**CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS**

Certain statements in this Quarterly Report on Form 10-Q are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may also be made in other documents filed or furnished with the SEC or may be made orally to analysts, investors, representatives of the media and others.

Generally, forward-looking statements are not based on historical facts but instead represent only our current beliefs regarding future events. All forward-looking statements are, by their nature, subject to risks, uncertainties and other factors. Investors are cautioned not to place undue reliance on these forward-looking statements. Such statements may be identified by words such as expects, anticipates, intends, projects, estimates, plans, may increase, may fluctuate and similar expressions or future or conditional verbs such as will, should, would, may. Forward-looking statements contained in this Form 10-Q include, but are not limited to, statements concerning the following:

- the impact of the adoption of recently issued accounting pronouncements on our financial statements;
- future origination volumes and loan margins in the mortgage industry;
- our belief that sources of liquidity will be adequate to fund operations and repayment of upcoming debt maturities;
- our expectations regarding our ability to achieve our liquidity plans;
- our expectation of reinsurance losses and associated reserves; and
- mortgage repurchase and indemnification requests and associated reserves and provisions.

Actual results, performance or achievements may differ materially from those expressed or implied in forward-looking statements due to a variety of factors, including but not limited to the factors listed and discussed in Part I Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011, Item 1A. Risk Factors in this Form 10-Q and those factors described below:

## Edgar Filing: PHH CORP - Form 10-Q

- the effects of market volatility or macroeconomic changes on the availability and cost of our financing arrangements and the value of our assets;
- the effects of any further declines in the volume of U.S. home sales and home prices, due to adverse economic changes or otherwise, on our Mortgage Production and Mortgage Servicing segments;
- the effects of changes in current interest rates on our business and our financing costs;
- our decisions regarding the use of derivatives related to mortgage servicing rights, if any, and the resulting potential volatility of the results of operations of our Mortgage Servicing segment;
- the impact of the failure to maintain our credit ratings, including the impact on our cost of capital and ability to incur new indebtedness or refinance our existing indebtedness, as well as our current or potential customers' assessment of our counterparty credit risk;
- the effects of continued elevated volumes or increases in our actual and projected repurchases of, indemnification given in respect of, or related losses associated with, sold mortgage loans for which we have provided representations and warranties or other contractual recourse to purchasers and insurers of such loans, including increases in our loss severity and reserves associated with such loans;
- the effects of reinsurance claims in excess of projected levels and in excess of reinsurance premiums we are entitled to receive or amounts currently held in trust to pay such claims;
- the effects of any significant adverse changes in the underwriting criteria or existence or programs of government-sponsored entities, including Fannie Mae and Freddie Mac, including any changes caused by the Dodd-Frank Wall Street Reform and Consumer Protection Act or other actions of the federal government;

## Edgar Filing: PHH CORP - Form 10-Q

### Table of Contents

- the effects of any inquiries and investigations by attorneys general of certain states and the U.S. Department of Justice, the Bureau of Consumer Financial Protection or other state or federal regulatory agencies related to foreclosure procedures or other mortgage origination or servicing activities, any litigation related to our mortgage origination or servicing activities, or any related fines, penalties and increased costs;
- the ability to maintain our status as a government sponsored entity-approved seller and servicer, including the ability to continue to comply with the respective selling and servicing guides, including any changes caused by the Dodd-Frank Act;
- changes in laws and regulations, including changes in mortgage- and real estate-related laws and regulations (including changes caused by the Dodd-Frank Act) status of government sponsored-entities and state, federal and foreign tax laws and accounting standards;
- the effects of the insolvency of any of the counterparties to our significant customer contracts or financing arrangements or the inability or unwillingness of such counterparties to perform their respective obligations under, or to renew on terms favorable to us, such contracts, or our ability to continue to comply with the terms of our significant customer contracts, including service level agreements;
- the effects of competition in our existing and potential future lines of business, including the impact of consolidation within the industries in which we operate and competitors with greater financial resources and broader product lines;
- the ability to obtain financing (including refinancing and extending existing indebtedness) on acceptable terms, if at all, to finance our operations or growth strategy, to operate within the limitations imposed by our financing arrangements and to maintain the amount of cash required to service our indebtedness;
- the ability to maintain our relationships with our existing clients and to establish relationships with new clients;
- the effects of any failure in or breach of our technology infrastructure, or those of our outsource providers, or any failure to implement changes to our information systems in a manner sufficient to comply with applicable law and our contractual obligations;
- the ability to attract and retain key employees;
- a deterioration in the performance of assets held as collateral for secured borrowings;

## Edgar Filing: PHH CORP - Form 10-Q

- any failure to comply with covenants under our financing arrangements; and
  
- the impact of changes in the U.S. financial condition and fiscal and monetary policies, or any actions taken or to be taken by the U.S. Department of the Treasury and the Board of Governors of the Federal Reserve System on the credit markets and the U.S. economy.

Forward-looking statements speak only as of the date on which they are made. Factors and assumptions discussed above, and other factors not identified above, may have an impact on the continued accuracy of any forward-looking statements that we make. Except for our ongoing obligations to disclose material information under the federal securities laws, we undertake no obligation to release publicly any revisions to any forward-looking statements. For any forward-looking statements contained in any document, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**1. Summary of Significant Accounting Policies**

**BASIS OF PRESENTATION**

PHH Corporation and subsidiaries (collectively, PHH or the Company) is a leading outsource provider of mortgage and fleet management services operating in the following business segments:

- **Mortgage Production** provides mortgage loan origination services and sells mortgage loans.
- **Mortgage Servicing** performs servicing activities for originated and purchased loans.
- **Fleet Management Services** provides commercial fleet management services.

The Condensed Consolidated Financial Statements include the accounts and transactions of PHH and its subsidiaries, as well as entities in which the Company directly or indirectly has a controlling interest and variable interest entities of which the Company is the primary beneficiary. PHH Home Loans, LLC and its subsidiaries are consolidated within the Condensed Consolidated Financial Statements, and Realogy Corporation's ownership interest is presented as a noncontrolling interest. Intercompany balances and transactions have been eliminated from the Condensed Consolidated Financial Statements.

The Condensed Consolidated Financial Statements have been prepared in conformity with accounting principles generally accepted in the United States, which is commonly referred to as GAAP, for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and disclosures required by GAAP for complete financial statements. In management's opinion, the unaudited Condensed Consolidated Financial Statements contain all adjustments, which include normal and recurring adjustments necessary for a fair presentation of the financial position and results of operations for the interim periods presented. The results of operations reported for interim periods are not necessarily indicative of the results of operations for the entire year or any subsequent interim period. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

On March 31, 2011, the Company sold 50.1% of the equity interests in its appraisal services business, Speedy Title and Appraisal Review Services, ( STARS ) to CoreLogic, Inc. for a total purchase price of \$35 million. For the six months ended June 30, 2011, a \$68 million gain on the sale of the 50.1% equity interest was recorded within Other income. Subsequent to March 31, 2011, the Company participates in the appraisal services business through its 49.9% ownership interest in STARS, and is entitled to its proportionate share of STARS earnings.

## Edgar Filing: PHH CORP - Form 10-Q

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions include, but are not limited to, those related to the valuation of mortgage servicing rights, mortgage loans held for sale, other financial instruments and goodwill, the estimation of liabilities for mortgage loan repurchases and indemnifications and reinsurance losses, and the determination of income tax assets and liabilities and associated valuation allowances. Actual results could differ from those estimates.

Unless otherwise noted and except for share and per share data, dollar amounts presented within these Notes to Condensed Consolidated Financial Statements are in millions.

Table of Contents

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**CHANGES IN ACCOUNTING POLICIES**

**Comprehensive Income.** In June 2011, the FASB issued ASU 2011-05, *Presentation of Comprehensive Income*. Subsequently in December 2011, the FASB issued ASU 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. The updates to comprehensive income guidance require all nonowner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. The Company adopted the new accounting guidance effective January 1, 2012, and applied it retrospectively. The adoption added the Condensed Consolidated Statements of Comprehensive Income but did not impact the Company's results of operations, financial position, or cash flows.

**Fair Value Measurement.** In May 2011, the FASB issued ASU 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards*. This update to fair value measurement guidance addresses changes to concepts regarding performing fair value measurements including: (i) the application of the highest and best use and valuation premise; (ii) the valuation of an instrument classified in the reporting entity's shareholders' equity; (iii) the valuation of financial instruments that are managed within a portfolio; and (iv) the application of premiums and discounts. This update also enhances disclosure requirements about fair value measurements, including providing information regarding Level 3 measurements such as quantitative information about unobservable inputs, further discussion of the valuation processes used and assumption sensitivity analysis. The Company adopted the new accounting guidance effective January 1, 2012. The updated disclosures are included in Note 12, *Fair Value Measurements*.

**Transfers and Servicing.** In April 2011, the FASB issued ASU 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*. This update to transfers and servicing guidance removes from the assessment of effective control the criterion relating to the transferor's ability to repurchase or redeem financial assets on substantially the agreed terms, even in the event of default by the transferee. This update also eliminates the requirement to demonstrate that the transferor possesses adequate collateral to fund substantially all the cost of purchasing replacement financial assets. The Company adopted the new accounting guidance effective beginning January 1, 2012 and the guidance will be applied prospectively to new transactions or modifications of existing transactions. The adoption of this update did not have an impact on the Company's financial statements.

**RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

**Intangibles.** In July 2012, the FASB issued ASU 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment*. This update amends the current guidance on testing indefinite-lived intangibles for impairment and allows for the option to first assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangibles are impaired. If it is more likely than not that the indefinite-lived intangibles are impaired, the entity is required to determine the fair value of the indefinite-lived intangibles and perform the quantitative impairment test by comparing the fair value with the carrying amount. The amendments are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012 with early adoption permitted. The Company does not anticipate the adoption of this update will have a material impact on its financial statements.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****2. Earnings Per Share**

Basic (loss) earnings per share attributable to PHH Corporation was computed by dividing Net (loss) income attributable to PHH Corporation for the period by the weighted-average number of shares outstanding during the period. Diluted (loss) earnings per share attributable to PHH Corporation was computed by dividing Net (loss) income attributable to PHH Corporation for the period by the weighted-average number of shares outstanding during the period, assuming all potentially dilutive common shares were issued.

The weighted-average computation of the dilutive effect of potentially issuable shares of Common stock under the treasury stock method excludes the effect of any contingently issuable securities where the contingency has not been met and the effect of securities that would be anti-dilutive, which may include:

- outstanding stock-based compensation awards representing shares from restricted stock units and stock options;
- stock assumed to be issued related to convertible notes;
- purchased options and sold warrants related to the assumed conversion of the 2012 Convertible notes; and
- sold warrants related to the Company's 2014 Convertible notes.

The computation also excludes the assumed issuance of the 2014 Convertible notes and related purchased options as they are currently to be settled only in cash. Shares associated with anti-dilutive securities are outlined in the table below.

The following table summarizes the calculations of basic and diluted (loss) earnings per share attributable to PHH Corporation for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,

---

(1) Represents incremental shares from restricted stock units and stock options.

(2) Represents assumed conversion of the 2017 Convertible notes and the 2012 Convertible notes for the six months ended June 30, 2012 and 2011, respectively.

Table of Contents

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

**3. Restricted Cash, Cash Equivalents and Investments**

The following table summarizes Restricted cash, cash equivalents and investment balances:

	June 30, 2012	(In millions)	December 31, 2011
Restricted cash and cash equivalents	\$	371	\$ 348
Restricted investments, at fair value		126	226
Total	\$	497	\$ 574

The restricted cash related to our reinsurance activities is invested in certain debt securities as permitted under the reinsurance agreements. The restricted investments are classified as available-for-sale securities and remain in trust for capital fund requirements and potential reinsurance losses. During the three months ended June 30, 2012, the Company terminated one of its reinsurance agreements. As a result, the restricted cash and investments held in trust to pay future losses were released and the remaining liability was settled with the primary mortgage insurer. See Note 9, *Credit Risk* for information regarding the termination.

The following tables summarize Restricted investments, at fair value:

	June 30, 2012					Weighted- average remaining maturity
	Amortized Cost	Fair Value	Unrealized Gains (In millions)	Unrealized Losses		
Corporate securities	\$ 28	\$ 29	\$ 1	\$		29 mos.
Agency securities (1)	29	29				33 mos.
Government securities	68	68				18 mos.
Total	\$ 125	\$ 126	\$ 1	\$		24 mos.

	December 31, 2011					Weighted- average remaining maturity
	Amortized Cost	Fair Value	Unrealized Gains (In millions)	Unrealized Losses		
Corporate securities	\$ 53	\$ 54	\$ 1	\$		28 mos.
Agency securities (1)	118	119	1			19 mos.
Government securities	52	53	1			34 mos.
Total	\$ 223	\$ 226	\$ 3	\$		25 mos.

---

(1) Represents bonds and notes issued by various agencies including, but not limited to, Fannie Mae, Freddie Mac and Federal Home Loan Banks.

During the three months ended June 30, 2012 and the three and six months ended June 30, 2011, the amount of realized gains and losses from the sale of available-for-sale securities was not significant. During the six months ended June 30, 2012, realized gains of \$1 million from the sale of available-for-sale securities were recorded and realized losses were not significant.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****4. Transfers and Servicing of Mortgage Loans**

Residential mortgage loans are sold through one of the following methods: (i) sales to or pursuant to programs sponsored by Fannie Mae, Freddie Mac and Ginnie Mae, or (ii) sales to private investors. The Company may have continuing involvement in mortgage loans sold by retaining one or more of the following: servicing rights and servicing obligations, recourse obligations and/or beneficial interests (such as interest-only strips, principal-only strips, or subordinated interests). See Note 9, "Credit Risk" for a further description of recourse obligations.

The total servicing portfolio consists of loans associated with capitalized mortgage servicing rights, loans held for sale, and the servicing portfolio associated with loans subserviced for others. The total servicing portfolio, including loans subserviced for others was \$192.8 billion and \$182.4 billion as of June 30, 2012 and December 31, 2011, respectively. Mortgage servicing rights (MSRs) recorded in the Condensed Consolidated Balance Sheets are related to the capitalized servicing portfolio, and are created either through the direct purchase of servicing from a third party or through the sale of an originated loan.

The activity in the loan servicing portfolio associated with capitalized servicing rights consisted of:

	<b>Six Months Ended June 30,</b>		
	<b>2012</b>		<b>2011</b>
	<b>(In millions)</b>		
Balance, beginning of period	\$	147,088	\$ 134,753
Additions		17,445	18,649
Payoffs, sales and curtailments		(16,639)	(10,966)
Balance, end of period	\$	147,894	\$ 142,436

The activity in capitalized MSRs consisted of:

	<b>Six Months Ended June 30,</b>		
	<b>2012</b>		<b>2011</b>
	<b>(In millions)</b>		
Balance, beginning of period	\$	1,209	\$ 1,442
Additions		174	257
Changes in fair value due to:			
Realization of expected cash flows		(124)	(89)
Changes in market inputs or assumptions used in the valuation model		(102)	(102)
Balance, end of period	\$	1,157	\$ 1,508

## Edgar Filing: PHH CORP - Form 10-Q

The value of MSRs is driven by the net positive cash flows associated with servicing activities. These cash flows include contractually specified servicing fees, late fees and other ancillary servicing revenue and were recorded within Loan servicing income as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
Servicing fees from capitalized portfolio	\$ 111	\$ 110	\$ 223	\$ 216
Late fees	5	4	10	10
Other ancillary servicing revenue	8	8	20	19

As of June 30, 2012 and December 31, 2011, the MSRs had a weighted-average life of approximately 4.6 years and 4.2 years, respectively. See Note 12, Fair Value Measurements for additional information regarding the valuation of MSRs.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

The following table sets forth information regarding cash flows relating to loan sales in which the Company has continuing involvement:

	<b>Six Months Ended June 30,</b>	
	<b>2012</b>	<b>2011</b>
	<b>(In millions)</b>	
Proceeds from new loan sales or securitizations	\$ 18,149	\$ 18,818
Servicing fees from capitalized portfolio(1)	223	216
Other cash flows on retained interests (2)	5	
Purchases of delinquent or foreclosed loans (3)	(42)	(20)
Servicing advances (4)	(651)	(884)
Repayment of servicing advances	642	846

(1) Excludes late fees and other ancillary servicing revenue.

(2) Represents cash flows received on retained interests other than servicing fees.

(3) Excludes indemnification payments to investors and insurers of the related mortgage loans.

(4) As of June 30, 2012 and December 31, 2011, outstanding servicing advance receivables of \$256 million and \$247 million, respectively, were included in Accounts receivable, net.

During the three and six months ended June 30, 2012, pre-tax gains of \$198 million and \$426 million, respectively, related to the sale or securitization of residential mortgage loans were recognized in Gain on mortgage loans, net in the Condensed Consolidated Statements of Operations.

During the three and six months ended June 30, 2011, pre-tax gains of \$140 million and \$318 million, respectively, related to the sale or securitization of residential mortgage loans were recognized in Gain on mortgage loans, net in the Condensed Consolidated Statements of Operations.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****5. Derivatives**

Derivative instruments and the risks they manage are as follows:

- **Forward delivery commitments** Related to interest rate and price risk for Mortgage loans held for sale and interest rate lock commitments
- **Option contracts** Related to interest rate and price risk for interest rate lock commitments
- **MSR-related agreements** Related to interest rate risk for mortgage servicing rights
- **Interest rate contracts** Related to interest rate risk for variable-rate debt arrangements and fixed-rate leases
- **Convertible note-related agreements** Related to the issuance of the Convertible notes due in 2014
- **Foreign exchange contracts** Related to exposure to currency fluctuations that would impact our investment in, or borrowings related to, our Canadian operations

Derivative instruments are recorded in Other assets and Other liabilities in the Condensed Consolidated Balance Sheets. The Company does not have any derivative instruments designated as hedging instruments.

The following table presents the balances of outstanding derivative instruments on a gross basis and the application of counterparty and collateral netting:

	June 30, 2012		December 31, 2011			
	Asset	Liability	Notional	Asset	Liability	Notional
	(In millions)					
Interest rate lock commitments	\$ 179	\$	\$ 5,849	\$ 184	\$	\$ 7,095
Forward delivery commitments: (1)						
Not subject to master netting arrangements	4	8	1,781	6	27	3,897
Subject to master netting arrangements(2)	15	55	8,984	32	100	11,893
Option contracts	1		1,050	2		845
MSR-related agreements				6		1,100
Interest rate contracts	1		703	1	1	477
Convertible note-related agreements(3)	16	16		4	4	
Total, gross	216	79		235	132	
Netting adjustments:						

Edgar Filing: PHH CORP - Form 10-Q

Offsetting receivables/payables	(35)	(35)	(32)	(32)
Cash collateral paid/received	22	(15)	(6)	(54)
Total, net	\$ 203	\$ 29	\$ 197	\$ 46

(1) The net notional amount of Forward delivery commitments was \$7.1 billion and \$8.3 billion as of June 30, 2012 and December 31, 2011, respectively.

(2) Represents derivative instruments that are executed with the same counterparties and subject to master netting arrangements. Forward delivery commitments subject to netting shown above were presented in the Condensed Consolidated Balance Sheets as follows:

	June 30, 2012		December 31, 2011	
	Asset Derivatives	Liability Derivatives	Asset Derivatives	Liability Derivatives
	(In millions)			
Other Assets	\$ 10	\$ 30	\$	\$
Other Liabilities	5	25	32	100
Total	\$ 15	\$ 55	\$ 32	\$ 100

(3) The notional amount of derivative instruments related to the issuance of the 2014 Convertible notes was 9.6881 million shares of the Company's Common stock as of June 30, 2012 and December 31, 2011.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

As of June 30, 2012 and December 31, 2011, cash collateral posted for derivative agreements that did not qualify for net presentation was \$3 million and \$13 million, respectively, which was included in Other assets in the Condensed Consolidated Balance Sheets.

The following table summarizes the gains (losses) recorded in the Condensed Consolidated Statements of Operations for derivative instruments:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
<i>Gain on mortgage loans, net:</i>				
Interest rate lock commitments	\$ 374	\$ 249	\$ 760	\$ 433
Forward delivery commitments	(124)	(100)	(153)	(90)
Options contracts	(6)	(4)	(10)	(7)
<i>Net derivative gain (loss) related to mortgage servicing rights:</i>				
MSR-related agreements	2		(3)	
<i>Fleet interest expense:</i>				
Interest rate contracts	(1)	(1)	(1)	(1)
Foreign exchange contracts	1	(3)	1	(5)

**6. Vehicle Leasing Activities**

The following table summarizes the components of Net investment in fleet leases:

	June 30, 2012	December 31, 2011
	(In millions)	
<i>Operating Leases:</i>		
Vehicles under open-end operating leases	\$ 8,019	\$ 8,058
Vehicles under closed-end operating leases	167	176
Vehicles under operating leases	8,186	8,234
Less: Accumulated depreciation	(4,840)	(5,097)
Net investment in operating leases	3,346	3,137
<i>Direct Financing Leases:</i>		
Lease payments receivable	111	81
Less: Unearned income	(1)	(1)
Net investment in direct financing leases	110	80
<i>Off-Lease Vehicles:</i>		
Vehicles not yet subject to a lease	234	290
Vehicles held for sale	20	16

Edgar Filing: PHH CORP - Form 10-Q

Less: Accumulated depreciation		(9)		(8)
Net investment in off-lease vehicles		245		298
Total	\$	3,701	\$	3,515

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****7. Debt and Borrowing Arrangements**

The following table summarizes the components of Debt:

	June 30, 2012		December 31, 2011	
	Balance	Wt. Avg- Interest Rate(1)	Balance	Wt. Avg- Interest Rate(1)
	(In millions)			
Term notes, in amortization	\$ 772	2.2%	\$ 1,196	2.1%
Term notes, in revolving period	993	1.2%	374	1.6%
Variable-funding notes	1,531	1.6%	1,516	1.4%
Other	28	5.1%	32	5.1%
Vehicle Management Asset-Backed Debt	3,324		3,118	
Committed warehouse facilities	1,721	2.1%	2,313	2.0%
Uncommitted warehouse facilities		%	44	1.2%
Servicing advance facility	68	2.7%	79	2.8%
Mortgage Asset-Backed Debt	1,789		2,436	
Term notes	877	8.2%	879	8.2%
Convertible notes	410	5.0%	460	4.0%
Credit facilities		%		%
Unsecured Debt	1,287		1,339	
Mortgage loan securitization debt certificates, at fair value		%	21	7.0%
Total	\$ 6,400		\$ 6,914	

(1) Represents the weighted-average stated interest rate of the facilities as of the respective date, which may be different from the effective rate due to the amortization of premiums, discounts and issuance costs. Facilities are variable-rate, except for the Term notes, Convertible notes, and Mortgage loan securitization debt certificates which are fixed-rate.

