Commission File Number: 1-32731

CHIPOTLE MEXICAN GRILL, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

Delaware
(State or other jurisdiction of
incorporation or organization)

84-1219301
(IRS Employer
Identification No.)

1401 Wynkoop Street, Suite 500 Denver, CO
(Address of Principal Executive Offices)

80202
(Zip Code)

Registrant's telephone number, including area code: (303) 595-4000

Securities registered pursuant to Section 12(b) of the Act:

<p>Title of each class Common stock, par value \$0.01 per share</p>	<p>Name of each exchange on which registered New York Stock Exchange</p>
<p>Securities registered pursuant to Section 12(g) of the Act: None</p>	

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(do not check if a
smaller reporting

company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 28, 2013, the aggregate market value of the registrant's outstanding common equity held by non-affiliates was \$7.10 billion, based on the closing price of the registrant's common stock on such date, the last trading day of the registrant's most recently completed second fiscal quarter. For purposes of this calculation, shares of common stock held by each executive officer and director and by holders of more than 5% of

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

the outstanding common stock have been excluded since those persons may under certain circumstances be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of January 30, 2014, there were 31,024,168 shares of the registrant's common stock, par value of \$0.01 per share outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates certain information by reference from the registrant's definitive proxy statement for the 2014 annual meeting of shareholders, which will be filed no later than 120 days after the close of the registrant's fiscal year ended December 31, 2013.

PART I

ITEM 1. BUSINESS

General

Chipotle Mexican Grill, Inc. and its subsidiaries (Chipotle , the Company , or we) operate Chipotle Mexican Grill restaurants, which serve a focused menu of burritos, tacos, burrito bowls (a burrito without the tortilla) and salads, made using fresh ingredients. As of December 31, 2013, we operated 1,572 Chipotle restaurants throughout the United States, as well as seven in Canada, six in England, two in France, and one in Germany. Additionally, our restaurants include six ShopHouse Southeast Asian Kitchen restaurants, serving Asian-inspired cuisine, and we are an investor in a consolidated entity that owns and operates one Pizzeria Locale, a fast casual pizza concept, resulting in a total of 1,595 restaurants as of December 31, 2013. We focus on trying to find the highest quality ingredients we can to make great tasting food; on building a special people culture that is centered on creating a team of top performers empowered to achieve high standards; on building restaurants that are operationally efficient and aesthetically pleasing; and on doing all of this with increasing awareness and respect for the environment. We have grown substantially over the past five years, and expect to open between 180 and 195 additional restaurants in 2014, including a small number of ShopHouse and/or Pizzeria Locale restaurants.

Our vision is to change the way people think about and eat fast food. We do this by avoiding a formulaic approach when creating our restaurant experience, looking to fine-dining restaurants for inspiration. We use high-quality raw ingredients, classic cooking methods and a distinctive interior design and have friendly people to take care of each customer features that are more frequently found in the world of fine dining. Our approach is also guided by our belief in an idea we call Food With Integrity. Our objective is to find the highest quality ingredients we can ingredients that are grown or raised with respect for the environment, animals and people who grow or raise the food.

We manage our operations and restaurants based on seven regions that aggregate into one reportable segment. Financial information about our operations, including our revenues and net income for the years ended December 31, 2013, 2012, and 2011, and our total assets as of December 31, 2013 and 2012, is included in our consolidated financial statements and accompanying notes in Item 8, Financial Statements and Supplementary Data. Substantially all of our revenues are generated and assets are located in the U.S. For a discussion of risks related to our international operations, see *Risks Related to Our Growth Strategy and Future Expansion Our expansion into international markets may present increased risks due to lower customer awareness of our brand, our unfamiliarity with those markets and other factors* in Item 1A, Risk Factors.

Our Menu and Food Preparation

Food With Integrity. Serving high quality food while still charging reasonable prices is critical to our vision to change the way people think about and eat fast food. As part of our Food With Integrity philosophy, we believe that purchasing fresh ingredients and preparing them by hand are not enough, so we spend time on farms and in the field to understand where our food comes from and how it is raised. Because our menu is so focused, we can concentrate on the sources of each ingredient, and this has become a cornerstone of our continuous effort to improve our food.

In all of our restaurants, we endeavor to serve only meats that were raised without the use of subtherapeutic antibiotics or added hormones, and in accordance with criteria we've established in an effort to improve sustainability and promote animal welfare. We brand these meats as Responsibly RaisedTM. One of our primary goals is for all of our restaurants to serve meats raised to meet our standards, but we have and will continue to face challenges in doing so. Some of our restaurants served conventionally raised beef and chicken for periods during 2013, and some are continuing to serve conventionally raised beef, due to supply constraints for our Responsibly Raised meats. More of our restaurants may periodically serve conventionally raised meats in the future due to additional supply constraints. When we become aware that one or more of our restaurants will serve conventionally raised meat, we clearly and specifically disclose this temporary change on signage in each affected restaurant so that customers can avoid those meats if they choose to do so.

Table of Contents

We also seek to use more sustainably grown produce, meaning produce grown by suppliers who we believe respect the environment and their employees. A portion of some of the produce items we serve is organically grown, and/or sourced locally while in season (by which we mean grown within 350 miles of the restaurant where it is served). A portion of our beans is organically grown and a portion is grown using conservation tillage methods that improve soil conditions, reduce erosion, and help preserve the environment in which the beans are grown. Our commitment to Food With Integrity extends to the dairy products we serve as well. The sour cream and cheese we buy is made with milk that comes from cows that are not given rBGH (recombinant bovine growth hormone). Also, milk used to make much of our cheese and sour cream is sourced from pasture-based dairies that provide an even higher standard of animal welfare by providing outdoor access for their cows. Further, we disclose on our website which ingredients contain genetically modified organisms, or GMOs, and we are working to replace ingredients containing GMOs in our food (not including beverages) with non-GMO ingredients. While the meat and poultry we serve is not genetically modified, the animals are likely fed a diet containing GMOs. Because of the prevalence of GMOs in a number of important feed crops, most grains used as animal feed in the U.S. are genetically modified.

We do face challenges associated with pursuing Food With Integrity. There are higher costs and other risks associated with purchasing ingredients grown or raised with an emphasis on quality, environmental sustainability and other responsible practices. Growth rate and weight gain can be lower for chickens, cattle and pigs that are not fed subtherapeutic antibiotics and for cattle that are not given growth hormones. Crops grown organically or using other responsible practices can take longer to grow and crop yields can be lower. It can take longer to identify and secure relationships with suppliers that are able to meet our criteria for meat, dairy and produce ingredients. Given the costs associated with what we believe are responsible farming practices, many large suppliers have not found it economical to pursue business in this area. However, we believe that in addition to seeking great tasting and nutritious food, consumers are increasingly concerned about where their food comes from and how it is raised. And we believe that as consumers become more educated about better animal welfare and farming practices as well as social accountability, they will foster greater demand for sustainably grown foods in the long term. We believe that increased demand over the long term for the types of meat and produce items we strive to serve will continue to attract the interest and capital investment of larger farms and suppliers. We also understand that we will continue to be at the forefront of this trend and must balance our interest in advancing Food With Integrity with our desire to provide great food at reasonable prices. If we are able to continue growing while focusing on Food With Integrity, our sourcing flexibility should improve over time, though we expect that most of these ingredients and other raw materials will remain more expensive than conventionally raised, commodity-priced equivalents.

A Few Things, Thousands of Ways. Chipotle restaurants serve only a few things: burritos, burrito bowls, tacos and salads. But because customers can choose from four different meats, two types of beans and a variety of extras such as salsas, guacamole, cheese and lettuce, there is enough variety to extend our menu to provide countless choices. We plan to keep a simple menu, but we will consider additions that we think make sense, such as the recent introduction in select markets of Sofritas, our new vegan protein option made with braised organic tofu. And if customers can't find something on the menu that is quite what they're after, we encourage them to let us know. If we can make it from the ingredients we have, we will do it.

In preparing our food, we use stoves and grills, pots and pans, cutting knives, wire whisks and other kitchen utensils, walk-in refrigerators stocked with a variety of fresh ingredients, herbs and spices and dry goods such as rice. Ingredients we use include chicken and steak that is marinated and grilled in our restaurants, carnitas (seasoned and braised pork), barbacoa (spicy shredded beef) and vegetarian pinto and black beans. We add our rice, which is tossed with lime juice and freshly chopped cilantro, as well as freshly shredded cheese, sour cream, lettuce, peppers and onions, depending on each customer's request. We use various herbs, spices and seasonings to prepare our meats and vegetables. We also provide a variety of extras such as guacamole, salsas and tortilla chips seasoned with fresh lime juice and kosher salt. In addition to sodas, fruit drinks and organic milk, most of our restaurants also offer a selection of beer and margaritas. Our food is prepared from scratch, with the majority prepared in our restaurants while some is prepared with the same fresh ingredients in larger batches in commissaries.

Table of Contents

Food Served Fast So That Customers Can Enjoy It Slowly. Our employees spend hours preparing our food on-site, but each customer order can be ready in seconds. Customers select exactly what they want and how they want it by speaking directly to the employees that prepared the food and are assembling the order. While we think that our customers return because of the great-tasting food, we also think that they like getting food served fast without having a typical fast-food experience. And while our restaurants often have lines, we try to serve customers as quickly as possible. We do this by focusing on what we call the four pillars of throughput. The four pillars are having a dedicated expeditor, who works just before the cashier to get drink and side orders and bag to-go orders; a dedicated linebacker, to make sure the serving line is stocked with all our ingredients so the employees on the line can focus on each customer's order; proper *mise en place*; and ensuring that we have spaces in their places, or the best employees at each position during all of our peak periods. When we do this our customers are served quickly without feeling rushed. We've even been able to serve more than 300 customers an hour at some locations. The natural flow of our restaurant layout, including the floor plan and the design of our serving line, are designed to make the food ordering process intuitive and, we believe, more efficient. And we constantly strive to improve the speed of service in all of our restaurants, so that we can accommodate more customers and larger orders without disrupting restaurant traffic. For instance, our restaurants accept orders by fax, online or through an iPhone or Android ordering application in order to provide a more convenient experience by allowing customers to avoid standing in line. By emphasizing speed of service without compromising the genuine interactions between our customers and our crews, and by continually making improvements to our restaurant operations, we believe that we can provide a high quality experience to more and more customers.

Quality Assurance and Food Safety. We are committed to serving safe, high quality food to our customers. Quality and food safety is integrated throughout our supply chain and everything we do; from the farms that supply our food all the way through to our front line. We have established close relationships with some of the top suppliers in the industry, and we actively maintain a limited list of approved suppliers from whom our distributors must purchase. Our quality assurance department establishes and monitors our quality and food safety programs for our supply chain. Our training and risk management departments develop and implement operating standards for food quality, preparation, cleanliness and safety in the restaurants. Our food safety programs are also designed to ensure that we comply with applicable federal, state and local food safety regulations.

Restaurant Management and Operations

Culture of Top Performers. In addition to our focus on the food we serve, we have a similarly focused people culture with an emphasis on identifying, hiring and empowering top performing employees. We are committed to creating a performance based culture that leads to the best restaurant experience possible for our employees and our customers. The foundation of that culture starts with hiring the best people in our restaurants. We make an effort to hire employees who share a passion for food and who will operate our restaurants in a way that is consistent with our high standards, yet allows each of their unique personalities and strengths to contribute to our success. We believe we provide attractive career opportunities to crew and managers who are committed to work hard, provide great customer service and have the ability to lead and empower a team of top performers. We provide hands on, shoulder-to-shoulder training to develop the full potential of our restaurant employees. We are committed to developing our people and promoting from within, with about 85% of salaried management and about 96% of hourly management coming from internal promotions. Our best general managers, who run great restaurants and develop strong, empowered restaurant teams, are promoted to Restaurateur and in that role can earn bonuses for developing people. We've leveraged our outstanding Restaurateurs leadership by giving many Restaurateurs responsibility for mentoring one or more nearby restaurants. This provides an opportunity for Restaurateurs to develop field leadership roles one restaurant at a time. Restaurateurs who have shown they can successfully run four restaurants by developing teams of all top performers (including at least one Restaurateur), thereby creating a culture of high standards, constant improvement and empowerment in each of their restaurants, can be promoted to apprentice team leaders.

Importance of Methods and Culture. Although we have many restaurants, we believe that our departure from the automated cooking techniques and microwaves used by many traditional fast-food and fast-casual restaurants helps to set us apart. Our crews use classic cooking methods: they marinate and grill meats, hand-cut

Table of Contents

produce and herbs, make fresh salsa and guacamole, and cook rice in small batches throughout the day. They work in kitchens that more closely resemble those of high-end restaurants than they do a typical fast-food place. Despite our more labor-intensive method of food preparation, our focused menu creates efficiencies which allow us to serve high quality food made from ingredients typically found in fine dining restaurants.

The Front Line is Key. Our restaurant and kitchen designs intentionally place crew members up front with customers to reinforce our focus on service, and our open kitchen design allows customers to see that we prepare our food fresh, each and every day. All of our restaurant employees are encouraged to interact with customers no matter their job, whether preparing food or serving customers during our busiest period. We focus on attracting and retaining people who can deliver that experience for each customer. We provide each customer with individual attention and make every effort to respond to customer suggestions and concerns in a personal and hospitable way. We believe our focus on creating a positive and interactive experience helps build loyalty and enthusiasm for our brand among general managers, crew members and customers alike.

The Basics. Each restaurant typically has a general manager (a position we've characterized as the most important in the company), an apprentice manager (in more than three-quarters of our restaurants), one to three hourly service managers, one or two hourly kitchen managers and an average of 23 full and part-time crew members. We generally have two shifts at our restaurants, which simplifies scheduling and provides stability for our employees. We tend to have more employees in our busier restaurants. We cross-train our people so that each can work a variety of stations, allowing us to work efficiently during our busiest times, while giving our people the opportunity to develop a wider array of skills. Consistent with our emphasis on customer service, we encourage our general managers and crew members to welcome and interact with customers throughout the day. In addition to the employees serving our customers at each restaurant, we also have a field support system that includes apprentice team leaders, team leaders or area managers, team directors, executive team directors or regional directors, and restaurant support officers.

Supply Chain

Close Relationships with Suppliers. Maintaining the high levels of quality we expect in our restaurants depends in part on our ability to acquire high-quality, fresh ingredients and other necessary supplies that meet our specifications from reliable suppliers. Our 23 independently owned and operated regional distribution centers purchase from various suppliers we carefully select based on quality and their understanding of our mission, and we seek to develop mutually beneficial long-term relationships with suppliers. We work closely with our suppliers and use a mix of forward, fixed and formula pricing protocols, and our distribution centers purchase within the pricing guidelines and protocols we have established with the suppliers. We've tried to increase, where necessary, the number of suppliers for our ingredients, which we believe can help mitigate pricing volatility and supply shortages, and we follow industry news, trade issues, weather, exchange rates, foreign demand, crises and other world events that may affect our ingredient prices. Certain key ingredients (beef, pork, chicken, beans, rice, sour cream, cheese, and tortillas) are purchased from a small number of suppliers.

Distribution Arrangements. Ingredients and other supplies are delivered to our restaurants by our independently owned and operated regional distribution centers.

Marketing

A great dining experience in our restaurants is our most powerful marketing of all. But there is still a need to introduce our brand to consumers, and to help them understand what makes Chipotle different than other restaurants. So we pay close attention to all of these details, monitoring customer sentiment and awareness of Chipotle and keeping our communications closely aligned with the ways our customers experience our brand. Our advertising and promotional programs, in-store communications, and other design elements all help to communicate something about what makes Chipotle different from other fast food companies. Whether it's engaging with our company via social media, participating in our local events or simply eating a burrito at one of our restaurants, each interaction with a customer affords us an important opportunity to build our brand.

Our advertising has generally included print, outdoor, transit and radio ads, but we are also incorporating online advertising into the mix, and adding strategic promotions that demonstrate how Chipotle is different than

Table of Contents

other restaurant concepts, or that connect us to like-minded individuals or organizations. Beyond these traditional means, we are continuing to explore and pioneer new avenues of branded content aimed at educating consumers about issues that are important to us, and explaining why we are working to drive positive change in the nation's food supply. In addition, we continue to generate considerable media coverage, with scores of publications writing favorably about our food, restaurant concept and business.

We also recognize the need for our marketing to evolve, much as we have evolved our food culture and our unique people culture. To this end, we have been developing more owned media, including new video and music programs, and a more visible event strategy that includes our Cultivate festivals of food, music and ideas, and participation in relevant events in markets around the country. Many of these newer programs allow us to tell our story with more nuance than is afforded by traditional advertising, and help forge stronger emotional connections with our customers. We are also increasing our use of digital, mobile, and social media to our overall marketing mix, giving customers greater opportunity to access Chipotle in ways that are convenient for them, and broadening our ability to engage with our customers individually.

Collectively, these efforts and our excellent restaurant teams have helped us create considerable word-of-mouth publicity, with our customers learning about us and telling others, allowing us to build awareness and loyalty with relatively low advertising expenditures, even in a competitive category, and to differentiate Chipotle as a company that is committed to doing the right things in every facet of our business.

Competition

The fast-casual, quick-service and casual dining segments of the restaurant industry are highly competitive with respect to, among other things, taste, price, food quality and presentation, service, location and the ambience and condition of each restaurant. Our competition includes a variety of restaurants in each of these segments, including locally owned restaurants and national and regional chains. Many of our competitors offer dine-in, carry-out and delivery services. Among our main competitors are a number of multi-unit, multi-market Mexican food or burrito restaurant concepts, some of which are expanding nationally. Unlike us, a number of our competitors grow through franchising.

