#### PART III NARRATIVE

o

State below in reasonable detail the reasons why Forms 10-K, 20-F, 11-K, 10-Q, N-SAR, N-CSR the transition report or portion thereof, could not be filed within the prescribed time period.

The Company needs additional time to finalize the consolidated financial statements to be included in its Form 10-K for the year ended December 31, 2002. As previously disclosed, during the fourth quarter of 2002, the Company changed its method of determining the cost of inventories from the last-in, first-out ("LIFO") method to the first-in, first-out ("FIFO") method. Prior to 2002, the majority of the Company's operations used the LIFO method of valuing inventory. The Company has concluded that the FIFO method will result in a better measurement of current inventory costs with revenues because the Company has realized, and expects to continue to realize, cost reductions in its manufacturing operations. The Company will apply this change by retroactively restating its financial statements as required by Accounting Principles Board Opinion No. 20, "Accounting Changes." The Company is in the process of completing the necessary changes to its consolidated financial statements to give effect to the restatement. The Company expects that the restatement will result in an increase to the accumulated deficit as of January 1, 2000 of approximately \$15.5 million. The Company expects that the restatement will impact each of Cost of Sales, Income from Operations and Net (Loss) Income by \$12.3 million positively in 2001 and by \$6.9 million negatively in 2000.
