PART I FINANCIAL INFORMATION

Item 1. Financial Statements

Introduction

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Form 10-Q may contain certain forward-looking statements. When used in this Form 10-Q or in any other presentation, statements which are not historical in nature, including the words “anticipate,” “estimate,” “should,” “expect,” “believe,” “intend,” “project” and similar expressions, are intended to identify forward-looking statements. They also include statements containing a projection of sales, earnings or losses, capital expenditures, dividends, capital structure or other financial terms.

The forward-looking statements in this Form 10-Q are based upon our management’s beliefs, assumptions and expectations of our future operations and economic performance, taking into account the information currently available to us. These statements are not statements of fact. Forward-looking statements involve risks and uncertainties, some of which are not currently known to us that may cause our actual results, performance or financial condition to be materially different from the expectations of future results, performance or financial condition we express or imply in any forward-looking statements. Some of the important factors that could cause our actual results, performance or financial condition to differ materially from expectations are:

- Covenants in our credit facilities may restrict our financial and operating flexibility.
- We may need additional funds and, if we are unable to obtain these funds, we may not be able to expand or operate our business as planned.
- ~~We~~ incurred significant losses in FY13, and there can be no assurance that such losses will not continue.
- We are required to make substantial quarterly cash payments over six years in respect of the settlement agreement, as described in Note 13 herein.
- We are subject to risk as a result of our international manufacturing operations.
- Our results of operations could be negatively affected by potential fluctuations in foreign currency exchange rates.
- Our results of operations may vary widely from quarter to quarter.

Rapid technological change could negatively affect sales of our products and our performance. Because we do not have long-term commitments from many of our customers, we must estimate customer demand, and errors in our estimates could negatively impact our inventory levels and net sales.

Our operations are substantially dependent upon key personnel. We rely on a limited number of suppliers and manufacturers for specific fabrics, and we may not be able to obtain substitute suppliers and manufacturers on terms that are as favorable, or at all, if our supplies are interrupted. We deal in countries where corruption is an obstacle. Particularly in Brazil, in the industry in which we operate, corruption is an obstacle.

We face competition from other companies, a number of which have substantially greater resources than we do.

Some of our sales are to foreign buyers, which exposes us to additional risks. A significant reduction in government funding for preparations for terrorist incidents could adversely affect our net sales.

We may be subject to product liability claims, and insurance coverage could be inadequate or unavailable to cover these claims.

Environmental laws and regulations may subject us to significant liabilities.

The market price of our common stock may fluctuate widely.

Our directors and executive officers have the ability to exert significant influence on our Company and on matters subject to a vote of our stockholders.

Provisions in our restated certificate of incorporation and by-laws and Delaware law could make a merger, tender offer or proxy contest difficult.

If we fail to maintain proper and effective internal controls or are unable to remediate a material weakness in our internal controls, our ability to produce accurate and timely financial statements could be impaired, and investors' views of us could be harmed.

Acquisitions could be unsuccessful.

Cybersecurity incidents could disrupt business operations, result in the loss of critical and confidential information and adversely impact our reputation and results of operations.

The other factors referenced in this Form 10-Q, including, without limitation, in the sections entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the factors described under "Risk Factors" disclosed in our fiscal 2013 Form 10-K.

We believe these forward-looking statements are reasonable; however, you should not place undue reliance on any forward-looking statements, which are based on current expectations. Furthermore, forward-looking statements speak only as of the date they are made. We undertake no obligation to publicly update or revise any forward-looking statements after the date of this Form 10-Q, whether as a result of new information, future events or otherwise. In light of these risks, uncertainties and assumptions, the forward-looking events discussed in this Form 10-Q might not occur. We qualify any and all of our forward-looking statements entirely by these cautionary factors.

LAKELAND INDUSTRIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Business

Lakeland Industries, Inc. and Subsidiaries (the “Company”), a Delaware corporation organized in April 1982, manufactures and sells a comprehensive line of safety garments and accessories for the industrial protective clothing and homeland security markets. The principal market for our products is the United States. No customer accounted for more than 10% of net sales during the six-month periods ended July 31, 2013 and 2012.

2. Basis of Presentation

The condensed consolidated financial statements included herein have been prepared by us, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission, and reflect all adjustments (consisting of only normal and recurring adjustments) which are, in the opinion of management, necessary to present fairly the condensed consolidated financial information required therein. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) have been condensed or omitted pursuant to such rules and regulations. While we believe that the disclosures are adequate to make the information presented not misleading, it is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in our Annual Report on Form 10-K and Form 10-K/A filed with the Securities and Exchange Commission for the fiscal year ended January 31, 2013.

Our consolidated financial statements have been prepared using the accrual method of accounting in accordance with GAAP.

Certain reclassifications of prior period data have been made to conform to current period classification.

The results of operations for the three and six-month periods ended July 31, 2013, are not necessarily indicative of the results to be expected for the full year.

In this Form 10-Q, “FY” means fiscal year; thus, for example, FY14 refers to the fiscal year ending January 31, 2014.

3. Principles of Consolidation

The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.

4. Inventories

Inventories consist of the following:

	July 31, 2013	January 31, 2013
Raw materials	\$ 17,516,428	\$ 16,361,872
Work-in-process	2,252,192	1,812,788
Finished goods	20,649,740	21,096,015
	\$ 40,418,360	\$ 39,270,675

Inventories include freight-in, materials, labor and overhead costs and are stated at the lower of cost (on a first-in, first-out basis) or market.

5. Earnings Per Share

Basic earnings per share are based on the weighted average number of common shares outstanding without consideration of common stock equivalents. Diluted earnings per share are based on the weighted average number of common and common stock equivalents. The diluted earnings per share calculation take into account the shares that may be issued upon exercise of stock options, reduced by the shares that may be repurchased with the funds received from their exercise, based on the average price during the period.

The following table sets forth the computation of basic and diluted earnings (loss) per share at July 31, 2013 and 2012.

	Three Months Ended July 31,		Six Months Ended July 31,	
	2013	2012	2013	2012
Numerator				
Net profit (loss) from continuing operations	\$4,171,399	\$1,643,830	\$3,326,919	\$(8,477,637)
Denominator				
Denominator for basic earnings (loss) per share				
Weighted-average shares outstanding before common share equivalents	5,352,034	5,271,997	5,341,578	5,235,957
Weighted average common equivalent shares resulting from the warrant issued June 28, 2013 to the subordinated debt lender LKL Investments LLC	207,539	0	103,769	0
Total weighted average, including common equivalent shares	5,559,573	5,271,997	5,445,348	5,235,957
Effect of dilutive securities from restricted stock plan and from dilutive effect of stock options	108,663	169,170	73,725	—
Denominator for diluted earnings (loss) per share (adjusted weighted average shares)	5,668,236	5,441,167	5,519,073	5,235,957

Diluted earnings (loss) per share from continuing operations	\$0.74	\$0.30	\$0.60	\$(1.62)

6. Long-Term Debt

On June 28, 2013, the Company and its wholly-owned subsidiary, Lakeland Protective Wear Inc. (collectively with the Company, the “Borrowers”), entered into a Loan and Security Agreement (the “Senior Loan Agreement”) with AloStar Business Credit, a division of AloStar Bank of Commerce, a state banking institution formed under Alabama law (the “Senior Lender”). The Senior Loan Agreement provides the Borrowers with a three year \$15 million revolving line of credit, at a variable interest rate based on LIBOR, with a first priority lien on substantially all of the United States and Canada assets of the Company, except for the Canadian warehouse.

On June 28, 2013, the Borrowers also entered into a Loan and Security Agreement (the “Subordinated Loan Agreement”) with LKL Investments, LLC, an affiliate of Arenal Capital, a private equity fund (the “Junior Lender”). The Subordinated Loan Agreement provides for a \$3.5 million term loan to be made to the Borrowers and a second priority lien on substantially all of the assets of the Company in the United States and Canada, except for the Canadian warehouse and except for a first lien on the Company’s Mexican facility. Pursuant to the Subordinated Loan Agreement, among other things, Borrowers issued to the Junior Lender a five year term loan promissory note (the “Note”). At the election of the Junior Lender, interest under the Note may be paid in cash, by payment in kind (PIK) in additional notes or payable in shares of common stock, par value \$.01 per share (“Common Stock”), of the Company (the “Interest Shares”). If shares of Common Stock are used to make interest payments on the Note, the number of Interest Shares will be based upon 100% of an average of the then current market value of the Common Stock, subject to the limitations set forth in the Subordinated Loan Agreement. The Junior Lender also, in connection with this transaction, received a common stock purchase warrant (the “Warrant”) to purchase up to 566,015 shares of Common

Stock (subject to adjustment), representing beneficial ownership of approximately 9.58% of the outstanding Common Stock of the Company, as of the closing of the transactions contemplated by the Subordinated Loan Agreement. The Company's receipt of gross proceeds of \$3.5 million in subordinated debt financing was a condition precedent set by Senior Lender, of which this transaction satisfied.

The proceeds from such financings have been used to fully repay the Company's former financing facility with TD Bank, N.A. in the amount of approximately US \$13.7 million. Also repaid upon closing of the financings was the warehouse loan in Canada with a balance of CDN \$1,362,000 Canadian dollars (approximately US \$1,320,000), payable to Business Development Bank of Canada.