Several of our competitors compete by offering menu items that are specifically identified as low in carbohydrates, better for customers or otherwise targeted at particular consumer preferences. Many of our competitors in the fast-casual and quick-service segments of the restaurant industry also emphasize lower-cost, value meal menu options, a strategy we do not currently pursue.

Moreover, we may also compete with companies outside the fast casual and quick service and casual dining segments of the restaurant industry. For example, competitive pressures can come from deli sections and in-store cafés of several major grocery store chains, including those targeted at customers who want higher-quality food, as well as from convenience stores and casual dining outlets. These competitors may have, among other things, a more diverse menu, lower operating costs, better locations, better facilities, better management, more effective marketing and more efficient operations than we have.

We believe we are well-positioned to continue to grow our market position in existing and new markets given current consumer trends, including increasing awareness and concern among consumers about what they eat and how it is prepared and the increasing prevalence of the fast-casual segment. Some of our competitors have formats that might resemble ours, but we believe that Chipotle has become one of the most recognized fast-casual restaurants and that we are known for our focus on having teams of top-performing employees prepare food using a variety of fresh ingredients in an open restaurant kitchen to create delicious food, as well as our commitment to Food With Integrity, which we think adds up to a high quality customer experience in our restaurants. We believe these elements represent significant competitive advantages in the segment in which we operate.

Restaurant Site Selection

We believe that site selection is critical to our success and thus we devote substantial time and effort to evaluating each potential location. Our site selection process includes the use of external real estate brokers with

Table of Contents

expertise in specific markets, taking direction from our internal team of real estate managers. Locations proposed by real estate managers are reviewed by development management and at times leaders from operations as part of a formal site ride, as well as in a written real estate package. We study the surrounding trade area, demographic and business information within that area, and available information on competitors. Based on this analysis, including utilization of predictive modeling using proprietary formulas, we determine projected sales and targeted return on investment. We have been successful in a number of different types of locations, such as in-line or end-cap locations in strip or power centers, in regional malls and downtown business districts, free-standing buildings, food courts, and airports. Our new restaurant development activity has broadened to incorporate trade areas or restaurant sites in which we have little or no prior experience, including smaller or more economically mixed communities, highway sites, outlet centers, and on military sites.

ShopHouse Southeast Asian Kitchen and Pizzeria Locale

We believe that the fundamental principles on which our restaurants are based—finding the very best sustainably raised ingredients, prepared and cooked using classical methods in front of the customer, and served in an interactive format by special people dedicated to providing a great dining experience—can be adapted to cuisines other than the food we serve at Chipotle.

In order to see how our model works when we use different ingredients and a different style of food, we opened our first ShopHouse Southeast Asian Kitchen during 2011 and we opened five additional ShopHouse restaurants during 2013. ShopHouse serves a menu that, like at Chipotle, is focused; main dishes consist of rice or noodle bowls made with steak, chicken, meatballs made with pork and chicken, or tofu. Further, during 2013, we invested in a consolidated entity that owns and operates one Pizzeria Locale, a fast casual pizza concept serving a menu that includes classic pizzas and salads, from a selection of high-quality ingredients.

Notwithstanding our opening of ShopHouse and investment in Pizzeria Locale, and our plans in 2014 for a small number of additional ShopHouse and/or Pizzeria Locale restaurants, our immediate focus will remain on thoughtfully growing the Chipotle brand.

Seasonality

Seasonal factors cause our profitability to fluctuate from quarter to quarter. Historically, our average daily restaurant sales and profits are lower in the first and fourth quarters due, in part, to the holiday season and because fewer people eat out during periods of inclement weather (the winter months) than during periods of mild or warm weather (the spring, summer and fall months). Other factors also have a seasonal effect on our results. For example, restaurants located near colleges and universities generally do more business during the academic year.

Our Intellectual Property and Trademarks

Chipotle, Chipotle Mexican Grill, Unburrritable, Food With Integrity, Fresh Is Not Enough, Anymore, The Gourmet Restaurant Where You With Your Hands, Responsibly Raised, ShopHouse and a number of related designs and logos are U.S. registered trademarks of Chipotle. We have filed trademark applications for a number of other marks in the U.S. In addition to our U.S. registrations, we have registered trademarks for Chipotle and a number of other marks in Canada, the European Union and various other countries, and have filed trademark applications for Chipotle Mexican Grill, Chipotle and a number of other marks in various countries as well.

We also believe that the design of our restaurants is our proprietary trade dress. From time to time we have taken action against other restaurants that we believe are misappropriating our trademarks, restaurant designs or advertising. Although our policy is to protect and defend vigorously our rights to our intellectual property, we may not be able to adequately protect our intellectual property, which could harm the value of our brand and adversely affect our business.

Table of Contents

Information Systems

We use an integrated information system to manage the flow of information within each restaurant and between the restaurants and our corporate offices and which is accessible remotely by our field staff. This system includes a point-of-sales local area network that helps facilitate the operations of the restaurant by recording sales transactions and printing orders in the appropriate locations within the restaurant. Additionally, the point-of-sales system is used to authorize, batch and transmit credit card transactions, to record employee time clock information, and to produce a variety of management reports. Select information that is captured from this system is transmitted to our corporate offices on a daily basis, which enables management to continually monitor operating results. We believe that our current point-of-sales systems will be an adequate platform to support our continued expansion. See **Risk Factors** **General Business Risks** *We may incur costs resulting from security risks we face in connection with our electronic processing and transmission of confidential customer and employee information* below for a discussion of certain risks associated with our point-of-sales systems.

Employees

As of December 31, 2013, we had about 45,340 employees, including about 3,740 salaried employees and about 41,600 hourly employees. None of our employees are unionized or covered by a collective bargaining agreement.

Available Information

We maintain a website at www.chipotle.com, including an investor relations section at ir.chipotle.com in which we routinely post important information, such as webcasts of quarterly earnings calls and other investor events in which we participate or host, and any related materials. Our Code of Conduct is also available in this section of our website. You may access our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, as well as other reports relating to us that are filed with or furnished to the SEC, free of charge in the investor relations section of our website as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The public may also read and copy materials we file with the SEC at the SEC's Public Reference Room, which is located at 100 F Street, NE, Room 1580, Washington, DC 20549. You can obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC at www.sec.gov.

The contents of the websites mentioned above are not incorporated into and should not be considered a part of this report. The references to the URLs for these websites are intended to be inactive textual references only.

ITEM 1A. RISK FACTORS

Cautionary Note Regarding Forward-Looking Statements

This report includes statements of our expectations, intentions, plans and beliefs that constitute **forward-looking statements** within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are intended to come within the safe harbor protection provided by those sections. These statements, which involve risks and uncertainties, relate to the discussion of our business strategies and our expectations concerning future operations, margins, profitability, liquidity and capital resources and to analyses and other information that are based on forecasts of future results and estimates of amounts not yet determinable. Forward-looking statements include our projections of the number of restaurants we expect to open in 2014, our expected comparable restaurant sales results during 2014, our expectations for food cost inflation and food costs as a percentage of revenue in 2014, statements about potential menu price increases in 2014, projections of restaurant development costs and other expenses, statements of our intention to open restaurants in one or more specified locations, statements regarding the potential impact of ongoing economic uncertainty on our business, statements about possible repurchases of our common stock, forecasts of

Table of Contents

marketing and promotional spending and general and administrative expenses as a percentage of revenue in 2014, and our projections of our effective tax rate for 2014, and other statements of our expectations and plans. We have used words such as may, will, should, expect, intend, plan, anticipate, believe, think, estimate, seek, expect, predict, could, project, potential and other similar terms and phrases to assumptions, in this report to identify forward-looking statements. These forward-looking statements are made based on expectations and beliefs concerning future events affecting us and are subject to uncertainties, risks and factors relating to our operations and business environments, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those matters expressed or implied by these forward-looking statements. Such risks and other factors include those listed in this Item 1A. Risk Factors, and elsewhere in this report.

When considering forward-looking statements in this report or that we make in other reports or statements, you should keep in mind the cautionary statements in this report and future reports we file with the SEC. New risks and uncertainties arise from time to time, and we cannot predict when they may arise or how they may affect us. We assume no obligation to update any forward-looking statements after the date of this report as a result of new information, future events or other developments, except as required by applicable laws and regulations.

Risks Related to our Growth Strategy and Future Expansion

Our sales and profit growth could be adversely affected if comparable restaurant sales increases are less than we expect, and we may not successfully increase comparable restaurant sales or they may decrease.

While future sales growth will depend substantially on our opening new restaurants, changes in comparable restaurant sales (which represent the change in period-over-period sales for restaurants beginning in their 13th full month of operations) will also affect our sales growth and will continue to be a critical factor affecting profit growth. This is because the profit margin on comparable restaurant sales is generally higher, as comparable restaurant sales increases enable fixed costs to be spread over a higher sales base. Conversely, declines in comparable restaurant sales can have a significant adverse effect on profitability due to the loss of the positive impact on profit margins associated with comparable restaurant sales increases. We expect comparable restaurant sales increases in 2014 to be in the low to mid-single digits, excluding any menu price increases, due in part to difficult comparisons with 2013.

Our ability to increase comparable restaurant sales depends on many factors, including:

changes in consumer preferences and discretionary spending, including weaker consumer spending during periods of economic difficulty or uncertainty;

consumer understanding and acceptance of the Chipotle experience and perceptions of the Chipotle brand;

our ability to increase menu prices without adversely impacting transaction counts to such a degree that the impact from lower transactions equals or exceeds the benefit of the menu price increase;

any trade down by customers or other reduction in average check in response to price increases, which could reduce or eliminate the benefit of the price increase on comparable restaurant sales;

competition, either from our competitors in the restaurant industry, or from our own restaurants in the event customers who frequent one of our restaurants begin to visit one of our new restaurants instead;

executing our strategies effectively, including our development strategy, our marketing and branding strategies, our initiatives to increase the speed at which our crew serves each customer, expanded use of fax service lines and online and other electronic ordering, and introductions of catering options and new menu items, each of which we may not be able to accomplish or which may not have the impact we expect;

initial sales performance of new restaurants, which is subject to the risks described below under *Our new restaurants, once opened, may not be profitable, and may adversely impact the sales of our existing restaurants* ;

Table of Contents

weather, road construction and other factors limiting access to our restaurants; and

changes in government regulation.

As a result of these factors it is possible that we will not achieve our targeted comparable restaurant sales or that the change in comparable restaurant sales could be negative. A number of these factors are beyond our control, and therefore we cannot assure that we will be able to sustain comparable restaurant sales increases.

Past declines in our comparable restaurant sales increases have significantly impacted our stock price. Beginning in the second quarter of 2012, prior to which we had been experiencing strong comparable restaurant sales growth momentum, our comparable restaurant sales increases decelerated and the price of our stock declined significantly in the wake of this deceleration, including a decline of nearly 22% on the trading day following our second quarter 2012 earnings release. Any future deceleration in or failure to meet market expectations for our comparable restaurant sales increases would likely result in another significant decline in the price of our common stock.

Increasing our sales and profitability depends substantially on our ability to open new restaurants in sites and on terms attractive to us, which is subject to many unpredictable factors.

There were 1,595 restaurants in operation as of December 31, 2013. We plan to increase the number of our restaurants significantly in the next three years, and plan to open between 180 and 195 new restaurants in 2014. However, we have in the past experienced delays in opening some restaurants and that could happen again as a result of any of the following factors:

our potential inability to locate and secure new restaurant sites in locations that we believe to be attractive;

obstacles to hiring and training qualified operating personnel in the local market;

delay or cancellation of new site development by developers and landlords, which may become increasingly common during periods of economic uncertainty or tight credit;

difficulty managing construction and development costs of new restaurants at affordable levels, particularly in competitive markets;

difficulty negotiating leases with acceptable terms;

any shortages of construction materials and labor;

lack of availability of, or inability to obtain, adequate supplies of ingredients that meet our quality standards;

failures or delays in securing required governmental approvals (including construction, parking and other permits); and

the impact of inclement weather, natural disasters and other calamities.

One of our biggest challenges in opening new restaurants is staffing. We seek to hire only top-performing employees and to promote general managers from our crew, which may make it more difficult for us to staff all the restaurants we intend to open. Constraints on our hiring new employees are described further below under *Risks Related to Operating in the Restaurant Industry* *Our business could be adversely affected by increased labor costs or difficulties in finding the right employees for our restaurants and the right field leaders.*

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

Another significant challenge is locating and securing an adequate supply of suitable new restaurant sites. Competition for suitable new restaurant sites in our target markets can be intense, and development and leasing costs are increasing, particularly for urban locations. These factors may be exacerbated by any ongoing economic uncertainty, as developers may continue to delay or be unable to finance new projects. Delays or failures in opening new restaurants due to any of the reasons set forth above could materially and adversely affect our growth strategy and our expected results. Moreover, as we open and operate more restaurants our rate of expansion relative to the size of our restaurant base will decline, which may in turn slow our sales and profitability growth.

Table of Contents

Our progress in opening new restaurants from quarter to quarter may also occur at an uneven rate, which may result in quarterly sales and profit growth falling short of market expectations in some periods. Similarly, our growth strategy and the substantial investment associated with the development of each new restaurant (as well as the impact of our new restaurants on the sales of our existing restaurants) may cause our operating results to fluctuate and be unpredictable or adversely affect our profits.

Our new restaurants, once opened, may not be profitable, and may adversely impact the sales of our existing restaurants.

Historically, many of our new restaurants have opened with an initial ramp-up period typically lasting 24 months or more, during which they generated sales and income below the levels at which we expect them to normalize. This is in part due to the time it takes to build a customer base in a new area, higher fixed costs relating to increased labor and other start-up inefficiencies that are typical of new restaurants, and a larger proportion of our recent openings being in higher rent sites than we have historically targeted. It may also be difficult for us to attract a customer base if we are not able to staff our restaurants with employees who perform to our high standards. If we are unable to build the customer base that we expect for new restaurant locations or overcome the higher fixed costs associated with new restaurant locations, new restaurants may not have similar results as our existing restaurants and may not be profitable. We also have lowered the average development cost, net of landlord reimbursements, for new Chipotle restaurants in the U.S. significantly in recent years, from about \$916,000 in 2008 to about \$800,000 in 2013. In 2014, we expect average development costs to increase about 5%. In the event we are not able to achieve the average development costs we expect for 2014 or sustain the benefits achieved in prior years, which could result from inflation, project mismanagement or other reasons, our new restaurant locations could also result in decreased profitability. Additionally, our new restaurant development activity has broadened recently to incorporate trade areas or restaurant sites in which we have little or no prior experience, including smaller or more economically mixed communities, highway sites, outlet centers, and restaurants in airports, food courts, or on military sites. The risks relating to building a customer base and managing development and operating costs may be more significant in some or all of these types of trade areas or restaurant sites.

In addition, we have now opened restaurants in nearly all major metropolitan areas across the U.S. New restaurants opened in existing markets may adversely impact sales in previously-opened restaurants in the same market as customers who frequent our established restaurants begin to visit a newly-opened restaurant instead. This impact could worsen as we open additional restaurants, and could make it more difficult for us to increase comparable restaurant sales and profitability. Existing restaurants could also make it more difficult to build the customer base for newly-opened restaurants in the same market.

Our expansion into international markets may present increased risks due to lower customer awareness of our brand, our unfamiliarity with those markets and other factors.

In 2008, we opened our first restaurant outside the U.S., in Toronto, Canada. In 2010 we opened our first restaurant in the United Kingdom in London, in 2012 we opened our first restaurant in France in Paris, and in 2013 we opened our first restaurant in Germany in Frankfurt. As of December 31, 2013, 16 of our restaurants were located outside of the U.S. As a result of our small number of restaurants outside the U.S. and the relatively short time we have been operating those restaurants, we have lower brand awareness, lower sales and/or transaction counts, and less operating experience in these markets. The markets in which we've opened restaurants outside the U.S., and any additional new markets we enter outside the U.S. in the future, have different competitive conditions, consumer tastes and discretionary spending patterns than our U.S. markets. As a result, new restaurants outside the U.S. may be less successful than restaurants in our existing markets. Specifically, due to lower consumer familiarity with the Chipotle brand, differences in customer tastes or spending patterns, or for other reasons, sales at restaurants opened outside the U.S. may take longer to ramp up and reach expected sales and profit levels, and may never do so, thereby affecting our overall profitability. To build brand awareness in international markets, we may need to make greater investments in advertising and promotional activity than we originally planned, which could negatively impact the profitability of our operations in those markets.

Table of Contents

We may also find it more difficult in international markets to hire, motivate and keep qualified employees who can project our vision, passion and culture. In addition, restaurants outside the U.S. have had higher construction, occupancy and operating costs than restaurants in existing markets, and we may have difficulty finding reliable suppliers or distributors or ones that can provide us, either initially or over time, with adequate supplies of ingredients meeting our quality standards. Markets outside the U.S. may also have regulatory differences with the U.S. with which we are not familiar, or that subject us to significant additional expense or to which we are not able to successfully adapt, which may have a particularly adverse impact on our sales or profitability in those markets and could adversely impact our overall results. Our overall results may also be affected by currency risk on the transactions in other currencies and translation adjustments resulting from the conversion of our international financial results into the U.S. dollar.

ShopHouse Southeast Asian Kitchen and Pizzeria Locale may not contribute to our growth.

