WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

1. General

The accompanying unaudited condensed consolidated financial statements of Weatherford International Ltd. (the "Company") are prepared in accordance with U.S. generally accepted accounting principles and include all adjustments of a normal recurring nature which, in the opinion of management, are necessary to present fairly our Condensed Consolidated Balance Sheet at September 30, 2012, Condensed Consolidated Statements of Operations, Condensed Consolidated Statements of Comprehensive Income and Condensed Consolidated Statements of Cash Flows for the three and nine months ended September 30, 2012 and 2011. When referring to "Weatherford" and using phrases such as "we", "us", and "our", the intent is to refer to Weatherford International Ltd., a Swiss joint-stock company, and its subsidiaries as a whole or on a regional basis, depending on the context in which the statements are made.

Although we believe the disclosures in these financial statements are adequate to make the interim information presented not misleading, certain information relating to our organization and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to U.S. Securities and Exchange Commission ("SEC") rules and regulations. These financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2011 in our Annual Report restated on Form 10-K/A. The results of operations for the three and nine months ended September 30, 2012 are not necessarily indicative of the results expected for the year ending December 31, 2012.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period and disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and assumptions, including those related to uncollectible accounts receivable, lower of cost or market of inventories, equity investments, intangible assets and goodwill, property, plant and equipment, income taxes, percentage-of-completion accounting for long-term contracts, self-insurance, pension and post retirement benefit plans, contingencies and share-based compensation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Principles of Consolidation

We consolidate all wholly-owned subsidiaries, controlled joint ventures and variable interest entities where the Company has determined it is the primary beneficiary. Investments in affiliates in which we exercise significant influence over operating and financial policies are accounted for using the equity method. All material intercompany accounts and transactions have been eliminated in consolidation.

Prior Restatements

We identified a material weakness in our internal controls over the accounting for income taxes during 2010 and 2011 that resulted in material errors in our income tax accounts. The correction of these errors resulted in the restatement of our previously reported financial statements for the years ended December 31, 2009 and 2008, and our condensed consolidated financial statements for each quarter within 2010 and 2009 (the "2010 restatement") and for the years ended December 31, 2010 and 2009 and our condensed consolidated financial statements for each quarter within 2011 and 2010 (the "2011 restatement"). During 2012, in connection with the preparation of our first and second quarter financial statements and our ongoing income tax remediation activities, we identified additional errors related to prior years. Due to the continued accumulation of these errors, the Audit Committee of our Board of Directors concluded, on July 24, 2012, that investors should no longer rely upon our previously issued financial statements. Management determined that the Company would delay filing restated financial statements for 2011 and the first quarter of 2012, as well as interim financial statements for the second and third quarters of 2012, until significant procedures and reviews

of our accounting for income taxes were performed. As a result of these additional procedures, we identified additional errors across multiple jurisdictions resulting in further restatement of our previously issued financial statements for the years ended December 31, 2011, 2010 and 2009 and our condensed consolidated financial statements for the first quarter of 2012 and each quarter within 2011 and 2010 (the "2012 restatement"). Prior to filing this Quarterly Report on Form 10-Q for the quarter ended September 30, 2012, we filed an amended Annual Report on Form 10-K/A for the year ended December 31, 2011 and an amended Quarterly Report on Form 10-Q/A for the quarter ended March 31, 2012 to reflect the 2012 restatement.

We have also restated our previously issued financial statements for the three months ended March 31, 2012 to correct errors in revenue and operating income associated with the early production facility construction contract discussed in Note 3. Under the accounting guidance applicable to construction-type contracts, claims arising from construction contracts that have or will be made against customers for costs incurred in excess of current contract provisions can be recognized as revenue, to the extent of cost incurred, when the contract or other evidence provides a legal basis for the claim, the additional costs were caused by circumstances that were unforeseen at the contract date and are not the result of deficiencies in our performance, claim-related costs are identifiable and considered reasonable in view of the work performed, and evidence supporting the claim is objective and verifiable. During the three months ended March 31, 2012, we included in our revenue estimates claims and unapproved change orders for the recovery of cost overruns that did not meet this recognition criteria. In addition, we did not include in our revenue estimates liquidated damages that we are contractually obligated to pay as a result of delays in the expected completion of the project. With the removal of these amounts from estimated revenue, estimated costs to be incurred under the contract exceed estimated revenue to be earned under contract, and therefore the anticipated loss on the contract as of March 31, 2012 should have been recorded in full during the three months ended March 31, 2012. The correction of these errors is reflected in our amended Quarterly Report on Form 10-Q/A for the quarter ended March 31, 2012.

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

2. Business Combinations and Dispositions

We have acquired businesses we feel are important to our long-term strategy. Results of operations for acquisitions are included in the accompanying Condensed Consolidated Statements of Operations from the date of acquisition.

The balances included in the Condensed Consolidated Balance Sheets related to recent acquisitions are based on preliminary information and are subject to change when final asset valuations are obtained and potential liabilities have been evaluated. The purchase price is allocated to the net assets acquired based upon their estimated fair values at the date of acquisition.

In May 2012, we acquired a company that designs and produces well completion tools. As purchase consideration, we paid \$28 million in cash, issued three million shares valued at approximately \$39 million, settled a previously existing note receivable for \$16 million and entered into a contingent consideration arrangement initially valued at approximately \$11 million that will be settled in early 2015. This contingent consideration arrangement is dependent on the market price of our common stock and the resulting obligation will be marked to market in each reporting period prior to settlement. The change in the fair value of the contingent consideration arrangement has been immaterial since the acquisition. As of September 2012, the valuation of the acquired assets, liabilities and contingent consideration was not yet complete. During the nine months ended September 30, 2012, we also acquired other businesses and equity investments for cash consideration of \$136 million, net of cash acquired.

During the nine months ended September 30, 2012, we completed the sale of our subsea controls business in exchange for an equity investment valued at \$173 million in an entity that is positioned to provide complete subsea solutions to clients. We recognized a \$28 million gain from the transaction which was not subject to income taxes. The major classes of assets sold included \$39 million of accounts receivable and other current assets, \$38 million of inventories, \$5 million of property plant and equipment and \$74 million of goodwill. Liabilities of \$13 million were also transferred in the sale.

3. Loss Contract

During the nine months ended September 30, 2012, we recognized losses of \$87 million (\$0.11 per share) related to a long-term early production facility construction contract in Iraq accounted for under the percentage-of-completion method. As of September 30, 2012, we have claims against our customer of \$73 million that are not included in our revenue estimates because they do not meet the criteria for recognition under the guidance applicable to construction-type contracts. Additionally, we have accrued \$17 million for liquidated damages that we are contractually obligated to pay as a result of delays in the expected completion of the project. Although we have not yet met the recognition criteria for revenue recognition, we expect to vigorously pursue collection of the claims and reduction or elimination of the liquidated damages. Any benefits resulting from those efforts will be recognized when the criteria for the revenue recognition are met.

4. Accounts Receivable Factoring

During the three and nine months ended September 30, 2012, a subsidiary in our Latin America segment factored approximately \$96 million and \$147 million, respectively, of accounts receivables under the program we entered into in 2010. We received \$136 million in proceeds and recognized an immaterial loss on these sales. These transactions qualified for sale accounting under the applicable accounting standards and the proceeds received through September 30, 2012 are included in operating cash flows in our Condensed Consolidated Statement of Cash Flows. We did not factor receivables in the nine months ended September 30, 2011.

5. Inventories

The components of inventory were as follows:

	September	
	30,	December
	2012	31, 2011
	(In millions)	
Raw materials, components and supplies	\$463	\$ 443
Work in process	210	149
Finished goods	3,003	2,566
	\$3,676	\$ 3,158

Work in process and finished goods inventories include cost of materials, labor and manufacturing overhead. During the three and nine months ended September 30, 2012 we recognized a charge of \$29 million to reduce the carrying value of our guar inventory to the lower of cost or market. This loss is classified in cost of products within our Condensed Consolidated Statements of Operations. During the nine months ended September 30, 2012, we also recognized a charge for excess and obsolete inventory of \$64 million (\$0.08 per share).

7

Table of contentsWEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

6. Goodwill

We perform an impairment test for goodwill and indefinite-lived intangible assets annually as of October 1, or more frequently if indicators of potential impairment exist. Our goodwill impairment test involves a comparison of the fair value of each of our reporting units with its carrying amount. Fair value is estimated using discounted cash flows and a discount rate based on the weighted average cost of capital of the reporting unit. Our reporting units are based on our regional structure and consist of the United States, Canada, Latin America, Europe, Sub-Sahara Africa ("SSA"), Russia, Middle East/North Africa ("MENA") and Asia Pacific.

During the three months ended June 30, 2012, we noted a sustained decline in the market price of our registered shares such that our market capitalization was lower than our total shareholders' equity for an extended period.

Additionally, certain of our reporting units were not performing at the levels previously expected. In response, we considered the associated circumstances to assess whether an event or change occurred that, more likely than not, reduced the fair value of any of our reporting units below their carrying amount. After considering the relevant circumstances, we concluded that the decline in our market capitalization was a potential indicator of impairment and we prepared the analysis necessary to identify potential impairment through the comparison of reporting unit fair values and carrying amounts. This "step one" analysis, indicated that the goodwill attributed to our MENA and SSA reporting units was potentially impaired. Consequently, we performed the "step two" analysis of the goodwill impairment test, comparing the implied fair value of reporting unit goodwill with the carrying amount of that goodwill. The "step two" analysis indicated that the goodwill for both reporting units was fully impaired and we recognized an impairment loss of \$589 million in the second quarter of which \$512 million was attributable to MENA and \$77 million to SSA. We recognized a tax benefit of \$1 million for these impairment losses.

The changes in the carrying amount of goodwill by segment for the nine months ended September 30, 2012, were as follows:

	North America	MENA/Asia Pacific	Europe/ SSA/ Russia	Latin America	Total
	(In millions)				
As of December 31, 2011	\$2,272	\$ 743	\$ 1,024	\$ 384	\$4,423
Acquisitions	40		32		72
Disposals	(2)	(7)	(65)		(74)
Impairment loss		(512)	(77)		(589)
Purchase price and other adjustments	(18)			(21)	(39)
Foreign currency translation	39	3	17	(6)	53
As of September 30, 2012	\$2,331	\$ 227	\$ 931	\$ 357	\$3,846

7. Equity Investments

In connection with our goodwill impairment test, we prepared an analysis to determine the fair value of our equity investments in less than majority owned entities. Upon completion of this valuation, we determined that the fair value attributable to certain equity investments was significantly below our carrying value for these investments. We assessed these declines in value as other than temporary and recognized an impairment loss of \$204 million with no corresponding tax benefits during the nine months ended September 30, 2012.

8. Short-term Borrowings and Current Portion of Long-term Debt

The components of short-term borrowings were as follows:

September	December
30,	31,

Edgar Filing: Weatherford International Ltd./Switzerland - Form 10-Q

	2012	2011
	(In millions)	
Commercial paper	\$1,235	\$ 997
Other short-term bank loans	32	14
Total short-term borrowings	1,267	1,011
Current portion of long-term debt	339	309
Short-term borrowings and current portion of long-term debt	\$1,606	\$ 1,320

We maintain a \$2.25 billion unsecured, revolving credit agreement (the "Credit Agreement") with JPMorgan Chase Bank, N.A., as administrative agent. The Credit Agreement has a scheduled maturity date of July 13, 2016, and can be used for a combination of borrowings, support for our commercial paper program and issuances of letters of credit. This agreement requires us to maintain a debt-to-capitalization ratio of less than 60% and it limits our total debt to \$10 billion while our financial reporting is not current. We are in compliance with these covenants at September 30, 2012.

