APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(Unaudited)

Note 1 Basis of Presentation

Basis of Presentation

In the opinion of management, the unaudited interim consolidated condensed financial statements of Applied Materials, Inc. and its subsidiaries (Applied or the Company) included herein have been prepared on a basis consistent with the October 30, 2016 audited consolidated financial statements and include all material adjustments, consisting of normal recurring adjustments, necessary to fairly present the information set forth therein. These unaudited interim consolidated condensed financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in Applied's Annual Report on Form 10-K for the fiscal year ended October 30, 2016 (2016 Form 10-K). Applied's results of operations for the three months ended January 29, 2017 are not necessarily indicative of future operating results. Applied's fiscal year ends on the last Sunday in October of each year. Fiscal 2017 and 2016 contain 52 weeks and 53 weeks, respectively, and the first three months of fiscal 2017 and 2016 contained 13 weeks and 14 weeks, respectively.

Certain prior year amounts have been reclassified to conform to current year presentation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates. On an ongoing basis, Applied evaluates its estimates, including those related to accounts receivable and sales allowances, fair values of financial instruments, inventories, intangible assets and goodwill, useful lives of intangible assets and property and equipment, fair values of share-based awards, and income taxes, among others. Applied bases its estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Revenue Recognition

Applied recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; seller's price to buyer is fixed or determinable; and collectability is probable. Applied's shipping terms are customarily FOB Applied shipping point or equivalent terms. Applied's revenue recognition policy generally results in revenue recognition at the following points: (1) for all transactions where legal title passes to the customer upon shipment or delivery, Applied recognizes revenue upon passage of title for all products that have been demonstrated to meet product specifications prior to shipment; the portion of revenue associated with certain installation-related tasks is deferred, and that revenue is recognized upon completion of the installation-related tasks; (2) for products that have not been demonstrated to meet product specifications prior to shipment, revenue is recognized at customer technical acceptance; (3) for transactions where legal title does not pass at shipment or delivery, revenue is recognized when legal title passes to the customer, which is generally at customer technical acceptance; and (4) for arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred using the relative selling price method utilizing estimated sales prices until delivery of the deferred elements. Applied limits the amount of revenue recognition for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations or subject to customer-specified return or adjustment. In cases where Applied has sold products that have been demonstrated to meet product specifications prior to shipment, Applied believes that at the time of delivery, it has an enforceable claim to amounts recognized as revenue. Spare parts revenue is generally recognized upon shipment, and services revenue is generally recognized over the period that the services are provided.

When a sales arrangement contains multiple elements, such as hardware and services and/or software products, Applied allocates revenue to each element based on a selling price hierarchy. The selling price for a deliverable is based on its vendor specific objective evidence (VSOE) if available, third party evidence (TPE) if VSOE is not

available, or estimated selling price (ESP) if neither VSOE nor TPE is available. Applied generally utilizes the ESP due to the nature of its products. In multiple element arrangements where more-than-incidental software deliverables are included, revenue is allocated to each separate unit of accounting for each of the non-software deliverables, and to the software deliverables as a group, using the relative selling prices of each of the deliverables in the arrangement based on the aforementioned selling price hierarchy. If the arrangement contains more than one software deliverable, the arrangement consideration allocated to the software deliverables as a group is then allocated to each software deliverable using the guidance for recognizing software revenue.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Recent Accounting Pronouncements

Accounting Standards Adopted

Debt Issuance Costs. In April 2015, the Financial Accounting Standard Board (FASB) issued authoritative guidance that requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability, consistent with debt discounts. Effective in the first quarter of fiscal 2017, Applied adopted the authoritative guidance retrospectively. The adoption of this guidance did not have a significant impact on Applied's consolidated financial statements. See Note 9 of Notes to Consolidated Condensed Financial Statements for additional discussion.

Fair Value Disclosures. In May 2015, the FASB issued authoritative guidance to remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The new guidance also removes the requirement of certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. The guidance became effective for Applied in the first quarter of fiscal 2017, with retrospective application. The adoption of this guidance only impacts disclosures in Applied's annual consolidated financial statements.

Intangibles: Internal-Use Software. In April 2015, the FASB issued authoritative guidance for customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. This guidance did not change accounting for service contracts. Applied adopted this guidance effective in the first quarter of fiscal 2017 prospectively to all arrangements entered into or materially modified after the effective date. The adoption of this guidance did not have a significant impact on Applied's consolidated financial statements.

Accounting Standards Not Yet Adopted

Goodwill Impairment. In January 2017, the FASB issued authoritative guidance that simplifies the process required to test goodwill for impairment. The authoritative guidance will be effective for Applied in the first quarter of fiscal 2020. Early adoption is permitted. The adoption of this guidance is not expected to have a significant impact on Applied's consolidated financial statements.

Income Taxes: Intra-Entity Asset Transfers. In October 2016, the FASB issued authoritative guidance that requires entities to recognize at the transaction date the income tax consequences of intercompany asset transfers other than inventory. The authoritative guidance will be effective for Applied in the first quarter of fiscal 2019, with early adoption permitted. Applied is currently evaluating the effect of this new guidance on Applied's consolidated financial statements.

Restricted Cash. In August 2016, a new authoritative guidance was issued which addresses classification of certain cash receipts and cash payments related to the statement of cash flows. The authoritative guidance will be effective for Applied in the first quarter of fiscal 2019. The adoption of this guidance is not expected to have a significant impact on Applied's consolidated financial statements.

Financial Instruments: Credit Losses. In June 2016, the FASB issued authoritative guidance that modifies the impairment model for certain financial assets by requiring use of an expected loss methodology, which will result in more timely recognition of credit losses. The authoritative guidance will be effective for Applied in the first quarter of fiscal 2021. Early adoption is permitted beginning in the first quarter of fiscal 2020. Applied is currently evaluating the effect of this new guidance on Applied's consolidated financial statements.

Share-Based Compensation. In March 2016, the FASB issued authoritative guidance that simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, forfeitures, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Applied plans to adopt the authoritative guidance effective in the first quarter of fiscal 2018. Upon adoption, Applied has elected to

continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period. The new standard will result in the recognition of excess tax benefits in provision for income taxes rather than paid-in capital prospectively, which is expected to increase volatility in Applied's results of operations. Applied also elected to apply the presentation requirements for cash flows related to excess tax benefits retrospectively. The presentation requirements for cash flows related to employee taxes paid for withheld shares will be presented as a financing activity retrospectively, as required. Applied expects cash flow from operations to increase, with a corresponding decrease in cash flow from financing activity as a result of the changes in the cash flow presentation.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Leases. In February 2016, the FASB issued authoritative guidance for lease accounting, which requires lessees to recognize lease assets and liabilities on the balance sheet for certain lease arrangements that are classified as operating leases under the previous standard, and to provide for enhanced disclosures. The authoritative guidance will be effective for Applied in the first

quarter of fiscal 2020 and should be applied using a modified retrospective approach. Early adoption is permitted.

Applied is currently evaluating the effect of this new guidance on Applied's consolidated financial statements.

Financial Instruments: Classification and Measurement. In January 2016, the FASB issued authoritative guidance that requires equity investments that do not result in consolidation, and are not accounted for under the equity method, to be measured at fair value, and requires recognition of any changes in fair value in net income unless the investments qualify for a new practicability exception. For financial liabilities measured at fair value, the change in fair value caused by a change in instrument-specific credit risk will be required to be presented separately in other comprehensive income. The authoritative guidance will be effective for Applied in the first quarter of fiscal 2019.

Early adoption is permitted only for the provisions related to the recognition of changes in fair value of financial liabilities caused by instrument-specific credit risk. Applied is currently evaluating the effect of this new guidance on Applied's consolidated financial statements.

Inventory Measurement. In July 2015, the FASB issued authoritative guidance that requires inventory to be measured at the lower of cost and net realizable value instead of at lower of cost or market. This guidance does not apply to inventory that is measured using last-in, first out (LIFO) or the retail inventory method but applies to all other inventory including those measured using first-in, first-out (FIFO) or the average cost method. The authoritative guidance will be effective for Applied in the first quarter of fiscal 2018 and should be applied prospectively. Early adoption is permitted as of the beginning of an interim or annual reporting period. Applied is currently evaluating the effect of this new guidance on Applied's consolidated financial statements.

Revenue Recognition. In May 2014, the FASB issued authoritative guidance that requires revenue recognition to depict the transfer of promised goods or services to a customer in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This new standard will supersede most current revenue recognition guidance, including industry-specific guidance. Entities will have the option of using either a full retrospective or modified retrospective approach to adopting the guidance. Under the modified approach, an entity would recognize the cumulative effect of initially applying the guidance with an adjustment to the opening balance of retained earnings in the period of adoption. In addition, the modified approach will require additional disclosures. In August 2015, the FASB issued an amendment to defer the effective date by one year and allow entities to early adopt no earlier than the original effective date. With this amendment, the guidance will be effective for Applied in the first quarter of fiscal 2019, which is the Company's planned adoption date. In fiscal 2016, Applied established a project steering committee and cross-functional implementation team to identify potential differences that would result from applying the requirements of the new standard to Applied's revenue contracts. In addition, the implementation team is also responsible for identifying and implementing changes to business processes, systems and controls to support recognition and disclosure under the new standard. Applied is continuing to evaluate the effect of this new guidance on Applied's financial position, results of operations and its ongoing financial reporting, including the selection of a transition method.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 2 Earnings Per Share

Basic earnings per share is determined using the weighted average number of common shares outstanding during the period. Diluted earnings per share is determined using the weighted average number of common shares and potential common shares (representing the dilutive effect of stock options, restricted stock units, and employee stock purchase plan shares) outstanding during the period. Applied's net income has not been adjusted for any period presented for purposes of computing basic or diluted earnings per share due to the Company's non-complex capital structure.

	Three Months Ended	
	January 29, 2017	January 31, 2016
	(In millions, except per share amounts)	
Numerator:		
Net income	\$ 703	\$ 286
Denominator:		
Weighted average common shares outstanding	1,078	1,146
Effect of dilutive stock options, restricted stock units and employee stock purchase plan shares	11	8
Denominator for diluted earnings per share	1,089	1,154
Basic and diluted earnings per share	\$ 0.65	\$ 0.25
Potentially dilutive securities	—	2

Potentially dilutive securities attributable to outstanding stock options and restricted stock units are excluded from the calculation of diluted earnings per share where the combined exercise price, average unamortized fair value and assumed tax benefits upon the exercise of options and the vesting of restricted stock units are greater than the average market price of Applied common stock, and therefore their inclusion would be anti-dilutive.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Gains and Losses on Investments

During the three months ended January 29, 2017 and January 31, 2016, gross realized gains and losses on investments were not material.

At January 29, 2017 and October 30, 2016, gross unrealized losses related to Applied's investment portfolio were not material. Applied regularly reviews its investment portfolio to identify and evaluate investments that have indications of possible impairment. Factors considered in determining whether an unrealized loss is considered to be temporary, or other-than-temporary and therefore impaired, include: the length of time and extent to which fair value has been lower than the cost basis; the financial condition, credit quality and near-term prospects of the investee; and whether it is more likely than not that Applied will be required to sell the security prior to recovery. Generally, the contractual terms of investments in marketable securities do not permit settlement at prices less than the amortized cost of the investments. Applied determined that the gross unrealized losses on its marketable fixed-income securities at January 29, 2017 and January 31, 2016 were temporary in nature and therefore it did not recognize any impairment of its marketable fixed-income securities during the three months ended January 29, 2017 or January 31, 2016.

Impairment charges on equity investments in privately-held companies during the three months ended January 29, 2017 and January 31, 2016 were not material. These impairment charges are included in interest and other income, net in the Consolidated Condensed Statement of Operations.

Unrealized gains and temporary losses on investments classified as available-for-sale are included within accumulated other comprehensive income (loss), net of any related tax effect. Upon realization, those amounts are reclassified from accumulated other comprehensive income (loss) to results of operations.

Note 4 Fair Value Measurements

Applied's financial assets are measured and recorded at fair value, except for equity investments in privately-held companies. These equity investments are generally accounted for under the cost method of accounting and are periodically assessed for other-than-temporary impairment when events or circumstances indicate that an other-than-temporary decline in value may have occurred. Applied's nonfinancial assets, such as goodwill, intangible assets, and property, plant and equipment, are recorded at cost and are assessed for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable.

Fair Value Hierarchy

Applied uses the following fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1 — Quoted prices in active markets for identical assets or liabilities;

Level 2 — Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Applied's investments consist primarily of debt securities that are classified as available-for-sale and recorded at their fair values. In determining the fair value of investments, Applied uses pricing information from pricing services that value securities based on quoted market prices and models that utilize observable market inputs. In the event a fair value estimate is unavailable from a pricing service, Applied generally obtains non-binding price quotes from brokers. Applied then reviews the information provided by the pricing services or brokers to determine the fair value of its short-term and long-term investments. In addition, to validate pricing information obtained from pricing services,

Applied periodically performs supplemental analysis on a sample of securities. Applied reviews any significant unanticipated differences identified through this analysis to determine the appropriate fair value.

Investments with remaining effective maturities of 12 months or less from the balance sheet date are classified as short-term investments. Investments with remaining effective maturities of more than 12 months from the balance sheet date are classified as long-term investments. As of January 29, 2017, substantially all of Applied's available-for-sale, short-term and long-term investments were recognized at fair value that was determined based upon observable inputs.

Assets Measured at Fair Value on a Recurring Basis

Financial assets (excluding cash balances) measured at fair value on a recurring basis are summarized below:

	January 29, 2017			October 30, 2016		
	Level 1	Level 2	Total	Level 1	Level 2	Total
	1	2		1	2	
(In millions)						
Assets:						
Money market funds	\$1,533	\$—	\$1,533	\$1,889	\$—	\$1,889
U.S. Treasury and agency securities	83	69	152	107	98	205
Non-U.S. government securities	—	66	66	—	15	15
Municipal securities	—	769	769	—	661	661
Commercial paper, corporate bonds and medium-term notes	—	814	814	—	415	415
Asset-backed and mortgage-backed securities	—	264	264	—	253	253
Publicly traded equity securities	72	—	72	67	—	67
Total	\$1,688	\$1,982	\$3,670	\$2,063	\$1,442	\$3,505

There were no transfers between Level 1 and Level 2 fair value measurements during the three months ended January 29, 2017 or January 31, 2016. Applied did not have any financial assets measured at fair value on a recurring basis within Level 3 fair value measurements as of January 29, 2017 or October 30, 2016.

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

Equity investments in privately-held companies are generally accounted for under the cost method of accounting and are periodically assessed for other-than-temporary impairment when an event or circumstance indicates that an other-than-temporary decline in value may have occurred. If Applied determines that an other-than-temporary impairment has occurred, the investment will be written down to its estimated fair value based on available information, such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data. At January 29, 2017, equity investments in privately-held companies totaled \$64 million, of which \$56 million of investments were accounted for under the cost method of accounting and \$8 million of investments had been measured at fair value on a non-recurring basis within Level 3 fair value measurements due to an other-than-temporary decline in value. At October 30, 2016, equity investments in privately-held companies totaled \$70 million, of which \$62 million of investments were accounted for under the cost method of accounting and \$8 million of investments had been measured at fair value on a non-recurring basis within Level 3 fair value measurements due to an other-than-temporary decline in value. Impairment charges on equity investments in privately-held companies during the three months ended January 29, 2017 and January 31, 2016 were not material.

