PRELIMINARY PROXY STATEMENT SUBJECT TO COMPLETION DATED SEPTEMBER 9, 2011

PROPOSED BUSINESS COMBINATION YOUR VOTE IS VERY IMPORTANT

On behalf of the boards of directors of Atlantic Power Corporation ("**Atlantic Power**") and of CPI Income Services Ltd., the general partner of Capital Power Income L.P. ("**CPILP**"), we send to you this management proxy circular and joint proxy statement that describes the proposed statutory plan of arrangement ("**Plan of Arrangement**") and related transactions whereby Atlantic Power will acquire, directly and indirectly, all of the outstanding limited partnership units of CPILP (the "**Arrangement**").

CPILP unitholders will be permitted to exchange each of their limited partnership units for, at their election, C$19.40 in cash or 1.3 Atlantic Power common shares, subject to proration if total cash elections exceed approximately C$506.5 million or share elections exceed approximately 31.5 million Atlantic Power common shares. Based on the current number of Atlantic Power common shares outstanding (and specifically excluding any common shares of Atlantic Power that may be issued to finance the cash portion of the purchase price), the existing Atlantic Power shareholders will own approximately 70% of the combined company and former CPILP unitholders will own approximately 30%.

Based on the closing price of the Atlantic Power common shares on the Toronto Stock Exchange ("**TSX**") of C$ on , 2011, the transaction values CPILP at approximately C$ billion or C$ per unit. This represents a premium of approximately % over CPILP's -day volume-weighted average trading price on the TSX through June 17, 2011, the last trading day prior to the public announcement by Atlantic Power and CPILP of their proposed strategic combination.

Capital Power Corporation ("**Capital Power**") and EPCOR Utilities Inc. ("**EPCOR**"), the direct and indirect holders of all of the issued and outstanding shares of CPI Investments Inc., which directly and indirectly holds an aggregate of approximately 29% of the outstanding limited partnership units of CPILP, have entered into agreements with Atlantic Power pursuant to which they each have agreed to support the Arrangement. In addition, in connection with completion of the Arrangement, CPILP will sell its Roxboro and Southport facilities located in North Carolina to an affiliate of Capital Power and the management agreements between Capital Power and CPILP will be terminated (or assigned to Atlantic Power).

The transactions are subject to, among other things, certain approvals by the shareholders of Atlantic Power and the unitholders of CPILP. Specifically, at special meetings expected to be held on 2011, Atlantic Power shareholders will be asked to approve an ordinary resolution that authorizes the issuance of the common shares of Atlantic Power necessary to complete the Arrangement and CPILP unitholders will be asked to approve a special resolution that authorizes the Arrangement, the Plan of Arrangement and certain other steps required to complete the Arrangement. The text of the resolutions are set forth in Annex F and G to this management proxy circular and joint proxy statement, respectively.

The Atlantic Power board of directors unanimously recommends that the Atlantic Power shareholders vote "FOR" the ordinary resolution to issue the common shares necessary to complete the Arrangement.

The board of directors of CPI Income Services Ltd., the general partner of CPILP, unanimously recommends that the CPILP unitholders vote "FOR" the special resolution to approve the Arrangement, the Plan of Arrangement and certain other steps required to complete the Arrangement.

Your vote is very important, regardless of the number of shares or units you own. Whether or not you expect to attend the Atlantic Power or CPILP special meeting in person, please vote your shares or units as promptly as possible so that they may be represented and voted at the applicable special meeting.

If you are unable to attend the Atlantic Power special meeting in person, please complete, date and sign the accompanying form of proxy (printed on paper) and return it, in the envelope provided to Computershare Trust Company of Canada, Proxy Department, 9th Floor, 100 University Avenue, Toronto, Ontario, M5J 2Y1, so that it is received not less than 48 hours, excluding Saturdays, Sundays and holidays, before the time fixed for holding the Atlantic Power special meeting or any adjournments or postponements thereof.

If you fail to make a proper election prior to the Election Deadline you will be deemed to have elected to receive Atlantic Power shares in respect of all of your CPILP units.

If you are a non-registered holder of CPILP units or Atlantic Power shares and have received these materials through your broker, investment dealer or other intermediary, please follow the instructions provided by such broker, investment dealer or other intermediary to ensure that your vote is counted and, in the case of CPILP unitholders, for instructions and assistance in delivering your certificate(s) representing those units and, if applicable, making an election with respect to the form of consideration you wish to receive.

More information about Atlantic Power, CPILP and the transaction, including other conditions, is contained in this management proxy circular and joint proxy statement. QUESTIONS AND ANSWERS

Set forth below are questions that you, as a shareholder of Atlantic Power or unitholder of CPILP, may have regarding the Plan of Arrangement and the other matters to be considered at the special meetings of shareholders of Atlantic Power and unitholders of CPILP and the answers to those questions. Atlantic Power and CPILP urge you to read carefully the remainder of this joint proxy statement because the information in this section does not provide all the information that might be important to you with respect to the Plan of Arrangement and the other matters to be considered at the special meetings. Atlantic Power, following completion of the Plan of Arrangement, is sometimes referred to in this joint proxy statement as the "Combined Company". All references to US$ or $ are to United States dollars, and all references to C$ are to Canadian dollars.

Q: Why am I receiving this joint proxy statement?

