#### GRACO INC. AND SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. The consolidated balance sheet of Graco Inc. and Subsidiaries (the Company) as of June 26, 2009 and the related statements of earnings for the thirteen and twenty-six weeks ended June 26, 2009 and June 27, 2008, and cash flows for the twenty-six weeks ended June 26, 2009 and June 27, 2008 have been prepared by the Company and have not been audited.

In the opinion of management, these consolidated financial statements reflect all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position of Graco Inc. and Subsidiaries as of June 26, 2009, and the results of operations and cash flows for all periods presented.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Therefore, these statements should be read in conjunction with the financial statements and notes thereto included in the Company's 2008 Annual Report on Form 10-K.

The results of operations for interim periods are not necessarily indicative of results that will be realized for the full fiscal year.

2. The following table sets forth the computation of basic and diluted earnings per share (in thousands, except per share amounts):

Stock options to purchase 3,920,000 and 1,889,000 shares were not included in the 2009 and 2008 computations of diluted earnings per share, respectively, because they would have been anti-dilutive.

3. Information on option shares outstanding and option activity for the twenty-six weeks ended June 26, 2009 is shown below (in thousands, except per share amounts):

	Option	Weighted Average Exercise		Options		Weig Avera Exerc	age

average contractual term of 4.5 years. There were approximately 4.9 million share options vested and expected to vest as of June 26, 2009, with an aggregate intrinsic value of \$7.4 million, a weighted average exercise price of \$28.73 and a weighted average contractual term of 6.7 years.

Information related to options exercised in the first six months of 2009 and 2008 follows (in thousands):

The Company recognized year-to-date share-based compensation of \$5.2 million in 2009 and \$5.1 million in 2008. As of June 26, 2009, there was \$9.7 million of unrecognized compensation cost related to unvested options, expected to be recognized over a weighted average period of 2.4 years.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions and results:

Under the Company's Employee Stock Purchase Plan, the Company issued 312,000 shares in 2009 and 216,000 shares in 2008. The fair value of the employees' purchase rights under this Plan was estimated on the date of grant.

The benefit of the 15 percent discount from the lesser of the fair market value per common share on the first day and the last day of the plan year was added to the fair value of the employees' purchase rights determined using the Black-Scholes option-pricing model with the following assumptions and results:

The Company paid \$1.5 million in June 2009 and \$1.5 million in June 2008 for contracts insuring the lives of certain employees who are eligible to participate in certain non-qualified pension and deferred compensation plans. These insurance contracts will be used to fund the non-qualified pension and deferred compensation arrangements. The insurance contracts are held in a trust and are available to general creditors in the event

of the Company's insolvency. Cash surrender value of \$4.1 million and \$2.7 million is included in other assets

in the consolidated balance sheet as of June 26, 2009 and December 28, 2008, respectively.

In the second quarter of 2009, the useful life of certain brand names was determined to be no longer indefinite. The original cost of such brand names, totaling \$2.3 million, is being amortized over a three-year period beginning April 1, 2009. Amortization of intangibles was \$3.0 million in the second quarter of 2009 and \$5.8 million year-to-date. Estimated annual amortization expense is as follows: \$11.2 million in 2009, \$10.5 million in 2010, \$9.4 million in 2011, \$7.9 million in 2012, \$4.1 million in 2013 and \$1.6 million thereafter.

10. The Company accounts for all derivatives, including those embedded in other contracts, as either assets or liabilities and measures those financial instruments at fair value. The accounting for changes in the fair value of derivatives depends on their intended use and designation.

As part of its risk management program, the Company may periodically use forward exchange contracts and interest rate swaps to manage known market exposures. Terms of derivative instruments are structured to match the terms

of the risk being managed and are generally held to maturity. The Company does not hold or issue derivative financial instruments for trading purposes. All other contracts that contain provisions meeting the definition of a derivative also meet the requirements of, and have been designated as, normal purchases or sales. The Company's policy is to not

enter into contracts with terms that cannot be designated as normal purchases or sales.