The following is a summary of the material terms of the financings:

\$15 million Senior Credit Facility

· Borrowers are both Lakeland Industries, Inc. and its Canadian operating subsidiary Lakeland Protective Wear Inc.

· Borrowing pursuant to a revolving credit facility subject to a borrowing base calculated as the sum of:

o 85% of eligible accounts receivable as defined

o The lesser of 60% of eligible inventory as defined or 85% of net orderly liquidation value of inventory

o In transit inventory in bound to the US up to a cap of \$1,000,000, subject to a satisfactory appraisal of Alabama real estate, which was received and resolved in August 2013.

o Receivables and inventory held by the Canadian operating subsidiary to be included, up to a cap of \$2 million of availability

o Amount available at closing was approximately \$12.3 million

· Collateral

o A perfected first security lien on all of the Borrowers United States and Canadian assets, other than its Mexican plant and the Canadian warehouse

o Pledge of 65% of Lakeland US stock in all foreign subsidiaries other than 100% pledge of stock of its Canadian subsidiaries

· Collection

o All customers of Borrowers must remit to a lockbox controlled by Senior Lender or into a blocked account with all collection proceeds applied against the outstanding loan balance

· Maturity

o An initial term of three years from June 28, 2013 (the "Closing Date")

o Prepayment penalties of 3%, if prepaid prior to the first anniversary of Closing Date; 2% if prior to the second anniversary and 1% if prior to the third anniversary of the Closing Date

· Interest Rate

o Rate equal to LIBOR rate plus 525 basis points

o Initial rate and rate at July 31, 2013 of 6.25%

o Floor rate of 6.25%

· Fees: Borrowers shall pay to the Lender the following fees:

o Origination fee of \$225,000, paid on the Closing Date and being amortized over the term of loan and is included in other assets in the accompanying balance sheet

o 0.50% per annum on unused portion of commitment

o A non-refundable collateral monitoring fee in the amount of \$3,000 per month

o All legal and other out of pocket costs

· Financial Covenants

Borrowers covenanted that, from the closing date until the commitment termination date and full payment of the obligations to Senior Lender, Lakeland Industries, Inc. (the parent company), together with its subsidiaries on a consolidated basis, excluding its Brazilian subsidiary, shall comply with the following additional covenants:

· Fixed Charge Coverage Ratio. At the end of each fiscal quarter of Borrowers, commencing with the fiscal quarter ending July 31, 2013, Borrowers shall maintain a Fixed Charge Coverage Ratio of not less than 1.1 to 1.00 for the four quarter period then ending.

· Minimum Quarterly Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA"). Borrowers shall achieve, on a rolling basis excluding the operations of the Borrower's Brazilian subsidiary, EBITDA of not less than the following as of the end of each quarter as follows:

o July 31, 2013 for the two quarters then ended, \$2.1 million;

o October 31, 2013 for the three quarters then ended, \$3.15 million,
o January 31, 2014 for the four quarters then ended, and thereafter, \$4.1 million
Capital Expenditures. Borrowers shall not during any fiscal year make capital expenditures in an amount exceeding \$1 million in the aggregate

The Company is in compliance with all loan covenants of the Senior Debt at July 31, 2013.

Other Covenants

o Standard financial reporting requirements as defined

o Limitation on amounts that can be advanced to or on behalf of Brazilian operations, limited to \$200,000 for fiscal year ended January 2014 and nothing thereafter

o Limitation on total net investment in foreign subsidiaries of a maximum of \$1.0 million per annum
\$3.5 million Subordinated Debt Financing

Subordinated Loan Agreement

o Maturity date: June 28, 2018

Interest at 12.0% per annum through and including December 27, 2016, increased to 16% per annum on December 28, 2016 and 20% per annum on December 28, 2017. Until the first anniversary of the Closing, all interest shall either be paid in kind (PIK) or paid in shares of common stock of Lakeland, valued at 100% of the then market value, at the election of the Junior Lender

o All loan costs associated with the Subordinated Debt are included with the deferred debt costs from the Senior Loan and are being amortized over the life of the Senior Loan

o Warrant to purchase 566,015 shares of Common Stock (subject to adjustment), exercisable at \$0.01 per share. Warrant is subject to customary anti-dilution adjustment provisions, including for issuances of Common Stock or Common Stock equivalents at a price less than \$5.00 per share, computed on a weighted average basis, subject to a hard cap limitation of 1,068,506 shares on total number of shares to be issued from a combination of warrants, interest shares and price-protection anti-dilution adjustments. The Company is allowed to issue up to 500,000 shares without triggering this provision, to allow for restricted shares and other new compensatory issuances.

o Warrant exercise period is five years from the Closing Date

o Registration Rights: the Company commits to filing with the Securities and Exchange Commission a registration statement covering the shares issuable in connection with the subordinated loan transaction within 90 days of the Closing Date and to have it effective no later than 180 days from the Closing Date, which requirement has been complied with

o Investor Rights: Junior lender will have the right to designate one board member or a board observer, subject to certain conditions. As of September 12, 2013, the Junior lender has not exercised this right

o Subject to Senior Lender Subordination Agreement, the subordinated loan, may be repaid in increments of \$500,000 with Senior Lender approval, on or after June 28, 2014

o Early Termination Fees; Applicable Termination Percentage:

(a) Upon early repayment of the Term Loan, Borrowers shall be obligated to pay, in addition to all of the other Obligations then outstanding, an amount equal to the product obtained by multiplying \$3,500,000 by the applicable percentage set forth below:

5.00% if the effective date of termination occurs on or before June 28, 2014

3.00% if the effective date of termination occurs after June 28, 2014 but on or before June 28, 2015; or

1.00% if the effective date of termination occurs after June 28, 2015 but on or before June 28, 2016

Upon acceleration of the loan following a Change of Control, Borrowers shall be obligated to pay an additional fee equal to \$35,000

o Financial covenants setback 10% from those in the Senior Loan Agreement

o Second priority lien on substantially all of the assets of the Company in the United States and Canada, except a first lien on Mexican facility

o The Company is in compliance with all covenants of the Subordinated Debt at July 31, 2013.

Management has valued the Warrant at \$2,235,406. This has been treated as Original Issue Discount (OID) and is being amortized as additional interest over the five-year term of the related subordinated debt. The effective rate of return to the Junior Lender is computed by deducting the warrant valuation OID from the \$3.5 million principal leaving a valuation for the debt at closing of \$1,264,594. Including the 12% coupon and the amortization of the OID gives an effective per annum rate on just the debt of approximately 47%, assuming the warrant is broken out separately. However, Management views this to be one blended loan or transaction along with the Senior Debt of up to \$15 million at 6.25%, since the subordinated debt was an absolutely required condition of closing made by the Senior Lender.

Amounts outstanding as of July 31, 2013 under the Senior Lender Facility were \$10.4 million and under the Junior Lender Facility, \$3.5 million net of amortized original issue discount of \$2.2 million for a net value of \$1.3 million on the balance sheet.

Borrowings in Brazil and Subsequent Event

On April 19, 2013 the Company borrowed R\$560,000 (approximately US\$240,000) for working capital at an annual interest rate of 18.16%. On September 5, 2013, the Company borrowed R\$354,000 (approximately US\$150,000) for working capital at an interest rate of 1,80% per month. The total bank loans in Brazil outstanding at July 31, 2013 were the equivalent of US\$1.1 million and are included in short term borrowings on the balance sheet.

Borrowings in UK

On February 20, 2013 the Company and its UK subsidiary completed an agreement to obtain accounts receivable financing with HSBC Bank in the UK in the amount £1,000,000 (approximately US\$1,500,000 at current exchange rates), more fully described in the Company's Form 8-K which was filed on February 20, 2013. The balance outstanding under this facility at July 31, 2013 was the equivalent of US\$1.2 million and is included in short term borrowings on the balance sheet. The interest rate repayment rate is 3.46% and the term is for a minimum period of one year renewable.

Subsequent Event: China Loan

On August 12, 2013, the Company's China subsidiary borrowed approximately US\$0.8 million, as more fully described in the Company's Form 8-K which was filed on August 16, 2013.

7. *Major Supplier*

We purchased no more than 10% of our raw materials from any one supplier during the six-month period ended July 31, 2013.

