SIGNET REPORTS FIRST QUARTER RESULTS

Signet Group plc (LSE: SIG and NYSE: SIG), the world's largest speciality retail jeweller, today announced its first quarter results for the 13 weeks from 4 February to 5 May 2007. These results are presented in US dollars following the change in the functional currency of the Company and the move to reporting in US dollars which took effect from 5 February 2007.

Group

Total sales rose by 8.1% at constant exchange rates (see note 10); the reported increase was 10.9% to \$814.4 million (13 weeks to 29 April 2006: \$734.3 million). Like for like sales increased by 3.1%. Group profit before tax was \$50.8 million (13 weeks to 29 April 2006: \$53.7 million) and operating profit was \$54.0 million (13 weeks to 29 April 2006: \$56.3 million). Operating margin was 6.6% (13 weeks to 29 April 2006: 7.7%). At constant exchange rates operating profit decreased by 2.9% and profit before tax by 4.3% (see note 10). The average US dollar rate was £1/\$1.96 (13 weeks to 29 April 2006: £1/\$1.75).

The tax rate was 36.0% (13 weeks to 29 April 2006: 35.9%). Earnings per share were 1.9 cents (13 weeks to 29 April 2006: 2.0 cents), equivalent to 19.1 cents per American Depositary Share (13 weeks to 29 April 2006: 19.8 cents).

United States (circa 75% of Group annual sales)

Total sales increased by 10.1% to \$632.3 million (Q1 2006/07: \$574.5 million). Like for like sales rose by 3.2%. The rate of growth has slowed from that of the prior year due to a more challenging retail environment. On an underlying basis the increase in like for like sales was estimated to have been 1.9% after taking into account the adverse weather disruption over Valentine's Day and the benefit of a shift in the timing of a promotional event at the beginning of the quarter.

Operating profit was \$59.9 million (13 weeks to 29 April 2006: \$62.7 million). The results were adversely impacted by net expense timing differences in respect of marketing events, which are estimated to have reduced operating profit by about \$5 million. As anticipated, gross margin was lower due to commodity cost increases and changes in sales mix. The mix changes reflected factors, including the growth of Jared, which again enhanced like for like sales performance. The operating margin was 9.5% (Q1 2006/07: 10.9%). The bad debt ratio was comfortably within the tight range of the last ten years.

United Kingdom (circa 25% of Group annual sales)

Total sales were up by 1.7% at constant exchange rates (see note 10); the reported increase was 14.0% to \$182.1 million (13 weeks to 29 April 2006: \$159.8 million). Like for like sales rose by 2.6%, with H.Samuel up by 1.9% and Ernest Jones by 3.5%. The normal seasonality in trading was reflected in an operating loss of \$1.9 million (13 weeks to 29 April 2006: loss \$2.8 million). As expected, gross margin was little changed.

Group Costs, Financing Costs and Net Debt

Group costs were \$4.0 million (13 weeks to 29 April 2006: \$3.6 million). Primarily as a result of the \$100 million share buy back programme, which was substantially completed during the period, financing costs rose to \$3.2 million (13 weeks to 29 April 2006: \$2.6 million) and net debt, at 5 May 2007, to \$286.2 million (29 April 2006: \$169.5 million).

Comment

Terry Burman, Group Chief Executive, commented: In the first quarter the US trading environment weakened and the UK marketplace was a little stronger. Against this background, profit before tax of \$50.8 million demonstrates the underlying strength of the Group.

The US division experienced weak sales over the Mother's Day period at the start of the second quarter. Trading since then has seen like for like sales return to the underlying rate of growth achieved in the first quarter. The sales performance of the UK business has seen a further small improvement to that of the first 13 weeks.

10. Impact of constant exchange rates

The Group has historically used constant exchange rates to compare period-to-period changes in certain financial data. This is referred to as 'at constant exchange rates' throughout this release. The Group considers this a useful measure for analysing and explaining changes and trends in the Group's results. The impact of the re-calculation of sales, operating profit, profit before tax and net debt at constant exchange rates, including a reconciliation to the Group's GAAP results, is analysed below.
