EATON VANCE SENIOR INCOME TRUST as of June 30, 2001

LETTER TO SHAREHOLDERS

[Photo of James B. Hawkes]

James B. Hawkes
President

In a volatile interest rate climate, Eaton Vance Senior Income Trust again provided a significant yield advantage in a portfolio of senior, secured floating-rate loans. Based on the Trust's June monthly dividend of \$0.065 per share and a closing share price of \$8.94, the Trust's market yield was 8.72% at June 30, 2001.

A weakening economy and a dramatic decline in interest rates made this a challenging year for the loan market...

The year ended June 30, 2001 saw a slowdown in the economy, as industrial production was accompanied by mounting job layoffs in the manufacturing and technology sectors. First quarter 2001 GDP expanded at a weak 1.3%, followed by an anemic 0.7%growth rate in the second quarter. Facing mounting evidence of a faltering economy, the Federal Reserve dramatically lowered interest rates in an effort to re-stimulate economic activity.

In this challenging environment, the Trust maintained relatively low volatility and an attractive yield advantage...

The Trust's investment universe was affected by the economic uncertainties, as well as by weaker demand for lower-quality loans. While performance understandably reflected these changing market conditions, the Trust's volatility remained well below that of many other fixed-income asset classes. Once again, consistent with its history, the Trust maintained a significant yield advantage over alternative income-producing investments.

Eaton Vance Senior Income Trust continues its mandate for conservative investors...

The past 12 months produced extreme volatility in the financial markets.

Following years of double-digit returns, the equity markets collapsed in a torrent of disappointing earnings. The fixed-income markets reacted in a similarly volatile fashion to the vagaries of the Federal Reserve, which has now completely erased the rate hikes of 2000.

Amid this uncertainty, risk-conscious investors may find appealing the lower volatility of the loan market. Without question, the economy has more hurdles to clear over the near-term. However, as conditions improve, new opportunities are certain to emerge. As we enter the new fiscal year, the Trust will continue its mandate of seeking high current income from a portfolio of senior floating-rate loans. In the pages that follow, co-portfolio managers Scott Page and Payson Swaffield review the events of the past year and offer their insights on the period ahead.

Sincerely,

/s/ James B. Hawkes

James B. Hawkes President August 8, 2001

Trust Information as of June 30, 2001

Performance(1)

Average Annual Total Return (by share price, NYSE)	
One Year Life of Fund (10/30/98)	5.65% 4.71
Average Annual Total Return (at net asset value)	
One Year Life of Fund (10/30/98)	-0.72% 4.39
Ten Largest Holdings(2)	
Century Cable Holdings Charter Communications Operating, LLC Insight Midwest Holdings, LLC Voicestream PCS Holdings, LLC Lyondell Petrochemical Company Amphenol Corp. Jefferson Smurfit Corporation Rite Aid Corp. Metro Goldwyn Mayer, Inc.	3.5% 3.3 2.1 2.1 1.7 1.2 1.2 1.2
Nextel Communications, Inc.	1.1

(1) Returns are calculated by determining the percentage change in net asset value and share price with all distributions reinvested. (2) Ten largest holdings account for 18.6% of the Trust's investments, determined by dividing the total market value of the holdings by the total net assets of the Trust. Holdings are subject to change.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost.

MANAGEMENT DISCUSSION

[Photo of Scott H. Page]

Scott H. Page

[Photo of Payson E. Swaffield]

Payson E. Swaffield

An interview with Scott H. Page and Payson F. Swaffield, co-portfolio ~managers of Eaton Vance Senior Income Trust.

- Q: Scott, the past year has been characterized by growing concerns about the economy. What impact has that had on the loan market?
- A: MR. PAGE: The slowing economy during the past year was reflected in the loan markets in the form of a difficult credit environment. Weaker demand for lower-quality loans resulted in lower market prices. Areas such as the telecom sector were especially troublesome.

In addition, in response to a slowing economy, the Federal Reserve has lowered its benchmark Federal Funds rate - a key short-term rate barometer - a total of six times since January 2001, for a total of 275 basis points. (2.75%). LIBOR, the rate on which floating-rate loan interest rates are typically based, has moved in tandem with the Fed moves. Predictably, that has resulted in lower income from the loan market.