Assets held as collateral for asset-backed borrowing arrangements that are not available to pay the Company's general obligations as of June 30, 2012 consisted of:

	Vehicle Asset-Backed Debt		Mortgage Asset-Backed Debt	
	(In millions)			
Restricted cash and cash equivalents	\$	314	\$	6
Accounts receivable		46		87
Mortgage loans held for sale (unpaid principal balance)				1,773
Net investment in fleet leases		3,593		
Total	\$	3,953	\$	1,866

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

The following table provides the contractual debt maturities as of June 30, 2012:

	Vehicle Asset-Backed Debt(1)	Mortgage Asset-Backed Debt	Unsecured Debt(2)	Total
	(In millions)			
Within one year	\$ 750	\$ 1,789	\$ 418	\$ 2,957
Between one and two years	1,007			1,007
Between two and three years	893		250	1,143
Between three and four years	534		450	984
Between four and five years	131		250	381
Thereafter	12		8	20
	\$ 3,327	\$ 1,789	\$ 1,376	\$ 6,492

(1) Maturities of vehicle management asset-backed notes, a portion of which are amortizing in accordance with their terms, represent estimated payments based on the expected cash inflows related to the securitized vehicle leases and related assets.

(2) Maturities of convertible notes have been reflected based on the contractual maturity date. Under certain circumstances, the convertible notes may be converted prior to the earliest conversion date and the principal portion of the notes would be due in cash prior to the contractual maturity date.

Capacity under all borrowing agreements is dependent upon maintaining compliance with, or obtaining waivers of, the terms, conditions and covenants of the respective agreements. Available capacity under asset-backed funding arrangements may be further limited by asset eligibility requirements. Available capacity under committed borrowing arrangements as of June 30, 2012 consisted of:

	Capacity	Utilized Capacity (In millions)	Available Capacity
<b>Vehicle Management Asset-Backed Debt:</b>			
Term notes, in revolving period	\$ 993	\$ 993	\$
Variable-funding notes	2,241	1,531	710
<b>Mortgage Asset-Backed Debt:</b>			
Committed warehouse facilities	3,540	1,721	1,819
Servicing advance facility	120	68	52
Unsecured Credit facilities(1)	530	18	512

(1) Utilized capacity reflects \$18 million of letters of credit issued under the Amended Credit Facility, which are not included in Debt in the Condensed Consolidated Balance Sheet.

Capacity for Mortgage asset-backed debt shown above excludes \$2.0 billion not drawn under uncommitted facilities. See Note 12, Fair Value Measurements for the measurement of the fair value of Debt.

**VEHICLE MANAGEMENT ASSET-BACKED DEBT**

*Term Notes*

On May 17, 2012, Chesapeake issued \$643 million of Series 2012-1 Term notes. Proceeds from the notes were used to pay down a portion of the Series 2010-1 Notes and Series 2011-1 Notes.

Table of Contents

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

*Variable-funding Notes*

On June 27, 2012, Chesapeake fully repaid its 2010-1 and 2011-1 Class B Notes and amended its Series 2010-1 Indenture Supplement and Series 2011-1 Indenture Supplement to, among other things, extend the revolving period of the 2010-1 and 2011-1 Variable-funding notes to June 26, 2013 and June 26, 2014, respectively. Upon expiration of the revolving periods, the 2010-1 and 2011-1 Variable-funding notes amortization period will commence.

On April 30, 2012, the Fleet Leasing Receivables Trust ( FLRT ) 2010-2 Series was amended to increase capacity to \$741 million.

**MORTGAGE ASSET-BACKED DEBT**

*Committed Facilities*

During the six months ended June 30, 2012, the committed variable-rate mortgage repurchase facilities with Credit Suisse First Boston Mortgage Capital LLC were extended to May 22, 2013 and the committed variable-rate mortgage repurchase facility with The Royal Bank of Scotland plc was extended to June 21, 2013.

On April 27, 2012, the Company's master agreement with Fannie Mae was renewed and certain other agreements with Fannie Mae were amended, including an amendment to the \$1.0 billion committed early funding letter agreement. Pursuant to the committed early funding letter amendment, the termination event related to the Company's credit ratings was removed and other termination events were added, most of which are generally consistent with existing covenants under the Company's various other debt facilities. See the Debt Covenants section below for further information. Unless earlier terminated, the committed early funding agreement expires on December 15, 2012.

*Servicing Advance Facility*

On June 29, 2012, the committed facility with Fannie Mae that provides for the early reimbursement of certain servicing advances made on behalf of Fannie Mae was extended to June 30, 2013.

**UNSECURED DEBT**

***Credit Facilities***

Credit facilities primarily represents an Amended and Restated Competitive Advance and Revolving Credit Agreement, dated as of January 6, 2006, among PHH, a group of lenders and JPMorgan Chase Bank, N.A., as administrative agent. During the six months ended June 30, 2012, \$525 million of commitments under the Amended Credit Facility were extended to February 28, 2013.

The Amended Credit Facility was amended and restated in August 2012. See Note 15, *Subsequent Events* for additional information.

***Convertible Notes***

As of June 30, 2012, Convertible notes included: (i) \$250 million of 4.0% Convertible senior notes with a maturity date of September 1, 2014; and (ii) \$250 million of 6.0% Convertible senior notes with a maturity date of June 15, 2017.

**2012 CONVERTIBLE NOTES**

During the six months ended June 30, 2012, the Company paid the outstanding principal balance of the Convertible notes due 2012.

Table of Contents

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**2014 CONVERTIBLE NOTES**

As of June 30, 2012 and December 31, 2011, the carrying amount of the Convertible notes due 2014 is net of an unamortized discount of \$32 million and \$40 million, respectively. The effective interest rate of the notes, which includes the accretion of the discount and issuance costs, is 13.0%. There have been no conversions of the notes since issuance.

**2017 CONVERTIBLE NOTES ISSUANCE**

In January 2012, the Company completed an offering of \$250 million in aggregate principal amount of 6.0% Convertible Senior Notes due 2017, governed by an indenture dated January 17, 2012 with The Bank of New York Mellon Trust Company, N.A., as trustee. After deducting the 3% underwriting discount and debt issue costs, the Company realized net proceeds of \$243 million from the issuance. The notes are senior unsecured obligations of the Company and rank equally with all existing and future senior unsecured debt and are senior to all of the Company's existing and future subordinated debt. The notes are not redeemable by the Company prior to the maturity date. The Company used the net proceeds from this offering to repay the outstanding aggregate principal amount of the Convertible notes due 2012.

Interest on the notes is payable semiannually in arrears on June 15 and December 15 of each year, beginning June 15, 2012. The notes mature on June 15, 2017, unless previously repurchased or converted in accordance with their terms.

In accordance with GAAP, the liability and equity components of the Convertible notes due 2017 were separately accounted for based on estimates of the Company's non-convertible debt borrowing rate at the time of issuance. Accordingly, the liability component includes an original issue discount of \$63 million, including the underwriting discount, and the value of the equity component is recorded separately. Additionally, the Company incurred \$1 million of debt issue costs, which were allocated to the liability and equity components based on their relative fair values. At the time of issuance, the Company determined that the conversion option related to the notes was indexed to the Company's own stock and met all of the criteria for equity classification. Accordingly, the initial valuation of the liability component was \$188 million recorded within Debt, and the initial valuation of the equity component was \$33 million, net of \$22 million of deferred taxes, recorded within Additional paid-in capital in the Condensed Consolidated Balance Sheets. Since the conversion option met all of the criteria for equity classification, there have been no changes in value recorded from the date of issuance.

The debt discount and issuance costs allocated to the liability are being accreted to Mortgage interest expense in the Condensed Consolidated Statements of Operations through the earliest conversion date of the notes, December 16, 2016. As of June 30, 2012, the carrying amount of the Convertible notes due 2017 is net of an unamortized discount of \$58 million. The effective interest rate of the Convertible notes due 2017, which includes the cost of amortization of the discount and issuance costs, is 13.0%.

**Conversion Features:**

## Edgar Filing: PHH CORP - Form 10-Q

Holders of the Convertible notes due 2017 may convert all or any portion of the notes, at their option, prior to December 15, 2016 only upon the occurrence of certain triggering events related to (i) the price of the notes, (ii) the price of the Company's Common stock, or (iii) upon the occurrence of specified corporate events. Holders of the Convertible notes due 2017 may also convert all or any portion of the notes at any time, at their option from, and including, December 15, 2016 through the third scheduled trading day immediately preceding the maturity date.

### *Conversion Based on Note Price*

Prior to the close of business on the scheduled trading day immediately preceding December 15, 2016, the notes may be converted during the five business day period after any five consecutive trading day period (the Measurement Period) in which the trading price per \$1,000 in principal amount of the notes for each day of the Measurement Period was less than 98% of the product of the last reported sale price of the Company's Common stock and the applicable conversion rate for the notes of such date.

Table of Contents

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

*Conversion Based on Stock Price*

Prior to the close of business on the scheduled trading day immediately preceding December 15, 2016, the notes may be converted during any calendar quarter after the calendar quarter ending March 31, 2012 and only during such calendar quarter, if the last reported sale price of the Company's Common stock for 20 or more trading days in a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter exceeds 130% of the applicable conversion price in effect for the notes on each such trading day.

The conversion price of the Convertible notes due 2017 is \$12.79 per share (based on an initial conversion rate of 78.2014 shares per \$1,000 principal amount of notes). Upon conversion, the principal amount of the converted notes is payable in cash and the Company will pay or deliver (at its election): (i) cash; (ii) shares of the Company's Common stock; or (iii) a combination of cash and shares of the Company's Common stock; to settle amounts due if the conversion value exceeds the principal of the converted notes. As of June 30, 2012, the if-converted value exceeded the principal amount of the notes by \$92 million; however, the notes were not convertible in accordance with their terms as of June 30, 2012.

Subject to certain exceptions, the holders of the Convertible notes due 2017 may require the Company to repurchase all or a portion of their notes upon a fundamental change, as defined under the indenture. The Company will generally be required to increase the conversion rate for holders that elect to convert their notes in connection with a make-whole fundamental change, as defined under the indenture. The conversion rate and the conversion price will be subject to adjustment upon the occurrence of certain events as specified in the indenture; however, in no circumstance will the conversion rate exceed 97.7517 per \$1,000 in principal amount of notes, subject to certain anti-dilution adjustments.

**DEBT COVENANTS**

Certain debt arrangements require the maintenance of certain financial ratios and contain other affirmative and negative covenants, termination events, and other restrictions, including, but not limited to, covenants relating to material adverse changes, liquidity maintenance, restrictions on indebtedness of the Company and its material subsidiaries, mergers, liens, liquidations, sale and leaseback transactions, and restrictions on certain types of payments, including dividends and stock repurchases. Certain other debt arrangements, including the Fannie Mae committed facility, contain provisions that permit the Company or our counterparty to terminate the arrangement upon the occurrence of certain events, including those described below.

There were no significant amendments to the terms of debt covenants during the six months ended June 30, 2012. The covenants of the Amended Credit Facility were amended in August 2012. See Note 15, "Subsequent Events" for additional information.

As of June 30, 2012, the Company was in compliance with all financial covenants related to its debt arrangements.

## Edgar Filing: PHH CORP - Form 10-Q

During the six months ended June 30, 2012, the termination events for the Fannie Mae committed facility were amended to require the Company to maintain (i) on the last day of each fiscal quarter, consolidated net worth of at least \$1.0 billion; (ii) on the last day of each fiscal quarter, a ratio of indebtedness to tangible net worth no greater than 6.5 to 1; (iii) a minimum of \$1.0 billion in committed mortgage warehouse or gestation facilities, with no more than \$500 million of gestation facilities included towards the minimum, but excluding committed or uncommitted loan purchase arrangements or other funding arrangements from Fannie Mae and any mortgage warehouse capacity provided by government sponsored enterprises; and (iv) compliance with certain loan repurchase trigger event criteria related to the aging of outstanding loan repurchase demands by Fannie Mae.

Under certain of the Company's financing, servicing, hedging and related agreements and instruments, the lenders or trustees have the right to notify the Company if they believe it has breached a covenant under the operative documents and may declare an event of default. If one or more notices of default were to be given, the Company believes it would have various periods in which to cure certain of such events of default. If the Company does not cure the events of default or obtain necessary waivers within the required time periods, the maturity of some of our debt could be accelerated and its ability to incur additional indebtedness could be restricted. In addition, an event of default or acceleration under certain agreements and instruments would trigger cross-default provisions under certain of the Company's other agreements and instruments.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****8. Income Taxes**

Interim income tax expense or benefit is recorded by applying a projected full-year effective income tax rate to the quarterly Income before income taxes for results that are deemed to be reliably estimable. Certain results dependent on fair value adjustments of the Mortgage Production and Mortgage Servicing segments are considered not to be reliably estimable and therefore discrete year-to-date income tax provisions are recorded on those results.

The following table and discussion summarizes items that significantly impacted Income tax (benefit) expense and increased (decreased) the effective tax rate:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
State and local income taxes, net of federal tax benefits	\$ (4)	\$ (4)	\$ 1	\$ 1
Liabilities for income tax contingencies				(8)
Changes in rate and apportionment factors		(1)	(6)	
Changes in valuation allowance		2		6
Noncontrolling interest	(5)	(2)	(9)	(3)

**State and local income taxes, net of federal tax benefits.** The impact to the effective tax rate from state and local income taxes primarily represents the volatility in the pre-tax income or loss, as well as the mix of income and loss from the operations by entity and state income tax jurisdiction. The effective state tax rate was lower for the six months ended June 30, 2012 as compared to 2011.

**Liabilities for income tax contingencies.** The impact to the effective tax rate from changes in the liabilities for income tax contingencies primarily represents decreases in liabilities associated with the resolution and settlement with various taxing authorities, partially offset by increases in liabilities associated with new uncertain tax positions taken during the period. During the six months ended June 30, 2011, the IRS concluded its examination and review of the Company's taxable years 2006 through 2009.

**Changes in rate and apportionment factors.** Represents the impact to the effective tax rate on deferred tax items for changes in apportionment factors and tax rate. For the six months ended June 30, 2012, the amount represents the impact of applying statutory changes to apportionment weight, apportionment sourcing and corporate income tax rates that were enacted by various states, primarily New Jersey.

**Changes in valuation allowance.** The impact to the effective tax rate from changes in valuation allowance primarily represents state loss carryforwards generated during the year for which the Company believes it is more likely than not that the amounts will not be realized. For the six months ended June 30, 2011, the change was primarily driven by tax losses generated by our mortgage business.

***Noncontrolling interest.*** The impact to the effective tax rate from noncontrolling interest represents Realogy Corporation's portion of income taxes related to the income or loss attributable to PHH Home Loans. The impact primarily represents the impact of PHH Home Loans' election to report as a partnership for federal and state income tax purposes, whereby, the tax expense is reported by the individual LLC members. Accordingly, the Company's Income tax expense includes only its proportionate share of the income tax related to the income or loss generated by PHH Home Loans.

Table of Contents

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**9. Credit Risk**

The Company is subject to the following forms of credit risk:

- **Consumer credit risk** through mortgage banking activities as a result of originating and servicing residential mortgage loans
- **Commercial credit risk** through fleet management and leasing activities
- **Counterparty credit risk** through derivative transactions, sales agreements and various mortgage loan origination and servicing agreements

*Consumer Credit Risk*

The Company is not subject to the majority of the risks inherent in maintaining a mortgage loan portfolio because loans are not held for investment purposes and are generally sold to investors within 30 days of origination. The majority of mortgage loan sales are on a non-recourse basis; however, the Company has exposure in certain circumstances in its capacity as a loan originator and servicer to loan repurchases and indemnifications through representation and warranty provisions. Additionally, the Company has exposure through a reinsurance agreement that is inactive and in runoff.

Loan performance is an indicator of the inherent risk associated with our origination and servicing activities. The Company has exposure to possible losses on loans within the servicing portfolio due to loan repurchases and indemnifications, as further discussed below.

The following tables summarize certain information regarding the total loan servicing portfolio, which includes loans associated with the capitalized Mortgage servicing rights as well as loans subserviced for others:

	June 30, 2012	December 31, 2011
	(In millions)	
<i>Loan Servicing Portfolio Composition</i>		
Owned	\$ 150,172	\$ 150,315

Edgar Filing: PHH CORP - Form 10-Q

Subserviced(1)		42,603		32,072
Total	\$	192,775	\$	182,387
Conventional loans	\$	155,366	\$	145,885
Government loans		31,005		29,903
Home equity lines of credit		6,404		6,599
Total	\$	192,775	\$	182,387
Weighted-average interest rate		4.4%		4.6%

---

(1) As of June 30, 2012, loans subserviced for others includes \$8.4 billion of loans which were transferred to the Company's loan servicing portfolio related to a new subservicing agreement.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

	June 30, 2012		December 31, 2011	
	Number of Loans	Unpaid Balance	Number of Loans	Unpaid Balance
<i>Portfolio Delinquency</i> (1)				
30 days	2.05%	1.69%	2.24%	1.83%
60 days	0.50%	0.42%	0.60%	0.51%
90 or more days	0.74%	0.66%	0.98%	0.95%
Total	3.29%	2.77%	3.82%	3.29%
Foreclosure/real estate owned(2)	1.89%	1.87%	1.83%	1.85%

(1) Represents portfolio delinquencies as a percentage of the total number of loans and the total unpaid balance of the portfolio.

(2) As of June 30, 2012 and December 31, 2011, there were 16,467 and 15,689 of loans in foreclosure with an unpaid principal balance of \$3.0 billion and \$2.8 billion, respectively.

**Foreclosure-Related Reserves**

Representations and warranties are provided to purchasers and insurers on a significant portion of loans sold and are assumed on purchased mortgage servicing rights. In the event of a breach of these representations and warranties, the Company may be required to repurchase a mortgage loan or indemnify the purchaser, and any loss on the mortgage loan may be borne by the Company. If there is no breach of a representation and warranty provision, there is no obligation to repurchase the loan or indemnify the investor against loss. In limited circumstances, the full risk of loss on loans sold is retained to the extent the liquidation of the underlying collateral is insufficient. In some instances where the Company has purchased loans from third parties, it may have the ability to recover the loss from the third party. Foreclosure-related reserves are maintained for probable losses related to repurchase and indemnification obligations and on-balance sheet loans in foreclosure and real estate owned.

A summary of the activity in foreclosure-related reserves is as follows:

	Six Months Ended June 30,	
	2012	2011
	(In millions)	
Balance, beginning of period	\$ 127	\$ 111
Realized foreclosure losses	(66)	(35)
Increase in reserves due to:		
Changes in assumptions	104	39
New loan sales	10	7
Balance, end of period	\$ 175	\$ 122

Foreclosure-related reserves consist of the following:

**Loan Repurchases and Indemnifications**

The maximum exposure to representation and warranty provisions exceeds the amount of loans in the capitalized portfolio of \$147.9 billion; however, the maximum amount of losses cannot be estimated because the Company does not service all of the loans for which it has provided representations or warranties. As of June 30, 2012, approximately \$205 million of loans have been identified in which the Company has full risk of loss or has identified a breach of representation and warranty provisions; 12% of which were at least 90 days delinquent (calculated based upon the unpaid principal balance of the loans).

As of June 30, 2012 and December 31, 2011, liabilities for probable losses related to repurchase and indemnification obligations of \$140 million and \$95 million, respectively, are included in Other liabilities in the Condensed Consolidated Balance Sheets. The liability for loan repurchases and indemnifications represents management's estimate of probable losses based on the best information available and requires the application of a significant level of judgment and the use of a number of assumptions. These assumptions include the estimated amount and timing of repurchase and indemnification requests, the expected success rate in defending against

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

requests, and estimated loss severities on repurchases and indemnifications. While the Company uses the best information available in estimating the liability, our actual experience can vary significantly from the assumptions as the estimation process is inherently uncertain. Given the increased levels of repurchase requests and realized losses in recent periods, there is a reasonable possibility that future losses may be in excess of the recorded liability.

