Forward-Looking Statements

Certain of the statements included in this Quarterly Report on Form 10-Q, including but not limited to those in Management's Discussion and Analysis of Financial Condition and Results of Operations, constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as expects, believes, anticipates, includes, plans, assumes, estimates, projects, should, will, shall or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management's current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. There can be no assurance that future developments affecting Prudential Financial, Inc. and its subsidiaries will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) general economic, market and political conditions, including the performance and fluctuations of fixed income, equity, real estate and other financial markets; (2) the availability and cost of additional debt or equity capital or external financing for our operations; (3) interest rate fluctuations or prolonged periods of low interest rates; (4) the degree to which we choose not to hedge risks, or the potential ineffectiveness or insufficiency of hedging or risk management strategies we do implement, with regard to variable annuity or other product guarantees; (5) any inability to access our credit facilities; (6) reestimates of our reserves for future policy benefits and claims; (7) differences between actual experience regarding mortality, morbidity, persistency, surrender experience, interest rates or market returns and the assumptions we use in pricing our products, establishing liabilities and reserves or for other purposes; (8) changes in our assumptions related to deferred policy acquisition costs, value of business acquired or goodwill; (9) changes in assumptions for retirement expense; (10) changes in our financial strength or credit ratings; (11) statutory reserve requirements associated with term and universal life insurance policies under Regulation XXX and Guideline AXXX; (12) investment losses, defaults and counterparty non-performance; (13) competition in our product lines and for personnel; (14) difficulties in marketing and distributing products through current or future distribution channels; (15) changes in tax law; (16) economic, political, currency and other risks relating to our international operations; (17) fluctuations in foreign currency exchange rates and foreign securities markets; (18) regulatory or legislative changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act; (19) inability to protect our intellectual property rights or claims of infringement of the intellectual property rights of others; (20) adverse determinations in litigation or regulatory matters and our exposure to contingent liabilities, including in connection with our divestiture or winding down of businesses; (21) domestic or international military actions, natural or man-made disasters including terrorist activities or pandemic disease, or other events resulting in catastrophic loss of life; (22) ineffectiveness of risk management policies and procedures in identifying, monitoring and managing risks; (23) effects of acquisitions, divestitures and restructurings, including possible difficulties in integrating and realizing the projected results of acquisitions, including risks associated with the acquisition of certain insurance operations in Japan; (24) interruption in telecommunication, information technology or other operational systems or failure to maintain the security, confidentiality or privacy of sensitive data on such systems; (25) changes in statutory or U.S. GAAP accounting principles, practices or policies; (26) Prudential Financial, Inc.'s primary reliance, as a holding company, on dividends or distributions from its subsidiaries to meet debt payment obligations and the ability of the subsidiaries to pay such dividends or distributions in light of our ratings objectives and/or applicable regulatory restrictions; and (27) risks due to the lack of legal separation between our Financial Services Businesses and our Closed Block Business. Prudential Financial, Inc. does not intend, and is under no obligation, to update any particular forward-looking statement included in this document. See Risk Factors included in the Annual Report on Form 10-K for the year ended December 31, 2011 for discussion of certain risks relating to our businesses and investment in our securities.

Table of Contents

Throughout this Quarterly Report on Form 10-Q, Prudential Financial and the Registrant refer to Prudential Financial, Inc., the ultimate holding company for all of our companies. Prudential Insurance refers to The Prudential Insurance Company of America, before and after its demutualization on December 18, 2001. Prudential, the Company, we and our refer to our consolidated operations before and after demutualization.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements

1. BUSINESS AND BASIS OF PRESENTATION

Prudential Financial, Inc. (Prudential Financial) and its subsidiaries (collectively, Prudential or the Company) provide a wide range of insurance, investment management, and other financial products and services to both individual and institutional customers throughout the United States and in many other countries. Principal products and services provided include life insurance, annuities, retirement-related services, mutual funds, and investment management. The Company has organized its principal operations into the Financial Services Businesses and the Closed Block Business. The Financial Services Businesses operate through three operating divisions: U.S. Retirement Solutions and Investment Management, U.S. Individual Life and Group Insurance, and International Insurance. The Company's businesses that are not sufficiently material to warrant separate disclosure and divested businesses, are included in Corporate and Other operations within the Financial Services Businesses. The Closed Block Business, which includes the Closed Block (see Note 6), is managed separately from the Financial Services Businesses. The Closed Block Business was established on the date of demutualization and includes the Company's in force participating insurance and annuity products and assets that are used for the payment of benefits and policyholders' dividends on these products, as well as other assets and equity that support these products and related liabilities. In connection with the demutualization, the Company ceased offering these participating products.

Basis of Presentation

The Unaudited Interim Consolidated Financial Statements include the accounts of Prudential Financial, entities over which the Company exercises control, including majority-owned subsidiaries and minority-owned entities such as limited partnerships in which the Company is the general partner, and variable interest entities in which the Company is considered the primary beneficiary. See Note 5 for more information on the Company's consolidated variable interest entities. The Unaudited Interim Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). Intercompany balances and transactions have been eliminated.

In the opinion of management, all adjustments necessary for a fair statement of the financial position and results of operations have been made. All such adjustments are of a normal, recurring nature, except for the adjustment described below under Out of Period Adjustments. Interim results are not necessarily indicative of the results that may be expected for the full year. These financial statements should be read in conjunction with the Company's Audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

The Company's Gibraltar Life Insurance Company, Ltd. (Gibraltar Life) consolidated operations, including the previously-acquired AIG Star Life Insurance Co., Ltd., AIG Edison Life Insurance Company, AIG Financial Assurance Japan K.K., and AIG Edison Service Co., Ltd. use a November 30 fiscal year end for purposes of inclusion in the Company's Consolidated Financial Statements. Therefore, the Unaudited Interim Consolidated Financial Statements as of June 30, 2012, include the assets and liabilities of Gibraltar Life as of May 31, 2012 and the results of operations for Gibraltar Life for the three and six months ended May 31, 2012.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The most significant estimates include those used in determining deferred policy acquisition costs and related amortization; value of business acquired and its amortization; amortization of sales inducements; measurement of goodwill and any related impairment; valuation of investments including derivatives and the recognition of other-than-temporary impairments; future policy benefits including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

Reclassifications

Certain amounts in prior periods have been reclassified to conform to the current period presentation.

Out of Period Adjustments

In the second quarter of 2012, the Company recorded two out of period adjustments resulting in a decrease of \$122 million to Income from continuing operations before income taxes and equity in earnings of operating joint ventures for the three and six months ended June 30, 2012.

The first adjustment related to a decline in the value of a real estate-related investment. Based on a review of the underlying collateral and a related guarantee, the Company determined that impairments of \$75 million should be recognized, of which \$61 million should have been recorded in prior years. The second adjustment consisted of an increase of \$61 million in reserves for estimated payments arising from use of new Social Security Master Death File matching criteria to identify deceased policy and contract holders. During the initial calculation of the reserve in the third quarter of 2011, the Company excluded certain life policies in extended term status from the analysis used to identify potential claims.

The adjustments resulted in a decrease in adjusted operating income, the Company's measure of segment performance, of \$106 million for the current quarter, including a reduction of \$61 million to the Asset Management segment and a reduction of \$45 million to the Corporate and Other operations of the Financial Services Businesses. In addition, the adjustments resulted in a reduction of \$16 million to the Closed Block Business. The adjustments are not material to any previously reported quarterly or annual financial statements.

In addition to the two out of period adjustments discussed above, in the first quarter of 2011, the Company recorded an out of period adjustment that decreased Income from continuing operations before income taxes and equity in earnings of operating joint ventures by \$95 million. This adjustment had no impact on adjusted operating income, the Company's measure of segment performance, and was not material to any previously reported quarterly or annual financial statements. For additional information regarding this out of period adjustment, see Note 1 to the Company's Consolidated Financial Statements included in its 2011 Annual Report on Form 10-K.

For further information on the presentation of segment results and a definition of adjusted operating income, see Note 11.

2. SIGNIFICANT ACCOUNTING POLICIES AND PRONOUNCEMENTS

Investments in Debt and Equity Securities and Commercial Mortgage and Other Loans

The Company's investments in debt and equity securities include fixed maturities; equity securities; and short-term investments. The accounting policies related to these, as well as commercial mortgage and other loans, are as follows:

Fixed maturities are comprised of bonds, notes and redeemable preferred stock. Fixed maturities classified as available-for-sale are carried at fair value. See Note 13 for additional information regarding the

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

determination of fair value. Fixed maturities for which the Company has asserted the positive intent and ability to hold to maturity are carried at amortized cost and classified as held-to-maturity. The amortized cost of fixed maturities is adjusted for amortization of premiums and accretion of discounts to maturity. Interest income, as well as the related amortization of premium and accretion of discount, is included in Net investment income under the effective yield method. For mortgage-backed and asset-backed securities, the effective yield is based on estimated cash flows, including interest rate and prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also vary based on other assumptions regarding the underlying collateral, including default rates and changes in value. These assumptions can significantly impact income recognition and the amount of other-than-temporary impairments recognized in earnings and other comprehensive income. For high credit quality mortgage-backed and asset-backed securities (those rated AA or above), cash flows are updated quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For mortgage-backed and asset-backed securities rated below AA or those for which an other than temporary impairment has been recorded, the effective yield is adjusted prospectively for any changes in estimated cash flows. See the discussion below on realized investment gains and losses for a description of the accounting for impairments. Unrealized gains and losses on fixed maturities classified as available-for-sale, net of tax, and the effect on deferred policy acquisition costs, value of business acquired, unearned revenue reserves, deferred sales inducements, future policy benefits and policyholders dividends that would result from the realization of unrealized gains and losses, are included in Accumulated other comprehensive income (loss).

Trading account assets supporting insurance liabilities, at fair value includes invested assets that support certain products included in the Retirement segment, as well as certain products included in the International Insurance segment, which are experience rated, meaning that the investment results associated with these products are expected to ultimately accrue to contractholders. Realized and unrealized gains and losses for these investments are reported in Asset management fees and other income. Interest and dividend income from these investments is reported in Net investment income.

Other trading account assets, at fair value consist primarily of fixed maturities, equity securities, including certain perpetual preferred stock, and certain derivatives, including those used by the Company in its capacity as a broker-dealer and derivative hedging positions used in a non-broker-dealer capacity primarily to hedge the risks related to certain products. These instruments are carried at fair value. Realized and unrealized gains and losses on these investments and on derivatives used by the Company in its capacity as a broker-dealer are reported in Asset management fees and other income and, for those related to the Company's former global commodities group, in Income from discontinued operations, net of taxes. Interest and dividend income from these investments is reported in Net investment income and, for those related to the Company's former global commodities group, in Income from discontinued operations, net of taxes.

Equity securities available-for-sale are comprised of common stock, mutual fund shares, non-redeemable preferred stock, and certain perpetual preferred stock, and are carried at fair value. The associated unrealized gains and losses, net of tax, and the effect on deferred policy acquisition costs, value of business acquired, unearned revenue reserves, deferred sales inducements, future policy benefits and policyholders dividends that would result from the realization of unrealized gains and losses, are included in Accumulated other comprehensive income (loss). The cost of equity securities is written down to fair value when a decline in value is considered to be other-than-temporary. See the discussion below on realized investment gains and losses for a description of the accounting for impairments. Dividends from these investments are recognized in Net investment income when earned.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Commercial mortgage and other loans consist of commercial mortgage loans, agricultural loans, loans backed by residential properties, as well as certain other collateralized and uncollateralized loans. Commercial mortgage loans are broken down by class which is based on property type (industrial properties, retail, office, multi-family/apartment, hospitality, and other). Loans backed by residential properties primarily include recourse loans held by the Company's international insurance businesses. Other collateralized loans primarily include senior loans made by the Company's international insurance businesses and loans made to the Company's former real estate franchisees. Uncollateralized loans primarily represent reverse dual currency loans and corporate loans held by the Company's international insurance businesses.

Commercial mortgage and other loans originated and held for investment are generally carried at unpaid principal balance, net of unamortized deferred loan origination fees and expenses and net of an allowance for losses. Commercial mortgage loans originated within the Company's commercial mortgage operations include loans held for sale which are reported at the lower of cost or fair value; loans held for investment which are reported at amortized cost net of unamortized deferred loan origination fees and expenses and net of an allowance for losses; and loans reported at fair value under the fair value option. Commercial mortgage and other loans acquired, including those related to the acquisition of a business, are recorded at fair value when purchased, reflecting any premiums or discounts to unpaid principal balances.

Interest income, as well as prepayment fees and the amortization of the related premiums or discounts, related to commercial mortgage and other loans, are included in Net investment income.

Impaired loans include those loans for which it is probable that amounts due will not be collected according to the contractual terms of the loan agreement. The Company defines "past due" as principal or interest not collected at least 30 days past the scheduled contractual due date. Interest received on loans that are past due, including impaired and non-impaired loans as well as loans that were previously modified in a troubled debt restructuring, is either applied against the principal or reported as net investment income based on the Company's assessment as to the collectability of the principal. See Note 4 for additional information about the Company's past due loans.

The Company discontinues accruing interest on loans after the loans become 90 days delinquent as to principal or interest payments, or earlier when the Company has doubts about collectability. When the Company discontinues accruing interest on a loan, any accrued but uncollectible interest on the loan and other loans backed by the same collateral, if any, is charged to interest income in the same period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where the payment of interest has been interrupted for a substantial period, or the loan has been modified, a regular payment performance has been established.

