SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-16577

(Exact name of registrant as specified in its charter).

Michigan (State or other jurisdiction of Incorporation or organization)	38-3150651 (I.R.S. Employer Identification No.)
---	---

5151 Corporate Drive, Troy, Michigan (Address of principal executive offices) (248) 312-2000 (Registrant's telephone number, including area code)	48098-2639 (Zip code)
--	--------------------------

Not applicable
(Former name, former address and formal fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No .

As of November 3, 2015, 56,441,157 shares of the registrant's common stock, \$0.01 par value, were issued and outstanding.

Flagstar Bancorp, Inc.

Notes to the Consolidated Financial Statements (Unaudited)

Note 1 – Basis of Presentation

The accompanying financial statements of Flagstar Bancorp, Inc. ("Flagstar" or the "Company"), including its wholly owned principal subsidiary, Flagstar Bank, FSB (the "Bank"), have been prepared using U.S. generally accepted accounting principles ("GAAP") for interim financial statements.

These consolidated financial statements do not include all of the information and footnotes required by GAAP for a full year presentation and certain disclosures have been condensed or omitted in accordance with rules and regulations of the Securities and Exchange Commission. These interim financial statements are unaudited and include, in the opinion of the Company, all adjustments necessary for a fair presentation of the results for the periods indicated, which are not necessarily indicative of results which may be expected for the full year. These consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, which is available on the Company's website, at flagstar.com, and on the SEC website, at sec.gov. Certain prior period amounts have been reclassified to conform to the current period presentation.

Note 2 – Investment Securities

As of September 30, 2015 and December 31, 2014, investment securities were comprised of the following.

	Amortized Cost (1)	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(Dollars in millions)			
September 30, 2015				
Available-for-sale securities				
Agency	\$463	\$7	\$(1)) \$469
Agency-collateralized mortgage obligations	657	11	—	668
Municipal obligations	13	—	—	13
Total available-for-sale securities	\$1,133	\$18	\$(1)) \$1,150
Held-to-maturity securities				
Agency	\$445	\$4	\$—	\$449
Agency-collateralized mortgage obligations	663	6	—	669
Total held-to-maturity securities	\$1,108	\$10	\$—	\$1,118
December 31, 2014 (2)				
Available-for-sale securities				
Agency	\$925	\$6	\$(2)) \$929
Agency-collateralized mortgage obligations	734	8	(1)) 741
Municipal obligations	2	—	—	2
Total available-for-sale securities	\$1,661	\$14	\$(3)) \$1,672

(1) Includes the investment securities that were transferred to held-to-maturity at fair value.

(2) The Company did not have any held-to-maturity securities at December 31, 2014.

Credit related declines in the available-for-sale and held-to-maturity securities are classified as other-than-temporary impairments ("OTTI") and are reported as a separate component of noninterest income within the Consolidated Statement of Operations. An impaired investment security is considered to be other than temporary if (1) the Company intends to sell the security; (2) it is more likely than not the Company will be required to sell the security

before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover all contractually required principal and interest payments.

Table of Contents

Available-for-sale securities

Securities available-for-sale are carried at fair value, with unrealized gains reported as a component of other comprehensive income and unrealized losses reported as a component of other comprehensive income to the extent they are temporary in nature.

The Company purchased \$59 million and \$783 million of available-for-sale securities, which included agency securities, comprised of mortgage-backed securities, collateralized mortgage and municipal obligations during the three and nine months ended September 30, 2015, respectively. During the third quarter the Company subsequently transferred \$462 million of the securities purchased during 2015 to held-to-maturity investments. The Company purchased \$86 million and \$762 million of available-for-sale securities, which included agency securities, comprised of mortgage-backed securities and collateralized mortgage obligations during the three and nine months ended September 30, 2014, respectively.

Gains (losses) on sales of available-for-sale securities are reported in other noninterest income in the Consolidated Statements of Operations. During both the three and nine months ended September 30, 2015, there were no sales of available-for-sale securities except those related to loans that had been securitized for sale in the normal course of business, compared to \$255 million and \$314 million, respectively, in sales of available-for-sale securities, resulting in a gain of \$2 million and \$3 million during the three and nine months ended September 30, 2014, respectively.

Held-to-maturity securities

Investment securities held-to-maturity are carried at amortized cost and adjusted for amortization of premiums and accretion of discounts using the interest method.

During the third quarter 2015, the Company transferred \$1.1 billion of available-for-sale securities to held-to-maturity securities at a premium of \$8 million, reflecting the Company's intent and ability to hold those securities to maturity. Transfers of investment securities into the held-to-maturity category from the available-for-sale category are accounted for at fair value at the date of transfer. The related \$5 million of unrealized holding gain, net of tax, that was included in the transfer is retained in other comprehensive income (loss) and is being amortized as an adjustment to interest income over the remaining life of the securities. There were no gains or losses recognized as a result of this transfer. The Company did not classify investment securities as held-to-maturity at December 31, 2014.

The Company purchased \$10 million of held-to-maturity securities, which included agency-collateralized mortgage obligations during both the three and nine months ended September 30, 2015, respectively. During both the three and nine months ended September 30, 2015, there were \$25 million of maturities in held-to-maturity securities. The Company did not hold held-to-maturity securities for the three and nine months ended September 2014.

The following table summarizes by duration the unrealized loss positions on investment securities:

Type of Security	Unrealized Loss Position with Duration 12 Months and Over			Unrealized Loss Position with Duration Under 12 Months		
	Fair Value	Number of Securities	Unrealized Loss	Fair Value	Number of Securities	Unrealized Loss
September 30, 2015	(Dollars in millions)					
Available-for-sale securities						
Agency	\$8	2	\$—	\$87	7	\$(1)
Agency-collateralized mortgage obligations	—	—	—	42	3	—

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Held-to-maturity securities						
Agency	\$—	—	\$—	\$10	1	\$—
December 31, 2014						
Available-for-sale securities						
Agency	\$53	6	\$—	\$305	21	\$(2)
Agency-collateralized mortgage obligations	98	10	(1)	38	4	—

10

Table of Contents

The amortized cost and estimated fair value of securities at September 30, 2015, are presented below by contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations.

	Investment Securities Available-for-Sale				Investment Securities Held-to-maturity			
	Amortized Cost	Fair Value	Weighted-Average Yield		Amortized Cost	Fair Value	Weighted-Average Yield	
September 30, 2015	(Dollars in millions)				(Dollars in millions)			
Due in one year or less	\$—	\$—	—	%	\$—	\$—	—	%
Due after one year through five years	—	—	—	%	—	—	—	%
Due after five years through 10 years	13	13	4.60	%	69	69	2.43	%
Due after 10 years	1,120	1,137	2.50	%	1,039	1,049	2.44	%
Total	\$1,133	\$1,150			\$1,108	\$1,118		

Management evaluates its securities portfolio each quarter to determine if any security is considered to be other than temporarily impaired. In making this evaluation, management considers its ability and intent to hold securities to recover current market losses. The Company did not recognize any other than temporary impairment losses on its investment securities during the third quarter or nine months ended September 2015 and 2014.

Note 3 – Loans Held-for-Sale

The majority of our mortgage loans originated as loans held-for-sale are sold into the secondary market on a whole loan basis or by securitizing the loans into securities. At September 30, 2015 and December 31, 2014, loans held-for-sale totaled \$2.4 billion and \$1.2 billion, respectively. For the three and nine months ended September 30, 2015, the Company reported net gain on loan sales of \$68 million and \$242 million, respectively, compared to \$52 million and \$152 million net gain on loan sales during the three and nine months ended September 30, 2014, respectively.

At September 30, 2015 and December 31, 2014, \$243 million and \$48 million, respectively, of loans held-for-sale were recorded at lower of cost or fair value. The remainder of the loans in the portfolio are recorded at fair value as the Company elected the fair value option.

Note 4 – Loans with Government Guarantees

The majority of loans with government guarantees continue to be insured or guaranteed by the Federal Housing Administration. These loans earn interest at a rate based upon the 10-year U.S. Treasury note rate at the time the underlying loan becomes delinquent, which is not paid by the FHA until claimed.

At September 30, 2015, loans with government guarantees actually repurchased totaled \$509 million and were classified as loans with government guarantees. At December 31, 2014, loans with government guarantees actually repurchased totaled \$1.1 billion and were classified as loans with government guarantees.

The Company adopted ASU Update No. 2014-14, Receivables - Troubled Debt Restructuring by Creditors (Subtopic 310-40) in the first quarter 2015 at which time repossessed assets and the associated claims were recorded separately from the associated loans. At September 30, 2015, repossessed assets and the associated claims recorded in other assets totaled \$231 million and at December 31, 2014 repossessed assets and the associated claims were \$373 million and included in loans with government guarantees.

Table of Contents

Note 5 – Loans Held-for-Investment

Loans held-for-investment are summarized as follows.

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
Consumer loans		
Residential first mortgage	\$2,726	\$2,193
Second mortgage	140	149
HELOC	405	257
Other	32	31
Total consumer loans	3,303	2,630
Commercial loans		
Commercial real estate	707	620
Commercial and industrial	493	429
Warehouse lending	1,011	769
Total commercial loans	2,211	1,818
Total loans held-for-investment	5,514	4,448
Less allowance for loan losses	(197) (297
Loans held-for-investment, net	\$5,317	\$4,151

During the third quarter 2015, the Company transferred interest-only residential first mortgage loans with unpaid principal balances totaling \$214 million to held-for-sale, which were subsequently sold in October 2015. In addition the Company transferred \$19 million of nonperforming first mortgage loans to held-for-sale, which were subsequently sold at a gain on sale of \$1 million during the third quarter 2015. A portion of the general allowance for loan losses associated with both of these loan sales was reduced, resulting in a \$16 million reduction in the general allowance.

During the second quarter 2015, the Company sold interest-only residential first mortgage loans with unpaid principal balances totaling \$386 million, along with \$70 million of nonperforming and troubled debt restructured first mortgage loans. A portion of the allowance for loan losses associated with these loans was reduced, resulting in a \$15 million reduction in allowance. Upon a change in the Company's intent, the loans were transferred to held-for-sale and subsequently sold resulting in a loss on sale of \$1 million during the three months ended June 30, 2015.

During the first quarter 2015, the Company re-measured the specifically identified reserve relating to the troubled debt restructured loans, resulting in a \$36 million reduction in reserve based on a change in expected future cash flows. During the first quarter 2015, the Company changed its intent to hold these loans for investment and instead decided to hold these loans for sale. The loans for which the intent changed had an approximate unpaid principal balance of \$331 million, including approximately \$291 million of troubled debt restructured residential first mortgage loans, and \$30 million in specifically identified reserves at the time this intent was changed. These loans were transferred to loans held-for-sale and subsequently sold resulting in a loss on sale of less than \$1 million during the first quarter 2015.

During the first quarter 2014, the Company sold nonperforming, troubled debt restructured residential first mortgage and residential first mortgage jumbo loans with unpaid principal balances totaling \$313 million. A portion of the allowance for loan losses associated with these loans was reduced, resulting in a \$2 million reduction in allowance. Upon a change in the Company's intent, the loans were transferred to held-for-sale and subsequently sold resulting in a gain on sale of \$1 million.

During the second quarter 2014, the Company sold nonperforming, troubled debt restructured residential first mortgage and residential first mortgage jumbo loans with unpaid principal balances totaling \$234 million. Upon a change in the Company's intent, the loans were transferred to held-for-sale and subsequently sold resulting in a gain on sale of \$4 million.

During the third quarter 2014, the Company sold nonperforming, troubled debt restructured residential first mortgage and residential first mortgage jumbo loans with unpaid principal balances totaling \$81 million. A portion of the allowance for loan losses associated with these loans was reduced, resulting in a \$5 million reduction in allowance. Upon a change in the Company's intent, the loans were transferred to held-for-sale and subsequently sold resulting in a gain on sale of \$5 million.

Table of Contents

During the first and second quarter of 2015, the Company purchased \$197 million of HELOC loans with a premium of \$7 million.

The Company has pledged certain loans held-for-investment, loans held-for-sale, and loans with government guarantees to collateralize lines of credit and/or borrowings with the Federal Reserve Bank of Chicago and the Federal Home Loan Bank of Indianapolis. At September 30, 2015 and December 31, 2014, the Company pledged \$5.2 billion and \$4.1 billion, respectively.

The allowance for loan losses by class of loan are summarized in the following table.

	Residential First Mortgage	Second Mortgage	HELOC	Other Consumer	Commercial Real Estate	Commercial and Industrial	Warehouse Lending	Total
(Dollars in millions)

Total allowance for loan losses	\$234	\$12	\$19	\$1	\$17	\$11	\$3	\$297

(1) Excludes loans carried under the fair value option.

The allowance for loan losses, other than for loans that have been identified for individual evaluation for impairment, is determined on a loan pool basis by grouping loan types with similar risk characteristics to determine the Company's best estimate of incurred losses. Management evaluates the results of the allowance for loan losses model and makes qualitative adjustments to the results of the model when it is determined that model results do not reflect all losses inherent in the loan portfolios due to changes in recent economic trends and conditions, or other relevant factors.

For those loans not individually evaluated for impairment, management has categorized the commercial and consumer loans into portfolios with common risk characteristics.

Table of Contents

The following table sets forth the loans held-for-investment aging analysis as of September 30, 2015 and December 31, 2014, of past due and current loans.

	30-59 Days Past Due	60-89 Days Past Due	90 Days or Greater Past Due (1)	Total Past Due	Current	Total Investment Loans
(Dollars in millions)						
September 30, 2015						
Consumer loans						
Residential first mortgage	\$8	\$5	\$51	\$64	\$2,662	\$2,726
Second mortgage	1	—	1	2	138	140

Other	—	—	1	1	31	32
Total consumer loans	13	8	60	81	3,222	3,303
Commercial loans						
Commercial real estate	—	—	—	—	707	707
Commercial and industrial	—	—	3	3	490	493
Warehouse lending	—	—	—	—	1,011	1,011
Total commercial loans	—	—	3	3	2,208	2,211
Total loans (2)	\$13	\$8	\$63	\$84	\$5,430	\$5,514
December 31, 2014						
Consumer loans						
Residential first mortgage	\$29	\$8	\$115	\$152	\$2,041	\$2,193
Second mortgage	1	1	2	4	145	149
HELOC	4	1	3	8	249	257
Other	—	—	—	—	31	31
Total consumer loans	34	10	120	164	2,466	2,630
Commercial loans						
Commercial real estate	—	—	—	—	620	620
Commercial and industrial	—	—	—	—	429	429
Warehouse lending	—	—	—	—	769	769
Total commercial loans	—	—	—	—	1,818	1,818
Total loans (2)	\$34	\$10	\$120	\$164	\$4,284	\$4,448

(1) Includes performing nonaccrual loans that are less than 90 days delinquent and for which interest can not be accrued.

(2) Includes \$9 million and \$5 million of loans 90 days or greater past due accounted for under the fair value option at September 30, 2015 and December 31, 2014, respectively.

For all classes within the consumer and commercial loan portfolio, loans are placed on nonaccrual status when any portion of principal or interest is 90 days past due (or nonperforming), or earlier when the Company becomes aware of information indicating that collection of principal and interest is in doubt. When a loan is placed on nonaccrual status, the accrued interest income is reversed. Loans return to accrual status when principal and interest become current and are anticipated to be fully collectible.

Loans held-for-investment and loans held-for-sale on which interest accruals have been discontinued totaled approximately \$77 million and \$135 million at September 30, 2015 and December 31, 2014, respectively, and \$122 million at September 30, 2014. Interest income is recognized on impaired loans using a modified cost recovery method. Interest that would have been accrued on impaired loans totaled approximately \$1 million and \$4 million during the three and nine months ended September 30, 2015, respectively, and \$2 million and \$4 million during the three and nine months ended September 30, 2014, respectively. At September 30, 2015 and December 31, 2014, the

Company had no loans 90 days past due and still accruing.

Table of Contents

Troubled Debt Restructuring

The Company may modify certain loans in both consumer and commercial loan portfolios to retain customers or to maximize collection of the outstanding loan balance. The Company has programs designed to assist borrowers by extending payment dates or reducing the borrower's contractual payments. All loan modifications are made on a case-by-case basis. The Company's standards relating to loan modifications consider, among other factors, minimum verified income requirements, cash flow analysis, and collateral valuations. TDRs result in those instances in which a borrower demonstrates financial difficulty and for which a concession has been granted, which includes reductions of interest rate, extensions of amortization period, principal and/or interest forgiveness and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of collateral. These loans are classified as nonperforming TDRs if the loan was nonperforming prior to the restructuring, or based upon the results of a collateral credit evaluation. Such loans will continue on nonaccrual status until the borrower has established a willingness and ability to make the restructured payments for at least six months, after which they will begin to accrue interest.

The following table provides a summary of TDRs outstanding by type and performing status.

	TDRs		
	Performing	Nonperforming	Total
September 30, 2015	(Dollars in millions)		
Consumer loans			
Residential first mortgage	\$41	\$20	\$61
Second mortgage	34	1	35
HELOC	22	5	27
Total consumer loans	97	26	123
Commercial loans			
Commercial real estate	—	—	—
Commercial and industrial	—	—	—
Total commercial loans	—	—	—
Total TDRs (1)(2)	\$97	\$26	\$123
December 31, 2014			
Consumer loans			
Residential first mortgage	\$306	\$44	\$350
Second mortgage	35	1	36
HELOC	20	1	21
Total consumer loans	361	46	407
Commercial loans			
Commercial real estate	1	—	1
Total TDRs (1)(2)	\$362	\$46	\$408

(1) The allowance for loan losses on consumer TDR loans totaled \$16 million and \$81 million at September 30, 2015 and December 31, 2014, respectively.

(2) Includes \$31 million and \$30 million of TDR loans accounted for under the fair value option at September 30, 2015 and December 31, 2014, respectively.

Some loan modifications classified as TDRs may not ultimately result in the full collection of principal and interest, as modified, but may give rise to potential incremental losses. The Company measures impairment using the discounted cash flow method for performing TDRs and measures impairment based on collateral values for re-defaulted TDRs.

Table of Contents

The following table provides a summary of newly modified TDRs and TDR loans that subsequently defaulted in the previous 12 months during the three and nine months ended September 30, 2015 and 2014. All TDR classes within consumer and commercial loan portfolios are considered subsequently defaulted when they are greater than 90 days past due.

	Number of Accounts	Pre-Modification Unpaid Principal Balance (Dollars in millions)	Post-Modification Unpaid Principal Balance (1)	Increase (Decrease) in Allowance at Modification

Table of Contents

Credit Quality

The Company utilizes an internal risk rating system in accordance with the Rating Credit Risk booklet of the Comptroller's Handbook, April 2011 and the Uniform Retail Credit classification and Account Management Policy issued June 20, 2000 by the Federal Financial Institution Examination Council (FFIEC) which is applied to all consumer and commercial loans. Commercial credits are classified using a risk-based approach by assigning a risk rating individually to each loan. Management conducts periodic examinations which serve as an independent verification of the accuracy of the ratings assigned. Loan grades are based on different factors within the borrowing relationship: entity sales, debt service coverage, debt/total net worth, liquidity, balance sheet and income statement trends, management experience, business stability, financing structure of the deal, and financial reporting requirements. The underlying collateral is also rated based on the specific type of collateral and corresponding LTV. The combination of the borrower and collateral risk ratings result in the final rating for the borrowing relationship. Descriptions of the Company's internal risk ratings as they relate to credit quality follow the ratings used by the U.S. bank regulatory agencies as listed below.

Pass. Pass assets are not impaired nor do they have any known deficiencies that could impact the quality of the asset.

Watch. Watch assets are defined as pass rated assets that exhibit elevated risk characteristics or other factors that deserve management's close attention and increased monitoring. However, the asset does not exhibit a potential or well-defined weakness that would warrant a downgrade to criticized or adverse classification.

Special mention. Assets identified as special mention possess credit deficiencies or potential weaknesses deserving management's close attention. Special mention assets have a potential weakness or pose an unwarranted financial risk that, if not corrected, could weaken the assets and increase risk in the future. Special mention assets are criticized, but do not expose an institution to sufficient risk to warrant adverse classification.

Substandard. Assets identified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. For HELOC loans and other consumer loans, the Company evaluates credit quality based on the aging and status of payment activity and includes all nonperforming loans.

Doubtful. An asset classified as doubtful has all the weaknesses inherent in one classified substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. A doubtful asset has a high probability of total or substantial loss, but because of specific pending events that may strengthen the asset, its classification as loss is deferred. Doubtful borrowers are usually in default, lack adequate liquidity or capital, and lack the resources necessary to remain an operating entity. Pending events can include mergers, acquisitions, liquidations, capital injections, the perfection of liens on additional collateral, the valuation of collateral, and refinancing. Generally, pending events should be resolved within a relatively short period and the ratings will be adjusted based on the new information. Because of high probability of loss, non-accrual accounting treatment is required for doubtful assets.

Commercial Loans

Management conducts periodic examinations which serve as an independent verification of the accuracy of the ratings assigned. Loan grades are based on different factors within the borrowing relationship: entity sales, debt service coverage, debt/total net worth, liquidity, balance sheet and income statement trends, management experience, business stability, financing structure of the deal, and financial reporting requirements. The underlying collateral is also rated

based on the specific type of collateral and corresponding LTV. The combination of the borrower and collateral risk ratings result in the final rating for the borrowing relationship.

Consumer Loans

The same rating principles are used for consumer and commercial loans, but the principles are applied differently for consumer loans. Consumer loans consists of open and closed end loans extended to individuals for household, family, and other personal expenditures, and includes consumer loans, loans to individuals secured by their personal residence, including first mortgage, home equity, and home improvement loans. Because consumer loans are usually relatively small-balance, homogeneous exposures, consumer loans are rated primarily on payment performance. Payment performance is a proxy for the strength of repayment capacity and loans are generally classified based on their payment status rather than by an individual review of each loan.

Table of Contents

In accordance with regulatory guidance, the Company assigns risk ratings to consumer loans in the following manner:

- Consumer loans are classified as Watch once the loan becomes 60 days past due.
- Open and closed-end consumer loans 90 days or more past due are classified Substandard.

Note 6 – Variable Interest Entities ("VIEs")

Due to the Assured Settlement Agreement in 2013, the Company became the primary beneficiary and reconsolidated the FSTAR 2005-1 and the FSTAR 2006-2 HELOC securitization trust's assets and liabilities. The Company had elected the fair value option for these assets and liabilities.

