#### CALCULATION OF REGISTRATION FEE

- (1)Pursuant to rule 457(f)(1), the maximum aggregate offering price is based on the average of the high and low sales prices of Crested Corp. common stock as reported on OTCBB for the five trading days preceding September 17, 2007, and computed based on the estimated maximum number of 2,876,188 shares of U.S. Energy Corp. common stock that may be exchanged for the Crested Corp. common stock. The fee rate is \$30.70 per million dollars of the aggregate offering market price.
- (2)Represents the maximum number of shares issuable by U.S. Energy Corp. upon consummation of the merger with Crested Corp. U.S. Energy Corp. shall be the surviving entity in the merger.

**Delaying amendment under rule 473(a)**: The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall become effective in accordance with section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Commission, acting pursuant to section 8(a), may determine.

Information contained herein is subject to completion or amendment. A registration statement relating to these securities has been filed with the Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This prospectus shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale is not permitted or would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

### PRELIMINARY PROXY STATEMENT/PROSPECTUS DATED OCTOBER 22, 2007, SUBJECT TO COMPLETION MERGER PROPOSED—YOUR VOTE IS IMPORTANT

Dear Shareholders:

The boards of directors of Crested Corp. ("Crested") and U.S. Energy Corp. ("USE") have approved a merger of Crested with and into USE.

If the merger is completed, Crested shareholders (other than USE) will receive 1 share of USE's common stock (par value \$0.01 per share) for each 2 shares of Crested's common stock (par value \$0.001 per share), for a total of 2,876,188 shares of USE common stock. USE will receive no shares in the merger. The implied value of one share of Crested common stock on August 21, 2007, the last practicable trading day before the distribution of this proxy statement/prospectus, was \$2.37, based on the \$4.74 per share closing price of USE common stock on that date. This value will fluctuate prior to the completion of the merger. Crested's common stock is traded on the Over-the-Counter Bulletin Board under the symbol "CBAG".

USE has agreed to file an application with the Nasdaq Capital Market to have the shares of USE common stock issuable pursuant to the merger listed on Nasdaq under the symbol "USEG."

A maximum of 2,876,188 shares of USE common stock will be issued to Crested shareholders in the merger. These shares will represent approximately 12.1% of the outstanding common stock of USE after the merger on a pro forma basis as of August 21, 2007. We cannot complete the merger unless the holders of a majority of the shares of Crested common stock not held by USE and its directors and officers approve the merger agreement. Crested will hold a special meeting of its shareholders to vote on this proposal. Your vote is important. The place, date and time of the special meeting is as follows:

Crested Corp. 877 N. 8<sup>th</sup> W. Riverton, Wyoming 82501 \_\_\_\_\_, 2007 10:00 a.m., Local Time

The Crested directors unanimously recommend that the Crested shareholders vote "FOR" the adoption of the merger agreement.

Your participation in the special meeting, in person or by proxy, is encouraged. Whether or not you plan to attend the special meeting in person, we encourage you to complete, sign, date and return the enclosed proxy card promptly in the accompanying postage paid envelope. If you do not vote, you will have effectively voted against the merger.

USE, two affiliates of USE (Sutter Gold Mining Inc. and Plateau Resources Limited Inc.), and the USE officers and directors, current and retired, who own Crested stock, and the Crested directors have entered into a voting agreement with Crested. They have agreed to vote all shares of Crested's stock held by them consistent with the vote of the holders of a majority of the minority Crested shares. At August 21, 2007 USE, on a consolidated basis, owns approximately 70.1%, of the outstanding shares of Crested. The USE officers and directors and Crested directors own approximately 1.3% of Crested, and also own options to purchase another 1,170,000 shares of Crested stock (at \$1.71 per share); on a fully-diluted basis, the Crested and USE officers and directors own 3.0% of Crested's common stock.

This proxy statement/prospectus describes the special meeting, the merger, documents related to the merger and other related matters. **Please read this entire proxy statement/prospectus carefully, including the section discussing Risk Factors beginning on page** \_\_\_\_. You may also obtain information about USE and Crested from documents that the companies have each previously filed with the Securities and Exchange Commission, as described under "WHERE YOU CAN FIND MORE INFORMATION" on page \_\_\_\_ of this proxy statement/prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved the USE common stock to be issued under this proxy statement/ prospectus or determined if this proxy statement/prospectus is accurate or adequate. Any representation to the contrary is a criminal offense.

The date of this proxy statement/prospectus is \_\_\_\_\_\_, 2007, and it is first being mailed or otherwise delivered to Crested shareholders on or about \_\_\_\_\_\_, 2007.

iv

#### **ADDITIONAL INFORMATION**

This proxy statement/prospectus incorporates important business and financial information about USE from documents that are incorporated by reference but not delivered with this proxy statement/prospectus. You can obtain documents incorporated by reference in this proxy statement/prospectus by requesting them in writing or by telephone from USE.

U.S. Energy Corp. Attn: Robert Scott Lorimer, CFO/Treasurer 877 N. 8<sup>th</sup> W. Riverton, Wyoming 82501 Telephone 307.856.9271

Documents containing business and financial information about Crested which are not contained in this proxy statement/prospectus, but which are contained in exhibits filed with the Form S-4 registration statement, of which this proxy statement/prospectus is a part, may be obtained by writing or calling Crested at the address and telephone number listed above. No information about Crested is incorporated by reference into this proxy statement/prospectus.

You will not be charged for any of the documents you request. Crested shareholders requesting documents should do so not later than \_\_\_\_\_\_, 2007, in order to receive them before the special meeting].

#### **Important Proxy Submission Information**

Crested shareholders of record may submit their proxies by returning them to Crested Corp., 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501, Attn. Robert Scott Lorimer, CFO/Treasurer, in the return envelope provided to them. Crested shareholders may also vote their proxies at the meeting to be held at Crested's office, 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501, at 10:00 a.m., local time, on \_\_\_\_\_\_\_, 2007.

v

#### CRESTED CORP. 877 N. 8<sup>th</sup> W. Riverton, Wyoming 82501 NOTICE OF SPECIAL MEETING OF CRESTED SHAREHOLDERS TO BE HELD ON , 2007

Dear Shareholders:

NOTICE IS HEREBY GIVEN that a special meeting of Crested shareholders will be held at the offices of Crested, 877 N. 8<sup>th</sup> W., Riverton, Wyoming, at 10:00 a.m., local time, on \_\_\_\_\_\_, 2007. The purpose of the meeting is to consider and vote upon the following matters:

- a proposal to adopt the Agreement and Plan of Merger, dated as of January 23, 2007, and as amended on July 31, 2007, by and between Crested Corp., a Colorado corporation, and U.S. Energy Corp. ("USE"), a Wyoming corporation; and
- such other business as may properly come before the special meeting or any adjournment or postponement thereof.

In the merger, each 2 shares of Crested common stock will be converted into the right to receive 1 share of USE common stock, or a total of 2,876,188 shares, including 197,202 shares to be issued for the Crested shares underlying options to buy Crested shares held by employees, officers, directors and a retired officer of USE. Your attention is directed to the proxy statement/prospectus accompanying this notice for a discussion of the merger. A copy of the merger agreement is included as Appendix A to the accompanying proxy statement/prospectus.

Crested has fixed the close of business on October 10, 2007 as the record date for the Crested special meeting. Only Crested shareholders of record at such date will be entitled to receive notice of, and to vote at, the special meeting or any adjournment or postponement thereof. In order to adopt the merger agreement, holders of a majority of the outstanding shares of Crested common stock which are not held by USE, by its officers and directors, or by two subsidiaries of USE (Plateau Resources Limited, Inc. and Sutter Gold Mining Inc.), must vote to adopt the merger agreement. Your vote is important.

USE, its subsidiaries, its officers and directors and Crested's directors who own shares in Crested, have entered into a voting agreement (see Appendix B to this proxy statement/prospectus) by which they have agreed to vote all of their shares of Crested common stock consistent with the vote of the holders of a majority of the minority shareholders of Crested with respect to adoption of the merger agreement. Such shareholders hold approximately 71.4% of Crested's outstanding shares on a non-diluted basis (72.0% on a fully-diluted basis). A list of Crested shareholders entitled to vote at the special meeting will be available for inspection by any shareholder during regular business hours at Crested's offices, located at 877 N. 8<sup>h</sup> W., Riverton, Wyoming 82501, for 10 days prior to the date of the special meeting and will also be available at the special meeting.

All Crested shareholders entitled to notice of, and to vote at, the Crested special meeting are cordially invited to attend the Crested special meeting in person. However, to ensure your representation at the special meeting, please submit your proxy by mail with voting instructions. The submission of your proxy will not prevent you from voting in person. Any holder of Crested shares entitled to vote that is present at the Crested special meeting may vote in person instead of by proxy, thereby canceling any previous proxy. In any event, a proxy may be revoked in writing at any time before the vote is taken at the Crested special meeting.

All of Crested's directors have unanimously determined that the merger agreement and the merger are advisable, fair to, and in the best interests of Crested and its shareholders, and unanimously recommend that Crested shareholders vote "FOR" the adoption of the merger agreement.

YOUR VOTE IS IMPORTANT.

BY ORDER OF THE BOARD OF DIRECTORS, Harold F. Herron, President and Director \_\_\_\_\_\_, 2007

#### QUESTIONS AND ANSWERS ABOUT THE MERGER

The following are some questions you may have about the merger, and brief answers to those questions. You should read the remainder of this proxy statement/prospectus, and the attached documents and the documents that are incorporated by reference because the information in this section does not provide all the information that might be important to you with respect to the merger. The answers only summarize some of the information.

#### Q: Why am I receiving this proxy statement/prospectus?

A: Crested and USE have agreed to the acquisition of Crested by USE pursuant to the terms of a merger agreement, as amended, that is described in this proxy statement/prospectus. A copy of the merger agreement and the amendment is attached to this proxy statement/prospectus as Appendix A. In order to complete the merger, Crested shareholders holding a majority of the outstanding Crested shares, excluding the Crested shares owned by USE, by its subsidiaries, and by its officers and directors, must adopt the merger agreement and the transactions contemplated thereby. This proxy statement/prospectus contains important information about the merger, the merger agreement and the special meeting, which you should read carefully. The enclosed voting materials allow you to vote your shares without attending the special meeting. **Your vote is important.** USE, its subsidiaries, its officers and directors and Crested's directors who own Crested shares, have entered into a voting agreement with Crested, by which they have agreed to vote all of their shares of Crested common stock in line with the vote of the holders of a majority of the minority shares of Crested (i.e., all shares not held by USE, by its subsidiaries, and by its officers and directors), with respect to adoption of the merger agreement. A copy of the voting agreement is attached to this proxy statement/prospectus as Appendix B. At August 21, 2007 the minority Crested shareholders hold approximately 29.9% of the outstanding shares of Crested. We encourage you to vote or tender your proxy as soon as possible.

#### Q: Why is Crested proposing the merger?

A: Crested is proposing to merge for several reasons, including the belief of its board of directors that the merger is the best strategic alternative available for Crested. For more information, please see "Crested's Reasons for the Merger; Recommendation of Crested's Board of Directors."

#### **Q:** What will happen in the merger?

A: In the merger, Crested will merge into USE. USE will continue after the merger as the surviving entity, and Crested will cease to exist.

#### As a Crested shareholder, what will I receive in the merger?

**O**:

A: If the merger is completed, for every 2 shares of Crested common stock you own, you will receive 1 share of USE common stock.

If you own 500 or fewer Crested shares, you may elect to receive cash instead of shares of USE. The amount of cash would be based on the value of the USE shares you would receive, multiplied by the closing price of USE shares on the day the merger is completed. USE may determine to pay cash or issue shares to all Crested shareholders who have made such an election: If you make this election, and USE decides to pay cash, then USE will pay cash to everyone with 500 or fewer Crested shares who makes the election; if USE decides not to pay cash, then all of the electing persons will receive USE shares.

If none of the Crested minority shareholders elect to receive cash, then all of the Crested minority shareholders, and the employees and directors and officers of USE who now hold options to purchase Crested stock, will receive a total of 2,876,188 USE shares.

# Q: Will any of the officers, directors and employees of USE, or the independent directors of Crested, receive Crested shares in the merger?

A: Yes. The following table shows the number of Crested shares currently owned by USE officers and one retired USE officer as of August 21, 2007. The table also shows the ownership of Crested shares, if the merger with USE is successful, by (i) USE employees, (ii) USE officers, (iii) USE directors, (iv) a retired USE officer, (v) Crested directors, (vi) USE and (vii) USE consolidated subsidiaries. Percentage ownership of each group mentioned above is also shown before the merger and what it would be after the merger. Shares owned by USE employees, officers and directors post merger include shares which would be issued on a cashless exercise basis for options held by those individuals.

# Edgar Filing: US ENERGY CORP - Form S-4/A

USE						
Consolidated						
Ownership						
Total USE,						
USE						
Subsidiary,						
Employees,						
Officers and						
Directors of						
Crested and						
USE	12,406,974(3)	1,500,000	394,398	12,801,372	71.4%	72.0%
(1) Shares direct	ly owned by Danie	el P. Svilar, ret	ired USE			
and Crested Ger	neral Counsel.					
<sup>(2)</sup> Includes Daniel P. Svilar (200,000 options) who served as General Counsel						
	at January 12, 200	-				
	Director until reti			of options)		
January 6, 2007						

January 6, 2007.

<sup>(3)</sup> Subject to Voting Agreement to be voted with majority

of minority shareholders of Crested.

Immediately following, and as a result of the merger, the Crested minority shareholders (<u>other</u> than the officers, directors, and employees of USE, directors of Crested and USE consolidated subsidiaries) are expected to own about 10.4% of the total USE shares to be outstanding (on a pro forma basis as of August 21, 2007, when USE had 20,937,053 shares outstanding).

# **Q:** What are the principal risks relating to the merger?

A: If all of the conditions to the merger are not met, the merger will not occur. The merger agreement contains certain termination rights for both USE and Crested which, if exercised, could result in reimbursement to the other party of legal and advisory fees actually incurred relating to the merger. These and other risks are explained in the section entitled "Risk Factors—Risks Relating to the Merger" beginning on page 19 of this proxy statement/prospectus.

#### **Q:** Can the value of the transaction change between now and the time the merger is completed?

A: Yes. The value of the merger consideration (the USE shares) can change. The exchange ratio is fixed, meaning that every 2 issued and outstanding shares of Crested's common stock held by the minority shareholders will be converted into the right to receive 1 USE share, regardless of the trading price of USE common stock at the effective time of the merger. Because the market value of the USE shares to be issued in the merger may increase or decrease substantially as USE's trading price fluctuates, the value you receive may be worth more or less than it was when the merger agreement was signed, when you vote, when the merger is completed, or when you actually receive your shares. The future market price of USE shares is not predicted.

#### **Q:** When and where will the special meeting take place?

A: The Crested meeting will take place on \_\_\_\_\_, 2007, at 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501, at 10:00 am local time.

#### Q: Who is entitled to vote at the special meeting?

A: Holders of record of Crested shares as of the close of business on October 10, 2007 (the record date), are entitled to vote at the meeting. Each shareholder has one vote for each share of Crested that the shareholder owns on the record date.

#### **Q:** What vote is required to adopt the merger agreement?

A: The affirmative vote of the holders of a majority of Crested shares is required to adopt the merger agreement. The following table shows how we have calculated the vote required to approve the merger. Because the Crested options will not be exercised until after all Crested shareholders vote at the meeting, the shares underlying the Crested options are not shown in the table.

Number of Crested shares	
Outstanding at August 21, 2007	17,382,704
Deduct shares owned by:	
U.S. Energy Corp.	12,024,733
USE Officers	18,466
Retired USE Officer	147,850
Crested Directors	55,925
Plateau Resources, Ltd.	60,000
Sutter Gold Mining Company	100,000
	12,406,974
Crested shares owned by minority	
shareholders	4,975,730
Majority of Crested Minority Shareholders	2,487,866

Therefore, the affirmative vote of Crested minority shareholders (<u>not</u> including those who have entered into the voting agreement) holding 2,487,866 shares is needed to approve the merger. See "THE VOTING AGREEMENT" beginning on page 94.

# Q: How does the Crested board of directors recommend that Crested shareholders vote?

A: The Crested board of directors unanimously recommended that Crested shareholders vote **"FOR"** the adoption of the merger agreement. The two Crested shares for one USE share exchange ratio was negotiated between special committees of independent directors of the boards of Crested and USE, and approved by the full boards of directors of both companies.

# **Q:** Did the Crested and USE Boards receive opinions from financial advisors?

A. Yes. Neidiger, Tucker, Bruner, Inc. ("NTB") delivered its written opinion, dated January 22, 2007, to the special committee of the independent directors of Crested, to the board of directors of Crested, to the effect that, as of such date and based upon and subject to the factors, qualifications, limitations and assumptions set forth therein. NTB's opinion states that the exchange ratio is fair and reasonable from a financial point of view to the minority shareholders of Crested. As of October 12, 2007, NTB delivered an updated written opinion, as of that date, to the same effect. NTB has been paid a fee by Crested, none of which is contingent upon consummation of the merger.

Navigant Capital Advisors, LLC ("Navigant Capital") delivered its written opinion, dated January 23, 2007, to the board of directors of USE, to the effect that, as of such date and based upon and subject to the factors, qualifications, limitations and assumptions set forth therein, the exchange ratio is fair, from a financial point of view, to the shareholders of USE. As of October 12, 2007, Navigant Capital delivered an updated written opinion, as of that date, to the same effect. Navigant Capital has been paid a fee by USE, none of which is contingent upon consummation of the merger.

The full text of the written opinions of NTB and Navigant Capital, both dated October 12, 2007, which set forth the respective assumptions, matters considered and limitations on the reviews undertaken in connection with the opinions, are attached as Appendices C and D. Crested shareholders should read NTB's opinion in its entirety. Neither NTB's nor Navigant Capital's opinion is a recommendation as to how any holder of Crested shares should vote on the merger agreement.

#### Q: What do I need to do now?

A: After you have carefully read this entire document and such other information you deem appropriate, please vote your shares of Crested common stock. You may do this by completing, signing, dating and mailing the enclosed proxy card. A return envelope is enclosed. This will enable your shares to be represented and voted at the Crested special meeting.

#### Q: What if I do not vote, do not fully complete my proxy card, or fail to instruct my broker?

A: If you do not submit a proxy or instruct your broker how to vote your shares if your shares are held in "street name," and you do not vote in person at the special meeting, the effect will be the same as if you voted "AGAINST" the adoption of the merger agreement. If you submit a signed proxy without specifying the manner in which you would like your shares to be voted, your shares will be voted "FOR" the adoption of the merger agreement.

#### Q: If my shares are held in "street name" by my broker, will my broker automatically vote my shares for me?

A:No. Your broker will not be able to vote your shares without instructions from you. You should instruct your broker to vote your shares, and you should follow the directions your broker provides. Please refer to the voting form used by your broker to see if it offers telephone or Internet voting.

#### Q: What if I fail to instruct my broker?

A: If you fail to instruct your broker to vote your shares and the broker submits an unvoted proxy, the resulting broker "non-vote" will be counted toward a quorum at the respective special meeting, but the effect will be the same as if you voted "AGAINST" the adoption of the merger.

#### Q: Can I attend the special meeting and vote my shares in person?

A: Yes. Holders of record of Crested common stock are invited to attend the special meeting and to vote in person at the meeting. If a broker holds your shares, then you are not a record holder and you must ask your broker how you can vote in person at the special meeting.

# Q: Can I change my vote?

- A: Yes. If you have not voted through your broker, there are three ways you can change your proxy instructions after you have submitted your proxy card.
  - First, you may send a written notice revoking your proxy to the person to whom you submitted your proxy.
- Second, you may complete and submit a new proxy card. The latest proxy actually received from a Crested shareholder before the meeting will be counted, and any earlier proxy will automatically be revoked.
- Third, you may attend the Crested special meeting and vote in person. Any earlier proxy will thereby be automatically revoked. However, simply attending the meeting without voting will not revoke your proxy.
- If you have instructed a broker to vote your shares, you must follow the directions you receive from your broker in order to change or revoke your vote.

#### Q: When do you expect to complete the merger?

A: We expect to complete the merger in the fourth quarter of 2007. However, we cannot guarantee when or if the merger will occur.

#### Q: Will I have appraisal rights as a result of the merger?

A: Yes. Under Sections 7-113-101 to 7-113-302 of the Colorado Business Corporation Act, under certain circumstances, you are entitled to dissent from the merger and have the value of your Crested shares appraised.

#### **Q:** What are the tax consequences of the merger to me?

A: The merger is intended to qualify as a reorganization within the meaning of Section 368(a) of the Internal Revenue Code of 1986, as amended (the "Code"), so that for U.S. federal income tax purposes, you will not recognize gain or loss on the receipt of USE shares. Each of USE's and Crested's obligations under the merger agreement are conditioned on the receipt of opinions that the merger will qualify as a reorganization for United States federal income tax purposes.

For a more complete discussion of the United States federal income tax consequences of the merger, see "MATERIAL UNITED STATES FEDERAL INCOME TAX CONSEQUENCES OF THE MERGER" on page 97.

The tax consequences of the merger to you will depend on your particular facts and circumstances. Please consult your own tax advisor to determine your own tax consequences from the merger.

#### Q: Should I send in my stock certificates now?

A: No, you should not send in your stock certificates at this time. Crested shareholders will need to exchange their Crested stock certificates for USE shares after we complete the merger. USE will send you instructions for exchanging stock certificates at that time.

## Q: How will Crested shareholders receive the merger consideration?

A: Following the merger, you will receive a letter of transmittal and instructions on how to obtain the merger consideration in exchange for your Crested common stock. You must return the completed letter of transmittal and your Crested stock certificates as described in the instructions, and you will receive the merger consideration as soon as practicable after USE receives your completed letter of transmittal and Crested stock certificates. If you hold shares through a brokerage account, your broker will handle the surrender of stock certificates and the receipt of your merger consideration.

#### Q: Who will help answer my questions?

A: If you have any questions about the transaction or how to submit your proxy, or if you need additional copies of this proxy statement/prospectus, the enclosed proxy card, voting instructions, or the election form, you should contact Robert Scott Lorimer, CFO/Treasurer, Crested Corp., 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501, telephone 307.856.9271.

-7-

# Edgar Filing: US ENERGY CORP - Form S-4/A

#### SUMMARY

This summary generally highlights selected information from this proxy statement/prospectus. It does not contain all of the information that may be important to you. You should read carefully the entire document and the other documents referred to in this proxy statement/prospectus to fully understand the merger.

Information about the joint venture between U.S. Energy Corp. and Crested Corp. is set forth below. Some of the other items in the summary refer to the page where the subject is discussed in more detail. Other items are discussed only in the summary.

Summary information about USE follows. Detailed information can be found in the documents about USE that are incorporated by reference. See "WHERE YOU CAN FIND MORE INFORMATION." Detailed information about Crested is set forth under the caption "INFORMATION ABOUT CRESTED."

Information on USE's Internet website <u>www.usnrg.com</u> is not part of this proxy statement/prospectus and you should not rely on that information in deciding whether to adopt the merger agreement and approve the related transactions.

#### Parties to the Merger

The parties to the merger agreement are U.S. Energy Corp., a Wyoming corporation, and Crested Corp., a Colorado corporation. The companies share the same principal executive office and employees. Their address is:

U.S. Energy Corp. and Crested Corp. 877 N. 8<sup>th</sup> W. Riverton, Wyoming 82501 307.856.9271

#### **U.S. Energy Corp. – Selected Information**

The following summarizes some information about USE. For detailed information on its business, properties, and management, financial statements and management's discussion and analysis of financial condition and results of operations, please see the information incorporated by reference into this proxy statement/prospectus entitled "WHERE YOU CAN FIND MORE INFORMATION".

#### General

USE was formed in 1966 and is in the business of acquiring, exploring, developing and/or selling or leasing mineral and other properties. These properties have principally consisted of uranium, gold, molybdenum, and oil and gas.

-8-

Almost all of USE's business is conducted through a joint venture with Crested. USE and Crested were originally independent companies, with two common affiliates, John L. Larsen and Max T. Evans. Mr. Evans died in February 2002 and Mr. Larsen died in September 2006. In 1980, USE and Crested formed a joint venture (the "USECC Joint Venture", "USECC" or the "Joint Venture") to do business together unless one or the other elected not to pursue a specific project. Since 1993, USE has funded substantially all of Crested's obligations under the USECC Joint Venture because Crested has not had the capital to pay its share. Historically, Crested paid a portion of the advances from USE by issuing its common stock to USE. As of June 30, 2007, Crested owed USE a total of \$3,250,800. As of July 31, 2007, all of this amount was paid by Crested to USE with the cash proceeds it received from the sale of uranium assets, which Crested had jointly owned with USE. For a further discussion of the joint venture arrangement, see "The USECC Joint Venture" section below.

Typically, properties are acquired as part of specific mineral projects. Properties are initially acquired, financed and operated by and through the USECC Joint Venture. Management's strategy has been, and will continue to be, demonstrating prospective value in the properties sufficient to support substantial investments by investment groups, financial institutions and/or large industry partners, and then bring on long term development expertise to move the properties into production. Sales of the properties or subsidiaries also is a continuing alternative, as was effected with the 2005 sale of Rocky Mountain Gas, Inc. ("RMG"), and as was recently effected in April 2007 by the sale of the uranium assets to sxr Uranium One Inc. ("sxr" or "Uranium One," headquartered in Toronto, Canada with offices in South Africa and Australia (Toronto Stock Exchange and Johannesburg Stock Exchange, "SXR")), as discussed further below.

To demonstrate prospective value, management may have feasibility studies conducted by independent engineering firms, to determine the economic feasibility, calculated at commodity prices existing at the time, of various mine plans and processing (milling) facilities. In some instances, significant additional exploratory drilling may have to be done to further delineate grades as well as the extent of the minerals in the ground, if any.

The principal uncertainties in the successful implementation of the strategy are:

- whether feasibility studies will show, for any of the properties, that the minerals can be mined and processed profitably;
- commodity prices for gold, uranium, molybdic oxide, as well as oil and gas must be at levels so the properties can be exploited at a profit; and
- whether the feasibility studies will show volume and grades of mineralization, and manageable costs of development, mining and processing, which are sufficient to bring industry partners to the point of investment.

To some extent, the economic feasibility of a particular property can change with modifications to the mine processing plans (for example, to add or not add a circuit to process a particular mineral, enlarge or reduce the production rate and/or the mine plan, etc.) Overall, however, the principal drivers to attainment of the business strategy are the quality of the minerals in the ground, the cost to extract the minerals, and international commodity prices.

Some of the projects are transferred to new companies, with the objective of obtaining capital from an outside source for further development and/or joint venturing with other companies. Examples include: Sutter Gold Mining, Inc, ("SGMI") for gold, and RMG for coalbed methane gas ("CBM") which was sold in 2005.

As of the date of this proxy statement/prospectus, the only remaining substantial mineral asset is the Lucky Jack molybdenum property (the "Lucky Jack Property"), in which Kobex Resources Ltd. ("Kobex") has an option to acquire a substantial interest by funding mine development costs and other expenditures. If Kobex does not exercise its option to acquire an interest in the Lucky Jack Property, USE and Crested will pursue other alternatives for that property, including sale to third parties, a joint venture with another company, and raising capital for USE and Crested to continue development and exploitation on their own. If the merger of Crested is not consummated, Crested, as a result of its ownership percentage of the Lucky Jack Property, will participate in these activities, but its lack of capital may limit its ability to do so. If the merger is unsuccessful, USE may elect to not continue funding Crested's portion of costs which may cause Crested to either raise its own participating capital or become diluted.

USE and Crested intend to remain active in the minerals industry, and now are exploring various opportunities to acquire additional mineral properties, and other business opportunities. USE recently entered into a contract to acquire oil and gas leases with an industry partner. These properties are currently under evaluation for drilling and development of producing oil and gas wells. In the event that the merger with Crested is not closed, USE has agreed to offer, on a cost basis, a 50% interest in the oil and gas properties to Crested. Except for real estate in Gillette, Wyoming which has been purchased to develop multifamily housing to serve the demographics of the energy business in Wyoming and the oil and gas leases owned by USE, there are no contracts or agreements in principle to acquire mineral properties or participate in other business opportunities by USECC, or USE and Crested jointly or separately.

# The USECC Joint Venture

Under the USECC Joint Venture as originally conceived, if either USE or Crested had a business opportunity, the proposal would be presented to the other party with the opportunity to participate equally on a 50%-50% basis. The USECC Joint Venture was signed in 1982 and has not been amended since that time. Mineral or other assets have been acquired by the USECC Joint Venture and the companies have shared exploration and development costs. From time to time, USECC or USE and Crested have contributed a group of assets to a newly formed corporation for equal equity stakes, then the new corporation had the potential of raising debt or additional equity capital to continue exploration and development of the assets, and acquire more assets.

Examples of the operation of the USECC Joint Venture have been SGMI, RMG (sold in 2005), uranium properties, and the Lucky Jack Property. Historically, a disproportionate amount of the costs for each of these projects have been paid by USE. USE's interests in RMG and SGMI were increased to reflect its funding in these projects: USE and Crested own 48.8% and 5.7% of SGMI, and the proceeds as between USE and Crested from the 2005 sale of RMG reflected their disproportionate interests in RMG (65% and 35%) at the time of sale.

As of June 30, 2007, Crested owed USE \$3,250,800 as a result of USE paying Crested's share of expenses related to RMG, SGMI, the uranium properties and the Lucky Jack Property, as well as Crested's shares of administrative and legal costs (including the legal costs for the 15 -year litigation with Nukem Inc. over a partnership owned by Nukem, USE and Crested), and other business activities. This amount is net of Crested issuing a total of 6,666,666 shares of common stock (during its former fiscal year ended May 31, 2001) to USE, for which it received a \$3,000,000 reduction of its debt to USE. The Crested shares were issued at the then-current market prices for Crested stock. USE has not charged interest on the debt incurred by Crested. As of July 31, 2007, Crested completely paid off the remaining debt to USE with cash proceeds Crested received from the sale of its interests in uranium assets to Uranium One. See "sxr Uranium One – Uranium Assets" below.

This table shows the amounts owed by Crested to USE at July 31, 2007, June 30, 2007, March 31, 2007, December 31, 2006, 2005, 2004, 2003, and 2002, and at May 31, 2002. Crested and USE changed their fiscal year end from May 31 to December 31 in 2002.

July 31, 2007	\$ -
June 30, 2007	\$ 3,250,800
March 31, 2007	\$12,963,900
December 31, 2006	\$13,277,200
December 31, 2005	\$10,821,800
December 31, 2004	\$ 9,650,900
December 31, 2003	\$ 9,480,300
December 31, 2002	\$ 8,553,900
May 31, 2002	\$ 7,560,700

Crested has no employees, and relies on USE employees for all services. USE funds payroll and benefits for all employees, and charges Crested one-half of the amount it pays for payroll expenses each year. The only compensation arrangement in place for Crested as a stand -alone company is its incentive stock option plan, adopted in 2004, under which the Crested and USE officers, directors, and employees hold options, which are in addition to any options held under the USE incentive stock option plan.

If the merger is consummated, Crested will cease to exist, and all of its assets and liabilities will belong to USE, and the Joint Venture will be terminated and all its assets and liabilities will belong to USE. If the merger is not consummated, Crested may need to seek other sources of capital.

#### **Recent Significant Transactions**

**Sutter Gold Mining Inc.** USE and Crested organized a limited liability company in 1994 to hold and develop its California gold properties. The assets were transferred to Sutter Gold Mining Company, and activities were funded by continued capital from USE and third party investors. In 2004, the corporation completed a reverse takeover of Globemin Resources Inc., changed Globemin's name to Sutter Gold Mining Inc. ("Sutter" or "SGMI"), is listed on the Toronto Venture Exchange as "SGMI", and has raised additional capital from third party investors.

On March 14, 2007 the independent directors of USE, Crested and Sutter negotiated a settlement of \$2,025,700 in debt due to USE and Crested as of December 31, 2006 for the issuance of 7,621,868 shares of Sutter common stock. The issuance of these shares was subject to the approval of the Toronto Stock Exchange ("TSX") which was obtained on May 2, 2007.

In addition, USE and Crested agreed to convert the \$4.6 million Contingent Stock Purchase Warrant they held to purchase common stock in SGMI, into a 5% Net Profits Interest Royalty ("NPIR") on its Lincoln Project in California, until the total amount of \$4.6 million is paid, and a 1% NPIR thereafter.

The USECC Joint Venture also is providing, by a Line of Credit and Loan Agreement, dated June 20, 2007, a \$1 million line of credit to SGMI at 12% interest (interest payable quarterly). Maturity of all debt incurred under the line of credit is due June 20, 2009; prepayment without penalty is allowed. The debt is secured by SGMI properties. The USECC Joint Venture has the sole option to have SGMI repay the principal amount of the debt in cash, common shares of SGMI or by returning shares SGMI owns of USE and Crested; however, interest is not payable in shares. If the principal is paid in shares of SGMI common stock, such shares would be issued at a 10% discount to the 10 days' volume weighted average price before payment.

**Rocky Mountain Gas, Inc.– Coalbed Methane**. From 1999 through mid-2005, USE participated in the Coalbed Methane business ("CBM") through RMG, which was formed in 1999 by USE and Crested. In 2001, RMG entered into a CBM property acquisition and development arrangement with a subsidiary of Carrizo Oil & Gas, a public Houston-based company. In 2003, RMG and the Carrizo subsidiary contributed CBM properties to a new corporation, Pinnacle Gas Resources, Inc., in exchange for Pinnacle common stock issued to USE and Crested, and Carrizo. At the same time, Pinnacle received financing from funds affiliated with DLJ Merchant Banking. In September 2006, USE and Crested sold their Pinnacle shares in a private transaction for \$13.8 million.

USE and Crested sold RMG to Enterra Energy Trust on June 1, 2005 in exchange for approximately \$20 million in cash and securities of Enterra, which securities were subsequently sold.

#### sxr Uranium One – Uranium Assets

On April 30, 2007, USE and Crested and certain of their private subsidiary companies, completed the sale of these uranium assets contemplated by the February 22, 2007 Asset Purchase Agreement (the "APA") with Uranium One, and certain of its private subsidiary companies. As used in this report, Uranium One refers to that entity as well as its subsidiaries that are parties to the APA, and USE and Crested refer to those entities, as well as their subsidiaries that are parties to the APA. The APA is an exhibit to the Form 8-K filed on February 23, 2007.

At closing, USE and Crested sold their uranium assets, including the Shootaring Canyon uranium mill in Utah, unpatented uranium claims in Wyoming, Colorado, Arizona and Utah and geological data related to the sold claims, and USE and Crested's contractual rights with Uranium Power Corp. ("UPC"), to subsidiaries of Uranium One, for consideration (purchase price) comprised of:

#### Consideration received at closing:

#### Cash and Uranium One stock:

- \$750,000 cash (paid in advance on July 13, 2006) and recorded as a refundable deposit.
- 6,607,605 Uranium One common shares. On April 30, 2007, the Uranium One common shares closed at CAD\$16.65 per share on the TSX (approximately US\$15.04).
- \$6,606,000 cash, comprised of (i) \$5,020,900 as a "UPC-Related Payment" to pay USE and Crested for transferring to Uranium One their contractual rights with UPC; and (ii) \$1,585,100 in reimbursements for USE's and Crested's property expenditures from July 10, 2006.

# (i) <u>UPC-Related Payment</u>:

• \$3,013,600 as the net present value of \$3,100,000 in future cash payments owed by UPC to USE and Crested under the purchase and sale agreement for UPC to buy a 50% interest in certain of USE and Crested's mining properties as well as the mining venture agreement between USE and Crested, and UPC, to acquire and develop additional properties, and other agreements. At February 22, 2007, the future payments amount was \$4,100,000; however, prior to the Closing of the APA, UPC paid USE and Crested \$1,000,000 of that amount.

-12-

and

• \$2,007,300 as the net present value of the 1,500,000 shares of UPC stock to have been issued in the future by UPC to USE and Crested under the purchase and sale agreement. The UPC stock was priced at a 5.25% annual discount rate applied to the volume weighted average closing price of UPC stock for the ten trading days ended April 25, 2007.

### (ii) <u>Reimbursements</u>:

• \$1,585,100 for property acquisition and exploration costs, and Shootaring Mill holding expenses.

Net cash paid to USE and Crested was \$6,602,700 after deduction of \$3,300 for pro rated property taxes paid by USE and Crested. Of the cash paid as reimbursable costs, \$88,000 was escrowed for resolution of work related to some of the mining claims.

## Kobex Resources Ltd. - Molybdenum

On October 4, 2006, USE and Crested, and Kobex Resources Ltd. ("Kobex" or "KBX"), a British Columbia company traded on the TSX Venture Exchange under the symbol "KBX," signed a Letter Agreement relating to the Lucky Jack Property. The parties signed an amendment on December 7, 2006, and on April 3, 2007, signed a formal Exploration, Development and Mine Operating Agreement, which replaced the Letter Agreement. Kobex has the right to acquire an option to purchase up to a 50% interest in the Lucky Jack Property. The total cost to Kobex, over a period of five years, to exercise the full option, will be \$50 million in option payments, property expenditures, and a bankable feasibility study, plus a differential payment, if option payments, expenditures and a bankable feasibility study total less than \$50 million. At the operation of USE and Crested, Kobex also may acquire an additional 15% interest (for a total of 65%) after it has earned its 50% interest. When Kobex has earned 50%, USE and Crested will have the right to form a joint venture for the property with Kobex.