A:

Atlantic Power and CPILP have entered into the Arrangement Agreement pursuant to which Atlantic Power has agreed to acquire, directly and indirectly, all of the outstanding CPILP units pursuant to a Plan of Arrangement under the *Canada Business Corporations Act* (the "**CBCA**"), all as more fully described in this joint proxy statement. In order to effect the Plan of Arrangement:

Atlantic Power shareholders must approve the Share Issuance Resolution attached hereto as Annex F approving the issuance of Atlantic Power common shares to be issued in consideration for the acquisition of CPILP units as is necessary to complete the Arrangement; and

CPILP unitholders must approve the Arrangement Resolution attached hereto as Annex G approving the Arrangement, the Plan of Arrangement and certain other steps required to complete the Arrangement.

Atlantic Power and CPILP will hold separate special meetings to obtain these approvals. This joint proxy statement contains important information about the Plan of Arrangement and the special meetings of shareholders of Atlantic Power and unitholders of CPILP.

Your vote is important. You do not need to attend the special meetings in person to vote. Atlantic Power and CPILP encourage you to vote as soon as possible.

Q: Is the Arrangement supported by the boards of directors of Atlantic Power and CPI Income Services Ltd. as the general partner of CPILP?

A:

Yes. The board of directors of Atlantic Power has unanimously determined that (i) the Arrangement is in the best interests of Atlantic Power and is fair to Atlantic Power's stakeholders, (ii) Atlantic Power should enter into the Arrangement Agreement, and (iii) Atlantic Power's shareholders should vote FOR the Share Issuance Resolution.

In making its recommendation, the Atlantic Power board of directors considered a number of factors as described in this joint proxy statement under the heading "The Arrangement Agreement and Plan of Arrangement Atlantic Power's Reasons for the Arrangement Agreement; Recommendations of Atlantic Power's Board of Directors."

The members of the board of directors of CPI Income Services Ltd., the general partner of CPILP, entitled to vote, being the independent directors of CPI Income Services Ltd., the general partner of CPILP, determined unanimously that the Arrangement is in the best interests of CPILP and is fair to the CPILP unitholders and resolved unanimously to recommend to the CPILP unitholders that they vote FOR the Arrangement Resolution. The members of the board of directors of CPI Income Services Ltd., the general partner of CPILP, entitled to vote also unanimously approved the Arrangement and the execution and performance of the Arrangement Agreement.

Table of Contents

In making its recommendation, the board of directors of CPI Income Services Ltd., the general partner of CPILP, considered a number of factors as described in this joint proxy statement under the heading "The Arrangement Agreement and Plan of Arrangement CPILP's Reasons for the Plan of Arrangement; Recommendations of the Board of Directors of CPILP's General Partner."

Q: What are Atlantic Power's and CPILP's reasons for the entering into the Arrangement Agreement?

A:

The boards of directors of Atlantic Power and of CPI Income Services Ltd., the general partner of CPILP, each concluded that the potential benefits they expect from combining Atlantic Power and CPILP, including, among other things, strengthening Atlantic Power's dividend sustainability for the foreseeable future as a result of immediate accretion to cash available for distribution, creation of a combined company with a larger and more diversified portfolio and anticipated enhanced access to capital, outweighed the uncertainties, risks and potentially negative factors relevant to the Plan of Arrangement. For a more detailed discussion of the reasoning of Atlantic Power's board of directors and the board of directors of CPI Income Services Ltd., the general partner of CPILP, see "The Arrangement Agreement and Plan of Arrangement Atlantic Power's Reasons for the Arrangement Agreement; Recommendations of Atlantic Power's Board of Directors" and " CPILP's Reasons for the Plan of Arrangement; Recommendations of the Board of Directors of CPILP's General Partner" in this joint proxy statement, beginning on pages 55 and 77, respectively.

Q: What is a plan of arrangement?

A:

A plan of arrangement is a statutory procedure under Canadian corporate law that allows companies to carry out transactions with securityholders and court approval. The Plan of Arrangement you are being asked to consider will allow Atlantic Power to acquire, directly and indirectly, all of the outstanding CPILP units.

Q: If I am a CPILP unitholder, how do I elect to receive my consideration under the Plan of Arrangement?

A:

Each registered holder of CPILP units prior to the deadline for making consideration elections, being 5:00 p.m. (Edmonton time) on , 2011, will have the right to elect in the Letter of Transmittal and Election Form to be sent by CPILP to the CPILP unitholders in connection with the Plan of Arrangement to receive the consideration set out above, subject to proration.

CDS Clearing and Depositary Services Inc. is the only registered holder of CPILP units. All other holders of CPILP units should contact the broker, investment dealer or other intermediary through which they hold CPILP units for instructions and assistance in making an election with respect to the form of consideration they wish to receive.

If you fail to make a proper election by the election deadline, you will be deemed to have elected to receive share consideration for all of your CPILP units, subject to proration.

Q: If I am a CPILP unitholder, am I assured of receiving the exact form of consideration I elect to receive?

A:

No. Both the aggregate number of Atlantic Power common shares and the aggregate amount of cash to be paid to CPILP unitholders under the Plan of Arrangement are fixed. All cash elections will be subject to proration if total cash elections exceed approximately C$506.5 million and all share elections will be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares. Accordingly, there is no assurance that you will receive the form of consideration you elect with respect to all of your CPILP units. If the elections of all CPILP unitholders result in an oversubscription for Atlantic Power common shares or cash,

Table of Contents

Atlantic Power will allocate the consideration you will receive between cash and Atlantic Power common shares.

Q: What is the value of the consideration to be received under the Plan of Arrangement?

