**DRIL-QUIP, INC.**

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**(UNAUDITED)**

**1. Organization and Principles of Consolidation**

Dril-Quip, Inc., a Delaware corporation (the Company or Dril-Quip), designs, manufactures, sells and services highly engineered offshore drilling and production equipment that is well suited for use in deepwater, harsh environment and severe service applications. The Company's principal products consist of subsea and surface wellheads, subsea and surface production trees, subsea control systems and manifolds, mudline hanger systems, specialty connectors and associated pipe, drilling and production riser systems, liner hangers, wellhead connectors and diverters. Dril-Quip's products are used by major integrated, large independent and foreign national oil and gas companies in offshore areas throughout the world. Dril-Quip also provides technical advisory assistance on an as-requested basis during installation of its products, as well as rework and reconditioning services for customer-owned Dril-Quip products. In addition, Dril-Quip's customers may rent or purchase running tools from the Company for use in the installation and retrieval of the Company's products.

The Company's operations are organized into three geographic segments: Western Hemisphere (including North and South America; headquartered in Houston, Texas), Eastern Hemisphere (including Europe and Africa; headquartered in Aberdeen, Scotland) and Asia-Pacific (including the Pacific Rim, Southeast Asia, Australia, India and the Middle East; headquartered in Singapore). Each of these segments sells similar products and services and the Company has major manufacturing facilities in all three of its headquarter locations as well as in Macae, Brazil.

The condensed consolidated financial statements included herein have been prepared by Dril-Quip and are unaudited. The balance sheet at December 31, 2011, has been derived from the audited consolidated financial statements at that date. In the opinion of management, the unaudited condensed consolidated interim financial statements include all normal recurring adjustments necessary for a fair presentation of the financial position as of June 30, 2012 and the results of operations, comprehensive income, and the cash flows for each of the six-month periods ended June 30, 2012 and 2011. Although management believes the unaudited interim related disclosures in these condensed consolidated financial statements are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in annual audited consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. The results of operations, comprehensive income and the cash flows for the six-month period ended June 30, 2012 are not necessarily indicative of the results to be expected for the full year. The condensed consolidated financial statements included herein should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

**2. Significant Accounting Policies**

*Principles of Consolidation*

The condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All material intercompany accounts and transactions have been eliminated.

*Use of Estimates*

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements.

and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Some of the Company's more significant estimates are those affected by critical accounting policies for revenue recognition, inventories and contingent liabilities as discussed more fully in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

*Revenue Recognition*

*Product Revenue*

The Company earns product revenues from two sources:

product revenues recognized under the percentage-of-completion method; and

product revenues from the sale of products that do not qualify for the percentage-of-completion method.

*Revenues recognized under the percentage-of-completion method*

The Company uses the percentage-of-completion method on long-term project contracts that have the following characteristics:

The contracts call for products which are designed to customer specifications;

The structural designs are unique and require significant engineering and manufacturing efforts generally requiring more than one year in duration;

The contracts contain specific terms as to milestones, progress billings and delivery dates; and

Product requirements cannot be filled directly from the Company's standard inventory.

For each project, the Company prepares a detailed analysis of estimated costs, profit margin, completion date and risk factors which include availability of material, production efficiencies and other factors that may impact the project. On a quarterly basis, management reviews the progress of each project, which may result in revisions of previous estimates, including revenue recognition. The Company calculates the percent complete and applies the percentage to determine the revenues earned and the appropriate portion of total estimated costs. Losses, if any, are recorded in full in the period they become known. Historically, the Company's estimates of total costs and costs to complete have approximated actual costs incurred to complete the project.

Under the percentage-of-completion method, billings usually do not correlate directly to the revenue recognized. Based upon the terms of the specific contract, billings may be in excess of the revenue recognized, in which case the amounts are included in customer prepayments as a liability on the Condensed Consolidated Balance Sheets. Likewise, revenue recognized may exceed customer billings in which case the amounts are reported in trade receivables. Unbilled revenues are expected to be billed and collected within one year. As of June 30, 2012 and December 31, 2011, receivables included \$37.7 million and \$30.5 million of unbilled receivables, respectively. During the quarter ended June 30, 2012, there were 13 projects representing approximately 18% of the Company's total revenue and approximately 22% of its product revenues that were accounted for using percentage-of-completion accounting, compared to 12 projects during the second quarter of 2011 representing approximately 20% of the Company's total revenues and approximately 24% of its product revenues. For the six months ended June 30, 2012, there were 17 projects representing approximately 18% of the Company's total revenues and 21% of its product revenues, compared to 12 projects which represented approximately 23% of the Company's total revenues and 27% of its product revenues for the six months ended June 30, 2011, all of which were accounted for using percentage-of-completion accounting.

*Revenues not recognized under the percentage-of-completion method*

Revenues from the sale of inventory products, not accounted for under the percentage-of-completion method, are recorded at the time the manufacturing processes are complete and ownership is transferred to the customer.

*Service revenue*

The Company earns service revenues from three sources:

technical advisory assistance;

rental of running tools; and

rework and reconditioning of customer-owned Dril-Quip products.

The Company does not install products for its customers, but it provides technical advisory assistance. At the time of delivery of the product, the customer is not obligated to buy or rent the Company's running tools and the Company is not obligated to perform any subsequent services relating to installation. Technical advisory assistance service revenue is recorded at the time the service is rendered. Service revenues associated with the rental of running and installation tools are recorded as earned. Rework and reconditioning service revenues are recorded when the refurbishment process is complete.

The Company normally negotiates contracts for products, including those accounted for under the percentage-of-completion method, and services separately. For all product sales, it is the customer's decision as to the timing of the product installation as well as whether Dril-Quip running tools will be purchased or rented. Furthermore, the customer is under no obligation to utilize the Company's technical advisory services. The customer may use a third party or their own personnel.

*Fair Value of Financial Instruments*

The Company's financial instruments consist primarily of cash and cash equivalents, receivables and payables. The carrying values of these financial instruments approximate their respective fair values as they are short-term in nature.

*Earnings Per Share*

Basic earnings per common share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per common share is computed considering the dilutive effect of stock options using the treasury stock method.