In May 2007, Kobex paid the first option payment of US\$750,000 by issuing 285,626 shares of Kobex common stock (142,813 shares to each of USE and Crested), valued at the market price for Kobex stock on May 22, 2007.

For details on the Kobex agreement, please see "WHERE YOU CAN FIND MORE INFORMATION." A summary is also provided under the caption "INFORMATION ABOUT CRESTED – Kobex Resources Ltd.- Molybdenum"

# **Crested Corp.**

Crested is also based in Riverton, Wyoming, and was organized in 1970. Crested was engaged in its own mineral properties business for many years. In the late 1970s, USE and Crested owned molybdenum properties near Crested Butte, Colorado, and sold those properties to Amax, Inc. In 1980, USE and Crested entered into the USECC Joint Venture. See "The USECC Joint Venture" discussion above.

• Crested's principal asset is its ownership, with USE, of the Lucky Jack Property's patented and unpatented molybdenum claims located near Crested Butte, Colorado, and a related water treatment plant which is located on several of the claims.

See "INFORMATION ABOUT CRESTED" for more information on Crested's properties and business, and other information.

#### Reasons for the Merger and Crested's Recommendation to Shareholders (page 97)

USE's board of directors approved the merger because it will:

- eliminate the cost of paying for Crested's operations. The primary costs and expenses which will be eliminated are those related to regulatory reporting, audits, and administrative time consumed in the management of Crested;
  - increase USE's working capital; and
- improve how USE is perceived in the stock market and possibly increase USE's ability to raise capital. Management believes that USE's majority ownership of Crested and the operation of the Joint Venture, when Crested has no business operations separate from USE, is perceived by the marketplace to be complex and unwieldy.
  - Crested's board of directors approved the merger because, among other things:
- the merger will maximize value to the Crested shareholders, because the combined assets will be administered by one company, under one set of officers, directors, and dedicated employees; and
- there will be substantially more liquidity for the minority shareholders to trade in USE stock as compared to Crested.
- If the merger is not completed, Crested may not have sufficient capital to succeed as an independent public company without the continued funding of USE. If the merger is not completed, Crested may no longer have the benefit of the USE employees, and Crested may have to establish separate administrative offices and hire independent officers, which would substantially increase its expenses. The Crested board of directors, consistent with the recommendation of the special committee of independent Crested directors, has recommended that the minority shareholders of Crested vote "FOR" the merger as being in their best interest.

#### The Merger (page 72)

If the merger is approved, Crested will merge with and into USE pursuant to the terms of the merger agreement. USE will be the surviving entity and will succeed to and assume all the rights and obligations of Crested. The merger agreement is attached as Appendix A. You should read the entire agreement because it is the legal document governing the merger.

The merger agreement contains customary representations and warranties by USE and Crested; sets forth certain conditions that must be satisfied prior to closing (even if the Crested minority shareholders approve the merger agreement); provisions for termination of the merger agreement by either USE or Crested; payment of termination fees under specified circumstances if the merger agreement is terminated, and other matters. For a summary of these and other terms of the merger agreement, see "Merger Agreement" at page 90.

-14-

#### Merger Consideration (page 87)

As a result of the merger, each 2 shares of Crested common stock issued and outstanding immediately prior to the effective time of the merger will be converted at the effective time into the right to receive 1 share of USE (a total of 2,876,188 USE shares, which includes 197,202 shares for the conversion of 1,500,000 options held by USE employees, directors, officers and a recently-retired USE officer. Upon completion of the merger, the Crested minority shareholders (including USE consolidated subsidiaries, USE officers, a retired USE officer, USE directors and employees of USE along with shares of USE held in retirement plans for employees and directors of Crested) will own approximately 19.0% of USE. The 197,202 shares to be received from the cashless exercise of Crested options which are then converted to shares of USE and the exchange of Crested shares owned by USE officers, a retired USE officer, uSE consolidated subsidiaries and Crested directors which will result in an additional 111,121 USE shares will represent an ownership of .3% of the USE shares outstanding post merger which is included in the 19.0% ownership of USE by minority shareholders. These percentages are based on the USE shares outstanding at August 21, 2007. USE will not issue fractional shares; instead, any fractional share will be rounded up to a full USE share.

#### Share Information and Comparative Market Prices (pages 34-36)

USE common stock is listed on the Nasdaq Capital Market ("Nasdaq") under the symbol "USEG." Crested common stock is listed on the Over-the-Counter Bulletin Board under the symbol "CBAG." The following table shows closing sale prices of USE common stock and Crested common stock as reported on January 22, 2007 (the trading day before public announcement of the signing of the merger agreement), March 30, 2007, June 29, 2007 and on August 21, 2007, the last practicable trading day before the distribution of this proxy statement/prospectus. The table also shows the implied value of one share of Crested common stock, which was calculated by dividing the closing USE price by two.

	Co S Pri	USE Common Stock Price per Share		Crested Common Stock Price per Share		nplied Ilue of One are of rested mmon
January 22, 2007	\$	4.63	\$	2.25	\$	2.32
March 30, 2007	\$	5.32	\$	2.62	\$	2.66
June 29, 2007	\$	5.38	\$	2.53	\$	2.69
August 21, 2007	\$	4.74	\$	2.35	\$	2.37

The market prices of USE common stock and Crested common stock will fluctuate prior to the merger. You should obtain current market quotations before voting.

#### Material United States Federal Income Tax Consequences of the Merger to Crested Shareholders (page 97)

The merger is intended to qualify as a reorganization within the meaning of Section 368(a) of the Code, so that for U.S. federal income tax purposes you will not recognize gain or loss on the receipt of USE shares as part of the merger consideration. The merger is conditioned on the receipt of an opinion from Conrad Henderson, LLC, certified public accountants, that the merger will qualify as a reorganization for United States federal income tax

purposes. The officers, directors and employees of USE will recognize gain on the receipt of the USE shares they exchange for the Crested shares acquired on exercise of non-qualified Crested options.

-15-

If you own 500 or fewer shares of Crested and elect to receive cash instead of USE shares, and USE determines to pay cash to all such electing persons, you will recognize gain or loss depending on your basis in your Crested shares.

For a more complete discussion of the United States federal income tax consequences of the merger, see "MATERIAL UNITED STATES FEDERAL INCOME TAX CONSEQUENCES OF THE MERGER."

# Tax matters can be complicated and the tax consequences of the merger to Crested shareholders will depend on each shareholder's particular tax situation. Crested shareholders should consult their tax advisors to understand fully the tax consequences of the merger to them.

#### **Opinion of the Crested Financial Advisor (page 79)**

In connection with the merger, the Crested board of directors appointed its two independent directors to comprise the special committee of the board of directors for Crested. The Crested special committee retained Neidiger, Tucker, Bruner Inc. ("NTB") as its independent financial advisor. Crested's special committee of the board of directors has received NTB's written opinion as to the fairness, from a financial point of view, of the merger consideration to be received by the holders of Crested common stock, other than USE holders, subject to the assumptions and qualifications in such opinion. The full text of NTB's opinion, dated October 12, 2007, is, as authorized by NTB, attached to this proxy statement/prospectus as Appendix C. You are encouraged to read the NTB opinion carefully in its entirety for a description of the assumptions made, procedures followed, matters considered and limitations on the review undertaken. NTB's opinion was provided to the Crested board in its evaluation of the proposed merger. The opinion does not address any other aspect of the merger or any related transaction and does not constitute a recommendation to any Crested shareholder with respect to any matters relating to the proposed merger.

#### Crested Shareholders Have Dissenters' Rights of Appraisal (page 95)

Under the Colorado Business Corporation Act, Crested shareholders have the right to dissent from the merger and seek payment in cash of the fair value of their Crested shares. See "DISSENTERS' RIGHTS" on page 95.

#### The Voting Agreement (page 94)

The voting agreement is attached as Appendix B. We urge you to read this agreement as it governs how the Crested shares held by USE and by some of the affiliates of USE are to be voted.

#### Conditions that Must Be Satisfied or Waived for the Merger to Occur (page 92)

As more fully described in this proxy statement/prospectus and the merger agreement, the completion of the merger depends on a number of conditions being satisfied or waived, including receipt of Crested shareholder approval and effectiveness of this registration statement.

Although we expect to complete the merger in the fourth quarter of 2007, we cannot be certain when, or if, the merger will be completed.

-16-

#### **Termination of the Merger Agreement (page 93)**

The merger agreement may be terminated before the special meeting under specific conditions. In addition, even if the minority shareholders of Crested adopt the merger agreement, the merger agreement may be terminated by mutual written consent, or for other reasons. Under certain circumstances, termination fees would have to be paid. See "THE MERGER AGEEMENT" on page 90 of this proxy statement/prospectus.

#### Crested's and USE's Directors and Officers Have Financial Interests in the Merger (page 88)

All of Crested's directors and officers have interests in the merger as individuals. In addition, the Crested officers and directors who also serve as officers and directors of USE hold options to buy Crested shares and two officers own Crested shares now. The Crested independent directors own shares of Crested, and, like the officers and other directors, will receive USE shares, on the same exchange ratio as all other Crested shareholders, in the merger, if it is consummated. Under the merger agreement, all of the Crested officers and directors are entitled to indemnification by USE for events related to the merger.

All but one of the USE directors and officers, several of whom also are directors and officers of Crested, hold qualified and nonqualified options to buy Crested stock. A recently retired officer of USE and Crested (Daniel P. Svilar) and a recently retired director of USE (Don C. Anderson) also hold qualified and nonqualified Crested options. If the merger is completed, the options will be exercised on a cashless basis and the Crested shares will be converted to USE shares using the same 2:1 exchange ratio as applies to the minority Crested shareholders. Crested will pay the income taxes which will be owed on cashless exercise of the nonqualified Crested options by such persons as well as USE officers.

The independent directors, as members of Crested's special committee, were aware of all these factors and considered them in approving the merger agreement and the amendment thereto.

# The Rights of Crested Shareholders Will Be Governed by Different Laws and New Governing Documents After the Merger (page 100)

USE is a Wyoming corporation and Crested is a Colorado corporation. After the merger, Crested shareholders will own stock in a Wyoming corporation, and their rights will differ in some significant respects from their current rights in Colorado corporation.

USE is listed on the Nasdaq Capital Market, and Crested is traded on the Over-the-Counter Bulletin Board. As shareholders of USE after the merger, Crested shareholders will have the right to vote on certain matters under the Nasdaq Market Place rules. These rules do not apply to OTCBB traded companies.

#### Accounting Treatment of the Merger by USE (page 97)

USE will account for the merger as a purchase for financial reporting purposes.

#### **USE Shareholder Approval Is Not Required**

USE shareholders are not required to approve the issuance of the USE shares in the merger, and the board of directors of USE will not ask the USE shareholders to vote on the merger agreement.

## **Regulatory Requirements**

Other than approval of the registration statement by the Securities and Exchange Commission, of which this proxy statement/prospectus is a part, neither USE nor Crested is aware of any federal or state regulatory requirements that must be complied with or approval that must be obtained in connection with the merger.

### **Risk Factors (page 19)**

In evaluating the merger and the merger agreement and before deciding how to vote your Crested shares, please carefully read this proxy statement/prospectus and especially consider certain factors, risks and uncertainties discussed in the section entitled "RISK FACTORS" beginning on page 19.

### **Restrictions on the Ability to Sell USE Common Stock**

All the USE shares which you receive in the merger will be freely transferable unless you are considered an "affiliate" of either Crested or USE under the Securities Act of 1933 (the "Securities Act"). Affiliates will be permitted to sell the USE shares they acquire in the merger under the SEC's rules 144 and 145. The volume limitations, notice of sale and other requirements of the rule would have to be satisfied for such sales, but the two-year holding requirement of the rule will not apply. This proxy statement/ prospectus does not register the resale of USE shares held by affiliates.

### **Surrender of Stock Certificates**

Following the effective time of the merger, USE will cause a letter of transmittal to be mailed to all holders of Crested shares containing instructions for surrendering their certificates. Certificates should not be surrendered until the letter of transmittal is received, fully completed and returned.

### The Special Meeting of Crested Shareholders (page 69)

The special meeting of the Crested shareholders will be held on \_\_\_\_\_\_, 2007, at 10:00 a.m., local time, at the offices of Crested , 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501.

The purpose of the meeting is to consider and vote upon (i) a proposal to adopt the merger agreement and (ii) such other business as may properly come before the meeting or any adjournment or postponement of the meeting.

Crested's board of directors has fixed the close of business on October 10, 2007 as the record date for determination of Crested shareholders entitled to notice of and to vote at the meeting. As of the close of business on October 10, 2007, there were 17,382,704 shares of Crested outstanding, which were held of record by approximately 1,618 shareholders. A majority of these shares, present in person or represented by proxy, will constitute a quorum for the transaction of business at the meeting. Each Crested shareholder is entitled to one vote for each share of Crested held as of the record date.

Adoption of the merger agreement by the holders of a majority of the Crested shares outstanding on the record date is required by Colorado law. The merger agreement requires approval by the holders of a majority of the minority shares of Crested; 2,487,866 shares constitutes such "majority of the minority" (not including those who have agreed to vote "in line" with the vote of the majority of the minority).

USE, its consolidated subsidiaries, those of its officers, a retired USE officer the USE directors, and the Crested directors, who own Crested stock, have agreed to vote consistent with the majority of the minority. As of August 21, 2007 USE and such persons together own 71.4% of the Crested shares. In the event that the merger is consummated officers, directors and employees of USE will be allowed to exercise their options on a cashless basis and receive an additional 394,398 shares of Crested for a total ownership by USE, its consolidated subsidiaries, its officers, directors, employees, and the Crested directors of 72.0% of the outstanding Crested shares immediately prior to the merger. Please see "THE VOTING AGREEMENT" beginning on page 93.

### **RISK FACTORS**

Before you vote, carefully consider the risks described below in addition to the other information in this proxy statement/prospectus, including the section entitled "Cautionary Statement Regarding Forward-Looking Statements." By voting in favor of the merger, you will be choosing to invest in USE's common stock. If any of the following risks actually occur, USE's business, financial condition or results of operations could be materially adversely affected, the value of USE's shares could decline, and you could lose all or part of your investment.

### **Risks Relating to the Merger**

# The value of the USE shares that you will receive in the merger may vary as a result of the fixed exchange ratio and fluctuations in the price of USE's stock.

The 2 Crested shares for 1 USE share exchange ratio is fixed. When the exchange ratio was approved by the two companies' boards of directors on December 20, 2006, the ratio represented a premium of about 12% in the value of the Crested minority shares (if the merger had closed that day) to the relative stock prices between the two companies for the 30 days ended December 18, 2006.

You may not realize this premium when you sell your USE shares. If USE's market price decreases before the merger is consummated, the value of the merger consideration to be received by Crested shareholders will decrease. Stock price variations could be the result of changes in the business, operations or prospects of USE, market assessments of when the merger will be completed, general market and economic conditions, and other factors which are beyond the control of USE or Crested. Please see recent market prices for USE and Crested stock under "COMPARATIVE MARKET PRICES AND DIVIDENDS."

### If the conditions to the merger are not met, the merger may not occur.

Specific conditions in the merger agreement must be satisfied or waived to complete the merger. If the conditions are not satisfied or waived, to the extent permitted by law, the merger will not occur, and each of USE and Crested may lose some or all of the intended benefits of the merger. The following conditions, in addition to other customary closing conditions, must be satisfied or waived before USE and Crested are obligated to complete the merger:

- there is no temporary restraining order, preliminary or permanent injunction or other order or decree issued by any court of competent jurisdiction or other statute, law, rule, legal restraint or prohibition in effect preventing the completion of the merger;
- USE's shares to be issued in the merger have been approved for listing on Nasdaq, subject to official notice of issuance;

- the merger agreement is adopted by the holders of a majority of minority shares of Crested;
  - holders of not more than 200,000 Crested shares have dissented from the merger; and
- at any time before consummation of the merger, USE's closing stock price has not been 20% more or less than the 2-to-1 exchange ratio as applied to the Crested stock price, for two or more consecutive trading days, and neither USE or Crested has terminated the merger agreement. For example, if Crested's price per share is \$2.40, the implied value for two Crested shares under the exchange ratio would be \$4.80. Under those circumstances, if USE's price is more than \$5.768 and Crested's price stays at \$2.40, or if Crested's price decreases to less than \$3.84, then the merger agreement could be terminated by either USE or Crested.

### Crested may waive one or more of the conditions to the merger without re-soliciting shareholder approval.

Each of the conditions to Crested's obligations to complete the merger may be waived, in whole or in part, by agreement of USE and Crested if the condition is an obligation of both to complete the merger. The board of directors of Crested may evaluate the materiality of any such waiver to determine whether an amendment of this proxy statement/prospectus and re-solicitation of proxies is necessary. Crested generally does not expect any such waiver to be significant enough to require re-solicitation. In the event that any such waiver is not determined to be significant enough to require re-solicitation of shareholders, the companies will have the discretion to complete the merger without seeking further shareholder approval.

# Directors and executive officers of Crested may have potential conflicts of interest in recommending that you vote in favor of the merger.

The directors and officers of Crested have interests in the merger that are in addition to the interests of the minority Crested shareholders. See "THE MERGER- Crested's Directors and Officers Have Financial Interests in the Merger" on page 88.

### The merger agreement restricts Crested's ability to pursue alternatives to the merger.

The merger agreement contains a "no shop" provision that, subject to limited fiduciary exceptions, restricts Crested's ability directly or indirectly to initiate, solicit, encourage or facilitate, discuss or commit to competing third-party proposals to acquire all or a significant part of Crested. Further, there are only limited exceptions to Crested's agreement that the Crested board of directors will not withdraw, modify or qualify in a manner adverse to USE its adoption of the merger or its recommendation to holders of Crested stock that they vote in favor of the adoption of the merger, or recommend any acquisition proposal. Although the Crested board of directors to comply with its fiduciary duties, doing so in specified situations could entitle USE to terminate the merger agreement and to be paid by Crested a termination fee of 50% of USE's legal and financial advisory fees.

USE required that Crested agree to these provisions as a condition to USE's willingness to enter into the merger agreement. These provisions could discourage a potential competing acquiror that might have an interest in acquiring all or a significant part of Crested from considering or proposing an acquisition, even if it were prepared to pay consideration with a higher market value than the consideration USE proposes to pay in the merger, or might result in a potential competing acquiror proposing to pay a lower per share price to acquire Crested than it might otherwise have proposed to pay due to the added expense of the termination fee.

### **Risks Relating to USE's Business**

### USE has a history of operating losses.

At June 30, USE had \$16,743,400 retained earnings compared with an accumulated deficit of \$39,101,900 at December 31, 2006. During the first quarter of 2007 (ended March 31, 2007), USE recorded a net loss of \$1,318,200 and during the second quarter of 2007 (ended June 30, 2007), USE recorded a gain of \$59,295,400. During the six months ended June 30, 2007 USE recorded a loss from continuing operations of \$11,462,500 and a net gain of \$57,977,200. For the year ended December 31, 2006, USE recorded a loss before a benefit from income taxes of \$14,279,400 and a net gain after benefit from income taxes of \$1,052,200. The large change in earnings from quarter to quarter is the nature of the USE business model of acquiring, holding and selling mineral properties. The process from acquisition of the properties until ultimate sale is capital intensive and often takes years to complete.

Working capital at June 30, 2007 and December 31, 2006 was \$86,664,100 and \$31,730,000, respectively. Historically, working capital needs have been primarily met from receipt of funds from liquidating investments, selling partial interests in mineral properties and selling equity. Although USE received significant cash proceeds from the sale of the uranium properties in April 2007, and has received additional cash from selling the Uranium One shares, the development and production of mineral properties is very capital intensive. The Luck Jack Property will take significant amounts of capital to place it into production. USE may seek equity and/or debt financing for this purpose, which may result in dilution to current shareholders. Please see the risk factor below captioned "Future equity transactions, including exercise of options or warrants, could result in dilution; and registration for public resale of the common stock in these transactions may depress stock prices."

### No recurring business revenues and uncertainties associated with transaction-based revenues.

Presently USE does not have an operating business with recurring revenues. Receipt of funds from selling interests in mineral properties, or liquidating investments in mineral properties (or the subsidiaries which hold properties) is unpredictable as to timing, structure, and profitability. For example, we began activities in the coalbed methane sector in 1999 by starting up RMG. RMG used, rather than provided, capital until it was sold to Enterra Energy Trust in June 2005. In 2003, we acquired stock in Pinnacle by RMG's contribution of properties into Pinnacle, but we did not realize a return on the transaction until September 2006.

Working capital on hand is expected to be sufficient to fund general and administrative expenses, and conduct exploration and a limited amount of development work on the mineral properties as well as other business ventures USE is pursuing, including multifamily housing. Although USE currently has working capital, it will need to continue to seek funding from industry partners or sell equity or debt to develop all the projects. Also, it is anticipated the necessary capital for developing the Lucky Jack Molybdenum Property will be available through Kobex to obtain mining and other permits, further delineate the mineral resources underground, and plan the mining and processing operation. However, additional capital (the costs of which would be shared by USE and Kobex) will be necessary to put the property into production.

The interest retained by USE in the Lucky Jack molybdenum property, is not expected to generate recurring revenues for several years. In addition, the mine plan of Phelps Dodge Corporation (from whom USE and Crested received the property) and its predecessor companies encountered opposition from local and environmental groups, as well as municipal and county government agencies. That opposition will likely continue and, may result in unexpected delays and increased costs to get a new mine plan approved.

## Uncertainties in the value of the mineral properties.

While USE believes that its mineral properties are valuable, substantial work and capital will be needed to establish whether they are in fact valuable.

The profitable mining and processing of gold by SGMI will also depend on many factors, including: receipt of permits and keeping in compliance with permit conditions; delineation through extensive drilling and sampling of sufficient volumes of mineralized material with sufficient grades to make mining and processing economic over time; continued sustained high prices for gold, and obtaining the capital required to initiate and sustain mining operations and build and operate a gold processing mill.

The Lucky Jack Property has been analyzed and explored by its prior owners. This data will have to be updated to the level of a current feasibility study to determine the viability of starting mining operations. Obtaining mining and other permits to begin mining the molybdenum property may be difficult, even with the assistance of Kobex. Capital requirements for a molybdenum mining operation will be substantial.

USE has not yet obtained final feasibility studies on any of its mineral properties. These studies would establish the potential economic viability of the different properties based on extensive drilling and sampling; the design and costs to build and operate mills, the cost of capital, and other factors. Feasibility studies can take many months to complete. These studies are conducted by professional third-party consulting and engineering firms, and will have to be completed, at considerable cost, to determine if the deposits contain proved reserves (i.e., amounts of minerals in sufficient grades that can be extracted profitably under current commodity pricing assumptions and estimated for development and operating costs). A feasibility study usually, but not always, must be completed in order to raise the substantial capital needed to put a mineral property into production. USE has not established any reserves (i.e., economic deposits of mineralized materials) on any of its properties, and future studies may indicate that some or all of the properties will not be economic to put into production.

### Compliance with environmental regulations may be costly.

USE's business is regulated by government agencies. Permits are required to explore for minerals, operate mines and build and operate processing plants. The regulations under which permits are issued change from time to time to reflect changes in public policy or scientific understanding of issues. If the economics of a project cannot withstand the cost of complying with changed regulations, USE might decide not to move forward with the project.

USE must comply with numerous environmental regulations on a continuous basis, to comply with United States environmental laws, including the Clean Air Act, the Clean Water Act, and the Resource Conservation and Recovery Act ("RCRA"). For example, water and dust discharged from mines and tailings from prior mining or milling operations must be monitored and contained and reports filed with federal, state and county regulatory authorities. Additional monitoring and reporting is required by state and local regulatory agencies. The Abandoned Mine Reclamation Act in Wyoming and similar laws in other states (for examples, California for SGMI's gold property and Colorado for the Lucky Jack project) impose reclamation obligations on abandoned mining properties, in addition to or in conjunction with federal statutes. Environmental regulatory programs create potential liability for operations, and may result in requirements to perform environmental investigations or corrective actions under federal and state laws and federal and state Superfund requirements. Failure to comply with these regulations could result in substantial fines, environmental remediation orders and/or potential shut down of the project until compliance is achieved. Failure to timely obtain required permits to start operations at a project could cause delay and/or the failure of the project resulting in a potential write-off of the investments therein.

## USE depends on key personnel.

USE has a very limited staff and executive group. These persons are knowledgeable of USE's mineral properties and have experience in dealing with the exploration of mineral properties as well as the financing of them. The loss of key employees would adversely impact our business, as finding replacements is difficult as a result of competition for experienced personnel in the minerals industry.

## USE will seek additional business activities.

USE's interests in SGMI and the Lucky Jack Property are the primary mineral properties owned by USE (indirect in the case of SGMI) after the sale of the uranium assets to Uranium One. USE intends to acquire other mineral interests, and pursue other business activities such as real estate development and oil and gas exploration. Other than real estate investment opportunities and a contract to explore for gas and oil with a major industry partner, USE currently does not have any agreements in place for other business opportunities.

### We may be classified as an inadvertent investment company.

We are not engaged in the business of investing, reinvesting, or trading in securities, and we do not hold ourselves out as being engaged in those activities. However, under the federal Investment Company Act of 1940, a company may be fall within the scope of being an "inadvertent investment company" under section 3(a)(1)(C) of the 1940 Act if the value of its investment securities is more than 40% of its total assets (exclusive of government securities and cash items).

As a result of the April 30, 2007 sale of our uranium assets to Uranium One, we received investment securities (our stock in Uranium One) with a value in excess of 40% of the value of our total assets.

An inadvertent investment company can avoid being classified as an investment company if it can rely on one of the exclusions under the 1940 Act. One such exclusion, Rule 3a-2 under the 1940 Act, allows an inadvertent investment company (as a "transient investment company") a grace period of one year from the date of classification (in our case, April 30, 2008), to seek to comply with the 40% limit, or with any other available exclusion. Accordingly, we are taking actions to comply with this 40% limit from the present time through April 30, 2008. These actions may include liquidating investment securities as necessary to stay within the 40% limit.

As Rule 3a-2 is available to a company no more than once every three years, and assuming no other exclusion were available to us, we would have to keep within the 40% limit through April 30, 2010. In any event, we would not intend to become an intentional investment company (i.e. engaging in investment and trading activities in investment securities), even after April 30, 2010.

Classification as an investment company under the 1940 Act requires registration with the SEC. If an investment company fails to register, it would have to stop doing almost all business, and its contracts would become voidable. Registration is time consuming and restrictive, and we would be very constrained in the kind of business we could do as a registered investment company.

There can be no assurance that we will be able to accomplish this objective by April 30, 2008.

### **Risks Relating to USE Stock**

### USE may issue shares of preferred stock with greater rights than its common stock.

Although it has no current plans, arrangements, understandings or agreements to do so, USE's articles of incorporation authorize USE's board of directors to issue one or more series of preferred stock and set the terms of the stock without seeking approval from holders of the common stock. Preferred stock that is issued may have preferential rights over USE's common stock, in terms of dividends, liquidation rights and voting rights.

# Future equity transactions, including exercise of options or warrants, could result in dilution; and registration for public resale of the common stock in these transactions may depress stock prices.

From time to time, USE has sold restricted stock and warrants, and convertible debt (or stock in subsidiary companies, convertible to USE stock), to investors in private placements conducted by broker-dealers, or in negotiated transactions. Because the stock was issued as restricted, the stock was sold at a discount to market prices, and the exercise price of the warrants sometimes, and/or the conversion price for stock in subsidiaries, was at or lower than market prices. These transactions caused dilution to existing shareholders. Also, from time to time, options are issued to employees, directors and third parties as incentives, with exercise prices equal to market prices. Exercise of in-the-money options and warrants will result in dilution to existing shareholders; the amount of dilution will depend on the spread between market and exercise price, and the number of shares involved.

Although it does not intend to do so at this time, USE may continue to raise capital from the equity markets using private placements at discounted prices. In addition, USE may continue to grant options to employees and directors with exercise prices equal to market price at the grant date, and in the future may sell restricted stock and warrants (or stock in subsidiary companies convertible to stock of USE), all of which may result in dilution to existing shareholders.

Public resale of such restricted stock, and of stock issued in conversion of debt or stock of subsidiary companies, may depress the market price of the USE stock.

#### Dividends on USE common stock

USE declared a special cash dividend of \$0.10 per share on all outstanding shares of its common stock on the record date of July 6, 2007, payable on July 16, 2007. Prior to this dividend, USE has only declared a dividend on one other occasion, November 1, 1990, when it declared a 1 for 10 share dividend. Management of USE does not currently anticipate any dividends to be paid in the near term future but anticipates retaining earnings to fund investments and business development.

#### USE's take-over defense mechanisms could discourage some advantageous transactions.

USE has adopted a shareholder rights plan, also known as a poison pill. The plan is designed to discourage a takeover of USE at an unfair price. However, it is possible that the board of directors and the takeover acquirer would not agree on a higher price, in which case the takeover might be abandoned, even though the takeover price might be at a significant premium to market prices. Therefore, as a result of the mere existence of the plan, shareholders may not receive the premium price. See "DESCRIPTION OF USE SECURITIES – Preferred Stock – Series P Preferred Stock."

# USE's stock price likely will continue to be volatile due to several factors.

In the 18 months ended June 30, 2007, USE's stock has traded as low as \$3.32 per share and as high as \$7.20 per share. USE believes that some of the factors which cause this volatility are:

- price and volume fluctuations in the stock market generally;
- relatively small amounts of USE stock trading on any given day;
- fluctuations in USE's financial operating results; and
- price swings in the minerals commodities markets.

You should expect continued volatility in the stock price after the merger. It is possible that when you want to sell your USE shares, USE's stock price could be lower than what you paid for your Crested shares, resulting in a loss on your investment.

### UNAUDITED U.S. ENERGY CORP. PRO FORMA COMBINED CONDENSED CONSOLIDATED FINANCIAL INFORMATION

<u>Basis of Presentation</u> The pro forma financial statements filed with this report reflect what USE's financial position would have been had the merger with Crested closed on January 1, 2006 and June 30, 2007. The balance sheet, and statement of operations, at December 31, 2006, and for the year then ended, as well as at June 30, 2007 and for the six months then ended, have been condensed.

Basic earnings per share are based upon the weighted average number of common shares outstanding. Diluted earnings per common share are based on the assumption that all of the Crested options were converted into common shares using the treasury stock method. There are no differences in net earnings for purposes of computing basic and diluted earnings per share as conversion of the common stock options would have no effect on net earnings.

The unaudited pro forma information is based on the historical financial statements of USE and Crested under the purchase method of accounting, and includes the adjustments described in the accompanying notes. The pro forma combined condensed consolidated balance sheet and the pro forma combined condensed consolidated statements of operations and accompanying notes are qualified in their entirety and should be read in conjunction with the historical financial statements of USE and Crested included with or incorporated by reference into this proxy statement/prospectus.

The pro forma adjustments are based on estimates and assumptions available on the date of this proxy statement/prospectus that USE believes are reasonable under the circumstances. The pro forma combined condensed consolidated financial information has been prepared in accordance with the rules and regulations of the SEC. This information is intended for informational purposes only and is not necessarily indicative of the future financial position of USE after the merger, or of its financial position that would have actually occurred had the acquisition been effected as of the dates indicated above.

### NOTES TO U.S. ENERGY COPR. UNAUDITED PRO FORMA COMBINED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS AS OF JUNE 30, 2007 AND DECEMBER 31, 2006

### 1. Basis of Pro Forma Presentation

The unaudited pro forma combined condensed consolidated financial statements of USE have been prepared on the basis of assumptions relating to the allocation of consideration paid for the acquired assets and liabilities of Crested based on the best preliminary estimates of USE's management. The actual allocation of the amount of the consideration may differ from that reflected in these unaudited pro forma combined condensed consolidated financial statements, based upon the completion of a valuation. The table below sets forth the estimated purchase price allocation for USE at June 30, 2007:

Fair value of USE common stock issued, not including						
stock-based compensation allocable to USE shares						
issued for Crested shares underlying Crested options:	\$	14,413,000				
Estimated fair value of:						
stock-based compensation (USE shares						
issued for Crested shares underlying Crested options):	\$	1,060,900				
Total Pro Forma Consideration	\$	15,473,900				

#### 2. Pro Forma Adjustments

These adjustments reflect the components of the aggregate purchase consideration and related transaction costs, which includes USE common stock with a market value of \$15,473,900 at June 30, 2007 and \$14,524,700 at December 31, 2006 (including shares issued for the Crested shares underlying the Crested options).

The USE shares' market value is based on a per share value of approximately \$5.38, which was the market price at the close on June 29, 2007 and \$5.05 on December 29, 2006. The calculation of the number of USE shares to be issued, 2,876,188 total shares, is based upon the agreed upon exchange of 2 shares of Crested for 1 share of USE based on the price per share as computed by the independent consultants to the Special Committees of USE and Crested which was recommended by the Special Committees of both companies and ratified by the full boards of directors of each company on December 20, 2006 of \$4.74 per share for USE and \$2.32 per share for Crested. The ratio of 2 shares of Crested for 1 share of USE represented a premium of about 12% in the value of the Crested minority shares (if the merger had closed that day) to the relative stock prices between the two companies for the 30 days ended December 18, 2006.

### 3. Allocation of Pro Forma Purchase Consideration

The pro forma purchase consideration of \$15,473,900 at June 30, 2007 is allocated to mining claims. This allocation represents consideration of Crested's interest in the Lucky Jack Molybdenum property near Crested Butte, Colorado not owned by USE. Management believes that the fair value of this property is substantially greater than Crested's book value. At this time, management intends to conduct a formal valuation of this property to confirm that valuation estimate.

### **COMPARATIVE PER SHARE DATA**

In the following table, USE and Crested provide you with historical per share financial information. Read it along with the selected consolidated historical financial data and the historical financial statements of USE and Crested.

# COMPARATIVE MARKET PRICES AND DIVIDENDS

In reviewing the following market price data, you should note that the value of the merger consideration will fluctuate with changes in the price of USE's stock. When the price of USE's stock increases, the value of the merger consideration increases; when the price of USE's stock decreases, the value of the merger consideration decreases. Future prices for USE's stock are not predicted. You should obtain current trading prices for both USE and Crested stock before you vote on the merger.

### **Recent Closing Prices**

The table below shows (i) the closing price per share of USE common stock on NASDAQ Capital Market, and the closing price per share of Crested common stock on the OTCBB, on January 22, 2007, the trading day before public announcement of the signing of the merger agreement, March 30, 2007, June 29, 2007 and on August 21, 2007, the most recent practicable date prior to the mailing of this proxy statement/prospectus, and (ii) the "implied value" of one share of Crested on those dates. The implied value of one share of Crested was calculated by dividing the closing sales price for a USE share by two.

Neither USE nor Crested has paid any cash dividends in the periods indicated. USE did however declare a \$0.10 cash dividend on June 22, 2007 with a record date of July 6, 2007 and a payment date of July 16, 2007. USE has no plans to continue the payment of dividends, although in the future it may do so.

### Number of Crested shareholders

As of June 30, 2007 there were approximately 1,618 Crested shareholders of record.

-36-

### CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Information contained in this proxy statement/prospectus, and the USE documents incorporated by reference in this proxy statement/prospectus, contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements may be made directly in this proxy statement/prospectus referring to USE or Crested, and may include statements regarding the period following completion of the merger. These statements are intended to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements are based on current expectations or projections about operations, industry, financial condition and liquidity. Words such as "may," "could," "will," "should," "plan," "predict," "potential," "anticipate," "estimate," "expect," "project," "intend," "believe" and variations thereof or words and terms of similar substance used connection with any discussion of future operating or financial performance, the merger or our businesses, identify forward-looking statements.

You should note that the discussion of USE's and Crested's reasons for the merger, and the descriptions of Crested's special committee's financial advisor's opinion and USE's financial advisor's opinion, contain forward-looking statements that describe beliefs, assumptions and estimates as of the indicated dates. Those forward-looking expectations may have changed as of the date of this proxy statement/prospectus. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. These statements may include projections and estimates concerning the timing and success of specific projects, USE's capital requirements, permitting status of various properties and the ability to economically exploit our properties. Actual results could differ materially and adversely from these forward-looking statements.

Historically, mineral prices have been volatile, and rise and fall based on changes in market demand and changes in the political, regulatory and economic climate.

All subsequent written and oral forward-looking statements concerning the merger or other matters addressed in this proxy statement/prospectus and attributable to USE or Crested or any person acting on either's behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Except to the extent required by applicable law or regulation, neither USE nor Crested undertakes any obligation to release publicly any revisions to such forward-looking statements to reflect events or circumstances after the date of this proxy statement/prospectus or to reflect the occurrence of unanticipated events.