We believe that the fundamental principles on which Chipotle restaurants are based—finding the very best sustainably raised ingredients, prepared and cooked using classical methods in front of the customer, and served in an interactive format by special people dedicated to providing a great dining experience—can be adapted to cuisines other than the food we serve at Chipotle. In order to see how our model works when we use different ingredients and a different style of food, we opened ShopHouse Southeast Asian Kitchen during 2011 and now have a total of six ShopHouse restaurants, in Washington D.C. and the Los Angeles area. We also announced in late 2013 that we have invested in a company operating a new fast casual Pizzeria Locale restaurant in Denver, Colorado, and that we plan to invest in and assist with the expansion of Pizzeria Locale in the future. ShopHouse and Pizzeria Locale are new brands and they have lower brand awareness, lower sales and less operating experience than most Chipotle restaurants, and may not achieve the same restaurant economics as Chipotle restaurants. Notwithstanding our opening of ShopHouse and investment in Pizzeria Locale, our immediate focus will remain on thoughtfully growing the Chipotle brand. As a result, we do not expect ShopHouse or Pizzeria Locale to contribute to our growth in a meaningful way for at least the next several years, and we may determine not to move forward with any further expansion of ShopHouse or Pizzeria Locale. This would limit our overall growth over the long term.

Our failure to manage our growth effectively could harm our business and operating results.

As described elsewhere in this report, our plans call for a significant number of new restaurants. Our existing restaurant management systems, financial and management controls, information systems and personnel may be inadequate to support our expansion. Managing our growth effectively will require us to continue to enhance these systems, procedures and controls and to hire, train and retain general managers, crew and corporate staff. We also are continuing to attempt to improve our field management in an effort to develop additional top-performing general managers more quickly. We may not respond quickly enough to the changing demands that our expansion will impose on management, crew and existing infrastructure, and changes to our operating structure may result in increased costs or inefficiencies that we cannot currently anticipate. Changes as we grow may have a negative impact on the operation of our restaurants, and cost increases resulting from our inability to effectively manage our growth could adversely impact our profitability. We also place a lot of importance on our culture, which we believe has been an important contributor to our success. As we grow, we may have difficulty maintaining our culture or adapting it sufficiently to meet the needs of our operations. Our failure to foster and maintain our corporate culture could also harm our business and operating results.

Risks Related to Operating in the Restaurant Industry***Changes in food and supply costs could adversely affect our results of operations.***

Our profitability depends in part on our ability to anticipate and react to changes in food and supply costs. Like all restaurant companies, we are susceptible to increases in food costs as a result of factors beyond our control, such as general economic conditions, seasonal fluctuations, weather conditions, global demand, food safety concerns, generalized infectious diseases, fluctuations of the U.S. dollar, product recalls and government regulations. The cost of many basic foods for humans and animals, including corn, wheat, rice and cooking oils, has increased markedly in some years, resulting in upward pricing pressures on almost all of our raw ingredients including chicken, beef, tortillas and rice, increasing our food costs. Food prices for a number of our key

Table of Contents

ingredients escalated markedly at various points during 2013 and we expect that there will be additional pricing pressures on some of those ingredients, including avocados, beef, dairy and chicken during 2014. We could also be adversely impacted by price increases specific to meats raised in accordance with our sustainability and responsibility criteria or other food items we buy as part of our Food With Integrity focus, the markets for which are generally smaller and more concentrated than the markets for commodity food products. Weather related issues, such as freezes or drought, may also lead to temporary spikes in the prices of some ingredients such as produce or meats. For instance, two years of drought conditions in parts of the U.S. have resulted in significant increases in beef prices during late 2013 and early 2014. Increasing weather volatility or other long-term changes in global weather patterns, including any changes associated with global climate change, could have a significant impact on the price or availability of some of our ingredients. Any increase in the prices of the ingredients most critical to our menu, such as chicken, beef, cheese, avocados, beans, rice, tomatoes and pork, would adversely affect our operating results. Alternatively, in the event of cost increases with respect to one or more of our raw ingredients, we may choose to temporarily suspend serving menu items, such as guacamole or one or more of our salsas, rather than paying the increased cost for the ingredients. Any such changes to our available menu may negatively impact our restaurant traffic and comparable restaurant sales, and could also have an adverse impact on our brand.

Our business could be adversely affected by increased labor costs or difficulties in finding the right employees for our restaurants and the right field leaders.

Labor is a primary component of our operating costs, and we believe good managers and crew are a key part of our success. We devote significant resources to recruiting and training our general managers and crew. Increased labor costs due to factors like additional taxes or requirements to incur additional employee benefits costs, including the requirements of the Patient Protection and Affordable Care Act, or the Affordable Care Act, (discussed further under *Regulatory and Legal Risks The effect of recent changes to U.S. healthcare laws may increase our healthcare costs and negatively impact our financial results,*), as well as competition, increased minimum wage requirements, paid sick leave or vacation accrual mandates, and any changes in our restaurant staffing structure would adversely impact our operating costs. Our success also depends in part on the energy and skills of our employees and our ability to hire, motivate and keep qualified employees, especially general managers and crew members. As we grow, we believe we will need to promote or hire additional top-performing field leaders to ensure we hire and motivate good managers and crew, and it may be difficult to identify and keep those field leaders. Our failure to find and keep enough employees who are a good fit with our culture could delay planned restaurant openings, result in higher employee turnover or erode our employee and restaurant cultures, any of which could have a material adverse effect on our business and results of operations. Restaurant operators have traditionally experienced relatively high employee turnover rates. Any increase in our turnover rates for managers or crew could be costly and could negatively impact our operations.

Various states in which we operate are considering or have already adopted new immigration laws, and the U.S. Congress and Department of Homeland Security from time to time consider or implement changes to Federal immigration laws, regulations or enforcement programs as well. Changes in immigration or work authorization laws may increase our obligations for compliance and oversight, which could subject us to additional costs and make our hiring process more cumbersome, or reduce the availability of potential employees. Although we require all workers to provide us with government-specified documentation evidencing their employment eligibility, some of our employees may, without our knowledge, be unauthorized workers. We currently participate in the E-Verify program, an Internet-based, free program run by the U.S. government, to verify employment eligibility for all employees throughout our company. However, use of E-Verify does not guarantee that we will properly identify all applicants who are ineligible for employment. Unauthorized workers may subject us to fines or penalties, and we could experience adverse publicity that negatively impacts our brand and may make it more difficult to hire and keep qualified employees. For example, following an audit by the Department of Homeland Security of the work authorization documents of our restaurant employees in Minnesota during 2010, we lost approximately 450 employees, resulting in a temporary increase in labor costs and disruption of our operations, including slower throughput, as we trained new employees, as well as some degree of negative publicity. The resulting broad-based civil and criminal investigations by the U.S. Attorney for

Table of Contents

the District of Columbia and U.S. Securities and Exchange Commission of our compliance with work authorization requirements and related disclosures and statements are ongoing. See Note 9 Commitments and Contingencies in our consolidated financial statements included in Item 8.

Financial Statements and Supplementary Data. Termination of a significant number of employees in specific markets or across our company would disrupt our operations including slowing our throughput, and could also cause additional adverse publicity and temporary increases in our labor costs as we train new employees. We could also become subject to fines, penalties and other costs related to claims that we did not fully comply with all recordkeeping obligations of federal and state immigration compliance laws. Our financial performance may be materially harmed as a result of any of these factors.

Because we do not franchise, risks associated with hiring and maintaining a large workforce, including increases in wage rates or the cost of employee benefits, compliance with laws and regulations related to the hiring, payment and termination of employees, and employee-related litigation, may be more pronounced for us than for restaurant companies at which some or all of these risks are borne by franchisees or other operating contractors.

Instances of food-borne or localized illnesses could cause the temporary closure of some restaurants or result in negative publicity, thereby resulting in a decline in our sales, and could adversely affect the price and availability of the meat, produce or dairy we use to prepare our food.

Instances of food-borne illnesses, real or perceived, whether at our restaurants or those of our competitors, may subject us to liability to affected customers, and could result in negative publicity about us or the restaurant industry that adversely affects our sales. For instance, on a small number of occasions a Chipotle restaurant has been associated with customer illness, and on those occasions our sales have been adversely impacted, at times even in markets beyond those impacted by the illness. We may be at a higher risk for food-borne illness outbreaks than some competitors due to our use of fresh produce and meats rather than frozen, and our reliance on employees cooking with traditional methods rather than automation. If our customers become ill from food-borne or localized illnesses or if an illness is attributed to our food, even incorrectly, we could also be forced to temporarily close some restaurants. In addition, reports linking nationwide or regional outbreaks of food-borne illnesses have caused us to temporarily suspend serving some produce items in our foods or to otherwise alter our menu. Similarly, past outbreaks of E. coli relating to certain food items caused consumers to avoid certain products and restaurant chains, Asian and European countries have experienced outbreaks of avian flu, and incidents of mad cow disease have occurred in Canadian and U.S. cattle herds. These problems, other food-borne illnesses (such as hepatitis A or norovirus) and injuries caused by food tampering have had in the past, and could have in the future, an adverse affect on the price and availability of affected ingredients. A decrease in customer traffic as a result of these health concerns or negative publicity, or as a result of a change in our menu or dining experience or a temporary closure of any of our restaurants, would adversely impact our restaurant sales and profitability. Furthermore, if we react to these problems by changing our menu or other key aspects of the Chipotle experience, we may lose customers who do not accept those changes, and may not be able to attract enough new customers to generate sufficient revenue to make our restaurants profitable. Customers may also shift away from us if we choose to pass along to consumers any higher ingredient costs resulting from supply problems associated with outbreaks of food-borne illnesses, which would also have a negative impact on our sales and profitability. The risk of illnesses associated with our food might increase in connection with an expansion of our catering business or other situations in which our food is served in conditions we cannot control.

Competition could adversely affect us.

The fast-casual, quick-service and casual dining segments of the restaurant industry are highly competitive with respect to, among other things, taste, price, food quality and presentation, service, location and the ambience and condition of each restaurant. Our competition includes a variety of restaurants in each of these segments, including locally owned restaurants and national and regional chains. Many of our competitors offer dine-in, carry-out and delivery services. Many of our competitors have existed longer than we have and may have a more established market presence with substantially greater financial, marketing, personnel and other resources than

Table of Contents

we have. Among our main competitors are a number of multi-unit, multi-market Mexican food or burrito restaurant concepts, some of which are expanding nationally. Some of these competitors, and other fast casual concepts, have sought to duplicate various elements of our business operations, and more chains may copy us to varying degrees in the future. Additionally, our newer concepts, ShopHouse Southeast Asian Kitchen and Pizzeria Locale, operate in markets in which there are numerous competitors, including a number of large and well-known brands. A number of other companies or individuals in the restaurant industry have recently opened or invested in fast-casual pizza concepts. In addition, our strategy includes opening additional restaurants in existing markets, and as we do so sales may decline in our previously-opened restaurants as customers who frequent our established restaurants begin to visit a newly-opened restaurant instead.

Several of our competitors compete by offering menu items that are specifically identified as low in carbohydrates, better for customers or otherwise targeted at particular consumer preferences. Many of our competitors in the fast-casual and quick-service segments of the restaurant industry also emphasize lower-cost, value meal menu options, a strategy we do not currently pursue. Our sales may be adversely affected by these products and price competition.

Moreover, we may also compete with companies outside the fast casual and quick service and casual dining segments of the restaurant industry. For example, competitive pressures can come from deli sections and in-store cafés of several major grocery store chains, including those targeted at customers who want higher-quality food, as well as from convenience stores and casual dining outlets. These competitors may have, among other things, a more diverse menu, lower operating costs, better locations, better facilities, better management, more effective marketing and more efficient operations than we have.

Any of these competitive factors may adversely affect us and reduce our sales and profits.

Failure to receive frequent deliveries of higher-quality food ingredients and other supplies could harm our operations.

Our ability to maintain our menu depends in part on our ability to acquire ingredients that meet our specifications from reliable suppliers. Shortages or interruptions in the supply of ingredients caused by unanticipated demand, problems in production or distribution, food contamination, inclement weather, a supplier ceasing operations or other conditions could adversely affect the availability, quality and cost of our ingredients, which could harm our operations. We have almost no long-term contracts with suppliers, and we have relied largely on a third party distribution network with a limited number of distribution partners. If any of our distributors or suppliers performs inadequately, or our distribution or supply relationships are disrupted for any reason, our business, financial condition, results of operations or cash flows could be adversely affected. We currently depend on a limited number of suppliers for some of our key ingredients, including beef, pork, chicken, beans, rice, sour cream, cheese, and tortillas. Due to the unique nature of the products we receive from our Food With Integrity suppliers and as described in more detail below under *Risks Related to our Unique Business Strategy We may not persuade customers of the benefits of paying our prices for higher-quality food*, these suppliers could be more difficult to replace if we were no longer able to rely on them. If we have to seek new suppliers and service providers we may be subject to pricing or other terms less favorable than those we currently enjoy. If we cannot replace or engage distributors or suppliers who meet our specifications in a short period of time, that could increase our expenses and cause shortages of food and other items at our restaurants, which could cause a restaurant to remove items from its menu. If that were to happen and customers change their dining habits as a result, affected restaurants could experience significant reductions in sales during the shortage or thereafter. Our focus on a limited menu would make the consequences of a shortage of a key ingredient more severe.

Changes in customer tastes and preferences, spending patterns and demographic trends could cause sales to decline.

Changes in customer preferences, general economic conditions, discretionary spending priorities, demographic trends, traffic patterns and the type, number and location of competing restaurants affect the

Table of Contents

restaurant industry. Our sales could be impacted by changes in consumer preferences in response to dietary concerns, including preferences regarding items such as calories, sodium, carbohydrates or fat. These changes could result in consumers avoiding our menu items in favor of other foods, and our focus on a limited menu could make the consequences of a change in consumer preferences more severe than our competitors may face. Our success also depends to a significant extent on consumer confidence, which is influenced by general economic conditions and discretionary income levels. Our average restaurant sales may decline during economic downturns or periods of uncertainty, which can be caused by various factors such as high unemployment, increasing taxes, interest rates, or other changes in fiscal or monetary policy, high gasoline prices, declining home prices, tight credit markets or foreign political or economic unrest. Any material decline in consumer confidence or a decline in family food away from home spending could cause our sales, operating results, profits, business or financial condition to decline. If we fail to adapt to changes in customer preferences and trends, we may lose customers and our sales may deteriorate.

If we were to experience widespread difficulty renewing existing leases on favorable terms, our revenue or occupancy costs could be adversely affected.

We lease substantially all of the properties on which we operate restaurants, and some of our leases are due for renewal or extension options in the next several years. Some leases are subject to renewal at fair market value, which could involve substantial increases and a smaller number expire without any renewal option. While we currently expect to pursue the renewal of substantially all of our expiring restaurant leases, any difficulty renewing a significant number of such leases, or any substantial increase in rents associated with lease renewals, could adversely impact us. If we have to close any restaurants due to difficulties in renewing leases, we would lose revenue from the affected restaurants and may not be able to open suitable replacement restaurants. Substantial increases in rents associated with lease renewals would increase our occupancy costs, reducing our restaurant margins.

Regulatory and Legal Risks

Governmental regulation in one or more of the following areas may adversely affect our existing and future operations and results, including by harming our ability to open new restaurants or increasing our operating costs.

Employment and Immigration Regulations

We are subject to various federal and state laws governing our relationship with and other matters pertaining to our employees, including wage and hour laws, requirements to provide meal and rest periods or other benefits, family leave mandates, requirements regarding working conditions and accommodations to certain employees, citizenship or work authorization and related requirements, insurance and workers compensation rules and anti-discrimination laws. Complying with these rules subjects us to substantial expense and can be cumbersome, and can also expose us to liabilities from claims for non-compliance. For example, a number of lawsuits have been filed against us alleging violations of federal and state laws regarding employee wages and payment of overtime, meal and rest breaks, employee record-keeping and related practices with respect to our employees. We could suffer losses from, and we incur legal costs to defend, these or similar cases, and the amount of such losses or costs could be significant. In addition, several states and localities in which we operate and the federal government have from time to time enacted minimum wage increases, paid sick leave and mandatory vacation accruals, and similar requirements and these changes could increase our labor costs. In addition, see *The effect of recent changes to U.S. healthcare laws may increase our healthcare costs and negatively impact our financial results* below for a discussion of risks related to recent changes in U.S. healthcare laws.

We also are audited from time to time for compliance with citizenship or work authorization requirements as well, and recent audit activity and federal criminal and civil investigations in this area are described in more detail above under *Risks Related to Operating in the Restaurant Industry*. Our business could be adversely affected by increased labor costs or difficulties in finding the right employees for our restaurants and the right field leaders, as well as in Note 9 Commitments and Contingencies in our consolidated financial statements

Table of Contents

included in Item 8. Financial Statements and Supplementary Data. Unauthorized workers may subject us to fines or penalties, and if any of our workers are found to be unauthorized our business may be disrupted as we try to replace lost workers with additional qualified employees. On the other hand, in the event we wrongfully reject work authorization documents, or if our compliance procedures are found to have a disparate impact on a protected class such as a racial minority or based on the citizenship status of applicants, we could be found to be in violation of anti-discrimination laws. We could experience adverse publicity arising from enforcement activity related to work authorization compliance, anti-discrimination compliance, or both, that negatively impacts our brand and may make it more difficult to hire and keep qualified employees. Moreover, in addition to the criminal and civil investigations mentioned above under *Risks Related to Operating in the Restaurant Industry Our business could be adversely affected by increased labor costs or difficulties in finding the right employees for our restaurants and the right field leaders*, the office of the U.S. Attorney for the District of Columbia and the U.S. Securities and Exchange Commission have informed us that they are conducting parallel investigations into possible criminal and civil securities law violations relating to our employee work authorization compliance and related disclosures and statements as well. All of the foregoing investigations will continue to be expensive and distracting, and could subject us to fines, reputational damage, and other liabilities that could be significant.

