Airtrax, Inc.
Notes to the Financial Statements
March 31, 2007
(unaudited)

1. BASIS OF PRESENTATION

The unaudited interim financial statements of Airtrax, Inc. ("the Company") as of March 31, 2007 and for the three month periods ended March 31, 2007 and 2006 have been prepared in accordance with accounting principles generally accepted in the United States of America. In the opinion of management, such information contains all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results of such periods. The results of operations for the three month period ended March 31, 2007 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2007.

Certain information and disclosures normally included in the notes to financial statements have been condensed or omitted as permitted by the rules and regulations of the Securities and Exchange Commission, although the Company believes the disclosure is adequate to make the information presented not misleading. The accompanying unaudited financial statements should be read in conjunction with the financial statements of the Company for the year ended December 31, 2006.

2. CONVERTIBLE NOTE FINANCINGS AND STOCK SALES

On February 20, 2007, the Company entered into a Securities Purchase Agreement (the "Purchase Agreement") with certain accredited and/or qualified institutional investors pursuant to which the Company sold an aggregate of \$3,734,040 principal amount secured convertible debentures (the "Debentures") convertible into shares of common stock, no par value ("Common Stock") at a conversion price equal to \$0.45 (the "Conversion Price"). The Debentures were sold at a discount equal to the amounts of interest that will accrue at a simple rate of 8% per annum during the term of the debentures. The amount realized was \$3,219,000; this was further reduced by expenses of the sale of \$396,900. In addition, the Company issued to the investors (i) warrants to purchase 8,297,866 shares of Common Stock (the "Warrants") at an exercise price equal to \$0.54 per share, which represents 100% of the number of shares issuable upon conversion of the Debentures; (ii) callable warrants to purchase 4,148,933 shares of Common Stock at an exercise price equal to \$0.75 per share, which represents 50% of the number of shares issuable upon conversion of the Debentures; and (iii) callable warrants to purchase 4,148,933 shares of Common Stock at an exercise price equal to \$1.25 per share, which represents 50% of the number of shares issuable upon conversion of the Debentures (collectively, the "Callable Warrants"). In addition to the expenses of the sale, noted above, 715,333 warrants to purchase common stock were issued to the placement agent that arranged the financing.

The Debentures mature on February 20, 2009. The Company may in its discretion redeem the Debentures, subject to certain equity conditions being met by the Company as set forth in the Debentures, at a price equal to 150% of the principal balance, accrued interest, and all liquidated damages, if any, thereon that are requested to be redeemed. The Company's obligations under the Purchase Agreement, the Debentures and the additional definitive agreements with respect to this transaction are secured by all of the assets of the Company.

The Conversion Price of the Debentures is subject to the following adjustments for any failure by the Company to cause the Securities and Exchange Commission (the "SEC") to declare the initial registration statement covering the shares underlying the Debentures, the Warrants and the Callable Warrants effective:

• if the initial registration statement is not declared effective on or before February 20, 2008, the Conversion Price applicable to an amount of conversion shares equal to the highest number of shares of Common Stock which can be

sold by the holder pursuant to Rule 144, promulgated under the Securities Act of 1933, as amended (the "144 Amount"), shall be adjusted to equal the lesser of (i) the then Conversion Price and (ii) 80% of the average of the 3 lowest closing prices of the Common Stock during the 10 trading days immediately preceding February 20, 2008;

- if the initial registration statement is not declared effective on or before April 20, 2008, the Conversion Price applicable to an amount of conversion shares equal to the 144 Amount shall be adjusted to equal the lesser of (i) the then Conversion Price and (ii) 80% of the average of the 3 lowest closing prices of the Common Stock during the 10 Trading Days immediately preceding April 20, 2008;

Airtrax, Inc.
Notes to the Financial Statements
March 31, 2007
(unaudited)

if the initial registration statement is not declared effective on or before July 20, 2008, the Conversion Price applicable to an amount of conversion shares equal to the 144 Amount shall be adjusted to equal the lesser of (i) the then Conversion Price and (ii) 80% of the average of the 3 lowest closing prices of the Common Stock during the 10 trading days immediately preceding July 20, 2008;