A:

If the Plan of Arrangement is completed, holders of CPILP units will receive, at their election, C$19.40 per unit in cash or 1.3 Atlantic Power common shares per unit, subject to proration if total cash elections exceed approximately C$506.5 million or share elections exceed approximately 31.5 million Atlantic Power common shares. Because Atlantic Power will issue a fixed number of Atlantic Power common shares in exchange for each CPILP unit, the market value of the consideration that CPILP unitholders will receive will depend on the price per Atlantic Power common share at the time the transaction is completed. That price will not be known at the time of the special meetings and may be less or more than the current price or the price at the time of the special meetings.

Q: How does Atlantic Power intend to finance the cash portion of the consideration to be received under the Plan of Arrangement?

A:

Atlantic Power intends to finance the cash portion of the purchase price to complete the Plan of Arrangement by issuing up to approximately C$200.0 million of equity and up to approximately C$425.0 million of debt through public and private offerings. However, in the event that such financing is not available on terms satisfactory to Atlantic Power, Atlantic Power has received an executed commitment letter (the "**TLB Commitment Letter**"), evidencing the commitment of a Canadian chartered bank and another financial institution to structure, arrange, underwrite and syndicate a senior secured credit facility consisting of a term B loan facility (the "**Tranche B Facility**") in the amount of $625 million, subject to the terms and conditions set forth therein.

Q: Will the Atlantic Power common shares be traded on an exchange?

A:

It is a condition of the completion of the Plan of Arrangement that the common shares of Atlantic Power received under the Plan of Arrangement be approved for listing on the NYSE and on the TSX.

Q: Why are the North Carolina facilities being sold to Capital Power rather than being included in the transaction?

A:

The North Carolina facilities are not of strategic interest to Atlantic Power. At the time of, and leading up to, the signing of the Arrangement Agreement, there was uncertainty surrounding the negotiations and finalized terms of the power purchase agreements for these facilities. Capital Power agreed to purchase the North Carolina facilities to facilitate the consummation of the transaction. The price of approximately C$121.4 million was negotiated in good faith between the independent directors of CPI Income Services Ltd., as general partner of CPILP, and Capital Power. CIBC World Markets Inc. ("**CIBC**") provided a written opinion to the special committee of the board of directors of CPI Income Services Ltd., as general partner of CPILP, and to the independent director of CPI Preferred Equity Ltd. that the consideration to be received by CPI Preferred Equity Ltd. pursuant to the membership interest purchase agreement in respect of the North Carolina assets is fair, from a financial point of view, to CPI Preferred Equity Ltd.

Q: How is the Plan of Arrangement expected to impact the payment of dividends on Atlantic Power common shares?

A:

The transactions contemplated by the Plan of Arrangement are expected to be immediately accretive to cash available for distribution following the effective date of the Plan of Arrangement

Table of Contents

(the "**Effective Date**"). As a result, Atlantic Power intends to increase its dividend by 5% from C$1.094 per share to C$1.15 per share on an annual basis following the Effective Date. Atlantic Power's dividend will continue to be paid monthly. CPILP unitholders that become holders of Atlantic Power common shares pursuant to the Arrangement will experience a reduction in per share dividends relative to per unit distributions of CPILP, however, the dividends of the Combined Company are expected to have increased sustainability over time.

Q: If I hold CPILP units will I still be paid distributions prior to the Effective Date?

A:

CPILP expects to continue to pay monthly distributions to CPILP unitholders up to and including the month immediately preceding the month in which the Effective Date occurs. However, no distribution shall be paid unless and until the board of directors of CPI Income Services Ltd., the general partner of CPILP, in its sole discretion, makes a declaration that such distribution is payable.

Q: When and where will the special meetings be held?

A:

The Atlantic Power special meeting will be held at the King Edward Hotel, , 37 King Street East, Toronto, Ontario on , 2011 at a.m., Toronto time.

The CPILP special meeting will be held at on , 2011 at a.m., Edmonton time.

Q: Who is entitled to vote at the Atlantic Power and CPILP special meetings?

A:

Atlantic Power has fixed , 2011 as the record date for the Atlantic Power special meeting. If you were an Atlantic Power shareholder as of the close of business on such date, you are entitled to vote on matters that come before the Atlantic Power special meeting.

CPILP has fixed , 2011 as the record date for the CPILP special meeting. If you were a CPILP unitholder as of the close of business on such date, you are entitled to vote on matters that come before the CPILP special meeting.

Q: What vote is required to approve each of the Share Issuance Resolution and the Arrangement Resolution?

A:

Atlantic Power: The Share Issuance Resolution must be approved by a majority of the votes cast by Atlantic Power shareholders, either in person or by proxy, at the Atlantic Power special meeting.

CPILP: Pursuant to the Interim Order, the Arrangement Resolution must be approved by not less than $66^{2}/_{3}\%$ of the votes cast by CPILP unitholders, either in person or by proxy, at the CPILP special meeting. In addition, the Arrangement Resolution must be approved by a simple majority of the votes cast by CPILP unitholders present in person or by proxy at the CPILP special meeting, after excluding those votes required to be excluded by the minority approval provisions of MI 61-101, such as the votes cast by CPI Income Services Ltd., as general partner of CPILP, and CPI Investments, Inc. ("**CPI Investments**"). Notwithstanding the foregoing, the Arrangement Resolution authorizes the board of directors of CPI Income Services Ltd., the general partner of CPILP, without further notice to or approval of the unitholders, subject to the terms of the Plan of Arrangement and the Arrangement Agreement, to amend the Plan of Arrangement or the Arrangement Agreement or to decide not to proceed with the Plan of Arrangement at any time prior to the Plan of Arrangement becoming effective pursuant to the provisions of the CBCA. Capital Power and EPCOR, the direct and indirect holders of all of the issued and outstanding

Table of Contents

shares of CPI Investments, which directly and indirectly holds an aggregate of approximately 29% of the outstanding limited partnership units of CPILP, have entered into agreements with Atlantic Power pursuant to which they each have agreed to support the Arrangement.

