

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

ENVIRONMENTAL POWER CORP

Form S-2

April 01, 2002

As filed with the Securities and Exchange Commission on April 1, 2002.
Registration No. 333--

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM S-2
REGISTRATION STATEMENT UNDER THE SECURITIES ACT OF 1933

ENVIRONMENTAL POWER CORPORATION

(Name of registrant as specified in its charter)

Delaware

04-2782065

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

One Cate Street, Fourth Floor
Portsmouth, New Hampshire 03801
(603) 431-1780

JOSEPH E. CRESCI
One Cate Street, Fourth Floor
Portsmouth, New Hampshire 03801
(603) 431-1780

(Address, including zip code, and
telephone number, including area code,
of registrant's principal executive
offices)

(Name, address, including zip code, and
telephone number, including area code,
of agent for service)

With copies to:
Steven I. Himmelstein
Dorsey & Whitney LLP
250 Park Avenue New York, New York 10177

Approximate date of commencement of proposed sale to the public: As soon
as practicable following the date on which the Registration Statement becomes
effective.

If any of the securities being registered on this form are offered as a
delayed or continuous basis pursuant to Rule 415 under the Securities Act,
check the following box.

If the registrant elects to deliver its latest annual report to security
holders, or a complete and legal facsimile thereof pursuant to Item 11(a)(i) of
this Form, check the following box.

If this Form is filed to register additional securities for an offering
pursuant to Rule 462(b) under the Securities Act, check the following box and
list the Securities Act registration statement number of the earlier effective
registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c)
under the Securities Act, check the following box and list the Securities Act
registration statement number of the earlier effective registration statement

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

for the same offering. []

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

If delivery of the prospectus is expected to be made pursuant to Rule 434, check the following box. []

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered -----	Amount to be registered / (1) / -----	Proposed maximum offering price per share -----	Proposed maximum aggregate offering price -----	Amount of registrati fee / (5) -----
Common Stock.....	16,031,957 / (2) /	\$0.52	\$8,336,618	\$767
Common Stock Underlying Options.....	141,329 / (3) /	0.52	73,491	7
Common Stock Underlying Warrants.....	821,170 / (4) /	0.52	427,008	40
Total	16,994,456 Shares	XXX	\$8,837,117	\$814

/(1)/ In accordance with Rule 416, there are hereby being registered an indeterminate number of additional shares of common stock which may be issued as a result of the anti-dilution provisions of the options and warrants.

/(2)/ Registered for resale.

/(3)/ Registered for resale upon exercise of outstanding options.

/(4)/ Registered for resale upon exercise of outstanding warrants.

/(5)/ The registration fee that is being paid herewith was calculated in accordance with Rule 457(c) and is based on the average of the bid and asked prices of the registrants' common stock, as reported on the OTC Bulletin Board on March 27, 2002.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. The selling shareholders may not sell their securities until the registration

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell the securities and it is not soliciting an offer to buy the securities in any state where the offer or sale is not permitted.

Subject to completion, dated April 1, 2001.

PROSPECTUS

ENVIRONMENTAL POWER CORPORATION

16,994,456 shares of common stock

This prospectus describes the registration of 16,031,957 shares of common stock, 141,329 shares of common stock issuable upon the exercise of outstanding options and 821,170 shares of common stock issuable upon exercise of outstanding warrants. We will be issuing, in private transactions, the shares of common stock issuable upon exercise of the options and warrants.

We do not know if any or all of the options or warrants will be exercised. The selling shareholders will have to exercise the options and warrants in order to publicly sell the underlying shares of common stock that are offered for resale in this prospectus.

The common stock is quoted for trading on the OTC Bulletin Board under the symbol "POWR." The address of our principal executive offices is One Cate Street, Fourth Floor, Portsmouth, New Hampshire 03801 and our telephone number is (603) 431-1780.

Investing in the common stock involves certain risks. See "Risk Factors" commencing on page 3 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2002.

INDEX TO PRO FORMA FINANCIAL INFORMATION AND MICROGY FINANCIAL STATEMENTS	27

RISK FACTORS

An investment in our common stock is speculative and involves a high degree of risk. You should purchase the common stock only if you are sophisticated in financial matters and business investments. You should carefully consider the following factors before purchasing our common stock.

Microgy Cogeneration Systems, Inc., a company that we recently acquired, has very little operating history from which to evaluate its business and products.

Microgy was formed in 1999 and is still in the development stage. Microgy intends to develop facilities which use environmentally friendly anaerobic digestion and other technologies to produce bio-energy from animal and organic wastes. Because a large part of our future business is anticipated to involve Microgy's bio-energy projects, your investment decision will likely be based in large part on an enterprise with very little operating history upon which to judge. We are unable to determine whether our investment in Microgy will prove to be financially advantageous.

Microgy has experienced losses to date and we anticipate it will continue to experience losses in the foreseeable future.

Microgy had accumulated losses of approximately \$2.3 million through December 31, 2001. We expect our Microgy subsidiary to continue to incur losses, reduce our earnings or, as the case may be, add to our earnings deficit as we seek to develop its business. These ongoing losses will likely adversely affect our financial condition into the foreseeable future.

We have not completed our plans for deployment of our anaerobic digester technology and therefore, cannot predict its related costs or outlook for profitability.

The strategic implementation planning necessary to determine our course of action for deployment of our anaerobic digester technology has not been completed. Accordingly, no decision has been made as to whether we will sell, install and operate, or develop and own the related facilities. In addition, we do not have experience in, or a basis for, predicting the general and administrative and other costs associated with developing anaerobic digester facilities. Because of this we are unable to determine when or if these facilities will generate a profit. If the organizational, structural, staffing and other overhead costs associated with the anaerobic digester facilities outstrip any profits, the value of your investment will be adversely affected.

If we are unable to obtain needed financing for Microgy's anaerobic digestion bioenergy projects, the valuation of our Microgy investment may be reduced significantly.

We are considering corporate, project and group financing to fund the cost of any development we may decide to pursue for our anaerobic digestion bioenergy projects. In such event, we are likely to require financing with more favorable rates and terms than are generally available and such financing may

be difficult to obtain. If we are unable to obtain such

3

financing, our initial valuation of our Microgy investment may be reduced significantly, and we may be required to substantially curtail our business or close any anaerobic digester projects. This financing will depend on the lender's or investor's review of the financial capabilities of us as well as specific project or projects and other factors, including their assessment of our ability to successfully construct and manage the project.

Microgy's technologies could become obsolete before commercial deployment, reducing the value of your investment.

We do not expect to commercially deploy Microgy's licensed anaerobic digestion bioenergy technologies until we further develop Microgy's business plan, decide on project structures and arrange necessary financing. Current solutions or solutions that may be developed in the future by competitors could make our anaerobic digestion bioenergy technologies obsolete before they are commercially deployed. Accordingly, we cannot guarantee that our technologies will ensure a competitive position within the marketplace in the future. If we are unable to obtain a competitive position in the agricultural and alternative power generation markets, the value of your investment will be reduced.

If we experience delays in obtaining the technical information and specifics needed to build our licensed anaerobic digester technologies, our business could be harmed and the value of your investment could be reduced.

The company from which we license intellectual property regarding our anaerobic digestion bioenergy products still holds trade secret and other proprietary information that is important to us. In the past, Microgy has experienced delays in obtaining and completing information necessary to successfully develop anaerobic digester projects. The inability to readily obtain this information from our licensor could delay our product offerings, make them more expensive to bring to market and reduce the value of your investment.