- Q: Payson, how would you assess the performance of the Trust amid these conditions?
- A: MR. SWAFFIELD: The Trust managed to navigate a difficult climate relatively well. Based on market price, the Trust posted a total return of 5.65% for the year, despite a 4.0% decline in share price, which was more than offset by the Trust's dividend. These statistics indicate that, while the decline in net asset value was consistent with the tough credit conditions within the loan market, the Trust's yield advantage played a major role in a very difficult investment environment.
- Q: What factors contributed to the poor credit environment?
- A: MR. SWAFFIELD: Credit defaults increased in the bank loan market as well as in other credit markets, including the high-yield market. Several factors led to a higher default rate: a slower economy in the second half of 2000 and early 2001; a lack of liquidity in some higher-risk markets, such as the high-yield bond market; and a rapid retreat from the "new economy" companies that had been so liberally funded just a year earlier. Each of these factors contributed to an overall increase in capital market volatility.

Five Largest Sector Weightings (1)

Cable Television	12.8%
Telecommunications - Wireless	7.7%
Chemicals	6.6%
Manufacturing	5.5%
Real Estate	4.3%

Trust Overview(1)

Total net assets	\$428 million
Number of borrowers	210
Industries represented	51
Collateral coverage ratio	1.5 to 1
Weighted days-to-interest rate reset	54 days
Average maturity	5.7 Yrs.
Average size per borrowing	\$1.9 million

(1) Five largest sector weightings account for 36.9% of the Trust's investments, determined by dividing the total market value of the holdings by the total net assets of the Trust. Sector Weightings and Trust Overview are as of 6/30/01 and are subject to change. Trust Overview information refers only to senior, secured floating-rate loan portion of the Trust.

SHARES OF THE TRUST ARE NOT INSURED BY THE FDIC AND ARE NOT DEPOSITS OR OTHER OBLIGATIONS OF, OR GUARANTEED BY, ANY DEPOSITORY INSTITUTION. SHARES ARE SUBJECT TO INVESTMENT RISKS, INCLUDING POSSIBLE LOSS OF PRINCIPAL INVESTED. YIELD WILL CHANGE.

When volatility and uncertainty increase in equity markets, companies' access to capital is impeded; defaults rise, and risk premiums increase until the market finds a new equilibrium. This process has been under way for some time, and was reflected in decreases in market prices of bank loans held by the Trust, as well as by an increase in returns demanded in the primary and secondary markets for fixed-rate bonds.

- Q: You referred to the difficulties within the telecom sector. Could you expand on that?
- A: MR. PAGE: Yes. Some segments of the telecom sector predominantly long-haul fiber and wireline competitive local exchange carriers (CLECs) have been damaged by high debt levels, deteriorating credit markets and an overcapacity that has spawned fierce competition. Thus, some CLECs and broadband providers found themselves with massive debt at a time when prices were dropping. In addition, the potential market for telecom providers has contracted in the slow economy, as business users have reevaluated their telecom needs. These segments are clearly the most troubled within the telecom sector and the Trust had very little exposure to these areas at June 30.
- Q: How have you positioned the Trust in recent months?
- A: MR. SWAFFIELD: The Trust's largest weightings at June 30, 2001 were in cable television, wireless telecommunications and specialty chemicals. Cable operators have continued to generate subscriber and revenue growth, which has made them attractive in a slow-growth economy. Meanwhile, selected wireless telecom service providers, insulated from the weaker elements of the telecom sector, have continued to post impressive sales momentum. Finally, specialty chemical companies are less vulnerable to an economic slowdown than their commodity chemical counterparts, and have been boosted by growth in specialty niche markets.
- Q: Could you discuss some of the Trust's cable television investments?
- A: MR. PAGE: Yes. The nation's cable industry has been marked by a massive

consolidation over the past decade. Today, the 10 largest operators control more than 86% of the U.S. cable business, with around 60 million subscribers. Charter Communications is the nation's fourth largest cable network. Charter's revenues rose 21% in the first quarter, boosted by the industry's fastest subscriber growth, especially in Internet delivery.

The Trust has also had investments in smaller cable operators, such as Insight Midwest Holdings, which have benefited from the surge of cable use in rural and smaller markets. In addition to their rapid revenue growth, smaller companies could be potential acquisition targets in the future.