As of June 30, 2012, the estimated amount of reasonably possible losses in excess of the recorded liability was \$105 million. This estimate assumes that repurchase and indemnification requests remain at an elevated level through the year ended December 31, 2013, the success rate in defending against requests declines and loss severities remain at current levels. The Company's estimate of reasonably possible losses does not represent probable losses and is based upon significant judgments and assumptions which can be influenced by many factors, including: (i) home prices and the levels of home equity; (ii) the criteria used by investors in selecting loans to request; (iii) borrower delinquency patterns; and (iv) general economic conditions.

**Mortgage Loans in Foreclosure and Real Estate Owned**

The carrying values of the mortgage loans in foreclosure and real estate owned were recorded within Other assets in the Condensed Consolidated Balance Sheets as follows:

	June 30, 2012	(In millions)		December 31, 2011
Mortgage loans in foreclosure(1)	\$	126	\$	112
Allowance for probable losses		(21)		(19)
Mortgage loans in foreclosure, net	\$	105	\$	93
Real estate owned	\$	58	\$	51
Adjustment to estimated net realizable value		(14)		(13)
Real estate owned, net	\$	44	\$	38

(1) Includes \$62 million of recoverable advances as of both June 30, 2012 and December 31, 2011.

**Mortgage Reinsurance**

In the second quarter of 2012, the Company terminated one of its inactive reinsurance contracts. The termination of the agreement settled the liability and exposure to loss under that contract and, as a result, \$37 million of the related restricted cash and investments held in trust to pay future losses were distributed to the primary mortgage insurer and \$24 million of previously restricted cash was released and distributed to the Company as unrestricted cash. During the three and six months ended June 30, 2012, the termination resulted in a pre-tax loss of \$16 million which was recorded in Loan servicing income in the Condensed Consolidated Statements of Operations.

## Edgar Filing: PHH CORP - Form 10-Q

As of June 30, 2012, the Company has remaining exposure to consumer credit risk through losses from one contract with a primary mortgage insurance company that is inactive and in runoff. The exposure to losses through this reinsurance contract is based on mortgage loans pooled by year of origination.

The contractual reinsurance period for each pool was 10 years and the weighted-average reinsurance period was 4 years as of June 30, 2012. Loss rates on these pools are determined based on the unpaid principal balance of the underlying loans. The Company indemnifies the primary mortgage insurer for losses that fall between a stated minimum and maximum loss rate on each annual pool. In return for absorbing this loss exposure, the Company is contractually entitled to a portion of the insurance premium from the primary mortgage insurer.

The Company is required to hold cash and securities in trust related to this potential obligation, which was \$130 million, included in Restricted cash, cash equivalents and investments in the Condensed Consolidated Balance Sheets as of June 30, 2012. The amount of cash and securities held in trust is contractually specified in the reinsurance agreement and is based on the original risk assumed under the contract and the incurred losses to date.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

As of June 30, 2012, \$43 million was included in Other liabilities in the Condensed Consolidated Balance Sheets for incurred and incurred but not reported losses associated with mortgage reinsurance activities (estimated on an undiscounted basis), which includes \$4 million of known unpaid reinsurance losses outstanding.

A summary of the activity in reinsurance-related reserves is as follows:

	2012	Six Months Ended June 30, (In millions)	2011
Balance, beginning of period	\$	84	\$ 113
Realized reinsurance losses(1)		(51)	(33)
Increase in liability for reinsurance losses		10	17
Balance, end of period	\$	43	\$ 97

(1) Realized reinsurance losses for the six months ended June 30, 2012 includes \$21 million related to the release of reserves associated with the termination of an inactive reinsurance agreement.

***Commercial Credit Risk***

Vehicle leases are primarily classified as operating leases; however, certain leases are classified as direct financing leases and recorded within Net investment in fleet leases in the Condensed Consolidated Balance Sheets. As of June 30, 2012 and December 31, 2011, both direct financing leases greater than 90 days past due and direct financing leases greater than 90 days past due that are still accruing interest were \$3 million and \$16 million, respectively. As of June 30, 2012 and December 31, 2011, there were no allowances for credit losses related to direct financing leases.

**10. Commitments and Contingencies**

In January 2012, the Company was notified that the Bureau of Consumer Financial Protection (the CFPB) had opened an investigation to determine whether the Company's mortgage insurance premium ceding practices to captive reinsurers comply with the Real Estate Settlement Procedures Act and other laws enforced by the CFPB. The CFPB requested certain related documents and information for review. During the second quarter of 2012, the CFPB requested further production of documents and answers to written questions. The Company has provided reinsurance services in exchange for premiums ceded and believes that it has complied with the Real Estate Settlement Procedures Act and other laws applicable to the Company's mortgage reinsurance activities. The Company did not provide reinsurance on loans originated after 2009. There can be no assurance that this investigation will not result in the imposition of any penalties or fines against the Company or its subsidiaries.

The Company has received inquiries and requests for information from regulators and attorneys general of certain states as well as from the Committee on Oversight and Government Reform of the U.S. House of Representatives and the U.S. Senate Judiciary Committee, requesting information as to the Company's mortgage origination and servicing practices, including its foreclosure processes and procedures. There also has been a continued focus on foreclosure practices by Fannie Mae and Freddie Mac. While the Company has not been assessed any material fines or penalties from regulatory agencies resulting from its mortgage origination or servicing practices to date, Fannie Mae and Freddie Mac have assessed compensatory fees against the Company for failing to meet certain foreclosure timelines specified in their respective servicing guides.

The Company expects that the higher level of legislative and regulatory focus on mortgage origination and servicing practices will result in higher legal, compliance and servicing related costs as well as potential regulatory fines and penalties. It is also reasonably possible that the Company could experience an increase in mortgage origination or servicing related litigation in the future. However, the amount of any increased costs or losses in connection with such matters cannot be reasonably estimated given the inherent uncertainty around the outcome of such matters.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****11. Accumulated Other Comprehensive Income**

The after-tax components of Accumulated other comprehensive income (loss) were as follows:

	<b>June 30, 2012</b>	<b>(In millions)</b>		<b>December 31, 2011</b>
Currency translation adjustment	\$	31	\$	31
Unrealized gains on available-for-sale securities, net of income taxes of \$0 and \$1		1		2
Pension adjustment, net of income tax benefit of \$(7) and \$(7)		(11)		(12)
Total	\$	21	\$	21

All components of Accumulated other comprehensive income (loss) presented above are net of income taxes; however the currency translation adjustment presented above excludes income taxes on undistributed earnings of foreign subsidiaries, which are considered to be indefinitely invested.

**12. Fair Value Measurements**

The Company updates the valuation of each instrument recorded at fair value on a quarterly basis, evaluating all available observable information which may include current market prices or bids, recent trade activity, changes in the levels of market activity and benchmarking of industry data. The assessment also includes consideration of identifying the valuation approach that would be used currently by market participants. If it is determined that a change in valuation technique or its application is appropriate, or if there are other changes in availability of observable data or market activity, the current methodology will be analyzed to determine if a transfer between levels of the valuation hierarchy is appropriate. Such reclassifications are reported as transfers into or out of a level as of the beginning of the quarter that the change occurs.

The incorporation of counterparty credit risk did not have a significant impact on the valuation of assets and liabilities recorded at fair value as of June 30, 2012 or December 31, 2011.

**Recurring Fair Value Measurements**

Discussion of the measurement of fair value for the assets and liabilities measured on a recurring basis follows:

Edgar Filing: PHH CORP - Form 10-Q

**Mortgage Loans Held for Sale.** The following table reflects the difference between the carrying amounts of Mortgage loans held for sale measured at fair value, and the aggregate unpaid principal amount that the Company is contractually entitled to receive at maturity:

	June 30, 2012		December 31, 2011	
	Total	Loans 90 days or more past due and on non-accrual status	Total	Loans 90 days or more past due and on non-accrual status
<i>(In millions)</i>				
<i>Mortgage loans held for sale:</i>				
Carrying amount	\$ 1,976	\$ 18	\$ 2,658	\$ 23
Aggregate unpaid principal balance	1,935	26	2,592	34
Difference	\$ 41	\$ (8)	\$ 66	\$ (11)

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

The following table summarizes the components of Mortgage loans held for sale:

	June 30, 2012	December 31, 2011
	(In millions)	
First mortgages:		
Conforming (1)	\$ 1,792	\$ 2,483
Non-conforming	122	109
Construction loans		4
Total first mortgages	1,914	2,596
Second lien	9	10
Scratch and Dent (2)	53	50
Other		2
Total	\$ 1,976	\$ 2,658

(1) Represents mortgage loans that conform to the standards of the government-sponsored entities.

(2) Represents mortgage loans with origination flaws or performance issues.

**Derivative Instruments.** The average pullthrough percentage used in measuring the fair value of Interest Rate Lock Commitments ( IRLCs ) was 74% as of both June 30, 2012 and December 31, 2011. The pullthrough percentage is considered a significant unobservable input and represents an adjustment to the recorded value of the IRLCs to reflect the estimated percentage that will result in a closed mortgage loan under the original terms of the agreement. The estimate of pullthrough is modeled based on a historical analysis of loan closing and fallout data that considers current interest rates as well as changes in pullthrough resulting from fluctuations in interest rates and loan values. Actual loan pullthrough is compared to the modeled estimates in order to evaluate this assumption each period based on current trends. Generally, a change in interest rates is accompanied by a directionally opposite change in the assumption used for the pullthrough percentage, and the impact to fair value of a change in pullthrough would be partially offset by the related change in price.

**Mortgage Servicing Rights.** The fair value of Mortgage servicing rights ( MSRs ) is estimated based upon projections of expected future cash flows considering prepayment estimates (developed using a model described below), the Company's historical prepayment rates, portfolio characteristics, interest rates based on interest rate yield curves, implied volatility and other economic factors. On a quarterly basis, assumptions used in estimating fair value are validated against a number of third-party sources, which may include peer surveys, MSR broker surveys, third-party valuations and other market-based sources.

In the first quarter of 2012, the Company integrated an updated prepayment model used in the valuation of MSRs, which is more closely aligned with the actual prepayment speeds of the capitalized servicing portfolio. Additionally, the new model utilizes a combination of standard default curves and current delinquency levels to project future delinquencies and foreclosures, whereas the previous model assumed current delinquency and foreclosure rates would remain constant over the life of the asset. Based upon the results of our analysis of the modeled value and validation

## Edgar Filing: PHH CORP - Form 10-Q

of our value and current assumptions against third-party sources, there was no change to the overall value of MSR as a result of integrating the new prepayment model.

The significant assumptions used in estimating the fair value of MSR were as follows (in annual rates):

	<b>June 30, 2012</b>	<b>December 31, 2011</b>
Weighted-average prepayment speed (CPR)	16%	18%
Option adjusted spread, in basis points	999	857
Weighted-average delinquency rate	6%	n/a

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

The following table summarizes the estimated change in the fair value of MSR from adverse changes in the significant assumptions:

	Weighted- Average Prepayment Speed	June 30, 2012 Option Adjusted Spread (In millions)	Weighted- Average Delinquency Rate
Impact on fair value of 10% adverse change	\$ (68)	\$ (44)	\$ (19)
Impact on fair value of 20% adverse change	(130)	(84)	(38)

These sensitivities are hypothetical and presented for illustrative purposes only. Changes in fair value based on a 10% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, this analysis does not assume any impact resulting from management's intervention to mitigate these variations.

The effect of a variation in a particular assumption is calculated without changing any other assumption and the assumptions used in valuing the MSRs are independently aggregated. Although there are certain inter-relationships among the various key assumptions noted above, changes in one of the significant assumptions would not independently drive changes in the others. The prepayment speed assumptions are highly dependent upon interest rates, which drive borrowers' propensity to refinance; however, there are other factors that can influence borrower refinance activity. These factors include housing prices, the levels of home equity, underwriting standards and loan product characteristics. The weighted average delinquency rate is based on the current and projected credit characteristics of the capitalized servicing portfolio and is dependent on economic conditions, home equity and delinquency and default patterns. The option adjusted spread is a measure of the risk in valuing the MSR, considering all other market-based assumptions.

Assets and liabilities measured at fair value on a recurring basis were included in the Condensed Consolidated Balance Sheets as follows:

	Level One	Level Two	June 30, 2012 Level Three (In millions)	Cash Collateral and Netting (1)	Total

(1) In 2012, the Company sold its investment in the subordinated debt and residual interests of a Mortgage loan securitization trust that had been consolidated as a variable interest entity.

Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

Transfers into Level Three generally represent mortgage loans held for sale with performance issues, origination flaws or other characteristics that impact their salability in active secondary market transactions. Transfers out of Level Three generally represent mortgage loans held for sale with corrected performance issues or origination flaws or loans that were foreclosed upon. Mortgage loans in foreclosure are measured at fair value on a non-recurring basis.

Realized and unrealized gains (losses) related to assets and liabilities classified within Level Three of the valuation hierarchy were included in the Condensed Consolidated Statements of Operations as follows:

	Three Months Ended June 30,		Six Months Ended June 30,

**Fair Value of Other Financial Instruments**

## Edgar Filing: PHH CORP - Form 10-Q

As of June 30, 2012 and December 31, 2011, all financial instruments were either recorded at fair value or the carrying value approximated fair value, with the exception of Debt and derivative instruments included in Total PHH Corporation stockholders' equity. For financial instruments that were not recorded at fair value, such as Cash and cash equivalents and Restricted cash and cash equivalents, the carrying value approximates fair value due to the short-term nature of such instruments. These financial instruments are classified within Level One of the valuation hierarchy.

**Debt.** As of June 30, 2012, the total fair value of Debt was \$6.7 billion, and substantially all of the debt is measured using Level Two inputs. For Level Two Debt, fair value is estimated using either: (i) a market based on the current market pricing of recent trades for similar instruments or the current expected ask price for the Company's debt instruments; (ii) a discounted cash flow model using assumptions based on current market information available for similar debt instruments; or (iii) observable spreads and terms for recent pricing of similar instruments.

## Edgar Filing: PHH CORP - Form 10-Q

- (1) Represents amounts specifically designated to purchase assets, repay debt and/or provide over-collateralization related to vehicle management asset-backed debt arrangements.
- (2) Represents amounts not available to pay the Company's general obligations. See Note 7, Debt and Borrowing Arrangements for further information.
- (3) Excludes intercompany payables.

Table of Contents

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

***PHH Home Loans***

For the six months ended June 30, 2012, approximately 25% of the mortgage loans originated by the Company were derived from Realogy Corporation's affiliates, of which approximately 85% were originated by PHH Home Loans.

***Mortgage Loan Securitization Trust***

In 2012, the Company sold the residual interests in a mortgage securitization trust that had been consolidated as a VIE. As a result, the Company is no longer the primary beneficiary of the VIE and the assets and liabilities of the trust were deconsolidated from the Condensed Consolidated Balance Sheets. The loss on the sale of these residual interests was not significant.

**14. Segment Information**

Operations are conducted through three business segments: Mortgage Production, Mortgage Servicing and Fleet Management Services.

- **Mortgage Production** provides mortgage loan origination services and sells mortgage loans.
- **Mortgage Servicing** performs servicing activities for originated and purchased loans.
- **Fleet Management Services** provides commercial fleet management services.

Certain income and expenses not allocated to the three reportable segments and intersegment eliminations are reported under the heading Other. The Company's operations are substantially located in the U.S.

Management evaluates the operating results of each of the reportable segments based upon Net revenues and segment profit or loss, which is presented as the income or loss before income tax expense or benefit and after net income or loss attributable to noncontrolling interest. The Mortgage Production segment profit or loss excludes Realogy Corporation's noncontrolling interest in the profit or loss of PHH Home Loans.

Edgar Filing: PHH CORP - Form 10-Q

Segment results were as follows:

	June 30, 2012	Total Assets (In millions)	December 31, 2011

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**15. Subsequent Events**

*Unsecured Debt Credit Facilities*

On August 2, 2012, the Company amended and restated the existing unsecured Amended Credit Facility with an Amended and Restated Credit Agreement among PHH, a group of lenders and JPMorgan Chase Bank, N.A., as administrative agent (the Revolving Credit Facility). As a result of the amendment, the commitments of the facility were reduced from \$525 million (scheduled to expire on February 29, 2013) to \$300 million of aggregate commitments (scheduled to expire between July 1, 2014 and August 2, 2015), as discussed further below.

The Revolving Credit Facility consists of two tranches: (i) a \$250 million revolving credit tranche (the Tranche A Credit Facility) that is scheduled to expire on August 2, 2015 and (ii) a \$50 million revolving credit tranche (the Tranche B Credit Facility) that is scheduled to expire on July 1, 2014. No borrowing may be made under the Tranche B Credit Facility if there is unused availability under the Tranche A Credit Facility. Borrowings under the Revolving Credit Facility are subject to satisfaction of certain conditions, including compliance with a borrowing base coverage ratio test of unencumbered assets to unsecured debt of at least 1.2:1.

The Company's obligations under the Tranche A Credit Facility are guaranteed by each of its direct, indirect, existing and future domestic subsidiaries, subject to exceptions for (i) securitization subsidiaries, (ii) subsidiaries which are not substantially wholly-owned by the Company and (iii) certain other subsidiaries. The Company's obligations under the Tranche B Credit Facility are not guaranteed by any of its existing subsidiaries.

The Revolving Credit Facility is variable-rate and the facility fee and interest rate margin under the facility are subject to change if the Company's senior unsecured long-term debt ratings are changed by certain credit rating agencies.

Among other affirmative and negative covenants, the Revolving Credit Facility requires the Company to maintain: (i) on the last day of each fiscal quarter, net worth of at least \$1.0 billion; (ii) at any time prior to October 1, 2013, a ratio of indebtedness to tangible net worth no greater than 6.0:1 and, thereafter, no greater than 5.75:1; (iii) a minimum of \$1.0 billion in committed mortgage warehouse financing capacity excluding uncommitted mortgage warehouse facilities provided by the GSEs and certain mortgage gestation facilities; (iv) a minimum of \$750 million in committed third party fleet vehicle lease financing capacity; and (v) certain minimum liquidity requirements as of October 31, 2012, and May 2, 2014.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion should be read in conjunction with the Cautionary Note Regarding Forward-Looking Statements, Item 1A. Risk Factors and our Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q and Part I Item 1. Business and Part I Item 1A. Risk Factors, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements and the notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2011.*

Our Management's Discussion and Analysis of Financial Condition and Results of Operations is presented in sections as follows:

- Overview
- Results of Operations
- Risk Management
- Liquidity and Capital Resources
- Critical Accounting Policies and Estimates
- Recently Issued Accounting Pronouncements

**OVERVIEW**

We are a leading outsource provider of mortgage and fleet management services. We conduct our business through three operating segments: a Mortgage Production segment, a Mortgage Servicing segment and a Fleet Management Services segment. Our Mortgage Production segment originates, purchases and sells mortgage loans through PHH Mortgage. Our Mortgage Servicing segment services mortgage loans originated by PHH Mortgage, and also purchases mortgage servicing rights and acts as a servicer for certain clients that own the underlying servicing rights. Our Fleet Management Services segment provides commercial fleet management services to corporate clients and government agencies throughout the United States and Canada.

Although our Fleet Management Services segment has historically generated a larger portion of our Net revenues, our Mortgage Production and Mortgage Servicing segments have historically contributed a significantly larger portion of our Net income. Our Mortgage Production and Mortgage Servicing segments have experienced, and may continue to experience, high degrees of earnings volatility due to significant exposure to interest rates and the real estate markets, which impacts our loan origination volumes, valuation of our mortgage servicing rights and foreclosure-related charges.

## Edgar Filing: PHH CORP - Form 10-Q

See Risk Management in this Form 10-Q for additional information regarding our interest rate and market risks.

### Executive Summary

For 2012, we are focusing on four key strategies to increase shareholder value:

- pursue disciplined growth in our three franchise platforms which are mortgage private label services, our mortgage relationship with Realogy and our fleet management business;
- drive industry-leading operational excellence;
- continue our unwavering commitment to customer service; and
- in the near-term, prioritize liquidity and cash flow generation from our mortgage and fleet businesses and deleverage the balance sheet.

These strategies represent a shift in focus for 2012 away from an emphasis on growing origination market share and mortgage servicing rights. Some of the actions we are taking to reposition the business, including prioritizing liquidity and cash flow generation in the near-term, may have a negative impact on our 2012 earnings.

Table of Contents

In May 2012, our debt rating was downgraded by Fitch to BB from BB+. In recent months, S&P downgraded our debt rating from BB+ to BB- and placed us on negative outlook, and Moody's placed us on negative outlook. The downgrades in our credit rating reflect the rating agencies' assessments of a variety of factors including but not limited to: (i) an increase in potential mortgage loan repurchases; (ii) our hedge practices related to our mortgage servicing rights; and (iii) uncertainties regarding our liquidity profile. See [Liquidity and Capital Resources](#) for further discussion of our 2012 goals and liquidity and capital plan.

Our unrestricted cash balance was \$700 million as of June 30, 2012 compared to \$875 million as of March 31, 2012 which reflects the repayment of \$201 million of unsecured term debt and a \$52 million increase in the cash collateral posted under derivative agreements. Excluding those changes, we generated \$78 million of positive cash flow for the second quarter of 2012, which resulted from our operations and the following actions:

- generated \$31 million of unrestricted cash from our reinsurance subsidiary, including \$24 million from the termination of a reinsurance agreement and \$7 million from the release of restricted cash in excess of the trust requirements;
- generated \$28 million of cash from the sale of non-conforming mortgage loans and the repayment of retained subordinated notes from prior fleet lease asset-backed borrowing arrangements;
- selectively originated loans in our wholesale/correspondent platform to control cash utilization; and
- aligned our business operations with established cash flow targets to support the repayment of our near-term unsecured debt maturities.