-37-

### **INFORMATION ABOUT CRESTED**

### General

Crested Corp. is a Colorado corporation formed in 1970 and is in the business of acquiring, exploring, developing and/or selling or leasing mineral properties. Crested and USE originally were independent companies, with two common affiliates, John L. Larsen and Max T. Evans. Mr. Evans died in February 2002 and Mr. Larsen died in 2006. In 1982, Crested and USE formed the USECC Joint Venture to do business together. See "SUMMARY INFORMATION – The USECC Joint Venture." From time to time, USE has funded many of Crested's obligations because Crested did not have the funds to pay its share of the obligations. Crested has paid a portion of this debt by issuing common stock to USE. At December 31, 2006, Crested owed \$13,277,200 to USE. As a result of Crested receiving one-half of the proceeds from the sale of the uranium properties to Uranium One, Crested paid in full the amount owed to USE as of July 31, 2007.

Historically, Crested's business strategy has been, and will continue to be, acquiring undeveloped and/or developed mineral properties at low acquisition costs and then operating, selling, leasing or joint venturing the properties, or selling the subsidiary companies to other companies in the mineral sector at a profit.

Typically, projects initially are acquired, financed and operated by Crested and USE in their Joint Venture ("SUMMARY INFORMATION – The USECC Joint Venture" above). From time to time, some of the projects are then transferred to separate companies organized for that purpose, with the objective of raising capital from an outside source for further development and/or joint venturing with other companies. Examples include: SGMI for gold, RMG for coalbed methane and Remington Village, LLC. for real estate.

### **Recent Significant Transactions**

### Sutter Gold Mining Inc.

USE and Crested organized a limited liability company in 1994 to hold and develop California gold properties. The assets were transferred to Sutter Gold Mining Company, and activities were funded by continued capital from USE and third party investors. In 2004, the corporation completed a reverse takeover of Globemin Resources Inc. (Toronto Venture Exchange "SGMI") and has raised additional capital from third party investors. In connection with the reverse takeover, the name was changed to Sutter Gold Mining Inc. ("Sutter" or "SGMI").

On March 14, 2007 the independent directors of USE, Crested and Sutter negotiated a settlement of \$2,025,700 in debt due to USE and Crested as of December 31, 2006 for the issuance of 7,621,867 shares of Sutter common stock. The issuance of these shares was subject to the approval of the Toronto Stock Exchange ("TSX") which was obtained on May 2, 2007. As a result of the issuance of these shares (at market prices) for debt, USE currently owns 48.8% of SGMI and Crested owns 5.7%. In addition, USE and Crested agreed to convert their \$4.6 million Contingent Stock Purchase Warrant which allowed them to purchase common stock in SGMI into a 5% Net Profits Interest Royalty ("NPIR") on its Lincoln Project in California, until the total amount of \$4.6 million is paid, and a 1% NPIR thereafter.

-38-

The USECC Joint Venture also is providing, by a Line of Credit and Loan Agreement, dated June 20, 2007, a \$1.0 million line of credit to SGMI at 12% interest (interest payable quarterly). Maturity of all debt incurred under the line of credit is due June 20, 2009; prepayment without penalty is allowed. The debt is secured by SGMI properties. The USECC Joint Venture has the sole option to have SGMI repay the principal amount of the debt in common shares; however, interest is not payable in shares. If the principal is paid in shares of SGMI common stock, such shares would be issued at a 10% discount to the 10 days' volume weighted average price before payment.

### Rocky Mountain Gas, Inc. and Pinnacle Gas Resources, Inc. – Coalbed Methane.

From 1999 through mid-2005, USE's primary business focus was in the CBM business conducted through RMG, an entity formed in 1999 by USE and Crested. In 2001, RMG entered into a CBM property acquisition and development arrangement with a subsidiary of Carrizo Oil & Gas, a public Houston-based company. In 2003, RMG and the Carrizo subsidiary contributed CBM properties to a new corporation, Pinnacle Gas Resources, Inc., in exchange for Pinnacle common stock issued to USE and Crested, and Carrizo. At the same time, Pinnacle received financing from funds affiliated with DLJ Merchant Banking.

In September 2006, USE and Crested sold their Pinnacle shares in a private transaction for \$13.8 million, of which Crested received \$4,830,000 in cash proceeds and recorded a gain on the transaction of \$3,794,800. As a result of the sale of the equity ownership of Pinnacle, Crested and USE became obligated to pay Enterra Energy Trust (see below) \$2.0 million in either cash or stock of USE. Subsequent to September 30, 2006, Crested and USE agreed to pay the obligation to Enterra with 506,395 shares of USE common stock owned by Crested. Through the delivery of these shares of USE common stock, Crested paid \$700,000, representing 35% of the \$2.0 million and its share of RMG before it was sold, and received a credit on its debt to USE in the amount of \$1.3 million.

RMG was sold to Enterra Energy Trust (TSX: ENT.UN and NYSE: ENT) on June 1, 2005 for approximately \$20 million in cash and securities of Enterra, which was paid to USE and Crested. The Enterra securities were subsequently sold.

# SXR Uranium One

Uranium -For information on sale of the uranium assets, see "SUMMARY INFORMATION- U.S. Energy Corp. - Recent Significant Transactions - SXR Uranium One – Uranium Assets" above.

# Kobex Resources Ltd. – Molybdenum

On February 28, 2006, Crested and USE re-acquired the Lucky Jack molybdenum property (formerly the Mount Emmons molybdenum property), located near Crested Butte, Colorado. The property was returned to Crested and USE by Phelps Dodge Corporation ("PD") in accordance with a 1987 Amended Royalty Deed and Agreement between Crested, USE and Amax Inc. ("Amax"). The Lucky Jack property includes 25 patented mining claims and approximately 520 unpatented mining claims, which together approximate 5,400 acres.

Crested and USE are pursuing permitting and development of the Lucky Jack Property. Development of the property for mining will require extensive capital and long term planning and permitting activities. Our agreement with Kobex Resources Ltd. is expected to provide a significant amount of capital to advance the project, but added capital will be required to open and operate a mine.

# Edgar Filing: US ENERGY CORP - Form S-4/A

Molybdic oxide is an alloy used primarily in specialty steel products for enhanced corrosion resistance, metal strengthening and heat resistance. Molybdenum chemicals are used in a number of diverse applications such as lubricants, additives for water treatment, feedstock for the production of pure molybdenum metal and catalysts used for petroleum refining. Pure molybdenum metal powder products are used in a number of diverse applications, such as lighting, electronics and specialty steel alloys.

Molybdic oxide prices have recently increased: Annual Metal Week Dealer Oxide mean prices for molybdic oxide averaged \$25.55 per pound in 2006 compared with \$32.94 in 2005, \$16.41 in 2004, \$5.32 in 2003 and \$3.77 in 2002. The price at April 13, 2007 was \$28.75 per pound. The metallurgical market for molybdenum is characterized by cyclical and volatile prices, little product differentiation and strong competition. In the market, prices are influenced by production costs of domestic and foreign competitors, worldwide economic conditions, world supply/demand balances, inventory levels, the U.S. Dollar exchange rate and other factors. Molybdenum prices also are affected by the demand for end-use products in, for example, the construction, transportation and durable goods markets. A substantial portion of world's annual molybdenum supply is produced as a by-product of copper mining. By-product production is estimated to account for approximately 60% of global molybdenum production.

Molybdenum price experienced continued stability during 2006 and to date in 2007, with molybdenum prices in 2005 reaching near historical highs. Production increases were experienced in by-product copper production and primary production as metal prices improved throughout the year. Production in China remains difficult to estimate; however, based on published reports, production was negatively impacted in several molybdenum producing regions due to safety concerns and operational issues. Although a more stable supply of western, high-quality materials continued through the year. The overall market remained in slight deficit during 2006 due to demand outpacing supply.

• Kobex Resources Ltd. Agreement

On April 3, 2007, USE, Crested, and Kobex Resources Ltd. ("Kobex") (a British Columbia company traded on the TSX Venture Exchange under the symbol "KBX"), signed a formal Exploration, Development and Mine Operating Agreement (the "agreement") for the Lucky Jack Property.

The agreement grants Kobex the exclusive option to acquire up to a 50% undivided interest in patented and unpatented claims located near Crested Butte, Colorado, which are held by USECC, for \$50 million. The \$50 million to be spent will be for all project-related expenditures, the cost for a bankable feasibility study, and option payments to USECC. The balance between money spent on expenditures and option payments, and \$50 million, will be paid to USECC in cash.

#### Expenditures and Option payments

				Cumulative
			Total	Total for
		Option	Expenditure a	Expenditures
		Payment	nd Option	Amounts and
Date by When Expenditures	Expenditures	Amount <sup>(3)</sup> -	Payment	Option
and Options Must be Paid <sup>(1)</sup>	Amount <sup>(2)</sup> -	\$	Amount - \$	Payments - \$

March 31, 2008	3,500,000 (4)	1,200,000 (4)	4,200,000	4,950,000
Dec. 31, 2008	5,000,000	500,000	5,500,000	10,450,000
Dec. 31, 2009	5,000,000	500,000	5,500,000	15,950,000
Dec. 31, 2010	2,500,000	500,000	3,000,000	18,950,000
Dec. 31, 2011	-0-	500,000	500,000	19,450,000

Totals 16,000,000 3,950,000 19,450,000

-40-

(1) Any shortfall in expenditures may be paid direct, in cash, to USECC. Except for the initial payment of \$3,500,000 in expenditures by March 31, 2008 (which is a firm commitment of Kobex), if any expenditures amount is not fulfilled and/or option payment is not made by 90 days after the due date, the agreement will be deemed to have been terminated by Kobex. However, if Kobex fails to incur an expenditures amount and/or does not make an option payment after the date when Kobex has earned a 15% interest, USE and Crested will replace Kobex as manager of the property.

Expenditures include, but not limited to, holding and permitting costs for the Lucky Jack property; geological,(2) geophysical, metallurgical, and related work; salaries and wages; and water treatment plant capital and operating costs.

- (3) At Kobex' election, option payments may be made in cash or Kobex common stock at the market price on issue date. Kobex may accelerate these payments in advance of the scheduled dates. In May 2007, Kobex paid the first option payment (US\$750,000) by issuing 285,632 shares of Kobex common stock (142,816 shares to each of USE and Crested), valued at the market price for Kobex stock on May 22, 2007.
- (4) For this period, Kobex may reduce the option payment by \$700,000 by increasing expenditures by that amount, or apportioning the \$700,000 between the option payment and expenditures.

### Bankable Feasibility Study

Kobex is required to deliver a bankable feasibility study (the "BFS") for the Lucky Jack property, including confirmation of advance permitting or issuance of a mining permit. If option payments and expenditures, plus the costs to prepare the BFS, total \$50 million before the BFS is completed and delivered to USECC, Kobex and USECC shall jointly (50% each) fund completion of the BFS.

If, at the time of the delivery of a BFS, option payments and expenditures are less than \$50 million, then, in order to fully exercise the option to acquire an aggregate 50% interest in the Lucky Jack property, Kobex shall pay USECC in cash the difference between \$50 million, and the option payments plus expenditures plus the costs to prepare and complete the BFS. This amount is the "study cash difference." If the BFS is not completed by December 31, 2016, Kobex' interest will revert to 15% (if an aggregate of \$15 million has been spent on the property by that date and an aggregate of \$50 million has not been spent by that date) and USE and Crested will assume operatorship of the Lucky Jack property.

### Exercise of the Option

The option is exercisable in two stages. The "option period" is the time between April 3, 2007, and that date when Kobex has earned a 50% interest in the project.

<u>First Stage</u>: When Kobex has incurred an initial \$15 million in expenditures, Kobex shall have earned a 15% interest in the Lucky Jack property.

<u>Second Stage</u>: If Kobex completes the remaining option payments and expenditures and delivers the BFS (and pays the study cash difference, if applicable), Kobex shall have earned an additional 35% interest (for a total of 50%). This date will be the "50% option exercise date."

<u>Management During the Option Period</u>. On the 50% option exercise date, Kobex may enter into a 50-50 joint venture or provide USECC, at its sole discretion, the option to either (i) continue as a joint venture with Kobex (50% interest each); or (ii) have Kobex arrange all future financing for all operations on the property, for an additional 15% interest to Kobex (for a total 65% interest in the joint venture); or (iii) have Kobex acquire all the outstanding securities of an entity formed by USECC to hold its joint venture interest, for Kobex stock, with the purchase price determined by negotiation or an independent valuator.

Throughout the option period, Kobex shall be the manager of all programs on the Lucky Jack property, and its activities shall be subject to the direction and control of a management committee. The management committee shall have four members (two each from USECC and Kobex); in the event of a tie, the Kobex members shall have the tie breaking vote. A technical committee, also with two members from each party, shall provide technical assistance to the management committee.

<u>The Joint Venture</u>. After the 50% option exercise date, a joint venture (the "Lucky Jack Joint Venture") shall be deemed formed between USECC and Kobex, to hold and explore the property; if feasible, develop a mine on the Lucky Jack property; and for so long as feasible, operate the mine and exploit minerals from the property. USECC and Kobex each shall have a 50% interest in the joint venture and shall be obligated to contribute funds to adopted programs and budgets in proportion to their interests.

Kobex shall be the manager of the joint venture, subject to the direction and control of a management committee, which may be the same as the management committee during the option period.

<u>Broker's Fee</u>. Kobex has paid a broker's fee in connection with the agreement in the amount of CAD \$463,750. USECC is responsible for 50% of this fee (CAD \$231,875) payable in equal amounts over 5 years in cash or common stock of USE, or in shares of Kobex which USECC will have received for option payments from Kobex. If the master agreement with Kobex is terminated for any reason during the five year period, USECC's obligations to reimburse Kobex for the broker's fee also would be terminated.

<u>Continuing Royalty held by USECC</u>. USE and Crested shall each continue to retain a 3% gross overriding royalty (for a cumulative 6% gross overriding royalty) on production from the property, under the Amended and Restated Royalty Deeds and Agreement dated May 29, 1987 between USE, Crested, and Mt. Emmons Mining Company. USE and Crested's 6% royalty will be reduced to 5.1% when Kobex earns a 15% interest in the Lucky Jack property, and will be reduced again to 3% when Kobex earns a 50% interest in the property. Kobex also has an option to eliminate an additional 1% of the 3% royalty for \$10 million in cash after they have earned their 50% interest.

### Real Estate – Remington Village, LLC

On May 10, 2007, USE and Crested, through a wholly owned limited liability company, Remington Village, LLC, closed a contract for the purchase of approximately 10.15 acres of land located in Gillette, Wyoming. The total purchase price was \$1,272,693, paid in cash by USE. The property will be developed for a 216 unit multifamily complex to meet the strong demand for housing resulting from the growth of the energy business in Wyoming.

USE also signed a Development Agreement with P.E.G. Development, LLC ("PEG") (a private real estate development company) to assist in obtaining the entitlements, engineering and architectural plans necessary to construct the complex. PEG has considerable development experience, including 10 projects in the inter-Rocky Mountain region.

The construction cost of the entire complex is estimated to be approximately \$26.1 million. Local demographics suggest Gillette's population will increase from 26,000 to 50,000 by 2015 because of increased coal and coalbed methane production in Campbell County, Wyoming, as well as the construction of three new coal fired power plants nearby. There is significant unmet demand for rental units, as there is currently little, if any, available and long wait lists. USE is now in negotiations with local large employers to pre-lease 80% or more of the USE complex for an extended period of time.

USE has obtained a construction loan commitment from a commercial bank. The equity component required to be contributed by Remington Village is approximately \$7.5 million; a portion (approximately \$3 million) of this amount is comprised of the contribution (by USE and Crested) of the purchased real estate to Remington Village, and payment of initial development expenses related to the project, and the balance of approximately \$4.5 million will be paid by USE and Crested. After expenditure of the equity component of the project financing, Remington Village will draw down the construction loan. The construction loan is secured by the property (and repayment is guaranteed by USE); matures March 1, 2009, and bears interest (payable montly on outstanding balance) at 2.25% above the LIBOR rate in effect each month. Under the terms of the USECC Joint Venture, Crested will be responsible to USE for one-half of all development expense. Construction of the Remington Village project commenced during the third quarter of 2007 and is projected to be completed in 2008.

USE intends to expand operations in the multifamily housing sector, with focus on the energy basins of Wyoming, Utah, and Colorado where housing demand is expected to remain strong.

### Oil and Gas Exploration

USE signed an Exploration and Area of Mutual Interest agreement with a Gulf Coast (United States) oil and gas exploration and production company. USE anticipates it will participate as a 20% working interest partner in numerous wells that will be drilled over the next three to five years. Approximately \$3 million has been paid by USE under the agreement to date. Two prospects have already been leased, and exploration and development activities should commence in the later part of the fourth quarter 2007 or the first quarter of 2008.

USE believes that numerous prospects will be generated, leased and drilled, potentially resulting in \$10,000,000 to \$15,000,000 in exploration and development expenditures for its working interest over the course of the anticipated three to five year program. USE has retained a technical advisor to advise it in regards to the program.

### Properties

### Molybdenum

Crested and USE re-acquired the Lucky Jack Project (formerly the Mount Emmons molybdenum property) located near Crested Butte, Colorado on February 28, 2006. The property was returned to Crested and USE by Phelps Dodge Corporation ("PD") in accordance with a 1987 Amended Royalty Deed and Agreement between Company and Amax Inc. ("Amax"). The Lucky Jack Project includes a total of 25 patented and approximately 520 unpatented mining claims, which together approximate 5,400 acres, or over 8 square miles of mining claims.

Kobex Resources Ltd. has an option to acquire up to 50% of the Lucky Jack Project. See "Kobex Resources Ltd. – Molybdenum" discussion above.

Conveyance of the property to Crested and USE also included the transfer of ownership and operational responsibility of the mine water treatment plant located on the properties. The water treatment permit issued under the Colorado Discharge Permit System ("CDPS") was assigned to Crested and USE by the Colorado Department of Health and Environment. Operating costs for the water treatment plant have been approximately \$1.3 million annually. Crested and USE have hired a contractor to operate the water treatment plant. Crested and USE will also evaluate the potential use of the water treatment plant in the milling operations.

Crested and USE leased various patented and unpatented mining claims on the Lucky Jack molybdenum property to Amax in 1974. In the late 1970s, Amax delineated a large deposit of molybdenum on the properties, reportedly containing approximately 155 million tons of mineralized material averaging 0.44% molybdenum disulfide (MoS2). In 1980, Amax constructed a water treatment plant at the Lucky Jack property to treat water flowing from old mine workings and for potential use in milling operations. By 1983, Amax had reportedly spent an estimated \$150 million in the acquisition of the property, securing water rights, extensive exploration, ore body delineation, mine planning, metallurgical testing and other activities involving the mineral deposit. Amax was merged into Cyprus Minerals in 1992 to form Cyprus Amax. PD then acquired the Lucky Jack property project in 1999 through its acquisition of Cyprus Amax. Thereafter, PD acquired additional water rights and patents to certain claims to mine and mill the deposit.

In its 1992 patent application to the Bureau of Land Management of the United States Department of the Interior ("BLM"), Amax stated that the size and grade of the Mount Emmons deposit was determined to approximate 220 million tons grading 0.366% molybdenite. In a letter dated April 2, 2004, BLM estimated that there were about 23 million tons of mineable reserves containing 0.689% molybdenite, and that about 267 million pounds of molybdenum trioxide was recoverable. This letter covered only the high-grade mineralization which is only a portion of the total mineral deposit delineated to date. The BLM relied on a mineral report prepared by Western Mine Engineering (WME) for the U.S. Forest Service, which directed and administered the WME contract. WME's analysis was based upon a price of \$4.61 per pound for molybdic oxide and was used by BLM in determining that nine claims satisfied the patenting requirement that the mining claims contain a valuable mineral that could be mined profitably. WME consulted a variety of sources in preparation of its report, including a study prepared in 1990 by American Mine Services, Inc. and a pre-feasibility report prepared by Behre Dolbear & Company, Inc. of Denver, CO in 1998.

### Uranium

All uranium properties owned by USE and Crested were sold to Uranium One on April 30, 2007.

### Gold

**California**. USE's and Crested's subsidiary, SGMI, holds approximately 535 acres of surface and mineral rights near Sutter Creek, Amador County, California, 45 miles east-southeast of Sacramento, California, in the central part of the 121-mile-long Mother Lode gold belt. The project is located in the western Sierra Nevada Mountains at 1,000 to 1,500 feet in elevation. The year round climate is temperate. Access is by California State Highway 16 from Sacramento to California State Highway 49, then by paved county road approximately .4 miles outside of Sutter Creek.

A Conditional Use Permit is being kept current to allow for planned mining activities on the properties in the future.

Surface and mineral rights holding costs, and property taxes were \$823,300 in 2006. Additionally, SGMI expended \$471,324 in a drilling program and the maintenance of equipment. The leases are for varying terms and require rental fees, annual royalty payments and payment of real property taxes and insurance. A tourist visitor's center and gift shop has been set up and leased to a third party for \$1,500 per month plus a 4% gross royalty on revenues. These revenues offset a portion of costs for holding the SGMI properties.

A review of documentation of historic gold production from properties to the north and south of the project shows that between 1857 and 1951, a total of 2,350,096 ounces of gold were produced from the project.

Production was halted in most of the producing mines because of the Second World War. The report indicates that these very productive mines chased gold bearing mineralized veins to seven times the depth of SGMI's present workings.

The areas of large historic gold production are found at the north and south ends of the project area, bracketing a one-mile long portion of the Mother Lode Belt with no historic gold production, and which hosts the Lincoln and Comet Zones. The Lincoln and Comet Zones were blind discoveries that did not outcrop at surface and which represent the first significant new gold discoveries made along the Mother Lode Belt in the last 50 years that are unrelated to past-producing mines. SGMI believes there is significant potential for continued new discoveries within the area of the Lincoln and Comet Zones, both near the surface and at depth as 90% of the property has not been explored.

The property has been the subject of considerable modern exploration activity, most of it centering on the Lincoln and Comet zones, which are adjacent to each other. A total of 85,085 feet of drilling has been accomplished in prior years, with 190 diamond drill holes, and modern underground development consists of a 2,850-foot declined ramp with 2,400 feet of crosscuts plus five raises.

To further delineate the resource size and connect the Lincoln and Comet blocks, an underground and surface drilling program was executed in the latter part of 2006 and continued into 2007. During 2006, 8,718 feet of underground core drilling in 32 holes and 1,931 feet of surface core in 2 holes were completed. Assay results have been received for 14 of the holes. Notable intercepts in those holes included 24 feet of 0.21 ounces gold per ton in hole 0164 and 9.3 feet of 1.26 ounces gold per ton in hole 0165. Drilling is continuing in 2007.

**Mexico**. In November, 2006, SGMI signed an Exclusive Option Agreement with The Alamo Group, Inc. of Scottsdale, Arizona, to acquire a 100% interest (less royalty provisions) in the Santa Teresa mineral concession located in the historic El Alamo gold mining district southeast of Ensenada, Mexico for Cdn\$500,000 in payments and work commitments.

The concession contains several historic underground gold mines along its approximate 1.5 mile long strike length. The concession is located in the northern Baja peninsula of Mexico approximately 60 miles southeast of the port city of Ensenada, Mexico. Mining in the district was initiated in 1888 with the discovery of placer gold resulting in the El Alamo Gold Rush of 1888. Operations quickly went underground as miners followed surface outcroppings of quartz veins down to the shallow water table at about 50 feet. Mining generally ceased in 1905 due to political unrest and the lack of infrastructure which would have allowed underground production to continue below the shallow water table Since 1905, there has been only limited exploration work conducted in the district.

Santa Teresa geology is characterized by a series of thin highly enriched quartz veins. The vein system located in this area consists of five main parallel, near vertical, auriferous quartz veins and numerous shorter parallel companion veins. As with the California Mother Lode gold system, a majority of the gold in the quartz is considered "free" gold and amenable to simple gravity recovery.

SGMI has signed a Letter of Intent (LOI) with Premier Gold Mines Limited (TSX: "PG") to jointly explore Sutter's Santa Teresa mineral concession located in the historic and high grade El Alamo Mineral District of Baja California Norte, Mexico. The Sutter concession is located in the heart of the gold district which was the subject of the El Alamo Gold Rush of 1888. It is located some 100 kilometres southeast of Ensenada, Mexico and about 250 kilometres from San Diego, California, USA.

The proposed joint venture (JV) with Premier provides the funding for immediate exploration of the project.

### **Other Properties**

• Fort Peck Lustre Field (Montana)

Crested and USE operated a small oil production facility (two wells) at the Lustre Oil Field on the Ft. Peck Indian Reservation in northeastern Montana, for a fee based on oil produced. The wells were shut in during April 2006 and negotiations began to return the wells to the Ft. Peck Tribes. Negotiations resulted in an agreement, whereby the Tribes would assume all reclamation obligations on the wells and Crested, USE and their co-participants in the wells would deed over to the tribes all tanks, pump equipment and down hole equipment to the Tribes. A final distribution of residual funds from production and the conveyance of wells were completed in April 2007.

• Wyoming

Crested and USE own a 14-acre tract in Riverton, Wyoming, with a two-story 30,400 square foot office building. The first floor is rented to non-affiliates and government agencies; the second floor is occupied by Crested and USE. Crested and USE also own a 10,000 square foot aircraft hangar on land leased from the City of Riverton; 7,000 square feet of associated offices and facilities, three vacant lots covering 16 acres in Fremont County, Wyoming; and two city lots and improvements including one small office building.

• Utah

On February 27, 2006, USE through its wholly owned subsidiary Plateau Resources Limited, Inc. ("Plateau") re-acquired by foreclosure sale the Ticaboo, Utah properties. The properties include: a motel, restaurant, lounge, convenience store, recreational boat storage/service facility, and improved residential and mobile home lots. These properties were acquired when the Shootaring Canyon uranium mill was acquired in 1993. The mill was part of the uranium assets sold to Uranium One, but the Ticaboo properties were not included in the sale.

On April 12, 2006, USE signed a contract with ARAMARK Sports and Entertainment Services, Inc., a subsidiary of ARAMARK (NYSE: "RMK"), for the management and operation of all commercial services at the Ticaboo town site. The initial term of the contract is for three years, with one three-year extension option to be exercised upon the mutual agreement of USE and ARAMARK. Under the terms of the contract, ARAMARK manages the Ticaboo town site's 70-room motel, convenience store, mobile home park, boat storage facility, restaurant and lounge. ARAMARK will add Ticaboo to its nationwide reservation center and website. ARAMARK receives a management fee and will invest in a marketing program designed to maximize future revenues.

On October 15, 2007, Plateau and USE signed a contract to sell the Ticaboo properties to Uranium One for \$2.7 million cash plus certain assumed liabilites. Crested shares all cash flows, both positive and netgative, from the Ticaboo properties with USE on a 50-50 basis.

Closing is anticipated to be on October 23, 2007, subject to obtaining third party consents and resolution of a title issue. The contract must be closed by December 1, 2007 or it will terminate unless extended by the parties on or before such date.

### **Mining Claim Holdings**

### Title

Approximately 25 of the Lucky Jack mining claims which Crested and USE received back from Phelps Dodge are patented claims; however the majority of the mining claims located there are unpatented.

Unpatented claims are located upon federal and public land pursuant to procedures established by the General Mining Law, which governs mining claims and related activities on federal public lands. Requirements for the location of a valid mining claim on public land depend on the type of claim being staked, but generally include discovery of valuable minerals, erecting a discovery monument and posting thereon a location notice, marking the boundaries of the claim with monuments, and filing a certificate of location with the county in which the claim is located and with the BLM. If the statutes and regulations for the location of a mining claim are complied with, the locator obtains a valid possessory right to the contained minerals. To preserve an otherwise valid claim, a claimant must also pay certain rental fees annually to the federal government and make certain additional filings with the county and the BLM. Failure to pay such fees or make the required filing may render the mining claim void or voidable.

Because mining claims are self-initiated and self-maintained, they possess some unique vulnerability not associated with other types of property interests. It is impossible to ascertain the validity of unpatented mining claims solely from public records and it can be difficult or impossible to confirm that all of the requisite steps have been followed for location and maintenance of a claim. If the validity of an unpatented mining claim is challenged by the government, the claimant has the burden of proving the economic feasibility of mining minerals located thereon. However, we believe that all of our Lucky Jack mining claims are valid and in good standing.

### **Proposed Federal Legislation**

The U.S. Congress from time to time has considered proposed revisions to the General Mining Law, including as recently as in 2007. If these proposed revisions were enacted, payment of royalties on production of minerals from federal lands could be required as well as new requirements for reclamation of mined land and other environmental control measures and judicial review of past and future patent decisions could be implemented including review of issuance of mineral patents by the BLM in respect of the Lucky Jack Project. The effect of any revision of the General Mining Law on operations cannot be determined until enactment, however, it is possible that revisions would materially increase the carrying and operating costs of mineral properties located on federal unpatented mining claims and patented mining claims may be subject to additional review.

### Legal Proceedings

Except for matters involving water rights, USE and Crested are not parties to any pending legal proceeding. SGMI is defending a quiet title action, to which USE and Crested are not parties.

### Water Rights Litigation –Lucky Jack Molybdenum Property

Prior to the transfer of the Lucky Jack Molybdenum Property (formerly the Mount Emmons property) from Phelps Dodge Corporation ("PD") and Mount Emmons Mining Company ("MEMCO") to USE and Crested on February 28, 2006, MEMCO filed a number of Statements of Opposition in the Water Court, Water Division No. 4, State of Colorado to protect its existing water rights against applications filed by other parties seeking to appropriate or change water rights or perfect conditional water rights. Subsequent to transfer of the mine property, Motions for Substitution of Parties (from MEMCO to USE and Crested) were filed and approved by the Water Court. These cases are as follows:

- <u>Concerning the Application for Water Rights of Virgil and Lee Spann Ranches</u>, <u>Inc.</u>, Case No. 03CW033, 03CW034, 03CW035, 03CW036 and 03CW037. These related cases involve the Spann Ranches, Inc.'s Water Court applications to change the point of diversion through alternative points for the purpose of rotating a portion of their senior water rights between ditches to maximize beneficial use in the event of a major downstream senior call. MEMCO filed Statements of Opposition to ensure that the final decrees to be issued by the Water Court contain terms and conditions sufficient to protect MEMCO's water rights from material injury. These cases are pending, and USE and Crested are awaiting proposed decrees from Applicant Spann Ranches, Inc. for consideration.
- 2. <u>Concerning the Application for Water Rights of the Town of Crested Butte</u>, Case No. 02CW63. This case involves an application filed by the Town of Crested Butte to provide for an alternative point of diversion. MEMCO filed a Statement of Opposition to ensure that the final decree to be issued by the Water Court contains terms and conditions sufficient to protect MEMCO's water rights from material injury. The Town of Crested Butte, USE and Crested have reached a settlement to protect USECC's water rights pursuant to a proposed final decree, which will be submitted with a Stipulation signed by the parties to the Water Court for its approval.
- 3. Concerning the Application of the United States of America in the Gunnison River, Gunnison County, Case No. 99CW267. This case involves an application filed by the United States of America to appropriate 0.033 cubic feet per second of water for wildlife use and for incidental irrigation of riparian vegetation at the Mt. Emmons Iron Bog Spring, located in the vicinity of the Lucky Jack property. MEMCO filed a Statement of Opposition to protect proposed mining operations against any adverse impacts by the water requirements of the Iron Bog on such operations. This case is pending while the parties attempt to reach a settlement on the proposed decree terms and conditions.
- 4. Concerning the Application for Water Rights of the United States of America for Quantification of Reserved Right for Black Canyon of Gunnison National Park, Case No. 01CW05. This case involves an application filed by the United States of America to make absolute conditional water rights claimed in the Gunnison River in relation to the Black Canyon of the Gunnison National Park for, and to quantify in-stream flows for the protection and reproduction of fish and to preserve the recreational, scenic and aesthetic conditions. MEMCO and over 350 other parties filed Statements of Opposition to protect their existing water rights. USECC and most other Opposers have taken the position that the flows claimed by the United States should be subordinated to the historical operations of the federally owned and operated Aspinall Unit, and are subject to the provisions contained in the Aspinall Unit Subordination Agreement between the federal government and water districts which protect junior water users in the Upper Gunnison River Basin. This case is pending while the parties negotiate terms and conditions for incorporation into Stipulations among the parties and into the future final decree to be issued by the Water Court. Future Water Court proceedings in this case will involve quantification of the in-stream flows claimed for the Black Canyon Park.

### Moratorium Related to the Crested Butte Watershed

On August 7, 2007, the Town of Crested Butte issued a temporary moratorium on development activities within its watershed that were not ongoing at the effective date of the moratorium. USE and Crested believe the Lucky Jack Project should not be affected by this moratorium and they are continuing all ongoing activities while reviewing and evaluating the matter.

USE, Crested, and Kobex intend to work with the Town to proceed with necessary rehabilitation activities, in a manner which will be consistent with Ordinance 23 and other applicable rules, regulations, and statutes. However, the timing of expected revisions to the Watershed Protection District Ordinance, and the nature of such revisions, are not predicted. As a result, it is possible that unexpected delays, and/or increased costs, may be encountered in developing a new mine plan for the Lucky Jack property.

### Quiet Title Litigation – Sutter Gold Mining Inc.

In 2004, USECC Gold Limited Liability Company (a predecessor of SGMI) as plaintiff filed an action (<u>USECC Gold Limited Liability Company vs. Nevada-Wabash Mining Company, et al</u>, Case No. 04CV3419) in Superior Court of California, County of Amador) seeking to quiet title as vested in plaintiff to two patented mining claims at the Sutter Gold project. All but one of the approximately 54 defendants (dissolved private corporations and other entities, their stockholders and/or estates of deceased stockholders) has defaulted. Plaintiff and the remaining defendant have had settlement discussions; if a settlement is not obtained, a trial will be scheduled.

SGMI is confident that plaintiff would prevail on the merits in the event of trial. The subject property includes a portion of the existing decline prior to intercepting the mineralized resource at the Sutter Gold project. The remaining defendant claims a one-fifth interest in one of the two patented mining claims. If settlement discussions are not successful, and if plaintiff does not prevail at trial, defendant may be entitled to seek remedies related to the property, possibly including filing a partition action. The outcome of such post-trial proceedings (if commenced by defendant following an outcome adverse to plaintiff at trial) after filing a petition action cannot be predicted, but management does not expect any outcome to ultimately adversely affect SGMI's plan of operations or financial condition.

### **Research and Development**

No research and development expenditures have been incurred during the past three fiscal years.

#### **Environmental Regulations**

**General.** Operations are subject to various federal, state and local laws and regulations regarding the discharge of materials into the environment or otherwise relating to the protection of the environment, including the Clean Air Act, the Clean Water Act and the Resource Conservation and Recovery Act ("RCRA"). With respect to mining operations conducted in Colorado, Abandoned Mine Reclamation Act and industrial development and siting laws and regulations also impact USE and Crested. Similar law and regulations in California affect SGMI operations.

Management believes USE and Crested, as well as their subsidiaries, comply in all material respects with existing environmental regulations.

**Other Environmental Costs.** Actual costs for compliance with environmental laws may vary considerably from estimates, depending upon such factors as changes in environmental law and regulations (e.g., the new Clean Air Act), and conditions encountered in minerals exploration and mining. USE and Crested do not anticipate that expenditures to comply with law regulating the discharge of materials into the environment, or which are otherwise designed to protect the environment, will have any substantial adverse impact on our competitive position. Environmental regulatory programs create potential liability for operations and may result in a requirement to perform environmental investigations or corrective actions under federal and state laws and federal and state Superfund requirements.

#### **Employees**

As of August 21, 2007, Crested had no full-time employees. The expenses associated with USE's 25 full-time employees, including payroll taxes, fringe benefits, bonus plans and retirement plans, are shared with Crested for all ventures in which Crested participates on a percentage ownership basis. Crested uses approximately 50 percent of the time of USE employees, and reimburses USE on a cost reimbursement basis for their wages, payroll taxes, benefits, health insurance and retirement contributions.

### **Change in Accountants**

**Termination of relationship with prior audit firm**. On January 19, 2007, Crested received a letter, dated January 10, 2007, from Epstein, Weber & Conover, PLC ("EWC"), stating that EWC is combining with Moss Adams LLP, that EWC therefore had resigned as Crested's registered independent public accounting firm, and that the client-auditor relationship between Crested and EWC had ceased. EWC advised Crested that all partners of EWC had become partners of Moss Adams.

EWC's audit reports, dated April 2, 2007, March 3, 2006 and April 11, 2005, on Crested's financial statements for years ended December 31, 2006, December 31, 2005 and 2004 all contained a going concern qualification. In this respect, the qualification in the reports on Crested's statements referenced Crested's working capital deficits at December 31, 2006, December 31, 2005, and at December 31, 2004, as well as Crested's history of substantial operating losses. The qualification in the reports stated that these factors raised substantial doubt about the ability of Crested to continue as a going concern.