- Q: In light of the continued difficulties in some parts of the telecom sector, where have you invested the Trust's telecom investments?
- A: MR. PAGE: Our largest telecom exposure is to mobile telephony, that is, car and mobile phones. To date, this sector has not participated significantly in the telecom credit decline I alluded to earlier. In this area, our largest investments have been Nextel Communica-tions and Voicestream PCS. Nextel provides digital wireless services in major metropolitan areas, primarily to business customers. The company serviced 6.7 million digital units at the end of 2000 and witnessed a 33% rise in revenues in the second quarter of 2001. As an indication of its financial soundness, as of June 30, Nextel's cash and short-term investments essentially offset its bank debt.

Voicestream was recently acquired by Deutsche Telecom, an investment grade German telecom company. We expect this debt to be refinanced soon, given the credit strength of its parent. We also have investments in rural cellular providers. We believe these companies can continue to generate strong revenue growth, in part due to lower levels of competition.

- Q: What sort of chemical companies have you found attractive?
- A: MR. SWAFFIELD: The Trust focused on chemical producers with products with a wide array of uses and, thus, less vulnerability to an economic downturn. For example, Lyondell Petrochemicals manufactures a broad range of intermediate and high performance chemicals, from polymers used in manufacturing processes to chemicals used in food processing and personal care products to a variety of refined petroleum products.
- Q: Could you comment on the Trust's use of leverage?
- A: MR. SWAFFIELD: Yes. As shareholders know, the Trust has the capability to employ a limited amount of financial leverage to enhance the Trust's yield. In June, the Trust issued auction preferred shares, which represented a source of financing that was relatively cheaper than debt financing, such as bank loans or commercial paper. This financing also allowed the Trust to marginally increase its total amount of leverage. While that may, at times, slightly increase the volatility of the underlying assets, we believe the combined benefits of lower-cost financing and the ability to generate higher dividends will more than offset the higher risk.
- Q: What is your outlook for the loan market in the coming year?
- A: MR. PAGE: There is not yet a strong body of evidence that the economy is turning around. Historically, it has taken at least six months for a series of rate cuts to begin re-invigorating the economy. In its Open Market Committee messages and Congressional testimony, the Fed has conveyed its concerns that weakness in the economy during the first half of 2001 has posed more of a threat than inflation. We believe that the Trust, with its broad diversification and exposure to defensive industries, should be well-positioned to withstand a continued slow economy. At some point, however, we believe that the economy should respond to lower interest rates

and mount a recovery, resulting in more robust revenue growth and improved credit quality.

MR. SWAFFIELD: It's also worth noting that, at this point in the interest rate cycle, the loan market is very favorably positioned from a risk standpoint relative to other fixed-income asset classes. With the Fed having already aggressively lowered rates, there is some concern among bond market participants that the Fed may be nearing the end of its rate reduction cycle. Because bond prices move in the opposite direction of rates, signs that the economy is starting to recover would likely result in lower bond prices. Thus, bonds are more vulnerable at this point in the rate cycle. Floating-rate loans, however, would enjoy rising returns in a rising-rate scenario. Together with the prospect of credit enhancement over time, we believe the longer-term outlook for the loan market is increasingly favorable.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- (2) Senior secured floating rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior secured floating rate intrests will have an expected average life of approximately two to four years.
 - * Non-income producing.

Note: At June 30, 2001, the Trust had unfunded commitments amounting to \$5,118,659 under various revolving credit agreements.

EATON VANCE SENIOR INCOME TRUST as of June 30, 2001

NOTES TO FINANCIAL STATEMENTS

1 Significant Accounting Policies

Eaton Vance Senior Income Trust (the Trust) is an entity commonly known as a Massachusetts business trust and is registered under the Investment Company Act of 1940 as a non-diversified closed-end management investment company. The

Trust's investment objective is to provide a high level of current income consistent with the preservation of capital, by investing primarily in senior, secured floating rate loans. The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