Other

The carrying amounts of Applied's financial instruments, including cash and cash equivalents, accounts receivable, notes payable - short term, and accounts payable and accrued expenses, approximate fair value due to their short maturities. At January 29, 2017, the carrying amount of long-term debt was \$3.1 billion and the estimated fair value was \$3.4 billion. At October 30, 2016, the carrying amount of long-term debt was \$3.1 billion and the estimated fair value was \$3.5 billion. The estimated fair value of long-term debt is determined by Level 2 inputs and is based primarily on quoted market prices for the same or similar issues. See Note 9 of the Notes to the Consolidated Condensed Financial Statements for further detail of existing debt.

Note 5 Derivative Instruments and Hedging Activities

Derivative Financial Instruments

Applied conducts business in a number of foreign countries, with certain transactions denominated in local currencies, such as the Japanese yen, euro, Israeli shekel and Taiwanese dollar. Applied uses derivative financial instruments, such as forward exchange contracts and currency option contracts, to hedge certain forecasted foreign currency denominated transactions expected to occur typically within the next 24 months. The purpose of Applied's foreign currency management is to mitigate the effect of exchange rate fluctuations on certain foreign currency denominated revenues, costs and eventual cash flows. The terms of currency instruments used for hedging purposes are generally consistent with the timing of the transactions being hedged.

During fiscal 2015, Applied entered into and settled a series of forward-starting interest rate swap agreements, with a total notional amount of \$600 million to hedge against the variability of cash flows due to changes in the benchmark interest rate of fixed rate debt. These instruments were designated as cash flow hedges at inception and settled in conjunction with the issuance of debt in September 2015. The loss from the settlement of the interest rate swap agreement which was included in accumulated other comprehensive income (AOCI) in stockholders' equity is being amortized to interest expense over the term of the senior unsecured 10-year notes issued in September 2015.

Applied does not use derivative financial instruments for trading or speculative purposes. Derivative instruments and hedging activities, including foreign currency exchange contracts and interest rate swap agreements, are recognized on the balance sheet at fair value. Changes in the fair value of derivatives that do not qualify for hedge treatment, as well as the ineffective portion of any hedges, are recognized currently in earnings. All of Applied's derivative financial instruments are recorded at their fair value in other current assets or in accounts payable and accrued expenses.

Hedges related to anticipated transactions are designated and documented at the inception of the hedge as cash flow hedges and foreign exchange derivatives are typically entered into once per month. Cash flow hedges are evaluated for effectiveness quarterly. The effective portion of the gain or loss on these hedges is reported as a component of AOCI in stockholders' equity and is reclassified into earnings when the hedged transaction affects earnings. The majority of the after-tax net income or loss related to foreign exchange derivative instruments included in AOCI at January 29, 2017 is expected to be reclassified into earnings within 12 months. Changes in the fair value of currency forward exchange and option contracts due to changes in time value are excluded from the assessment of effectiveness. Both ineffective hedge amounts and hedge components excluded from the assessment of effectiveness are recognized in earnings. If the transaction being hedged is no longer probable to occur, or if a portion of any derivative is deemed to be ineffective, Applied promptly recognizes the gain or loss on the associated financial instrument in earnings. The amount recognized due to discontinuance of cash flow hedges that were probable not to occur by the end of the originally specified time period was not significant for the three months ended January 29, 2017 and January 31, 2016. Additionally, forward exchange contracts are generally used to hedge certain foreign currency denominated assets or liabilities. These derivatives are typically entered into once per month and are not designated for hedge accounting treatment. Accordingly, changes in the fair value of these hedges are recorded in earnings to offset the changes in the fair value of the assets or liabilities being hedged.

The fair values of foreign exchange derivative instruments at January 29, 2017 and October 30, 2016 were not material.

Credit Risk Contingent Features

If Applied's credit rating were to fall below investment grade, it would be in violation of credit risk contingent provisions of the derivative instruments discussed above, and certain counterparties to the derivative instruments could request immediate payment on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk related contingent features that were in a net liability position was immaterial as of January 29, 2017.

Entering into derivative contracts with banks exposes Applied to credit-related losses in the event of the banks' nonperformance. However, Applied's exposure is not considered significant.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 6 Accounts Receivable, Net

Applied has agreements with various financial institutions to sell accounts receivable and discount promissory notes from selected customers. Applied sells its accounts receivable without recourse. Applied, from time to time, also discounts letters of credit issued by customers through various financial institutions. The discounting of letters of credit depends on many factors, including the willingness of financial institutions to discount the letters of credit and the cost of such arrangements.

Applied sold \$63 million of accounts receivable during the three months ended January 29, 2017. Applied did not sell accounts receivable during the three months ended January 31, 2016. Applied did not discount letters of credit issued by customers or discount promissory notes during the three months ended January 29, 2017 and January 31, 2016. Financing charges on the sale of receivables and discounting of letters of credit are included in interest expense in the accompanying Consolidated Condensed Statements of Operations and were not material for all periods presented. Accounts receivable are presented net of allowance for doubtful accounts of \$51 million at January 29, 2017 and October 30, 2016. Applied sells its products principally to manufacturers within the semiconductor and display industries. While Applied believes that its allowance for doubtful accounts is adequate and represents its best estimate as of January 29, 2017, it continues to closely monitor customer liquidity and industry and economic conditions, which may result in changes to Applied's estimates.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 8 Goodwill, Purchased Technology and Other Intangible Assets

Goodwill and Purchased Intangible Assets

Applied's methodology for allocating the purchase price relating to purchase acquisitions is determined through established and generally accepted valuation techniques. Goodwill is measured as the excess of the purchase price over the sum of the amounts assigned to tangible and identifiable intangible assets acquired less liabilities assumed. Applied assigns assets acquired (including goodwill) and liabilities assumed to one or more reporting units as of the date of acquisition. Typically, acquisitions relate to a single reporting unit and thus do not require the allocation of goodwill to multiple reporting units. If the products obtained in an acquisition are assigned to multiple reporting units, the goodwill is distributed to the respective reporting units as part of the purchase price allocation process.

Goodwill and purchased intangible assets with indefinite useful lives are not amortized, but are reviewed for impairment annually during the fourth quarter of each fiscal year and whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The process of evaluating the potential impairment of goodwill and intangible assets requires significant judgment, especially in emerging markets. Applied regularly monitors current business conditions and considers other factors including, but not limited to, adverse industry or economic trends, restructuring actions and lower projections of profitability that may impact future operating results. To test goodwill for impairment, Applied first performs a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, Applied then performs the two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. Under the two-step goodwill impairment test, Applied would in the first step compare the estimated fair value of each reporting unit to its carrying value. Applied determines the fair value of each of its reporting units based on a weighting of income and market approaches. If the carrying value of a reporting unit exceeds its fair value, Applied would then perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. If Applied determines that the carrying value of a reporting unit's goodwill exceeds its implied fair value, Applied would record an impairment charge equal to the difference.

As of January 29, 2017, Applied's reporting units include Transistor and Interconnect Group, Patterning and Packaging Group, and Imaging and Process Control Group, which combine to form the Semiconductor Systems reporting segment, Applied Global Services, and Display and Adjacent Markets.

The evaluation of goodwill and intangible assets for impairment requires the exercise of significant judgment. In the event of future changes in business conditions, Applied will be required to reassess and update its forecasts and estimates used in future impairment analyses. If the results of these future analyses are lower than current estimates, a material impairment charge may result at that time.

Details of goodwill and other indefinite-lived intangible assets as of January 29, 2017 and October 30, 2016 were as follows:

	January 29, 2017			October 30, 2016		
	Other			Other		
	Goodwill	Intangible Assets	Total	Goodwill	Intangible Assets	Total
	(In millions)					
Semiconductor Systems	\$2,151	\$ —	\$2,151	\$2,151	\$ —	\$2,151
Applied Global Services	1,010	5	1,015	1,010	5	1,015
Display and Adjacent Markets	155	18	173	155	20	175
Carrying amount	\$3,316	\$ 23	\$3,339	\$3,316	\$ 25	\$3,341

Other intangible assets that are not subject to amortization consist primarily of in-process technology, which will be subject to amortization upon commercialization. The fair value assigned to in-process technology was determined using the income approach taking into account estimates and judgments regarding risks inherent in the development process, including the likelihood of achieving technological success and market acceptance. If an in-process technology project is abandoned, the acquired technology attributable to the project will be written-off.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

A summary of Applied's purchased technology and intangible assets is set forth below:

January 29, 2017
October 30, 2016

	(In millions)	
Purchased technology, net	\$ 367	\$ 409
Intangible assets - finite-lived, net	137	141
Intangible assets - indefinite-lived	23	25
Total	\$ 527	\$ 575

Finite-Lived Purchased Intangible Assets

Applied amortizes purchased intangible assets with finite lives using the straight-line method over the estimated economic lives of the assets, ranging from 1 to 15 years.

Applied evaluates long-lived assets for impairment whenever events or changes in circumstances indicate the carrying value of an asset group may not be recoverable. Applied assesses the fair value of the assets based on the amount of the undiscounted future cash flow that the assets are expected to generate and recognizes an impairment loss when estimated undiscounted future cash flow expected to result from the use of the asset, plus net proceeds expected from disposition of the asset, if any, are less than the carrying value of the asset. When Applied identifies an impairment, Applied reduces the carrying value of the group of assets to comparable market values, when available and appropriate, or to its estimated fair value based on a discounted cash flow approach.

Intangible assets, such as purchased technology, are generally recorded in connection with a business acquisition. The value assigned to intangible assets is usually based on estimates and judgments regarding expectations for the success and life cycle of products and technology acquired. Applied evaluates the useful lives of its intangible assets each reporting period to determine whether events and circumstances require revising the remaining period of amortization. In addition, Applied reviews intangible assets for impairment when events or changes in circumstances indicate their carrying value may not be recoverable. Management considers such indicators as significant differences in actual product acceptance from the estimates, changes in the competitive and economic environments, technological advances, and changes in cost structure.

Details of finite-lived intangible assets were as follows:

Note 9 Borrowing Facilities and Debt

Applied has credit facilities for unsecured borrowings in various currencies of up to \$1.6 billion, of which \$1.5 billion is comprised of a committed revolving credit agreement with a group of banks that is scheduled to expire in September 2020. This agreement provides for borrowings in United States dollars at interest rates keyed to one of various benchmark rates selected by Applied for each advance, plus a margin based on Applied's public debt rating and includes financial and other covenants. Remaining credit facilities in the amount of approximately \$70 million are with Japanese banks. Applied's ability to borrow under these facilities is subject to bank approval at the time of the borrowing request, and any advances will be at rates indexed to the banks' prime reference rate denominated in Japanese yen. No amounts were outstanding under any of these facilities at both January 29, 2017 and October 30, 2016, and Applied has not utilized these credit facilities.

Debt outstanding as of January 29, 2017 and October 30, 2016 was as follows:

	Principal Amount		Effective	Interest
	January 29, 2017	October 30, 2016	Interest Rate	Pay Dates
(In millions)				
Short-term debt:				
7.125% Senior Notes Due 2017	\$ 200	\$ 200	7.190%	April 15, October 15

Balance at January 29, 2017	\$31	\$ (3)	\$ (148)	\$ 14	\$(106)

	Unrealized Gain (Loss)	Unrealized Gain (Loss)	Unrealized Gain (Loss)	Unrealized Gain (Loss)	
	on Derivative Investments	on Instruments Qualifying as Cash Flow Hedges	Defined and Postretirement Benefit Plans	Cumulative Translation Adjustments	Total
	(in millions)				
Balance at October 25, 2015	\$14	\$ (15)	\$ (105)	\$ 14	\$(92)
Other comprehensive income (loss) before reclassifications	1	(3)	—	—	(2)
Amounts reclassified out of AOCI	—	—	—	—	—
Other comprehensive income (loss), net of tax	1	(3)	—	—	(2)
Balance at January 31, 2016	\$15	\$ (18)	\$ (105)	\$ 14	\$(94)

The tax effects on net income of amounts reclassified from AOCI for the three months ended January 29, 2017 and January 31, 2016 were not material.

Stock Repurchase Program

On June 9, 2016, Applied's Board of Directors approved a common stock repurchase program authorizing up to \$2.0 billion in repurchases. At January 29, 2017, \$1.7 billion remained available for future stock repurchases under this repurchase program.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

The following table summarizes Applied's stock repurchases for the three months ended January 29, 2017 and January 31, 2016:

	Three Months Ended January 29, 2017		January 31, 2016
	(in millions, except per share amount)		
Shares of common stock repurchased	4	35	
Cost of stock repurchased	\$ 130	\$ 625	
Average price paid per share	\$31.80	\$ 17.64	

Applied records treasury stock purchases under the cost method using the first-in, first-out (FIFO) method. Upon reissuance of treasury stock, amounts in excess of the acquisition cost are credited to additional paid in capital. If Applied reissues treasury stock at an amount below its acquisition cost and additional paid in capital associated with prior treasury stock transactions is insufficient to cover the difference between the acquisition cost and the reissue price, this difference is recorded against retained earnings.

Dividends

In December 2016, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.10 per share. Dividends paid during the three months ended January 29, 2017 and January 31, 2016 totaled \$108 million and \$115 million, respectively. Applied currently anticipates that cash dividends will continue to be paid on a quarterly basis, although the declaration of any future cash dividend is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors, as well as a determination by the Board of Directors that cash dividends are in the best interests of Applied's stockholders.

Share-Based Compensation

Applied has a stockholder-approved equity plan, the Employee Stock Incentive Plan, which permits grants to employees of share-based awards, including stock options, restricted stock, restricted stock units, performance shares and performance units. In addition, the plan provides for the automatic grant of restricted stock units to non-employee directors and permits the grant of share-based awards to non-employee directors and consultants. Share-based awards made under the plan may be subject to accelerated vesting under certain circumstances in the event of a change in control of Applied. Applied also has two Employee Stock Purchase Plans, one generally for United States employees and a second for employees of international subsidiaries (collectively, ESPP), which enable eligible employees to purchase Applied common stock.

During the three months ended January 29, 2017 and January 31, 2016, Applied recognized share-based compensation expense related to stock options, ESPP shares, restricted stock, restricted stock units, performance shares and performance units. The effect of share-based compensation on the results of operations was as follows:

	Three Months Ended January 29, 2017		January 31, 2016
	(In millions)		
Cost of products sold	\$ 17	\$ 17	
Research, development, and engineering	20	20	

Marketing and selling	7	7
General and administrative	10	10
Total share-based compensation	\$ 54	\$ 54

The cost associated with share-based awards that are subject solely to time-based vesting requirements, less expected forfeitures, is recognized over the awards' service period for the entire award on a straight-line basis. The cost associated with performance-based equity awards is recognized for each tranche over the service period, based on an assessment of the likelihood that the applicable performance goals will be achieved.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

At January 29, 2017, Applied had \$400 million in total unrecognized compensation expense, net of estimated forfeitures, related to grants of share-based awards and shares issued under Applied's ESPP, which will be recognized over a weighted average period of 2.9 years. At January 29, 2017, there were 92 million shares available for grants of share-based awards under the Employee Stock Incentive Plan, and an additional 23 million shares available for issuance under the ESPP.