Additionally, while we do not currently have any unionized employees, union organizers have engaged in efforts to organize employees of other restaurant companies. If a significant portion of our employees were to become union organized, our labor costs could increase and our efforts to maintain a culture appealing only to top performing employees could be impaired. Potential changes in labor laws, including the possible passage of legislation designed to make it easier for employees to unionize, could increase the likelihood of some or all of our employees being subjected to greater organized labor influence, and could have an adverse effect on our business and financial results by imposing requirements that could potentially increase our costs, reduce our flexibility and impact our employee culture.

Americans with Disabilities Act and Similar State Laws

We are subject to the U.S. Americans with Disabilities Act, or ADA, and similar state laws that give civil rights protections to individuals with disabilities in the context of employment, public accommodations and other areas. We have incurred substantial legal fees in connection with ADA-related complaints in the past, and we may in the future have to modify restaurants, for example by adding access ramps or redesigning certain architectural features, to provide service to or make reasonable accommodations for disabled persons under these laws. The expenses associated with these modifications, or any damages, legal fees and costs associated with litigating or resolving claims under the ADA or similar state laws, could be material.

Nutrition and Food Regulation

In recent years, there has been an increased legislative, regulatory and consumer focus at the federal, state and municipal levels on the food industry including nutrition and advertising practices. Restaurants operating in the quick-service and fast-casual segments have been a particular focus. For example, the State of California, New York City and a number of other jurisdictions around the U.S. have adopted regulations requiring that chain restaurants include calorie information on their menu boards or make other nutritional information available. The U.S. health care reform law included nation-wide menu labeling and nutrition disclosure requirements as well, and our restaurants will be covered by these national requirements when they go into effect, which may be as early as 2014. Initiatives in the area of nutrition disclosure or advertising, such as requirements to provide information about the nutritional content of our food, may increase our expenses or slow customers as they move through the line, decreasing our throughput. These initiatives may also change customer buying habits in a way that adversely impacts our sales.

Local Licensure, Zoning and Other Regulation

Each of our restaurants is also subject to state and local licensing and regulation by health, alcoholic beverage, sanitation, food and workplace safety and other agencies. We may experience material difficulties or failures in obtaining the necessary licenses or approvals for new restaurants, which could delay planned

Table of Contents

restaurant openings. In addition, stringent and varied requirements of local regulators with respect to zoning, land use and environmental factors could delay or prevent development of new restaurants in particular locations.

Environmental Laws

We are subject to federal, state and local environmental laws and regulations concerning the discharge, storage, handling, release and disposal of hazardous or toxic substances, as well as local ordinances restricting the types of packaging we can use in our restaurants. We have not conducted a comprehensive environmental review of our properties or operations. We have, however, conducted investigations of some of our properties and identified contamination caused by third-party operations. We believe any such contamination has been or should be addressed by the third party. If the relevant third party does not address or has not addressed the identified contamination properly or completely, then under certain environmental laws, we could be held liable as an owner or operator to address any remaining contamination, sometimes without regard to whether we knew of, or were responsible for, the release or presence of hazardous or toxic substances. Any such liability could be material. Further, we may not have identified all of the potential environmental liabilities at our properties, and any such liabilities could have a material adverse effect on our operations or results of operations. We also cannot predict what environmental laws will be enacted in the future, how existing or future environmental laws will be administered or interpreted, or the amount of future expenditures that we may need to make to comply with, or to satisfy claims relating to, environmental laws.

Other Aspects of Regulatory Risk

From time to time we are the target of litigation in connection with various laws and regulations that cover our business. Much of this litigation occurs in California even though currently only about 18% of our restaurants are located there. As we continue to expand in California, or if we are not able to effectively manage the increased litigation risks and expenses we have experienced in California, our business may be adversely impacted to a greater extent than if we did not operate in, or minimized our operations in, California.

Because we do not franchise, the costs of compliance and other risks associated with government regulation of our business, as described above, may be more pronounced for us than for restaurant companies at which some or all of these risks are borne by franchisees or other operating contractors.

The effect of recent changes to U.S. healthcare laws may increase our healthcare costs and negatively impact our financial results.

We offer eligible full-time and part-time U.S. employees the opportunity to enroll in healthcare coverage subsidized by us. For various reasons, many of our eligible employees currently choose not to participate in our healthcare plans. However, under the comprehensive U.S. health care reform law enacted in 2010, the Affordable Care Act, changes that become effective in 2014, and especially the employer mandate and employer penalties that are scheduled to become effective in 2015, may increase our labor costs significantly. Changes in the law for 2014, including the imposition of a penalty on individuals who do not obtain healthcare coverage, may result in employees who are currently eligible but elect not to participate in our healthcare plans now finding it more advantageous to do so, which may increase our healthcare costs. In 2015, we will either adopt a qualifying plan under the Affordable Care Act for our full-time hourly employees, which will likely increase our healthcare expenses significantly, or we will be subject to employer penalties, which could also significantly increase our labor costs. It is also possible that making changes or failing to make changes in the healthcare plans we offer will make us less attractive to our current or potential employees. And in any event, implementing the requirements of the Affordable Care Act is likely to impose some additional administrative costs on us. The costs and other effects of these new healthcare requirements cannot be determined with certainty, but they may have a material adverse effect on our financial and operating results.

We could be party to litigation that could adversely affect us by distracting management, increasing our expenses or subjecting us to material money damages and other remedies.

We are subject to numerous claims alleging violations of federal and state laws regarding workplace and employment matters, including wages, work hours, overtime, vacation and family leave, discrimination,

Table of Contents

wrongful termination, and similar matters, and we could become subject to class action or other lawsuits related to these or different matters in the future. Our customers also occasionally file complaints or lawsuits against us alleging that we are responsible for some illness or injury they suffered at or after a visit to our restaurants, or that we have problems with food quality, operations or our food related disclosure or advertising practices. See *Governmental regulation in one or more of the following areas may adversely affect our existing and future operations and results, including by harming our ability to open new restaurants or increasing our operating costs* above, for additional discussion of these types of claims. From time to time, we also face claims alleging that technology we use in our business infringes patents held by third parties. In addition, the restaurant industry has been subject to a growing number of claims based on the nutritional content of food products sold and disclosure and advertising practices. We have been subject to a number of these actions and may be subject to additional actions of this type in the future. We are also undergoing government investigations as described elsewhere in this report, including in Note 9 Commitments and Contingencies in our consolidated financial statements included in Item 8. Financial Statements and Supplementary Data.

We believe the number of many of the foregoing types of claims has increased as our business has grown and we have become more visible to potential plaintiffs and their lawyers, particularly in California. Regardless of whether any claims against us are valid, or whether we are ultimately held liable for such claims, they may be expensive to defend and may divert time and money away from our operations and hurt our performance. A significant judgment for any claims against us could materially and adversely affect our financial condition or results of operations. Any adverse publicity resulting from these allegations, whether directed at us or at fast casual or quick-service restaurants generally, may also materially and adversely affect our reputation or prospects, which in turn could adversely affect our results.

Risks Related to our Unique Business Strategy

We may not persuade customers of the benefits of paying our prices for higher-quality food.

Our success depends in large part on our ability to persuade customers that food made with higher-quality ingredients is worth the prices they will pay at our restaurants relative to prices offered by some of our competitors, particularly those in the quick-service restaurant segment. We may not successfully educate customers about the quality of our food, and customers may not care even if they do understand our approach. That could require us to change our pricing, advertising or promotional strategies, which could materially and adversely affect our results of operations or the brand identity that we have tried to create. Consumers may also be more price-sensitive during periods of economic difficulty or uncertainty, and we experienced some decrease in traffic during late 2008 and throughout 2009 that we attribute in part to menu price increases. Recent reports have indicated continued consumer uncertainty that may persist during 2014, so our ability to increase menu prices or customer visits may be significantly hampered for the foreseeable future. We have announced that we are likely to increase menu prices during 2014, and if we do so it may adversely impact our customer traffic.

Our Food With Integrity philosophy subjects us to risks.

The principle of Food With Integrity constitutes a significant part of our business strategy. We use a substantial amount of ingredients grown or raised with an emphasis on practices we believe to be more sustainable or responsible than some conventional practices, and try to make food as fresh as we can. We do, however, face challenges associated with pursuing Food With Integrity. There are higher costs and other risks associated with purchasing ingredients grown or raised with an emphasis on quality, sustainability and other responsible practices. Growth rate and weight gain can be lower for chickens, cattle and pigs that are not fed sub-therapeutic antibiotics and for cattle that are not given growth hormones. Crops grown organically or using other responsible practices can take longer to grow and crop yields can be lower. It can take longer to identify and secure relationships with suppliers that are able to meet our criteria for meat, dairy and produce ingredients. Given the costs associated with what we believe are more responsible farming practices, and in some years due to decreased demand as a result of the weak economic environment, many large suppliers have not found it economical to pursue business in this area. Although all of our restaurants generally serve meat from animals raised in accordance with criteria we have established in an effort to improve sustainability and promote animal

Table of Contents

welfare, we may experience shortages of meat, particularly chicken or steak, meeting these criteria due to suppliers suspending production, market conditions, or other forces beyond our control. A few of our markets have reverted to temporarily serving conventionally raised beef or chicken due to supply shortages, including ongoing shortages of beef meeting our protocols during 2013 and early 2014. Furthermore, as we grow, the ability of our suppliers to expand output or otherwise increase their supplies to meet our needs may be constrained. Moreover, we have made a significant commitment to serving local or organic produce when seasonally available, and a small portion of our restaurants also serves produce purchased from farmers markets seasonally as well. These produce initiatives may make it more difficult to keep quality consistent, and present additional risk of food-borne illnesses given the greater number of suppliers involved in such a system and the difficulty of imposing our quality assurance programs on all such suppliers. Quality variations and food-borne illness concerns could adversely impact public perceptions of Food With Integrity or our brand generally.

If as a result of any of these factors we are unable to obtain a sufficient and consistent supply of these ingredients on a cost-effective basis, our food costs could increase, adversely impacting our operating margins. These factors could also cause us difficulties in aligning our brand with Food With Integrity, which could make us less popular among our customers and cause sales to decline. Our commitment to Food With Integrity may also leave us open to actions against us or criticism from special interest groups whose ideas regarding food issues differ from ours or who believe we should pursue different or additional goals with our Food With Integrity approach. Any adverse publicity that results from such criticism could damage our brand and adversely impact customer traffic at our restaurants. We may also face adverse publicity or liability for false advertising claims if suppliers do not adhere to all of the elements of our Food With Integrity programs, such as responsible meat protocols, requirements for organic or sustainable growing methods, and similar criteria on which we base our purchasing decisions. If any such supplier failures occur and are publicized, our reputation would be harmed and our sales may be adversely impacted.

Additionally, in response to increasing customer awareness and demand, some competitors have also begun to advertise their use of meats raised without the use of antibiotics or growth hormones, dairy products from cows not treated with rBGH, and other ingredients similar to those we seek as part of our Food With Integrity philosophy. If competitors become known for using these types of higher-quality or more sustainable ingredients, it could further limit our supply of these ingredients, and may make it more difficult for us to differentiate Chipotle and our restaurants, which could adversely impact our operating results.

Our success may depend on the continued service and availability of key personnel.

Our Chairman and co-Chief Executive Officer Steve Ells founded our company, has been the principal architect of our business strategy, and has led our growth from a single restaurant in 1993 to over 1,500 restaurants today. Monty Moran, our co-Chief Executive Officer, and Jack Hartung, our Chief Financial Officer, have also served with us for several years and much of our growth has occurred under their direction as well. We believe our executive officers, each of whom is an at-will employee without any employment contract, have created an employee culture, food culture and business strategy at our company that has been critical to our success and that may be difficult to replicate under another management team. We also believe that it may be difficult to locate and retain executive officers who are able to grasp and implement our unique strategic vision. If our company culture were to deteriorate following a change in leadership, or if a new management team were to be unsuccessful in executing our strategy or were to change important elements of our current strategy, our growth prospects or future operating results may be adversely impacted.

Our marketing and advertising strategies may not be successful, which could adversely impact our business.

We have developed a marketing and advertising strategy that we believe is unique in the restaurant industry. We have not generally advertised on television and engage in very limited price or value-based promotions. Instead we invest in marketing and advertising strategies that we believe will increase customers' connection with our brand. If these marketing and advertising investments do not drive increased restaurant sales, the

Table of Contents

expense associated with these programs will adversely impact our financial results, and we may not generate the levels of comparable restaurant sales we expect. In addition, our marketing has increasingly incorporated elements intended to encourage customers to question sources or production methods commonly used to produce food. These elements of our marketing could alienate food suppliers and other food industry groups and may potentially lead to an increased risk of disputes or litigation if suppliers or other constituencies believe our marketing is unfair or misleading. Increased costs in connection with any such issues, or any deterioration in our relationships with existing suppliers, could adversely impact us or our reputation. Furthermore, if these messages do not resonate with our customers or potential customers, the value of our brands may be eroded.

We have also implemented strategies such as remote ordering and catering options in an effort to increase overall sales. Our catering program, in particular, is new and untested and may not increase our sales to the degree we expect, or at all. Catering and other out-of-restaurant sales options also introduce new operating procedures to our restaurants and we may not successfully execute these procedures, which could adversely impact the customer experience in our restaurants and thereby harm our sales and customer perception of our brand.

General Business Risks

We may be harmed by security risks we face in connection with our electronic processing and transmission of confidential customer and employee information.

We accept electronic payment cards for payment in our restaurants. During 2013 approximately 64% of our sales were attributable to credit and debit card transactions, and credit and debit card usage could continue to increase. A number of retailers have experienced actual or potential security breaches in which credit and debit card information may have been stolen, including a number of highly publicized incidents with well-known retailers in late 2013 and early 2014. In August 2004, the merchant bank that processed our credit and debit card transactions informed us that we may have been the victim of a possible theft of card data. As a result, we recorded losses and related expenses totaling \$4.3 million from 2004 through 2006.

We may in the future become subject to additional claims for purportedly fraudulent transactions arising out of the actual or alleged theft of credit or debit card information, and we may also be subject to lawsuits or other proceedings in the future relating to these types of incidents. Proceedings related to theft of credit or debit card information may be brought by payment card providers, banks and credit unions that issue cards, cardholders (either individually or as part of a class action lawsuit) and federal and state regulators. Any such proceedings could distract our management from running our business and cause us to incur significant unplanned losses and expenses. Consumer perception of our brand could also be negatively affected by these events, which could further adversely affect our results and prospects.

We also are required to collect and maintain personal information about our employees, and we collect information about customers as part of some of our marketing programs as well. The collection and use of such information is regulated at the federal and state levels, and the regulatory environment related to information security and privacy is increasingly demanding. At the same time, we are relying increasingly on cloud computing and other technologies that result in third parties holding significant amounts of customer or employee information on our behalf. If the security and information systems of ours or of outsourced third party providers we use to store or process such information are compromised or if we or such third parties otherwise fail to comply with these laws and regulations, we could face litigation and the imposition of penalties, which could adversely affect our financial performance. Our reputation as a brand or as an employer could also be adversely affected, which could impair our sales or ability to attract and keep qualified employees.

Our insurance coverage and self-insurance reserves may not cover future claims.

We maintain various insurance policies for employee health, worker's compensation, general liability, property damage and auto liability. We are self-insured for our employee health plans but have third party insurance coverage to limit exposure for both individual and aggregate claim costs. We are also responsible for losses up to a certain limit for worker's compensation, general liability, property damage and auto liability insurance.

Table of Contents

For policies under which we are responsible for losses, we record a liability that represents our estimated cost of claims incurred and unpaid as of the balance sheet date. Our estimated liability is not discounted and is based on a number of assumptions and factors, including historical trends, actuarial assumptions and economic conditions, and is closely monitored and adjusted when warranted by changing circumstances. Our history of claims experience is short and our significant growth rate could affect the accuracy of estimates based on historical experience. If a greater amount of claims occurs compared to what we estimated, or if medical costs increase beyond what we expected, our accrued liabilities might not be sufficient and we may be required to record additional expense. Unanticipated changes may also produce materially different amounts of expense than reported under these programs, which could adversely impact our results of operations.

Negative publicity relating to our restaurants or our company could adversely impact our reputation, which may significantly harm us.

We depend in part on customers' perception of and connection to our brand. We may experience negative publicity from time to time relating to food quality, customer complaints, restaurant facilities, advertising and other business practices, litigation alleging illness or injury, regulatory issues, our suppliers' potential failure to adhere to elements of our Food With Integrity protocols, other issues regarding the integrity of our suppliers' food processing, employee relationships, or other matters, regardless of whether the allegations are valid or whether we are held to be responsible. The negative impact of adverse publicity relating to one or more restaurants or any of the foregoing topics may extend far beyond the restaurant(s) involved and affect many more, or even all, of our restaurants. The considerable expansion in the use of social media over recent years can further amplify any negative publicity that may be generated. A similar risk exists with respect to unrelated food service businesses, if consumers associate those businesses with our own operations.

Negative publicity may adversely impact customers' perception of us, which could adversely impact our sales. If the impact of any such negative publicity is particularly long-lasting, the value of our brand may suffer and our ability to grow could be diminished. Additionally, negative publicity about our employment practices may affect our reputation among employees and potential employees, which could make it more difficult for us to attract and retain top-performing employees. That could adversely impact the quality of the customer experience we can offer and our operations generally, and may increase our labor costs as well.

We may not be able to adequately protect our intellectual property, which could harm the value of our brands and adversely affect our business.