A Investment Valuation -- The Trust's investments are primarily in interests in senior floating rate loans (Senior Loans). Certain Senior Loans are deemed liquid because reliable market quotations are readily available for them. Liquid loans are valued on the basis of prices furnished by a pricing service. Other Senior Loans are valued at fair value by the Trust's investment adviser, Eaton Vance Management (EVM), under procedures established by the Trustees as permitted by Section 2(a)(41) of the Investment Company Act of 1940. Such procedures include the consideration of relevant factors, data and information relating to fair value, including (i) the characteristics of and fundamental analytical data relating to the Senior Loan, including the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate of the Senior Loan, the terms and conditions of the Senior Loan and any related agreements and the position of the loan in the borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Trust's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the Borrower, based on evaluations of its financial condition, financial statements and information about the Borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the Senior Loan including price quotations for and trading in the Senior Loan and interests in similar loans and the market environment and investor attitudes towards the Senior Loan and interests in similar loans; (v) the reputation and financial condition of the agent and any intermediate participant in the loan; and (vi) general economic and market conditions affecting the fair value of the Senior Loan. Other portfolio securities (other than short-term obligations, but including listed issues) may be valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. In certain circumstances, portfolio securities will be valued at the last sales price on the exchange that is the primary market for such securities, or the last quoted bid price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales during the day. The value of interest rate swaps is determined by changes in the relationship between two rates of interest. Short-term obligations which mature in sixty days or less are valued at amortized cost, if their original term to maturity when acquired by the Trust was 60 days or less or are valued at amortized cost using their value on the 61st day prior to maturity, if their original term to maturity when acquired by the Trust was more then 60 days, unless in each case this is determined not to represent fair value. Repurchase agreements are valued at cost plus accrued interest. Other portfolio securities for which there are no quotations or valuations are valued at fair value as determined in good faith by or on behalf of the Trustees.

B Income -- Interest income from Senior Loans is recorded on the accrual basis at the then-current interest rate, while all other interest income is determined on the basis of interest accrued, adjusted for amortization of premium or discount when required for federal income tax purposes. Facility fees received are recognized as income over the expected term of the loan. Dividend income is recorded on the ex-dividend date for dividends received in cash and/or securities. The Trust will adopt the provision of the AICPA Audit and Accounting Guide for Investment Companies, as revised, effective for fiscal years beginning after December 15, 2000. As required, the Trust will begin accreting market discounts on debt securities effective July 1, 2001.

Prior to this date, the Trust did not accrete market discounts on debt securities. The cumulative effect of this accounting change will have no impact on the total net assets of the Trust. The impact of this accounting change has not been determined but will result in an increase to cost of securities and a corresponding increase in net unrealized depreciation based on securities held as of June 30, 2001.

C Federal Taxes — The Trust's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute to shareholders each year all of its taxable income, including any net realized gain on investments. Accordingly, no provision for federal income or excise tax is necessary. At June 30, 2001, the Trust, for federal income tax purposes, had a capital loss carryover of \$1,925,241, which will reduce the Trust's taxable income arising from future net realized gain on investments, if any, to the extent permitted by the Internal Revenue Code and thus will reduce the amount of distributions to shareholders that would otherwise be necessary to relieve the Trust of any liability for federal income or excise tax. Such capital loss carryover will expire on June 30, 2009.

D Expense Reduction -- Investors Bank & Trust Company (IBT) serves as custodian of the Trust. Pursuant to the custodian agreement, IBT receives a fee reduced by credits which are determined based on the average daily cash balances the Trust maintains with IBT. All significant credit balances used to reduce the Trust's custodian fees are reported as a reduction of expenses on the Statement of Operations.

E Use of Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.

F Offering Costs -- Costs incurred by the Trust in connection with the initial offering of Trust shares were recorded as a reduction of paid-in capital.

G Other -- Investment transactions are accounted for on the date the investments are purchased or sold. Gains and losses on securities sold are determined on the basis of identified cost.

2 Auction Preferred Shares (APS)

The Trust issued 2,200 shares of Auction Preferred Shares Series A and 2,200 shares of Auction Preferred Shares Series B on June 27, 2001 in a public offering. The underwriting discount and other offering costs were recorded as a reduction to additional paid-in capital. Dividends on the APS, which accrue daily, are paid cumulativly at a rate which was established at the offering of the APS and have been reset every 7 days thereafter by an auction. Dividend

rates at June 30, 2001 were 3.90% and 3.90% for Series A and Series B Shares, respectively. Series A and Series B are identical in all respects except for the dates of reset for the dividend rates.