The Company reviews the performance and credit quality of the commercial mortgage and other loan portfolio on an on-going basis. Loans are placed on watch list status based on a predefined set of criteria and are assigned one of three categories. Loans are placed on "early warning" status in cases where, based on the Company's analysis of the loan's collateral, the financial situation of the borrower or tenants or other market factors, it is believed a loss of principal or interest could occur. Loans are classified as "closely monitored" when it is determined that there is a collateral deficiency or other credit events that may lead to a potential loss of principal or interest. Loans "not in good standing" are those loans where the Company has concluded that there is a high probability of loss of principal, such as when the loan is delinquent or in the process of foreclosure. As described below, in determining the allowance for losses, the Company evaluates each loan on the watch list to determine if it is probable that amounts due will not be collected according to the contractual terms of the loan agreement.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan, and is commonly expressed as a percentage. Loan-to-value ratios greater than 100% indicate that the loan amount exceeds the collateral value. A smaller loan-to-value ratio indicates a greater excess of collateral value over the loan amount. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A larger debt service coverage ratio indicates a greater excess of net operating income over the debt service payments. The values utilized in calculating these ratios are developed as part of the Company's periodic review of the commercial mortgage loan and agricultural loan portfolio, which includes an internal appraisal of the underlying collateral value. The Company's periodic review also includes a quality re-rating process, whereby the internal quality rating originally assigned at underwriting is updated based on current loan, property and market information using a proprietary quality rating system. The loan-to-value ratio is the most significant of several inputs used to establish the internal credit rating of a loan which in turn drives the allowance for losses. Other key factors considered in determining the internal credit rating include debt service coverage ratios, amortization, loan term, estimated market value growth rate and volatility for the property type and region. See Note 4 for additional information related to the loan-to-value ratios and debt service coverage ratios related to the Company's commercial mortgage and agricultural loan portfolios.

Loans backed by residential properties, other collateralized loans, and uncollateralized loans are also reviewed periodically. Each loan is assigned an internal or external credit rating. Internal credit ratings take into consideration various factors including financial ratios and qualitative assessments based on non-financial information. In cases where there are personal or third party guarantors, the credit quality of the guarantor is also reviewed. These factors are used in developing the allowance for losses. Based on the diversity of the loans in these categories and their immateriality, the Company has not disclosed the credit quality indicators related to these loans in Note 4.

For those loans not reported at fair value, the allowance for losses includes a loan specific reserve for each impaired loan that has a specifically identified loss and a portfolio reserve for probable incurred but not specifically identified losses. For impaired commercial mortgage and other loans the allowances for losses are determined based on the present value of expected future cash flows discounted at the loan's effective interest rate, or based upon the fair value of the collateral if the loan is collateral dependent. The portfolio reserves for probable incurred but not specifically identified losses in the commercial mortgage and agricultural loan portfolio segments considers the current credit composition of the portfolio based on an internal quality rating, (as described above). The portfolio reserves are determined using past loan experience, including historical credit migration, loss probability and loss severity factors by property type. These factors are reviewed each quarter and updated as appropriate.

The allowance for losses on commercial mortgage and other loans can increase or decrease from period to period based on the factors noted above. Realized investment gains (losses), net includes changes in the allowance for losses and changes in value for loans accounted for under the fair value option. Realized investment gains (losses), net also includes gains and losses on sales, certain restructurings, and foreclosures.

When a commercial mortgage or other loan is deemed to be uncollectible, any specific valuation allowance associated with the loan is reversed and a direct write down to the carrying amount of the loan is made. The carrying amount of the loan is not adjusted for subsequent recoveries in value.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Commercial mortgage and other loans are occasionally restructured in a troubled debt restructuring. These restructurings generally include one or more of the following: full or partial payoffs outside of the original

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

contract terms; changes to interest rates; extensions of maturity; or additions or modifications to covenants. Additionally, the Company may accept assets in full or partial satisfaction of the debt as part of a troubled debt restructuring. When restructurings occur, they are evaluated individually to determine whether the restructuring or modification constitutes a troubled debt restructuring as defined by authoritative accounting guidance. If the borrower is experiencing financial difficulty and the Company has granted a concession, the restructuring, including those that involve a partial payoff or the receipt of assets in full satisfaction of the debt is deemed to be a troubled debt restructuring. Based on the Company's credit review process described above, these loans generally would have been deemed impaired prior to the troubled debt restructuring, and specific allowances for losses would have been established prior to the determination that a troubled debt restructuring has occurred.

In a troubled debt restructuring where the Company receives assets in full satisfaction of the debt, any specific valuation allowance is reversed and a direct write down of the loan is recorded for the amount of the allowance, and any additional loss, net of recoveries, or any gain is recorded for the difference between the fair value of the assets received and the recorded investment in the loan. When assets are received in partial settlement, the same process is followed, and the remaining loan is evaluated prospectively for impairment based on the credit review process noted above. When a loan is restructured in a troubled debt restructuring, the impairment of the loan is remeasured using the modified terms and the loan's original effective yield, and the allowance for loss is adjusted accordingly. Subsequent to the modification, income is recognized prospectively based on the modified terms of the loans in accordance with the income recognition policy noted above. Additionally, the loan continues to be subject to the credit review process noted above.

In situations where a loan has been restructured in a troubled debt restructuring and the loan has subsequently defaulted, this factor is considered when evaluating the loan for a specific allowance for losses in accordance with the credit review process noted above.

See Note 4 for additional information about commercial mortgage and other loans that have been restructured in a troubled debt restructuring.

Short-term investments primarily consist of highly liquid debt instruments with a maturity of greater than three months and less than twelve months when purchased, other than those debt instruments meeting this definition that are included in Trading account assets supporting insurance liabilities, at fair value. These investments are generally carried at fair value and include certain money market investments, short-term debt securities issued by government sponsored entities and other highly liquid debt instruments. Short-term investments held in the Company's former broker-dealer operations were marked-to-market through Income from discontinued operations, net of taxes.

Realized investment gains (losses) are computed using the specific identification method with the exception of some of the Company's International Insurance businesses' portfolios, where the average cost method is used. Realized investment gains and losses are generated from numerous sources, including the sale of fixed maturity securities, equity securities, investments in joint ventures and limited partnerships and other types of investments, as well as adjustments to the cost basis of investments for net other-than-temporary impairments recognized in earnings. Realized investment gains and losses are also generated from prepayment premiums received on private fixed maturity securities, allowance for losses on commercial mortgage and other loans, fair value changes on commercial mortgage loans carried at fair value, and fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment, except those derivatives used in the Company's capacity as a broker or dealer.

The Company's available-for-sale and held-to-maturity securities with unrealized losses are reviewed quarterly to identify other-than-temporary impairments in value. In evaluating whether a decline in value is

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. With regard to available-for-sale equity securities, the Company also considers the ability and intent to hold the investment for a period of time to allow for a recovery of value. When it is determined that a decline in value of an equity security is other-than-temporary, the carrying value of the equity security is reduced to its fair value, with a corresponding charge to earnings.

Under the authoritative guidance for the recognition and presentation of other-than-temporary impairments for debt securities, an other-than-temporary impairment must be recognized in earnings for a debt security in an unrealized loss position when an entity either (a) has the intent to sell the debt security or (b) more likely than not will be required to sell the debt security before its anticipated recovery. For all debt securities in unrealized loss positions that do not meet either of these two criteria, the guidance requires that the Company analyze its ability to recover the amortized cost by comparing the net present value of projected future cash flows with the amortized cost of the security. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the debt security prior to impairment. The Company may use the estimated fair value of collateral as a proxy for the net present value if it believes that the security is dependent on the liquidation of collateral for recovery of its investment. If the net present value is less than the amortized cost of the investment, an other-than-temporary impairment is recognized. In addition to the above mentioned circumstances, the Company also recognizes an other-than-temporary impairment in earnings when a non-functional currency denominated security in an unrealized loss position due to currency exchange rates approaches maturity.

Under the authoritative guidance for the recognition and presentation of other-than-temporary impairments, when an other-than-temporary impairment of a debt security has occurred, the amount of the other-than-temporary impairment recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria or the foreign currency translation loss is not expected to be recovered before maturity, the other-than-temporary impairment recognized in earnings is equal to the entire difference between the security's amortized cost basis and its fair value at the impairment measurement date. For other-than-temporary impairments of debt securities that do not meet these criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and its net present value calculated as described above. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in Other comprehensive income (loss). Unrealized gains or losses on securities for which an other-than-temporary impairment has been recognized in earnings is tracked as a separate component of Accumulated other comprehensive income (loss).

For debt securities, the split between the amount of an other-than-temporary impairment recognized in other comprehensive income and the net amount recognized in earnings is driven principally by assumptions regarding the amount and timing of projected cash flows. For mortgage-backed and asset-backed securities, cash flow estimates consider the payment terms of the underlying assets backing a particular security, including interest rate and prepayment assumptions, based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also include other assumptions regarding the underlying collateral including default rates and recoveries, which vary based on the asset type and geographic location, as well as the vintage year of the security. For structured securities, the payment priority within the tranche structure is also considered. For all other debt securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. The Company has developed these estimates using information based on its

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

historical experience as well as using market observable data, such as industry analyst reports and forecasts, sector credit ratings and other data relevant to the collectability of a security, such as the general payment terms of the security and the security's position within the capital structure of the issuer.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods, including increases in cash flow on a prospective basis. In certain cases where there are decreased cash flow expectations, the security is reviewed for further cash flow impairments.

Derivative Financial Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices, values of securities or commodities, credit spreads, market volatility, expected returns, and liquidity. Values can also be affected by changes in estimates and assumptions, including those related to counterparty behavior and non-performance risk used in valuation models. Derivative financial instruments generally used by the Company include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter market. Derivative positions are carried at fair value, generally by obtaining quoted market prices or through the use of valuation models.

Derivatives are used in a non-broker-dealer capacity to manage the interest rate and currency characteristics of assets or liabilities and to mitigate volatility of expected non-U.S. earnings and net investments in foreign operations resulting from changes in currency exchange rates. Additionally, derivatives may be used to seek to reduce exposure to interest rate, credit, foreign currency and equity risks associated with assets held or expected to be purchased or sold, and liabilities incurred or expected to be incurred. As discussed in detail below and in Note 14, all realized and unrealized changes in fair value of non-broker-dealer related derivatives are recorded in current earnings, with the exception of the effective portion of cash flow hedges and effective hedges of net investments in foreign operations. Cash flows from derivatives are reported in the operating, investing, or financing activities sections in the Unaudited Interim Consolidated Statements of Cash Flows based on the nature and purpose of the derivative.

Derivatives were also used in a derivative broker-dealer capacity in the Company's former global commodities group to meet the needs of clients by structuring transactions that allow clients to manage their exposure to interest rates, foreign exchange rates, indices and prices of securities and commodities. The Company's global commodities group was sold on July 1, 2011. See Note 3 for further details. Realized and unrealized changes in fair value of derivatives used in these dealer related operations are included in Income from discontinued operations, net of taxes in the periods in which the changes occur. Cash flows from such derivatives are reported in the operating activities section of the Unaudited Interim Consolidated Statements of Cash Flows.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Derivatives are recorded either as assets, within Other trading account assets, at fair value or Other long-term investments, or as liabilities, within Other liabilities, except for embedded derivatives which are recorded with the associated host contract. The Company nets the fair value of all derivative financial instruments with counterparties for which a master netting arrangement has been executed.

The Company designates derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment (fair value hedge); (2) a hedge of a forecasted transaction or of the

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge); (3) a foreign-currency fair value or cash flow hedge (foreign currency hedge); (4) a hedge of a net investment in a foreign operation; or (5) a derivative that does not qualify for hedge accounting.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship. Even if a derivative qualifies for hedge accounting treatment, there may be an element of ineffectiveness of the hedge. Under such circumstances, the ineffective portion is recorded in Realized investment gains (losses), net.

The Company formally documents at inception all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives designated as fair value, cash flow, or foreign currency hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. Hedges of a net investment in a foreign operation are linked to the specific foreign operation.

When a derivative is designated as a fair value hedge and is determined to be highly effective, changes in its fair value, along with changes in the fair value of the hedged asset or liability (including losses or gains on firm commitments), are reported on a net basis in the income statement, generally in Realized investment gains (losses), net. When swaps are used in hedge accounting relationships, periodic settlements are recorded in the same income statement line as the related settlements of the hedged items.

When a derivative is designated as a cash flow hedge and is determined to be highly effective, changes in its fair value are recorded in Accumulated other comprehensive income (loss), to the extent they are effective, until earnings are affected by the variability of cash flows being hedged (e.g., when periodic settlements on a variable-rate asset or liability are recorded in earnings). At that time, the related portion of deferred gains or losses on the derivative instrument is reclassified and reported in the income statement line item associated with the hedged item.

When a derivative is designated as a foreign currency hedge and is determined to be highly effective, changes in its fair value are recorded either in current period earnings if the hedge transaction is a fair value hedge (e.g., a hedge of a recognized foreign currency asset or liability) or in Accumulated other comprehensive income (loss) if the hedge transaction is a cash flow hedge (e.g., a foreign currency denominated forecasted transaction). When a derivative is used as a hedge of a net investment in a foreign operation, its change in fair value, to the extent effective as a hedge, is recorded in the cumulative translation adjustment account within Accumulated other comprehensive income (loss).

If it is determined that a derivative no longer qualifies as an effective fair value or cash flow hedge or management removes the hedge designation, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in Realized investment gains (losses), net. In this scenario, the hedged asset or liability under a fair value hedge will no longer be adjusted for changes in fair value and the existing basis adjustment is amortized to the income statement line associated with the asset or liability. The component of Accumulated other comprehensive income (loss) related to discontinued cash flow hedges is reclassified to the income statement

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

line associated with the hedged cash flows consistent with the earnings impact of the original hedged cash flows.

When hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

value recognized currently in Realized investment gains (losses), net. Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the balance sheet and recognized currently in Realized investment gains (losses), net. Gains and losses that were in Accumulated other comprehensive income (loss) pursuant to the hedge of a forecasted transaction are recognized immediately in Realized investment gains (losses), net.

