Subject Company: Uroplasty, Inc.  
Commission File No. 001-32632

Dear Valued Customer:

We are excited to share with you that Uroplasty has signed a merger agreement with Vision-Sciences to create a medical device company offering innovative technologies for the urology and gynecology markets. The combined company will be known as Cogentix Medical, with an expanded team to better serve our customers. In addition to the minimally-invasive Urgent PC and Macroplastique product lines, the combined global sales organization will be able to offer you Vision-Sciences' proprietary EndoSheath® technology platform. The EndoSheath innovation is an “always sterile, always ready” technology that reduces the risks of cross-contamination associated with the reuse or “reprocessing” of conventional endoscopes, which are difficult, costly, and time-consuming to clean and sterilize and, most importantly, susceptible to human error. There have been more than five million units of the EndoSheath technology sold with ZERO reported cases of cross contamination.

It is important to us that this combination does not disrupt your practice in any way. We expect the transaction to close in the first half of 2015. In the meantime, there will be no immediate changes to how we do business. Customers will continue to be served by their current Uroplasty representatives, and you can expect the same consistent level of engagement and support from your Uroplasty team that you currently receive.

As we progress through this interim period, it is our goal to continue to communicate with our valued customers and ensure no impact to you. Should you have any questions, please feel free to contact your sales representative, or you can contact Darin Hammers or me directly. We thank you for your business and look forward to continuing to serve you.

We wish you and your organization a healthy, happy holiday season.

Best regards,

Rob Kill