The market for anaerobic digester bioenergy technology is crowded and our market share may not be sufficient to be profitable.

There are many companies that offer anaerobic digester systems. We believe that at least 60 companies offer complete systems or components to these systems in the U.S. market. The presence of these companies may dilute our market share to a degree that we are not profitable.

We currently rely on the Scrubgrass Project for all of our operating revenue.

We own a 22 year leasehold interest that commenced in 1994 in our Scrubgrass Project, a waste coal fired electric generating facility in Pennsylvania. Because all of our operating revenue currently results from the Scrubgrass Project, we are dependent on its successful and continued operation. Significant unscheduled shutdowns or large increases in interest rates at Scrubgrass could reduce our cash flow. This may necessitate a substantial curtailment of our operations and require the termination of any anaerobic digester projects and would have an adverse effect on our results of operations.

4

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

We do not control the management of the Scrubgrass project, our primary revenue generating asset.

We have a management services agreement with PG&E National Energy Group to manage our Scrubgrass project and a 15-year operations and maintenance agreement with PG&E Operating Services Company to operate the facility. Under the terms of these agreements, there are provisions that limit our participation in the management and operation of our Scrubgrass project. Because we do not exercise control over the operation or management of our Scrubgrass project, decisions may be made, notwithstanding our opposition, that may have an adverse effect on our business.

Our current power generation revenue is derived from only one customer, the loss of which would severely harm our financial condition and the value of your investment

Our current Scrubgrass project power generation revenue is earned under a long-term power purchase agreement with one customer, Pennsylvania Electric Company, or Penelec. We expect that the concentration of our revenue with this customer will continue for the foreseeable future. If this customer goes out of business or defaults on its payments to us, our financial condition will be adversely affected.

A large increase in interest rates may adversely affect our operating results.

Our Buzzard subsidiary is leveraged with variable rate and fixed rate debt obligations. Should market interest rates rise significantly, our operating results will be adversely impacted.

Our long term Scrubgrass project power purchase agreement is subject to market conditions in its later years which may affect our profitability.

Our Scrubgrass project generates electricity that is sold at rates established under a long-term power purchase agreement with Penelec, approved by the Pennsylvania Public Utility Commission. Contracted rates in the later years of the agreement are determined with reference to then existing market conditions. Therefore, low wholesale energy rates during the later years of the power purchase agreement would negatively impact our profitability and could affect our financial position.

Payment terms on our Scrubgrass project will change in 2003 and, if our working capital is not increased to satisfy the change, our cash available for other uses will be significantly limited.

In 2003, the payment schedule on our power purchase agreement will be modified to allow Penelec more time to pay us for the power that we produce. This will reduce our working capital and could limit our ability to service our debt or allocate resources to other projects.

Our technology for generating power from waste coal at our Scrubgrass project is relatively new and unproven and its effectiveness and efficiency cannot be anticipated.

Our Scrubgrass project employs circulating fluidized bed technology to produce electricity. Certain aspects of this technology, as well as the conversion of waste products into electricity, are relatively new concepts and have only been in existence in the United State over approximately the last 20 years. In addition, the long-term costs and implications of maintaining this

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

technology have not been established by historical industry data. Accordingly, this technology carries greater risk of failure than proven power generation technologies with more established histories.

We are a small company and the entrance of large companies into the alternative fuels and renewable energy business will likely harm our business.

Competition in the traditional energy business from electric utilities and other energy companies is well established with many substantial entities having multi-billion dollar multinational operations. Competition in the alternative fuels and renewable energy business is expanding with growth of the industry and advent of many new technologies. Larger companies, due to their better capitalization, will be better positioned to develop new technologies and to install existing or more advanced renewable energy generators, which could harm our market share and business.

If we are unable to obtain sufficient waste resources our renewable energy technologies will not likely operate profitably.

The performance of our renewable energy technologies is dependent on the availability of certain waste resources to produce the raw energy and meet performance standards in the generation of power or fuel. Lack of these waste resources or adverse changes in the nature or quality of such waste resources would seriously affect our ability to develop and finance projects and to efficiently operate and generate income. In such circumstances, our revenue and financial condition will be materially and negatively affected. We cannot be sure that waste resources, will be available in the future for free or at a price that make them affordable for our waste to energy technologies.

Our reliance on licenses, agreements and business alliances links our fate to the fate of these businesses, of which we cannot predict or control.

We intend to rely on a network of various licenses, agreements and alliances with other businesses to provide important technologies and services for our businesses. Specifically, we rely on third party companies for the operation and maintenance of our Scrubgrass project and for the technology upon which we base our proposed anaerobic digester projects. The termination of any of these or other material license, agreement or business alliance will have a detrimental impact on the success of one or all projects or categories of projects and negatively impact our revenue. We cannot predict or control the fate of these other businesses on which we rely.

6

Because we have not filed patents to protect Microgy's intellectual property, we might not be able to prevent others from employing competing products. Conversely, others who have filed for patent or other protection might be able to prevent us from employing our products.

Neither we nor, it is believed, our primary licensor have filed any patent applications on the intellectual property Microgy plans to use. Should we or our primary licensor decide to file patent applications, there can be no assurance that any patent applications relating to our existing or future products or technologies will result in patents being issued, that any issued patents will afford adequate protection to us, or that such patents will not be challenged, invalidated, infringed or circumvented. Furthermore, there can be no assurance that others have not developed, or will not develop, similar products or technologies that will compete with our products without infringing upon, or which do not infringe upon, our intellectual property rights.

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

Third parties, including potential competitors, may already have filed patent applications relating to the subject matter of our current or future products. In the event that any such patents are issued to such parties, such patents may preclude our licensors from obtaining patent protection for their technologies, products or processes. In addition, such patents may hinder or prevent us from commercializing our products and could require us to enter into licenses with such parties. There can be no assurance that any required licenses would be available to us on acceptable terms, or at all.

We rely heavily on confidentiality agreements and licensing agreements to maintain the proprietary nature of our base of technologies relating to currently licensed technologies. To compete effectively, we may have to defend the rights to our intellectual property from time to time. The defense costs can be significant. As such, we may lack the financial resources to adequately defend our intellectual property.

Our license for microturbine technology is from a small company that has not completed the development of the technology and is therefore of an uncertain value.

Our Microgy subsidiary has entered into a license agreement for applications of microturbine technology which is owned and being developed by Electric Power International, Inc., which itself is a small company with limited resources. Electric Power International has not yet completed development of the microturbine technology and may not have the resources available to do so. As a result, the value of this license agreement is of uncertain value.

The large amount of obstacles necessary to overcome for the development of power projects increases the possibility that such projects will incur costly delays.

In our development of power projects for ourselves or on behalf of our customers, we will be required to enter into or obtain some or all of the following:

7

- . site agreements;
- . supply contracts;
- . design/build or other construction related agreements;
- . power sales contracts;
- . various co-product sales agreements;
- . waste disposal agreements;
- . licenses;
- . environmental and other permits;
- . local government approvals; and
- . financing commitments required for the successful completion of development projects.

Our failure to accomplish any of these objectives could materially increase the cost or prevent the successful completion of development projects and incur the loss of any investment made. These events could adversely affect our business and results of operations and the value of your investment.

System failure of our power generation projects will reduce our revenue.