In June 2015, the Company executed a clean-up call of the FSTAR 2005-1 long-term debt associated with the HELOC securitization trust. The transaction resulted in a cash payment of \$24 million to the debt bondholders. After payment of the debt, the FSTAR 2005-1 HELOC securitization trust has been dissolved as of second quarter 2015. The Company initiated the clean-up call process with respect to the 2006-2 HELOC securitization trust, which the Company expects to complete in the fourth quarter 2015.

The Company continues to consolidate the VIE, which consists of the HELOC securitization trust formed in 2006. The Company has determined the trust is a VIE and has concluded that the Company is the primary beneficiary of this trust because it has the power to direct the activities of the entity that most significantly affect the entity's economic performance and has either the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits

Table of Contents

from the entity that could potentially be significant to the VIE. The beneficial owners of the trust can look only to the assets of the securitization trust for satisfaction of the debt issued by the securitization trust.

The following table provides a summary of the classifications of consolidated VIE assets and liabilities included in the Consolidated Financial Statements.

	2005-1	2006-2	Total
September 30, 2015	(Dollars in millions)		
HELOC Securitizations			
Assets			
Loans held-for-investment	\$—	\$57	\$57
Liabilities			
Long-term debt	\$—	\$32	\$32
December 31, 2014	(Dollars in millions)		
HELOC Securitizations			
Assets			
Loans held-for-investment	\$63	\$69	\$132
Liabilities			
Long-term debt	\$42	\$42	\$84

The economic performance of the VIE is most significantly impacted by the performance of the underlying loans. The principal risks to which the entities were exposed include credit risk and interest-rate risk.

FSTAR 2007-1 mortgage securitization trust is an unconsolidated VIE. The Company has a continuing involvement, but is not the primary beneficiary and de-recognized the assets upon transfer. In accordance with the settlement agreement with MBIA, there is no further recourse to the Company related to FSTAR 2007-1. At September 30, 2015 and December 31, 2014, the FSTAR 2007-1 mortgage securitization trust included 3,215 loans and 3,624 loans, respectively, with an aggregate principal balance of \$124 million and \$141 million, respectively.

Note 7 – Mortgage Servicing Rights

The Company has investments in mortgage servicing rights ("MSRs") to support mortgage strategies and to deploy capital at acceptable returns. The Company also utilizes derivatives as economic hedges to offset changes in the fair value of the MSRs resulting from the actual or anticipated changes in prepayments stemming from changing interest rate environments. The Company's portfolio of MSRs is highly sensitive to movements in interest rates. The primary risk associated with MSRs is the potential change in value as a result of higher than anticipated prepayments due to loan refinancing prompted, in part, by declining interest rates or government intervention. Conversely, these assets generally increase in value in a rising interest rate environment to the extent that prepayments are slower than anticipated. There is also a risk of valuation decline due to higher than expected increases in default rates, which the Company does not believe can be effectively hedged. See Note 8 of the Notes to the Consolidated Financial Statements, herein, for additional information regarding the instruments utilized to hedge the risks of MSRs.

Table of Contents

Changes in the carrying value of residential first mortgage MSR, accounted for at fair value, were as follows.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Balance at beginning of period	\$317	\$289	\$258	\$285
Additions from loans sold with servicing retained	74	79	220	199
Reductions from sales	(73) (68) (144) (161
Changes in fair value due to (1)				
Decrease in MSR due to pay-offs, pay-downs and run-off	(9) (10) (34) (22
Changes in valuation inputs or assumptions (2)	(15) (5) (6) (16
Fair value of MSR at end of period	\$294	\$285	\$294	\$285

(1) Changes in fair value are included within net return on mortgage servicing asset on the Consolidated Statements of Operations.

(2) Represents estimated MSR value change resulting primarily from market-driven changes in interest rates.

See Note 17 of the Notes to the Consolidated Financial Statements, herein, for additional fair value disclosures relating to mortgage servicing rights.

The following table summarizes income and fees associated with the mortgage servicing asset.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Income on mortgage servicing asset				
Servicing fees, ancillary income and late fees (1)	\$18	\$17	\$52	\$50
Fair value adjustments (2)	(24) (15) (38) (38
Gain on hedging activity (3)	15	—	10	10
Net transaction costs	3	(1) (5) —
Total income on mortgage servicing asset, included in net return on mortgage servicing asset	\$12	\$1	\$19	\$22

(1) Servicing fees are recorded on the accrual basis. Ancillary income and late fees are recorded on a cash basis.

(2) Includes a \$2 million gain related to the sale of MSR during the nine months ended September 30, 2015.

(3) Changes in the derivatives utilized as economic hedges to offset changes in fair value of the MSR.

Contractual servicing and subservicing fees. Contractual servicing and subservicing fees, including late fees and other ancillary income, for each type of loan serviced are presented below. Contractual servicing fees are included within net return on mortgage servicing asset on the Consolidated Statements of Operations. Contractual subservicing fees including late fees and other ancillary income are included within loan administration income on the Consolidated Statements of Operations. Subservicing fee income is recorded for fees earned, net of third-party subservicing costs, for loans subserviced.

The following table summarizes income and fees associated with the mortgage loans subserviced.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Income on mortgage loans subserviced				

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Servicing fees, ancillary income and late fees (1)	\$8	\$7	\$24	\$21
Other servicing charges	—	(1) (5) (2
Total income on mortgage loans subserviced, included in loan administration	\$8	\$6	\$19	\$19

(1) Servicing fees are recorded on the accrual basis. Ancillary income and late fees are recorded on cash basis.

Table of Contents

The following table summarizes the hypothetical effect on the fair value of servicing rights carried at fair value using adverse changes of 10 percent and 20 percent to the weighted-average of certain significant assumptions used in valuing these assets.

	September 30, 2015			December 31, 2014		
	Actual	Fair value due to 10% adverse change (Dollars in millions)	20% adverse change	Actual	Fair value due to 10% adverse change	20% adverse change
Option adjusted spread	8.68	% \$285	\$276	8.88	% \$250	\$243
Constant prepayment rate	13.27	% 283	272	14.98	% 253	245
Weighted average cost to service per loan	\$73.48	290	286	\$74.49	258	255

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. Changes in fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. To isolate the effect of the specified change, the fair value shock analysis is consistent with the identified adverse change, while holding all other assumptions impacting the fair value constant on the fair value of the servicing rights. In practice, a change in one assumption generally impacts other assumptions, which may either magnify or counteract the effect of the change.

Note 8 – Derivative Financial Instruments

Derivative financial instruments are recorded at fair value in other assets and other liabilities on the Consolidated Statements of Financial Condition after taking into account the effects of legally enforceable bilateral collateral and master netting agreements. The Company is exposed to non-performance risk by the counterparties to its various derivative financial instruments. The Company believes that the credit risk inherent in all its derivative contracts is minimal based on credit standards and the netting and collateral provisions of the interest rate swap agreements.

Derivatives not designated as hedging instruments: The Company maintains a derivative portfolio of interest rate swaps, futures and forward commitments used to manage exposure to changes in interest rates, MSR asset values and to meet the needs of customers. The Company also enters into interest rate lock commitments, which are commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. Market risk on interest rate lock commitments and mortgage loans held-for-sale is managed using corresponding forward sale commitments.

Changes in fair value of derivatives not designated as hedging instruments are recognized in the Consolidated Statements of Income.

Derivatives designated as hedging instruments: The Company uses interest rate swaps to hedge the forecasted cash flows from its underlying variable-rate Federal Home Loan Bank (FHLB) advances in a qualifying cash flow hedge accounting relationship. Changes in the fair value of derivatives designated as cash flow hedges are recorded in other comprehensive income on the Consolidated Statement of Financial Condition and reclassified into interest expense in the same period in which the hedge transaction is realized into earnings. At September 30, 2015, the Company had \$5 million (net-of-tax) of realized and unrealized losses on derivatives classified as cash flow hedges recorded in other comprehensive income (loss), compared to zero at December 31, 2014. The estimated amount to be reclassified from other comprehensive income into earnings during the remainder of 2015 and the next 12 months represents gains of less than \$1 million (net-of-tax) and \$3 million of losses (net-of-tax), respectively. All cash flow hedges were highly effective as of September 30, 2015.

Derivatives that are designated in hedging relationships are evaluated for effectiveness using regression analysis at the time they are designated and throughout the hedge period. Cash flows and the profit impact associated with designated hedges are reported in the same category as the underlying hedged item.

Table of Contents

The gains/(losses), by hedge designation, recorded in income for the periods ended September 30 were as follows:

Location of Gain/(Loss)		Three Months Ended		Nine Months Ended	
		September 30, 2015	2014	September 30, 2015	2014
(Dollars in millions)					
Derivatives not designated as hedging instruments:

(1) Includes gross amounts for items not netted in the Company's Consolidated Statements of Financial Condition.

The Company pledged a total of \$48 million of cash collateral to counterparties and had an obligation to return cash of \$10 million at September 30, 2015 for derivative activities. The Company pledged a total of \$36 million of investment securities and cash collateral to counterparties at December 31, 2014 for derivative activities. The net cash pledged is restricted and is included in other assets on the Consolidated Statements of Financial Condition.

Table of Contents

Note 9 – Federal Home Loan Bank Advances

The portfolio of Federal Home Loan Bank advances includes short-term fixed rate advances and long-term fixed rate advances. The following is a breakdown of the advances outstanding.

	September 30, 2015		December 31, 2014		
	Amount	Rate	Amount	Rate	
	(Dollars in millions)				
Short-term fixed rate term advances	\$824	0.18	% \$214	0.26	%
LIBOR adjustable advances long-term	225	0.46	% —	—	%
Long-term fixed rate term advances	975	1.54	% 300	1.36	%
Total	\$2,024	0.86	% \$514	0.90	%

At September 30, 2015, the Company had the authority and approval from the Federal Home Loan Bank to utilize a line of credit of up to \$7.0 billion and the Company may access that line to the extent that collateral is provided. At September 30, 2015, the Company had \$2.0 billion of advances outstanding and an additional \$1.6 billion of collateralized borrowing capacity available at Federal Home Loan Bank. The advances can be collateralized by non-delinquent single-family residential first mortgage loans, loans with government guarantees, certain other loans and investment securities. At September 30, 2015, \$225 million of the outstanding advances were adjustable rate based on the three month LIBOR index. Interest rates on these advances reset every three months and the advances may be prepaid without penalty, with notification at scheduled three month intervals after an initial 12 month lockout period.

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2015	2014	2015	2014	
	(Dollars in millions)				
Maximum outstanding at any month end	\$2,127	\$1,000	\$2,198	\$1,300	
Average outstanding balance	1,795	998	1,597	995	
Average remaining borrowing capacity	1,738	2,026	1,711	1,832	
Weighted-average interest rate	1.17	% 0.23	% 1.05	% 0.23	%

The following outlines the Company's Federal Home Loan Bank advance final maturity dates as of September 30, 2015.

	September 30, 2015 (Dollars in millions)
2015	\$824
2016	175
2017	50
2018	125
Thereafter	850
Total	\$2,024

Table of Contents

Note 10 – Long-Term Debt

The Company sponsored nine trust subsidiaries, including the consolidated VIEs, which issued trust preferred securities to third-party investors and loaned the proceeds to the Company in the form of junior subordinated notes included in long-term debt. The notes held by each trust are the sole assets of that trust. Distributions on the trust preferred securities of each trust are payable quarterly at a rate equal to the interest being earned by the trust on the notes held by these trusts.

The following table presents the carrying value on each junior subordinated note and VIE, along with the related interest rates of the long-term debt as of the dates indicated.

	September 30, 2015 (Dollars in millions)		December 31, 2014			
Trust Preferred Securities						
Floating Three Month LIBOR						
Plus 3.25%, matures 2032	\$26	3.58	%	\$26	3.50	%
Plus 3.25%, matures 2033	26	3.54	%	26	3.48	%
Plus 3.25%, matures 2033	26	3.53	%	26	3.51	%
Plus 2.00%, matures 2035	26	2.29	%	26	2.23	%
Plus 2.00%, matures 2035	26	2.29	%	26	2.23	%
Plus 1.75%, matures 2035	51	2.09	%	51	1.99	%
Plus 1.50%, matures 2035	25	1.79	%	25	1.73	%
Plus 1.45%, matures 2037	25	1.79	%	25	1.69	%
Plus 2.50%, matures 2037	16	2.84	%	16	2.74	%
Subtotal	\$247			\$247		
Notes associated with consolidated VIEs						
Floating One Month LIBOR						
Plus 0.46% (1), matures 2018 (3)	—			42		
Plus 0.16% (2), matures 2019 (4)	32			42		
Total long-term debt	\$279			\$331		

(1) The Note accrued interest at a rate equal to the least of (i) one month LIBOR plus 0.46 percent (ii) the net weighted average coupon, and (iii) 16.00 percent.

The interest rate for the notes may adjust monthly and will be subject to (i) a cap based on the weighted average of (2) the loan rates on the mortgage loans, minus the rates at which certain fees and expenses of the issuing entity are calculated and minus any required spread and adjusted for actual days and (ii) a fixed cap of 16.00 percent.

(3) In June 2015, the Company exercised a clean-up of the outstanding debt. The par value for the debt was \$43 million at December 31, 2014.

(4) The par value for the debt was \$33 million and \$45 million, respectively, at September 30, 2015 and December 31, 2014.

At September 30, 2015 and December 31, 2014 the three month LIBOR interest rate was 0.33 percent and 0.26 percent, respectively. At September 30, 2015 the one month LIBOR interest rate was 0.19 percent, compared to 0.17 percent at December 31, 2014.

Trust Preferred Securities

The trust preferred securities outstanding are callable by the Company are junior subordinated notes. The interest is payable quarterly; however, the Company may defer interest payments for up to 20 quarters without default or penalty. In January 2012, the Company exercised its contractual rights to defer interest payments with respect to trust preferred securities. The payments are periodically evaluated and will be reinstated when appropriate, subject to the

provisions of the Company's Supervisory Agreement and Consent Order. At September 30, 2015, the Company has deferred for 15 quarters and has \$26 million accrued for these deferred interest payments.

Table of Contents

Notes Associated with Consolidated VIEs

As previously discussed in Note 6 of the Notes to the Consolidated Financial Statements, herein, the Company determined it was the primary beneficiary of VIEs associated with HELOC securitizations and such VIEs proceeds from the HELOC assets are therefore consolidated in the Consolidated Financial Statements. The assets in the securitization trust are utilized to repay the outstanding debt of the securitization trust. The Company has elected the fair value option for the debt and changes in fair value are recorded to "other noninterest income" on the Consolidated Statements of Operations. Fair value is estimated using quantitative models which incorporate observable and, in some instances, unobservable inputs including security prices, interest rate yield curves, option volatility, currency, commodity or equity rates, and correlations between these inputs. The Company also considers the impact of its own observable credit spreads in the secondary bond markets in determining the discount rate used to value these liabilities. See Note 17 of the Notes to the Consolidated Financial Statements, herein, for additional recurring fair value disclosures.

The final legal maturity of the long-term debt associated with the VIE is June 2019; however, this debt agreement has a contractual provision that allows for a clean-up call of the debt when less than 10 percent of the balance remains outstanding. The Company initiated the clean-up call process with respect to the 2006-2 HELOC securitization trust, which the Company expects to complete in the fourth quarter 2015.

Note 11 - Representation and Warranty Reserve

The following table shows the activity impacting the representation and warranty reserve.

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2015	
	2014	2014	2014	2014
	(Dollars in millions)			
Balance, beginning of period	\$48	\$50	\$53	\$54
Provision				
Charged to gain on sale for current loan sales	2	2	6	5
Charged to representation and warranty reserve - change in estimate	(6) 13	(13) 16
Total	(4) 15	(7) 21
Charge-offs, net	1	(8) (1) (18
Balance, end of period	\$45	\$57	\$45	\$57

At the time a loan is sold, an estimate of the fair value of such loss associated with the mortgage loans is recorded in the representation and warranty reserve in the Consolidated Statements of Financial Condition and charged against the net gain on loan sales in the Consolidated Statements of Operations. Subsequent to the sale, the liability is re-measured on an ongoing basis based on an estimate of probable future losses. Changes in the estimate are recorded in the representation and warranty provision on the Consolidated Statements of Operations.

Note 12 – Stockholders' Equity

Preferred Stock and Other Warrants

On January 30, 2009, the Company sold to the U.S. Treasury 266,657 shares of Series C fixed rate cumulative non-convertible perpetual preferred stock ("Series C Preferred Stock") and a warrant to purchase up to approximately 1 million shares of Common Stock at an exercise price of \$62.00 per share (the "Warrant") for \$267 million. The Series C Preferred Stock qualifies as Tier 1 capital and currently pays cumulative dividends quarterly at a rate of 9

percent per annum. The Warrant is exercisable through 2019.

In 2013 the U.S. Treasury sold the Series C Preferred Stock and Warrants which are now held by unrelated third-party investors and are no longer held by the U.S. government under the TARP Capital Purchase Program. The warrants are valued utilizing the equity method.

Table of Contents

Preferred stock with a par value of \$0.01 and a liquidation value of \$1,000 and additional paid in capital attributable to preferred stock at September 30, 2015 is summarized as follows.

	Rate	Earliest Redemption Date	Shares Outstanding	Preferred Shares (Dollars in millions)	Additional Paid in Capital
Series C Preferred Stock	9.0	% 1/31/2012	266,657	\$—	\$267

At September 30, 2015, the Company has deferred \$79 million of dividend payments on the Series C Preferred Stock.

Accumulated Other Comprehensive Income (Loss)

The following table sets forth the components in accumulated other comprehensive income (loss) for investment securities available-for-sale, investment securities held-to-maturity and cash flow hedges.

	Held-to-Maturity Securities (Dollars in millions)	Available-for-Sale Securities	Cash Flow Hedges
Accumulated other comprehensive income (loss)			
Balance at December 31, 2014, net of tax	\$—	\$ 8	\$—
Net unrealized loss, net of tax	—	9	(5)
Transfer of net unrealized loss from AFS to HTM	5	(5) —
Balance at September 30, 2015, net of tax (1)	\$5	\$ 12	\$(5)
Balance at December 31, 2013, net of tax	\$—	\$(5)	\$—
Net unrealized gain, net of tax	—	4	—
Balance at September 30, 2014, net of tax (1)	\$—	\$(1)	\$—

(1) For the periods ended September 30, 2015 and 2014, there were no reclassifications out of accumulated other comprehensive income (loss) into earnings.

Table of Contents

Note 13 – Earnings (Loss) Per Share

Basic earnings (loss) per share, excluding dilution, are computed by dividing (loss) earnings available to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted (loss) earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised and converted into common stock or resulted in the issuance of common stock that could then share in the earnings of the Company.

The following table sets forth the computation of basic and diluted (loss) earnings per share of common stock.

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2015	
	2014		2014	
	(Dollars in millions, except share data)			
Net income (loss)	\$47	\$(28) \$125	\$(80
Less: preferred stock dividend/accretion	—	—	—	(1
Net income (loss) from continuing operations	47	(28) 125	(81
Deferred cumulative preferred stock dividends	(8) (7) (22) (19
Net income (loss) applicable to common stock	\$39	\$(35) \$103	\$(100
Weighted average shares				
Weighted average common shares outstanding	56,436,026	56,249,300	56,419,354	56,224,850
Effect of dilutive securities				
Warrants (1)	339,478	—	290,840	—
Stock-based awards	431,999	—	340,595	—
Weighted average diluted common shares	57,207,503	56,249,300	57,050,789	56,224,850
Earnings (loss) per common share				
Net income (loss) applicable to common stock	\$0.70	\$(0.61) \$1.82	\$(1.79
Effect of dilutive securities				
Warrants	—	—	(0.01) —
Stock-based awards	(0.01) —	(0.01) —
Diluted earnings (loss) per share	\$0.69	\$(0.61) \$1.80	\$(1.79

(1) Includes the May warrants at an exercise price of \$10.00 per share and a fair value of \$8 million at September 30, 2015.

The three and nine months ended September 30, 2014 diluted loss per share calculation excludes all common stock equivalents, including 248,089 and 273,407 shares pertaining to stock based awards, respectively, and 303,026 and 326,102 shares pertaining to warrants, respectively. The inclusion of these securities would be anti-dilutive.

Under the terms of the Series C Preferred Stock the Company may defer dividend payments. The Company elected to defer dividend payments beginning with the February 2012 dividend. Although not included in quarterly net income (loss) from continuing operations, the deferral still impacts net income (loss) applicable to common stock for the purpose of calculating earnings per share, as shown above. The cumulative amount in arrears as of September 30, 2015 is \$79 million.

Note 14 – Income Taxes

The provision for income taxes in interim periods requires the Company to make a best estimate of the effective tax rate expected to be applicable for the full year. This estimated effective tax rate is then applied to interim consolidated pre-tax operating income to determine the interim provision for income taxes.

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Table of Contents

As of each reporting date, the Company considers both positive and negative evidence including any annual limitations to the realization of the Company's net operating loss carryforwards that could impact the view with regard to realization of deferred tax assets. The Company continues to believe it is more likely than not that the benefit for federal deferred tax assets will be realized. The Company continues to believe it is more likely than not that the benefit for certain state deferred tax assets will not be realized. In recognition of this risk, the Company continues to provide a partial valuation allowance on the deferred tax assets relating to state deferred tax assets.

The Company believes that it is unlikely that the unrecognized tax benefits will change by a material amount during the next 12 months. The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense.

Note 15 — Regulatory Matters

Regulatory Capital

Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings, and other factors. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that could have a material effect on the Consolidated Financial Statements. On January 1, 2015, the Basel III rules became effective and include transition provisions through 2018. Under Basel III, Total capital consists of two tiers of capital, Tier 1 and Tier 2. Tier 1 capital is further composed of common equity Tier 1 capital and additional Tier 1 capital.

To be categorized as "well capitalized," the Company and the Bank must maintain minimum tangible capital, Tier 1 capital, common equity Tier 1, and total capital ratios as set forth in the table below. The Company and the Bank are considered "well capitalized" at both September 30, 2015 and December 31, 2014. There have been no conditions or events that management believes have changed the Company's or the Bank's category.

The following table shows the regulatory capital ratios as of the dates indicated.

Bancorp	Actual		For Capital Adequacy Purposes		Well Capitalized Under Prompt Corrective Action Provisions		
	Amount (Dollars in millions)	Ratio	Amount	Ratio	Amount	Ratio	
September 30, 2015 (1)

N/A - Not applicable

On January 1, 2015, the Basel III rules became effective, subject to transition provisions primarily related to (1) regulatory deductions and adjustments impacting common equity Tier 1 capital and Tier 1 capital. The Company and the Bank reported under Basel I (which included the Market Risk Final Rules) at December 31, 2014.