Q: How many votes do I have?

A:

Atlantic Power: You are entitled to one vote for each Atlantic Power common share that you owned as of the close of business on the Atlantic Power record date. As of the close of business on the Atlantic Power record date, there were approximately outstanding Atlantic Power common shares.

CPILP: You are entitled to one vote for each CPILP unit that you owned as of the close of business on the CPILP record date. As of the close of business on the CPILP record date, there were 56,597,899 outstanding CPILP units.

If you hold Atlantic Power common shares or CPILP units in "street name" through a stock brokerage account or through a bank or other nominee, please follow the voting instructions provided by your broker, investment dealer or other intermediary to ensure that your shares or units are represented at the applicable special meeting. CDS Clearing and Depositary Services Inc. is the only registered holder of CPILP units. All other holders of CPILP units beneficially hold those units in "street name" and should follow the voting instructions provided by their broker, investment dealer or other intermediary.

Q: My shares or units are held in "street name" by my broker or I am a non-registered shareholder or unitholder. Will my broker automatically vote my shares or units for me?

A:

No. If your shares or units are held in the name of a broker, investment dealer or other intermediary, you are considered the "beneficial owner" of the shares or units held for you in what is known as "street name." You are **not** the "record holder" or "registered holder" of such shares or units. If this is the case, this joint proxy statement has been forwarded to you by your broker, investment dealer or other intermediary. As the beneficial owner, unless your broker, investment dealer or other intermediary has discretionary authority over your shares or units, you generally have the right to direct your broker, investment dealer or other intermediary as to how to vote your shares or units. If you do not provide voting instructions, your shares or units will not be voted on any resolutions on which your broker, investment dealer or other intermediary does not have discretionary authority.

Please follow the voting instructions provided by your broker, investment dealer or other intermediary so that it may vote your shares or units on your behalf. Please note that you may not vote shares or units held in street name by returning a form of proxy directly to Atlantic Power or

Table of Contents

CPILP or by voting in person at the applicable special meeting unless you first provide a proxy from your broker, investment dealer or other intermediary.

If you do not instruct your broker, investment dealer or other intermediary on how to vote your shares or units, your broker, investment dealer or other intermediary will not vote your shares or units on any matter to be voted on at the applicable special meeting.

Q: What will happen if I return my form of proxy without indicating how to vote?

A:

If you are a registered holder of Atlantic Power common shares or a registered holder of CPILP units and you sign and return your form of proxy without indicating how to vote on the Share Issuance Resolution or Arrangement Resolution, as applicable, the Atlantic Power common shares or CPILP units represented by your proxy will be voted "FOR" the Share Issuance Resolution and "FOR" the Arrangement Resolution, as applicable.

Q: What constitutes a quorum?

A:

Atlantic Power: A quorum must be present at the special meeting for any business to be conducted. Pursuant to Atlantic Power's articles, the presence of two persons, present in person, each being a shareholder entitled to vote or a duly appointed proxy for a shareholder so entitled, constitutes a quorum. For purposes of counting votes, abstentions and broker non-votes will not be counted as votes cast at the Atlantic Power special meeting.

CPILP: A quorum must be present at the CPILP special meeting for any business to be conducted. Pursuant to the limited partnership agreement of CPILP, the quorum for the CPILP special meeting is one or more CPILP unitholders present in person or by proxy representing at least 10% of the outstanding units.

Q: Can I change my vote after I have returned a proxy or voting instruction card?

A:

Yes.

If you are a registered holder of Atlantic Power common shares as of the close of business on the record date for the Atlantic Power special meeting: You can change your vote at any time before the start of the Atlantic Power special meeting, unless otherwise noted. In addition to revocation in any other manner permitted by law, you can revoke your proxy in one of the following ways:

- you can grant a new, valid proxy bearing a later date (including by telephone or Internet);
- you can deposit a signed notice of revocation at Atlantic Power's registered office at any time up to and including the last business day preceding the day of the Atlantic Power special meeting (or any adjournment or postponement thereof) or with the chair of the Atlantic Power special meeting on the day of the Atlantic Power special meeting (or any adjournment or postponement thereof); or
- you can attend the special meeting and vote in person, which will automatically cancel any proxy previously given, or you may revoke your proxy in person, but your attendance alone will not revoke any proxy that you have previously given.

If you choose any of the foregoing methods, your notice of revocation or your new proxy must be received by Atlantic Power no later than the beginning of the Atlantic Power special meeting. If you have voted your shares by telephone or through the Internet, you may revoke your prior telephone or Internet vote by any manner described above. Only your latest dated proxy will count.

If you are a registered holder of CPILP units as of the close of business on the record date for the CPILP special meeting: You can change your vote at any time before the start of the CPILP

special meeting. In addition to revocation in any other manner permitted by law, you can revoke your proxy in one of the following ways:

you can grant a new, valid proxy bearing a later date (including by telephone or Internet);

you can send a signed notice of revocation; or

you can attend your special meeting and vote in person, which will automatically cancel any proxy previously given, or you may revoke your proxy in person, but your attendance alone will not revoke any proxy that you have previously given.