Whether we have sold our facilities to customers or continue to own them, our revenue and our performance under various agreements will depend on the efficient and uninterrupted operation of our bioenergy plants and systems, including automated control systems. Any system failure that causes

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

interruptions in our operations could have a material adverse effect on our business, results of operations and financial condition. As we expand our operations, there will be increased stress placed upon hardware and information traffic management systems. There can be no assurance that we will not experience system failures. In addition, our systems and operations are vulnerable to damage or interruption from fire, flood, power loss, telecommunications failure, break-ins and similar events. Our systems and operations will also face contamination due to the actions of farmers and others who may have access to our sites. We do not presently have redundant systems or a formal disaster recovery plan to mitigate the risk of losses that may occur. There can also be no assurance that any business interruption or property and casualty insurance that we would carry in the future would be sufficient to compensate for any losses that may occur.

Scheduled and unscheduled shutdowns of our power generation projects will reduce our revenue.

Our Scrubgrass Project and any future power generation projects we develop will experience both scheduled and unscheduled shutdowns. Periodically, power generation projects incur scheduled shutdowns in order to perform maintenance procedures to equipment that cannot be performed while the equipment is operating. Occasionally, our power generation projects may also incur unscheduled shutdowns and be required to temporarily cease operation or to

8

operate at reduced capacity levels following the detection of equipment malfunctions, or following minimum generation orders received by the utility. During periods when these projects shutdown or are operating at reduced capacity levels, we may incur losses due to reduced operating revenue and due to additional costs that may be required to complete any maintenance procedures.

Our power generation activities expose us to significant liability that our insurance cannot cover.

Our power generation activities involve significant risks to us for environmental damage, equipment damage and failures, personal injury and fines and costs imposed by regulatory agencies. In the event a liability claim is made against us, or if there is an extended outage or equipment failure or damage at our power plant for which it is inadequately insured or subject to a coverage exclusion, and we are unable to defend such claim successfully or obtain indemnification or warranty recoveries, there may be a material adverse effect on our financial condition.

Poor fuel and other materials quality will expose us to environmental liability and reduce our operating results.

For our Scrubgrass project, we obtain waste coal primarily from coal mining companies on a long-term basis because waste coal is plentiful and generally creates environmental hazards, such as acid drainage, when not disposed of properly. The waste coal is burned in the Scrubgrass project using a circulating fluidized bed combustion system. During the circulating fluidized bed combustion process, the waste coal is treated with other substances such as limestone. Depending on the quality of the waste coal and the limestone, the facility operator may need to add additional waste coal or other substances to create the appropriate balance of substances which would result in the best fuel or sorbent consistency for power generation and compliance with air quality standards. Therefore, the cost of generating power is directly impacted by the quality of the waste coal which supplies the Scrubgrass project. Certain

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

conditions, such as poor weather, can create situations where the facility operator has less control over the quality of the waste coal. Poor fuel quality may impact our future operating results.

The composition of effluents from our anaerobic digester facilities is not certain and may expose us to liability.

We do not have experience in blending the wastes that will occur in our anaerobic digester facilities. Such blends could result in unpredictable regulatory compliance costs, related liabilities and unwanted materials in waste effluents and coproducts, all of which could harm our financial condition.

9

Our sale of power into unregulated and retail markets will likely subject our revenue to large swings or a prolonged depression of prices.

Electricity is a commodity available from a large amount of sources with no pricing control. When we sell power under long term supply contracts or into the unregulated wholesale and retail markets, we will be subject to very competitive pricing pressures and market risks. Low energy rates would negatively impact our profitability and could adversely affect our financial condition.

Our products and services involve long sales cycles that result in high costs and uncertainty.

The negotiation of the large number of agreements necessary to sell, develop, install, operate and manage any of our facilities, as well as to market the energy and other co-products and to provide necessary related resources and services, involves a long sales cycle and decision-making process. Delays in the parties' decision-making process are outside of our control and may have a negative impact on our cost of sales, receipt of revenue and sales projections. We estimate that it can take from six months to a year or more to obtain decisions and to negotiate and close these complex agreements.

Because the market for renewable energy and waste management is unproven, it is possible that we may expend large sums of money to bring our offering to market and the revenue that we derive may be insufficient to fund our operations.

Our business approach to the renewable energy and waste management industry may not produce results as anticipated, be profitable or be readily accepted by the marketplace. We cannot estimate whether demand for our bio-energy products will materialize at anticipated prices, or whether satisfactory profit margins will be achieved. If such pricing levels are not achieved or sustained, or if our technologies and business approach to the energy industry do not achieve or sustain broad market acceptance, our business, operating results and financial condition will be materially and negatively impacted.

If we violate performance guarantees granted to Penelec we will be required to provide them with an incentive payment.

Our agreement for the sale of power to Penelec contains a provision that requires our Scrubgrass project to provide Penelec a certain percentage of its average output over a given period of time. If we do not comply with this performance guarantee, we will be required to compensate Penelec with an incentive payment. The payment of an incentive payment would have an adverse effect on our financial condition.

Our products and services will be subject to numerous governmental regulations.

We expect to provide services involving government regulation, which will subject us to certain regulatory policies and procedures. Compliance with these regulations could be costly and harm our financial condition. Many of these regulations cover air and water quality and related pollution issues. These regulations are mandated by the United States Environmental Protection Agency and various state and local governments. More specifically, our activities in anaerobic digestion and/or nutrient management related to animal manure, and other wastes, as well as the air emissions and waste effluent control from our facilities will involve a permitting process and other forms of scrutiny from these agencies. In addition, our activities will fall under a number of health and safety regulations and laws and regulations relating to farms and zoning.

Our power producing activities could be subject to costly regulations and tariffs.

Our Scrubgrass project and many of our planned bio-energy projects may or do produce power for sale to the electric grid. As such, the sale of this power may come under the regulations of various state public utility commissions. These commissions set the price tariffs under which energy can be sold or purchased and they set the design standards for the interconnection of power producing equipment with the electric power grid. Most of our power projects where electricity is sold to the grid will come under regulation by these commissions. These regulations may impede or delay the process of approving and implementing our projects. Substantial delays may materially affect our financial condition.

Government regulations can be burdensome and may result in delays and expense. In addition, modifications to regulations could adversely affect our ability to sell power or to implement our chosen strategy for the sale of power. Subsequent changes in the applicable regulations could also affect our ability to sell or install new facilities or develop and install facilities in an efficient manner or at all. Failure to comply with applicable regulatory requirements can result in, among other things, operating restrictions and fines which could harm our financial condition.

We depend on a small number of key executives and our business could suffer if they were to leave.

We employ a small group of skilled individuals to accomplish our goals. We believe our performance is substantially dependent on the continued employment and performance of our senior management. Many of these individuals are not currently subject to employment agreements or employee non-compete agreements. If we fail to retain the services of one or more of these persons, our business could suffer significantly. We do not maintain key-man insurance on the life of any of our officers at this time.

Our plans to enter into the anaerobic digester market will require the retention of skilled employees and contractors, the success of which cannot be assured.

In order for us to enter into the anaerobic digester market we will be

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

required to hire and retain highly skilled employees and independent contractors. It is anticipated that such persons will be difficult to locate and engage. If we are not successful in hiring and retaining qualified persons, our entrance into the anaerobic digester market will not likely be successful and the value of your investment will be impaired.

Lack of trading market may make it difficult for you to sell our common stock.

The trading of our common stock is conducted on the OTC Bulletin Board trading market. Trading activity in our common stock has fluctuated and has at times been limited. We cannot guarantee that a consistently active trading market will develop in the future, especially while we remain on the OTC Bulletin Board. A holder of the common stock may find it difficult to dispose of or to obtain accurate quotations as to the market value of our common stock. Our common stock is defined as a "penny stock" by rules adopted by the Securities and Exchange Commission. Brokers and dealers affecting transactions in our common stock in many circumstances must obtain the written consent of a customer prior to purchasing our common stock, must obtain information from the customer and must provide disclosures to the customer. These requirements may have the effect of reducing the level of trading of our common stock and reduce the liquidity of your investment.

