**Honda Exhibits Customized Mobilio Spike Models
at Tokyo Auto Salon 2003**

January 7, 2003 Honda Motor Co., Ltd. has announced that it will be exhibiting two customized Mobilio Spike models (the ThinkPad and the Surfing models) in the Honda Customize World booth at Tokyo Auto Salon 2003 with NAFAC event will be held in Chiba's Makuhari Messe from Friday, January 10th through Sunday, January 12th.

Honda Customize World showcases the exciting new possibilities offered by Honda's expanding range of custom automobiles. Demonstrating the powerful allure of customization, other exhibits will include the Module Box concept model based on the Mobilio Spike using the Modulo custom brand made by Honda Access Corporation (manufacturer of genuine Honda parts and accessories), an aero-parts model by DOOV Corporation^{*2}, and models by custom manufacturers handling Honda automobiles.

*2: 100%-owned subsidiary of Honda Access Corporation

Mobilio spike ThinkPad (customized model)

Mobilio spike Surfing (customized model)

1 Overview of customized Mobilio Spike models

ThinkPad model

This model is based on the Star Seeker concept of the car as a private observation platform for viewing starry skies. Using the advanced technology of IBM's ThinkPad notebook PC, released ten years ago this year, it features power-slide doors controlled using the Mobilio Spike (W-type) radio-wave keyless-entry system. Designed to a mobile observatory spec, the model also includes an astronomical telescope controlled and operated using the ThinkPad.

Surfing model

Featuring stowage, gadgetry and utility tailored to the serious surfer's lifestyle, this model is designed to a pro surfer spec, with a flexible cargo space based on the ULTRA system.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

A press-release regarding customized Mobilio Spike models will be available from January 7, 2003 at the following URL:

Honda Fit Ranked Best-selling Vehicle in 2002 in Japan

Tokyo, January 9, 2003 Honda Motor Co., Ltd., today announced that its small car model, the Fit, achieved cumulative unit sales of 250,790 units in Japan in 2002, according to the statistics of the Japan Automobile Dealers Association. Thus, Fit became the top-selling vehicle in Japan, the first time that a Honda model has reached the No.1 spot in yearly cumulative sales.

Since its launch in June 2001, the Fit has proved popular with a wide-range of customers for its trend-setting styling, good fuel economy and excellent user-friendly features. Its cumulative sales now total 355,088 units in about a year and a half since its launch.

The Fit was first exported to Europe in November 2001, and is currently sold, to high acclaim, in about 60 countries worldwide, as of the end of December 2002. Including exports, cumulative production of the Fit, which is manufactured at the Suzuka Factory, has exceeded 400,000 units.

- History of the Fit

* June 2001	Launch of the 1.3-liter model
* November 2001	Received the 2001-2002 Japan Car of the Year Award Received the 2002 RJC Car of the Year Award Start of exports, beginning with Europe
* December 2001	Achieved cumulative sales of 100,000 units in Japan
* June 2002	Achieved cumulative sales of 200,000 units in Japan
* September 2002	Launch of the 1.5-liter model
* October 2002	Achieved cumulative sales of 300,000 units in Japan
* November 2002	Facelift of the 1.3-liter model
* December 2002	Achieved cumulative sales of 350,000 units in Japan

Honda Begins Production of All-new Accord in China

Guangzhou, January 15, 2003 Guangzhou Honda Automobile Co., Ltd., Honda's automobile production and sales joint venture in China, today held a line-off ceremony to launch production of the all-new Accord. Nationwide sales of the new Accord will start January 25, 2003 at a price of 259,800 yuan for the 2.4l i-VTEC model with a first year sales target of 70,000 units.

The new Accord for the Chinese market is based on the U.S. version of Accord, which underwent a full model change in the U.S. in September 2002. Additional modifications were made to match road and usage conditions in China. In addition to achieving high levels of quality, reliability and safety, the new Accord offers excellent driving performance, a high level of comfort and functionality, as well as sporty styling. Regarding the environment, the new Accord achieved the Euro 3 standard for tail pipe emissions.

Guangzhou Honda began production of the Accord with its production start-up in March 1999, and cumulative production and sales of the Accord has now reached approximately 139,000 units. With the launch of the all-new model, Guangzhou Honda plans to further expand Accord sales.

Local content for the new Accord will increase to 70% from the current level of about 60% as Guangzhou Honda begins the complete manufacturing process of cylinder blocks and cylinder heads from molding to machining.

In April 2002, Guangzhou Honda added production of the Odyssey. The present line-up will be further expanded in summer 2003 with the production start-up of the compact sedan, the Fit Saloon. The annual production capacity at Guangzhou Honda will increase from the current 50,000 units to 120,000 units by February 2003, with a further increase to 240,000 units by spring 2004. Production output in 2002 reached 59,000 units, taking total cumulative production and sales of Accord and Odyssey to more than 153,000 units since the start of operations. Meanwhile, the production target for 2003 has been set at 112,000 units.