If a derivative does not qualify for hedge accounting, all changes in its fair value, including net receipts and payments, are included in Realized investment gains (losses), net without considering changes in the fair value of the economically associated assets or liabilities.

The Company is a party to financial instruments that contain derivative instruments that are embedded in the financial instruments. At inception, the Company assesses whether the economic characteristics of the embedded instrument are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that (1) the embedded instrument possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded instrument qualifies as an embedded derivative that is separated from the host contract, carried at fair value, and changes in its fair value are included in Realized investment gains (losses), net. For certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, the Company may elect to classify the entire instrument as a trading account asset and report it within Other trading account assets, at fair value.

Adoption of New Accounting Pronouncements

Effective January 1, 2012, the Company adopted, retrospectively, updated guidance regarding the presentation of comprehensive income. The updated guidance eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. Under the updated guidance, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The updated guidance does not change the items that are reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The Company opted to present the total of comprehensive income, the components of net income, and the components of other comprehensive income in two separate but consecutive statements. The Unaudited Interim Consolidated Financial Statements included herein reflect the adoption of this updated guidance.

Effective January 1, 2012, the Company adopted, prospectively, updated guidance regarding the fair value measurements and disclosure requirements. The updated guidance clarifies existing guidance related to the application of fair value measurement methods and requires expanded disclosures. The expanded disclosures required by this guidance are included in Note 13. Adoption of this guidance did not have a material effect on the Company's consolidated financial position or results of operations.

Effective January 1, 2012, the Company adopted, prospectively, updated guidance regarding the assessment of effective control for repurchase agreements. The Company's adoption of this guidance did not have a material effect on the Company's consolidated financial position, results of

operations, and financial statement disclosures.

Effective January 1, 2012, the Company adopted, retrospectively, new authoritative guidance to address diversity in practice regarding the interpretation of which costs relating to the acquisition of new or renewal

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

insurance contracts qualify for deferral. Under the amended guidance, acquisition costs are to include only those costs that are directly related to the acquisition or renewal of insurance contracts by applying a model similar to the accounting for loan origination costs. An entity may defer incremental direct costs of contract acquisition with independent third parties or employees that are essential to the contract transaction, as well as the portion of employee compensation, including payroll fringe benefits and other costs directly related to underwriting, policy issuance and processing, medical inspection, and contract selling for successfully negotiated contracts. Prior period financial information presented in these financial statements has been adjusted to reflect the retrospective adoption of the amended guidance. The lower level of costs now qualifying for deferral will be only partially offset by a lower level of amortization of Deferred policy acquisition costs, and, as such, will initially result in lower earnings in future periods, primarily within the International Insurance and Individual Annuities segments. The impact to the International Insurance segment largely reflects lower deferrals of allocated costs of its proprietary distribution system, while the impact to the Individual Annuities segment mainly reflects lower deferrals of its wholesaler costs. While the adoption of this amended guidance changes the timing of when certain costs are reflected in the Company's results of operations, it has no effect on the total acquisition costs to be recognized over time and has no impact on the Company's cash flows.

The following tables present amounts as previously reported in 2011, the effect on those amounts of the change due to the retrospective adoption of the amended guidance related to the deferral of acquisition costs as described above, and the adjusted amounts that are reflected in the Unaudited Interim Consolidated Financial Statements, included herein.

Unaudited Interim Consolidated Statement of Financial Position:

	December 31, 2011		
	As Previously Reported	Effect of Change (in millions)	As Currently Reported

Future Adoption of New Accounting Pronouncements

In July 2012, the FASB issued amended guidance on testing indefinite-lived intangible assets for impairment. Under the amended guidance, an entity can first assess qualitative factors to determine whether an indefinite-lived intangible asset may be impaired. If the entity concludes that it is not likely that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. But if the entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the asset's fair value with its carrying amount in accordance with existing guidance. The entity may also bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. The entity will be able to resume performing the qualitative assessment in any subsequent period. The amended guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The Company is currently assessing the impact of this guidance on the Company's consolidated financial position, results of operations, and financial statement disclosures, but does not expect it to impact its consolidated financial position or results of operations.

3. ACQUISITIONS AND DISPOSITIONS***Acquisition of AIG Star Life Insurance Co., Ltd., AIG Edison Life Insurance Company and Related Entities from AIG***

On February 1, 2011, Prudential Financial completed the acquisition from American International Group, Inc. (AIG) of AIG Star Life Insurance Co., Ltd. (Star), AIG Edison Life Insurance Company (Edison), AIG Financial Assurance Japan K.K., and AIG Edison Service Co., Ltd. (collectively, the Star and Edison Businesses) pursuant to the stock purchase agreement dated September 30, 2010 between Prudential Financial and AIG. The total purchase price was \$4,709 million, comprised of \$4,213 million in cash and \$496 million in assumed third party debt, substantially all of which is expected to be repaid, over time, with excess capital of the acquired entities. The acquisition of these businesses included the purchase by the Company of all of the shares of these entities, which became indirect wholly-owned subsidiaries of the Company.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

All acquired entities are Japanese corporations and their businesses are in Japan. On January 1, 2012, Star and Edison were merged into the Gibraltar Life Insurance Company, Ltd.

The Star and Edison Businesses primarily distribute individual life insurance, fixed annuities and certain accident and health products with fixed benefits through captive agents, independent agents, and banks. The addition of these operations to the Company's existing businesses increases its scale in the Japanese insurance market and provides complementary distribution opportunities.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Prudential Financial made a Section 338(g) election under the Internal Revenue Code with respect to the acquisition resulting in the acquired entities being treated for U.S. tax purposes as newly-incorporated companies. Under such election, the U.S. tax basis of the assets acquired and liabilities assumed of the Star and Edison Businesses were adjusted as of February 1, 2011 to reflect the consequences of the Section 338(g) election.

Although the acquisition of the Star and Edison Businesses included the acquisition of multiple entities, the Company views this as a single acquisition and reports it as such in the following disclosures.

Net Assets Acquired

The following table presents an allocation of the purchase price to assets acquired and liabilities assumed at February 1, 2011 (the Acquisition Date):

	(in millions)
Total invested assets at fair value(1)	\$ 43,103
Cash and cash equivalents	1,813
Accrued investment income	348
Value of business acquired(2)	3,769
Goodwill(2)	173
Other assets(1)(2)	880
Total assets acquired	50,086
Future policy benefits(2)(3)	22,202
Policyholders' account balances(2)(3)(4)	22,785
Long-term debt	496
Other liabilities(2)	390
Total liabilities assumed	45,873
Net assets acquired	\$ 4,213

(1) Total invested assets, at fair value, include \$55 million of related party assets. Other assets include \$86 million of related party assets.

(2) Reflects revisions to prior period presentation for correction of treatment of certain acquired policies and refinements to certain data.

(3) Reflects reclassifications to prior period presentation for correction of classification of certain acquired policies.

(4) Includes investment contracts reported at fair value, which exceeded the account value by \$646 million.

Value of Business Acquired

Value of business acquired (VOBA), which is established in accordance with purchase accounting guidance, is an intangible asset associated with the acquired in force insurance contracts representing the difference between the fair value and carrying value of the liabilities, determined as of the acquisition date. The fair value of the liabilities, and hence VOBA, reflects the cost of the capital attributable to the acquired insurance contracts. VOBA will be amortized over the expected life of the contracts in proportion to either gross premiums or gross profits, depending on the type of contract. Total gross profits will include both actual experience as it arises and estimates of gross profits for future periods. The Company will regularly evaluate and adjust the VOBA balance with a corresponding charge or credit to earnings for the effects of actual gross profits and changes in assumptions regarding estimated future gross profits. VOBA is reported as a component of Other assets and the amortization of VOBA is reported in General and administrative expenses. The proportion of the VOBA balance attributable to each of the product groups associated with this acquisition are as follows: 48% related to accident and health insurance products, 45% related to individual life insurance, and 7% related to fixed annuities.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The following table provides estimated future amortization of VOBA, net of interest, assuming June 30, 2012 end of period foreign currency exchange rates remain constant, relating to the Star and Edison Businesses for the periods indicated.

	(in millions)
Remainder of 2012	\$ 197
2013	\$ 354
2014	\$ 308
2015	\$ 266
2016	\$ 234
2017 and thereafter	\$ 1,850

Information regarding the change in VOBA is as follows:

	(in millions)
Balance as of January 1, 2012	\$ 3,490
Amortization	(266)
Interest	22
Foreign currency translation	(37)
Balance as of June 30, 2012	\$ 3,209

Goodwill

As a result of the acquisition of the Star and Edison Businesses, the Company recognized an asset for goodwill representing the excess of the acquisition cost over the net fair value of the assets acquired and liabilities assumed. Goodwill resulting from the acquisition of the Star and Edison Businesses amounted to \$173 million. Based on the Company's final calculation of the 338(g) election the Company determined that none of the goodwill is tax deductible. In accordance with U.S. GAAP, goodwill will not be amortized but rather will be tested at least annually for impairment. The test will be performed at the reporting unit level which for this acquisition is the International Insurance segment's Gibraltar Life and Other operations.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)***Supplemental Unaudited Pro Forma Information*

The following supplemental information presents selected unaudited pro forma information for the Company assuming the acquisition had occurred as of January 1, 2010. This pro forma information does not purport to represent what the Company's actual results of operations would have been if the acquisition had occurred as of the date indicated or what such results would be for any future periods. The pro forma information does not reflect the impact of future events that may occur, including but not limited to, expense efficiencies arising from the acquisition and also does not give effect to certain one-time charges that the Company expects to incur, such as restructuring and integration costs.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

On April 6, 2011, the Company entered into a stock and asset purchase agreement with Jefferies Group, Inc. (Jefferies), pursuant to which the Company agreed to sell to Jefferies all of the issued and outstanding shares of capital stock of the Company's subsidiaries that conducted its global commodities business (the Global Commodities Business) and certain assets that were primarily used in connection with the Global Commodities Business. Subsidiaries included in the sale were Prudential Bache Commodities, LLC, Prudential Bache Securities, LLC, Bache Commodities Limited, and Bache Commodities (Hong Kong) Ltd. On July 1, 2011, the Company completed the sale and received cash proceeds of \$422 million. Included in the table above for the three and six months ended June 30, 2011, is an after-tax loss of \$1 million recorded in connection with the sale of these operations. This consisted of a pre-tax loss of \$12 million and income tax benefit of \$11 million.

Real estate investments sold or held for sale reflects the income or loss from discontinued real estate investments.

Charges recorded in connection with the disposals of businesses include estimates that are subject to subsequent adjustment.

The Company's Unaudited Interim Consolidated Statements of Financial Position include total assets and total liabilities related to discontinued businesses as follows:

	June 30, 2012	December 31, 2011
	(in millions)	
Total assets	\$ 71	\$ 464
Total liabilities	\$ 1	\$ 7

Net writedowns for other-than-temporary impairment losses on fixed maturities recognized in earnings(1)	\$ (93)	\$ (153)	\$ (205)	\$ (257)
Writedowns for impairments on equity securities	(41)	(37)	(90)	(59)

(1) Excludes the portion of other-than-temporary impairments recorded in Other comprehensive income (loss), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

As discussed in Note 2, a portion of certain other-than-temporary impairment (OTTI) losses on fixed maturity securities are recognized in Other comprehensive income (loss) (OCI). For these securities, the net amount recognized in earnings (credit loss impairments) represents the difference between the amortized cost of the security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in OCI. The following tables set forth the amount of pre-tax credit loss impairments on fixed maturity securities held by the Company as of the dates indicated, for which a portion of the OTTI loss was recognized in OCI, and the corresponding changes in such amounts.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****Credit losses recognized in earnings on fixed maturity securities held by the Company for which a portion of the OTTI loss was recognized in OCI**

	Three Months Ended June 30, 2012	Six Months Ended June 30, 2012
	(in millions)	
Balance, beginning of period	\$ 1,465	\$ 1,475
Credit loss impairments previously recognized on securities which matured, paid down, prepaid or were sold during the period	(67)	(85)
Credit loss impairments previously recognized on securities impaired to fair value during the period(1)	0	(59)

The net change in unrealized gains and losses from other trading account assets, excluding derivative instruments, still held at period end, recorded within Asset management fees and other income included \$49 million of losses and \$52 million of gains during the three months ended June 30, 2012 and 2011, respectively, and \$88 million and \$103 million of gains during the six months ended June 30, 2012 and 2011, respectively.

Concentrations of Financial Instruments

The Company monitors its concentrations of financial instruments on an on-going basis, and mitigates credit risk by maintaining a diversified investment portfolio which limits exposure to any one issuer.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

As of June 30, 2012 and December 31, 2011, the Company was not exposed to any concentrations of credit risk of any single issuer greater than 10% of the Company's stockholders' equity, other than securities of the U.S. government, certain U.S. government agencies and certain securities guaranteed by the U.S. government, as well as the securities disclosed below.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The net carrying value of commercial and other loans held for sale by the Company as of June 30, 2012 and December 31, 2011 was \$306 million and \$514 million, respectively. In all these transactions, the Company pre-arranges that it will sell the loan to an investor. As of June 30, 2012 and December 31, 2011, all of the Company's commercial and other loans held for sale were collateralized, with collateral primarily consisting of office buildings, retail properties, apartment complexes and industrial buildings.

The following tables set forth the credit quality indicators as of June 30, 2012, based upon the recorded investment gross of allowance for credit losses.

The following table sets forth the commercial mortgage and other loans acquired and sold during the three months ended June 30, 2012:

	Commercial Mortgage Loans	Agricultural Property Loans	Residential Property Loans	Other Collateralized Loans	Uncollateralized Loans	Total
	(in millions)					
Acquired(1)	\$ 0	\$ 0	\$ 0	\$ 0	\$ 47	\$ 47
Sold(2)	0	0	0	0	0	0

(1) Reported at purchase price of commercial mortgage and other loans acquired.

