Item 2.03 Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant

On April 12, 2016 (the “Issuance Date”), Public Storage (the “Company”) entered into a Note Purchase Agreement (the “Purchase Agreement”) with the signatories thereto (the “Purchasers”), pursuant to which the Company issued €100,000,000 in aggregate principal amount of 1.54%, Euro-denominated, senior unsecured notes of the Company due April 12, 2024 (the “Notes”) in a private placement to the Purchasers on the Issuance Date.

The Purchasers are institutional accredited investors and the Notes were sold pursuant to an exemption from registration provided by Section 4(2) of the Securities Act of 1933, as amended (the “Securities Act”). The Notes have not been and will not be registered under the Securities Act and may not be offered or sold in the United States absent registration or an applicable exemption from registration under the Securities Act. The Notes will rank pari passu in right of payment with all other unsecured and unsubordinated indebtedness of the Company, except for those obligations that are mandatorily preferred by law.

Interest on the Notes will accrue from the Issuance Date, and the Company will pay interest semiannually on April 12 and October 12 of each year, beginning on October 12, 2016, until the Notes mature. The Company may prepay some or all of the Notes from time to time, subject to make-whole, swap breakage and other applicable provisions set forth in the Purchase Agreement. The Company’s obligations under the Notes may be required to be guaranteed from time to time by certain subsidiaries of the Company.

The Purchase Agreement contains customary representations, warranties and covenants, including certain covenants that may have the effect of limiting the ability of the Company and/or its subsidiaries to, among other things, enter into certain transactions with their affiliates, merge with or sell, lease or otherwise dispose of all or substantially all of their assets to certain third parties where the Company is not the surviving entity, create certain new liens, incur certain additional indebtedness and make certain investments. The Purchase Agreement also requires the Company to maintain certain financial ratios. These covenants contain important exceptions, limitations and qualifications set forth in the Purchase Agreement.

Events of default under the Purchase Agreement include, but are not limited to (i) a default in the payment of principal of the Notes, or the make-whole amount or any net loss on swap breakage in the event of a prepayment; (ii) a default in the payment of interest following a period of five business days; (iii) a breach of the Company’s covenants or warranties under the Purchase Agreement or any subsidiary guarantor under any guaranty agreement (subject to cure or commencement of cure within applicable cure periods in certain cases); (iv) any payment default or acceleration of recourse indebtedness of the Company or any subsidiary if the total amount of such indebtedness unpaid or accelerated exceeds \$150 million; (v) events of bankruptcy, insolvency or liquidation involving the Company or its material subsidiaries; (vi) any subsidiary guaranty agreement ceases to be in full force and effect or any subsidiary guarantor contests or denies the validity of its obligations under a subsidiary guaranty agreement; (vii) the occurrence of a final judgment in an aggregate amount in excess of \$100 million, rendered against the Company or one or more of its subsidiaries; and (viii) the failure to maintain funding standards in ERISA based plans and certain other liabilities related to ERISA based plans that result in a material adverse effect on the Company.

The Company intends to use the proceeds of the sale of the Notes for general corporate purposes.