We have numerous outstanding options and warrants which may adversely affect the price of our common stock.

As of December 31, 2001, we had outstanding options and warrants to acquire up to approximately 1,542,499 shares of our common stock at prices ranging from \$0.43 to \$3.08 per share. For the term of such options and warrants, the holders thereof will have an opportunity to profit from a rise in the market price of our common stock without assuming the risk of ownership. This may have an adverse affect on the price of our common stock and on the terms upon which we could obtain additional capital. It should be expected that the holders of such options and warrants would exercise them at a time when we would be able to obtain equity capital on terms more favorable than those provided by the options and warrants.

12

The issuance of preferred stock may adversely affect the price of our common stock which could cause a reduction in the value of your investment.

We are authorized to issue two million shares of preferred stock. The preferred stock may be issued in series from time to time with such designations, rights, preferences and limitations as our Board of Directors may determine by resolution without shareholder approval. No shares of preferred stock are currently outstanding and our directors have no current intention to issue any new shares of preferred stock. However, the potential exists that preferred stock might be issued which would grant dividend and liquidation preferences over our common stock, diminishing the value of our common stock.

A significant sale of our outstanding restricted common stock into the market could reduce the value of your investment.

A significant portion of our outstanding shares of common stock is restricted from immediate resale but may be sold into the market in the near future pursuant to this prospectus. This could cause the market price of our common stock to drop significantly, even if our business is doing well. Any reduction in the market price of our common stock would reduce the value of your investment.

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

Management and directors will continue to control our management and affairs.

Assuming that no member of our management sells his shares in this offering, management and directors will beneficially own approximately 70% of our outstanding common stock. Consequently, such persons, as a group, may be able to control the outcome of matters submitted for stockholder action including the election of members to our board of directors and the approval of significant change in control transactions. In addition, as a part of our acquisition of Microgy we entered into a stockholder's agreement with the principal former Microgy shareholders, Joseph E. Cresci and Donald A. Livingston, in which it was agreed that such parties will vote their shares through June 30, 2003 to cause the five existing directors (or replacements designated by Messrs. Cresci and Livingston) to be elected to five out of eight director positions and persons designated by Microgy's former principal shareholders to be elected to three out of our eight director positions. This may have the effect of delaying or preventing a change in control.

An active market for the common stock may not develop and the price for our common stock may be volatile.

Prior to this offering our common stock was not traded in high volumes. An active or liquid trading market in our common stock may not develop upon completion of this offering, or, if it does develop, it may not continue.

The market price for our common stock could be subject to significant fluctuations in response to variations in quarterly operating results, announcements of technological innovations or new projects and products by us or our competitors, or our failure to achieve operating results consistent with any securities analysts' projections of our performance.

The stock market has experienced extreme price and volume fluctuations and volatility that have particularly affected the market price of many emerging growth and development stage companies. Such fluctuations and volatility have often been unrelated or disproportionate to the operating performance of such companies.

13

We do not intend to pay dividends and you may not receive a return on investment without selling shares.

Since we are utilizing available cash for working capital purposes, including developing Microgy's business, we do not anticipate paying any cash dividends on our common stock in the foreseeable future. Therefore, you will not receive a return on our investment in our common stock without selling your shares since we currently intend to retain future earnings to fund our growth rather than paying dividends.

CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

Some of the statements contained in this prospectus under "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Business" are forward looking. They include statements that involve risks and uncertainties that might adversely affect our operating results in the future in a material way. Such risks and uncertainties include:

- . the ability to integrate and manage an acquired business;

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

- . volatile and unpredictable plant outages and repair requirements;
- . the unpredictability of the timing and loss of construction;
- . general economic and industry conditions;
- . government and regulatory policy fluctuations;
- . increases in marketing and sales costs;
- . intensity of competition for customers;
- . the stability of the bio-energy market; and
- . availability and cost of financing.

Most of these risks are beyond our control. Actual results may differ materially from those suggested by the forward looking statements for various reasons, including those discussed under "Risk Factors."

14

USE OF PROCEEDS

We intend to use the net proceeds from the exercise of the options and warrants for working capital. It is uncertain when, if ever, we will receive proceeds from exercise of the options and warrants.

- . If all of the options to purchase common stock being registered are exercised, we will receive proceeds of \$435,293. Such options were issued in exchange for Microgy options.
- . If all of the warrants to purchase common stock being registered are exercised, we will receive proceeds of \$1,285,729. Such warrants, issued in exchange for Microgy warrants, are exercisable through September 30, 2002.

SELLING SHAREHOLDERS

The following tables set forth certain information regarding the shares of common stock owned as of December 31, 2001, by each selling shareholder as adjusted to reflect the assumed sale by all selling shareholders of the shares of common stock offered in this prospectus. The tables indicate:

- . any position, office or other material relationship with us that the selling shareholder had within the past three years;
- . our estimate, assuming no gifts, pledges or sales pursuant to Rule 144, of the number of shares of common stock owned by such selling shareholder prior to the offering; and
- . the maximum number of shares of common stock to be offered for such selling shareholder's account and the amount and the percentage (if one percent or more and calculated as if the selling security holder were the sole seller of shares pursuant to this prospectus) of the shares of common stock to be owned by the selling shareholder after completion of the offering (assuming the selling shareholder sells the maximum number of shares of common stock).

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

The selling shareholders are not required, and may choose not, to sell any of their shares of common stock. Further, certain of the selling shareholders may have already sold their shares of common stock prior to the date of this prospectus.

PLAN OF DISTRIBUTION

We are registering the shares of common stock on behalf of the selling

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

shareholders as required by a July 23, 2001 Registration Rights Agreement. Selling shareholders include donees and pledgees selling shares of common stock received from a named selling shareholder after the date of this prospectus. Pursuant to such Registration Rights Agreement, all costs, expenses and fees in connection with the registration of the shares of common stock offered hereby will be borne by us. In addition, the selling shareholders may be entitled to indemnification against certain liabilities pursuant to the Registration Rights Agreement. Brokerage commissions and similar selling expenses attributable to the sale of shares of common stock will be borne by the selling shareholders. Sales of shares of common stock may be effected by selling shareholders in one or more types of transactions (which may include block transactions), in the over-the-counter market, in negotiated transactions, through put or call option transactions relating to the shares of common stock, through short sales of shares of common stock, or a combination of such methods of sale, at market prices prevailing at the time of sale, or at negotiated prices. Such transactions may or may not involve brokers or dealers. We have not been advised by the selling shareholders that they have entered into any agreements, understandings or arrangements with any underwriters or broker-dealers regarding the sale of their shares of common stock, nor that there is an underwriter or coordinating broker acting in connection with the proposed sale of shares of common stock by the selling shareholders.

The selling shareholders may effect such transactions by selling shares of common stock directly to purchasers or to or through broker-dealers, which may act as agents or principals. Such broker-dealers may receive compensation in the form of discounts, concessions, or commissions from the selling shareholders and/or the purchasers of shares of common stock for whom such broker-dealers may act as agents or to whom they sell as principal, or both (which compensation as to a particular broker-dealer might be in excess of customary commissions).