Table of Contents

Bank	Actual		For Capital Adequacy Purposes		Well Capitalized Under Prompt Corrective Action Provisions		
	Amount (Dollars in millions)	Ratio	Amount	Ratio	Amount	Ratio

Total capital (to risk-weighted assets)	1,235	23.85	% 414	8.0	% 518	10.0	%

On January 1, 2015, the Basel III rules became effective, subject to transition provisions primarily related to (1) regulatory deductions and adjustments impacting common equity Tier 1 capital and Tier 1 capital. The Company and the Bank reported under Basel I (which included the Market Risk Final Rules) at December 31, 2014.

Note 16 – Legal Proceedings, Contingencies and Commitments

Legal Proceedings

The Company and its subsidiaries are subject to various pending or threatened legal proceedings arising out of the normal course of business operations. In addition, the Bank is routinely named in civil actions throughout the country by borrowers and former borrowers relating to the origination, purchase, sale, and servicing of mortgage loans. From time to time, governmental agencies also conduct investigations or examinations of various mortgage-related practices of the Bank. In the course of such investigations or examinations, the Bank cooperates with such agencies and provides information as requested.

The Company assesses the liabilities and loss contingencies in connection with such pending or threatened legal and regulatory proceedings on at least a quarterly basis and establishes accruals when the Company believes it is probable that a loss may be incurred and that the amount of such loss can be reasonably estimated. Once established, litigation accruals are adjusted, as appropriate, in light of additional information.

Management does not believe that the amount of any reasonably possible losses in excess of any amounts accrued with respect to ongoing proceedings or any other known claims, including the matters described below, will be material to the Company's financial statements, or that the ultimate outcome of these actions will have a material adverse effect on its financial condition, results of operations or cash flows.

DOJ litigation settlement

Per the February 2012 DOJ litigation settlement, the Company is required to make future additional payments contingent upon the occurrence of certain future events. The Company elected the fair value option to account for this liability and uses a weighted average discounted cash flow model to measure fair value. The fair value of the DOJ litigation settlement liability was \$84 million and \$82 million at September 30, 2015 and December 31, 2014, respectively. The undiscounted amount of the DOJ litigation settlement liability remains at \$118 million at September 30, 2015.

At September 30, 2015 and December 31, 2014, the Company's total liability for contingent liabilities was \$85 million and \$86 million, respectively, including the legal proceedings and fair value liability relating to the DOJ litigation settlement.

Table of Contents

Commitments

A summary of the contractual amount of significant commitments is as follows.

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
Commitments to extend credit		
Mortgage loans interest-rate lock commitments	\$4,314	\$2,172
HELOC commitments	133	88
Other consumer commitments	25	7
Warehouse loan commitments	1,046	827
Standby and commercial letters of credit	14	10
Commercial and industrial commitments	297	276
Other commercial commitments	447	169

Commitments to extend credit are agreements to lend. Since many of these commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements. Commitments generally have fixed expiration dates or other termination clauses. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company, upon extension of credit is based on management's credit evaluation of the counterparties.

The Company enters into mortgage interest-rate lock commitments with its customers. These commitments are considered to be derivative instruments and changes in the fair value of these commitments are recorded in the Consolidated Statements of Financial Condition in other assets. Further discussion on derivative instruments is included in Note 8 - Derivative Financial Instruments.

The Company has unfunded commitments under its contractual arrangement with the HELOC securitization trust to fund future advances on the underlying HELOC. Refer to further discussion of this issue as presented in Note 6 of the Notes to the Consolidated Financial Statements, herein.

Other consumer commitments are conditional commitments issued to accommodate the financial needs of customers. The commitments are under various terms to lend funds to consumers, which include revolving credit agreements, term loan commitments and short-term borrowing agreements.

Warehouse loan commitments are lines of credit provided to mortgage originators to fund loans they originate and then sell. The proceeds of the sale of the loan is used to repay the draw on the line used to fund the loan.

Standby and commercial letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party, while commercial letters of credit are issued specifically to facilitate commerce and typically result in the commitment being drawn on when the underlying transaction is consummated between the customer and the third party.

Commercial and industrial and other commercial commitments are conditional commitments issued under various terms to lend funds to business and other entities. These commitments include revolving credit agreements, term loan commitments and short-term borrowing agreements. Many of these loan commitments have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of these commitments are expected to expire without being funded, the total commitment amounts do not necessarily represent future liquidity requirements.

These instruments involve, to varying degrees, elements of credit and interest rate risk beyond the amount recognized on the Consolidated Statements of Financial Condition. The Company's exposure to credit losses in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company utilizes the same credit policies in making commitments and conditional obligations as it does for balance sheet instruments. Commitments to extend credit are agreements to lend to a customer as long as there is not a violation of any condition established in the contract.

Table of Contents

The Company maintains a reserve for letters of credit which is included in other liabilities, which represents the estimate for probable credit losses inherent in unfunded commitments to extend credit. Unfunded commitments to extend credit include unfunded loans with available balances, new commitments to lend that are not yet funded, and standby and commercial letters of credit. The balance of \$2 million and \$1 million for September 30, 2015 and December 31, 2014, respectively, is reflected in other liabilities on the Consolidated Statements of Financial Condition.

Note 17 – Fair Value Measurements

The Company utilizes fair value measurements to record certain assets and liabilities at fair value.

Valuation Hierarchy

U.S. GAAP establishes a three-level valuation hierarchy for disclosure of fair value measurements. The hierarchy is based on the transparency of the inputs used in the valuation process with the highest priority given to quoted prices available in active markets and the lowest priority to unobservable inputs where no active market exists, as discussed below.

Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets in which the Company can participate as of the measurement date;

Level 2 - Quoted prices for similar instruments in active markets, and other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and

Level 3 - Unobservable inputs that reflect the Company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input within the valuation hierarchy that is significant to the overall fair value measurement. Transfers between levels of the fair value hierarchy are recognized at the end of the reporting period.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Assets

Investment securities available-for-sale. These securities are comprised of U.S. government sponsored agencies and municipal obligations. The Company measures fair value using prices obtained from pricing services. A review is performed on the security prices received from the pricing services, which includes discussion and analysis of the inputs used by the pricing services to value our securities and comparisons to independent pricing. Where possible, fair values are generated using market inputs including quoted prices (the closing price in an exchange market), bid prices (the price at which a buyer stands ready to purchase), and other market information. For fixed income securities that are not actively traded, the pricing services use alternative methods to determine fair value for the securities, including quotes for similar fixed-income securities, matrix pricing, discounted cash flow using benchmark curves or other factors to determine fair value. Investment securities are classified within level 2 of the valuation hierarchy.

Loans held-for-sale. The Company generally estimates the fair value of loans held-for-sale based on quoted market prices for securities backed by similar types of loans. Where quoted market prices were available, such market prices were utilized as estimates for fair values. Otherwise, the fair value of loans was computed by discounting cash flows

using observable inputs inclusive of interest rates, prepayment speeds and loss assumptions for similar collateral. These loans are classified as level 2.

Loans held-for-investment. Loans held-for-investment are generally recorded at amortized cost. Such loans are not recorded at fair value on a recurring basis. However, from time to time, a loan becomes impaired when it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement. Once a loan is identified as impaired, the fair value of the impaired loan is estimated using one of several methods, including collateral value less costs to sell, market value of similar debt, or discounted cash flows. The fair value of the underlying collateral is determined, where possible, using market prices derived from appraisals or market evaluations which are considered a non-recurring level 3 valuation. Fair value may also be measured using the present value of expected cash flows discounted at the loan's effective interest rate.

Table of Contents

Loans held-for-investment that are recorded at fair value on a recurring basis are loans that were previously recorded as loans held-for-sale but subsequently transferred to the held-for-investment category. As the Company elected the fair value option for the held-for-sale loans, they continue to be reported at fair value and measured consistent with the level 2 methodology for loans held-for-sale. Certain HELOC loans associated with the previous FSTAR 2005-1 and the current FSTAR 2006-2 securitization trusts have been recorded in the Consolidated Financial Statement as loans held-for-investment at fair value. The Company records these loans as a recurring level 3 valuation. Also included in loans held-for-investment are the second mortgage loans associated with the previous FSTAR 2006-1 mortgage securitization trust. The loans are carried at fair value and valued using a discounted estimated net future cash flow model and are classified within the level 3 valuation hierarchy as the model utilizes significant inputs which are unobservable. See Note 6 - Variable Interest Entities ("VIEs") for additional information.

Repossessed assets. Repossessed assets are measured and reported at fair value through a charge-off to the allowance for loan losses based upon the fair value of the repossessed asset. The fair value of repossessed assets, upon initial recognition, are estimated using level 3 inputs based on appraisals or evaluations. The significant unobservable inputs used in the level 3 fair value measurements of the Company's impaired loans and repossessed assets primarily relate to internal valuations or analysis.

Mortgage Servicing Rights ("MSRs"). The current market for MSRs is not sufficiently liquid to provide participants with quoted market prices. Therefore, the Company uses an option-adjusted spread valuation approach to determine the fair value of MSRs. This approach consists of projecting servicing cash flows under multiple interest rate scenarios and discounting these cash flows using risk-adjusted discount rates. The key assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. Management obtains third-party valuations of the MSR portfolio on a quarterly basis from independent valuation experts to assess the reasonableness of the fair value calculated by its internal valuation model. In certain circumstances, based on the probability of the completion of a sale of MSRs pursuant to a bona-fide purchase offer, the Company considers the bid price of that offer and identifiable transaction costs in comparison to the calculated fair value and may adjust the estimate of fair value to reflect the terms of the pending transaction. Due to the nature of the valuation inputs, MSRs are classified within level 3 of the valuation hierarchy.

Other investments. The fair value of the reverse repurchase agreement is determined by cost, which approximates the fair value due to its short term nature. The reverse repurchase agreement is guaranteed by a third party and secured by level 2 government and agency securities which are unobservable by the Company, which are held by a third party. In case of default, the Company would receive the collateral from the third party. The reverse repurchase agreement is included in other assets on the Consolidated Statements of Financial Condition.

Derivative financial instruments. Certain classes of derivative contracts are listed on an exchange and are actively traded, and they are therefore classified within level 1 of the valuation hierarchy. These include U.S. Treasury futures and U.S. Treasury options. The Company's forward loan sale commitments, swap futures and interest rate swaps are valued based on quoted prices for similar assets in an active market with inputs that are observable and are classified within level 2 of the valuation hierarchy. Rate lock commitments are valued using internal models with significant unobservable market parameters and therefore are classified within level 3 of the valuation hierarchy. The Company assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and determined that the credit valuation adjustments were not significant to the overall valuation of its derivatives. The derivatives are reported in either other assets or other liabilities on the Consolidated Statements of Financial Condition.

Liabilities

Warrants. Warrant liabilities are valued using a binomial lattice model and are classified within level 2 of the valuation hierarchy. Significant observable inputs include expected volatility, a risk free rate and an expected life. Warrant liabilities are reported in "other liabilities" on the Consolidated Statements of Financial Condition.

Long-term debt. The Company records the long-term debt associated with the previous FSTAR 2005-1 and the current FSTAR 2006-2 HELOC securitization trusts at fair value. The fair value of the debt is estimated using quantitative models which incorporate observable and, in some instances, unobservable inputs including security prices, interest rate yield curves, option volatility, currency, commodity or equity rates and correlations between these inputs. The Company also considers the impact of its own credit spreads in determining the discount rate used to value these liabilities. The credit spread is determined by reference to observable spreads in the secondary bond markets, which are considered to be level 3. The Company records this debt as a recurring level 3 valuation.

Litigation settlement. Upon settlement of the DOJ litigation settlement, we elected the fair value option to account for the liability representing the remaining future payments. As of September 30, 2015 the fair value totaled \$84 million, using a

Table of Contents

discount rate of 7.6 percent for which we use a discounted cash flow model to determine the current fair value. The model utilizes our forecast and considers multiple scenarios including possible outcomes that impact the timing of the additional payments which are discounted using a risk free rate adjusted for nonperformance risk that represents our credit risk. These scenarios are probability weighted and consider the view of an independent market participant to estimate the most likely fair value of the liability.

The liability is classified within level 3 of the valuation hierarchy as the projections of earnings and growth rate and other assumptions are unobservable inputs which affect the estimated timing of the cash flow payments. The Company considers factors which could affect those projections from the perspective of a market participant, which is incorporated into the assessment of fair value. The litigation settlement is included in other liabilities on the Consolidated Statements of Financial Condition and changes in the fair value of the litigation settlement will be recorded each quarter in other noninterest expense on the Consolidated Statements of Operations.

Assets and liabilities measured at fair value on a recurring basis

The following tables present the financial instruments carried at fair value as of September 30, 2015 and December 31, 2014, by caption on the Consolidated Statement of Financial Condition and by level in the valuation hierarchy (as described above).

The Company had no transfers of assets or liabilities recorded at fair value between fair value levels during the three and nine months ended September 30, 2015.

The Company utilized US Treasury future, forward agency and loan sales and interest rate swaps to manage the risk associated with mortgage servicing rights and rate lock commitments. The assets and/or liabilities transferred are valued at the end of the period. Gains and losses for individual lines in the tables do not reflect the effect of the Company's risk management activities related to such level 3 instruments.

Table of Contents

Fair value measurements using significant unobservable inputs

The tables below include a roll forward of the Consolidated Statement of Financial Condition amounts for the three and nine months ended September 30, 2015 and 2014 (including the change in fair value) for financial instruments classified by the Company within level 3 of the valuation hierarchy.

Table of Contents

The following tables present the quantitative information about recurring level 3 fair value financial instruments and the fair value measurements as of September 30, 2015 and December 31, 2014.

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
September 30, 2015 (Dollars in millions)				
Assets				
Second mortgage loans	\$45	Discounted cash flows	Discount rate Prepay rate - 12 month historical average CDR rate - 12 month historical average	7.2% - 10.8% (9.0%) 15.4% - 23.2% (19.3%) 2.6% - 3.9% (3.3%)
HELOC loans	\$80	Discounted cash flows	Loss severity on defaulted balance Weighted average discount rate	24.4% - 36.7% (30.6%) 6.9% - 10.3% (8.6%)
Mortgage servicing rights	\$294	Discounted cash flows	Option adjusted spread Constant prepayment rate Weighted average cost to service per loan	7.0% - 10.4% (8.7%) 10.8% - 15.6% (13.3%) \$59 - \$88 (\$73)
Liabilities				
Long-term debt	\$(32)	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Weighted average life Asset growth rate	7.2% - 10.8% (9.0%) 18.4% - 27.6% (23.0%) 0.2 - 0.4 (0.3) 4.4% - 6.6% (5.5%)
DOJ litigation settlement	\$(84)	Discounted cash flows	MSR growth rate Return on assets (ROA) improvement Peer group ROA	0.9% - 1.4% (1.2%) 0.02% - 0.04% (0.03%) 0.5% - 0.8% (0.7%)
Derivative financial instruments				
Rate lock commitments	\$44	Consensus pricing	Origination pull-through rate	65.3% - 97.9% (81.6%)
December 31, 2014 (Dollars in millions)				
Assets				
Second mortgage loans	\$53	Discounted cash flows	Discount rate Prepay rate - 12 month historical average CDR rate - 12 month historical average	7.2% - 10.8% (9.0%) 11.3% - 17.0% (14.2%) 2.4% - 3.6% (3.0%)
HELOC loans	\$132	Discounted cash flows	Yield Weighted average life (CPR) Weighted average life (CDR) Discount loss severity	8.0% - 12.0% (10.0%) 7.2% - 10.8% (9.0%) 6.6% - 9.9% (8.3%) 60.2% - 90.2% (75.2%)
Mortgage servicing rights	\$258	Discounted cash flows	Option adjusted spread Constant prepayment rate Weighted average cost to service	7.1% - 10.7% (8.9%) 12.2% - 17.1% (15.0%)

Liabilities			per loan	\$67 - \$88 (\$78)
Long-term debt	\$ (84)	Discounted cash flows	Discount rate	6.4% - 9.6% (8.0%)
			Prepay rate - 3 month historical average	16.0% - 24.0% (20.0%)
			Weighted average life	0.5 - 0.7 (0.6)
DOJ litigation settlement	\$ (82)	Discounted cash flows	Asset growth rate	4.4% - 6.6% (5.5%)
			MSR growth rate	0.9% - 1.4% (1.2%)
			Return on assets (ROA) improvement	0.02% - 0.04% (0.03%)
			Peer group ROA	0.5% - 0.8% (0.7%)
Derivative financial instruments				
Rate lock commitments	\$31	Consensus pricing	Origination pull-through rate	66.2% - 99.3% (82.7%)

Recurring Significant Unobservable Inputs

The significant unobservable inputs used in the fair value measurement of the second mortgage loans are discount rates, prepayment rates, and default rates. Significant increases (decreases) in the discount rate in isolation would result in a significantly lower (higher) fair value measurement. Increases in prepay rates in isolation result in a higher fair value and increases (decreases) in default rates in isolation result in a (higher) lower fair value.

At September 30, 2015, the significant unobservable inputs used in the fair value measurement of the HELOC loans are the loss severity on defaulted loans and the weighted average discount rate. For the HELOC loans, increases (decreases) in the loss severity on defaulted balance, in isolation, would result in a lower (higher) fair value measurement; increases

Table of Contents

(decreases) in the weighted average discount rate, in isolation, would lower (higher) fair value measurement. For the debt carried at fair value (liability), increases (decreases) in the discount rate in isolation would result in a lower (higher) fair value measurement; increases (decreases) in prepayment rates in isolation results in a shorter (longer) weighted average life and ultimately a higher (lower) fair value measurement. In June 2015, the Company executed a clean-up call of the FSTAR 2005-1 long-term debt associated with the HELOC securitization trust. After payment of the debt, the FSTAR 2005-1 HELOC securitization trust has been dissolved as of June 30, 2015.

The significant unobservable inputs used in the fair value measurement of the MSR's are option adjusted spreads, prepayment rates, and cost to service. Significant increases (decreases) in all three assumptions in isolation would result in a significantly lower (higher) fair value measurement.

The key economic assumptions used in determining the fair value of those MSR's capitalized during the three and nine months ended September 30, 2015 and 2014 periods were as follows.

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2015	2014	2015	2014	
Weighted-average life (in years)	7.9	7.9	7.9	8.0	
Weighted-average constant prepayment rate	11.0	% 12.0	% 11.2	% 11.8	%
Weighted-average discount rate	10.9	% 11.7	% 10.8	% 12.0	%

The key economic assumptions reflected in the overall fair value of the entire portfolio of MSR's were as follows.

	September 30, 2015	December 31, 2014	
Weighted-average life (in years)	7.1	6.6	
Weighted-average constant prepayment rate	13.3	% 15.0	%
Weighted-average discount rate	10.4	% 10.9	%

The significant unobservable input used in the fair value measurement of the rate lock commitments is the pull through rate. The pull through rate is a statistical analysis of the Company's actual rate lock fallout history to determine the sensitivity of the residential mortgage loan pipeline compared to interest rate changes and other deterministic values. New market prices are applied based on updated loan characteristics and new fallout ratios (i.e., the inverse of the pull through rate) are applied accordingly. Significant increases (decreases) in the pull through rate in isolation would result in a significantly higher (lower) fair value measurement.

The significant unobservable inputs used in the fair value measurement of the DOJ litigation settlement are future balance sheet and growth rate projections for overall asset growth, MSR growth, peer group return on assets and return on assets improvement. The current assumptions are based on management's approved, strategic performance targets beyond the current strategic modeling horizon (2015). The Bank's target asset growth rate post-2015 is based on growth in the balance sheet. Significant increases (decreases) in the Bank's growth rate in isolation could result in a significantly lower (higher) fair value measurement. Significant increases (decreases) in the Bank's MSR growth rate in isolation could result in a marginally lower (higher) fair value measurement. Significant increases (decreases) in the peer group's return on assets improvement in isolation could result in a marginally higher (lower) fair value measurement. Significant increases (decreases) in the Bank's return on assets in isolation could result in a marginally higher (lower) fair value measurement.

Table of Contents

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

The Company also has assets that under certain conditions are subject to measurement at fair value on a non-recurring basis. These assets are measured at the lower of cost or fair value and had a fair value below cost at the end of the period as summarized below.

	Level 3 (1) (Dollars in millions)
September 30, 2015	
Impaired loans held-for-investment (2)	
Residential first mortgage loans	\$36
Commercial and industrial loans	3
Repossessed assets (3)	17
Totals	\$56
December 31, 2014	
Impaired loans held-for-investment (2)	
Residential first mortgage loans	\$74
Repossessed assets (3)	19
Totals	\$93

(1) The fair values are obtained at various dates during the three months ended September 30, 2015 and December 31, 2014, respectively.

(2) The Company recorded \$20 million and \$76 million in fair value losses on impaired loans (included in provision for loan losses on Consolidated Statements of Operations) during the three and nine months ended September 30, 2015, respectively, compared to \$10 million and \$38 million in fair value losses on impaired loans during the three and nine months ended September 30, 2014, respectively.

(3) The Company recorded \$1 million and \$2 million in losses related to write downs of repossessed assets based on the estimated fair value of the specific assets during the three and nine months ended September 30, 2015, respectively, and recognized net gain of \$1 million and \$2 million on sales of repossessed assets (both write downs and net gains/losses are included in assets resolution expense on the Consolidated Statements of Operations) during the three and nine months ended September 30, 2015, respectively. The Company recorded \$2 million and \$4 million in losses related to write downs of repossessed assets based on the estimated fair value of the specific assets during the three and nine months ended September 30, 2014, respectively, and recognized net gains of \$1 million and \$4 million on sales of repossessed assets during the three and nine months ended September 30, 2014, respectively.

The following tables present the quantitative information about non-recurring level 3 fair value financial instruments and the fair value measurements as of September 30, 2015 and December 31, 2014.

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
September 30, 2015 (Dollars in millions)				
Impaired loans held-for-investment				
Residential first mortgage loans	\$36	Fair value of collateral	Loss severity discount	35% - 45% (41.4%)
Commercial and industrial loans	\$3	Fair value of collateral	Loss severity discount	40% - 50% (50.1%)
Repossessed assets	\$17	Fair value of collateral	Loss severity discount	0% - 100% (39.5%)
	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
December 31, 2014 (Dollars in millions)				
Impaired loans held-for-investment				

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Residential first mortgage loans	\$74	Fair value of collateral	Loss severity discount	35% - 47% (36.9%)
Repossessed assets	\$19	Fair value of collateral	Loss severity discount	7% - 100% (45.4%)

Non-Recurring Significant Unobservable Inputs

The significant unobservable inputs used in the fair value measurement of the impaired loans and repossessed assets are appraisals or other third-party price evaluations which incorporate measures such as recent sales prices for comparable properties.

