***Intel Corporation Has Entered Into a Definitive Agreement to
Acquire McAfee Inc.***

Dear Valued Customers and Partners,

Today McAfee agreed to be acquired by Intel Corporation. Obviously this is big news for McAfee, big news for Intel Corporation, big news for our combined customers, and big news for both the security industry and the future of the Internet. It is the company's common belief that security is a fundamental component of modern computing, and the acquisition reflects its increasing relevance in a completely connected world. The number of connected devices is expected to grow from 1 billion to 50 billion by 2020. This explosive growth of Internet and IP-enabled devices (e.g. Internet enabled TV, IP addressable cars, ATM machines, medical devices) is fundamentally reshaping communication, collaboration and commerce opportunities for individuals, businesses and governments around the world.

Unfortunately, cyber-criminals and cyber-terrorists are misusing the Internet's open and any-to-any communication architecture for malicious purposes, leaving many users at risk and the future of the Internet as we know it in question. Cybercrime costs over 1 trillion dollars to society, the identity of 100s of millions of individuals have already been compromised and dozens of governments around the globe have already been targets of cyberwarfare.

The current cybersecurity model isn't extensible across the proliferating spectrum of devices providing protection to a heterogeneous world of connected devices requires a fundamentally new approach to security. Frankly, the industry needed a paradigm shift incremental improvements simply couldn't bridge the opportunity gap. McAfee and Intel Corporation are joining forces to tackle this next generation cybersecurity issue which impacts everyone and anything connecting to the Internet

Intel Corporation has always thought about the two key pillars of computing devices as being power efficient performance and Internet connectivity. Going forward, our two companies believe security has become the third pillar of computing and it will continue to grow in importance in all segments of the market. By bringing McAfee's core security DNA within Intel Corporation, we believe we can offer better solutions and products to the market.

Intel Corporation has a successful software business built in part by acquiring companies, such as Wind River, that bring an expertise in solutions and services in order to deliver high-performance platforms to fast-growing sectors. McAfee is the next step in that strategy, and brings together security and hardware expertise that will better protect consumers and businesses and drive innovation across Intel Corporation's product offerings.

McAfee is the best security partner for Intel Corporation something they recognized based on many years as both a customer and successful collaborator on a variety of innovations. In fact, by next year, we will introduce new security offerings as a result of our collaboration.

As with Intel Corporation's other software acquisitions, McAfee will remain a stand-alone subsidiary, retain its leadership team and expertise, which will facilitate future innovation in security. Furthermore, this acquisition is driven to create new markets, and not about cost-cutting.

When the acquisition closes, McAfee and Intel Corporation will have the knowledge and scale necessary to capture the opportunity in security, and in turn, deliver growth and value to our customers, partners, and our combined shareholders. We expect that together the result will be increased safety, security, and trust in everyday technology experiences. And of course, a reduction in cybercriminal and cyberterrorist threats.

Customers around the world have counted on McAfee to protect them in the past, and now more than ever, they can count on McAfee to protect them in the future.

During the close process as well as following the close, McAfee will continue, in fact, to strengthen its security focus, customers and partners will experience no change in their experience or industry-leading service from McAfee. The expectation is that upon close McAfee will operate as a wholly-owned subsidiary of Intel Corporation, sustaining our focus on providing leading edge security solutions, while gaining the benefits of Intel Corporation's technology investments, market-reach, brand and global employee base.

This is very exciting news. There is no better partner that McAfee could have found than Intel Corporation. They share our vision for security, they share our vision of a connected world, and working together we'll be far stronger globally and able to make a much bigger difference in people's lives.

This pending acquisition is a great win for McAfee and our valued customers and partners.

McAfee Inc.

Additional Information and Where to Find It

McAfee, Inc. (McAfee) plans to file with the Securities and Exchange Commission (the SEC) and furnish to its stockholders a proxy statement in connection with the proposed merger with Jefferson Acquisition Corporation, pursuant to which McAfee would be acquired by Intel Corporation (the Merger). The proxy statement will contain important information about the

proposed Merger and related matters. INVESTORS AND STOCKHOLDERS ARE URGED TO READ THE PROXY STATEMENT CAREFULLY WHEN IT BECOMES AVAILABLE. Investors and stockholders will be able to obtain free copies of the proxy statement and other documents filed with the SEC by McAfee through the web site maintained by the SEC at www.sec.gov, and from McAfee by contacting Investor Relations by mail at McAfee, Inc., 3965 Freedom Circle, Santa Clara, California 95054, Attention: Investor Relations, by telephone at (408) 246-5223, or by going to McAfee's Investor Relations web site at investor.mcafee.com (click on SEC Filings). McAfee and its directors and executive officers may be deemed to be participants in the solicitation of proxies from the stockholders of McAfee in connection with the proposed Merger. Information regarding the interests of these directors and executive officers in the transaction described herein will be included in the proxy statement described above. Additional information regarding these directors and executive officers is also included in McAfee's proxy statement for its 2010 Annual Meeting of Stockholders, which was filed with the SEC on May 10, 2010. This document is available free of charge at the SEC's web site at www.sec.gov, and from McAfee by contacting Investor Relations by mail at McAfee, Inc., 3965 Freedom Circle, Santa Clara, California 95054, Attention: Investor Relations, by telephone at (408) 246-5223, or by going to McAfee's Investor Relations web site at investor.mcafee.com (click on SEC Filings).

Note on Forward-Looking Statements

The subject document contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including but not limited to, statements regarding the expected benefits and costs of the transaction, the plans, strategies and objectives of management for future operations, and the expected closing of the proposed Merger. These forward-looking statements involve certain risks and uncertainties that could cause actual results to differ materially from those indicated in such forward-looking statements, including, but not limited to, the ability of the parties to consummate the proposed Merger, satisfaction of closing conditions precedent to the consummation of the proposed Merger, including obtaining antitrust approvals in the U.S., Europe and other jurisdictions, the ability of Intel to successfully integrate McAfee's operations and employees, the ability to realize anticipated benefits of the proposed Merger, and such other risks as identified in McAfee's Annual Report on Form 10-K for the fiscal year ended December 31, 2009, and McAfee's most recent Quarterly Report on Form 10-Q, each as filed with the SEC, which contain and identify important factors that could cause the actual results to differ materially from those contained in the forward-looking statements. McAfee assumes no obligation to update any forward-looking statement contained in the subject document.