Restricted Stock Units, Restricted Stock, Performance Shares and Performance Units

A summary of the changes in restricted stock units, restricted stock, performance shares and performance units outstanding under Applied's equity compensation plans during the three months ended January 29, 2017 is presented below:

	Shares	Weighted Average Grant Date Fair Value
	(In millions, except per share amounts)	
Outstanding at October 30, 2016	25	\$ 18.28
Granted	7	\$ 30.36
Vested	(9)	\$ 16.26
Canceled	—	\$ 19.32
Outstanding at January 29, 2017	23	\$ 22.75

At January 29, 2017, 1 million additional performance-based awards could be earned upon achievement of certain levels of Applied's total shareholder return relative to a peer group at a future date.

During the first quarter of fiscal 2017, certain executive officers were granted awards that are subject to the achievement of specified performance goals. These awards become eligible to vest only if performance goals are achieved and will vest only if the grantee remains employed by Applied through each applicable vesting date. Certain awards require the achievement of positive operating margin for and vest ratably over three years. Other awards require the achievement of targeted levels of operating margin and wafer fabrication equipment market share, and the number of shares that may vest in full after three years ranges from 0% to 200% of the target amount.

The fair value of these awards is estimated on the date of grant. If the goals are achieved, the awards will vest, provided that the grantee remains employed by Applied through each scheduled vesting date. If the performance goals are not met as of the end of the performance period, no compensation expense is recognized and any previously recognized compensation expense is reversed. The expected cost is based on the awards that are probable to vest and is reflected over the service period and reduced for estimated forfeitures.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 11 Employee Benefit Plans

Applied sponsors a number of employee benefit plans, including defined benefit plans of certain foreign subsidiaries, and a plan that provides certain medical and vision benefits to eligible retirees. A summary of the components of net periodic benefit costs of these defined and postretirement benefit plans for the three months ended January 29, 2017 and January 31, 2016 is presented below:

	Three Months Ended January 29, 2017		January 31, 2016	
	(In millions)			
Service cost	\$ 3	\$	3	
Interest cost	2		4	
Expected return on plan assets	(4)	(4)
Amortization of prior service credit	(4)	—		
Amortization of actuarial loss	2		1	
Curtailment and settlement gain	—	(4)
Net periodic benefit cost	\$ (1)	\$	—	

Note 12 Income Taxes

Applied's effective tax rates for the first quarters of fiscal 2017 and 2016 were 8.8 percent and 8.9 percent, respectively. The effective tax rate for the first quarter of fiscal 2017 remained relatively flat compared to the same period in the prior year primarily due to favorable resolutions and changes related to income tax liabilities for uncertain tax positions during the first quarter of fiscal 2017 and expected changes in the geographical composition of income, offset by the reinstatement of the U.S. R&D tax credit during the first quarter of fiscal 2016 which was retroactive to its expiration in December of the prior year.

Note 13 Warranty, Guarantees and Contingencies

Warranty

Changes in the warranty reserves are presented below:

	Three Months Ended January 29, 2017		January 31, 2016
	(In millions)		
Beginning balance	\$153	\$	126
Warranties issued	40		26
Change in reserves related to preexisting warranty	3	(11)
Consumption of reserves	(26) (22)
Ending balance	\$170	\$	119

Applied products are generally sold with a warranty for a 12-month period following installation. The provision for the estimated cost of warranty is recorded when revenue is recognized. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical experience by product, configuration and geographic region. Quarterly warranty consumption is generally associated with sales that occurred during the preceding four quarters, and quarterly warranty provisions are generally related to the current quarter's sales.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Guarantees

In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to third parties as required for certain transactions initiated by either Applied or its subsidiaries. As of January 29, 2017, the maximum potential amount of future payments that Applied could be required to make under these guarantee agreements was approximately \$50 million. Applied has not recorded any liability in connection with these guarantee agreements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee agreements.

Applied also has agreements with various banks to facilitate subsidiary banking operations worldwide, including overdraft arrangements, issuance of bank guarantees, and letters of credit. As of January 29, 2017, Applied has provided parent guarantees to banks for approximately \$100 million to cover these arrangements.

Legal Matters

Korea Criminal Proceedings

In 2010, the Seoul Eastern District Court began hearings on indictments brought by the Seoul Prosecutor's Office for the Eastern District of Korea (the Prosecutor's Office) alleging that employees of several companies improperly received and used confidential information belonging to Samsung Electronics Co., Ltd. (Samsung), a major Applied customer based in Korea. The individuals charged included the former head of Applied Materials Korea (AMK), who at the time of the indictment was a vice president of Applied Materials, Inc., and certain other AMK employees. Neither Applied nor any of its subsidiaries was named as a party to the proceedings. Hearings on these matters concluded in November 2012 and the Court issued its decision on February 7, 2013. As part of the ruling, nine AMK employees (including the former head of AMK) were acquitted of all charges, while one AMK employee was found guilty on some of the charges and received a suspended jail sentence. The Prosecutor's Office and various individuals appealed the matter to the High Court. On June 20, 2014, the High Court rendered its decision, finding all defendants not guilty, including all ten AMK employees. The prosecutor has appealed the High Court decision to the Korean Supreme Court.

Other Matters

From time to time, Applied receives notification from third parties, including customers and suppliers, seeking indemnification, litigation support, payment of money or other actions by Applied in connection with claims made against them. In addition, from time to time, Applied receives notification from third parties claiming that Applied may be or is infringing or misusing their intellectual property or other rights. Applied also is subject to various other legal proceedings and claims, both asserted and unasserted, that arise in the ordinary course of business. Although the outcome of the above-described matters, claims and proceedings cannot be predicted with certainty, Applied does not believe that any will have a material effect on its consolidated financial condition or results of operations.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Note 14 Industry Segment Operations

Applied's three reportable segments are: Semiconductor Systems, Applied Global Services, and Display and Adjacent Markets. As defined under the accounting literature, Applied's chief operating decision-maker has been identified as the President and Chief Executive Officer, who reviews operating results to make decisions about allocating resources and assessing performance for the entire Company. Segment information is presented based upon Applied's management organization structure as of January 29, 2017 and the distinctive nature of each segment. Future changes to this internal financial structure may result in changes to Applied's reportable segments.

The Semiconductor Systems reportable segment includes semiconductor capital equipment for etch, rapid thermal processing, deposition, chemical mechanical planarization, metrology and inspection, wafer packaging, and ion implantation.

The Applied Global Services segment provides integrated solutions to optimize equipment and fab performance and productivity, including spares, upgrades, services, certain remanufactured earlier generation equipment and factory automation software for semiconductor, display and other products.

The Display and Adjacent Markets segment includes products for manufacturing liquid crystal displays (LCDs), organic light-emitting diodes (OLEDs), upgrades and flexible coating systems and other display technologies for TVs, personal computers, smart phones, and other consumer-oriented devices.

Each operating segment is separately managed and has separate financial results that are reviewed by Applied's chief operating decision-maker. Each reportable segment contains closely related products that are unique to the particular segment. Segment operating income is determined based upon internal performance measures used by Applied's chief operating decision-maker. The chief operating decision-maker does not evaluate operating segments using total asset information.

Applied derives the segment results directly from its internal management reporting system. The accounting policies Applied uses to derive reportable segment results are substantially the same as those used for external reporting purposes. Management measures the performance of each reportable segment based upon several metrics including net sales and operating income. Management uses these results to evaluate the performance of, and to assign resources to, each of the reportable segments.

The Corporate and Other category includes revenues from products, as well as costs of products sold, for fabricating solar photovoltaic cells and modules, and certain operating expenses that are not allocated to its reportable segments and are managed separately at the corporate level. These operating expenses include costs related to share-based compensation; certain management, finance, legal, human resources, and research, development and engineering functions provided at the corporate level; and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions, unless these actions pertain to a specific reportable segment. Segment operating income also excludes interest income/expense and other financial charges and income taxes. Management does not consider the unallocated costs in measuring the performance of the reportable segments.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS - (Continued)

Net sales and operating income (loss) for each reportable segment were as follows:

	Three Months Ended	
	Net Sales	Operating Income (Loss)
	(In millions)	
January 29, 2017:		
Semiconductor Systems	\$2,150	\$ 690
Applied Global Services	676	178
Display and Adjacent Markets	422	115
Corporate and Other	30	(176)
Total	\$3,278	\$ 807
January 31, 2016:		
Semiconductor Systems	\$1,373	\$ 265
Applied Global Services	606	149
Display and Adjacent Markets	254	48
Corporate and Other	24	(108)
Total	\$2,257	\$ 354

The reconciling items included in Corporate and Other were as follows:

	Three Months Ended	
	January 29, 2017	January 31, 2016
	(In millions)	
Unallocated net sales	\$30	\$ 24
Unallocated cost of products sold and expenses	(152)	(78)
Share-based compensation	(54)	(54)
Total	\$(176)	\$ (108)

The following customers accounted for at least 10 percent of Applied's net sales for the three months ended January 29, 2017, and sales to these customers included products and services from multiple reportable segments.

	Percentage of Net Sales	
Taiwan Semiconductor Manufacturing Company Limited	24	%
Samsung Electronics Co., Ltd.	18	%

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following management’s discussion and analysis is provided in addition to the accompanying consolidated condensed financial statements and notes to assist in understanding Applied’s results of operations and financial condition. Financial information as of January 29, 2017 should be read in conjunction with the financial statements for the fiscal year ended October 30, 2016 contained in the Company’s Form 10-K filed December 15, 2016.

This report contains forward-looking statements that involve a number of risks and uncertainties. Examples of forward-looking statements include those regarding Applied’s future financial or operating results, cash flows and cash deployment strategies, declaration of dividends, share repurchases, business strategies and priorities, costs and cost controls, products, competitive positions, management’s plans and objectives for future operations, research and development, strategic acquisitions and investments, growth opportunities, restructuring activities, backlog, working capital, liquidity, investment portfolio and policies, taxes, supply chain, manufacturing, properties, legal proceedings and claims, customer demand and spending, end-use demand, market and industry trends and outlooks, general economic conditions and other statements that are not historical facts, as well as their underlying assumptions. Forward-looking statements may contain words such as “may,” “will,” “should,” “could,” “would,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “potential” and “continue,” the negative of these terms, or other comparable terminology. All forward-looking statements are subject to risks and uncertainties and other important factors, including those discussed in Part II, Item 1A, “Risk Factors,” below and elsewhere in this report. These and many other factors could affect Applied’s future financial condition and operating results and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by Applied or on its behalf. Forward-looking statements are based on management’s estimates, projections and expectations as of the date hereof, and Applied undertakes no obligation to revise or update any such statements.

Overview

Applied provides manufacturing equipment, services and software to the global semiconductor, display, and related industries. Applied’s customers include manufacturers of semiconductor wafers and chips, liquid crystal and other displays, and other electronic devices. These customers may use what they manufacture in their own end products or sell the items to other companies for use in advanced electronic components. Applied operates in three reportable segments: Semiconductor Systems, Applied Global Services and Display and Adjacent Markets. A summary of financial information for each reportable segment is found in Note 14 of Notes to Consolidated Condensed Financial Statements. A discussion of factors that could affect Applied’s operations is set forth under “Risk Factors” in Part II, Item 1A, which is incorporated herein by reference. Product development and manufacturing activities occur primarily in the United States, Europe, Israel, and Asia. Applied’s broad range of equipment and service products are highly technical and are sold primarily through a direct sales force.

Applied’s results are driven primarily by worldwide demand for semiconductors and displays, which in turn depends on end-user demand for electronic products. Each of Applied’s businesses is subject to variable industry conditions, as demand for manufacturing equipment and services can change depending on supply and demand for chips, display technologies and other electronic devices, as well as other factors, such as global economic and market conditions, and the nature and timing of technological advances in fabrication processes. In addition, a significant driver in the semiconductor and display industries is end-demand for mobile consumer products, which is characterized by seasonality that impacts the timing of customer investments in manufacturing equipment and, in turn, Applied’s business. In light of these conditions, Applied’s results can vary significantly year-over-year, as well as quarter-over-quarter.

Table of Contents

The following tables present certain significant measurements for the periods indicated:

	Three Months Ended			Change	
	January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
(In millions, except per share amounts and percentages)					
Net sales	\$3,278	\$ 3,297	\$ 2,257	\$(19)	\$1,021
Gross profit	\$1,445	\$ 1,399	\$ 916	\$46	\$529
Gross margin	44.1 %	42.4 %	40.6 %	1.7 points	3.5 points
Operating income	\$807	\$ 777	\$ 354	\$30	\$453
Operating margin	24.6 %	23.6 %	15.7 %	1.0 points	8.9 points
Net income	\$703	\$ 610	\$ 286	\$93	\$417
Earnings per diluted share	\$0.65	\$ 0.56	\$ 0.25	\$0.09	\$0.40
Non-GAAP Adjusted Results					
Non-GAAP adjusted gross profit	\$1,487	\$ 1,441	\$ 957	\$46	\$530
Non-GAAP adjusted gross margin	45.4 %	43.7 %	42.4 %	1.7 points	3.0 points
Non-GAAP adjusted operating income	\$852	\$ 832	\$ 401	\$20	\$451
Non-GAAP adjusted operating margin	26.0 %	25.2 %	17.8 %	0.8 points	8.2 points
Non-GAAP adjusted net income	\$732	\$ 722	\$ 302	\$10	\$430
Non-GAAP adjusted earnings per diluted share	\$0.67	\$ 0.66	\$ 0.26	\$0.01	\$0.41

Reconciliations of non-GAAP adjusted measures are presented below under "Non-GAAP Adjusted Results." Fiscal 2017 and 2016 contains 52 weeks and 53 weeks, respectively, and the first three months of fiscal 2017 and 2016 contained 13 weeks and 14 weeks, respectively.

Mobility, and the increasing technological functionality of mobile devices, continues to be a strong driver of semiconductor industry spending. During the first three months of fiscal 2017, memory manufacturers invested in technology upgrades and new capacity, both of which were driven in part by the transition from planar NAND to 3D NAND. Foundry customers also invested in technology upgrades and new capacity to meet demand for advanced mobile chips. For the fiscal year, Applied anticipates healthy spending levels in all semiconductor categories. Mobility investments, including increasing investments in new technology, represents a significant driver of display equipment spending, which has resulted in manufacturing capacity expansion for mobile applications, notably OLED displays. Applied expects these investments to continue for the remainder of fiscal 2017, accompanied by demand for new equipment for making larger LCD TVs.