The selling shareholders and any broker-dealers that act in connection with the sale of shares of common stock might be deemed to be "underwriters" within the meaning of Section 2(11) of the Securities Act of 1933, and any commissions received by such broker-dealers and any profit on the resale of the shares of common stock sold by them while acting as principals might be deemed to be underwriting discounts or commissions under the Securities Act of 1933. Such arrangement may necessitate a filing with the NASD pursuant to Notice to Members 88-101. The selling shareholders may agree to indemnify any agent, dealer or broker-dealer that participates in transactions involving sales of the shares of common stock against certain liabilities, including liabilities arising under the Securities Act of 1933.

Because selling shareholders may be deemed to be "underwriters" within the meaning of Section 2(11) of the Securities Act of 1933, the selling shareholders will be subject to the prospectus delivery requirements of the Securities Act of 1933.

The selling security holder and any other persons participating in the sale or distribution of the shares will be subject to applicable provisions of the Securities Exchange Act of 1934, as amended, and the rules and regulations under such act, including, without limitation, Regulation M. These provisions may restrict certain activities of, and limit the timing of purchases and sales of any of the shares by, the selling security holder. Furthermore, under Regulation M, persons engaged in a distribution of securities are prohibited from simultaneously engaging in market making and certain other activities with respect to such securities for a specified period of time prior to the commencement of such distributions, subject to specified exceptions or exemptions. All of these limitations may affect the marketability of the shares.

Selling shareholders also may resell all or a portion of the shares of common stock in transactions in reliance upon Rule 144 or Regulation S under the Securities Act of 1933, provided they meet the criteria and conform to the requirements of such Rule or Regulation.

Upon us being notified by a selling shareholder that any material arrangement has been entered into with a broker-dealer for the sale of shares of common stock through a block trade, special offering, exchange distribution or secondary distribution or a purchase by a broker or dealer, a supplement to this prospectus will be filed, if required, pursuant to Rule 424(b) under the Securities Act of 1933, disclosing:

- . the name of each such selling shareholder and of the participating broker-dealer(s);
- . the number of shares of common stock involved;
- . the price at which such shares of common stock are being sold;
- . the commissions paid or discounts or concessions allowed to such broker-dealer(s), where applicable;
- . that such broker-dealer(s) did or did not conduct any investigation to verify the information set out or incorporated by reference in this prospectus; and
- . other facts material to the transaction.

In addition, upon us being notified by a selling shareholder that a donee or pledgee intends to sell more than 500 shares of common stock, we will file a supplement to this prospectus.

DESCRIPTION OF SECURITIES

Our authorized capital stock currently consists of 50,000,000 shares of common stock and 2,000,000 shares of preferred stock. Of the 2,000,000 shares of preferred stock, 30,000 shares have been designated as Series A Convertible Preferred Stock and 250,000 shares have been designated as Series B Convertible Preferred Stock. We may issue the preferred stock in one or more series as determined by the board of directors. As of March 27, 2002, there were 21,370,293 shares of common stock issued and 20,251,653 shares of common stock outstanding that were held of record by approximately 251 persons. As of March 27, 2002, no shares of Series A Convertible Preferred Stock or Series B Convertible Preferred Stock were outstanding.

COMMON STOCK

Each holder of record of common stock is entitled to one vote for each share held on all matters properly submitted to the stockholders for their vote. Cumulative voting in the election of directors is not authorized.

Holders of outstanding shares of common stock are entitled to those dividends declared by the board of directors out of legally available funds, and, in the event of liquidation, dissolution or winding up of our affairs, holders are entitled to receive ratably our net assets available to the stockholders. Holders of outstanding shares of common stock have no preemptive, conversion or redemption rights. All of the issued and outstanding shares of common stock are, and all unissued common stock, when offered and sold will be, duly authorized, validly issued, fully paid and nonassessable. To the extent

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

that additional common stock of ours may be issued in the future, the relative interests of the then existing stockholders may be diluted.

TRANSFER AGENT AND REGISTRAR

American Stock Transfer and Trust Company serves as the transfer agent and registrar for our common stock.

INDEMNIFICATION

Section 145 of the Delaware General Corporation Law permits us to indemnify, under certain circumstances, any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative for expenses related to such proceeding if the person acted in good faith and in a manner the person reasonable believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that the person's conduct was unlawful. Our bylaws substantively provide that we will indemnify such persons to the fullest extent allowed by the Delaware General Corporation Law.

DOCUMENTS INCORPORATED BY REFERENCE

We "incorporate by reference" into this prospectus the information in documents we file with the Securities and Exchange Commission, which means that we can disclose important information to you through these documents. The information incorporated by reference is an important part of this prospectus. Some information contained in this prospectus updates the information incorporated by reference and some information that we file subsequently with the Securities and Exchange Commission will automatically update this prospectus. We incorporate by reference the document listed below which has been filed as an exhibit with the registration statement to which this prospectus is a part:

- . our Annual Report on Form 10-K for the year ended December 31, 2001.

You may request, and we will provide, a copy of these filings at no cost by writing or calling William D. Linehan, Acting Chief Financial Officer, at One Cate Street, Fourth Floor, Portsmouth, New Hampshire 03801, (603) 431-1780.

25

WHERE CAN YOU FIND ADDITIONAL INFORMATION

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended, and we file reports, proxy statements and other information with the Securities and Exchange Commission. You may read and copy any document we file with the Securities and Exchange Commission at the public reference facilities maintained by the Securities and Exchange Commission at 450 Fifth Street, N.W., Washington, D.C. 20549. Our filings with the Securities and Exchange Commission are available to the public from the Securities and Exchange Commission's website at <http://www.sec.gov>. Please call the Securities and Exchange Commission at 1-800-SEC-0330 for further information.

We have filed with the Securities and Exchange Commission a registration statement on Form S-2 of which this prospectus is a part, under the Securities Act of 1933, as amended, for the common stock offered in this

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

prospectus. This prospectus does not contain all of the information set forth in the registration statement. Certain documents filed by us with the Securities and Exchange Commission have been incorporated in this prospectus by reference, see the section "Documents Incorporated by Reference." For further information about us and the common stock to be issued by us upon conversion of the options and warrants, please review the registration statement, including the exhibits and the documents incorporated by reference. The registration statement may be inspected for free at the principal office of the Securities and Exchange Commission in Washington, D.C., and copies of all or part of it may be obtained from the Securities and Exchange Commission by paying the prescribed fees.

LEGAL MATTERS

The validity of the common stock offered in this prospectus has been passed upon for us by Dorsey & Whitney LLP, New York, New York.

EXPERTS

The financial statements and the related financial statement schedule incorporated in this prospectus by reference from our Annual Report on Form 10-K have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated herein by reference, and have been so included in reliance upon the report of such firm given their authority as experts in accounting and auditing.

Microgy's financial statements as of June 30, 2001 and 2000, for the years ended June 30, 2001 and 2000, and for the period from March 25, 1999 (inception) through June 30, 2001, included in this prospectus have been audited by Ernst & Young LLP, independent auditors, as stated in their report appearing herein and elsewhere in the registration statement and are included in reliance upon such given on the authority of such firm as experts in accounting and auditing.

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

NOTES TO UNAUDITED PRO FORMA COMBINED CONDENSED FINANCIAL STATEMENTS

NOTE A -- BASIS OF PRESENTATION

During 2001, Environmental Power Corporation (individually "EPC" or consolidated "the Company") acquired 100% of the common stock of Microgy in two related transactions. On July 23, 2001, the Company exchanged approximately 87.7% of the outstanding common stock of Microgy for securities of the Company pursuant to a Share Exchange Agreement (the "Exchange Agreement") dated as of June 20, 2001 among the Company, Microgy and certain principal Microgy shareholders. Under the terms of the Exchange Agreement, the Company also committed to offer the remaining Microgy shareholders the opportunity to exchange their Microgy securities for the Company's securities. On December 28, 2001, the Company completed the exchange of its securities for the remaining outstanding securities of Microgy.