In 2007, the Company entered into interest rate swap contracts that effectively fix the rates paid on a total of \$80 million of variable rate borrowings. One contract fixed the rate on \$40 million of borrowings at 4.7 percent plus the applicable spread (depending on cash flow leverage ratio) until December 2010. The second contract fixed an additional \$40 million of borrowings at 4.6 percent plus the applicable spread until January 2011. Both contracts have been designated as cash flow hedges against interest rate volatility. Consequently, changes in the fair market value are recorded in accumulated other comprehensive income (loss) (AOCI). Amounts included in AOCI will be reclassified to earnings as interest rates increase and as the swap contracts approach their expiration dates. Net amounts paid or payable under terms of the contracts were charged to interest expense and totaled \$1.3 million in the first half of 2009.

The Company periodically evaluates its monetary asset and liability positions denominated in foreign currencies. The Company enters into forward contracts or options, or borrows in various currencies, in order to hedge its net monetary positions. These instruments are recorded at current market values and the gains and losses are included in other expense (income), net. There were seven contracts outstanding as of June 26, 2009, with notional amounts totaling \$13 million. There were 33 contracts outstanding during all or part of the first half of 2009, with net losses of \$0.4 million included in other expense (income), net. The Company believes it uses strong financial counterparts in these transactions and that the resulting credit risk under these hedging strategies is not significant.

The Company uses significant other observable inputs to value the derivative instruments used to hedge interest rate volatility and net monetary positions. The fair market value and balance sheet classification of such instruments follows (in thousands):

	Balance Sheet	June 26,		December 26,		
	Classification	2009		2008

- 11. In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements." This statement establishes a consistent framework for measuring fair value and expands disclosures on fair market value measurements. SFAS No. 157 was effective for the Company starting in fiscal 2008 for financial assets and liabilities. With respect to non-financial assets and liabilities, the statement was effective for the Company starting in fiscal 2009. The adoption of this statement as it pertains to non-financial assets and liabilities had no significant impact on the consolidated financial statements.
- 12. The Company has evaluated subsequent events through the time the financial statements were approved for issuance on July 22, 2009.

#### Item 2. GRACO INC. AND SUBSIDIARIES

# MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### **Overview**

The Company designs, manufactures and markets systems and equipment to move, measure, control, dispense and spray fluid materials. Management classifies the Company's business into three reportable segments: Industrial, Contractor and Lubrication. Key strategies include development of new products, expansion of distribution and new market penetration.

The following Management's Discussion and Analysis reviews significant factors affecting the Company's results of operations and financial condition. This discussion should be read in conjunction with the financial statements and the accompanying notes to the financial statements.

### **Results of Operations**

Net sales, net earnings and earnings per share were as follows (in millions except per share amounts and percentages):

	Thirteen Weeks Ended					Twenty	Twenty-six Weeks Ended					
	June 26	ó,	June 27,		%	June 26	June 26,		June 27,			
	2009		2008		Change	2009		2008		Change		
Net Sales	\$	147.7	\$	239.2	(38)%	\$	285.6	\$	443.4	(36)%		
Net Earnings	\$	11.6	\$	42.5	(73)%	\$	14.4	\$	78.0	(82)%		
Diluted Net Earnings												
per Common Share	\$	0.19	\$	0.69	(72)%	\$	0.24	\$	1.27	(81)%		

Weak economic conditions worldwide continued to affect the Company's operating results. Sales and orders decreased in all segments and regions. Currency translation had an unfavorable effect on sales (\$5 million for the quarter and \$11 million year-to-date) and net earnings (\$2 million for the quarter and \$4 million year-to-date). Year-to-date, the Company has recorded \$5 million of cost related to workforce reductions, mostly in the first quarter. The resulting decrease in cost structure contributed to an improvement in second quarter net earnings compared to the first quarter.

#### **Consolidated Results**

Sales by geographic area were as follows (in millions):

	Thirteen V	Week	s Ended			Twenty-six Weeks Ended				
	June 26,	June 26,		June 27,		June 26,		June 27	,	
	2009			2008		2009		2008

<sup>&</sup>lt;sup>1</sup> North and South America, including the U.S.

<sup>&</sup>lt;sup>2</sup> Europe, Africa and Middle East

Sales for the quarter are down 33 percent in the Americas, 52 percent in Europe (46 percent at consistent

translation rates) and 29 percent in Asia Pacific. Year-to-date sales are down 32 percent in the Americas,

47 percent in Europe (40 percent at consistent translation rates) and 27 percent in Asia Pacific. Consolidated

sales are down 38 percent for the quarter (36 percent at consistent translation rates) and 36 percent

year-to-date (33 percent at consistent translation rates).