The methods and assumptions used by the Company in estimating fair value of financial instruments which are required for disclosure only, are as follows:

Cash and cash equivalents. Due to their short-term nature, the carrying amount of cash and cash equivalents approximates fair value.

Investment securities held-to-maturity. Fair values are generated using market inputs, where possible, including quoted prices (the closing price in an exchange market), bid prices (the price at which a buyer stands ready to purchase), and other market information.

Loans with government guarantees. The fair value is estimated by using internally developed discounted cash flow models using market interest rate inputs as well as management's best estimate of spreads for similar collateral.

Loans held-for-investment. The fair value is estimated using internally developed discounted cash flow models using market interest rate inputs as well as management's best estimate of spreads for similar collateral.

45

Table of Contents

Federal Home Loan Bank stock. No secondary market exists for Federal Home Loan Bank stock. The stock is bought and sold at par by the Federal Home Loan Bank. Management believes that the recorded value equals the fair value.

Bank owned life insurance. The fair value of bank owned life insurance policies is based on the cash surrender values of the policies as reported by the insurance companies.

Other assets, foreclosure claims. The fair value of foreclosure claims with government guarantees approximates the carrying amount.

Deposit accounts. The fair value of deposits with no defined maturity is estimated based on a discounted cash flow model that incorporates current market rates for similar products and expected attrition. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for certificates of deposit with similar remaining maturities.

Federal Home Loan Bank advances. Rates currently available for debt with similar terms and remaining maturities are used to estimate the fair value of the existing debt.

Long-term debt. The fair value of the long-term debt is estimated based on a discounted cash flow model that incorporates current borrowing rates for similar types of borrowing arrangements.

Fair Value Option

The Company elected the fair value option for certain items as discussed throughout the Notes to the Consolidated Financial Statements to mitigate a divergence between accounting losses and economic exposure. Interest income on loans held-for-sale is accrued on the principal outstanding primarily using the "simple-interest" method.

The following table reflects the change in fair value included in earnings of financial instruments for which the value option has been elected.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014

(1) The Company is obligated to pay \$118 million in installment payments upon meeting certain performance conditions.

Note 18 – Segment Information

The Company's operations are conducted through four operating segments: Mortgage Originations, Mortgage Servicing, Community Banking and Other, which includes the remaining reported activities. Operating segments are defined as components of an enterprise that engage in business activity from which revenues are earned and expenses incurred for which discrete financial information is available that is evaluated regularly by executive management in deciding how to allocate resources and in assessing performance. The operating segments have been determined based on the products and services offered and reflect the manner in which financial information is currently evaluated by management. Each segment operates under the same banking charter, but is reported on a segmented basis for this report. Each of the operating segments is complementary to each other and because of the interrelationships of the segments, the information presented is not indicative of how the segments would perform if they operated as independent entities.

The Mortgage Originations segment originates, acquires and sells one-to-four family residential mortgage loans. The origination and acquisition of mortgage loans comprises the majority of the lending activity. Mortgage loans are originated through home loan centers, national call centers, the Internet and unaffiliated banks and mortgage banking and brokerage companies, where the net interest income and the gains from sales associated with these loans are recognized in the Mortgage Originations segment.

The Mortgage Servicing segment services and sub-services mortgage loans, on a fee basis, for others. Also, the Mortgage Servicing segment services, on a fee basis, residential mortgages held-for-investment by the Community Banking segment and mortgage servicing rights held by the Other segment. The Mortgage Servicing segment may also collect ancillary fees, such as late fees, and earns income through the use of noninterest-bearing escrows.

The Community Banking segment originates loans, provides deposits and fee based services to consumer, business, and mortgage lending customers through its Branch Banking, Business, and Commercial Banking, Government Banking, Warehouse Lending and Held-for-Investment Portfolio groups. Products offered through these teams include checking accounts, savings accounts, money market accounts, certificates of deposit, other services, consumer loans, commercial loans, and warehouse lines of credit. Other financial services available to consumer and commercial customers include lines of credit, revolving credit, customized treasury management solutions, equipment leasing, inventory, and accounts receivable lending and capital markets services such as interest rate risk protection products.

Table of Contents

The Other segment includes the treasury functions, funding revenue associated with stockholders' equity, the impact of interest rate risk management, the impact of balance sheet funding activities, and miscellaneous other expenses of a corporate nature. Treasury functions include administering the investment securities portfolios, balance sheet funding, interest rate risk management and MSR asset valuation, certain derivative and sales into the secondary market. In addition, the Other segment includes revenue and expenses related to treasury and corporate assets and liabilities and equity not directly assigned or allocated to the Mortgage Originations, Mortgage Servicing or Community Banking operating segments.

Revenues are comprised of net interest income (before the provision for loan losses) and noninterest income. Noninterest expenses are fully allocated to each operating segment. Allocation methodologies may be subject to periodic adjustment as the internal management accounting system is revised and the business or product lines within the segments change.

The following tables present financial information by business segment for the periods indicated.

	Three Months Ended September 30, 2015

Note 19 – Recently Issued Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." Under the amended guidance, an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The FASB has voted to approve another year deferral of the effective date from January 1, 2017 to January 1, 2019, while allowing for early adoption as of January 1, 2018. Management is currently evaluating this guidance and does not expect this guidance to have a material impact on the Company's Consolidated Financial Statements, but significant disclosures to the Notes thereto will be required.

In January 2015, the FASB issued ASU No. 2015-01, Income Statement - Extraordinary and Unusual items (Subtopic 225-20). ASU 2015-01 eliminates from U.S. GAAP the concept of extraordinary items, which, among other things, required an entity to segregate extraordinary items considered to be unusual and infrequent from the results of ordinary operations and show the item separately in the income statement, net of tax, after income from continuing operations. The ASU is effective for the annual period beginning after December 15, 2015, though early adoption is permitted. The adoption of this guidance is not expected to have a material effect on the Company's Consolidated Financial Statements or the Notes thereto.

In February 2015, the FASB issued ASU No. 2015-02, Consolidation (Topic 810) - Amendments to the Consolidation Analysis. Under the amended guidance all reporting entities are within the scope of Subtopic 810-10, Consolidation - Overall, including limited partnerships and similar legal entities, unless a scope exception applies. The presumption that a general partner controls a limited partnership has been eliminated. The ASU is effective for the annual period beginning after December 15, 2015, and all reporting periods thereafter. The adoption of this guidance is not expected to have a material effect on the Company's Consolidated Financial Statements or the Notes thereto.

Table of Contents

In April 2015, the FASB issued ASU No. 2015-03, Interest-Imputation of Interest (Subtopic 835-30). The amendments will require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The ASU is effective prospectively or retrospectively for annual and interim periods beginning after December 15, 2015. The adoption of this guidance is not expected to have a material effect on the Company's Consolidated Financial Statements or the Notes thereto.

In April 2015, the FASB issued ASU No. 2015-05, Intangibles - Goodwill and Other Internal-Use Software. The amendments in this update provide guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other licenses. If it does not include a software license, the customer should account for the arrangement as a service contract. The ASU is effective for the annual period beginning after December 15, 2015, and all reporting periods thereafter. The adoption of this guidance is not expected to have a material effect on the Company's Consolidated Financial Statements or the Notes thereto.

In May 2015, the FASB issued ASU No. 2015-07, Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share (or its equivalent). The amendments in this ASU remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient pursuant to ASC 820, Fair Value Measurement. Instead, those investments must be included as a reconciling line item so that the total fair value amount of investments in the disclosure is consistent with the amount on the balance sheet. Further, the ASU specifies that for purposes of calculating historical earnings per unit under the two-class method, the earnings (losses) of a transferred business before the date of a dropdown transaction should be allocated entirely to the general partner. ASU 2015-07 is effective for interim and annual periods beginning after December 15, 2015 and early adoption is permitted. This guidance is not expected to have a material impact on the Company's Consolidated Financial Statements or the Notes thereto.

In July 2015, the FASB issued ASU No 2015-12, Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient (consensus of the FASB Emerging Issues Task Force). Under the amendments, fully benefit-responsive investment contracts are measured, presented, and disclosed only at contract value. A plan will continue to provide disclosures that help users understand the nature and risks of fully benefit-responsive investment contracts. ASU 2015-12 is effective retrospectively for fiscal years beginning after December 15, 2015 and early adoption is permitted. This guidance is not expected to have a material impact on the Company's Consolidated Financial Statements, but disclosures to the Notes thereto will be updated per the requirements.

In September 2015, the FASB issued ASU No 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. The amendments in this ASU require that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined and in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. In addition, the amendments require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. ASU 2015-16 is effective retrospectively for fiscal years beginning after December 15, 2015 and early adoption is permitted. This guidance is not expected to have a material impact on the Company's Consolidated Financial Statements, but disclosures to the Notes thereto will be updated per the requirements.

Note 20 – Restatement of Consolidated Statements of Cash Flows

The Company reclassified the reporting of certain cash flows from operating, financing, and investing activities in the Consolidated Statements of Cash Flows for each of the quarterly periods in the year ended 2014. The primary cause of the reclassifications related to cash flows associated with our nonperforming loan sales that occurred throughout 2014, which were presented as cash flows provided by operating activities but should have been included in cash flows provided by investing activities consistent with the original balance sheet classification rather than their classification at the time of sale per ASC 230-45-12. These reclassifications have no impact on the total cash flows for the periods impacted or on the beginning or ending cash balances for any of these periods. The Company has included the comparison of the as stated and restated amounts for the period ended September 30, 2014, herein.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Where we say "we," "us," or "our," we usually mean Flagstar Bancorp, Inc. However, in some cases, a reference to "we," "us," or "our" will include our wholly owned subsidiary Flagstar Bank, FSB (the "Bank").

FORWARD – LOOKING STATEMENTS

This report contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, as amended. Forward-looking statements are based on management's current expectations and assumptions regarding the Company's business and performance, the economy and other future conditions, and forecasts of future events, circumstances and results. However, they are not guarantees of future performance and are subject to known and unknown risks, uncertainties, contingencies and other factors. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates" and variations of such words and similar expressions are intended to identify such forward-looking statements. The Company's actual results or outcomes may vary materially from those expressed or implied in a forward-looking statement. Accordingly, we cannot and do not provide you with any assurance that our expectations will in fact occur or that actual results will not differ materially from those expressed or implied by such forward-looking statements. In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by us or any other person that the results or conditions described in such statements or our objectives and plans will be achieved.

Factors that could cause future results to differ materially from historical performance and these forward-looking statements include, but are not limited to, the following items:

(1) General business and economic conditions, including unemployment rates, movements in interest rates, the slope of the yield curve, any increase in mortgage fraud and other related activity and changes in asset values in certain geographic markets, that affect us or our counterparties;

(2) Volatile interest rates and our ability to effectively hedge against them, which could affect, among other things, (i) the overall mortgage business, (ii) our ability to originate or acquire loans and to sell assets at a profit, (iii) prepayment speeds, (iv) our cost of funds and (v) investments in mortgage servicing rights;

(3) The adequacy of our allowance for loan losses and our representation and warranty reserves;

(4) Changes in accounting standards generally applicable to us and our application of such standards, including the calculation of the fair value of our assets and liabilities;

(5) Our ability to borrow funds, maintain or increase deposits or raise capital on commercially reasonable terms or at all, and our ability to achieve or maintain desired capital ratios;

(6) Changes in material factors affecting our loan portfolio, particularly our residential mortgage loans, and the market areas where our business is geographically concentrated or further loan portfolio or geographic concentration;

(7) Changes in, or expansion of, the regulation of financial services companies and government-sponsored housing enterprises, including new legislation, regulations, rulemaking and interpretive guidance, enforcement actions, the imposition of fines and other penalties by our regulators, the impact of existing laws and regulations, new or changed roles or guidelines of government-sponsored entities, changes in regulatory capital ratios, increases in deposit insurance premiums, and special assessments of the Federal Deposit Insurance Corporation;

(8)

Our ability to comply with the terms and conditions of the Supervisory Agreement with the Board of Governors of the Federal Reserve and the Bank's ability to comply with the Consent Order with the Office of Comptroller of the Currency and the Consent Order of the Consumer Financial Protection Bureau and our ability to address any further matters raised by these regulators, and other regulators or government bodies;

Our ability to comply with the terms and conditions of the agreement with the U.S. Department of Justice and the (9) impact of compliance with that agreement and our ability to accurately estimate the financial impact of that agreement, including the fair value and timing of the future payments;

Table of Contents

(10) The Bank's ability to make capital distributions and our ability to pay dividends on our capital stock or interest on our trust preferred securities;

(11) Our ability to attract and retain senior management and other qualified personnel to execute our business strategy, including our entry into new lines of business, our introduction of new products and services and management of risks relating thereto, and our competing in the mortgage loan originations, mortgage servicing and commercial and retail banking lines of business;

(12) Our ability to satisfy our mortgage servicing and subservicing obligations and manage repurchases and indemnity demands by mortgage loan purchasers, guarantors, and insurers;

(13) The outcome and cost of defending current and future legal or regulatory litigation, proceedings, or investigations;

(14) Our ability to create and maintain an effective risk management framework and effectively manage risk, including, among other things, market, interest rate, credit and liquidity risk, including risks relating to the cyclicity and seasonality of our mortgage banking business, litigation and regulatory risk, operational risk, counterparty risk, and reputational risk;

(15) The control by, and influence of, the fund that is our majority stockholder, and any changes that may occur with respect to that fund or its ownership interest in us;

(16) A failure of, interruption in or cybersecurity attack on our network or computer systems, which could impact our ability to properly collect, process, and maintain personal data, ensure ongoing mortgage and banking operations, or maintain system integrity with respect to funds settlement; and

(17) Factors that may require us to establish a valuation allowance against our deferred tax asset or that impact our ability to maximize the tax benefit of our net operating losses.

Factors that may cause future results to differ materially from historical performance and from forward-looking statements, including but not limited to the factors listed above, may be difficult to predict, may contain uncertainties that materially affect actual results, and may be beyond our control. Also, new factors emerge from time to time, and it is not possible for our management to predict the occurrence of all such factors or to assess the effect of each such factor, or the combined effect of several of the factors at one time, on our business. Any forward-looking statement speaks only as of the date on which it is made. Except to fulfill our obligations under the U.S. securities laws, we undertake no obligation to update any such statement to reflect events or circumstances after the date on which it is made.

Please also refer to Item 1A to Part I of our Annual Report on Form 10-K for the year ended December 31, 2014 and Item 1A to Part II of this Quarterly Report on Form 10-Q, which are incorporated by reference herein, for further information on these and other factors affecting us.

General

We are a Michigan-based savings and loan holding company founded in 1993. Our business is primarily conducted through our principal subsidiary, the Bank, a federally chartered stock savings bank founded in 1987. At September 30, 2015, based on our assets, we are the largest bank headquartered in Michigan and one of the top 10 largest savings banks in the United States. Our common stock is listed on the New York Stock Exchange ("NYSE") under the symbol "FBC." We are considered a controlled company for NYSE purposes, because MP Thrift Investments, L.P. ("MP Thrift") held approximately 63.1 percent of our common stock as of September 30, 2015.

We primarily originate or purchase residential mortgage loans throughout the country and sell them into securitization pools, primarily to Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac") and the Government National Mortgage Association ("Ginnie Mae") (collectively, the "Agencies") or as whole loans. In addition, we originate or purchase residential first mortgage loans, consumer loans, commercial loans and warehouse loans included in held-for-investment loan portfolios. Our revenues include net interest income, income from services we provide customers, and noninterest income from sales of residential first mortgage loans to the Agencies, the servicing of loans for others and the sale of servicing rights related to mortgage loans serviced for others. The combination of our home lending, broker and correspondent channels gives us broad access to customers across diverse geographies to originate, fulfill, sell and service our residential mortgage loan products.

The majority of our total loan originations during the nine months ended September 30, 2015 represented mortgage loans that were collateralized by residential mortgages on single-family residences and were eligible for sale to the Agencies. At September 30, 2015, we originated or purchased residential mortgage loans in all 50 states, the U.S. Virgin Islands, and the District of Columbia through relationships with approximately 517 mortgage brokers and approximately 679 correspondents. At September 30, 2015, we also operated 14 retail centers located in 10 states, which primarily originate one-to-four family residential mortgage loans as part of our Mortgage Originations segment.

We also originate or purchase mortgage loans through referrals from our branches, consumer direct call center and our website, flagstar.com. At September 30, 2015, we operated 99 branches in Michigan. Through our branches, we gather deposits and offer a line of consumer and commercial financial products and services to individuals and businesses. We also gather deposits on a nationwide basis through our banking group, and provide deposit and cash management services to governmental units on a relationship basis. We leverage our branches and Internet banking to cross-sell products to existing customers and increase our customer base.

At September 30, 2015, we had 2,677 full-time equivalent employees inclusive of account executives and loan officers.

Table of Contents

Critical Accounting Policies

Various elements of our accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. Certain accounting policies that, due to the judgment, estimates and assumptions inherent in those policies are critical to an understanding of our Consolidated Financial Statements, in Item 1. Financial Statements herein. These policies relate to: (a) fair value measurements; (b) the determination of our allowance for loan losses; and (c) the determination of our representation and warranty reserve. We believe the judgment, estimates and assumptions used in the preparation of our Consolidated Financial Statements and the Notes, in Item 1., are appropriate given the factual circumstances at the time. However, given the sensitivity of our Consolidated Financial Statements and the Notes, in Item 1., herein, to these critical accounting policies, the use of other judgments, estimates and assumptions could result in material differences in our results of operations and/or financial condition. For further information on our critical accounting policies, please refer to our Annual Report on Form 10-K for the year ended December 31, 2014, which is available on our website, flagstar.com, under the Investor Relations section, or on the website of the Securities and Exchange Commission, at sec.gov.

Net interest income increased \$26 million for the nine months ended September 30, 2015, compared to the same period in 2014, primarily due to growth in interest-earning assets.

Provision for loan losses improved by \$145 million for the nine months ended September 30, 2015, compared to the same period in 2014, primarily driven by the two changes in estimates, which occurred in the first quarter 2014: the evaluation of current data related to the loss emergence period on our residential mortgage loan portfolio and the evaluation of the enhanced risk associated with payment resets relating to interest-only loans. Also impacting this variance was a release of reserves previously associated with the sale or transfer of interest-only residential first mortgage loans, non-performing loans and troubled debt restructured first mortgage loans during the nine months ended September 30, 2015.

Noninterest income increased \$110 million for the nine months ended September 30, 2015, compared to the same period in 2014, primarily due to a \$90 million increase in net gain on loan sales and a benefit in the representation and warranty provision.

Noninterest expense decreased \$32 million for the nine months ended September 30, 2015, compared to the same period in 2014, primarily due to lower asset resolution expense resulting from a decline in levels of lower quality assets and a decrease in legal expenses as the CFPB settlement occurred in 2014. These variances were partially offset by an increase in loan processing expense due to an increase in loan originations.

Income tax provision increased \$108 million for the nine months ended September 30, 2015, compared to the same period in 2014, which was primarily due to higher taxable income.

Net Interest Income

Net interest income is the amount we earn on the average balances of our interest-earning assets, less the amount we incur on the average balances of our interest-bearing liabilities. Interest income recorded on loans is reduced by the amortization of net premiums and net deferred loan origination costs.

Comparison to Prior Year Quarter

Net interest income increased \$9 million to \$73 million for the three months ended September 30, 2015, compared to \$64 million for the three months ended September 30, 2014, primarily due to growth in interest-earning assets,

partially offset by a decrease in the net interest margin.

Our net interest margin for the three months ended September 30, 2015 was 2.75 percent, compared to 2.91 percent for the three months ended September 30, 2014. The decrease was driven primarily by the impact of match-funding our long-duration asset growth, partially offset by increased interest income resulting from higher quality loans held-for-investment.

Table of Contents

Interest income increased \$16 million for the three months ended September 30, 2015 to \$91 million, compared to \$75 million during the three months ended September 30, 2014, primarily driven by growth in interest-earning assets. Average loans held-for-investment totaled \$5.4 billion for the three months ended September 30, 2015, increasing \$1.3 billion or 32.4 percent compared to the three months ended September 30, 2014. We realized growth in warehouse, HELOC loans and residential first mortgage loans. Average warehouse loans increased \$385 million for the three months ended September 30, 2015 to \$936 million, compared to \$551 million for the three months ended September 30, 2014, primarily due to higher line utilization and new accounts. Average HELOC loans increased \$292 million for the three months ended September 30, 2015 to \$411 million, compared to \$119 million for the three months ended September 30, 2014, resulting from the acquisitions of loan portfolios in the first and second quarter 2015. Average residential first mortgage loans increased \$0.5 billion for the three months ended September 30, 2015 to \$2.8 billion, compared to \$2.3 billion for the three months ended September 30, 2014, primarily due to retained loan production.

Interest expense increased \$7 million for the three months ended September 30, 2015 to \$18 million, compared to \$11 million for the three months ended September 30, 2014, primarily due to Federal Home Loan Bank advances. Average Federal Home Loan Bank advances were \$1.8 billion for the three months ended September 30, 2015 an increase of \$0.8 billion compared to the three months ended September 30, 2014, primarily to match-fund our long-duration asset growth. Average interest-bearing deposits were \$6.3 billion during the three months ended September 30, 2015, increasing \$0.5 billion or 8.4 percent, compared to the three months ended September 30, 2014, led by higher demand and savings deposits.

Comparison to Prior Year to Date

Net interest income increased \$26 million to \$211 million for the nine months ended September 30, 2015, compared to \$185 million for the nine months ended September 30, 2014, primarily due to growth in interest-earning assets, partially offset by a decrease in the net interest margin.

Our net interest margin for the nine months ended September 30, 2015 was 2.76 percent, compared to 2.95 percent for the nine months ended September 30, 2014. The decrease was driven primarily by the impact of match-funding our long-duration asset growth.

Interest income increased \$47 million for the nine months ended September 30, 2015 to \$260 million, compared to \$213 million during the nine months ended September 30, 2014, primarily driven by higher average loan balances and investment securities. Average loans held-for-investment totaled \$4.9 billion for the nine months ended September 30, 2015, increasing \$0.9 billion or 23.5 percent compared to the nine months ended September 30, 2014. We realized solid growth in warehouse, HELOC loans and commercial and industrial loans. Average warehouse loans increased \$430 million for the nine months ended September 30, 2015 to \$844 million, compared to \$414 million for the nine months ended September 30, 2014, primarily due to higher line utilization and new accounts. Average HELOC loans increased \$208 million for the nine months ended September 30, 2015 to \$330 million, compared to \$122 million for the nine months ended September 30, 2014, resulting from the acquisitions of loan portfolios in 2015. Average commercial and industrial loans increased \$131 million for the nine months ended September 30, 2015 to \$429 million, compared to \$298 million for the nine months ended September 30, 2014.