- if the initial registration statement is not declared effective on or before October 20, 2008, the Conversion Price applicable to an amount of conversion shares equal to the 144 Amount shall be adjusted to equal the lesser of (i) the then Conversion Price and (ii) 80% of the average of the 3 lowest closing prices of the Common Stock during the 10 trading days immediately preceding October 20, 2008; and
- if the initial registration statement is not declared effective on or before February 20, 2009, the Conversion Price applicable to an amount of conversion shares equal to the 144 Amount shall be adjusted to equal the lesser of (i) the then Conversion Price and (ii) 80% of the average of the 3 lowest closing prices of the Common Stock during the 10 trading days immediately preceding February 20, 2009.

The Conversion Price of the Debentures and the respective exercise prices of the Warrants and the Callable Warrants are subject to adjustment in certain events, including, without limitation, upon the consolidation, merger or sale of all of substantially all of the assets, a reclassification of our Common Stock, or any stock splits, combinations or dividends with respect to the Common Stock.

In addition, after such time as the SEC declares the registration statement effective, if (i) the volume weighted average price for each of the 10 consecutive trading days (the "Measurement Period") exceeds \$1.50 per share with respect to the \$0.75 Callable Warrants and \$2.50 with respect to the \$1.25 Callable Warrants, (ii) the daily volume for each trading day in such Measurement Period exceeds 250,000 shares of Common Stock per trading day, and (iii) the holder is not in possession of any information that constitutes, or might constitute, material non-public information, then the Company may, within one trading day of the end of such Measurement Period, call for cancellation of all or any portion of the Callable Warrants which have not yet been exercised at a price equal to \$.001 per share.

Under the Registration Rights Agreement the Company entered into with the investors on February 20, 2007, the Company is obligated to file a registration statement on Form SB-2 to effect the registration of 130% the Common Stock issuable upon conversion of the Debentures and exercise of the Warrants, the Callable Warrants and the selling agent warrants (as described below) on the earlier of (i) 15 calendar days from the filing of the annual report on Form 10-KSB for the fiscal year ended December 31, 2006, or (ii) April 15, 2007 (the "Filing Date"). The Company is obligated to use its best efforts to cause the registration statement to be declared effective no later than 90 days after the Filing Date. If we do not file the registration statement by the Filing Date, or if the registration statement is not declared effective by the SEC within the deadline specified in the preceding sentence, the Company shall pay to the investors, as liquidated damages, an amount equal to 1.25% of the principal amount of the Debentures on a pro rata basis for each 30-day period of such registration default. On May 4, 2007, we filed the registration statement, and as a result have an obligation for liquidated damages.

Further, the Company paid commissions of \$321,900 and issued 715,333 warrants to First Montauk Securities Corp. (the "Selling Agent"), a NASD member firm, which acted as Selling Agent for the transaction, each as consideration for services performed in connection with the purchase and sale of the Debentures, Warrants and Callable Warrants to the investors pursuant to the Purchase Agreement. The Selling Agent had no obligation to buy any Debentures, Warrants or Callable Warrants from us. In addition, the Company agreed to indemnify the Selling Agent and other

persons against specific liabilities under the Securities Act of 1933, as amended.

The Company claimed an exemption from the registration requirements of the Act for the private placement of these securities pursuant to Section 4(2) of the Act and/or Regulation D promulgated thereunder since, among other things, the transaction did not involve a public offering, the Investors were accredited investors and/or qualified institutional buyers, the Investors had access to information about the Company and their investment, the Investors took the securities for investment and not resale, and w the Company took appropriate measures to restrict the transfer of the securities.

Airtrax, Inc.
Notes to the Financial Statements
March 31, 2007
(unaudited)

On March 1, 2007, an investor in the October 2005 converted \$22,500 of the 8% Convertible Notes due October 18, 2007 in exchange, the Company issued 50,000 shares of common stock. The conversion price was \$0.45 per share.