The termination of the reinsurance agreement generated a \$16 million pre-tax loss in the Mortgage Servicing segment during the second quarter and six months ended June 30, 2012. See [Risk Management](#) for additional information regarding the termination agreement. The remaining actions outlined above did not have an overall impact on our net income.

We are continuing to execute on our plans to improve our liquidity and cash flow generation and believe that the initiatives started during the first half of 2012 provide a solid foundation to meet our near-term unsecured debt maturities. See [Liquidity and Capital Resources](#) for additional information regarding our outstanding indebtedness, upcoming debt maturities and our liquidity and capital plan.

In our Mortgage Production segment we continue to experience elevated margins and volume. Total loan margins during the second quarter of 2012 were 381 basis points, representing a 140 basis points increase over the same period in 2011. Wholesale/correspondent closings declined to 14% of our total closings during the second quarter of 2012 compared to 28% in 2011, reflecting the emphasis on our retail platform and our efforts to manage cash consumption.

## Edgar Filing: PHH CORP - Form 10-Q

Our Mortgage Servicing segment continued to be negatively impacted by an increase in foreclosure-related charges. During the first half of 2012, we experienced increased levels of loan repurchase and indemnification requests, primarily from the GSEs, that exceeded our historical experience. This increase in repurchase and indemnification requests caused a significant increase in our unresolved requests, and we recorded \$39 million of provisions during the second quarter of 2012, compared to \$65 million during the first quarter of 2012 and \$24 million during the second quarter of 2011.

During the second quarter of 2012, we received 1,171 repurchase and indemnification requests, compared to 1,407 in the first quarter of 2012 as further compared to 807 and 698 in the second and fourth quarters of 2011, respectively. The increase in repurchase requests in 2012 is primarily due to an increase in the number of loan file reviews by the GSEs as they focused more resources on clearing the backlog of previously requested loan files primarily related to the 2005 through 2008 origination years. The majority of repurchase requests continue to be related to the 2005 through 2008 origination years. We continue to monitor these trends and may need to further increase our loan repurchase and indemnification liability if the elevated levels of repurchase requests continue. Additionally, an increased level of repurchase requests could result in an increased use of cash, as compared to prior periods, to fund loan repurchases or make payments under loan indemnification agreements. We expect foreclosure losses to remain elevated throughout 2012, and potentially into 2013, as investors continue to review both performing and non-performing loans for potential underwriting defects and representation and warranty violations. See Risk Management for additional information regarding our repurchase obligations and potential exposure.

Table of Contents

Our Fleet Management Services segment continued to grow earnings in the second quarter of 2012, driven by growth in our Net investment in leases as well as increases in maintenance service, fuel, and accident management average units.

**Industry Trends**

**Regulatory Trends**

We are subject to numerous federal, state and local laws and regulations and may be subject to various judicial and administrative decisions imposing various requirements and restrictions on our business. By agreement with our private label clients in our mortgage business, we are required to comply with additional requirements that our clients may be subject to through their regulators. These laws, regulations and judicial and administrative decisions include those pertaining to the following areas:

- Real estate settlement procedures;
  
- Consumer credit provisions; fair lending, fair credit reporting and truth in lending;
  
- The establishment of maximum interest rates, finance charges and other charges;
  
- Secured transactions; collections, foreclosure, repossession and claims-handling procedures;
  
- Privacy regulations providing for the use and safeguarding of non-public personal financial information of borrowers and guidance on non-traditional mortgage loans issued by the federal financial regulatory agencies;
  
- Taxing and licensing of vehicles and environmental protection;
  
- Insurance regulations and licensing requirements pertaining to standards of solvency that must be met and maintained; reserves and provisions for unearned premiums, losses and other obligations and deposits of securities for the benefit of policyholders.

## Edgar Filing: PHH CORP - Form 10-Q

In January 2012, we were notified that the Bureau of Consumer Financial Protection (the CFPB ) had opened an investigation to determine whether our mortgage insurance premium ceding practices to captive reinsurers comply with the Real Estate Settlement Procedures Act and other laws enforced by the CFPB. The CFPB requested certain related documents and information for review. During the second quarter of 2012, the CFPB requested further production of documents and answers to written questions. We have provided reinsurance services in exchange for premiums ceded and believe that we have complied with the Real Estate Settlement Procedures Act and other laws applicable to the Company s mortgage reinsurance activities. We did not provide reinsurance on loans originated after 2009. There can be no assurance that this investigation will not result in the imposition of any penalties or fines against us or our subsidiaries.

We have received inquiries and requests for information from regulators and attorneys general of certain states as well as from the Committee on Oversight and Government Reform of the U.S. House of Representatives and the U.S. Senate Judiciary Committee requesting information as to our mortgage origination and servicing practices, including our foreclosure processes and procedures. There also has been a continued focus on foreclosure practices by Fannie Mae and Freddie Mac. While we have not been assessed any material fines or penalties from regulatory agencies resulting from our mortgage origination or servicing practices to date, Fannie Mae and Freddie Mac have assessed compensatory fees against us for failing to meet certain foreclosure timelines specified in their respective servicing guides. We expect that the higher level of legislative and regulatory focus on mortgage origination and servicing practices will result in higher legal, compliance and servicing related costs as well as potential regulatory fines and penalties. It is also reasonably possible that we could experience an increase in mortgage origination or servicing related litigation in the future.

Table of Contents

**Mortgage Production Trends**

As of July 2012, Fannie Mae's *Economics and Mortgage Market Analysis* forecasts an increase in industry loan originations to \$1.5 trillion during 2012 compared to \$1.4 trillion during 2011, consisting of a 9% increase in both projected refinance and purchase originations. Refinance originations are sensitive to interest rates which have remained historically low, and Fannie Mae is projecting interest rates will remain at these levels for the remainder of 2012, positively impacting consumer demand. The increase in purchase originations is reflective of an increase in new and existing home sales expected during 2012.

During the first half of 2012, we experienced elevated levels of initial pricing margins compared to historical periods as mortgage interest rates remained low and high consumer demand persisted, which has continued into the third quarter of 2012. Although we expect margins to eventually decline from current levels, we believe that pricing margins could remain elevated throughout 2012 reflecting a longer term industry view of the returns required to manage the underlying risk of a mortgage production and servicing business. The Federal Housing Finance Agency increased guarantee fees on mortgage backed securities issued by Fannie Mae and Freddie Mac which became effective on April 1, 2012. We expect this increase, and potential future increases, will have the impact of increasing mortgage interest rates charged to borrowers, which could negatively impact conforming loan origination volumes.

The increased consumer demand for mortgage loans, coupled with more stringent underwriting guidelines and the increasingly complex regulatory compliance environment have led to longer processing cycle times across the mortgage industry. Consistent with these industry trends, we have experienced loan processing delays and other service issues that have negatively impacted customer service delivery in our Mortgage Production segment. As a result, we have failed to satisfy certain service level agreements and other performance provisions under some of our mortgage origination assistance agreements. During the six months ended June 30, 2012, we incurred an immaterial amount of contractual penalties related to these issues; however, a continuation of our failure to fully satisfy the terms of service-level and other performance provisions of these contracts could result in material penalties or the loss of client relationships. We are currently implementing measures to improve our loan processing and customer service delivery in an effort to more fully satisfy the terms of our mortgage origination assistance agreements.

**Mortgage Servicing Trends**

Repurchase requests have been volatile in recent periods, and we have seen a significant increase in repurchase requests, primarily from the Agencies. These requests have especially been concentrated in loans originated during 2005 through 2008. This trend has accelerated during 2012, as repurchase requests increased by 89% in the first half of 2012 compared to the second half of 2011, and the amount of outstanding repurchase requests as of June 30, 2012 increased to \$297 million from \$222 million as of December 31, 2011. The Federal Housing Finance Agency has committed to reducing taxpayer losses from the support of Fannie Mae and Freddie Mac, and the strict enforcement of representation and warranty provisions provides the Agencies with an effective means of loss mitigation. We believe repurchase requests and foreclosure costs will continue to remain high during 2012 and potentially into 2013. We expect that the Agencies will continue to focus on losses from origination years prior to 2009, since losses from those years have been intensified by the poor economic environment and challenging conditions in the housing market. Although repurchase requests have been primarily concentrated in loans originated during 2005 through 2008, the Agencies have also increased their reviews of more current loan production, which could further increase future repurchase activity.

Table of Contents

In addition to the increased focus on loan repurchases and indemnifications, we have experienced higher reinsurance losses as a result of the continued weakness in the housing market coupled with an elevated level of delinquency and foreclosure experience. We paid \$30 million in reinsurance claims during the six months ended June 30, 2012, which included \$8 million paid in connection with the reinsurance agreement that was terminated in the second quarter of 2012. The claim payments for our one remaining inactive reinsurance contract are expected to remain high throughout 2012 as foreclosures are completed and insurance claims are processed; however, we do not expect paid claims to remain at current levels since we have reached the maximum loss thresholds for certain origination years. We hold cash and securities in trust related to our potential obligation to pay such claims, which were \$130 million and were included in Restricted cash, cash equivalents and investments in the accompanying Condensed Consolidated Balance Sheets as of June 30, 2012. We expect that the amount currently held in trust will be significantly higher than future claims for reinsurance losses.

See Risk Management for additional information regarding mortgage reinsurance and loan repurchases.

**Fleet Management Services Trends**

The fleet management industry continues to be influenced by the relative strength of the U.S. economy and we would expect to see improvement in the industry if the U.S. economy improves. Although we have experienced a decline in our leased units in recent years, our net investment in leases has increased as our mix has changed to include more expensive truck and service-type vehicles. We have seen positive trends in our service units and we expect to balance the growth in our service unit counts with our leased units during 2012.

Table of Contents**RESULTS OF OPERATIONS****Consolidated Results**

The following table presents our consolidated results of operations:

	Three Months Ended June 30,		Six Months Ended June 30,

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
<b>Reportable Segments Profit (Loss):(1)</b>				
Mortgage Production segment	\$ 78	\$ 25	\$ 195	\$ 77
Mortgage Servicing segment	(196)	(113)	(222)	(99)
Fleet Management Services segment	22	19	46	35

(1) Segment Profit (Loss) is described in Note 14, Segment Information, in the accompanying Notes to Condensed Consolidated Financial Statements.

*Mortgage Production Segment*

**Quarterly Comparison:**

- Segment profit was \$53 million higher compared to 2011 primarily due to 140 basis points of higher total margins and a 64% increase in fee-based loan closings, partially offset by a 10% decline in interest rate lock commitments expected to close.

Table of Contents

- Interest rate lock commitments expected to close decreased to \$6.8 billion from \$7.5 billion in 2011; however, applications increased by 21% over the same period reflecting the shift in mix to fee-based production. Total closings reflect the significant increase in refinance activity as refinance closings increased by 94% compared to 2011 due to the historically low interest rate environment.
- The mix of wholesale/correspondent originations declined to 14% in 2012 from 28% in 2011, reflecting our strategy to selectively manage originations in this platform.

**Year-to-Date Comparison:**

- Segment profit was \$118 million higher compared to 2011 primarily due to 129 basis points of higher total margins and a 9% increase in the volume of interest rate lock commitments expected to close. In addition, the prior year profit includes a \$68 million gain on the sale of 50.1% of the equity interests in STARS.
- Total mortgage applications increased by 39% compared to 2011 and interest rate lock commitments expected to close increased to \$13.6 billion from \$12.5 billion in 2011 due to lower market interest rates and higher consumer demand.

*Mortgage Servicing Segment*

**Quarterly Comparison:**

- Segment loss was unfavorably impacted by a \$15 million increase in foreclosure-related charges compared to 2011 related to a significant increase in loan repurchase and indemnification requests in 2012 as discussed above under *Executive Summary* .
- Loan servicing income for the second quarter of 2012 includes a loss of \$16 million on the termination of one of our inactive reinsurance contracts as discussed below under *Risk Management* .
- Segment loss was unfavorably impacted by a 104% increase in loan payoffs in our capitalized servicing portfolio compared to 2011, resulting in a \$21 million impact on the fair value of our mortgage servicing rights and an additional \$5 million of curtailment interest payments.

**Year-to-Date Comparison:**

- Segment loss was unfavorably impacted by a \$65 million increase in foreclosure-related charges compared to 2011 related to a significant increase in loan repurchase and indemnification requests in the first half of 2012, as discussed above under Executive Summary .
- Loan servicing income for the six months ended 2012 includes a loss of \$16 million on the termination of one of our inactive reinsurance contracts as discussed below under Risk Management .
- Segment loss was unfavorably impacted by a 68% increase in loan payoffs in our capitalized servicing portfolio as compared to 2011, resulting in a \$30 million impact on the fair value of our mortgage servicing rights and an additional \$7 million of curtailment interest payments.

*Fleet Management Services Segment*

**Quarterly Comparison:**

- Segment profit increased by \$3 million to \$22 million in 2012, driven by growth in net investment in leases, lower funding costs and higher units and usage of fee-based and asset-based management services.
- Maintenance service, fuel, and accident management average units all increased in 2012 compared to 2011.

Table of Contents

**Year-to-Date Comparison:**

- Segment profit increased by \$11 million to \$46 million in 2012, driven by growth in net investment in leases, lower funding costs and higher units and usage of fee-based and asset-based management services.
- Maintenance service, fuel, and accident management average units all increased in 2012 compared to 2011.
- The average number of leased vehicles declined by 3% compared to 2011; however, our net investment in leases increased by \$175 million compared to June 30, 2011.

The results of each of our reportable segments are discussed in detail below.

**Income tax expense**

We record our interim tax provisions or benefits by applying a projected full-year effective income tax rate to our quarterly pre-tax income or loss for results that we deem to be reliably estimable. Certain results dependent on fair value adjustments of our Mortgage Production and Mortgage Servicing segments are considered to not be reliably estimable and therefore we record discrete year-to-date income tax provisions on those results.

Our effective income tax rates for the six months ended June 30, 2012 and 2011 were 1.3% and 19.5%, respectively.

For the six months ended June 30, 2012, the rate was primarily impacted by: (i) the noncontrolling interest holder's portion of taxes on the income of PHH Home Loans; and (ii) the impact of applying statutory changes to apportionment weight, apportionment sourcing and corporate income tax rates that were enacted by various states, primarily New Jersey, in the first quarter of 2012.

For the six months ended June 30, 2011, the rate was primarily impacted by: (i) a decrease in our liability for tax contingencies resulting from the resolution and settlement with various taxing authorities including the conclusion of the IRS examination and review of our taxable years 2006 through 2009; and (ii) the noncontrolling interest holder's portion of taxes on the income of PHH Home Loans; partially offset by (iii) changes in the valuation allowance driven by state tax losses generated by our mortgage business.

See Note 8, "Income Taxes" in the accompanying Notes to Condensed Consolidated Financial Statements for further detail.

**Appraisal Services Business Joint Venture**

On March 31, 2011, we sold 50.1% of the equity interests in our appraisal services business, Speedy Title and Appraisal Review Services, ( STARS ) to CoreLogic, Inc. for a total purchase price of \$35 million. We retained a 49.9% equity interest in STARS, which is accounted for under the equity method.

For the six months ended June 30, 2012, earnings from the equity method investment in STARS of \$3 million are recorded as a component of Other income in the Mortgage Production segment. During the six months ended June 30, 2011, a \$68 million gain on the sale of STARS was recorded within Other income of the Mortgage Production segment, which consisted of the net present value of the purchase price from CoreLogic plus the \$34 million from the initial valuation of our equity method investment.

Table of Contents**Other**

We leverage a centralized corporate platform to provide shared services for general and administrative functions to our reportable segments. These shared services include support associated with, among other functions, information technology, enterprise risk management, internal audit, human resources, accounting and finance, marketing and communications. The costs associated with these shared general and administrative functions, in addition to the cost of managing the overall corporate function, are incurred and recorded within Other and allocated back to our reportable segments through a corporate overhead allocation. Other also includes intersegment eliminations and certain income and expenses that are not allocated back to our reportable segments.

The following table presents the revenues and expenses recorded in Other:

	Three Months Ended June 30,			Six Months Ended June 30,			
	2012	2011		2012	2011		
	(In millions)						
<b>Net revenues</b>	\$	\$	(1)	\$	(1)	\$	(2)
Salaries and related expenses		18	17		35		36
Occupancy and other office expenses		1	1		2		2
Fleet interest expense		(1)			(2)		(2)
Other depreciation and amortization		3	2		4		2
Other operating expenses		12	9		28		20
Corporate overhead allocation		(34)	(29)		(68)		(59)
<b>Total expenses</b>		(1)			(1)		(1)
<b>Net income (loss) before income taxes</b>	\$	1	\$	(1)	\$		(1)

*Net revenues*

Net revenues represent income that is not allocated to the reportable segments and intersegment eliminations.

*Salaries and Related Expenses*

Salaries and related expenses represent costs associated with operating corporate functions and our centralized management platform and consist of salaries, payroll taxes, benefits and incentives paid to shared service support employees. These expenses are primarily driven by the average number of permanent employees.

**Quarterly Comparison:** Salaries and related expenses increased by \$1 million compared to 2011 primarily due to an increase in management incentive compensation.

**Year-to-Date Comparison:** Salaries and related expenses decreased by \$1 million compared to 2011 primarily due to \$2 million in lower actual payments related to 2011 incentive compensation plans that was partially offset by an increase in management incentives related to 2012 compensation plans.

*Other Operating Expenses*

The components of Other operating expenses were as follows:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2012		2011	2012		2011
	(In millions)					
Professional fees	\$	8	\$	6	\$	18
Other expenses		4		3		10
Total	\$	12	\$	9	\$	28

Table of Contents

**Quarterly Comparison:** Professional fees increased by \$2 million compared to 2011, which was primarily attributable to an increase in information technology-related expenses associated with private label client implementations in our Mortgage Production segment.

**Year-to-Date Comparison:** Professional fees increased by \$4 million compared to 2011, which was primarily attributable to an increase in information technology-related expenses associated with private label client implementations in our Mortgage Production segment. Other expenses increased by \$4 million compared to 2011, which was primarily driven by computer software and hardware expenses associated with the continued development of our information technology infrastructure.

*Corporate Overhead Allocation*

The table below provides a summary of our corporate overhead allocation by segment:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
Mortgage Production segment	\$ 19	\$ 14	\$ 38	\$ 30
Mortgage Servicing segment	4	4	8	7
Fleet Management Services segment	11	11	22	22
Other	(34)	(29)	(68)	(59)
Total	\$	\$	\$	\$

The amount of expense allocated to each segment is based upon the actual and estimated usage by function or expense category or based on the relative size of the operating segment.

Table of Contents**Mortgage Production Segment**

The following tables present a summary of our financial results and key related drivers for the Mortgage Production segment and are followed by a discussion of each of the key components of Net revenues and Total expenses:

	Three Months Ended June 30,		Six Months Ended June 30,

Table of Contents

*Mortgage Production Statistics*

Mortgage loan originations are driven by the demand to fund home purchases and the demand to refinance existing loans. Purchase closings are influenced by the number of home sales and the overall condition of the housing market whereas refinance closings are sensitive to interest rate changes relative to borrowers' current interest rates. Refinance closings typically increase when interest rates fall and decrease when interest rates rise. Although the level of interest rates is a key driver of refinancing activity, there are other factors which influence the level of refinance closings including home prices, levels of home equity, underwriting standards and product characteristics.

As of July 2012, Fannie Mae's *Economics and Mortgage Market Analysis* shows an increase in mortgage industry origination volumes of approximately 62% and 37% during the second quarter and six months ended June 30, 2012, respectively, as compared to the same period of 2011. Refinance closings continued to be positively impacted by a sustained low interest rate environment despite the many borrowers who took advantage of refinance incentives during prior periods of low interest rates. Based on the July industry origination volumes reported by Fannie Mae, refinance closings represented 68% and 72% of total origination volumes during the second quarter and six months ended June 30, 2012, respectively.

The level of wholesale/correspondent closings can be influenced by a variety of factors, including overall industry capacity, pricing margins and the competitive landscape. Our decline in wholesale/correspondent volume reflects our efforts to manage cash consumption and our strategy to generate mortgage servicing rights with minimal use of cash. As of June 30, 2012, 24% of our outstanding Interest rate lock commitments (IRLCs) expected to close were wholesale/correspondent compared to 44% as of December 31, 2011. Wholesale/correspondent loans are generally less profitable than retail loans and have lower loan margins and expenses.

IRLCs represent an agreement to extend credit to a mortgage loan applicant, or an agreement to purchase a loan from a third-party originator, whereby the interest rate on the loan is set prior to funding. IRLCs expected to close are adjusted for the amount of loans expected to close in accordance with the terms of the commitment. IRLCs expected to close result in loans closed to be sold as we do not enter into interest rate lock commitments on fee-based closings.

**Quarterly Comparison:** Our total closings increased by \$3.1 billion (32%) compared to 2011 and were comprised of a \$3.8 billion increase in refinance closings offset by a \$706 million decrease in purchase closings. Refinance closings were positively impacted by the low interest rate environment and represented 61% of our total closing volumes during the second quarter of 2012 compared to 41% in 2011.