In each relevant period, the net income used in the basic and dilutive earnings per share calculations is the same. The following table reconciles the number of common shares outstanding at June 30 of each year to the weighted average number of common shares outstanding and the weighted average diluted number of common shares outstanding for the purpose of calculating basic and diluted earnings per share:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
	(In thousands)			
Number of common shares outstanding at end of period basic	40,376	40,058	40,376	40,058
Effect of using weighted average common shares outstanding	(108)		(150)	(4)
Weighted average basic common shares outstanding basic	40,268	40,058	40,226	40,054
Dilutive effect of common stock options	185	254	206	262
Weighted average diluted common shares outstanding diluted	40,453	40,312	40,432	40,316

### 3. New Accounting Standards

In December 2011, the FASB issued Accounting Standards Update ( ASU ) 2011-11, Balance Sheet Disclosures about Offsetting Assets and Liabilities. This ASU was issued to alleviate some of the differences in presentation between U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS) as to presentations showing gross versus netted amounts. Entities are required to disclose both gross and net information about instruments and transactions that are eligible for offset in the statements of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. This ASU is effective for annual reporting periods beginning on or after January 1, 2013 and interim periods within those annual periods. The adoption of this accounting standard update will not have a material impact on the Company's condensed consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income. This ASU amended the guidance on the presentation of comprehensive income in financial statements to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items that are recorded in other comprehensive income. The new accounting guidance requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income or (2) two separate but consecutive statements. The provisions of this new guidance were effective for the Company on January 1, 2012. The Company adopted ASU 2011-05 effective with the period ended March 31, 2012. In December 2011, the FASB issued ASU 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items out of Accumulated Other Comprehensive Income. It was determined that the reclassification would be difficult for preparers and may add unnecessary complexity to financial statements.

### 4. Stock Options and Awards

During each of the three months ended June 30, 2012 and 2011, the Company recognized approximately \$1.2 million of stock-based compensation expense. For the six-months ended June 30, 2012 and 2011, stock-based compensation expense totaled \$2.6 million and \$2.4 million, respectively. Stock-based compensation expense is included in the selling, general and administrative expense line of the Condensed Consolidated Statements of Income. In May 2012, the Company awarded a total of 4,800 shares of restricted stock to its non-employee directors. The shares were valued at \$65.34 per share for a total of \$313,632 to be expensed ratably over three years. No stock-based compensation expense was capitalized during the three and six

Edgar Filing: DRIL-QUIP INC - Form 10-Q

months ended June 30, 2012 or 2011. There were no stock options granted in the second quarter of 2012 or 2011. Refer to Note 13 of the Company's Annual Report on Form 10-K for the year ended December 31, 2011 for additional information regarding stock-based compensation plans.

**5. Inventories**

Inventories consist of the following:

	June 30, 2012	December 31, 2011
	(In thousands)	
Raw materials and supplies	\$ 67,710	\$ 48,240

## 7. Share Repurchase Plan

On June 18, 2012, the Company's Board of Directors approved a share repurchase plan of up to \$100 million of the Company's common stock. As of June 30, 2012, no shares had been repurchased. The repurchase plan has no expiration date and all shares purchased are expected to be cancelled.

## 8. Commitments and Contingencies

### *Deepwater Horizon Incident*

On April 22, 2010, a deepwater U.S. Gulf of Mexico drilling rig known as the *Deepwater Horizon*, operated by BP Exploration & Production, Inc. (BP), sank after an explosion and fire that began on April 20, 2010. The Company is a party to an ongoing contract with an affiliate of BP to supply wellhead systems in connection with BP's U.S. Gulf of Mexico operations, and the Company's wellhead and certain of its other equipment were in use on the *Deepwater Horizon* at the time of the incident. A moratorium was placed on offshore deepwater drilling on May 28, 2010 in the U.S. Gulf of Mexico and was lifted on October 12, 2010. In the first quarter of 2011, after delays attributed to new regulations that increased the complexity of the drilling permit process, the issuance of deepwater permits resumed and deepwater drilling activity in the U.S. Gulf of Mexico has steadily increased since that time.

The Company was named, along with other unaffiliated defendants, in both class action and other lawsuits arising from of the *Deepwater Horizon* incident. The actions filed against the Company were consolidated, along with hundreds of other lawsuits not directly naming the Company, in the multi-district proceeding *In Re: Oil Spill by the Oil Rig Deepwater Horizon in the Gulf of Mexico, on April 20, 2010* (MDL Proceeding). The lawsuits generally allege, among other things, violation of state and federal environmental and other laws and regulations, negligence, gross negligence, strict liability, personal injury and/or property damages and generally seek awards of unspecified economic, compensatory and punitive damages and/or declaratory relief.

On January 20, 2012 the judge presiding over the MDL Proceeding, another related proceeding filed by affiliates of Transocean Ltd under the Limitation of Liability Act, and the U.S. government's action under the Oil Pollution Act, issued an order that granted the Company's Motion for Summary Judgment and dismissed all claims asserted against the Company in those proceedings with prejudice. On April 9, 2012, the judge issued an order granting a final judgment in favor of the Company with respect to the court's prior order that granted the Company's Motion for Summary Judgment.

Additional lawsuits may be filed and additional investigations may be launched in the future. An adverse outcome with respect to any of these lawsuits or investigations, or any lawsuits or investigations that may arise in the future, could have a material adverse effect on the Company's results of operations. The Company intends to continue to vigorously defend any litigation, fine and/or penalty relating to the *Deepwater Horizon* incident. Accordingly, the Company does not believe this litigation will have a material impact and no liability has been accrued in conjunction with these matters.

At the time of the *Deepwater Horizon* incident, the Company had a general liability insurance program with an aggregate coverage limit of \$100 million for claims with respect to property damage, injury or death and pollution. The coverage was increased to \$200 million in October 2010. The insurance policies may not cover all potential claims and expenses relating to the *Deepwater Horizon* incident. In addition, the Company's policies may not cover fines, penalties or costs and expenses related to government-mandated clean up of pollution. The Company has received a reservation of rights letter from its insurers. The incident may also lead to further tightening of the availability of insurance coverage. If liability limits are increased or the insurance market becomes more restricted, the risks and costs of conducting offshore exploration and development activities may increase, which could materially impact the Company's results of operations.