8. *Employee Stock Compensation*

The Company has three main share-based payment plans: The Nonemployee Directors Option Plan (the “Directors Plan”) and two Restricted Stock Plans (the “2009 Equity Plan” and the “2012 Equity Plan”). Both the 2009 and 2012 Equity Plans have an identical structure. The below table summarizes the main provisions of each of these plans:

Nature and terms

Nonemployee Director Stock Option Plan	<p>The plan provides for an automatic one-time grant of options to purchase 5,000 shares of common stock to each nonemployee director newly elected or appointed. Options are granted at not less than fair market value, become exercisable commencing six months from the date of grant and expire six years from the date of grant. In addition, all nonemployee directors re-elected to the Company's Board of Directors at any annual meeting of the stockholders will automatically be granted additional options to purchase 1,000 shares of common stock on that date. Such plan expired at December 31, 2012, as to any new awards. Existing options will expire based on individual award dates.</p>
Restricted Stock Plan – employees	<p>Long-term incentive compensation three-year plan. Employees are granted potential share awards at the beginning of the three-year cycle at baseline and maximum amounts. The level of award and final vesting is based on the Board of Director's opinion as to the performance of the Company and management in the entire three-year cycle. All vesting is three-year "cliff" vesting - there is no early vesting. The valuation is based on the stock price at the grant date and amortized to expense over the three-year period.</p>
Restricted Stock Plan – directors	<p>Long-term incentive compensation three-year plan. Directors are granted potential share awards at the beginning of the three-year cycle at baseline and maximum amounts. The level of award and final vesting is based on the Board of Director's opinion as to the performance of the Company and management in the entire three-year cycle. All vesting is three-year "cliff" vesting - there is no early vesting. The valuation is based on the stock price at the grant date and amortized to expense over the three-year period.</p>
Matching award program	<p>All participating employees are eligible to receive one share of restricted stock awarded for each two shares of Lakeland stock purchased on the open market. Such restricted shares are subject to three-year time vesting. The valuation is based on the stock price at the grant date and amortized to expense over the three-year period.</p>
Compensation in stock in lieu of cash program - employees	<p>All participating employees are eligible to elect to receive any cash bonus in shares of restricted stock. Such restricted shares are subject to two-year time vesting. The valuation is based on the stock price at the grant date and amortized to expense over the two-year period. Since the employee is giving up cash for unvested shares, the amount of shares awarded is 133% of the cash amount based on the grant date stock price. The Chief Executive Officer, Chief Financial Officer and the Chief Operating Officer of the Company have all elected to take 30% of their cash compensation in restricted stock pursuant to this program, commencing in October 2012.</p>
Director fee in stock program	<p>All directors are eligible to elect to receive any director fees in shares of restricted stock. Such restricted shares are subject to two-year time vesting. The valuation is based on the stock price at the grant date and amortized to expense over the two-year period. Since the director is giving up cash for unvested shares, the amount of shares awarded is 133% of the cash amount based on the grant date stock price.</p>

The following table represents our stock options granted, exercised and forfeited during the six months ended July 31, 2013.

Stock Options	Number of Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 31, 2013	24,000	\$ 7.47	3.95 years	\$ 1,300
Granted during the six months ended July 31, 2013	—	—	—	—
Outstanding at July 31, 2013	24,000	\$ 7.47	3.45 years	—
Exercisable at July 31, 2013	24,000	\$ 7.47	3.45 years	—
Reserved for future issuance:				
Directors' Plan (expired on December 31, 2012)	—			

There were no exercises or forfeitures during the six months ended July 31, 2013.

Restricted Stock Plan and Performance Equity Plan

On June 17, 2009, the stockholders of the Company approved the 2009 Equity Plan. A total of 253,000 shares of restricted stock were authorized under this plan. On June 20, 2012, the stockholders of the Company authorized 310,000 shares under the 2012 Equity Plan. Under these restricted stock plans, eligible employees and directors are awarded performance-based restricted shares of the Company common stock. The amount recorded as expense for the performance-based grants of restricted stock are based upon an estimate made at the end of each reporting period as to the most probable outcome of this plan at the end of the three-year performance period (e.g., baseline, maximum or zero). In addition to the grants with vesting based solely on performance, certain awards pursuant to the plan have a time-based vesting requirement, under which awards vest from two to three years after grant issuance, subject to continuous employment and certain other conditions. Restricted stock has voting rights, and the underlying shares are not considered to be issued and outstanding until vested.

Under the 2009 Equity Incentive Plan, the Company has issued 172,008 fully vested shares as of July 31, 2013. The Company has granted up to a maximum of 14,141 restricted stock awards remaining unvested as of July 31, 2013. All of these restricted stock awards are nonvested at July 31, 2013, and have a weighted average grant date fair value of \$7.90. The Company recognizes expense related to performance-based awards over the requisite service period using the straight-line attribution method based on the outcome that is probable.

Under the 2012 Equity Plan, the Company has granted 281,154 restricted stock awards as of July 31, 2013, assuming all maximum awards are achieved. All of these restricted stock awards are nonvested at July 31, 2013 (219,654 shares at “baseline”), and have a weighted average grant date fair value of \$6.03. The Company recognizes expense related to performance-based awards over the requisite service period using the straight-line attribution method based on the outcome that is probable.

As of July 31, 2013, unrecognized stock-based compensation expense related to restricted stock awards totaled \$6,805 pursuant to the 2009 Equity Incentive Plan and \$1,431,841 pursuant to the 2012 Equity Incentive Plan, before income taxes, based on the maximum performance award level, less what has been charged to expense on a cumulative basis through July 31, 2013, which was set to zero. Such unrecognized stock-based compensation expense related to restricted stock awards totaled \$6,805 for the 2009 Equity Incentive Plan and \$1,035,781 for the 2012 Equity Incentive Plan at the baseline performance level. The cost of these nonvested awards is expected to be recognized over a weighted-average period of three years. The Board has estimated its current performance level to be at zero, and expenses have been recorded accordingly. The performance-based awards are not considered stock equivalents for earnings per share (“EPS”) calculation purposes.

Stock-Based Compensation

The Company recognized total stock-based compensation costs of \$158,788 and \$176,878 for the three and six-months ended July 31, 2013 and 2012, respectively, of which \$10,790 and \$100,129 result from the 2009 Equity Plan and \$147,998 and \$52,119 result from the 2012 Equity Plan for the years ended July 31, 2013 and 2012, respectively, and \$0 and \$24,630, respectively, from the Director Option Plan. These amounts are reflected in selling, general and administrative expenses. The total income tax benefit recognized for stock-based compensation arrangements was \$57,164 and \$64,560 for the years ended July 31, 2013 and 2012, respectively.

(a) The Board has estimated the current performance level at zero and expenses have been recorded accordingly.

9. Manufacturing Segment Data

Domestic and international sales are as follows in millions of dollars:

	Three Months Ended July 31, 2013			2012			Six Months Ended July 31, 2013			2012		
Domestic	\$12.32	50.0 %	\$9.09	38.7 %	\$24.19	52.1 %	\$18.86	39.7 %				
International	12.32	50.0 %	14.41	61.3 %	22.19	47.9 %	28.62	60.3 %				
Total	\$24.64	100.0 %	\$23.50	100.0 %	\$46.38	100.0 %	\$47.48	100.0 %				

We manage our operations by evaluating each of our geographic locations. Our North American operations include our facilities in Alabama (primarily the distribution to customers of the bulk of our products and manufacturing of our chemical suit and fire protective products), Mexico (primarily disposable, glove, chemical suit and woven production) and Pennsylvania (primarily production of high visibility products). We also maintain two manufacturing companies in China (primarily disposable, chemical and woven suit production) and a wovens manufacturing facility in Brazil. We evaluate the performance of these entities based on operating profit, which is defined as income before income taxes, interest expense and other income and expenses. We have sales forces in Canada, Europe, Latin America, India, Russia, Kazakhstan and China, which sell and distribute products shipped from the United States, Mexico, Brazil or China. The table below represents information about reported manufacturing segments for the years noted therein:

10. Income Taxes

Income Tax Audits

The Company is subject to US federal income tax, as well as income tax in multiple US state and local jurisdictions and a number of foreign jurisdictions. The Company's federal income tax returns for the fiscal years ended January 31, 2003, 2004, 2005 and 2007, have been audited by the Internal Revenue Service ("IRS"). The Company has received a final "No Change Letter" from the IRS for FY07 dated August 20, 2009. The Company has received notice from the IRS on March 21, 2011, that it will shortly commence an audit for the FY09 tax return. There have been no further communications from the IRS since.

Our three major foreign tax jurisdictions are China, Canada and Brazil. China tax authorities performed a fraud audit, but the scope was limited to the fraud activities found in late FY09 as discussed more fully in Note 14 to the Company's Form 10-K for the year ended January 31, 2010. This audit covered tax years from 2003 through 2008. We reached a settlement with the Chinese Government in January 2009. China tax authorities have performed limited reviews on all China subsidiaries as of tax years 2008, 2009, 2010, 2011 and 2012 with no significant issues noted. We believe our tax positions are reasonably stated as of January 31, 2013. On May 9, 2013, one of our China operations was notified by local tax authority that they would conduct an audit on transfer pricing. After preliminary communication with the tax authority, we believe the additional tax liability will be no more than US\$16,000 or RMB100,000. At the same time, the China tax authority also had questions about why the retained earnings amount was not being repatriated to corporate and why the payments in trade payables from corporate to the sister companies were delayed, especially from US parent to our Chinese subsidiary. Additionally, the China tax authority questioned if there is any tax avoidance motive in the investment by Weifang Lakeland Safety Products Co., Ltd. of US\$500,000 to our Argentina subsidiary. We do not believe there will be any material tax consequences from the latter two inquiries.

Lakeland Protective Wear, Inc., our Canadian subsidiary, follows Canada tax regulatory framework recording its tax expense and tax deferred assets or liabilities. As of this statement filing date, we believe the Company's tax situation is reasonably stated, and we do not anticipate future tax liability.