Wholesale/correspondent closings represented 14% and 28% of our total closing volumes in the second quarters of 2012 and 2011, respectively which reflects our shift in focus to ensure that our operations are cash flow positive and to manage our wholesale/correspondent originations to control cash consumption.

Applications increased by 21% compared to 2011 resulting from a historically low interest rate environment and higher consumer demand; however our IRLCs expected to close declined by 10% primarily due to the change in mix to a greater composition of fee-based production where we do not enter into an interest rate lock commitment.

## Edgar Filing: PHH CORP - Form 10-Q

***Year-to-Date Comparison:*** Our total closings increased by \$3.2 billion (14%) compared to 2011 and were comprised of a \$4.2 billion increase in refinance closings offset by a \$1.0 billion decrease in purchase closings. Refinance closings were positively impacted by the low interest rate environment and represented 67% of our total closing volumes during the six months ended June 30, 2012 compared to 58% in 2011.

Table of Contents

Wholesale/correspondent closings represented 23% and 29% of our total closing volumes in the six months ended June 30, 2012 and 2011, respectively which reflects our shift in focus to ensure that our operations are cash flow positive and to manage our wholesale/correspondent originations to control cash consumption.

A historically low interest rate environment and higher consumer demand compared to 2011 resulted in a 39% increase in application volume and a 9% increase in IRLCs expected to close.

*Mortgage Fees*

Retail closings and fee-based closings are key drivers of Mortgage fees. Mortgage fees consist of fee income earned on all loan originations, including loans closed to be sold and fee-based closings. Fee income consists of amounts earned related to application and underwriting fees and fees on cancelled loans. Appraisal and other income generated by our appraisal services business is included through the quarter ended March 31, 2011. Fee income also consists of amounts earned from financial institutions related to brokered loan fees and origination assistance fees resulting from our private-label mortgage outsourcing activities. Fees associated with the origination and acquisition of mortgage loans are recognized as earned.

**Quarterly Comparison:** Mortgage fees increased by \$27 million (48%) compared to 2011 primarily due to an \$18 million increase in origination assistance fees from private label clients resulting from a 53% increase in private label closing units, a \$5 million increase in appraisal income and a \$4 million increase in application revenue. The increases in appraisal income and application revenue were both primarily driven by a 42% increase in the number of retail closing units compared to 2011.

**Year-to-Date Comparison:** Mortgage fees increased by \$21 million (15%) compared to 2011 primarily due to a \$15 million increase in origination assistance fees from private label clients resulting from a 19% increase in private label closing units, a \$3 million increase in appraisal income and a \$3 million increase in application revenue. Both increases in appraisal income and application revenue were primarily driven by a 23% increase in the number of retail closing units compared to 2011.

*Gain on Mortgage Loans, Net*

IRLCs expected to close are the primary driver of Gain on mortgage loans, net. Gain on mortgage loans, net includes realized and unrealized gains and losses on our mortgage loans, as well as the changes in fair value of our interest rate locks and loan-related derivatives. The fair value of our IRLCs is based upon the estimated fair value of the underlying mortgage loan, adjusted for: (i) the estimated costs to complete and originate the loan and (ii) the estimated percentage of IRLCs that will result in a closed mortgage loan. The valuation of our interest rate lock commitments and mortgage loans approximates a whole-loan price, which includes the value of the related mortgage servicing rights. Mortgage servicing rights are recognized and capitalized at the date the loans are sold and subsequent changes in the fair value are recorded in Change in fair value of mortgage servicing rights in the Mortgage Servicing segment.

Edgar Filing: PHH CORP - Form 10-Q

The components of Gain on mortgage loans, net were as follows:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2012		2011	2012		2011
	(In millions)					
Gain on loans	\$	199	\$	102	\$	362
Change in fair value of Scratch and Dent and certain non-conforming mortgage loans		(11)		5		(16)
Economic hedge results		20		12		92
Total change in fair value of mortgage loans and related derivatives		9		17		76
Total	\$	208	\$	119	\$	438
					\$	141
						37
						37
						178

Table of Contents

Gain on loans is primarily driven by the volume of IRLCs expected to close, total loan margins and the mix of wholesale/correspondent closing volume. Margins generally widen when mortgage interest rates decline and tighten when mortgage interest rates increase, as loan originators balance origination volume with operational capacity. For wholesale/correspondent closings and certain retail closings from our private label clients, the cost to acquire the loan reduces the gain from selling the loan into the secondary market.

Change in fair value of Scratch and Dent and certain non-conforming mortgage loans is primarily driven by additions, sales and changes in value of Scratch and Dent loans, which represent loans with origination flaws or performance issues.

Economic hedge results represent the change in value of mortgage loans, interest rate lock commitments and related derivatives, including the impact of changes in actual pullthrough as compared to our initial assumptions. We use derivative instruments to economically hedge changes in value of mortgage loans and interest rate lock commitments from the date of interest rate lock commitment through the date the loan is sold into the secondary market. These derivatives are intended to mitigate the changes in value attributable to changes in interest rates. Economic hedge results also includes changes in value of mortgage loans held for sale due to changes in expected execution upon sale which may not be interest rate related and would not be offset by changes in value of derivative instruments.

**Quarterly Comparison:** Gain on loans increased by \$97 million compared to 2011 primarily due to higher total loan margins that was partially offset by a 10% decrease in IRLCs expected to close. Average initial loan margins increased by 140 basis points primarily due to a reduction in mortgage interest rates and higher consumer demand.

For the second quarter of 2012, the \$11 million unfavorable change in fair value of Scratch and Dent and certain non-conforming loans was primarily attributable to additions to the population of Scratch and Dent loans resulting from an increase in repurchases. For the second quarter of 2011, the \$5 million favorable change in fair value of Scratch and Dent and certain non-conforming loans was primarily due to the sale of Scratch and Dent loans at a gain and an increase in the estimated fair value of the remaining population.

The \$8 million increase in economic hedge results compared to 2011 was driven by favorable execution gains on mortgage loans sold coupled with lower interest rate volatility that was partially offset by a lower impact of actual pullthrough of mortgage loans as compared to initial assumptions.

**Year-to-Date Comparison:** Gain on loans increased by \$221 million compared to 2011 primarily due to a 9% increase in IRLCs expected to close and higher total loan margins. Average initial loan margins increased by 129 basis points primarily due to a reduction in mortgage interest rates and higher consumer demand.

For the six months ended June 30, 2012, the \$16 million unfavorable change in fair value of Scratch and Dent and certain non-conforming loans was primarily attributable to additions to the population of Scratch and Dent loans resulting from an increase in repurchases that was partially offset by the sale of Scratch and Dent loans at a gain. For the six months ended June 30, 2011, the change in fair value of Scratch and Dent and certain non-conforming loans was impacted by the sale of Scratch and Dent loans at a gain and an increase in the estimated fair value of the remaining population which was offset by additions to Scratch and Dent loans resulting from repurchases.

## Edgar Filing: PHH CORP - Form 10-Q

The \$55 million increase in economic hedge results compared to 2011 was driven by favorable execution gains on mortgage loans sold coupled with lower interest rate volatility and a higher impact of actual pullthrough of mortgage loans as compared to initial assumptions.

Table of Contents

*Mortgage Net Finance Expense*

Mortgage net finance expense allocable to the Mortgage Production segment consists of interest income on mortgage loans, interest expense allocated on debt used to fund mortgage loans and an allocation of interest expense for working capital. Mortgage net finance expense is primarily driven by the average balance of loans held for sale, the average volume of outstanding borrowings, the note rate on loans held for sale and the cost of funds rate of our outstanding borrowings. A significant portion of our loan originations are funded with variable-rate short-term debt.

**Quarterly Comparison:** Mortgage net finance expense increased by \$9 million compared to 2011 and was comprised of an \$8 million (29%) increase in Mortgage interest expense and a \$1 million (5%) decrease in Mortgage interest income. The increase in Mortgage interest expense was related to higher allocated financing costs related to an increase in the average balance and cost of funds rate of corporate unsecured borrowings coupled with the higher average balance of loans held for sale. The decrease in Mortgage interest income was primarily due to a lower average note rate of loans held for sale.

**Year-to-Date Comparison:** Mortgage net finance expense increased by \$23 million compared to 2011 and was comprised of a \$14 million (23%) increase in Mortgage interest expense and a \$9 million (18%) decrease in Mortgage interest income. The increase in Mortgage interest expense was related to higher allocated financing costs related to an increase in the average balance of corporate unsecured borrowings, partially offset by the lower average balance of loans held for sale. The decrease in Mortgage interest income was primarily due to a lower average balance of loans held for sale and a lower note rate of loans held for sale.

*Other Income*

**Year-to-Date Comparison:** Other income decreased by \$69 million compared to 2011 primarily due to a \$68 million gain related to the March 31, 2011 sale of 50.1% of our equity interests in Speedy Title and Appraisal Review Services.

*Salaries and Related Expenses*

Salaries and related expenses allocable to the Mortgage Production segment consist of salaries, payroll taxes, benefits and incentives paid to employees in our mortgage production operations and commissions paid to employees involved in the loan origination process.

The components of Salaries and related expenses were as follows:

**Three Months Ended  
June 30,**

**Six Months Ended  
June 30,**

Edgar Filing: PHH CORP - Form 10-Q

	2012		2011		2012		2011	
	(In millions)							
Salaries, benefits and incentives	\$	60	\$	50	\$	119	\$	109
Commissions		30		22		56		42
Contract labor and overtime		10		4		18		16
Total	\$	100	\$	76	\$	193	\$	167

Salaries, benefits and incentives are primarily driven by the average number of permanent employees. Commissions are primarily driven by the volume of retail closings. Contract labor and overtime are primarily driven by origination volumes and consists of overtime paid to permanent employees and amounts paid to temporary and contract personnel. We continue to balance the number of full-time employees and the use of temporary and contract personnel with anticipated loan origination volumes.

**Quarterly Comparison:** Salaries, benefits and incentives increased by \$10 million compared to 2011 primarily due to an increase in the average number of permanent employees in the mortgage production operations and an increase in management incentive compensation. The \$8 million increase in commissions was primarily attributable to a 36% increase in closings from our real estate channel which has higher commission rates than

Table of Contents

private label closings. Contract labor and overtime increased by \$6 million compared to 2011 and was driven by higher overall closing volumes.

**Year-to-Date Comparison:** Salaries, benefits and incentives increased by \$10 million compared to 2011 primarily due to an increase in the average number of permanent employees in the mortgage production operations and an increase in management incentive compensation. The \$14 million increase in commissions was primarily attributable to a 32% increase in closings from our real estate channel which has higher commission rates than private label closings. Contract labor and overtime increased by \$2 million compared to 2011 and was driven by higher overall closing volumes.

*Other Operating Expenses*

Other operating expenses allocable to the Mortgage Production segment consist of production-related direct expenses, allocations for corporate overhead and other production related expenses.

The components of Other operating expenses were as follows:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2012		2011	2012		2011
	(In millions)					
Production-related direct expenses	\$	32	\$	23	\$	61
Corporate overhead allocation		19		14		38
Other expenses		23		17		42
Total	\$	74	\$	54	\$	141

Production-related direct expenses represent variable costs directly related to the volume of loan originations and consist of appraisal, underwriting and other direct loan origination expenses. These expenses are incurred during the loan origination process and are primarily driven by applications. Corporate overhead allocations relate to segment allocations of shared general and administrative costs and costs associated with operating and managing corporate functions and are discussed above under Results of Operations Other. Other expenses consist of other production-related expenses that include, but are not limited to professional fees, information technology costs, outsourcing fees and customer service expenses.

**Quarterly Comparison:** Production-related direct expenses increased by \$9 million compared to 2011 primarily due to increases in the number of retail applications. The \$6 million increase in other expenses compared to 2011 was primarily attributable to higher costs associated with legal and regulatory compliance activities.

**Year-to-Date Comparison:** Production-related direct expenses increased by \$18 million compared to 2011 primarily due to increases in the number of retail applications. The \$3 million increase in other expenses compared to 2011 was primarily attributable to higher costs associated

with legal and regulatory compliance activities.

Table of Contents**Mortgage Servicing Segment**

The following tables present a summary of our financial results and key related drivers for the Mortgage Servicing segment, and are followed by a discussion of each of the key components of Net revenues and Total expenses:

	As of June 30,	
	2012	2011
	(\$ In millions)	
Ending total loan servicing portfolio	\$ 192,775	\$ 173,651

Salaries and related expenses	9	8	19	17
Occupancy and other office expenses	2	2	4	5
Other operating expenses	67	45	162	76
Total expenses	78	55	185	98
Segment loss	\$ (196)	\$ (113)	\$ (222)	\$ (99)

*Mortgage Net Finance Expense*

Mortgage net finance expense allocable to the Mortgage Servicing segment consists of interest income from escrow balances, income from investment balances (including investments held in reinsurance trusts) and interest expense allocated on debt used to fund our Mortgage servicing rights ( MSRs ), which is driven by the average volume of outstanding borrowings and the cost of funds rate of our outstanding borrowings.

**Quarterly Comparison:** Mortgage net finance expense decreased by \$1 million compared to 2011 and was comprised of a \$3 million (15%) decrease in Mortgage interest expense that was partially offset by a \$2 million (50%) decrease in Mortgage interest income. The decrease in Mortgage interest expense was primarily

Table of Contents

attributable to a \$2 million decrease in the interest expense allocated to fund our MSR's resulting from a lower average MSR balance. Mortgage interest expense and Mortgage interest income both decreased by \$1 million compared to 2011 due to the first quarter 2012 deconsolidation of a mortgage securitization trust where we sold the residual interest.

**Year-to-Date Comparison:** Mortgage net finance expense decreased by \$4 million compared to 2011 and was comprised of a \$7 million (18%) decrease in Mortgage interest expense that was partially offset by a \$3 million (38%) decrease in Mortgage interest income. The decrease in Mortgage interest expense was primarily attributable to a \$5 million decrease in the interest expense allocated to fund our MSR's resulting from a lower average MSR balance. Mortgage interest expense and Mortgage interest income both decreased by \$2 million compared to 2011 due to the first quarter 2012 deconsolidation of a mortgage securitization trust where we sold the residual interest.

*Loan Servicing Income*

The components of Loan servicing income were as follows:

	Three Months Ended		Six Months Ended	
	2012	June 30, 2011	2012	June 30, 2011
	(In millions)			
Servicing fees from capitalized portfolio	\$ 111	\$ 106	\$ 223	\$ 209
Subservicing fees	3	4	7	7
Late fees and other ancillary servicing revenue	13	12	30	29
Curtailed interest paid to investors	(10)	(5)	(20)	(13)
Net reinsurance loss	(17)		(19)	(7)
Total	\$ 100	\$ 117	\$ 221	\$ 225

The primary drivers for Loan servicing income are the average capitalized loan servicing portfolio and average servicing fee. Service fee revenue is driven by recurring servicing fees that are recognized upon receipt of the coupon payment from the borrower and recorded net of guaranty fees. For loans that are subserviced for others, we receive a nominal stated amount per loan which is less than our average servicing fee related to the capitalized portfolio. Curtailed interest paid to investors represents uncollected interest from the borrower that is required to be passed onto investors and is primarily driven by the number of loan payoffs. Net reinsurance loss represents premiums earned on reinsurance contracts, net of ceding commission and provisions for reinsurance reserves. Net reinsurance loss for the second quarter and six months ended June 30, 2012 also includes a loss related to the termination of one of our inactive reinsurance contracts. Refer to Risk Management Consumer Credit Risk Mortgage Reinsurance for a description.

**Quarterly Comparison:** The \$5 million increase in servicing fees from the capitalized portfolio was primarily related to a 5% increase in the average capitalized loan servicing portfolio compared to 2011. Curtailed interest paid to investors increased by \$5 million (100%) compared to 2011 primarily due to a 117% increase in loan payoffs in our total loan servicing portfolio. The \$17 million increase in net reinsurance loss compared to 2011 was driven by a \$16 million loss related to the termination of an inactive reinsurance contract and a \$1 million decrease in premiums earned under reinsurance agreements in runoff.

## Edgar Filing: PHH CORP - Form 10-Q

**Year-to-Date Comparison:** The \$14 million increase in servicing fees from the capitalized portfolio was primarily related to a 6% increase in the average capitalized loan servicing portfolio compared to 2011. Curtailment interest paid to investors increased by \$7 million (54%) compared to 2011 primarily due to a 72% increase in loan payoffs in our total loan servicing portfolio. The \$12 million increase in net reinsurance loss compared to 2011 was driven by a \$16 million loss related to the termination of an inactive reinsurance contract and a \$3 million decrease in premiums earned under reinsurance agreements in runoff that was partially offset by a \$7 million decrease in the provision for reinsurance reserves resulting from slowing loss progressions as the maximum loss rates for certain origination years have been reached.

Table of Contents*Valuation Adjustments Related to Mortgage Servicing Rights*

Valuation adjustments related to mortgage servicing rights include Change in fair value of mortgage servicing rights and Net derivative loss related to mortgage servicing rights. The components of Valuation adjustments related to mortgage servicing rights are discussed separately below.

*Change in Fair Value of Mortgage Servicing Rights:* The fair value of our MSR is estimated based upon projections of expected future cash flows considering prepayment estimates, our historical prepayment rates, portfolio characteristics, interest rates based on interest rate yield curves, implied volatility and other economic factors. Generally, the value of our MSR is expected to increase when interest rates rise and decrease when interest rates decline due to the effect those changes in interest rates have on prepayment estimates. Other factors noted above as well as the overall market demand for MSR may also affect the valuation.

The components of Changes in fair value of mortgage servicing rights were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
Actual prepayments of the underlying mortgage loans	\$ (50)	\$ (29)	\$ (103)	\$ (73)
Actual receipts of recurring cash flows	(10)	(13)	(21)	(26)
Market-related fair value adjustments	(145)	(117)	(102)	(92)
Total	\$ (205)	\$ (159)	\$ (226)	\$ (191)

The change in fair value of MSR due to actual prepayments is driven by two factors: (i) the number of loans that prepaid during the period and (ii) the current value of the mortgage servicing right asset at the time of prepayment. Market-related fair value adjustments represent the change in fair value of MSR due to changes in market inputs and assumptions used in the valuation model. Refer to Critical Accounting Policies and Estimates for a description of the updates made to the model used in the valuation of our mortgage servicing rights.

**Quarterly Comparison:** The \$21 million increase in actual prepayments of the underlying mortgage loans compared to 2011 was primarily due to a 104% increase in loan payoffs in the capitalized loan servicing portfolio which was partially offset by a 13 basis point decrease in the average MSR value of prepayments.

Market-related fair value adjustments decreased the value of our MSR by \$145 million during the second quarter of 2012 and was primarily attributable to a decrease in mortgage interest rates, including a 36 basis point decrease in the primary mortgage rate used to value our MSR. The \$117 million market-related fair value decrease during the second quarter of 2011 was primarily attributable to a decrease in mortgage interest rates and a \$20 million decrease in fair value related to higher projected foreclosure costs to service.

**Year-to-Date Comparison:** The \$30 million increase in actual prepayments of the underlying mortgage loans compared to 2011 was primarily due to a 68% increase in loan payoffs in the capitalized loan servicing portfolio which was partially offset by a 15 basis point decrease in the average MSR value of prepayments.

Market-related fair value adjustments decreased the value of our MSRs by \$102 million during the six months ended June 30, 2012 and was primarily attributable to a decrease in mortgage interest rates, including a 32 basis point decrease in the primary mortgage rate used to value our MSR. The \$92 million market-related fair value decrease during the six months ended June 30, 2011 was primarily attributable to a decrease in mortgage interest rates.

*Net Derivative Gain (Loss) Related to Mortgage Servicing Rights:* From time-to-time, we may use a combination of derivative instruments to protect against potential adverse changes in the fair value of our MSRs resulting from a decline in interest rates. The change in fair value of derivatives is intended to react in the opposite direction of the market-related change in the fair value of MSRs, and generally increase in value as interest rates decline and decrease in value as interest rates rise. The amount and composition of derivatives used depends on

Table of Contents

the exposure to loss of value on our MSR's, the expected cost of the derivatives, our expected liquidity needs and the increased earnings generated by origination of new loans resulting from the decline in interest rates.

During the second quarter of 2012, we closed out of our derivative contracts that were hedging a minor portion of our mortgage servicing rights based on the current profile of MSR valuation sensitivities relative to the leverage and net worth compliance requirements in our debt agreements. The value of derivatives related to our MSR's increased by \$2 million during the second quarter of 2012 and decreased by \$3 million during the six months ended June 30, 2012. There were no open derivatives related to MSR's during either period of 2011.

*Other Income*

Other income allocable to the Mortgage Servicing segment primarily consists of the change in the net fair value of a mortgage securitization trust where we hold a residual interest. These residual interests were sold during the first quarter of 2012.

**Year-to-Date Comparison:** The \$1 million reduction in Other income during the six months ended June 30, 2012 was the resulting loss on sale of our residual interests in the mortgage securitization trust which was partially offset by realized gains from the sale of available-for-sale securities associated with restricted investments held in our reinsurance trust accounts.

The \$3 million reduction in Other income during the six months ended June 30, 2011 was primarily attributable to an increase in projected credit losses of the underlying securitized mortgage loans which comprised the securitization trust.