3. WARRANTS

The Company has issued warrants both as part of “stock units” and as an integral part of convertible note issues. The value of the warrants and conversion options which are classified as liabilities are revalued each reporting period. These values are determined by a Black Scholes valuation model, consistent with the requirements of SFAS No.133. The following is a schedule of changes in warrants outstanding during the first quarter of 2007. Each of these warrants is exercisable over five year periods from dates of issuance at prices ranging from \$0.45-\$1.56 per share.

Balance December 31, 2006	10,383,323
Warrants issued with \$3,734,040 convertible debt, February 20,	16,595,732
Warrants issued to Placement Agent of February 2007 convertible debt issue	715,333
Total warrants issued during 2007	17,311,065
Total warrants exercised during the quarter ended March 31, 2007	-
Balance March 31, 2007	27,694,388

4. SUPPLEMENTAL CASH FLOWS INFORMATION:

There were no taxes paid during the quarters ended March 31, 2007 and March 31, 2006.

Interest of \$34,886 and \$ 0 was paid during the quarter's ended March 31, 2007 and March 31, 2006, respectively.

There were no non-cash investing activities during either the March 31, 2007 and March 31, 2006 periods.

The following non-cash financing activities occurred during these periods.

Shares of common stock were issued for services during both the March 31, 2007 and March 31, 2006 periods. These totaled 330,106 shares and 144,456 shares, respectively and were valued at \$178,257 and \$250,166.

During the March 31, 2007 period the following additional noncash financing activity occurred:

- \$22,500 of convertible debt was converted to 50,000 shares of common stock.
- A \$45,000 account payable was satisfied by the issuance of 94,444 shares of common stock.

During the March 31, 2006 period, the Company issued \$150,000 of 4% convertible notes in consideration of certain investors waiving their rights to liquidated damages which had accrued. A charge of \$108,417 was recorded, representing the excess of the value of the convertible notes and associated derivatives over the \$91,160 accrued damages that were settled.

6. SUBSEQUENT EVENTS

· On April 18, 2007, an investor in the October 2005 8% Convertible Promissory Notes, elected to convert \$45,000 of principal into 100,000 shares of common stock. The conversion price of the Convertible Promissory Note is \$0.45 per share.

· On April 16, 2007, an investor in the May 2005 8% Convertible Promissory Notes, elected to convert \$92,000 of principal and \$14.808 of accrued interest into 237,351 shares of common stock. The conversion price of the Convertible Promissory Note is \$0.45 per share. The issuance of the above shares are pending the filing of the Company's restated quarterly 10-QSB's for 2005 and 2006.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Special Note on Forward-Looking Statements. Certain statements in “Management’s Discussion and Analysis or Plan of Operation” below, and elsewhere in this annual report, are not related to historical results, and are forward-looking statements. Forward-looking statements present our expectations or forecasts of future events. You can identify these statements by the fact that they do not relate strictly to historical or current facts. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements frequently are accompanied by such words such as “may,” “will,” “should,” “could,” “expects,” “plans,” “intends,” “anticipates,” “believes,” “estimates,” “potential” or “continue,” or the negative of such terms or other words and terms of similar meaning. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance, achievements, or timeliness of such results. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of such forward-looking statements. We are under no duty to update any of the forward-looking statements after the date of this annual report. Subsequent written and oral forward looking statements attributable to us or to persons acting in our behalf are expressly qualified in their entirety by the cautionary statements and risk factors set forth below and elsewhere in this annual report, and in other reports filed by us with the SEC.

You should read the following description of our financial condition and results of operations in conjunction with the financial statements and accompanying notes included in this report beginning on page F-1.

Overview

Since 1995, substantially all of our resources and operations have been directed towards the development of the Omni-Directional wheel, related components, Omni-Directional Lift Trucks and other Omni-Directional Vehicles. Many of the components, including the unique shaped wheels, motors, and frames, have been designed by Airtrax and are specially manufactured for us.