8

Table of contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

On April 16, 2012, we increased the size of our commercial paper program to \$2.25 billion from \$1.5 billion. From time to time, we use the commercial paper program to issue short-term, unsecured notes. Our commercial paper issuances are supported by the Credit Agreement. At September 30, 2012, our borrowings under our commercial paper program had a weighted average interest rate of 0.55% and there were \$99 million in outstanding letters of credit under the Credit Agreement.

We have short-term borrowings with various domestic and international institutions pursuant to uncommitted facilities. At September 30, 2012, we had \$32 million in short-term borrowings under these arrangements with a weighted average interest rate of 5.40%. In addition, we had \$531 million of letters of credit under various uncommitted facilities and \$112 million of performance bonds issued by financial sureties against an indemnification from us at September 30, 2012.

The carrying value of our short-term borrowings approximates their fair value as of September 30, 2012. The current portion of long-term debt at September 30, 2012 includes \$295 million of 5.15% Senior Notes due March 2013 and other long-term debt of \$44 million.

On April 4, 2012, we completed a \$1.3 billion long-term debt offering comprised of (1) \$750 million of 4.5% Senior Notes due 2022 and (2) \$550 million of 5.95% Senior Notes due 2042. The net proceeds from this offering were used to repay short-term indebtedness under our commercial paper program and for general corporate purposes.

In August 2012, as a result of the delay in filing our second quarter report on Form 10-Q and potential delay in filing our third quarter report on Form 10-Q, we sought consents from the holders of our Senior Notes to extend the due date under the Senior Note indentures for providing our Form 10-Q filings to no later than March 31, 2013. We received sufficient consents to apply this extension to all series of our publicly traded Senior Notes. We offered a cash payment of \$2.50 for each \$1,000 in principal amount for those note holders who consented to the extension and we paid approximately \$18 million to the holders of our Senior Notes in connection with this consent solicitation, which will be recognized as an increase in interest expense over the remaining terms of the Senior Notes. We also incurred and expensed in the three months ended September 30, 2012 other costs of \$12 million in connection with the consent solicitation.

9. Fair Value of Financial Instruments

Financial Instruments Measured and Recognized at Fair Value

We estimate fair value at a price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market for the asset or liability. Our valuation techniques require inputs that we categorize using a three level hierarchy, from highest to lowest level of observable inputs.

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities. Level 2 inputs are quoted prices or other market data for similar assets and liabilities in active markets, or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based upon our own judgment and assumptions used to measure assets and liabilities at fair value. Classification of a financial asset or liability within the hierarchy is determined based on the lowest level of input that is significant to the fair value measurement. Other than disclosed below under derivative instruments, we had no assets or liabilities measured and recognized at fair value on a recurring basis at September 30, 2012 and December 31, 2011.

Fair Value of Other Financial Instruments

Our other financial instruments include short-term borrowings and long-term debt. The carrying value of our commercial paper and other short-term borrowings approximates their fair value due to the short-term duration of the

associated interest rate periods. These short-term borrowings are classified as Level 2 in the fair value hierarchy.

The fair value of our long-term debt fluctuates with changes in applicable interest rates. Fair value will exceed carrying value when the current market interest rate is lower than the interest rate at which the debt was originally issued. The fair value of our long-term debt is a measure of its current value under present market conditions and is established based on observable inputs in non-active markets. Our long-term debt is classified as Level 2 in the fair value hierarchy.

9

Table of contentsWEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The fair value and carrying value of our long-term debt and current portion of long-term debt is as follows:

	September 30, 2012	December 31, 2011
Fair value	\$8,342	\$ 7,270
Carrying value	7,639	6,595

(In millions)

10. Derivative Instruments

We are exposed to market risk from changes in foreign currency and changes in interest rates. From time to time, we may enter into derivative financial instrument transactions to manage or reduce our market risk. We manage our debt portfolio to achieve an overall desired position of fixed and floating rates and we may employ interest rate swaps as a tool to achieve that goal. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions. In light of events in the global credit markets and the potential impact of these events on the liquidity of the banking industry, we continue to monitor the creditworthiness of our counterparties, which are multinational commercial banks.

The fair values of all our outstanding derivative instruments are determined using a model with Level 2 inputs including quoted market prices for contracts with similar terms and maturity dates.

Fair Value Hedges

We may use interest rate swaps to help mitigate exposures related to changes in the fair values of the associated debt.

Amounts paid or received upon termination of interest rate swaps accounted for as fair value hedges represent the fair value of the agreements at the time of termination and are recorded as an adjustment to the carrying value of the related debt. These amounts are amortized as a reduction, in the case of gains, or as an increase, in the case of losses, of interest expense over the remaining term of the debt.

In July 2011, we entered into interest rate swap agreements to pay a variable interest rate and receive a fixed interest rate with an aggregate notional amount of \$300 million. These swaps were designated as fair value hedges of our 6.35% Senior Notes due in 2017. In June 2012 these swaps were terminated. As a result of these terminations, we received a cash settlement of \$18 million. The gain associated with these interest rate swap terminations was deferred and is being amortized over the remaining term of our 6.35% Senior Notes as a reduction in interest expense.

As of September 30, 2012, including the gain discussed above, we had net unamortized gains of \$56 million associated with interest rate swap terminations. These gains are being amortized over the remaining term of the originally hedged debt as a reduction in interest expense.

Cash Flow Hedges

In 2008, we entered into interest rate derivative instruments to hedge projected exposures to interest rates in anticipation of a debt offering. Those hedges were terminated at the time of the issuance of the debt, and the loss on these hedges is being amortized from Accumulated Other Comprehensive Income (Loss) into interest expense over the remaining term of the debt. As of September 30, 2012, we had net unamortized losses of \$12 million associated with our cash flow hedge terminations.

Other Derivative Instruments

As of September 30, 2012, we had foreign currency forward contracts with notional amounts aggregating to \$951 million. These contracts were entered into to hedge exposure to currency fluctuations in various foreign currencies. The total estimated fair value of these contracts and amounts receivable or owed associated with closed contracts resulted in a net liability of approximately \$3 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in Other, Net in the accompanying Condensed Consolidated Statements of Operations.

10

Table of contentsWEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

We have cross-currency swaps between the U.S. dollar and Canadian dollar to hedge certain exposures to the Canadian dollar. At September 30, 2012, we had notional amounts outstanding of \$168 million. The total estimated fair value of these contracts at September 30, 2012, resulted in a liability of \$36 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in Other, Net in the accompanying Condensed Consolidated Statements of Operations.

The fair values of outstanding derivative instruments are summarized as follows:

	September		
	30,	31,	
	2012	2011	Classifications
	(In millions)		
Derivative assets designated as hedges:

Dividends Paid to Noncontrolling Interests	—	—	—	—	—	(22)	(22)		
Shares Issued for Acquisitions	6	63	—	—	65	—	134		
Equity Awards Granted, Vested and Exercised	—	(11)	—	—	68	—	57		
Deconsolidation of Joint Ventures	—	—	(10)	—	—	(29)	(39)		
Other	2	(2)	1	—	—	1	2		
Balance at September 30, 2011	\$ 769	\$4,667	\$ 4,142	\$ 100	\$ (345)	\$ 27	\$ 9,360		
Balance at December 31, 2011			\$769	\$4,675	\$4,134	\$80	\$(334)	\$21	\$9,345
Net Income (Loss)				(656)		20	(636)		
Other Comprehensive Income					83	—	83		
Dividends Paid to Noncontrolling Interests					—	(16)	(16)		
Shares Issued for Acquisitions				(27)	—	66	39		
Equity Awards Granted, Vested and Exercised				(16)	—	51	35		
Other			6	51	—	—	8	65	
Balance at September 30, 2012			\$775	\$4,683	\$3,478	\$163	\$(217)	\$33	\$8,915

At December 31, 2011, warrants were outstanding to purchase up to 8.6 million of our shares at a price of \$15.00 per share and were exercisable until February 28, 2012. On February 28, 2012, 4.3 million of these warrants were exercised through physical delivery of shares in exchange for \$65 million and the remaining 4.3 million of these warrants were exercised through net share settlement resulting in the issuance of 494,000 shares.

Effective May 23, 2012, we issued 70 million registered shares to one of our subsidiaries in an internal restructuring of certain of the Company's assets. These shares are held as treasury shares as of September 30, 2012.

12. Earnings per Share

Basic earnings per share for all periods presented equals net income divided by the weighted average number of our shares outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted average number of our shares outstanding during the period, adjusted for the dilutive effect of our stock options, restricted shares, performance units and warrants. Our diluted earnings per share calculation excludes three million potential shares for both the three and nine months ended September 30, 2012, and three million and two million potential shares for the three and nine months ended September 30, 2011, respectively, due to their anti-dilutive effect. Our diluted earnings per share calculation for the nine months ended September 30, 2012 also excludes four million potential shares that would have been included if we had net income for that period, but are excluded as we had a net loss and their inclusion would have been anti-dilutive.

12

Table of contentsWEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following reconciles basic and diluted weighted average of shares outstanding:

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2011	
	2012	2011	2012	2011
	(In millions)			
Basic weighted average shares outstanding	767	754	764	751
Dilutive effect of:				
Stock options, restricted shares and performance units	4	5	—	5
Warrants	—	1	—	2
Diluted weighted average shares outstanding	771	760	764	758

13. Share-Based Compensation

We recognized the following employee share-based compensation expense during the three and nine months ended September 30, 2012 and 2011:

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2011	
	2012	2011	2012	2011
	(In millions)			
Share-based compensation	\$ 17	\$ 18	\$ 54	\$ 66
Related tax benefit	6	6	19	23

During the nine months ended September 30, 2012, we issued approximately one million performance units, which will vest with continued employment and if the Company meets certain market-based performance goals. The performance units have a weighted-average grant date fair value of \$21.32 per share based on the Monte Carlo simulation method. As of September 30, 2012, there was \$27 million of unrecognized compensation related to our performance units. This cost is expected to be recognized over a weighted average period of two years.

During the nine months ended September 30, 2012, we also granted two million restricted share awards at a weighted average grant date fair value of \$14.35 per share. As of September 30, 2012, there was \$63 million of unrecognized compensation cost related to all of our unvested restricted share grants. This cost is expected to be recognized over a weighted average period of two years.

During 2012, our Executive Deferred Compensation Stock Ownership Plan ("EDC") was terminated, resulting in a partial distribution of vested balances under the plan. This plan contains fully paid and vested shares of the Company held in employee participant accounts. Our EDC plan was frozen in 2008, and no further benefits have accrued to participants in the plan since then. These shares were purchased in prior years using compensation deferred in prior years by participants and previously matched by the Company. Shares that were not distributed on termination will be

distributed to each participant in 2017 or upon his or her earlier departure from the Company.

