Financial performance

Adjusted profit before tax increased by 12% to £5.5bn as PCB and Barclaycard continued to grow profits. This was partly offset by reduced income in the Investment Bank, which made progress on its origination-led strategy whilst driving cost savings and RWA efficiencies

Adjusted income decreased 8% while impairment reduced by

29% due to a £732m reduction in Non-Core to £168m and 8% reduction in the Core business

Total adjusted operating expenses decreased 9% to £18.1bn driven by savings from Transform programmes and favourable currency movements. Operating expenses excluding CTA were £16.9bn, down from £18.7bn in 2013 and ahead of the £17bn 2014 target

Adjusted attributable profit was £2.8bn, resulting in EPS of 17.3p

Core

RoE

was

9.2%

(or

10.9%

excluding

CTA)

Group RoE

was 5.1%

Barclays Non-Core attributable loss reduced by 43% to

£1.1bn, and RoE drag fell to 4.1%

Summary Group financials: Adjusted profits up 12%

1

EPS and RoE calculations are based on adjusted attributable profit, also taking into account tax credits on AT1 coupons | PERFORMANCE

requirements contained

BCBS in October 2014. **NSFR** disclosed semi-annually 4 LDR calculated for PCB, Africa Banking, Barclaycard and Non-Core retail 5 Excludes repurchase agreements

Highlights
Financial performance

PBT up 3% at £6.7bn:

PCB and Barclaycard profits up 29% and 13% respectively

Africa Banking profits down 6%, but up 13% on a constant currency basis

Investment Bank profits down 32% in a year of transition

Income fell 4% to £24.7bn

Impairment improved by 8% to £2.0bn, reflecting the improving UK economic environment benefitting PCB and reduced impairment in Africa Banking South Africa mortgages portfolio

Operating expenses down 6% to £16.1bn reflecting Transform savings across the businesses, partially offset by an increase in CTA spend, including restructuring of the branch network and technology improvements to increase automation in PCB

Core attributable profit was £3.9bn with Core EPS of 24p

Core RoE was 9.2% (10.9% excluding CTA) on average allocated equity of £42bn, up £6bn from 2013 Core business performing well

(13.2p)

(6.7p)

Highlights

Loss before tax reduced by 24% to £1,180m as improvements in impairments and costs were partially offset by significant declines in income due to sales and rundown of businesses, securities and loans and the non-recurrence of favourable fair value movements on derivatives

2013 CTA spend primarily reflects restructuring in Europe, with the subsequent savings flowing through 2014 operating expenses

The income and costs relating to Spain will exit on completion, with a c.£280m reduction in annualised income, offset by c.£240m saving in gross costs

Period end equity reduced by £4.1bn to £11.0bn

Reduced loss and lower allocated equity reduced drag on Group RoE to 4.1%, well within the 6% to 3% drag guidance

Continued shrinkage and capital return in Non-Core

Continued progress on the transition towards our target end-state capital structure Evolution of capital structure Fully loaded CRD IV capital position

Fully loaded CRD IV CET1 ratio at 10.3% (10.2% on PRA transitional basis) on track to meet our target of > 11% in 2016. The ratio was well in excess of the 7% PRA regulatory target

Robust buffers to contingent capital triggers

AT1 contingent capital: c.330bps or £13.3bn

T2

contingent

capital:

c.530bps

or

£21.5bn

As

we

build

CET1

capital

over

the

transitional

period,

we

expect

to

reach a range of 11.5-12% in end-state reflecting our intention to hold an internal management buffer of up to 150bps over

future

minimum

requirements

Transitional total capital ratio increased to 16.5% (2013: 15.0%), and fully loaded total capital ratio increased to 15.4% (2013: 13.9%)

Further clarity required on Total Loss Absorbing Capacity (TLAC) quantum and composition. In the interim, we continue to build towards our target end-state capital structure which assumes at least 17% of total capital; final requirements subject to PRA discretion

Barclays 2015 Pillar 2A requirement as per the PRA s Individual Capital Guidance (ICG) is 2.8%. The ICG is subject to at least annual review

CET1 of 1.6% (assuming 56%)

