### **METHANEX REVIEWING OPTIONS FOR LONG-TERM METHANOL SUPPLY IN ASIA PACIFIC**

**March 13, 2003**

Methanex announced today that its currently proposed two million tonne per year methanol project planned for the Burrup Peninsula of Western Australia has been put on hold as the Company studies alternatives for long-term methanol supply to its customers in Asia Pacific.

Bruce Aitken, Methanex's Senior Vice President for Asia Pacific, commented, "This proposed development has become increasingly difficult to progress in its originally intended form. For Methanex, the capital costs for a greenfield project of this size have become disproportionately high. Mr. Aitken continued, "Northwest Australia remains an attractive location to build a methanol plant and we are evaluating several alternatives including installing capacity in smaller increments that would be more manageable from a cost perspective. Our Asian customers are very important to us and we are committed to maintaining our position in Asia.

Pierre Choquette, President and CEO of Methanex, added, "Our commitment to the methanol industry is evident in our significant projects currently underway. The 1.7 million tonne per year Atlas methanol project, that we are constructing in Trinidad with our partner BP, is scheduled for completion early next year. In addition, work has commenced on the 840,000 tonne per year expansion at our low cost methanol production hub in Chile. We expect to complete the Chile expansion in early 2005. Methanex is focused on establishing a production hub in the Asia Pacific region and Australia is still the preferred location for a new supply source.

Methanex is the world's largest producer and marketer of methanol. Methanex shares are listed for trading on the Toronto Stock Exchange in Canada under the trading symbol "MX" and on the Nasdaq National Market in the United States under the trading symbol "MEOH". Methanex can be visited online at [www.methanex.com](http://www.methanex.com).