If you choose any of the foregoing methods, your notice of revocation or your new proxy must be received by CPILP no later than the beginning of the CPILP special meeting. If you have voted your units by telephone or through the Internet, you may revoke your prior telephone or Internet vote by any manner described above. Only your latest-dated proxy will count.

If you hold your Atlantic Power common shares or CPILP units in "street name": You may change your vote by submitting another later-dated voting instruction form to your broker, investment dealer or other intermediary or by voting again by telephone or by Internet. In order to revoke a previous instruction, you must notify your broker, investment dealer or other intermediary in writing of your revocation. In order to ensure that the broker, investment dealer or other intermediary acts upon revocation, the written notice should be received by the broker, investment dealer or other intermediary well in advance of the applicable special meeting.

Q: What other approvals are required for the Plan of Arrangement?

A:

The Arrangement is subject to certain regulatory approvals, including approval under the *Investment Canada Act*, the *Competition Act* (Canada), the *Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended* (United States) and from the Federal Energy Regulatory Commission under the *United States Federal Power Act*, as more particularly set forth in the Arrangement Agreement. A "no action" letter and waiver from the merger notification provision under the Competition Act was received on August 26, 2011 and early termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act was granted on August 26, 2011.

The Arrangement must also be approved by the Court of Queen's Bench of Alberta. The court will be asked to make an order approving the Arrangement and determine that the Arrangement is fair to the CPILP unitholders. CPILP, CPI Income Services Ltd., as general partner of CPILP, and CPI Investments will apply to the court for this order if the regulatory approvals described above have been obtained and the CPILP unitholders approve the Arrangement Resolution at the CPILP special meeting.

In addition, in connection with the Arrangement, certain regulatory approvals of the power generation regulatory authorities that have jurisdiction over CPILP's projects are required.

Q: What are the material Canadian federal income tax consequences of the Plan of Arrangement to holders of CPILP units?

A:

CPILP unitholders will realize a taxable disposition of their CPILP units under the Plan of Arrangement. Eligible holders that receive Atlantic Power common shares pursuant to the Plan of Arrangement will be entitled to make a joint tax election with Atlantic Power under the *Income Tax Act* (Canada) (the "**Tax Act**") that will, depending on the circumstances of each particular unitholder, allow for a full or partial deferral of taxable gains that would otherwise be realized.

Atlantic Power common shares will be considered "qualified investments" for registered retirement savings plans and other tax-exempt plans.

Table of Contents

The primary Canadian federal income tax considerations arising in respect of the Plan of Arrangement, as well as the procedure to be followed by CPILP unitholders intending to make a joint tax election, are described more fully below under the heading "Material Canadian Federal Income Tax Considerations," beginning on page 108.

Q: When do you expect the Plan of Arrangement to be completed?

A:

Atlantic Power and CPILP are working to complete the Plan of Arrangement in the fourth quarter of 2011. However, the Plan of Arrangement is subject to obtaining various regulatory approvals and other conditions, and it is possible that factors outside the control of both entities could result in the Plan of Arrangement being completed at a later date, or not at all. There may be a substantial amount of time between the respective Atlantic Power and CPILP special meetings and the completion of the Plan of Arrangement. Atlantic Power and CPILP hope to complete the Plan of Arrangement as soon as reasonably practicable.

Q: What will happen to CPILP if the Plan of Arrangement is completed?

A:

If the Plan of Arrangement is completed, Atlantic Power will acquire all of the CPILP units and CPILP will become a wholly-owned subsidiary of Atlantic Power. Atlantic Power intends to have the CPILP units de-listed from the TSX.

Q: What do I need to do now?

A:

You should carefully read and consider the information contained in, and/or incorporated by reference into, this joint proxy statement. Registered holders of Atlantic Power shares or CPILP units should then vote by completing the enclosed form of proxy or, alternatively, by telephone, or over the Internet, in each case in accordance with the enclosed instructions.

If you hold your Atlantic Power common shares or CPILP units through a broker, investment dealer or other intermediary, please follow the instructions provided by such broker, investment dealer or other intermediary to ensure that your vote is counted at the meeting and, if you are a CPILP unitholder, making an election with respect to the form of consideration you wish to receive in exchange for your CPILP units.

Q: As a registered holder of CPILP units, should I send in my Letter of Transmittal and Election Form and CPILP unit certificates now?

A:

Yes. It is recommended that all registered holders of CPILP units complete, sign and return the Letter of Transmittal and Election Form with accompanying CPILP unit certificate(s) to Computershare Investor Services Inc. as soon as possible. To make a valid election as to the form of consideration that you wish to receive under the Plan of Arrangement (subject to proration), you must complete, sign and return the Letter of Transmittal and Election Form and make a proper election thereunder and return it with accompanying CPILP unit certificate(s) to Computershare Investor Services Inc. prior to the election deadline, being 5:00 p.m. (Edmonton time) on , 2011. **If you fail to make a proper election by the election deadline, you will be deemed to have elected to receive share consideration for all of your CPILP units, subject to proration.**

Q: If my CPILP units are held in street name by my broker, investment dealer or other intermediary, will my broker automatically make an election for me?

A:

No, a broker, investment dealer or other intermediary will make an election on your behalf, *only* if you provide instructions to them on which election to make or if they have discretionary authority over your units. Without instructions, no election will be made on your behalf (unless they have

Table of Contents

discretionary authority over your units). CPILP unitholders should instruct their brokers, investment dealers or other intermediaries to make an election on their behalf by following the directions provided to them by their brokers. **If you fail to make a proper election in accordance with the instructions provided by your broker, you will be deemed to have elected to receive share consideration for all of your CPILP units, subject to proration.**

Q: Are shareholders or unitholders entitled to appraisal/dissent rights?