The Company's Brazilian subsidiary is currently under a tax audit, which raised some issues regarding the tax impact related to the merger held in 2008 and the resulting goodwill resulting from the structure which was set up at the Company's Brazilian counsel's suggestion. The Company has not received any formal communication from the authorities. There is no formal claim received, and there may not be such a claim in any case. However, this structure is relatively common in acquisitions of Brazilian operations made by non-Brazilian companies. In general, acquisitions with this structure have survived challenge by the taxing authorities in Brazil. The cumulative amount of tax benefits recognized on the Company's books through July 31, 2013, resulting from the tax deduction of the goodwill amortization is approximately US\$0, net of the deferred tax valuation reserve. This results from the goodwill on the Brazilian books which, for Brazilian tax purposes, is eligible for tax write-off over a five-year period dating from November 2008.

Change in Accounting Estimate/Valuation Allowance

We record net deferred tax assets to the extent we believe these assets will more likely than not be realized. In making such determination, we considered all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations. The valuation allowance was \$4.5 million at January 31, 2013 and zero at July 31, 2013. Management has determined that as a result of improved operations in the US and the dividends received from asset sales along with other taxable effects of the recent financing, that it is now more likely than not that the deferred tax asset will be realized in the future and therefore the valuation allowance of \$4,544,431 has been reversed. The amount favorably affected our (benefit) for income taxes, resulting in a very favorable effect on net income for the three and six months ended July 31, 2013.

Unusual Tax Charges

As a result of the sale of its Qingdao plant, the Company received taxable dividends in the US which result in an accrual of a US deferred tax liability of \$422,321. Because of our tax loss carryforwards there is no immediate current tax liability for these taxes. Further, as a result of the financing completed in June 2013, the Company incurred US taxable income from its Canadian operations which resulted in a US deferred tax liability of \$100,000. Again, because of our tax loss carryforwards, no current tax liability is necessary.

11. Derivative Instruments and Foreign Currency Exposure

The Company is exposed to foreign currency risk. Management previously had a derivative instrument program to partially offset this risk by purchasing forward contracts to sell the Canadian Dollar, the Chilean Peso, the Euro, the Great Britain Pound and Brazil Real other than the cash flow hedge discussed below. However, as a result of the financing situation with its former lender, TD Bank, the Company's corporate hedging program has been temporarily suspended. Subsequent to the quarter end, the Company has established a foreign exchange facility with Wells Fargo Bank, N.A. The Company has continued its currency hedging in China and Brazil. Such contracts are largely timed to expire with the last day of the fiscal quarter, with a new contract purchased on the first day of the following quarter, to match the operating cycle of the Company. We designated the forward contracts as derivatives but not as hedging instruments, with loss and gain recognized in current earnings. In the three ended July 31, 2013, the Company sustained a loss on foreign exchange in Brazil of \$360,269 or \$(0.06) per share included in net income. In the six months ended July 31, 2013, the Company recorded a loss on foreign exchange in Brazil of \$387,411 or \$(0.07) per share included in net income.

The Company accounts for its foreign exchange derivative instruments by recognizing all derivatives as either assets or liabilities at fair value, which may result in additional volatility in both current period earnings and other comprehensive income as a result of recording recognized and unrecognized gains and losses from changes in the fair value of derivative instruments.

Currently, we have two types of derivatives to manage the risk of foreign currency fluctuations. We enter into forward contracts with financial institutions to manage our currency exposure related to net assets and liabilities denominated in foreign currencies. Those forward contract derivatives, not designated as hedging instruments, are generally settled quarterly. Gain and loss on those forward contracts are included in current earnings. We also enter cash flow hedge contracts with financial institutions to manage our currency exposure on future cash payments denominated in foreign currencies. The effective portion of gain or loss on cash flow hedge is reported as a component of accumulated other comprehensive income. Our hedge positions are summarized below:

Fair Value of Derivative Instruments

Derivatives not designated as hedging instruments

Foreign Exchange Forward Contracts

	Three Months Ended		Six Months Ended	
	July 31, 2013	July 31, 2012	July 31, 2013	July 31, 2012
Notional Value in USD	\$1,000,000	\$22,822,770	\$5,587,136	\$25,325,540
Gain and loss reported in current operating income (expense)	\$92,818	\$1,647	\$122,697	\$(55,614)

There is no outstanding balance from foreign exchange forward contracts as of July 31, 2013 or July 31, 2012.

Derivatives designated as hedging instruments

Asset Derivative from Foreign Currency Cash Flow Hedge

Edgar Filing: LAKELAND INDUSTRIES INC - Form 10-Q

	As of July 31, 2013	As of January 31, 2013
Notional value in USD	\$ 300,000	\$ 6,944,040
Gain reported in equity as other comprehensive income	4,722	38,513

Effect of Derivative on Income Statement from Foreign Currency Cash Flow Hedge

	Six Months Ended July 31, 2013	Six Months Ended July 31, 2012
Gain reclassified from other comprehensive income into current earnings during three months ended July 31, 2013, reported in operating income	\$ 160,032	\$ 32,485

The cash flow hedge is designed to hedge the payments made in USD and Euro to our China subsidiaries. Other assets have been recorded as \$92,011 and \$19,544 in the balance sheet for Q2 FY14 vs. FY13, respectively.

12. VAT Tax Issue in Brazil

Asserted Claims

VAT tax in Brazil is at the state level. We commenced operations in Brazil in May 2008 through an acquisition of Qualytextil, S.A. ("QT"). At the time of the acquisition, and going back to 2004, the acquired company used a port facility in a neighboring state (Recife-Pernambuco), rather than its own, in order to take advantage of incentives, in the form of a discounted VAT tax, to use such neighboring port facility. We continued this practice until April 2009. The practice was stopped largely for economic reasons, resulting from additional trucking costs and longer lead time. The Bahia state auditors (state of domicile for the Lakeland operations in Brazil) initially reviewed the period from 2004-2006 and filed a claim for unpaid VAT taxes in October 2009. The claim asserted that the state VAT taxes are owed to the state of domicile of the ultimate importer/user and disregarded the fact that the VAT taxes had already been paid to the neighboring state.

The audit notice claimed that the taxes paid to Recife-Pernambuco should have been paid to Bahia in the amount of R\$4.8 million and assessed fines and interest of an additional R\$5.6 million for a total of R\$10.4 million (approximately US\$3.0 million, \$3.5 million and \$6.5 million, respectively).

Bahia had announced an amnesty for this tax whereby R\$3.5 million (US\$1.9 million) of the taxes claimed were paid by QT by the end of the month of May 2010, and the interest and penalties related thereto were forgiven. According to fiscal regulation of Brazil, R\$2.1 million (US\$1.1 million) of this amnesty payment has since been recouped as credits against future taxes due.

An audit for the 2007-2009 period has been completed by the State of Bahia. In October 2010, the Company received a claim for 2007-2009 from the State of Bahia for taxes of R\$6.2 (US\$2.8) million and fines and penalties currently amounting to R\$6.4 (US\$2.8) million, for a total of R\$12.6 (US\$5.6) million, which had been expected per above. Of these claims, our attorney informs us that R\$0.9 (US\$0.4) million will likely be successfully defended based on state auditor misunderstanding. The Company intends to defend and wait for the amnesty period following the next such period. Our expectation is this would occur approximately in late FY16 through FY17.

Lakeland intends to apply for amnesty and make any necessary payments upon the forthcoming, anticipated amnesty periods imposed by the local Brazilian authorities. Of this R\$6.2 (US\$2.8) million exposure, R\$3.4 (US\$1.9) million is eligible for future credit. This future credit amount represents the USD value at the exchange rate prevailing in 2010 when recorded.

The Company's Brazilian counsel advises the Company that in its opinion the next amnesty will come before the end of the judicial process. There has been a long history in Bahia of the state declaring such amnesty periods every two to three years going back 25 years. The litigation process begins as two separate administrative proceedings and, after a period of time, must be switched to a formal court judicial proceeding. If the next amnesty does not arrive prior to the commencement of the formal court proceedings, the Company will have to remit a "judicial deposit" covering the exposure from 2007-2009 in taxes of approximately R\$6.2 (US\$2.8) million plus assessed fines and interest bringing the judicial deposit needed to approximately R\$12.5 (US\$5.6) million. The time period when such conversion to formal Judicial proceeding is currently estimated as from October 2013 through February 2014. The Company has changed its strategy regarding the VAT tax as a result of the current cash flow needs in Brazil. At such time when the switch to the formal judicial proceeding occurs, the Company intends to negotiate a guarantee with the court whereby the Company would either pledge its inventory as collateral for the judicial deposit or alternately would agree to deposit into an escrow account with the court system a monthly judicial deposit of a negotiated percentage of its future sales. The Company believes it is probable it would be able to negotiate such an arrangement. The Company would then be able to avail itself of a later amnesty as per above. Any amounts paid into the escrow would be available at such time to be applied to the amnesty payment. The Company believes it is more likely than not that it will have the cash from operations or the borrowing capacity at such time to fund such amnesty payment but no assurances can be given.