Results of Operations

Net Sales

Net sales for the periods indicated were as follows:

Three Months Ended	Change
--------------------	--------

Edgar Filing: APPLIED MATERIALS INC /DE - Form 10-Q

January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
---------------------	---------------------	---------------------	----------------------------	----------------------------

(In millions, except percentages)

Semiconductor Systems	\$2,150	65%	\$2,127	64%	\$1,373	61%	1%	57%
Applied Global Services	676	21%	693	21%	606	27%	(2)%	12%
Display and Adjacent Markets	422	13%	452	14%	254	11%	(7)%	66%
Corporate and Other	30	1%	25	1%	24	1%	20%	25%
Total	\$3,278	100%	\$3,297	100%	\$2,257	100%	(1)%	45%

Table of Contents

Net sales for the first quarter of fiscal 2017 decreased slightly compared to the prior quarter primarily due to lower customer investments for display equipment and services, partially offset by increased investments in semiconductor equipment. The Semiconductor Systems segment's relative share of total net sales increased slightly compared to the prior quarter and continued to represent the largest contributor of net sales.

For the first quarter of fiscal 2017 compared to the same period in the prior year, net sales increased primarily due to increased customer investments in all segments.

Net sales by geographic region, determined by the location of customers' facilities to which products were shipped, were as follows:

	Three Months Ended						Change	
	January 29, 2017	October 30, 2016	January 31, 2016				Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
(In millions, except percentages)								
Taiwan	\$ 1,103	34%	\$ 1,154	35%	\$ 637	28%	(4)%	73%
China	647	20%	441	13%	495	22%	47%	31%
Korea	670	20%	632	19%	273	12%	6%	145%
Japan	235	7%	364	11%	334	15%	(35)%	(30)%
Southeast Asia	97	3%	161	5%	87	4%	(40)%	11%
Asia Pacific	2,752	84%	2,752	83%	1,826	81%	—%	51%
United States	317	10%	289	9%	293	13%	10%	8%
Europe	209	6%	256	8%	138	6%	(18)%	51%
Total	\$ 3,278	100%	\$ 3,297	100%	\$ 2,257	100%	(1)%	45%

The increase in net sales from customers in China for the first quarter of fiscal 2017 compared to the prior quarter primarily reflected an increase in customer investments in display manufacturing and memory equipment. The decrease in net sales from customers in Japan primarily reflected decreases in customer investments from memory customers.

The increase in net sales from customers in Taiwan for the first quarter of fiscal 2017 compared to the same period in the prior year reflected an increase in investments from foundry customers. The increase in net sales from customers in Korea and China was primarily related to increased spending in memory and display manufacturing equipment.

Gross Margin

Gross margins for the periods indicated were as follows:

	Three Months Ended						Change	
	January 29, 2017	October 30, 2016	January 31, 2016				Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
(In millions, except percentages)								
Gross profit	\$ 1,445	\$ 1,399	\$ 916				\$ 46	\$ 529
Gross margin	44.1	% 42.4	% 40.6	%			1.7 point	3.5 points
Non-GAAP Adjusted Results								
Non-GAAP adjusted gross profit	\$ 1,487	\$ 1,441	\$ 957				\$ 46	\$ 530

Non-GAAP adjusted gross margin 45.4 % 43.7 % 42.4 % 1.7 3.0
pointpoints

Reconciliations of non-GAAP adjusted measures are presented below under "Non-GAAP Adjusted Results."

Gross profit, non-GAAP adjusted gross profit, gross margin and non-GAAP adjusted gross margin in the first quarter of fiscal 2017 increased compared to the prior quarter, primarily due to favorable changes in product mix and material cost savings. Gross profit, non-GAAP adjusted gross profit, gross margin and non-GAAP adjusted gross margin in the first quarter of fiscal 2017 increased compared to the same period in the prior year, primarily due to favorable product mix.

Gross profit and non-GAAP adjusted gross profit during each of the three months ended January 29, 2017, October 30, 2016 and January 31, 2016 included \$17 million, \$16 million and \$17 million, respectively, of share-based compensation expense.

Table of Contents

Research, Development and Engineering

Research, Development and Engineering (RD&E) expenses for the periods indicated were as follows:

Three Months Ended			Change	
			Q1 2017	Q1 2017
January 29, 2017	October 30, 2016	January 31, 2016	over Q4 2016	over Q1 2016

(In millions)

Research, development and engineering \$417 \$ 394 \$ 374 \$23 \$ 43

Applied's future operating results depend to a considerable extent on its ability to maintain a competitive advantage in the equipment and service products it provides. Development cycles range from 12 to 36 months depending on whether the product is an enhancement of an existing product, which typically has a shorter development cycle, or a new product, which typically has a longer development cycle. Most of Applied's existing products resulted from internal development activities and innovations involving new technologies, materials and processes. In certain instances, Applied acquires technologies, either in existing or new product areas, to complement its existing technology capabilities and to reduce time to market.

Management believes that it is critical to continue to make substantial investments in RD&E to assure the availability of innovative technology that meets the current and projected requirements of its customers' most advanced designs. Applied has maintained and intends to continue its commitment to investing in RD&E in order to continue to offer new products and technologies.

RD&E expenses increased during the first quarter of fiscal 2017 compared to the prior quarter and the same period in the prior year, primarily due to higher labor-related expenses, reflecting ongoing investment in product development initiatives, consistent with the Company's strategy. RD&E expenses during the three months ended January 29, 2017, October 30, 2016 and January 31, 2016 each included \$20 million of share-based compensation expense.

Marketing and Selling

Marketing and selling expenses for the periods indicated were as follows:

Three Months Ended			Change	
			Q1 2017	Q1 2017
January 29, 2017	October 30, 2016	January 31, 2016	over Q4 2016	over Q1 2016

(In millions)

Marketing and selling \$118 \$ 114 \$ 106 \$4 \$ 12

Marketing and selling expenses increased slightly in the first quarter of fiscal 2017 compared to the prior quarter. Marketing and selling expenses increased in the first quarter of fiscal 2017 compared to the same period in fiscal 2016 primarily due to higher variable compensation expense and additional headcount. Marketing and selling expenses during the three months ended January 29, 2017, October 30, 2016 and January 31, 2016 included \$7 million, \$6 million and \$7 million, respectively, of share-based compensation expense.

Table of Contents

General and Administrative

General and administrative (G&A) expenses for the periods indicated were as follows:

Three Months Ended			Change	
			Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
January 29, 2017	October 30, 2016	January 31, 2016		

(In millions)

General and administrative	\$103	\$ 114	\$ 82	\$(11)	\$ 21
----------------------------	-------	--------	-------	--------	-------

G&A expenses for the first quarter of fiscal 2017 decreased compared to the prior quarter primarily due to a loss recorded in the prior quarter related to the discontinuance of cash flow hedges for transactions that were probable not to occur by the end of the originally specified time period and savings from a temporary shutdown, offset by higher variable compensation expense. G&A expenses increased in the first quarter of fiscal 2017 compared to the same period in the prior year primarily due to higher variable compensation and additional headcount.

G&A expenses during the three months ended January 29, 2017, October 30, 2016 and January 31, 2016 included \$10 million, \$9 million and \$10 million, respectively of share-based compensation expense.

Interest Expense and Interest and Other Income (loss), net

Interest expense and interest and other income (loss), net for the periods indicated were as follows:

Three Months Ended			Change	
			Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
January 29, 2017	October 30, 2016	January 31, 2016		

(In millions)

Interest expense	\$38	\$ 38	\$ 42	\$—	\$(4)
Interest and other income, net	\$2	\$ 1	\$ 2	\$1	\$—

Interest expenses incurred were primarily associated with the senior unsecured notes issued in June 2011 and September 2015. Interest expense in the first quarter of fiscal 2017 compared to the prior quarter remained flat.

Interest expense decreased in the first quarter of fiscal 2017 compared to the same period in fiscal 2016 primarily due to the redemption of \$400 million in principal amount of senior unsecured notes and payment of other debt during the first quarter of fiscal 2016.

Interest and other income, net in the first quarter of fiscal 2017 compared to the prior quarter and the same period in the prior year remained relatively flat. Interest and other income, net in the first quarter of fiscal 2017 included a \$7 million loss related to impairment of certain strategic investments, while the first quarter of fiscal 2016 included a \$5 million loss from redemption of \$400 million in principal amount of senior unsecured notes.

Table of Contents

Income Taxes

Provision for income taxes and effective tax rates for the periods indicated were as follows:

	Three Months Ended			Change	
				Q1	Q1
				2017	2017
				over	over
				Q4	Q1
				2016	2016
	(In millions, except percentages)				
Provision for income taxes	\$68	\$ 130	\$ 28	\$(62)	\$ 40
Effective tax rate	8.8 %	17.6 %	8.9 %	(8.8) points	(0.1) points

Applied's provision for income taxes and effective tax rate are affected by the geographical composition of pre-tax income which includes jurisdictions with differing tax rates, conditional reduced tax rates and other income tax incentives. It is also affected by events that are not consistent from period to period, such as changes in income tax laws and the resolution of prior years' income tax filings.

The effective tax rate for the first quarter of fiscal 2017 was lower than in the prior quarter primarily due to favorable resolutions and changes related to income tax liabilities for uncertain tax positions during the fourth quarter of fiscal 2016 and expected changes in the geographical composition of income.

The effective tax rate for the first quarter of fiscal 2017 remained relatively flat compared to the same period in the prior year primarily due to favorable resolutions and changes related to income tax liabilities for uncertain tax positions during the first quarter of fiscal 2017 and expected changes in the geographical composition of income, offset by the reinstatement of the U.S. R&D tax credit during the first quarter of fiscal 2016 which was retroactive to its expiration in December of the prior year.

Table of Contents

Segment Information

Applied reports financial results in three segments: Semiconductor Systems, Applied Global Services, and Display and Adjacent Markets. A description of the products and services, as well as financial data, for each reportable segment can be found in Note 14 of Notes to Consolidated Condensed Financial Statements.

The Corporate and Other category includes revenues from products, as well as costs of products sold, for fabricating solar photovoltaic cells and modules and certain operating expenses that are not allocated to its reportable segments and are managed separately at the corporate level. These operating expenses include costs for share-based compensation; certain management, finance, legal, human resource, and RD&E functions provided at the corporate level; and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions, unless these actions pertain to a specific reportable segment.

The results for each reportable segment are discussed below.

Semiconductor Systems Segment

The Semiconductor Systems segment includes semiconductor capital equipment for deposition, etch, ion implantation, rapid thermal processing, chemical mechanical planarization, metrology and inspection, and wafer level packaging. Development efforts are focused on solving customers' key technical challenges in transistor, interconnect, patterning and packaging performance as devices scale to advanced technology nodes. The mobility trend remains the largest influence on industry spending, as it drives semiconductor device manufacturers to continually improve their ability to deliver high-performance, low-power processors and affordable memories.

The market for Semiconductor Systems has been characterized by continued investment by semiconductor manufacturers. During the first three months of fiscal 2017, memory manufacturers invested in technology upgrades and new capacity, both of which were driven in part by the transition from planar NAND to 3D NAND. Foundry customers also invested in technology upgrades and new capacity to meet demand for advanced mobile chips.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change	
	January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over Q4 2016	Q1 2017 over Q1 2016
(In millions, except percentages and ratios)					
Net sales	\$2,150	\$ 2,127	\$ 1,373	\$23 1%	\$777 57%
Operating income	\$690	\$ 667	\$ 265	\$23 3%	\$425 160%
Operating margin	32.1 %	31.4 %	19.3 %	0.7 points	12.8 points
Non-GAAP Adjusted Results					
Non-GAAP adjusted operating income	\$736	\$ 713	\$ 312	\$23 3%	\$424 136%
Non-GAAP adjusted operating margin	34.2 %	33.5 %	22.7 %	0.7 points	11.5 points

Reconciliations of non-GAAP adjusted measures are presented below under "Non-GAAP Adjusted Results."

Net sales for the first quarter of fiscal 2017 increased compared to the prior quarter, primarily due to higher spending from memory customers, partially offset by lower spending from logic customers. The increase in the operating income, non-GAAP adjusted operating income, operating margin and non-GAAP adjusted operating margin for the first quarter of fiscal 2017 compared to the prior quarter primarily reflected favorable changes in product mix and higher net sales. In the first quarter of fiscal 2017, two customers accounted for approximately 56 percent of this segment's total net sales, with one customer accounting for approximately 34 percent of this segment's total net sales. Net sales for the first quarter of fiscal 2017 increased compared to the same period in the prior year primarily due to higher spending from foundry and memory customers. The increase in the operating income, non-GAAP adjusted operating income, operating margin and non-GAAP adjusted operating margin for the first quarter of fiscal 2017 compared to the same period in the prior year primarily due to favorable product mix and higher net sales.

Table of Contents

The following regions accounted for at least 30 percent of total net sales for the Semiconductor Systems segment for one or more of the periods indicated:

Three Months Ended			Change	
January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over Q4 2016	Q1 2017 over Q1 2016

(In millions, except percentages)

Taiwan	\$945	44%	\$947	45%	\$502	37%	—%	88%
--------	-------	-----	-------	-----	-------	-----	----	-----

Applied Global Services Segment

The Applied Global Services segment provides integrated solutions to optimize equipment and fab performance and productivity, including spares, upgrades, services, certain remanufactured earlier generation equipment and factory automation software for semiconductor, display and solar products. Customer demand for products and services is fulfilled through a global distribution system with trained service engineers located in close proximity to customer sites.

Industry conditions that affected Applied Global Services' sales of spares and services were principally semiconductor manufacturers' wafer starts, as well as utilization rates.

Certain significant measures for the periods indicated were as follows:

Three Months Ended			Change	
January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over Q4 2016	Q1 2017 over Q1 2016

(In millions, except percentages and ratios)

Net sales	\$676	\$ 693	\$ 606	\$(17) (2)%	\$70 12%
Operating income	\$178	\$ 193	\$ 149	\$(15) (8)%	\$29 19%
Operating margin	26.3 %	27.8 %	24.6 %	(1.5) points	1.7 points
Non-GAAP Adjusted Results					
Non-GAAP adjusted operating income	\$179	\$ 193	\$ 149	\$(14) (7)%	\$30 20%
Non-GAAP adjusted operating margin	26.5 %	27.8 %	24.6 %	(1.3) points	1.9 points

Reconciliations of non-GAAP adjusted measures are presented below under "Non-GAAP Adjusted Results."

Net sales for the first quarter of fiscal 2017 compared to the prior quarter slightly decreased primarily due to lower spending on semiconductor services and 200mm equipment systems partially offset by higher investments in spares. Operating income, operating margin, non-GAAP adjusted operating income and non-GAAP adjusted operating margin for the first quarter of fiscal 2017 decreased compared to the prior quarter primarily due to lower net sales. In the first quarter of fiscal 2017, three customers accounted for approximately 35 percent of this segment's total net sales.

Net sales for the first quarter of fiscal 2017 increased compared to the same periods in the prior year due to higher customer spending for semiconductor spares and services. Operating income and non-GAAP adjusted operating income, operating margin and non-GAAP adjusted operating margin for the first quarter of fiscal 2017 compared to the same period in the prior year increased due to higher net sales.