(2) Reported at book value of commercial mortgage and other loans sold.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The following tables provide information about commercial mortgage and other loans involved in a troubled debt restructuring as of the dates indicated. The pre-modification outstanding recorded investment has been adjusted for any partial payoffs, and the table excludes troubled debt restructurings where we have received assets, other than loans, in full satisfaction of the loan. See Note 2 for additional information relating to the accounting for troubled debt restructurings.

	Three Months Ended June 30, 2012		Six Months Ended June 30, 2012	
	Adjusted Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Adjusted Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
	(in millions)			
Commercial mortgage loans:				
Industrial	\$ 0	\$ 0	\$ 0	\$ 0
Retail	0	0	0	0
Office	0	0	5	5
Apartments/Multi-Family	0	0	0	0
Hospitality	0	0	0	0
Other	15	13	15	13
Total commercial mortgage loans	15	13	20	18
Agricultural property loans	0	0	0	0
Residential property loans	0	0	0	0
Other collateralized loans	0	0	0	0
Uncollateralized loans	0	0	0	0
Total	\$ 15	\$ 13	\$ 20	\$ 18

The amount of payment defaults during the period on commercial mortgage and other loans that were modified as a troubled debt restructuring within the last 12 months was less than \$1 million as of June 30, 2012.

As of June 30, 2012, the Company committed to fund \$6 million to borrowers that have been involved in a troubled debt restructuring.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)*****Net Investment Income***

- (1) Includes \$706 million of fair value and \$98 million of gross unrealized losses at December 31, 2011, on securities classified as held-to-maturity, a portion of which are not reflected in Accumulated other comprehensive income (loss).

The gross unrealized losses at June 30, 2012 and December 31, 2011, are composed of \$2,673 million and \$3,535 million, respectively, related to high or highest quality securities based on NAIC or equivalent rating and \$1,220 million and \$1,819 million, respectively, related to other than high or highest quality securities based on NAIC or equivalent rating. At June 30, 2012, \$2,376 million of the gross unrealized losses represented declines in value of greater than 20%, \$318 million of which had been in that position for less than six months, as compared to \$3,478 million at December 31, 2011, that represented declines in value of greater than 20%, \$871 million of which had been in that position for less than six months. At June 30, 2012, the \$3,246 million of gross unrealized losses of twelve months or more were concentrated in asset-backed securities, and in the manufacturing, public utilities, and finance sectors of the Company's corporate securities. At December 31, 2011, the \$3,900 million of gross unrealized losses of twelve months or more were concentrated in asset-backed securities, and in the manufacturing, finance, and public utilities sectors of the Company's corporate securities. In accordance with its policy described in Note 2, the Company concluded that an adjustment to earnings for other-than-temporary impairments for these securities was not warranted at June 30, 2012 or December 31, 2011. These conclusions are based on a detailed analysis of the underlying credit and cash flows on each security. The gross unrealized losses are primarily attributable to foreign currency movements, credit spread widening and increased liquidity discounts. At June 30, 2012, the Company does not intend to sell the securities and it is not more likely than not that the Company will be required to sell the securities before the anticipated recovery of its remaining amortized cost basis.

Duration of Gross Unrealized Loss Positions for Equity Securities

The following table shows the fair value and gross unrealized losses aggregated by length of time that individual equity securities have been in a continuous unrealized loss position, as of the following dates:

	Less than twelve months		June 30, 2012 Twelve months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Equity securities, available-for-sale	\$ 1,802	\$ 191	\$ 0	\$ 0	\$ 1,802	\$ 191

	Less than twelve months		December 31, 2011 Twelve months or more		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Equity securities, available-for-sale	\$ 2,602	\$ 448	\$ 0	\$ 0	\$ 2,602	\$ 448

At June 30, 2012, \$39 million of the gross unrealized losses represented declines of greater than 20%, \$34 million of which had been in that position for less than six months. At December 31, 2011, \$236 million of the gross unrealized losses represented declines of greater than 20%, \$225 million of which had been in that position for less than six months. In accordance with its policy described in Note 2, the Company concluded that an adjustment for other-than-temporary impairments for these equity securities was not warranted at June 30, 2012 or December 31, 2011.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

5. VARIABLE INTEREST ENTITIES

In the normal course of its activities, the Company enters into relationships with various special purpose entities and other entities that are deemed to be variable interest entities (VIEs). A VIE is an entity that either (1) has equity investors that lack certain essential characteristics of a controlling financial interest (including the ability to control activities of the entity, the obligation to absorb the entity's expected losses and the right to receive the entity's expected residual returns) or (2) lacks sufficient equity to finance its own activities without financial support provided by other entities, which in turn would be expected to absorb at least some of the expected losses of the VIE.

If the Company determines that it is the VIE's primary beneficiary, it consolidates the VIE. There are currently two models for determining whether or not the Company is the primary beneficiary of a VIE. The first relates to those VIEs that have the characteristics of an investment company and for which certain other conditions are true. These conditions are that (1) the Company does not have the implicit or explicit obligation to fund losses of the VIE and (2) the VIE is not a securitization entity, asset-backed financing entity or an entity that was formerly considered a qualified special-purpose entity. In this model the Company is the primary beneficiary if it stands to absorb a majority of the VIE's expected losses or to receive a majority of the VIE's expected residual returns and would be required to consolidate the VIE.

For all other VIEs, the Company is the primary beneficiary if the Company has (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. If both conditions are present the Company would be required to consolidate the VIE.

Consolidated Variable Interest Entities for which the Company is the Investment Manager

The Company is the investment manager of certain asset-backed investment vehicles (commonly referred to as collateralized debt obligations, or CDOs) and certain other vehicles for which the Company earns fee income for investment management services, including certain investment structures which the Company's asset management business invests with other co-investors in investment funds referred to as feeder funds. The Company sells or syndicates investments through these vehicles, principally as part of the strategic investing activity of the Company's asset management businesses. Additionally, the Company may invest in debt or equity securities issued by these vehicles. CDOs raise capital by issuing debt securities, and use the proceeds to purchase investments, typically interest-bearing financial instruments. The Company analyzes these relationships to determine whether it has (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant and thus is the primary beneficiary. This analysis includes a review of (1) the Company's rights and responsibilities as investment manager, (2) fees received by the Company and (3) other interests (if any) held by the Company. The Company is not required to provide, and has not provided, material financial or other support to any VIE for which it is the investment manager.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The Company has determined that it is the primary beneficiary of certain VIEs for which it is the asset manager, including certain CDOs and other investment structures, as it meets both conditions listed above. The table below reflects the carrying amount and balance sheet caption in which the assets and liabilities of consolidated VIEs for which the Company is the investment manager are reported. The assets of these VIEs are restricted and must be used first to settle liabilities of the VIE. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIE.

	June 30, 2012	December 31, 2011
	(in millions)	
Fixed maturities, available-for-sale	\$ 84	\$ 83
Other trading account assets	305	271
Commercial mortgage and other loans	178	154
Other long-term investments	21	19
Cash and cash equivalents	37	275
Accrued investment income	1	1
Other assets	19	17
Total assets of consolidated VIEs	\$ 645	\$ 820
Other liabilities	\$ 549	\$ 723
Total liabilities of consolidated VIEs	\$ 549	\$ 723

The Company also consolidates a VIE whose beneficial interests are wholly-owned by consolidated subsidiaries. This VIE is not included in the table above and the Company does not currently intend to sell these beneficial interests to third parties.

Other Consolidated Variable Interest Entities

The Company is the primary beneficiary of certain VIEs in which the Company has invested, as part of its investment activities. Included among these structured investments are structured investments issued by a VIE that manages yen-denominated investments coupled with cross-currency coupon swap agreements thereby creating synthetic dual currency investments. The Company's involvement in the structuring of these investments combined with its economic interest indicates that the Company is the primary beneficiary. The Company has not provided material financial or other support that was not contractually required to these VIEs. The table below reflects the carrying amount and balance sheet caption in which the assets and liabilities of consolidated VIEs for which the Company is not the investment manager are reported. These liabilities primarily comprise obligations under debt instruments issued by the VIEs that are non-recourse to the Company. The creditors of each consolidated VIE have recourse only to the assets of that VIE.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

In addition, not reflected in the table above, the Company has created a trust that is a VIE, to facilitate Prudential Insurance's Funding Agreement Notes Issuance Program (FANIP). The trust issues medium-term notes secured by funding agreements issued to the trust by Prudential Insurance with the proceeds of such notes. The trust is the beneficiary of an indemnity agreement with the Company that provides that the Company is responsible for costs related to the notes issued with limited exception. As a result, the Company has determined that it is the primary beneficiary of the trust, which is therefore consolidated.

The funding agreements represent an intercompany transaction that is eliminated upon consolidation. However, in recognition of the security interest in such funding agreements, the trust's medium-term note liability of \$2,272 million and \$3,197 million at June 30, 2012 and December 31, 2011, respectively, is classified within Policyholders' account balances. Creditors of the trust have recourse to Prudential Insurance if the trust fails to make contractual payments on the medium-term notes. The Company has not provided material financial or other support that was not contractually required to the trust.

Unconsolidated Variable Interest Entities

The Company has determined that it is not the primary beneficiary of certain VIEs for which it is the investment manager, including certain CDOs and other investment structures, as it does not have both (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. The Company's maximum exposure to loss resulting from its relationship with unconsolidated VIEs for which it is the investment manager is limited to its investment in the VIEs, which was \$502 million and \$534 million at June 30, 2012 and December 31, 2011, respectively. These investments are reflected in Fixed maturities, available-for-sale, Other trading account assets, at fair value and Other long-term investments. The fair value of assets held within these unconsolidated VIEs was \$8,030 million and \$7,720 million as of June 30, 2012 and December 31, 2011, respectively. There are no liabilities associated with these unconsolidated VIEs on the Company's balance sheet.

In the normal course of its activities, the Company will invest in joint ventures and limited partnerships. These ventures include hedge funds, private equity funds and real estate-related funds and may or may not be VIEs. The Company's maximum exposure to loss on these investments, both VIEs and non-VIEs, is limited to the amount of its investment. The Company has determined that it is not required to consolidate these entities because either (1) it does not control them or (2) it does not have the obligation to absorb losses of the entities that could be potentially significant to the entities or the right to receive benefits from the entities that could be potentially significant. The Company classifies these investments as Other long-term investments and its maximum exposure to loss associated with these entities was \$4,529 million and \$4,486 million as of June 30, 2012 and December 31, 2011, respectively.

In addition, in the normal course of its activities, the Company will invest in structured investments including VIEs for which it is not the investment manager. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities. The Company's maximum exposure to loss on these structured investments, both VIEs and non-VIEs, is limited to the amount of its investment. See Note 4 for details regarding the carrying amounts and classification of these assets. The Company has not provided material financial or other support that was not contractually required to these structures. The Company has determined that it is not the primary beneficiary of these structures due to the fact that it does not

control these entities.

Included among these structured investments are asset-backed securities issued by VIEs that manage investments in the European market. In addition to a stated coupon, each investment provides a return based on

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

the VIE's portfolio of assets and related investment activity. The market value of these VIEs was approximately \$2.1 billion and \$2.6 billion as of June 30, 2012 and December 31, 2011, respectively, and these VIEs were financed primarily through the issuance of notes similar to those purchased by the Company. The Company generally accounts for these investments as available-for-sale fixed maturities containing embedded derivatives that are bifurcated and marked-to-market through Realized investment gains (losses), net, based upon the change in value of the underlying portfolio. The Company's variable interest in each of these VIEs represents less than 50% of the only class of variable interests issued by the VIE. The Company's maximum exposure to loss from these interests was \$312 million and \$664 million at June 30, 2012 and December 31, 2011, respectively, which includes the fair value of the embedded derivatives.

6. CLOSED BLOCK

On the date of demutualization, Prudential Insurance established a Closed Block for certain individual life insurance policies and annuities issued by Prudential Insurance in the U.S. The recorded assets and liabilities were allocated to the Closed Block at their historical carrying amounts. The Closed Block forms the principal component of the Closed Block Business.

The policies included in the Closed Block are specified individual life insurance policies and individual annuity contracts that were in force on the effective date of the Plan of Reorganization and for which Prudential Insurance is currently paying or expects to pay experience-based policy dividends. Assets have been allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses, and taxes and to provide for continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues. To the extent that, over time, cash flows from the assets allocated to the Closed Block and claims and other experience related to the Closed Block are, in the aggregate, more or less favorable than what was assumed when the Closed Block was established, total dividends paid to Closed Block policyholders may be greater than or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any cash flows in excess of amounts assumed will be available for distribution over time to Closed Block policyholders and will not be available to stockholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from assets outside of the Closed Block. The Closed Block will continue in effect as long as any policy in the Closed Block remains in force unless, with the consent of the New Jersey insurance regulator, it is terminated earlier.

The excess of Closed Block Liabilities over Closed Block Assets at the date of the demutualization (adjusted to eliminate the impact of related amounts in Accumulated other comprehensive income (loss)) represented the estimated maximum future earnings at that date from the Closed Block expected to result from operations attributed to the Closed Block after income taxes. In establishing the Closed Block, the Company developed an actuarial calculation of the timing of such maximum future earnings. If actual cumulative earnings of the Closed Block from inception through the end of any given period are greater than the expected cumulative earnings, only the expected earnings will be recognized in income. Any excess of actual cumulative earnings over expected cumulative earnings will represent undistributed accumulated earnings attributable to policyholders, which are recorded as a policyholder dividend obligation. The policyholder dividend obligation represents amounts to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance that is less favorable than originally expected. If the actual cumulative earnings of the Closed Block from its inception through the end of any given period are less than the expected cumulative earnings of the Closed Block, the Company will recognize only the actual earnings in

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

income. However, the Company may reduce policyholder dividend scales, which would be intended to increase future actual earnings until the actual cumulative earnings equaled the expected cumulative earnings.