Until such an arrangement is completed, the claim would result in an immediate loss of the Company's Certificate CND (Certificate of Non-existence of tax debt) which would then result in the Company's disqualification from participating in public tender bids. Further, any receivables outstanding at such time from billings resulting from public tenders would not be paid by the customer so long as the Certificate CND is not in effect. Such arrangement would result in a judicial tax claim filed against the Company for 20% greater than the total claim, or approximately \$R15.0 million or US\$6.7 million. The Company estimates it would take approximately 4 to 5 months for this arrangement process to be complete. At the conclusion of such process the Certificate CND would be reinstated and the Company could again participate in public tender bids and collect any such outstanding receivables. The loss of such certificate in the Company's opinion should not cause any material loss of sales to industrial customers.

Once this arrangement is completed, the formal judicial process could take from 5 to 10 years. The Company believes there is a strong likelihood that another amnesty would be offered by the state prior to such completion.

Set forth below are the total amounts of potential tax liability from both the first and second claims, the amount of payments already made into amnesty or scheduled for future payment, which are not eligible for future credit (essentially the discount allowed as an incentive by the neighboring state), less the amount of VAT taxes actually paid which are available as a credit and the amounts of the escrow released by one of the three sellers of the Brazilian company acquired by the Company. The foregoing forms the basis for the US\$1.6 million charge to expense recorded by Lakeland in the first quarter of fiscal 2011.

	BRL (millions)			USD (millions)		
Foreign exchange rate				1.82	1.82	1.82
	Total Paid Or To Be Paid Into Government Under Amnesty Program	Total Not Available For Credit ¹	Available For Credit ²	Total Paid Or To Be Paid Into Government Under Amnesty Program	Total Not Available For Credit ¹	Available For Credit ²
Original claim 2004-2006	3.5	1.4	2.1	1.9	0.8	1.1
Second claim						
Preacquisition 2007-April 2008	2.4	1.0	1.4	1.3	0.5	0.8
Postacquisition May 2008-April 2009	3.3	1.4	1.9	1.8	0.8	1.0
Totals	9.2	3.8	5.4	5.0	2.1	2.9
Escrow released from one seller	1.0	1.0	-	0.5	0.5	-

Charged to expense at July 31, 2010	-	2.8	-	-	1.6	-
-------------------------------------	---	-----	---	---	-----	---

¹Essentially represents the discount originally offered as incentive by the neighboring state.

²The amount allowed as credit against future payments represents the VAT taxes actually previously paid to the neighboring state.

Of these claims, our attorney informs us that R\$1.0 (US\$0.6) million will be successfully defended based on a lapse of statute of limitations and R\$0.3 (US\$0.2) million based on state auditor misunderstanding. No accrual has been made for these items.

The total taxes paid into the amnesty program on May 31, 2010 were R\$3.5 (US\$2.2) million.

Future Accounting for Funds

Following payment into the amnesty program, a portion of the taxes were since recouped via credits against future taxes due. The Company does not expect any further charges to expense other than as described below:

In addition to the direct cost of the additional tax liability accrued per above, there are several additional costs which will be future costs. There will be interest costs on the cash paid during the period from the payment to the state and the credit to be subsequently used which has been and will be charged to expense as incurred. There will be legal fees to defend and resolve this legal matter before the state, which will be charged to expense as incurred. This has been reflected as a reduction in the gross margin in the ensuing period through August 2011. This is not a cost but a lost discount.

Summary of Cash Flow Requirements: (R\$ millions and US\$ millions)

Claim period/description	Taxes	Fines and penalties	Maximum judicial deposit	
2004-2006 not paid into amnesty and being defended. Management does not plan to pay this into amnesty.	R\$1.3	R\$ 1.9	R\$3.2	US\$1.6
2007-2009 claim by State of Bahia ⁽¹⁾	R\$6.2	R\$ 6.1	R\$12.3	US\$6.2
TOTAL	R\$7.5	R\$ 8.0	R\$15.5	US\$7.8

⁽¹⁾ Our attorney informs us that based on the slow progress so far in the administrative proceedings for the 2007-2009 claim, they believe it is now more likely than not that the next amnesty will arrive prior to the need to pay the R\$12.3 judicial deposit. However, as per above, the Company intends to negotiate a settlement with the court system. Therefore, the most likely cash flow outlook in management's opinion is as follows:

R\$3.1 (US\$1.6) million 2004-2006 Judicial Management has pledged a first lien on its plant and equipment in Brazil as a judicial deposit in lieu of cash.

R\$6.2 (US\$3.1) million 2007-2009 Settlement to be negotiated

From Quarter Three Fiscal Year 2014 to Quarter Four Fiscal Year 2014

At the next amnesty period:

If before judicial process - still administration proceeding - the Company would pay only the taxes with no penalty or interest. A portion of this would then be recouped via credits against future taxes on future imports.

If after judicial process commences - the amount of the judicial deposit previously remitted would be reclassified to the taxes at issue, and the excess submitted to cover fines and interest would be refunded to Lakeland Brasil, S.A. As above, a portion of the taxes would be recouped via credits against future taxes on future imports.

Balance Sheet Treatment

The Company has reflected the above items on its January 31, 2013 and July 31, 2013 balance sheet as follows:

		R\$ millions	US\$ millions⁽¹⁾
Noncurrent assets	VAT taxes eligible for future credit	3.4	1.9
Long-term liabilities	Taxes payable	6.2	3.1

⁽¹⁾ At exchange rate prevailing in 2010 when recorded.

13. Brazil Management and Share Purchase Agreement-Arbitration Award and Settlement Agreement

Lakeland Industries, Inc. and its wholly-owned subsidiary, Lakeland Brasil S.A. (“Lakeland Brasil” and together with Lakeland Industries, Inc., the “Company”) were parties to an arbitration proceeding in Brazil involving the Company and two former officers (the “former officers”) of Lakeland Brasil. On May 8, 2012, the Company received notice of an arbitral award in favor of the former officers as described below. On May 12, 2012, the Company filed a request for clarification seeking a modification of the award or to have it set aside. However, no such relief was awarded to the Company.

The arbitration proceeding arose out of the acquisition by the Company in 2008 of Qualytextil, S.A., a company of which the former officers were owners. In connection with the acquisition, the Company entered into management agreements with the former officers and agreed to pay the former officers a supplemental purchase price payment (“SPP”), calculated based upon the 2010 EBITDA of the acquired company, subject to a cap (the “Maximum SPP”). Based upon actual results for 2010 as contractually specified, the Company determined that no SPP would be payable. Contractual provisions further provided for the former officers to be paid the Maximum SPP in the event that either of them were terminated by the Company without cause even if an SPP would not otherwise be payable. In May 2010, the Company terminated the former officers for cause.

In the arbitration proceeding, the former officers sought a determination that they were terminated by the Company without cause and, therefore, entitled to be paid their portion of the Maximum SPP and the monthly remuneration that they would have been paid from the date of termination through the end of their contractual employment period on December 31, 2011. On May 8, 2012, the Company received the arbitration decision which accepted the former officers’ requests to declare that their employments were terminated without cause and determined that, among other things, the noncompete clauses of each of the stock purchase agreement and management agreements were null and nonapplicable despite having been drafted by one of the top law firms in Brazil and reviewed by a second top law

firm. The Company was ordered to pay to the former officers damages representing their portion of the Maximum SPP in the aggregate amount of R\$18,037,500 (approximately US\$9 million at current exchange rates) and monthly remuneration from the date of termination through December 31, 2011, which the Company estimates at an aggregate amount of R\$1,150,000 (US\$580,000). The arbitration panel further ordered that the Company pay the former officers approximately R\$450,000 (US\$226,000) from an escrow account established in connection with the acquisition, and the Company is responsible for payment of 85% of the costs and arbitrators' fees associated with the arbitration. The arbitration award, with all taxes, expenses, interest and applicable adjustments to date, amounted to R\$25,148,252 (approximately US\$12,575,000) as adjusted for inflation, plus interest and penalties.

On September 11, 2012, the Company and the former officers entered into a settlement agreement (the “Settlement Agreement”) which fully and finally resolved all alleged outstanding claims against the Company arising from the arbitration proceeding. Pursuant to the Settlement Agreement, the Company agreed to pay to the former officers an aggregate of approximately US\$8.5 million (the “Settlement Amount”) over a period of six (6) years. The Settlement Amount is payable in combined Brazilian Real and United States dollars as follows: (i) R\$3 million (approximately US\$1.5 million) was paid on the effective date of the Settlement Agreement, of which amount (A) R\$2.294 million (approximately US\$1.15 million) in cash was released from the escrow account established in connection with the Qualytextil, S.A. acquisition and (B) R\$706,000 (approximately US\$350,000) was paid directly by the Company; (ii) R\$2 million (approximately US\$1.0 million) was paid in December 2012; and (iii) the balance of \$6.0 million of the Settlement Amount will be made in United States dollars consisting of 24 consecutive quarterly installments of US\$250,000 beginning on March 31, 2013. In the event the Company fails to pay the remainder of the Settlement Amount in accordance with terms of the Settlement Agreement, the former officers will be entitled to seek payment by the Company of R\$25,148,252 (approximately US\$12,575,000) as adjusted for inflation, plus interest and penalties, less prior payments, which represents the original arbitral award inclusive of all taxes, expenses, interest and applicable adjustments. The Company is current with all obligations pursuant to this Settlement Agreement.