The APS are redeemable at the option of the Trust, at a redemption price equal to \$25,000 per share, plus accumulated and unpaid dividends on any dividend payment date. The APS are also subject to mandatory redemption at a redemption price equal to \$25,000 per share, plus accumulated and unpaid dividends, if the Trust is in default on its asset maintenance requirements with respect to the APS. If the dividends on the APS shall remain unpaid in an amount equal to two full years' dividends, the holders of the APS as a class have the right to elect a majority of the Board of Trustees. In general, the holders of the APS and the common shares have equal voting rights of one vote per share, except

that the holders of the APS, as a separate class, have the right to elect at least two members of the Board of Trustees. The APS have a liquidation preference of \$25,000 per share, plus accumulated and unpaid dividends. The Trust is required to maintain certain asset coverage with respect to the APS as defined in the Trust's By-Laws. The Trust pays annual fees equivalent to 0.25% of the preferred shares' liquidation value for the remarketing efforts associated with the preferred auctions.

3 Distributions to Shareholders

The Trust intends to make monthly distributions to common shareholders of net investment income, after payment of any dividends on any outstanding preferred shares. Distributions are recorded on the ex-dividend date. Distributions to preferred shareholders are recorded daily and are payable at the end of each dividend period. Each dividend payment period for the Auction Preferred Shares is generally seven days. The applicable dividend rate for the Auction Preferred Shares on June 30, 2001 was 3.90% and 3.90%, for Series A and Series B Shares, respectively. For the year ended June 30, 2001, the Trust accrued dividends to Auction Preferred shareholders amounting to \$23,507 and \$23,507 for Series A and Series B Shares, respectively, representing an average APS dividend rate for such period of 3.90% and 3.90%, respectively.

4 Common Shares of Beneficial Interest

The Agreement and Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional \$0.01 par value common shares of beneficial interest. Transactions in common shares were as follows:

	Year Ended June 2001	2000
Issued to shareholders electing to receive payments of distributions in Fund common shares	206,282	
Net increase	206,282	

5 Investment Adviser Fee and Other Transactions with Affiliates

The investment adviser fee, computed at a monthly rate of 17/240 of 1% (0.85% annually) of the Trust's average weekly gross assets, was earned by EVM as compensation for management and investment advisory services rendered to the Trust. For the year ended June 30, 2001, the fee was equivalent to 0.85% of the Trust's average daily gross assets and amounted to \$3,992,329. Except for Trustees of the Trust who are not members of EVM's organization, officers and Trustees receive remuneration for their services to the Trust out of such investment adviser fee. EVM also serves as the administrator of the Trust. An administration fee, computed at the monthly rate of 1/48 of 1% (0.25% annually) of the average weekly gross assets of the Trust, is paid to EVM for managing and administering business affairs of the Trust. For the year ended June 30, 2001, the fee was equivalent to 0.25% of the Trust's average daily gross assets for such period and amounted to \$1,174,160.

Certain officers and Trustees of the Trust are officers of the above organization.

During the year ended June 30, 2001, the Trust engaged in purchases transactions with other Funds that also utilize EVM, or an affiliate of EVM, as an investment adviser. These purchase transactions complied with Rule 17-a7 under the Investment Company Act of 1940 and amounted to \$14,000,000.

6 Investment Transactions

The Trust invests primarily in Senior Loans. The ability of the issuers of the Senior Loans held by the Trust to meet their obligations may be affected by economic developments in a specific industry. The cost of purchases and the proceeds from principal repayments and sales of Senior Loans and corporate bonds aggregated \$330,050,045 and \$165,840,460, respectively, for the year ended June 30, 2001.

7 Short-Term Debt and Credit Agreements

The Trust has entered into a revolving credit agreement that will allow the Trust to borrow \$120 million (reduced from \$178 million on June 27, 2001) to support the issuance of commercial paper and to permit the Trust to invest in accordance with its investment practices. Interest is charged under the revolving credit agreement at the bank's base rate or at an amount above either the bank's adjusted certificate of deposit rate or federal funds effective rate. Interest expense includes a commitment fee of approximately \$268,000 which is computed at the annual rate of 0.15% on the unused portion of the revolving credit agreement. There were no significant borrowings under this agreement during the period. As of June 30, 2001, the Trust had commercial paper outstanding of \$71,000,000, at an interest rate of 4.15%. Maximum and average borrowings for the year ended June 30, 2001 were \$146,000,000 and \$135,000,000, respectively, and the average interest rate was 5.89%.