There was no single region that accounted for at least 30 percent of total net sales for the Applied Global Services segment for any of the periods presented.

Table of Contents

Display and Adjacent Markets Segment

The Display and Adjacent Markets segment encompasses products for manufacturing liquid crystal displays (LCDs), organic light-emitting diodes (OLEDs), upgrades and flexible coating systems and other display technologies for TVs, personal computers (PCs), tablets, smart phones, and other consumer-oriented devices. The segment is focused on expanding its presence through technologically-differentiated equipment for manufacturing large-scale TVs; emerging markets such as OLED, low temperature polysilicon (LTPS), metal oxide, and touch panel sectors; and development of products that provide customers with improved performance and yields. Display industry growth depends primarily on consumer demand for increasingly larger and more advanced TVs as well as larger and higher resolution displays for next generation mobile devices, including OLED.

The market environment for Applied's Display and Adjacent Markets segment has been characterized by increasing demand for manufacturing equipment for high-end mobile devices and TV manufacturing equipment, although the TV manufacturing equipment sector remains susceptible to cyclical conditions. Uneven order and revenue patterns in the Display and Adjacent Markets segment can cause significant fluctuations quarter-over-quarter, as well as year-over year.

Certain significant measures for the periods presented were as follows:

	Three Months Ended			Change			
	January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over Q4 2016		Q1 2017 over Q1 2016	
(In millions, except percentages and ratios)							
Net sales	\$422	\$ 452	\$ 254	\$(30) (7)%		\$168 66%	
Operating income	\$115	\$ 103	\$ 48	\$12 12%		\$67 140%	
Operating margin	27.3 %	22.8 %	18.9 %	4.5 points		8.4 points	
Non-GAAP Adjusted Results							
Non-GAAP adjusted operating income	\$115	\$ 103	\$ 48	\$12 12%		\$67 140%	
Non-GAAP adjusted operating margin	27.3 %	22.8 %	18.9 %	4.5 points		8.4 points	

Reconciliations of non-GAAP adjusted measures are presented below under "Non-GAAP Adjusted Results."

Net sales for the first quarter of fiscal 2017 were lower compared to the prior quarter which reflected lower customer investments for mobile display manufacturing equipment, partially offset by higher spending on TV display manufacturing equipment. Operating income, operating margin, non-GAAP adjusted operating income and non-GAAP adjusted operating margin for the first quarter of fiscal 2017 increased compared to the prior quarter primarily due to favorable changes in product mix and materials cost savings, partially offset by higher research and development spending. Three customers accounted for approximately 77 percent of net sales for the Display and Adjacent Markets segment in the first quarter of fiscal 2017, with one customer accounting for approximately 50 percent of net sales for the Display and Adjacent Markets segment.

Net sales for the first quarter of fiscal 2017 increased compared to the same period in the prior year primarily due to higher customer investments in mobile display manufacturing equipment. Operating income, operating margin, non-GAAP adjusted operating income and non-GAAP adjusted operating margin for the first three months of fiscal 2017 increased compared to the same period in the prior year, reflecting higher net sales and favorable changes in product mix, partially offset by increased research and development spending.

The following regions accounted for at least 30 percent of total net sales for the Display and Adjacent Markets segment for one or more of the periods presented:

Three Months Ended			Change	
January 29, 2017	October 30, 2016	January 31, 2016	Q1 2017 over	Q1 2017 over

Q4 2016 Q1 2016

(In millions, except percentages)

China	\$286	68%	\$123	27%	\$195	77%	133%	47%
Korea	\$108	26%	\$227	50%	\$13	5%	(52)%	731%

Table of Contents

Financial Condition, Liquidity and Capital Resources

Applied's cash, cash equivalents and investments consist of the following:

	January 29, 2017	October 30, 2016
	(In millions)	
Cash and cash equivalents	\$3,491	\$ 3,406
Short-term investments	656	343
Long-term investments	909	929
Total cash, cash-equivalents and investments	\$5,056	\$ 4,678

Sources and Uses of Cash

A summary of cash provided by (used in) operating, investing, and financing activities is as follows:

	Three Months Ended January 29, 2017		January 31, 2016
	(In millions)		
Cash provided by operating activities	\$646	\$207	
Cash used in investing activities	\$(367)	\$(109))
Cash used in financing activities	\$(194)	\$(1,933)	

Operating Activities

Cash from operating activities for the three months ended January 29, 2017 was \$646 million, which reflects net income adjusted for the effect of non-cash charges and changes in working capital components. Non-cash charges included depreciation, amortization, share-based compensation and deferred income taxes. Cash provided by operating activities increased from the first quarter of fiscal 2016 to the first quarter of fiscal 2017 primarily due to higher net income.

Applied has agreements with various financial institutions to sell accounts receivable and discount promissory notes from selected customers. Applied sells its accounts receivable without recourse. Applied, from time to time, also discounts letters of credit issued by customers through various financial institutions. The discounting of letters of credit depends on many factors, including the willingness of financial institutions to discount the letters of credit and the cost of such arrangements. Applied sold \$63 million of accounts receivable during the three months ended January 29, 2017. Applied did not sell accounts receivable during the three months ended January 31, 2016. Applied did not discount promissory notes or utilize programs to discount letters of credit issued by customers during the three months ended January 29, 2017 or January 31, 2016.

Applied's working capital was \$5.3 billion at January 29, 2017 and \$4.7 billion at October 30, 2016.

Days sales, inventory and payable outstanding at the end of each of the periods indicated were:

	January 29, 2017	October 30, 2016	January 31, 2016
Days sales outstanding	66	63	71
Days inventory outstanding	113	98	134
Days payable outstanding	43	39	40

Days sales outstanding varies due to the timing of shipments and payment terms. Days sales outstanding increased in the first quarter of fiscal 2017 compared to the prior quarter primarily due to slower collections partially offset by improved revenue linearity. Days inventory outstanding and days payable outstanding increased during the first

quarter of fiscal 2017 compared to the prior quarter primarily due to higher inventory balances at the end of the first quarter of fiscal 2017 due to higher expected business volume.

Table of Contents

Investing Activities

Applied used \$367 million of cash in investing activities during the three months ended January 29, 2017. Purchases of investments, net of proceeds from sales and maturities of investments, totaled \$303 million and capital expenditures were \$64 million during the three months ended January 29, 2017.

Applied's investment portfolio consists principally of investment grade money market mutual funds, U.S. Treasury and agency securities, municipal bonds, corporate bonds and mortgage-backed and asset-backed securities, as well as equity securities. Applied regularly monitors the credit risk in its investment portfolio and takes appropriate measures, which may include the sale of certain securities, to manage such risks prudently in accordance with its investment policies. During the three months ended January 29, 2017, Applied did not recognize any impairment of its fixed income securities. At January 29, 2017, gross unrealized losses related to Applied's investment portfolio were not material.

Financing Activities

Applied used cash for financing activities in the amount of \$194 million during the three months ended January 29, 2017, consisting primarily of \$130 million in repurchases of common stock and \$108 million in cash dividends to stockholders, offset by excess tax benefits from share-based compensation of \$44 million.

In December 2016, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.10 per share. Applied currently anticipates that cash dividends will continue to be paid on a quarterly basis, although the declaration of any future cash dividend is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors, as well as a determination by the Board of Directors that cash dividends are in the best interests of Applied's stockholders.

Applied has credit facilities for unsecured borrowings in various currencies of up to \$1.6 billion, of which \$1.5 billion is comprised of a committed revolving credit agreement with a group of banks that is scheduled to expire in September 2020. This agreement provides for borrowings in United States dollars at interest rates keyed to one of the two rates selected by Applied for each advance and includes financial and other covenants with which Applied was in compliance at January 29, 2017. Remaining credit facilities in the amount of approximately \$70 million are with Japanese banks. Applied's ability to borrow under these facilities is subject to bank approval at the time of the borrowing request, and any advances will be at rates indexed to the banks' prime reference rate denominated in Japanese yen. No amounts were outstanding under any of these facilities at both January 29, 2017 and October 30, 2016, and Applied has not utilized these credit facilities.

In fiscal 2011, Applied established a short-term commercial paper program of up to \$1.5 billion. At January 29, 2017, Applied did not have any commercial paper outstanding, but may issue commercial paper notes under this program from time to time in the future.

Applied had senior unsecured notes in the aggregate principal amount of \$3.4 billion outstanding as of January 29, 2017. The indentures governing these notes include covenants with which Applied was in compliance at January 29, 2017. See Note 9 of Notes to Consolidated Condensed Financial Statements for additional discussion of existing debt. Applied may seek to refinance its existing debt and may incur additional indebtedness depending on Applied's capital requirements and the availability of financing.

In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to third parties as required for certain transactions initiated by either Applied or its subsidiaries. As of January 29, 2017, the maximum potential amount of future payments that Applied could be required to make under these guarantee agreements was approximately \$50 million. Applied has not recorded any liability in connection with these guarantee agreements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee agreements.

Applied also has agreements with various banks to facilitate subsidiary banking operations worldwide, including overdraft arrangements, issuance of bank guarantees, and letters of credit. As of January 29, 2017, Applied Materials, Inc. has provided parent guarantees to banks for approximately \$100 million to cover these arrangements.

Table of Contents

Others

During the three months ended January 29, 2017, Applied did not record a bad debt provision. While Applied believes that its allowance for doubtful accounts at January 29, 2017 is adequate, it will continue to closely monitor customer liquidity and economic conditions.

As of January 29, 2017, approximately \$3.2 billion of cash, cash equivalents and marketable securities held by foreign subsidiaries may be subject to U.S. income tax if repatriated for U.S. operations. Applied intends to indefinitely reinvest approximately \$2.1 billion of these funds outside of the U.S. and does not plan to repatriate these funds. Applied would need to accrue and pay U.S. income tax if these funds were repatriated. For the remaining cash, cash equivalents and marketable securities held by foreign subsidiaries, U.S. income tax has been provided for in the financial statements.

Although cash requirements will fluctuate based on the timing and extent of factors such as those discussed above, Applied's management believes that cash generated from operations, together with the liquidity provided by existing cash balances and borrowing capability, will be sufficient to satisfy Applied's liquidity requirements for the next 12 months. For further details regarding Applied's operating, investing and financing activities, see the Consolidated Condensed Statements of Cash Flows in this report.

Table of Contents

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions and estimates that affect the amounts reported. Note 1 of Notes to Consolidated Financial Statements in Applied's Annual Report on Form 10-K and Note 1 of Notes to Consolidated Condensed Financial Statements in this report describe the significant accounting policies used in the preparation of the consolidated financial statements. Certain of these significant accounting policies are considered to be critical accounting policies.

A critical accounting policy is defined as one that is both material to the presentation of Applied's consolidated financial statements and that requires management to make difficult, subjective or complex judgments that could have a material effect on Applied's financial condition or results of operations. Specifically, these policies have the following attributes: (1) Applied is required to make assumptions about matters that are highly uncertain at the time of the estimate; and (2) different estimates Applied could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on Applied's financial condition or results of operations. Estimates and assumptions about future events and their effects cannot be determined with certainty. Applied bases its estimates on historical experience and on various other assumptions believed to be applicable and reasonable under the circumstances. These estimates may change as new events occur, as additional information is obtained and as Applied's operating environment changes. These changes have historically been minor and have been included in the consolidated financial statements as soon as they became known. In addition, management is periodically faced with uncertainties, the outcomes of which are not within its control and will not be known for prolonged periods of time. These uncertainties include those discussed in Part II, Item 1A, "Risk Factors." Based on a critical assessment of its accounting policies and the underlying judgments and uncertainties affecting the application of those policies, management believes that Applied's consolidated financial statements are fairly stated in accordance with accounting principles generally accepted in the United States of America, and provide a meaningful presentation of Applied's financial condition and results of operations.

Management believes that the following are critical accounting policies and estimates:

Revenue Recognition

Applied recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; sales price is fixed or determinable; and collectability is probable. Each sale arrangement may contain commercial terms that differ from other arrangements. In addition, Applied frequently enters into contracts that contain multiple deliverables. Judgment is required to properly identify the accounting units of the multiple deliverable transactions and to determine the manner in which revenue should be allocated among the accounting units. Moreover, judgment is used in interpreting the commercial terms and determining when all criteria of revenue recognition have been met in order for revenue recognition to occur in the appropriate accounting period. While changes in the allocation of the estimated sales price between the units of accounting will not affect the amount of total revenue recognized for a particular sales arrangement, any material changes in these allocations could impact the timing of revenue recognition, which could have a material effect on Applied's financial condition and results of operations.

Warranty Costs

Applied provides for the estimated cost of warranty when revenue is recognized. Estimated warranty costs are determined by analyzing specific product, current and historical configuration statistics and regional warranty support costs. Applied's warranty obligation is affected by product and component failure rates, material usage and labor costs incurred in correcting product failures during the warranty period. As Applied's customer engineers and process support engineers are highly trained and deployed globally, labor availability is a significant factor in determining labor costs. The quantity and availability of critical replacement parts is another significant factor in estimating warranty costs. Unforeseen component failures or exceptional component performance can also result in changes to warranty costs. If actual warranty costs differ substantially from Applied's estimates, revisions to the estimated warranty liability would be required, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Allowance for Doubtful Accounts

Applied maintains an allowance for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. This allowance is based on historical experience, credit evaluations, specific customer collection history and any customer-specific issues Applied has identified. Changes in circumstances, such as an unexpected material adverse change in a major customer's ability to meet its financial obligation to Applied or its payment trends, may require Applied to further adjust its estimates of the recoverability of amounts due to Applied, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Table of Contents

Inventory Valuation

Inventories are generally stated at the lower of cost or market, with cost determined on a first-in, first-out basis. The carrying value of inventory is reduced for estimated obsolescence by the difference between its cost and the estimated market value based upon assumptions about future demand. Applied evaluates the inventory carrying value for potential excess and obsolete inventory exposures by analyzing historical and anticipated demand. In addition, inventories are evaluated for potential obsolescence due to the effect of known and anticipated engineering change orders and new products. If actual demand were to be substantially lower than estimated, additional adjustments for excess or obsolete inventory may be required, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Goodwill and Intangible Assets

Applied reviews goodwill and intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable, and also annually reviews goodwill and intangibles with indefinite lives for impairment. Intangible assets, such as purchased technology, are generally recorded in connection with a business acquisition. The value assigned to intangible assets is usually based on estimates and judgments regarding expectations for the success and life cycle of products and technology acquired. If actual product acceptance differs significantly from the estimates, Applied may be required to record an impairment charge to reduce the carrying value of the reporting unit to its estimated fair value.

To test goodwill for impairment, Applied first performs a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, Applied then performs the two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. Under the two-step goodwill impairment test, Applied would in the first step compare the estimated fair value of each reporting unit to its carrying value. If the carrying value of a reporting unit exceeds its estimated fair value, Applied would then perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. If Applied determines that the carrying value of a reporting unit's goodwill exceeds its implied fair value, Applied would record an impairment charge equal to the difference.