In connection with the audits of Crested's financial statements for the fiscal years ended December 31, 2006. 2005 and 2004, and in the subsequent interim periods through June 30, 2007, (1) there were no disagreements with EWC on any matter of accounting principles or practices, financial statement disclosure or auditing scope and procedure that, if not resolved to the satisfaction of EWC, would have caused EWC to make reference to the matter in its report and (2) there were no "reportable events" as that term is defined in Item 304 of the SEC's Regulation S-K promulgated under the Securities Exchange Act of 1934.

EWC's notice to Crested, dated January 10, 2007 but received on January 19, 2007, of the cessation of the auditor-client relationship, and EWC's concurrence with the statements made in the above two paragraphs, are filed as exhibits to the Form S-4 registration statement of which this proxy statement/prospectus forms a part.

**Engagement of New Audit Firm.** Effective February 2, 2007, Crested engaged Moss Adams LLP to act as its principal independent accountant to audit its financial statements for the year ended December 31, 2006. The board of directors approved the decision to engage Moss Adams LLP.

During the fiscal years ended December 31, 2006, 2005 and 2004, and for the interim period from December 31, 2006 through June 30, 2007, Crested did not consult Moss Adams LLP regarding the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the financial statements, or any matter that was the subject of a disagreement with Crested's former accountants or was otherwise a reportable event.

-51-

### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006

The following is Management's Discussion and Analysis of significant factors which have affected Crested's liquidity, capital resources and results of operations during the six months ended June 30, 2007 and 2006 and the year ended December 31, 2006. The discussion contains forward-looking statements that involve risks and uncertainties.

### **Forward Looking Statements**

This Report on Form 10-Q includes "forward looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). All statements other than statements of historical fact included in this Report are forward looking statements. In addition, whenever words like "expect", "anticipate" or "believe" are used, we are making forward looking statements. Actual results may vary materially from the forward-looking statements and there is no assurance that the assumptions used will be realized in fact.

### **Overview of Business**

Crested Corp. ("Crested" or the "Company") has been involved in the acquisition, exploration, development and production of properties prospective for hard rock minerals including lead, zinc, silver, molybdenum, gold, uranium, and oil and gas. The Company also has been engaged to a limited extent in commercial real estate, but only in connection with acquiring mineral properties which included commercial real estate.

The Company manages its operations through a joint venture, USECC Joint Venture ("USECC"), with its parent company, U.S. Energy Corp. ("USE"). The Company has entered into partnerships through which it either joint ventured or leased properties with non-related parties for the development and production of certain of its mineral properties. The Company had no production from any of its mineral properties during the three and six months ended June 30, 2007.

### **Recent Developments**

### Sale of Uranium Assets

On April 30, 2007, the Company and USE sold all of their uranium assets, with the exception of a 4% Net Profits Royalty on the Green Mountain uranium property in Wyoming, to sxr Uranium One Inc. ("Uranium One"). Uranium One is listed on the Toronto Stock Exchange and Johannesburg Stock Exchange under the symbol "SXR". At closing, the Company and USE received (a) \$1,585,100 in reimbursable costs relating to work performed on the uranium properties, (b) \$5,020,900 as a result of Uranium One purchasing the Uranium Power Corp. ("UPC") position in the properties and (c) 6,607,605 shares of Uranium One common stock valued at the date of closing at \$99,400,600. The Company and USE also received the cash and collateral bonds posted for asset retirement obligations relating to the uranium properties. Through July 31, 2007, the Company and USE had received \$7,326,100 in returned cash bonds and also the release of its corporate headquarters which had also been pledged for certain asset retirement obligations.

#### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006 (continued)

As of June 30, 2007, the Company and USE sold 4,900,000 of the Uranium One shares for which they received \$60,714,300 during the quarter ended June 30, 2007 and \$6,159,400 during July 2007. The Company and USE sold the remaining 1,707,606 shares of Uranium One during July 2007 and received an additional \$23,529,300. The Company and USE also received \$321,000 as a result of a benefit from the foreign currency exchange rate. The total received by the Company and USE through July 2007 from the sale of Uranium One common stock was \$90,724,000. The Company and USE had a cash flow arrangement on the uranium properties which were sold. All positive and negative cash flows, pursuant to the agreement, were shared 50-50 by the Company and USE. The Company therefore received one half of all cash proceeds from the sale to Uranium One.

In summary, the Company received a total of \$48,665,100 from the sale of the Company's uranium assets to Uranium One through July 2007 (\$792,600 in reimbursable costs, \$2,510,500 from the buy out of the UPC position and \$45,362,000 from the sale of Uranium One stock). This, plus the release of the reclamation bonds of \$3,663,100, positions the Company in its strongest cash and liquidity position in its forty year history.

Pursuant to the terms of the Uranium One contract, the Company and USE (one half to each) will also receive \$20,000,000 when commercial production begins at the uranium mill the Company sold to Uranium One, \$7,500,000 when the first delivery of ore, after commercial production commences, from any of the uranium properties the Company sold to Uranium One, and a production royalty of up to \$12,500,000. The Company and USE also retained a 4% Net Profits Royalty on the Green Mountain uranium property in central Wyoming; this property is owned and operated by Rio Tinto, Inc.

### Lucky Jack Molybdenum Property – Kobex Resources Ltd.

On April 3, 2007, the Company, USE and Kobex Resources Ltd. ("Kobex") (a British Columbia company traded on the TSX Venture Exchange under the symbol "Kobex") signed a formal Exploration, Development and Mine Operating Agreement for the permitting and development of the Mt. Emmons, "Lucky Jack", molybdenum property.

Pursuant to the April 3, 2007 agreement, Kobex is required to expend \$16,000,000 on the property through December 2010. On July 6, 2007, Kobex announced its budget for its first year of operations through April of 2008 would be \$14,200,000. Kobex will not own an interest in the Lucky Jack property until it has expended \$15,000,000 at which time it will own 15%. After spending an additional \$35,000,000, the ownership interest for Kobex will be 50%. Kobex also may acquire an additional 15% at the Company and USE's option after it obtains a 50% interest. As of June 30, 2007 Kobex had expended \$1,429,100 since it began participating in the costs of the project.

Historical records filed with the Bureau of Land Management ("BLM") in the 1990's for the application of patented mineral claims, identify mineral resources of some 220 million tons of 0.366% molybdic disulfide ( $MoS_2$ ) mineralization. A high grade section of the mineralization containing some 22.5 million tons at a grade of 0.701%  $MoS_2$  was also reported. No assurance can be given that these quantities of  $MoS_2$  exist. The average market price for  $MoS_2$  at June 30, 2007 was \$32.75 per pound. Although no future cost of production can be made nor the market price predicted at time of production, at current market prices it is believed that the property could be very profitable for the Company.

#### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006 (continued)

#### **Merger Agreement**

The boards of directors of the Company and USE have approved a recommendation of the Special Committees of both boards, consisting of outside directors, to merge Crested into USE. The exchange ratio is 2 shares of the Company's common stock for 1 share of USE. It is anticipated that the merger will be concluded, if approved by the Crested shareholders, during the fourth quarter of 2007. (See Note 10 above)

### **Mineral Prices**

<u>Uranium</u> - The price of uranium concentrates has increased from a five year low of \$9.75 per pound in September 2002 to \$120.00 per pound on July 30, 2007 (Ux Weekly).

<u>Gold</u> - The five year low for gold was \$302.10 per ounce in April 2002. The price for gold on July 30, 2007 was \$664.10 per ounce (Metal Prices.com).

<u>Molybdenum</u> - The five year low for molybdic oxide was \$2.68 per pound in April 2002. The average price for molybdic oxide was \$31.75 per pound on July 27, 2007. (Metal Prices.com).

### **Results of Operations**

### Three and Six Months Ended June 30, 2007 compared with the Three and Six Months Ended June 30, 2006

During the six and three months ended June 30, 2007 the Company recorded net income of \$31,482,700 and \$31,721,200 respectively or \$1.83 and \$1.85 per share basic for those periods. This compares to net losses of \$2,223,900 and \$2,147,200 respectively for the three and six months ended June 30, 2006. The major change in earnings was as a result of the gain on the sale of the uranium assets to sxr Uranium One ("Uranium One"). Please see note 13 above. The Company sold 2,450,000 shares of the Uranium shares it received from the uranium asset sale upon which it recorded a loss of \$3,418,600 during the three and six months ended June 30, 2007.

The Company recorded \$400,000 in revenues from the sale of assets as a result of the signing of the Exploration, Development and Mine Operating Agreement with Kobex. Kobex had previously made a refundable deposit of \$25,000 that was released as a result of the formal agreement. Additionally, Kobex made its first contractual payment of \$375,000 to the Company by delivering 142,816 shares of its common stock during the three months ended June 30, 2007.

The other major change to other revenues and expenses during the six and three months ended June 30, 2007 from those recorded during comparative periods of the prior year are losses on the exchange of and valuation of shares of Enterra Energy Trust ("Enterra") that the Company received for the sale of a subsidiary coal bed methane company. The Company recorded a total loss from these items of \$1,577,800 during the six months ended June 30, 2006. The shares of Enterra were sold subsequent to June 30, 2006.

#### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006 (continued)

The Company had no revenues during the three and six months ended June 30, 2007 and 2006. General and Administrative expenses increased by \$119,100 to \$268,500 during the six months ended June 30, 2007 compared to the same period of 2006. The increase is the result of increased professional services relating to the merger with USE during 2007. A similar increase of \$112,400 was recorded during the quarter ended June 30, 2007 over that recorded during June 30, 2006.

During the six months ended June 30, 2007 the Company recognized an equity loss of \$3,727,500 compared to an equity loss of \$344,300 for the six months ended June 30, 2006. The major component for the increase of \$3,383,200 in equity losses during the six months ended June 30, 2007 was employment related payments made by USE in the form of bonuses to employees, officers and directors for the work they accomplished in closing the sale of uranium assets to Uranium One. Please see note 14 above.

### **Liquidity and Capital Resources**

The liquidity position of the Company is the best it has ever been during its forty year history. At June 30, 2007, the Company had \$24,615,600 in cash on hand and Government Treasury Bills as well as \$11,205,000 in marketable securities. Current assets at June 30, 2007 were \$39,637,400 as compared to current liabilities of \$13,654,900. The Company therefore had working capital at June 30, 2007 of \$25,982,500 and a current ratio of 2.9 to 1.

Current liabilities at June 30, 2007 consisted of income taxes payable of \$10,404,100 and debt to USE of \$3,250,800. The debt to USE was paid in July 2007. The Company has sufficient capital to fund its portion of the operations it and USE participate in jointly and should not need to borrow any additional funds from USE during the balance of 2007.

Cash and cash equivalents increased by \$1,285,300 as a result of the sale of the uranium assets to Uranium One. An additional amount of cash which was generated from the sale to Uranium One, \$20,000,000 along with the interest earned thereon, was invested in Government Treasury Bills. The Company held \$20,093,700 invested in Government Treasury Bills at June 30, 2007 and considers them very liquid. Pursuant to FAS 95 these investments are considered Marketable Securities as they have maturity dates, from date of purchase, in excess of 90 days. The Company can sell these Government Treasury Bills at any time cash is required without penalty.

Cash provided by investing activities came primarily as a result of the sale of marketable securities of \$30,522,300 (shares of Uranium One and UPC). This increase in cash from investing activities was offset by the funding of USECC in the amount of \$2,430,200 and the purchase of Government Treasury Bills during the six months ended June 30, 2007.

Financing activities consumed \$6,882,100 as a result of a payment during the six months ended June 30, 2007 the Company made on its debt to USE.

### -55-

#### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006 (continued)

#### **Capital Resources**

#### Kobex Resources Ltd. Agreement

On April 3, 2007, the Company and USE signed a formal Exploration, Development and Mine Operating Agreement providing Kobex an option to acquire up to a 65% interest in the Lucky Jack molybdenum property. Prior to Kobex expending \$15 million it will not own an interest in the Lucky Jack property. At such time as Kobex spends \$15 million it will own a 15% interest and after it expends a total of \$50 million it will own a 50% interest in the Lucky Jack property. In the event that Kobex is able to deliver a bankable feasibility study on the Lucky Jack property prior to spending the \$50 million it can pay the reminder of the \$50 million directly to the Company and USE to obtain its 50% interest. As a result of the Kobex agreement, it is not anticipated that any of the Company's cash reserves will be consumed in permitting, development and maintenance of the property during the balance of 2007 and into the near term.

The principal financial benefit to be realized in 2007 and thereafter by the Company (if Kobex meets its contractual obligations) is that Kobex will fund substantially all costs and expenses which otherwise may have to be funded by the Company and USE (including paying for the water treatment plant, obtain necessary permits, and have a bankable feasibility study prepared in advance of mining the property). In addition to the payment of operating, permitting and construction costs, the contract also calls for option payments in the aggregate amount of \$3,950,000 payable to the Company and USE over five years payable in either cash or common shares of Kobex. These option payments began in 2007 and continue through December 2011. The first payment of \$750,000 in Kobex common stock was made on May 23, 2007.

#### Cash on Hand

As discussed above, the Company has monetized certain of its assets which have provided significant amounts of cash that will continue to be used to fund general and administrative expenses, and possible exploration and development of new mineral properties as well as real estate developments. The Company has invested its cash surplus in interest bearing accounts and U.S. Government Treasury Bills which will provide working capital to fund the Company's projects.

#### Other

Due to the current levels of the market prices for gold and molybdenum, management of the Company believes that sufficient capital will be available to develop its mineral properties from strategic industry partners, debt financing, cash on hand, and the sale of equity or a combination of the four.

#### **Capital Requirements**

The Company believes that the current market prices for gold and molybdenum are at levels that warrant further exploration and development of the Company's mineral properties. Management of the Company anticipates these metals prices will remain at levels which will allow the properties to be produced economically. The successful development and production of these properties could greatly enhance the liquidity and financial position of the Company. It is not possible to predict the future price of minerals and the ultimate economic liability of our projects.

#### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006 (continued)

The direct capital requirements of the Company during the third and fourth quarter of 2007 are its general and administrative costs, its one half of a \$1,000,000 letter of credit to Sutter, the development of the real estate properties and the purchase of various assets and potential acquisitions.

### Lucky Jack Molybdenum Property

As a result of the Exploration, Development and Mine Operating agreement entered into on April 3, 2007 with Kobex, it is not anticipated that the Company will have to expend its capital resources on the Lucky Jack project during the balance of 2007. Budgeted cash outlays by the Company and USE to fund operations at Lucky Jack are reimbursed by Kobex. At June 30, 2007, Kobex owed USECC \$631,200. Kobex has paid all the amounts due to the Company and USE within 30 days of being invoiced and is current on its obligations to the Company and USE. There have been no billing or operation disputes between Kobex and the Company and USE.

#### Sutter Gold Mining Inc. Properties

The Company and USE have agreed to provide Sutter with a \$1,000,000 credit facility at 12% interest for a term of two years. The credit facility will be able to be drawn down over time in \$50,000 increments and is repayable at the option of the Company and USE either in cash or common stock of Sutter. The grant of the line of credit was subject to the approval of the TSX for the issuance of 7,621,868 shares of Sutter's common stock to repay the Company and USE for an existing \$2,025,700 in debt as of December 31, 2006. Approval of the issuance of the shares was received on May 4, 2007 at which time the credit facility became available to Sutter. As of June 30, 2007, management of the Company does not anticipate extending any further credit to Sutter other than its one half of this \$1,000,000 line of credit. To fund its additional development and capital infrastructure commitments, Sutter will have to locate an industry partner, sell a portion or all of its position in the gold properties or seek equity or commercial financing.

### Real Estate

On January 8, 2007, the Company and USE, through their wholly owned limited liability company, Remington Village, LLC ("Remington"), signed a Contract to Buy and Sell Real Estate to purchase approximately 10.15 acres of land located in Gillette, Wyoming for \$1,268,800. The Company and USE closed on the property on May 10, 2007. The Company also signed a Development Agreement with P.E.G. Development, LLC to assist in the evaluation of the property and to obtain the entitlements, engineering and architecture necessary to construct multifamily housing on the property. The cost to obtain entitlements, engineering and architecture is estimated to be approximately \$698,000. Total land purchase and construction costs is estimated to be \$26.1 million. At June 30, 2007, the board of directors of the Company had authorized the expenditure of up to \$3,889,000 for the purchase of the land, payment of the entitlements and the commencement of site work. All of the assets relating to Remington are owned by USECC which is not consolidated into the Company financials but carried as an investment in an affiliate. The Company is responsible for one half of all expenditures on the Remington development.

#### Crested's Management's Discussion and Analysis of Financial Condition and Results of Operations for the Six Months Ended June 30, 2007 as Compared to the six months ended June 30, 2006 (continued)

The Company and USE are currently evaluating opportunities to finance a portion of the development of the multifamily housing project which include commercial construction loans and industry partners. As of the filing of this report, no final determination on the actual construction financing terms had been made. In the event that the Company and USE develop the multifamily property currently under evaluation, and finances the construction through commercial banking, it is anticipated that the Company and USE will be required to put up \$7,600,000 in equity and may be required to put up to an additional \$4,725,000 as a deposit with the commercial bank. The deposit of \$4,725,000 would be held as collateral but would earn interest at the same rate as the Company and USE receive on their Treasury Bills. It is expected that construction financing in the amount of \$18,500,000 will be obtained in the third quarter of 2007 and that the project will be completed within 18 months of inception.

#### Reclamation Costs

At the close of the sale of the uranium properties to Uranium One, all asset retirement obligations relating to those assets were transferred to Uranium One. With the relief of those obligations, the Company only has obligations relating to the Lucky Jack properties.

The asset retirement obligation for the Lucky Jack molybdenum property at June 30, 2007 is \$53,000. It is not anticipated that this reclamation work will occur in the near term.

#### <u>Other</u>

The employees of the Company and USE are not given raises on a regular basis. In consideration of this and in appreciation of their work, the board of directors from time to time has accepted the recommendation of the Compensation Committee to grant a bonus to employees and directors when major transactions are closed.

The Company and USE purchased a used airplane in August 2007 to replace its current corporate airplane. The cost of the airplane, with refurbishments, was approximately \$5.3 million. The corporate airplane that the Company and USE used previously is for sale and is anticipated to sell for between \$1.2 and \$1.5 million. The Company is responsible for one half of the purchase price of the recently acquired airplane and will receive one half of the proceeds from the sale of the old airplane. The airplanes are not reflected on the balance sheet of the Company as they are recorded on the non-consolidated financial statements of USECC and shown as the Company's investment in an affiliate.

The Company and USE are evaluating several mineral projects in which it may invest. Additionally, the Company and USE are researching several other opportunities to deploy its capital outside of the minerals business. At June 30, 2007 none of these acquisition targets had advanced past the research stage.

-58-

### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

The following is Management's Discussion and Analysis of significant factors which have affected the Company's liquidity, capital resources and results of operations during the years ended December 31, 2006, 2005 and 2004. The discussion contains forward-looking statements that involve risks and uncertainties.

### **General Overview**

Crested Corp. ("Crested" or the "Company") has been involved in the acquisition, exploration, development and production of properties prospective for hard rock minerals including lead, zinc, silver, molybdenum, gold, uranium, and oil and gas. The Company also has been engaged to a limited extent in commercial real estate, but only in connection with acquiring mineral properties which included commercial real estate. Going forward, the Company intends to expand commercial real estate operations. Initially the Company will target multifamily housing in communities located in the Rocky Mountain area that are being impacted by the energy development.

The Company manages its operations through a joint venture, USECC Joint Venture ("USECC"), with its parent company, U.S. Energy Corp. ("USE"). The Company has entered into partnerships through which it either joint ventured or leased properties with non-related parties for the development and production of certain of its mineral properties. The Company had no production from any of its mineral properties during the year ended December 31, 2006. Additional subsidiaries have been organized by the Company and USE which include U.S. Moly Corp. ("USMC") for molybdenum and InterWest, Inc. ("InterWest") for real estate. The Company and USE each own 45% of the common stock of these entities with the employees, officers and directors of the Company and USE owning the remaining 10%.

During the years ended December 31, 2003 and 2004, the Company's uranium and gold properties were shut down due to depressed metals prices. During 2005, the market prices for gold and uranium increased to levels which may allow the Company to place these properties into production or sell part or all of them to industry participants. Exploration work was resumed on the uranium properties in 2005 and new uranium properties have been acquired during 2006.

<u>Uranium</u> - The price of uranium concentrate has increased from a five year low of \$7.25 per pound in January 2001 to a five year high of \$72 per pound in December 2006. During the first quarter of 2007 this increase continued (\$91 at March 12, 2007).

**Gold** - The five year low for gold was in 2001 when it hit \$256 per ounce. The market price for gold has risen in subsequent years with the average annual price for gold at \$603 in 2006, \$445 in 2005, \$410 in 2004, \$363 in 2003 and \$310 in 2004.

**Molybdenum** - Annual Metal Week Dealer Oxide mean prices averaged \$25.55 per pound in 2006 compared with \$32.94 per pound in 2005, \$16.41 per pound in 2004, \$5.32 in 2003 and \$3.77 in 2002. Continued strong demand has outpaced supply over the past several years (deficit market conditions) and has reduced inventory levels throughout the industry. At March 9, 2007, the price was \$28.25 per pound.

-59-

# Crested's Management's Discussion and Analysis - Results of Operations

for the Year Ended December 31, 2006, 2005 and 2004

(continued)

The rebound in the Company's commodity prices present opportunities. The Company holds what we consider to be significant mineral and related properties in gold and uranium, and received a significant molybdenum property from Phelps Dodge Corporation ("PD") on February 28, 2006. In contrast to the prior five years, we now have cash on hand sufficient for general and administrative expenses, the continuation of our uranium property acquisition and exploration plan, and operation of the water treatment plant on the molybdenum property. Kobex Resources Ltd. ("KBX") is expected to pay the Lucky Jack molybdenum property permitting expenses and water treatment plan operating costs, and if the sxr Uranium One ("Uranium One") contract is closed, additional cash will be available to acquire new mineral properties and pursue other business opportunities.

Management's strategy to generate a return on shareholder capital is first, to demonstrate prospective value in the mineral properties sufficient to support substantial investments by large industry partners and second, to structure these investments to bring capital and long term development expertise to move the properties into production. There are uncertainties associated with this strategy. Please see the risk factor disclosure in this report.

### Proposed merger with USE

On December 20, 2006, the Company's Special Committee of the independent board members met with the Special Committee of the independent board members of USE. Following extensive discussions between the two committees, the USE Special Committee proposed a merger of the Company into USE, by means of an offer to acquire the minority shares of the Company, based on an exchange ratio of one share of common stock of USE for every two shares of the Company's common stock not held by USE (which owns 70.9% of the Company's common stock). Navigant Capital Advisors, LLC served as financial advisor to the USE Special Committee, and Neidiger Tucker Bruner Inc. served as financial advisor to the Company's Special Committee. Both Navigant Capital Advisors, LLC and Neidiger Tucker Bruner submitted fairness opinions on the final proposal for the merger.

The offer also provided that:

(i) USE would vote in line with the vote of a majority of the holders of the Company's minority share holders;

(ii) USE may decline to consummate the merger, even after approval by the holders of a majority of the minority the Company's shares, if the holders of more than 200,000 the Company's shares perfect their rights to dissent from the merger under Colorado law or for other reasons, in USE's sole discretion; and

(iii) Shares of common stock issuable under options issued by the Company which are held by USE officers, directors, and employees are to participate in the offer on the same exchange ratio basis as the minority shareholders of the Company (the number of option shares would be determined by the extent to which the Company's market price exceeds the \$1.71 option exercise price).

The Special Committee for the Company accepted the offer. Thereafter, the Special Committees recommended to their respective full boards that the merger offer be approved. On December 20, 2006, the full boards of directors of the Company and USE voted to approve the merger offer.

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

Consummation of the merger is subject to execution of definitive documents; USE delivering to the Company's minority shareholders a proxy statement/prospectus (following declaration of effectiveness by the SEC of a Form S-4 to be filed by USE with the SEC) for a special meeting of the Company's shareholders; approval of the merger by the holders of a majority of the minority the Company's shares; and satisfaction of customary representations and warranties to be contained in the definitive documents.

#### **Forward Looking Statements**

This Report on Form 10-K for the years ended December 31, 2006, 2005 and 2004 includes "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended ("the Exchange Act"). All statements other than statements of historical fact included in this Report are forward-looking statements. In addition, whenever words like "expect", "anticipate", or "believe" are used, we are making forward looking statements. Actual results may vary materially from the forward-looking statements and there is no assurance that the assumptions used will be realized in fact.

#### **Critical Accounting Policies**

*Marketable Securities* - The Company accounts for its marketable securities (1) as trading, (2) available-for-sale or (3) held-to-maturity. Based on the Company's intent to sell the securities, its equity securities are reported as a trading security. The Company's available-for-sale securities are carried at fair value with net unrealized gain or (loss) recorded as a separate component of shareholders' equity. If a decline in fair value of held-to-maturity securities is determined to be other than temporary, the investment is written down to fair value.

Asset Impairments - We assess the impairment of property and equipment whenever events or circumstances indicate that the carrying value may not be recoverable.

Asset Retirement Obligations - The Company records the fair value of the reclamation liability on its shut down mining properties as of the date that the liability is incurred. The Company reviews the liability each quarter and determines if a change in estimate is required as well as accretes the total liability on a quarterly basis for the future liability. Final determinations are made during the fourth quarter of each year. The Company deducts any actual funds expended for reclamation during the quarter in which it occurs.

*Liabilities Held for Sale*– Long lived liabilities that will be sold within one year of the financial statements are classified as current. At December 31, 2006 the Company believed that its uranium assets in Wyoming, Utah, Colorado and Arizona would be sold within a twelve month period. All asset retirement obligations as well as any other liability associated with these properties was classified as current Liabilities Held for Sale at December 31, 2006. In the event that these assets and liabilities are not sold, they will be re-evaluated to insure that no impairment has taken place and re-classified as long term assets and liabilities.

*Revenue Recognition* - Revenues are reported on a gross revenue basis and are recorded at the time services are provided or the commodity is sold. Sales of proved and unproved properties are accounted for as adjustments of capitalized costs with no gain or loss recognized, unless such adjustments would significantly alter the relationship between capitalized costs and proved reserves, in which case the gain or loss is recognized in income.

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

*Income Taxes* - The Company recognizes deferred income tax assets and liabilities for the expected future income tax consequences, based on enacted tax laws, of temporary differences between the financial reporting and tax basis of assets, liabilities and carry forwards. The Company recognizes deferred tax assets for the expected future effects of all deductible temporary differences, loss carry forwards and tax credit carry forwards. Deferred tax assets are reduced, if deemed necessary, by a valuation allowance for any tax benefits which, based on current circumstances, are not expected to be realized. We recognized an income tax benefit of \$7,533,800 by reducing the valuation allowance on the deferred income tax assets based upon our assessment that we will generate taxable income as a result of the transaction with sxr Uranium One Inc. for the sale of uranium assets.

*Use of Accounting Estimates* - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### **Recent Accounting Pronouncements**

**FIN 48** In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes," ("FIN 48") an interpretation of FASB Statement No. 109, "Accounting for Income Taxes." FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires that the Company recognize in its financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods and disclosure. The provisions of FIN 48 are effective beginning January 1, 2007 with the cumulative effect of the change in accounting principle recorded as an adjustment to the opening balance of retained earnings, goodwill, deferred income taxes and income taxes payable in the Balance Sheets. The Company does not expect that the adoption of FIN 48 will have a significant impact on the financial statements of the Company.

**FAS 157** In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements" ("FAS 157"). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions for FAS 157 are effective for the Company's fiscal year beginning January 1, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's financial position, results of operations or cash flows.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* ("SAB 108"). SAB 108 provides guidance on consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB 108 is effective for fiscal years ending after November 15, 2006. The adoption of SAB 108 did not have an impact on our financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS 159") which permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 will be effective for us on January 1, 2008. We are currently evaluating the impact of adopting SFAS 159 on our financial position, cash flows, and

results of operations.

-62-

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

The Company has reviewed other current outstanding statements from the Financial Accounting Standards Board and does not believe that any of those statements will have a material adverse affect on the financial statements of the Company when adopted.

#### Liquidity and Capital Resources

On June 8, 2006, the Company converted 245,759 Enterra Acquisitions Class D Shares ("Acquisitions") into Enterra Energy Trust units ("Enterra"). The Enterra units were sold during the third quarter of 2006. The Company received \$2,991,000 in net cash proceeds from the liquidation of this investment position. The Company also sold its minority interest in Pinnacle Gas Resources, Inc. ("Pinnacle") for \$4,830,000.

Although the Company received these cash proceeds during the year ended December 31, 2006 it continued to have a working capital deficit of \$3,730,800 and an accumulated deficit of \$11,497,400. The principal component of the working capital deficit is a debt payable to USE in the amount of \$13,277,200. The debt to USE increased \$2,455,400 during the year ended December 31, 2006 as a result of USE paying the Company's portion of working capital and investment capital needs in various entities in which they jointly participate.

During the year ended December 31, 2006, the Company consumed \$15,600 in operations and \$3,313,900 in financing activities while investing activities generated \$6,471,000. The Company recorded a net loss before a benefit from income taxes of \$3,782,900 during the year ended December 31, 2006. The major component of the loss was a negotiated settlement payment to Phelps Dodge Corporation ("PD") in the amount of \$3.5 million. The settlement was as a result of an order from the Federal District Court of Colorado in favor of PD wherein the Company and USE were ordered to pay PD \$7,538,300 plus interest at 5.5% per annum. Rather than appeal the award, the parties agreed on a settlement \$7.0 million, of which the Company was obligated to pay one half. The Company had sufficient working capital to pay the settlement amount.

The Company believes that the current market prices for gold, uranium and molybdenum are at levels that warrant the exploration and development of the Company's mineral properties. Management of the Company anticipates these metals prices will remain at levels which will allow the properties to be produced economically. Management of the Company therefore believes that sufficient capital will be available to develop its mineral properties from strategic industry partners, debt financing, and the sale of equity or a combination of the three. The successful development and production of these properties could greatly enhance the liquidity and financial position of the Company.

### **Capital Resources**

#### Contract to Sell Uranium Assets to Uranium One and the UPC Agreement

On February 22, 2007, the Company and USE signed an asset purchase agreement with sxr Uranium One Inc. ("Uranium One") and certain of its private subsidiary companies. If this agreement is closed, Uranium One will buy all the uranium assets and take over the Company and USE's rights in the UPC purchase and mining venture. These proceeds will substantially enhance liquidity, and with respect to UPC, the receipt of approximately \$5 million from Uranium One for UPC's future obligations under its purchase agreement with the Company and USE will eliminate the uncertainty associated with UPC making those payments under the UPC purchase agreement (UPC would be paying Uranium One following the closing of the asset purchase agreement). The value of the proceeds is indeterminable as they are based on stock prices that will fluctuate until closing.

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

#### Kobex Resources Ltd. Agreement

On October 6, 2006, the Company and USE signed an agreement (amended December 7, 2006) giving Kobex ("KBX") an option to acquire up to a 65% interest in the Lucky Jack molybdenum property. The principal financial benefit to be realized in 2007 and thereafter by the Company of Kobex performance under the agreement, is that Kobex will fund substantial costs and expenses which otherwise may have to be funded by the Company and USE (including paying for the water treatment plant, obtain necessary permits, and have performed a bankable feasibility study preparatory to mining or selling the property). See "Lucky Jack Molybdenum Property" below. The Company's liquidity will be affected positively when the agreement is signed and executed. The closing date has not been determined.

#### Line of Credit

The Company, jointly with USE, has a \$500,000 line of credit with a commercial bank. The line of credit is secured by certain real estate holdings and equipment jointly owned with USE. At December 31, 2006, the full line of credit was available to the Company and USE. This line credit is used for short term working capital needs associated with operations.

#### Cash on Hand

As discussed above the Company has monetized certain of its assets which have provided cash which will continue to be used to fund general and administrative expenses, limited exploration, development and required remedial work on its mineral properties and the maintenance of those properties and associated facilities such as the water treatment plant at the Lucky Jack property until such time as an industry partner is secured to develop the properties or they are sold.

#### **Capital Requirements**

The direct capital requirements of the Company during 2006 remain its general and administrative costs; expenses and funding of exploration drilling; the holding costs of the Sheep Mountain uranium properties in Wyoming, required reclamation work on the Sheep Mountain properties and the maintenance of the Shootaring Canyon uranium mill ("Shootaring") and uranium properties in southern Utah, Colorado and Arizona and the maintenance of jointly owned real estate. On February 28, 2006, the Company and USE re-acquired the Lucky Jack molybdenum property from PD. In addition to receiving the Lucky Jack property the Company and USE became the owners of a water treatment plant which is attached to the property and thereby responsible for the operation of the plant and thereby became responsible for the operating costs of this plant. The Company, as a result of the formation of InterWest and the pursuit of the real estate market, will be obligated to fund its percentage of capital required to purchase and or develop real estate properties.

-64-

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

#### **Maintaining Mineral Properties**

#### **Uranium Properties**

The average care and maintenance costs associated with the Sheep Mountain uranium mineral properties in Wyoming is approximately \$200,000 per year of which UPC is required to pay 50% annually. There are also costs associated with the exploration and maintenance of the uranium properties in Utah, Colorado and Arizona. The majority of these costs are covered as a result of the agreements with UPC and Uranium One detailed above in Capital Resources. In the event that the sale of the properties to Uranium One is concluded all the costs of maintaining, exploring and developing and reclaiming these properties will be paid for by Uranium One and UPC. Additionally, if the Uranium One agreement is successfully closed, Uranium has agreed to reimburse the Company and USE for any pre-approved costs associated with the properties from June 14, 2006 to the date of closing. It is therefore projected that although the Company and USE will pay the holding costs associated with the uranium properties until the time of the close with Uranium One that there will be no net consumption of cash for these properties during 2007 if the transaction with Uranium One closes.

#### Lucky Jack Molybdenum Property

The Company and USE re-acquired the Lucky Jack molybdenum property, from PD on February 28, 2006. The property was returned to the Company and USE by PD in accordance with a 1987 Amended Royalty Deed and Agreement between the Company and USE and Amax Inc. PD became the successor owner of the property in 1999. On September 26, 2006, the Company and USE each paid PD \$3,500,000 for a total of \$7,000,000 as final settlement of the July 26, 2006 Judgment of \$7,538,300 awarded by the U.S. Federal District Court of Colorado to PD.

Conveyance of the property by PD to the Company and USE also included the transfer of ownership and operational responsibility of the mine water treatment plant located on the properties. Operating costs for the water treatment plant are expected to approximate \$1.5 million annually. In an effort to assure continued compliance, the Company and USE has retained the technical expert and contractor hired by PD on January 2, 2006 to operate the water treatment plant. Under the agreement with Kobex Resources Ltd., Kobex is expected to pay these and other costs. However, until such time as the Company is able to find an industry partner to participate in the property, costs related to the property in excess of Kobex's obligations will be shared by the Company and USE and Kobex in proportion to their interests in the property (assuming Kobex performs and exercises its options). The Company and USE's share of these future costs could be significant.

#### Asset Retirement Obligations

The Company and USE are equally responsible for the reclamation obligations, environmental liabilities and liabilities for injuries to employees in mining operations with respect to the Sheep Mountain uranium properties. The balance in the reclamation liability account at December 31, 2006 of \$2.4 million (½ accrued by the Company) is believed by management to be adequate. The Company and USE are self bonded for this obligation by mortgaging certain of their real estate assets, including the Glen L. Larsen building and by posting cash bonds. Due the pending Uranium One purchase of the uranium assets and the belief of management that the sale of the assets will close during the twelve months after December 31, 2006, the asset retirement obligation of \$1,204,900 is classified as a current liability held for sale.

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

The environmental and reclamation obligations acquired with the acquisition of Plateau include obligations relating to the Shootaring Mill. As of December 31, 2006, the present value at 8% of the reclamation liability on the Plateau properties was \$4,117,400. Plateau holds a cash deposit for reclamation in the amount of approximately \$6.8 million. The Company is obligated to pay one half of any amount of reclamation cost over the bond amount at the time the actual reclamation cost is incurred. It is not anticipated that the reclamation work will begin for at least 33 years.

If the sale of the uranium properties to Uranium One closes, the asset retirement obligations on the Sheep Mountain and Plateau Resources properties will be transferred to Uranium One.

The Lucky Jack molybdenum property has a reclamation liability of \$102,000 as of December 31, 2006 of which the Company is obligated to pay one half. No capital resources will be used for this obligation during 2007.

## **InterWest**

On January 8, 2007, InterWest, through its wholly owned limited liability company, Remington Village, LLC, signed a Contract to Buy and Sell Real Estate to purchase approximately 10.15 acres of land located in Gillette, Wyoming for \$1,268,800. InterWest also signed a Development Agreement with PEG to assist in the evaluation of the property and to obtain the entitlements, engineering and architecture necessary to construct multi-family housing on the property. The cost to obtain entitlements, engineering and architecture is estimated to be approximately \$698,000 and the construction cost of the 216 rental units is estimated to be between \$22 and \$25 million.