#### *Brazilian Tax Issue*

In December 2010 and January 2011, the Company's Brazilian subsidiary was served with assessments collectively valued at approximately BRL24.4 million (approximately USD12.1 million as of June 2012) from the State of Rio de Janeiro, Brazil, to cancel credits resulting from the importation of goods and subsequent transfers to the Company's subsidiary in Brazil. The Company believes that its subsidiary should not be subject to the cancellation of credits and is vigorously contesting the assessments in the Brazilian administrative systems. While pending, the amount of interest, penalties and monetary restatement fees on the tax assessments continues to accrue. In January 2012, a decision was rendered by the Brazilian tax authority that reduced one of the assessments by approximately BRL8.4 million (approximately USD4.2 million as of June 2012) due to errors and the lapsing of the statute of limitations with respect to a portion of the assessment. As of June 2012, the total assessment, including interest, penalties and possible monetary restatement fees is approximately BRL19.9 million (approximately USD9.8 million). At this time, the ultimate disposition of this matter cannot be determined and therefore, it is not possible to reasonably estimate the amount of loss that might result from an adverse judgment or settlement of these assessments. Accordingly, no liability has been accrued in conjunction with this matter. The Company does not expect the liability, if any, resulting from these assessments to have a material adverse effect on its operations, comprehensive income, financial position or cash flows.

#### *General*

The Company operates its business and markets its products and services in most of the significant oil and gas producing areas in the world and is, therefore, subject to the risks customarily attendant to international operations and dependency on the condition of the oil and gas industry. Additionally, products of the Company are used in potentially hazardous drilling, completion, and production applications that can cause personal injury, product liability, and environmental claims. Although exposure to such risk has not resulted in any significant problems in the past, there can be no assurance that ongoing and future developments will not adversely impact the Company.

The Company is also involved in a number of legal actions arising in the ordinary course of business. Although no assurance can be given with respect to the ultimate outcome of such legal action, in the opinion of management, the ultimate liability with respect thereto will not have a material adverse effect on the Company's operations, comprehensive income, financial position or cash flows.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following is management's discussion and analysis of certain significant factors that have affected aspects of the Company's financial position, results of operations, comprehensive income, and cash flows during the periods included in the accompanying unaudited condensed consolidated financial statements. This discussion should be read in conjunction with the unaudited condensed consolidated financial statements presented elsewhere herein as well as the discussion under Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations and the financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

**Overview**

Dril-Quip designs, manufactures, sells and services highly engineered offshore drilling and production equipment that is well suited for use in deepwater, harsh environment and severe service applications. The Company designs and manufactures subsea equipment, surface equipment and offshore rig equipment for use by major integrated, large independent and foreign national oil and gas companies in offshore areas throughout the world. The Company's principal products consist of subsea and surface wellheads, subsea and surface production trees, subsea control systems and manifolds, mudline hanger systems, specialty connectors and associated pipe, drilling and production riser systems, liner hangers, wellhead connectors and diverters. Dril-Quip also provides technical advisory assistance on an as-requested basis during installation of its products, as well as rework and reconditioning services for customer-owned Dril-Quip products and rental of running tools for use in connection with the installation and retrieval of the Company's products.

*Deepwater Horizon Incident*

On April 22, 2010, a deepwater U.S. Gulf of Mexico drilling rig known as the *Deepwater Horizon*, operated by BP, sank after an explosion and fire that began on April 20, 2010. The Department of Interior issued an order imposing a moratorium on deepwater drilling in the U.S. Gulf of Mexico that was lifted on October 12, 2010. As a result of the *Deepwater Horizon* incident, the Company's revenues and earnings may be affected by, among other things, new or revised governmental laws or regulations relating to offshore oil and gas exploration and production activities, both in the U.S. Gulf of Mexico and in other areas in which the Company's customers operate, and the effect of such laws or regulations on the level of demand for the Company's products and services. For additional information related to the impact of the *Deepwater Horizon* incident as well as information related to litigation and additional governmental investigations and regulations arising out of the incident, see Commitments and Contingencies, Note 8, of the Notes to Condensed Consolidated Financial Statements and Part II, Item 1, Legal Proceedings. As a result of recent scrutiny of the offshore drilling industry triggered by the *Deepwater Horizon* incident, the technical specifications for the Company's existing and future products may change resulting in additional testing of its products to ensure their compliance with such specifications. If the Company's products are unable to satisfy the requirements of the additional testing, or if the costs of the modifications to such products necessary to satisfy the testing are not acceptable to the Company's customers, the customers may terminate their contracts with the Company or decide not to purchase the Company's products.

*Oil and Gas Prices*

Both the market for offshore drilling and production equipment and services and the Company's business are substantially dependent on the condition of the oil and gas industry and, in particular, the willingness of oil and gas companies to make capital expenditures on exploration, drilling and production operations offshore. Oil and gas prices and the level of offshore drilling and production activity have historically been characterized by significant volatility.

## Edgar Filing: DRIL-QUIP INC - Form 10-Q

According to the Energy Information Administration ( EIA ) of the U.S. Department of Energy, average crude oil (West Texas Intermediate Cushing) and natural gas (Henry Hub) closing prices are listed below for the periods covered by this report:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Crude oil (\$/Bbl)	\$ 93.29	\$ 102.02	\$ 98.10	\$ 98.08
Natural gas (\$/Mcf)	2.37	4.50	2.44	4.41

During the second quarter of 2012, West Texas Intermediate crude oil closing prices ranged between \$77.72 per barrel and \$106.17 per barrel with an average quarterly price of \$93.29 per barrel, as compared to a range of \$90.65 and \$113.39 per barrel with the average quarterly price of \$102.02 per barrel for the same period in 2011. For the six months ended June 30, 2012 and 2011, crude oil closing prices averaged \$98.10 and \$98.08, respectively, and ranged between \$77.72 per barrel and \$109.39 per barrel for the 2012 period, as compared to a range of \$83.13 per barrel to \$113.39 per barrel for the same period in 2011. West Texas Intermediate crude oil prices ended the second quarter of 2012 at \$85.04 per barrel. Henry Hub natural gas prices at June 30, 2012 were \$2.82 per Mcf.