Applied determines the fair value of each reporting unit based on a weighting of an income and a market approach. Applied bases the fair value estimates on assumptions that it believes to be reasonable but that are unpredictable and inherently uncertain. Under the income approach, Applied estimates the fair value based on discounted cash flow method.

The estimates used in the impairment testing are consistent with the discrete forecasts that Applied uses to manage its business, and considers any significant developments during the period. Under the discounted cash flow method, cash flows beyond the discrete forecasts are estimated using a terminal growth rate, which considers the long-term earnings growth rate specific to the reporting units. The estimated future cash flows are discounted to present value using each reporting unit's weighted average cost of capital. The weighted average cost of capital measures a reporting unit's cost of debt and equity financing weighted by the percentage of debt and equity in a reporting unit's target capital structure. In addition, the weighted average cost of capital is derived using both known and estimated market metrics, and is adjusted to reflect both the timing and risks associated with the estimated cash flows. The tax rate used in the discounted cash flow method is the median tax rate of comparable companies and reflects Applied's current international structure, which is consistent with the market participant perspective. Under the market approach, Applied uses the guideline company method which applies market multiples to forecasted revenues and earnings before interest, taxes, depreciation and amortization. Applied uses market multiples that are consistent with comparable publicly-traded companies and considers each reporting unit's size, growth and profitability relative to its comparable companies.

Management uses significant judgment when assessing goodwill for potential impairment, especially in emerging markets. Indicators of potential impairment include, but are not limited to, challenging economic conditions, an unfavorable industry or economic environment or other severe decline in market conditions. Such conditions could have the effect of changing one of the critical assumptions or estimates used for the fair value calculation, resulting in an unexpected goodwill impairment charge, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Table of Contents

Income Taxes

Applied's provision for income taxes and effective tax rate are affected by the geographical composition of pre-tax income which includes jurisdictions with differing tax rates, conditional reduced tax rates and other income tax incentives. It is also affected by events that are not consistent from period to period, such as changes to income tax laws and the resolution of prior years' income tax filings.

Applied recognizes a current tax liability for the estimated amount of income tax payable on tax returns for the current fiscal year. Deferred tax assets and liabilities are recognized for the estimated future tax effects of temporary differences between the book and tax bases of assets and liabilities. Deferred tax assets are also recognized for net operating loss and tax credit carryforwards. Deferred tax assets are offset by a valuation allowance to the extent it is more likely than not that they are not expected to be realized.

Applied recognizes tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained upon examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized from such positions are estimated based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. Any changes in judgment related to uncertain tax positions are recognized in Applied's provision for income taxes in the quarter in which such change occurs. Interest and penalties related to uncertain tax positions are recognized in Applied's provision for income taxes.

The calculation of Applied's provision for income taxes and effective tax rate involves significant judgment in estimating the impact of uncertainties in the application of complex tax laws. Resolution of these uncertainties in a manner inconsistent with Applied's expectations could have an adverse material impact on Applied's results of operations and financial condition.

Non-GAAP Adjusted Financial Results

Applied provides investors with certain non-GAAP adjusted financial measures, which are adjusted to exclude the impact of certain costs, expenses, gains and losses, including certain items related to mergers and acquisitions; restructuring charges and any associated adjustments; impairments of assets, or investments; gain or loss on sale of strategic investments; certain other discrete adjustments and income tax items. Reconciliations of these non-GAAP measures to the most directly comparable financial measures calculated and presented in accordance with GAAP are provided in the financial tables presented below.

Management uses these non-GAAP adjusted financial measures to evaluate the Company's operating and financial performance and for planning purposes, and as performance measures in its executive compensation program. Applied believes these measures enhance an overall understanding of our performance and investors' ability to review the Company's business from the same perspective as the Company's management and facilitate comparisons of this period's results with prior periods on a consistent basis by excluding items that we do not believe are indicative of our ongoing operating performance. There are limitations in using non-GAAP financial measures because the non-GAAP financial measures are not prepared in accordance with generally accepted accounting principles, may be different from non-GAAP financial measures used by other companies, and may exclude certain items that may have a material impact upon our reported financial results. The presentation of this additional information is not meant to be considered in isolation or as a substitute for the directly comparable financial measures prepared in accordance with GAAP.

Table of Contents

The following tables present a reconciliation of the GAAP and non-GAAP adjusted consolidated results:
APPLIED MATERIALS, INC.

UNAUDITED RECONCILIATION OF GAAP TO NON-GAAP ADJUSTED RESULTS

(In millions, except percentages)	Three Months Ended		
	January 29, 2017	October 30, 2016	January 31, 2016
Non-GAAP Adjusted Gross Profit			
Reported gross profit - GAAP basis	\$1,445	\$1,399	\$ 916
Certain items associated with acquisitions ¹	42	42	42
Inventory reversals related to restructuring ²	—	—	(1)
Non-GAAP adjusted gross profit	\$1,487	\$1,441	\$ 957
Non-GAAP adjusted gross margin	45.4 %	43.7 %	42.4 %
Non-GAAP Adjusted Operating Income			
Reported operating income - GAAP basis	\$807	\$ 777	\$ 354
Certain items associated with acquisitions ¹	47	47	48
Acquisition integration costs	1	—	—
Inventory reversals related to restructuring ²	—	—	(1)
Other gains, losses or charges, net ³	(3)	8	—
Non-GAAP adjusted operating income	\$852	\$ 832	\$ 401
Non-GAAP adjusted operating margin	26.0 %	25.2 %	17.8 %
Non-GAAP Adjusted Net Income			
Reported net income - GAAP basis	\$703	\$ 610	\$ 286
Certain items associated with acquisitions ¹	47	47	48
Acquisition integration costs	1	—	—
Inventory reversals related to restructuring ²	—	—	(1)
Impairment (gain on sale) of strategic investments, net	5	6	(2)
Loss on early extinguishment of debt	—	—	5
Other gains, losses or charges, net ³	(3)	8	—
Reinstatement of federal R&D tax credit, resolution of prior years' income tax filings and other tax items	(16)	57	(29)
Income tax effect of non-GAAP adjustments ⁴	(5)	(6)	(5)
Non-GAAP adjusted net income	\$732	\$ 722	\$ 302

¹ These items are incremental charges attributable to completed acquisitions, consisting of amortization of purchased intangible assets.

² Results for the three months ended January 31, 2016 included a benefit from sales of solar equipment tools for which inventory had been previously reserved.

³ Results for the three months ended October 30, 2016 included a loss of \$8 million due to discontinuance of cash flow hedges that were probable not to occur by the end of the originally specified time period.

⁴ These amounts represent non-GAAP adjustments above multiplied by the effective tax rate within the jurisdictions the adjustments affect.

Note: The reconciliation of GAAP and non-GAAP adjusted segment results above does not include certain revenues, costs of products sold and operating expenses that are reported within corporate and other and included in consolidated operating income.

Table of Contents

Item 3: Quantitative and Qualitative Disclosures About Market Risk

Applied is exposed to interest rate risk related to its investment portfolio and debt issuances. Applied's investment portfolio includes fixed-income securities with a fair value of approximately \$1.4 billion at January 29, 2017. These securities are subject to interest rate risk and will decline in value if interest rates increase. Based on Applied's investment portfolio at January 29, 2017, an immediate 100 basis point increase in interest rates would result in a decrease in the fair value of the portfolio of approximately \$17 million. While an increase in interest rates reduces the fair value of the investment portfolio, Applied will not realize the losses in the consolidated statement of operations unless the individual fixed-income securities are sold prior to recovery or the loss is determined to be other-than-temporary. At January 29, 2017, the carrying amount of long-term debt issued by Applied was \$3.1 billion with an estimated fair value of \$3.4 billion. A hypothetical decrease in interest rates of 100 basis points would result in an increase in the fair value of Applied's long-term debt issuances of approximately \$292 million at January 29, 2017.

Certain operations of Applied are conducted in foreign currencies, such as Japanese yen, euro, Israeli shekel and Taiwanese dollar. Applied enters into currency forward exchange and option contracts to hedge a portion of, but not all, existing and anticipated foreign currency denominated transactions generally expected to occur within the next 24 months. Gains and losses on these contracts are generally recognized in income at the time that the related transactions being hedged are recognized. Because the effect of movements in currency exchange rates on currency forward exchange and option contracts generally offsets the related effect on the underlying items being hedged, these financial instruments are not expected to subject Applied to risks that would otherwise result from changes in currency exchange rates. Applied does not use derivative financial instruments for trading or speculative purposes.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, management of Applied conducted an evaluation, under the supervision and with the participation of Applied's Chief Executive Officer and Chief Financial Officer, of the effectiveness of Applied's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, Applied's Chief Executive Officer and Chief Financial Officer concluded that Applied's disclosure controls and procedures were effective as of the end of the period covered by this report in ensuring that information required to be disclosed was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and to provide reasonable assurance that information required to be disclosed by Applied in such reports is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

During the first quarter of fiscal 2017, there were no changes in the internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act, that materially affected, or are reasonably likely to materially affect, Applied's internal control over financial reporting.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information set forth under “Legal Matters” in Note 13 in Notes to Consolidated Condensed Financial Statements is incorporated herein by reference.

Item 1A: Risk Factors

The risk factors set forth below include any material changes to, and supersede the description of, the risk factors disclosed in Part I, Item 1A of Applied’s 2016 Form 10-K. These factors could materially and adversely affect Applied’s business, financial condition or results of operations and cause reputational harm, and should be carefully considered in evaluating the Company and its business, in addition to other information presented elsewhere in this report.

The industries that Applied serves can be volatile and difficult to predict.

As a supplier to the global semiconductor and display and related industries, Applied is subject to business cycles, the timing, length and volatility of which can be difficult to predict and which vary among its businesses. These industries historically have been cyclical and are subject to volatility and sudden changes in customer requirements for new manufacturing capacity and advanced technology, which depend on several factors, including general economic conditions, end-user demand, customers’ capacity utilization, production volumes, access to affordable capital, consumer buying patterns, inventory levels relative to demand, and technology transitions. These changes can affect the timing and amounts of customer investments in technology and manufacturing equipment, and can have a significant impact on Applied’s net sales, operating expenses, gross margins and net income. The amount and mix of capital equipment spending between different products and technologies can have a significant impact on the results of operations of Applied’s Semiconductor Systems segment, which is the largest contributor to its consolidated net sales.

To meet rapidly changing demand in the industries it serves, Applied must accurately forecast demand and effectively manage its resources and production capacity across its businesses, and may incur unexpected or additional costs to align its business operations. During periods of increasing demand for its products, Applied must have sufficient manufacturing capacity and inventory to meet customer demand; effectively manage its supply chain; attract, retain and motivate a sufficient number of qualified employees; and continue to control costs. During periods of decreasing demand, Applied must reduce costs and align its cost structure with prevailing market conditions; effectively manage its supply chain; and motivate and retain key employees. If Applied does not effectively manage these challenges during periods of changing demand, its business performance and results of operations may be adversely impacted. Even with effective allocation of resources and management of costs, during periods of decreasing demand, Applied’s gross margins and earnings may be adversely impacted.

Applied is exposed to risks associated with an uncertain global economy.

Uncertain global economic and business conditions, along with uncertainties in the financial markets, national debt and fiscal concerns in various regions, pose challenges to the industries in which Applied operates. Markets for semiconductors and displays depend largely on business and consumer spending and demand for electronic products. Economic uncertainty and related factors exacerbate negative trends in business and consumer spending and may cause certain Applied customers to push out, cancel, or refrain from purchasing for equipment or services, which may have an adverse impact on Applied’s revenues, results of operations and financial condition. Uncertain market conditions, difficulties in obtaining capital, or reduced profitability may also cause some customers to scale back operations, exit businesses, merge with other manufacturers, or file for bankruptcy protection and potentially cease operations, which can also result in lower sales, additional inventory or bad debt expense for Applied. Economic and industry uncertainty may similarly affect suppliers, which could impair their ability to deliver parts and negatively affect Applied’s ability to manage operations and deliver its products. These conditions may also lead to consolidation or strategic alliances among other equipment manufacturers, which could adversely affect Applied’s ability to compete effectively.

Uncertain economic and industry conditions also make it more challenging for Applied to forecast its operating results, make business decisions, and identify and prioritize the risks that may affect its businesses, sources and uses of cash, financial condition and results of operations. If Applied does not appropriately manage its business operations, it could have a significant negative impact on its business performance and financial condition. Applied may be required to implement additional cost reduction efforts, including restructuring activities, which may adversely affect Applied's ability to capitalize on opportunities. Even during periods of economic uncertainty or lower revenues, Applied must continue to invest in research and development and maintain a global business infrastructure to compete effectively and support its customers, which can have a negative impact on its operating margins and earnings.

Table of Contents

Applied maintains an investment portfolio that is subject to general credit, liquidity, market and interest rate risks. The risks to Applied's investment portfolio may be exacerbated if financial market conditions deteriorate and, as a result, the value and liquidity of the investment portfolio, as well as returns on pension assets, could be negatively impacted and lead to impairment charges. Applied also maintains cash balances in various bank accounts globally in order to fund normal operations. If any of these financial institutions becomes insolvent, it could limit Applied's ability to access cash in the affected accounts, which could affect its ability to manage its operations.

Applied is exposed to risks as a result of ongoing changes in the various industries in which it operates.

The global semiconductor, display and related industries in which Applied operates are characterized by ongoing changes affecting some or all of these industries that impact demand for and the profitability of Applied's products, including:

- the nature, timing and degree of visibility of changes in end demand for electronic products, including those related to fluctuations in consumer buying patterns tied to seasonality or the introduction of new products, and the effects of these changes on foundry and other customers' businesses and on demand for Applied's products;
- increasing capital requirements for building and operating new fabrication plants and customers' ability to raise the necessary capital;
- regulatory or tax policies impacting the timing of customers' investment in new or expanded fabrication plants;
- differences in growth rates among the semiconductor, display and other industries in which Applied operates;
- the increasing importance of establishing, improving and maintaining strong relationships with customers;
- the increasing cost and complexity for customers to move from product design to volume manufacturing, which may slow the adoption rate of new manufacturing technology;
- the need for customers to continually reduce the total cost of manufacturing system ownership;
- the heightened importance to customers of system reliability and productivity and the effect on demand for fabrication systems as a result of their increasing productivity, device yield and reliability;
- manufacturers' ability to reconfigure and re-use fabrication systems which can reduce demand for new equipment;
- the increasing importance of, and difficulties in, developing products with sufficient differentiation to influence customers' purchasing decisions;
- requirements for shorter cycle times for the development, manufacture and installation of manufacturing equipment;
- price and performance trends for semiconductor devices and displays, and the corresponding effect on demand for such products;
- the increasing importance of the availability of spare parts to maximize the time that customers' systems are available for production;
- the increasing role for and complexity of software in Applied products; and
- the increasing focus on reducing energy usage and improving the environmental impact and sustainability associated with manufacturing operations.

Applied is exposed to risks as a result of ongoing changes specific to the semiconductor industry.