8 Federal Income Tax Basis of Investments

The cost and unrealized appreciation (depreciation) in value of the investment securities at June 30, 2001, as computed on a federal income tax basis, were as follows:

Aggregate cost	\$506,203,350
Gross unrealized appreciation Gross unrealized depreciation	\$ 3,001,539 (24,227,866)
Net unrealized depreciation	\$ (21,226,327)

EATON VANCE SENIOR INCOME TRUST as of June 30, 2001

INDEPENDENT AUDITORS' REPORT

To the Trustees and Investors of Eaton Vance Senior Income Trust

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of Eaton Vance Senior Income Trust (the Trust) as of June 30, 2001, and the related statement of operations and cash flows for the year then ended, the statement of changes in net assets and the financial highlights for the three-year period ended June 30, 2001. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted

in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. Our procedures included confirmation of securities and Senior Loans owned at June 30, 2001 by correspondence with the custodian, brokers and selling or agent banks; where replies were not received from brokers and selling or agent banks, we performed other auditing procedures. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provides a reasonable basis for our opinion.

In our opinion, such financial statements and financial highlights, referred to above, present fairly, in all material respects, the financial position of Eaton Vance Senior Income Trust at June 30, 2001, the results of its operations, the changes in its net assets, its cash flows and its financial highlights for the respective stated periods in conformity with accounting principles generally accepted in the United States of America.

DELOITTE & TOUCHE LLP Boston, Massachusetts August 10, 2001

EATON VANCE SENIOR INCOME TRUST

DIVIDEND REINVESTMENT PLAN

The Trust offers a dividend reinvestment plan (the Plan) pursuant to which shareholders automatically have dividends and capital gains distributions reinvested in common shares (the Shares) of the Trust unless they elect otherwise through their investment dealer. On the distribution payment date, if the net asset value per Share is equal to or less than the market price per Share plus estimated brokerage commissions then new Shares will be issued. The number of Shares shall be determined by the greater of the net asset value per Share or 95% of the market price. Otherwise, Shares generally will be purchased on the open market by the Plan Agent. Distributions subject to income tax (if any) are taxable whether or not shares are reinvested.

If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you will need to request that your shares be re-registered in your name with the Trust's transfer agent, PFPC Global Fund Services or you will not be able to participate.

The Plan Agent's service fee for handling distributions will be paid by the Trust. Each participant will be charged their pro rata share of brokerage commissions on all open-market purchases.

Plan participants may withdraw from the Plan at any time by writing to the Plan Agent at the address noted on the following page. If you withdraw, you will receive shares in your name for all Shares credited to your account under the Plan. If a participant elects by written notice to the Plan Agent to have the Plan Agent sell part or all of his or her Shares and remit the proceeds, the Plan Agent is authorized to deduct a \$5.00 fee plus brokerage commissions from the proceeds.

If you wish to participate in the Plan and your shares are held in your own name, you may complete the form on the following page and deliver it to the Plan

Agent.

Any inquires regarding the Plan can be directed to the Plan Agent, PFPC Global Fund Services, at 1-800-331-1710.

EATON VANCE SENIOR INCOME TRUST

APPLICATION FOR PARTICIPATION IN DIVIDEND REINVESTMENT PLAN

This form is for shareholders who hold their common shares in their own names. If your common shares are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to see if it will participate in the Plan on your behalf. If you wish to participate in the Plan, but your brokerage firm, bank, or nominee is unable to participate on your behalf, you should request that your common shares be re-registered in your own name which will enable your participation in the Plan.

The following authorization and appointment is given with the understanding that I may terminate it at any time by terminating my participation in the Plan as provided in the terms and conditions of the Plan.

> _____ Please print exact name on account:

Shareholder signature Dat.e

Shareholder signature

Date

Please sign exactly as your common shares are registered. All persons whose names appear on the share certificate must sign.

YOU SHOULD NOT RETURN THIS FORM IF YOU WISH TO RECEIVE YOUR DIVIDENDS AND DISTRIBUTIONS IN CASH. THIS IS NOT A PROXY.

THE AUTHORIZATION FORM, WHEN SIGNED, SHOULD BE MAILED TO THE FOLLOWING ADDRESS:

Eaton Vance Senior Income Trust c/o PFPC Global Fund Services P.O. Box 8030 Boston, MA 02266-8030 800-331-1710