According to the July 2012 release of the Short-Term Energy Outlook published by the EIA, West Texas Intermediate crude oil prices are projected to average approximately \$88.00 per barrel over the second half of 2012 and through 2013. In its July 2012 Oil Market Report, the International Energy Agency ( IEA ), projects that world demand will rise by approximately 0.8 million barrels per day to 89.9 million barrels per day in 2012, and will rise an additional 1.0 million barrels per day to 90.9 million barrels per day in 2013. In July 2012, the EIA projected Henry Hub natural gas prices to average \$2.66 per Mcf in 2012 and \$3.32 per Mcf in 2013.

### *Rig Count*

Detailed below is the average contracted rig count for the Company's geographic regions for the three and six months ended June 30, 2012 and 2011. The rig count data includes floating rigs (semi-submersibles and drillships) and jack-up rigs. The Company has included only these types of rigs as they are the primary end users of the Company's products.

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Western Hemisphere	208	188	206	178
Eastern Hemisphere	171	153	171	150
Asia-Pacific	266	241	263	240
	645	582	640	568

*Source: ODS Petrodata RigBase June 30, 2012 and 2011*

The table represents rigs under contract and includes rigs currently drilling as well as rigs committed, but not yet drilling. According to ODS-Petrodata RigBase, as of June 30, 2012, there were 66 rigs under contract in the U.S. Gulf of Mexico (31 jack-up rigs and 35 floating rigs). Of the total contracted, 60 were actively drilling (29 jack-up rigs and 31 floating rigs). As of June 30, 2011, there were 58 rigs under contract in the U.S. Gulf of Mexico, (33 jack-up rigs and 25 floating rigs) of which 46 were actively drilling (28 jack-up rigs and 18 floating rigs).

The Company believes that the number of rigs (semi-submersibles, jack-up rigs and drillships) under construction impacts its revenue because in certain cases, its customers order some of the Company's products

during the construction of such rigs. As a result, an increase in rig construction activity tends to favorably impact the Company's backlog while a decrease in rig construction activity tends to negatively impact the Company's backlog. According to ODS-Petrodata, at the end of June 2012 and 2011, there were 180 and 144 rigs, respectively, under construction. The expected delivery dates for the rigs under construction on June 30, 2012 are as follows:

2012	27
2013	65
2014	46
2015	7
After 2015 or unspecified delivery date	35

180

#### Regulation

The demand for the Company's products and services is also affected by laws and regulations relating to the oil and gas industry in general, including those specifically directed to offshore operations. The adoption of new laws and regulations, or changes to existing laws or regulations that curtail exploration and development drilling for oil and gas for economic or other policy reasons could adversely affect the Company's operations by limiting demand for its products. For a description of certain actions taken by the U.S. government related to the *Deepwater Horizon* incident, see Commitments and Contingencies in Note 8 to the Notes to Condensed Consolidated Financial Statements.

#### Business Environment

Oil and gas prices and the level of offshore drilling and production activity have been characterized by significant volatility in recent years. Worldwide, military, political and economic events have contributed to oil and natural gas price volatility and are likely to continue to do so in the future. In 2011, oil prices peaked at \$113.39 per barrel and ended the year at \$98.83 per barrel. Oil prices reached a high of \$106.17 per barrel during the second quarter of 2012, but decreased to \$91.56 by July 20, 2012. The Company expects continued volatility in both crude oil and natural gas prices, as well as in the level of drilling and production related activities. The volatility in prices appears to have impacted land drilling activity more so than offshore drilling, particularly in deeper offshore waters, where Dril-Quip's products are more often utilized. Even during periods of high prices for oil and natural gas, companies exploring for oil and gas may cancel or curtail programs, or reduce their levels of capital expenditures for exploration and production for a variety of reasons. In addition, a significant and prolonged decline in hydrocarbon prices would likely have a material adverse effect on the Company's results of operations.

The Company believes that its backlog should help mitigate the impact of negative market conditions; however, a prolonged decline in commodity prices, an extended continuation of the downturn in the global economy or future restrictions or declines in offshore oil and gas exploration and production could have a negative impact on the Company and/or its backlog. The Company's backlog at June 30, 2012 was approximately \$697 million compared to approximately \$727 million at June 30, 2011, \$716 million at December 31, 2011, and \$701 million at March 31, 2012. The Company can give no assurance that backlog will remain at current levels. All of the Company's projects currently included in its backlog are subject to change and/or termination at the option of the customer. If the Company's existing or future products are unable to satisfy the requirements for any testing required by its customers or additional testing triggered by the *Deepwater Horizon* incident, or if the costs of the modifications to such products necessary to satisfy the testing are not acceptable to the Company's customers, the customers may terminate their contracts with the Company.

The Company operates its business and markets its products and services in most of the significant oil and gas producing areas in the world and is, therefore, subject to the risks customarily attendant to international operations and investments in foreign countries. These risks include nationalization, expropriation, war, acts of

terrorism and civil disturbance, restrictive action by local governments, limitation on repatriation of earnings, change in foreign tax laws and change in currency exchange rates, any of which could have an adverse effect on either the Company's ability to manufacture its products in its facilities abroad or the demand in certain regions for the Company's products or both. To date, the Company has not experienced any significant problems in foreign countries arising from local government actions or political instability, but there is no assurance that such problems will not arise in the future.

*Revenues.* Dril-Quip's revenues are generated from two sources: products and services. Product revenues are derived from the sale of offshore drilling and production equipment. Service revenues are earned when the Company provides technical advisory assistance for installation of the Company's products, reconditioning services and rental of running tools for installation and retrieval of the Company's products. For the six months ended June 30, 2012 and 2011, the Company derived 84% and 85%, respectively, of its revenues from the sale of its products and 16% and 15%, respectively, of its revenues from services. Service revenues generally correlate to revenues from product sales because increased product sales typically generate increased demand for technical advisory services during installation and rental of running tools. The Company has substantial international operations, with approximately 75% and 78% of its revenues derived from foreign sales for the three months ended June 30, 2012 and 2011, respectively, and 71% and 70% for the six months ended June 30, 2012 and 2011, respectively. Substantially all of the Company's domestic revenue relates to operations in the U. S. Gulf of Mexico. Domestic revenue approximated 25% and 22%, respectively, of the Company's total revenues for the three months ended June 30, 2012 and 2011 and 29% and 30% for the six months ended June 30, 2012 and 2011, respectively.