Regarding the sales network, Guangzhou Honda will increase the number of dealers from approximately 140 to 200 dealers by the end of 2003. It is the first sales and service dealer network in China to be developed by a manufacturer, integrating auto sales and service into one organization, including maintenance service, parts supply and communication with customers.

Honda Taiwan Begins Production and Sales of the CR-V

Taipei, January 21, 2003 Honda Taiwan Co., Ltd., Honda's automobile production and sales subsidiary in Taiwan, launched sales of the new CR-V in Taipei today, one day after a line-off ceremony was held at the recently completed automobile plant in Pingdong in southern Taiwan. Nationwide sales will begin today, January 21 through Honda Taiwan's newly established automobile dealer network. The sales price has been set at 799,000 yuan (approx. 2.8million yen) for the LX mid-trim level, and Honda expects to sell 10,000 units of the CR-V in the first year. (1 yuan = 3.5 yen)

Honda established Honda Taiwan as a 100% owned local subsidiary in February 2002, after discontinuing its local partnership in order to create an organizational structure that would enable it to fully utilize its global production and supply networks. Following this development, in June, Honda purchased land and a factory from local automobile manufacturer, Taching Motors Co., Ltd., located in Pingdong, south of Taiwan. Further investments were made in new production equipment in order to introduce Honda's flexible manufacturing system.

Regarding the sales network, Honda Taiwan will further increase the number of dealers, which have responsibility for sales, service and service parts. Honda expects to have 30 dealer outlets by the end of 2003.

Honda Sets Domestic Sales and Production Records for 2002

January 27, 2003 Honda Motor Co., Ltd., announced today that its domestic sales increased 4.6% and passenger car and light truck sales were up 7.9% in 2002, the best year ever for the company in both categories.

The annual sales record of 902,658 units was highlighted by Honda's Fit sub-compact, which became the best-selling vehicle in Japan in 2002. It was the fourth consecutive year of growth in both overall sales and the third consecutive year of growth in the passenger car-light trucks category.

Domestic production, meanwhile, was up 7.9% in 2002 setting a new record. Overall production also grew, increasing 8.0% worldwide in December, and 9.4% for 2002. Overseas production grew 14.8% in December, and 10.8% for the year.

Domestic sales in December were off 2.3%. The Fit, however, again posted strong sales totaling 22,098 units. For the year, 250,790 Fits were sold in Japan. In December, Honda's Life mini-vehicle (11,869 units), Mobilio (8,381 units) and Accord (6,386 units) also enjoyed brisk sales.

Mini vehicle sales were down 14.5% in December, and down 1.9% for 2002.

Export shipments from Japan in December were up sharply again, gaining 22.7%, mainly because of increased shipments to Europe and North America.

Honda Announces a Full Model Change for the CB1300 SUPER FOUR Large-Displacement Road Sports Bike

January 30, 2003 Honda Motor Co., Ltd. has announced a full model change for its CB1300 SUPER FOUR large-displacement road sports bike. The new bike, which features dynamic styling combined with a powerful water-cooled, 4-stroke, in-line 4-cylinder 1300cc engine, goes on sale February 7th.

The new CB1300 SUPER FOUR is the latest advancement on the CB1000 SUPER FOUR model, designed based on the Project Big-1[†] concept, that was first introduced in November 1992. The displacement was boosted to 1300cc in March 1998, winning over a broad spectrum of motorcycle enthusiasts.

*1 The Project Big-1 concept seeks to achieve exciting driving performance through a sophisticated blend of light, nimble handling and powerful engine performance in a bike equipped with a water-cooled, DOHC 4-valve, in-line 4-cylinder engine.

CB1300 SUPER FOUR

1 **Planned vehicle sales** (domestic, annual): 4,000 units

1 **Manufacturer's suggested retail price** (consumption tax not included)

Two-tone color type: ¥990,000

Solid color type: ¥980,000

(Example of regionally adjusted manufacturer's suggested retail price: Okinawa +¥10,000. The manufacturer's suggested retail price is for reference only. Similar adjustments may be made in other regions.)

Table of Contents

The dry weight of the new bike is 20kg lighter than previous models, and a 3-D ignition timing control system and PGM-FI (Programmed Fuel Injection) have been added to achieve precise, sensitive throttle response and smooth powerful output characteristics. The exhaust system and other components were also redesigned to create a dignified, comfortable exhaust sound and resonance that the rider experiences through his or her entire body, further enhancing the bike's driving pleasure.

Functional improvements include a 12-liter storage compartment under the seat and Honda's original HISS (Honda Ignition Security System) anti-theft device. An information display has also been added to provide the rider with all required information, further heightening the bike's ease of operation. The new model inherits the CB1000 SUPER FOUR's dynamic styling, combining beauty with functionality.