Transaction Details

On July 23, 2001, the Company issued an aggregate of 5,521,549 shares of common stock and 197,760.7 shares of newly designated Series B Convertible Preferred Stock to certain principal stockholders of Microgy in exchange for 15,919,147 shares of Microgy common stock. Each share of preferred stock, which voted with the common stock on an as-converted basis, was automatically converted into ten shares of common stock as of November 9, 2001 upon an increase in the authorized common stock to an amount sufficient to allow conversion of the preferred stock. The exchange ratio of 0.4711 shares of the Company's common stock for each share of Microgy common stock was determined by negotiations among the Company, Microgy and the primary principal Microgy shareholders. The exchange ratio is based on all of the fully diluted equity of Microgy being exchanged for 45% of the Company's fully diluted equity and assumes exercise or conversion of all derivative securities. The exchange ratio may be increased to reflect certain issuances of equity by the Company to generate funds to be available for financing Microgy. However, holders of approximately 94% of the Microgy common stock agreed to waive their right to adjustments in the exchange ratio, other than any adjustment resulting from 400,000 options and warrants issued in September 2001. One of the principal Microgy shareholders exchanged a warrant to purchase 800,000 shares of Microgy common stock for a warrant to purchase the Company's securities based on the exchange ratio. In connection with the issuance of 400,000 options and warrants in September 2001, the Company adjusted the exchange ratio to 0.4873 shares of the Company's common stock for each share of Microgy common stock. The Company then issued 258,884 additional shares of common stock to the principal Microgy shareholders on December 28, 2001 and amended the warrant issued to the principal Microgy shareholder to reflect the new exchange ratio.

On October 17, 2001, the Company offered the remaining security holders of Microgy, who owned an aggregate of 2,230,126 shares of Microgy common stock, warrants to purchase 885,000 shares of Microgy common stock and options to purchase 290,000 shares of Microgy common stock, an opportunity to exchange their securities of Microgy for the Company's securities based on the adjusted exchange ratio. On December 28, 2001, the Company issued 1,086,830 shares of its common stock and exchanged warrants to purchase 431,298 shares of its common stock and options to purchase 141,329 shares of its common stock for the remaining Microgy securities.

Solely for purposes of this presentation, the unaudited combined condensed statement of operations has been prepared as if Microgy were combined with EPC and its other subsidiaries into one reporting entity. The purchase price paid by EPC for Microgy's net assets has been pushed down to the Microgy subsidiary. The portion of the purchase price not allocated to tangible or intangible

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

assets or liabilities has been recorded as goodwill (See Note B).

The accompanying unaudited pro forma combined condensed statement of operations of the Company has been prepared in accordance with the instructions to Form S-2 and Regulation S-X and does not include all of the information and footnotes required by generally accepted accounting principles for annual financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2001.

F-2

NOTE B - PURCHASE PRICE

For purposes of the unaudited pro forma combined condensed statement of operations, the purchase price for the outstanding common stock of Microgy was calculated as follows:

	Number Of Shares	Fair Value	
Common stock issued	8,844,870	\$6,837,084	
Common stock options	141,329	11,967	
Common stock warrants	821,170	43,730	
Direct acquisition costs		450,747	
Total purchase price	9,807,369	\$7,343,528	

The fair value of common stock issued was determined by multiplying the number of shares by the average closing market price of EPC's common stock from June 18, 2001 through June 27, 2001.

The fair value of the common stock options and warrants were determined using an option pricing model with the following assumptions:

	50,000 Microgy Options	240,000 Microgy Options	800,000 Microgy Warrants	885,000 Microgy Warrants
Calculated fair value	\$ 0	\$ 11,967	\$ 41,451	\$ 2,279
Options/Warrants for EPC common shares	24,367	116,962	389,872	431,298
Exercise price per share (EPC share basis)	\$ 3.08	\$ 3.08	\$ 1.03	\$ 2.05
Dividend yield	0%	0%	0%	0%
Risk free rate of return	1.711%	4.336%	2.182%	1.811%
Expected useful life	3 months	4.75 years	1 year	9 months
Expected stock volatility rate	88.04%	88.04%	72.28%	88.04%

NOTE C -- GOODWILL

For purposes of the unaudited pro forma combined condensed statement of

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

operations, the Company has allocated the excess of the purchase price over the fair value of net tangible and identifiable intangible assets as of July 23, 2001 to goodwill. Goodwill was determined as follows:

Total purchase price of Microgy	\$ 7,343,528
Fair value of licensed technology rights	(3,710,000)
Fair value of net operating loss carryforwards	(538,000)
Fair value of deferred income tax liability	1,374,770
Fair value of the net tangible assets acquired:	
100% of the negative historical book value of Microgy	442,568

Goodwill	\$ 4,912,866
	=====

Amortization of goodwill has not been included in the unaudited pro forma combined condensed statement of operations pursuant to Statement of Financial Accounting Standards ("SFAS") No. 142 "Goodwill and Other Intangible Assets".

NOTE D - LICENSED TECHNOLOGY RIGHTS

Licensed technology rights are recorded at cost and are being amortized using the straight-line method over a useful life of 20 years. The Company reported amortization of licensed technology rights of \$185,500 in its unaudited pro forma combined condensed statements of operations for the year ended December 31, 2001.

F-3

NOTE E - INCOME TAXES

Microgy is a development stage company which currently does not incur income tax expense on a standalone basis because of its net operating losses. For purposes of the unaudited pro forma combined condensed statement of operations, the Company has reported an income tax benefit from Microgy's loss before income taxes. This amount represents the Company's estimated savings of Federal and certain state income taxes from including Microgy's operations in a combined tax return.

NOTE F - EARNINGS PER COMMON SHARE

The Company computes its earnings per common share using the treasury stock method in accordance with SFAS No. 128, "Earnings per Share". The Company computes basic earnings per share by dividing net income for the period by the weighted average number of shares of common stock outstanding during the period. For purposes of calculating diluted earnings per share, the Company considers its shares issuable in connection with stock options to be dilutive common stock equivalents when the exercise price is less than the average market price of the Company's common stock for the period. The Company excludes antidilutive common stock equivalents from the calculation of diluted earnings per share. The following table outlines the calculation of proforma combined basic earnings per share and diluted earnings per share for the year ended December 31, 2001.

Income	Shares
(Numerator)	(Denominator)

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

Year Ended December 31, 2001:

Income available to shareholders	\$ 1,131,696	20,251,653
Effect of dividends to preferred stockholders	(5,000)	
Basic EPS - income available to common shareholders	1,126,696	20,251,653
Effect of dilutive securities:		
Assumed exercise of dilutive stock options		16,318
Diluted EPS - income available to common shareholders	\$ 1,126,696	20,267,971

The Company did not include in the computation of diluted EPS antidilutive options and warrants to purchase 1,442,499 shares of the Company's common stock as of December 31, 2001. The options and warrants expire at various dates through 2011.

F-4

Report of Independent Auditors

Board of Directors
Microgy Cogeneration Systems, Inc.