Product contracts are negotiated and sold separately from service contracts. In addition, service contracts are not included in the product contracts or related sales orders and are not offered to the customer as a condition of the sale of the Company's products. The demand for products and services is generally based on worldwide economic conditions in the offshore oil and gas industry, and is not based on a specific relationship between the two types of contracts. Substantially all of the Company's sales are made on a purchase order basis. Purchase orders are subject to change and/or termination at the option of the customer. In case of a change or termination, the customer is required to pay the Company for work performed and other costs necessarily incurred as a result of the change or termination.

Generally, the Company attempts to raise its prices as its costs increase. However, the actual pricing of the Company's products and services is impacted by a number of factors, including competitive pricing pressure, the level of utilized capacity in the oil service sector, maintenance of market share, the introduction of new products and general market conditions.

The Company accounts for larger and more complex projects that have relatively longer manufacturing time frames on a percentage-of-completion basis. For the six months ended June 30, 2012, 17 projects representing approximately 18% of the Company's total revenue and approximately 21% of its product revenue were accounted for using percentage-of-completion accounting, compared to 12 projects representing approximately 23% of the Company's total revenue and 27% of its product revenue for the first six months of 2011. This percentage may fluctuate in the future. Revenues accounted for in this manner are generally recognized based upon a calculation of the percentage complete, which is used to determine the revenue earned and the appropriate portion of total estimated cost of sales. Accordingly, price and cost estimates are reviewed periodically as the work progresses, and adjustments proportionate to the percent complete are reflected in the period when such estimates are revised. Losses, if any, are recorded in full in the period they become known. Amounts received from customers in excess of revenues recognized are classified as a current liability.

The following table sets forth, for the periods indicated, a breakdown of the Company's U.S. Gulf of Mexico products and services revenues:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
(In millions)				
<b>Revenues:</b>				
<b>Products</b>				
Subsea equipment	\$ 26.0	\$ 15.0	\$ 63.6	\$ 38.0
Surface equipment	0.1	0.1	0.2	0.2
Offshore rig equipment	5.9	8.9	13.5	33.0
<b>Total products</b>	<b>32.0</b>	<b>24.0</b>	<b>77.3</b>	<b>71.2</b>
<b>Services</b>	<b>12.1</b>	<b>6.3</b>	<b>23.8</b>	<b>10.7</b>
<b>Total U.S. Gulf of Mexico revenues</b>	<b>\$ 44.1</b>	<b>\$ 30.3</b>	<b>\$ 101.1</b>	<b>\$ 81.9</b>

As a result of the U.S. Gulf of Mexico drilling moratorium and subsequent delays in the issuance of permits, many of the Company's customers in the U.S. Gulf of Mexico have unused inventory of the Company's subsea wellhead equipment. However, the number of floating rigs actively drilling in the U.S. Gulf of Mexico has steadily increased and is currently greater than pre-moratorium levels, increasing the Company's opportunities for greater subsea equipment revenues in the future. The Company believes that the effects of the U.S. Gulf of Mexico drilling moratorium and related permitting delays have had little or no impact on revenues related to offshore rig equipment. The change in offshore rig equipment revenues in the first half of 2012 compared to the first half of 2011 resulted primarily from a reduction of revenues from projects accounted for under the percentage-of-completion method. The Company's U.S. Gulf of Mexico service revenues, which decreased in each quarter of 2010 as a percentage of worldwide revenues as a result of the U.S. Gulf of Mexico drilling moratorium, have steadily increased since the beginning of 2011. For the quarter ending March 31, 2011, U.S. Gulf of Mexico service revenues were 3.2% of total worldwide revenue and have increased to 6.9% of total worldwide revenue for the quarter ended June 30, 2012. The Company will continue to monitor the effects of the drilling moratorium and the subsequent permitting delays on its ongoing business operations.

*Cost of Sales.* The principal elements of cost of sales are labor, raw materials and manufacturing overhead. Cost of sales as a percentage of revenues is influenced by the product mix sold in any particular period, costs from projects accounted for under the percentage-of-completion method and market conditions. The Company's costs related to its foreign operations do not significantly differ from its domestic costs.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses include the costs associated with sales and marketing, general corporate overhead, compensation expense, stock-based compensation expense, legal expenses, foreign currency transaction gains and losses and other related administrative functions.

*Engineering and Product Development Expenses.* Engineering and product development expenses consist of new product development and testing, as well as application engineering related to customized products.

*Income Tax Provision.* The Company's effective income tax rate has historically been lower than the statutory rate primarily due to foreign income tax rate differentials, research and development credits and deductions related to domestic production activities.

## Results of Operations

The following table sets forth, for the periods indicated, certain statement of operations data expressed as a percentage of revenues:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
<b>Revenues:</b>				
Products	83.1%	83.6%	83.8%	85.4%
Services	16.9	16.4	16.2	14.6
Total revenues	100.0	100.0	100.0	100.0
<b>Cost of sales:</b>				
Products	52.0	50.1	52.0	49.3
Services	9.3	9.8	8.9	9.7
Total cost of sales	61.3	59.9	60.9	59.0
Selling, general and administrative expenses	9.8	11.7	10.7	12.5
Engineering and product development expenses	5.4	6.2	5.4	6.3
Operating income	23.5	22.2	23.0	22.2
Interest income		0.1	0.1	0.1
Interest expense				
Income before income taxes	23.5	22.3	23.1	22.3
Income tax provision	6.6	6.1	6.5	6.3
Net income	16.9%	16.2%	16.6%	16.0%

The following table sets forth, for the periods indicated, a breakdown of our products and service revenues:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
(In millions)				
<b>Revenues:</b>				
<b>Products</b>				
Subsea equipment	\$ 120.1	\$ 101.4	\$ 247.2	\$ 185.8
Surface equipment	10.1	3.8	21.1	10.1
Offshore rig equipment	16.5	9.3	28.1	38.8
Total products	146.7	114.5	296.4	234.7
Services	29.9	22.5	57.3	40.0
Total revenues	\$ 176.6	\$ 137.0	\$ 353.7	\$ 274.7

### Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011.