*Other Operating Expenses*

The following table presents a summary of Other operating expenses:

	Three Months Ended			Six Months Ended		
	2012	June 30,	2011	2012	June 30,	2011
				(In millions)		
Foreclosure-related charges	\$	39	\$	24	\$	104
Corporate overhead allocation		4		4		8
Other expenses		24		17		50
Total	\$	67	\$	45	\$	162
						76

Foreclosure-related charges are driven by the volume of repurchase and indemnification requests, claims appeal success rates and expected loss severities. Repurchase requests from all investors and insurers have been volatile and the persistency of these recent trends remains extremely

uncertain. Expected loss severities are impacted by various economic factors including delinquency rates and home price values while our claims appeal success rate can fluctuate based on the validity and composition of repurchase demands and the underlying quality of the loan files. See Risk Management Consumer Credit Risk Loan Repurchases and Indemnifications for a further discussion of the sensitivity of our loan repurchase and indemnification liability.

Corporate overhead allocations relate to segment allocations of shared general and administrative costs and costs associated with operating and managing corporate functions and are discussed above under Results of Operations Other.

Other expenses include operating expenses of the Mortgage Servicing segment, including costs directly associated with servicing loans in foreclosure and real estate owned, professional fees and outsourcing fees.

**Quarterly Comparison:** Foreclosure-related charges increased by \$15 million compared to 2011 and were primarily attributable to a significant increase in our actual and future expected number of repurchase and indemnification requests from the GSEs and a decline in our claims appeal success rate that was partially offset by a decrease in our estimated future loss severities. The amount of unresolved repurchase and indemnification

Table of Contents

requests was 36% higher compared to June 30, 2011 and the total number of repurchase requests we received increased by 45% compared to the second quarter of 2011.

The \$7 million increase in other expenses compared to 2011 was primarily due to an increase in expenses associated with servicing delinquent and foreclosed loans and real estate owned that was partially offset by a reduction in liabilities for compensatory fees related to foreclosure processing which was driven by changes to the servicing guidelines that were announced during the second quarter of 2012.

**Year-to-Date Comparison:** Foreclosure-related charges were \$104 million during the six months ended June 30, 2012, compared to \$39 million during 2011. The increase is reflective of the significant increase in the actual and future expected number of repurchase and indemnification requests from the GSEs and a decline in our claims appeal success rate that was partially offset by a decrease in our estimated future loss severities. The total number of repurchase requests we received increased by 57% compared to the six months ended June 30, 2011.

The \$20 million increase in other expenses compared to 2011 was primarily due to an increase in expenses associated with servicing delinquent and foreclosed loans and real estate owned.

Table of Contents**Fleet Management Services Segment**

The following tables present a summary of our financial results and related drivers for the Fleet Management Services segment, and are followed by a discussion of each of the key components of our Net revenues and Total expenses:

	Average for the Three Months Ended June 30,		Average for the Six Months Ended June 30,	
	2012	2011	2012	2011
	(In thousands of units)			
Leased vehicles	267	274	268	276
Maintenance service cards	347	318	343	318
Fuel cards	301	293	299	291
Accident management vehicles	314	293	314	294

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(In millions)			
Fleet management fees	\$ 45	\$ 44	\$ 92	\$ 86
Fleet lease income	338	343	674	680
Other income	18	19	36	35
Net revenues	401	406	802	801
Salaries and related expenses	16	16	32	31
Occupancy and other office expenses	3	4	7	8
Depreciation on operating leases	303	309	604	615
Fleet interest expense	18	21	36	43
Other depreciation and amortization	2	2	5	5
Other operating expenses	37	35	72	64
Total expenses	379	387	756	766
Segment profit	\$ 22	\$ 19	\$ 46	\$ 35

*Fleet Management Fees*

The drivers of Fleet management fees are leased vehicles and service unit counts as well as the usage of fee-based services. Fleet management fees consist primarily of the revenues of our principal fee-based products: fuel cards, maintenance services, accident management services and monthly management fees for leased vehicles. Fleet management fees also include driver safety training services fees.

**Quarterly Comparison:** Fleet management fees increased by \$1 million (2%) compared to 2011 primarily due to higher usage of asset-based fleet management services related to asset dispositions.

## Edgar Filing: PHH CORP - Form 10-Q

**Year-to-Date Comparison:** Fleet management fees increased by \$6 million (7%) compared to 2011 primarily due to a \$4 million increase in fees associated with fee-based products resulting from higher client participation in driver safety training services and an increase in maintenance service card units. The remaining \$2 million increase in Fleet management fees compared to 2011 was due to higher usage of asset-based fleet management services related to asset dispositions.

Table of Contents*Fleet Lease Income*

The following table presents a summary of the components of Fleet lease income:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2012		2011	2012		2011
	(In millions)					
Leasing revenue	\$	334	\$	340	\$	677
Operating lease syndication revenue		4		3		3
Total	\$	338	\$	343	\$	680

Fleet lease income consists of leasing revenue related to operating and direct financing leases as well as the gross sales proceeds associated with our operating lease syndications. We originate certain leases with the intention of syndicating to banks and other financial institutions, which includes the sale of the underlying assets and assignment of any rights to the leases. Upon the transfer and assignment of operating leases that qualify for sales treatment we record the proceeds from the sale within Fleet lease income and recognize the cost of goods sold within Other operating expenses for the undepreciated cost of the asset sold.

Leasing revenue related to operating leases consists of an interest component for the funding cost inherent in the lease as well as a depreciation component for the cost of the vehicles under lease. Leasing revenue related to direct financing leases consists of an interest component for the funding cost inherent in the lease.

**Quarterly Comparison:** Leasing revenue decreased by \$6 million (2%) compared to 2011 primarily due to a 3% decline in the average number of leased vehicles, which was partially offset by an increase in net investment in leases reflecting the growth in average lease balances. The \$6 million decrease in leasing revenue was partially offset by a \$6 million decrease in Depreciation on operating leases as described below. The amount of gross sales proceeds related to operating lease syndications resulted in a \$1 million increase in Fleet lease income compared to 2011.

**Year-to-Date Comparison:** Leasing revenue decreased by \$10 million (1%) compared to 2011 primarily due to a 3% decline in the average number of leased vehicles, which was partially offset by an increase in net investment in leases reflecting the growth in average lease balances. The \$10 million decrease in leasing revenue was partially offset by an \$11 million decrease in Depreciation on operating leases as described below. The amount of gross sales proceeds related to operating lease syndications resulted in a \$4 million increase in Fleet lease income compared to 2011.

*Other Income*

Other income primarily consists of gross sales proceeds from our owned vehicle dealerships, the gain or loss from the sale of used vehicles and other ancillary revenues.

*Depreciation on Operating Leases*

Depreciation on operating leases is the depreciation expense associated with our vehicles under operating leases included in Net investment in fleet leases.

***Quarterly Comparison:*** Depreciation on operating leases decreased by \$6 million (2%) compared to 2011 primarily due to a 3% decline in the average number of leased vehicles which was partially offset by an increase in net investment in leases.

***Year-to-Date Comparison:*** Depreciation on operating leases decreased by \$11 million (2%) compared to 2011 primarily due to a 3% decline in the average number of leased vehicles which was partially offset by an increase in net investment in leases.

Table of Contents*Fleet Interest Expense*

Fleet interest expense is primarily driven by the average volume and cost of funds rate of outstanding borrowings and consists of interest expense associated with borrowings related to leased vehicles, changes in market values of interest rate cap agreements related to vehicle asset-backed debt and amortization of deferred financing fees.

**Quarterly Comparison:** Fleet interest expense decreased by \$3 million (14%) compared to 2011 primarily due to a favorable change in the cost of funds rates resulting from debt renewals and a decrease in the amortization of deferred financing fees.

**Year-to-Date Comparison:** Fleet interest expense decreased by \$7 million (16%) compared to 2011 primarily due to a favorable change in the cost of funds rates resulting from debt renewals and a decrease in the amortization of deferred financing fees.

*Other Operating Expenses*

The following table presents a summary of the components of Other operating expenses:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2012	2011		2012	2011	
	(In millions)					
Cost of goods sold	\$ 17	\$ 15	\$	32	\$ 27	\$
Corporate overhead allocation	11	11		22	22	
Other expenses	9	9		18	15	
Total	\$ 37	\$ 35	\$	72	\$ 64	\$

Cost of goods sold represents the acquisition cost of vehicles at our dealerships and the carrying value of certain operating leases syndicated to banks and other financial institutions. The gross sales proceeds from our owned dealerships are included in Other income and the proceeds from syndications are recorded within Fleet lease income. Corporate overhead allocations relate to segment allocations of shared general and administrative costs and costs associated with operating and managing corporate functions and are discussed above under Results of Operations Other.

**Quarterly Comparison:** The \$2 million increase in cost of goods sold compared to 2011 was primarily attributable to an increase in the amount of operating lease syndications.

## Edgar Filing: PHH CORP - Form 10-Q

***Year-to-Date Comparison:*** The \$5 million increase in cost of goods sold compared to 2011 was primarily attributable to an increase in the amount of operating lease syndications. Other expenses increased by \$3 million compared to 2011 primarily due to expenses associated with higher client participation in driver safety training services.

Table of Contents

## **RISK MANAGEMENT**

In the normal course of business we are exposed to various risks including, but not limited to, interest rate risk, consumer credit risk, commercial credit risk, counterparty credit risk, liquidity risk and foreign exchange risk. The Finance and Risk Management Committee of the Board of Directors provides oversight with respect to the assessment of our overall capital structure and its impact on the generation of appropriate risk adjusted returns, as well as the existence, operation and effectiveness of our risk management programs, policies and practices. Our Chief Risk Officer, working with each of our businesses, oversees governance processes and monitoring of these risks including the establishment of risk strategy and documentation of risk policies and controls.

### **Interest Rate Risk**

Our principal market exposure is to interest rate risk, specifically long-term Treasury and mortgage interest rates due to their impact on mortgage-related assets and commitments. Additionally, our escrow earnings on our mortgage servicing rights and our net investment in variable-rate lease assets are sensitive to changes in short-term interest rates such as LIBOR. We also are exposed to changes in short-term interest rates on certain variable rate borrowings including our mortgage warehouse asset-backed debt, vehicle management asset-backed debt and our unsecured revolving credit facility. We anticipate that such interest rates will remain our primary benchmark for market risk for the foreseeable future.

Refer to Item 3. Quantitative and Qualitative Disclosures About Market Risk for an analysis of the impact of 25 bps, 50 bps and 100 bps changes in interest rates on the valuation of assets and liabilities sensitive to interest rates.

### **Consumer Credit Risk**

Our exposures to consumer credit risk include:

- Loan repurchase and indemnification obligations from breaches of representation and warranty provisions of our loan sales or servicing agreements, which result in indemnification payments or exposure to loan defaults and foreclosures;
- Mortgage reinsurance losses; and
- A decline in the fair value of mortgage servicing rights as a result of increases in involuntary prepayments from increasing portfolio delinquencies.

*Loan Repurchases and Indemnifications*

Foreclosure-related reserves are maintained for probable losses related to repurchase and indemnification obligations and on-balance sheet loans in foreclosure and real estate owned. The liability for loan repurchases and indemnifications represents management's estimate of probable losses based on the best information available and requires the application of a significant level of judgment and the use of a number of assumptions. These assumptions include the estimated amount and timing of repurchase and indemnification requests, the expected success rate of defending against requests and estimated loss severities on repurchases and indemnifications. While the best information available is used in estimating our liability, our actual experience can vary significantly from our assumptions as the estimation process is inherently uncertain. Given the increased levels of repurchase requests and realized losses in recent periods, there is a reasonable possibility that future losses may be in excess of the recorded liability.

As of June 30, 2012, the estimated amount of reasonably possible losses in excess of the recorded liability was \$105 million. This estimate assumes that repurchases and indemnifications remain at an elevated level through the year ended December 31, 2013, our success rate in defending against requests declines and loss severities remain at current levels. Our estimate of reasonably possible losses does not represent probable losses and is based upon significant judgments and assumptions which can be influenced by many factors, including: (i) home prices and the levels of home equity; (ii) the criteria used by investors in selecting loans to request; (iii) borrower delinquency patterns; and (iv) general economic conditions.

Table of Contents

Actual losses incurred in connection with loan repurchases and indemnifications could vary significantly from and exceed the recorded liability. We may also be required to increase our loan repurchase and indemnification liability in the future. Accordingly, there can be no assurance that actual losses or estimates of reasonably possible losses associated with loan repurchases and indemnifications will not be in excess of the recorded liability or that we will not be required to increase the recorded liability in the future.

Foreclosure-related reserves consist of the following:

	<b>June 30, 2012</b>	<b>(In millions)</b>		<b>December 31, 2011</b>
Loan repurchase and indemnification liability	\$	140	\$	95
Allowance for probable foreclosure losses		21		19
Adjustment to value for real estate owned		14		13
Total	\$	175	\$	127

A summary of the activity in foreclosure-related reserves is as follows:

	<b>Three Months Ended June 30,</b>			<b>Six Months Ended June 30,</b>		
	<b>2012</b>		<b>2011</b>	<b>2012</b>		<b>2011</b>
			<b>(In millions)</b>			
Balance, beginning of period	\$	165	\$	115	\$	127
Realized foreclosure losses		(33)		(19)		(66)
Increase in reserves due to:						
Change in assumptions		39		24		104
New loan sales		4		2		10
Balance, end of period	\$	175	\$	122	\$	175

Table of Contents*Loan Repurchase & Indemnification Liability*

We subject the population of repurchase and indemnification requests received to a review and appeal process to establish the validity of the claim and corresponding obligation. The following table presents the unpaid principal balance of our unresolved requests by status:

	As of June 30, 2012			As of December 31, 2011		
	Investor Requests	Insurer Requests	Total	Investor Requests	Insurer Requests	Total
<b>Agency Invested:</b>						
Claim pending (1)	\$ 59	\$	\$ 59	\$ 33	\$ 1	\$ 34
Appealed (2)	29	12	41	24	10	34
Open to review (3)	94	20	114	101	14	115
Agency requests	182	32	214	158	25	183
<b>Private Invested:</b>						
Claim pending (1)	16		16	3		3
Appealed (2)	26	9	35	17	3	20
Open to review (3)	23	9	32	12	4	16
Private requests	65	18	83	32	7	39
Total	\$ 247	\$ 50	\$ 297	\$ 190	\$ 32	\$ 222

(1) Claim pending status represents loans that have completed the review process where we have agreed with the representation and warranty breach and are pending final execution.

(2) Appealed status represents loans that have completed the review process where we have disagreed with the representation and warranty breach and are pending response from the claimant. Based on claims received and appealed during the twelve months ended June 30, 2012 that have been resolved, we were successful in refuting approximately 90% of claims appealed.

(3) Open to review status represents loans where we have not completed our review process. We appealed approximately 70% of claims received and reviewed during the twelve months ended June 30, 2012.

Approximately 80% and 70% of the unpaid principal balance of our unresolved repurchase requests relates to loans originated between 2005 and 2008 as of June 30, 2012 and December 31, 2011, respectively.

See Note 9, *Credit Risk*, in the accompanying Notes to Condensed Consolidated Financial Statements for additional information regarding our foreclosure-related reserves.

*Mortgage Reinsurance*

In the second quarter of 2012, we terminated one of our inactive reinsurance contracts that resulted in a pre-tax loss of \$16 million for the second quarter and six months ended June 30, 2012 which was recorded in Loan servicing income in the Condensed Consolidated Statements of Operations. See Note 9, Credit Risk, in the accompanying Notes to Condensed Consolidated Financial Statements for additional information regarding the termination agreement.

We have remaining exposure to consumer credit risk through losses from one contract with a primary mortgage insurance company that is inactive and in runoff. We are required to hold securities in trust related to this potential obligation, which were \$130 million as of June 30, 2012 and were included in Restricted cash, cash equivalents and investments in the accompanying Condensed Consolidated Balance Sheets. As of June 30, 2012, a liability of \$43 million was included in Other liabilities in the accompanying Condensed Consolidated Balance Sheets for incurred and incurred but not reported losses associated with our mortgage reinsurance activities, which was determined on an undiscounted basis.

Table of Contents

A summary of the activity in reinsurance-related reserves is as follows:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2012	2011		2012	2011	
	(In millions)					
Balance, beginning of period	\$	72	\$	110	\$	84
Realized reinsurance losses(1)		(33)		(17)		(51)
Increase in liability for reinsurance losses(2)		4		4		10
Balance, end of period	\$	43	\$	97	\$	43

(1) Realized reinsurance losses for the three and six months ended June 30, 2012 includes \$21 million related to the release of reserves associated with the termination of an inactive reinsurance agreement.

(2) The increase in reinsurance reserves is recorded as an expense within Loan servicing income in the accompanying Condensed Consolidated Statements of Operations.

The following table summarizes certain information regarding mortgage loans that are subject to reinsurance by year of origination as of June 30, 2012:

Year of Origination:	Unpaid Principal Balance (UPB) (\$ In millions)	Maximum Potential Exposure to Reinsurance Loss	Average Credit Score(3)	Delinquencies(1)(3)	Foreclosures/ Real estate owned/ Bankruptcies(2)(3)
2003	\$ 208	\$ 50	690	5.20%	8.12%
2004	582	71	690	4.17%	7.99%
2005	534	16	693	4.65%	10.86%
2006	300		692	7.08%	11.52%
2007	770	2	699	4.58%	11.36%
2008	539	18	723	3.73%	5.95%
2009	321	7	758	0.57%	0.37%
Total	\$ 3,254	\$ 164	706	4.32%	8.61%

(1) Represents delinquent mortgage loans for which payments are 60 days or more outstanding as a percentage of the total unpaid principal balance.

(2) Calculated as a percentage of the total unpaid principal balance.

(3) Based on March 31, 2012 data.

**Commercial Credit Risk**

We are exposed to commercial credit risk for our clients under the lease and service agreements of our Fleet Management Services segment. We manage such risk through an evaluation of the financial position and creditworthiness of the client, which is performed on at least an annual basis. The lease agreements generally allow us to refuse any additional orders; however, the obligation remains for all leased vehicle units under contract at that time. The fleet management service agreements can generally be terminated upon 30 days written notice.

**Counterparty & Concentration Risk**

We are exposed to risk in the event of non-performance by counterparties to various agreements, derivative contracts, and sales transactions. In general, we manage such risk by evaluating the financial position and creditworthiness of counterparties, monitoring the amount for which we are at risk, requiring collateral, typically cash, in instances in which financing is provided and/or dispersing the risk among multiple counterparties.

Table of Contents

As of June 30, 2012, there were no significant concentrations of credit risk with any individual counterparty or group of counterparties with respect to our derivative transactions. Concentrations of credit risk associated with receivables are considered minimal due to our diverse client base. With the exception of the financing provided to customers of our mortgage business, we do not normally require collateral or other security to support credit sales.

## LIQUIDITY AND CAPITAL RESOURCES

We manage our liquidity and capital structure to fund growth in assets, to fund business operations, and to meet contractual obligations, including maturities of our indebtedness. In developing our liquidity plan, we consider how our needs may be impacted by various factors including maximum liquidity needs during the period, fluctuations in assets and liability levels due to changes in business operations, levels of interest rates, and working capital needs. We also assess market conditions and capacity for debt issuance in various markets we access to fund our business needs. Our primary operating funding needs arise from the origination and financing of mortgage loans, the purchase and funding of vehicles under management and the retention of mortgage servicing rights. Our liquidity needs can also be significantly influenced by changes in interest rates due to collateral posting requirements from derivative agreements as well as the levels of repurchase and indemnification requests from investors and insurers of loans that have been previously sold.

Sources of liquidity include: equity capital (including retained earnings); the unsecured debt markets; committed and uncommitted credit facilities; secured borrowings, including the asset-backed debt markets; cash flows from operations (including service fee and lease revenues); cash flows from assets under management; and proceeds from the sale or securitization of mortgage loans and lease assets.

We are continuing to monitor developments in regulations that may impact our businesses including the Dodd-Frank Act and ongoing GSE reforms that could have a material impact on our liquidity. For more information, see Part I Item 1A. Risk Factors Risk Related to our Company. The businesses in which we engage are complex and heavily regulated, and changes in the regulatory environment affecting our businesses could have a material adverse effect on our business, financial position, results of operations or cash flows. in our Form 10-K and Item 1A. Risk Factors Risk Related to our Company. Changes in existing U.S. government-sponsored mortgage programs or servicing eligibility standards could materially and adversely affect our business, financial position, results of operations or cash flows. in this Form 10-Q.

As of June 30, 2012, our near-term unsecured debt maturities include \$418 million of Term notes due March 1, 2013. Additionally, we may need greater liquidity in the short term to fund increases in loan repurchases and indemnifications as well as potential increased collateral posting requirements related to derivative and debt agreements.

On August 2, 2012, our existing Amended Credit Facility agreement was amended and restated, extending \$300 million of available commitments. Under the terms of the new facility (the Revolving Credit Facility), \$50 million of commitments expire on July 1, 2014 and \$250 million of commitments expire on August 2, 2015. Borrowings under the Revolving Credit Facility are subject to satisfaction of certain conditions, including compliance with a borrowing base coverage ratio test of unencumbered assets to unsecured debt of at least 1.2:1. See Note 15, Subsequent Events for further discussion of the facility.

We have historically been reliant on accessing the capital markets for unsecured debt in order to refinance or extend the maturities of our unsecured debt at the parent company level and we may do so in the future. There has been a prolonged period of uncertainty and volatility in

the economy, which may impair or limit our access to unsecured funding. Additionally, our senior unsecured long-term debt credit ratings are below investment grade, and as a result, our access to the public debt markets may be severely limited in comparison to the ability of investment grade issuers to access such markets.