Omni-Directional means that vehicles designed and built by us can travel in any direction. Our Omni-directional vehicles are controlled with a joystick. The vehicle will travel in the direction the joystick is pushed. If the operator pushes the joystick sideways, the vehicle will travel sideways. If the operator were to twist the joystick the vehicle will travel in circles. Our omni-directional vehicles have one motor and one motor controller for each wheel. The omni-directional movement is caused by coordinating the speed and direction of each motor with joystick inputs which are routed to a micro-processor, then from the micro-processor to the motor controllers and finally to the motor itself.

During the year ended December 31, 2006, we continued development of the COBRA and KING COBRA scissor lifts and the Omni-Directional power chair. We anticipate incurring more costs on these products and plan to begin production of the first COBRA and the KING COBRA models in 2007. The growth and development of our business will require a significant amount of additional working capital. We currently have limited financial resources and based on our current operating plan, we will need to raise additional capital in order to continue operations. However, we are in discussions with lenders to raise capital in order to continue operating. We currently do not have adequate cash to meet our short or long term objectives. In the event additional capital is raised, it may have a dilutive effect on our existing stockholders. There can be no assurance that additional financing will be available at terms that are suitable to us.

We have incurred losses and experienced negative operating cash flow since our inception. For the twelve month period ended December 31, 2006 and 2005, we had net losses attributable to common shareholders of approximately \$4.4 million and \$15.2 million, respectively. The net loss in both periods includes conversion expenses of \$1 million and \$6.6 million in 2006 and 2005, respectively, offset by revaluation income \$3.5 million and \$1 million in 2006 and 2005, respectively, in connection with the repricing of the conversion ratios of convertible debenture issues and of warrant conversion prices. We also wrote down the advances to Filco of \$4.7 million and \$2 million in 2006 and 2005, respectively. We expect to continue to incur significant expenses. Our operating expenses have been and are expected to continue to outpace revenue and result in additional losses in the near term. We may never be able to reduce these losses, which will require us to seek additional debt or equity financing. While we are in discussions with several prospective lenders, we do not currently have commitments for these funds and there can be no assurance that additional financing will be available, or if available, will be on acceptable terms.

Results of Operations for the Three Months ended March 31, 2007 Compared to the Three Months March 31, 2006

Liquidity constraints and limited access to additional capital for production in 2004 and 2005 and the unexpected death of our then Chief Executive Officer and President, Peter Amico in August 2006 have limited production and sales of omni-directional technology. Consequently, management believes that the year-to-year comparisons described below are not indicative of future year-to-year comparative results.

In September 2006, Airtrax was awarded a \$415,000 contract to design and build a customized MP2 Equipment Handling Unit for the Israeli Air Force. The contract includes an option to build five additional units at \$95,000 each upon the acceptance of the first unit. It is estimated that the follow on orders that could result from this contract would be from 29 to 100 units over the next one to three years. The Critical Design Review was completed in November 2006, the design was approved and initial deliverables were provided. As a result, we received a first process payment of \$170,000 on December 12 2006. We completed the Acceptance Test Procedure in mid April 2007 and we expect to receive a second payment of \$162,000. We cannot predict whether we will be able to successfully pass all of the acceptance tests and complete the contract, or that if we do so, that any subsequent orders will result.

We believe that the joint cooperation between us and the United States Navy with the MP2 contract, including building the ETU-110 omni-directional engine handler and our contract to design and build a customized MP2 Equipment Handling Unit for the Israeli Air Force, has bolstered the potential use of our technology within the military. We do not intend to incur additional costs with the US Navy unless we incur potential expenses in demonstrating the ETU-110 omni-directional engine handler, or other omni-directional vehicles in connection with the Israeli contract.