A:

Atlantic Power: The shareholders of Atlantic Power are not entitled to dissent rights in connection with the Share Issuance Resolution.

CPILP: The unitholders of CPILP are not entitled to dissent rights in connection with the Arrangement Resolution.

Q: What happens if I sell my shares or units before the special meeting?

A:

The record date of each of the special meetings is , 2011. If you transfer your shares or units after the applicable record date but before the applicable special meeting, you will retain your right to vote at the applicable special meeting.

Q. If the Plan of Arrangement is approved, can I sell my CPILP units after the special meeting but before completion of the Plan of Arrangement?

A.

The Letter of Transmittal and Election Form to be completed by registered holders of CPILP units provides that the deposit of CPILP units is irrevocable. Accordingly, a registered holder of CPILP units that has validly deposited units and made an election will not be able to withdraw and sell those units after so doing. Notwithstanding the irrevocable nature of the deposit of units, elections as to the form of consideration may be changed prior to the election deadline, being 5:00 p.m. (Edmonton time) on , 2011, by submitting a new Letter of Transmittal and Election Form.

If you hold your CPILP units in "street name," once you have provided your broker, investment dealer or other intermediary with your election as to the form of consideration to be received, your broker, investment dealer or other intermediary will make an election on your behalf via an online system set up by CDS Clearing and Depository Services Inc. Once your election has been submitted, this effectively "freezes" your CPILP units such that you will not be able to sell your units after making an election unless your broker, investment dealer or other intermediary makes an online withdrawal. An online withdrawal could only be made prior to the election deadline, being , 2011.

Q: Who is soliciting my proxy?

A:

Atlantic Power: Your proxy is being solicited by or on behalf of management of Atlantic Power for use at the Atlantic Power special meeting and any adjournment or postponement thereof. All associated costs of the proxy solicitation will be borne by Atlantic Power. In addition to the use of the mail, proxies may be solicited by directors, officers and other employees of Atlantic Power, without additional remuneration, by personal interview, telephone, facsimile or otherwise. Atlantic Power will also request brokerage firms, nominees, custodians and fiduciaries to forward proxy materials to the beneficial owners of shares and will provide customary reimbursement to such firms for the cost of forwarding these materials. Atlantic Power has retained to assist in its solicitation of proxies and has agreed to pay them a fee of approximately , plus reasonable expenses, for these services.

Table of Contents

CPILP: Management of CPI Income Services Ltd., the general partner of CPILP, is soliciting your proxy for use at the CPILP special meeting and any adjournment or postponement thereof. All associated costs of the proxy solicitation will be borne by CPILP. In addition to the use of the mail, proxies may be solicited by directors, officers and other employees of CPILP or its general partner, without additional remuneration, by personal interview, telephone, facsimile or otherwise. CPILP will also request brokerage firms, nominees, custodians and fiduciaries to forward proxy materials to the beneficial owners of units and will provide customary reimbursement to such firms for the cost of forwarding these materials. CPILP has retained Georgeson Shareholder Communications Canada, Inc. to assist in its solicitation of proxies and has agreed to pay them a fee of approximately C$40,000, plus reasonable out-of-pocket expenses, for these services.

Q: What if I hold both Atlantic Power common shares and CPILP units?

A:

If you are a shareholder of Atlantic Power and a unitholder of CPILP, you will receive two separate packages of proxy materials. A vote as a CPILP unitholder will not count as a vote as an Atlantic Power shareholder, and a vote as an Atlantic Power shareholder will not count as a vote as a CPILP unitholder. Therefore, please separately vote each of your CPILP units and Atlantic Power common shares.

Q: Who can help answer my questions?

A:

CPILP unitholders or Atlantic Power shareholders who have questions about the Plan of Arrangement or the other matters to be voted on at the special meetings or desire additional copies of this joint proxy statement or additional forms of proxy should contact:

The Arrangement Agreement and Plan of Arrangement (see page 48)

On June 20, 2011, Atlantic Power, CPILP, the General Partner and CPI Investments entered into the Arrangement Agreement, which provides that Atlantic Power will acquire, directly or indirectly, all of the issued and outstanding CPILP units pursuant to the Plan of Arrangement under the CBCA. Under the terms of the Plan of Arrangement, CPILP unitholders will be permitted to exchange each of their CPILP units for, at their election, C$19.40 in cash or 1.3 Atlantic Power common shares. All cash elections will be subject to proration if total cash elections exceed approximately C$506.5 million and all share elections will be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares.

Pursuant to the Plan of Arrangement, CPILP will sell its Roxboro and Southport facilities located in North Carolina to an affiliate of Capital Power, for approximately C$121.4 million. Additionally, in connection with the Plan of Arrangement, the management agreements between certain subsidiaries of Capital Power and CPILP and certain of its subsidiaries will be terminated (or assigned) in consideration of a payment of C$10.0 million. Atlantic Power or its subsidiaries will assume the management of CPILP and intends to enter into a transitional services agreement with Capital Power for a term of up to 12 months following the completion of the Plan of Arrangement, in respect of certain services, which will facilitate the integration of CPILP into Atlantic Power.

The Arrangement Agreement contains customary representations, warranties and covenants. Among these covenants, CPILP and CPI Income Services Ltd. have each agreed not to solicit alternative transactions, except that CPILP may respond to an alternative transaction proposal that constitutes, or would reasonably be expected to lead to, a superior proposal. In addition, Atlantic Power or CPILP may be required to pay a C$35.0 million fee if the Arrangement Agreement is terminated in certain circumstances.