Interest expense increased \$21 million for the nine months ended September 30, 2015 to \$49 million, compared to \$28 million for the nine months ended September 30, 2014, primarily due to Federal Home Loan Bank advances and interest-bearing deposits. Average interest-bearing deposits were \$6.1 billion during the nine months ended September 30, 2015, increasing \$0.6 billion or 11.7 percent, compared to the nine months ended September 30, 2014. Retail deposits increased \$0.5 billion, led by growth in savings deposits. Average Federal Home Loan Bank advances were \$1.6 billion for the nine months ended September 30, 2015 an increase of \$0.6 billion compared to the nine

months ended September 30, 2014, primarily to match-fund our long-duration asset growth.

Rate/Volume Analysis

The following tables present the dollar amount of changes in interest income and interest expense for the components of interest-earning assets and interest-bearing liabilities that are presented in the preceding table. The table below distinguishes between the changes related to average outstanding balances (changes in volume while holding the initial rate constant) and the changes related to average interest rates (changes in average rates while holding the initial balance constant). The rate/volume variances are allocated to variances due to rate.

	Three Months Ended September 30, 2015 Versus 2014 Increase (Decrease)

(2) Commercial loans include commercial real estate, commercial and industrial, and warehouse lending.

Provision for Loan Losses

Comparison to Prior Year Quarter

The benefit from loan losses was \$1 million for the three months ended September 30, 2015, an improvement from the provision of \$8 million for the three months ended September 30, 2014. During the three months ended September 30, 2015, the benefit for loan losses included a net reduction in the allowance for loan losses relating to loan transfers to held-for-sale and sales, which included a net reduction in the allowance relating to interest-only residential first mortgage loan transfers, partially offset by an increase in provision related to an increase in the average loans held-for-investment loan portfolio.

Net charge-offs for the three months ended September 30, 2015 increased to \$24 million, compared to \$13 million for the three months ended September 30, 2014, primarily due to the charge-off of allowance related to loans sold or transferred during the three months ended September 30, 2015. As a percentage of the average loans held-for-investment, annualized net charge-offs for the three months ended September 30, 2015 increased to 1.84 percent from 1.36 percent for the three months ended September 30, 2014. During the three months ended September 30, 2015, the annualized net charge-offs as a percentage of the average loans held-for-investment were

0.61 percent, excluding the charge-offs related to the loan sales or transfers of \$16 million, compared to an annualized net charge-offs as a percentage of the average loans held-for-investment of 0.70 percent, excluding the charge-offs related to the loan sales of \$6 million during the three months ended September 30, 2014.

Comparison to Prior Year to Date

The benefit for loan losses was \$18 million for the nine months ended September 30, 2015, an improvement from the provision of \$127 million for the nine months ended September 30, 2014, primarily driven by the two changes in estimates, which occurred in the first quarter 2014: the evaluation of current data related to the loss emergence period on our residential

Table of Contents

mortgage loan portfolio and the evaluation of the enhanced risk associated with payment resets relating to interest-only loans. Also impacting this variance was a release of reserves previously associated with the sale or transfer of interest-only residential first mortgage loans, non-performing loans and troubled debt restructured first mortgage loans during the nine months ended September 30, 2015, partially offset by an increase related to the growth in average loans held-for-investment loan portfolio.

Net charge-offs for the nine months ended September 30, 2015 totaled \$82 million, compared to \$33 million for the nine months ended September 30, 2014. The increase was primarily due to the charge-off of allowance relating to loans sold or transferred during the nine months ended September 30, 2015. As a percentage of the average loans held-for-investment, annualized net charge-offs for the nine months ended September 30, 2015 increased to 2.34 percent from 1.17 percent for the nine months ended September 30, 2014. During the nine months ended September 30, 2015 and 2014, the annualized net charge-offs as a percentage of the average loans held-for-investment were 0.43 percent and 0.87 percent, respectively, excluding the charge-offs related to the loan sales or transfers of \$67 million and \$8 million, respectively.

See the section captioned "Allowance for Loan Losses" in this discussion for further analysis of the provision (benefit) for loan losses.

Noninterest Income

The following table sets forth the components of our noninterest income.

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2015	2014	2015	2014	
	(Dollars in millions)				
Net gain on loan sales	\$68	\$52	\$242	\$152	
Loan fees and charges	17	19	53	56	
Deposit fees and charges	7	6	19	16	
Loan administration income	8	6	19	19	
Net return on mortgage servicing asset	12	1	19	22	
Net gain (loss) on sale of assets	1	5	(1) 11	
Representation and warranty benefit (provision)	6	(13) 13	(16)
Other noninterest income	9	9	9	3	
Total noninterest income	\$128	\$85	\$373	\$263	

Comparison to Prior Year Quarter

Total noninterest income was \$128 million during the three months ended September 30, 2015, which was a \$43 million increase from \$85 million of noninterest income during the three months ended September 30, 2014. The increase during the three months ended September 30, 2015, was primarily due to the representation and warranty benefit (provision), higher net gain on loan sales and an increase in net return on mortgage servicing asset, partially offset by a decrease in net gain on sale of assets.

Net gain on loan sales increased \$16 million to \$68 million during the three months ended September 30, 2015, compared to \$52 million for the three months ended September 30, 2014. The increase in gain on loan sales was primarily due to higher fallout adjusted lock volume and improved gain on loan sale margins, driven by stronger market pricing. The net gain on loan sale margin increased 22 basis points to 1.05 percent during the three months ended September 30, 2015, compared to 0.83 percent for the three months ended September 30, 2014. For the three months ended September 30, 2015, the fallout-adjusted mortgage rate lock commitments increased to \$6.5 billion,

compared to \$6.3 billion in the three months ended September 30, 2014, led by an increase in refinance activity driven by lower mortgage interest rates.

Net return on mortgage servicing asset increased \$11 million to \$12 million for the three months ended September 30, 2015, compared to \$1 million during the three months ended September 30, 2014. The increase was primarily due to an increase in the mortgage servicing asset and a benefit from collections of contingencies held back by the purchaser relating to MSR sales in prior periods, partially offset by the net impact of market-driven changes in the position.

Table of Contents

Net gain on sale of assets decreased \$4 million to \$1 million during the three months ended September 30, 2015, compared to income of \$5 million for the three months ended September 30, 2014. The decrease in gain on sale of assets was primarily due to the 2014 loan sales.

Representation and warranty provision improved \$19 million to a benefit of \$6 million for the three months ended September 30, 2015, compared to a loss of \$13 million during the three months ended September 30, 2014. The change was primarily due to the provision in the three months ended September 30, 2014 resulting from an increase in the number of claims expected on government loans for which we had previously executed indemnification agreements. The remaining improvement is primarily due to lower net charge-offs driven by sustained reductions in the volume of repurchased loans.

Comparison to Prior Year to Date

Total noninterest income was \$373 million during the nine months ended September 30, 2015, which was a \$110 million increase from \$263 million of noninterest income during the nine months ended September 30, 2014. The increase during the nine months ended September 30, 2015, was led by higher net gain on loan sales and lower representation and warranty provision, partially offset by a decrease in net gain on sale of assets.

Net gain on loan sales increased \$90 million to \$242 million during the nine months ended September 30, 2015, compared to \$152 million for the nine months ended September 30, 2014. The increase in gain on loan sales was primarily due to higher fallout-adjusted lock volume and improved gain on loan sale margins, driven by stronger market pricing. For the nine months ended September 30, 2015, the fallout-adjusted mortgage rate lock commitments increased to \$20.5 billion, compared to \$17.9 billion in the nine months ended September 30, 2014, primarily due to higher refinance activity, higher origination volumes, and improved margins.

Net return on mortgage servicing asset decreased \$3 million to \$19 million for the nine months ended September 30, 2015, compared to income of \$22 million during the nine months ended September 30, 2014. The decrease was primarily a result of increased prepayments resulting from lower interest rates, partially offset by an increase in the mortgage servicing asset and a benefit from collections of contingencies held back by the purchaser relating to MSR sales in prior periods.

Net (loss) gain on sale of assets decreased \$12 million to a loss of \$1 million during the nine months ended September 30, 2015, compared to a gain of \$11 million for the nine months ended September 30, 2014. The decrease in net (loss) gain on sale of assets was primarily due to loan sales in the nine months ended September 30, 2014 and the write down of land assets to be sold during the nine months ended September 30, 2015.

Representation and warranty provision improved \$29 million to a benefit of \$13 million for the nine months ended September 30, 2015, compared to a loss of \$16 million during the nine months ended September 30, 2014. The change was primarily due to the provision in the nine months ended September 30, 2014 resulting from an increase in the number of claims expected on government loans for which we had previously executed indemnification agreements. The remaining improvement is primarily due to lower net charge-offs driven by sustained reductions in the volume of repurchased loans.

Other noninterest income increased \$6 million to \$9 million during the nine months ended September 30, 2015, compared to \$3 million during the nine months ended September 30, 2014. The improvement was primarily due to the first quarter 2014 adjustment of \$21 million to the carrying value of loans that had been repurchased which were performing at the time of repurchase, partially offset by a change in the fair value related to loans carried under the fair value option and a net gain on investment securities available-for-sale during the nine months ended September 30, 2014.

Table of Contents

The following table provides information on our net gain on loan sales reported in our consolidated financial statements and loans sold within the period.

	Three Months Ended					
	September 30, 2015	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014	
	(Dollars in millions)					
Net gain on loan sales	\$68	\$83	\$91	\$53	\$52	
Mortgage rate lock commitments (gross)	\$8,025	\$8,400	\$9,035	\$7,605	\$7,713	
Loans sold and securitized	\$7,318	\$7,571	\$6,254	\$6,831	\$7,072	
Mortgage rate lock commitments (fallout-adjusted) (1)	\$6,495	\$6,804	\$7,185	\$6,156	\$6,304	
Net margin on mortgage rate lock commitments (fallout-adjusted) (1)	1.05	% 1.21	% 1.27	% 0.87	% 0.83	%

(1) Fallout-adjusted locks are mortgage rate lock commitments (gross) which are adjusted for estimated mortgage loans in the pipeline that are not expected to close.

Noninterest Expense

The following table sets forth the components of our noninterest expense.

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2015	2014	2015	2014	
	(Dollars in millions)				
Compensation and benefits	\$58	\$54	\$178	\$174	
Commissions	10	10	31	26	
Occupancy and equipment	20	20	60	60	
Asset resolution	—	14	13	43	
Federal insurance premiums	6	6	18	17	
Loan processing expense	14	10	40	26	
Legal and professional expense	10	15	27	40	
Other noninterest expense	13	50	40	53	
Total noninterest expense	\$131	\$179	\$407	\$439	
Efficiency ratio	65.0	% 120.0	% 69.6	% 98.3	%

Comparison to Prior Year Quarter

Total noninterest expense was \$131 million during the three months ended September 30, 2015, which was a \$48 million decrease from \$179 million of noninterest expense during the three months ended September 30, 2014. The decrease during the three months ended September 30, 2015, was primarily due to decreases related to the 2014 CFPB settlement and asset resolution expense, partially offset by an increase in compensation and benefits and loan processing expense.

The \$4 million increase in compensation and benefits expense for the three months ended September 30, 2015, compared to the three months ended September 30, 2014, was primarily due to a higher performance-related compensation, partially offset by a decrease in health benefits expense. Our full-time equivalent employees decreased

from 2,725 at September 30, 2014 to 2,677 at September 30, 2015.

Asset resolution expenses decreased \$14 million during the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to the positive impact from carrying lower levels of default loans, including early buyout mortgage loans.

During the three months ended September 30, 2015, loan processing expense increased \$4 million to \$14 million, compared to \$10 million for the three months ended September 30, 2014, primarily due to higher loan originations.

Table of Contents

During the three months ended September 30, 2015, legal and professional expenses decreased \$5 million to \$10 million, compared to \$15 million for the three months ended September 30, 2014, primarily due to a decrease in litigation expenses and consulting fees.

During the three months ended September 30, 2015, other noninterest expense decreased \$37 million to \$13 million, compared to \$50 million for the three months ended September 30, 2014, primarily due to the \$38 million CFPB settlement and penalties that occurred in 2014.

Comparison to Prior Year to Date

Total noninterest expense was \$407 million during the nine months ended September 30, 2015, which was a \$32 million decrease from \$439 million of noninterest expense during the nine months ended September 30, 2014. The decrease during the nine months ended September 30, 2015, was primarily due to a decrease in asset resolution expense and expenses related to the CFPB settlement, offset by increases in compensation and benefits, commissions, and loan processing expense.

Compensation and benefits was \$178 million during the nine ended September 30, 2015, which was a \$4 million increase from the nine months ended September 30, 2014, primarily due to an increase in performance-related compensation. Our full-time equivalent employees decreased from 2,725 at September 30, 2014 to 2,677 at September 30, 2015.

Commission expense, is a variable cost associated with loan originations. Commissions increased \$5 million to \$31 million during the nine months ended September 30, 2015, compared to \$26 million in the nine months ended September 30, 2014, primarily due to an increase in the volume of loan originations. Loan originations increased to \$23.9 billion for the nine months ended September 30, 2015 from \$18.4 billion in the nine months ended September 30, 2014.

Asset resolution expenses decreased \$30 million to \$13 million during the nine months ended September 30, 2015, compared to \$43 million in the nine months ended September 30, 2014, primarily due to the positive impact from carrying lower levels of default loans, including early buyout mortgage loans.

During the nine months ended September 30, 2015, loan processing expense increased \$14 million to \$40 million, compared to \$26 million for the nine months ended September 30, 2014, primarily due to an increase in the volume of loan originations.

During the nine months ended September 30, 2015, legal and professional expenses decreased \$13 million to \$27 million, compared to \$40 million for the nine months ended September 30, 2014, primarily due to a decrease in legal fees resulting from fewer litigation expenses and a reduction in consulting fees.

During the nine months ended September 30, 2015, other noninterest expense decreased \$13 million to \$40 million, compared to \$53 million for the nine months ended September 30, 2014, primarily due to a decrease of expenses related to the CFPB settlement, lower advertising costs and regulatory-related expense, partially offset by an increase associated with our outstanding warrants due to a higher stock price.

Provision for Income Taxes

Our provision for income taxes for the three and nine months ended September 30, 2015 was \$24 million and \$70 million, respectively, compared to a benefit of \$10 million and a benefit of \$38 million during the three and nine months ended September 30, 2014, respectively. The Company's effective tax rate for the three and nine months ended

September 30, 2015 was an effective tax provision rate of 34.4 percent and 36.0 percent, respectively, compared to a benefit rate of (27.2) percent and a benefit rate of (32.3) percent for the three and nine months ended September 30, 2014, respectively. The effective rate for the three and nine months ended September 30, 2015 differs from the combined federal and state statutory tax rate due to the recognition of research and development tax credits and tax exempt income.

See Note 14 of the Notes to the Consolidated Financial Statements.

Table of Contents

OPERATING SEGMENTS

Overview

For detail on each segment's objectives, strategies, and priorities, please read this section in conjunction with Note 18 of the Notes to Consolidated Financial Statements, herein, for a full understanding of our consolidated financial performance.

The net income (loss) by operating segment is presented in the following table.

	Three Months Ended September 30, 2015		2014		Nine Months Ended September 30, 2015		2014	
	(Dollars in millions)

Other	(13)	11		(62)	61	
Total net income (loss)	\$47		\$(28)	\$125		\$(80)

Mortgage Originations

Our Mortgage Originations segment originates, acquires and sells one-to-four family residential mortgage loans. We sell the residential mortgage loans we produce into the secondary market on a whole loan basis or by securitizing the loans into mortgage-backed securities with the agencies. During 2014 and continuing into 2015, we remained one of the country's leading mortgage loan originators. We utilize production channels to originate or acquire mortgage loans and each production channel originates mortgage loan products which are underwritten to the same standards. We expect to continue to leverage technology to streamline the mortgage origination process with enhance compliance and quality controls, thereby bringing service and convenience to loan officers, brokers and correspondents. We also continue to make available to our customers various Web-based tools that facilitate the mortgage loan origination process through each of our production channels. Brokers and correspondents are able to register and lock loans, check the status of inventory, deliver documents in electronic format, generate closing documents, and request funds through the Internet.

Correspondent. In a correspondent transaction, an unaffiliated bank or mortgage company completes the loan paperwork and also supplies the funding for the loan at closing. Underwriting may be performed by the correspondent (delegated) or may be performed by us (nondelegated). After the bank or mortgage company has funded the transaction, we purchase the loan at a market price. We do not acquire loans from correspondents on a bulk basis without prior review. Instead, we perform a review of each loan, purchasing only those that were originated in accordance with our underwriting guidelines. We have active correspondent relationships with approximately 679 companies, including banks, credit unions and mortgage companies located in all 50 states.

Broker. In a broker transaction, an unaffiliated bank or mortgage brokerage company completes several steps of the loan origination process including the loan paperwork, but the loans are underwritten on a loan-level basis to our underwriting standards, and we supply the funding for the loan at closing (also known as "table funding") thereby becoming the lender of record. Currently, we have active broker relationships with approximately 517 banks, credit unions and mortgage brokerage companies located in all 50 states.

Home Lending. In a home lending transaction, loans are originated through a network of stand-alone home loan centers, as well as referrals from our Community Banking segment and the national direct-to-consumer call center.

When loans are originated on a retail basis, most aspects of the lending process are completed internally including the origination documentation (inclusive of customer disclosures) as well as the funding of the transactions. At September 30, 2015, we maintained 14 loan origination centers (including four in Michigan and ten outside of Michigan). At the same time, our centralized loan processing provides efficiencies and allows lending sales staff to focus on originations.

Table of Contents

As of September 30, 2015, we ranked in the top 10 mortgage lenders nationwide based on our residential first mortgage loan originations. The following tables disclose residential first mortgage loan originations by channel, type and mix for each respective period.

	Three Months Ended				
	September 30, 2015	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014

Other noninterest expense	(15) (29) (57) (68)
Net income	\$56	\$15	\$200	\$69	
Average balances					
Total loans held-for-sale	\$2,179	\$1,590	\$2,052	\$1,407	
Total assets	2,337	1,747	2,194	1,559	

Comparison to Prior Year Quarter

The Mortgage Originations segment net income increased \$41 million to \$56 million during the three months ended September 30, 2015, compared to \$15 million in the three months ended September 30, 2014, primarily due to an increase in net gain on loan sales and a decrease in other noninterest expense.

Net interest income increased to \$19 million for the three months ended September 30, 2015, compared to \$16 million for the three months ended September 30, 2014, primarily due to higher average balances of loans held-for-sale driven by an increase in mortgage loan origination volume.

The increase in net gain on loan sales during the three months ended September 30, 2015, compared to the three months ended September 30, 2014 was primarily due to improved gain on sale margins and higher fallout-adjusted rate lock volume. Other noninterest income increased to a loss of \$3 million for the three months ended September 30, 2015, compared to a loss of \$8 million for the three months ended September 30, 2014. During the three months ended September 30, 2014, we

70

Table of Contents

had an increase in provision as a result of an increase in the number of claims expected on government loans for which we had previously executed indemnification agreements.

Other noninterest expense decreased during the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to the CFPB settlement and penalties that occurred in 2014 and lower consulting expenses.

Comparison to Prior Year to Date

The Mortgage Originations segment net income increased \$131 million to \$200 million during the nine months ended September 30, 2015, compared to \$69 million in the nine months ended September 30, 2014. This increase was primarily due to an increase in net gain on loans sales as a result of higher fallout adjusted rate lock volume and higher lock margin.

Net interest income increased to \$54 million for the nine months ended September 30, 2015, compared to \$42 million for the nine months ended September 30, 2014, primarily due to higher average balances of loans held-for-sale driven by an increase in loan origination volume.

The increase in net gain on loan sales during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014 was primarily due to higher fallout-adjusted lock volume and improved gain on sales margins. Loan fees and charges increased to \$47 million for the nine months ended September 30, 2015, compared to \$38 million for the nine months ended September 30, 2014, primarily due to higher mortgage origination volume. Other noninterest income increased \$8 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to a 2014 adjustment to the carrying value of loans that had been repurchased which were performing at the time of repurchase.

Commission expense increased \$7 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014. Loan processing expense increased \$4 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014. Both commission expense and loan processing expense increased as a result of higher loan origination volume. Other noninterest expense decreased \$11 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to the benefit relating to the DOJ liability recorded during the nine months ended September 30, 2014 resulting from the exercise of a subjective contractual provision outside of our control which changed the estimated timing of payments.

Mortgage Servicing

The Mortgage Servicing segment services and sub-services mortgage loans on a fee basis for others. The Mortgage Servicing segment services residential mortgages held-for-investment by the Community Banking segment and mortgage servicing rights held by the Other segment.

71

Comparison to Prior Year Quarter

The Mortgage Servicing segment reported a net loss of \$10 million for the three months ended September 30, 2015, compared to a net loss of \$55 million for the three months ended September 30, 2014, primarily due to decreases relating to the 2014 CFPB settlement expense and an improvement in representation and warranty benefit.

Loan administration income improved \$3 million for the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to higher income from loans serviced for others. Representation and warranty provision improved \$12 million for the three months ended September 30, 2015, compared to the three months ended September 30, 2014. This was primarily due to an increase in the number of claims expected on government loans for which we had previously executed indemnification agreements during the three months ended September 30, 2014. The remaining improvement is primarily due to lower net charge-offs driven by sustained reductions in the volume of repurchased loans.

Asset resolution expense decreased \$13 million for the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to the positive impact from carrying lower levels of default loans, including early buyout mortgage loans. Loan processing expense increased \$3 million for the three months ended September 30, 2015 to \$7 million, compared to a net loss of \$4 million during the three months ended September 30, 2014, primarily attributable to higher expenses on loans subserviced for others. Other noninterest expense decreased to \$28 million for the three months ended September 30, 2015, compared to \$51 million for the three months ended September 30, 2014, primarily due to expenses relating to the CFPB settlement recorded in the prior year quarter.