Revenue

Revenue for the three-month period ended March 31, 2007 was approximately \$92,000, representing a decrease of approximately \$567,000 from revenue of \$659,000 for the three-month period ended March 31, 2006. This decrease in revenue, is primarily, attributed to the reduction in sales of our SIDEWINDER ATX-3000.

Cost of Goods Sold

Our cost of goods sold for the three-month period ended March 31, 2007 amounted to approximately \$134,000, a decrease of approximately \$459,000 from \$593,000 for the three-month period ended March 31, 2006. This decrease in cost of goods sold is primarily attributed to the reduction in sales of our SIDEWINDER ATX-3000.

Operating and Administrative Expenses.

Operating and administrative expenses which include administrative salaries, depreciation and other expenses for the three-month period ended March 31, 2007 totaled \$797,000 which represents a decrease of approximately \$159,000 from \$956,000 incurred in the three-month period ended March 31, 2006. The decrease is primarily due the reduction in production of our SIDEWINDER ATX-3000 off set by development costs for the Cobra and King Cobra scissor lift and Omni-Directional Power Chair.

Loss Attributable to Common Shareholders.

Loss attributable to common shareholders for the three-month period ended March 31, 2007 was \$(5.2) million compared with income of \$519,000 for the same period in 2006. The decrease in income is due primarily to the recording of conversion expense in this period of \$4.9 million compared with \$600,000 in 2006. Additionally, we recorded revaluation income of \$567,000 in 2007 compared with \$2.0 million in 2006, in connection with the repricing of certain conversion ratios of convertible debenture issues and of warrant conversion prices.

Research and Development

We incurred \$23,579 and \$61,593 in research and development expenses during the three month period ended March 31, 2007 and 2006, respectively. Research and development activities during fiscal 2007 primarily involved continued testing and evaluation of omni-directional components and preparing these components for production in 2007. Our wheel design was changed from the "concept" to "production" phase. This was and is an ongoing process between our Company and a vendor's engineers to insure manufacturability. The motors and controllers were designed and/or changed in design in order to meet ANSI (American National Standards Institute) and UL (Underwriters Laboratories) testing requirements. Danaher and us revised the algorithms used in the motor controllers as well the microprocessor that runs the machines. Research and development activities also included further changes to existing designs and new designs that were patented or for those patents with pending applications.

Liquidity and Capital Resources

Since our inception, we have financed our operations through the private placement of our common stock and sales of convertible debt. During the twelve months ended December 31, 2006 and 2005, we raised net of offering costs approximately \$1.3 million and \$5.9 million, respectively, from the private placement of our securities.

During 2000, we were approved by the State of New Jersey for our technology tax transfer program pursuant to which we could sell our net operating losses and research and development credits as calculated under state law. In the years 2006 and 2005, we recorded credits of \$437,803 and \$867,413, respectively, from the sale of our losses and credits.

We have consistently demonstrated our ability to meet our cash requirements through private placements of our common stock and convertible notes. We have continued to similarly satisfy those requirements during the twelve months ended December 31, 2006. However, there can be no assurances that we will be successful in raising the required capital to continue our current operating plan.

We anticipate that our cash requirements for the foreseeable future will be significant. In particular, management expects substantial expenditures for inventory, product production, and advertising with production of its Omni-Directional lift truck and the start of Cobra and King Cobra (Scissors-Lift) production.

We will require additional funds to continue our operations beyond the initial production run. We anticipate that operating capital in the amount of approximately \$3 to 5 million will be required during the next 12 months to sufficiently fund operations. We expect to recognize lower per unit manufacturing and part costs in the future due to volume discounts, as well as lower per unit shipping costs as we transition from the initial rate to larger-scale production. While we are in discussions with several prospective lenders, we do not currently have commitments for additional funds and there can be no assurance that additional financing will be available, or if available, will be on acceptable terms. If we are unable to obtain sufficient funds during the next six months we will further reduce the size of our organization and may be forced to reduce and/or curtail our production and operations, all of which could have a material adverse impact on our business prospects.