A substantial part of total costs may be funded with commercial loans, and the Company and USE may seek private investors to offset the equity component (estimated at 20% of total costs). If the Uranium One contract is not closed, InterWest may sell the property with the planning permit, instead of building the complex.

InterWest intends to expand operations in the multifamily housing sector, with focus on the energy basins of Wyoming, Utah, and Colorado where housing demand is expected to remain strong. Funding of these projects is predicated upon the projects meeting specific rate of return, financing and management requirements. If such projects are found the Company may be obligated to fund up to 20% of each project from cash reserves.

#### Debt

Obligations of the Company consist of advances payable to USE, which are due upon demand. The obligation is due to USE for funding a majority of the operations of USECC, of which 50% is the responsibility of the Company. All advances payable to USE are classified as current as of December 31, 2006 and 2005 as a result of USE's unilateral ability to modify the repayment terms.

#### Other

The employees of the Company are not given raises on a regular basis. In consideration of this and in appreciation of their work, the board of directors from time to time has accepted the recommendation of the Compensation Committee to grant a bonus to employees and directors when major transactions are closed.

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

#### **Results of Operations**

#### Year Ended December 31, 2006 as Compared to the Year Ended December 31, 2005

During the years ended December 31, 2006 and December 2005 the Company did not have any revenues from operations. Operating costs and expenses consisted of non cash accretion of asset retirement obligations of \$113,000 for the twelve months ended December 31, 2006 and \$90,900 for the year ended December 31, 2005. The increase in accretion expenses during the year ended December 31, 2006 as compared to those recorded at December 31, 2005 of \$22,100 was as a result of a re-estimation of the actual reclamation cost associated with the Sheep Mountain uranium properties and the addition of reclamation costs associated with the Lucky Jack project.

General and administrative expenses increased from \$179,500 during the year ended December 31, 2005 to \$531,000 at December 31, 2006 for an increase of \$351,500. This increase is directly related to the re-valuation of the Executive Retirement Plan of the Company and USE for two of its executive officers, one of whom passed away during 2006 and the other who determined that he would retire during the first quarter of 2007. The acceleration of their use of the retirement policy is within the requirements of the policy but was not anticipated so quickly. The change caused an acceleration of the accrual of the benefits due under the policy. Additionally the Company experienced an increase in professional services due to consultants and legal fees associated with the potential merger with USE.

During the year ended December 31, 2006, the Company recorded a loss from the exchange of the Enterra Acquisition shares of \$1,354,200 and a loss of \$324,300 from the sale of Enterra units. The Company received exchangeable shares of Enterra Acquisitions when it sold RMG to Enterra in June of 2005. These shares were convertible to units of Enterra Energy Trust after a one year holding period. Prior to the actual conversion the conversion feature of the Enterra Acquisition shares was accounted for as an imbedded derivative. At the time the actual conversion took place the market price of Enterra Energy Trust units had significantly decreased. The Company sold all of the units of Enterra and recorded a loss on the sale of \$324,300 while it recorded a net increase in cash of \$2,991,000 from the sales.

During the year ended December 31, 2006 the Company recorded a net loss of \$223,600 from the value of the derivative discussed above on the Enterra Acquisition shares. During the year ended December 31, 2005 the Company recognized revenue of \$223,600 from the valuation of the derivative. Additionally, the Company recorded a net gain on the sale of RMG of \$5,816,700 during the year ended December 31, 2005.

During the year ended December 31, 2006, the Company sold its equity ownership interest in Pinnacle to a third party. As a result of this sale the Company received \$4,830,000 in cash proceeds and recognized a net gain on the sale of \$3,794,800. The Company also settled its portion of the PD award ordered by the U.S. District Court of Colorado by paying \$3.5 million to PD. There were no similar sales or litigation settlement transactions during the year ended December 31, 2005.

During the year ended December 31, 2006 the Company and USE became obligated to pay Enterra \$2.0 million as a result of their net proceeds from the sale of their interest in Pinnacle. The Company and USE paid this obligation through the release of 506,395 shares of USE common stock that the Company owned. The Company further released the balance of the shares of USE it owned, 5,964 shares, to USE. For the release of these shares the Company paid its portion of the obligation to Enterra, \$700,000, which was netted against the gain recognized from the sale of Pinnacle

equity, and received a credit from USE on its indebtedness to USE in the amount of \$1,323,800. The Company recognized a net gain on the transfer of these shares of USE common stock of \$2,023,800 during the year ended December 31, 2006.

-67-

#### Crested's Management's Discussion and Analysis - Results of Operations for the Year Ended December 31, 2006, 2005 and 2004

(continued)

Equity losses from USECC increased by \$1,925,800 from \$1,699,800 during the year ended December 31, 2005 to \$3,625,600 during the twelve months ended December 31, 2006. The primary reason for the increase in the equity loss from USECC was as a result of the Compensation Committee of USE recommending that a cash bonus in the aggregate amount of \$3,013,000 be paid to all 29 employees (including officers) of USE on September 29, 2006. The bonus was paid for the results of the employees' work on behalf of the Company and USE related to the sale of the Company and USE's stock in Pinnacle and other transactions.

The USE Compensation Committee is comprised of the four independent directors of USE; none of these persons are directors or officers or employees of the Company. The Compensation Committee determined that the bonus amount allocated to each recipient should be based upon years of service and previous compensation. All employees work for both the Company and USE. Under the long-standing joint venture agreement between the Company and USE, each is responsible for paying one-half of all administrative expenses. Accordingly, one-half of the bonus was paid by the Company.

The Company recorded a net loss if \$3,782,900 before income taxes during the year ended December 31, 2006 as compared to a net gain before taxes of \$4,641,400 during the year ended December 31, 2005. As explained above the major difference between the two periods was litigation settlement expense with PD and losses recorded during 2006 on the exchange of Enterra shares and a lower amount recognized from the sale of investments. During 2006 the Company recorded a tax benefit as a result of the accounting treatment related to valuation allowances and deferred tax assets. The result was a tax benefit of \$7,533,800 as compared to a tax provision during the year ended December 31, 2005 of \$100,000. Additionally the Company received a current benefit from income taxes as a result of a refund from prior year provisions. (See Note G to financial statements)

The Company recorded a net gain per share of \$0.22 for the year ended December 31, 2006 as compared to a net gain per share of \$0.26 per share during the year ended December 31, 2005.

#### Year ended December 31, 2005 compared to Year ended December 31, 2004

During the year ended December 31, 2005, the Company had no revenues or income from operations. The expenses incurred relate to General and Administrative costs and the accretion of the reclamation liability of the Company on the Sheep Mountain uranium properties. General and Administrative costs and expenses decreased by \$23,900 during the year ended December 31, 2005. This reduction in General and Administrative expenses was primarily related to reduce professional services. During the year ended December 31, 2005 the Company accreted \$90,900 in additional reclamation expenses on the Sheep Mountain uranium properties. Due to the rise in the market price for uranium the reclamation of the Sheep Mountain uranium properties has been delayed which resulted in a reverse charge to earnings \$109,500.

During the year ended December 31, 2005, a gain was recognized on the sale of RMG, for the receipt of 91,029 Enterra Initial Units and 245,759 Class D shares of Acquisitions valued at \$19.00 each or a total of \$6,399,000. The gain was offset by the Company's investment in RMG; the purchase of an overriding royalty from an entity that had financed the purchase of RMG's producing properties, and the Company's portion of the buy-out of the RMG minority shareholders' interest in Pinnacle. The net gain recognized on the sale of RMG was therefore \$5,816,700. There were no similar revenues during the year ended December 31, 2005. The Company also recognized a gain on the revaluation of the Acquisitions Class D shares of \$223,600 for the year ended December 31, 2005.

# Crested's Management's Discussion and Analysis - Results of Operations

for the Year Ended December 31, 2006, 2005 and 2004

(continued)

During the year ended December 31, 2005, the Company received dividend revenues of \$12,400 from the Enterra Initial Units and recognized \$1,100 in interest revenue on cash received from the sale of those Units which resulted in cash receipts of \$2,177,800 and net profits of \$448,300. No similar revenues were recognized during the year ended December 31, 2004.

The Company recorded a net gain of \$4,541,400 or \$0.26 per share during the year ended December 31, 2005 as compared to a net loss of \$1,767,500 or a loss of \$0.10 per share during the year ended December 31, 2004.

# **Future Operations**

Management of the Company intends to take advantage of the opportunity presented by the recent and future projected market prices for all the minerals that it is involved with. The development of the Company's mineral properties will require large amounts of cash, which the Company will have to obtain from industry or equity partners. The holding costs of these properties is not beyond the Company's capital resources in the short term but to maintain the properties long term additional financing will be required.

# **Effects of Changes in Prices**

Mineral operations are significantly affected by changes in commodity prices. As prices for a particular mineral increase, prices for prospects for that mineral also increase, making acquisitions of such properties costly and sales advantageous. Conversely, a price decline facilitates acquisitions of properties containing that mineral, but makes sales of such properties more difficult. Operational impacts of changes in mineral commodity prices are common in the mining industry.

**Uranium and Gold.** Changes in the prices of uranium and gold will affect our operational decisions the most. Currently, both gold and uranium have experienced an increase in price. We continually evaluate market trends and data and are seeking financing or a joint venture to place the Company's gold and uranium properties in production.

**Molybdenum.** The price of molybdenum at December 31, 2006 was \$28.00 per pound (Metal Prices.com). Production from the Lucky Jack Project will have a very long life and changes in prices of molybdenum would affect the revenues from that property. A significant decrease in the current market price would have to occur prior to the time that the Mt. Emmons property would no longer be profitable. In addition to the market risk it is not known how long the permitting process on Mt. Emmons will take or how much it will cost.

## **Contractual Obligations**

The Company has three divisions of contractual obligations as of December 31, 2006: Debt to USE of \$13,277,200, liabilities held for sale \$1,204,900 and asset retirement obligations of \$51,000.

Accordingly, even if the Uranium One contract is closed, future property acquisitions and development work may require large amounts of cash, of which the Company may have to obtain from industry or equity partners.

#### THE CRESTED SPECIAL MEETING

This section contains information from Crested about the special meeting of shareholders that Crested has called to consider, and possibly adopt, the merger agreement.

Together with this proxy statement/prospectus, Crested is also sending you a notice of the Crested special meeting and a form of proxy that is solicited by Crested's board of directors for use at the Crested special meeting to be held on \_\_\_\_\_\_, 2007, at 10:00 a.m., local time, at the offices of Crested, 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501, and any adjournments or postponements of the meeting.

#### Matters to be Considered

The purpose of the special meeting is to consider and to vote on a proposal to adopt the January 23, 2007 Agreement and Plan of Merger between USE and Crested.

You may be asked to vote upon other matters that may properly be submitted to a vote at the special meeting. You also may be asked to vote on a proposal to adjourn or postpone the special meeting.

#### **Proxies**

Each copy of this proxy statement/prospectus mailed to Crested shareholders is accompanied by a form of proxy with voting instructions for submission by mail. You should complete and return the proxy card to ensure that your vote is counted at the special meeting, or any adjournment or postponement thereof, regardless of whether or not you plan to attend.

You may revoke your proxy at any time before the vote is taken by:

- submitting written notice of revocation to the Secretary of Crested prior to the voting of such proxy;
  - submitting a properly executed proxy of a later date; or
- voting in person at the special meeting; however, simply attending the special meeting without voting will not revoke an earlier proxy.

If your shares are not held in street name, written notices of revocation and other communications regarding the revocation of your proxy should be addressed to:

Crested Corp. 877 N. 8<sup>th</sup> W. Riverton, Wyoming 82501 Attn: Robert Scott Lorimer, CFO/Treasurer

Such written notice should be mailed as early as possible to ensure that the notice of revocation reaches Crested prior to the date of the meeting.

If your shares are held in street name, you should follow the instructions of your broker or bank regarding revocation of proxies.

All shares represented by valid proxies that Crested receives through this solicitation, and that are not revoked, on a timely basis, will be voted in accordance with the instructions on the proxy card. If you make no specification on your proxy card as to how you want your shares to be voted before signing and returning it, your proxy will be voted **"FOR"** the adoption of the merger agreement and the transactions contemplated by the merger agreement. The Crested board of directors is currently unaware of any other matters that may be presented for action at the meeting. If other matters properly come before the meeting, or any adjournment or postponement thereof, Crested intends that shares represented by properly submitted proxies will be voted, or not voted, by and at the discretion of the persons named as proxies on the proxy card.

## Crested shareholders should NOT send stock certificates with their proxy cards.

## Shares Subject to Voting Agreement

Under a voting agreement dated as of January 23, 2007 between Crested and certain Crested shareholders (including USE), those shareholders have agreed to vote or cause to be voted all of their shares of Crested common stock in the same way the holders of a majority of the minority shares of Crested vote, with respect only to the adoption of the merger agreement. The shares subject to the voting agreement represent approximately 71.4% of the outstanding shares of Crested as of the record date (70.1% held by USE and its subsidiaries and 1.3% by the other shareholders who signed the voting agreement).

## Solicitation of Proxies; Expenses of Solicitation

Crested and USE each will pay one-half of the costs to file, print and mail this proxy statement/prospectus for the special meeting. In addition to solicitation by mail, directors and officers of Crested may solicit proxies from shareholders by telephone, telegram, e-mail, personal interview or other means. USE and Crested currently expect not to incur any costs beyond those customarily expended for a solicitation of proxies in connection with a merger agreement. Directors and officers will not receive additional compensation for their solicitation activities, but may be reimbursed for reasonable out-of-pocket expenses incurred by them in connection with the solicitation. Brokers, dealers, commercial banks, trust companies, fiduciaries, custodians and other nominees have been requested to forward proxy solicitation materials to their customers and such nominees will be reimbursed for their reasonable out of pocket expenses.

## **Record Date**

Crested has fixed the close of business on October 10, 2007 as the record date for determining the Crested shareholders entitled to receive notice of and to vote at the Crested special meeting or any adjournment or postponement thereof.

## Voting Rights and Vote Required

The presence, in person or by properly executed proxy, of the holders of a majority of the outstanding shares of Crested entitled to vote thereon is necessary to constitute a quorum at the special meeting. Under Nasdaq rules, brokers or members who hold shares in street name for customers who are the beneficial owners of such shares are prohibited from giving a proxy to vote those shares with respect to adopting the merger agreement without specific instructions from such customers. An un-voted proxy submitted by a broker is sometimes referred to as a "broker non-vote" and is the equivalent of a vote "AGAINST" the merger.

The actions proposed in this proxy statement/prospectus are <u>not</u> matters that can be voted on by brokers holding shares for beneficial owners without the owners' specific instructions. If you do not instruct your broker, bank or other nominee, they will not be able to vote your shares, such failure to vote is a broker non-vote. Accordingly, if a broker or bank holds your shares you are urged to instruct your broker or bank on how to vote your shares.

The adoption of the merger agreement requires the affirmative vote of the holders of a majority of the shares of Crested common stock outstanding as of the record date. You are entitled to one vote for each share of Crested common stock you held as of the record date.

## As of the record date:

• USE executive officers (and a recently retired officer (Daniel P. Svilar)) and directors of Crested own 222,241 Crested shares (1.3%), not including the 12,024,733 shares owned by USE, 60,000 shares owned by Plateau and 100,000 shares owned by SGMI, which are consolidated subsidiaries of USE, for a consolidated USE ownership of 12,184,733 shares (70.1%).

#### **Recommendation of the Board of Directors**

All of the Crested directors have determined that the terms of the merger, the merger agreement and the other transactions contemplated thereby are advisable, fair to and in the best interests of Crested and all of its shareholders, and recommend that you vote **"FOR"** the adoption of the merger agreement and the transactions contemplated by the merger agreement, including the merger.

See "THE MERGER—Crested's Reasons for the Merger; Recommendation of Crested's Board of Directors" on page 77 for a more detailed discussion of the Crested board of directors' recommendation.

## Interest of Certain Matters to be Acted Upon

Please see discussion entitled "Crested and USE Directors and Officers Have Financial Interests in the Merger" on page 88.

## Attending the Meeting

If you are a beneficial owner of Crested common stock held by a broker, bank or other holder of record, you will need proof of ownership to be admitted to the special meeting. A recent brokerage statement or letter from a bank or broker are examples of proof. If you want to vote your shares of Crested common stock held in street name in person at the meeting, you will have to get a written proxy in your name from the broker, bank or other holder of record who holds your shares.

#### **Revocation of Proxies**

You may revoke your proxy at any time prior to its use by delivering it to Robert Scott Lorimer at Crested's offices a signed notice of revocation bearing a date <u>later</u> than the date of your proxy, stating that the proxy is revoked or by granting a duly executed new, signed proxy bearing a later date, or if you are a holder of record, by attending the special meeting and voting in person. However, simply attending the special meeting without voting will not revoke your proxy. If you hold your shares in "street name," you must get a proxy from your broker, bank or other custodian to vote your shares in person at the special meeting.

## Householding

Some banks, brokers and other nominee record holders may be participating in the practice of "householding" proxy statements and annual reports. This means that only one copy of this proxy statement/prospectus may have been sent to multiple shareholders in your household. Crested will promptly deliver to you a separate copy of this proxy statement/prospectus, if you write to Mr. Robert Scott Lorimer, CFO/ Treasurer of USE and Crested, or call him at 307.856.9271. If you wish to receive separate copies of an annual report or proxy statement in the future, or if you are receiving multiple copies and would like to receive only one copy for your household, you should contact your bank, broker or other nominee record holder, or you may contact Crested.

The matters to be considered at the special meeting are of great importance to the Crested shareholders. You are urged to read and carefully consider the information presented in this proxy statement/prospectus, and to complete, date, sign and promptly return the enclosed proxy in the enclosed postage-paid envelope.

#### **Future Crested Shareholder Proposals**

If the merger is not consummated, Crested will hold its annual shareholders meeting on about December 3, 2007. Any shareholder proposal intended to be considered for inclusion in the Crested proxy statement for presentation at that meeting should be received at Crested's office, located at 877 N. & W., Riverton, Wyoming 82501 by \_\_\_\_\_\_, 2007.

#### THE MERGER

The following discussion contains material information pertaining to the merger. This discussion is subject, and qualified in its entirety by reference, to the merger agreement and the financial advisor opinion attached as appendices to this proxy statement/prospectus. We urge you to read and review those entire documents as well as the discussion in this proxy statement/prospectus.

#### General

This section provides material information about the merger and the background of Crested and USE signing the merger agreement. The next sections of this proxy statement/prospectus, entitled "THE MERGER AGREEMENT" and "THE VOTING AGREEMENT" have additional and more detailed information regarding the legal documents that govern the merger.

At the Crested special meeting, Crested shareholders will be asked to consider and vote upon a proposal to adopt the merger agreement.

#### Structure

If the merger agreement is adopted by the affirmative vote of the holders of a majority of the minority Crested shares, Crested will be merged into USE, and the separate corporate existence of Crested will cease. USE will continue as the surviving entity.

The merger agreement provides that each share of Crested common stock issued and outstanding immediately prior to the effective time of the merger, other than the Crested shares owned by USE, will be converted into the right to receive one-half USE share (2 Crested shares for 1 USE share, which is referred to below as the "Exchange Ratio"). Fractional USE shares will be rounded up to a full share. The USE shares will be validly issued, fully paid and non-assessable shares of common stock. Upon completion of the merger, all Crested shares will no longer be

outstanding and will be automatically canceled and cease to exist.

USE will account for the merger as a purchase for financial reporting purposes. See "ACCOUNTING TREATMENT" below. The merger is intended to qualify as a reorganization within the meaning of Section 368(a) of the Code, so that for U.S. federal income tax purposes you will not recognize gain or loss on the receipt of USE common stock as part of the merger consideration. However, if you receive USE shares for Crested shares underlying a Crested option, and that option is non-qualified under IRS regulations, you will recognize income for tax purposes. The merger is conditioned on the receipt of opinions that the merger will qualify as a reorganization for United States federal income tax purposes. For a more complete discussion of the United States federal income tax consequences of the merger, see "MATERIAL UNITED STATES FEDERAL INCOME TAX CONSEQUENCES OF THE MERGER" below.

# **Background of the Merger**

Crested was actively involved in the minerals industry for its own account and independent of USE for many years. In 1982, following a successful sale of the molybdenum properties owned by both USE and Crested to AMAX, Inc., the boards of directors of both companies decided to enter into the Joint Venture agreement, to allow joint participation in new projects. Most of the business conducted by the companies has been done under the USECC Joint Venture. For many years, the companies had at least one director in common, but each company paid its share of property acquisition and development costs as incurred. Since 1982, USE and Crested have held interests in the same properties and projects. By 1993, Crested no longer had the capital to pay its share of the obligations under the Joint Venture, and USE began paying for Crested's shortfalls, and booking a receivable from Crested. Despite Crested paying substantial portions of the receivable by issuing Crested stock to USE, by December 31, 2006, Crested owed USE more than \$13 million. Crested has not had any officers who are independent of USE for the past 15 years, and had no directors independent of USE from 2002 until two independent directors were appointed in connection with the merger negotiations.

From time to time since 2004, the management of USE and Crested have informally discussed the potential benefits to USE and Crested shareholders of merging Crested into USE, but these discussions never yielded any agreement on the terms of a possible transaction, and no offers were communicated from USE to Crested. As a result of the formal discussions relating to the potential merger, Crested asked two former independent board members to serve on the board of directors of Crested and also as the Special Committee members for the merger negotiations. Both prior board members accepted and resumed board service on October 13, 2006, and continue to serve as directors of Crested.

# History of Communications between the Boards of Directors of the Companies Regarding the Merger.

In late July 2006, Crested and USE management contacted outside legal counsel to discuss a possible acquisition by USE of the Crested shares not held by USE.

From September 19, 2006 to September 27, 2006, USE management discussed with outside legal counsel procedures to establish a special committee of independent directors of USE to evaluate a possible offer to be made to the Crested board of directors; retain an independent financial advisory firm to advise the USE special committee; and have the Crested board of directors establish a special committee of independent directors, and retain separate outside legal counsel, to represent the interests of the Crested minority shareholders.

#### -74-

On October 13, 2006, the USE board of directors established a special committee of independent directors of USE, H. Russell Fraser and Mike Anderson, to explore a possible offer from USE to Crested, to acquire the minority shares of Crested in exchange for USE shares, and to negotiate with a special committee of the Crested directors any offer which might be made to Crested. Also on that date, the special committee retained Navigant Capital Advisors, LLC ("Navigant Capital") to advise the committee as to the fairness to USE shareholders of any offer which the special committee might recommend. On October 13, 2006, USE notified the Crested board of directors that USE had established its special committee to evaluate whether, and if so how, USE might offer to acquire the minority shares of Crested.

Also on October 13, 2006, Mike Zwickl and Kathleen Martin, former directors of Crested, were appointed to the Crested board of directors and to a newly created special committee of independent directors of Crested, to evaluate the fairness to the Crested minority shareholders, of any offer which USE might make to acquire the Crested minority shares, and to negotiate with the USE special committee about the terms of any offer which USE might make. The Crested board of directors agreed to compensate Mr. Zwickl and Ms. Martin by issuing to them \$15,000 each in restricted shares of Crested common stock, valued at Crested's \$1.63 market price on October 13, 2006 (i.e., 9,203 shares to each member.

On October 17, 2006, the Crested special committee had a meeting where it interviewed Neidiger, Tucker, Bruner, Inc. ("NTB") to advise the committee on the fairness to the Crested minority shareholders of any offer USE might make. The special committee also interviewed separate outside legal counsel, Davis Graham & Stubbs LLP ("DGS"), to advise the special committee regarding a possible offer from USE. The special committee further discussed its charter, responsibilities and discretion. The special committee engaged NTB and DGS.

From September 28, 2006 to November 28, 2006, the USE special committee conducted several meetings by telephone conference, to review and discuss, with the participation of Navigant Capital, the various preliminary analyses prepared by Navigant Capital concerning the historical relationship between the stock prices for USE and Crested, the relative asset values of the two companies, and other matters. The USE special committee, with the approval of Navigant Capital, shared Navigant Capital's preliminary analyses with NTB, and Navigant Capital and NTB discussed these analyses.

On December 4, 2006, the USE board of directors informed the Crested special committee that the USE board had accepted the recommendation of the USE special committee to make a preliminary offer to acquire all the minority shares of Crested in exchange for shares of USE, using an exchange ratio of 2.3 Crested shares for 1 USE share. This ratio was based on comparative stock prices for the 30 days preceding November 28, 2006, and represented a premium of 3% over Crested's price of \$2.38 relative to USE's price of \$5.64 on December 4, 2006.

From December 14, 2006 to December 19, 2006, the Crested special committee, with NTB and DGS participating, conducted several meetings to review and discuss the USE offer, Navigant Capital's analysis, NTB's analysis and certain other information.

-75-

On December 20, 2006, Michael Feinstein, an alternative member of the USE special committee, and the committee's outside legal counsel held an informal breakfast meeting at 8:00 am on December 20, 2006 with Crested's outside legal counsel. Counsel to Crested reported that the Crested special committee had determined that it was rejecting USE's preliminary offer of December 4, 2006 of a 3% premium to stock prices as such offer was not consistent with the ranges of premium paid in comparable deals (comparable in terms of related party transactions, where a parent company offers to buy a minority stake in a subsidiary), as shown in a preliminary analysis which had been prepared by Navigant Capital and shared with Crested's special committee and work done by NTB. Counsel to Crested stated that the Crested special committee was prepared to consider a offer with an exchange ratio that would represent a price premium in the range of 15%, and invited further discussion on the matter from the USE special committee.

At formal subsequent meetings on December 20, 2006:

• The USE special committee met at 10:00 am (members of Navigant Capital were present by conference call), to discuss the rejection and counter-offer of the Crested special committee. The USE special committee discussed with Navigant Capital the relationship between various possible exchange ratios, the net asset values of the companies, and the "implied exchange ratios" suggested by the analyses conducted by Navigant Capital for the USE special committee. For more information on Navigant Capital's engagement and the work it performed for the special committee, see "Opinion of the USE Financial Advisor – Navigant Capital Advisors, LLC."

The USE special committee also considered certain "intangible" factors which had not been quantified by Navigant Capital in its preliminary evaluations, including Crested's lack of trading liquidity, absence of a stand alone business plan, dependence on USE employees, and its complete reliance on interest-free capital from USE for many years to stay in business. At the conclusion of this meeting, the USE special committee decided to make a one-time offer based on an exchange ratio of two Crested shares for one USE share which represented a 12% premium at such time.

The two special committees subsequently met at 11:00 am, with their respective outside legal counsel. The USE special committee expressed its disagreement with the Crested special committee's basis for a 15% premium offer made at the breakfast meeting, and informed the Crested special committee that the relative asset values of the companies, and the intangible factors involving the two companies, would not justify a stock exchange ratio of more than 2:1. In particular, the USE special committee stated that the range of premiums paid by acquirors in other transactions was not applicable to the USE-Crested transaction. The other transactions involved companies with different or complementary businesses, and in the mineral sector, companies with different but complementary properties, while USE and Crested own interests in the same properties.

The USE special committee also expressed its support, which had been discussed between outside legal counsel for the two companies, for recommending to the full USE board of directors that USE commit to voting its block of Crested shares in line with the vote of the holders of a majority of the minority Crested shares if the companies were to come to agreement on an exchange ratio. Also discussed and conveyed to the Crested special committee was the inclusion of shares underlying Crested stock options in the USE exchange offer.

After extensive discussion, the Crested special committee evaluated USE's new offer and accepted the proposed 2:1 exchange ratio, along with the proposals that USE would vote its Crested shares in line with a majority of the minority Crested shares, and inclusion of the Crested option shares as part of the total merger consideration. The special committees agreed to recommend these terms to the full boards of directors of the companies.

• At full separate meetings of the USE and Crested boards of directors, the terms recommended by the special committees were discussed. During the board meetings, Navigant Capital and NTB indicated they would be willing to provide fairness opinions to USE, and Crested, respectively, if a definitive merger agreement reflecting the 2:1 exchange ratio was signed. Following the meetings, on December 20, 2006, the following matters were agreed upon by the two special committees in separate discussions and approved by the full USE board: (i) USE would have the right to not consummate the merger if Crested shareholders with more than 200,000 shares dissented from the merger under Colorado law; and (ii) an optional cash out would be available (at USE's discretion) for all of those Crested shareholders holding a small number of shares, in lieu of issuing USE shares to them. Each of the Crested and USE boards of directors approved inclusion of these two latter items in the formal minutes of the USE board of directors meeting of December 20, 2006.

• From December 21, 2006 to January 19, 2006, outside legal counsel exchanged drafts of the merger agreement and the voting agreement, and the respective boards of directors negotiated (through outside counsel) various provisions in the draft agreements. On January 22, 2007, NTB delivered its fairness opinion to the special committee of the Crested board of directors, to the effect that the 2:1 exchange ratio was fair and reasonable from a financial point of view to the Crested minority shareholders. On January 23, 2007, Navigant Capital made a final presentation to the full USE board of directors of the proposed terms and conditions of the exchange ratio, and thereafter delivered its opinion to the board of directors, to the effect that the exchange ratio was fair to the USE shareholders. The merger agreement and voting agreement were unanimously approved by the directors of USE and were signed on January 23, 2007. The merger agreement and voting agreement were unanimously approved by the directors of Crested and were signed on January 23, 2007.

• On July 31, 2007, the boards of directors of USE and Crested approved (upon the recommendation of their respective special committees), an amendment to the merger agreement to extend the deadline for consummating the merger and to provide that if the merger is approved by the Crested shareholders, and the merger is consummated, then Crested will pay the income tax which will be owed by each officer or director of USE who is a holder of a nonqualified Crested stock option upon its cashless exercise, provided that each such holder delivers to USE an agreement (a "lockup agreement") not to sell (until retirement, death or disability) any of the USE stock they receive in exchange for the Crested shares they acquire on exercise of those options.

• On October 12, 2007, the special committees of USE and Crested, as well as the full boards of directors of both companies, approved and accepted the updated fairness opinions received from Navigant Capital and NTB, both dated on October 12, 2007.

# USE's Reasons for the Merger

In reaching its decision to merge with Crested, USE considered the following:

- The merger would result in the elimination of approximately \$500,000 in recurring annual costs, that has historically been paid by USE, for Crested's legal and other expenses associated with Crested being a public company. USE has not derived any economic benefit from its joint venture arrangement with Crested. Instead, USE has funded Crested's share of operational and administrative expenses for years, without charging interest.
  - Crested has no business independent of USE.
- Joint ownership of assets with Crested as a majority-owned subsidiary is confusing to the USE shareholders and the public markets. The merger would eliminate this two tier ownership.

## Crested's Reasons for the Merger; Recommendation of Crested's Board of Directors

In deciding to approve the merger agreement and to recommend approval of the merger to Crested's minority shareholders, the Crested board of directors took into account the Crested special committee's recommendation that the 2:1 exchange ratio be approved, and that the merger would be in the best interests of the Crested minority shareholders. The full board of directors of Crested, including the independent directors who comprise the special committee, considered a number of factors, including the following:

- At December 31, 2006, Crested owed more than \$13 million to USE, and at that date did not have the funds to pay the obligation. As a result of receipt of proceeds from the Uranium One closing, Crested has since paid its obligation to USE. However, Crested still may not have sufficient capital to fund its portion of mineral property exploration and development costs. If Crested should not have enough capital to continue participating with USE, USE may not continue to fund Crested's costs if the merger is not consummated, which would result in dilution to Crested's interest in the projects.
- Crested has no assets or business separate from USE. Because Crested is traded on the OTCBB, Crested may find it difficult, if not impossible, to raise capital for a separate business plan. In addition, because USE and Crested have the same economic interest in the molybdenum project, the companies would be competing for investment capital needed for this project.
- Trading volume in Crested's stock has been small in relation to the number of shares held by the minority shareholders and this condition is not expected to change. As a result, sales by the minority shareholders of any significant portion of their Crested shares likely would cause the price to decrease substantially. USE is traded on the Nasdaq Capital Market and historically has much greater stock trading volume.
- USE has employees, greater financial resources than Crested, and as a Nasdaq listed company, has better access to the capital markets.
- Given USE's consolidated 70.1% ownership of Crested, the Crested board of directors did not consider it feasible to consider seeking another company to acquire Crested.
- The Crested board of directors did not attempt to quantify or otherwise assign relative weight to the foregoing factors in reaching its determination, and individual directors may have given different weight to the factors. The Crested board of directors viewed its approval and recommendation as being based on the totality of the information and factors presented to and considered by it. In reaching its decision, the Crested board of directors consulted with Crested management with respect to strategic and operational matters, and consulted with NTB with respect to the financial aspects of the transaction. Additionally, the Crested board of directors consulted Crested's legal advisors with respect to the merger agreement and related issues.

Based on the information available, the Crested board of directors determined that the value to be received by the Crested minority shareholders in the merger is greater than that available to them in a liquidation, a combination with another entity, or with Crested remaining an independent entity.

-78-

<u>Financial terms of the merger</u> The Crested board of directors believes that the merger consideration is fair to the shareholders based upon Crested's current financial condition and future prospects, as well as the current financial condition and the board's perception of the future prospects of USE. In arriving at this conclusion, the board of directors, together with Crested's management and legal and financial advisors, evaluated the lack of strategic alternatives available to Crested.

The Crested board of directors also recognized that in December 2006, the merger consideration represented an approximate 12% premium over the average trading price of Crested's common stock during preceding periods. The Crested board of directors also determined that the merger consideration fairly valued the cash and other assets on Crested's balance sheet. In this regard, the Crested board of directors considered the information presented by, and the opinion of, NTB. See "Opinion of the Crested Financial Advisor – Neidiger, Tucker, Bruner, Inc." below, and considered the updated opinion of NTB dated October 12, 2007 as confirming the fairness of the exchange ratio as originally determined.

<u>Terms of the merger agreement and voting agreement</u> The Crested board of directors considered the terms of the merger agreement, including the nature and scope of the closing conditions. The board also considered the potential for incurring a termination fee in the event of a termination of the merger agreement under certain circumstances. While this fee is small in relation to similar fees in other merger transactions, it is potentially significant given Crested's limited financial resources, and this provision might discourage third parties from seeking to acquire Crested.

The board took into account the other termination provisions of the merger agreement, which were the subject of negotiations between the parties and which would permit either party to terminate the merger agreement without cause, including the provision that allows either party to terminate if the relative stock prices of the companies varies more than 20%.

In addition, the Crested board considered the terms of the voting agreement between USE and certain of its affiliates who own Crested stock, and Crested. The Crested board considered it important that USE and those affiliates vote in line with the vote of the holders of a majority of the minority Crested shares.

**Strategic Alternatives.** Other than the merger, the Crested board of directors believed that the only strategic alternatives available to Crested were to liquidate or remain a stand-alone public company and seek to grow.

<u>Liquidation</u> The Crested board of directors considered a voluntary dissolution and liquidation of its assets as an alternative to the merger. Dissolution would require approval by the holders of a majority of Crested's shares, including the shares held by USE. If approval were obtained, Crested would have to cease doing business except to liquidate assets, pay creditors, and distribute remaining assets to all shareholders. During the wind up phase, it is possible that Crested would have to continue filing periodic reports with the SEC, and if it didn't have the funds to pay these compliance costs, it might be relying on USE to pay the costs, as well as other general and administrative expenses.

Whether USE would vote in favor of a liquidation is not known to the Crested board. The Crested board also considered the fact that even if USE approved of a liquidation, the amount Crested might obtain from liquidating assets (for example, it's 50% interest in the molybdenum properties) is unknown. In addition, an attempted sale of the 50% interest in the molybdenum properties might not be possible under the existing agreement between Kobex Resources Ltd., USE, and Crested. It is possible that buyers could not be located, or if located, the price would be unrealistically low compared to the value Crested minority shareholders may receive by owning shares in USE after the merger, with USE continuing to develop value from 100% of the two companies' assets, including the molybdenum property.

-79-

<u>Continuing as an independent public entity</u>. The other strategic alternative considered by the Crested board was for Crested to remain an independent entity. For Crested to realistically continue to operate as an independent entity for the benefit of all its shareholders, it would have to grow significantly. This would require hiring officers and employees, and potentially setting up an office outside of USE's headquarters that the USECC Joint Venture owns. If Crested moved out of the headquarters, USE would have to either rent or purchase Crested's one-half ownership in the building. Crested would also have to seek new opportunities for developing and executing a business plan that is not reliant on USE.

Even with its share of the proceeds, after retiring debt to USE, from the sale of the uranium assets to Uranium One, Crested likely may not have enough capital to continue as an independent public company, and additional funding for a new untested business plan would be difficult if not impossible to obtain.

The Crested board acknowledges the risks related to its minority shareholders owning USE shares: USE historically has relied on transaction-based revenues; its operations require locating and successful working with industry partners; and protracted downturns in mineral commodity prices can delay realizing value from significant investments. However, Crested faces the same risks. On balance, the Crested board concluded that the benefits of combining with USE greatly outweigh the strategic alternatives. This explanation of the Crested board of directors' reasons for the merger and all other information presented in this section is forward-looking in nature and, therefore, should be read in light of the factors discussed under the caption "CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS" in this proxy statement/prospectus. The Crested board of directors also considered the fact that some members of the board of directors and of Crested management may have interests in the merger that are different from those of Crested shareholders generally. See "THE MERGER—Crested's Directors and Officers Have Financial Interests in the Merger" and "—Indemnification" in this proxy statement/prospectus.