Total	\$9,278	\$ 911	\$ 847

The nine months ended September 30, 2012 includes a \$100 million accrual for a loss contingency related to sanctioned country matters, income tax restatement and material weakness remediation expenses of \$52 (a) million, \$11 million in fees and expenses associated with our third quarter 2012 debt consent solicitation and severance, exit and other charges of \$62 million offset by a \$28 million gain related to the sale of our subsea controls business.

During the nine months ended September 30, 2012, we recognized a charge for excess and obsolete inventory of (b) \$64 million attributable to each reporting segment as follows: \$22 million for North America, \$14 million for MENA/Asia Pacific, \$20 million for Europe/SSA/Russia and \$8 million for Latin America.

(c) The nine months ended September 30, 2011 was negatively impacted by a \$16 million charge due to an equity tax enacted in Colombia during the first quarter of 2011.

(d) The nine months ended September 30, 2011 includes \$35 million for severance and exit costs, income tax restatement and material weakness remediation expenses of \$9 million, \$9 million in connection with the termination of a corporate consulting contract and \$5 million for legal and professional fees incurred in connection with our on-going governmental investigations.

Early in 2011, our operations in Libya were disrupted by civil unrest. Most employees were evacuated and steps were taken to safeguard assets within the country. Due to the ongoing hostilities, we were unable to physically verify the existence or condition of the majority of our assets in country for most of 2011 and the information available to us about those assets evolved during the year. Additionally, due to international sanctions against all entities affiliated with the Libyan government, we were unable to pursue collections of accounts receivable from a significant portion of our Libyan customers. In the fourth quarter of 2011, hostilities subsided and limited company personnel were able to re-enter the country. Additionally, we were able to engage in discussions with our customers.

Following an examination of our Libyan assets and evaluation of our accounts receivable from Libyan customers, we recognized an expense of \$59 million primarily to establish a reserve for receivables, machinery and equipment and inventory in Libya. Our operations in Libya have not resumed and we are not able to predict when they will resume. Given our evacuation from the country, it may be difficult, if not impossible, for us to safeguard and recover all of our operating assets; our ability to do so will depend on the local turn of events. At September 30, 2012, we had inventory and property, plant and equipment in Libya with a carrying value of \$112 million, as well as \$3 million of accounts receivable. We risk loss of assets in any location where hostilities arise and persist. In these areas we also may not be able to perform the work we are contracted to perform, which could lead to forfeiture of performance bonds.

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

15. Disputes, Litigation and Contingencies

U.S. Government and Internal Investigations

We are currently involved in government and internal investigations.

The U.S. Department of Commerce, Bureau of Industry & Security, Office of Foreign Assets Control ("OFAC"), Department of Justice ("DOJ") and SEC have undertaken investigations of allegations of improper sales of products and services by the Company and its subsidiaries in certain sanctioned countries. We have cooperated fully with these investigations and have retained legal counsel, reporting to our Audit Committee, to investigate these matters.

In light of these investigations, the U.S. and foreign policy environment and the inherent uncertainties surrounding these countries, we decided in September 2007 to direct our foreign subsidiaries to discontinue doing business in countries that are subject to comprehensive U.S. economic and trade sanctions, specifically Cuba, Iran, and Sudan, as well as Syria. Effective September 2007, we ceased entering into any new contracts in these countries and began an orderly discontinuation and winding down of our existing business in these sanctioned countries. Effective March 31, 2008, we substantially completed our winding down of business in these countries and have conducted further withdrawal activities, pursuant to the licenses issued by OFAC, which have now ceased. Certain of our subsidiaries continue to conduct business in countries such as Myanmar that are subject to more limited U.S. trading sanctions. In 2011, the country of South Sudan came into formal existence without the same sanction restrictions as those imposed upon Sudan; the Company may operate in South Sudan.

We have been in negotiations with the government agencies to resolve the investigation into alleged violations of the trade sanctions laws for more than a year, and these negotiations have advanced significantly. During the quarter ended June 30, 2012, the negotiations progressed to a point where we recognized a liability for a loss contingency that we believe is probable and for which a reasonable estimate can be made. The Company estimates that the most likely amount of this loss is \$100 million, although the actual amount could be greater or less, and the timing of the payment cannot yet be determined. The Company recognized a \$100 million loss contingency, with no corresponding tax benefit in the quarter ended June 30, 2012 as our best estimate for the potential settlement of the sanctioned country matters. However, uncertainties remain and therefore an exposure to loss may exist in excess of the amount accrued, pending the ultimate resolution of the investigation, and we may ultimately not reach a final settlement with the government and may proceed to litigation. As of any potential resolution with the government, the DOJ may seek to impose modifications to business practice, that decrease our business and modifications to the Company's compliance programs, which may increase compliance costs.

Until 2003, we participated in the United Nations oil-for-food program governing sales of goods and services into Iraq. The DOJ and SEC have undertaken investigations of our participation in the oil-for-food program and have subpoenaed certain documents in connection with these investigations. We have cooperated fully with these investigations. We have retained legal counsel, reporting to our Audit Committee, to investigate this matter. We are in negotiations with the government agencies to resolve these matters, but we cannot yet anticipate the timing, outcome or possible impact of the ultimate resolution of the investigations, financial or otherwise.

The DOJ and SEC are also investigating our compliance with the Foreign Corrupt Practices Act ("FCPA") and other laws worldwide. We have retained legal counsel, reporting to our Audit Committee, to investigate these matters and we are cooperating fully with the DOJ and SEC. As part of our internal investigations, we have uncovered potential violations of U.S. law in connection with activities in several jurisdictions. We have been in negotiations with the government agencies to resolve these matters for more than a year, but we cannot yet anticipate the timing, outcome or possible impact of the ultimate resolution of the investigations, financial or otherwise.

Table of contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The DOJ, SEC and other agencies and authorities have a broad range of civil and criminal penalties they may seek to impose against corporations and individuals for violations of trade sanctions laws, the FCPA and other federal statutes including, but not limited to, injunctive relief, disgorgement, fines, penalties and modifications to business practices and compliance programs. In recent years, these agencies and authorities have entered into agreements with, and obtained a range of penalties against, several corporations and individuals in similar investigations, under which civil and criminal penalties were imposed, including in some cases fines and other penalties and sanctions in the tens and hundreds of millions of dollars. Any injunctive relief, disgorgement, fines, penalties, sanctions or imposed modifications to business practices resulting from these investigations could adversely affect our results of operations, and the cost of our investigations have been significant.

To the extent we violated trade sanctions laws, the FCPA, or other laws or regulations, fines and other penalties may be imposed. Because these matters are now pending before the indicated agencies, there is uncertainty as to the ultimate amount of any penalties we may pay. We have not yet recognized a loss contingency related to these matters other than trade sanction laws, as we have not concluded that there are related losses that we believe are probable and for which a reasonable estimate can be made. However, there can be no assurance that actual fines or penalties, if any, will not have a material adverse effect on our business, financial condition, liquidity or results of operations.

In addition, the SEC and the DOJ are investigating the circumstances surrounding the material weakness in the Company's internal controls over financial reporting for income taxes that was disclosed on Forms 12b-25 and 8-K on March 1, 2011 and February 21, 2012, respectively, and the related restatements of our historical financial statements. We are cooperating fully with the government investigation.

Macondo Litigation

On April 20, 2010, the Deepwater Horizon rig operating under contract with BP at the Macondo well in the Gulf of Mexico exploded and sank, resulting in 11 deaths, several injuries and significant damages to property and the environment.

We provided the following services and products to BP on the Macondo well: (1) connected and tightened four intermediate casing strings and one tapered production string ("long string"); (2) furnished a liner hanger on one casing string; (3) furnished centralizers, most of which were not used in the well, and (4) provided float equipment on the long string. The float equipment consisted of a reamer shoe, a float collar and wiper plugs. The float collar is designed to control backflow or ingress of the cement through the shoe track while the cement hardens. At the time of the explosion, we had two employees on the Deepwater Horizon; they sustained minor injuries.

As a result of the explosion, approximately 400 lawsuits were filed, mainly for personal injuries, wrongful death and pollution damage. We are named, along with BP and other defendants, in several dozen of these lawsuits. The United States Judicial Panel on Multidistrict Litigation issued an order centralizing most of these cases in the Federal District Court for the Eastern District of Louisiana. The pollution damage complaints generally refer to the Oil Pollution Act of 1990 ("OPA") and allege, among other things, negligence and gross negligence by us and other defendants. They allege that we and the other defendants are responsible for property damage, trespass, nuisance and economic loss as a result of environmental pollution and generally seek awards of unspecified economic, compensatory, and punitive damages, as well as injunctive relief.

We were not designated as a "Responsible Party," as that term is defined by OPA. Therefore, we were not charged with responsibility for cleaning up the oil released from the Macondo well or handling any claims. A Responsible Party may make a claim for contribution against any other party it alleges contributed to the oil spill. Since we have not been named a Responsible Party, we sought to be dismissed from any and all OPA-related claims.

Table of contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In June 2011, we reached an agreement with BP wherein BP agreed to indemnify us for the vast majority of our potential exposure related to the Macondo incident, including OPA claims. Pursuant to this agreement, we agreed to pay BP \$75 million, an amount covered by our insurance policies.

In February 2012, the Court in which the consolidated Multidistrict Litigation is pending dismissed all claims against Weatherford, finding that there was no evidence that the Weatherford equipment used in the Macondo well was defective or that any actions or inactions by Weatherford caused or contributed to the cause of the blowout and oil spill. Subsequent to these claims being dismissed, new claims were brought against the Company, and may continue to be brought against the Company, in Federal District Court. These claims have been, and we expect that they will continue to be, consolidated into the Multidistrict Litigation. We expect such new claims will also be dismissed.

Additionally, claims brought against us in state court, which have not been consolidated in the Multidistrict Litigation, are still pending. We cannot predict whether or not those claims will proceed against Weatherford.

However, given the dismissal of the claims against us in the Multidistrict Litigation and the June 2011 indemnification agreement with BP, we do not believe that we have any material exposure with regard to these remaining claims. Additional lawsuits could be filed in the future relating to the Macondo incident.

Additionally, we are cooperating fully with the investigations of the accident initiated by various agencies of the U.S. government and, to the extent requested, have responded to several subpoenas, information and document requests and requests for testimony of employees.

Shareholder Litigation

In 2010, shareholders filed suit in Weatherford's name against those directors in place before June 2010 and certain current and former members of management relating to the U.S. government and internal investigations disclosed above and in our SEC filings since 2007. Separately, in 2011 and 2012, shareholders filed suit relating to the material weakness in the Company's internal controls over financial reporting for income taxes that was disclosed on Forms 12b-25 and 8-K filed on March 1, 2011 and February 21, 2012, respectively, and the related restatement of historical financial statements. These suits name the Company as well as current and former members of management and our directors. We cannot predict the ultimate outcome of these claims.

Other Disputes

Our former Senior Vice President and General Counsel (the "Executive") left the Company in June 2009. The Executive had employment agreements with us that terminated on his departure. There is currently a dispute between the Executive and us as to the amount of compensation we are obligated to pay under these employment agreements based on the Executive's separation. This dispute has not resulted in a lawsuit being filed. It is our belief that an unfavorable outcome regarding this dispute is not probable, and as such, we have not accrued for \$9 million of the Executive's claimed severance and other benefits.