Our ability to successfully implement our business plan depends in part on our ability to further build brand recognition using our trademarks, service marks, trade dress and other proprietary intellectual property, including our name and logos, our Food With Integrity strategy and the unique ambience of our restaurants. If our efforts to protect our intellectual property are inadequate, or if any third party misappropriates or infringes on our intellectual property, either in print or on the internet, the value of our brands may be harmed, which could have a material adverse effect on our business and might prevent our brands from achieving or maintaining market acceptance. We are aware of restaurants in foreign jurisdictions using menu items, logos and other branding that we believe are based on our intellectual property, and our ability to halt these restaurants from using these elements may be limited in jurisdictions in which we are not operating. This could have an adverse impact on our ability to successfully expand into other jurisdictions in the future. We may also encounter claims from prior users of similar intellectual property in areas where we operate or intend to conduct operations. This could harm our image, brand or competitive position and cause us to incur significant penalties and costs.

Our quarterly results may fluctuate significantly and could fall below the expectations of securities analysts and investors due to various factors.

Our quarterly results may fluctuate significantly and could fail to meet the expectations of securities analysts and investors because of various factors, including:

changes in comparable restaurant sales and customer visits, including as a result of changes in consumer confidence;

our ability to raise menu prices without adversely impacting customer traffic;

Table of Contents

changes in consumer preferences and discretionary spending;

labor availability and wages of restaurant management and crew, as well as temporary fluctuations in labor costs as a result of large-scale changes in workforce;

fluctuations in supply costs, particularly for our most significant food items;

the timing of new restaurant openings and related revenues and expenses;

operating costs at newly opened restaurants, which are often materially greater during the first several months of operation;

the impact of inclement weather, natural disasters and other calamities, such as freezes that have impacted produce crops and droughts that have impacted livestock and the supply of certain meats;

variations in general economic conditions, including the impact of declining interest rates on our interest income;

negative publicity about the ingredients we use or the occurrence of food-borne illnesses or other problems at our restaurants;

increases in infrastructure costs;

litigation, settlement costs and related legal expense;

tax expenses, impairment charges and other non-operating costs; and

potential distraction or unusual expenses associated with our expansion into international markets or initiatives to expand new concepts.

Seasonal factors also cause our results to fluctuate from quarter to quarter. Our restaurant sales are typically lower during the winter months and the holiday season and during periods of inclement weather (because fewer people are eating out) and higher during the spring, summer and fall months (for the opposite reason). Our restaurant sales will also vary as a result of the number of trading days that is, the number of days in a quarter when a restaurant is open.

As a result of these factors, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year. Average restaurant sales or comparable restaurant sales in any particular future period may decrease. In the future, operating results may fall below the expectations of securities analysts and investors, which could cause our stock price to fall. We believe the market price of our common stock, which has generally traded at a higher price-earnings ratio than stocks of most or all of our peer companies, reflects high market expectations for our future operating results. The trading market for our common stock has been volatile at times as well. As a result, if we fail to meet market expectations for our operating results in the future, any resulting decline in the price of our common stock could be significant.

Our anti-takeover provisions may delay or prevent a change in control of us, which could adversely affect the price of our common stock.

Certain provisions in our corporate documents and Delaware law may delay or prevent a change in control of us, which could adversely affect the price of our common stock. Our amended and restated certificate of incorporation and amended and restated bylaws contain some provisions

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

that may make the acquisition of control of us without the approval of our board of directors more difficult, including provisions relating to the nomination, election and removal of directors, the structure of the board of directors and limitations on actions by our shareholders. In addition, Delaware law also imposes some restrictions on mergers and other business combinations between us and any holder of 15% or more of our outstanding common stock. Any of these provisions may discourage a potential acquirer from proposing or completing a transaction that may have otherwise presented a premium to our shareholders.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents**ITEM 2. PROPERTIES**

As of December 31, 2013, there were 1,595 Chipotle and other concept restaurants in operation. The table below sets forth the locations (by state or country) of all restaurants in operation.

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

We categorize our restaurants as either end-caps (at the end of a line of retail outlets), in-lines (in a line of retail outlets), free-standing or other. Of our restaurants in operation as of December 31, 2013, we had 970 end-cap locations, 264 in-line locations, 283 free-standing units, and 78 other. The average restaurant size is about 2,580 square feet and seats about 56 people. Many of our restaurants also feature outdoor patio space.

Table of Contents

Our main office is located at 1401 Wynkoop Street, Suite 500, Denver, Colorado, 80202 and our telephone number is (303) 595-4000. We lease our main office and substantially all of the properties on which we operate restaurants. For additional information regarding the lease terms and provisions, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations *Contractual Obligations*, as well as Note 7 Leases in our consolidated financial statements included in Item 8. Financial Statements and Supplementary Data.

We own sixteen properties and operate restaurants on all of them.

ITEM 3. LEGAL PROCEEDINGS

For information regarding legal proceedings, see Note 9 Commitments and Contingencies in our consolidated financial statements included in Item 8. Financial Statements and Supplementary Data.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The following table describes the per share range of high and low sales prices for shares of our common stock for the quarterly periods indicated, as reported by the New York Stock Exchange (NYSE). Our common stock trades on the NYSE under the symbol CMG.

	High	Low
2012		
First Quarter	\$ 426.57	\$ 336.29
Second Quarter	\$ 442.40	\$ 370.19
Third Quarter	\$ 404.59	\$ 277.26
Fourth Quarter	\$ 322.92	\$ 233.82
	High	Low
2013		
First Quarter	\$ 334.89	\$ 266.02
Second Quarter	\$ 379.15	\$ 316.87
Third Quarter	\$ 429.78	\$ 362.30
Fourth Quarter	\$ 550.28	\$ 420.20

As of January 30, 2014, there were approximately 1,100 holders of our common stock, as determined by counting our record holders and the number of participants reflected in a security position listing provided to us by the Depository Trust Company. Because such DTC participants are brokers and other institutions holding shares of our common stock on behalf of their customers, the actual number of unique shareholders represented by these record holders is not known.

Purchases of Equity Securities by the Issuer

The table below reflects shares of common stock we repurchased during the fourth quarter of 2013.

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
October	65,691 ⁽²⁾	\$ 503.23	9,853	\$ 98,391,729
<i>Purchased 10/1 through 10/31</i>				
November	7,461	\$ 535.45	7,461	\$ 94,396,728
<i>Purchased 11/1 through 11/30</i>				
December	8,012	\$ 523.56	8,012	\$ 90,202,004
<i>Purchased 12/1 through 12/31</i>				
Total	81,164	\$ 508.19	25,326	\$ 90,202,004

- (1) Shares were repurchased pursuant to repurchase programs announced on November 20, 2012 and February 5, 2013. Repurchases under each program were and are limited to \$100 million in total repurchase price, and there is no expiration date. Authorization of any ongoing repurchase program may be modified, suspended, or discontinued at any time.
- (2) Includes 55,838 shares of common stock that were surrendered by participants under the Amended and Restated Chipotle Mexican Grill, Inc. 2006 Stock Incentive Plan as payment of statutory minimum tax withholding on the vesting of performance shares and payout of the awards. Shares surrendered by the participants pursuant to the terms of that plan and the applicable award agreements are deemed

repurchased by us, but are not part of publicly announced share repurchase programs.

Table of Contents

Dividend Policy

We are not required to pay any dividends and have not declared or paid any cash dividends on our common stock. We intend to continue to retain earnings for use in the operation and expansion of our business and therefore do not anticipate paying any cash dividends on our common stock in the foreseeable future.

COMPARISON OF CUMULATIVE TOTAL RETURN

The following graph compares the cumulative annual stockholders return on our common stock from December 31, 2008 through December 31, 2013 to that of the total return index for the S&P 500 and the S&P 500 Restaurants Index assuming an investment of \$100 on December 31, 2008. In calculating total annual stockholder return, reinvestment of dividends, if any, is assumed. The indices are included for comparative purposes only. They do not necessarily reflect management's opinion that such indices are an appropriate measure of the relative performance of our common stock. This graph is not soliciting material, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference in any of our filings under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, whether made before or after the date hereof and irrespective of any general incorporation language in any such filing.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion together with Item 6. Selected Financial Data and our consolidated financial statements and related notes included in Item 8. Financial Statements and Supplementary Data. The discussion contains forward-looking statements involving risks, uncertainties and assumptions that could cause our results to differ materially from expectations. Factors that might cause such differences include those described in Item 1A. Risk Factors and elsewhere in this report.

Overview

Chipotle operates fresh Mexican food restaurants serving burritos, tacos, burrito bowls (a burrito without the tortilla) and salads. We began with a simple philosophy: demonstrate that food served fast doesn't have to be a traditional fast-food experience. We do this by avoiding a formulaic approach when creating our restaurant experience, looking to fine dining restaurants for inspiration. We use high-quality raw ingredients, classic cooking methods and distinctive interior design, and have friendly people to take care of each customer features that are more frequently found in the world of fine dining. Our approach is also guided by our belief in an idea we call Food With Integrity. Our objective is to find the highest quality ingredients we can ingredients that are grown or raised with respect for the environment, animals, and people who grow or raise the food. A similarly focused people culture, with an emphasis on identifying and empowering top performing employees, enables us to develop future leaders from within.

2013 Highlights and Trends

Restaurant Development. As of December 31, 2013, we had 1,595 restaurants in operation, including 1,572 Chipotle restaurants throughout the United States, with an additional seven in Canada, six in England, two in France, and one in Germany. Our restaurants include six ShopHouse Southeast Asian Kitchen restaurants, serving Asian-inspired cuisine, and we are an investor in a consolidated entity that owns and operates one Pizzeria Locale, a fast casual pizza concept. New restaurants have contributed substantially to our restaurant sales growth and we opened 185 restaurants in 2013, and expect to open between 180 and 195 restaurants in 2014, including a small number of ShopHouse and/or Pizzeria Locale restaurants.

Sales Growth. Average restaurant sales were \$2.169 million as of December 31, 2013, increasing from \$2.113 million as of December 31, 2012. We define average restaurant sales as the average trailing 12-month sales for restaurants in operation for at least 12 full calendar months. Our comparable restaurant sales increases were 5.6% in 2013. Comparable restaurant sales represent the change in period-over-period sales for restaurants beginning in their 13th full calendar month of operation. Comparable restaurant sales increases in 2013 were driven primarily by an increase in customer visits. We expect 2014 comparable restaurant sales to be in the low to mid-single digits assuming we do not increase menu prices. Based on continued food cost inflation, we are likely to increase menu prices at some point during 2014, most likely the second half of the year.

During 2013, we launched our catering service in Chipotle restaurants throughout the U.S, except New York City where we expect to introduce catering later in 2014. Catering represented approximately 1% of sales in markets in which catering was offered during the fourth quarter.

Food With Integrity. In all of our restaurants, we endeavor to serve only meats that were raised without the use of subtherapeutic antibiotics or added hormones, and in accordance with criteria we've established in an effort to improve sustainability and promote animal welfare. We brand these meats as Responsibly Raised™. In addition, a portion of some of the produce items we serve is organically grown, and/or sourced locally when in season (by which we mean within 350 miles of the restaurant where it is served), and a portion of the beans we serve is organically grown and a portion is grown using conservation tillage methods that improve soil conditions, reduce erosion and help preserve the environment in which they are grown. The sour cream and cheese we buy is made with milk that comes from cows that are not given rBGH. Milk used to make much of our cheese and our sour cream is sourced from pasture-based dairies that provide an even higher standard of animal welfare by providing outdoor access for their cows. Further, we disclose on our website which ingredients

Table of Contents

contain genetically modified organisms, or GMOs, and we are working to replace ingredients containing GMOs in our food (not including beverages) with non-GMO ingredients. While the meat and poultry we serve is not genetically modified, the animals are likely fed a diet containing GMOs. We will continue to search for quality ingredients that not only taste delicious, but also benefit local farmers or the environment, or otherwise benefit or improve the sustainability of our supply chain.

One of our primary goals is for all of our restaurants to continue serving meats that are raised to meet our standards, but we have and will continue to face challenges in doing so. Some of our restaurants served conventionally raised beef and chicken for periods during 2013 and some are continuing to serve conventionally raised beef, due to supply constraints for our Responsibly Raised meats. More of our restaurants may periodically serve conventionally raised meats in the future due to supply constraints. When we become aware that one or more of our restaurants will serve conventionally raised meat, we clearly and specifically disclose this temporary change on signage in each affected restaurant, so that customers can avoid those meats if they choose to do so.

Our food costs increased as a percentage of revenue in 2013 as a result of inflationary pressures on many of our ingredients, particularly salsa ingredients, as well as dairy, cooking oils, and chicken. We expect that food cost inflation will continue into 2014.

Stock Repurchases. In accordance with stock repurchases authorized by our Board of Directors we purchased shares of our common stock with an aggregate total repurchase price of \$110.0 million during 2013. As of December 31, 2013, \$90.2 million was available to be repurchased under the current repurchase authorization announced on February 5, 2013. We have entered into an agreement with a broker under SEC rule 10b5-1(c), authorizing the broker to make open market purchases of common stock from time to time, subject to market conditions. The existing repurchase agreement and the Board's authorization of the repurchases may be modified, suspended, or discontinued at any time.

On November 20, 2012, we entered into a privately negotiated accelerated share repurchase transaction (ASR) to repurchase \$25 million of our common stock. We advanced the \$25 million upon commencement of the transaction and received 65,187 shares, which represented 70% of the total number of shares to be repurchased calculated using the closing price on the commencement date. The agreement was settled in February 2013, and we received an additional 21,860 shares, resulting in a weighted-average share price per share of \$287.20 for the ASR.

Restaurant Openings, Relocations and Closures

The following table details restaurant unit data for the years indicated.

		For the years ended	
		December 31	
	2013	2012	2011
Beginning of year	1,410	1,230	1,084
Openings	185	183	150
Relocations		(3)	(4)
Total restaurants at end of year	1,595	1,410	1,230

Results of Operations

Our results of operations as a percentage of revenue and period-over-period variances are discussed in the following section. As our business grows, as we open more restaurants and hire more employees, our restaurant operating costs and depreciation and amortization increase.

Table of Contents**Revenue**

	For the years ended December 31			% increase	% increase
	2013	2012	2011	2013 over 2012	2012 over 2011
	(dollars in millions)				
Revenue	\$ 3,214.6	\$ 2,731.2	\$ 2,269.5	17.7%	20.3%
Average restaurant sales	\$ 2.169	\$ 2.113	\$ 2.103	2.7%	0.5%
Comparable restaurant sales increases	5.6%	7.1%	11.2%		
Number of restaurants as of the end of the period	1,595	1,410	1,230	13.1%	14.6%
Number of restaurants opened in the period, net of relocations	185	180	146		

The significant factors contributing to our increases in sales were new restaurant openings and comparable restaurant sales increases. Restaurant sales from restaurants not yet in the comparable base contributed \$333.9 million of the increase in sales in 2013, of which \$156.6 million was attributable to restaurants opened during the year. In 2012, restaurant sales from restaurants not yet in the comparable restaurant base contributed \$304.7 million of the increase in sales, of which \$134.8 million was attributable to restaurants opened in 2012.

Comparable restaurant sales increases contributed \$150.3 million and \$156.4 million of the increase in restaurant sales in 2013 and 2012, respectively. Comparable restaurant sales growth in 2013 was due primarily to increases in customer visits, and comparable restaurant sales growth in 2012 was due primarily to increases in customer visits, as well as the impact of menu price increases.

Food, Beverage and Packaging Costs

	For the years ended December 31			% increase	% increase
	2013	2012	2011	2013 over 2012	2012 over 2011
	(dollars in millions)				
Food, beverage and packaging	\$ 1,073.5	\$ 891.0	\$ 738.7	20.5%	20.6%
As a percentage of revenue	33.4%	32.6%	32.5%		

Food, beverage and packaging costs increased as a percentage of revenue in 2013 due to inflation on many food items, particularly salsa ingredients, as well as dairy, cooking oils, and chicken. We expect that food cost inflation will continue into 2014.

Food, beverage and packaging costs increased as a percentage of revenue in 2012 due to inflation on many food items, primarily beef, chicken, and rice, and initiatives to improve the taste and quality of our food. The increase was partially offset by the impact of menu price increases, and relief in avocado prices.

Labor Costs

	For the years ended December 31			% increase	% increase
	2013	2012	2011	2013 over 2012	2012 over 2011
	(dollars in millions)				
Labor costs	\$ 739.8	\$ 641.8	\$ 543.1	15.3%	18.2%
As a percentage of revenue	23.0%	23.5%	23.9%		

Labor costs as a percentage of revenue decreased in 2013 due primarily to the benefit of higher average restaurant sales.

Table of Contents

Labor costs as a percentage of revenue decreased in 2012 due primarily to the benefit of higher average restaurant sales, including the impact of menu price increases, partially offset by increased average wage rates.

Occupancy Costs

	For the years ended December 31			% increase	% increase
	2013	2012	2011	2013 over 2012	2012 over 2011
	(dollars in millions)				
Occupancy costs	\$ 199.1	\$ 171.4	\$ 147.3	16.1%	16.4%
As a percentage of revenue	6.2%	6.3%	6.5%		

Occupancy costs decreased as a percentage of revenue in 2013 and in 2012 primarily due to the benefit of higher average restaurant sales on a partially fixed-cost base.

Other Operating Costs

	For the years ended December 31			% increase	% increase
	2013	2012	2011	2013 over 2012	2012 over 2011
	(dollars in millions)				
Other operating costs	\$ 347.4	\$ 286.6	\$ 251.2	21.2%	14.1%
As a percentage of revenue	10.8%	10.5%	11.1%		

Other operating costs include, among other items, marketing and promotional costs, bank and credit card fees, and restaurant utilities and maintenance costs. Other operating costs increased as a percentage of revenue in 2013 due primarily to higher spend on marketing and promotions. We expect marketing and promotional spend as a percentage of revenue to increase in 2014.

