Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events

On November 24, 2008, Antigenics Inc. (the Company) announced an oral presentation of final data from a Phase 1 investigator-sponsored trial of the Company's investigational cancer vaccine Oncophag® (vitespen) in recurrent, high-grade glioma at the Society of Neuro-Oncology's 13th Annual Scientific Meeting in Las Vegas. Final results from the study, conducted at the Brain Tumor Research Center at the University of California, San Francisco, showed that Oncophage vaccination following brain cancer surgery increased overall median survival to approximately 10.5 months with four patients surviving beyond 12 months and one patient surviving almost 2.5 years. This is compared to a historical median survival of only 6.5 months post surgery. All patients enrolled into the trial had at least one recurrence of brain cancer.

The full text of the press release issued in connection with the announcement is being furnished as Exhibit 99.1 to this current report on Form 8-K.