Additionally, we are aware of various disputes and potential claims and are a party in various litigation involving claims against us, some of which are covered by insurance. For claims, disputes and pending litigation in which we believe a negative outcome is probable and a loss can be reasonably estimated, we have recorded a liability for the expected loss. These liabilities are immaterial to our financial condition and results of operations. In addition we have certain claims, disputes and pending litigation in which we do not believe a negative outcome is probable or for which we can only estimate a range of liability. If one or more negative outcomes were to occur, the impact to our financial condition could be as high as \$20 million.

16. New Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board ("FASB") issued new guidance to achieve common fair value measurement and disclosure requirements between U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards. This new guidance amends current fair value measurement and

disclosure guidance to include increased transparency around valuation inputs and investment categorization. This new guidance is effective for fiscal years and interim periods beginning after December 15, 2011. Our adoption of the new guidance did not impact our consolidated financial position, results of operations or cash flows, although it did require additional fair value disclosures.

18

Table of contents

WEATHERFORD INTERNATIONAL LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In June 2011, the FASB issued new guidance on the presentation of comprehensive income. The new guidance allows an entity to present components of net income and other comprehensive income in one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes of shareholders' equity. While the new guidance changes the presentation of comprehensive income, there are no changes to the components that are recognized in net income or other comprehensive income under current accounting guidance. In December 2011, the FASB modified the June guidance to defer the requirement that companies present reclassification adjustments for each component of Accumulated Other Comprehensive Income (Loss) in both net income and other comprehensive income. This guidance, with the exception of the deferral, is effective for fiscal years and interim periods beginning after December 15, 2011. Our adoption of the new guidance did not impact on our consolidated financial position, results of operations or cash flows. Consistent with the guidance we have presented comprehensive income and the components of comprehensive income in a separate statement that immediately follows the condensed consolidated statements of operations.

In July 2012, the FASB issued an update to existing guidance on the impairment assessment of indefinite-lived intangibles. This update simplifies the impairment assessment of indefinite-lived intangibles by allowing companies to consider qualitative factors to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying amount before performing the two step impairment review process. This new guidance is effective for fiscal years and interim periods beginning after September 15, 2012.

17. Condensed Consolidating Financial Statements

A Swiss joint-stock company named Weatherford International Ltd. is the ultimate parent of the Weatherford group ("Weatherford Switzerland or Parent"). The Parent guarantees the obligations of Weatherford International Ltd., which is incorporated in Bermuda ("Weatherford Bermuda") and Weatherford International, Inc., which is incorporated in Delaware ("Weatherford Delaware"), noted below.

The following obligations of Weatherford Delaware were guaranteed by Weatherford Bermuda at September 30, 2012: (1) the 5.95% Senior Notes, (2) the 6.35% Senior Notes and (3) the 6.80% Senior Notes.

The following obligations of Weatherford Bermuda were guaranteed by Weatherford Delaware at September 30, 2012: (1) the revolving credit facility, (2) the 4.95% Senior Notes, (3) the 5.50% Senior Notes, (4) the 6.50% Senior Notes, (5) the 5.15% Senior Notes, (6) the 6.00% Senior Notes, (7) the 7.00% Senior Notes, (8) the 9.625% Senior Notes, (9) the 9.875% Senior Notes, (10) the 5.125% Senior Notes, (11) the 6.75% Senior Notes, (12) the 4.50% Senior Notes and (13) the 5.95% Senior Notes due 2042.

The following obligations of Weatherford Bermuda were guaranteed by Weatherford Delaware at December 31, 2011: (1) the revolving credit facility, (2) the 4.95% Senior Notes, (3) the 5.50% Senior Notes, (4) the 6.50% Senior Notes, (5) the 5.15% Senior Notes, (6) the 6.00% Senior Notes, (7) the 7.00% Senior Notes, (8) the 9.625% Senior Notes, (9) the 9.875% Senior Notes, (10) the 5.125% Senior Notes and (11) the 6.75% Senior Notes.

As a result of the guarantee arrangements, we are required to present the following condensed consolidating financial information. The accompanying guarantor financial information is presented on the equity method of accounting for all periods presented. Under this method, investments in subsidiaries are recorded at cost and adjusted for our share in the subsidiaries' cumulative results of operations, capital contributions and distributions and other changes in equity.

Elimination entries relate primarily to the elimination of investments in subsidiaries and associated intercompany balances and transactions.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") begins with an executive level overview, which provides a general description of our company today, a synopsis of industry market trends, insight into management's perspective of the opportunities and challenges we face and our outlook for the remainder of 2012. Next, we analyze the results of our operations for the three and nine months ended September 30, 2012 and 2011, including the trends in our business and review our liquidity and capital resources. We conclude with a discussion of our critical accounting policies and estimates and a summary of recently issued accounting pronouncements. The "Company," "we," "us" and "our" refer to Weatherford International Ltd., a Swiss joint-stock corporation.

The following discussion should be read in conjunction with our financial statements included with this report and our financial statements and related MD&A for the year ended December 31, 2011 included in our Annual Report on Form 10-K/A. Our discussion includes various forward-looking statements about our markets, the demand for our products and services and our future results. These statements are based on certain assumptions we consider reasonable. For information about these assumptions, you should refer to the section entitled "Forward-Looking Statements."

Overview

General

Our principal business is to provide equipment and services to the oil and natural gas exploration and production industry both on land and offshore, through our product and service line groups 1) Formation Evaluation and Well Construction and 2) Completion and Production.

Formation Evaluation and Well Construction includes: Drilling Services, Well Construction, Integrated Drilling, Wireline and Evaluation Services, Drilling Tools and Re-entry and Fishing

Completion and Production includes: Artificial Lift Systems, Stimulation and Chemicals, Completion Systems and Pipeline and Specialty Services

We may sell our products and services separately or may bundle them together to provide integrated solutions, up to and including integrated well construction where we are responsible for the entire process of drilling, constructing and completing a well. Our customers include both exploration and production companies and other oilfield service companies. Depending on the service line, customer and location, our contracts vary in their terms, provisions and indemnities. We earn revenues under our contracts when products and services are delivered. Typically, we provide products and services at a well site where our personnel and equipment may be located together with personnel and equipment of our customer and third parties, such as other service providers.

We conduct operations in approximately 100 countries and have service and sales locations in nearly all of the oil and natural gas producing regions in the world. Our operational performance is segmented and reviewed on a geographic basis and we report the following regions as separate, distinct reporting segments: (1) North America; (2) Latin America; (3) Europe/Sub-Sahara Africa ("SSA")/Russia; and (4) Middle East/North Africa ("MENA")/Asia Pacific.

Industry Trends

Changes in the current price and expected future prices of oil and natural gas influence the level of energy industry spending. Changes in expenditures result in an increased or decreased demand for our products and services. Rig count is an indicator of the level of spending for the exploration for and production of oil and natural gas reserves.

Table of contents

The following chart sets forth certain statistics that reflect historical market conditions:

	WTI Oil (a)	Henry Hub Gas (b)	North American Rig Count (c)	International Rig Count (c)
September 30, 2012	\$92.19	\$3.32	2,231	1,260
December 31, 2011	98.83	2.99	2,481	1,188
September 30, 2011	87.27	3.86	2,406	1,169

(a) Price per barrel as of September 30 and December 31 – Source: Thomson Reuters

(b) Price per MM/BTU as of September 30 and December 31 – Source: Thomson Reuters

(c) Average rig count for the applicable quarter – Source: Baker Hughes Rig Count

Oil prices decreased during the first nine months of 2012, ranging from a low of \$77.69 per barrel in at the end of June to a high of \$109.77 per barrel at the end of February. Natural gas prices decreased during the first nine months of 2012 and ranged from a high of \$3.32 MM/BTU at the end of September to a low of \$1.91MM/BTU in mid-April.

Factors influencing oil and natural gas prices during the period include hydrocarbon inventory levels, realized and expected economic growth, realized and expected levels of hydrocarbon demand, levels of spare production capacity within the Organization of Petroleum Exporting Countries ("OPEC"), weather and geopolitical uncertainty.

Outlook

We believe the long-term outlook for our businesses is favorable. As decline rates accelerate and reservoir productivity complexities increase, our clients will face growing challenges securing desired rates of production growth. These challenges increase our customers' requirements for technologies that improve productivity and efficiency and increase demand for our products and services. These phenomena provide us with a positive outlook over the longer term.

The level of improvement in our businesses in 2012 will continue to depend heavily on pricing and volume increases, our control of costs and our ability to further penetrate existing markets with our younger technologies, as well as our ability to successfully introduce these technologies to new markets.

For 2012, we maintain a positive outlook with respect to increases in North American revenue and profitability.

Assuming a flat to slightly declining rig count, we expect 2012 revenue to increase modestly and operating income, excluding impairments, to increase slightly compared to 2011. We believe the predominance of oil activity and our market share in Canada as well as the strength of oil-based activity in the United States mostly offset the declines in natural gas related activity. Our artificial lift, formation evaluation, completion, production optimization, and wireline product lines should continue to show meaningful growth compared to 2011 and offset declines in our stimulation and chemicals product lines, where we continue to anticipate comparative weakness.

Internationally, our outlook remains positive for 2012. Latin America has a solid backlog that should result in increases in revenue and profitability driven by continuous progress in several countries including Mexico, Colombia, Brazil and Argentina as compared to 2011. Growth in our Europe/SSA/Russia region will be broad based and driven by profitability improvements. Our MENA operation should show improvement in revenue compared to 2011 due to the start of certain new contracts, primarily in Saudi Arabia and Kuwait, but with declining margins due to losses in Iraq and we expect little to no improvement in North Africa by the end of the year. We anticipate that the revenue and profitability growth in Asia will be driven by a strong backlog in China and Australia.

We believe 2013 will be a positive year for both our North American and international operations. We expect steady improvements in North America with some gains, both top-line and margin. Internationally, forecasts for Latin America show a very strong year and Europe/SSA/Russia and Asia Pacific are all expected to have solid growth and positive margin improvements. MENA should return to being a positive contributor. We expect our artificial lift product line to have steady volume growth into 2013. Pricing increases for artificial lift are expected to flatten in North America, but has room to increase in the international markets.

Revenues

The following chart contains consolidated revenues by product line for the three and nine months ended September 30, 2012 and 2011:

	Three Months Ended September 30, 2012		2011		Nine Months Ended September 30, 2012		2011	
Formation Evaluation and Well Construction	56 %	56 %	56 %	57 %	56 %	57 %	57 %	57 %
Completion and Production	44 %	44 %	44 %	43 %	44 %	43 %	43 %	43 %
	100 %	100 %	100 %	100 %	100 %	100 %	100 %	100 %

Consolidated revenues increased \$449 million, or 13%, in the third quarter of 2012 as compared to the third quarter of 2011. This increase outpaced the 2% decrease in average rig count over the comparable period. North America revenue increased \$106 million, or 7%, in the third quarter of 2012 compared to the same quarter of the prior year. International revenues increased \$343 million, or 20%, in the third quarter of 2012 as compared to the third quarter of 2011. Our artificial lift systems, drilling services, and stimulation and chemicals product lines were the strongest contributors to the increase over the year-ago period.

For the nine months ended September 30, 2012, consolidated revenues increased \$1.9 billion, or 20%, as compared to the same period of the previous year. North America revenues increased \$819 million, or 19% while International revenues improved \$1.1 billion, or 21%.