As of June 30, 2012 and December 31, 2011, the Company recognized a policyholder dividend obligation of \$779 million and \$762 million, respectively, to Closed Block policyholders for the excess of actual cumulative earnings over the expected cumulative earnings. Additionally, accumulated net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block were reflected as a policyholder dividend obligation of \$4,646 million and \$3,847 million at June 30, 2012 and December 31, 2011, respectively, to be paid to Closed Block policyholders unless offset by future experience, with an offsetting amount reported in Accumulated other comprehensive income (loss). See the table below for changes in the components of the policyholder dividend obligation for the six months ended June 30, 2012.

Closed Block Liabilities and Assets designated to the Closed Block, as well as maximum future earnings to be recognized from Closed Block Liabilities and Closed Block Assets, are as follows:

	June 30, 2012	December 31, 2011
	(in millions)	
Closed Block Liabilities		
Future policy benefits	\$ 51,160	\$ 51,423

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****7. EQUITY**

The Company has outstanding two classes of common stock: the Common Stock and the Class B Stock. The changes in the number of shares issued, held in treasury and outstanding are as follows for the periods indicated:

	Issued	Common Stock Held In Treasury	Outstanding (in millions)	Class B Stock Issued and Outstanding
Balance, December 31, 2011	660.1	192.1	468.0	2.0
Common Stock issued	0.0	0.0	0.0	0.0
Common Stock acquired	0.0	8.8	(8.8)	0.0
Stock-based compensation programs(1)	0.0	(4.8)	4.8	0.0
Balance, June 30, 2012	660.1	196.1	464.0	2.0

(1) Represents net shares issued from treasury pursuant to the Company's stock-based compensation program.

In June 2011, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.5 billion of its outstanding Common Stock through June 2012. As of June 30, 2012, 28.6 million shares of the Company's Common Stock were repurchased under this authorization at a total cost of \$1.5 billion, of which 8.8 million shares were repurchased in the first six months of 2012 at a total cost of \$500 million.

In June 2012, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.0 billion of its outstanding Common Stock through June 2013. As of June 30, 2012, there were no repurchases made under this authorization. The timing and amount of any share repurchases will be determined by management based on market conditions and other considerations, and the repurchases may be effected in the open market, through derivative, accelerated repurchase and other negotiated transactions and through plans designed to comply with Rule 10b5-1(c) under the Exchange Act.

The balance of and changes in each component of Accumulated other comprehensive income (loss) attributable to Prudential Financial, Inc. for the six months ended June 30, 2012 and 2011 are as follows (net of taxes):

8. EARNINGS PER SHARE

The Company has outstanding two separate classes of common stock. The Common Stock reflects the performance of the Financial Services Businesses and the Class B Stock reflects the performance of the Closed Block Business. Accordingly, earnings per share is calculated separately for each of these two classes of common stock.

Net income for the Financial Services Businesses and the Closed Block Business is determined in accordance with U.S. GAAP and includes general and administrative expenses charged to each of the respective businesses based on the Company's methodology for the allocation of such expenses. Cash flows between the Financial Services Businesses and the Closed Block Business related to administrative expenses are determined by a policy servicing fee arrangement that is based upon insurance and policies in force and statutory cash premiums. To the extent reported administrative expenses vary from these cash flow amounts, the differences are recorded, on an after tax basis, as direct equity adjustments to the equity balances of the businesses.

The direct equity adjustments modify the earnings available to each of the classes of common stock for earnings per share purposes.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****Common Stock**

A reconciliation of the numerators and denominators of the basic and diluted per share computations is as follows:

Unvested share-based payment awards that contain nonforfeitable rights to dividends are participating securities and included in the computation of earnings per share pursuant to the two-class method. Under this method, earnings of the Financial Services Businesses attributable to Prudential Financial, Inc. are allocated between Common Stock and the participating awards, as if the awards were a second class of stock. Undistributed earnings allocated to participating unvested share-based payment awards for the three months ended June 30, 2012 and 2011 were based on 4.4 million and 6.8 million of such awards, respectively, weighted for the period they were outstanding. Undistributed earnings allocated to participating unvested share-based payment awards for the six months ended June 30, 2012 and 2011 were based on 4.8 million and 6.7 million of such awards, respectively, weighted for the period they were outstanding. The computation of earnings per share of Common Stock excludes the dilutive impact of participating unvested share-based awards based on the application of the two-class method.

For the three months ended June 30, 2012 and 2011, 14.3 million and 9.9 million options, respectively, weighted for the portion of the period they were outstanding, with a weighted average exercise price of \$69.05 and \$74.82 per share, respectively, were excluded from the computation of diluted earnings per share because the

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

options, based on application of the treasury stock method, were antidilutive. For the six months ended June 30, 2012 and 2011, 12.6 million and 9.4 million options, respectively, weighted for the portion of the period they were outstanding, with a weighted average exercise price of \$70.74 and \$75.42 per share, respectively, were excluded from the computation of diluted earnings per share because the options, based on application of the treasury stock method, were antidilutive.

In September 2009, the Company issued \$500 million of surplus notes with an interest rate of 5.36% per annum which are exchangeable at the option of the note holders for shares of Common Stock. The exchange rate used in the diluted earnings per share calculation for the surplus notes is 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes. In calculating diluted earnings per share under the if-converted method, the potential shares that would be issued assuming a hypothetical exchange, weighted for the period the notes are outstanding, are added to the denominator, and interest expense, net of tax, is added to the numerator, if the overall effect is dilutive.

Class B Stock

Income (loss) from continuing operations per share of Class B Stock for the three and six months ended June 30 are presented below. There are no potentially dilutive shares associated with the Class B Stock.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)****9. SHORT-TERM AND LONG-TERM DEBT***Commercial Paper*

The Company issues commercial paper under the two programs described below. At June 30, 2012 and December 31, 2011, the weighted average maturity of total commercial paper outstanding was 18 and 21 days, respectively.

Prudential Financial has a commercial paper program with an authorized capacity of \$3.0 billion. Prudential Financial commercial paper borrowings generally have been used to fund the working capital needs of Prudential Financial's subsidiaries and provide short-term liquidity at Prudential Financial.

Prudential Funding, LLC, a wholly-owned subsidiary of Prudential Insurance, has a commercial paper program with an authorized capacity of \$7.0 billion. Prudential Funding commercial paper borrowings generally have served as an additional source of financing to meet the working capital needs of Prudential Insurance and its subsidiaries. Prudential Funding also lends to other subsidiaries of Prudential Financial up to limits agreed with the New Jersey Department of Banking and Insurance. Prudential Financial has issued a subordinated guarantee covering Prudential Funding's commercial paper program.

The table below presents the Company's total outstanding commercial paper borrowings as of the dates indicated:

	June 30, 2012	December 31, 2011
	(in millions)	
Prudential Financial	\$ 208	\$ 296
Prudential Funding, LLC	789	870
Total outstanding commercial paper borrowings	\$ 997	\$ 1,166

Federal Home Loan Bank of New York

Prudential Insurance is a member of the Federal Home Loan Bank of New York, or FHLBNY. Membership allows Prudential Insurance access to the FHLBNY's financial services, including the ability to obtain collateralized loans and to issue collateralized funding agreements that can be

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

used as an alternative source of liquidity. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be maintained at certain specified levels relative to outstanding borrowings, depending on the type of asset pledged. FHLBNY membership requires Prudential Insurance to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, if Prudential Insurance's financial strength ratings decline below A/A2/A Stable by S&P/Moody's/Fitch, respectively, and the FHLBNY does not receive written assurances from the New Jersey Department of Banking and Insurance, or NJDOBI, regarding Prudential Insurance's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Currently, there are no restrictions on the term of borrowings from the FHLBNY.

NJDOBI permits Prudential Insurance to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. Based on Prudential Insurance's statutory net admitted assets as of December 31, 2011, the 5% limitation equates to a maximum amount of pledged assets of \$7.7 billion and an estimated maximum borrowing capacity (after taking into account required collateralization levels and purchases of activity-based stock) of approximately \$6.3 billion. Nevertheless, FHLBNY borrowings are subject to the FHLBNY's discretion and to the availability of qualifying assets at Prudential Insurance.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

As of June 30, 2012, Prudential Insurance had pledged qualifying assets with a fair value of \$2.9 billion, which supported outstanding collateralized advances of \$924 million and collateralized funding agreements of \$1.5 billion with maturities ranging from 2013 to 2018.

As of June 30, 2012, \$199 million of the FHLB NY outstanding advances is reflected in Short-term debt and matures in December 2012 and the remaining \$725 million is in Long-term debt and matures in December 2015. The funding agreements issued to the FHLB NY, which are reflected in Policyholders account balances, have priority claim status above debt holders of Prudential Insurance. The fair value of qualifying assets that were available to Prudential Insurance but not pledged amounted to \$3.6 billion as of June 30, 2012.

Federal Home Loan Bank of Boston

Prudential Retirement Insurance and Annuity Company, or PRIAC, is member of the Federal Home Loan Bank of Boston, or FHLBB. Membership allows PRIAC access to collateralized advances which will be classified in Short-term debt or Long-term debt, depending on the maturity date of the obligation. PRIAC's membership in FHLBB requires the ownership of member stock and borrowings from FHLBB require the purchase of activity-based stock in an amount between 3.0% and 4.5% of outstanding borrowings depending on the maturity date of the obligation. As of June 30, 2012, PRIAC had no advances outstanding under the FHLBB facility.

The Connecticut Department of Insurance, or CTDOI, permits PRIAC to pledge up to \$2.6 billion in qualifying assets to secure FHLBB borrowings through December 31, 2013. PRIAC must seek re-approval from CTDOI prior to borrowing additional funds after that date. Based on available eligible assets as of June 30, 2012, PRIAC had an estimated maximum borrowing capacity, after taking into consideration required collateralization levels and required purchases of activity-based FHLBB stock, of approximately \$1.6 billion.

Credit Facilities

As of June 30, 2012, Prudential Financial and Prudential Funding maintained an aggregate of \$3,750 million of unsecured committed credit facilities, which includes a \$2,000 million five-year credit facility on which Prudential Financial is the sole borrower party. These facilities have remaining terms ranging from 2.5 years to 4.5 years. There were no outstanding borrowings under these credit facilities as of June 30, 2012. Each of the facilities is available to the applicable borrowers up to the aggregate committed credit and may be used for general corporate purposes, including as backup liquidity for the Company's commercial paper programs discussed above. For additional information on these credit facilities, see Note 14 to the Company's Consolidated Financial Statements included in the 2011 Annual Report on Form 10-K.

Sale of Asset-Backed Notes

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

On March 30, 2012, Prudential Insurance sold, in a Rule 144A private placement, \$1.0 billion aggregate principal amount of 2.997% notes with a final maturity of September 30, 2015. The notes are secured by the assets of a trust, consisting of approximately \$2.8 billion aggregate principal balance of residential mortgage-backed securities deposited into the trust by Prudential Insurance. Payments of interest and principal on the notes will be made only to the extent of funds available to the trust in accordance with a priority of payments set forth in the indenture governing the notes. Prudential Financial guaranteed to the holders of the notes the timely payment of all principal and interest due on the notes and any make-whole payments that may become due as a result of the payment of principal on the notes prior to its scheduled payment date.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)*****Termination of Existing Replacement Capital Covenants and Execution of New Replacement Capital Covenant***

On April 11, 2012, the Company terminated the replacement capital covenants that were entered into in 2008 in connection with its issuance of \$600 million of 8.875% fixed-to-floating rate junior subordinated notes (the 8.875% junior subordinated notes) and \$920 million of 9.0% junior subordinated notes. The Company received the consent of holders of a majority in principal amount of its 6.625% medium-term notes due 2037, as was required for the termination of the replacement capital covenants. The Company also entered into a new replacement capital covenant with respect to the 8.875% junior subordinated notes only. The new replacement capital covenant was entered into for the benefit of the holders of the Company's 5.90% medium-term notes due March 2036 and requires that the Company not repay, redeem or purchase the 8.875% junior subordinated notes prior to June 15, 2038 unless it has received proceeds from the sale or issuance of common stock or other qualifying securities that have certain characteristics that are at least as equity-like as the 8.875% junior subordinated notes. However, the terms of the new replacement capital covenant will not apply in certain instances, including (i) if Standard & Poor's upgrades the Company's corporate credit rating by at least one notch above A+ or (ii) if the Company repurchases or redeems up to 10% of the outstanding principal amount of the 8.875% junior subordinated notes in any one-year period, provided that no more than 25% of the outstanding principal amount of the 8.875% junior subordinated notes are repurchased or redeemed in any ten-year period.

Surplus Notes

In 2011, a subsidiary of Prudential Insurance entered into an agreement that provides for the issuance by that subsidiary of up to \$1 billion of ten-year fixed rate surplus notes. In June 2012, this subsidiary entered into another agreement for the issuance of up to an additional \$500 million of ten-year fixed rate surplus notes. At June 30, 2012, \$750 million of surplus notes were outstanding under this facility. Under the agreements, the subsidiary issuer received debt securities that are redeemable under certain circumstances, including upon the occurrence of specified stress events affecting the subsidiary issuer. Interest and principal payments on the surplus notes and on the debt securities are settled on a net basis because valid rights of set-off exist. Also, Prudential Financial agreed that it or one of its affiliates will make capital contributions to the subsidiary issuer of the surplus notes to reimburse it for any investment losses in excess of specified amounts. Surplus notes issued under this facility are subordinated to policyholder obligations, and the payment of interest and principal may only be made with the prior approval of the Arizona Department of Insurance.