Servicing of residential mortgage loans for third parties generates fee income and represents a significant business activity. We had a total average balance of serviced mortgage loans of \$27.0 billion for the three months ended September 30, 2015 and \$27.5 billion for the three months ended September 30, 2014, which generated net income from servicing of \$12 million and \$1 million, respectively, which increased primarily due to higher income on loans serviced for others. We had a total average balance of subserviced mortgage loans of \$42.5 billion for the three months ended September 30, 2015 and \$43.8 billion for the three months ended September 30, 2014, which generated net income on subservicing of \$8 million and \$6 million, respectively, which increased primarily from the default rate in loans subserviced for others.

Comparison to Prior Year to Date

The Mortgage Servicing segment reported a net loss of \$42 million for the nine months ended September 30, 2015, compared to a net loss of \$79 million for the nine months ended September 30, 2014, primarily due to a decrease in asset resolution, an increase in representation and warranty benefit and a decrease in the expenses related to the 2014 CFPB settlement, partially offset by an increase in loan processing expense.

Net interest income decreased to \$11 million for the nine months ended September 30, 2015, compared to \$17 million for the nine months ended September 30, 2014, primarily due to lower average balances of loans with government guarantees resulting from lower volumes of repurchases and higher volume of claims filed.

Representation and warranty provision improved \$22 million for the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to the provision in the nine months ended September 30, 2014 resulting from an increase in the number of claims expected on government loans for which we had previously executed indemnification agreements. The remaining improvement was primarily due to lower net charge-offs driven by sustained reductions in the volume of repurchased loans. Other noninterest income decreased to \$9 million for the nine months ended September 30, 2015, compared to \$16 million for the nine months ended September 30, 2014, primarily due to a benefit from a contract renegotiation achieved in 2014.

Asset resolution expense decreased \$29 million for the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to the positive impact from carrying lower levels of default loans, including early buyout mortgage loans, higher recoveries on modified loans with government guarantees and includes a benefit of an FHA indemnification release. Loan processing expense increased \$10 million for the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily attributable to higher expenses on loans subserviced for others. Other noninterest expense decreased to \$66 million for the nine months ended September 30, 2015, compared to \$75 million for the nine months ended September 30, 2014, primarily due to the 2014 CFPB settlement and the benefit relating to the DOJ liability estimate recorded in 2014.

Servicing of residential mortgage loans for third parties generates fee income and represents a significant business activity. At September 30, 2015 and December 31, 2014, we serviced portfolios of mortgage loans of \$26.3 billion and \$25.4

billion, respectively. We had a total average balance of serviced mortgage loans of \$26.5 billion for the nine months ended September 30, 2015 and \$26.8 billion for the nine months ended September 30, 2014, which generated net income from servicing of \$19 million and \$22 million, respectively, which increased primarily due to income from loans serviced for others.

At September 30, 2015 and December 31, 2014, we subserviced portfolios of mortgage loans of \$42.3 billion and \$46.7 billion, respectively. We had a total average balance of subserviced mortgage loans of \$43.9 billion for the nine months ended September 30, 2015 and \$42.6 billion for the nine months ended September 30, 2014, which generated net income on subservicing of \$19 million and \$19 million, respectively.

The following table presents the unpaid principal balance (net of write downs) of residential loans serviced and the number of accounts associated with those loans.

	September 30, 2015		December 31, 2014	
	Amount	Number of accounts	Amount	Number of accounts
	(Dollars in millions)			
Residential loan servicing				
Serviced for own loan portfolio (1)	\$5,707	29,764	\$4,521	26,268
Serviced for others	26,306	118,702	25,427	117,881
Subserviced for others (2)	42,282	220,648	46,724	238,498
Total residential loans serviced (2)	\$74,295	369,114	\$76,672	382,647

(1) Includes loans held-for-investment (residential first mortgage, second mortgage, and HELOC), loans held-for-sale (residential first mortgage), loans with government guarantees and repossessed assets.

(2) Does not include temporary short-term subservicing performed as a result of sales of servicing-released mortgage servicing rights. Includes repossessed assets.

Community Banking

Our Community Banking segment consists primarily of four groups: Branch Banking, Commercial and Business Banking, Warehouse Lending and Mortgage Held-for-Investment Portfolio. The groups within the Community Banking segment originate consumer loans, commercial loans and warehouse loans; accept consumer, business, and governmental deposits; and offer investment and insurance services, liquidity management products, and capital markets services. The liquidity management products include customized treasury management solutions and international wire services. Capital market services that allow for risk mitigation are offered through interest rate derivative products. At September 30, 2015, Branch Banking included 99 branches located throughout Michigan. Commercial and Business Banking includes relationship and portfolio managers throughout Michigan's major markets. Warehouse Lending offers lines of credit to other mortgage lenders nationally, allowing those lenders to fund the closing of residential first mortgage loans.

Table of Contents

Comparison to Prior Year Quarter

During the three months ended September 30, 2015, the Community Banking segment reported net income of \$14 million, compared to a net income of \$1 million for the three months ended September 30, 2014, primarily due to an improvement in the provision for loan losses and an increase in net interest income, partially offset by a decrease in other noninterest income.

Net interest income increased \$6 million during the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to growth in average loans held-for-investment, partially offset by a decrease in the net interest margin.

The provision for loan losses improved to a benefit of \$1 million during the three months ended September 30, 2015, compared to a provision of \$8 million for the three months ended September 30, 2014, primarily driven by the two changes in estimates, which occurred in the first quarter 2014: the evaluation of current data related to the loss emergence period on our residential mortgage loan portfolio and the evaluation of the enhanced risk associated with payment resets relating to interest-only loans. Also impacting this variance was a release of reserves previously associated with the transfer of interest-only residential first mortgage loans during the three months ended September 30, 2015, partially offset by an increase related to the growth in average loans held-for-investment loan portfolio.

All other noninterest income accounts decreased \$6 million during the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to loan origination costs related to an increase in mortgage originations resulting from an increase in loans held-for-investment as we continue to grow our balance sheet.

Comparison to Prior Year to Date

During the nine months ended September 30, 2015, the Community Banking segment reported net income of \$29 million, compared to a loss of \$131 million for the nine months ended September 30, 2014, primarily due to an improvement in provision for loan losses and an increase in net interest income.

Net interest income increased \$15 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to higher average loans held-for-investment balances.

The provision for loan losses improved to a benefit of \$18 million during the nine months ended September 30, 2015, compared to a provision of \$127 million during the nine months ended September 30, 2014. For the nine months ended September 30, 2015, the benefit for loan losses included a net reduction in the allowance for loan losses relating to several loan sales and transfers, including a net reduction in the allowance relating to interest-only residential first mortgage loans, partially offset by an increase related to the growth in average loans held-for-investment loan portfolio. The provision for the nine months ended September 30, 2014 was primarily driven by two changes in estimates: the evaluation of current data related to the loss emergence period and the evaluation of the enhanced risk associated with payment resets relating to the interest-only loans.

Deposit fees and charges increased \$3 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to higher debit card revenue. All other noninterest income accounts decreased \$7 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to fair value adjustments on loans held-for-investment, purchased commitments and loan costs related to an increase in loan originations.

Compensation and benefits was \$36 million during the nine ended September 30, 2015, which was a \$7 million decrease from the nine months ended September 30, 2014, primarily due to a decrease in our full-time equivalent employees.

Other

The Other segment includes treasury functions, income and expense impact of equity and cash, the effect of eliminations of transactions between segments, tax benefits not assigned to specific operating segments, the funding revenue associated with stockholders' equity, and miscellaneous other expenses of a corporate nature. The treasury functions include administering the investment portfolio, balance sheet funding, interest rate risk management and MSR asset valuation, certain derivatives and sales into the secondary market.

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Net interest income	\$6	\$4	\$20	\$15
Loan administration (expense) income	(3) (2) (11) (8
Net return on mortgage servicing asset	13	1	19	22
Other noninterest (loss) income	1	4	(2) 11
Noninterest expense	(6) (6) (18) (17
Income before taxes	11	1	8	23
Provision (benefit) for income taxes	24	(10) 70	(38
Net (loss) income	\$(13) \$11	\$(62) \$61
Average balances				
Total investment securities	\$2,358	\$1,465	\$2,296	\$1,272
Total assets	3,772	3,143	3,712	2,913

Net interest income includes interest on the investment securities portfolios, debt, and the net impact of derivatives used to manage interest rate sensitivity. Noninterest income includes servicing fees from MSR net of a loan administration fee to the Mortgage Servicing segment to service the loan and the impact of hedging (see Note 11 of the Notes to the Consolidated Financial Statements, herein, for additional information regarding MSRs), gains or losses on the sale of MSRs, trading asset gains or losses and other treasury related items. Noninterest income also includes insurance income and miscellaneous fee income not allocated to other operating segments. Noninterest expense includes treasury operating expenses, certain corporate administrative and other miscellaneous expenses not allocated to other operating segments. The provision for income taxes is not allocated to the operating segments.

Comparison to Prior Year Quarter

For the three months ended September 30, 2015, the Other segment net income decreased by \$23 million, compared to the three months ended September 30, 2014. The decrease was primarily due to an increase provision for income taxes, partially offset by an increase in net return on mortgage servicing asset.

Net interest income increased by \$2 million for the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to growth in investment securities portfolios, partially offset by higher Federal Home Loan Bank advances as we lengthened the duration of liabilities in 2015.

Net return on mortgage servicing asset increased \$12 million for the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to reduced transaction costs, higher service fee income and the three months ended September 30, 2015 benefited from collections of contingencies held back by the purchaser relating to MSA sales in prior periods. These benefits were partially offset in the current quarter by the net impact of market-driven changes in the position.

Provision for income taxes increased \$34 million for the three months ended September 30, 2015, compared to the three months ended September 30, 2014, primarily due to primarily due to higher taxable income.

We had MSR bulk sales of \$6.7 billion of loans serviced for others during the three months ended September 30, 2015. We incurred \$3 million of net transaction costs on the sale of our MSRs during the three months ended September 30, 2015, which is included in net return on mortgage servicing asset on the Consolidated Statements of Operations.

Comparison to Prior Year to Date

For the nine months ended September 30, 2015, the Other segment net income decreased by \$123 million, compared to the nine months ended September 30, 2014, primarily due to an increase in the provision for income taxes and a decrease in other noninterest income.

Table of Contents

Net interest income increased by \$5 million for the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to a higher average investment securities portfolios, partially offset by a higher average balance in Federal Home Loan Bank advances as we lengthened the duration of liabilities in 2015.

Loan administration income decreased by \$3 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to charges attributable to higher prepayments in the mortgage servicing portfolio. Net return on mortgage servicing asset decreased \$3 million during the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, resulting from higher prepayment speeds related to elevated mortgage refinance volumes and a net hedge loss related to an increase in market implied volatility. Other noninterest income decreased \$13 million for the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to the change in estimate of the fair value loans.

Provision for income taxes increased \$108 million for the nine months ended September 30, 2015, compared to the nine months ended September 30, 2014, primarily due to higher taxable income.

We had MSR bulk sales of \$13.9 billion of loans serviced for others during the nine months ended September 30, 2015. We incurred a loss of \$5 million of net transaction costs on the sale of our MSRs during the nine months ended September 30, 2015, which is included in net return on mortgage servicing asset on the Consolidated Statements of Operations.

Table of Contents

RISK MANAGEMENT

Like all financial services companies, we engage in business activities and assume the related risks. The risks we are subject to in the normal course of business, include, but are not limited to, credit, regulatory compliance, legal, reputation, liquidity, market, operational and strategic. Our risk management activities are focused on ensuring we properly identify, measure, and manage such risks across the entire enterprise to maintain safety and soundness and maximize profitability. We hold capital to protect from the risk of unexpected loss.

A comprehensive discussion of risk management and capital matters affecting us can be found in the Risk Factors section included in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014. Some of the more significant processes used to manage and control credit, liquidity, market, operational, and capital risks are described in the following paragraphs.

Credit Risk

Credit risk is the risk of loss to us arising from an obligor's inability or failure to meet contractual payment or performance terms. Like other financial services institutions, we make loans, extend credit, purchase securities, and enter into financial derivative contracts, all of which have related credit risk. The majority of our credit risk is associated with lending activities, as the acceptance and management of credit risk is central to profitable lending.

Loans held-for-investment

Loans held-for-investment increased from \$4.4 billion at December 31, 2014, to \$5.5 billion at September 30, 2015, primarily due to increases in warehouse, residential first mortgage and HELOC loans. Warehouse loans increased \$242 million, primarily led by higher line utilization and new accounts. Further, this was due to an increase in residential first mortgage loans as we retained certain residential first mortgage loan production on the balance sheet and to an increase in HELOC loans primarily due to purchases of HELOC loans during 2015.

Loans held-for-investment include \$132 million and \$211 million of loans accounted for under the fair value option at September 30, 2015 and December 31, 2014, respectively.

For information relating to the concentration of credit of our loans held-for-investment, see Note 5 of the Notes to the Consolidated Financial Statements, herein.

Residential first mortgage loans. We offer various types of fixed and adjustable rate loans for non-conforming loan amounts for the purpose of purchasing or refinancing owner occupied and second home properties. Our underwriting guidelines were designed with the intent to minimize layered risk, and meet the Ability to Repay. The LTV requirements vary depending on occupancy, property type, loan amount, and FICO. Loans with LTVs exceeding 80 percent are required to obtain mortgage insurance. We generally originate loans that meet accepted secondary market underwriting standards. We also originate adjustable rate mortgage ("ARM"), fixed rate mortgage, and high cost area mortgage loans held-for-investment using Fannie Mae and Freddie Mac guidelines. The debt-to-income ratio and documentation requirements were determined by the automated underwriting system.

At September 30, 2015, the largest geographic concentrations of our residential first mortgage loans in our held-for-investment portfolio were in California, Florida, and Michigan, which represented 59.5 percent of such loans outstanding.

Table of Contents

The following table identifies our held-for-investment residential mortgages by major category, at September 30, 2015 and December 31, 2014.

	Unpaid Principal Balance (1)	Average Note Rate	Average Original FICO Score	Average Current FICO Score (2)	Weighted Average Maturity (months)	Average Original LTV Ratio	Housing Price Index LTV, as recalculated (3)

(1) Unpaid principal balance, net of write downs, does not include premiums or discounts.

(2) Current FICO scores obtained at various times during the nine months ended September 30, 2015.

(3) The HPI LTV is updated from the original LTV based on Metropolitan Statistical Area-level OFHEO data as of June 30, 2015.

(4) Includes only those loans that are currently in the interest-only phase of repayment. Loans originated as interest-only that are now amortizing are included in amortizing loans.

(5) Primarily Option ARMs.

Adjustable-rate mortgage loans. Adjustable rate mortgage ("ARM") loans held-for-investment were originated using Fannie Mae and Freddie Mac guidelines as a base framework, and the debt-to-income ratio guidelines and documentation typically followed the automated underwriting system guidelines. Our underwriting guidelines were designed with the intent to minimize layered risk. The maximum ratios allowable for purposes of both the LTV ratio and the combined loan-to-value ("CLTV") ratio, which includes second mortgages on the same collateral, was 95 percent, but subordinate (or second mortgage) financing was not allowed over a 95 percent LTV ratio. At a 95 percent LTV ratio with private mortgage insurance, the minimum acceptable FICO score, or the "floor," was 620, and at lower LTV ratio levels, the FICO floor was also 620.

Set forth below as of September 30, 2015, are the amounts of the ARM loans in our held-for-investment loan portfolio with interest rate reset dates in the periods noted. As noted in the above table, loans may reset more than once over a three-year period and nonperforming loans do not reset while in the nonperforming status. Accordingly, the table below may include the same loans in more than one period.

1 st Quarter	2 nd Quarter	3 rd Quarter	4 th Quarter
(Dollars in millions)			

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

2015 (1)	N/A	N/A	N/A	\$134
2016	\$143	\$151	\$154	146
2017	147	155	156	148
Later years (2)	345	591	882	703

(1) Reflect loans that have reset through September 30, 2015.

(2) Later years reflect one reset period per loan.

Table of Contents

Second mortgage loans. The majority of second mortgages we currently originate were closed in conjunction with the closing of the residential first mortgages originated by us. We generally required the same levels of documentation and ratios as with our residential first mortgages. Our current allowable debt-to-income ratio for approval of second mortgages is capped at 43 percent. We currently limit the maximum CLTV to 80 percent and FICO scores to a minimum of 680. Current fixed rate loans are available with terms up to 15 years. The second mortgage loans require full documentation and are underwritten and priced to ensure high credit quality and loan profitability.

Home Equity Line of Credit loans. Current HELOC guidelines and pricing parameters have been established to attract higher credit quality loans with long-term profitability. The minimum FICO is 680, maximum CLTV up to 89 percent, and the maximum debt-to-income ratio is 43 percent. HELOCs are adjustable-rate, interest-only home equity line of credit loans generally with a 10-year, interest-only draw period followed by a 20-year amortizing period.

We also offer HELOC loans for a term period of five to 15 years to repay. The minimum FICO is 680, maximum CLTV up to 89 percent, and the maximum debt-to-income ratio is 43 percent.

Set forth below is a table describing the characteristics of the interest-only mortgage loans in our held-for-investment portfolio at September 30, 2015, by year of origination.

Year of Origination	2005 and Prior	2006	2007	2008 to 2012	Post 2013	Total / Weighted Average

(2) Current FICO scores obtained at various times during the nine months ended September 30, 2015.

(3) The HPI LTV is updated from the original LTV based on Metropolitan Statistical Area-level OFHEO data as of June 30, 2015.

We sold or transferred approximately \$600 million of interest-only mortgage loans from our held-for-investment portfolio during the nine months ended September 30, 2015 as part of a concerted effort to de-risk our balance sheet and reduce the costs associated with nonperforming and higher risk assets.

Set forth below is a table describing the amortization date and payment shock of interest-only mortgage loans at the dates indicated in our held-for-investment mortgage portfolio at September 30, 2015.

	2015	2016	2017	2018	Thereafter	Total / Weighted Average

Table of Contents

Commercial loans held-for-investment. During the nine months ended September 30, 2015, we have continued to grow our commercial loan portfolio. Our Commercial and Business Banking group includes relationships with relationship managers throughout Michigan's major markets. Our commercial loans held-for-investment totaled \$2.2 billion at September 30, 2015 and \$1.8 billion at December 31, 2014. The portfolio consists of three loan types: commercial real estate, commercial and industrial, and warehouse loans, each of which is discussed in more detail below.

The following table identifies the commercial loans held-for-investment portfolio by loan type and selected criteria at September 30, 2015 and December 31, 2014.

Table of Contents

Commercial real estate loans. Our commercial real estate held-for-investment loan portfolio is comprised of loans that are collateralized by real estate properties intended to be income-producing in the normal course of business.

The following table discloses our total unpaid principal balance (net of write downs) of commercial real estate held-for-investment loans by geographic concentration and collateral type at September 30, 2015.

Collateral Type	State			Total (1)	
	Michigan	California	Other

Percent	88.3	% 3.9	% 7.8	% 100.0	%

(1) Unpaid principal balance, net of write downs, does not include premiums or discounts.

Commercial and industrial loans. Commercial and industrial held-for-investment loan facilities typically include lines of credit and term loans to small or middle market businesses for use in normal business operations to finance working capital needs, equipment purchases, and expansion projects.

Warehouse lending. We also offer warehouse lines of credit to other mortgage lenders. These allow the lender to fund the closing of residential first mortgage loans. Each extension or draw-down on the line is collateralized by the residential first mortgage loans being funded. Underlying mortgage loans are predominately originated using agencies' underwriting standards. We believe we are increasing market share in warehouse, as our operating model has fundamentally changed. Where once we were the primary purchaser of loans funded by our warehouse lending, now, loans purchased by other investors represent the majority of our fundings. These lines of credit are, in most cases, personally guaranteed by one or more principal officers of the borrower. The aggregate committed amount of adjustable rate warehouse lines of credit granted to other mortgage lenders at September 30, 2015 was \$2.1 billion, of which \$1.0 billion was outstanding, compared to \$1.6 billion committed at December 31, 2014, of which \$0.8 billion was outstanding.

Credit Quality

Management considers a number of qualitative and quantitative factors in assessing the level of its allowance for loan losses. See the section captioned "Allowance for Loan Losses" in this discussion. As illustrated in the following tables, trends in certain credit quality characteristics such as nonperforming loans and past due statistics have recently stabilized or even begun to show signs of improvement. This is predominantly a result of the nonperforming and TDR loan sales, as well as run off of the legacy portfolios and the addition of new loans with strong credit characteristics to the held-for-investment portfolio.

Table of Contents

The following table sets forth certain information about our nonperforming assets as of the end of each of the last five quarters.

NONPERFORMING LOANS AND ASSETS

	September 30, 2015	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014

Ratio of nonperforming assets to loans held-for-investment and repossessed assets	1.45	% 1.55	% 2.15	% 3.12	% 3.18	%

(1) Does not include nonperforming loans held-for-sale of \$14 million, \$14 million, \$19 million, \$15 million and \$15 million at September 30, 2015, June 30, 2015, December 31, 2014 and September 30, 2014, respectively.

(2) Excludes loans carried under the fair value option.

Past due loans held-for-investment

For all classes within the consumer and commercial loan portfolio, loans are placed on nonaccrual status when any portion of principal or interest is 90 days past due (or nonperforming), or earlier when we become aware of information indicating that collection of principal and interest is in doubt. When a loan is placed on nonaccrual status, the accrued interest income is reversed. Loans return to accrual status when principal and interest become current and are anticipated to be fully collectible. At September 30, 2015, we had \$84 million of loans held-for-investment that were determined to be past due loans. Of those past due loans, \$63 million of loans were nonperforming held-for-investment. At December 31, 2014, we had \$164 million of loans held-for-investment that were determined to be past due loans. Of those past due loans, \$120 million of loans were nonperforming. The decrease from December 31, 2014 to September 30, 2015 was primarily due to the sale of nonperforming residential first mortgage loans.

Consumer loans. As of September 30, 2015, nonperforming consumer loans decreased from December 31, 2014, primarily due to the sale of nonperforming residential first mortgage loans. Net charge-offs in consumer loans totaled \$21 million and \$81 million for the three and nine months ended September 30, 2015, respectively, compared to \$13 million and \$34 million for the three and nine months ended September 30, 2014, respectively. The increase was primarily due to charge-offs related to the sale of nonperforming residential first mortgage loans.

Table of Contents

The following table sets forth information regarding past due loans at the dates listed.