At a meeting held on January 23, 2007, after due consideration and consultation with its financial and legal advisors, all Crested directors (including the independent directors) determined that the merger agreement and the transactions contemplated thereby were advisable, fair to and in the best interests of Crested and its shareholders, including the minority shareholders, adopted the merger agreement, and recommended that Crested shareholders vote to adopt the merger agreement. On October 12, 2007, all Crested directors reaffirmed the proceeding, taking into account the updated opinion from NTB.

## **Opinion of the Crested Financial Advisor – Neidiger, Tucker, Bruner, Inc.**

Under an engagement letter dated October 25, 2006, Crested engaged Neidiger, Tucker, Bruner, Inc. to, among other things, render an opinion to the Crested board of directors that, as of the date of the opinion, the exchange ratio of 1 USE share for each 2 Crested shares held by the Crested minority shareholders in the merger agreement is fair and reasonable from a financial point of view to the minority shareholders. On December 20, 2006, NTB orally advised a meeting of the Crested board held that day that NTB was prepared to issue its opinion, and the written opinion, dated January 22, 2007, was delivered to the special committee of the Crested board on January 23, 2007. NTB's opinion is based upon and subject to the matters reviewed with the special committee of the Crested board of directors and set forth in its opinion. At the request of the Crested board of directors, NTB updated its opinion as of October 12, 2007, and confirmed the fairness of the exchange ratio as fair and reasonable to the Crested minority shareholders from a financial point of view. In this discussion, "NTB's opinion" refers to the opinion as of October 12, 2007.

NTB, as part of its investment banking service, is regularly engaged in the valuation of businesses, securities and assets in connection with mergers, acquisitions, underwritings, sales and distribution of securities, private placements and valuations for estates, and for corporate and other purposes.

-80-

This description of NTB's opinion is qualified by reference to the full text of the opinion included as Appendix C. **Crested shareholders are urged to read the Neidiger, Tucker, Bruner, Inc. opinion in its entirety.** 

NTB's engagement and its opinion are directed to and for the benefit of the special committee of the Crested board of directors in connection with its consideration of the merger. It addresses only the fairness of the merger consideration to the Crested minority shareholders from a financial point of view as of the date of the opinion. It does not address the merits of the proposed merger compared to the liquidation of Crested or Crested remaining an independent company. The opinion does not address the merits of the underlying decision by Crested to engage in the merger. NTB expresses no opinion or recommendation as to how the Crested shareholders should vote. Crested has paid NTB a cash financial advisory fee.

The NTB opinion is necessarily based on market and other conditions as in effect on, and the information made available to NTB, as of the date of its opinion. It should be understood that subsequent developments may affect the conclusion expressed in the opinion and that NTB assumes no responsibility for advising any person of any change in any matter affecting the opinion, or for updating or revising it based on circumstances or events occurring after its date. In rendering its opinion, NTB was not authorized to solicit, and did not solicit, third-party indications of interest in acquiring all or a part of Crested or engaging in a business combination or any other strategic transaction with Crested.

In the course of performing its review and analyses in rendering its opinion, NTB:

- Reviewed Crested and USE audited financial statements and annual 10-K filings with the SEC for the fiscal years ended December 31, 2003, 2004, 2005 and 2006.
- Reviewed Crested and USE unaudited financial statements and quarterly 10-Q filings with the SEC for the quarters ended March 31, 2006, June 30, 2006, September 30, 2006, March 31, 2007, and June 30, 2007.
  - Conducted discussions with certain members of management of USE and Crested.
- Reviewed the Preliminary Analysis Presentation to USE prepared by navigant Capital Advisors, LLC, dated November 28, 2006 and revised November 30, 2006. Reviewed the fairness Analysis presented to USE by Navigant Capital Advisors, LLC dated October 12, 2007.
- Reviewed the list of outstanding employee stock options and warrants issued by Crested and USE as provided by management.
  - Reviewed the financial condition and past operating results of Crested and USE.
- Reviewed the Merger Agreement dated January 23, 2007 and the First Amendment to Agreement and Plan of Merger dated July 31, 2007 by and among USE and Crested.
  - Reviewed other publicly available information for both Crested and USE.
  - Conducted such other studies and analyses as deemed appropriate by NTB.

NTB relied on the accuracy and completeness of the financial and other information provided by Crested, and the information provided by Crested's management. NTB did not make an independent verification of such information. NTB relied upon the accuracy and completeness of the foregoing information, and did not assume any responsibility for and did not conduct any independent verification of this information. In addition, NTB did not conduct any independent verification of this information. In addition, NTB did not conduct any independent verification of this information. In addition, NTB did not conduct any independent verification of the assets or liabilities of Crested or concerning its solvency or fair value, and NTB was not provided with any such valuation or appraisal.

In rendering its opinion, NTB assumed that the merger would be consummated on the terms described in the merger agreement without any waiver of any material terms or conditions. NTB also assumed that obtaining or not obtaining necessary regulatory approvals for the merger would not have an adverse effect on Crested or the combined USE or the contemplated benefits of the consummation of the merger. NTB did not express any opinion as to tax or other consequences that might result from the merger, nor did its opinion address any legal, tax, regulatory or accounting matters, as to which NTB understood that Crested had obtained or would obtained such advice as it deemed necessary from qualified professionals.

NTB and the Crested Special Committee mutually reached a decision on the amount of consideration that would be deemed reasonable.

NTB did not express any opinion as to the price at which shares of Crested or USE may trade in the future.

## **Opinion of the USE Financial Advisor – Navigant Capital Advisors, LLC**

The following is a summary of the material financial and comparative analyses that were performed by Navigant Capital in connection with rendering its opinion to the board of directors of U.S. Energy Corp. The summary of is not a complete description of the analyses. The preparation of a fairness opinion is a complex analytical process involving various determinations as to the most appropriate and relevant methods of financial analyses and the application of those methods to the particular circumstances, and, therefore, is not readily susceptible to summary description. In arriving at its opinion, Navigant Capital considered the results of all the analyses and did not attribute any particular weight to any factor or analysis considered. Rather, Navigant Capital made its determination as to fairness on the basis of its experience and professional judgment after considering the results of all of the analyses.

Navigant Capital acted as USE's financial advisor in connection with the proposed merger, pursuant to an engagement letter dated as of October 6, 2006, and USE has paid Navigant Capital a customary fee. The USE board of directors selected Navigant Capital as its financial advisor based on Navigant Capital's qualifications, expertise, reputation and professional experience. Navigant Capital is an internationally recognized investment banking firm that regularly engages in the valuation of businesses and securities in connection with mergers and acquisitions, leveraged buyouts, private placements and valuations for corporate and other purposes.

Navigant Capital delivered to USE a written opiniton dated January 23, 2007. That opinion was updated and reissued as of October 12, 2007. The full text of Navigant Capital's October 12, 2007 written opinion to the USE board of directors is attached as Appendix D and is referred to in the following discussion as "Navigant Capital's opinion.". You should read Navigant Capital's opinion carefully. The opinion is limited to the fairness, from a financial point of view, to the holders of USE common stock of the exchange ratio of one share of USE common stock for each two issued and outstanding shares of Crested common stock. The opinion does not address the fairness of the exchange ratio to Crested or the minority shareholders of Crested. Navigant Capital's opinion does not constitute a recommendation to you on how to vote on the merger.

The following summary, which is qualified in its entirety by reference to the full text of Navigant Capital's opinion, discusses the material terms of Navigant's opinion.

In arriving at its opinion, Navigant Capital:

- Reviewed USE's and Crested's audited financial statements included in their respective Annual Reports on Securities and Exchange Commission ("SEC") Form 10-K for the fiscal years ended December 31, 2002 through 2006 and their respective unaudited financial statements included in their respective Quarterly Reports on SEC Form 10-Q for the six months ended June 30, 2007, together with in each case the related Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Report;
- Reviewed the January 23, 2007 Merger Agreement and the First Amendment effective July 31, 2007, including (a) Section 1.5 providing for the conversion of Crested common stock into the right to receive USE common stock based on the Exchange Ratio and (b) Section 1.6 providing for the cashless exercise at the effective time of the Merger of options to purchase Crested common stock outstanding under Crested's Incentive Stock Option Plan and the conversion of such shares of Crested common stock into shares of USE common stock based on the Exchange Ratio;
- Reviewed the Voting Agreement dated January 23, 2007 between USE, Crested and certain stockholders of Crested;
- Reviewed certain internal financial and other data concerning the operations, financial condition and financial forecasts relating to the business, earnings, cash flow, assets, liabilities and prospects of USE and Crested prepared by management of USE;
- Conducted discussions with members of management of USE concerning the matters described in the first four paragraphs above;
  - Visited certain facilities and business offices of USE and Crested;
    - Visited certain of USE's and Crested's properties;
- Reviewed the executed Exploration, Development and Mine Operating Agreement between U.S. Moly, USE, Crested and Kobex Resources Ltd. dated April 3, 2007; Reviewed the executed Joint Venture Agreement by and between USE and Crested dated July 31, 1982 and subsequent amendment dated January 20, 1989;
- Reviewed the list of outstanding employee stock options and warrants issued by USE and Crested as provided by USE;
  - Evaluated net asset approaches for USE and Crested as stand-alone entities;
- Reviewed the terms of (i) recent mergers and acquisitions of companies in the sector and (ii) premiums paid in acquisitions of a diverse set of companies;

- Reviewed the historical market prices, trading activity, and valuation multiples for USE's and Crested's publicly traded securities and compared them with those of certain publicly traded companies; and
  - Conducted such other studies, analyses and inquiries as Navigant Capital deemed appropriate.

In preparing its opinion, Navigant Capital assumed and relied upon, and did not independently verify, the accuracy and completeness of the information reviewed by it with respect to USE or Crested and did not assume any responsibility with respect thereto, and further relied upon the assurance of management of USE that it was not aware of any facts that would make such information inaccurate or misleading in any respect material to its analysis. Navigant Capital did not make any physical inspection or independent appraisal of any of the properties or assets of USE, nor did it evaluate the solvency or fair value of USE under any state or federal laws related to bankruptcy, insolvency or similar matters. Navigant Capital's opinion was necessarily based on business, economic, market and other conditions existing as of the date of its opinion and could be evaluated by it at the date of the opinion.

With respect to the financial forecast information furnished to or discussed with Navigant Capital by USE, Navigant Capital assumed that such information was reasonably prepared and that it reflected the best currently available estimates and judgment of USE's management as to the expected future financial performance of USE and Crested. For purposes of its opinion, Navigant Capital assumed that USE and Crested were not involved in any material transaction other than the merger and those activities undertaken in the ordinary course of business.

Navigant Capital assumed that the merger would be consummated on the terms and conditions described in the merger agreement reviewed by Navigant Capital, without material delay, waiver, amendment or modification of any material term, condition or agreement therein, and that the definitive merger agreement would not differ in any material respect from the draft reviewed.

Based upon the foregoing and other statements in the opinion, and in reliance thereon, Navigant Capital's opinion states that the exchange ratio is fair, from a financial point of view, to the shareholders of USE.

Navigant Capital's opinion only addressed the matters specifically addressed thereby. Without limiting the foregoing, Navigant Capital's opinion did not address: (i) matters that require legal, regulatory, accounting, insurance, tax or other professional advice; (ii) the underlying business decision of USE, its shareholders or any other party to proceed with or effect the merger; (iii) the fairness of any portion or aspect of the merger not expressly addressed in the opinion; (iv) the fairness of any portion or aspect of the merger to the holders of any class of securities, creditors or other constituencies of USE, or any other party other than those set forth in the opinion; (v) the relative merits of the merger as compared to any alternative business strategies that might exist for USE or the effect of any other transaction in which USE and Crested might engage; (vi) the tax or legal consequences of the merger to either USE, its security holders, or any other party; (viii) the degree to which the amount and nature of the compensation from the merger benefits any individual officers, directors, employees or class of such persons, relative to the benefits to the shareholders of USE; (viii) the likely price at which USE's or Crested's Common stock will trade; or (ix) matters relating to the exercise or conversion of options issued pursuant to Crested's Incentive Stock Option Plan. Navigant Capital was not engaged to initiate any discussions with third parties with respect to a possible acquisition or any other alternative transaction or to negotiate the terms of the merger, and Navigant Capital was not asked to, and Navigant Capital did not, offer any opinion as to the matterial terms of the merger agreement or the form of the merger.

Navigant Capital assumed that the merger will be consummated on the terms and conditions described in the merger agreement and amendment, without material delay, waiver, amendment or modification of any material term, condition or agreement therein.

Navigant Capital's opinion does not address the relative merits of the merger or any alternatives thereto, the underlying decision of the board to proceed with or effect the merger, or any other aspect of the merger. In furnishing its opinion, Navigant Capital does not admit that it is an expert within the meaning of the term "expert" as used in the Securities Act, nor does it admit that its opinion constitutes a report or valuation within the meaning of the Securities Act.

Navigant Capital employed generally accepted valuation practices and methods in preparing its opinion. The following summarizes Navigant Capital's material financial analyses used in developing its opinion. The summary does not constitute a complete description of Navigant Capital's analyses and the factors it considered in preparing its opinion, including the assumptions and methodologies that underlie the analyses. The preparation of an opinion regarding fairness, from a financial point of view, is a complex process involving the application of subjective business judgment in determining the most appropriate and relevant methods of financial analysis and the application of those methods to the particular circumstances and, therefore, is not readily susceptible to summary description.

No company, transaction or business used in Navigant Capital's analyses as a comparison is identical or directly comparable to USE, Crested, or the proposed merger, and an evaluation of the results of those analyses is not entirely mathematical. Rather, the analyses involve complex considerations and judgments concerning financial and operating characteristics and other factors that could affect values of the companies or the merger.

In performing its analyses, Navigant Capital made numerous assumptions with respect to financial conditions and other matters, many of which are beyond the control of Navigant Capital or USE. Any estimates contained in the analyses are not necessarily indicative of actual values or future results, which may be significantly more or less favorable than suggested by the analyses. The analyses do not purport to be appraisals or to reflect the prices at USE's assets actually could be sold.

## Summary of Analyses Performed by Navigant

Navigant Capital's principal analyses were a comparison of the relative stock prices of USE and Crested, a comparison of the ranges of fair market value of the equity of USE and Crested utilizing a net asset approach and premiums paid in similar transactions. These analyses each suggested an "implied exchange ratio" of the number of Crested shares exchangeable into one USE share that would be supported by relative stock prices, and by the net asset approach.

In arriving at its opinion, Navigant Capital considered all of the analyses it performed and did not attribute any particular weight to any specific analysis nor did it reach a conclusion based on any single analysis. Consequently, no single analysis should be considered independently as it may lead to a misleading conclusion about Navigant's opinion concerning the exchange ratio for the merger.

**Stock Price Comparison** The simple average price of USE and Crested stock prices, as reported for the 30 days ended December 18, 2006, were \$5.16 and \$2.32, respectively, indicating an implied exchange ratio of 2.224 Crested shares for 1 USE share. The volume weighted average prices for that period, using reported prices and trading volumes in each company's stock, were \$5.30 and \$2.31, respectively, indicating an implied exchange ratio of 2.294 Crested shares for 1 USE share.

The simple average price of USE and Crested stock prices, as reported for the 60 days ended December 18, 2006, were \$4.64 and \$1.98, respectively, indicating an implied exchange ratio of 2.343 Crested shares for one USE share. The volume weighted average prices for that period, using reported prices and trading volumes in each company's stock, were \$5.02 and \$2.12, respectively, indicating an implied exchange ratio of 2.368 Crested shares for one USE share.

Since December 26, 2007, the two companies' stock prices have converged to the 2 for 1 exchange ratio. **proach to Equity Value**. The main properties owned by USE and Crested were discretely valued based on indications of cash flows associated with the agreements relating to USE's and Crested's mining properties, and discounting these cash flows at an

**Net Asset Approach to Equity Value**. The main properties owned by USE and Crested were discretely valued based on indications of cash flows associated with the agreements relating to USE's and Crested's mining properties, and discounting these cash flows at an annual rate of 10%, and further discounting, for the underlying transaction risks, ranging from 10% to 20%, to account for the risks (i) due to the transactions having not yet been completed, (ii) associated with developing properties, and (iii) the credit risk of third parties. The values of other assets and liabilities were based on book value or values represented by USE management. Adjustments in these values were based on the judgment of Navigant Capital. This net asset approach discretely estimated the equity value of the companies.

As shown in the following table, the range of implied exchange ratios was from 1.909 to 1.929 Crested shares for one USE share.

Net Asset Approach	10% Project Completion Risk for Kobex Mining Agreement; 10% SGMI share discount (1)		15% Project Completion Risk for Kobex Mining Agreement; 15% SGMI share discount (2)		20% Project Completion Risk for Kobex Mining Agreement; 20% SGMI share discount (3)

Notes

- (1)Assumes 10% transaction risk for KOBEX exploration, development and mine operating agreement and 10% illiquidity discount for the shares of SGMI.
- (2) Assumes 15% transaction risk for KOBEX exploration, development and mine operating agreement and 15% illiquidity discount for the shares of SGMI.
- (3) Assumes 20% transaction risk for KOBEX exploration, development and mine operating agreement and 20% illiquidity discount for the shares of SGMI.
  - (4) Includes 50% of USECC assets and liabilities.
    (5) Valued at book value from 6/30/07 balance sheets.

**Premiums Paid in Similar Transactions.** Navigant Capital also reviewed the terms and premiums paid in similar transactions over the past five years. Some of the transactions involved companies in the minerals sector (uranium, and gold and silver) and other transactions involved companies in other industry sectors. This analysis showed acquirors paid premiums over (or under) the 30 day trading average of the target companies' stock price, ranging from 314% to -55% for uranium companies 14 transactions analyzed having an arithmetic mean of 72.5% and a median of 42%); 348% to -36% for gold and silver companies (63 transactions analyzed having an arithmetic mean of 60.3% and a median of 48%); and 114% to -62% for target companies in all industries (less than \$1 billion deal size) in cases where a greater-than-70% majority owner purchased the remaining minority stake (15 transactions analyzed having an arithmetic mean of 27%).

## **Decision of USE's Board of Directors**

In deciding to approve the merger agreement and to recommend approval of the merger, the USE board of directors (including the independent directors on the special committee) carefully considered Navigant Capital's original opinion on the fairness of the 2:1 exchange ratio and the several analyses performed by Navigant Capital regarding the relative values of USE and Crested. These same elements were taken in account by the board of directors in its review of Navigant Capital's October 12, 2007 opinion. However, Navigant Capital's opinion was one of several factors taken into consideration.

The board also considered the other factors described under "USE's Reasons for the Merger." Further, the board considered the possibility that the strategic alternative of Crested continuing as an independent company would not be successful, in which case the USE shareholders would not realize any value for the consolidated 70.1% stake held in Crested.

# Board of Directors and Management of USE Following the Merger

There will be no change in the current directors and executive officers of USE following the merger. The USE board is not under any obligation to, and does not intend to, appoint the Crested outside directors to the USE board. The officers of Crested also serve as officers of USE, and those individuals will continue in service to USE. USE may at some point in the future ask officers of Crested who are currently not on the USE board of directors to stand for election as directors of USE.

Information about the USE directors and officers, and compensation paid to such persons, can be found in USE's proxy statement for the annual meeting which was held on June 22, 2007. See "WHERE YOU CAN FIND MORE INFORMATION."

### **Distribution of the Merger Consideration**

Within five business days after the completion of the merger, USE will send a letter of transmittal and instructions to each Crested shareholder for use in (i) exchanging certificates representing shares of Crested for shares of USE (which will be in book-entry form unless a physical certificate is requested), and (ii) for those Crested shareholders owning 500 or fewer Crested shares, the option of receiving cash instead of USE shares; provided, that USE has the right to elect to pay such cash or issue shares to all such electing Crested shareholders. USE will cause its transfer agent (Computershare Trust Company) to deliver USE shares to each Crested shareholder (or cash for holders who decide to receive and USE agrees to pay cash), once it receives the properly completed transmittal materials together with such shareholder's certificated or uncertificated Crested shares.

Certificated Crested shares may be delivered to USE up to six months after completion of the merger. At the end of that period, in its discretion, USE may refuse to honor further requests for issuing USE shares. USE will not be liable to anyone if merger consideration is delivered to a public official pursuant to any applicable abandoned property, escheat or similar law.

If your certificate representing Crested shares has been lost, stolen or destroyed, you may receive the merger consideration if you give the exchange an affidavit to that effect. USE may require you to post a bond in reasonable amount as an indemnity against any claim that may be made against USE with respect to the lost, stolen or destroyed certificate.

After completion of the merger, there will be no further transfers on the stock transfer books of Crested and all Crested shares presented to USE's transfer agent for any reason will be converted into the right to receive USE shares.

### **Public Trading Markets**

USE common stock is listed on the Nasdaq Capital Market ("USEG"). Crested common stock is listed on the Over-the-Counter Bulletin Board ("CBAG"). If the merger is consummated, Crested stock will be delisted from the OTCBB and deregistered with the SEC under the Securities Exchange Act of 1934. USE will use its reasonable best efforts to cause the merger consideration (the shares of USE issued in the merger) to be listed on Nasdaq.

Except for USE shares issued to any person who is deemed to be an affiliate of Crested, all the USE shares to be issued in the merger will be freely transferable under the Securities Act.

For information on the implied value of one Crested share on the day before the signing of the merger agreement, and a date prior to the distribution of this proxy statement/prospectus, please see "COMPARATIVE MARKET PRICES AND DIVIDENDS – Recent Closing Prices."

### **USE Dividends**

USE declared a dividend of \$0.10 per share on all outstanding shares of its common stock for all holders on the record date of July 6, 2007, payable on July 16, 2007. Prior to the current dividend USE has only declared a dividend on one other occasion, November 1, 1990, when it declared a 1 for 10 share dividend. Management of USE does not

currently anticipate any dividends to be paid in the near term future but anticipates retaining earnings to fund investments and business development.

-88-

### Crested's and USE's Directors and Officers Have Financial Interests in the Merger

Those executive officers and directors of Crested that hold options to buy Crested shares underlying options may be deemed to have financial interests in the merger that are in addition to their financial interests as current shareholders of Crested. The Crested board of directors was aware of these financial interests and considered them, among other matters, in approving the merger agreement. The officers and directors of USE who do not serve Crested also hold Crested options.

If at the special meeting the merger is approved by the holders of a majority of the minority Crested Shares, then, immediately prior to that consummation, those officers, directors, and employees of USE (and a recently-retired officer, Daniel P. Svilar) who elect to exercise their options under the Crested incentive stock option plan, will receive shares of Crested. The exercise of options would be by a "cashless exercise" method, using the Crested \$2.32 stock price at December 21, 2006, resulting in the issuance of a total of 394,398 Crested shares.

In addition, the merger agreement provides that if the merger is consummated, then Crested would pay the income taxes which would be owed by those persons who exercise (by cashless method) their Crested options which are nonqualified (the "Crested NSOs"). Additionally Crested has agreed to pay the income taxes 15,000 forfeitable shares of Crested common stock which were issued in 1990 to Mr. Lorimer. As a result of the merger, these forfeitable Crested shares will be converted into 7,500 shares of USE on the same ratio of 2:1 pursuant to the Merger Agreement. The 7,500 shares of USE will be subject to a Lock-up Agreement not to sell the shares until retirement, total disability or death. This provision was approved by the independent directors of Crested.

The amount of tax which would be owed by such persons will depend on the market prices for USE and Crested stock when the merger is closed. Assuming market prices for USE of \$4.74 and Crested of \$2.32, the total income tax which would be paid by Crested for all such persons would be approximately \$268,700. Such persons include the officers and directors in service to USE, a retired USE director (Don C. Anderson); and a recently-retired USE and Crested officer (Daniel P. Svilar);. Further to USE's Compensation Committee's objective of compensating current officers with equity to further motivate them to stay in service, the Compensation Committee recommended (and the USE Board of Directors has mandated) that all of the officers of USE sign lockup agreements not to sell (until retirement, death or disability) any of the USE stock they receive in exchange for the Crested stock they receive on cashless exercise of the Crested NSOs, and, for Steven R. Youngbauer, those shares he would receive on cashless exercise of his qualified options (even though he will not recognize income on exercise of such options).

The following table shows the amount of Crested options held by officers and directors of USE and the number of shares which will be issued to each such person if the merger is consummated.

Director and General Council of Crested until retirement on January 12, 2007

-90-

The USE shares will be issued based on the same 2:1 exchange ratio as applies to Crested's minority shareholders.

### **Indemnification and Insurance**

The merger agreement provides that, for six years following consummation of the merger, USE will indemnify and hold harmless, the directors and officers of Crested (with respect to claims arising from facts or events relating to the merger and occurring prior to consummation of the merger), to the fullest extent permitted by USE's articles of incorporation and bylaws, and Wyoming law. This indemnification extends to Mike Zwickl and Kathleen Martin, independent directors of Crested and special committee members, who will not become directors of USE. USE will obtain a rider to its current policy of directors' and officers' liability insurance to cover such claims against such persons once the merger is completed.

### THE MERGER AGREEMENT

The following summarizes certain provisions of the agreement and plan of merger, as amended, and the merger which are not summarized elsewhere. The summaries are qualified in their entirety by reference to the complete text of the agreement and plan of merger which is incorporated by reference into the prospectus and attached as Appendix A. Please read the entire merger agreement.

### **Representations and Warranties**

The merger agreement contains representations and warranties by USE and Crested, some of which reflect negotiations between the parties and which are customary in transactions of this type. The representations and warranties are solely for the benefit of the parties to the merger agreement and may be limited or modified by a variety of factors, including: subsequent events, information included in public filings, and disclosure schedules to the merger agreement. Accordingly, some of the representations and warranties may not describe the actual state of affairs after the date of the merger agreement, and you should not rely on them as statements of fact.

### **Closing and Effective Time of the Merger**

*Closing.* The closing of the merger will take place on the first business day following the date on which all closing conditions set forth in the merger agreement have been either satisfied or waived (other than any conditions which by their terms cannot be satisfied until the closing date) or such other time as agreed to in writing by USE and Crested. We currently expect to complete the merger in the fourth quarter of 2007.

*Effective Time*. The merger will be effective upon the filing of (a) a statement of merger executed in accordance with the relevant provisions of the Colorado Corporations and Associations Act with the Secretary of State of the State of Colorado, and (b) articles of merger executed in accordance with the relevant provisions of the Wyoming Business Corporations Act with the Secretary of State of the State of Wyoming. The effective time may be a later date than when both filings have been made, if a later time is specified in the filings by USE and Crested.

### No Solicitation of Takeover Proposals.

The merger agreement provides that, until its termination, Crested will not, and will not permit any of its subsidiaries or any of its or its subsidiaries' officers, directors or employees, or any investment bankers, attorneys or other advisors or representatives to, directly or indirectly, (i) solicit, initiate, or encourage any inquiries relating to, or the submission of, any Takeover Proposal (as defined below), (ii) approve or recommend any Takeover Proposal, accept any Takeover Proposal or enter into any letter of intent, agreement in principle or agreement with respect to any Takeover Proposal (or resolve to or publicly propose to do any of the foregoing) or (iii) participate in any discussions or negotiations regarding, or furnish to any person any information with respect to, or take any other action to facilitate any inquiries or the making of any proposal or offer that constitutes, or may reasonably be expected to lead to, any Takeover Proposal.

Despite this general prohibition on activities with respect to a Takeover Proposal, Crested or its board of directors may take and disclose to Crested's shareholders a position with respect to a tender offer by a third party pursuant to the SEC's Rules 14d-9 and 14e-2 promulgated under the Exchange Act, provided that the board may not recommend that the shareholders tender their Crested common stock in connection with any such tender or exchange offer unless the board determines in good faith:

- after consultation with its financial advisors and outside counsel, that failing to take such action would reasonably be expected to constitute a breach of the fiduciary duties of the board; and
  - that the Takeover Proposal is a "Superior Proposal" (as defined below).

In addition, if, prior to the special meeting of Crested shareholders relating to approval of the merger, Crested received an unsolicited bona fide written Takeover Proposal from a third party that the board determined in good faith (after receiving the advice of a financial adviser of nationally or regionally recognized reputation) is reasonably likely to be a Superior Proposal, Crested and its representatives would be permitted to conduct such discussion or provide such information as the board determines. Moreover, the board would have to determine in its good faith judgment those actions which it would be required to take in order to comply with its fiduciary duties. Crested has agreed that, prior to providing any information or data to, or entering into any negotiations or discussions with, any such third-party or making any such recommendation in connection with a proposal or offer for a Takeover Proposal, it will receive from such third-party an executed confidentiality agreement.

Crested has agreed to promptly notify USE if it receives any Takeover Proposal, including the identity of the party submitting such proposal, and to provide USE, no later than 24 hours after receipt, with the material terms, conditions and other aspects of any inquiries, proposals or offers with respect to, or which could reasonably be expected to lead to, a Takeover Proposal, and of any modifications or revisions to the terms of the Takeover Proposal.

"Takeover Proposal" means any proposal or offer (whether or not in writing and whether or not delivered to the shareholders of Crested generally) for a merger or other business combination, reorganization, share exchange, recapitalization, liquidation, dissolution or similar transaction involving Crested or any of its subsidiaries or to acquire in any manner (including by tender or exchange offer), directly or indirectly, a 25% or more equity interest in, any voting securities of, or assets (including equity interests in other entities) of Crested and its subsidiaries having an aggregate value equal to 10% or more of Crested's net asset value, other than the transactions contemplated by the merger agreement.

"Superior Proposal" means any unsolicited bona fide written Takeover Proposal which:

(1) contemplates

(A) a merger or other business combination, reorganization, share exchange, recapitalization, liquidation, dissolution, tender offer, exchange offer or similar transaction involving Crested as a result of which Crested's shareholders prior to such transaction in the aggregate cease to own at least 20% of the voting securities of the ultimate parent entity resulting from such transaction; or

(B) a sale, lease, exchange, transfer or other disposition (including, without limitation, a contribution to a joint venture) of at least 10% of the value of the net assets of Crested and its subsidiaries, taken as a whole; and

(2) is otherwise on terms which Crested's board of directors determines after consultation with its financial advisor and outside legal counsel,

(A) would result in a transaction that, if consummated, is more favorable to Crested's shareholders from a financial point of view than the merger or, if applicable, any proposal by USE to amend the terms of the merger agreement taking into account all the terms and conditions of such proposal and the merger agreement; and

(B) is reasonably capable of being completed without undue delay.

### Conditions to the Completion of the Merger

In addition to the satisfaction immediately prior to completion of the merger of customary representations and warranties made by each party in the merger agreement, there are specific conditions which must be satisfied or waived to complete the merger. If the conditions are not satisfied or waived, to the extent permitted by law, the merger will not occur, and each of USE and Crested may lose some or all of the intended benefits of the merger. If these conditions have been satisfied (or waived), USE will (pursuant to the voting agreement with Crested) vote its shares consistent with the vote of the holders of a majority of the minority Crested shares. Certain conditions are:

- there is no temporary restraining order, preliminary or permanent injunction or other order or decree issued by any court of competent jurisdiction or other statute, law, rule, legal restraint or prohibition in effect preventing the completion of the merger;
- USE's shares to be issued in the merger have been approved for listing on Nasdaq, subject to official notice of issuance;
  - the merger agreement is adopted by the holders of a majority of minority shares of Crested;
  - holders of not more than 200,000 Crested shares have not dissented from the merger; and
    - certain legal and tax opinions are delivered.

-93-

### Conduct of Business of Crested and USE Pending the Merger

Pursuant to the merger agreement, Crested and USE each have agreed that, prior to the Effective Time, except as otherwise agreed to by the other party in writing (which agreement will not be unreasonably withheld) or except in connection with the transactions contemplated by the merger agreement, each will, and will cause each of its subsidiaries to, conduct its business in the ordinary and usual course and in a manner consistent with past practice, and will use all reasonable efforts to maintain beneficial business relationship and good will with suppliers, contractors, distributors, customers, licensors, licensees and others having business relationships, and keep available the services of its current key officers (and in the case of USE, its key employees). "Ordinary and usual course of business" include the activities contemplated by the agreement with Kobex Resources Ltd. and the acquisition of mineral properties. In addition, Crested (but not USE) has agreed not to issue or acquire any of its common stock or issue securities convertible into common stock (except for the issuance of common stock on exercise of options outstanding under Crested's incentive stock option plan).

• Each of the companies in addition have agreed not to enter into or modify material agreements, or amend their articles of incorporation or bylaws, or permit their subsidiaries to do so. Excepted from this agreement would be modifications to the agreement with Kobex (so long as such modifications are of equal application to each of USE and Crested).

### Termination and Termination Fees; Payment of Fees and Costs Generally

The merger agreement may be terminated before the special meeting, or after the special meeting even if the minority shareholders of Crested have approved the merger agreement, under specific conditions:

- by either USE or Crested if the merger is not completed, through no fault of the terminating party, by December 31, 2007, although this deadline may be extended by mutual agreement;
  - by USE if the holders of a majority of the Crested minority shares do not approve the merger agreement;
- by USE or Crested if any final and nonappealable legal restraint is issued having the effect of permanently restraining, enjoining or otherwise prohibiting the merger;
- by USE if the Crested board of directors (or its special committee) withdraws, modifies or amends its approval or recommendation in favor of the merger or recommends or approves to Crested's shareholders a Takeover Proposal or resolves to do any of the foregoing, or otherwise breaches its obligations relating to the solicitation of Takeover Proposals (see below);
  - by USE if the holders of more than 200,000 Crested shares dissent from the merger;
- by USE or Crested if, at any time before completion of the merger, USE's closing stock price has been 20% more or less than the 2 to 1 exchange ratio as applied to the Crested stock price, for two or more consecutive trading days;
  - by USE or Crested due to material uncovered breaches or failures to perform by the other party.

Crested has agreed to pay USE a termination fee equal to 50% of USE's legal and financial advisory fees incurred in connection with the merger agreement (the "Termination Fee") if the merger agreement is terminated by USE because (i) Crested's board of directors (or any committee thereof) has withdrawn, modified or amended in any manner adverse to USE its approval of or recommendation in favor of the merger or recommended or approved a Takeover Proposal or resolved to do any of the foregoing; (ii) Crested breached its covenant in Section 5.9 of the merger agreement relating to the solicitation of Takeover Proposals; or (iii) Crested otherwise intentionally breaches the merger agreement.

• USE has agreed to pay Crested (i) all of Crested's legal and financial advisory fees if USE terminates the agreement because the holders of more than 200,000 Crested shares dissent from the merger; and (ii) 50% of Crested's legal and financial advisory fees incurred in connection with the merger agreement if Crested terminates the agreement due to USE's intentional breach of the agreement, even if all conditions to USE consummating the merger have been fulfilled.

In the event of termination, USE and Crested will have no obligations thereunder to each other except for payment of the Termination Fee or payment of Crested's fees as described in the preceding paragraph.

• Except as described above, and except for costs to mail this proxy statement/prospectus (to be shared equally), the parties will pay their own legal and financial advisory fees and costs related to the merger agreement.

### THE VOTING AGREEMENT

At the same time USE and Crested signed the merger agreement, the companies and those officers and directors of USE who own shares of Crested, signed an irrevocable voting agreement (attached as Appendix B). The voting agreement was signed as an inducement for Crested to sign the merger agreement.

*Voting of Shares* Pursuant to the voting agreement, USE and the others who are party to it have agreed to vote (at the Crested special meeting) consistent with the vote of holders of a majority of the minority Crested shares, whether in favor of, or against, approval of the merger agreement, as well as any other matters required to be approved by the Crested shareholders at the meeting. However, under the voting agreement, USE may elect to not vote in favor of the merger, even if it has been approved by the holders of a majority of the minority Crested shares, to the extent such election is permitted (see "THE MERGER AGREEMENT - Conditions to the Completion of the Merger" above).

Under the voting agreement, USE and the others also have agreed to vote against any proposal at the meeting which would result in a breach by Crested of the merger agreement. The others who are party to the voting agreement have agreed not to assert dissenters' rights. See "DISSENTERS' RIGHTS" below.

The Crested shares subject to the voting agreement are:

U.S. Energy		12,024,733	
Corp.		12,024,735	
Plateau		60,000	
Resources		00,000	
Sutter Gold		100,000	
		100,000

Mike Zwickl	(4)	14,203	
		12,406,974	

<sup>(1)</sup>Mr. Herron serves as a director of USE and Crested, Sr. Vice President of USE and

Co-Chairman and President of Crested

<sup>(2)</sup>Mr. Lorimer serves as CFO/Treasurer and Vice President of Finance of USE and Crested

and as a director of Crested

<sup>(3)</sup>Mr. Svilar served as General Counsel and Secretary of USE and Crested and as a director

of Crested until his retirement on January 12,

2007.