In addition, pursuant to the Settlement Agreement, as additional security for payment of the Settlement Amount, Lakeland Brasil agreed to grant the former officers a second mortgage interest on certain of its property in Brazil, which mortgage is expressly behind the lien securing the payment of tax debts to a state within Brazil related to certain notices of tax assessment on such property. The Company also agreed to become a co-obligor, in lieu of a guarantor, for payment of the Settlement Amount.

The Company, upon reaching the Settlement Agreement, has recorded a settlement liability at net present value of \$7.0 million, by applying a risk-free interest rate of 1.58% to discount the noninterest-bearing payment schedule. Together with estimated total fees for the settlement of \$856,000, the total cost for the settlement is estimated at \$7.9 million. The Settlement liability is \$5.5 million as of July 31, 2013, as reflected on the accompanying balance sheet, net of imputed interest of \$241,000.

The Company further believes that its available resources, together with additional outside funding through debt or equity financings or asset sales, will enable it to make timely payment of the Settlement Amount and continue its operations on a viable basis. There can, however, be no assurance that such outside funding will ultimately be obtained (see Note 6).

The legal and arbitration fees are being charged to expense as incurred.

14. Goodwill

The changes in the carrying amount of goodwill during fiscal year 2014 are summarized in the following:

	US	Total
Balance as of January 31, 2013	\$871,297	\$871,297
During fiscal year 2014 through July 31, 2013		
Effect of foreign currency translation	—	—
Balance as of July 31, 2013	\$871,297	\$871,297

15. Recent Accounting Pronouncements

The Company considers the applicability and impact of all accounting standards updates (ASUs). No recent accounting pronouncement will have a material impact on the financial statements.

16. Discontinued Operations in India

In 2011 the Company decided to discontinue operations in its India glove manufacturing facility and put the assets and business up for sale. The Company decided to sell this division primarily because it has incurred significant operating losses since inception, and the Company has been unsuccessful in developing sufficient sales to reach at least break even. The Company attempted to sell the operations as an ongoing operation but shut down its operations in December 2011. Total assets of discontinued operations were reduced \$0.6 in the quarter primarily as a result of sales of inventory and one of the three plots of real estate owned, as described in Note 17.

In conjunction with the discontinuance of operations, the Company, in the year ended January 31, 2012, recognized a pretax loss on shutdown and sale of assets of \$1.7 million, primarily consisting of \$1.0 million in fixed asset write-downs and \$0.1 million in inventory write-downs. In the year ended January 31, 2013, the Company took a further write-down of fixed assets in the amount of \$0.8 million. The assets and liabilities of the discontinued operations are presented separately under the captions "Assets of discontinued operations in India" and "Liabilities of discontinued operations in India," respectively, in the accompanying Balance Sheets at January 31, 2013 and January 31, 2012.

17. Asset Sales

Sale of Real Estate in China

In April 2013, the Company executed a contract for the sale of real estate located in Qingdao, China, which was completed on June 30, 2013. The sale was structured as a sale of a subsidiary's stock after transferring out all non-real estate assets to other Lakeland entities. The net proceeds of the sale to the Company were approximately \$1.0 million, received in June 2013. All production from this facility has been transferred to other Lakeland manufacturing facilities. There are no product lines which will be dropped as a result of this plant relocation. Accordingly, the operations of this plant are not being treated as a discontinued operation. This sale resulted in no significant gain or loss for financial statement purposes. However, as a result of this sale there were dividends paid to the US parent company of approximately US\$1.7 million, which results in taxable income in the US, generating a tax charge of \$422,321 for the financial statements. However, as a result of its loss carry forwards for US tax purposes, no cash tax liability has been incurred.

Sale of India Property

The Company has entered into a Memorandum of Understanding (“MOU”) in March 28, 2013 for the sale of Plot 24, the largest of three plots held for sale by the Company, which closed on July 29th 2013. The sale price is INR 25,000,000 (approximately US\$415,000), which is less than previously anticipated due to foreign exchange deterioration in the Indian Rupee. The Company collected this cash on July 29, 2013.

	Remaining Assets Held for Sale as of	
	July 31, 2013	January 31, 2013
Inventory	\$ 0	\$ 85,170
Other current asset	—	10,024
Property and equipment	205,468	717,988
Total assets of discontinued operations	205,468	813,182
Liabilities of discontinued operations:		
Accounts payable	—	2,759
Other liabilities	—	22,282
Total liabilities of discontinued operations	—	25,041
Net assets of discontinued operations	\$ 205,468	\$ 788,141

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Form 10-Q may contain certain "forward-looking" information within the meaning of the Private Securities Litigation Reform Act of 1995. This information involves risks and uncertainties. Our actual results may differ materially from the results discussed in the forward-looking statements.

Overview

We manufacture and sell a comprehensive line of safety garments and accessories for the global industrial protective clothing markets. Our products are sold by our in-house sales force and independent sales representatives to a network of over 1,200 North American safety and mill supply distributors and end users and distributors internationally. These distributors in turn supply end user industrial customers, such as integrated oil, utilities, chemical/petrochemical, automobile, steel, glass, construction, smelting, janitorial, pharmaceutical and high technology electronics manufacturers. In addition, we supply federal, state and local governmental agencies and departments domestically and internationally, such as municipal fire and police departments, airport crash rescue units, the military, the Department of Homeland Security and the Centers for Disease Control and state and privately owned utilities and integrated oil companies.

We have operated-facilities in Mexico since 1995, in China since 1996, in India since 2007 (now discontinued) and in Brazil since May 2008. Beginning in 1995, we moved the labor intensive sewing operation for our limited use/disposable protective clothing lines to these facilities. Our facilities and capabilities in China and Mexico allow access to a less expensive labor pool than is available in the United States and permit us to purchase certain raw materials at a lower cost than they are available domestically. As we have increasingly moved production of our products to our facilities in Mexico and China, we have seen improvements in the profit margins for these products. Our net sales attributable to customers outside the United States were \$12.3 million and \$14.4 million for the three months ended July 31, 2013 and July 31, 2012, respectively.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of our financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, net sales and expenses and disclosure of contingent assets and liabilities. We base estimates on our past experience and on various other assumptions that we believe to be reasonable under the circumstances, and we periodically evaluate these estimates.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition. The Company derives its sales primarily from its limited use/disposable protective clothing and secondarily from its sales of high-end chemical protective suits, firefighting and heat protective apparel, gloves and arm guards and reusable woven garments. Sales are recognized when goods are shipped, at which time title and the risk of loss pass to the customer. Some sales in Brazil may be sold on terms with F.O.B. destination, which are recognized when received by the customer. Sales are reduced for sales returns and allowances. Payment terms are generally net 30 days for United States sales and net 90 days for international sales.

Inventories. Inventories include freight-in, materials, labor and overhead costs and are stated at the lower of cost (on a first-in, first-out basis) or market. Inventory is written down for slow-moving, obsolete or unusable inventory.

In the year ended January 31, 2013, the Company changed its estimate used in calculating slow-moving inventory in the US. Previously, the Company wrote-down the inventory value for any item in excess of 5 years stock on hand based on annualized sales levels. The Company has determined that based on its needs to service customers, up to a two-year supply may be needed. Therefore, the Company now writes down anything in excess of a two-year supply. Most foreign operations consider inventory obsolete or slow-moving when more than one-year supply exists.

Allowance for Doubtful Accounts. Trade accounts receivable are stated at the amount the Company expects to collect. The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. Management considers the following factors when determining the collectability of specific customer accounts:

Customer creditworthiness, past transaction history with the customer, current economic industry trends and changes in customer payment terms. Past due balances over 90 days and other less creditworthy accounts are reviewed individually for collectability. If the financial condition of the Company's customers were to deteriorate, adversely affecting their ability to make payments, additional allowances would be required. Based on management's assessment, the Company provides for estimated uncollectible amounts through a charge to earnings and a credit to a valuation allowance. Balances that remain outstanding after the Company has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable.

Income Taxes and Valuation Allowances. We are required to estimate our income taxes in each of the jurisdictions in which we operate as part of preparing our consolidated financial statements. This involves estimating the actual current tax in addition to assessing temporary differences resulting from differing treatments for tax and financial accounting purposes. These differences, together with net operating loss carry forwards and tax credits, are recorded as deferred tax assets or liabilities on our balance sheet. A judgment must then be made of the likelihood that any deferred tax assets will be realized from future taxable income. A valuation allowance may be required to reduce deferred tax assets to the amount that is more likely than not to be realized. In the event we determine that we may not be able to realize all or part of our deferred tax asset in the future, or that new estimates indicate that a previously recorded valuation allowance is no longer required, an adjustment to the deferred tax asset is charged or credited to net income in the period of such determination.

Uncertain Tax Positions. In the event the Company determines that it may not be able to realize all or part of our deferred tax assets in the future, or that new estimates indicate that a previously recorded valuation allowance is no longer required, an adjustment to the deferred tax asset is charged or credited to income in the period of such determination. The Company recognizes tax positions that meet a "more likely than not" minimum recognition threshold.

Valuation of Goodwill and Other Intangible Assets. Goodwill and indefinite lived, intangible assets are tested for impairment at least annually; however, these tests may be performed more frequently when events or changes in circumstances indicate the carrying amount may not be recoverable. Goodwill impairment is evaluated utilizing a two-step process as required by US GAAP. Factors that the Company considers important that could identify a potential impairment include: significant underperformance relative to expected historical or projected future operating results; significant changes in the overall business strategy; and significant negative industry or economic trends. The Company measures any potential impairment on a projected discounted cash flow method. Estimating future cash flows requires the Company's management to make projections that can differ materially from actual results.