AT1 of 0.5% (assuming 19%)

T2 of 0.7% (assuming 25%)

The PRA consultation on the Pillar 2 framework (CP1/15), and Basel

Committee consultations and reviews of approaches to Pillar 1 and Pillar 2 risk might further impact the Pillar 2A requirement in the future 1.8% (£7.4bn) Legacy T1 3.5% (£14.3bn) T2 17% Total capital ratio CCCB/ Sectoral buffers 16.5% Total capital ratio 1.6% P2A Pillar 2A requirement 4.5% CET1 1.7% (£6.9bn) Legacy T1 Difference to fully loaded ratio of 10.3% arises from regulatory adjustment relating to unrealised gains 2 Being the higher of 7%

PRA expectation

and

CRD IV capital requirements 3 **CRD** IV rules on mandatory distribution restrictions apply from 1 January 2016 onwards based on transitional CET1 requirements 4 Based on the **CRD** IV CET1 transitional (FSA October 2012 statement) the ratio was 12.3% as at 31 December 2014 5 Barclays current

regulatory

target isto meet a FL **CRD** IV CET1 ratio of 9% by 2019, plus Pillar 2A add-on. Pillar 2A requirements for 2015 held constant out to end-state for illustrative purposes. The **PRA** buffer is assumed to be below the combined buffer requirement of 4.5% in endstate albeit this

might not be the case. CCCB, other systemic and sectoral buffer assumed to be zero 6 Point in time assessment made at least annually, by the PRA, to reflect idiosyncratic risks not fully captured under Pillar 1 Ι 2.5% Capital Conservation buffer Max 1.5% Internal buffer 2.0% AT1 (incl. P2A) 2.9% T2 (incl. P2A) 2.0% G-SII

3 5 4

ASSET QUALITY CREDIT RATING APPENDIX PERFORMANCE OVERVIEW LIQUIDITY & FUNDING CAPITAL & LEVERAGE 13

We intend to manage our CET1 capital ratio to mitigate against the risk of mandatory distribution restrictions

Mandatory restrictions to discretionary distributions will apply to all European banks, under CRD IV, from 1 January 2016 (Art. 162.2 of CRD)

As outlined in Art. 141 of CRD, mandatory distribution restrictions apply if an institution fails to meet the combined buffer requirement (CBR) at which point a Maximum Distributable Amount (MDA) is calculated on a reducing scale

CBR is phased in from 2016. In end state, we intend to hold an internal management buffer of up to 150bps above CBR providing prudent headroom to the mandatory distribution restriction point

As at 1 January 2016, mandatory distribution restrictions on interest payment would apply at 7.2%, stepping up to 10.6% by 2019 when the CRD IV transitional rules are fully phased in

Barclays expects to have full discretion in the allocation of permitted distributions within the MDA

leverage
exposure

1 (£bn) Highlights

Leverage exposures during Q4 14 decreased by £91bn to £1,233bn

Loans and advances and other assets decreased by £52bn to £713bn primarily due to a seasonal reduction in settlement balances of £28bn and a £13bn reduction in cash balances

SFTs decreased £35bn to £157bn driven by a £26bn reduction in IFRS reverse repurchase agreements and £9bn in SFT adjustments, reflecting deleveraging in BNC and a seasonal reduction in trading volumes

Total derivative exposures decreased £8bn due to a £16bn reduction in the potential future exposure (PFE), partially offset by an increase in IFRS derivatives and cash collateral PFE on derivatives decreased £16bn to £179bn mainly due to reductions in business activity and optimisations, including trade compressions and tear-ups. This was partially offset by an increase relating to sold options driven by a change to the basis of calculation Other derivatives exposures (excluding PFE) increased £8bn to £92bn driven by an increase in IFRS derivatives of £57bn to £440bn and cash collateral £13bn to £73bn. This was broadly offset by increases in allowable derivatives netting

Losses arise at OpCo, and are transmitted to HoldCo through write-down of intercompany instruments

Losses at HoldCo are limited to its investment in the OpCo

Losses should be allocated in accordance with the insolvency hierarchy, meaning *pari passu* treatment of equal-ranked internal and external claims

