Darin G. Billerbeck, President and Chief Executive Officer, said, Growth in the fourth quarter and second half of 2016 was led by the overall consumer market and the ramp of our flagship win at a major consumer OEM. The higher consumer volumes combined with targeted manufacturing efficiencies allowed us to deliver a 57.7% gross margin for the full year 2016, up from 54.2% in the prior year. Our long term growth will be based on a combination of new consumer design wins along with continuous growth in our industrial and communications businesses focused on new applications such as medical devices, virtual and augmented reality, along with wireless connectivity. Smart connectivity, made easy.

Max Downing, Interim Chief Financial Officer, added, We made significant progress in 2016 on better aligning our operating expenses, while further improving our cash flow generation. During 2016 we generated \$41.7 million in cash flows from operations and ended the year with \$116.9 million in cash and short-term investments. We intend to remain focused on maximizing the leverage of our operating model and reducing our outstanding debt balance.

Forward-Looking Statements Notice:

The foregoing paragraphs contain forward-looking statements that involve estimates, assumptions, risks and uncertainties. Any statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. Such forward-looking statements include statements relating to: our expectation that our long term growth will be based on a combination of new consumer design wins along with continuous growth in our industrial and communications businesses focused on new applications such as medical devices, virtual and augmented reality, along with wireless connectivity. Other forward-looking statements may be indicated by words such as will, could, should, would, may, expect, plan, project, anticipate, future. believe. estimate, predict, propose, potential, continue or the negative of these terms or other comp terminology; and our expectation that we will remain focused on maximizing the leverage of our operating model and reduce our outstanding debt balance. Lattice believes the factors identified below could cause actual results to differ materially from the forward-looking statements.

Estimates of future revenue are inherently uncertain due to, among other things, the high percentage of quarterly turns business. In addition, revenue is affected by such factors as global economic conditions, which may affect customer demand, pricing pressures, competitive actions, the demand for our Mature, Mainstream and New products, and in particular our iCE40 and MachXO3L devices, the ability to supply products to customers in a timely manner, changes in our distribution relationships, or the volatility of our consumer business. Actual gross margin percentage and operating expenses could vary from the estimates on the basis of, among other things, changes in revenue levels, changes in product pricing and mix, changes in wafer, assembly, test and other costs, including commodity costs, variations in manufacturing yields, the failure to sustain operational improvements, the actual amount of compensation charges due to stock price changes. Any unanticipated declines in revenue or gross margin, any unanticipated increases in our operating expenses or unanticipated charges could adversely affect our profitability.

In addition to the foregoing, other factors that may cause actual results to differ materially from the forward-looking statements in this press release include disruptions of our businessarising from theannouncement and pendency of our proposed acquisition by Canyon Bridge Capital Partners, Inc., global economic uncertainty, overall semiconductor market conditions, market acceptance and demand for our new products, the Company s dependencies on its silicon wafer suppliers, the impact of competitive products and pricing, technological and product development risks, the failure to achieve the anticipated benefits and synergies of the Silicon Image transaction. In addition, actual results are subject to other risks and uncertainties that relate more broadly to our overall business, including those risks more fully described in Lattice s filings with the SEC including its annual report on Form 10-K for the fiscal year ended January 2, 2016, and Lattice s quarterly reports filed on Form 10-Q.

You should not unduly rely on forward-looking statements because actual results could differ materially from those expressed in any forward-looking statements. In addition, any forward-looking statement applies only as of the date on which it is made. The Company does not intend to update or revise any forward-looking statements, whether as a result of events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Non-GAAP Financial Measures:

Included within this press release and the accompanying tables and notes are non-GAAP financial measures that supplement the Company s consolidated financial information prepared in accordance with U.S. GAAP. The non-GAAP measures presented exclude charges and adjustments primarily related to stock-based compensation, restructuring charges, acquisition-related charges, amortization of acquired intangible assets, purchase accounting adjustments, impairment of goodwill and intangible assets, gain on the sale of a business unit, and the estimated tax effect of these items. These charges and adjustments may or may not be infrequent or nonrecurring in nature but are a result of periodic or non-core operating activities of the Company. The Company describes these non-GAAP financial measures and reconciles them to the most directly comparable GAAP measures in the tables and notes attached to this press release.

The Company s management believes that these non-GAAP financial measures provide an additional and useful way of viewing aspects of our performance that, when viewed in conjunction with our GAAP results, provide a more comprehensive understanding of the various factors and trends affecting our ongoing financial performance and operating results than GAAP measures alone. In particular, investors may find the non-GAAP measures useful in reviewing our operating performance without the significant accounting charges resulting from the Silicon Image acquisition, alongside the comparably adjusted prior year results. Management also uses these non-GAAP measures for strategic and business decision-making, internal budgeting, forecasting, and resource allocation processes and believes that investors should have access to similar data when making their investment decisions.

In addition, the Company uses Adjusted EBITDA to measure compliance with certain of its debt covenants. These non-GAAP measures are included solely for informational and comparative purposes and are not meant as a substitute for GAAP and should be considered together with the consolidated financial information located in the tables attached to this press release.