Impairment of Long-Lived Assets. The Company evaluates the carrying value of long-lived assets to be held and used when events or changes in circumstances indicate the carrying value may not be recoverable. The carrying value of a long-lived asset is considered impaired when the total projected undiscounted cash flows from the asset are separately identifiable and are less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset.

Foreign Currency Risks. The functional currency for the Brazil operation is the Brazil Real; the United Kingdom, the Euro; the trading company in China, the RenminBi; the Canada Real Estate, the Canadian dollar; and the Russia operation, the Russian Ruble and Kazakhstan Tenge. All other operations have the US dollar as its functional currency.

Self-Insured Liabilities. We have a self-insurance program for certain employee health benefits. The cost of such benefits is recognized as expense based on claims filed in each reporting period and an estimate of claims incurred but not reported during such period. Our estimate of claims incurred but not reported is based upon historical trends. If more claims are made than were estimated or if the costs of actual claims increase beyond what was anticipated, reserves recorded may not be sufficient, and additional accruals may be required in future periods. We maintain separate insurance to cover the excess liability over set single claim amounts and aggregate annual claim amounts.

Loss Contingencies. Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company's management and its legal counsel assess such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company's legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims, as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been or is probable of being incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the nature of the guarantee would be disclosed.

Significant Balance Sheet Fluctuation July 31, 2013, As Compared to January 31, 2013

Cash decreased by \$.9 million and borrowings under the revolving credit facility increased to \$10.4 million at July 31, 2013, but term loans of \$5.5 million were repaid and additional junior indebtedness of \$3.5 million was incurred. Accounts receivables decreased \$0.1 million and inventory increased by \$1.1 million primarily in the US and China. Other current assets increased \$0.3 million, primarily due to prepayments to material suppliers in China and Argentina. Assets of discontinued operations decreased \$0.6 million with the sale of Plot 24 in India (discussed in more detail in Note 17). Accounts payables increased \$2.6 million mainly in China due to extended payment terms negotiated with raw materials suppliers.

Three months ended July 31, 2013, As Compared to the Three Months Ended July 31, 2012

Net Sales. Net sales increased \$1.1 million, or 4.8%, to \$24.6 million for the three months ended July 31, 2013, from \$23.5 million for the three months ended July 31, 2012. China sales increased \$2.3 million or 23.0% primarily due to increased orders from our customers in Japan and Korea and completion of a large apparel contract for China. UK sales increased by \$0.8 million, or 34.4%. Latin America sales decreased by \$0.2 million or 13.7%. Russia and Kazakhstan sales combined increased by \$0.1 million, or 75.9%. As a result of continuing efforts to market the Lakeland brand and including China direct ship to US customers of \$1.5 million, US domestic sales of disposables increased by \$1.9 million, chemical sales decreased by \$0.1 million, fire protection sales increased \$0.4 million, wovens sales increased \$0.2 million and reflective sales increased by \$0.9 million, for an overall sales gain in the U.S. of \$3.3 million, or 35.6%. Sales in Brazil decreased by \$3.0 million, a decrease of 63.8%, as a result of several large bid orders shipped in the second quarter last year and a generally poor sales level in Brazil. There can be no assurance that sales in Brazil will improve. Sales for Lakeland worldwide, excluding Brazil, increased \$4.2 million, or 22.0%, over the second quarter of last year.

Gross Profit. Gross profit increased \$0.4 million, or 4.5%, to \$7.5 million for the three months ended July 31, 2013, from \$7.1 million for the three months ended July 31, 2012. Gross profit as a percentage of net sales was flat at 30.3% for the three months ended July 31, 2013, from 30.4% for the three months ended July 31, 2012. Major factors driving the changes in gross margins were:

Disposables gross margin increased by 6.8 percentage points due to higher volume resulting from conversion of customers to Lakeland branded product with a higher gross, a price increase and adjustments in transfer pricing.

Brazil gross margin was 6.9 percentage points for this year compared with 28.1% last year resulting from several large bid contracts at a high margin last year, and heavy discounting in this year to promote sales.

Argentina gross margin decreased by 6.7 percentage points mainly due to poor volume resulting from lack of working capital.

Higher margins in chemical sales were reflected as a result of a different sales mix.

China gross margins increased 0.4 percentage points primarily due to the accrual of shutdown cost in our Qingdao facility offset by an increase in higher margin domestic China and Asia Pacific sales.

UK margins were up by 4.3 percentage points reflecting higher volume and improved sales mix.

Gloves margin decreased by 16.6 percentage points, mainly resulting from an increase in inventory reserves for Nitrosal gloves.

Operating Expenses. Operating expenses decreased \$0.8 million, or 11.7%, to \$6.2 million for the three months ended July 31, 2013 from \$7.0 million for the three months ended July 31, 2012. Operating expenses as a percentage of net sales was 25.1% for the three months ended July 31, 2013 down from 29.7% for the three months ended July 31, 2012.

\$(0.1) million decrease in sales and sales administrative salaries primarily due to reductions in Brazil

\$(0.1) million decrease in officer salaries as officers voluntarily received one third of compensation in the form of stock

\$(0.2) million decrease in commissions primarily in Brazil as a result of reduced volume

\$(0.2) million reduction to bad debt expense primarily in Argentina due to one bad customer account written off in FY 13

\$(0.2) million decrease in payroll administrative salaries due to reductions in Brazil

Operating Profit. Operating profit increased 753.3% to \$1.3 million for the three months ended July 31, 2013, from \$0.2 million for the three months ended July 31, 2012. Operating margins were 5.3% for the three months ended July 31, 2013, compared to 0.6% for the three months ended July 31, 2012.

Interest Expenses. Interest expenses increased \$0.2 million to \$0.5 million for the three months ended July 31, 2013, from \$0.3 million for the three months ended July 31, 2012, due to higher rates prevailing in Brazil, US, and UK.

Income Tax Expense. Income tax expenses consist of federal, state and foreign income taxes. Income tax expenses decreased \$3.6 million to a benefit of \$3.6 million for the three months ended July 31, 2013, from \$0.0 million for the three months ended July 31, 2012. The main components of the income tax benefit in the current quarter were the reversal of the deferred tax asset valuation allowance of \$4.5 million, offset by a US tax of \$0.4 million on dividends resulting from the sale of the Qingdao plant in China, as described more fully in Note 10, and \$0.1 million resulting from Canadian taxable income created in the US from the financing completed in June 2013. Our effective tax rates fluctuated significantly due to the loss carryforwards and large unusual items.

Net Income (Loss). Net income increased by \$2.6 million to \$4.2 million for the three months ended July 31, 2013, from \$1.6 million for the three months ended July 31, 2012. The increase is mainly due to reversal of the FY13 deferred income tax write down, as more fully described in Note 10, and the improvements in operating results. The three months ended July 31, 2012 were positively affected due to the \$2.1 million adjustment due to the settlement of the Brazilian arbitration at an amount less the amount awarded.

Six Months Ended July 31, 2013, As Compared to the Six Months Ended July 31, 2012

Net Sales. Net sales decreased \$1.1 million, or 2.4%, to \$46.4 million for the six months ended July 31, 2013, from \$47.5 million for the six months ended July 31, 2012. The net decrease was due to a \$6.4 million decrease in foreign sales including a \$5.2 million decrease in Brazil partially offset by an increase of \$5.7 million in domestic sales. Domestic sales in China and to the Asia Pacific Rim increased by \$4.7 million or 50.4% excluding direct ships to the USA included in prior year sales of \$3.6 million. UK sales increased by \$1.1 million, or 23.7%. Latin America sales decreased by \$0.5 million or 33.5%. Russia and Kazakhstan sales combined increased by \$0.8 million, or 253.2%. Domestic sales of disposables increased by \$2.9 million, chemical sales increased by \$0.3 million, fires sales increased \$0.5 million, wovens sales increased \$0.4 million and reflective sales increased by \$1.4 million. Sales in Brazil decreased by \$6.4 million, a decrease of 64.8%, as a result of several large bid orders shipped in the second quarter last year and a generally poor sales level in Brazil. There can be no assurance that sales in Brazil will improve. Sales for Lakeland worldwide, excluding Brazil, increased \$5.3 million, or 14.1%, over the six months of last year.

Gross Profit. Gross profit decreased \$0.9 million, or 6.2%, to \$13.5 million for the six months ended July 31, 2013, from \$14.4 million for the six months ended July 31, 2012. Gross profit as a percentage of net sales decreased to 29.2% for the six months ended July 31, 2013, from 30.4% for the six months ended July 31, 2012. Major factors driving the changes in gross margins were:

Wovens gross margin increased 13 percentage points in FY14 compared with FY13. This increase was mainly due to the FY13 inventory write-downs resulting from the closure of the Missouri plant, disruptions, inefficiencies and a shortage following the move.

Disposables gross margin increased by 6.2 percentage points due to higher volume resulting from conversion of customers to Lakeland branded products with a higher gross, a price increase and adjustments in transfer pricing.