Operating Income

Consolidated operating income decreased \$95 million or 23%, in the third quarter of 2012 as compared to the third quarter of 2011. Our operating segment's contribution to operating income was consistent with the same quarter of the prior year, but offset by a \$25 million increase in research and development and corporate expenses.

For the nine months ended September 30, 2012, consolidated operating income decreased \$858 million or 23% compared to the same period of the prior year primarily as a result of our \$793 million goodwill and equity investment impairment charge and \$100 million sanctioned country loss contingency recorded during 2012, which were partially offset by higher operating income in our segments.

Other items for the nine months ended September 30, 2012 includes a \$28 million gain related to the sale of our subsea controls business, professional fees associated with our ongoing income tax remediation efforts of \$52 million, \$11 million in fees and expenses associated with our third quarter 2012 debt consent solicitation and severance, and exit and other charges of \$62 million.

Other items for the nine months ended September 30, 2011 includes professional fees associated with our ongoing income tax remediation efforts of \$9 million, \$35 million for severance and exit costs, \$9 million in connection with the termination of a corporate consulting contract, and \$5 million for legal and professional fees incurred in connection with our on-going investigations.

Interest Expense, Net

Interest Expense, Net increased \$12 million and \$19 million, respectively, for the three and nine month periods ended September 30, 2012 as compared to the same periods of the prior year due to increases in our levels of indebtedness.

Income Taxes

For the three months and nine months ended September 30, 2012, we had a tax provision of \$86 million and \$259 million on income before taxes of \$163 million and a pre-tax loss of \$377 million, respectively. Our results for the nine months ended September 30, 2012 include a \$589 million goodwill impairment charge, substantially all of which was non-deductible, a \$204 million equity method impairment charge and a \$100 million accrual for a loss contingency, both of which are fully non-deductible.

For the three and nine months ended September 30, 2011, we had a tax provision of \$145 million and \$291 million on income before taxes of \$269 million and \$503 million, respectively. Our tax provision for the three and nine months ended September 30, 2011 includes discrete tax benefits of \$12 million and \$30 million, respectively.

29

Table of contents

Segment Results

North America

North American revenues increased \$106 million, or 7%, in the third quarter of 2012, as compared to the third quarter of 2011 and \$819 million, or 19%, during the first nine months of 2012 as compared to the same period of the prior year. These increases outpaced the changes in average North American rig count over the comparable periods.

Revenues from our well construction, artificial lift and fishing and re-entry product lines were the strongest contributors to the year-over-year increase.

Operating income decreased \$84 million, or 24%, in the third quarter of 2012, as compared to the third quarter of the prior year. Operating margins were 15.5% in the third quarter of 2012 and 21.7% in the third quarter of 2011 and were negatively impacted by a \$29 million lower of cost or market adjustment to the carrying value of our guar inventory.

Operating margins decreased 370 basis points to 16.6% for the first nine months of 2012, compared to 20.3% for the first nine months of 2011. Declines in operating margin are primarily attributable to stimulation and chemicals margin declines.

MENA/Asia Pacific

MENA/Asia Pacific revenues increased \$127 million, or 22%, in the third quarter of 2012, as compared to the third quarter of 2011. Similarly, revenues increased \$178 million during the first nine months of 2012 as compared to the same period in the prior year. Our completions, stimulation and chemicals and pipeline and specialty services product lines were the strongest contributors to the increase in revenue.

Operating income increased \$6 million, or 38%, in the third quarter of 2012, compared to the same quarter of the prior year. Operating margins were 3.1% in the third quarter of 2012 and 2.8% in the third quarter of 2011. For the first nine months of 2012, operating income decreased \$52 million, or 90%, compared to the same period of the prior year.

The 2012 decrease in operating income is primarily due to losses on a percentage of completion contract in Iraq.

Europe/SSA/Russia

Revenues in our Europe/SSA/Russia segment increased \$40 million, or 7%, in the third quarter of 2012, compared to the same quarter of the prior year. The region realized strong performances from our pipeline and specialty services, fishing and re-entry and drilling tools product lines in the current quarter as compared to the same period of the prior year. For the nine months ended September 30, 2012, revenues increased \$161 million, or 10%, compared to the first nine months of 2011.

Operating income increased \$7 million, or 9%, in the third quarter of 2012, as compared to the same quarter of 2011. Operating margins were 14.1% in the third quarter of 2012 and 13.8% in the third quarter of 2011. The increase in operating income and margins was due to an abatement noted in the increased fuel and transportation costs in Russia, relative to the prior year quarter and the realization of our strong backlog in integrated drilling, wireline, completion and artificial lift. For the nine months ended September 30, 2012, operating margins increased from 12.3% in the same period of the prior year to 13.8%.

Latin America

Revenues in our Latin America segment increased \$176 million or 30%, in the third quarter of 2012, as compared to the same quarter of the prior year due to increases in drilling, artificial lift and stimulation and chemicals. During the nine months ended September 30, 2012, revenues increased \$721 million, or 48%.

Operating income increased \$27 million, or 39%, in the third quarter of 2012, over the comparable period of the prior year. Operating margins increased from 11.8% for the third quarter of 2011 to 12.6% for the third quarter of 2012.

For the nine months ended September 30, 2012, operating margins improved 290 basis points to 12.2% on the higher levels of activity.

Liquidity and Capital Resources

Sources of Liquidity

Our sources of available liquidity include cash and cash equivalent balances, cash generated from operations, commercial paper and committed bank lines of credit. We also historically have accessed banks for short-term loans from uncommitted borrowing arrangements and the capital markets with debt, equity and convertible bond offerings. From time to time we may enter into transactions to factor accounts receivable or dispose of businesses or capital assets that are no longer core to our long-term growth strategy.

30

Table of contents

Committed Borrowing Facilities

We maintain a \$2.25 billion unsecured, revolving credit agreement (the "Credit Agreement") with JPMorgan Chase Bank, N.A., as administrative agent. The Credit Agreement has a scheduled maturity date of July 13, 2016 and can be used for a combination of borrowings, support for our commercial paper program and issuances of letters of credit.

This agreement requires us to maintain a debt-to-capitalization ratio of less than 60%. In August 2012, as a result of the delay in filing our second quarter report on Form 10-Q and a potential delay in filing our third quarter report on Form 10-Q, we sought and obtained waivers to extend the due date under the Credit Agreement for providing our Form 10-Q filings to no later than March 19, 2013. During the period in which the waiver was in effect we were subject to additional covenants and provisions primarily including one that limited our aggregate indebtedness to not more than \$10 billion. We are in compliance with these covenants at September 30, 2012.

The following is a recap of our availability under our committed borrowing facility at September 30, 2012 (in millions):

Facilities	\$2,250
Less:	
Amount drawn	—
Commercial paper	1,235
Letters of credit	99
Availability	\$916

On April 16, 2012, we increased the size of our commercial paper program to \$2.25 billion from \$1.5 billion. From time to time, we use the commercial paper program to issue short-term, unsecured notes. Our commercial paper issuances are supported by the Credit Agreement.

On April 4, 2012, we completed a \$1.3 billion long-term debt offering comprised of (1) \$750 million of 4.5% Senior Notes due 2022 and (2) \$550 million of 5.95% Senior Notes due 2042. The net proceeds from this offering were used to repay short-term indebtedness under our commercial paper program and for general corporate purposes.

In August 2012, as a result of the delay in filing our second quarter report on Form 10-Q and potential delay in filing our third quarter report on Form 10-Q, we sought consents from the holders of our Senior Notes to extend the due date under the Senior Note indentures for providing our Form 10-Q filings to no later than March 31, 2013. We received sufficient consents to apply this extension to all series of our publicly traded Senior Notes. We offered a cash payment of \$2.50 for each \$1,000 in principal amount for those note holders who consented to the extension and we paid approximately \$30 million in connection with this consent solicitation including costs.

Cash Requirements

During the remainder of 2012, we anticipate our cash requirements will include interest payments on our outstanding debt, working capital needs and capital expenditures. Our cash requirements may also include limited business acquisitions and an indeterminate amount to settle the governmental investigations described in Note 15 to our condensed consolidated financial statements. Consistent with 2011, we anticipate funding these requirements from cash generated from operations, availability under our Credit Agreement, the issuance of commercial paper and potential proceeds from disposals of businesses or capital assets that are no longer core to our long-term growth strategy.

Capital expenditures for 2012 are projected to be between 10% and 15% of our revenues. The amounts ultimately spent will depend on a number of factors including the type of contracts we enter into and asset availability. The expenditures are expected to be used primarily to support anticipated near-term growth. Capital expenditures during the nine months ended September 30, 2012 were \$1.7 billion.

Table of contents

Accounts Receivable Factoring

During the three and nine months ended September 30, 2012, a subsidiary in our Latin America segment factored approximately \$96 million and \$147 million respectively, of accounts receivables under the program we entered into in 2010. We received \$136 million in proceeds and recognized an immaterial loss on these sales. These transactions qualified for sale accounting under the applicable accounting standards and the proceeds received through September 30, 2012 are included in operating cash flows in our Condensed Consolidated Statement of Cash Flows. We did not factor receivables in the nine months ended September 30, 2011.

Derivative Instruments

Fair Value Hedges

We may use interest rate swaps to help mitigate exposures related to changes in the fair values of the associated debt. Amounts paid or received upon termination of interest rate swaps accounted for as fair value hedges represent the fair value of the agreements at the time of termination and are recorded as an adjustment to the carrying value of the related debt. These amounts are amortized as a reduction, in the case of gains, or as an increase, in the case of losses, of interest expense over the remaining term of the debt. As of September 30, 2012, we had net unamortized gains of \$56 million associated with interest rate swap terminations.

In July 2011, we entered into interest rate swap agreements to pay a variable interest rate and receive a fixed interest rate with an aggregate notional amount of \$300 million. These swaps were designated as fair value hedges of our 6.35% Senior Notes due 2017. In June 2012 these swaps were terminated. As a result of these terminations, we received a cash settlement of \$18 million. The gain associated with these interest rate swap terminations was deferred and is being amortized over the remaining term of our 6.35% Senior Notes as a reduction in interest expense.

Cash Flow Hedges

In 2008, we entered into interest rate derivative instruments to hedge projected exposures to interest rates in anticipation of a debt offering. Those hedges were terminated at the time of the issuance of the debt, and the loss on these hedges is being amortized from Accumulated Other Comprehensive Income (Loss) into interest expense over the remaining term of the debt. As of September 30, 2012, we had net unamortized losses of \$12 million associated with our cash flow hedge terminations.

Other Derivative Instruments

As of September 30, 2012, we had foreign currency forward contracts with notional amounts aggregating to \$951 million. These contracts were entered into to hedge exposure to currency fluctuations in various foreign currencies.

The total estimated fair value of these contracts and amounts receivable or owed associated with closed contracts resulted in a net liability of approximately \$3 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in Other, Net in the accompanying Condensed Consolidated Statements of Operations.

We have cross-currency swaps between the U.S. dollar and Canadian dollar to hedge certain exposures to the Canadian dollar. At September 30, 2012, we had notional amounts outstanding of \$168 million. The total estimated fair value of these contracts at September 30, 2012, resulted in a liability of \$36 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in Other, Net in the accompanying Condensed Consolidated Statements of Operations.