**Revenues.** Revenues increased by \$39.6 million, or approximately 28.9%, to \$176.6 million in the three months ended June 30, 2012 from \$137.0 million in the three months ended June 30, 2011. Product revenues increased by approximately \$32.2 million for the three months ended June 30, 2012 compared to the same period in 2011 as a result of increased revenues of \$18.7 million in subsea equipment, \$6.3 million in surface equipment and \$7.2 million in offshore rig equipment. The majority of the increase in subsea equipment occurred in the Western Hemisphere and Asia-Pacific. The change in offshore rig equipment revenues in the second quarter of 2012 compared to the second quarter of 2011 resulted primarily from an increase of revenues from projects accounted for under the percentage-of-completion method. In any given time

period, the revenue allocation

between the various product lines will vary depending upon the projects accounted for under the percentage-of-completion accounting method, completion status of such projects, market conditions and customer demand. Product revenues increased in the Western Hemisphere by approximately \$23.5 million and in Asia-Pacific by \$16.8 million, partially offset by a decrease in product revenues of \$8.1 million in the Eastern Hemisphere. Service revenues increased by approximately \$7.8 million in the Western Hemisphere and \$400,000 in the Eastern Hemisphere, partially offset by a decrease in Asia-Pacific of \$800,000. The majority of the increases in service revenues related to an increase in rental tool revenues as momentum continues to build in the U.S. Gulf of Mexico.

*Cost of Sales.* Cost of sales increased by \$26.3 million, or approximately 32.1%, to \$108.3 million for the three months ended June 30, 2012 from \$82.0 million for the same period in 2011. As a percentage of revenues, cost of sales were approximately 61.3% and 59.9% for the three-month period ended June 30, 2012 and 2011, respectively. The increase in cost of sales as a percentage of revenues resulted primarily from changes in product mix and increases in unabsorbed manufacturing overhead expenses.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses increased by \$1.4 million, or approximately 8.7%, to \$17.4 million for the three months ended June 30, 2012 from \$16.0 million for the same period in 2011. Increased personnel and related expenses totaled \$1.1 million. This increase was partially offset by an increase in foreign currency transaction gains to \$450,000 for the three months ended June 30, 2012 from \$405,000 for the three months ended June 30, 2011. Stock option expense for the second quarter of 2012 and 2011 both totaled \$1.2 million. Selling, general and administrative expenses as a percentage of revenues decreased to 9.8% in 2012 from 11.7% in 2011.

*Engineering and Product Development Expenses.* For the three months ended June 30, 2012, engineering and product development expenses increased by approximately \$1.0 million, or 11.8%, to \$9.5 million from \$8.5 million in the same period of 2011. Engineering and product development staffs have increased to meet the demands of the higher backlog related to long-term projects. Engineering and product development expenses as a percentage of revenues decreased to 5.4% in 2012 from 6.2% in 2011.

*Interest Income.* Interest income for the three months ended June 30, 2012 was approximately \$78,000 as compared to \$86,000 for the three months ended June 30, 2011. This decrease resulted from reduced interest rates. The Company continues to keep the majority of its short-term investments in funds which invest in U.S. Treasury obligations.

*Interest expense.* Interest expense for the three months ended June 30, 2012 was approximately \$9,000 as compared to \$11,000 for the same period in 2011.

*Income tax provision.* Income tax expense for the three months ended June 30, 2012 was \$11.6 million on income before taxes of \$41.4 million, resulting in an effective tax rate of approximately 28%. Income tax expense for the three months ended June 30, 2011 was \$8.3 million on income before taxes of \$30.5 million, resulting in an effective tax rate of approximately 27%. The increase in the effective income tax rate reflects the difference in income before income taxes among the Company's three geographic areas, which have different income tax rates.

*Net Income.* Net income was approximately \$29.8 million for the three months ended June 30, 2012 and \$22.2 million for the same period in 2011 for the reasons set forth above.

*Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011.*

*Revenues.* Revenues increased by \$79.0 million, or approximately 28.8%, to \$353.7 million in the six months ended June 30, 2012 from \$274.7 million in the six months ended June 30, 2011. Product revenues increased by approximately \$61.7 million for the six months ended June 30, 2012 compared to the same period in 2011 as a result of increased revenues of \$61.4 million in subsea equipment and \$11.0 million in surface equipment, partially offset by a decrease in offshore rig equipment revenues related to percentage-of-completion projects of \$10.7 million. Product revenues increased in the Western Hemisphere by \$11.7 million, \$23.6 million

in the Eastern Hemisphere and \$26.4 million in Asia-Pacific. Service revenues increased by approximately \$17.3 million due to increased service revenues in the Western Hemisphere of \$16.6 million and in the Eastern Hemisphere of \$2.2 million, partially offset by \$1.5 million decrease in Asia-Pacific. The majority of the increase in service revenues related to an increase in rental tool revenues and to a lesser extent, technical advisory assistance revenues.

*Cost of Sales.* Cost of sales increased by \$53.3 million or approximately 32.9%, to \$215.4 million for the six months ended June 30, 2012 from \$162.1 million for the same period in 2011. As a percentage of revenues, cost of sales were approximately 60.9% and 59.0% for the six months ended June 30, 2012 and 2011, respectively.

*Selling, General and Administrative Expenses.* For the six months ended June 30, 2012, selling, general and administrative expenses increased by approximately \$3.5 million, or 10.2%, to \$37.8 million from \$34.3 million for the same period in 2011. Approximately \$2.2 million was primarily related to increases in personnel and related expenses. Legal and professional fees were \$600,000 higher in the second quarter of 2012 as compared to the same period in 2011. The Company experienced approximately \$1.9 million in foreign currency transaction losses in the first six months of 2012 and 2011. Stock option expense for the first six months of 2012 was \$2.6 million compared to \$2.4 million for the same period in 2011. Selling, general and administrative expenses as a percentage of revenues decreased to 10.7% in 2012 from 12.5% in 2011.