In addition to the traditional two-tone color combinations of white on red and black on gray embellished with a wing-mark motif, a solid-color type is also available in simple monotone silver, for three color schemes in all.

=Main Features of the CB1300 SUPER FOUR=

1 A new more compliant, more fun-to-drive engine that is 8kg lighter

The new CB1300 SUPER FOUR engine's rocker arms have been replaced with a direct push system in which the cam lobes operate via lifters to open and close the valves directly. This results in greater combustion efficiency and a more compact, lightweight, low-friction design. Further weight reductions attained through the use of a thinner cylinder block and the elimination of engine fins result in an engine unit that is 8kg lighter. Innovations throughout ensure unrivalled operability and engine response. In the fuel system, the carburetor has been abandoned in favor of digitally controlled PGM-FI equipped with an advanced 32-bit high-performance ECU that executes high-speed analysis of engine rpm, camshaft rpm, water temperature, atmospheric pressure, throttle opening, and other data to achieve improved throttle response and optimum combustion efficiency.

1 Air injection contributes to a major reduction in CO, HC, and NO_x emissions

A built-in air injection system delivers the optimum amount of fresh air to the exhaust ports in each cylinder, causing incompletely combusted materials in the port to re-ignite. In combination with the PGM-FI, this results in a major reduction of CO, HC, and NO_x emissions in the exhaust.

Table of Contents

1 Exhaust sound performance that further enhances the fun of the ride

In order to produce a crisp, pleasant exhaust sound, the 4-2-1 exhaust pipe is fitted with a single-pipe collector and muffler. The muffler's rear cap is also equipped with a newly developed variable exhaust valve to create a clear sound with a minimum of interference noise. Other improvements include a drive chain fitted with plastic washers between the rollers to suppress drive noise and a rubber rear upper engine mount that reduces unpleasant vibration noises, resulting in a pleasing sound that further enhances the fun of the ride.

1 A lighter, more compact frame delivers comfortable driving performance

The dual-backbone, double-cradle frame provides improved overall rigidity and balance. A shortening of the wheelbase by 30mm, in addition to other modifications, has resulted in a 7kg weight savings in the frame area. The new design emphasizes handling and driving performance.

1 Meter display provides instant confirmation of all important driving information

The custom-designed, twin-gauge display features an analog speedometer and tachometer. Inside the tachometer is an LCD panel displaying a clock and fuel gauge, and between the speedometer and tachometer is an LCD information display that shows two odometers, distance remaining, a stopwatch, coolant temperature, ambient air temperature, distance traveled per day and more.

1 Major increase in cargo capacity, including a 12-liter storage space

The 12-liter storage space located under the seat is big enough to accommodate a U-lock, rainwear, gloves, cap, maps, and more. This cargo space, combined with the six hooks located at the back of the seat, gives the new CB1300 SUPER FOUR a major increase in cargo capacity over previous models.

1 Coloring

The new CB1300 SUPER FOUR is available in either a two-tone color scheme employing newly developed ultra-thin color film for the tank stripes for a nearly flush fit, or a simple, solid color scheme. The two-tone type is available in either Pearl Fadeless White and Candy Aramona Red, traditional to the CB series, or Black and Force Silver Metallic with a graphic design patterned after a partial wing mark. The solid color type is Force Silver Metallic.

Photographs and related publicity information on the CB1300 SUPER FOUR are available for downloading from the following URL:

HONDA MOTOR CO., LTD. REPORTS

UNAUDITED CONSOLIDATED FINANCIAL RESULTS

FOR THE FISCAL THIRD QUARTER AND

THE NINE MONTHS ENDED DECEMBER 31, 2002

Tokyo, January 31, 2003 Honda Motor Co., Ltd. today announced its unaudited consolidated financial results for the fiscal third quarter and the nine months ended December 31, 2002.

Third Quarter Results

Honda's consolidated net income for the fiscal third quarter ended December 31, 2002 totaled JPY 115.1 billion (USD 961 million), an increase of 40.0% from the same period in 2001. Basic net income per Common Share for the quarter amounted to JPY 118.63 (USD 0.99), compared to JPY 84.42 for the same period in 2001. Two of Honda's American Depositary Shares represent one Common Share.

Unit sales in all Honda's business categories, namely motorcycles, automobiles and power products, increased for the fiscal third quarter and consolidated net sales and other operating revenue (herein referred to as revenue) amounted to JPY 1,989.2 billion (USD 16,591 million), an increase of 13.3% over the corresponding period in 2001.

Revenue included currency translation effects, which had a positive impact on foreign currency denominated revenue from Honda's overseas subsidiaries translated into yen. Honda estimates that had the exchange rate of the yen remained unchanged from the same period in 2001, revenue for the quarter would have increased by approximately 13.0%.