Days Past Due	September 30, 2015	December 31, 2014
	(Dollars in millions)	
30 – 59 days		
Consumer loans		
Residential first mortgage	\$8	\$29
Second mortgage	1	1
HELOC	4	4
Total 30-59 days past due	13	34
60 – 89 days		
Consumer loans		
Residential first mortgage	5	8
Second mortgage	—	1
HELOC	3	1
Total 60-89 days past due	8	10
90 days or greater		
Consumer loans		
Residential first mortgage	51	115
Second mortgage	1	2
HELOC	7	3
Other	1	—
Commercial loans		
Commercial and industrial	3	—
Total 90 days or greater past due (1) (2)	63	120
Total past due loans	\$84	\$164

(1) Includes loans carried under the fair value option of \$9 million and \$5 million at September 30, 2015 and December 31, 2014, respectively.

(2) Includes performing nonaccrual loans that are less than 90 days delinquent and for which interest can not be accrued.

The \$79 million decrease in total past due loans at September 30, 2015, compared to December 31, 2014 was primarily driven by the sale of \$411 million unpaid principal balance of lower performing loans during the nine months ended September 30, 2015. The 30 to 59 days past due loans decreased to \$13 million at September 30, 2015, compared to \$34 million at December 31, 2014, primarily driven by improved asset quality, the sale of nonperforming loans and growth in higher quality residential mortgage loans.

Table of Contents

The following table sets forth information regarding nonperforming loans (i.e., greater than 90 days past due loans) as to which we have ceased accruing interest.

	September 30, 2015		As a % of Loan Specified Portfolio	As a % of Nonaccrual Loans	
	Loans Held-for-Investment	Nonaccrual Loans

Total loans held-for-investment, net	\$5,317				

(1) Includes \$9 million of nonaccrual loans carried under the fair value option at September 30, 2015.

Troubled debt restructurings (held-for-investment)

Troubled debt restructurings ("TDRs") are modified loans in which a borrower demonstrates financial difficulties and for which a concession has been granted. The decrease in our total TDR loans at September 30, 2015, compared to December 31, 2014 was primarily due to TDR loan sales. Nonperforming TDRs were 41.6 percent and 37.9 percent of total nonperforming loans at September 30, 2015 and December 31, 2014, respectively.

Nonperforming TDRs are included in nonaccrual loans and performing TDRs are excluded from nonaccrual loans because it is reasonably assured that all contractual principal and interest due under the restructured terms will be collected. Within consumer nonperforming loans, residential first mortgage TDRs were 39.7 percent of residential first mortgage nonperforming loans at September 30, 2015, compared to 37.5 percent at December 31, 2014. The level of modifications that was determined to be TDRs in these portfolios is expected to result in elevated nonperforming loan levels for longer periods because nonperforming TDRs remain in nonperforming status until a borrower has made at least six consecutive months of payments under the modified terms or ultimate resolution occurs. TDRs primarily reflect our loss mitigation efforts to proactively work with borrowers having difficulty making their payments.

	TDRs Held-for-Investment		
	Performing	Nonperforming	Total
	(Dollars in millions)		
September 30, 2015			
Consumer loans (1)	\$97	\$26	\$123

Commercial loans (2)	1	—	1
Total TDRs	\$362	\$46	\$408

Consumer loans include: residential first mortgage, second mortgage, HELOC and other consumer loans. The (1) allowance for loan losses on consumer TDR loans totaled \$16 million and \$81 million at September 30, 2015 and December 31, 2014, respectively.

(2) Commercial loans include: commercial real estate, commercial and industrial and warehouse loans.

85

Table of Contents

The \$285 million decrease in TDRs loans at September 30, 2015, compared to December 31, 2014 was primarily due to the sale of TDR loans during the nine months ended September 30, 2015.

The following table sets forth the activity during each of the periods presented with respect to performing TDRs and nonperforming TDRs.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
(Dollars in millions)

Ending balance	\$26	\$35	\$26	\$35

(1) Includes loans paid in full or otherwise settled, sold or charged-off.

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses that are inherent in our loans held-for-investment portfolio but which have not yet been realized. The consumer loan portfolio includes residential first mortgages, second mortgages, HELOC, and other consumer loans. The commercial loan portfolio includes commercial real estate, commercial and industrial and warehouse lending. See Note 5 to the Consolidated Financial Statements for additional information.

The allowance for loan losses decreased to \$197 million at September 30, 2015 from \$297 million at December 31, 2014. The decrease from December 31, 2014 was primarily attributable to the reduction of reserves relating to the residential first mortgage loans which were sold or transferred, partially offset by growth in the average loan held-for-investment loan portfolio.

The allowance for loan losses as a percentage of loans held-for-investment decreased to 3.66 percent as of September 30, 2015 from 7.01 percent as of December 31, 2014, primarily as a result of the sale or transfer of interest-only residential first mortgage loans, nonperforming loans and troubled debt restructured first mortgage loans and the continued growth of higher quality assets, such as our warehouse loans where credit risks are low. At September 30, 2015, we had a 5.2 percent allowance coverage of our consumer loan portfolio, consistent with the decrease in consumer past due loans and fewer lower quality assets. The commercial loan allowance for loan losses coverage ratio was 1.4 percent at September 30, 2015, reflecting the strong credit quality of this portfolio and growth in warehouse loans during the nine month ended September 30, 2015.

The allowance for loan losses is considered adequate based upon management's assessment of relevant factors, including the types and amounts of nonperforming loans, historical and current loss experience, and the current

economic environment.

86

Table of Contents

The following tables set forth certain information regarding the allocation of our allowance for loan losses to each loan category.

	September 30, 2015			Percentage to	
	Loans	Percent	Allowance	Total

(1) Excludes loans carried under the fair value option.

Excludes charge-offs of \$16 million and \$6 million related to the sale or transfer of loans during the three months (2) ended September 30, 2015 and September 30, 2014, respectively, and \$67 million and \$8 million related to the sale or transfer of loans during the nine months ended September 30, 2015 and September 30, 2014, respectively.

Liquidity Risk

Liquidity risk is the risk that we will not have sufficient funds to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to meet loan requests, to accommodate possible outflows in deposits and to take advantage of interest rate and market opportunities. The ability of a financial institution to meet current financial obligations is a function of the balance sheet structure, the ability to liquidate assets, and access to various sources of funds.

We primarily originate agency-eligible loans held-for-sale and therefore the majority of new residential first mortgage loan originations are readily convertible to cash, either by selling them as part of our monthly agency sales, private party whole loan sales, or by pledging them to the Federal Home Loan Bank of Indianapolis and borrowing against them. We use the Federal Home Loan Bank of Indianapolis as a significant source for funding our residential

mortgage banking business due to its flexibility in terms of being able to borrow or repay borrowings as daily cash needs require.

The amount we can borrow, or the value we receive for the assets pledged to our liquidity providers, varies based on the amount and type of pledged collateral as well as the perceived market value of the assets and the "haircut" off the market

88

Table of Contents

value of the assets. That value is sensitive to the pricing and policies of our liquidity providers and can change with little or no notice.

Our principal uses of funds include loan originations and operating expenses. At September 30, 2015, we had outstanding interest-rate lock commitments to lend \$4.3 billion in mortgage loans, compared to \$2.2 billion at December 31, 2014. These commitments may expire without being drawn upon and therefore, do not necessarily represent future cash requirements. Total commitments totaled \$6.3 billion at September 30, 2015 and \$3.5 billion at December 31, 2014.

Our cash flows relate primarily to cash outflows to originate loans held-for-investment and held-for-sale, cash inflows when those loans held-for-sale are sold, cash flows related to our servicing business, interest income, interest expense, and operating expenses.

Our Consolidated Statements of Cash Flows shows cash used in operating activities of \$7.1 billion and \$6.0 billion for the nine months ended September 30, 2015 and 2014, respectively. This primarily reflects the mortgage operations and is a reflection of the manner in which we execute certain loan sales for which the cash outflow is included in operating activities and the corresponding cash inflow is included in the investing section.

As governed and defined by our internal liquidity policy, we maintain excess liquid assets and unused collateralized borrowing capacity at sufficient levels to cover unexpected liquidity needs. Each business day, we forecast 90 days of daily cash needs. This allows us to determine our projected near term daily cash fluctuations and also to plan and adjust, if necessary, future activities. As a result, in an adverse environment, we would be able to make adjustments to operations as required to meet the liquidity needs of our business, including adjusting deposit rates to increase deposits, planning for additional Federal Home Loan Bank borrowings, accelerating sales of loans held-for-sale (agencies and/or private), selling loans held-for-investment or securities, borrowing through the use of repurchase agreements, reducing originations, making changes to warehouse funding facilities, or borrowing from the discount window.

Deposits

Our deposits consist of three primary categories: retail deposits, government deposits, and company controlled deposits. Total deposits increased \$1.1 billion, or 15.1 percent at September 30, 2015, compared to December 31, 2014.

We have continued to focus on increasing our core deposit accounts such as branch and commercial demand deposits, savings and money market accounts. These core deposits provide a lower cost funding source to the Bank. During the nine months ended September 30, 2015 our core deposits increased \$286 million, due primarily to our promotional campaign to increase our retail savings accounts.

We call on local governmental agencies and other public units as an additional funding source. These deposit accounts include \$372 million of certificates of deposit with maturities typically less than one year and \$835 million in checking and savings accounts at September 30, 2015.

Company controlled deposits arise due to our servicing of loans for others and represent the portion of the investor custodial accounts on deposit with the Bank. These deposits do not bear interest, but these deposits require us to reimburse the owner for the spread on these funds. This cost is a component of net loan administration income. During the nine months ended September 30, 2015 these deposits increased \$493 million.

We participate in the Certificates of Deposit Account Registry Service ("CDARS") program, through which certain customer certificates of deposit ("CDs") are exchanged for CDs of similar amounts from other participating banks. This gives customers the potential to receive FDIC insurance up to \$50 million. At September 30, 2015, we had \$314 million of total CDs enrolled in the CDARS program.

Table of Contents

The composition of our deposits was as follows:

	September 30, 2015 (Dollars in millions)			December 31, 2014				
	Balance	Yield/Rate	% of Deposits	Balance	Yield/Rate	% of Deposits		
Retail deposits								
Branch retail deposits								
Demand deposit accounts	\$746	0.07	% 9.2	% \$726	0.08	% 10.3	%	
Savings accounts	3,671	0.84	% 45.1	% 3,428	0.72	% 48.5	%	
Money market demand accounts	176	0.15	% 2.2	% 209	0.15	% 3.0	%	
Certificates of deposit/CDARS (1)	799	0.82	% 9.8	% 807	0.65	% 11.4	%	
Total branch retail deposits	5,392	0.71	% 66.3	% 5,170	0.60	% 73.1	%	
Commercial retail deposits								
Demand deposit accounts	\$149	0.38	% 1.8	% \$133	0.01	% 1.9	%	
Savings accounts	32	0.56	% 0.4	% 27	0.35	% 0.4	%	
Money market demand accounts	75	0.76	% 0.9	% 43	0.60	% 0.6	%	
Certificates of deposit/CDARS (1)	14	1.03	% 0.2	% 5	0.29	% 0.1	%	
Total commercial retail deposits	270	0.54	% 3.3	% 208	0.18	% 3.0	%	
Total retail deposits subtotal	\$5,662	0.73	% 69.6	% \$5,378	0.59	% 76.1	%	
Government deposits								
Demand deposit accounts	\$367	0.39	% 4.5	% \$246	0.38	% 3.5	%	
Savings accounts	468	0.52	% 5.8	% 317	0.52	% 4.5	%	
Certificates of deposit/CDARS (1)	372	0.54	% 4.6	% 355	0.43	% 5.0	%	
Total government deposits (2)	1,207	0.49	% 14.8	% 918	0.45	% 13.0	%	
Company controlled deposits (3)	1,267	—	% 15.6	% 773	—	% 10.9	%	
Total deposits (4)	\$8,136	0.58	% 100.0	% \$7,069	0.50	% 100.0	%	

(1) The aggregate amount of certificates of deposit with a minimum denomination of \$100,000 was approximately \$0.8 billion at both September 30, 2015 and December 31, 2014, respectively.

(2) Government deposits include funds from municipalities and schools.

(3) These accounts represent a portion of the investor custodial accounts and escrows controlled by us in connection with loans serviced, or subserviced for others and that have been placed on deposit with the Bank.

(4) The aggregate amount of deposits with a balance over \$250,000 was approximately \$3.3 billion and \$2.6 billion at September 30, 2015 and December 31, 2014, respectively.

Borrowings

The Federal Home Loan Bank provides loans, also referred to as advances, on a fully collateralized basis, to savings banks and other member financial institutions. We are currently authorized through a resolution of our board of directors to apply for advances from the Federal Home Loan Bank using approved loan types as collateral. At September 30, 2015, we had the authority and approval from the Federal Home Loan Bank to utilize a line of credit of up to \$7.0 billion and we may access that line to the extent that collateral is provided. At September 30, 2015, we had \$2.0 billion of advances outstanding and an additional \$1.6 billion of collateralized borrowing capacity available at Federal Home Loan Bank.

We have arrangements with the Federal Reserve Bank of Chicago to borrow as appropriate from its discount window. The discount window is a borrowing facility that is intended to be used only for short-term liquidity needs arising

from special or unusual circumstances. The amount we are allowed to borrow is based on the lendable value of the collateral that we provide. To collateralize the line, we pledge commercial and industrial loans that are eligible based on Federal Reserve Bank of Chicago guidelines. At September 30, 2015, we had pledged commercial and industrial loans amounting to \$72 million with a lendable value of \$40 million. At December 31, 2014, we had pledged commercial and industrial loans amounting to \$53 million with a lendable value of \$31 million. At September 30, 2015 and December 31, 2014, we had no borrowings outstanding against this line of credit.

Federal Home Loan Bank advances. Federal Home Loan Bank advances increased \$1.5 billion at September 30, 2015 from December 31, 2014. We rely upon advances from the Federal Home Loan Bank as a source of funding for the origination or purchase of loans for sale in the secondary market and for providing duration specific short-term and medium-term financing. The outstanding balance of Federal Home Loan Bank advances fluctuates from time to time depending on our

Table of Contents

current inventory of mortgage loans held-for-sale and the availability of lower cost funding sources such as repurchase agreements. During the nine months ended September 30, 2015, we entered into longer-term fixed rate advances to provide more stable funding for interest-earning asset growth and extend the duration of our borrowings to be commensurate with the growth in longer-duration assets, such as residential first mortgage loans.

See Note 9 of the Notes to the Consolidated Financial Statements, for additional information of Federal Home Loan Bank advances.

Long-term debt. As part of our overall capital strategy, we previously raised capital through the issuance of trust-preferred securities by our special purpose financing entities formed for the offerings. The outstanding trust preferred securities mature 30 years from issuance, are callable by us after 20 quarters, and pay interest quarterly. Under these trust preferred arrangements, we have the right to defer interest payments to the trust preferred security holders for up to 20 quarters without default or penalty.

On January 27, 2012, we notified holders of the trust preferred securities our intention to exercise the contractual right to defer regularly scheduled quarterly payments of interest, beginning with the February 2012 payment, with respect to trust preferred securities. These payments will be periodically evaluated and reinstated when appropriate, subject to provisions of the Consent Order and Supervisory Agreement. At September 30, 2015, we have deferred for 15 consecutive quarters for a total amount of \$26 million.

Following the Assured Settlement Agreement, we consolidated the debt associated with certain HELOC securitizations held in a trust or variable interest entity ("VIE"), at fair value. We exercised our clean-up call with respect to the 2005-1 HELOC securitization trust, during the second quarter 2015. The transaction resulted in a cash payment of \$24 million to the debt bondholders. After payment of the debt, the FSTAR 2005-1 HELOC securitization trust has been dissolved during the second quarter 2015. At September 30, 2015, the fair value of the long-term debt associated with the remaining HELOC securitization trust was \$32 million. The final legal maturity of the long-term debt associated with the VIE is June 2019. However, this debt agreement has a contractual provision that allows for a clean-up call of the debt when less than 10 percent of the original loan balances of that securitization trust remain outstanding. As of September 30, 2015, FSTAR 2006-2 (LIBOR plus 16.00 percent) is expected to be below the threshold near the end of 2015. The debt pays interest based on a spread over the 30-day LIBOR interest rate. We initiated the clean-up call process with respect to the 2006-2 HELOC securitization trust, which we expect to complete in the fourth quarter 2015.

For information relating to long-term debt, see Note 10 of the Notes to the Consolidated Financial Statements.

Market Risk

Market risk is the risk of reduced earnings and or declines in the net market value of the balance sheet primarily due to changes in interest rates, currency exchange rates, or equity prices. We do not have any material foreign currency exchange risk or equity price risk. The primary market risk is interest rate risk and results from timing differences in the repricing of our assets and liabilities, changes in the relationships between rate indices, and the potential exercise of explicit or embedded options.

Interest rate risk is monitored by the asset liability committee ("ALCO"), which is composed of our executive officers and other members of management, in accordance with policies approved by our board of directors. In determining the appropriate level of interest rate risk, the ALCO considers the impact projected interest rate scenarios have on earnings and capital, liquidity, business strategies, and other factors. The ALCO meets monthly or as deemed necessary to review, among other things, the sensitivity of assets and liabilities to interest rate changes, the book and fair values of assets and liabilities, unrealized gains and losses, purchase and sale activity, loans held-for-sale and

commitments to originate loans, and the maturities of investments, borrowings and time deposits.

Financial instruments used to manage interest rate risk include derivative financial instruments such as interest rate swaps and forward sales commitments. Further discussion of the use of and the accounting for derivative instruments is included in Notes 8 and 17 of the Notes to Consolidated Financial Statements. All of our derivatives are accounted for at fair market value. All mortgage loan production originated for sale is accounted for on a fair value basis.

To effectively measure and manage interest rate risk, sensitivity analysis is used to determine the impact on earnings and the net market value of the balance sheet across various interest rate scenarios, balance sheet trends, and strategies. From these simulations, interest rate risk is quantified and appropriate strategies are developed and implemented. Additionally, duration and net interest income sensitivity measures are utilized when they provide added value to the overall interest rate risk

Table of Contents

management process. The overall interest rate risk position and strategies are reviewed by executive management and the board of directors on an ongoing basis. Business is traditionally managed to reduce overall exposure to changes in interest rates. However, management has the latitude to increase interest rate sensitivity within certain limits if, in management's judgment, the increase will enhance profitability.

Net interest income simulation analysis provides estimated net interest income of the current balance sheet across alternative interest rate scenarios. The net interest income analysis measures the sensitivity of interest sensitive earnings over a 12 month time horizon. The analysis holds the current balance sheet values constant and does not take into account management intervention. The net interest income simulation demonstrates the level of interest rate risk inherent in the existing balance sheet.

The following table is a summary of the changes in our net interest income that are projected to result from hypothetical changes in market interest rates. The interest rate scenarios presented in the table include interest rates as of September 30, 2015 and December 31, 2014 and adjusted by instantaneous parallel rate changes plus or minus 200 basis points.

September 30, 2015

Scenario	Net interest Income (Dollars in millions)	\$ Change	% Change	
200	\$294	\$16	6.0	%
Constant	279	—	—	%
(200)	225	(53)) (19.0)%

December 31, 2014

Scenario	Net interest Income (Dollars in millions)	\$ Change	% Change	
200	\$297	\$42	17.0	%
Constant	255	—	—	%
(200)	207	(48)) (19.0)%

We have also projected the potential impact to net interest income in a hypothetical "bear flattener" interest rate scenario as of September 30, 2015. When increasing short-term interest rates instantaneously by 100 basis points and holding the longer term interest rates unchanged, the decrease to net interest income over a 12 month and 24 month period based on our forecasted balance sheet is \$19 million and \$39 million, respectively.

In the net interest income simulation, our balance sheet exhibits slight asset sensitivity. When interest rates rise our interest income increases, conversely when interest rates fall our interest income decreases. The net interest income simulation measures the interest rate risk of the balance sheet over a short period over time, typically 12 months. An additional analysis is completed that measures the interest rate risk over an extended period of time. The Economic Value of Equity ("EVE") analysis provides a fair value of the balance sheet in alternative interest rate scenarios. The EVE analysis does not take into account management intervention and assumes the new rate environment is constant and the change is instantaneous.

The following table is a summary of the changes in our EVE that are projected to result from hypothetical changes in market interest rates. EVE is the market value of assets, less the market value of liabilities, adjusted for the market value of off balance sheet instruments. The interest rate scenarios presented in the table include interest rates at September 30, 2015 and December 31, 2014, and as adjusted by instantaneous parallel rate changes upward to 300 basis points and downward to 100 basis points. The scenarios are not comparable due to differences in the interest rate environments, including the absolute level of rates and the shape of the yield curve. Each rate scenario reflects unique prepayment, repricing, and reinvestment assumptions. Management derives these assumptions by considering published market prepayment expectations, the repricing characteristics of individual instruments or groups of similar

instruments, our historical experience, and our asset and liability management strategy. Further, this analysis assumes that certain instruments would not be affected by the changes in interest rates or would be partially affected due to the characteristics of the instruments.

This analysis is based on our interest rate exposure at September 30, 2015 and December 31, 2014, and does not contemplate any actions that we might undertake in response to changes in market interest rates, which could impact EVE. Further, as this framework evaluates risks to the current statement of financial condition only, changes to the volumes and pricing of new business opportunities that can be expected in the different interest rate outcomes are not incorporated in this analytical framework. For instance, analysis of our history suggests that declining interest rate levels are associated with higher loan production volumes at higher levels of profitability. While this "natural business hedge" historically offset most, if not all,

Table of Contents

of the identified risks associated with declining interest rate scenarios, these factors fall outside of the EVE framework. Further, there can be no assurance that this natural business hedge would positively affect the economic value of equity in the same manner and to the same extent as in the past.

There are limitations inherent in any methodology used to estimate the exposure to changes in market interest rates. It is not possible to fully model the market risk in instruments with leverage, option, or prepayment risks. Also, we are affected by basis risk, which is the difference in repricing characteristics of similar term rate indices. As such, this analysis is not intended to be a precise forecast of the effect a change in market interest rates would have on us.

If EVE increases in any interest rate scenario, that would indicate an increasing direction for the margin in that hypothetical rate scenario. A perfectly matched balance sheet would possess no change in the EVE, no matter what the rate scenario. The following table presents the EVE in the stated interest rate scenarios.

September 30, 2015					December 31, 2014				
Scenario	EVE	EVE%	\$ Change	% Change	Scenario	EVE	EVE%	\$ Change	% Change
	(Dollars in millions)					(Dollars in millions)			
300	\$1,812	15.7	% \$(262)	(12.6)%	300	\$1,462	16.6	% \$(217)	(12.9)%
200	1,918	16.2	% (156)	(7.5)%	200	1,537	17.0	% (143)	(8.5)%
100	2,015	16.5	% (59)	(2.9)%	100	1,618	17.4	% (62)	(3.7)%
Current	2,074	16.6	% —	—	Current	1,680	17.7	% —	—
(100)	2,038	16.0	% (36)	(1.7)%	(100)	1,703	17.6	% 24	1.4

Our balance sheet exhibits sensitivity in a rising interest rate scenario as the EVE decreases. The decrease in EVE is the result of the amount of liabilities that would be expected to reprice in the near term exceeding the amount of assets that could similarly reprice over the same time period because such assets may have longer maturities or repricing terms.