Retail Medium-term Notes

Prudential Financial maintains a retail medium-term notes program, including the InterNotes® program, under its shelf registration statement with an authorized issuance capacity of \$5.0 billion. As of June 30, 2012, the outstanding balance of retail notes was \$2.6 billion. In July 2012, the Company redeemed \$358 million of its outstanding retail notes and provided notice to noteholders to redeem an additional \$299 million of the retail notes in August 2012.

10. EMPLOYEE BENEFIT PLANS

Pension and Other Postretirement Plans

The Company has funded and non-funded contributory and non-contributory defined benefit pension plans, which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and earnings during their career.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents (other postretirement benefits). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company's U.S. employees may become eligible to receive other postretirement benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service.

Net periodic (benefit) cost included in General and administrative expenses includes the following components:

11. SEGMENT INFORMATION

Segments

The Company has organized its principal operations into the Financial Services Businesses and the Closed Block Business. Within the Financial Services Businesses, the Company operates through three divisions, which together encompass six reportable segments. Businesses that are not sufficiently material to warrant separate disclosure and divested businesses are included in Corporate and Other operations within the Financial Services Businesses. Collectively, the businesses that comprise the three operating divisions and Corporate and Other are referred to as the Financial Services Businesses.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

Adjusted Operating Income

In managing the Financial Services Businesses, the Company analyzes the operating performance of each segment using adjusted operating income. Adjusted operating income does not equate to income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures or net income as determined in accordance with U.S. GAAP but is the measure of segment profit or loss used by the Company to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is the measure of segment performance presented below. Adjusted operating income is calculated by adjusting each segment's income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures for the following items, which are described in greater detail below:

realized investment gains (losses), net, and related charges and adjustments;

net investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;

the contribution to income/loss of divested businesses that have been or will be sold or exited but that did not qualify for discontinued operations accounting treatment under U.S. GAAP; and

equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

These items are important to an understanding of overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and the Company's definition of adjusted operating income may differ from that used by other companies. However, the Company believes that the presentation of adjusted operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of the Financial Services Businesses.

As described in Note 1, during the second quarter of 2012, the Company recorded two out of period adjustments resulting in a decrease of \$122 million to Income from continuing operations before income taxes and equity in earnings of operating joint ventures for the three and six months ended June 30, 2012. The adjustments resulted in a decrease in adjusted operating income of \$106 million for the current quarter, including a reduction of \$61 million to the Asset Management segment and a reduction of \$45 million to the Corporate and Other operations of the Financial Services Businesses resulting from the increase in reserves. In addition, the reserves adjustment resulted in a reduction of \$16 million to the Closed Block Business which was excluded from adjusted operating income.

Realized investment gains (losses), net, and related charges and adjustments

Realized investment gains (losses), net

Adjusted operating income excludes Realized investment gains (losses), net, except for certain items described below. Significant activity excluded from adjusted operating income includes impairments and credit-related gains and losses from sales of securities, the timing of which depends largely on market credit cycles and can vary considerably across periods, and interest rate-related gains and losses from sales of securities, which are largely subject to the Company's discretion and influenced by market opportunities, as well as the Company's tax and capital profile. Additionally, certain gains and losses pertaining to derivative contracts that do not qualify for hedge accounting treatment are also excluded from adjusted operating income. Trends in the underlying profitability of the Company's businesses can be more clearly identified without the fluctuating effects of these transactions.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The following table sets forth the components of Realized investment gains (losses), net that are included in adjusted operating income and, as a result, are reflected as adjustments to Realized investment gains (losses), net for purposes of calculating adjusted operating income:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2012	2011	2012	2011
	(in millions)			
Net gains (losses) from:				
Terminated hedges of foreign currency earnings	\$ (21)	\$ (30)	\$ (48)	\$ (64)
Current period yield adjustments	\$ 88	\$ 59	\$ 154	\$ 123
Principal source of earnings	\$ (30)	\$ 76	\$ (19)	\$ 103

Terminated Hedges of Foreign Currency Earnings. The amounts shown in the table above primarily reflect the impact of an intercompany arrangement between Corporate and Other operations and the International Insurance segment, pursuant to which the non-U.S. dollar-denominated earnings in all countries for a particular year, including its interim reporting periods, are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency hedging program designed to mitigate the risk that unfavorable rate changes will reduce the segment's U.S. dollar equivalent earnings. Pursuant to this program, the Company's Corporate and Other operations execute forward currency contracts with third parties to sell the net exposure of projected earnings from the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar-denominated earnings are expected to be generated. These contracts do not qualify for hedge accounting under U.S. GAAP, so the resulting profits or losses are recorded in Realized investment gains (losses), net. When the contracts are terminated in the same period that the expected earnings emerge, the resulting positive or negative cash flow effect is included in adjusted operating income.

Current Period Yield Adjustments. The Company uses interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. For derivative contracts that do not qualify for hedge accounting treatment, the periodic swap settlements, as well as certain other derivative related yield adjustments are recorded in Realized investment gains (losses), net, and are included in adjusted operating income to reflect the after-hedge yield of the underlying instruments. In certain instances, when these derivative contracts are terminated or offset before their final maturity, the resulting realized gains or losses are recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives or underlying instruments in order for adjusted operating income to reflect the after-hedge yield of the underlying instruments. Included in the amounts shown in the table above are gains on certain derivatives contracts that were terminated or offset in prior periods of \$16 million and \$12 million for the three months ended June 30, 2012 and 2011, respectively, and \$30 million and \$24 million for the six months ended June 30, 2012 and 2011, respectively. Additionally, as of June 30, 2012, there was a \$609 million deferred net gain related to certain derivative contracts that were terminated or offset in prior periods, primarily in the International Insurance segment.

Principal Source of Earnings. The Company conducts certain activities for which realized investment gains and losses are a principal source of earnings for its businesses and therefore included in adjusted operating income, particularly within the Company's Asset Management segment. For example, Asset Management's strategic investing business makes investments for sale or syndication to other investors or for placement or co-investment in the Company's managed funds and structured products. The realized investment gains and losses associated with the sale of these strategic investments, as well as related derivative results, are a principal activity for this business and included in adjusted operating income. In addition, the realized investment gains and losses associated with loans originated by the Company's commercial mortgage operations, as well as related

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

derivative results and retained mortgage servicing rights, are a principal activity for this business and included in adjusted operating income. The amounts shown in the table above for the three and six months ended June 30, 2012 reflect the impact of the Asset Management segment's out of period adjustment discussed above.

Other items reflected as adjustments to Realized investment gains (losses), net

The following table sets forth certain other items excluded from adjusted operating income and reflected as an adjustment to Realized investment gains (losses), net for purposes of calculating adjusted operating income:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in millions)			
Net gains (losses) from:				
Other trading account assets	\$ (33)	\$ 10	\$ 33	\$ 57
Foreign currency exchange movements	\$ 1,503	\$ (12)	\$ 124	\$ (223)
Other activities	\$ 17	\$ 9	\$ 38	\$ (54)

Other Trading Account Assets. The Company has certain investments in its general account portfolios that are classified as trading. These trading investments are carried at fair value and included in Other trading account assets, at fair value on the Company's statements of financial position. Realized and unrealized gains and losses for these investments are recorded in Asset management fees and other income. Consistent with the exclusion of realized investment gains and losses with respect to other investments managed on a consistent basis, the net gains or losses on these investments are excluded from adjusted operating income.

Foreign Currency Exchange Movements. The Company has certain assets and liabilities for which, under U.S. GAAP, the changes in value, including those associated with changes in foreign currency exchange rates during the period, are recorded in Asset management fees and other income. To the extent the foreign currency exposure on these assets and liabilities is economically hedged or considered part of the Company's capital funding strategies for its international subsidiaries, the change in value included in Asset management fees and other income is excluded from adjusted operating income. The amounts in the table above are largely driven by non-yen denominated insurance liabilities in the Company's Japanese insurance operations. The insurance liabilities are supported by investments denominated in corresponding currencies, including a significant portion designated as available-for-sale. While these non-yen denominated assets and liabilities are economically hedged, under U.S. GAAP, unrealized gains and losses on available-for-sale investments, including those arising from foreign currency exchange rate movements, are recorded in Accumulated other comprehensive income (loss), while the non-yen denominated liabilities are re-measured for foreign currency exchange rate movements, and the related change in value is recorded in earnings within Asset management fees and other income. Due to this non-economic volatility that is reflected in U.S. GAAP earnings, the change in value recorded within Asset management fee and other income is excluded from adjusted operating income.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Included in the \$223 million net loss for the six months ended June 30, 2011 is an out of period adjustment recorded in the first quarter of 2011 that decreased income from continuing operations before equity in earnings of operating joint ventures by \$95 million.

Other Activities. The Company excludes certain other items from adjusted operating income that are consistent with similar adjustments described above. The significant items within other activities shown in the table above included the following:

In connection with the settlement of disputes arising out of the Chapter 11 bankruptcy petition filed by Lehman Brothers Holdings Inc., the Company recorded additional losses of \$65 million in the first quarter of

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

2011 related to a portion of its counterparty exposure on derivative transactions it had previously held with Lehman Brothers and its affiliates. These losses are recorded within Asset management fees and other income within the Company's Corporate and Other operations. Consistent with the exclusion of credit-related losses recorded in Realized investment gains (losses), net, the impact of this settlement is excluded from adjusted operating income. In the second quarter of 2012, the Company recorded a \$12 million estimated recovery of this settlement, which is also excluded from adjusted operating income.

The Company records an adjustment for non-performance risk that relates to the uncollateralized portion of certain derivative contracts between a subsidiary of the Company and third parties. These adjustments are recorded within Asset management fees and other income. Consistent with the exclusion of the mark-to-market on derivatives recorded in Realized investment gains (losses), net, the impact of the non-performance risk is excluded from adjusted operating income. The net impact of the non-performance risk was to exclude from adjusted operating income net gains of \$8 million, and \$11 million for the three months ended June 30, 2012 and 2011, respectively, and net gains of \$34 million and \$12 million for the six months ended June 30, 2012 and 2011, respectively.

Related charges

Charges that relate to realized investment gains and losses are also excluded from adjusted operating income, and include the following:

The portion of the amortization of deferred policy acquisition costs, value of business acquired, unearned revenue reserves and deferred sales inducements for certain products that is related to net realized investment gains and losses.

Policyholder dividends and interest credited to policyholders account balances that relate to certain foreign life policies and certain domestic group life policies, respectively, that pass back certain realized investment gains and losses to the policyholder, and reserves for future policy benefits for certain policies where cash flows are affected by net realized investment gains and losses.

Market value adjustments paid or received upon a contractholder's surrender of certain of the Company's annuity products as these amounts mitigate the net realized investment gains or losses incurred upon the disposition of the underlying invested assets.

Investment gains and losses on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes

Certain products included in the Retirement and International Insurance segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are classified as trading and are carried at fair value, with realized and unrealized gains and losses reported in Asset management fees and other income. To a lesser extent, these experience-rated products are also supported by derivatives and commercial mortgage and other loans. The derivatives are carried at fair value, with realized and unrealized gains and losses reported in Realized investment gains (losses), net. The

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

commercial mortgage and other loans are carried at unpaid principal, net of unamortized discounts and an allowance for losses, with gains and losses on sales and changes in the valuation allowance for commercial mortgage and other loans reported in Realized investment gains (losses), net.

Adjusted operating income excludes net investment gains and losses on trading account assets supporting insurance liabilities, which is consistent with the exclusion of realized investment gains and losses with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

with the historical treatment of charges related to realized investment gains and losses on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in Interest credited to policyholders account balances. These adjustments are in addition to the exclusion from adjusted operating income of net investment gains and losses on the related derivatives and commercial mortgage and other loans through *Realized investment gains (losses), net, and related charges and adjustments*, as discussed above. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread the Company earns on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that are expected to ultimately accrue to the contractholders.

Divested businesses

The contribution to income/loss of divested businesses that have been or will be sold or exited, but that did not qualify for discontinued operations accounting treatment under U.S. GAAP, are excluded from adjusted operating income as the results of divested businesses are not relevant to understanding the Company's ongoing operating results.

Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests

Equity in earnings of operating joint ventures, on a pre-tax basis, are included in adjusted operating income as these results are a principal source of earnings. These earnings are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on the Company's Unaudited Interim Consolidated Statements of Operations.

Earnings attributable to noncontrolling interests are excluded from adjusted operating income. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company's Unaudited Interim Consolidated Statements of Operations.

12. INCOME TAXES

The Company's liability for income taxes includes the liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by the Internal Revenue Service (IRS) or other taxing authorities. Audit periods remain open for review until the statute of limitations has passed. Generally, for tax years which produce net operating losses, capital losses or tax credit carryforwards (tax attributes), the statute of limitations does not close, to the extent of these tax attributes, until the expiration of the statute of limitations for the tax year in which

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

they are fully utilized. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. The statute of limitations for the 2004 through 2006 tax years will expire in December 2012, unless extended. The statute of limitations for the 2007 tax year will expire in December 2013, unless extended. Tax years 2008 through 2011 are still open for IRS examination. It is reasonably possible that the total amount of unrecognized tax benefits will decrease anywhere from \$0 to \$83 million within the next 12 months due to the completion of the IRS examination for tax years 2007 through 2010.