Other operating costs decreased as a percentage of revenue in 2012 due primarily to the benefit of higher average restaurant sales on a partially fixed-cost base and lower marketing and promotional spend as a percentage of revenue.

General and Administrative Expenses

	For the years ended December 31			% increase	% increase
	2013	2012	2011	2013 over 2012	2012 over 2011
	(dollars in millions)				
General and administrative expense	\$ 203.7	\$ 183.4	\$ 149.4	11.1%	22.7%
As a percentage of revenue	6.3%	6.7%	6.6%		

The increase in general and administrative expenses in dollar terms in 2013 primarily resulted from increased payroll and benefits costs as we grew and increased legal costs, partially offset by costs from our biennial All Managers Conference, or AMC, held in the third quarter of 2012, as well as a decrease in 2013 in non-cash stock-based compensation expense due to expenses in 2012 related to non-vested stock awards subject to performance conditions. We expect general and administrative expenses to increase as a percentage of revenue in 2014 due primarily to higher estimated non-cash stock-based compensation expense of about \$100 million given the current stock price and an increase in the number of shares granted, and the 2014 AMC.

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

The increase in general and administrative expenses in dollar terms in 2012 primarily resulted from an increase in non-cash stock-based compensation expense due to awards granted in 2012 with a higher stock price on the date of grant and additional expense related to non-vested stock awards subject to performance conditions, and costs from our biennial AMC.

Table of Contents**Depreciation and Amortization**

	For the years ended December 31			% increase 2013 over 2012	% increase 2012 over 2011
	2013	2012 (dollars in millions)	2011		
Depreciation and amortization	\$ 96.1	\$ 84.1	\$ 74.9	14.2%	12.3%
As a percentage of revenue	3.0%	3.1%	3.3%		

As a percentage of total revenue, depreciation and amortization decreased in 2013 and 2012 as a result of the benefit of higher average restaurant sales on a partially fixed cost base.

Income Tax Provision

	For the years ended December 31			% increase 2013 over 2012	% increase 2012 over 2011
	2013	2012 (dollars in millions)	2011		
Provision for income taxes	\$ 207.0	\$ 179.7	\$ 134.8	15.2%	33.3%
Effective tax rate	38.7%	39.3%	38.5%		

The 2013 effective tax rate decreased by 0.6% from 2012 due primarily to certain federal tax credits that were extended in 2013, for both 2013 and 2012, which benefited the rate by 1.1%. This decrease was partially offset by non-recurring adjustments related to state income taxes.

We estimate our 2014 annual effective tax rate will be 39.2%, increasing from 2013 due to the expiration of certain federal credits, partially offset by a lower estimated state rate.

The 2012 effective tax rate increased primarily due to expiration of certain federal credits, a smaller benefit from food donations, and higher foreign losses which we are not yet able to recognize. The increase was partially offset by prior period adjustments. The 2012 effective tax rate would have been lower by approximately 0.7% if certain federal credits that were realized in the 2012 tax return after being extended during 2013 had instead been extended during 2012.

Quarterly Financial Data/Seasonality

The following table presents data from the consolidated statement of income and comprehensive income for each of the eight quarters in the period ended December 31, 2013. The operating results for any quarter are not necessarily indicative of the results for any subsequent quarter.

	2013 Quarters Ended			
	March 31	June 30	September 30	December 31
Revenue	\$ 726.8	\$ 816.8	\$ 826.9	\$ 844.1
Operating income	\$ 120.0	\$ 146.4	\$ 137.2	\$ 129.1
Net income	\$ 76.6	\$ 87.9	\$ 83.4	\$ 79.6
Number of restaurants opened in quarter	48	44	37	56
Comparable restaurant sales increase	1.0%	5.5%	6.2%	9.3%

2012 Quarters Ended			
March 31	June 30	September 30	December 31

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

Revenue	\$ 640.6	\$ 690.9	\$ 700.5	\$ 699.2
Operating income	\$ 102.2	\$ 133.8	\$ 117.7	\$ 102.2
Net income	\$ 62.7	\$ 81.7	\$ 72.3	\$ 61.4
Number of restaurants opened in quarter	32	55	36	60
Comparable restaurant sales increase	12.7%	8.0%	4.8%	3.8%

Seasonal factors cause our profitability to fluctuate from quarter to quarter. Historically, our average daily restaurant sales and net income are lower in the first and fourth quarters due, in part, to the holiday season and

Table of Contents

because fewer people eat out during periods of inclement weather (the winter months) than during periods of mild or warm weather (the spring, summer and fall months). Other factors also have a seasonal effect on our results. For example, restaurants located near colleges and universities generally do more business during the academic year. The number of trading days in a quarter can also affect our results. Overall, on an annual basis, changes in trading dates do not have a significant impact on our results.

Our quarterly results are also affected by other factors such as the number of new restaurants opened in a quarter and unanticipated events. New restaurants typically have lower margins following opening as a result of the expenses associated with opening new restaurants and their operating inefficiencies in the months immediately following opening. In addition, unanticipated events also impact our results. Accordingly, results for a particular quarter are not necessarily indicative of results to be expected for any other quarter or for any year.

Liquidity and Capital Resources

Our primary liquidity and capital requirements are for new restaurant construction, working capital and general corporate needs. We have a cash and short-term investment balance of \$578.2 million that we expect to utilize, along with cash flow from operations, to provide capital to support the growth of our business (primarily through opening restaurants), to repurchase additional shares of our common stock subject to market conditions (including up to \$90.2 million in repurchases under programs authorized as of December 31, 2013), to maintain our existing restaurants and for general corporate purposes. We also have a long term investments balance of \$313.9 million, which consists of U.S. treasury notes and certificate of deposit products with maturities of 13 months to approximately 2 years. We believe that cash from operations, together with our cash balance, will be enough to meet ongoing capital expenditures, working capital requirements and other cash needs for the foreseeable future.

We haven't required significant working capital because customers generally pay using cash or credit and debit cards and because our operations do not require significant receivables, nor do they require significant inventories due, in part, to our use of various fresh ingredients. In addition, we generally have the right to pay for the purchase of food, beverage and supplies some time after the receipt of those items, generally within ten days, thereby reducing the need for incremental working capital to support our growth.

While operations continue to provide cash, our primary use of cash is in new restaurant development. Our total capital expenditures for 2013 were \$199.9 million, which included the purchase and refurbishment of a corporate aircraft for a total cost of about \$8.3 million. We expect to incur capital expenditures of about \$235 million in 2014, of which about \$175 million relates to our construction of new restaurants before any reductions for landlord reimbursements, and the remainder primarily relates to restaurant reinvestments. In 2013, for Chipotle restaurants in the U.S., we spent on average about \$800,000 in development and construction costs per restaurant, net of landlord reimbursements, and for all restaurants including international locations we spent on average about \$830,000, net of landlord reimbursements. For new restaurants to be opened in 2014, we anticipate average development costs will increase approximately 5% due primarily to the mix of locations and categories.

Contractual Obligations

Our contractual obligations as of December 31, 2013 were as follows:

	Total	1 year	2013 2-3 years (in thousands)	4-5 years	After 5 years
Operating leases	\$ 2,856,522	\$ 185,866	\$ 378,988	\$ 383,499	\$ 1,908,169
Deemed landlord financing	\$ 5,111	\$ 394	\$ 822	\$ 846	\$ 3,049
Other contractual obligations ⁽¹⁾	\$ 163,441	\$ 156,629	\$ 6,812	\$	\$
Total contractual cash obligations	\$ 3,025,074	\$ 342,889	\$ 386,622	\$ 384,345	\$ 1,911,218

- (1) We enter into various purchase obligations in the ordinary course of business. Those that are binding primarily relate to amounts owed for orders related to produce and other ingredients and supplies, construction contractor and subcontractor agreements, orders submitted for equipment for restaurants under construction, and marketing initiatives and corporate sponsorships.

Table of Contents

We are obligated under non-cancelable leases for our restaurants and administrative offices. Our leases generally have initial terms of either five to ten years with two or more five-year extensions, for end-cap and in-line restaurants, or 15 to 20 years with several five-year extensions, for free-standing restaurants. Our leases generally require us to pay a proportionate share of real estate taxes, insurance, common charges and other operating costs. Some restaurant leases provide for contingent rental payments based on sales thresholds, although we generally do not expect to pay significant contingent rent on these properties based on the thresholds in those leases.

Off-Balance Sheet Arrangements

As of December 31, 2013 and 2012, we had no off-balance sheet arrangements or obligations.

Inflation

The primary areas of our operations affected by inflation are food, healthcare costs, labor, fuel, utility costs, materials used in the construction of our restaurants, and insurance. Although almost all of our crew members make more than the minimum wage, increases in the applicable federal or state minimum wage may have an impact on our labor costs. Additionally, many of our leases require us to pay taxes, maintenance, utilities and insurance, all of which are generally subject to inflationary increases.

Critical Accounting Estimates

We describe our significant accounting policies in Note 1 of our consolidated financial statements included in Item 8. Financial Statements and Supplementary Data. Critical accounting estimates are those that we believe are both significant and that require us to make difficult, subjective or complex judgments, often because we need to estimate the effect of inherently uncertain matters. We base our estimates and judgments on historical experiences and various other factors that we believe to be appropriate under the circumstances. Actual results may differ from these estimates, and we might obtain different estimates if we used different assumptions or factors. We believe the following critical accounting estimates affect our more significant judgments and estimates used in the preparation of our financial statements:

Leases

We lease most of our restaurant locations. Our leases typically contain escalating rentals over the lease term as well as optional renewal periods. We have estimated that our lease term, including reasonably assured renewal periods, is the lesser of the lease term or 20 years. We account for our leases by recognizing rent expense on a straight-line basis over the reasonably assured lease term. The majority of our leasehold improvements are also depreciated over the reasonably assured lease term. If the estimate of our reasonably assured lease term was changed, our depreciation and rent expense could differ materially.

Stock-based Compensation

We recognize compensation expense for equity awards over the vesting period based on the award's fair value. We use the Black-Scholes valuation model to determine the fair value of our stock-only stock appreciation rights, or SOSARs, which requires assumptions to be made regarding our stock price volatility, the expected life of the award and expected dividend rates. The volatility assumption was based on our historical data and implied volatility, and the expected life assumptions were based on our historical data. Similarly, the compensation expense of performance share awards and SOSARs with performance-based vesting conditions is based in part on the estimated probability of our achieving levels of performance associated with particular levels of payout for performance shares and with vesting for performance SOSARs. We determine the probability of achievement of future levels of performance by comparing the relevant performance level with our internal estimates of future

Table of Contents

performance. Those estimates are based on a number of assumptions, and different assumptions may have resulted in different conclusions regarding the probability of our achieving future levels of performance relevant to the payout levels for the awards. Had we arrived at different assumptions of stock price volatility or expected lives of our SOSARs, or different assumptions regarding the probability of our achieving future levels of performance with respect to performance share awards and performance SOSARs, our stock-based compensation expense and results of operations could have been different.

Insurance Liability

We maintain various insurance policies for workers' compensation, general liability and auto damage with varying deductibles as high as \$1 million, and for property which generally has a \$1.5 million deductible. We are self-insured for employee health but have third party insurance coverage to limit exposure to these claims. We record a liability that represents our estimated cost of claims incurred and unpaid as of the balance sheet date. Our estimated liability is not discounted and is based on a number of assumptions and factors, including historical trends, actuarial assumptions and economic conditions, and is closely monitored and adjusted when warranted by changing circumstances. In addition, our history of claims experience is short and our significant growth rate could affect the accuracy of estimates based on historical experience. Should a greater amount of claims occur compared to what was estimated or medical costs increase beyond what was expected, our accrued liabilities might not be sufficient and additional expenses may be recorded. Actual claims experience could also be more favorable than estimated, which would result in expense reductions. Unanticipated changes may produce materially different amounts of expense than that reported under these programs. The total estimated insurance liabilities as of December 31, 2013 were \$31.6 million.

Reserves/Contingencies for Litigation and Other Matters

We are involved in various claims and legal actions that arise in the ordinary course of business. These actions are subject to many uncertainties, and we cannot predict the outcomes with any degree of certainty. Consequently, we were unable to ascertain the ultimate aggregate amount of monetary liability or financial impact with respect to these matters as of December 31, 2013 and 2012. Although we have recorded liabilities related to a number of legal actions, our estimates used to determine the amount of these liabilities may not be accurate, and there are other legal actions for which we have not recorded a liability. As a result, in the event legal actions for which we have not accrued a liability or for which our accrued liabilities are not accurate are resolved, such resolution may affect our operating results and cash flows.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**Commodity Price Risks**

We are also exposed to commodity price risks. Many of the ingredients we use to prepare our food, as well as our packaging materials, are commodities or ingredients that are affected by the price of other commodities, exchange rates, foreign demand, weather, seasonality, production, availability and other factors outside our control. We work closely with our suppliers and use a mix of forward pricing protocols under which we agree with our supplier on fixed prices for deliveries at some time in the future, fixed pricing protocols under which we agree on a fixed price with our supplier for the duration of that protocol, and formula pricing protocols under which the prices we pay are based on a specified formula related to the prices of the goods, such as spot prices. However, a majority of the dollar value of goods purchased by us is effectively at spot prices. Generally our pricing protocols with suppliers can remain in effect for periods ranging from one to 18 months, depending on the outlook for prices of the particular ingredient. In several cases, we have minimum purchase obligations. We've tried to increase, where necessary, the number of suppliers for our ingredients, which we believe can help mitigate pricing volatility, and we follow industry news, trade issues, exchange rates, foreign demand, weather, crises and other world events that may affect our ingredient prices. Increases in ingredient prices could adversely affect our results if we choose for competitive or other reasons not to increase menu prices at the same rate at which ingredient costs increase, or if menu price increases result in customer resistance.

Table of Contents

Changing Interest Rates

We are exposed to interest rate risk through fluctuations of interest rates on our investments. Changes in interest rates affect the interest income we earn, and therefore impact our cash flows and results of operations. As of December 31, 2013, we had \$652.5 million in investments and interest-bearing cash accounts, including an insurance related restricted trust account classified in other assets, and \$240.7 million in accounts with an earnings credit we classify as interest income, which combined earned a weighted average interest rate of 0.33%.

Foreign Currency Exchange Risk

A portion of our operations consist of activities outside of the U.S. and we have currency risk on the transactions in other currencies and translation adjustments resulting from the conversion of our international financial results into the U.S. dollar. However, a substantial majority of our operations and investment activities are transacted in the U.S. and therefore our foreign currency risk is limited at this date.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of

Chipotle Mexican Grill, Inc.

We have audited the accompanying consolidated balance sheets of Chipotle Mexican Grill, Inc. (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income and comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Chipotle Mexican Grill, Inc. at December 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Chipotle Mexican Grill, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 4, 2014 expressed an unqualified opinion thereon.

CHIPOTLE MEXICAN GRILL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(dollar and share amounts in thousands, unless otherwise specified)

1. Description of Business and Summary of Significant Accounting Policies

Chipotle Mexican Grill, Inc. (the Company), a Delaware corporation, develops and operates fast-casual, fresh Mexican food restaurants. As of December 31, 2013, the Company operated 1,572 Chipotle restaurants throughout the United States. The Company also has seven restaurants in Canada, six in England, two in France, and one in Germany. Further, the Company operates six ShopHouse Southeast Asian Kitchen restaurants, serving fast-casual, Asian inspired cuisine, as well as is an investor in a consolidated entity that owns and operates one Pizzeria Locale, a fast casual pizza concept. The Company manages its operations based on seven regions and has aggregated its operations to one reportable segment.

Principles of Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of the Company, including wholly owned subsidiaries and investees that the Company controls. All intercompany balances and transactions have been eliminated.

Certain amounts in prior periods have been reclassified to conform to the current year presentation. During the first quarter of 2013, the Company reclassified amounts related to lease financing liabilities from deemed landlord financing to other liabilities, and from current portion of deemed landlord financing to accrued liabilities. Such reclassifications did not have a material effect on the Company's consolidated financial position or results of operations.

Management Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates under different assumptions or conditions.

Revenue Recognition

Revenue from restaurant sales is recognized when food and beverage products are sold. The Company reports revenue net of sales and use taxes collected from customers and remitted to governmental taxing authorities.

The Company sells gift cards which do not have an expiration date and it does not deduct non-usage fees from outstanding gift card balances. The Company recognizes revenue from gift cards when: (i) the gift card is redeemed by the customer; or (ii) the Company determines the likelihood of the gift card being redeemed by the customer is remote (gift card breakage) and there is not a legal obligation to remit the unredeemed gift cards to the relevant jurisdiction. The determination of the gift card breakage rate is based upon Company-specific historical redemption patterns. During the fourth quarter of 2012, the Company revised its estimated breakage rate from 5% to 4% of gift card sales which did not have a material impact on revenue. Gift card breakage is recognized in revenue as the gift cards are used on a pro rata basis over a six month period beginning at the date of the gift card sale and is included in revenue in the consolidated statement of income and comprehensive income. Breakage recognized during the years ended December 31, 2013, 2012 and 2011 was \$1,976, \$2,070 and \$1,524, respectively.

Cash and Cash Equivalents

The Company considers all highly liquid investment instruments purchased with an initial maturity of three months or less to be cash equivalents.