<sup>(4)</sup>Serves as an Independent Director of Crested and on Special Committee of Crested for the USE - Crested merger.

The Crested shares not owned by USE will be exchanged for USE shares at the same 2:1 exchange ratio as applies to the minority Crested shareholders. USE and the other shareholders have agreed not to transfer any of their Crested shares prior to the merger.

### **DISSENTERS' RIGHTS**

Under Article 113 of the Colorado Business Corporation Act (the "CBCA"), the Crested minority shareholders have the right to dissent from the merger and obtain payment of the fair value of their Crested shares if the merger is completed. A copy of Article 113 is attached as Appendix E. The following summarizes the steps that you must take to perfect your rights to dissent and be paid the fair value of your Crested shares. If you fail to follow each step in a timely manner, as provided in Article 113, you will lose your right to be paid fair value for your Crested shares.

The summary only addresses some of the provisions of Article 113. The summary is qualified in its entirety by the complete text of Appendix E. Read it carefully.

First step to be taken by a dissenter. If you desire to receive payment of the fair value for your shares, you must:

- Cause Crested to receive, before the vote is taken at the special meeting, written notice of your intention to demand payment for your shares if the merger is completed; and
  - Not vote your shares in favor of the merger agreement.

-96-

Note that if you hold record ownership of the Crested shares you own beneficially, and you wish to dissent with respect to those beneficially owned shares, you <u>must</u> instruct your record holder (for example, your broker or bank, or, if your shares are held of record by a partnership or corporation, then that entity) to assert dissenters' rights as to <u>all</u> of your shares held beneficially by the record holder.

Step to be taken by USE (sending a Notice to Dissenters). If the merger is completed,

USE will give to each record shareholder who has given written notice of intent to demand payment (and who has not voted in favor of the merger agreement), a written dissenters' notice along with a copy of Appendix E. USE's written dissenters' notice will

- (i) state that the merger has been authorized and been completed as of a specific date;
- (ii) state that dissenters' payment demands and stock certificates must be sent to USE;
- (iii) provide a form for demanding payment (which will request an address be provided where payment is to be made);
- (iv) set the date by which USE must receive the payment demand and certificates for the Crested shares (the date cannot be less than 30 days after USE gives its written dissenters' notice);
- (v) require each beneficial owner <u>and</u> the record shareholder(s) of all shares owned beneficially to certify to USE that dissenters' rights have been asserted as to <u>all</u> of the shares; and
- (vi) state that the first public announcement of the 2:1 exchange ratio was made on December 26, 2006 and that in the payment demand form (under (iii) above), each shareholder (or the beneficial owner if the shares are held by another record holder) must certify in writing whether the shares were acquired before or after December 26, 2006.

First step to be taken by a dissenter. Within the time period set by USE in the dissenters' notice, you must

(a) Cause USE to receive a payment demand (USE will send you a form for this along with USE's dissenters' notice); and

(b) Deposit the stock certificate(s) with USE.

**Payment by USE**. If you have taken the first and second steps, then USE will pay you an amount it estimates is the fair value of your shares, plus interest, and send you financial information about USE, how it estimates the fair value, and other information.

Third step to be taken by a dissenter if dissatisfied with the payment. If you don't agree with USE's estimate of value, send a notice to USE of your own estimate.

**Judicial appraisal if payment demands are not resolved**. If payment demands are not resolved, USE will initiate a legal proceeding in the District Court, City and County of Denver, and the court will determine fair value of all the shares for which payment demands are not resolved, appointing appraisers to help the court make its decision, if appropriate. If fair value is determined to be more than what was paid by USE, USE will pay the difference.

### **ACCOUNTING TREATMENT**

The merger of Crested with and into USE will be accounted for in accordance with accounting principles generally accepted in the United States using the purchase method of accounting. USE will establish a new accounting basis for the assets and liabilities of Crested based on their fair values, the value of the consideration deemed to be provided to Crested's shareholders in connection with the merger and the costs of the merger. USE will record as mining claims the excess of the consideration over the book value of Crested's assets (including identifiable intangible assets) and liabilities which primarily represents the 30% of Crested's 50% ownership of the Lucky Jack Molybdenum property near Crested Butte, Colorado. A final determination of required purchase accounting adjustments, including the allocation of consideration to the assets acquired and liabilities assumed, based on their respective fair values, has not yet been made. For financial reporting purposes, the results of operations of Crested will be included in USE consolidated statement of operations following the completion of the merger. USE's financial statements for prior periods will not be restated as a result of the merger.

### MATERIAL UNITED STATES FEDERAL INCOME TAX CONSEQUENCES OF THE MERGER

The following discussion sets forth the material U.S. federal income tax consequences of the merger to U.S. holders (as defined below) of Crested common stock. This discussion does not address any tax consequences arising under the laws of any state, local or foreign jurisdiction. This discussion is based upon the Code, the regulations of the U.S. Treasury Department and court and administrative rulings and decisions in effect and available on the date of this proxy statement/prospectus, any of which may change, possibly retroactively. Such a change could affect the continuing validity of this discussion.

For purposes of this discussion, the term "U.S. holder" means a beneficial owner of Crested common stock who for U.S. federal income tax purposes is:

- a citizen or resident of the United States;
- a corporation, or an entity treated as a corporation, created or organized in or under the laws of the United States or any state or political subdivision thereof;
- a trust that (i) is subject to (a) the primary supervision of a court within the United States and (b) the authority of one or more United States persons to control all substantial decisions or (ii) has a valid election in effect under applicable Treasury regulations to be treated as a United States person; or
  - an estate that is subject to U.S. federal income tax on its income regardless of its source.

If a partnership (including for this purpose any entity treated as a partnership for U.S. federal income tax purposes) holds Crested common stock, the tax treatment of a partner generally will depend on the status of such partner and the activities of the partnership. If you are a partner in a partnership holding Crested common stock, you should consult your tax advisors.

-98-

This discussion assumes that you, as a U.S. holder, hold your shares of Crested common stock as capital assets within the meaning of the Code. This discussion does not address all aspects of U.S. federal income taxation that may be relevant to you in light of your particular circumstances or that may be applicable to you if you are subject to special treatment under the U.S. federal income tax laws, including if you are:

- a financial institution;
- a tax-exempt organization;
- an S corporation or other pass-through entity;
  - an insurance company;
    - a mutual fund;
- a dealer in stocks and securities, or foreign currencies;
- a trader in securities who elects the mark-to-market method of accounting for your securities;
- a holder of Crested common stock subject to the alternative minimum tax provisions of the Code;
- a holder of Crested common stock who received his or her Crested common stock through the exercise of employee stock options or otherwise as compensation or through a tax-qualified retirement plan;
- a holder that is not a U.S. holder, certain expatriates, or a person that has a functional currency other than the U.S. dollar;
  - a holder of options granted under any Crested benefit plan; or
- a holder of Crested common stock who holds Crested common stock as part of a hedge against currency risk, a straddle or a constructive sale or a conversion transaction.

### In General

Completion of the merger is conditioned on, among other things, the receipt by each of USE and Crested of tax opinions from Conrad Henderson LLC, that the merger will be treated for U.S. federal income tax purposes as a reorganization within the meaning of Section 368(a) of the Code. These opinions will be based on representation letters provided by USE and Crested to be delivered at the time of closing and on customary factual assumptions, and will assume that the merger will be completed according to the terms of the merger agreement.

USE and Crested have not and will not seek any ruling from the Internal Revenue Service regarding any matters relating to the merger, and as a result, there can be no assurance that the Internal Revenue Service will not disagree with or challenge any of the conclusions described herein.

-99-

Based on the above assumptions and qualifications and the representations provided by USE and Crested and on certain customary factual assumptions, all of which must continue to be true, accurate and complete in all material respects as of the completion of the merger, it is the opinion of Conrad Henderson LLC that the material U.S. federal income tax consequences of the merger will be as follows:

- the merger will be treated as a "reorganization" within the meaning of Section 368(a) of the Code and each of Crested and USE will be a party to the reorganization within the meaning of Section 368(b) of the Code;
- subject to the paragraph captioned "Cash in Lieu of USE Shares" below, you will not recognize gain or loss upon exchanging Crested common stock for shares of USE common stock in the merger;
- your aggregate tax basis in the shares of USE common stock that you receive in the merger will equal your aggregate tax basis in the Crested common stock you surrendered in the merger; and
- your holding period for the shares of USE common stock that you receive in the merger will include your holding period for the shares of Crested common stock that you surrender in the exchange.

If you acquired different blocks of Crested common stock at different times and at different prices, any gain or loss will be determined separately with respect to each block of Crested common stock, and the shares of USE common stock you receive will be allocated pro rata to each such block of stock. In addition, your basis and holding period in your shares of USE common stock may be determined with reference to each block of Crested common stock.

*Cash in Lieu of USE Shares, Backup Withholding, and Reporting.* If pursuant to the merger (i) you own 500 or fewer Crested shares and you elect to receive cash equal to the value of the USE shares instead of USE shares, and (ii) USE decides to pay you and all other such electors cash instead of delivering USE shares, then you will generally recognize capital gain or loss on any cash received equal to the difference between the amount of cash received and your basis in the Crested shares. Any such capital gain or loss will be a long-term capital gain or loss if you have held (or are treated as having held) your Crested common stock for more than one year at the time of the merger.

Holders of Crested common stock may be subject to information reporting and backup withholding on cash payments received. You will not be subject to backup withholding, however, if you:

- furnish a correct taxpayer identification number and certify that you are a U.S. person (including a U.S. resident alien) not subject to backup withholding on the substitute Form W-9 you will receive;
- are a corporation and, when required, demonstrate that fact and otherwise comply with applicable requirements of the backup withholding rules; or
  - otherwise establish that you are exempt from backup withholding.

Any amounts withheld under the backup withholding rules will be allowed as a refund or credit against your U.S. federal income tax liability, provided you furnish the required information to the Internal Revenue Service. The backup withholding tax rate is currently 28%.

-100-

If you receive shares of USE as a result of the merger, you will be required to retain records pertaining to the merger and you will be required to attach to your United States federal income tax return for the year in which the merger takes place a statement setting forth all relevant facts relating to the merger. At a minimum, the statement must include (i) the shareholder's tax basis in the Crested stock surrendered and (ii) the fair market value, as of the time of the effective date of the merger, of the USE common stock received in the exchange therefore.

### Tax Consequences If the Merger Does Not Qualify as a Reorganization Under Section 368(a) of the Code

If the Internal Revenue Service determines that the merger does not qualify as a reorganization within the meaning of Section 368(a) of the Code and that determination is upheld, you would be required to recognize a gain or loss with respect to each share of Crested common stock surrendered in the merger in an amount equal to the difference between (i) the fair market value of any USE common stock (or cash if the cash in lieu of USE shares election is made and paid by USE), and (ii) the tax basis of the shares of Crested common stock surrendered in exchange therefore. Such gain or loss will be a long-term capital gain or loss if you held the Crested stock for more than one year, and will be a short-term capital gain or loss if you held the Crested common stock that you purchased in the same transaction. Your aggregate tax basis in the USE stock received in the merger would in this case be equal to its fair market value at the time of the closing of the merger, and the holding period for the USE stock would begin the day after the closing of the merger.

This discussion does not address tax consequences that may vary with, or are contingent upon, the individual circumstances of holders of Crested common stock and does not address the tax consequences to any foreign shareholder. Moreover, it does not address any non-income tax or any foreign, state or local tax consequences of the merger. Tax matters are very complicated, and the tax consequences of the merger to holders of Crested common stock will depend upon the facts of their particular situation. Accordingly, we strongly urge holders of Crested common stock to consult with their tax advisors to determine the particular federal, state, local or foreign income or other tax consequences to them as a result of the merger.

### **COMPARISON OF SHAREHOLDERS' RIGHTS**

#### General

USE is a Wyoming corporation, and Crested is a Colorado corporation. The rights of USE shareholders are governed by Wyoming law and the USE articles of incorporation and bylaws. If the merger is completed, the rights of the Crested shareholders also will be governed by Wyoming law and the USE articles of incorporation and bylaws.

#### **Comparison of Shareholders' Rights**

This table summarizes the material differences between the rights of USE shareholders under Wyoming law - the Wyoming Business Corporation Act (the "WBCA") and the Wyoming Management Stability Act (the "WMSA"), and under USE's articles of incorporation and bylaws, and the rights of Crested shareholders under Colorado law - the Colorado Business Corporation Act (the "CBCA), and under Crested's articles of incorporation and bylaws. This summary does not include all of the differences between Wyoming and Colorado law relating to the rights of shareholders of corporations, nor does it include all the differences between the governing documents of the companies. The articles of incorporation and bylaws of the companies have been filed as exhibits to the Form S-4 registration statement of which this proxy statement/prospectus forms a part, and this summary is qualified in its entirety by reference to those exhibits. Completion of the merger will not effect any change in the articles of incorporation or bylaws of USE.

U.S. Energy Corp.

special meeting date.	of the meeting to each
	shareholder of record
	entitled to vote at the
	meeting.

-104-

	U.S. Energy Corp.	Crested Corp.
	Generally, under the WBCA, a matter is approved at a meeting if the number of votes in favor exceeds the number of votes opposed, unless the WBCA requires a different ratio (for example, directors are elected by a plurality of the votes cast by the shares entitled to vote in the election at the meeting at which a quorum is present and at least a majority of all votes entitled to be cast is required in the case of a merger proposal wherein the vote of USE shareholders is required).	Under the CBCA, once a quorum exists, action on a matter, other than the election of directors, is approved if the number of votes cast in favor exceeds the number of votes opposed. There are exceptions, such as a merger, where the favorable vote of a majority of all votes entitled to be cast is required.
Shareholder voting rights in certain transactions	Under the WMSA, USE cannot participate in a merger, consolidation or share exchange with a stockholder owning 15% or more of the voting stock of USE, for a period of three years after the stockholder comes to own that much stock, unless the transaction is approved by the board of directors and by the affirmative vote of the holders of two-thirds of the stock not owned by the 15% stockholder.	Colorado does not have a statute like the WMSA.

#### **DESCRIPTION OF USE SECURITIES**

### **Common Stock**

USE is authorized by its articles of incorporation to issue an unlimited number of shares of common stock, \$0.01 par value, and 100,000 shares of preferred stock, \$0.01 par value.

Shares of common stock may be issued for such consideration and on such terms as determined by the board of directors, without shareholder approval. Holders are entitled to receive dividends when and as declared by the board

of directors out of funds legally available therefore. There are no restrictions on payment of cash dividends. It is anticipated that future earnings would be reinvested into operations and not declared as dividends on the common stock.

All holders of shares of common stock have equal voting rights. Holders of shares of common stock are entitled to one vote per share on all matters upon which such holders are entitled to vote, and further have the right to cumulate their votes in elections of directors. Cumulation means multiplying the number of shares held, by the number of nominees to the board of directors, then voting the product among the nominees as desired. Directors are elected by a plurality of the votes cast. Pursuant to the articles of incorporation and as permitted by the Wyoming Management Stability Act, shares of common stock held by USE subsidiaries may be voted by such subsidiaries as determined by the board of directors of each, in elections of directors and other matters brought before shareholders.

-105-

### **Preferred Stock**

### General

Shares of preferred stock may be issued by the board of directors with such dividend, liquidation, voting and conversion features as may be determined by the board of directors without shareholder approval. There are no shares of preferred stock outstanding, and, except for the Convertible Series A and Series P preferred stock (discussed below), no series has been established as of the date of this proxy statement/prospectus.

### **Convertible Series A**

In June 2000, USE established the Series A preferred stock in connection with certain financings it was contemplating with its subsidiary RMG. The total number of Series A Preferred shares to be issued was 1,000 with a per share sales price of \$10,000 per share and 2,000,000 shares of common stock for issuance if all the authorized Series A Preferred Stock was sold and later converted into common stock of USE. The Convertible Series A Preferred stock have no voting rights but have certain dividend rights. As of July 15, 2007, no Convertible Series A Preferred stock was outstanding.

#### Series P

In September 2001, USE established the Series P preferred stock in connection with USE adopting, in September 2001, a shareholder rights plan (referred to below as the "plan"). The plan was amended as of September 30, 2005, and the plan, as amended, was filed with the Securities and Exchange Commission. For more information, please see "WHERE YOU CAN FIND MORE INFORMATION – Incorporation of Documents by Reference" below.

The following summarizes several of the principal features of the plan:

- The purpose of the plan is to deter an unfairly low priced hostile takeover of USE, by encouraging a hostile party to negotiate a fair offer with the board of directors. A "hostile takeover" is a transaction or a series of transactions with the objective of acquiring a controlling block of a company's voting stock with a view toward selling assets or liquidating the company. If a hostile takeover is commenced (or the board of directors is informed that such a takeover is about to be commenced), but subsequently a fair offer was negotiated between the hostile party and the board of directors, the plan would be terminated.
- The rights trade with the common stock and are not separable therefrom. However, no separate certificate for the rights would be issued unless and until there is a hostile takeover attempted, after which time separate and tradable rights certificates would be issued.
- Under the plan, the holder of each share of common stock has the right to purchase (when the rights become exercisable) from USE one-one thousandth (1/1,000th) of one share of Series P preferred stock, at \$200.00 for each one-one thousandth (1/1,000th) share Series P stock. The rights are not exercisable unless and until a hostile takeover of USE is initiated with the aim of acquiring 15% of USE's voting stock.

-106-

• If, before a hostile takeover is launched, the hostile party comes to agreement with the board of directors about price and terms and makes a "qualified offer" to buy the outstanding stock of USE (i.e. an offer which the USE board of directors deems is fair to all USE shareholders), then the board of directors may redeem (purchase) the rights for \$0.01 each. But, if a qualified offer is not agreed upon, then the rights become exercisable for Series P stock. The Series P preferred stock, when issued on exercise of the rights, would be convertible into shares of USE common stock, which USE would issue at a price equal to one-half the market price of USE at that time.

### EXPERTS

### U.S. Energy Corp.

The consolidated balance sheets of U.S. Energy Corp. as of December 31, 2005 and 2006, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years ended December 31, 2006, set forth in U.S. Energy Corp.'s annual report on Form 10-K for the year ended December 31, 2006, which balance sheets and related statements are incorporated herein by reference.

The consolidated balance sheet at December 31, 2006 and related consolidated statements of operations, shareholders' equity, and cash flows for the year then ended have been incorporated herein in reliance upon the report of Moss Adams, LLP independent registered accounting firm, upon the authority of said firms as experts in accounting and auditing.

The consolidated balance sheet at December 31, 2005 and related consolidated statements of operations, shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2005 have been incorporated herein in reliance upon the report of Epstein Weber & Conover, PLC, independent registered accounting firm, upon the authority of said firms as experts in accounting and auditing.

### **Crested Corp.**

The balance sheets of Crested Corp. as of December 31, 2005 and 2006 and the related statements of operations, shareholders' deficit, and cash flows for each of the three years ended December 31, 2006, set forth in this proxy statement/prospectus, have been included herein.

The consolidated balance sheet at December 31, 2006 and related consolidated statements of operations, shareholders' equity, and cash flows for year then ended have been included herein in reliance upon the report of Moss Adams, LLP, independent registered accounting firm, upon the authority of said firm as experts in accounting and auditing.

The consolidated balance sheet at December 31, 2005 and related consolidated statements of operations, shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2005 have been included herein in reliance upon the report of Epstein Weber & Conover, PLC, independent registered accounting firm, upon the authority of said firms as experts in accounting and auditing.

The opinion of Conrad Henderson LLC as to the tax consequences of the merger to Crested shareholders, as set forth herein, is included herein in reliance upon the authority of said firm as experts in tax matters.

-107-

### LEGAL MATTERS

The validity of the shares of U.S. Energy Corp. common stock to be issued in the merger will be passed upon by The Law Office of Stephen E. Rounds. Davis Graham & Stubbs LLP has represented Crested Corp. as special counsel in connection with the merger.

### WHERE YOU CAN FIND MORE INFORMATION

USE has filed with the Securities and Exchange Commission a registration statement on Form S-4 to register with the SEC the shares of USE common stock to be issued to the minority Crested shareholders in the merger. This proxy statement/prospectus is part of the registration statement - a prospectus of USE and a proxy statement of Crested for the Crested special meeting. The registration statement, including its exhibits and schedules, contains additional relevant information about USE and USE's capital stock. The rules and regulations of the SEC allow us to omit certain information included in the registration statement from this proxy statement/prospectus.

In addition, USE and Crested file reports, proxy statements and other information with the SEC under the Exchange Act. You may read and copy this information at the SEC:

Public Reference Room 100 F Street, N.E. Washington, D.C. 20549

You may obtain copies of this information by mail from the Public Reference Section of the SEC, 100 F Street, N.E., Washington, D.C. 20549, at prescribed rates. You may obtain information on the operation of the SEC's Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet worldwide web site that contains reports, proxy statements and other information about issuers, like USE and Crested, who file electronically with the SEC. The address of the site is <u>http://www.sec.gov.</u> The SEC allows USE to "incorporate by reference" information into this proxy statement/prospectus. This means that USE can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is considered to be a part of this proxy statement/prospectus, except for any information that is superseded by information that is included directly in this proxy statement/prospectus or incorporated by reference subsequent to the date of this proxy statement/prospectus as described below. Because the market value of the minority shares of Crested is less than \$75 million, the SEC's rules as to use of Form S-4 do not allow information about Crested to be incorporated by reference into this proxy statement/prospectus.

This proxy statement/prospectus incorporates by reference the following documents that USE has filed with the SEC. They contain important information about USE and its financial condition.

#### **Incorporation of Documents by Reference**

- Annual Report on Form 10-K for year ended December 31, 2006.
- Quarterly Report on Form 10-Q for the six months and quarter ended June 30, 2007.
  - Proxy Statement on Schedule 14A for USE Annual Meeting on June 22, 2007.

- Current Reports on Form 8-K:
- August 6, 2007: Amendment of Plan and Agreement of Merger for Crested Corp.
  - July 27, 2007: Final sale of sxr Uranium One shares.
- July 5, 2007: Cash dividend, stock buy back program and update on Oil and Gas Exploration activities
- June 27, 2007: Results of the Annual Meeting held June 22, 2007, Credit Facility for Sutter Gold Mining Inc. and changes to Company Bylaws.
- June 4, 2007: TSX-V approval of the Exploration, Development and Mine Operating Agreement with Kobex Resources Ltd.
  - May 7, 2007: Amendment of the 8-K filed May 4, 2007.
- May 4, 2007: Sale of uranium assets to sxr Uranium One Inc. including Pro Forma Financial Information, the approval of Compensation Committee recommendations and tax obligation.
- April 9, 2007: Execution of formal Exploration, Development and Mine Operating Agreement with Kobex Resources Ltd.
  - February 23, 2007: Execution of Assets Purchase Agreement with SXR Uranium One Inc.
  - February 5, 2007: Engagement of new independent accounting firm.
- February 1, 2007: Termination of relationship with former independent accounting firm.
- January 24, 2007: Termination of relationship with former independent accounting firm; execution of Merger Agreement with Crested Corp.; and appoint of new director and new officer.
  - January 8, 2007: Extension of time period for Exclusivity Agreement with SXR Uranium One Inc.
- The Amended Rights Agreement relating to the shareholder rights plan, which Agreement is an exhibit to the Form 8-A12G/A filed with the SEC on November 17, 2005.

In addition, USE also incorporates by reference additional documents that USE may file with the SEC between the date of this proxy statement/prospectus and the date of the Crested special meeting pursuant to Sections 13(a), 13(c), 14, or 15(d) of the Exchange Act. These documents include periodic reports, such as Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, as well as proxy statements. Nothing in this proxy statement/prospectus shall be deemed to incorporate information furnished but not filed with the SEC pursuant to Item 2.02 or Item 7.01 of Form 8-K or any exhibit thereto.

-109-

Further, USE incorporates into this proxy statement/prospectus all filings filed by USE with the SEC pursuant to the Exchange Act after the date of the initial filing of the Form S-4 registration statement and prior to effectiveness of the registration statement. This paragraph shall not be included in the final rule 424 proxy statement/prospectus filed with the SEC after declaration of effectiveness of the registration statement.

USE has supplied all information contained or incorporated by reference in this proxy statement/prospectus relating to USE, and Crested has supplied all information in this proxy statement/prospectus relating to Crested.

Documents incorporated by reference are available from USE without charge, excluding any exhibits or schedules to those documents unless the exhibit is specifically incorporated by reference as an exhibit in this proxy statement/prospectus. Copies of all exhibits which are filed with the Form S-4, but not incorporated by reference, are available from USE or Crested without charge. You can obtain copies of any of these documents by requesting them in writing or by telephone from U.S. Energy Corp., 877 N. 8<sup>th</sup> W., Riverton, Wyoming 82501, attention Robert Scott Lorimer, CFO/Treasurer.

# Crested shareholders requesting documents must request them at least five business days before the special meeting in order to receive them before the special meeting.

Neither USE nor Crested has authorized anyone to give any information or make any representation about the merger or our companies that is different from, or in addition to, that contained in this proxy statement/prospectus or in any of the materials that have been incorporated into this proxy statement/prospectus. Therefore, if anyone gives you information of this sort, you should not rely on it. If you are in a jurisdiction where offers to exchange or sell, or solicitations of offers to exchange or purchase, the securities offered by this proxy statement/prospectus or the solicitation of proxies is unlawful, or if you are a person to whom it is unlawful to direct these types of activities, then the offer presented in this proxy statement/prospectus does not extend to you. The information contained in this proxy statement/prospectus speaks only as of the date of this proxy statement/prospectus unless the information specifically indicates that another date applies.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited)

## 1) **Basis of Presentation**

The Balance Sheet as of June 30, 2007, the Statements of Operations for the three and six months ended June 30, 2007 and 2006 and Statements of Cash Flows for the six months ended June 30, 2007 and 2006 have been prepared by the Company without audit. The Balance Sheet at December 31, 2006, was derived from financial statements audited by Moss Adams LLP, independent public accountants, as indicated in their report for the year ended December 31, 2006 (not included). In the opinion of the Company, the accompanying financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to fairly present the financial position of the Company as of June 30, 2007 and the results of operations for the three and six months ended June 30, 2007 and 2006 and cash flows for the six months ended June 30, 2007 and 2006 and cash flows for the six months ended June 30, 2007 and 2006.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these financial statements be read in conjunction with the Company's December 31, 2006 Form 10-K. The results of operations for the periods ended June 30, 2007 and 2006 are not necessarily indicative of the operating results for the full year.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates of reclamation expenses based on certain assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

## 2) Recent Accounting Pronouncements

**FIN 48** In June 2006, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes," ("FIN 48") an interpretation of FASB Statement No. 109, "Accounting for Income Taxes." FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires that the Company recognize in its financial statements, the impact of a tax position. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods and disclosure. The provisions of FIN 48 are effective beginning January 1, 2007 with the cumulative effect of the change in accounting principle recorded as an adjustment to the opening balance of retained earnings, goodwill, deferred income taxes and income taxes payable in the Balance Sheets. The adoption of FIN 48 has no significant impact on the financial statements of the Company at June 30, 2007.

**FAS 157** In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements" ("FAS 157"). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions for FAS 157 are effective for the Company's fiscal year beginning January 1, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's financial position, results of operations or cash flows.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

**SAB 108** In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* ("SAB 108"). SAB 108 provides guidance on consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB 108 is effective for fiscal years ending after November 15, 2006. The adoption of SAB 108 did not have an impact on our financial statements.

**SFAS 159** In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS 159") which permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 will be effective for us on January 1, 2008. We are currently evaluating the impact of adopting SFAS 159 on our financial position, cash flows, and results of operations.

The Company has reviewed other current outstanding statements from the Financial Accounting Standards Board and does not believe that any of those statements will have a material adverse affect on the financial statements of the Company when adopted.

## 3) Marketable Securities

The Company accounts for its marketable securities as (1) held to maturity, (2) available for sale and (3) trading. The Company holds short-term securities which have maturities of greater than three months but less than one year from the date of purchase. These securities are classified as held to maturity based on the Company's intent to hold such securities to the maturity date. All held to maturity securities are U.S. Government securities and are stated at amortized cost, which approximates fair market value. Income related to these securities is reported as a component of interest income. The Company's available for sale securities are carried at fair value with net unrealized gain or (loss) recorded as a separate component of shareholders' equity. If a decline in fair value of held to maturity securities is determined to be other than temporary, the investment is written down to fair value. Based on the Company's intent to sell the securities, its equity securities are reported as trading securities.

At June 30, 2007, the Company owned held to maturity and available for sale securities.

	Cost	Market Value	t	Inrealized Loss
Held to maturity - treasury bills		\$ 20,093,700		
Available for sale securities				
sxr shares	\$ 12,844,900	\$ 10,884,400	\$	1,960,500
Kobex shares	375,000	320,600		54,500
	\$ 13,219,900	\$ 11,205,000	\$	2,015,000

## 4) Long Term Debt

Debt at June 30, 2007 and December 31, 2006, consists of debt payable to U.S. Energy Corp, ("USE") of \$3,250,800 and \$13,277,200, respectively. USE owns 70.9% of the Company's outstanding stock. This debt has been incurred as

a result of USE funding the Company's portion of joint operations and investments. The entire debt to USE was retired as of July 31, 2007.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

## 5) **Other Comprehensive Income (Loss)**

Unrealized gains and losses on investments are excluded from net income but are reported as comprehensive income on the Condensed Consolidated Balance Sheets under Shareholders' equity. The following table illustrates the effect on net income (loss) if the Company had recognized comprehensive income:

## 6) Earnings Per Share

The Company presents basic and diluted earnings per share in accordance with the provisions of Statement of Financial Accounting Standards No. 128, "Earnings per Share". Basic earnings per common share is based on the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed based on the weighted average number of common shares outstanding adjusted for the incremental shares attributed to outstanding options to purchase common stock, if dilutive. Potential common shares relating to employee options are excluded from the computation of diluted earnings (loss) per share, because they are anti-dilutive. There were no anti-dilutive options at June 30, 2007.

## 7) Stock Based Compensation

The Company's management adopted an Incentive Stock Option Plan ("ISOP"), which was approved by the Company's shareholders on September 2, 2004. 2,000,000 shares of common stock are reserved for grant under the ISOP. The number of shares so reserved will be automatically increased to equal 20% of the Company's issued and outstanding shares of common stock. As of June 30, 2007 a total of 1,700,000 options under the ISOP had been issued to officers and employees of the Company and USE and directors of USE. These options were issued on June 10, 2005, have an

exercise price of \$1.71 per share and expire on June 9, 2015.

The Company has adopted the disclosure requirements of SFAS No. 123(R) "Accounting for Stock - Based Compensation - Transition and Disclosure". No stock-based employee compensation cost is reflected in net income during the quarter ended June 30, 2007. All options were previously fully vested.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

## 8) Income Taxes

The income tax provision is different from the amounts computed by applying the statutory federal income tax rate to income from continuing operations before taxes. The reasons for these differences are as follows:

	Three Months		Six Months	
	Ended		Ended	
	Ju	ne 30, 2007	Ju	ine 30, 2007
Consolidated book income before income tax	\$	49,691,400	\$	49,324,400
Permanent differences				(205,400)
Taxable income before temporary differrences	\$	49,691,400	\$	49,119,000
Expected federal income tax expense (benefit) 35%	\$	17,320,200	\$	17,191,600
Increase (decrease) in valuation allowance				
Deferred income tax provision (benefit)	\$	7,566,100	\$	7,437,600
Current tax provision (refund)		9,754,100		9,754,100
Total federal tax expense		17,320,200		17,191,700
State income tax net of fed benefit		650,000		650,000
Total provision	\$	17,970,200	\$	17,841,700

The components of deferred taxes as of June 30, 2007 and December 31, 2006 are as follows:

Current taxes payable at June 30, 2007 are comprised of \$9,754,100 of federal income taxes and \$650,000 of state income taxes. This results in a current taxes payable of \$10,404,100 at June 30, 2007. There were no current taxes payable at December 31, 2006.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

The components of deferred taxes as of June 30, 2007 and December 31, 2006 are as follows:

	J	June 30,		December 31,	
		2007		2006	
Deferred tax assets:					
Deferred compensation	\$	85,100	\$	81,000	
Accrued reclamation		18,600		439,600	
Tax basis in excess of book		705,200			
Net operating loss carryforwards				6,976,600	
Tax credits (AMT credit carryover)				44,200	
Other		200			
Total deferred tax assets		809,100		7,541,400	
Deferred tax liabilities:					
Book basis in excess of tax basis - Enterra Units					
Depreciable assets		(7,600)		(7,600)	
Total deferred tax liabilities		(7,600)		(7,600)	
Net deferred tax assets		801,500		7,533,800	
Valuation allowance					
Deferred tax assets net of valuation allowance	\$	801,500	\$	7,533,800	

A valuation allowance for deferred tax assets is required when it is more likely than not that some portion or all of the deferred tax assets will not be realized. No valuation allowance is therefore provided at June 30, 2007 and December 31, 2006 as the Company believes that it is more likely than not that the deferred tax assets will be utilized in future years.

During the six months ended June 30, 2007, net current deferred tax assets decreased by \$6,732,400. After giving effect to \$705,200 of tax benefit of unrealized losses, which was a credit to other comprehensive income, the Company recorded a deferred federal income tax expense in the amount of \$7,437,600. The decrease in net deferred tax assets was largely the result of the utilization of net operating losses and the accrued reclamation liabilities resulting from the sxr sale.

On January 1, 2007 the Company adopted FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48"). Pursuant to FIN 48, the Company identified and evaluated any potential uncertain tax positions. The Company has concluded that there are no uncertain tax positions requiring recognition in the financial statements. As a result, the adoption of FIN 48 had no impact on the Company's financial statements.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

The Company's practice is to recognize interest and/or penalties related to income tax matters in income tax expense. The Company had no accrued interest or penalties at June 30, 2007 or December 31, 2006.

The Internal Revenue Service has audited the Company's and subsidiaries tax returns through the year ended May 31, 2000. The Company's income tax liabilities are settled through fiscal 2000.

## 9) Sale of Marketable Securities

During the six months ended June 30, 2007, the Company sold (to a Canadian financial institution) 2,450,000 shares of sxr Uranium One for net proceeds (after commission and bulk sale discount) of \$33,436,800. An additional \$3,111,600 was received July 2007 as a result of the settlement of a portion of this sale of securities which occurred in late June 2007. The Company recorded a loss of \$3,418,600 on the sale of the sxr Uranium One shares.

The Company, through its joint venture with U.S. Energy ("USECC"), also sold 750,000 shares of UPC during the six months ended June 30, 2007. USECC received \$722,800 in net cash proceeds and recorded a net gain of \$387,300 on the sale of the UPC shares. The Company recorded this income as part of the equity loss it recognized from USECC for the six months ended June 30, 2007.

## 10) Asset Retirement Obligations

The Company accounts for the reclamation of its mineral properties and oil properties pursuant to SFAS No. 143, "Accounting for Asset Retirement Obligation." Under the provisions of this accounting statement, the Company records the estimated fair value of the reclamation liability on its mineral properties as of the date that the liability is incurred with a corresponding increase in the property's book value. Actual costs could differ from those estimates. The reclamation liabilities are reviewed each quarter to determine whether estimates for the total asset retirement obligation are sufficient to complete the reclamation work required.

The following is a reconciliation of the total liability for asset retirement obligations (unaudited):

Balance December 31, 2006	\$ 51,000
Revaluation of liability	900
Accretion Expense	1,100
Balance June 30, 2007	\$ 53,000

## 11) Merger Agreement

On January 23, 2007, the Company and USE entered into a plan and agreement of merger (the "merger agreement") for the proposed acquisition of the minority shares of the Company (approximately 29.1% is not owned by USE) and the subsequent merger of the Company into USE. The merger agreement was approved by all directors of both companies. The exchange ratio of 2 of the Company's shares for one share of USE was negotiated between the special committees of independent directors of both companies, and approved by the full boards of both companies on December 20, 2006. For detailed information, please see the Form 8-K filed on January 24, 2007.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

Management believes that the merger of the Company into USE will enhance shareholder value due to consolidation of assets, simplification of reporting requirements and the application of all resources to one company. It is anticipated that the merger will occur during the fourth quarter 2007.

# 12) Real Estate Investment

On May 10, 2007, the Company and USE through their wholly owned subsidiary, Remington Village, LLC (owned on a 50-50 basis) acquired approximately 10.15 acres of land located in Gillette, Wyoming for a purchase price of \$1,247,700. The Company and USE have now also successfully obtained entitlements and permits necessary to construct a 216 unit multifamily housing complex on the property. It is estimated that the construction cost of this multifamily complex will be approximately \$26.2 million. The Board of Directors has approved up to a 30% equity investment in the property for a total of \$7.6 million and has directed the management of the Company to seek construction financing in the amount of \$18.5 million for the project from a conventional lender. Further, the boards of directors of the Company and USE have authorized up to \$3,889,000 to purchase the property and commence site work until the conventional financing is in place. This amount has been committed thus far to purchase the property and commence site work, which is underway. The Company and USE have expended \$1,549,700 through June 30, 2007.