We have audited the accompanying balance sheets of Microgy Cogeneration Systems, Inc. (a development stage company) as of June 30, 2001 and 2000 and the related statements of operations, changes in stockholders' equity (deficit), and cash flows for the years ended June 30, 2001 and 2000 and the period from March 25, 1999 (inception) through June 30, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Microgy Cogeneration Systems, Inc. at June 30, 2001 and 2000, and the results of its operations and its cash flows for the years ended June 30, 2001 and 2000 and the period from March 25, 1999 (inception) through June 30, 2001 in conformity with accounting principles generally accepted in the United States.

F-9

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements

June 30, 2001

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ORGANIZATION AND DEVELOPMENT STAGE ACTIVITY

Microgy Cogeneration Systems, Inc. (the "Company") was incorporated in Colorado on March 25, 1999, and is in the development stage as of June 30, 2001. The Company is an alternative energy company developing renewable energy projects through proprietary technologies and systems. The initial proposed projects are biopower facilities intended to process agricultural and organic wastes into renewable energy and fuels through Company systems using proprietary technologies.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash on hand at the balance sheet date.

PROPERTY AND EQUIPMENT

Property and equipment, consisting primarily of computer equipment and furniture and fixtures, is stated at cost. Depreciation is computed over the estimated useful lives of the assets, which range from three to seven years.

CASH FLOW REPORTING

The Company issued common stock valued at \$83,407 during the year ended June 30, 2001 to purchase preferred shares in an associated entity. The investment

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

was fully reserved for as of June 30, 2001.

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

F-10

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

COMMON STOCK SUBSCRIPTIONS RECEIVABLE

Common stock subscriptions receivable represent amounts due from stockholders of the Company's common stock at June 30, 2000. All amounts were received by the Company during July 2000.

2. INCOME TAXES

The Company accounts for income taxes in conformity with Financial Accounting Standards Board Statement No. 109, Accounting for Income Taxes. Under the provisions of Financial Accounting Standards Board Statement No. 109, a deferred tax liability or asset (net of a valuation allowance) is provided in the financial statements by applying the provisions of applicable tax laws to measure the deferred tax consequences of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. These temporary differences will result in net taxable or deductible amounts in future years as a result of events recognized in the financial statements in the current or preceding years.

The Tax Reform Act of 1986 contains provisions that limit the utilization of net operating loss and tax credit carryforwards if there has been a "change in ownership" as described in Section 382 of the Internal Revenue Code. Such a change of ownership may limit the Company's utilization of its net operating loss and tax credit carryforwards, and could be triggered by an initial public offering or subsequent sales of securities by the Company or its stockholders.

Significant components of the Company's deferred tax accounts are as follows:

	June 30,	
	2001	2000
Deferred tax assets:		
Net operating loss carryforwards	\$511,181	\$200,613
Allowance for doubtful accounts	19,371	9,987
Total deferred tax assets	530,552	210,600
Valuation allowance	(530,552)	(210,600)
Net deferred taxes	\$ -	\$ -

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

At June 30, 2001, the Company had net operating loss carryforwards for income tax purposes of approximately \$1,503,000, which expire through 2020.

F-11

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

3. COMMON STOCK ISSUANCES

During March and June 1999, 8,112,500 shares of common stock were issued to management and founders of the Company for an aggregate of \$8,113, or \$0.001, per share.

In August 1999, the Company sold 5,937,500 shares for an aggregate of \$250,000 or \$0.042 per share.

During January and April of 2000, 1,500,000 shares and 454,000 shares, respectively, were issued to members of management for an aggregate of \$1,500 and \$454, respectively. In connection with both issuances, the Company recorded expense in relation to services of \$104,341.

During June 2000, the Company completed a private placement and raised a total of \$1,047,038 on the issuance of 1,990,815 shares at a price of \$0.54 per share, net of issuance costs of \$28,000.

During July 2000, the Company issued 154,458 shares valued at \$0.54 per share in an exchange for an investment of preferred stock of an associated entity. The investment was fully reserved for as of June 30, 2001.

4. STOCK OPTIONS

Pursuant to the provisions of Financial Accounting Standards Board Statement No. 123, Accounting and Disclosure of Stock-Based Compensation, the Company accounts for its stock compensation arrangements under Accounting Principles Board No. 25, Accounting for Stock Issued to Employees, and related pronouncements. Under the provisions of Accounting Principles Board No. 25, no compensation expense is recognized when stock options are granted with exercise prices equal to or greater than market value on the date of grant.

In June 2000, the Company's Board of Directors and stockholders approved the 2000 Stock Option Plan (the 2000 Plan) pursuant to which a total of 5,000,000 shares of common stock have been reserved for issuance to eligible employees, consultants, and directors of the Company. Awards under the 2000 Plan may consist of incentive stock options, which qualify under Section 422 of the Internal Revenue Code, or nonqualified

F-12

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

4. STOCK OPTIONS (CONTINUED)

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

stock options, which do not qualify under that provision. The 2000 Plan provides for an exercise period of up to six years with the price being equal to the fair market value at the time the option is granted. The 2000 Plan is administered by the Board of Directors, which has the authority to select the individuals to whom awards will be granted and to determine whether and to what extent stock options are to be granted, the numbers of shares of common stock to be covered by each award, the vesting schedule of stock options, and all other terms and conditions of each award. There were 5,000,000 shares of common stock reserved for issuance under the 2000 Plan as of June 30, 2000. No stock options were issued as of June 30, 2000.

On September 18, 2000, the Board of Directors authorized 290,000 options to be issued to employees of the Company with an exercise price of \$1.50 per share. Options to purchase 50,000 shares vest on August 1, 2001. The remaining 240,000 options vest on October 1, 2001. As of June 30, 2001, there were no options exercised or exercisable.

Pro forma information regarding net income and earnings per share is required by Financial Accounting Standards Board Statement No. 123, and has been determined as if the Company had accounted for its employee stock options under the fair value method of that Statement. The fair value for these options was estimated at the date of grant using the minimum value method available to nonpublic companies under Financial Accounting Standards Board Statement No. 123. Under this method, option value is determined as the excess of the fair value of the stock at the date of the grant over the present value of both the exercise price (lump sum) and the expected dividend payments (annuity), each discounted at the risk-free rate, over the expected exercise life of the option. A risk-free interest rate of 5%, a dividend yield of 0%, and a weighted-average expected life of three years were applied.

For purposes of pro forma disclosures, the estimated fair value of the options is amortized to expense over the options' vesting period. The pro forma effect on the Company's net income for the year ended June 30, 2001 is immaterial.

5. PREFERRED STOCK

The Company is authorized to issue up to 25,000,000 shares of nonvoting preferred stock, \$0.001 par value, with the shares to be issued in series by the Board of Directors. The shares of preferred stock may be issued in one or more series with such designations,

F-13

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

5. PREFERRED STOCK (CONTINUED)

rights, preferences, and limitations as the Company's Board of Directors may determine without approval of its stockholders. As of June 30, 2001 and 2000, there were no preferred stock shares issued or outstanding.

6. WARRANTS

In May 1999, the Company issued 885,000 warrants to stockholders of the Company. The shareholder warrants expire in May 2002. Each warrant is exercisable for one share of common stock at a price of \$1.00 per share. The

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

Company has the ability to call the warrants at a price of \$1.20 per common share, or greater under certain conditions.

In December 1999, an employee was issued a warrant to purchase 800,000 shares of common stock at an exercise price of \$0.50 per share through March 2001 and \$1.00 per share through September 2002. On June 8, 2001, the Board of Directors extended the exercise date to May 31, 2002 at \$0.50 per share and to September 30, 2002 at \$1.00 per share. This warrant was exchanged for a warrant in Environmental Power Corporation ("EPC") in connection with the share exchange transaction, which occurred in July 2001 (see Note 11).