Gross profit margin, expressed as a percentage of sales, was 49.4 percent for the quarter and 48.1 percent

year-to-date, down from 53.8 percent and 54.3 percent, respectively, for the comparable periods last year.

Decreases in both the quarter and year-to-date are due to lower production volumes (approximately 4

percentage points), unfavorable currency translation rates (approximately 1½ percentage points) and

increased pension cost (approximately 1 percentage point). Decreases were offset somewhat by

favorable material costs (approximately 1 percentage point). Workforce reduction costs in the

first quarter affected the year-to-date margin rate by approximately 1 percentage point.

Total operating expenses for the quarter and year-to-date are down 12 percent and 7 percent, respectively.

Decreases from translation effects (\$2 million for the quarter, \$4 million year-to-date), lower incentive and

bonus provisions and spending reductions are partially offset by higher product development and pension

expenses. Increases in product development expense reflect the Company's commitment to continued

development of new and improved products as a key component of its strategy for future growth.

Year-to-date operating expenses include approximately \$2 million related to workforce reductions made

primarily in the first quarter.

The effective income tax rate was 32.1 percent for the quarter compared to 34.7 percent for the second

quarter of 2008. The rate was higher in 2008 because the R&D tax credit was not renewed until the

fourth quarter and no credit was included in the second quarter provision.

For the quarter, Industrial segment sales decreased 42 percent in the Americas, 57 percent in Europe (52 percent at consistent translation rates) and 29 percent in Asia Pacific. Year-to-date sales decreased 38 percent in the Americas, 49 percent in Europe (43 percent at consistent translation rates) and 28 percent in Asia Pacific.

In the second quarter, the impacts of low volume and currency translation on operating earnings were partially offset by the impacts of lower selling-related expenses and spending reductions initiated in prior quarters. Low volume, workforce reduction costs, currency translation and increased product development expense affected year-to-date operating earnings as a percentage of sales.

Low volume, workforce reduction costs, currency translation and increased product development expense affected year-to-date operating earnings as a percentage of sales. For the quarter, Lubrication segment sales decreased 38 percent in the Americas, 58 percent in Europe (54 percent at consistent translation rates) and 56 percent in Asia Pacific. Year-to-date sales decreased 37 percent in the Americas, 50 percent in Europe (46 percent at consistent translation rates) and 41 percent in Asia Pacific.

In the second quarter, the impact of low volume on operating earnings were partially offset by the impacts of lower selling-related expenses and spending reductions initiated in prior quarters. Low volume, workforce

reduction costs and increased product development expense affected year-to-date operating earnings as a percentage of sales. Mix of products sold and costs related to discontinued products contributed to lower margin rates in the Lubrication segment.

#### **Liquidity and Capital Resources**

In the first half of 2009, the Company used cash to reduce the borrowings under its long-term line of credit by \$36 million and paid dividends of \$23 million. Significant uses of cash and borrowings in the first half of 2008 included \$80 million for purchases and retirement of Company common stock, \$35 million for a business acquisition and \$23 million for payment of dividends.

Since the end of 2008, inventories have been reduced by \$23 million. Accounts receivable decreased by \$15 million from continuing collections and lower sales levels.

At June 26, 2009, the Company had various lines of credit totaling \$281 million, of which \$123 million was unused. Internally generated funds and unused financing sources are expected to provide the Company with the flexibility to meet its liquidity needs in 2009.

#### Outlook

Management expects that global economic conditions will continue to present a challenging operating environment for at least the rest of the year. To the extent permitted by working capital resources, management intends to continue making targeted investments in strategic operating and growth initiatives, including new product development, improving manufacturing efficiencies, expanding distribution and entering new markets.

Working capital management will continue to be a high priority for the remainder of 2009. The Company plans to further reduce inventory and continue its focus on collection of receivables over their normal cycle.

Given the uncertainty in world economies and the possibility of continued weakness in markets

served, management has contingency plans to appropriately respond to conditions as they develop.