On February 20, 2007, we entered into a Securities Purchase Agreement with certain accredited and/or qualified institutional investors pursuant to which we sold an aggregate of \$3,734,040 principal amount secured convertible debentures convertible into shares of our common stock at a conversion price equal to \$0.45 for an aggregate purchase price of \$3,219,000. In addition, we issued to the investors (i) warrants to purchase 8,297,866 shares of our common stock at an exercise price equal to \$0.54 per share, which represents 100% of the number of shares issuable upon conversion of the debentures; (ii) callable warrants to purchase 4,148,933 shares of our common stock at an exercise price equal to \$0.75 per share, which represents 50% of the number of shares issuable upon conversion of the debentures; and (iii) callable warrants to purchase 4,148,933 shares of our common stock at an exercise price equal to \$1.25 per share, which represents 50% of the number of shares issuable upon conversion of the debentures.

The Debentures mature on February 20, 2009. We may in our discretion redeem the debentures, subject to certain equity conditions being met by us as set forth in the debentures, at a price equal to 150% of the principal balance, accrued interest, and all liquidated damages, if any, thereon that are requested to be redeemed. Our obligations under the securities purchase agreement, the debentures and the additional definitive agreements with respect to this transaction are secured by all of our assets.

As a result of our liquidity issues, we have experienced delays in the repayment of certain promissory notes upon maturity and payments to vendors and others. If in the future, the holders of our promissory notes may demand repayment of principal and accrued interest instead of electing to extend the due date and if we are unable to repay our debt when due because of our liquidity issues, we may be forced to refinance these notes on terms less favorable to us than the existing notes, seek protection under the federal bankruptcy laws or be forced into an involuntary bankruptcy filing.

As of March 31, 2007, our working capital deficit was \$5.4 million. Fixed assets, net of accumulated depreciation, as of March 31, 2007 and December 31, 2006, were \$265,471 and \$283,920, respectively. Current liabilities as of March 31, 2007 were \$9,653,737 compared with \$5,489,101 as of December 31, 2006. Current liabilities in 2007 and 2006 include liabilities for options and conversion rights of \$6.4 million and \$.3 million, respectively.

Off-Balance Sheet Arrangements.

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenue, results of operations, liquidity or capital expenditures.

Liquidated Damages

In connection with financings we entered into with various investors in November 2004, October 2005, and February 2007 we provided such investors registration rights. Pursuant to those registration rights, in the event that we did not file a registration statement by a certain date registering for resale shares of common stock issuable upon conversion of their securities or have such registration statement effective by another date, we agreed to pay to such investors liquidated damages. On May 4, 2007, we filed such registration statement, and as a result have an obligation for liquidated damages.

Critical Accounting Policies and Estimates

Revenue

Revenue on product sales is recognized when persuasive evidence of an arrangement exists, such as when a purchase order or contract is received from the customer, the price is fixed, title to the goods has changed and there is a reasonable assurance of collection of the sales proceeds. We obtain written purchase authorizations from our customers for a specified amount of product at a specified price and consider delivery to have occurred at the time of shipment. Revenue is recognized at shipment .

Revenue from research and development activities relating to firm fixed-price contracts is generally recognized as billing occurs. Revenue from research and development activities relating to cost-plus-fee contracts include costs incurred plus a portion of estimated fees or profits based on the relationship of costs incurred to total estimated costs. Contract costs include all direct material and labor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party. Amounts can be billed on a bi-monthly basis. Billing is based on subjective cost investment factors.

Intangibles

We continually evaluate whether events and changes in circumstances warrant revised estimates of useful lives or recognition of an impairment loss of our intangibles, which as of March 31, 2007, consist mainly of patents and licensing agreements. The conditions that would trigger an impairment assessment of our intangible assets include a significant, sustained negative trend in our operating results or cash flows, a decrease in demand for our products, a change in the competitive environment and other industry and economic factors.

Accounting for Income Taxes

As part of the process of preparing our financial statements, we are required to estimate our income taxes. This process involves estimating our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income. If there is not persuasive evidence that recovery will occur, we would establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a period, we must include an expense within the tax provision in the consolidated statement of operations.

Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. We have recorded a valuation allowance of \$8.3 million as of March 31, 2007, due to uncertainties related to our ability to utilize some of our deferred tax assets, primarily consisting of certain net operating losses carried forward before they expire and certain accrued expenses, which are deferred for income tax purposes until paid. The valuation allowance is based on our estimates of taxable income and the period over which our deferred tax assets will be recoverable. The net deferred tax asset as of December 31, 2006 was \$1,001,256, net of the valuation allowance.

Issuances of Common Stock

Because of the significant liquidity issues we have faced since our inception, we have been required to issue common stock to third party vendors and others in order to pay for services rendered. Such issuances are recorded as an expense in the period in which the services are performed. During the three month period ended March 31, 2007, we issued an aggregate of 330,106 shares of common stock to third parties in exchange for services performed. These services were valued at \$178,257 for three months ended March 31, 2007.

Recent Accounting Pronouncement

The Financial Accounting Standards Board (FASB) has recently issued "FASB Staff Position EITF 00-19-2 which modifies the accounting treatment of derivatives that flow from financings involving embedded derivatives. This Staff Position is effective for financial statements for periods beginning January 1, 2007. Adoption of this staff position has not caused any change in the quarter ended March 31, 2007 in the way we account for derivatives.

We have reviewed other accounting pronouncements issued during 2006 and 2007 and have concluded that they will have no effect on our financial statements.

ITEM 3. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 as of March 31, 2007. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on our evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were not designed at a reasonable assurance level and were not effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

On March 21, 2007, we determined, after consultation with our independent registered public accounting firm, that a restatement of our financial statements for the year ended December 31, 2005 filed on Form 10-KSB, together with its subsequent quarterly reports on Form 10-QSB for the periods ending March 31, June 30, and September 30, 2006, respectively (collectively, the "Reports"), was necessary due to the issuance of our preferred stock as payment of dividends in lieu of cash dividends on April 1, 2005 with respect to previously issued shares of preferred stock. Our original Articles of Incorporation, as amended, including on April 30, 2000, prohibit the issuance of additional shares of preferred stock as payment of dividends on shares of issued and outstanding preferred stock. Accordingly, the 100,000 shares of preferred stock which were issued to the holder on April 1, 2005 were issued in error.

Our Articles of Incorporation, as amended, including on April 30, 2000, similarly do not support the calculation we used in determining the number of shares of common stock used to pay preferred stock dividends. The difference being the date used in determining the stock price at the end of each preferred dividend period, as opposed to the lowest common stock price during the preferred dividend period, subject to a 70% discount, for calculating the number of common shares issued as payment of the period's preferred stock dividend. Accordingly, the number of shares were greater than the number of shares required, and were issued in error resulting in increased preferred dividend expenses and preferred stock equity. The financial statements at December 31, 2004 reflect 275,000 shares of preferred stock outstanding and disclosed that an additional 100,000 shares of preferred stock were deemed the equivalent of 221,892 shares of common stock that would have been required to settle an equivalent amount of preferred dividends. On April 1, 2005, the preferred shares were issued. We have determined that the number of shares deemed the equivalent of the preferred stock dividend will be recalculated based on our Articles of Incorporation, as amended, including on April 30, 2000.

In addition, on March 15, 2007, we determined that a restatement of our Quarterly Reports on Form 10-QSB for the three and six months ended June 30, 2005 and the three months ended March 31, 2005 was necessary in light of our review of our accounting for derivatives and based on recent interpretations of the accounting for certain financial instruments under SFAS 133 "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133") and the Emerging Issues Task Force No.

00-19 "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock" ("EITF No. 00-19").