During 2004 through 2006, the Company entered into two transactions that involved, among other things, the payment of foreign income taxes that were credited against the Company's U.S. tax liability. On May 23, 2011, the IRS issued notices of proposed adjustments disallowing the foreign tax credits claimed and related transaction expenses. The total amount of the proposed adjustments for the transactions was approximately \$200 million of tax and penalties. During the fourth quarter of 2011, the Company reached agreement with the IRS on the resolution of the proposed foreign tax credits disallowance. The impact to the 2011 results attributable to the settlement was an increase to tax expense of approximately \$93 million. The settlement of the foreign tax credit transactions for 2004 through 2006 marked the conclusion of the IRS audits for those years. As a result, all unrecognized tax positions plus interest relating to tax years prior to 2007 were recognized in 2011. As such, 2011 benefited from a reduction to the liability for unrecognized tax benefits of \$70 million, including the impact from the foreign tax credit disallowance.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

The dividends received deduction (DRD) reduces the amount of dividend income subject to U.S. tax and is a significant component of the difference between the Company's effective tax rate and the federal statutory tax rate of 35%. The DRD for the current period was estimated using information from 2011, current year results, and was adjusted to take into account the current year's equity market performance. The actual current year DRD can vary from the estimate based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from mutual fund investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

In August 2007, the IRS released Revenue Ruling 2007-54, which included, among other items, guidance on the methodology to be followed in calculating the DRD related to variable life insurance and annuity contracts. In September 2007, the IRS released Revenue Ruling 2007-61. Revenue Ruling 2007-61 suspended Revenue Ruling 2007-54 and informed taxpayers that the U.S. Treasury Department and the IRS intend to address through new guidance the issues considered in Revenue Ruling 2007-54, including the methodology to be followed in determining the DRD related to variable life insurance and annuity contracts. On February 13, 2012, the Obama Administration released the General Explanations of the Administration's Revenue Proposals. One proposal would change the method used to determine the amount of the DRD. A change in the DRD, including the possible retroactive or prospective elimination of this deduction through guidance or legislation, could increase actual tax expense and reduce the Company's consolidated net income. These activities had no impact on the Company's results in 2011 or first six months of 2012.

For tax years 2007 through 2011, the Company is participating in the IRS's Compliance Assurance Program (CAP). Under CAP, the IRS assigns an examination team to review completed transactions contemporaneously during these tax years in order to reach agreement with the Company on how they should be reported in the tax returns. If disagreements arise, accelerated resolutions programs are available to resolve the disagreements in a timely manner before the tax returns are filed. It is management's expectation this program will shorten the time period between the filing of the Company's federal income tax returns and the IRS's completion of its examination of the returns.

Total income tax expense includes additional tax expense related to the utilization of deferred tax assets recorded in the Statement of Financial Position as of the acquisition date for Prudential Gibraltar Financial Life Insurance Company, Ltd. (PGFL) and the Star and Edison Businesses. The balance of additional tax expense to be recognized in the future related to the utilization of opening balance sheet deferred tax assets is as follows:

	PGFL	Star and Edison Businesses (in millions)	Total
Opening balance sheet deferred tax assets after valuation allowance that will result in additional tax expense	\$ 42	\$ 678	\$ 720
Additional tax expense (benefit) recognized in the Statement of Operations:			
2009	6	0	6
2010	6	0	6
2011	(29)	252	223
Six months 2012	4	339	343

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Subtotal	(13)	591	578
Additional tax expense (benefit) recognized in Other Comprehensive Income	21	(15)	6
Additional tax expense to be recognized in future periods	\$ 34	\$ 102	\$ 136

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

On January 1, 2012, the Star and Edison Businesses merged into Gibraltar Life Insurance Company, Ltd. The majority of additional U.S. tax expense recognized in the first six months of 2012 is a result of the merger. The annual amount of additional tax expense related to the utilization of opening balance sheet deferred tax assets will be significantly lower in the future. As a result, the remaining \$102 million of the additional tax expense will be recognized over an extended period of time.

13. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative guidance around fair value establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available. Active markets are defined as having the following characteristics for the measured asset/liability: (i) many transactions, (ii) current prices, (iii) price quotes not varying substantially among market makers, (iv) narrow bid/ask spreads and (v) most information publicly available. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short term investments, equity securities and derivative contracts that are traded in an active exchange market. Prices are obtained from readily available sources for market transactions involving identical assets or liabilities.

Level 2 Fair value is based on significant inputs, other than Level 1 inputs, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. The Company's Level 2 assets and liabilities include: fixed maturities (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain equity securities (mutual funds, which do not actively trade and are priced based on a net asset value), certain commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper), and certain over-the-counter derivatives. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs. Prices from services are validated through comparison to trade data and internal estimates of current fair value, generally developed using market observable inputs and economic indicators.

Level 3 Fair value is based on at least one or more significant unobservable inputs for the asset or liability. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the asset or liability. The Company's Level 3 assets and liabilities primarily include: certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, certain highly structured over-the-counter derivative contracts, certain commercial mortgage loans, certain consolidated real estate funds for which the Company is the general partner, and embedded derivatives resulting from certain products with guaranteed benefits. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Company's understanding of the market, and are generally considered Level 3. Under certain conditions, based on its

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

observations of transactions in active markets, the Company may conclude the prices received from independent third party pricing services or brokers are not reasonable or reflective of market activity. In those instances, the Company may choose to over-ride the third party pricing information or quotes received and apply internally-developed values to the related assets or liabilities. To the extent the internally-developed valuations use significant unobservable inputs, they are classified as Level 3. As of June 30, 2012 and December 31, 2011, these over-rides on a net basis were not material.

The Company has established policies and guidelines that require the establishment of valuation methodologies and consistent application of such methodologies. These policies and guidelines govern the use of inputs and price source hierarchies and provide controls around the valuation processes. These controls include appropriate review and analysis of prices against market activity or indicators of reasonableness, approval of price source changes, price overrides, methodology changes and classification of fair value hierarchy levels. The valuation policies and guidelines are reviewed and updated as appropriate.

- (2) Primarily represents derivative assets.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

- (3) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account assets classified as Level 3 consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Unaudited Interim Consolidated Statement of Financial Position.

The methods and assumptions the Company uses to estimate the fair value of assets and liabilities measured at fair value on a recurring basis are summarized below.

Fixed Maturity Securities The fair values of the Company's public fixed maturity securities are generally based on prices obtained from independent pricing services. Prices from pricing services are sourced from multiple vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company generally receives prices from multiple pricing services for each security, but ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. To validate reasonableness, prices are reviewed by internal asset managers through comparison with directly observed recent market trades and internal estimates of current fair value, developed using market observable inputs and economic indicators. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2, as they are primarily based on observable pricing for similar assets and/or other market observable inputs. If the pricing information received from third party pricing services is not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service. If the pricing service updates the price to be more consistent in comparison to the presented market observations, the security remains within Level 2.

If the Company ultimately concludes that pricing information received from the independent pricing service is not reflective of market activity, non-binding broker quotes are used, if available. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may over-ride the information from the pricing service or broker with an internally-developed valuation. As of June 30, 2012 and December 31, 2011, over-rides on a net basis were not material. Internally-developed valuations or non-binding broker quotes are also used to determine fair value in circumstances where vendor pricing is not available. These estimates may use significant unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the asset. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. Pricing service over-rides, internally-developed valuations and non-binding broker quotes are generally included in Level 3 in the fair value hierarchy.

The fair value of private fixed maturities, which are primarily comprised of investments in private placement securities, originated by internal private asset managers, are primarily determined using a discounted cash flow model. In certain cases these models primarily use observable inputs with a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions, taking into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Generally, these securities have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may also incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are not significant to the price of a security, a Level 2 classification is made. Otherwise, a Level 3 classification is used.

Private fixed maturities also include debt investments in funds that, in addition to a stated coupon, pay a return based upon the results of the underlying portfolios. The fair values of these securities are determined by

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

reference to the funds' net asset value (NAV). Since the NAV at which the funds trade can be observed by redemption and subscription transactions between third parties, the fair values of these investments have been reflected within Level 2 in the fair value hierarchy.

Trading Account Assets Trading account assets (including trading account assets supporting insurance liabilities) consist primarily of public corporate bonds, treasuries, equity securities and derivatives whose fair values are determined consistent with similar instruments described above under Fixed Maturity Securities and below under Equity Securities and Derivative Instruments.

Equity Securities Equity securities consist principally of investments in common and preferred stock of publicly traded companies, perpetual preferred stock, privately traded securities, as well as common shares of mutual funds. The fair values of most publicly traded equity securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded equity securities the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded equity securities are classified within Level 3. The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in the fair value hierarchy. The fair values of perpetual preferred stock are based on inputs obtained from independent pricing services that are primarily based on non-binding broker quotes, as the directly observable market inputs are not available. As a result, the fair values of perpetual preferred stock are classified as Level 3.

Commercial Mortgage and Other Loans The fair value of commercial mortgage loans held for investment (i.e. interim portfolio) and accounted for using the Fair Value Option are determined based on the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, adjusted for the current market spread for similar quality loans. The quality ratings for these loans, a primary determinant of the appropriate credit spread and a significant component of the pricing input, are based on internally-developed methodology. As a result, these loans are included in Level 3 in the fair value hierarchy.

The fair value of loans held and accounted for using the Fair Value Option is determined utilizing pricing indicators from the whole loan market, where investors are committed to purchase these loans at a pre-determined price, which is considered the principal exit market for these loans. The Company has evaluated the valuation inputs used for these assets, including the existence of pre-determined exit prices, the terms of the loans, prevailing interest rates and credit risk, and deemed that the primary pricing inputs are Level 2 inputs in the fair value hierarchy.

Other Long-Term Investments Other long-term investments include limited partnerships which are consolidated because the Company is either deemed to exercise control or considered the primary beneficiary of a variable interest entity. These entities are considered investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities, equity securities and mutual funds), as well as wholly-owned real estate held within other investment funds. The fair value of the feeder fund investments in master funds are generally determined by reference to the investments in the underlying master funds.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

The fair value of investments in funds holding publicly traded equity securities are generally based on quoted prices in active markets for identical investments and are therefore reflected as Level 1. The fair value of

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

investments in funds holding public fixed maturities and mutual funds are generally based on validated quotes from pricing services or observable data as described above, and are reflected in Level 2. The fair value of investments in funds that are subject to significant liquidity restrictions are reflected in Level 3.

The fair value of fund investments, where the fair value option has been elected, is primarily determined by the fund managers. Since the valuations may be based on unobservable market inputs and cannot be validated by the Company, these investments have been included within Level 3 in the fair value hierarchy.

The fair value of real estate held in consolidated investment funds is determined through an independent appraisal process. The appraisals generally utilize a discounted cash flow model, following an income approach that incorporates various assumptions including rental revenue, operating expenses and discount rates. The cash flow approach is supplemented with replacement cost estimates and comparable recent sales data when available. These appraisals and the related assumptions are updated at least annually, and incorporate historical property experience and any observable market data, including any market transactions. Since many of the assumptions utilized are unobservable and are considered to be significant inputs to the valuation, the real estate investments within other long-term investments have been reflected within Level 3 in the fair value hierarchy.

Derivative Instruments Derivatives are recorded at fair value either as assets, within Other trading account assets, or Other long-term investments, or as liabilities, within Other liabilities, except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts are determined based on quoted prices in active exchanges or through the use of valuation models. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, non-performance risk, liquidity and other factors. Liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying derivative position.

The Company's exchange-traded futures and options include treasury futures, eurodollar futures, commodity futures, eurodollar options and commodity options. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company's derivative positions are traded in the over-the-counter (OTC) derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The fair values of most OTC derivatives, including interest rate and cross currency swaps, currency forward contracts, commodity swaps, commodity forward contracts, single name credit default swaps, loan commitments held for sale and to-be-announced (or TBA) forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models' key inputs include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, non-performance risk, volatility and other factors.

OTC derivative contracts are executed under master netting agreements with counterparties with a Credit Support Annex, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect the interests of the Company and its counterparties, should either party suffer a credit rating deterioration. The vast majority of the Company's derivative agreements are with highly rated major international financial institutions. To reflect the market's perception of its own and the counterparty's non-performance risk, the Company incorporates additional spreads over London Interbank

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Offered Rate (LIBOR) into the discount rate used in determining the fair value of OTC derivative assets and liabilities. The additional credit spread over LIBOR rates is determined taking into consideration publicly available information relating to the financial strength of the Company. The Company adjusts these credit spreads to remove any illiquidity risk premium, which is subject to a floor based on a percentage of the credit spread. However, the non-performance risk adjustment is applied only to the uncollateralized portion of the OTC derivative assets and liabilities, after consideration of the impacts of two-way collateral posting. Most OTC derivative contract inputs have bid and ask prices that are actively quoted or can be readily obtained from external market data providers. The Company's policy is to use mid-market pricing in determining its best estimate of fair value.

Derivatives classified as Level 3 include first-to-default credit basket swaps, look-back equity options and other structured products. These derivatives are valued based upon models with some significant unobservable market inputs or inputs from less actively traded markets. The fair values of first-to-default credit basket swaps are derived from relevant observable inputs (e.g. individual credit default spreads, interest rates and recovery rates), and unobservable model-specific input values such as correlation between different credits within the same basket. Look-back equity options and other structured options and derivatives are valued using simulation models such as the Monte Carlo and other techniques. The input values for look-back equity options are derived from observable market indices (e.g. interest rates, dividend yields and equity indices), and unobservable model-specific input values including certain volatility parameters. Level 3 methodologies are validated through periodic comparison of the Company's fair values to broker-dealer values.

Cash Equivalents and Short-Term Investments Cash equivalents and short-term investments include money market instruments, commercial paper and other highly liquid debt instruments. Money market instruments are generally valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. The remaining instruments in the Cash Equivalents and Short-term Investments category are typically not traded in active markets; however, their fair values are generally based on market observable inputs and, accordingly, these investments have primarily been classified within Level 2 in the fair value hierarchy.

Separate Account Assets Separate Account Assets primarily include fixed maturity securities, treasuries, equity securities and real estate investments for which values are determined consistent with similar instruments described above under Fixed Maturity Securities, Equity Securities and Other Long-Term Investments.

Other Liabilities Other liabilities include derivative instruments, the fair values of which are determined consistent with similar derivative instruments described above under Derivative Instruments.