Mortgage servicing rights

At September 30, 2015, MSR's at fair value increased \$36 million to \$294 million, compared to \$258 million at December 31, 2014, primarily due to an increase in the volume of the unpaid principal balance of servicing retained MSR's.

Changes in the carrying value of residential first mortgage MSR's, accounted for at fair value, were as follows:

	Three Months Ended		Nine Months Ended	
	September 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014
	(Dollars in millions)			
Balance at beginning of period	\$317	\$289	\$258	\$285
Additions from loans sold with servicing retained	74	79	220	199
Reductions from sales	(73)	(68)	(144)	(161)
Changes in fair value due to				
Payoffs	(9)	(10)	(34)	(22)
Valuation inputs or assumptions	(15)	(5)	(6)	(16)
Fair value of MSR's at end of period	\$294	\$285	\$294	\$285

In the third quarter 2015, we began economically hedging the risk of changes in implied volatility caused by changing market expectations, which impacts the fair value of the MSR's.

Our ratio of MSRs to Tier 1 capital was 21.1 percent and 21.8 percent at September 30, 2015 and December 31, 2014, respectively.

The principal balance of the loans underlying our total MSRs was \$26.3 billion at September 30, 2015, compared to \$25.4 billion at December 31, 2014.

For information relating to the mortgage servicing rights, see Note 7 of the Notes to the Consolidated Financial Statements, herein.

Table of Contents

Investment securities available-for-sale

Investment securities available-for-sale, decreased from \$1.7 billion at December 31, 2014 to \$1.2 billion at September 30, 2015. The decrease was primarily due to the transfer of \$1.1 billion of available-for-sale securities to held-to-maturity securities, partially offset by the purchase of \$783 million of agency securities, including mortgage-backed securities and collateralized mortgage obligations.

Investment securities held-to-maturity

Investment securities held-to-maturity increased to \$1.1 billion at September 30, 2015 as a result of the transfer of \$1.1 billion of available-for-sale securities to held-to-maturity securities during the third quarter of 2015 reflecting the Company's intent and ability to hold those securities to maturity. We did not hold investment securities held-to-maturity at December 31, 2014. See Note 2 of the Notes to the Consolidated Financial Statements, herein.

Operational Risk

Operational risk is the risk of loss due to human error; inadequate or failed internal systems and controls; violations of, or noncompliance with, laws, rules, regulations, prescribed practices, or ethical standards; and external influences such as market conditions, fraudulent activities, disasters, and security risks. We continuously strive to strengthen our system of internal controls to ensure compliance with laws, rules, and regulations, and to improve the oversight of our operational risk. We evaluate internal systems, processes, and controls to mitigate loss from cyber-attacks and, to date, have not experienced any material losses. The goal of this framework is to implement effective operational risk techniques and strategies, minimize operational and fraud losses, and enhance our overall performance.

Loans with government guarantees

The amount of loans with government guarantees totaled \$509 million at September 30, 2015. This includes the \$11 million of loans which we have not yet repurchased but had the unilateral right to repurchase. At December 31, 2014, loans with government guarantees totaled \$1.1 billion and those loans which we had not yet repurchased but had the unilateral right to repurchase totaled \$9 million and were classified as other liability. The balance of this portfolio decreased at September 30, 2015, primarily due to \$373 million of repossessed assets and claims that were reclassified from loans with government guarantees to other assets as a result of the adoption of ASU Update No. 2014-14, Receivables - Troubled Debt Restructuring by Creditors (Subtopic 310-40) and lower volumes of repurchases, as well as higher volume of claims filed.

Substantially all of these loans continue to be insured or guaranteed by the Federal Housing Administration ("FHA") and management believes that the reimbursement process is proceeding appropriately. These repurchased loans earn interest at a statutory rate, which varies for each loan, but is based on the 10-year U.S. Treasury note rate at the time the loan becomes greater than 60 days delinquent. This interest is recorded as interest income and the related claims settlement expenses are recorded in asset resolution expense on the Consolidated Statements of Operations. When a government guaranteed loan becomes nonperforming and is outside the reasonable period, the interest is no longer recognized.

For further information on loans with government guarantees, see Note 4 of the Notes to the Consolidated Financial Statements, herein.

Table of Contents

Representation and warranty reserve

We sell most of the residential first mortgage loans that we originate into the secondary mortgage market. When we sell mortgage loans, we make customary representations and warranties to the purchasers, including sponsored securitization trusts and their insurers (primarily Fannie Mae and Freddie Mac).

REPRESENTATION AND WARRANTY RESERVE

	Three Months Ended September 30, 2015		2014		Nine Months Ended September 30, 2015		2014	
	(Dollars in millions)							
Balance, beginning of period	\$48	\$50			\$53		\$54	
Provision								
Charge to gain on sale for current loan sales	2	2			6		5	
Provision (benefit) representation and warranty reserve - change in estimate	(6) 13			(13) 16	
Total	(4) 15			(7) 21	
Charge-offs, net	1	(8) (1) (18)
Balance, end of period	\$45	\$57			\$45		\$57	

The decrease in the provision adjustment charged to representation and warranty reserve expense during the nine months ended September 30, 2015, was primarily due to lower than expected charge-offs coupled with our ongoing efforts to continue to refine our estimates as more data becomes available reflecting the trend under the revised representation and warranty reserve framework as published by the Federal Housing Finance Agency.

The following table summarizes the amount of annual Fannie Mae and Freddie Mac audit file review requests by number of accounts. Such requests precede the repurchase demands that Fannie Mae and Freddie Mac may make thereafter.

	Three Months Ended				
	September 30, 2015	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014
Fannie Mae	788	912	1,185	988	766
Freddie Mac	402	442	449	487	588
Total	1,190	1,354	1,634	1,475	1,354

During the nine months ended September 30, 2015, we had \$75 million in Fannie Mae new repurchase demands and \$23 million in Freddie Mac new repurchase demands. The following table summarizes the amount of quarterly new repurchase demands we have received by loan origination year.

	Three Months Ended				
	September 30, 2015	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014
	(Dollars in millions)				
2008 and prior (1)	\$—	\$2	\$5	\$19	\$2
2009-2015	13	33	45	28	37
Total	\$13	\$35	\$50	\$47	\$39
Number of accounts	56	150	237	265	177

(1) Includes a significant portion of the repurchase requests and obligations associated with loans within the settlement agreements with Fannie Mae and Freddie Mac.

Table of Contents

The following table summarizes the aggregate amount of pending repurchase demands at the end of each quarterly period noted.

	Three Months Ended		March 31, 2015	December 31, 2014	September 30, 2014
	September 30, 2015	June 30, 2015			
	(Dollars in millions)				
Period end balance	\$30	\$46	\$58	\$43	\$31
Percent non-agency (approximately)	0.1	% 0.3	% 0.3	% 1.6	% 2.4

The following table summarizes the trends with respect to key model attributes and assumptions for estimating the representation and warranty reserve.

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
UPB of loans sold (1)	\$158,490	\$143,605
Loans expected to be repurchased (percent of loans sold) (2)	0.2	% 0.4
Loss severity rate (3)	21.1	% 8.7

(1) Includes unpaid principal balance of 2009 and later vintage loans sold to Fannie Mae and Freddie Mac through September 30, 2015.

(2) Loans expected to be funded post appeal loss.

(3) Average loss severity rate expected to be experienced on actual repurchases made (post appeal loss).

See Note 11 of the Notes to the Consolidated Financial Statements.

Consent Orders

Effective October 23, 2012, the Bank's board of directors executed a Stipulation and Consent (the "Stipulation"), accepting the issuance of a Consent Order (the "Consent Order") by the OCC. The Consent Order replaces the supervisory agreement entered into between the Bank and the Office of Thrift Supervision (the "OTS") on January 27, 2010, which the OCC terminated simultaneous with issuance of the Consent Order.

On September 29, 2014, the Bank entered into a Consent Order with the Consumer Financial Protection Bureau (the "CFPB"). The Consent Order relates to alleged violations of federal consumer financial laws arising from the Bank's residential first mortgage loan loss mitigation practices and default servicing operations dating back to 2011. Under the terms of the Consent Order, the Bank has paid \$28 million for borrower remediation and \$10 million in civil money penalties. The settlement does not involve any admission of wrongdoing on the part of the Bank or its employees, directors, officers, or agents.

Supervisory Agreement

The Company is subject to the Supervisory Agreement, which will remain in effect until terminated, modified, or suspended in writing by the Federal Reserve. The failure to comply with the Supervisory Agreement could result in the initiation of further enforcement action by the Federal Reserve, including the imposition of further operating restrictions, and could result in additional enforcement actions against the Company. The Company has taken actions which it believes are appropriate to comply with, and intends to maintain compliance with, all of the requirements of the Supervisory Agreement. For further information and a complete description of all of the terms of the Supervisory Agreement, please refer to the copy of the Supervisory Agreement filed with the SEC as an exhibit to the Company's Current Report on Form 8-K filed on January 28, 2010.

Capital

Under the capital distribution regulations, a savings bank that is a subsidiary of a savings and loan holding company must either notify or seek approval from the OCC for a capital distribution at least 30 days prior to the declaration of a dividend or the approval by our board of directors of the proposed capital distribution. The 30-day period allows the OCC to determine whether the distribution would not be advisable. Because we are under the Consent Order, we currently must seek approval from the OCC prior to making a capital distribution from the Bank. In addition, under the Supervisory Agreement, the Company agreed to request prior non-objection of the Federal Reserve to pay dividends or other capital distributions.

Table of Contents

Under the terms of the Fixed Rate Cumulative Perpetual Preferred Stock, Series C (the "Series C Preferred Stock") the Company may defer payments of dividends. Beginning with the February 2012 payment, the Company has exercised its contractual right to defer regularly scheduled quarterly payments of dividends on Series C Preferred Stock, and is therefore currently in arrears with the dividend payments. As of September 30, 2015, the amount of the arrearage on the dividend payments of the Series C Preferred Stock was \$79 million. At the time that the Company pays the deferred dividends, this payment will result in a reduction of equity. Currently, the impact of the deferred dividends is removed from net income for calculating the Company's earnings per share.

Regulatory Developments

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by regulators about components, risk weightings, and other factors. We are currently subject to regulatory capital rules issued by U.S. banking regulators. On January 1, 2015, we became subject to the Basel III rules, which include certain transition provisions through 2018. Through December 31, 2014, we were subject to the Basel I general risk-based capital rules.

Regulatory Capital Composition – Transition

Important differences in determining the composition of regulatory capital between the Basel I Rules and Basel III include changes in capital deductions related to the Company's MSR's and deferred tax assets. These changes will be impacted by, among other things, future changes in interest rates, overall earnings performance and corporate actions. Changes to the composition of regulatory capital under Basel III, compared to the Basel I Rules, are recognized in 20 percent annual increments, and will be fully recognized as of January 1, 2018. When presented on a fully phased-in basis, capital, risk-weighted assets, and the capital ratios assume all regulatory capital adjustments and deductions are fully recognized.

As of September 30, 2015, the Company and the Bank were subject to a partial phase-in limitation on deductions related to MSR's and certain deferred tax assets. This partial phase-in reduced our Tier 1 leverage ratio when compared to the same ratio under Basel I. Our common equity Tier I ratio increased under the phase-in rules, as the absorption of the write-off of excess MSR's and net operating loss-dependent deferred tax assets (NOL) are included at only 40 percent by common equity Tier 1 in the first year of the phase-in. The remaining net operating loss-dependent DTAs above the Basel III limits are written off against the non-common elements of Tier 1 capital (the preferred shares and the trust preferred securities) in this first year of phase-in. If additional Tier 1 Capital elements are not available to absorb the remaining NOL deductions, these deductions are then applied to common equity elements.

Effective on January 1, 2015, the capital framework under the Basel III final rule replaced the existing regulatory capital rules for all banks, savings associations, and U.S. bank holding companies with greater than \$500 million in total assets, and all savings and loan holding companies. The final rule implements a new common equity Tier 1 minimum capital requirement. In addition, the new regulations would subject a banking organization to certain limitations on capital distributions and discretionary bonus payments to executive officers if the organization did not maintain a capital conservation buffer of common equity Tier 1 capital in an amount greater than 2.5 percent of its total risk-weighted assets. The effect of the capital conservation buffer will be to increase the minimum common equity Tier 1 capital ratio to 7.0 percent, the minimum Tier 1 risk-based capital ratio to 8.5 percent and the minimum total risk-based capital ratio to 10.5 percent. The capital conservation buffer becomes effective January 1, 2016 with transition provisions through 2018.

The new regulations grandfather the regulatory capital treatment of hybrid debt and equity securities, such as trust preferred securities issued prior to May 19, 2010, for banks or holding companies with less than \$15.0 billion in total consolidated assets as of December 31, 2009. Although the Company may continue to include our existing trust preferred securities as Tier 1 capital, the prohibition on the use of these securities as Tier 1 capital going forward may limit the Company's ability to raise capital in the future.

Table of Contents

At September 30, 2015, we were considered "well-capitalized" for regulatory purposes. The following tables show the regulatory capital ratios as of the dates indicated.

Bancorp	September 30, 2015		December 31, 2014		
	Amount	Ratio	Amount	Ratio	
	(Dollars in millions)				
Tier 1 leverage (to adjusted tangible assets)	\$1,393	11.65	% \$1,184	12.59	%
Total adjusted tangible asset base (1)	11,957		9,403		
Tier 1 capital (to risk-weighted assets)	\$1,393	20.32	% \$1,184	22.81	%
Common equity Tier 1 (to RWA) (2)	1,024	14.93	% N/A	N/A	
Total risk-based capital (to risk-weighted assets)	1,483	21.64	% 1,252	24.12	%
Risk-weighted asset base (1)	\$6,857		\$5,190		
N/A - Not applicable					

(1) Based on adjusted total assets for purposes of Tier 1 leverage capital and risk-weighted assets for purposes Tier1, common equity Tier 1, and total risk-based capital.

On January 1, 2015, the Basel III rules became effective, subject to transition provisions primarily related to (2)regulatory deductions and adjustments impacting common equity Tier 1 capital and Tier 1 capital. The Company and the Bank reported under Basel I (which included the Market Risk Final Rules) at December 31, 2014.

Bank	September 30, 2015		December 31, 2014		
	Amount	Ratio	Amount	Ratio	
	(Dollars in millions)				
Tier 1 leverage (to adjusted tangible assets)	\$1,426	11.91	% \$1,167	12.43	%
Total adjusted tangible asset base (1)	11,975		9,392		
Tier 1 capital (to risk-weighted assets)	\$1,426	20.75	% \$1,167	22.54	%
Common equity Tier 1 (to RWA) (2)	1,426	20.75	% N/A	N/A	
Total risk-based capital (to risk-weighted assets)	1,516	22.05	% 1,235	23.85	%
Risk-weighted asset base (1)	\$6,874		\$5,179		
N/A - Not applicable					

(1) Based on adjusted total assets for purposes of Tier 1 leverage capital and risk-weighted assets for purposes Tier1, common equity Tier 1, and total risk-based capital.

On January 1, 2015, the Basel III rules became effective, subject to transition provisions primarily related to (2)regulatory deductions and adjustments impacting common equity Tier 1 capital and Tier 1 capital. The Company and the Bank reported under Basel I (which included the Market Risk Final Rules) at December 31, 2014.

Our Tier 1 leverage ratio decreased at September 30, 2015, compared to December 31, 2014, primarily resulted from the deployment of capital for balance sheet growth, partially offset by earnings retention.

Certain regulatory capital ratios for the Bank and the Company as of September 30, 2015 are shown in the following table.

September 30, 2015	Regulatory Minimums	Regulatory Minimums to be Well-Capitalized	Bank	Company	
Basel III Ratios (transitional)					
Common equity Tier I capital ratio	4.50	% 6.50	% 20.75	% 14.93	%
Tier I leverage ratio	4.00	% 5.00	% 11.91	% 11.65	%

Basel III Ratios (fully phased-in) (1)

Common equity Tier I capital ratio	4.50	% 6.50	% 17.95	% 9.61	%
Tier I leverage ratio	4.00	% 5.00	% 10.62	% 9.87	%

(1) See "Use of Non-GAAP Financial Measures."

Looking at the impact of a fully phased in implementation of Basel III, our Tier 1 leverage ratio would have been 9.87 percent and our Tier 1 common ratio would have been 9.61 percent at September 30, 2015. The impact to our Tier 1 leverage ratio is mostly driven by the treatment that mortgage servicing rights receive under Basel III. Over the long term, we plan to continue to reduce our mortgage servicing rights to Tier 1 ratio, taking into consideration market conditions to guide our pace of MSR reduction. At September 30, 2015, we had \$294 million of mortgage servicing rights, representing 21.1 percent of Tier

Table of Contents

Tier 1 capital. The value of the mortgage servicing rights asset increased at September 30, 2015 from December 31, 2014, primarily due to higher interest rates and slower prepayment speeds, increasing the mortgage servicing rights to Tier 1 ratio. We will continue to look for opportunities to reduce our mortgage servicing rights exposure over time.

Use of Non-GAAP Financial Measures

In addition to results presented in accordance with GAAP, this report includes non-GAAP financial measures such as the ratio of total nonperforming assets to Tier 1 capital (to adjusted total assets) and estimated Basel III ratios. We believe these non-GAAP financial measures provide additional information that is useful to investors in helping to understand the underlying performance and trends of the Company.

Non-GAAP financial measures have inherent limitations, which are not required to be uniformly applied and are not audited. Readers should be aware of these limitations and should be cautious with respect to the use of such measures. To mitigate these limitations, we have practices in place to ensure that these measures are calculated using the appropriate GAAP or regulatory components in their entirety and to ensure that our performance is properly reflected to facilitate consistent period-to-period comparisons. Although we believe the non-GAAP financial measures disclosed in this report enhance investors' understanding of our business and performance, these non-GAAP measures should not be considered in isolation, or as a substitute for those financial measures prepared in accordance with GAAP.

Nonperforming assets / Tier 1 + Allowance for Loan Losses. The ratio of nonperforming assets to Tier 1 and allowance for loan losses divides the total level of nonperforming assets held for investment by Tier 1 capital (to adjusted total assets), as defined by bank regulations, plus allowance for loan losses. We believe these measurements are meaningful measures of capital adequacy used by investors, regulators, management and others to evaluate the adequacy of capital in comparison to other companies within the industry.

	September 30, 2015	December 31, 2014	September 30, 2014	
Nonperforming assets / Tier 1 capital + allowance for loan losses	(Dollars in millions)			
Nonperforming assets	\$80	\$139	\$134	
Tier 1 capital (to adjusted total assets)	1,426	1,184	1,146	
Allowance for loan losses	197	297	301	
Tier 1 capital + allowance for loan losses	\$1,623	\$1,481	\$1,447	
Nonperforming assets / Tier 1 capital + allowance for loan losses	4.9	% 9.4	% 9.3	%

Basel III (transitional) to Basel III (fully phased-in) reconciliation. On January 1, 2015, the Basel III rules became effective, subject to transition provisions primarily related to regulatory deductions and adjustments impacting common equity Tier 1 capital and Tier 1 capital. We reported under Basel I (which included the Market Risk Final Rules) at December 31, 2014. When fully phased-in, Basel III, will increase capital requirements through higher minimum capital levels as well as through increases in risk-weights for certain exposures. Additionally, the final Basel III rules place greater emphasis on common equity. In October 2013, the OCC and Federal Reserve released final rules detailing the U.S. implementation of Basel III and the application of the risk-based and leverage capital rules to top-tier savings and loan holding companies. We have transitioned to the Basel III framework beginning in January 2015 and are subject to a phase-in period extending through 2018. Accordingly, the calculations provided below are estimates. These measures are considered to be non-GAAP financial measures because they are not formally defined by GAAP and the Basel III implementation regulations will not be fully phased-in until January 1, 2019. The regulations are subject to change as clarifying guidance becomes available and the calculations currently include our interpretations of the requirements including informal feedback received through the regulatory process. Other entities may calculate the Basel III ratios differently from ours based on their interpretation of the guidelines. Since analysts and banking regulators may assess our capital adequacy using the Basel III framework, we believe that it is useful to

provide investors information enabling them to assess our capital adequacy on the same basis.

Basel III (fully phased-in) (1)	17.95	% 10.62	% 17.95	% 19.23 %

On January 1, 2015, the Basel III rules became effective, subject to transition provisions primarily related to (1) regulatory deductions and adjustments impacting common equity Tier I capital and Tier I capital. We reported under Basel I (which included the Market Risk Final Rules) at December 31, 2014.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

A discussion regarding our management of market risk is included in "Market Risk" in this report in "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. As of September 30, 2015 pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended ("Exchange Act"), an evaluation was performed by the Bank's (a) management, including our principal executive and financial officers regarding the design and effectiveness of our disclosure controls and procedures. Based upon that evaluation, the principal executive and financial officers have concluded that our current disclosure controls and procedures were effective as of September 30, 2015.

Changes in Internal Controls. There have been no changes in the Bank's internal control over financial reporting (as (b) defined in Rule 13a-15(d) of the Exchange Act) during the three months ended September 30, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1. Legal Proceedings

From time to time, the Company is party to legal proceedings incident to its business. See Note 16 of the Notes to Consolidated Financial Statements, in Item 1 Financial Statements, which is incorporated herein by reference.

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in response to Item 1A to Part I of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Sale of Unregistered Securities

The Company made no sales of unregistered securities during the quarter ended September 30, 2015.

Issuer Purchases of Equity Securities

The Company made no purchases of its equity securities during the quarter ended September 30, 2015.

Item 3. Defaults upon Senior Securities

The Company had no defaults on senior securities.

The following sets forth arrearage of the payment of dividends on preferred stock.

Under the terms of the Fixed Rate Cumulative Perpetual Preferred Stock, Series C (the "Series C Preferred Stock") the Company may defer payments of dividends. Beginning with the February 2012 payment, the Company has exercised its contractual right to defer regularly scheduled quarterly payments of dividends on Series C Preferred Stock, and is therefore currently in arrears with the dividend payments. As of September 30, 2015, the amount of the arrearage on the dividend payments of the Series C Preferred Stock was \$79 million.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.