**Liquidity and Capital Plan**

Our goals for 2012 include a focus on increasing liquidity and cash flow generation, addressing our near-term debt maturities and negotiating an extension of our unsecured revolving credit facility. Consistent with those goals, we

Table of Contents

have developed a liquidity and capital plan consisting of various steps to improve our liquidity and capital position, which may involve one or more of the following:

- (i) focusing our efforts to ensure that our operations are cash flow positive, which may include reductions in our correspondent mortgage originations;
- (ii) disposing of assets that are not necessary to support our business strategies, which may include the assets of our reinsurance business; and
- (iii) generating mortgage servicing rights with minimal use of cash.

We have taken the following actions in the six months ended June 30, 2012 to improve our liquidity and capital position:

- completed an offering of 6.0% Convertible notes due 2017 with \$243 million of net cash proceeds;
- repaid \$252 million of unsecured term debt, including the Convertible notes due 2012;
- generated \$78 million of cash from the sale of non-conforming mortgage loans and residual investments and the securitization of fleet leases;
- generated \$40 million of unrestricted cash from our reinsurance subsidiary, including \$24 million from the termination of a reinsurance agreement and \$16 million from the release of restricted cash in excess of the trust requirements;
- selectively originated loans in our wholesale/correspondent platform with minimal cash consumption; and
- aligned our business operations with established cash flow targets to support the repayment of our near-term unsecured debt maturities.

## Edgar Filing: PHH CORP - Form 10-Q

These actions generated \$109 million of unrestricted cash during the six months ended June 30, 2012, and combined with our cash flows from other operating, financing and investing activities, as discussed below, our Cash and cash equivalents increased by \$286 million from December 31, 2011.

In addition, in August 2012, we amended and restated our Amended Credit Facility. See Note 15, Subsequent Events for details.

We will continue to actively refine our liquidity plan and take all appropriate actions in an effort to ensure we have more than adequate liquidity to meet our debt maturities and other liabilities. There can be no assurances that we will be successful implementing this plan, or if we are successful, there can be no assurances that our plan will be sufficient to meet our liquidity needs. We believe that the execution of our liquidity and capital plan will provide sufficient liquidity to meet our debt service obligations, fund potential increases in repurchase and indemnification requests and operate our business. However, the execution of our plan may have a negative impact on our future results of operations, including revenue and net income.

Given our expectation for business volumes, we believe that our sources of liquidity are adequate to fund our operations for at least the next 12 months and to repay our upcoming maturities. We expect aggregate capital expenditures to be between \$40 million and \$45 million for 2012, in comparison to \$25 million for 2011.

Table of Contents**Cash Flows**

At June 30, 2012, we had \$700 million of Cash and cash equivalents, an increase of \$286 million from \$414 million at December 31, 2011. The following table summarizes the changes in Cash and cash equivalents:

	Six Months Ended June 30,			
	2012	2011	Change	
	(In millions)			
Cash provided by (used in):				
Operating activities	\$ 1,511	\$ 3,099	\$	(1,588)
Investing activities	(732)	(638)		(94)
Financing activities	(494)	(2,440)		1,946
Effect of changes in exchange rates on Cash and cash equivalents	1	(4)		5
Net increase in Cash and cash equivalents	\$ 286	\$ 17	\$	269

***Operating Activities***

Our cash flows from operating activities reflect the net cash generated or used in our business operations and can be significantly impacted by the timing of mortgage loan originations and sales. In addition to depreciation and amortization, the operating results of our reportable segments are impacted by the following significant non-cash activities:

- **Mortgage Production** Capitalization of mortgage servicing rights
- **Mortgage Servicing** Change in fair value of mortgage servicing rights
- **Fleet Management Services** Depreciation on operating leases

During the six months ended June 30, 2012, cash provided by operating activities was \$1.5 billion. This is primarily reflective of \$1.2 billion of net cash provided by the volume of mortgage loan sales in our Mortgage Production segment and \$21 million received from counterparties related to cash collateral posted on derivative agreements. Cash provided by operating activities was further driven by positive cash flows from our Mortgage Servicing and Fleet Management Services segments.

The net cash provided by the operating activities of our Mortgage Production segment resulted from a \$682 million decrease in the Mortgage loans held for sale balance in our Condensed Consolidated Balance Sheets between June 30, 2012 and December 31, 2011, which is the result of

## Edgar Filing: PHH CORP - Form 10-Q

timing differences between origination and sale as of the end of each period. The decrease in Mortgage loans held for sale also resulted in a decrease in Mortgage Asset-Backed Debt as further described in Financing Activities below.

During the six months ended June 30, 2011, cash provided by our operating activities was \$3.1 billion. This was reflective of \$2.9 billion of net cash provided by the volume of mortgage loan sales in our Mortgage Production segment and in the operating activities of our Fleet Management Services segment. Other adjustments and changes in other assets and liabilities, net primarily includes the \$68 million gain on the sale of an interest in our appraisal services business and a net cash outflow of \$200 million for cash collateral on derivative agreements.

### *Investing Activities*

Our cash flows from investing activities include cash outflows for purchases of vehicle inventory, net of cash inflows for sales of vehicles within the Fleet Management Services segment as well as changes in the funding requirements of Restricted cash, cash equivalents and investments for all of our business segments. Cash flows related to the acquisition and sale of vehicles fluctuate significantly from period to period due to the timing of the underlying transactions.

Table of Contents

During the six months ended June 30, 2012, cash used in our investing activities was \$732 million, which primarily consisted of \$814 million in net cash outflows from the purchase and sale of vehicles, partially offset by a \$76 million net decrease in Restricted cash, cash equivalents and investments primarily due to the release of restricted cash and investments held in trust to the primary mortgage insurer which resulted from the termination of one of our reinsurance agreements.

During the six months ended June 30, 2011, cash used in our investing activities was \$638 million, which primarily consisted of \$650 million in net cash outflows from the purchase and sale of vehicles, partially offset by \$20 million in net cash inflows from the sale of an interest in our appraisal services business.

***Financing Activities***

Our cash flows from financing activities include proceeds from and payments on borrowings under our vehicle management asset-backed debt, mortgage asset-backed debt and unsecured debt facilities. The fluctuations in the amount of borrowings within each period are due to working capital needs and the funding requirements for assets supported by our secured and unsecured debt, including Net investment in fleet leases, Mortgage loans held for sale and Mortgage servicing rights.

During the six months ended June 30, 2012, cash used in our financing activities was \$494 million and related to \$446 million of net payments on secured borrowings resulting from the decreased funding requirements for Mortgage loans held for sale described in Operating Activities and \$9 million of net payments on unsecured borrowings resulting from the repayment of the Convertible notes due 2012 which was offset by the issuance of the Convertible Senior Notes due 2017. Our financing activities also reflect our efforts to maximize secured borrowings against the available asset base.

During the six months ended June 30, 2011, cash used in our financing activities was \$2.4 billion and related to net payments on borrowings resulting from the decreased funding requirements for Mortgage loans held for sale described in Operating Activities and Investing Activities above.

**Debt**

We utilize both secured and unsecured debt as key components of our financing strategy. Our primary financing needs arise from our assets under management programs which are summarized in the table below:

	June 30, 2012	December 31, 2011
	(In millions)	
Restricted cash, cash equivalents and investments	\$ 497	\$ 574
Mortgage loans held for sale	1,976	2,658
Net investment in fleet leases	3,701	3,515

Edgar Filing: PHH CORP - Form 10-Q

Mortgage servicing rights		1,157		1,209
Total	\$	7,331	\$	7,956

Asset-backed debt is used primarily to support our investments in vehicle management and mortgage assets, and is secured by collateral which include certain Mortgage loans held for sale and Net investment in fleet leases, among other assets. The outstanding balance under the asset-backed debt facilities varies daily based on our current funding needs for eligible collateral. In addition, amounts undrawn and available under our revolving credit facility can also be utilized to supplement asset-backed facilities and provide for the funding of vehicles in the U.S. and Canada as well as the funding of mortgage originations.

Table of Contents

The following table summarizes our Debt as of June 30, 2012:

	Balance	(In millions)	Total Assets Held as Collateral(1)
Vehicle Management Asset-Backed Debt	\$ 3,324		\$ 3,953
Mortgage Asset-Backed Debt		1,789	1,866
Unsecured Debt		1,287	
Total	\$ 6,400		\$ 5,819

(1) Assets held as collateral are not available to pay our general obligations.

***Vehicle Management Asset-Backed Debt***

Vehicle management asset-backed debt primarily represents variable-rate debt issued by our wholly owned subsidiary, Chesapeake Funding LLC, to support the acquisition of vehicles used by our Fleet Management Services segment's U.S. leasing operations and debt issued by Fleet Leasing Receivables Trust ( FLRT ), a special purpose trust, used to finance leases originated by our Canadian fleet operation.

Vehicle management asset-backed funding arrangements consisted of the following facilities as of June 30, 2012:

	Balance	Total Capacity (In millions)	Available Capacity(1)	End of Revolving Period(2)	Estimated Maturity Date(3)
Chesapeake 2009-1	\$ 136	n/a	n/a	n/a	12/15/12
Chesapeake 2009-2	498	n/a	n/a	n/a	02/15/14
Chesapeake 2009-3	43	n/a	n/a	n/a	08/07/14
Chesapeake 2009-4	28	n/a	n/a	n/a	11/07/12
FLRT 2010-1	67	n/a	n/a	n/a	12/15/13
Term notes, in amortization	772				
Chesapeake 2011-2	350	\$ 350	\$	09/19/13	06/07/16
Chesapeake 2012-1	643	643		04/18/13	01/07/16
Term notes, in revolving period	993	993			
Chesapeake 2010-1	574	875	301	06/26/13	03/07/16
FLRT 2010-2	547	741	194	08/30/12	04/15/22
Chesapeake 2011-1	410	625	215	06/26/14	10/07/16
Variable funding-notes	1,531	2,241	710		
Other	28	28			
Total	\$ 3,324	\$ 3,262	\$ 710		

## Edgar Filing: PHH CORP - Form 10-Q

- (1) Capacity is dependent upon maintaining compliance with the terms, conditions, and covenants of the respective agreements and may be further limited by asset eligibility requirements.
  
- (2) During the revolving period, the monthly collection of lease payments allocable to each outstanding series creates availability to fund the acquisition of vehicles and/or equipment to be leased to customers. Upon expiration, the revolving period of the related series of notes ends and the repayment of principal commences, amortizing monthly with the allocation of lease payments until the notes are paid in full.
  
- (3) Represents the estimated final repayment date of the amortizing notes.

Table of Contents**Mortgage Asset-Backed Debt**

Mortgage asset-backed debt primarily represents variable-rate mortgage repurchase facilities to support the origination of mortgage loans. Mortgage repurchase facilities, also called warehouse lines of credit, are one component of our funding strategy, and they provide creditors a collateralized interest in specific mortgage loans that meet the eligibility requirements under the terms of the facility during the warehouse period. The source of repayment of the facilities is typically from the sale or securitization of the underlying loans into the secondary mortgage market. We utilize both committed and uncommitted warehouse facilities and we evaluate our needs under these facilities based on forecasted volume of mortgage loan closings and sales.

Our funding strategies for mortgage originations may also include the use of committed and uncommitted mortgage gestation facilities. Gestation facilities effectively finance mortgage loans that are eligible for sale to an agency prior to the issuance of the related MBS.

Mortgage asset-backed funding arrangements consisted of the following as of June 30, 2012:

	Balance	Total Capacity (In millions)	Available Capacity(1)	Maturity Date
<b>Debt:</b>				
<i>Committed facilities of PHH Mortgage:</i>				
Fannie Mae	\$ 652	\$ 1,000	\$ 348	12/15/12
Royal Bank of Scotland plc	187	500	313	06/21/13
Bank of America	50	415	365	10/11/12(2)
Barclays Bank PLC	69	350	281	12/11/12
Wells Fargo Bank	26	300	274	08/10/12(4)
Credit Suisse First Boston Mortgage Capital LLC	103	250(3)	147	05/22/13
<i>Committed facilities of PHH Home Loans:</i>				
Credit Suisse First Boston Mortgage Capital LLC	352	425(3)	73	05/22/13
Wells Fargo Bank	142	150	8	08/10/12(4)
Barclays Bank PLC	140	150	10	12/11/12
Committed repurchase facilities	1,721	3,540	1,819	
<i>Uncommitted facilities of PHH Mortgage:</i>				
Fannie Mae		2,000	2,000	n/a
Uncommitted repurchase facilities		2,000	2,000	
Servicing advance facility	68	120	52	06/30/13
Total	\$ 1,789	\$ 5,660	\$ 3,871	
<b>Off-Balance Sheet Gestation Facilities:</b>				
JP Morgan Chase	\$ 156	\$ 500	\$ 344	09/30/12

(1) Capacity is dependent upon maintaining compliance with the terms, conditions, and covenants of the respective agreements and may be further limited by asset eligibility requirements.

## Edgar Filing: PHH CORP - Form 10-Q

- (2) Provided certain conditions are met, the Bank of America facility may be renewed for an additional year at our request.
- (3) We may allocate a limited amount of capacity from the committed facilities with Credit Suisse First Boston Mortgage Capital LLC between PHH Mortgage and PHH Home Loans; however, the aggregate combined borrowing capacity cannot exceed \$675 million. The borrowing capacities in the table above reflects the maximum available to PHH Home Loans.
- (4) In July 2012, the Wells Fargo Bank facilities were amended and the respective maturity dates were extended to October 9, 2012.

Table of Contents**Unsecured Debt**

Unsecured credit facilities are utilized to fund our short-term working capital needs to fund our MSRs and to supplement asset-backed facilities and provide for a portion of the operating needs of our mortgage and fleet management businesses. As of and during the six months ended June 30, 2012, there were no amounts outstanding under the Amended Credit Facility.

Unsecured borrowing arrangements consisted of the following as of June 30, 2012:

	Balance	Balance at Maturity (In millions)	Total Capacity	Available Capacity	Maturity Date
4% notes due in 2014	\$ 218	\$ 250	n/a	n/a	09/01/14
6% notes due in 2017	192	250	n/a	n/a	06/15/17
Convertible notes	410	500			
9.25% notes due in 2016	449	450	n/a	n/a	03/01/16
7.125% notes due in 2013	420	418	n/a	n/a	03/01/13
Other	8	8	n/a	n/a	04/15/18
Term notes	877	876			
Amended Credit Facility			\$ 525	\$ 507 <sup>(1)</sup>	02/28/13 <sup>(2)</sup>
Other			5	5	09/30/12
Credit Facilities			\$ 530	\$ 512	
Total	\$ 1,287	\$ 1,376			

(1) Utilized capacity reflects \$18 million of letters of credit issued under the Amended Credit Facility, which are not included in Debt in the Condensed Consolidated Balance Sheet.

(2) In August 2012, the Amended Credit Facility was amended and restated as discussed in Note 15, Subsequent Events.

As of July 24, 2012, our credit ratings, and ratings outlook on our senior unsecured debt were as follows:

	Senior Debt	Short-Term Debt	Ratings Outlook/Watch
Moody's Investors Service	Ba2	NP	Negative
Standard & Poors	BB-	B	Negative
Fitch	BB	B	Negative

In the three months ended June 30, 2012, Fitch Ratings downgraded our long-term Issuer Default Ratings and senior unsecured debt rating to BB from BB+, removed us from Ratings Watch Negative and maintained our Rating Outlook as Negative. The downgrade reflects Fitch's assessment of a variety of factors, including but not limited to: an increase in potential mortgage loan repurchases, our hedge practices related to our mortgage servicing rights, and uncertainties regarding our liquidity profile.

## Edgar Filing: PHH CORP - Form 10-Q

Our senior unsecured long-term debt credit ratings are below investment grade, and as a result, our access to the public debt markets may be severely limited in comparison to the ability of investment grade issuers to access such markets.

A security rating is not a recommendation to buy, sell or hold securities, may not reflect all of the risks associated with an investment in our debt securities and is subject to revision or withdrawal by the assigning rating organization. Each rating should be evaluated independently of any other rating.

See Item 1A. Risk Factors Risk Related to Our Company Our senior unsecured long-term debt ratings are below investment grade (and were subject to recent downgrades) and, as a result, we may be limited in our ability to obtain or renew financing on economically viable terms or at all. in this Form 10-Q for more information.

Table of Contents

**Debt Covenants**

Certain of our debt arrangements require the maintenance of certain financial ratios and contain other affirmative and negative covenants, termination events, and other restrictions, including, but not limited to, covenants relating to material adverse changes, liquidity maintenance, restrictions on our indebtedness and the indebtedness of our material subsidiaries, mergers, liens, liquidations, sale and leaseback transactions, and restrictions on certain types of payments, including dividends and stock repurchases. Certain other debt arrangements, including the Fannie Mae committed facility, contain provisions that permit us or our counterparty to terminate the arrangement upon the occurrence of certain events, including those described below.

There were no significant amendments to the terms of debt covenants during the six months ended June 30, 2012. The covenants of the Amended Credit Facility were amended in August 2012. See Note 15, *Subsequent Events* for additional information.

As of June 30, 2012, we were in compliance with all financial covenants related to our debt arrangements.

During the six months ended June 30, 2012, the termination events for the Fannie Mae committed facility were amended to require that we maintain (i) on the last day of each fiscal quarter, consolidated net worth of at least \$1.0 billion; (ii) on the last day of each fiscal quarter, a ratio of indebtedness to tangible net worth no greater than 6.5 to 1; (iii) a minimum of \$1.0 billion in committed mortgage warehouse or gestation facilities, with no more than \$500 million of gestation facilities included towards the minimum, but excluding committed or uncommitted loan purchase arrangements or other funding arrangements from Fannie Mae and any mortgage warehouse capacity provided by government sponsored enterprises; and (iv) compliance with certain loan repurchase trigger event criteria related to the aging of outstanding loan repurchase demands by Fannie Mae.

Under certain of our financing, servicing, hedging and related agreements and instruments, the lenders or trustees have the right to notify us if they believe we have breached a covenant under the operative documents and may declare an event of default. If one or more notices of default were to be given, we believe we would have various periods in which to cure certain of such events of default. If we do not cure the events of default or obtain necessary waivers within the required time periods, the maturity of some of our debt could be accelerated and our ability to incur additional indebtedness could be restricted. In addition, an event of default or acceleration under certain of our agreements and instruments would trigger cross-default provisions under certain of our other agreements and instruments.

**CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

***Mortgage Servicing Rights.*** In the first quarter of 2012, we integrated an updated prepayment model used in the valuation of our mortgage servicing rights, which we believe is more closely aligned with the actual prepayment speeds of our capitalized servicing portfolio. Additionally, the new model utilizes a combination of standard default curves and current delinquency levels to project future delinquencies and foreclosures, whereas the previous model assumed current delinquency and foreclosure rates would remain constant over the life of the asset. Based upon the results of our analysis of the modeled value and validation of our value and current assumptions against third-party sources, there was no change to the overall value of MSR as a result of the prepayment model update.

See Part II Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates of our 2011 Form 10-K for further discussion of our critical accounting policies and estimates.

## **RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

For information regarding recently issued accounting pronouncements and the expected impact on our financial statements, see Note 1, Summary of Significant Accounting Policies in the accompanying Notes to Condensed Consolidated Financial Statements.

Table of Contents

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Our principal market exposure is to interest rate risk, specifically long-term Treasury and mortgage interest rates due to their impact on mortgage-related assets and commitments. Additionally, our escrow earnings on our mortgage servicing rights and our net investment in variable-rate lease assets are sensitive to changes in short-term interest rates such as LIBOR. We also are exposed to changes in short-term interest rates on certain variable rate borrowings including our mortgage asset-backed debt, vehicle management asset-backed debt and our unsecured revolving credit facility. We anticipate that such interest rates will remain our primary benchmark for market risk for the foreseeable future.

**Sensitivity Analysis**

We assess our market risk based on changes in interest rates utilizing a sensitivity analysis. The sensitivity analysis measures the potential impact on fair values based on hypothetical changes (increases and decreases) in interest rates.

We use a duration-based model in determining the impact of interest rate shifts on our debt portfolio, certain other interest-bearing liabilities and interest rate derivatives portfolios. The primary assumption used in these models is that an increase or decrease in the benchmark interest rate produces a parallel shift in the yield curve across all maturities.

We utilize a probability weighted option-adjusted spread model to determine the fair value of mortgage servicing rights and the impact of parallel interest rate shifts on mortgage servicing rights. The primary assumptions in this model are prepayment speeds, option-adjusted spread (discount rate) and weighted-average delinquency rates. However, this analysis ignores the impact of interest rate changes on certain material variables, such as the benefit or detriment on the value of future loan originations, non-parallel shifts in the spread relationships between mortgage-backed securities, swaps and Treasury rates and changes in primary and secondary mortgage market spreads. We rely on market sources in determining the impact of interest rate shifts for mortgage loans, interest rate lock commitments, forward delivery commitments on mortgage-backed securities or whole loans and option contracts. In addition, for interest-rate lock commitments, the borrower's propensity to close their mortgage loans under the commitment is used as a primary assumption.

Our total market risk is influenced by a wide variety of factors including market volatility and the liquidity of the markets. There are certain limitations inherent in the sensitivity analysis presented, including the necessity to conduct the analysis based on a single point in time and the inability to include the complex market reactions that normally would arise from the market shifts modeled.