# 13) Sutter Gold Mining, Inc.

On March 14, 2007, Sutter reached a Settlement Agreement with the Company, USE and USECC concerning: 1) an accumulated debt obligation by Sutter of approximately \$2,025,700 at December 31, 2006 for expenditures made by USECC on behalf of Sutter. The debt was settled by Sutter issuing and delivering 7,621,867 shares of Sutter common stock to the Company and USE, one half to each. 2) a Contingent Stock Purchase Warrant between Sutter, the Company and USE was settled by issuing a 5% Net Profits Interest Royalty ("NPIR") to the Company and USE (reducing to 1% after \$4.6 million has been paid under the 5% NPIR. In addition, the Company and USE agreed to provide a \$1 million line of credit (\$500,000 each) to Sutter at 12% annual interest, drawable and repayable at any time in tranches of \$50,000 or more. The line of credit is collateralized by Sutter's California properties. The Company and USE have the sole option to have Sutter repay the debt in cash or Sutter stock at a 10% discount to the 10 day Volume Weighted Average Price ("VWAP") before payment (subject to Exchange approval). Prepayment without penalty is allowed. Terms of the credit agreement were negotiated and approved by the independent directors of Sutter, the Company and USE.

# 14) Uranium One Asset Purchase Agreement Closing

On April 30, 2007, the Company and USE and certain of their private subsidiary companies, completed the sale of their uranium assets by closing the February 22, 2007 Asset Purchase Agreement (the "APA") with sxr Uranium One Inc. ("Uranium One," headquartered in Toronto, Canada (Toronto Stock Exchange and Johannesburg Stock Exchange, "SXR")), and certain of its private subsidiary companies. Also, please see footnote 8 above concerning proceeds from sale of Uranium One stock as of June 30, 2007.

# CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

The net gain on the sale of the uranium assets to sxr Uranium One is as follows:

Revenues from sale of assets to sxr Uranium One	
Release of	¢ 275.000
refundable deposit Relief from Asset	\$ 375,000

On May 2, 2007, the Company and USE, with the approval of their boards of directors and upon the recommendation of the compensation committee of the USE board of directors (independent directors), paid a \$4,887,000 gross cash bonus to all employees for extraordinary service related to the April 30, 2007 sale of the uranium assets to Uranium One.

Also on May 2, 2007, USE, with the approval of its board of directors and upon the recommendation of the compensation committee, paid a total of \$649,500 in taxes owed by officers and employees, upon the proposed release to them on May 2, 2007 by USE, of a total of 177,600 forfeitable shares of common stock of U.S. Energy Corp., and 2,460 dividend shares, for a total proposed release of 180,060 shares. USE also reimbursed the estate of John L Larsen for \$213,800 of taxes recently paid by the estate upon release of forfeitable shares to the estate following Mr. Larsen's passing in September 2006; and reimbursed Daniel P. Svilar \$162,300 for taxes he paid following release of forfeitable shares to him upon his retirement in January 2007. These matters were ratified by the shareholders of USE at the June 22, 2007 annual meeting and the shares have been released. The Company shares in the expenses of all USE employees on a 50-50 basis and therefore is responsible for one half of these expenses.

The Company's portion of the bonus and taxes paid to and for the benefit of the officers, employees and the John L. Larsen estate were \$4,443,500, \$324,800 and \$81,000, respectively.

# CRESTED CORP. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2007 (Unaudited) (continued)

## 16) Lucky Jack Molybdenum Property – Kobex Resources Ltd.

On April 3, 2007, the Company, USE and Kobex Resources Ltd. ("Kobex") (a British Columbia company traded on the TSX Venture Exchange under the symbol "Kobex"), signed a formal Exploration, Development and Mine Operating Agreement for the permitting, development and production of the Mt. Emmons "Lucky Jack" Molybdenum Property. The agreement grants Kobex the exclusive option to acquire up to a 50% undivided interest in patented and unpatented claims located near Crested Butte, Colorado, which are held by the Company and USE, for \$50 million. The \$50 million to be spent will be for all Project-related expenditures, the cost for a bankable feasibility study, and option payments to the Company and USE. The balance between money spent on expenditures and option payments, if any, and \$50 million, will be paid to the Company and USE in cash.

At June 30, 2007, Kobex owed USECC \$631,200 in reimbursable project costs. Kobex paid this amount in July 2007 and is current on its obligations to the Company. Kobex also delivered 142,816 shares of its common stock valued at \$375,000 pursuant to the Exploration, Development and Mine Operating Agreement.

## **Report of Independent Registered Public Accounting Firm**

## Crested Corp. Board of Directors

We have audited the accompanying balance sheet of Crested Corp. (the "Company") as of December 31, 2006, and the related statements of operations, shareholders' equity, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of Crested Corp. at December 31, 2006, and the results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note A to the financial statements, the Company has experienced significant losses from operations. In addition, the Company has a working capital deficit of \$3,730,800 as of December 31, 2006; the substantial portion of the obligation is owned to an affiliated entity. These factors raise substantial doubt about the ability of the Company to continue as a going concern. Management's plans in regards to these matters are also described in Note A. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As described in Note B to the financial statements, the Company adopted a new principle of accounting for share-based payments in accordance with Financial Accounting Standards Board Statement No. 123R, *Share-Based Payment*.

/s/ Moss Adams LLP Scottsdale, Arizona

April 2, 2007

## **Report of Independent Registered Public Accounting Firm**

## Crested Corp. Board of Directors

We have audited the accompanying balance sheet of Crested Corp. as of December 31, 2005 and the related statements of operations, shareholders' equity and cash flows for each of the two years in the period ended December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion of these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Crested Corp. as of December 31, 2005 and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note A to the financial statements, the Company has experienced significant losses from operations. In addition, the Company has a working capital deficit of \$10,832,900 as of December 31, 2006; the substantial portion of the obligation is owned to an affiliated entity. These factors raise substantial doubt about the ability of the Company to continue as a going concern. Management's plans in regards to these matters are also described in Note A. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

# **CRESTED CORP.**

CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004

## A. BUSINESS ORGANIZATION AND OPERATIONS:

Crested Corp. (the "Company" or "Crested") was incorporated in the State of Colorado on September 18, 1970. It engages in the acquisition, exploration, sale and/or development of mineral properties, the production of petroleum properties and marketing of minerals through equity investees. Principal mineral interests are in uranium, gold and molybdenum. The Company also historically participated in the development and production of coalbed methane gas through a non consolidated investee, Rocky Mountain Gas, Inc. ("RMG"), which was sold during the year ended December 31, 2005. (See Note E) The Company holds various real estate properties. These properties are managed through a non consolidated joint venture USECB joint venture ("USECB" or "USECC") discussed below and in Note B. Although not consolidated, the majority of the Company's assets and operations are recorded on the books and records of USECB which is accounted for using the equity method of accounting. Due to the fact that the Company's interest in assets and operations are reported by USECB, the USECB financial statements are attached hereto.

The Company and U. S. Energy Corp. ("USE"), an approximate 70.9% shareholder of the Company, at December 31, 2006, are engaged in the standby and maintenance of two uranium properties, one in southern Utah known as the Shootaring Uranium Mill, which is owned by Plateau Resources Limited, a 100% owned subsidiary of USE, and a second consisting of a group of mining claims and a state lease on Sheep Mountain located in central Wyoming. The Company and USE also own various uranium mining claims located in Wyoming, Utah, Colorado and Arizona. Sutter Gold Mining Inc. ("SGMI"), a Wyoming corporation, manages the Company's and USE's interest in gold properties. At December 31, 2006, the Company owned 0.9% of SGMI. Additional companies organized during 2006 by the Company and USE include U.S. Moly Corp. ("USMC") for the management of the molybdenum business and InterWest, Inc. for the prospective real estate business. Initial ownership of these shell companies is 45% the Company, 45% USE and 10% by their officers, directors and employees.

## **Management Plan**

During the year ended December 31, 2006 the Company recorded a net gain of \$3,850,900. Ongoing annual losses have resulted in an accumulated deficit of \$11,497,400 at December 31, 2006. The Company also has a working capital deficit of \$3,730,800 at December 31, 2006 that includes \$13,277,200 due to USE. The Company experienced negative cash flows from operations of \$15,600, \$129,900 and \$198,600 for the years ended December 31, 2006, 2005 and 2004 respectively. At December 31, 2006, the Company does not have sufficient cash or cash flows from operations to meet its on going general and administrative costs and retire the debt due to USE. All of these factors raise substantial doubt about the Company's ability to continue as a going concern during the upcoming year.

The Company has assets that are unencumbered that could be sold to generate cash, however, there can be no assurances that funds generated from the sale of assets will be sufficient to meet all of the Company's obligations.

In order to improve the liquidity of the Company, management intends to do the following:

• Continue working with Uranium Power Corp. ("UPC") and USE to explore and develop jointly held uranium properties along with seeking a joint venture partner. (See Note E)

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

• Continue to work with USE to close the sale of its uranium assets, including the Shootaring Canyon Uranium mill ("Shootaring") in southern Utah to sxr Uranium One ("Uranium One"). (See Note E)

• Continue working with USE to finalize an operating agreement with Kobex Resources Ltd. ("KBX") which will fund the initial exploration, permitting and development of the Lucky Jack molybdenum property ("Lucky Jack") in Colorado. (See Note E)

• Seek additional investment opportunities through the acquisition of operating companies or the development of entities such as real estate.

• Seek joint venture partners on other mineral properties which the Company owns an interest in.

# B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

## Investments

Investments in joint ventures and 20% to 50% owned companies are accounted for using the equity method. The Company's investment in SGMI and USECC Joint Venture ("USECC") are accounted for using the equity method (see Note D) as they under the control by USE and its management.

## **Cash Equivalents**

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. The Company maintains its cash and cash equivalents in bank deposit accounts which may exceed federally insured limits. At December 31, 2006, the Company and USECC had all of their cash and cash equivalents with several financial institutions. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents.

# **Marketable Securities**

The Company accounts for its marketable securities under Statement of Financial Accounting Standards ("SFAS") No. 115, Accounting for Certain Investments in Debt and Equity Securities , which requires certain securities to be categorized as either trading, available-for-sale or held-to-maturity. Based on the Company's intent to hold the securities at least through the minimum contractual holding period, with exception, the Enterra securities described below, the Company's marketable securities are carried at fair value with net unrealized gain or (loss) recorded as a separate component of shareholders' equity.

At December 31, 2005, the Company had an investment in non-affiliated company, 245,759 shares of Enterra Series D Common Stock, in the amount of \$5,228,300. On June 8, 2006, the Enterra stock was converted into Enterra units and became marketable. The units were classified as Trading Marketable Securities. The Company recognized a \$1,354,200 loss on the conversion of the shares, and a loss of \$223,600 on the valuation of the derivatives to convert the Enterra shares. All of these marketable securities were sold during the year ended December 31, 2006. The Company received \$2,991,000 in cash proceeds and recognized a loss of \$324,300 from the sale of these marketable securities. Due to the short period that these securities were held they are classified as trading securities.

# CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

## **Properties and Equipment**

The Company capitalizes all costs incidental to the acquisition as incurred. Mineral exploration costs are expensed as incurred. When exploration work indicates that a mineral property can be economically developed as a result of establishing proved and probable reserves, costs for the development of the mineral property as well as capital purchases and capital construction are capitalized and amortized using units of production over the estimated recoverable proved and probable reserves. Costs and expenses related to general corporate overhead are expensed as incurred. All capitalized costs are charged to operations if the Company subsequently determines that the property is not economical due to permanent decreases in market prices of commodities, too high of production costs or depletion of the mineral resource.

Oil and gas properties are accounted for using the full cost method. Capitalized costs plus any future development costs are amortized by the units-of-production method using proven reserves. All oil and gas properties are fully depleted.

## Long-Lived Assets

The Company evaluates its long-lived assets for impairment when events or changes in circumstances indicate that the related carrying amount may not be recoverable. If the sum of estimated future cash flows on an undiscounted basis is less than the carrying amount of the related asset, asset impairment is considered to exist. The related impairment loss is measured by comparing estimated future cash flows on a discounted basis to the carrying amount of the asset. Changes in significant assumptions underlying future cash flow estimates may have a material effect on the Company's financial position and results of operations. An uneconomic commodity market price, if sustained for an extended period of time, or an inability to obtain financing necessary to develop the mineral interests may result in asset impairment. The Company participates in long lived assets through its investments in USECC and SGMI. These assets are not consolidated on the financial statements of the Company. As of December 31, 2006, no impairment existed in the USECC or SGMI assets.

## **Fair Value of Financial Instruments**

The carrying amount of cash equivalents and other current assets approximates fair value because of the short term nature of those instruments. It is not practicable to determine the fair value of debt to affiliate carried at \$13,277,200 and \$10,821,800 at December 31, 2006 and December 31, 2005, respectively.

## **Stock Based Compensation**

On September 2, 2004, the Company's shareholders adopted an Incentive Stock Option Plan ("ISOP") for employees of the Company and USE. 2,000,000 shares of common stock were initially reserved for the ISOP. At such time as options have been granted to purchase 2,000,000 shares, the number of shares available for issuance under the ISOP will automatically be increased to 20% of the issued and outstanding common shares of the Company. The Company granted 1.7 million of these ISOP options to various directors, officers and employees on June 10, 2005.

# CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

SFAS 123, "Accounting for Stock-Based Compensation," ("SFAS 123") defines a fair value based method of accounting for employee stock options or similar equity instruments. SFAS 123 allowed the continued measurement of compensation cost for such plans using the intrinsic value based method prescribed by APB Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), provided that pro forma disclosures are made to net income or loss and net income or loss per share, assuming the fair value based method of SFAS 123 had been applied. The Company has elected to account for its stock-based compensation plans under APB 25 through calendar year 2005. Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment ("SFAS 123R"), which requires the Company to measure the cost of employee services received in exchange for all equity awards granted including stock options based on the fair market value of the award as of the grant date. SFAS 123R supersedes Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation ("SFAS 123") and Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees ("APB 25"). The Company has adopted SFAS 123R using the modified prospective method. Accordingly, prior period amounts have not been restated. Under the modified prospective method, stock options awards that are granted, modified or settled after December 31, 2005 will be valued at fair value in accordance with provisions of SFAS 123R and recognized on a straight line basis over the service period of the entire award.

Implementing SFAS No. 123(R) as of January 1, 2006 has had no effect on the results of operations of the Company for the year ended December 31, 2006.

The Company has computed the fair values of all options granted using the Black-Scholes pricing model and the following weighted average assumptions:

	Year Ended Decer	nber 31,
	2005	2004
Risk-free interest rate	4.38%	4.82%
Expected lives (years)	9.44	
Expected volatility	107.20%	
Expected dividend yield		

To estimate expected lives of options for this valuation, it was assumed options will be exercised at the end of their expected lives. All options are initially assumed to vest. Cumulative compensation cost recognized in pro forma net income or loss with respect to options that are forfeited prior to vesting is adjusted as a reduction of pro forma compensation expense in the period of forfeiture.

# CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

If the Company had accounted for its stock-based compensation plans in accordance with SFAS 123, the Company's net gain (loss) and pro forma net gain (loss) per common share would have been reported as follows:

	Year Ended						
	December 31, 2005 2004						
		2004					
Net gain (loss) to common	\$	4,541,400	\$	(1,767,500)			
shareholder as reported							
Deduct: Total stock based							
employee expense							
determined under fair							
value based method		(1,013,500)					
Pro forma net gain (loss)	\$	3,527,900	\$	(1,767,500)			
As reported, Basic and Diluted	\$	0.26	\$	(0.10)			
Pro forma, Basic and Diluted	\$	0.21	\$	(0.10)			

Weighted average shares used to calculate pro forma net loss per share were determined as described below, except in applying the treasury stock method to outstanding options; net proceeds assumed received upon exercise were increased by the amount of compensation cost attributable to future service periods and not yet recognized as pro forma expense.

## **Asset Retirement Obligations**

The Company accounts for its asset retirement obligations under SFAS No. 143 "Accounting for Asset Retirement Obligation." The Company records the fair value of the reclamation liability on its shut down mining properties as of the date that the liability is incurred. The Company reviews the liability each quarter and determines if a change in estimate is required as well as accretes the total liability on a quarterly basis for the future liability. Final determinations are made during the fourth quarter of each year.

## Liabilities Held for Sale

The Company accounts for long lived liabilities held for sale pursuant to FAS 144, "Accounting for the Impairment or Disposal of Long-Lived Assets". On July 10, 2006, the Company and USE signed an Exclusivity Agreement tot sell its uranium properties. On February 22, 2007, the Company and USE signed an Asset Purchase Agreement for the sale of these uranium assets. As the terms of the agreement dictate that the actual sale of these assets will occur within calendar 2007, the long term asset retirement obligation of \$1,204,900 at December 31, 2006 is classified as a current liability. (See Notes E and K) No other liabilities or asset carrying values are reflected in the December 31, 2006 Balance Sheet of the Company. The Uranium assets are held in a shut down mode and there are no operations at them.

The Company deducts any actual funds expended for reclamation during the quarter in which it occurs. The Company has no remaining book value for these properties.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

The following is a reconciliation of the total liability for asset retirement obligations

Balance December 31, 2005	\$ 1,151,400
Addition to Liability	44,100
Revaluation of liability	(52,600)
Accretion Expense	113,000
Reclassification to liabilities held for sale	(1,204,900)
Balance December 31, 2006	\$ 51,000

## **Income Taxes**

The Company accounts for income taxes under the provisions of Statement of Financial Accounting Standards No. 109 ("SFAS 109"), "Accounting for Income Taxes". This statement requires recognition of deferred income tax assets and liabilities for the expected future income tax consequences, based on enacted tax laws, of temporary differences between the financial reporting and tax bases of assets, liabilities and carry forwards.

SFAS 109 requires recognition of deferred tax assets for the expected future effects of all deductible temporary differences, loss carry forwards and tax credit carry forwards. Deferred tax assets are reduced, if deemed necessary, by a valuation allowance for any tax benefits which, based on current circumstances, are not expected to be realized.

#### Net Income (Loss) Per Share

The Company reports net gain (loss) per share pursuant to Statement of Financial Accounting Standards No. 128 ("SFAS 128"). Basic earnings per share is computed based on the weighted average number of common shares outstanding. Diluted earnings per share is computed based on the weighted average number of common shares outstanding adjusted for the incremental shares attributed to outstanding options to purchase common stock, if dilutive. Using the treasury stock method there were 558,560 potential shares relating to forfeitable shares and options that are included in the diluted earnings per share for the year ended December 31, 2006. Potential common shares relating to options and were excluded from the computation of diluted gain (loss) per share, because they were anti-dilutive, totaled 1,700,000, and -0- at December 31, 2005 and 2004 respectively.

#### **Diluted Earnings Per Share**

	Income		2006 Shares	Per Share	
Basic earning per share	\$	3,850,900	17,153,282	\$	0.22
Effect of dilutive securities:					
Forfeitable shares			15,000		
Outstanding options			543,560		
			558,560		

Diluted earning per share:	\$ 3,850,900	17,711,842	\$ 0.22

F-27

# Edgar Filing: US ENERGY CORP - Form S-4/A

Effect of dilutive securities:					
Forfeitable shares			15,000		
Outstanding options					
			15,000		
Diluted earning per share:	\$	4,541,400	17,161,306	\$	0.26

## **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

## **Recent Accounting Pronouncements**

**FIN 48** In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes," ("FIN 48") an interpretation of FASB Statement No. 109, "Accounting for Income Taxes." FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires that the Company recognize in its financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods and disclosure. The provisions of FIN 48 are effective beginning January 1, 2007 with the cumulative effect of the change in accounting principle recorded as an adjustment to the opening balance of retained earnings, goodwill, deferred income taxes and income taxes payable in the Balance Sheets. The Company does not expect that the adoption of FIN 48 will have a significant impact on the financial statements of the Company.

**FAS 157** In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements" ("FAS 157"). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions for FAS 157 are effective for the Company's fiscal year beginning January 1, 2008. The Company is currently evaluating the impact that the adoption of this statement will have on the Company's financial position, results of operations or cash flows.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements ("SAB

108"). SAB 108 provides guidance on consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB 108 is effective for fiscal years ending after November 15, 2006. The adoption of SAB 108 did not have an impact on our financial statements.

F-28

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS 159") which permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 will be effective for us on January 1, 2008. We are currently evaluating the impact of adopting SFAS 159 on our financial position, cash flows, and results of operations.

The Company has reviewed other current outstanding statements from the Financial Accounting Standards Board and does not believe that any of those statements will have a material adverse affect on the financial statements of the Company when adopted.

## C. RELATED-PARTY TRANSACTIONS:

The Company does not have employees, but utilized USE's employees and pays for one-half of these costs under the USECC Joint Venture Agreement. The Board of Directors of USE adopted the U.S. Energy Corp. 1989 Employee Stock Ownership Plan ("ESOP") in 1989, for the benefit of USE's employees. As of December 31, 2006, 2005, and 2004 the Board of Directors of USE contributed 70,756, 56,494 and 70,439 shares of USE stock to the ESOP at prices of \$4.98, \$4.65 and \$2.96 per share, respectively. The Company is responsible for one-half of the value of these contributions or \$176,200, \$131,400 and \$104,200, for the years ended December 31, 2006, 2005 and 2004, respectively, which was advanced through debt to affiliate. As of December 31, 2006, all shares of USE stock that have been contributed to the ESOP have been allocated. The estimated fair value of shares that are not vested is approximately \$196,100.

#### Proposed merger with USE

On December 20, 2006, the Company's Special Committee of the independent board members met with the Special Committee of the independent board members of USE. Following extensive discussions between the two committees, the USE Special Committee proposed a merger of the Company into USE, by means of an offer to acquire the minority shares of the Company, based on an exchange ratio of one share of common stock of USE for every two shares of the Company's common stock not held by USE (which owns 70.9% of the Company's common stock). Navigant Capital Advisors, LLC served as financial advisor to the USE Special Committee, and Neidiger Tucker Bruner Inc. served as financial advisor to the Company's Special Committee. Both Navigant Capital Advisors, LLC and Neidiger Tucker Bruner submitted fairness opinions on the final proposal for the merger.

The offer also provided that:

(i) USE would vote in line with the vote of a majority of the holders of the Company's minority share holders;
 (ii) USE may decline to consummate the merger, even after approval by the holders of a majority of the minority the Company's shares, if the holders of more than 200,000 the Company's shares perfect their rights to dissent from the merger under Colorado law or for other reasons, in USE's sole discretion; and

(iii) Shares of common stock issuable under options issued by the Company which are held by USE officers, directors, and employees are to participate in the offer on the same exchange ratio basis as the minority shareholders of the Company (the number of option shares would be determined by the extent to which the Company's market price exceeds the \$1.71 option exercise price).

#### CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

The Special Committee for the Company accepted the offer. Thereafter, the Special Committees recommended to their respective full boards that the merger offer be approved. On December 20, 2006, the full boards of directors of the Company and USE voted to approve the merger offer.

Consummation of the merger is subject to execution of definitive documents; USE delivering to the Company's minority shareholders a proxy statement/prospectus (following declaration of effectiveness by the SEC of a Form S-4 to be filed by USE with the SEC) for a special meeting of the Company's shareholders; approval of the merger by the holders of a majority of the minority the Company's shares; and satisfaction of customary representations and warranties to be contained in the definitive documents.

#### D. INVESTMENTS IN AFFILIATES:

The Company's investments in affiliates are as follows:

	December 31,			
	2006		2005	
50.0% \$	4,274,900	\$	3,342,100	
various	5,500		6,700	
\$	4,280,400	\$	3,348,800	
0.9% \$	(85,500)	\$	(85,500)	
13.2%	(130,100)		(130,100)	
\$	(215,600)	\$	(215,600)	
	various \$ 0.9% \$	2006 50.0% \$ 4,274,900 various 5,500 \$ 4,280,400 0.9% \$ (85,500) 13.2% (130,100)	2006 50.0% \$ 4,274,900 \$ various 5,500 \$ 4,280,400 \$ 0.9% \$ (85,500) \$ 13.2% (130,100)	

At December 31, 2006, and 2005 investments of \$4,280,400, \$3,348,800, respectively, are presented as investments in affiliates in the accompanying balance sheets. A liability of \$215,600 has been presented as a commitment to fund equity investees as of December 31, 2006 and 2005 for these investments in affiliates that the Company must fund.

During the year ended December 31, 2006, the Company paid its portion of the \$2,000,000 obligation to Enterra (\$700,000) by transferring its 512,359 shares of USE common stock to USE (valued at \$3.95 per share at the time). USE then paid the total obligation of \$2,000,000 to Enterra by transferring 506,329 shares of USE stock. The Company recognized a gain of \$2,023,800 on the statement of operations and the Company also received a \$1,323,800 credit from USE on the debt that the Company owes to USE.

Equity loss from investments accounted for by the equity method is as follows:

	Year ended December 31,			
	2006	2005	2004	
USECC	\$ (3,625,600)	\$ (1,699,800)	\$ (1,447,500)	
	\$ (3,625,600)	\$ (1,699,800)	\$ (1,447,500)	

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

USECC is an entity established primarily to provide management and administrative services to the Company and its affiliates. Commercial operations of USECC with unaffiliated entities is limited.

The difference of the Company's recorded investment in USECC and the Company's capital account on USECC's balance sheet of \$668,300 consists of prior year establishment and changes of the asset retirement obligation for the Company.

	December 31,			
		2006		2005

#### E. MINERAL TRANSACTIONS AND MINING PROPERTIES:

#### Lucky Jack Molybdenum Properties

The Company and USE re-acquired the Lucky Jack Project (formerly the Mount Emmons molybdenum property) located near Crested Butte, Colorado on February 28, 2006. The property was returned to the Company and USE by Phelps Dodge Corporation ("PD") in accordance with a 1987 Amended Royalty Deed and Agreement between the Company, USE and Amax Inc. ("Amax"). The Lucky Jack Project includes a total of 25 patented and approximately 520 unpatented mining claims, which together approximate 5,400 acres, or over 8 square miles of mining

claims. Pursuant to a court order the Company and USE paid PD \$7,000,000, one half each, for prior holding and operating costs of the property and water treatment plant as well as litigation expenses when the properties were transferred from PD to the Company and USE.

F-31

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

Conveyance of the property to the Company and USE also included the transfer of ownership and operational responsibility of the mine water treatment plant located on the properties. The water treatment permit issued under the Colorado Discharge Permit System ("CDPS") was assigned to the Company and USE by the Colorado Department of Health and Environment. Operating costs for the water treatment plant are expected to approximate \$1 million annually. The Company and USE through USECC, have hired a contractor to operate the water treatment plant. The Company and USE will also evaluate the potential use of the water treatment plant in the milling operations.

On October 6, 2006, the Company, USE and USMC on the one hand, and Kobex Resources Ltd. ("KBX") (a British Columbia company traded on the TSX Venture Exchange under the symbol "KBX"), on the other hand, signed a letter agreement (the "Letter Agreement") providing KBX an option to acquire up to a 65% interest in certain patented and unpatented claims held by the Company and USE at the Lucky Jack molybdenum property ("Property"). The Letter Agreement was amended on December 7, 2006, with an effective date of December 5, 2006.

The total cost to KBX over an estimated period of five years to exercise the full option will be \$50 million in option payments and property expenditures, including the costs to prepare a bankable feasibility study on the Property and with a cash differential payment if this total is less than \$50 million.

The Letter Agreement entitles KBX with an exclusive option (the "Option") to acquire, in two stages, up to an undivided 65% interest in the Property, by paying all of the Option Payments to the Company and USE and also paying for permitting, engineering, exploring, operating (including water treatment plant expenses) and all other property-related costs and expenses ("Expenditures"), until a bankable feasibility study is provided to the Company and USE. Option Payments may be made in cash or KBX common stock, at KBX's election. The Expenditures will be paid in cash. KBX also will have to pay an additional cash amount if the total of all Option Payments and Expenditures is less than \$50 million at the time a bankable feasibility study is delivered to the Company and USE (see below).

Date or Anniversary <sup>(1)</sup>	Option Payment		Expenditures	
10 business days				
after Effective Date <sup>(2)</sup>	\$	750,000	-0-	
By first anniversary <sup>(3)</sup>	\$	500,000/1,200,000	\$ 3,500,000/4,200,000	
By second anniversary	\$	500,000	\$ 5,000,000	
ç ç		,		
By third anniversary	\$	500,000	\$ 5,000,000	
ý ý				
By fourth anniversary	\$	500,000	\$ 2,500,000	
y the desired y			) )	
By fifth anniversary	\$	500,000		
			\$ 30,000,000(4)	
	\$	3,950,000	\$ 46,000,000	
		. ,		

One half of these amounts will be for the benefit of Company.

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

- (1) Anniversary of Effective Date.
- (2) If paid in KBX stock, 10 business days after Canadian regulatory and stock exchange approval which has not yet occurred.
- (3) Of this amount, \$700,000 is payable by the first anniversary of the Effective Date, either by KBX paying an additional like amount in Expenditures, in the first year; or increasing the first anniversary option payment by a like amount (payable in cash or KBX common stock); or a combination of the preceding.
- (4) Delivery of a bankable feasibility study ("BFS") on the Property. If the total Option Payments and Expenditures and costs to prepare the BFS are less than \$50 million, KBX will pay the Company and USE the difference in cash. If the total is more than \$50 million before the BFS is completed, The Company and USE and KBX each will pay 50% of the balance needed to complete the BFS.

Except for the first Expenditures of \$3.5 million and the first Option Payment of \$750,000 (both of which must be paid by KBX), all other Option Payments and Expenditures are at KBX's discretion. However, if KBX fails to make any other Option Payments and Expenditures by the due dates and applicable grace periods, the Letter Agreement (or definitive agreement, if any) will be terminated and all rights and interests will revert to the Company and USE.

When KBX has paid \$15 million in Expenditures, it will have earned a 15% interest in the Property. When all remaining option payments, and all of the expenditures over \$15 million, have been paid, KBX will have earned an additional 35% interest (or a 50% total interest). However, when the BFS is delivered, if the total of all option payments, expenditures, and BFS costs are less than \$50 million, earning this additional 35% interest also will be subject to KBX paying the Company and USE (in cash) the difference between the actual Option payments and Expenditures paid to date, and \$50 million.

The Company and USE each hold a 3% gross overriding royalty interest in the property and this will be reserved for their separate benefit when the property is transferred to KBX. If KBX earns a 15% interest in the property, the royalty will be reduced to 2.55% each; if KBX earns a 50% interest, the royalty will be reduced to 1.5% each. For one year after the final reduction, KBX will have the option to terminate 1% (.5% of each 1.5%) by paying \$10 million in cash or KBX common stock (at the Company and USE's sole discretion), with one-half paid to each Crested and USE.

At such time as KBX has earned a 50% interest, KBX will have the right to form a joint venture with the Company and USE for the property on a 50%-50% basis. Alternatively, within four months of earning a 50% interest, KBX may offer the Company and USE a one time only election to (i) elect to remain in the 50%/50% joint venture; or (ii) to allow KBX to acquire an additional 15% interest in the property for a total of 65% interest in the property (the "65% Election"), whereby The Company and USE would revert to a 35% interest , which change in ownership will require KBX to have arranged all future property financing on optimal terms; or (iii) have KBX acquire all of the Company and USE's interest for KBX common stock on an agreed upon valuation basis (but the KBX shares issued cannot be less than 50% for KBX and not more than 50% for the Company and USE's interest).

## CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

Until KBX earns its 50% interest, KBX will manage all programs on the property, but a management committee (with two representatives from each of KBX and the Company and USE) will approve all programs and budgets for Expenditures. If there is a tie vote, the KBX representative would cast the deciding vote. A technical committee will also be formed to provide technical advice; each of KBX and the Company and USE will have two representatives. The Technical Committee will report to the management committee.

KBX may terminate the Letter Agreement or the formal agreement at any time, subject to KBX paying the Company and USE the initial \$1.45 million Option Payment (in cash or KBX stock), and KBX having paid the minimum initial \$3.5 million of Expenditures. Further, if and to the extent the initial minimum \$1.45 million Option Payment and \$3.5 million in Expenditures have not been met, termination by KBX will be subject to its paying to the Company and USE \$700,000 in cash or KBX stock and the difference between \$4.2 million and the total Expenditures actually made by the date of termination.

If KBX pays a broker or finder's fee in connection with the transaction, the Company will reimburse KBX up to 50% of the fee (but the reimbursable amount will not exceed Cdn \$400,000), in cash or common stock of USE (at the Company and USE's election), in four equal annual installments. The reimbursement obligation would terminate if the Letter Agreement or the formal agreement is terminated before it is fully paid.

#### Contract to Sell Uranium Assets to Uranium One - Uranium

On July 10, 2006, the Company and USE signed an Exclusivity Agreement with sxr Uranium One Inc. ("Uranium One" or "SXR"), which is headquartered in Toronto, Canada with offices in South Africa and Australia (TSE and JSE "SXR"). Upon signing the Exclusivity Agreement, the Term Sheet (signed by Uranium One and by the Company and USE on June 22, 2006) became effective. The Term Sheet sets forth the indicative terms of a proposed sale of the majority of the Company and USE's uranium assets to Uranium One.

Under the terms of the Exclusivity Agreement, Uranium One paid to the USECC \$750,000 cash (nonrefundable, except for material breach of the Exclusivity Agreement) for the exclusive right to purchase the their uranium assets, including the Shootaring Canyon uranium mill in southeast Utah (and all geological libraries and other intellectual property related to the acquired assets and the mill), for a period of up to 270 days (an initial six month period, plus an optional three month extension) during which time Uranium One was to conduct their due diligence. (See Subsequent Event at Note K)

#### • UPC Purchase and Sale Agreement

As of January 31, 2007, the Company, USE and UPC, signed an Amendment to Agreements (filed as an exhibit to this Report) to allow USE and Crested to transfer to Uranium One all of their rights, responsibilities and obligations under the Purchase and Sale Agreement, and the Mining Venture Agreement, which relate to uranium properties. In the Amendment to Agreements, the Company and USE relinquished all their rights to the Green River South property in favor of UPC, and those specific rights therefore will be excluded from the transfer. All other rights will be transferred to Uranium One when the APA is closed. The following summarizes the agreements with UPC which are the subject of the Amendment to Agreements.

#### CRESTED CORP. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2006, 2005 AND 2004 (Continued)

On December 8, 2004, the Company and USE entered into a Purchase and Sale Agreement (the "Agreement") with Bell Coast Capital Corp. now named Uranium Power Corp. ("UPC"), a British Columbia corporation (TSX-V "UCP-V") for the sale to UPC of an undivided 50% interest in the Sheep Mountain properties located in Wyoming.

The Agreement was amended on January 13, 2006. A summary of certain provisions follows: The purchase price for the properties is \$7,050,000 plus 4 million shares of UPC common stock. During the year ended December 31, 2006, UPC paid \$2,100,000 and delivered 1,500,000 shares of their stock to USECC. At December 31, 2006, UPC had therefore, on a cumulative basis, paid \$2,950,000 and delivered 2.5 million UPC shares to USECC. An additional \$4.1 million and 1.5 million shares are required to pay the full purchase price as follows: \$1.0 million cash on April 29, 2007 and \$1.5 million cash on October 29, 2007 (provided that UPC is required to pay 50% of all money it raises after January 13, 2006, which would be applied against the two cash payments); and two additional payments each of \$800,000 cash and 750,000 UPC shares on June 29, 2007 and December 29, 2007, respectively (total \$1,600,000 cash and 1,500,000 UPC shares).

UPC will contribute up to \$10,000,000 to the joint venture (at \$500,000 for each of 20 exploration projects). The Company and USE on the one hand and UPC on the other will then each be responsible for 50% of costs on each project in excess of \$500,000. The USECC and UPC will also each be responsible for paying 50% of (i) current and future Sheep Mountain reclamation costs in excess of \$1,600,000, and (ii) all costs to maintain and hold the properties.

UPC may terminate the agreement before closing, in which event UPC (i) would forfeit all payments made to termination date; (ii) lose all of its interest in the properties to be contributed by the Company under the agreement; (iii) lose all rights to additional properties acquired in the joint venture as well as forfeit all cash contributions to the joint venture, and (iv) be relieved of its share of reclamation liabilities existing at December 8, 2004.

If the Uranium One contract is not closed, then closing of the UPC Purchase and Sale Agreement is required on or before December 29, 2007, with UPC's last payment of the purchase price. At the closing, UPC will contribute its 50% interest in the properties, and the Company will contribute their aggregate 50% interest in the properties, to the joint venture, wherein UPC and USECC will each hold a 50% interest. If the installments are not timely paid, UPC will forfeit all of the 50% interest it is to earn in the properties and the joint venture to be formed.

• UPC Mining Venture Agreement

As of April 11, 2005, the Company and USE signed a Mining Venture Agreement with UPC to establish a joint venture, with a term of 30 years, to explore, develop and mine the properties being purchased by UPC under the Purchase and Sale Agreement, and acquire, explore and develop additional uranium properties. An area of mutual interest ("AMI") was revised by the January 31, 2007 Amendment to Agreements and generally covers uranium properties within one mile of the properties subject to the joint venture.