7. RELATED-PARTY TRANSACTIONS

During the year ended June 30, 2000, rent and telephone expenses in the amount of \$9,250 were paid to a related party having the same President and Vice President as the Company, who are also stockholders of both entities. Business opportunities relating to anaerobic digestion, microturbines, and heating and cooling technology were purchased for \$25,000 in September 1999 from the same related party and expensed at that time. Advances were also made to that related party under a promissory note related to a secured advance line not to exceed \$250,000. The Company had advanced \$56,974 and \$26,274 as of June 30, 2001 and 2000, respectively. Due to the uncertainty of collection, this amount has been reserved in full. In addition, no interest income related to the note receivable has been recognized by the Company.

During the years ended June 30, 2001 and 2000, the Company paid rent of \$57,554 and \$10,350, respectively, to a related party whose Chairman of its Board of Directors is also the Chairman of the Board of Directors of the Company.

F-14

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

7. RELATED-PARTY TRANSACTIONS (CONTINUED)

On March 30, 2001, the Company executed an unsecured note payable with the Company's Chairman of the Board of Directors for an amount not to exceed \$200,000. The note bears interest at 8% per annum and matures on September 30, 2001. The outstanding balance of the note as of June 30, 2001 is \$177,000. Subsequent to June 30, 2001, the Company settled its obligation in full in relation to the note.

On June 28, 2001, the Company executed an unsecured note payable with EPC (see Note 11) for an amount not to exceed \$100,000. The note bears interest at 8% per annum and is payable on demand. The outstanding balance of the note as of June 30, 2001 is \$26,200. Subsequent to June 30, 2001, the Company executed an additional unsecured note with EPC in an amount not to exceed \$50,000. The note is payable on demand and bears interest at a rate of 8% per annum.

8. POWER CONTRACT

In December 2000, the Company entered into an agreement with a California-based irrigation district that provides water and electric services to its customers located primarily in the California central valley. The agreement calls for the Company to sell up to 15 megawatts of power to the irrigation district once the Company has developed facilities to generate such power. The term of the agreement is ten years from the date of commercial operation of each proposed

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

facility. The facilities would provide renewable energy created by the Company from agricultural wastes located on farms, which are customers of the irrigation district.

9. EUROPEAN TECHNOLOGY PROVIDER

On May 12, 2000, the Company entered into a revised licensing agreement with a European technology provider whereby the Company is granted a perpetual and exclusive license in certain territories for use of certain proprietary technology in its cogeneration facilities. This agreement superseded an initial license agreement executed in November 1999.

F-15

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

9. EUROPEAN TECHNOLOGY PROVIDER (CONTINUED)

The European technology provider will own a 5% minority equity stake in any legal entity that owns any project developed by the Company using the European technology provider's enhanced anaerobic digester technology wherein the Company retains an equity position.

The agreement specifies a fixed payment amount per project to the European technology provider for engineering work and construction drawings. The agreement also specifies that a licensing fee, based on a percentage of the total cost for each project facility where the licensed technology is installed and operating, as well as a monthly consulting fee, will be paid to the European technology provider upon commercial operation of a particular project.

10. COLORADO TECHNOLOGY PROVIDER

On September 17, 1999, the Company entered into an agreement with a Colorado technology provider whereby the Company is granted an exclusive and perpetual worldwide license for use of the Colorado technology provider's proprietary microturbine, which is currently being developed for use in the Company's biogas or cogeneration projects. The agreement also gives the Company the right to manufacture the microturbine under certain conditions.

The Company also has a nonexclusive and perpetual worldwide license for the manufacture and use of the proprietary microturbine in a stand-alone or utility grid-connected system.

11. SUBSEQUENT EVENT

On July 23, 2001, approximately 88% of the shares of the Company were exchanged for shares of EPC, an energy company that is publicly traded and has annual revenues of more than \$50 million. In that transaction, certain shareholders of the Company exchanged their common stock in the Company for common and convertible preferred stock of EPC. In a subsequent share exchange offer, EPC has also offered to the remaining shareholders, representing the remaining 12% of the Company's common shares, to exchange their shares on the same basis. The basis of the exchange ratio on a fully diluted basis will result in the Company's shareholders owning approximately 45% of the fully diluted equity of EPC if all shareholders exchange. The Company has, in

Microgy Cogeneration Systems, Inc.
(A development stage company)

Notes to Financial Statements (continued)

11. SUBSEQUENT EVENT (CONTINUED)

turn, become a controlled subsidiary of EPC. Members of the Board of Directors of the Company are now representatives of the senior management of EPC. EPC has appointed the President of the Company, and the majority of the shareholders of the Company have, in turn, appointed three of the eight members of the Board of Directors of EPC.

Printing, freight and engraving.....	\$	*7,000
Transfer agent fee.....	\$	*1,000
Miscellaneous.....	\$	-

Total.....	\$	88,814*
		=====

*Estimated.

ITEM 15. INDEMNIFICATION OF DIRECTORS AND OFFICERS.

Section 145 of the Delaware General Corporation Law permits us to indemnify, under certain circumstances, any person acting on our behalf who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative for expenses related to such proceeding if the person acted in good faith and in a manner the person reasonable believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe that the person's conduct was unlawful. Our bylaws substantively provide that we will indemnify such persons to the fullest extent allowed by the Delaware General Corporation Law.

In addition, our certificate of incorporation limits the liability our of directors for monetary damages for breach of their fiduciary duty as a director other than for intentional misconduct, fraud or a knowing payment of a dividend in violation of Delaware law. Such provision limits recourse for money damages that might otherwise be available to us or our shareholders for negligence by directors acting on our behalf. Although these provisions would

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2

not prohibit injunctive or similar actions against these individuals, the practical effect of such relief would be limited. This limitation of liability under state law does not apply to any liabilities that may exist under federal securities laws.

Finally, we have entered into an indemnification agreement with Joseph C. Cresci, Donald A. Livingston and William D. Linehan where we agree to indemnify these individuals against any loss, liability, cost or other expense that they incur in relation to certain of their activities related to them acting as either fiduciaries or agents of all of our employee welfare benefit plans, employee pension benefit plans and benefit plans.

Insofar as indemnification for liabilities arising under the 1933 Act may be permitted to our directors, officers and controlling persons, or otherwise, we have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

Item 17. Undertakings

The undersigned hereby undertakes that it will:

(1) file, during any period in which it offers or sells securities, a post-effective amendment to this registration statement to:

- . include any prospectus required by section 10(a)(3) of the Securities Act of 1933;
- . reflect in the prospectus any facts or events, which, individually or together, represent a fundamental change in the information set forth in the registration statement; and
- . include any additional or changed material information on the plan of distribution.

(2) for determining liability under the Securities Act, treat each post-effective amendment as a new registration statement of the securities offered, and the offering of the securities at that time to be the initial bona fide offering thereof; and

(3) file a post-effective amendment removing from registration any of the securities that remain unsold at the end of the offering.

(4) insofar as indemnification for liabilities arising under the Securities Act of 1933 (the "Act") may be permitted to directors, officers and controlling persons of the small business issuer pursuant to the foregoing provisions, or otherwise, the small business issuer has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the small business issuer of expenses incurred or paid by a director, officer or controlling person of the small business issuer in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the small business issuer will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

Edgar Filing: ENVIRONMENTAL POWER CORP - Form S-2