We used June 30, 2012 market rates on our instruments to perform the sensitivity analysis. The estimates are based on the market risk sensitive portfolios described in the preceding paragraphs and assume instantaneous, parallel shifts in interest rate yield curves. These sensitivities are hypothetical and presented for illustrative purposes only. Changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship of the change in fair value may not be linear.

Table of Contents

The following table summarizes the estimated change in the fair value of our assets and liabilities sensitive to interest rates as of June 30, 2012 given hypothetical instantaneous parallel shifts in the yield curve:

	Down		Change in Fair Value		Up	
	100 bps	50 bps	Down 25 bps	Up 25 bps	50 bps	100 bps
(In millions)						
<b>Mortgage assets:</b>						
Restricted investments	\$ 1	\$ 1	\$ 1	\$ (1)	\$ (1)	\$ (2)
Mortgage loans held for sale	23	19	11	(14)	(31)	(72)
Interest rate lock commitments	59	47	27	(37)	(83)	(199)
Forward loan sale commitments	(88)	(68)	(39)	50	109	248
Option contracts	(2)	(1)	(1)	2	7	29
Total Mortgage loans held for sale, interest rate lock commitments and related derivatives	(8)	(3)	(2)	1	2	6
Mortgage servicing rights	(280)	(147)	(77)	79	156	300
Total mortgage assets	(287)	(149)	(78)	79	157	304
Total vehicle assets	2	1	1	(1)	(1)	(2)
Interest rate contracts						1
Total liabilities	(32)	(16)	(8)	8	15	31
Total, net	\$ (317)	\$ (164)	\$ (85)	\$ 86	\$ 171	\$ 334

**Item 4. Controls and Procedures****DISCLOSURE CONTROLS AND PROCEDURES**

As of the end of the period covered by this Form 10-Q, management performed, with the participation of our Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on that evaluation, management concluded that our disclosure controls and procedures were effective as of June 30, 2012.

**CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING**

There have been no changes in our internal control over financial reporting during the quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

## **PART II OTHER INFORMATION**

### **Item 1. Legal Proceedings**

For information regarding legal proceedings, see Note 10, Commitments and Contingencies in the accompanying Notes to Condensed Consolidated Financial Statements.

### **Item 1A. Risk Factors**

This Item 1A should be read in conjunction with Part I Item 1A. Risk Factors in our Form 10-K for the year ended December 31, 2011. Other than with respect to the risk factors discussed below, there have been no material changes from the risk factors disclosed in our Form 10-K.

*We are substantially dependent upon our secured and unsecured funding arrangements. If any of our funding arrangements are terminated, not renewed or otherwise become unavailable to us, we may be unable to find replacement financing on economically viable terms, if at all, which would have a material adverse effect on our business, financial position, results of operations and cash flows.*

We are substantially dependent upon various sources of funding, including unsecured credit facilities and other unsecured debt, as well as secured funding arrangements, including asset-backed securities, mortgage warehouse facilities and other secured credit facilities to fund mortgage loans and vehicle acquisitions, a significant portion of which is short-term in nature. Our access to both the secured and unsecured credit markets is subject to prevailing market conditions. Renewal of our existing series of, or the issuance of new series of, vehicle lease asset-backed notes on terms acceptable to us or our ability to enter into alternative vehicle management asset-backed debt arrangements could be adversely affected in the event of: (i) the deterioration in the quality of the assets underlying the asset-backed debt arrangement; (ii) increased costs associated with accessing or our inability to access the asset-backed debt market; (iii) termination of our role as servicer of the underlying lease assets in the event that we default in the performance of our servicing obligations or we declare bankruptcy or become insolvent or (iv) our failure to maintain a sufficient level of eligible assets or credit enhancements, including collateral intended to provide for any differential between variable-rate lease revenues and the underlying variable-rate debt costs. In addition, our access to and our ability to renew our existing mortgage asset-backed debt could suffer in the event of: (i) the deterioration in the performance of the mortgage loans underlying the asset-backed debt arrangement; (ii) our failure to maintain sufficient levels of eligible assets or credit enhancements; (iii) increased costs associated with accessing or our inability to access the mortgage asset-backed debt market; (iv) our inability to access the secondary market for mortgage loans; (v) termination of our role as servicer of the underlying mortgage assets in the event that (a) we default in the performance of our servicing obligations or (b) we declare bankruptcy or become insolvent or (vi) a lowering of our credit ratings.

Certain of our debt arrangements require us to comply with certain financial covenants and other affirmative and restrictive covenants, including requirements to post additional collateral or to fund assets that become ineligible under our secured funding arrangements. An uncured default of one or more of these covenants would result in a cross-default between and amongst our various debt arrangements. Consequently, an uncured default under any of our debt arrangements that is not waived by our lenders and that results in an acceleration of amounts payable to our lenders

## Edgar Filing: PHH CORP - Form 10-Q

or the termination of credit facilities would materially and adversely impact our liquidity, could force us to sell assets at below market prices to repay our indebtedness, and could force us to seek relief under the U.S. Bankruptcy Code, all of which would have a material adverse effect on our business, financial position, results of operations and cash flows.

If any of our credit facilities are terminated or are not renewed, including as a result of our breach or a lowering of our credit ratings, or if conditions in the credit markets worsen dramatically and it is not possible or economical for us to complete the sale or securitization of our originated mortgage loans or vehicle leases, we may be unable to find replacement financing on commercially favorable terms, if at all, which could adversely impact our operations and prevent us from: (i) executing our business plan and related risk management strategies; (ii) originating new mortgage loans or vehicle leases; or (iii) fulfilling commitments made in the ordinary course of business. These

Table of Contents

factors could reduce revenues attributable to our business activities or require us to sell assets at below market prices, either of which would have a material adverse effect on our overall business and consolidated financial position, results of operations and cash flows. Most of our mortgage asset backed debt facilities are 364-day facilities that mature within one year. Generally, these facilities require us to maintain a specified amount of available liquidity from other facilities. As such, our liquidity plan and compliance with debt covenants depends on our ability to renew multiple facilities within a short time frame.

***Our senior unsecured long-term debt ratings are below investment grade (and were subject to recent downgrades) and, as a result, we may be limited in our ability to obtain or renew financing on economically viable terms or at all.***

Our senior unsecured long-term debt ratings are below investment grade. As a result of our senior unsecured long-term debt credit ratings being below investment grade, our access to the public debt markets may be severely limited in comparison to the ability of investment grade issuers to access such markets. We may be required to rely on alternative financing, such as bank lines and private debt placements, and may also be required to pledge otherwise unencumbered assets. There can be no assurances that we would be able to find such alternative financing on terms acceptable to us, if at all. Furthermore, we may be unable to renew all of our existing bank credit commitments beyond the then-existing maturity dates. As a consequence, our cost of financing could rise significantly, thereby negatively impacting our ability to finance our mortgage loans held for sale, mortgage servicing rights and net investment in fleet leases. Any of the foregoing would have a material adverse effect on our business, financial position, results of operations and cash flows.

On December 21, 2011, Standard & Poor's Ratings Services ( S&P ) lowered our senior unsecured debt rating two notches with a negative outlook. S&P may lower our rating by another notch or more if we are unable to refinance the \$418 million aggregate principal amount of our debt maturing in 2013 or are unable to put in place sources of liquidity to fund our business satisfactory to S&P.

On January 10, 2012, Moody's Investors Service, Inc. ( Moody's ) affirmed our senior unsecured debt rating and corporate family rating and our commercial paper rating. Additionally, Moody's changed its outlook for our senior unsecured debt and corporate family ratings to negative from stable.

In addition, on May 30, 2012, Fitch removed our long-term issuer default rating and senior unsecured debt rating from Rating Watch Negative and lowered both ratings one notch with a negative rating outlook. Fitch may lower our ratings by another notch or more if losses arising from mortgage repurchase claims from the GSEs significantly exceed our operating cash flows and other liquidity sources; declines in mortgage origination cause our natural hedge ratio to materially worsen; or if we are unable to put in place sources of liquidity to fund our business satisfactory to Fitch.

The December 21, 2011 S&P downgrade and May 30, 2012 Fitch downgrade and any possible negative future action by S&P, Fitch or any of the other ratings agencies will exacerbate the risks described above. We cannot assure you what impact any debt ratings downgrade may have on our cost of capital, ability to incur new indebtedness or refinance our existing indebtedness or ability to retain or secure customers.

There can be no assurances that our credit rating by the primary ratings agencies reflects all of the risks of an investment in our debt securities. Our credit ratings are an assessment by the rating agency of our ability to pay our obligations. Any of our credit ratings are subject to revision or withdrawal at any time by the applicable rating agency. Actual or anticipated changes in our credit ratings will generally affect the market value

of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors on the market value of, or trading market for, our debt securities.

***We are highly dependent upon programs administered by Fannie Mae, Freddie Mac and Ginnie Mae. Failure to maintain our relationships with each of Fannie Mae, Freddie Mac and Ginnie Mae could materially and adversely affect our business, financial position, results of operations or cash flows.***

Our ability to generate revenues through mortgage loan sales to institutional investors in the form of mortgage-backed securities depends to a significant degree on programs administered by Fannie Mae, Freddie Mac, Ginnie Mae and others that facilitate the issuance of mortgage-backed securities in the secondary market. These entities

Table of Contents

play a powerful role in the residential mortgage industry, and we have significant business relationships with them. Our status as a Fannie Mae, Freddie Mac and Ginnie Mae approved seller/servicer is subject to compliance with each entity's respective selling and servicing guidelines and failure to meet such guidelines could result in the unilateral termination of our status as an approved seller/servicer.

During 2011, 92% of our mortgage loan sales were sold to, or were sold pursuant to programs sponsored by, Fannie Mae, Freddie Mac or Ginnie Mae. We also derive other material financial benefits from our relationships with Fannie Mae, Freddie Mac and Ginnie Mae, including the assumption of credit risk by these entities on loans included in mortgage-backed securities in exchange for our payment of guarantee fees, the ability to avoid certain loan inventory finance costs through streamlined loan funding and sale procedures and the use of mortgage warehouse facilities with Fannie Mae pursuant to which, as of June 30, 2012, we had total capacity of \$3.0 billion, made up of \$1.0 billion of committed and \$2.0 billion uncommitted capacity. Due to the downgrade of our credit rating by S&P on December 21, 2011, Fannie Mae had the right to terminate its \$1.0 billion committed early funding letter agreement (the "Committed Funding Letter Agreement"). On April 27, 2012, we renewed our master agreement with Fannie Mae and amended certain other agreements with Fannie Mae, including an amendment to the Committed Funding Letter Agreement (the "Amended Committed Funding Letter Agreement"). Pursuant to the Amended Committed Funding Letter Agreement, the termination event related to our credit ratings was removed and other termination events were added, most of which are generally consistent with existing covenants under our various other debt facilities. These additional termination events include, among others, a failure to maintain (i) on the last day of each fiscal quarter, consolidated net worth of at least \$1.0 billion; (ii) on the last day of each fiscal quarter, a ratio of indebtedness to tangible net worth no greater than 6.5 to 1; (iii) a minimum of \$1.0 billion in committed mortgage warehouse facilities or Gestation Facilities, with no more than \$500 million of Gestation Facilities included towards the minimum, but excluding committed or uncommitted loan purchase arrangements or other funding arrangements from Fannie Mae and any mortgage warehouse capacity provided by GSEs; and (iv) compliance with certain loan repurchase trigger event criteria related to the aging of outstanding loan repurchase demands by Fannie Mae. Unless earlier terminated, the Amended Committed Funding Letter Agreement expires on December 15, 2012.

In addition, we service loans on behalf of Fannie Mae and Freddie Mac, as well as loans that have been securitized pursuant to securitization programs sponsored by Fannie Mae, Freddie Mac and Ginnie Mae in connection with the issuance of agency guaranteed mortgage-backed securities and a majority of our mortgage servicing rights relate to these servicing activities. These entities establish the base service fee to compensate us for servicing loans as well as the assessment of fines and penalties that may be imposed upon us for failing to meet servicing standards.

***Changes in existing U.S. government-sponsored mortgage programs or servicing eligibility standards could materially and adversely affect our business, financial position, results of operations or cash flows.***

In January 2011, the Federal Housing Finance Agency directed Fannie Mae and Freddie Mac to develop a joint initiative to consider alternatives for future mortgage servicing structures and compensation. Under this proposal, the GSEs are considering potential structures in which the minimum service fee would be reduced or eliminated altogether. This would provide mortgage bankers with the ability to either sell all or a portion of the retained servicing fee for cash up front, or retain an excess servicing fee. While the proposal provides additional flexibility in managing liquidity and capital requirements, it is unclear how the various options might impact mortgage-backed security pricing and the related pricing of excess servicing fees. The GSEs are also considering different pricing options for non-performing loans to better align servicer incentives with MBS investors and provide the loan guarantor the ability to transfer non-performing servicing. The Federal Housing Finance Agency has indicated that any change in the servicing compensation structure would be prospective and the changes, if implemented, could have a significant impact on the entire mortgage industry and on the results of operations and cash flows of our mortgage business.

In February 2011 the Obama administration issued a report to Congress, and in February 2012 the Federal Housing Finance Agency issued a report to Congress outlining the long-term strategic plan for, and various options for long-term reform of Fannie Mae and Freddie Mac. These options involve gradually reducing the role of Fannie Mae and Freddie Mac in the mortgage market and ultimately winding down both

## Edgar Filing: PHH CORP - Form 10-Q

institutions such that the private sector provides the majority of mortgage credit. Such reforms may include, among other actions: (i) further reductions in conforming loan limits; (ii) increases in guarantee fees; (iii) standardization of servicing protocols; (iv) changes to servicer compensation; and (v) increased MBS disclosures. In addition, it is possible that some of

Table of Contents

these reforms could be accelerated depending on the outcome of the 2012 U.S. Presidential and Congressional elections, among other things. Any of these options are likely to result in higher mortgage rates in the future, which could have a negative impact on our Mortgage production business. Additionally, it is unclear what impact these changes will have on the secondary mortgage markets, mortgage-backed securities pricing, and competition in the industry.

The potential changes to the government-sponsored mortgage programs, and related servicing compensation structures, could require us to fundamentally change our business model in order to effectively compete in the market. Our inability to make the necessary changes to respond to these changing market conditions or loss of our approved seller/servicer status with any of these entities, would have a material adverse effect on our overall business and our consolidated financial position, results of operations and cash flows and could result in a lowering of our credit ratings. Any discontinuation of, significant reduction of or material change in, the operation or underwriting standards of these entities would likely prevent us from originating and selling most, if not all, of our salable mortgage loan originations and could result in the discontinuation of or material decrease in the availability of our mortgage warehouse facilities with Fannie Mae.

***Our Mortgage Production segment is substantially dependent upon our relationships with Realogy and Merrill Lynch Home Loans, a division of Bank of America, National Association, and the termination or non-renewal of our contractual agreements with these clients would materially and adversely impact our mortgage loan originations and resulting Net revenues and Segment profit (loss) of our Mortgage Production segment and this would have a material adverse effect on our overall business and our consolidated financial position, results of operations and cash flows.***

We have relationships with several clients that represent a significant portion of our revenues and mortgage loan originations for our Mortgage Production segment. In particular, Realogy and Merrill Lynch Home Loans, a division of Bank of America, National Association, represented approximately 22% and 21%, respectively, of our mortgage loan originations for the year ended December 31, 2011. The loss of any one of these clients, whether due to insolvency, their unwillingness or inability to perform their obligations under their respective contractual relationships with us, their termination of their respective contractual relationships with us due to our failure to fully satisfy our contractual obligations, or if we are not able to renew on commercially reasonable terms any of their respective contractual relationships with us, would materially and adversely impact our mortgage loan originations and resulting Net revenues and Segment profit (loss) of our Mortgage Production segment and this would also have a material adverse effect on our overall business and our consolidated financial position, results of operations and cash flows.

In the third quarter of 2011, we were unable to reach an agreement to renew our existing relationship with Charles Schwab, which represented 9% of our mortgage loan originations for the year ended December 31, 2011, as well as approximately \$8.9 billion of subserviced loans as of December 31, 2011.

***The termination of our status as the exclusive recommended provider of mortgage products and services promoted by Realogy's affiliates would have a material adverse effect on our business, financial position, results of operations or cash flows.***

We are party to a strategic relationship agreement dated as of January 31, 2005 between PHH Mortgage, PHH Home Loans, PHH Broker Partner, Realogy Services Venture Partner, Inc. and Cendant Corporation (now known as Avis Budget Group, Inc.). Under the Strategic Relationship Agreement we are the exclusive recommended provider of mortgage loans to the independent sales associates affiliated with the real estate brokerage business owned and operated by Realogy's affiliates and certain customers of Realogy. The marketing agreement entered into between Coldwell Banker Real Estate Corporation, Century 21 Real Estate LLC, ERA Franchise Systems, Inc., Sotheby's International Affiliates, Inc. and PHH Mortgage Corporation similarly provides that we are the exclusive recommended provider of mortgage loans and

## Edgar Filing: PHH CORP - Form 10-Q

related products to the independent sales associates of Realogy's real estate brokerage franchisees, which include Coldwell Banker Real Estate Corporation, Century 21 Real Estate LLC, ERA Franchise Systems, Inc. and Sotheby's International Affiliates, Inc.

In addition, the Strategic Relationship Agreement provides that Realogy has the right to terminate the covenant requiring it to exclusively recommend us as the provider of mortgage loans to the independent sales associates

Table of Contents

affiliated with the real estate brokerage business owned and operated by Realogy's affiliates and certain customers of Realogy, following notice and a cure period, if:

- we materially breach any representation, warranty, covenant or other agreement contained in the Strategic Relationship Agreement, the Marketing Agreement, trademark license agreements or certain other related agreements, including, without limitation, our confidentiality agreements in the PHH Home Loans Operating Agreement and the Strategic Relationship Agreement, and our non-competition agreements in the Strategic Relationship Agreement;
- we become subject to any regulatory order or governmental proceeding and such order or proceeding prevents or materially impairs PHH Home Loans' ability to originate mortgage loans for any period of time (which order or proceeding is not generally applicable to companies in the mortgage lending business) in a manner that adversely affects the value of one or more of the quarterly distributions to be paid by PHH Home Loans pursuant to the PHH Home Loans Operating Agreement;
- PHH Home Loans otherwise is not permitted by law, regulation, rule, order or other legal restriction to perform its origination function in any jurisdiction, but in such case exclusivity may be terminated only with respect to such jurisdiction; or
- PHH Home Loans does not comply with its obligations to complete an acquisition of a mortgage loan origination company under the terms of the Strategic Relationship Agreement.

If Realogy were to terminate its exclusivity obligations with respect to us, one of our competitors could replace us as the recommended provider of mortgage loans to Realogy and its affiliates and franchisees, which would result in our loss of most, if not all, of our mortgage loan originations, Net revenues and Segment profit (loss) of our Mortgage Production segment derived from Realogy's affiliates, which loss would have a material adverse effect on our overall business and our consolidated financial position, results of operations and cash flows.

Moreover, certain of the events that give Realogy the right to terminate its exclusivity obligations with respect to us under the Strategic Relationship Agreement would also give Realogy the right to terminate its other agreements and arrangements with us. For example, the PHH Home Loans Operating Agreement also permits Realogy to terminate the mortgage venture with us (i) upon our material breach of any representation, warranty, covenant or other agreement contained in the Strategic Relationship Agreement, the Marketing Agreement, the Trademark License Agreements or certain other related agreements that is not cured following any applicable notice or cure period; (ii) if we become subject to any regulatory order or governmental proceeding that prevents or materially impairs PHH Home Loans' ability to originate mortgage loans for any period of time (which order or proceeding is not generally applicable to companies in the mortgage lending business) in a manner that adversely affects the value of one or more of the quarterly distributions to be paid by PHH Home Loans pursuant to the PHH Home Loans Operating Agreement; (iii) in the event of a change in control of us, PHH Broker Partner Corporation or any other affiliate of ours involving certain competitors or other specified parties; (iv) if PHH Home Loans fails to make scheduled distributions pursuant to the PHH Home Loans Operating Agreement; (v) in the event of the bankruptcy or insolvency of us or PHH Mortgage; or (vi) upon any act or omission by us or our subsidiaries that causes or would reasonably be expected to cause material harm to Realogy or any of its subsidiaries. Upon a termination of the PHH Home Loans joint venture by Realogy or its affiliates, Realogy will have the right either (i) to require that we or certain of our affiliates purchase all of Realogy's interest in PHH Home Loans; or (ii) to cause us to sell our interest in PHH Home Loans to an unaffiliated third party designated by certain of Realogy's affiliates. If we were required to purchase Realogy's interest in PHH Home Loans, that could have an adverse impact on our liquidity. Additionally, any termination of PHH Home Loans will also result in a termination of the Strategic Relationship Agreement and our exclusivity rights under the Strategic Relationship Agreement. Pursuant to the terms of the PHH

## Edgar Filing: PHH CORP - Form 10-Q

Home Loans Operating Agreement, beginning on February 1, 2015, Realogy will have the right at any time upon two years' notice to us to terminate its interest in PHH Home Loans. If Realogy were to terminate PHH Home Loans or our other arrangements with Realogy, including its exclusivity obligations with respect to us, any such termination would likely result in our loss of most, if not all, of our mortgage loan originations, Net revenues and Segment profit (loss) of our Mortgage Production segment derived from Realogy's affiliates, which loss would have a material adverse effect on our overall business and our consolidated financial position, results of operations, cash flows and liquidity.