Future Policy Benefits The liability for future policy benefits primarily includes general account liabilities for guarantees on variable annuity contracts, including guaranteed minimum accumulation benefits (GMAB), guaranteed minimum withdrawal benefits (GMWB) and guaranteed minimum income and withdrawal benefits (GMIWB), accounted for as embedded derivatives. The fair values of the GMAB, GMWB and GMIWB liabilities are calculated as the present value of future expected benefit payments to customers less the present value of assessed rider fees attributable to the embedded derivative feature. This methodology could result in either a liability or contra-liability balance, given changing capital market conditions and various policyholder behavior assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the

timing and amount of future cash flows. The determination of these risk premiums requires the use of management judgment.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

The significant inputs to the valuation models for the embedded derivatives associated with the optional living benefit features of the Company's variable annuity products include capital market assumptions, such as interest rate and implied volatility assumptions, the Company's market-perceived risk of its own non-performance (NPR), as well as various assumptions that are actuarially determined, including lapse rates, benefit utilization rates, withdrawal rates, and mortality rates. Since many of the assumptions utilized in the valuation of the embedded derivatives associated with the Company's optional living benefit features are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level 3 in the fair value hierarchy.

Capital market inputs and actual policyholders' account values are updated each quarter based on capital market conditions as of the end of the quarter, including interest rates, equity markets and implied volatility. In the risk neutral valuation, interest rates are used to both grow the policyholders' account values and discount all projected future cash flows. The Company's discount rate assumption is based on the LIBOR swap curve, and is adjusted for NPR, as discussed below. Assuming all other assumptions remain unchanged, a decline in interest rates will generally cause account values to grow more slowly, increasing future expected benefit payments, as well as decreasing the discounting impact in the present value calculation, both of which would cause increases in the fair value of the liability. The opposite impacts occur as interest rates rise. Implied volatility also impacts the estimate of future expected benefit payments. An increase in implied volatility will generally increase future expected benefit payments, causing an increase in the fair value of the liability. The opposite impact occurs as implied volatility declines.

Actuarial assumptions are reviewed at least annually, and updated based upon historical experience giving consideration to any observable market data, including market transactions such as acquisitions and reinsurance transactions. Assumptions relating to contractholder behavior such as lapse, benefit utilization, withdrawal, and mortality rates, are based on experience by product type and/or year of contract issuance. Unless a material change in contractholder behavior or mortality experience that the Company feels is indicative of a long term trend is observed in an interim period, assumptions related to contractholder behavior and mortality are generally updated in the third quarter of each year by considering the actual experience that has occurred during the period from the most recent update to the expected amounts. These assumptions require the use of management judgment and are discussed in further detail below.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Level 3 Assets and Liabilities by Price Source The table below presents the balances of Level 3 assets and liabilities measured at fair value with their corresponding pricing sources.

	As of June 30, 2012		
	Internal(1)	External(2)	Total

(1) Represents valuations reflecting both internally-derived and market inputs, as well as third-party pricing information or quotes. See below for additional information related to internally-developed valuation for significant items in the above table.

(2) Represents unadjusted prices from independent pricing services and independent non-binding broker quotes where pricing inputs are not readily available.

(3) Includes assets classified as fixed maturities available-for-sale, trading account assets supporting insurance liabilities and other trading account assets.

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Quantitative Information Regarding Internally-Priced Level 3 Assets and Liabilities The table below presents quantitative information on significant internally-priced Level 3 assets and liabilities for which the investment risks associated with market value changes are borne by the Company.

			As of June 30, 2012		
	Fair Value (in millions)	Valuation Techniques	Unobservable Input	Range (Weighted Average)	
Assets:					
Corporate securities	\$ 988	Discounted cash flow	Discount rate	1.4% -17.5% (11.63%)	
			Market comparables	EBITDA multiples(1)	5X - 8.5X (7.27X)
			Cap at call price	Call price	100% -101% (100.22%)
			Liquidation	Liquidation value	6.9% - 98% (73.82%)
Asset-backed securities	\$ 308	Discounted cash flow	Prepayment rate	2.8% - 20% (6.50%)	
			Default rate	0.5% - 2.5% (0.80%)	
			Loss severity	25% - 40% (26.77%)	
			Liquidity premium	0.5% - 2.75% (1.42%)	
			Average life (years)	0.2 years -5 years (2.99 years)	
			Comparable spreads	0.4% - 24.3% (3.47%)	
		Comparable security yields	8.05% - 24.4% (12.65%)		
Liabilities:					
Future policy benefits	\$3,054	Discounted cash flow	Lapse rate	0% - 15%	
			NPR spread	0.4% - 2.6%	
			Utilization rate	60% - 90%	
			Withdrawal rate	90% - 100%	
			Mortality rate(2)	0% - 10%	
		Equity volatility curve	22% - 32%		

(1) EBITDA multiples represent multiples of earnings before interest, taxes, depreciation and amortization, and are amounts used when the reporting entity has determined that market participants would use such multiples when pricing the investments.

(2) Range reflects the mortality rate for the vast majority of business with living benefits, with policyholders ranging from 35 to 90 years old. While the majority of living benefits have a minimum age requirement, certain benefits do not have an age restriction. This results in contractholders for certain benefits with mortality rates approaching 0%.

Corporate Securities Internally-priced corporate securities classified in Level 3 include certain below investment grade watchlist and distressed fixed maturity securities. For securities where discounted cash flows are used, the primary unobservable input is the internally-developed discount rate. Significant increases in the discount rate would result in a significantly lower fair value, with the reverse being true for decreases in the discount rate. In certain cases, the Company uses an estimated liquidation value of the borrower or underlying assets. The Company also applies market comparables, such as earnings before interest, taxes, depreciation and amortization (EBITDA) multiples for certain securities. In isolation, an increase in the value of these inputs would result in an increase in fair value, with the reverse being true for decreases in the value of these inputs.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Asset-Backed Securities Asset-backed securities classified in Level 3 are primarily valued internally using a discounted cash flow technique. Unobservable inputs are the prepayment rate, default rate, loss severity, liquidity premium and comparable security spreads. In isolation, an increase in prepayment rate or a decrease in default rate or loss severity would generally result in an increase in fair value, although the interrelationships between these inputs depend on specific market conditions. However, in stressed markets, prepayment rates tend to decrease, while default rates and loss severities tend to increase. These changes will result in a decrease in fair value. In other cases where a

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

liquidity premium and/or comparable security spreads and yields are used, a significant increase in either of these inputs can produce a significant decrease in fair value.

Future Policy Benefits Future policy benefits classified as Level 3 are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs and the general uncertainty around the timing and amount of future cash flows. As described above, the significant unobservable inputs to the valuation models for the embedded derivatives associated with the optional living benefit features of the Company's variable annuity products include various assumptions that are actuarially determined, including lapse rates, benefit utilization rates, withdrawal rates and mortality rates as well as volatility assumptions and assumptions used to reflect NPR.

The Company's dynamic lapse rate assumption adjusts the base lapse rate at the contract level based on a comparison of the actuarially calculated guaranteed amount and the current policyholder account value as well as other factors, such as the applicability of any surrender charges. The dynamic lapse adjustment reduces the base lapse rate based on the magnitude of the difference between the guaranteed amount and the account value. In-the-money contracts are those with a guaranteed benefit in excess of the current policyholder account value. Since in-the-money contracts are less likely to lapse, the dynamic lapse adjustment will reduce the lapse rate assumption for these contracts. All else being equal, contracts having a larger difference between the guaranteed amount and the account value will have a smaller lapse rate after applying the dynamic lapse rate adjustment. For less in-the-money contracts, the lapse rate assumption will be closer to the base lapse rate. Lapse rates are also generally assumed to be lower for the period where surrender charges apply. A lower base lapse rate is applied to contracts in the surrender charge period. A higher base lapse rate is applied to contracts in the year the surrender charge period expires.

To reflect NPR, the Company incorporates an additional spread over LIBOR into the discount rate used in the valuations of the embedded derivatives associated with its optional living benefit features. Since insurance liabilities are senior to debt, the Company believes that reflecting the financial strength ratings of the Company's insurance subsidiaries in the valuation of the liability or asset appropriately takes into consideration NPR. The additional spread over LIBOR is determined taking into consideration publicly available information relating to the financial strength of the Company's insurance subsidiaries, as indicated by the credit spreads associated with funding agreements issued by these subsidiaries. The Company adjusts these credit spreads to remove any illiquidity risk premium, which is subject to a floor based on a percentage of the credit spread. This additional spread is applied at an individual contract level and only to those individual living benefit contracts in a liability position and generally not to those in a contra-liability position. An increase in the spread over LIBOR increases the discounting impact in the present value calculation and will generally cause a decrease in the fair value of the liability.

The Company's benefit utilization rate assumption estimates the percentage of contracts that will utilize the benefit during the contract duration, including the estimated timing of the first lifetime income withdrawal by the contractholder. These assumptions vary based on the product type, the age of the contractholder and the age of the contract. The utilization rate varies by product, based on the availability of an enhanced guarantee after a certain waiting period. For example, the utilization rates for a product with the opportunity to double the guaranteed value after a 10, 12 or 20 year accumulation period are adjusted based on contractholder experience related to such enhancement. Generally, the Company assumes a certain percentage of contractholders will utilize the guaranteed benefit (depending on the product type, contractholder age and contract age) and will begin lifetime withdrawals at various time intervals from contract inception, with the remaining contractholders either beginning lifetime withdrawals immediately or never utilizing the benefit. The impact of changes in these

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements (Continued)

assumptions is highly dependent on the contract type and age of the contractholder at the time of the sale and the timing of the first lifetime income withdrawal.

The Company's withdrawal rate assumption estimates the magnitude of annual contractholder withdrawals relative to the amount allowable under the contract. Larger differences in the withdrawal rate assumption compared to the contractual guaranteed income withdrawal percentage, either positive or negative, will generally result in a decrease in the fair value of the liability. Prior to the exhaustion of the contractholder's total account value, the Company assumes contractholders will withdraw a certain percentage of the maximum allowable amount under the contract and will withdraw the maximum once the contractholder account value is completely exhausted.

Based on historical experience, the Company applies a mortality rate adjustment compared to standard industry tables. Overall mortality rates vary by contract group based on the age of the contractholder. Generally, the Company does not expect actual mortality trends to change significantly in the short-term and, to the extent these trends may change, the Company expects such changes to be gradual over the long-term. Since the variable annuity living benefits generally provide for a minimum withdrawal benefit for life, increases in mortality rates will decrease the fair value of the liability, with the reverse being true with decreases in mortality rates.

Market volatility also impacts the estimate of future expected benefit payments. The Company uses an equity volatility curve based on third-party inputs. The curve starts with first year implied volatility and grades to a long-term realized volatility. The first year implied volatility determines the overall slope of the equity volatility curve. An increase in implied volatility will generally increase future expected benefit payments, causing an increase in the fair value of the liability.

Separate Account Assets In addition to the significant internally-priced Level 3 assets and liabilities presented and described above, the Company also has internally-priced separate account assets reported within Level 3. Changes in the fair value of separate account assets are borne by customers and thus are offset by changes in separate account liabilities on the Company's Unaudited Interim Consolidated Statement of Financial Position. As a result, changes in value associated with these investments do not impact the Company's Unaudited Interim Consolidated Statement of Operations. In addition, fees earned by the Company related to the management of these assets do not change due to changes in the fair value of these investments. Quantitative information about significant internally-priced Level 3 separate account assets is as follows:

Real Estate and Other Invested Assets Separate account assets include \$18,658 million of investments in real estate as of June 30, 2012 that are classified as Level 3 and reported at fair value. In general, these fair value estimates are based on property appraisal reports prepared by independent real estate appraisers. Key inputs and assumptions to the appraisal process include rental income and expense amounts, related growth rates, discount rates and capitalization rates. In cases where real estate investments are made through indirect investments, fair value is generally determined by the Company's equity in net assets of the entities. The debt associated with real estate, other invested assets and the Company's equity position in entities are externally valued. Because of the subjective nature of inputs and the judgment involved in the appraisal process, real estate investments and their corresponding debt are typically included in the Level 3 classification. Key unobservable inputs to real estate valuation include capitalization rates, which range from 4.75% to 10.5% (6.55% weighted average) and discount rates, which range from 6.25% to 25.0% (8.04% weighted average). Key unobservable inputs to real estate debt valuation include yield to maturity, which ranges from 2.28% to 11.77% (4.93% weighted average) and market spread over base rate, which ranges from 1.74% to 4.93% (3.48% weighted average).

Commercial Mortgage Loans Separate account assets include \$1,104 million of commercial mortgage loans as of June 30, 2012 that are classified as Level 3 and reported at fair value. Commercial mortgage loans are primarily valued internally using discounted cash flow techniques, as described further under Fair Value of

Table of Contents**PRUDENTIAL FINANCIAL, INC.****Notes to Unaudited Interim Consolidated Financial Statements (Continued)**

Financial Instruments. The primary unobservable input used is the spread to discount cash flows, which range from 1.95% to 8.41% (2.33% weighted average). In isolation, an increase in the value of this input would result in a decrease in fair value, with the reverse being true for decreases in the value of these inputs.

Transfers between Levels 1 and 2 During the three and six months ended June 30, 2012, \$2.6 billion of separate account assets transferred from Level 1 to Level 2. The assets that transferred were foreign common stocks. This transfer was the result of an adjustment being made at June 30, 2012 to the fair value of these assets beyond the quoted market price to reflect events that occurred between the close of foreign trading markets and the close of U.S. trading markets on that day. On March 31, 2012, and December 31, 2011 no such adjustment was made. There were no transfers between Levels 1 and 2 for the three months and six months ended June 30, 2011.

Changes in Level 3 assets and liabilities The following tables provide a summary of the changes in fair value of Level 3 assets and liabilities for the three months ended June 30, 2012, as well as the portion of gains or losses included in income for the three months ended June 30, 2012 attributable to unrealized gains or losses related to those assets and liabilities still held at June 30, 2012.