Off Balance Sheet Arrangements

A Swiss joint-stock company named Weatherford International Ltd. is the ultimate parent ("Weatherford Switzerland") of the Weatherford group and guarantees the obligations of Weatherford International Ltd., which is incorporated in Bermuda ("Weatherford Bermuda") and Weatherford International, Inc., which is incorporated in Delaware ("Weatherford Delaware") noted below.

Table of contents

The following obligations of Weatherford Delaware were guaranteed by Weatherford Bermuda at September 30, 2012 and December 31, 2011: (1) the 5.95% Senior Notes, (2) the 6.35% Senior Notes and (3) the 6.80% Senior Notes.

The 6.625% Senior Notes were also guaranteed by Weatherford Bermuda at December 31, 2011.

The following obligations of Weatherford Bermuda were guaranteed by Weatherford Delaware at September 30, 2012: (1) the revolving credit facility, (2) the 4.95% Senior Notes, (3) the 5.50% Senior Notes, (4) the 6.50% Senior Notes, (5) the 5.15% Senior Notes, (6) the 6.00% Senior Notes, (7) the 7.00% Senior Notes, (8) the 9.625% Senior Notes, (9) the 9.875% Senior Notes, (10) the 5.125% Senior Notes, (11) the 6.75% Senior Notes, (12) the 4.50% Senior Notes and (13) the 5.95% Senior Notes due 2042.

The following obligations of Weatherford Bermuda were guaranteed by Weatherford Delaware December 31, 2011: (1) the revolving credit facility, (2) the 4.95% Senior Notes, (3) the 5.50% Senior Notes, (4) the 6.50% Senior Notes, (5) the 5.15% Senior Notes, (6) the 6.00% Senior Notes, (7) the 7.00% Senior Notes, (8) the 9.625% Senior Notes, (9) the 9.875% Senior Notes, (10) the 5.125% Senior Notes and (11) the 6.75% Senior Notes.

Letters of Credit

We execute letters of credit and bid and performance bonds in the normal course of business. As of September 30, 2012, we had \$742 million of letters of credit and bid and performance bonds outstanding, consisting of \$531 million outstanding under various uncommitted credit facilities, \$99 million letters of credit outstanding under our committed facilities and \$112 million of performance bonds issued by financial sureties against an indemnification from us.

These obligations could be called by the beneficiaries should we breach certain contractual or performance obligations. If the beneficiaries were to call the letters of credit under our committed facilities, our available liquidity would be reduced by the amount called.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements. We prepare these financial statements in conformity with U.S. generally accepted accounting principles. As such, we are required to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. We base our estimates on historical experience, available information and various other assumptions we believe to be reasonable under the circumstances. On an on-going basis, we evaluate our estimates; however, actual results may differ from these estimates under different assumptions or conditions.

There have been no material changes or developments in our evaluation of the accounting estimates and the underlying assumptions or methodologies that we believe to be Critical Accounting Policies and Estimates as disclosed in our Form 10-K for the year ended December 31, 2011.

New Accounting Pronouncements

See Note 16 to our condensed consolidated financial statements included elsewhere in this report.

Risk Factors

An investment in our registered shares involves various risks. When considering an investment in our Company, you should consider carefully all of the risk factors described in our most recent Annual Report on Form 10-K, under the heading "Item 1A. Risk Factors" as well as the information below and other information included and incorporated by reference in this report.

Forward-Looking Statements

This report, as well as other filings made by us with the Securities and Exchange Commission ("SEC"), and our releases issued to the public contain various statements relating to future financial performance and results, including certain projections and business trends and other statements that are not historical facts. We believe these statements constitute "Forward-Looking Statements" as defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "plan," "may," "should," "could," "will," "would," "will be," "will continue," "will likely result," and similar expressions, although not all forward-looking statements contain these identifying words.

Table of contents

From time to time, we update the various factors we consider in making our forward-looking statements and the assumptions we use in those statements. However, we undertake no obligation to correct, update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise, except to the extent required under federal securities laws. The following sets forth various assumptions we use in our forward-looking statements, as well as risks and uncertainties relating to those statements. Certain of the risks and uncertainties may cause actual results to be materially different from projected results contained in forward-looking statements in this report and in our other disclosures. These risks and uncertainties include, but are not limited to, those described below under Item 1A – Risk Factors and the following:

Global political, economic and market conditions could affect projected results. Our operating results and the forward-looking information we provide are based on our current assumptions about oil and natural gas supply and demand, oil and natural gas prices, rig count and other market trends. Our assumptions on these matters are in turn based on currently available information, which is subject to change. The oil and natural gas industry is extremely volatile and subject to change based on political and economic factors outside our control. A weakened global economic climate generally results in lower demand and lower prices for oil and natural gas, which reduces drilling and production activity, which in turn results in lower revenues and income for us. Worldwide drilling activity and global demand for oil and natural gas may also be affected by changes in governmental policies and sovereign debt, laws and regulations related to environmental or energy security matters, including those addressing alternative energy sources and the risks of global climate change. Worldwide economic conditions, and the related demand for oil and natural gas, may in future periods be significantly weaker than we have assumed.

We may be unable to realize our expected revenues from current and future contracts. Our customers, many of whom are national oil companies, often have significant bargaining leverage over us and may elect to cancel or revoke contracts, not renew contracts, modify the scope of contracts or delay contracts, in some cases preventing us from realizing expected revenues and/or profits. The 2011 conflict in Libya and the continued security problems have slowed, and may continue to slow or ultimately prevent, collection of certain accounts receivable generated in Libya. Our projections assume that our customers will honor the contracts we have been awarded and that those contracts and the business that we believe is otherwise substantially firm will result in anticipated revenues in the periods for which they are scheduled.

Currency fluctuations could have a material adverse financial impact on our business. A material change in currency rates in our markets could affect our future results as well as affect the carrying values of our assets. Any hedging activity in which we engage may not adequately protect us from these fluctuations. The terms and size of our hedges are based on the information available to us at the time we enter into them. As a result, our hedging activity may not entirely offset our exposures. World currencies have been subject to significant volatility. Due to the volatility we may be unable to enter into foreign currency contracts at a reasonable cost. As we are not able to predict changes in currency valuations, our forward-looking statements assume no material impact from future changes in currency exchange rates.

Our ability to manage our workforce could affect our projected results. We employ tens of thousands of people on six continents in a multitude of legal jurisdictions with differing labor laws. Our need for human resources varies from time to time and place to place, corresponding largely to global drilling and production activity. In a climate of decreasing demand, we are faced with managing our workforce levels to control costs without impairing our ability to provide services to our customers and in compliance with various local laws. Conversely, in a climate of increasing demand, we are faced with the challenge of recruiting and retaining a skilled workforce at a reasonable cost. Our forward-looking statements assume we will be able to manage, cost effectively, our workforce in all jurisdictions in which we operate in both up cycles and down cycles.

Increases in the prices and availability of our raw materials could affect our results of operations. We use large amounts of raw materials (including steel and other metals, chemicals, plastics, polymers and energy inputs) for manufacturing our products and some of our fixed assets. The price of these raw materials has a significant impact

on our cost of producing products for sale or constructing fixed assets used in our business. We have assumed that the prices of our raw materials will remain within a manageable range and will be readily available. If we are unable to obtain necessary raw materials or if we are unable to minimize the impact of increased raw material costs or to realize the benefit of cost decreases in a timely fashion through our supply chain initiatives or pricing, our margins and results of operations could be adversely affected.

34

Table of contents

Our ability to manage our supply chain and business processes could affect our projected results. We have undertaken efforts to improve our supply chain, invoicing and collection processes and procedures. These undertakings include costs, which we expect will result in long-term benefits for our business processes. Our forward-looking statements assume we will realize the benefits of these efforts.

Rapid increases in demand for our products may challenge our supply chain. Many of our products have months-long manufacturing lead times, and we must maintain appropriate levels of manufacturing facilities and trained personnel to ensure the quality and safety of our supply chain. During periods of rapidly increasing or unexpected demand, we may not be able to manufacture sufficient quantities of certain products to meet our customers' demands, which could result in lost opportunities and reputational damage. Conversely, during periods of rapidly decreasing or unexpected declines in demand, we may have committed resources to manufacturing resulting in excess inventories, or we may have underutilized manufacturing capacity, which could adversely affect our financial condition. Our forward-looking statements assume we will be able to forecast and manage our supply chain needs and inventory levels efficiently.

Our long-term growth depends upon technological innovation and commercialization. Our ability to deliver our long-term growth strategy depends in part on the commercialization of new technology. A central aspect of our growth strategy is to improve our products and services through innovation, to obtain technologically advanced products through internal research and development and/or acquisitions, to protect proprietary technology from unauthorized use and to expand the markets for new technology by leveraging our worldwide infrastructure. Our success will depend on our ability to commercialize the technology that we have acquired and demonstrate the enhanced value our technology brings to our customers' operations. Our major technological advances include, but are not limited to, those related to controlled pressure drilling and testing systems, expandable solid tubulars, expandable sand screens and intelligent well completion. Our forward-looking statements have assumed successful commercialization of, and above-average growth from, our new products and services, as well as legal protection of our intellectual property rights.

Nonrealization of expected benefits from our redomestication could affect our projected results. We operate through our various subsidiaries in numerous countries throughout the world including the United States. During the first quarter of 2009, we completed a transaction in which our former Bermuda incorporated parent company became a wholly-owned subsidiary of Weatherford Switzerland, a Swiss joint-stock company, and holders of common shares of the Bermuda company received one registered share of Weatherford Switzerland in exchange for each common share that they held. Consequently, we are or may become subject to changes in tax laws, treaties or regulations or the interpretation or enforcement thereof in the U.S., Bermuda, Switzerland or any other jurisdictions in which we or any of our subsidiaries operate or are resident. Our income tax expense is based upon our interpretation of the tax laws in effect in various countries at the time that the expense was incurred. If the U.S. Internal Revenue Service or other taxing authorities do not agree with our assessment of the effects of such laws, treaties and regulations, this could have a material adverse effect on us, including the imposition of a higher effective tax rate on our worldwide earnings or a reclassification of the tax impact of our significant corporate restructuring transactions. In addition, our realization of expected tax benefits is based upon the assumption that we take successful planning steps and that we maintain and execute adequate processes to support our planning activities. If we fail to do so, we may not achieve the expected benefits.

Nonrealization of expected benefits from our acquisitions or business dispositions could affect our projected results.

We expect to gain certain business, financial and strategic advantages as a result of business acquisitions we undertake, including synergies and operating efficiencies. Our forward-looking statements assume that we will successfully integrate our business acquisitions and realize the benefits of those acquisitions. Further, we may from time to time undertake to dispose of businesses or capital assets that are no longer core to our long-term growth strategy and the disposition of which may improve our capital structure. Our forward-looking statements assume that if we decide to dispose of a business or asset we will find a buyer willing to pay a price we deem favorable to Weatherford and that we will successfully dispose of the business or asset. Our inability to complete dispositions timely and at attractive prices may impair our ability to improve our capital structure as rapidly as our

forward-looking statements may indicate.