The completion of the Plan of Arrangement is subject to the receipt of all necessary court and regulatory approvals in Canada and the United States and certain other closing conditions. Atlantic Power and CPILP currently expect to complete the Plan of Arrangement in the fourth quarter of 2011, subject to receipt of required shareholder/unitholder, court and regulatory approvals and the satisfaction or waiver of the financing and other conditions to the Plan of Arrangement described in the Arrangement Agreement.

The full text of the Arrangement Agreement is attached as Annex A to this joint proxy statement. Atlantic Power and CPILP urge you to read it carefully.

Atlantic Power's Reasons for the Arrangement Agreement (see page 55)

On June 19, 2011, at a meeting of the Atlantic Power board of directors, by unanimous vote, the Atlantic Power board of directors determined that the Arrangement, including the issuance of Atlantic Power common shares to CPILP unitholders necessary to complete the Arrangement, is in the best interests of Atlantic Power and is fair to the stakeholders of Atlantic Power. In reaching these determinations, the Atlantic Power board of directors consulted with Atlantic Power's management and its legal, financial and other advisors, and also considered numerous factors, including strategic and financial benefits of the Arrangement and other factors which the Atlantic Power board of directors viewed as supporting its decisions.

The strategic benefits that the Atlantic Power board of directors believes should result from the combination of Atlantic Power and CPILP include, among other things, the following:

- Atlantic Power will have a larger and more diversified portfolio of contracted power generation assets;
- Atlantic Power's proven management team will be combined with CPILP's highly qualified operations and other personnel;
- Atlantic Power's market capitalization and enterprise value are expected to double, which is expected to add liquidity and enhance access to capital; and
- Atlantic Power's asset portfolio will expand and its geographic diversification and fuel type diversification will be enhanced.

The financial benefits that the Atlantic Power board of directors believes should result from the combination of Atlantic Power and CPILP include, among other things, the following:

- upon completion of the Plan of Arrangement, Atlantic Power intends to increase dividends;
- Atlantic Power's dividend sustainability for the foreseeable future is expected to strengthen as a result of immediate accretion to cash available for distribution; and
- a significant improvement in Atlantic Power's dividend payout ratio starting in 2012.

CPILP's Reasons for the Plan of Arrangement (see page 77)

At a meeting held on June 19, 2011, the members of the board of directors of the General Partner entitled to vote, being the independent directors of the General Partner, determined unanimously that the Arrangement is in the best interests of CPILP and is fair to the CPILP unitholders and resolved unanimously to recommend to the CPILP unitholders that they vote in favor of the Arrangement. In reaching these decisions, the board of directors of the General Partner consulted with its management and financial, legal and other advisors, and considered a variety of factors weighing in favor of or relevant to the Plan of Arrangement, including strategic and financial benefits of the Plan of Arrangement and other factors which the board of directors of the General Partner viewed as supporting its decisions.

The strategic benefits that the board of directors of the General Partner believes should result from the combination of Atlantic Power and CPILP include, among other things, the following:

- the creation of a larger, more diversified power company than CPILP on a standalone basis;
- the enhancement to Atlantic Power's proven management team by combining it with CPILP's highly qualified operations and other personnel;

the advantages resulting from larger scale and expanded scope of the Combined Company in meeting the challenges facing the power industry;

Table of Contents

the benefit of allowing the business of CPILP to grow independently of the Manager, which has its own power generation business, and the additional growth opportunities of the Combined Company;

the complementary nature of the respective products and geographical markets of the two entities; and

the expected market capitalization, free cash flow, liquidity and capital structure of the Combined Company relative to CPILP on a stand-alone basis.

The financial benefits that the board of directors of the General Partner believes should result from the combination of Atlantic Power and CPILP include, among other things, the following:

CPILP unitholders may receive Atlantic Power common shares as consideration for their CPILP units, which would allow them to own common shares of the Combined Company; and

the belief that the Combined Company will have a strong cash generation profile.

The other benefits that the board of directors of the General Partner believes should result from the combination of Atlantic Power and CPILP include, among other things, the following:

the inherent constraints associated with CPILP's current growth structure and the belief that the Combined Company will be well positioned and structured to generate and exploit future growth opportunities; and

the prospect of finding it necessary to develop or otherwise replace the management, employee work force and administrative functions performed by the Manager, given that Capital Power had advised CPILP that it was considering divesting itself of all of its CPILP interests in order to focus on its own core business.

Recommendations of the Board of Directors of Atlantic Power (see page 34)

At a meeting held on June 19, 2011, after considering the various factors and considerations further disclosed in the section titled "The Arrangement Agreement and Plan of Arrangement Atlantic Power's Reasons for the Arrangement Agreement; Recommendations of Atlantic Power's Board of Directors" Atlantic Power's board of directors unanimously determined that the Plan of Arrangement and the other transactions contemplated by the Arrangement Agreement, including the issuance of Atlantic Power common shares to CPILP unitholders necessary to complete the Plan of Arrangement, are in the best interests of Atlantic Power and is fair to its stakeholders. **Accordingly, the Atlantic Power board of directors unanimously recommends that the Atlantic Power shareholders vote "FOR" the Share Issuance Resolution.**

Recommendations of the Board of Directors of the General Partner (see page 39)