*Engineering and Product Development Expenses.* For the six months ended June 30, 2012, engineering and product development expenses increased by \$1.9 million, or approximately 11.0%, to \$19.1 million from \$17.2 million for the same period in 2011. Engineering and product development staffs have increased to meet the demands of the higher backlog related to long-term projects. Engineering and product development expenses as a percentage of revenues was 5.4% in 2012 and 6.3% in 2011.

*Interest Income.* Interest income for the six months ended June 30, 2012 was approximately \$181,000 compared to approximately \$185,000 for the six months ended June 30, 2011. This decrease was due to decreased interest rates. The Company continues to keep the majority of its short-term investments in funds which invest in U.S. Treasury obligations.

*Interest Expense.* Interest expense for the six months ended June 30, 2012 was \$14,000 compared to \$22,000 for the same period in 2011.

*Income tax provision.* Income tax expense for the six months ended June 30, 2012 was \$22.9 million on income before taxes of \$81.5 million, resulting in an effective tax rate of approximately 28%. Income tax expense for the six months ended June 30, 2011 was \$17.3 million on income before taxes of \$61.2 million, resulting in an effective tax rate of approximately 28%.

*Net Income.* Net income was approximately \$58.6 million for the six months ended June 30, 2012 and \$43.9 million for the same period in 2011 for the reasons set forth above.

## Liquidity and Capital Resources

Cash flows provided by (used in) type of activity were as follows:

	Six months ended June 30,	
	2012	2011
	(In thousands)	
Operating activities	\$ (32,471)	\$ 35,442
Investing activities	(26,647)	(30,816)
Financing activities	8,189	388
	(50,929)	5,014
Effect of exchange rate changes on cash activities	496	(746)
Increase (decrease) in cash and cash equivalents	\$ (50,433)	\$ 4,268

Statements of cash flows for entities with international operations that are local currency functional exclude the effects of the changes in foreign currency exchange rates that occur during any given period, as these are non-cash changes. As a result, changes reflected in certain accounts on the Condensed Consolidated Statements of Cash Flows, may not reflect the changes in corresponding accounts on the Condensed Consolidated Balance Sheets.

The primary liquidity needs of the Company are (i) to fund capital expenditures to improve and expand facilities and manufacture additional running tools and (ii) to fund working capital. Recently, the Company's principal sources of funds have been cash flows from operations.

Cash flows from operating activities utilized \$32.5 million of cash during the six months ended June 30, 2012 compared to generating \$35.4 million for the same period in 2011. This decrease in cash flows of \$67.9 million was primarily due to changes in net operating assets and liabilities, which used \$105.8 million for the six months ended June 30, 2012 and used \$21.3 million for the same period in 2011. The decrease was partially offset by an increase in net income of \$14.7 million and an increase in non-cash items of \$1.8 million.

The significant changes in net operating assets and liabilities were due to the following:

For the six months ended June 30, 2012, increases in trade receivables of \$40.7 million was largely due from third-party revenue growth in the Western Hemisphere, Eastern Hemisphere and Asia-Pacific segments.

For the six months ended June 30, 2012, increases in inventory levels of \$63.1 million were required to support anticipated increases in production volume primarily related to long-term projects.

Capital expenditures by the Company were \$27.7 million and \$32.8 million in the first six months of 2012 and 2011, respectively. Capital expenditures in 2012 and 2011 included expanding manufacturing facilities in the Asia-Pacific, Eastern and Western Hemispheres and increased expenditures on machinery and equipment and running tools. The capital expenditures for the first six months of 2012 were primarily \$5.2 million for facilities, \$14.0 million for machinery and equipment, \$6.9 million for running tools and other expenditures of \$1.6 million.

As of June 30, 2012, the Company has no commercial lending arrangement or lines of credit. The Company believes that cash generated from operations plus cash on hand will be sufficient to fund operations, working capital needs and anticipated capital expenditure requirements for the next twelve months. However, any significant future declines in hydrocarbon prices, catastrophic events or significant changes in regulations affecting the Company or its customers could have a material adverse effect on the Company's liquidity. Should market conditions result in unexpected cash requirements, the Company believes that borrowing from commercial lending institutions would be available and adequate to meet such requirements.

On June 19, 2012, the Company announced that its Board of Directors authorized a stock repurchase plan under which the Company can repurchase up to \$100 million of its common stock. The repurchase program has no expiration date. As of June 30, 2012, no shares had been repurchased.

#### **Off-Balance Sheet Arrangements**

The Company has no derivative instruments and no off-balance sheet hedging or financing arrangements, contracts or operations.

#### **Critical Accounting Policies**

Refer to our Annual Report on Form 10-K for the year ended December 31, 2011 for a discussion of our critical accounting policies. During the six months ended June 30, 2012, there were no material changes in our judgments and assumptions associated with the development of our critical accounting policies.

**Item 3. *Quantitative and Qualitative Disclosures About Market Risk***

The Company is currently exposed to certain market risks related to interest rate changes on its short-term investments and fluctuations in foreign exchange rates. The Company does not engage in any material hedging transactions, forward contracts or currency trading which could mitigate the market risks inherent in such transactions. There have been no material changes in market risks for the Company from December 31, 2011.

**Foreign Exchange Rate Risk**

Through its subsidiaries, the Company conducts a portion of its business in currencies other than the United States dollar, principally the British pound sterling and, to a lesser extent, the Brazilian real. The Company experienced a foreign currency pre-tax gain of approximately \$450,000 during the three months ended June 30, 2012 and a \$1.9 million pre-tax loss during the six months ended June 30, 2012, compared to approximately \$405,000 in pre-tax gains and \$1.9 million in pre-tax loss for the three and six months ended June 30, 2011, respectively. Historically, the Company's foreign currency gains and losses have not been significant. However, when significant disparities between the British pound sterling and the U.S. dollar or the Brazilian real and the U.S. dollar occur, there can be no assurance that the Company will be able to protect itself against such currency fluctuations.