A downturn in our industry could affect the carrying value of our goodwill. As of September 30, 2012, we had approximately \$3.8 billion of goodwill. During the second quarter of 2012, we recorded a goodwill impairment charge of \$589 million, precipitated by a sustained decline in the market price of the Company's registered shares. Our estimates of the value of our goodwill could be reduced in the future as a result of various factors, including market factors, some of which are beyond our control. Our forward-looking statements do not assume any future goodwill impairment. Any reduction in the fair value of our businesses may result in an impairment charge and therefore adversely affect our results.

35

Table of contents

Adverse weather conditions in certain regions could adversely affect our operations. From time to time, hurricanes, typhoons and severe weather impact our operations in the Gulf of Mexico and Southeast Asia. These storms and associated threats reduce the number of days on which we and our customers operate which results in lower revenues than we otherwise would have achieved. Our Canadian operations, particularly in the second quarter of each year, may vary greatly depending on the timing of "break-up", or the spring thaw, which annually results in a period in which conditions are not conducive to operations. Similarly, unfavorable weather in Russia, Caspian, China, Mexico, Australia and in the North Sea, as well as exceedingly cold winters in other areas of the world, could reduce our operations and revenues from these areas during the relevant period. Our forward-looking statements assume weather patterns in our primary areas of operations will be conducive to our operations.

U.S. Government and internal investigations could affect our results of operations. We are currently involved in government and internal investigations involving our operations. We are in negotiations with the government agencies to resolve these matters, but we cannot yet anticipate with certainty the timing, outcome or possible impact of the ultimate resolution of these investigations, financial or otherwise. The governmental agencies involved in these investigations have a broad range of civil and criminal penalties they may seek to impose against corporations and individuals for violations of trade sanction laws, the Foreign Corrupt Practices Act and other federal statutes including, but not limited to, injunctive relief, disgorgement, fines, penalties and modifications to business practices and compliance programs. In recent years, these agencies and authorities have entered into agreements with, and obtained a range of penalties against, several corporations and individuals in similar investigations, under which civil and criminal penalties were imposed, including in some cases fines and other penalties and sanctions in the tens and hundreds of millions of dollars. We recognized a \$100 million loss contingency in the quarter ended June 30, 2012 for the potential settlement of the sanctioned countries matter. However, the timing and ultimate amount we may pay in connection with those investigations is not certain. Under trade sanction laws, the U.S. DOJ may also seek to impose modifications to business practices that decrease our business, and modifications to compliance programs, which may increase compliance costs. Any injunctive relief, disgorgement, fines, penalties, sanctions or imposed modifications to business practices and the on-going costs resulting from these investigations could adversely affect our results of operations. Through September 30, 2012, we have incurred \$125 million for legal and professional fees in connection with complying with and conducting these on-going investigations. This amount excludes the costs we have incurred to augment and improve our compliance function. We also have incurred \$44 million from 2007 through 2009 for costs in connection with our exit from certain sanctioned countries. We may have additional charges related to these matters in future periods, which costs may include labor claims, contractual claims, penalties assessed by customers, and costs, fines, taxes and penalties assessed by local governments, but we cannot quantify those charges or be certain of the timing of them. In addition, the SEC and DOJ are investigating the circumstances surrounding the material weakness in the Company's internal controls over financial reporting for income taxes that was disclosed on Forms 12b-25 and 8-K on March 1, 2011 and February 21, 2012, respectively, and the related restatements of our historical financial statements. We are cooperating fully with the government investigations.

Failure in the future to ensure ongoing compliance with certain laws could affect our results of operations. In 2009, we substantially augmented our compliance infrastructure with increased staff and more rigorous policies, procedures and training of our employees regarding compliance with applicable anti-corruption laws, trade sanctions laws and import/export laws. As part of this effort, we now undertake audits of our compliance performance in various countries. Our forward-looking statements assume that our compliance efforts will be successful and that we will comply with our internal policies and applicable laws regarding these issues. Our failure to do so could result in additional enforcement action in the future, the results of which could be material and adverse to us.

Political disturbances, war, or terrorist attacks and changes in global trade policies could adversely impact our operations. We operate in over 100 countries, and as such are at risk of various types of political activities, including acts of insurrection, war, terrorism, nationalization of assets and changes in trade policies. We have assumed there will be no material political disturbances or terrorist attacks and there will be no material changes in global trade

policies that affect our business. In early 2011, our operations in Libya, Algeria, Tunisia, Egypt, and to a lesser extent Yemen and Bahrain were disrupted by political revolutions and uprisings in these countries. Conflict in Libya and lesser political disturbances elsewhere in the Middle East and North Africa regions are ongoing, and our operations in Libya have not resumed. During 2011, these six countries accounted for approximately 3% of our global revenue, down from 6% in 2010. We take steps to secure our personnel and assets in affected areas and resume or continue operations where it is safe for us to do so; our forward-looking statements assume we will do so successfully. In Libya, we evacuated all of our non-Libyan employees and their families shortly after hostilities commenced and we have assumed our operations in Libya will not resume in the remainder of 2012. Given our evacuation from the country, it may be difficult, if not impossible, for us to safeguard and recover all of our operating assets; our ability to do so will depend on the local turn of events. At September 30, 2012, we had inventory and property, plant and equipment in Libya with a carrying value of \$112 million, as well as \$3 million of accounts receivable. We risk loss of assets in any location where hostilities arise and persist. In these areas we also may not be able to perform the work we are contracted to perform, which could lead to forfeiture of performance bonds. We have assumed that cessation of business activities in other parts of the Middle East and North Africa regions due to political turmoil will be short-lived, that the negative impact on our business will not be material, and that the region will not experience further disruptive political revolution in the near term. However, if political violence were to curtail our activities in other countries in the region from which we derive greater business, such as Saudi Arabia, Iraq and Algeria, and particularly if political activities were to result in prolonged violence or conflict, we may fail to achieve the results reflected in our forward-looking statements.

Table of contents

The material weakness in accounting for income taxes could have an adverse effect on our share price or our debt ratings and our ability to report our financial information timely and accurately. If we are unable to effectively remediate this material weakness in a timely manner, we could lose investor confidence in the accuracy and completeness of our financial reports, which could have an adverse effect on our share price and could subject us to additional potentially costly shareholder litigation or government inquiries. Further, if we are unable to effectively remediate this material weakness in a timely manner, our failure to do so could limit our ability to obtain financing, harm our reputation or result in debt rating agencies adjusting the ratings on our debt downward. Our forward-looking statements assume we will be able to remediate the material weakness in a timely manner and will maintain an effective internal control environment in the future.

Recent turmoil in the credit markets may reduce our access to capital or reduce the availability of financial risk-mitigation tools. The worldwide credit markets experienced turmoil and uncertainty from mid-2008 through most of 2009, and certain markets remained challenging in parts of 2010. In 2011, several important financial and banking institutions were perceived to be overexposed to credit risks with respect to certain sovereign debt. We do not have access to complete information about the exposures of any particular institution, and we cannot predict what systemic risks may exist to a failure of any sovereign debtor, major financial institution or bank. Our forward-looking statements assume that the financial institutions that have committed to extend us credit will honor their commitments under our credit facilities and that capital markets will remain orderly. If one or more of those institutions becomes unwilling or unable to honor its commitments, our access to liquidity could be impaired and our cost of capital to fund growth could increase. We use interest rate and foreign exchange swap transactions with financial institutions to mitigate certain interest rate and foreign exchange risks associated with our capital structure and our business. Our forward-looking statements assume that those tools will continue to be available to us at prices we deem reasonable. However, the failure of any counterparty to honor a swap agreement could reduce the availability of these financial risk mitigation tools or could result in the loss of expected financial benefits.

Finally, our future results will depend upon various other risks and uncertainties, including, but not limited to, those detailed in our other filings with the SEC under the Securities Exchange Act of 1934, as amended, and the Securities Act of 1933, as amended. For additional information regarding risks and uncertainties, see our other filings with the SEC. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act of 1934 are made available free of charge on our internet web site www.weatherford.com as soon as reasonably practicable after we have electronically filed the material with, or furnished it to, the SEC.

Table of contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We are currently exposed to market risk from changes in foreign currency and changes in interest rates. From time to time, we may enter into derivative financial instrument transactions to manage or reduce our market risk. A discussion of our market risk exposure in these financial instruments follows.

Foreign Currency Exchange Rates

We operate in virtually every oil and natural gas exploration and production region in the world. In some parts of the world, such as the Middle East and Southeast Asia, the currency of our primary economic environment is the U.S. dollar. We use this as our functional currency. In other parts of the world, we conduct our business in currencies other than the U.S. dollar and the functional currency is the applicable local currency. In those countries in which we operate in the local currency, the effects of foreign currency fluctuations are largely mitigated because local expenses of such foreign operations are also generally denominated in the same currency.

In January 2010, the Venezuelan government announced its intention to devalue its currency and move to a two tier exchange structure. The official exchange rate moved from 2.15 to 2.60 for essential goods and from 2.15 to 4.30 for non-essential goods and services. Our Venezuelan entities maintain the U.S. dollar as their functional currency. In connection with this devaluation, we incurred a charge of \$64 million for the remeasurement of our net monetary assets denominated in Venezuelan bolivars at the date of the devaluation, which was not tax deductible in Venezuela.

We also recorded a \$24 million tax benefit for local Venezuelan income tax purposes related to our net U.S. dollar-denominated monetary liability position in the country. Effective January 1, 2011, the Venezuelan government again modified the fixed rate of exchange, eliminating the two tier structure and establishing 4.30 as the official exchange rate for all goods and services. This modification did not have a material impact to our financial position or results of operations. As of September 30, 2012, we had a net monetary asset position denominated in Venezuelan bolivars of approximately \$298 million comprised primarily of cash and accounts receivable. We are continuing to explore opportunities to reduce our exposure but should another devaluation occur in the future, we may be required to take further charges related to the remeasurement of our net monetary asset position. For example, if the Venezuela bolivar devalued by an additional 10% in the future, we would record a devaluation charge of approximately \$30 million.

Assets and liabilities of entities for which the functional currency is the local currency are translated into U.S. dollars using the exchange rates in effect at the balance sheet date, resulting in translation adjustments that are reflected in Accumulated Other Comprehensive Income in the shareholders' equity section on our Condensed Consolidated Balance Sheets. A portion of our net assets are impacted by changes in foreign currencies in relation to the U.S. dollar. We recorded a \$82 million adjustment to increase our equity account for the nine months ended September 30, 2012, to reflect the change U.S. dollar against various foreign currencies.

As of September 30, 2012, we had foreign currency forward contracts with notional amounts aggregating to \$951 million, which were entered into to hedge exposure to currency fluctuations in various foreign currencies. The total estimated fair value of these contracts at September 30, 2012, resulted in a net liability of approximately \$3 million.

These derivative instruments were not designated as hedges, and the changes in fair value of the contracts are recorded each period in current earnings.

We have cross-currency swaps between the U.S. dollar and Canadian dollar to hedge certain exposures to the Canadian dollar. At September 30, 2012, we had notional amounts outstanding of \$168 million. The total estimated fair value of these contracts at September 30, 2012, resulted in a liability of \$36 million. These derivative instruments were not designated as hedges and the changes in fair value of the contracts are recorded each period in current earnings.

Interest Rates

We are subject to interest rate risk on our long-term fixed-interest rate debt and variable-interest rate borrowings.