The largest proportion of Applied's consolidated net sales and profitability is derived from sales of manufacturing equipment in the Semiconductor Systems segment to the global semiconductor industry. In addition, a majority of the revenues of Applied Global Services is from sales to semiconductor manufacturers. The semiconductor industry is characterized by ongoing changes particular to this industry that impact demand for and the profitability of Applied's semiconductor equipment and service products, including:

- the increasing cost of research and development due to many factors, including decreasing linewidths on a chip, the use of new materials, new and more complex device structures, more applications and process steps, increasing chip design costs, and the increasing cost and complexity of integrated manufacturing processes;
- the need to reduce product development time, despite the increasing difficulty of technical challenges;
- the growing number of types and varieties of semiconductors and number of applications across multiple substrate sizes;
- the increasing cost and complexity for semiconductor manufacturers to move more technically advanced capability and smaller linewidths to volume manufacturing, and the resulting impact on the rates of technology transition and investment in capital equipment;

Table of Contents

challenges in generating organic growth given semiconductor manufacturers' levels of capital expenditures and the allocation of capital investment to market segments that Applied does not serve, such as lithography, or segments where Applied's products have lower relative market presence;

- the importance of increasing market positions in segments with growing demand;
- semiconductor manufacturer's ability to reconfigure and re-use equipment, and the resulting effect on their need to purchase new equipment and services;
- the increasing frequency and complexity of technology transitions and inflections, such as 3-D transistors and advanced interconnects, and Applied's ability to timely and effectively anticipate and adapt to these changes; shorter cycle times between order placements by customers and product shipment require greater reliance on forecasting of customer investment, which may lead to inventory write-offs and manufacturing inefficiencies that decrease gross margin;
- competitive factors that make it difficult to enhance position, including challenges in securing development-tool-of-record (DTOR) and production-tool-of-record (PTOR) positions with customers;
- consolidation in the semiconductor industry, including among semiconductor manufacturers and among manufacturing equipment suppliers;
- shifts in sourcing strategies by computer and electronics companies that impact the equipment requirements of Applied's foundry customers;
- the concentration of new wafer starts in Korea and Taiwan, where Applied's service penetration and service-revenue-per-wafer-start have been lower than in other regions;
- investment in semiconductor manufacturing capabilities in China, and its effect on the demand for semiconductor manufacturing equipment; and
- the increasing fragmentation of semiconductor markets, leading certain markets to become too small to support the cost of a new fabrication plant, while others require less technologically advanced products.

If Applied does not accurately forecast, and allocate appropriate resources and investment towards addressing, key technology changes and inflections, successfully develop and commercialize products to meet demand for new technologies, and effectively address industry trends, its business and results of operations may be adversely impacted.

Applied is exposed to risks as a result of ongoing changes specific to the display industry.

The global display industry historically has experienced considerable volatility in capital equipment investment levels, due in part to the limited number of display manufacturers, the concentrated nature of end-use applications, production capacity relative to end-use demand, and panel manufacturer profitability. Industry growth depends primarily on consumer demand for increasingly larger and more advanced TVs, and on demand for advanced smartphones and mobile device displays, which demand is highly sensitive to cost and improvements in technologies and features. The display industry is characterized by ongoing changes particular to this industry that impact demand for and the profitability of Applied's display products, including:

- the importance of new types of display technologies, such as organic light-emitting diode (OLED), low temperature polysilicon (LTPS), flexible displays and metal oxide, and new touch panel films;
- the timing and extent of an expansion of manufacturing facilities in China, which may be affected by changes in economic conditions in China;
- the rate of transition to larger substrate sizes for TVs and to new display technologies for TVs and mobile applications, and the resulting effect on capital intensity in the industry and on Applied's product differentiation, gross margin and return on investment; and
- the variability in demand for display manufacturing equipment, and uncertainty with respect to future display technology end-use applications and growth drivers.

If Applied does not successfully develop and commercialize products to meet demand for new and emerging display technologies, or if industry demand for display manufacturing equipment and technologies slows, Applied's business and its results of operations may be adversely impacted.

Table of Contents

The industries in which Applied operates are highly competitive and subject to rapid technological and market changes.

Applied operates in a highly competitive environment in which innovation is critical, and its future success depends on many factors, including the development of new technologies and effective commercialization and customer acceptance of its equipment, services and related products. In order to successfully grow its businesses, Applied must increase its position in its current markets, expand into adjacent and new markets, and optimize operational performance. The development, introduction and support of a broadening set of products in a geographically diverse and competitive environment, and that may require greater collaboration with customers and other industry participants, have grown more complex and expensive over time. Furthermore, new or improved products may entail higher costs and lower profits. To compete successfully, Applied must:

- identify and address technology inflections, market changes, new applications, customer requirements and end-use demand;
- develop new products and disruptive technologies, improve and develop new applications for existing products, and adapt products for use by customers in different applications and markets with varying technical requirements;
- differentiate its products from those of competitors, meet customers' performance specifications, appropriately price products, and achieve market acceptance;
- maintain operating flexibility to enable responses to changing markets, applications, customers and customer requirements;
- enhance its worldwide operations across its businesses to reduce cycle time, enable continuous quality improvement, reduce costs, and enhance design for manufacturability and serviceability;
- focus on product development and sales and marketing strategies that address customers' high value problems and strengthen customer relationships;
- effectively allocate resources between its existing products and markets, the development of new products, and expanding into new and adjacent markets;
- improve the productivity of capital invested in R&D activities;
- accurately forecast demand, work with suppliers and meet production schedules for its products;
- improve its manufacturing processes and achieve cost efficiencies across product offerings;
- adapt to changes in value offered by companies in different parts of the supply chain;
- qualify products for evaluation and volume manufacturing with its customers; and
- implement changes in its design engineering methodology to reduce material costs and cycle time, increase commonality of platforms and types of parts used in different systems, and improve product life cycle management.

If Applied does not successfully anticipate technology inflections, develop and commercialize new products and technologies, and respond to changes in customer requirements and market trends, its business performance and results of operations may be adversely impacted.

Applied is exposed to risks associated with a highly concentrated customer base.

Applied's customer base is highly concentrated, and has become increasingly concentrated as a result of continued consolidation. Applied's customer base is also geographically concentrated. A relatively limited number of manufacturers account for a substantial portion of Applied's business. As a result, the actions of even a single customer can expose Applied's business and results of operations to greater volatility. The mix and type of customers, and sales to any single customer, may vary significantly from quarter to quarter and from year to year, and have a significant impact on Applied's net sales, gross margins and net income. Applied's products are configured to customer specifications, and changing, rescheduling or canceling orders may result in significant, non-recoverable costs. If customers do not place orders, or they substantially reduce, delay or cancel orders, Applied may not be able to replace the business, which may have a significant adverse impact on its results of operations and financial condition. The concentration of Applied's customer base increases its risks related to the financial condition of its customers, and the deterioration in financial condition of a single customer or the failure of a single customer to perform its obligations could have a material adverse effect on Applied's results of operations and cash flow. To the extent its customers experience liquidity constraints, Applied may incur additional bad debt expense, which may have a significant impact on its results of operations. Major customers may also seek pricing, payment, intellectual property-related, or other

commercial terms that are less favorable to Applied, which may have a negative impact on Applied's business, revenue and gross margins.

Table of Contents

Applied is exposed to the risks of operating a global business.

Applied has product development, engineering, manufacturing, sales and other operations in many countries, and some of its business activities are concentrated in certain geographic areas. Moreover, in the first quarter of fiscal 2017, approximately 90 percent of Applied's net sales were to customers in regions outside the United States. As a result of the global nature of its operations, Applied's business performance and results of operations may be adversely affected by a number of factors, including:

- varying regional economic and geopolitical business conditions and demands;
- political and social attitudes, laws, rules, regulations and policies within countries that favor domestic companies over non-domestic companies, including customer- or government-supported efforts to promote the development and growth of local competitors;
- customer- or government-supported efforts to influence Applied to conduct more of its operations and sourcing in a particular country, such as Korea and China;
- variations among, and changes in, local, regional, national or international laws and regulations, including contract, intellectual property, labor, tax, and import/export laws, and the interpretation and application of such laws and regulations;
- global trade issues, including the ability to obtain required import and export licenses, and international trade disputes;
- ineffective or inadequate legal protection of intellectual property rights in certain countries;
- positions taken by governmental agencies regarding possible national commercial and/or security issues posed by international business operations;
- fluctuating raw material, commodity, energy and shipping costs or shipping delays;
- geographically diverse operations and projects, which require an effective organizational structure and allocation of resources, and appropriate business processes, procedures and controls;
- supply chain interruptions, and service interruptions from utilities, transportation, data hosting or telecommunications providers;
- a diverse workforce with different experience levels, languages, cultures, customs, business practices and worker expectations, and differing employment practices and labor issues;
- variations in the ability to develop relationships with local customers, suppliers and governments;
- fluctuations in interest rates and currency exchange rates, including the relative strength or weakness of the U.S. dollar against the Japanese yen, euro, Taiwanese dollar, Israeli shekel, Chinese yuan or Singapore dollar;
- the need to provide sufficient levels of technical support in different locations around the world;
- political instability, natural disasters, pandemics, social unrest, terrorism or acts of war in locations where Applied has operations, suppliers or sales, or that may influence the value chain of the industries that Applied serves;
- hiring and integration of an increasing number of workers in new countries;
- the increasing need for a mobile workforce to work in or travel to different regions; and
- uncertainties with respect to economic growth rates in various countries, including for the manufacture and sale of semiconductors and displays in the developing economies of certain countries.

Many of these challenges are present in China and Korea, which are experiencing significant growth of customers, suppliers and competitors to Applied. Applied further believes that China and Korea present large potential markets for its products and opportunity for growth over the long term, although at lower projected levels of profitability and margins for certain products than historically have been achieved in other regions. In addition, government authorities may impose conditions that require the use of local suppliers or partnerships with local companies, require the license or other transfer of intellectual property, or engage in other efforts to promote local businesses and local competitors, which could have a significant adverse impact on Applied's business.

Table of Contents

Applied is exposed to risks associated with business combinations, acquisitions and strategic investments.

Applied engages in acquisitions of or investments in companies, technologies or products in existing, related or new markets for Applied. Business combinations, acquisitions and investments involve numerous risks to Applied's business, financial condition and operating results, including but not limited to:

- diversion of management's attention and disruption of ongoing businesses;
- contractual restrictions on the conduct of Applied's business during the pendency of a proposed transaction;
- inability to complete proposed transactions due to the failure to obtain regulatory or other approvals, litigation or other disputes, and any ensuing obligation to pay a termination fee;
- the failure to realize expected returns from acquired businesses;
- requirements imposed by government regulators in connection with their review of a transaction, which may include, among other things, divestitures and restrictions on the conduct of Applied's existing business or the acquired business;
- ineffective integration of operations, systems, technologies, products or employees, which can impact the ability to realize anticipated synergies or other benefits;
- failure to commercialize technologies from acquired businesses or developed through strategic investments;
- dependence on unfamiliar supply chains or relatively small supply partners;
- inability to capitalize on characteristics of new markets that may be significantly different from Applied's existing markets and where competitors may have stronger market positions and customer relationships;
- failure to retain and motivate key employees of acquired businesses;
- the potential impact of the announcement or consummation of a proposed transaction on relationships with third parties;
- potential changes in Applied's credit rating, which could adversely impact the Company's access to and cost of capital;
- reductions in cash balances or increases in debt obligations to finance activities associated with a transaction, which reduce the availability of cash flow for general corporate or other purposes, including share repurchases and dividends;
- exposure to new operational risks, rules, regulations, worker expectations, customs and practices to the extent acquired businesses are located in regions where Applied has not historically conducted business;
- challenges associated with managing new, more diverse and more widespread operations, projects and people;
- inability to obtain and protect intellectual property rights in key technologies;
- inadequacy or ineffectiveness of an acquired company's internal financial controls, disclosure controls and procedures, or environmental, health and safety, anti-corruption, human resource, or other policies or practices;
- impairment of acquired intangible assets and goodwill as a result of changing business conditions, technological advancements or worse-than-expected performance of the segment;
- the risk of litigation or claims associated with a proposed or completed transaction;
- unknown, underestimated or undisclosed commitments or liabilities; and
- the inappropriate scale of acquired entities' critical resources or facilities for business needs.

Applied also makes strategic investments in other companies, including companies formed as joint ventures, which may decline in value or not meet desired objectives. The success of these investments depends on various factors over which Applied may have limited or no control and, particularly with respect to joint ventures, requires ongoing and effective cooperation with strategic partners. The risks to Applied's strategic investment portfolio may be exacerbated by unfavorable financial market and macroeconomic conditions and, as a result, the value of the investment portfolio could be negatively impacted and lead to impairment charges.

Table of Contents

Applied's indebtedness and debt covenants could adversely affect its financial condition and business.

Applied has \$3.4 billion in aggregate principal amount of senior unsecured notes outstanding. Under the indenture governing the senior unsecured notes, it may be required to offer to repurchase the notes at a price equal to 101% of the principal amount, plus accrued and unpaid interest, upon a change of control of Applied and a contemporaneous downgrade of the notes below investment grade. Applied also has in place a \$1.5 billion committed revolving credit agreement. While no amounts were outstanding under this credit agreement at January 29, 2017, Applied may borrow amounts in the future under the agreement. Applied may also enter into new financing arrangements. Applied's ability to satisfy its debt obligations is dependent upon the results of its business operations and subject to other risks discussed in this section. Significant changes in Applied's credit rating or changes in the interest rate environment could have a material adverse consequence on Applied's access to and cost of capital for future financings, and financial condition. If Applied fails to satisfy its debt obligations, or comply with financial and other debt covenants, it may be in default and any borrowings may become immediately due and payable, and such default may also constitute a default under other of Applied's obligations. There can be no assurance that Applied would have sufficient financial resources or be able to arrange financing to repay any borrowings at such time.

Applied is exposed to risks associated with expanding into new and related markets and industries.

As part of its growth strategy, Applied must successfully expand into related or new markets and industries, either with its existing products or with new products developed internally, or those developed in collaboration with third parties, or obtained through acquisitions. Applied's ability to successfully expand its business into new and related markets and industries may be adversely affected by a number of factors, including:

- the need to devote additional resources to develop new products for, and operate in, new markets;
- the need to develop new sales and technical marketing strategies, cultivate relationships with new customers and meet different customer service requirements;
- differing rates of profitability and growth among multiple businesses;
- Applied's ability to anticipate demand, capitalize on opportunities, and avoid or minimize risks;
- the complexity of managing multiple businesses with variations in production planning, execution, supply chain management and logistics;
- the adoption of new business models, business processes and systems;
- the complexity of entering into and effectively managing strategic alliances or partnering opportunities;
- new materials, processes and technologies;
- the need to attract, motivate and retain employees with skills and expertise in these new areas;
- new and more diverse customers and suppliers, including some with limited operating histories, uncertain or limited funding, evolving business models or locations in regions where Applied does not have, or has limited, operations;
- new or different competitors with potentially more financial or other resources, industry experience and established customer relationships;
- entry into new industries and countries, with differing levels of government involvement, laws and regulations, and business, employment and safety practices;
- third parties' intellectual property rights; and
- the need to comply with, or work to establish, industry standards and practices.