**Item 4. *Controls and Procedures***

In accordance with Exchange Act Rules 13a-15 and 15d-15, the Company carried out an evaluation, under the supervision and with the participation of management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2012 to provide reasonable assurance that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and such information is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

Management's Annual Report on Internal Control over Financial Reporting appears on page 47 of the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

There has been no change in the Company's internal controls over financial reporting that occurred during the quarter ended June 30, 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

---

**PART II OTHER INFORMATION**

**Item 1. Legal Proceedings.**

In December 2010 and January 2011, the Company's Brazilian subsidiary was served with assessments from the disallowance of netting certain import and export taxes. The Company is vigorously contesting these assessments.

In addition, the Company is involved in lawsuits filed as a result of the April 2010 *Deepwater Horizon* incident in the U.S. Gulf of Mexico. The judge presiding over the multi-district litigation proceedings for the *Deepwater Horizon* incident dismissed all claims consolidated against the Company in those proceedings in January 2012 and issued a final judgment ordering the same in April 2012, but new lawsuits may be filed against the Company in the future.

For a further description of the Company's legal proceedings, see Commitments and Contingencies, Note 8 to the Notes to Condensed Consolidated Financial Statements.

**Item 1A. Risk Factors.**

There have been no material changes from the risk factors disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

None.

**FORWARD LOOKING STATEMENTS**

This Quarterly Report on Form 10-Q includes certain statements that may be deemed to be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Statements contained in all parts of this document that are not historical facts are forward-looking statements that involve risks and uncertainties that are beyond the control of Dril-Quip, Inc. (the Company or Dril-Quip). You can identify the Company's forward-looking statements by the words anticipate, estimate, expect, may, project, believe and similar expressions, or by the Company's discussion of strategies or trends. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that these expectations will prove to be correct. These forward-looking statements include the following types of information and statements as they relate to the Company:

future operating results and cash flow;

scheduled, budgeted and other future capital expenditures;

working capital requirements;

the availability of expected sources of liquidity;

the introduction into the market of the Company's future products;

## Edgar Filing: DRIL-QUIP INC - Form 10-Q

the market for the Company's existing and future products;

the Company's ability to develop new applications for its technologies;

the exploration, development and production activities of the Company's customers;

compliance with present and future environmental regulations and costs associated with environmentally related penalties, capital expenditures, remedial actions and proceedings;

effects of pending legal proceedings; and

future operations, financial results, business plans and cash needs.

These statements are based on assumptions and analyses in light of the Company's experience and perception of historical trends, current conditions, expected future developments and other factors the Company believes were appropriate in the circumstances when the statements were made. Forward-looking statements by their nature involve substantial risks and uncertainties that could significantly impact expected results, and actual future results could differ materially from those described in such statements. While it is not possible to identify all factors, the Company continues to face many risks and uncertainties. Among the factors that could cause actual future results to differ materially are the risks and uncertainties discussed under Item 1A. Risk Factors in Part I of the Company's Annual Report on Form 10-K for the year ended December 31, 2011 and the following:

the volatility of oil and natural gas prices;

the cyclical nature of the oil and gas industry;

uncertainties associated with the United States and worldwide economies;

uncertainties regarding political tensions in the Middle East, Africa and elsewhere;

current and potential governmental regulatory actions in the United States and regulatory actions and political unrest in other countries;

uncertainties regarding future oil and gas exploration and production activities in the U.S. Gulf of Mexico and elsewhere, including new regulations, customs requirements and product testing requirements;

operating interruptions (including explosions, fires, weather-related incidents, mechanical failure, unscheduled downtime, labor difficulties, transportation interruptions, spills and releases and other environmental risks);

the Company's reliance on product development;

technological developments;

the Company's reliance on third-party technologies;

the Company's dependence on key employees and skilled machinists, fabricators and technical personnel;

the Company's reliance on sources of raw materials;

impact of environmental matters, including future environmental regulations;

competitive products and pricing pressures;

## Edgar Filing: DRIL-QUIP INC - Form 10-Q

fluctuations in foreign currency;

the Company's reliance on significant customers;

creditworthiness of the Company's customers;

fixed price contracts;

changes in general economic, market or business conditions;

access to capital markets;

negative outcome of litigation, threatened litigation or government proceedings; and

terrorists threats or acts, war and civil disturbances.

Many of such factors are beyond the Company's ability to control or predict. Any of the factors, or a combination of these factors, could materially affect the Company's future results of operations and the ultimate accuracy of the forward-looking statements. Management cautions against putting undue reliance on forward-looking statements or projecting any future results based on such statements or present or prior earnings levels. Every forward-looking statement speaks only as of the date of the particular statement, and the Company undertakes no obligation to publicly update or revise any forward-looking statement.

**Item 6.**

(a) Exhibits

The following exhibits are filed herewith:

Exhibit No.	Description
*3.1	Restated Certificate of Incorporation of the Company (incorporated herein by reference to Exhibit 3.2 to the Company's Registration Statement on Form S-1 (Registration No. 333-33447)).
*3.2	Certificate of Designations of Series A Junior Participating Preferred Stock of the Company (incorporated herein by reference to Exhibit 3.1 to the Company's report on Form 8-K dated November 25, 2008).
*3.3	Amended and Restated Bylaws of the Company (incorporated herein by reference to Exhibit 3.1 to the Company's report on Form 8-K filed January 17, 2012.)
*4.1	Form of certificate representing Common Stock (incorporated herein by reference to Exhibit 4.2 to the Company's Registration Statement on Form S-1 (Registration No. 333-33447)).
*4.2	Rights Agreement dated as of November 24, 2008 between Dril-Quip, Inc. and Mellon Investor Services LLC, as Rights Agent (incorporated herein by reference to Exhibit 4.1 to the Company's Current Report on Form 8-K filed on November 25, 2008).
*+10.1	Amended and Restated 2004 Incentive Plan (incorporated herein by reference to Exhibit A to the Company's Proxy Report on Form DEF 14A filed on April 6, 2012).