Consolidated operating income for the fiscal third quarter totaled JPY 158.9 billion (USD 1,326 million), an increase of 2.7% compared to the same period in 2001. This increase in operating income was due mainly to higher revenue from every product category, Honda's ongoing cost cutting strategies together with the depreciation of the yen, which offset the negative impact from increases in selling, general and administrative (SG&A) expenses as well as research and development (R&D) expenses.

Table of Contents

Consolidated income before income taxes for the quarter totaled JPY 158.7 billion (USD 1,324 million), an increase of 31.7% from the same period in 2001.

With respect to Honda's sales in the fiscal third quarter by business category, motorcycle unit sales increased 39.6% to 2,145,000 units, and revenue increased 6.9%, to JPY 217.2 billion (USD 1,812 million). These increases were due primarily to higher sales in Asian countries such as Thailand, China, Indonesia and India.

Honda's unit sales of automobiles increased by 7.7% to 702,000 units, due primarily to strong sales of such light truck models as the Pilot, CR-V and Odyssey in North America. Revenue increased 14.6%, to JPY 1,637.4 billion (USD 13,657 million) during the quarter.

Unit sales of power products totaled 862,000 units, an increase of 9.5% compared to the corresponding period in 2001. Favorable sales of Honda's general-purpose engines in Europe and North America were the major factor in this increase. Revenue from other businesses, including the power product business and financial services, increased by 7.9% to JPY 134.5 billion (USD 1,122 million) due mainly to higher revenue from financial services led by favorable automobile sales in North America.

Nine-Month Results

Honda's consolidated net income for the fiscal nine months ended December 31, 2002 totaled JPY 309.9 billion (USD 2,585 million), an increase of 21.1% from the corresponding period of last year. Basic net income per Common Share for the fiscal nine months amounted to JPY 318.59 (USD 2.66), compared to JPY 262.72 for the corresponding period a year ago.

Unit sales of Honda's motorcycles, automobiles and power products increased and revenue for the fiscal nine months amounted to JPY 5,842.8 billion (USD 48,731 million), an increase of 11.1% from last year.

Revenue included positive effect of currency translation, and Honda estimates that had the exchange rate of the yen remained unchanged from the previous year, revenue for the year would have increased by approximately 9.9%.

Table of Contents

Consolidated operating income for the fiscal nine months totaled JPY 482.8 billion (USD 4,027 million), an increase of 2.7% compared to the corresponding period last year. Higher revenue from every product category, a weaker yen and Honda's continuing cost cutting strategies were the major contributing factors in this increase in operating income.

Consolidated income before income taxes for the fiscal nine months totaled JPY 432.4 billion (USD 3,606 million), an increase of 10.7% compared to the previous year.

With respect to Honda's sales for the nine-month period by business category, motorcycle unit sales increased by 38.4% to 6,012,000 units, and revenue increased 10.6% to JPY 715.0 billion (USD 5,964 million). Strong gains primarily in Asian countries outside Japan were more than enough to offset decreased revenue from Japan.

Honda's unit sales of automobiles increased by 8.7% to 2,108,000 units, and revenue increased 10.8% to JPY 4,728.9 billion (USD 39,441 million) for the nine-month period. Robust sales of light truck models such as the Pilot, CR-V and Odyssey in North America were the primary contributors to these increases.

Unit sales of power products totaled 2,868,000 units, an increase of 14.9% compared to the corresponding period of the previous year. Unit sales of general-purpose engines increased in North America, Europe and Japan. Revenue from other businesses, including power products and financial services, showed a 15.0% increase, amounting to JPY 398.8 billion (USD 3,326 million).

Table of Contents**Forecasts for the fiscal year ending March 31, 2003****FY2003 Forecasts for consolidated results**

	<u>In billions of yen</u>	<u>Changes from FY 2002</u>
Net sales and other operating revenue	8,000	+8.7%
Income before income taxes	610	+10.6%
Net income	430	+18.6%

FY2003 Forecasts for unconsolidated results

	<u>In billions of Yen</u>	<u>Changes from FY 2002</u>
Net sales	3,300	+2.8%
Ordinary profit	240	+9.6%
Net income	170	+26.0%

These forecasts are based on the assumption that the exchange rates for the yen to the U.S. dollar and the euro for the current fiscal year will average JPY 123 and JPY 115, respectively.

This announcement contains forward-looking statements within the meaning of Section 21E of the U.S. Securities Exchange Act of 1934. Honda's actual results could materially differ from those contained in these forward-looking statements as a result of numerous factors outside of Honda's control. Such factors include general economic conditions in Honda's principal markets, and foreign exchange rates between the Japanese yen and other major currencies, as well as other factors detailed from time to time in Honda's reports filed with the U.S. Securities and Exchange Commission.