No creditor worse off than in insolvency safeguard expected to apply for senior unsecured debt Expected creditor hierarchy during transition Barclays position Barclays has started to issue capital and term senior unsecured debt out of Barclays PLC, the Holding Company To better align the credit proposition between investors in HoldCo and OpCo securities during the transition period, proceeds raised by Barclays PLC have been used to subscribe for capital and senior unsecured term debt in Barclays Bank PLC with corresponding ranking As the HoldCo is a creditor of the OpCo alongside OpCo external creditors, respecting the creditor hierarchy should require pari passu treatment between internally and externally OpCo issued capital and debt of the same rank 1 Maturing capital and term senior unsecured debt to be refinanced out of HoldCo during the transition period, making the external creditor hierarchy simpler post transition Transition towards a holding company capital and funding model Barclays Bank PLC (OpCo) External capital External equity External senior Subscription of internal OpCo issued equity, capital and debt

2

st OpCo Equity nd OpCo external & intercompany AT1 3 rd OpCo external & intercompany T2 4 th OpCo external & intercompany senior unsecured debt External OpCo senior External OpCo capital 1 Based on Barclays expectations of the creditor hierarchy in a resolution scenario; assumes internal subordination not imposed during transition 2 Internal issuance in each case

Barclays PLC Parent Company Balance Sheet

Extract from notes to Parent Company Balance Sheet

46 Barclays PLC (the Parent Company)

Investment in subsidiary

The investment in subsidiary of £33,743m (2013: £30,059m) represents investments made into Barclays Bank PLC, including £4,326m (2013: £2,063m) of Additional Tier 1 (AT1) securities. The increase of £3,684m during the year was due to a £2,263m increased holding in Barclays Bank PLC issued securities and a further cash contribution of £1,421m. Loans and advances to subsidiary and debt securities in issue During the period, Barclays PLC issued £810m equivalent of Fixed Rate Subordinated Notes (Tier 2) and £2,056m equivalent of Fixed Rate Senior Notes accounted for as subordinated liabilities and debt securities in issue respectively. The proceeds raised through these transactions were used, respectively, to subscribe for £810m equivalent of Fixed Rate Subordinated Notes (Tier 2) issued by Barclays Bank PLC, and to make £2,056m equivalent of Fixed Rate Senior Loans to Barclays Bank PLC, in each case with a ranking corresponding to the notes issued by Barclays PLC.

Proactive transition towards a HoldCo funding and

capital model positions us well to meet potential future TLAC requirements

While requirements remain to be set, Barclays current expectation is a multi-year conformance period

Good portion of OpCo term senior unsecured debt maturing before 2019 which can be refinanced from HoldCo

Based on Barclays current interpretation of TLAC requirements,

proxy

TLAC

ratio

at

24%

4

on

the

assumption that Barclays Bank PLC term nonstructured senior unsecured debt is refinanced from HoldCo and subordinated to OpCo excluded liabilities

Currently do not intend to use HoldCo senior unsecured debt proceeds to subscribe for OpCo liabilities on a subordinated basis until required to do so

The future TLAC-ratio will further benefit from CET1 capital growth and AT1 issuance towards end-state expectations

As TLAC rules are finalised and as we approach implementation date, we will assess the appropriate composition and quantum of our future TLAC stack

High quality liquidity pool (£bn) Key messages

Further strengthened liquidity position with the Group liquidity pool up by £22bn to £149bn, building a larger surplus to the internal Liquidity Risk Appetite

Quality of the pool remains high: 82% held in cash, deposits with central banks and high quality government bonds

Over 95% of government bonds are securities issued by UK, US, Japanese, French, German, Danish, Swiss and Dutch sovereigns

Even though not a regulatory requirement, the size of our liquidity pool is almost double that of wholesale debt maturing in less than a year

Additional significant sources of contingent funding in the form of high quality assets pre-positioned with central banks globally

Continued strengthening of estimated CRD IV/Basel 3 liquidity ratios:

Estimated LCR increased to 124%, mainly due to the increase in the size of the liquidity pool, resulting in a £30bn surplus above the future 100% requirement Estimated NSFR strengthened to 102%, primarily driven by the progress on run-down of Non-Core Maintaining a robust liquidity position, with pool well in excess of internal and external minimum requirements Estimated

31

CREDIT RATING

Barclays Full Year 2014 Fixed Income Investor Presentation

Potential outflows related to a multiple-notch credit downgrade are included in the liquidity risk appetite (LRA)

The table on the left hand side shows contractual collateral requirements and contingent obligations following potential future one and two notch long-term and associated short-term simultaneous downgrades across all credit rating agencies

During the year the Group strengthened its liquidity position, building a larger surplus to its liquidity risk appetite

This positions the Group well for any potential contractual or behavioural outflows as a consequence of the potential loss of A-1/P-1 short term ratings for Barclays Bank PLC as credit rating agencies assess sovereign support notches in their ratings Behavioural outflows

Contractual outflows

Financial performance

Strong customer number and asset growth across all geographies

Income increased 6%, reflecting growth in the UK consumer and merchant, Germany and US businesses, partially offset by depreciation of average USD against GBP

NII increased 8% to £3bn driven by volume growth; NIM decreased to 8.75% from 8.99% due to a change in product mix and impact of promotional offers

Impairment increased 8% due to asset growth and enhanced coverage for forbearance. Delinquency rates remained broadly stable and the loan loss rate reduced 24bps to 308bps

Costs broadly flat despite continued investment in the business

RoE increased to 16%

Net L&A increased 16% reflecting growth across all geographies, including the impact of promotional offers and the acquisition of portfolios in the US

14% growth in customers and 9% increase in payments processed

Barclaycard: Profits up 13%

LEVERAGE
In line with the European Bank Recovery & Resolution
Directive the UK Banking Act now includes a statutory

bail-in power 51

Under Depositor Preference, the BRRD introduces seniority of deposits from natural persons and SMEs over wholesale liabilities

The scope of the UK bail-in power extends to include all outstanding unsecured wholesale liabilities of original tenor greater than 7 days

Liabilities issued prior to the introduction of the statutory bail-in power, including those issued under non-EEA governing laws, may be subject to bail-in upon its introduction irrespective of issuance date, unless they are excluded liabilities (i.e. all

outstanding unsecured liabilities with an original tenor greater than 7 days may be subject to bail-in Guiding principle is that the ordinary creditor hierarchy should be respected and that creditors holding eligible liabilities of equal rank should be treated equally

In light of Article 55 of the BRRD, and as requested by the PRA, Barclays has begun the process of including in the terms of its wholesale term debt securities, governed by non-EEA laws, a provision acknowledging the scope of the UK bail-in power

Note, the inclusion of such an acknowledgement is not intended to change the ranking or treatment of such non-EEA law governed instruments relative to EEA law governed instruments in respect of a UK bail-in, rather it clarifies that all such instruments should be treated equally in the event of a UK bail-in

Barclays Full Year 2014 Fixed Income Investor Presentation APPENDIX

Statutory bail-in of debt is a key part of the regulatory response to the financial crisis, aimed at avoiding the bail-out of failing financial institutions with tax-payer funds

European Bank Recovery and Resolution Directive (BRRD):

a European-wide framework for the recovery and resolution of credit institutions and investment firms:

UK Banking Act: in line with the BRRD, the UK Banking Act was amended in January 2015 to include a bail-in option

available to the UK resolution authority, enabling it recapitalise a failed institution by allocating losses to its shareholders and unsecured creditors by writing down and/or converting their claims to equity:

Certain liabilities excluded from scope, such as insured deposits, secured liabilities (Section 48B(8))

Powers to be exercised broadly in a manner that respects the hierarchy of claims in liquidation

Principle that at least senior creditors should receive no less favourable treatment than they would have received in an insolvency

Statutory bail-in power in respect of eligible liabilities, to be implemented in home state legislation by no later than 1 January 2016 (Article 130)

Requirement for eligible liabilities governed by non-EEA laws to include a contractual recognition by creditors that they are bound by any exercise of the statutory bail-in power (Article 55)
