**Notes to Schedule of Investments (amounts in thousands, except number of contracts):**

- (a) Securities are grouped by coupon or range of coupons and represent a range of maturities.
- (b) The average amount of borrowings outstanding during the three-months ended April 30, 2006 was \$111,154 at a weighted average interest rate of 4.67%. On April 30, 2006, securities valued at \$109,801 were pledged as collateral for reverse repurchase agreements. The Fund is authorized to borrow funds and utilize leverage in amounts not exceeding thirty-three and one-third percent of its total assets. The Fund's ability to leverage creates an opportunity for increased net income, but at the same time poses special risks. If the income from the securities purchased with borrowed funds is not sufficient to cover the cost of borrowing, the net income of the Fund will be less than if borrowing had not been used, reducing the amount available for distribution to shareholders.
- (c) Securities with an aggregate market value of \$747 have been pledged as collateral for swap contracts on April 30, 2006.
- (d) Securities with an aggregate market value of \$885 have been segregated with the custodian to cover margin requirements for the following open futures contracts on April 30, 2006:

Description	Type	Expiration Month	# of Contracts	Unrealized Appreciation