Table of Contents**Accounts Receivable**

Accounts receivable primarily consists of receivables from third party gift card distributors, tenant improvement receivables, payroll-related tax receivables, vendor rebates, and receivables arising from the normal course of business. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable based on a specific review of account balances. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recoverability is considered remote.

Inventory

Inventory, consisting principally of food, beverages, and supplies, is valued at the lower of first-in, first-out cost or market. Certain key ingredients (beef, pork, chicken, beans, rice, sour cream, cheese, and tortillas) are purchased from a small number of suppliers.

Investments

The Company's investments consist of U.S. treasury notes and CDARS, certificates of deposit placed through an account registry service, with maturities up to approximately two years and classified as held-to-maturity. Held-to-maturity securities are carried at amortized cost, which the Company has determined approximates fair value as of December 31, 2013 and 2012. Fair market value of U.S. treasury notes is measured on a recurring basis based on Level 1 inputs and fair market value of CDARS is measured on a recurring basis based on Level 2 inputs (level inputs are described below under "Fair Value Measurements"). The Company recognizes impairment charges on its investments in the consolidated statement of income and comprehensive income when management believes the decline in the fair value of the investment is other-than-temporary. No impairment charges were recognized on the Company's investments for the years ended December 31, 2013, 2012 and 2011.

Leasehold Improvements, Property and Equipment

Leasehold improvements, property and equipment are recorded at cost. Internal costs directly associated with the acquisition, development and construction of a restaurant are capitalized and were \$9,024, \$10,038 and \$9,616 for the years ended December 31, 2013, 2012 and 2011, respectively. Expenditures for major renewals and improvements are capitalized while expenditures for minor replacements, maintenance and repairs are expensed as incurred. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. Leasehold improvements are amortized over the shorter of the lease term, which generally includes reasonably assured option periods, or the estimated useful lives of the assets. Upon retirement or disposal of assets, the accounts are relieved of cost and accumulated depreciation and the related gain or loss, if any, is reflected in loss on disposal of assets in the consolidated statement of income and comprehensive income.

At least annually, the Company evaluates, and adjusts when necessary, the estimated useful lives. The changes in estimated useful lives did not have a material impact on depreciation in any period. The estimated useful lives are:

Leasehold improvements and buildings	3-20 years
Furniture and fixtures	4-10 years
Equipment	3-7 years

Goodwill

Goodwill represents the excess of cost over fair value of net assets of the business acquired. Goodwill is not subject to amortization, but instead is tested for impairment at least annually, and the Company is required to record any necessary impairment adjustments. Impairment is measured as the excess of the carrying value over the fair value of the goodwill. Based on the Company's analysis, no impairment charges were recognized on goodwill for the years ended December 31, 2013, 2012 and 2011.

Table of Contents

Other Assets

Other assets consist primarily of restricted cash assets of \$23,810 and \$24,799 as of December 31, 2013 and 2012, respectively, a rabbi trust as described further in Note 6, transferable liquor licenses which are carried at the lower of fair value or cost, and a prepaid tax asset related to an intercompany transfer of international intellectual property. Restricted cash assets are primarily insurance related restricted trust assets.

Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. For the purpose of reviewing restaurant assets to be held and used for potential impairment, assets are grouped together at the market level, or in the case of a potential relocation or closure, at the restaurant level. The Company manages its restaurants as a group with significant common costs and promotional activities; as such, an individual restaurant's cash flows are not generally independent of the cash flows of others in a market. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized as the amount by which the carrying amount of the asset exceeds the fair value of the asset. During the years ended December 31, 2013, 2012 and 2011, an aggregate impairment charge of \$1,220, \$0 and \$380, respectively, was recognized in loss on disposal of assets in the consolidated statement of income and comprehensive income. The impairment charges resulted primarily from potential restaurant relocations or office closures. Fair value of the restaurants was determined using Level 3 inputs (as described below under Fair Value Measurements) based on a discounted cash flows method through the estimated date of closure.

Income Taxes

The Company recognizes deferred tax assets and liabilities at enacted income tax rates for the temporary differences between the financial reporting bases and the tax bases of its assets and liabilities. Any effects of changes in income tax rates or tax laws are included in the provision for income taxes in the period of enactment. The deferred income tax impacts of investment tax credits are recognized as an immediate adjustment to income tax expense. When it is more likely than not that a portion or all of a deferred tax asset will not be realized in the future, the Company provides a corresponding valuation allowance against the deferred tax asset. When it is more likely than not that a position will be sustained upon examination by a tax authority that has full knowledge of all relevant information, the Company measures the amount of tax benefit from the position and records the largest amount of tax benefit that is greater than 50% likely of being realized after settlement with a tax authority. The Company's policy is to recognize interest to be paid on an underpayment of income taxes in interest expense and any related statutory penalties in the provision for income taxes in the consolidated statement of income and comprehensive income.

Restaurant Pre-Opening Costs

Pre-opening costs, including rent, wages, benefits and travel for the training and opening teams, food and other restaurant operating costs, are expensed as incurred prior to a restaurant opening for business.

Insurance Liability

The Company maintains various insurance policies including workers' compensation, employee health, general liability, automobile, and property damage. Pursuant to these policies, the Company is responsible for losses up to certain limits and is required to estimate a liability that represents the ultimate exposure for aggregate losses below those limits. This liability is based on management's estimates of the ultimate costs to be incurred to settle known claims and, where applicable, claims not reported as of the balance sheet date. The estimated liability is not discounted and is based on a number of assumptions and factors, including historical trends, actuarial assumptions, and economic conditions. If actual trends differ from the estimates, the financial results could be impacted. As of December 31, 2013 and 2012, \$24,819 and \$22,540, respectively, of the estimated liability was included in accrued payroll and benefits and \$6,749 and \$5,220, respectively, was included in accrued liabilities in the consolidated balance sheet.

Table of Contents

Advertising and Marketing Costs

Advertising and marketing costs are expensed as incurred and totaled \$44,389, \$34,999 and \$31,902 for the years ended December 31, 2013, 2012 and 2011, respectively. Advertising and marketing costs are included in other operating costs in the consolidated statement of income and comprehensive income.

Rent

Rent expense for the Company's leases, which generally have escalating rentals over the term of the lease, is recorded on a straight-line basis over the lease term. The lease term is the lesser of 20 years inclusive of reasonably assured renewal periods, or the lease term. The lease term begins when the Company has the right to control the use of the property, which is typically before rent payments are due under the lease. The difference between the rent expense and rent paid is recorded as deferred rent in the consolidated balance sheet. Pre-opening rent is included in pre-opening costs in the consolidated income statement. Tenant incentives used to fund leasehold improvements are recorded in deferred rent and amortized as reductions of rent expense over the term of the lease.

Additionally, certain of the Company's operating leases contain clauses that provide additional contingent rent based on a percentage of sales greater than certain specified target amounts. The Company recognizes contingent rent expense provided the achievement of that target is considered probable.

Fair Value of Financial Instruments

The carrying value of the Company's cash and cash equivalents, accounts receivable and accounts payable approximate fair value because of their short-term nature.

Fair Value Measurements

Financial Accounting Standards Board Accounting Standard Codification 820, *Fair Value of Measurements and Disclosures* (Topic 820) defines fair value based on the price that would be received to sell an asset or the exit price that would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. Topic 820 establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value. The fair value hierarchy consists of three broad levels, which are described below:

Level 1: Quoted prices in active markets for identical assets or liabilities that the entity has the ability to access.

Level 2: Observable inputs other than prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated with observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

Foreign Currency Translation

The Company's international operations generally use the local currency as the functional currency. Assets and liabilities are translated at exchange rates in effect as of the balance sheet date. Income and expense accounts are translated at the average monthly exchange rates during the year. Resulting translation adjustments are recorded as a separate component of accumulated other comprehensive income in the consolidated statement of shareholders' equity.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents and investments. Approximately one third of the Company's cash and investment

Table of Contents

balances are held at three financial institutions and are not federally backed or federally insured. Credit card transactions at the Company's restaurants are processed by four service providers, one each for the United States, Canada, and England, and one for France and Germany.

Subsequent Events

The Company evaluated subsequent events and transactions for potential recognition or disclosure in the consolidated financial statements through the date of issuance.

Recently Issued Accounting Standards

Effective January 1, 2013, the Company adopted Accounting Standards Update (ASU) No. 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The adoption of ASU 2013-02 concerns presentation and disclosure only and did not have an impact on the Company's consolidated financial position or results of operations.

2. Supplemental Financial Information

Leasehold improvements, property and equipment were as follows:

	December 31	
	2013	2012
Land	\$ 11,062	\$ 11,062
Leasehold improvements and buildings	1,121,260	996,080
Furniture and fixtures	113,751	100,416
Equipment	244,562	204,062
	1,490,635	1,311,620
Accumulated depreciation	(527,397)	(444,917)
	\$ 963,238	\$ 866,703

Accrued liabilities were as follows:

	December 31	
	2013	2012
Gift card liability	\$ 31,508	\$ 22,736
Transaction tax payable	17,541	13,499
Other accrued expenses	23,962	20,186
	\$ 73,011	\$ 56,421

Table of Contents**3. Income Taxes**

The components of the provision for income taxes are as follows:

	Years ended December 31		
	2013	2012	2011
Current tax:			
U.S. Federal	\$ 165,731	\$ 166,386	\$ 100,983
U.S. State	39,136	31,231	21,848
Foreign	63	125	(6)
	204,930	197,742	122,825
Deferred tax:			
U.S. Federal	5,238	(16,024)	12,080
U.S. State	(3,105)	(2,013)	(50)
Foreign	(1,330)	(1,578)	(711)
	803	(19,615)	11,319
Valuation allowance	1,300	1,558	616
Provision for income taxes	\$ 207,033	\$ 179,685	\$ 134,760

Actual taxes paid for each tax period were less than the current tax expense due to the excess tax benefit on stock-based compensation of \$38,379, \$73,210, and \$38,786 during the years ended December 31 2013, 2012, and 2011, respectively.

The effective tax rate differs from the statutory tax rates as follows:

	Years ended December 31		
	2013	2012	2011
Statutory U.S. federal income tax rate	35.0%	35.0%	35.0%
State income tax, net of related federal income tax benefit	4.2	4.1	4.1
Federal credits	(0.5)		(0.8)
Valuation allowance	0.4	0.3	0.1
Prior period adjustments	(0.4)	(0.1)	0.1
Effective income tax rates	38.7%	39.3%	38.5%

In January 2013, the United States Congress authorized, and the President signed into law, certain federal tax credits that were reflected in the Company's U.S. tax return for 2012; however, since this law was enacted in 2013, the financial statement benefit of such credits were reflected in 2013. The lack of availability of such credits caused the 2012 effective tax rate to be approximately 0.7% higher than it would have been had the credits been approved in 2012. Recognizing the 2012 credits during 2013 benefited the 2013 rate by 0.6%.

Deferred U.S. income taxes have not been recorded for temporary differences related to investments in certain foreign subsidiaries. These temporary differences consisted primarily of undistributed earnings considered permanently invested in operations outside the U.S. Determination of the deferred income tax liability on these unremitted earnings is not practicable because such liability, if any, is dependent on circumstances existing if and when remittance occurs.

Table of Contents

Deferred income tax liabilities are taxes the Company expects to pay in future periods. Similarly, deferred income tax assets are recorded for expected reductions in taxes payable in future periods. Deferred income taxes arise because of the differences in the book and tax bases of certain assets and liabilities. Deferred income tax liabilities and assets consist of the following:

	December 31	
	2013	2012
Long-term deferred income tax liability:		
Leasehold improvements, property and equipment	\$ 156,746	\$ 136,040
Goodwill and other assets	1,346	1,166
Other	1,591	
Total long-term deferred income tax liability	159,683	137,206
Long-term deferred income tax asset:		
Deferred rent	47,127	41,041
Gift card liability	876	480
Capitalized transaction costs	506	505
Stock-based compensation and other employee benefits	53,622	46,515
Foreign net operating loss carry-forwards	5,598	2,992
State credits	1,300	
Other		72
Valuation allowance	(4,780)	(3,346)
Total long-term deferred income tax asset	104,249	88,259
Net long-term deferred income tax liability	55,434	48,947
Current deferred income tax liability:		
Prepaid assets and other	2,970	2,086
Total current deferred income tax liability	2,970	2,086
Current deferred income tax asset:		
Allowances, reserves and other	11,973	10,433
Other employee benefits	4,267	573
Valuation allowance	(58)	(58)
Total current deferred income tax asset	16,182	10,948
Net current deferred income tax asset	13,212	8,862
Total deferred income tax liability	\$ 42,222	\$ 40,085

As of December 31, 2013 and 2012, the Company had no unrecognized tax benefits. There was no change in the amount of unrecognized tax benefits as a result of tax positions taken during the year or in prior periods or due to settlements with taxing authorities or lapses of applicable statutes of limitations. The Company is open to federal and state tax audits until the applicable statutes of limitations expire. Tax audits by their very nature are often complex and can require several years to complete. The Company is no longer subject to U.S. federal tax examinations by tax authorities for tax years before 2010. For the majority of states where the Company has a significant presence, it is no longer subject to tax examinations by tax authorities for tax years before 2009. Some of the Company's foreign net operating losses begin expiring in 2015.

4. Shareholders' Equity

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

Through December 31, 2013, the Company announced authorizations by its Board of Directors of the expenditure of up to \$700 million to repurchase shares of the Company's common stock. Under the remaining repurchase authorization, shares may be purchased from time to time in open market transactions, subject to market conditions.

Table of Contents

On November 20, 2012 the Company entered into a privately negotiated accelerated share repurchase transaction (ASR) to repurchase \$25,000 of its common stock. The Company advanced \$25,000 on November 20, 2012 and received 65 shares, which represented 70% of the total number of shares to be repurchased calculated using the closing price on November 20, 2012. The agreement was settled in February 2013, and the Company received an additional 22 shares, resulting in a weighted-average price per share of \$287.20 for the ASR.

The shares of common stock repurchased under authorized programs, including the ASR, were 336, 686 and 220 for a total cost of \$109,987, \$206,394 and \$63,508 during 2013, 2012 and 2011, respectively. As of December 31, 2013, \$90,202 was available to be repurchased under the authorized programs. The shares repurchased are being held in treasury until such time as they are reissued or retired, at the discretion of the Board of Directors.

During 2013 and 2012, shares of common stock were netted and surrendered as payment for minimum statutory tax withholding obligations in connection with the vesting of outstanding stock awards. Shares surrendered by the participants in accordance with the applicable award agreements and plan are deemed repurchased by the Company but are not part of publicly announced share repurchase programs. In the year ended 2013, the Company's repurchases in connection with such netting and surrender totaled 57 shares for a total cost of \$28,916, and in the year ended 2012, totaled 28 shares for a total cost of \$10,698.

5. Stock Based Compensation

The Company issues shares pursuant to the Chipotle Mexican Grill, Inc. 2011 Stock Incentive Plan (the 2011 Incentive Plan). Shares issued pursuant to awards granted prior to the 2011 Incentive Plan were issued subject to previous stock plans. For purposes of counting the shares remaining available under the 2011 Incentive Plan, each share issuable pursuant to outstanding full value awards, such as restricted stock units and performance shares, will count as two shares used, whereas each share underlying a stock appreciation right or stock option will count as one share used. Under the 2011 Incentive Plan, 3,360 shares of common stock have been authorized and reserved for issuances to eligible employees, of which 2,014 represent shares that were authorized for issuance but not issued at December 31, 2013. The 2011 Incentive Plan is administered by the Compensation Committee of the Board of Directors, which has the authority to select the individuals to whom awards will be granted, to determine the type of awards and when the awards are to be granted, the number of shares to be covered by each award, the vesting schedule and all other terms and conditions of the awards. The exercise price for stock awards granted under the 2011 Incentive Plan cannot be less than fair market value at the date of grant.

The Company granted stock options prior to 2008, and has granted stock only stock appreciation rights (SOSARs) since that time. SOSARs generally vest equally over two and three years and expire after seven years. Stock-based compensation expense is generally recognized on a straight-line basis for each separate vesting portion. Compensation expense related to employees eligible to retire and retain full rights to the awards is recognized over six months which coincides with the notice period. Compensation expense on performance shares, which is based on the quantity of awards the Company has determined are probable of vesting, is recognized over the longer of the estimated performance goal attainment period or time vesting period. Stock-based compensation expense, including SOSARs and stock awards, was \$64,781 (\$39,465 net of tax) in 2013, \$66,274 (\$40,361 net of tax) in 2012 and \$42,965 (\$26,166 net of tax) in 2011. During the first quarter of 2012, the Company increased its estimate of the number of non-vested stock awards subject to performance conditions that were probable of vesting, which resulted in a cumulative adjustment to expense of \$5,578 (\$3,397 net of tax and \$0.11 impact to basic and diluted earnings per share for 2012). For the years ended December 31, 2013, 2012 and 2011, \$1,124, \$1,998 and \$1,583, respectively, of stock-based compensation expense was recognized as capitalized development and is included in leasehold improvements, property and equipment in the consolidated balance sheet.