In addition, Applied from time to time receives funding from United States and other government agencies for certain strategic development programs to increase its research and development resources and address new market opportunities. As a condition to this government funding, Applied may be subject to certain record-keeping, audit, intellectual property rights-sharing and/or other obligations.

Table of Contents

Manufacturing interruptions or delays could affect Applied's ability to meet customer demand and lead to higher costs, while the failure to estimate customer demand accurately could result in excess or obsolete inventory.

Applied's business depends on its timely supply of equipment, services and related products that meet the rapidly changing technical and volume requirements of its customers, which depends in part on the timely delivery of parts, including components and subassemblies, from suppliers, including contract manufacturers. Some key parts are subject to long lead-times or obtainable only from a single supplier or limited group of suppliers, and some sourcing or subassembly is provided by suppliers located in countries other than the countries where Applied conducts its manufacturing, including China and Korea. Variable industry conditions and the volatility of demand for manufacturing equipment increase capital, technical, operational and other risks for Applied and for companies throughout its supply chain. These conditions may cause some suppliers to scale back operations, exit businesses, merge with other companies, or file for bankruptcy protection and possibly cease operations. Applied may also experience significant interruptions of its manufacturing operations, delays in its ability to deliver products or services, increased costs or customer order cancellations as a result of:

- the failure or inability of suppliers to timely deliver sufficient quantities of quality parts on a cost-effective basis;
- volatility in the availability and cost of materials, including rare earth elements;
- difficulties or delays in obtaining required import or export approvals;
- shipment delays due to transportation interruptions or capacity constraints;
- information technology or infrastructure failures; and
- natural disasters or other events beyond Applied's control (such as earthquakes, floods or storms, regional economic downturns, pandemics, social unrest, political instability, terrorism, or acts of war), particularly where it conducts manufacturing.

If a supplier fails to meet Applied's requirements concerning quality, cost, protection of intellectual property, socially-responsible business practices, or other performance factors, Applied may transfer its business to alternative sources, which could entail manufacturing delays, additional costs, or other difficulties. If Applied is unable to meet its customers' demand for a prolonged period due to its inability to obtain certain parts or components, it could affect its ability to manage its operations, and have an adverse impact on Applied's business, results of operations and customer relationships. In addition, if Applied needs to rapidly increase its business and manufacturing capacity to meet increases in demand or expedited shipment schedules, this may exacerbate any interruptions in Applied's manufacturing operations and supply chain and the associated effect on Applied's working capital. Moreover, if actual demand for Applied's products is different than expected, Applied may purchase more/fewer parts than necessary or incur costs for canceling, postponing or expediting delivery of parts. If Applied purchases inventory in anticipation of customer demand that does not materialize, or if customers reduce or delay orders, Applied may incur excess inventory charges.

The ability to attract, retain and motivate key employees is vital to Applied's success.

Applied's success, competitiveness and ability to execute on its global strategies and maintain a culture of innovation depend in large part on its ability to attract, retain and motivate key employees. Achieving this objective may be difficult due to many factors, including fluctuations in global economic and industry conditions, management changes, Applied's organizational structure, global competition for talent and the availability of qualified employees, cost reduction activities (including workforce reductions and unpaid shutdowns), availability of career development opportunities, the ability to obtain necessary authorizations for workers to provide services outside their home countries, and the effectiveness of Applied's compensation and benefit programs, including its share-based programs. Restructuring programs present particular challenges to the extent they involve the departure of knowledgeable and experienced employees and the resulting need to identify and train existing or new workers to perform necessary functions, which may result in unexpected costs, reduced productivity, and/or difficulties with respect to internal processes and controls.

Table of Contents

Applied is exposed to various risks related to protection and enforcement of intellectual property rights.

Applied's success depends in significant part on the protection of its patents, trade secrets, copyrights and other intellectual property rights. Infringement of Applied's rights by a third party, such as the unauthorized manufacture or sale of equipment or spare parts, could result in uncompensated lost market and revenue opportunities for Applied. Policing any unauthorized use of intellectual property is difficult and costly and Applied cannot be certain that the measures it has implemented will prevent misuse. Applied's ability to enforce its intellectual property rights is subject to litigation risks, as well as uncertainty as to the protection and enforceability of those rights in some countries. If Applied seeks to enforce its intellectual property rights, it may be subject to claims that those rights are invalid or unenforceable, and others may seek counterclaims against Applied, which could have a negative impact on its business. If Applied is unable to enforce and protect intellectual property rights, or if they are circumvented, invalidated, rendered obsolete by the rapid pace of technological change, it could have an adverse impact on its competitive position and business. In addition, changes in intellectual property laws or their interpretation, such as recent changes in U.S. patent laws, may impact Applied's ability to protect and assert its intellectual property rights, increase costs and uncertainties in the prosecution of patent applications and enforcement or defense of issued patents, and diminish the value of Applied's intellectual property.

Third parties may also assert claims against Applied and its products. Claims that Applied's products infringe the rights of others, whether or not meritorious, can be expensive and time-consuming to defend and resolve, and may divert the efforts and attention of management and personnel. The inability to obtain rights to use third party intellectual property on commercially reasonable terms could have an adverse impact on Applied's business. In addition, Applied may face claims based on the theft or unauthorized use or disclosure of third-party trade secrets and other confidential business information. Any such incidents and claims could severely harm Applied's business and reputation, result in significant expenses, harm its competitive position, and prevent Applied from selling certain products, all of which could have a significant adverse impact on Applied's business and results of operations.

Applied is exposed to risks related to cybersecurity threats and incidents.

In the conduct of its business, Applied collects, uses, transmits and stores data on information technology systems. This data includes confidential information belonging to Applied or its customers or other business partners, as well as personally-identifiable information of individuals. Applied has experienced, and expects to continue to be subject to, cybersecurity threats and incidents, ranging from employee error or misuse to individual attempts to gain unauthorized access to information systems to sophisticated and targeted measures known as advanced persistent threats, none of which have been material to the Company to date. Applied devotes significant resources to network security, data encryption and other measures to protect its systems and data from unauthorized access or misuse. However, depending on their nature and scope, cybersecurity incidents could result in business disruption; the misappropriation, corruption or loss of confidential information and critical data (Applied's and that of third parties); reputational damage; litigation with third parties; diminution in the value of Applied's investment in research, development and engineering; data privacy issues; and increased cybersecurity protection and remediation costs.

Applied is exposed to various risks related to legal proceedings.

Applied from time to time is, and in the future may be, involved in legal proceedings or claims regarding patent infringement, intellectual property rights, antitrust, environmental regulations, securities, contracts, product performance, product liability, unfair competition, misappropriation of trade secrets, employment, workplace safety, and other matters. Applied also on occasion receives notification from customers who believe that Applied owes them indemnification or other obligations related to claims made against such customers by third parties.

Legal proceedings and claims, whether with or without merit, and associated internal investigations, may be time-consuming and expensive to prosecute, defend or conduct; divert management's attention and other Applied resources; inhibit Applied's ability to sell its products; result in adverse judgments for damages, injunctive relief, penalties and fines; and negatively affect Applied's business. There can be no assurance regarding the outcome of current or future legal proceedings, claims or investigations.

Table of Contents

The failure to successfully implement and conduct outsourcing activities and other operational initiatives could adversely affect results of operations.

To better align its costs with market conditions, locate closer to customers, enhance productivity, and improve efficiencies, Applied conducts certain engineering, software development, manufacturing, sourcing and other operations in regions outside the United States, including India, Taiwan, China, and Korea. Applied has implemented a distributed manufacturing model, under which certain manufacturing and supply chain activities are conducted in various countries, including Germany, Israel, Italy, Singapore, Taiwan, the United States and other countries in Asia, and assembly of some systems is completed at customer sites. In addition, Applied outsources certain functions to third parties, including companies in the United States, India, China, Korea, Malaysia and other countries. Outsourced functions include contract manufacturing, engineering, customer support, software development, information technology support, finance and administrative activities. The expanding role of third party providers has required changes to Applied's existing operations and the adoption of new procedures and processes for retaining and managing these providers, as well as redistributing responsibilities as warranted, in order to realize the potential productivity and operational efficiencies, assure quality and continuity of supply, and protect the intellectual property of Applied and its customers, suppliers and other partners. If Applied does not accurately forecast the amount, timing and mix of demand for products, or if contract manufacturers or other outsource providers fail to perform in a timely manner or at satisfactory quality levels, Applied's ability to meet customer requirements could suffer, particularly during a market upturn.

In addition, Applied must regularly implement or update comprehensive programs and processes to better align its global organizations, including initiatives to enhance its supply chain and improve back office and information technology infrastructure for more efficient transaction processing. The implementation of new processes and information systems and additional functionality to the existing systems entails certain risks, including difficulties with changes in business processes that could disrupt Applied's operations, such as its ability to track orders and timely ship products, project inventory requirements, manage its supply chain and aggregate financial and operational data. During transitions Applied must continue to rely on legacy information systems, which may be costly or inefficient, while the implementation of new initiatives may not achieve the anticipated benefits and may divert management's attention from other operational activities, or have other unintended consequences.

If Applied does not effectively develop and implement its outsourcing and relocation strategies, if required export and other governmental approvals are not timely obtained, if Applied's third party providers do not perform as anticipated, if there are delays or difficulties in enhancing business processes or if there are delays or difficulties in implementing or enhancing information systems, Applied may not realize anticipated productivity improvements or cost efficiencies, and may experience operational difficulties, increased costs (including energy and transportation), manufacturing interruptions or delays, inefficiencies in the structure and/or operation of its supply chain, loss of its intellectual property rights, quality issues, reputational harm, increased product time-to-market, and/or inefficient allocation of human resources, all of which could adversely affect Applied's business, financial condition and results of operations. Applied may incur impairment charges to goodwill or long-lived assets.

Applied has a significant amount of goodwill and other acquired intangible assets related to acquisitions. Goodwill and purchased intangible assets with indefinite useful lives are not amortized, but are reviewed for impairment annually during the fourth quarter of each fiscal year, and more frequently when events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The review compares the fair value for each of Applied's reporting units to its associated carrying value, including goodwill. Factors that could lead to impairment of goodwill and intangible assets include adverse industry or economic trends, reduced estimates of future cash flows, declines in the market price of Applied common stock, changes in Applied's strategies or product portfolio, and restructuring activities. Applied's valuation methodology for assessing impairment requires management to make judgments and assumptions based on historical experience and projections of future operating performance. Applied may be required to record future charges to earnings during the period in which an impairment of goodwill or intangible assets is determined to exist.

Applied is exposed to risks associated with operating in jurisdictions with complex and changing tax laws.

Applied is subject to income taxes in the United States and foreign jurisdictions. Significant judgment is required to determine and estimate worldwide tax liabilities. Applied's provision for income taxes and effective tax rates could be affected by numerous factors, including changes in: (1) applicable tax laws; (2) amount and composition of pre-tax income in jurisdictions with differing tax rates; (3) plans to indefinitely reinvest certain funds held outside of the U.S.; and (4) valuation of deferred tax assets and liabilities. An increase in Applied's provision for income taxes and effective tax rate could have a material adverse impact on Applied's results of operations and financial condition. As of January 29, 2017, Applied intends to indefinitely reinvest approximately \$2.1 billion of cash, cash equivalents and marketable securities held by foreign subsidiaries and does not plan to repatriate these funds. Applied would need to accrue and pay U.S. taxes if these funds were repatriated.

Table of Contents

Consistent with the international nature of its business, Applied conducts certain manufacturing, supply chain, and other operations in Asia, bringing these activities closer to customers and reducing operating costs. In certain foreign jurisdictions, conditional reduced income tax rates have been granted to Applied. To obtain the benefit of these tax incentives, Applied must meet requirements relating to various activities. Applied's ability to realize benefits from these incentives could be materially affected if, among other things, applicable requirements are not met or Applied incurs net losses in these jurisdictions.

In addition, Applied is subject to examination by the Internal Revenue Service and other tax authorities, and from time to time amends previously filed tax returns. Applied regularly assesses the likelihood of favorable or unfavorable outcomes resulting from these examinations and amendments to determine the adequacy of its provision for income taxes, which requires estimates and judgments. Although Applied believes its tax estimates are reasonable, there can be no assurance that the tax authorities will agree with such estimates. Applied may have to engage in litigation to achieve the results reflected in the estimates, which may be time-consuming and expensive. There can be no assurance that Applied will be successful or that any final determination will not be materially different from the treatment reflected in Applied's historical income tax provisions and effective tax rates.

Applied is subject to risks associated with environmental and safety regulations.

Applied is subject to environmental and safety regulations in connection with its global business operations, including but not limited to: regulations related to the development, manufacture and use of its products; handling, discharge, recycling and disposal of hazardous materials used in its products or in producing its products; the operation of its facilities; and the use of its real property. The failure or inability to comply with existing or future environmental and safety regulations could result in: significant remediation or other legal liabilities; the imposition of penalties and fines; restrictions on the development, manufacture, sale or use of certain of its products; limitations on the operation of its facilities or ability to use its real property; and a decrease in the value of its real property. Applied could be required to alter its manufacturing and operations and incur substantial expense in order to comply with environmental and safety regulations. Any failure to comply with environmental and safety regulations could subject Applied to significant costs and liabilities that could adversely affect Applied's business, financial condition and results of operations.

Applied is exposed to various risks related to the global regulatory environment.

As a public company with global operations, Applied is subject to the laws of the United States and multiple foreign jurisdictions and the rules and regulations of various governing bodies, which may differ among jurisdictions, including those related to financial and other disclosures, corporate governance, intellectual property, tax, trade, anti-competition, employment, immigration, privacy, and anti-corruption. Changing, inconsistent or conflicting laws, rules and regulations, and ambiguities in their interpretation and application, create uncertainty and challenges, and compliance with laws, rules and regulations may be onerous and expensive, divert management time and attention from revenue-generating activities, and otherwise adversely impact Applied's business operations. Violations of law, rules and regulations could result in fines, criminal sanctions, restrictions on Applied's business, and damage to its reputation, and could have an adverse impact on its business operations, financial condition and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The following table provides information as of January 29, 2017 with respect to the shares of common stock repurchased by Applied during the first quarter of fiscal 2017.

Period	Total Number of Shares Purchased	Aggregate Price Paid	Total Number of Shares Purchased as Part of Publicly Announced Program*	Maximum Dollar Value of Shares That May Yet be Purchased Under the Program*
	(In millions, except per share amounts)			
Month #1 (October 31, 2016 to November 27, 2016)	1.1 \$ 29.73	\$ 33	1.1	\$ 1,749
Month #2 (November 28, 2016 to December 25, 2016)	1.5 \$ 32.11	47	1.5	\$ 1,702
Month #3 (December 26, 2016 to January 29, 2017)	1.5 \$ 33.00	50	1.5	\$ 1,652
Total	4.1 \$ 31.80	\$ 130	4.1	

* On June 9, 2016, Applied's Board of Directors approved a common stock repurchase program authorizing up to \$2.0 billion in repurchases.