Variable rate debt, where the interest rate fluctuates periodically, exposes us to short-term changes in market interest

rates. Fixed rate debt, where the interest rate is fixed over the life of the instrument, exposes us to changes in market interest rates reflected in the fair value of the debt and to the risk that we may need to refinance maturing debt with new debt at a higher rate. All other things being equal, the fair value of our fixed rate debt will increase or decrease as interest rates change.

38

Table of contents

Our long-term borrowings that were outstanding at September 30, 2012 and December 31, 2011, subject to interest rate risk consist of the following:

	September 30, 2012		December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In millions)			
5.95% Senior Notes due 2012	\$—	\$—	\$273	\$279
5.15% Senior Notes due 2013	295	299	297	306
4.95% Senior Notes due 2013	250	258	252	264
5.50% Senior Notes due 2016	355	386	357	386
6.35% Senior Notes due 2017	613	700	613	674
6.00% Senior Notes due 2018	497	573	498	563
9.625% Senior Notes due 2019	1,025	1,312	1,030	1,323
5.125% Senior Notes due 2020	797	874	799	861
4.50% Senior Notes due 2022	747	788	—	—
6.50% Senior Notes due 2036	595	645	596	680
6.80% Senior Notes due 2037	298	328	298	338
7.00% Senior Notes due 2038	497	567	498	556
9.875% Senior Notes due 2039	247	362	247	350
6.75% Senior Notes due 2040	596	678	598	690
5.95% Senior Notes due 2042	545	572	—	—

On April 16, 2012, we increased the size of our commercial paper program to \$2.25 billion from \$1.5 billion. From time to time, we use the commercial paper program to issue short-term, unsecured notes. Our commercial paper issuances are supported by the Credit Agreement.

We have various other long-term debt instruments of \$283 million at September 30, 2012, but believe the impact of changes in interest rates in the near term will not be material to these instruments. The carrying value of our short-term borrowings of \$1.6 billion at September 30, 2012 approximates their fair value.

As it relates to our variable rate debt, if market interest rates average 1% more for the remainder of 2012 than the rates as of September 30, 2012, interest expense for the remainder of 2012 would increase approximately \$4 million. This amount was determined by calculating the effect of the hypothetical interest rate on our variable rate debt. For purposes of this sensitivity analysis, we assumed no changes in our capital structure.

Interest Rate Swaps and Derivatives

We manage our debt portfolio to achieve an overall desired position of fixed and floating rates and may employ interest rate swaps as a tool to achieve that goal. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions. The counterparties to our interest rate swaps are multinational commercial banks. In light of events in the global credit markets and the potential impact of these events on the liquidity of the banking industry, we continue to monitor the creditworthiness of our counterparties.

Amounts paid or received upon termination of the interest rate swaps represent the fair value of the agreements at the time of termination and are recorded as an adjustment to the carrying value of the related debt. These amounts are amortized as a reduction, in the case of gains, or an increase, in the case of losses, to interest expense over the remaining term of the debt.

In July 2011, we entered into interest rate swap agreements to pay a variable interest rate and receive a fixed interest rate with an aggregate notional amount of \$300 million. These swaps were designated as fair value hedges of our

6.35% Senior Notes. In June 2012 these swaps were terminated. As a result of these terminations, we received a cash settlement of \$18 million. The gain associated with these interest rate swap terminations was deferred and is being amortized over the remaining term of our 6.35% Senior Notes.

ITEM 4. CONTROLS AND PROCEDURES

Income Tax Material Weakness Previously Disclosed

As disclosed in our Annual Report on Form 10-K/A and Form 10-K for the years ended December 31, 2011 and 2010, respectively, we previously identified a material weakness in our internal controls over the accounting for income taxes relating to current taxes payable, deferred tax assets and liabilities, reserves for uncertain tax positions and current and deferred tax expense. This material weakness resulted in the restatement of our consolidated financial statements included in our Annual Reports on Form 10-K for both 2011 and 2010. As further disclosed, we took steps during 2011 to remediate this material weakness, including:

- Engaged third-party tax advisors and consultants to assist with enhancing internal controls over financial reporting for income taxes and developing and implementing a remediation plan;
- Revised the process for the quarterly and annual tax provisions including additional resources focused on the review and oversight of the tax accounts, reserves for uncertain tax positions and preparation of the income tax provision;
- Began recruitment of various positions within the tax and financial reporting departments and completed the hiring of several newly created positions by the end of 2011;
- Completed the review and validation of the current and deferred tax balance sheet accounts at significant locations;
- and
- Provided income tax accounting training to tax and financial personnel within each region.

Although we had designed and implemented certain new internal controls in an effort to remediate the material weakness, we continued to conclude that the material weakness was not remediated as of December 31, 2011 because our processes, procedures, controls and oversight over the income tax process were not effective to ensure that amounts related to current taxes payable, deferred tax assets and liabilities, reserves for uncertain tax positions the current and deferred income tax expense and related footnote disclosures were accurate.

During 2012, in connection with the preparation of our first and second quarter financial statements and our ongoing income tax remediation activities, we identified additional income tax errors related to prior years. Due to the continued accumulation of these errors, the Audit Committee of our Board of Directors concluded, on July 24, 2012, that investors should no longer rely upon our previously issued financial statements. Management determined that we would delay filing restated financial statements until significant procedures and reviews of our accounting for income taxes were performed. During the third and fourth quarters of 2012, we expanded planned procedures related to the remediation of the material weakness, broadened the scope of these procedures and performed additional procedures to restate our consolidated financial statements and ensure they have been prepared in accordance with generally accepted accounting principles. These procedures included the validation of all our income tax accounts and focused on reconciliations of our current taxes payable and deferred tax balances with the tax bases of assets and liabilities in all jurisdictions, expanded review of uncertain tax positions in all jurisdictions with an additional focus on transfer pricing activities and a further review of our accounting for withholding taxes. As a result of these additional procedures, we identified additional errors across multiple jurisdictions that resulted in further restatement of our previously reported financial statements for the years ended December 31, 2011, 2010 and 2009 and our condensed consolidated financial statements for the first quarter of 2012 and each of the affected quarters within 2011 and 2010. As of the filing date of this Quarterly Report on Form 10-Q, the material weakness in our internal controls over the accounting for income taxes has not been remediated.

Table of contents

Remediation Plan

We believe that the additional adjustments to prior period income taxes are a result of additional procedures and improvements the Company implemented during 2012 to existing procedures or procedures implemented in 2011.

These procedures are part of our efforts to remediate the material weakness and included enhanced reviews and validation of potential uncertain tax positions reported by internal personnel, additional training and communication of potential tax exposures, enhanced procedures related to tax returns filed during 2012 to identify differences in amounts accrued, enhancements to the quarterly tax provision process and implementation of technology solutions to eliminate manual processes. In an effort to remediate the material weakness, the Company plans to continue the implementation of its remediation plan by undertaking the following:

Ongoing evaluation and continued enhancement of tax department personnel and organizational structure including the use of third-party tax advisors and consultants to both assist with enhancing internal controls over financial reporting and to augment our existing tax staff until new appropriately qualified employees are hired to ensure effective preparation and review of the income tax provision, account reconciliations and analyses:

Timely preparation of tax basis balance sheets and reconciliations of the tax accounts to enable more timely detection of potential errors;

Ongoing analysis of uncertain tax positions in all jurisdictions, leveraging the extensive work performed by the Company in connection with the current restatement into a routine process for identifying and assessing uncertain tax positions on a timely basis;

Continued evaluation of the information technology infrastructure supporting our income tax process and implementation of additional technology solutions to further eliminate manual processes and provide long-term sustainability of the process improvements; and

Continued delivery of income tax accounting training for tax and financial accounting personnel.

Material Weakness Related to Percentage of Completion Contract in Iraq

We also identified a material weakness in our internal controls related to a long-term construction contract in Iraq accounted for under the percentage-of-completion method. We concluded that the Company's processes, procedures and internal controls were not effective to ensure that amounts related to the revenue and costs associated with this contract were accounted for in accordance with generally accepted accounting principles. Specifically, we determined that there was: (i) a lack of internal controls over the accounting for claims; and (ii) a failure of internal controls over monitoring the contract scope of work and approval of all estimates related to project change orders. As a result of these control deficiencies, during the first and second quarters of 2012, we included in our revenue estimates claims and unapproved change orders for the recovery of cost overruns that did not meet the recognition criteria for including claims in revenue estimates. In addition, we failed to include in our revenue estimates liquidated damages that we are contractually obligated to pay as a result of delays in the expected completion of the project.

With the removal of these amounts from estimated revenue, the estimated costs to be incurred under the contract exceed estimated revenue to be earned under contract, and therefore the anticipated loss on the contract should have been recorded in full at each balance sheet date. The aforementioned errors had an impact on our Operating Income of \$24 million and \$55 million in the first and second quarters of 2012, respectively. We restated our first quarter financial statements and adjusted our second quarter financial statements to correct for these errors.

Table of contents

Remediation Plan

The Company implemented the following additional controls and procedures over percentage-of-completion accounting during the third and fourth quarters of 2012 to remediate the material weakness:

- Documentary evidence and multiple reviews required for change orders;
- Third-party legal opinions required to support the inclusion of claims in revenue estimates;
- Contract summary and technical accounting review of contracts; and
- Training on an annual basis for all locations using percentage-of-completion accounting.

These new controls and procedures will be taken into account in our annual internal control assessment as of December 31, 2012.

Evaluation of Disclosure Controls and Procedures

At the end of the period covered by this Quarterly Report on Form 10-Q, we carried out an evaluation under the supervision and with the participation of management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act of 1934, as amended ("Exchange Act")). Based upon that evaluation and the evaluation of the identified material weaknesses in our internal controls over financial reporting, our CEO and CFO have concluded our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) were not effective to provide reasonable assurance that the information required to be disclosed in the reports we file and submit under the Exchange Act is recorded, processed, summarized and reported within the time period specified in the Securities and Exchange Commission's rules and forms and that information relating to us (including our consolidated subsidiaries) required to be disclosed is accumulated and communicated to management, including the CEO and CFO, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

Our management, including the CEO and CFO, identified no change in our internal control over financial reporting that occurred during our fiscal quarter ended September 30, 2012, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting other than the changes resulting from the income tax remediation activities described above.

Table of contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Note 15 to our condensed consolidated financial statements included elsewhere in this report.

ITEM 1A. RISK FACTORS

There have been no material changes during the quarter ended September 30, 2012 to the risk factors set forth in Part I, Item 1A in our Annual Report on Form 10-K/A for the year ended December 31, 2011.

ITEM 2. UNREGISTERED SALES OF EQUITY IN SECURITIES AND USE OF PROCEEDS

Under our restricted share plan, employees may elect to have us withhold registered shares to satisfy minimum statutory federal, state and local tax withholding obligations arising on the vesting of restricted stock awards and exercise of options. When we withhold these shares, we are required to remit to the appropriate taxing authorities the market price of the shares withheld, which could be deemed a purchase of shares by us on the date of withholding.

During the quarter ended September 30, 2012, we withheld shares to satisfy these tax withholding obligations as follows:

Period	No. of Shares	Average Price
July 1 – July 31, 2012	42,256	\$ 12.57
August 1 – August 31, 2012	11,985	11.95
September 1 – September 30, 2012	26,533	12.91