Table of Contents

The tables below summarize the option and SOSAR activity under the stock incentive plans (in thousands, except years and per share data):

	2013		2012		2011	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding, beginning of year	1,449	\$ 274.92	1,486	\$ 157.07	1,451	\$ 82.56
Granted	672	\$ 320.21	617	\$ 371.70	587	\$ 268.73
Exercised	(369)	\$ 176.23	(592)	\$ 80.31	(536)	\$ 76.78
Forfeited	(62)	\$ 329.76	(62)	\$ 274.25	(16)	\$ 173.05
Outstanding, end of year	1,690	\$ 312.44	1,449	\$ 274.92	1,486	\$ 157.07

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Years of Contractual Life	Aggregate Intrinsic Value
Outstanding as of December 31, 2013	1,690	\$ 312.44	5.1	\$ 372,475
Vested and expected to vest as of December 31, 2013	1,647	\$ 312.04	5.1	\$ 363,561
Exercisable as of December 31, 2013	258	\$ 210.85	3.8	\$ 83,019

The SOSARs granted during 2013 include 191 SOSARs that contain performance conditions. The total intrinsic value of options and SOSARs exercised during the years ended December 31, 2013, 2012 and 2011 was \$91,178, \$183,097 and \$113,752. Unearned compensation as of December 31, 2013 was \$31,912 for SOSAR awards, and is expected to be recognized over a weighted average period of 1.3 years.

A summary of non-vested stock award activity under the stock incentive plans is as follows (in thousands, except per share data):

	2013		2012		2011	
	Shares	Grant Date Fair Value	Shares	Grant Date Fair Value	Shares	Grant Date Fair Value
Outstanding, beginning of year	120	\$ 218.34	207	\$ 153.40	205	\$ 148.22
Granted	68	\$ 527.45	1	\$ 401.56	6	\$ 272.28
Vested	(117)	\$ 215.76	(83)	\$ 55.92	(3)	\$ 87.36
Forfeited		\$	(5)	\$ 267.23	(1)	\$ 53.36
Outstanding, end of year	71	\$ 520.27	120	\$ 218.34	207	\$ 153.40

At December 31, 2013, 66 of the outstanding non-vested stock awards were subject to both service and performance vesting conditions. The quantity of shares that ultimately vest is determined based on the cumulative cash flow from operations reached during the three year period ending on September 30, 2016. If the cumulative cash flow from operations during the three year period does not reach a specified level, no shares will vest. Unearned compensation as of December 31, 2013 was \$26,357 for non-vested stock awards the Company has determined are probable of vesting, and is expected to be recognized over a weighted average period of 2.7 years. The fair value of shares earned as of the vesting date during the year ended December 31, 2013, 2012, and 2011 was \$58,941, \$31,309, and \$961, respectively.

The following table reflects the average assumptions utilized in the Black-Scholes option-pricing model to value SOSAR awards granted for each year:

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

	2013	2012	2011
Risk-free interest rate	0.5%	0.4%	1.6%
Expected life (years)	3.4	3.4	3.4
Expected dividend yield	0.0%	0.0%	0.0%
Volatility	35.4%	39.1%	51.0%
Weighted-average Black-Scholes fair value per share at date of grant	\$ 82.51	\$ 104.97	\$ 101.91

Table of Contents

The Company has not paid dividends to date and does not plan to pay dividends in the near future. The risk-free interest rate is based upon U.S. Treasury rates for instruments with similar terms. The volatility assumption was based on our historical data and implied volatility, and the expected life assumptions were based on our historical data.

6. Employee Benefit Plans

The Company maintains the Chipotle Mexican Grill 401(k) plan (the 401(k) Plan). The Company matches 100% of the first 3% of pay contributed by each eligible employee and 50% on the next 2% of pay contributed. Employees become eligible to receive matching contributions after one year of service with the Company. For the years ended December 31, 2013, 2012, and 2011, Company matching contributions totaled approximately \$2,644, \$2,431 and \$2,039, respectively.

In 2012, the Company began offering an employee stock purchase plan (ESPP). Under the ESPP, 250 shares of common stock have been authorized and reserved for issuances to eligible employees. Employees become eligible to contribute after one year of service with the Company and may contribute up to 15% of their base earnings, subject to an annual maximum dollar amount, toward the monthly purchase of the Company's common stock. During the year ended 2013 there were 1 shares issued under the ESPP, and during the year ended 2012 there were 1 shares issued under the ESPP.

The Company also maintains the Chipotle Mexican Grill, Inc. Supplemental Deferred Investment Plan (the Deferred Plan) which covers eligible employees of the Company. The Deferred Plan is a non-qualified plan that allows participants to make tax-deferred contributions that cannot be made under the 401(k) Plan because of Internal Revenue Service limitations. Participants' earnings on contributions made to the Deferred Plan fluctuate with the actual earnings and losses of a variety of available investment choices selected by the participant. Total liabilities under the Deferred Plan as of December 31, 2013 and 2012 were \$13,397 and \$10,037, respectively, and are included in other long-term liabilities in the consolidated balance sheet. The Company matches 100% of the first 3% of pay contributed by each eligible employee and 50% on the next 2% of pay contributed once the 401(k) contribution limits are reached. For the years ended December 31, 2013, 2012, and 2011, the Company made deferred compensation matches of \$201, \$213 and \$179 respectively, to the Deferred Plan.

Prior to the first quarter of 2012, the Deferred Plan was unfunded, with all earnings and losses recorded in general and administrative expenses in the consolidated statement of income and comprehensive income. The total expense recognized related to the unfunded portion of the Deferred Plan including the matching contributions was \$487 and \$20 for the years ended December 31, 2012, and 2011, respectively. During the first quarter of 2012, the Company elected to fund its deferred compensation obligations through a rabbi trust. The rabbi trust is subject to creditor claims in the event of insolvency, but the assets held in the rabbi trust are not available for general corporate purposes. Amounts in the rabbi trust are invested in mutual funds, as selected by participants, which are designated as trading securities and carried at fair value, and are included in other assets in the consolidated balance sheet. Fair value of mutual funds is measured using Level 1 inputs (quoted prices for identical assets in active markets), and the fair value of the investments in the rabbi trust was \$13,397 and \$10,037 as of December 31, 2013 and 2012, respectively. The Company records trading gains and losses in general and administrative expenses in the consolidated statement of income and comprehensive income, along with the offsetting amount related to the increase or decrease in deferred compensation to reflect its exposure of the Deferred Plan liability. The Company recorded \$722 and \$240 of unrealized gains on investments held in the rabbi trust during twelve months ended December 31, 2013 and 2012, respectively.

7. Leases

The Company generally operates its restaurants in leased premises. Lease terms for traditional shopping center or building leases generally include combined initial and option terms of 20-25 years. Ground leases generally include combined initial and option terms of 30-40 years. The option terms in each of these leases are typically in five-year increments. Typically, the lease includes rent escalation terms every five years including fixed rent escalations, escalations based on inflation indexes, and fair market value adjustments. Certain leases contain contingent rental provisions based upon the sales of the underlying restaurants. The leases generally provide for the payment of common area maintenance, property taxes, insurance and various other use and occupancy costs by the Company. In addition,

Table of Contents

the Company is the lessee under non-cancelable leases covering certain offices.

Future minimum lease payments required under existing operating leases as of December 31, 2013 are as follows:

2014	\$ 185,866
2015	189,474
2016	189,514
2017	190,256
2018	193,243
Thereafter	1,908,169
Total minimum lease payments	\$ 2,856,522

Minimum lease payments have not been reduced by minimum sublease rentals of \$6,355 due in the future under non-cancelable subleases.

Rental expense consists of the following:

	For the years ended December 31		
	2013	2012	2011
Minimum rentals	\$ 178,395	\$ 152,935	\$ 130,827
Contingent rentals	\$ 2,719	\$ 1,917	\$ 1,754
Sublease rental income	\$ (1,726)	\$ (1,623)	\$ (1,390)

The Company has six sales and leaseback transactions. These transactions do not qualify for sale leaseback accounting because of the Company's deemed continuing involvement with the buyer-lessor due to fixed price renewal options, which results in the transaction being recorded under the financing method. Under the financing method, the assets remain on the consolidated balance sheet and the proceeds from the transactions are recorded as a financing liability. A portion of lease payments are applied as payments of deemed principal and imputed interest. The deemed landlord financing liability was \$3,386 and \$3,529 as of December 31, 2013, and 2012, respectively, with the current portion of the liability included in accrued liabilities, and the remaining portion included in other liabilities in the consolidated balance sheet.

8. Earnings Per Share

Basic earnings per share is calculated by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during each period. Diluted earnings per share (diluted EPS) is calculated using income available to common shareholders divided by diluted weighted-average shares of common stock outstanding during each period. Potentially dilutive securities include shares of common stock underlying stock options, SOSARs and non-vested stock awards (collectively stock awards). Diluted EPS considers the impact of potentially dilutive securities except in periods in which there is a loss because the inclusion of the potential common shares would have an anti-dilutive effect. Stock awards of 393, 360 and 240 were excluded from the calculation of 2013, 2012 and 2011 diluted EPS, respectively, because they were anti-dilutive. In addition, 381, 449 and 224 stock awards subject to performance conditions were excluded from the 2013, 2012 and 2011 calculations of diluted EPS. The following table sets forth the computations of basic and diluted earnings per share:

	Year ended December 31		
	2013	2012	2011
Net income	\$ 327,438	\$ 278,000	\$ 214,945
Shares:			
Weighted average number of common shares outstanding	30,957	31,513	31,217
Dilutive stock awards	324	270	558
Diluted weighted average number of common shares outstanding	31,281	31,783	31,775

Edgar Filing: CHIPOTLE MEXICAN GRILL INC - Form 10-K

Basic earnings per share	\$	10.58	\$	8.82	\$	6.89
Diluted earnings per share	\$	10.47	\$	8.75	\$	6.76

Table of Contents

9. Commitments and Contingencies

Purchase Obligations

The Company enters into various purchase obligations in the ordinary course of business, generally of short term nature. Those that are binding primarily relate to commitments for food purchases and supplies, amounts owed under contractor and subcontractor agreements, orders submitted for equipment for restaurants under construction, and marketing initiatives and corporate sponsorships.

Litigation

Notices of Inspection of Work Authorization Documents and Related Civil and Criminal Investigations

Following an inspection during 2010 by the U.S. Department of Homeland Security, or DHS, of the work authorization documents of the Company's restaurant employees in Minnesota, the Immigration and Customs Enforcement arm of DHS, or ICE, issued to the Company a Notice of Suspect Documents identifying a large number of employees who, according to ICE and notwithstanding the Company's review of work authorization documents for each employee at the time they were hired, appeared not to be authorized to work in the U.S. The Company approached each of the named employees to explain ICE's determination and afforded each employee an opportunity to confirm the validity of their original work eligibility documents, or provide valid work eligibility documents. Employees who were unable to provide valid work eligibility documents were terminated in accordance with the law. In December 2010, the Company was also requested by DHS to provide the work authorization documents of restaurant employees in the District of Columbia and Virginia, and the Company provided the requested documents in January 2011. The Company has subsequently received requests from the office of the U.S. Attorney for the District of Columbia for work authorization documents covering all of the Company's employees since 2007, plus employee lists and other documents concerning work authorization. The Company believes its practices with regard to the work authorization of its employees, including the review and retention of work authorization documents, are in compliance with applicable law. However, the termination of large numbers of employees in a short period of time does disrupt restaurant operations and results in a temporary increase in labor costs as new employees are trained.

In May 2012, the U.S. Securities and Exchange Commission notified the Company that it is conducting a civil investigation of the Company's compliance with employee work authorization verification requirements and its related disclosures and statements, and the office of the U.S. Attorney for the District of Columbia advised the Company that its investigation has broadened to include a parallel criminal and civil investigation of the Company's compliance with federal securities laws. The Company intends to continue to fully cooperate in the government's investigations. It is not possible at this time to determine whether the Company will incur, or to reasonably estimate the amount of, any fines, penalties or further liabilities in connection with these matters.

Shareholder Derivative Actions

On July 12, 2012, Ralph B. Richey filed a shareholder derivative action in the U.S. District Court for the District of Colorado alleging that the members of the Company's Board of Directors breached their fiduciary duties in connection with employee work authorization compliance matters. On September 21, 2012, Joanne Nelson filed a shareholder derivative action in the same court alleging that the members of the Company's Board of Directors and the Company's Chief Financial Officer breached their fiduciary duties, caused waste of corporate assets, and were unjustly enriched in connection with employee work authorization compliance matters, as well as in connection with the Company's alleged failure to disclose material information about the Company's business results and prospects, and in connection with compensation paid to some of the Company's officers. On October 4, 2012, Francis Schmitz filed a shareholder derivative action in the same court, making allegations substantially the same as those in the Nelson complaint. Each of these actions purports to state a claim for damages on behalf of the Company, and is based on statements in the Company's SEC filings and related public disclosures, as well as media reports and Company records, in part regarding the matters described above under *Notices of Inspection of Work Authorization Documents and Related Civil and Criminal Investigations*. On January 17, 2013, these three shareholder derivative actions were consolidated by the court

Table of Contents

and will proceed as a single action. On March 20, 2013, an amended and consolidated complaint for the cases was filed by plaintiff Saleem Mohammed. On May 22, 2013, the Company filed a motion to dismiss the consolidated cases, and a ruling on the motion remains pending. The Company has agreed to a proposed settlement of the consolidated cases the terms of which are subject to court approval and ratification by the Company's Board of Directors. Under the proposed settlement agreement, the Company would pay the plaintiffs' attorneys' fees which have been accrued and agree to put in place additional oversight procedures related to employee work authorization compliance. In the event the settlement is not approved, the Company intends to continue to defend the cases vigorously, but it would not be possible at this time to reasonably estimate the outcome of or any potential liability from these cases.

Miscellaneous

The Company is involved in various other claims and legal actions that arise in the ordinary course of business. The Company does not believe that the ultimate resolution of these actions will have a material adverse effect on the Company's financial position, results of operations, liquidity or capital resources. However, a significant increase in the number of these claims, or one or more successful claims under which the Company incurs greater liabilities than the Company currently anticipates, could materially and adversely affect the Company's business, financial condition, results of operations and cash flows.

10. Quarterly Financial Data (Unaudited)

Summarized unaudited quarterly financial data:

	2013			
	March 31	June 30	September 30	December 31
Revenue	\$ 726,751	\$ 816,786	\$ 826,907	\$ 844,147
Operating income	\$ 120,044	\$ 146,418	\$ 137,154	\$ 129,104
Net income	\$ 76,584	\$ 87,853	\$ 83,379	\$ 79,622
Basic earnings per share	\$ 2.47	\$ 2.84	\$ 2.70	\$ 2.57
Diluted earnings per share	\$ 2.45	\$ 2.82	\$ 2.66	\$ 2.53

	2012			
	March 31	June 30	September 30	December 31

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that information required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our co-Chief Executive Officers and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Evaluation of Disclosure Controls and Procedures

As of December 31, 2013, we carried out an evaluation, under the supervision and with the participation of our management, including our co-Chief Executive Officers and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our co-Chief Executive Officers and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Changes in Internal Control over Financial Reporting

There were no changes during the fiscal quarter ended December 31, 2013 in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Management's Annual Report on Internal Control over Financial Reporting

The management of Chipotle Mexican Grill, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2013, based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control - Integrated Framework (1992). Based on that assessment, management concluded that, as of December 31, 2013, our internal control over financial reporting was effective based on the criteria established in Internal Control - Integrated Framework (1992).

Our independent registered public accounting firm, Ernst & Young LLP, has issued an attestation report on the effectiveness of our internal control over financial reporting as of December 31, 2013. This report follows.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of

Chipotle Mexican Grill, Inc.

We have audited Chipotle Mexican Grill, Inc.'s (the Company) internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Chipotle Mexican Grill, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Chipotle Mexican Grill, Inc. as of December 31, 2013 and 2012, and the related consolidated statements of income and comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2013, and our report dated February 4, 2014 expressed an unqualified opinion thereon.

Table of Contents**ITEM 9B. OTHER INFORMATION**

None.

PART III**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Incorporated by reference from the definitive proxy statement for our 2014 annual meeting of shareholders, which will be filed no later than 120 days after December 31, 2013.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated by reference from the definitive proxy statement for our 2014 annual meeting of shareholders, which will be filed no later than 120 days after December 31, 2013.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS*Securities Authorized for Issuance Under Equity Compensation Plans*

The following table presents information regarding options and rights outstanding under our equity compensation plans as of December 31, 2013. All options/SOSARs reflected are options to purchase common stock.

	(a) Number of Securities to be Issued Upon Exercise of Outstanding Options and Rights ⁽¹⁾	(b) Weighted-Average Exercise Price of Outstanding Options and Rights ⁽¹⁾	(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in column (a)) ⁽²⁾
Equity Compensation Plans Approved by Security Holders:	1,760,851	\$ 312.44	2,262,454
Equity Compensation Plans Not Approved by Security Holders:	None.	N/A	None.
Total	1,760,851	\$ 312.44	2,262,454

(1) Includes shares issuable in connection with performance shares, which will be issued based on achievement of performance criteria associated with the awards, with the number of shares issuable dependent on our level of performance. The weighted-average exercise price in column (b) includes the weighted-average exercise price of stock options and SOSARs only.

(2) Includes 2,013,854 shares remaining available under the Chipotle Mexican Grill, Inc. 2011 Stock Incentive Plan, and 248,600 shares remaining available under the Chipotle Mexican Grill, Inc. Employee Stock Purchase Plan. In addition to being available for future issuance upon exercise of SOSARs or stock options that may be granted after December 31, 2013, all of the shares available for grant under the Chipotle Mexican Grill, Inc. 2011 Stock Incentive Plan may instead be issued in the form of restricted stock, restricted stock units, performance shares or other equity-based awards. Each share underlying a full value award such as restricted stock, restricted stock units or performance shares counts as two shares used against the total number of securities authorized under the plan.

Additional information for this item is incorporated by reference from the definitive proxy statement for our 2014 annual meeting of shareholders, which will be filed no later than 120 days after December 31, 2013.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Incorporated by reference from the definitive proxy statement for our 2014 annual meeting of shareholders, which will be filed no later than 120 days after December 31, 2013.
