Item 8.01 Other Events.

The Company has reassessed the application of ASC 470-20, *Debt with Conversion and Other Options* as it relates to the 8% Series A Redeemable Convertible Preferred Stock Offering completed in January 2011 (the January 2011 Preferred Offering). The Company received gross proceeds from the January 2011 Preferred Offering of approximately \$5.1 million in which it sold 5,000 shares of 8% redeemable convertible preferred stock with a stated value of \$1,000 per share, each share convertible into 92.5926 shares of common stock, and warrants to purchase up to approximately 463,000 shares of common stock. All 5,000 shares of preferred stock sold in the January 2011 Preferred Offering were subsequently converted into the stated number of common stock shares as of August 2011. ASC 470-20 requires the Company to value the preferred stock and common stock warrants, any resulting beneficial conversion feature(s) resulting from the valuation of these securities and to determine and record the value of each of these securities or conversion feature as debt or equity based on the interpretation and application of ASC 470-20.

The Company allocated the proceeds of the Offering between the redeemable preferred stock and the warrants based on fair value and correctly recorded the redeemable preferred stock as a liability (debt), but did not consider the

embedded beneficial conversion feature (BCF) associated with the redeemable preferred stock. ASC 470-20 required the Company to record a BCF of approximately \$5 million at the time of issuance of the \$5 million convertible Preferred Stock offering and to amortize the BCF as non-cash interest expense over the conversion period. Since all 462,960 shares were converted by August 8, 2011, the entire \$5 million of BCF should have been amortized as interest expense during 2011. As a result, the Company's interest expense and net loss were understated by \$5 million. The error had no effect on cash, cash flows or total shareholders' equity during 2011 and had no effect on cash, cash flows, net income or total shareholders' equity for any subsequent periods. After considering the quantitative and qualitative effects of the errors to the 2011 annual financial statements, as well as the quarterly period financial statements within 2011, in the opinion of management the error is not material to assessing the financial condition or operations of the Company. The Company has adjusted additional paid-in capital and a corresponding offset to retained earnings on the September 30, 2013 and December 31, 2012 balance sheets to reflect this adjustment.