We concluded that our 6% Series A Convertible Promissory Notes ("Notes") and the Class A and Class B Warrants (collectively, the "Warrants") issued to certain accredited and/or qualified institutional purchasers pursuant to that certain Subscription Agreement (the "Subscription Agreement") dated as of February 11, 2005 contained embedded derivatives due to the registration rights and liquidated damages provisions contained in the Subscription Agreement. The embedded derivative provisions provided that we will pay liquidated damages in connection with the delay in filing of a registration statement on Form SB-2 in the event that we did not file such registration statement which registers the shares of our common stock underlying the Notes and the Warrants, or cause the Securities and Exchange Commission to declare such registration statement effective, each within specified time frames as set forth in the Subscription Agreement.

In particular, we will restate our financial statements contained in the Quarterly Reports to reflect the reduction in preferred stock outstanding, preferred stock dividend expense and deemed dividend expenses recorded in 2005 and 2006. In addition, we will restate our financial statements contained in the Reports to reflect a liability in connection with issuance of the Notes and the Warrants that contained an embedded derivative and conversion privileges, as of March 31, 2005, June 30, 2005 and September 30, 2005 as follows:

1. The accounting for the embedded derivatives within the Notes and the Warrants was determined under the guidance of SFAS 133 and EITF No. 00-19. The embedded derivatives are classified as a current liability in accordance with SFAS 133, and are recorded at fair value.
2. In reporting periods subsequent to the issuance of June 30, 2005, the embedded derivative has been revalued with the change to fair value recorded as income/(expense).

Furthermore, on April 25, 2007, we determined that a restatement of our financial statements for the year ended December 31, 2006 filed on Form 10-KSB, together with the quarterly report on Form 10-QSB for the period ending September 30, 2006 (collectively, the "Reports"), is necessary due to the issuance of convertible debentures and warrants (collectively, the "Securities") in July 2006 for the settlement of liquidated damages from our October 2005 private placement. The Securities were not previously recorded on our books and records. Additionally, we determined that a correction of the accounting for the settlement of liquidated damages in July 2006, in connection with our November 2004 private placement, was also required.

(b) Changes in internal control over financial reporting.

We regularly review our system of internal control over financial reporting and make changes to our processes and systems to improve controls and increase efficiency, while ensuring that we maintain an effective internal control environment. Changes may include such activities as implementing new, more efficient systems, consolidating activities, and migrating processes.

As described below, we made changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-QSB that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. As a result of the needed restatements described above, we have hired additional qualified staff with SEC experience in the financial reporting and analysis area. We believe that this will avoid the reoccurrence of our material weaknesses and will strengthen our internal controls related to the financial closing, review, and analysis process so that our controls and procedures are effective in future periods.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we may become involved in various lawsuits and legal proceedings which arise in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. We are currently not aware of any such legal proceedings or claims that we believe will have, individually or in the aggregate, a material adverse affect on our business, financial condition or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

* All of the above offerings and sales were deemed to be exempt under rule 506 of Regulation D and Section 4(2) of the Securities Act of 1933, as amended. No advertising or general solicitation was employed in offering the securities. The offerings and sales were made to a limited number of persons, all of whom were accredited investors, business associates of Airtrax or executive officers of Airtrax, and transfer was restricted by Airtrax in accordance with the requirements of the Securities Act of 1933. In addition to representations by the above-referenced persons, we have made independent determinations that all of the above-referenced persons were accredited or sophisticated investors, and that they were capable of analyzing the merits and risks of their investment, and that they understood the speculative nature of their investment. Furthermore, all of the above-referenced persons were provided with access to our Securities and Exchange Commission filings.

Item 3. Defaults Upon Senior Securities.

None

Item 4. Submission of Matters to a Vote of Security Holders.

None.

Item 5. Other Information.

None.

Item 6. Exhibits

31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14 and Rule 15d-14(a), promulgated under the Securities and Exchange Act of 1934, as amended

31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14 and Rule 15d 14(a), promulgated under the Securities and Exchange Act of 1934, as amended

32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (Chief Executive Officer)

32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (Chief Financial Officer)

SIGNATURES

In accordance with requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

AIRTRAX, INC.