Chemical gross margins increased 9 percentage points in FY14 compared with FY13. This increase is primarily due to the conversion of customers to Lakeland brand products with higher gross margins and adjustments in transfer pricing.

Brazil gross margin was 11.9% for this year compared with 36.5% last year resulting from several large bid contracts at a high margin last year, and heavy discounting in this year to promote sales.

Argentina gross margin decreased by 15.1 percentage points mainly due to poor volume resulting from lack of working capital.

China gross margins decreased 2.7 percentage points primarily due to the accrual of shutdown cost in our Qingdao facility, offset by an increase in higher margin domestic China and Asia Pacific sales.

Gloves margin decreased by 6.6 percentage points mainly resulting from an increase in inventory reserves for Nitrosol gloves.

Operating Expenses. Operating expenses decreased \$1.8 million, or 12.5%, to \$12.5 million for the six months ended July 31, 2013, from \$14.3 million for the six months ended July 31, 2012. As a percentage of sales, operating expenses decreased to 26.9% for the six months ended July 31, 2013, from 30.0% for the six months ended July 31, 2012. The \$1.8 million decrease in operating expenses in the six months ended July 31, 2013, as compared to the six months ended July 31, 2012, was comprised of:

\$(0.8) million decrease in sales commission mainly resulting from two large bid contracts in Brazil last year which resulted in high commissions
 \$(0.3) million reduction in payroll administrative expense primarily in Brazil as the labor complement is adjusted
 \$(0.2) million reduction in officer cash salaries as officers voluntarily received one third of compensation in the form of restricted stock
 \$(0.1) million decrease in travel expenses as fewer trade shows were attended in FY14
 \$(0.1) million reduction to research and development as compared to FY13
 \$(0.1) million reduction to bad debt expense due to expense incurred in Argentina in FY13
 \$(0.1) million decrease in equity compensation expense due to FY13 change from baseline to zero on the 2012 Restricted Stock Plan
 \$(0.1) million decrease to payroll tax as a result of staff reductions
 \$(0.1) million decrease to miscellaneous general and administrative expenses
 \$0.1 million increase in bank fees related to the new financing in the US

Operating Profit. Operating profit increased 500.8% to \$1.1 million for the six months ended July 31, 2013, from \$0.2 million for the six months ended July 31, 2012. Operating margins were 2.3% for the six months ended July 31, 2013, compared to 0.4% for the six months ended July 31, 2012.

Interest Expenses. Interest expenses increased \$0.2 million to \$0.7 million for the six months ended July 31, 2013, from \$0.5 million for the six months ended July 31, 2012, due to higher rates prevailing in Brazil, US, and UK.

Income Tax Expense. Income tax expenses consist of federal, state and foreign income taxes. Income tax expenses decreased \$3.0 million to a benefit of \$3.6 million for the six months ended July 31, 2013, from a benefit of \$0.4 million for the six months ended July 31, 2012. The main components of the income tax benefit in the current six month period were the reversal of the deferred tax asset valuation allowance of \$4.5 million, offset by a US tax of \$0.4 million on dividends resulting from the sale of the Qingdao plant in China, and \$0.1 million resulting from Canadian taxable income created in the US from the financing completed in June 2013. Our effective tax rates fluctuated significantly due to the loss carryforwards and large unusual items.

Net Income (Loss). Net income increased \$11.8 million to \$3.3 million for the six months ended July 31, 2013, from a loss of \$8.5 million for the six months ended July 31, 2012. The increase is mainly due to the \$10.0 million Arbitral Award in Brazil in FY13, the reversal of the FY13 deferred income tax write down as more fully described in Note 10 and the improvements in operating results.

Liquidity and Capital Resources

Cash Flows. As of July 31, 2013, we had cash and cash equivalents of \$5.8 million and working capital of \$41.0 million. Cash and cash equivalents decreased \$.9 million, as a result of worldwide cash management, and working capital increased \$5.0 million from January 31, 2013. International cash management is affected by local requirements and movements of cash across borders can be slowed down.

Net cash provided by operating activities of \$0.4 million for the six months ended July 31, 2013, was due primarily to profit from operations of \$3.3 million, an increase in accounts payable of \$3.1 million and \$0.2 million in stock based compensation; offset by the reversal of the deferred tax asset write down of \$3.9 million, a \$2.6 million increase in inventories with an offset of \$0.3 million for inventory obsolescence. Net cash provided by investing activities of \$0.4 million in the six months ended July 31, 2013, was due to the completion of the sale of Qingdao and India Plot 24.

We currently have one Senior credit facility: \$15.0 million revolving credit facility which commenced June 28, 2013, of which we had \$10.4 million of borrowings outstanding as of July 31, 2013, expiring on June 30, 2016 at a current rate of 6.25%. Maximum availability in excess of amount outstanding at July 31, 2013 was \$1.1 million. Our current credit facility requires, and any future credit facilities may also require, that we comply with specified financial covenants relating to earnings before interest, taxes, depreciation and amortization and others relating to fixed charge coverage ratio and limits on capital expenditures and investments in foreign subsidiaries. Our ability to satisfy these financial covenants can be affected by events beyond our control, and we cannot guarantee that we will meet the requirements of these covenants. These restrictive covenants could affect our financial and operational flexibility or impede our ability to operate or expand our business. Default under our credit facilities would allow the lenders to declare all amounts outstanding to be immediately due and payable. Our lenders have a security interest in substantially all of our US and Canadian assets, other than the Canada warehouse and pledges of 65% of the equity of the Company's foreign subsidiaries, outside Canada. If our lenders declare amounts outstanding under any credit facility to be due, the lenders could proceed against our assets. Any event of default, therefore, could have a material adverse effect on our business. Lakeland has recently closed on new financing as described more fully in Note 6 to the Financial Statements.

Subordinated Debt Financing (Junior Lender). As described more fully in Note 6, the June 28, 2013 financing included Subordinated Debt which contained warrants. The value of the warrants was treated as Original Issue Discount (OID) and will be amortized over the term of the loan. Management views this to be one blended loan or transaction along with the Senior Debt at 6.25%, since the subordinated debt was an absolutely required condition of closing made by the Senior Lender. In management's view, this financing is at favorable terms considering the distress situation at the time of the closing and the year prior and the alternatives available to the Company. There were several "Unitranche" transactions proposed to the Company with overall cost less favorable than the overall cost of the combined Senior and Junior financing closed June 28, 2013.

Capital Expenditures. Our capital expenditures principally relate to purchases of building and equipment in Brazil and Mexico, manufacturing equipment, computer equipment and leasehold improvements. We anticipate FY14 capital expenditures to be approximately \$1.0 million. Our facilities in China have not been encumbered by commercial bank mortgages and, thus, Chinese commercial mortgage loans or the sale of a facility may be available with respect to these real estate assets if we need additional liquidity. Subsequent to July 31, 2013, the Company's China subsidiary completed a \$0.8 million loan. There are no further specific plans for material capital expenditures in FY14.

During FY13 the AnQui City, China Weifang Lakeland factory expanded its operations substantially to accommodate the movement of the work in a leased facility, whose lease had expired. By bringing the two factories together, economies of scale were achieved.

Foreign Currency Exposure. The Company has foreign currency exposure, principally through its investment in Brazil, sales in China, Canada and the UK and production in Mexico and China. Management has undertaken a hedging program to offset this risk by purchasing forward contracts to sell the Canadian Dollar, Chilean Peso, Euro and Great Britain Pound. However, such program was suspended as a result of the credit issues with its former lender. Management has established, in September 2013, a foreign exchange facility with Wells Fargo Bank, N.A. Such contracts are largely timed to expire with the last day of the fiscal quarter, with a new contract purchased on the first day of the following quarter, to match the operating cycle of the Company. Management has decided not to hedge its long position in the Chinese Yuan or Brazilian Real; however, as described in Note 11, the Company does engage in cash flow hedges between the CNY and the USD and EUR, and partial hedges in Brazil of its USD payables.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no significant changes in market risk from that disclosed in our Annual Report on Form 10-K for the fiscal year ended January 31, 2013.

Item 4. Controls and Procedures

We conducted an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of July 31, 2013. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of July 31, 2013.

Management has assessed the effectiveness of the Company’s internal control over financial reporting as of July 31, 2013. In making this assessment, management used the criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based upon an evaluation performed as of July 31, 2013 and throughout FY13, we have identified a material weakness surrounding our internal control over international financial reporting and review. In response to the material weakness management is restructuring its international financial review process and believes these changes will remediate the issue. Further, this weakness did not result in any significant adjustment to the financial statements.

Changes in Internal Control over Financial Reporting

There have been no changes in Lakeland Industries, Inc.'s internal control over financial reporting that occurred during Lakeland's second quarter of fiscal 2014 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Items 2, 3, 4 and 5 are not applicable

Item 1. Legal Proceedings.

From time to time, we are a party to litigation arising in the ordinary course of our business. Other than the proceedings related to the VAT tax issue described in Note 12 to the financial statements, we are not currently a party to any litigation or other legal proceedings that we believe could reasonably be expected to have a material adverse effect on our results of operations, financial condition or cash flows.

Item 6. Exhibits:

Exhibits:

31.1 Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

31.2 Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32.1 Certification of Chief Executive Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