At a meeting held on June 19, 2011, after considering, among other things, the oral opinions of CIBC and Greenhill & Co. Canada Ltd. ("**Greenhill**"), subsequently confirmed in writing, the full text of which are attached as Annexes D and E, respectively, of this joint proxy statement, the members of the board of directors of the General Partner entitled to vote determined unanimously that the Plan of Arrangement is in the best interests of CPILP and is fair to the CPILP unitholders and resolved unanimously to recommend to the CPILP unitholders that they vote in favor of the Plan of Arrangement. The members of the board of directors of the General Partner entitled to vote also unanimously approved the Plan of Arrangement and the execution and performance of the Arrangement Agreement. **Accordingly, the board of directors of the General Partner unanimously recommends that the CPILP unitholders vote "FOR" the approval of the Arrangement Resolution.**

Table of Contents

Opinions of Atlantic Power's Financial Advisors (see page 58)

In connection with the Arrangement Agreement, TD Securities Inc. ("**TD Securities**") and Morgan Stanley & Co. LLC ("**Morgan Stanley**") each delivered to Atlantic Power's board of directors its written opinion, dated June 19, 2011, that, on such date and based upon and subject to the various limitations, qualifications and assumptions set forth in each written opinion, the consideration to be paid by Atlantic Power to CPILP unitholders pursuant to the Arrangement Agreement was fair, from a financial point of view, to Atlantic Power. The full texts of these opinions are attached as Annexes B and C, respectively, to this joint proxy statement.

You should read each opinion carefully in its entirety for a description of the assumptions made, the matters considered and limitations on the review undertaken. Each opinion is addressed to the board of directors of Atlantic Power, and addresses only the fairness from a financial point of view of the consideration to be paid by Atlantic Power to CPILP unitholders pursuant to the Arrangement Agreement. The opinions do not address any other aspect of the Plan of Arrangement and do not constitute a recommendation to the shareholders of Atlantic Power or unitholders of CPILP as to how to vote with respect to the Plan of Arrangement or any other matter. In addition, the opinions do not in any manner address the prices at which Atlantic Power common shares will trade following the consummation of the Plan of Arrangement or at any other time.

Opinions of CPILP's Financial Advisors (see page 81)

In connection with the Arrangement Agreement, on June 19, 2011, the board of directors of the General Partner received written opinions from each of CIBC and Greenhill stating that, on such date and based upon and subject to the various limitations, qualifications and assumptions set forth in each written opinion, the consideration to be received by CPILP unitholders pursuant to the Arrangement Agreement was fair from a financial point of view to such CPILP unitholders (other than the General Partner, CPI Investments and Atlantic Power in respect of the Greenhill opinion, and other than Capital Power and its affiliates in respect of the CIBC opinion). The full texts of these opinions, which set forth, among other things, the assumptions made, procedures followed, matters considered and qualifications and limitations on the scope of the review undertaken, are attached as Annexes D and E, respectively, to this joint proxy statement. CIBC also provided its written opinion to the special committee of the board of directors of the General Partner and the independent director of the board of directors of CPI Preferred Equity Ltd. that the consideration to be received by CPI Preferred Equity Ltd. pursuant to the membership interest purchase agreement in respect of the North Carolina assets is fair, from a financial point of view, to CPI Preferred Equity Ltd.

Interests of Certain CPILP Directors and Officers in the Plan of Arrangement (see page 82)

Certain of the directors and officers of the General Partner are also officers and/or directors of Capital Power and its affiliates and are not considered to be independent of CPILP within the meaning of applicable Canadian securities laws. Capital Power and its affiliates have interests in the Plan of Arrangement and certain other transactions to be completed in connection with the Plan of Arrangement that are different from, or in addition to, the interests of the other CPILP unitholders. See "Canadian Securities Law Matters" beginning on page 85.

The board of directors of the General Partner was aware of and considered these interests, among other matters, in evaluating the Plan of Arrangement, and in recommending that CPILP unitholders vote in favor of the Arrangement Resolution. The members of the board of directors of the General Partner who are officers and/or directors of Capital Power and its affiliates did not participate in the vote to approve the Plan of Arrangement, as a result of the potential conflict of interest presented by their positions with Capital Power and its affiliates.

The following table indicates, as of September 7, 2011, the number of CPILP units beneficially owned, directly or indirectly, or over which control or direction is exercised, by: (i) each director and

CPI Investments owns 16,513,504 CPILP units. Under the Plan of Arrangement, Atlantic Power will acquire all of the outstanding shares of CPI Investments on effectively the same basis as the acquisition of CPILP units under the Plan of Arrangement.

All current directors and officers of the General Partner will resign their positions in connection with the Plan of Arrangement.

Regulatory Approvals Required for the Plan of Arrangement and Other Regulatory Matters (see page 88)

CPILP units currently trade on the TSX. After the Plan of Arrangement, Atlantic Power intends to delist the CPILP units from the TSX. The preferred shares of CPI Preferred Equity Ltd. will remain outstanding and listed on the TSX.

Atlantic Power common shares currently trade on the TSX and NYSE. Atlantic Power will also apply to list Atlantic Power common shares issuable under the Plan of Arrangement on the NYSE and the TSX, and it is a condition to the completion of the Plan of Arrangement that Atlantic Power shall have obtained approval for these listings.

In addition to certain regulatory approvals of the power generation regulatory authorities required in connection with the Plan of Arrangement, the Arrangement is subject to approval under the:

Investment Canada Act.

Competition Act (Canada). A "no action" letter and waiver from the merger notification under this statute was received on August 26, 2011.

Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (United States). Early termination of the waiting period under this statute was granted on August 26, 2011.

United States Federal Power Act. An application under Section 203 of this statute was made on July 25, 2011.

The Arrangement must also be approved by the Court of Queen's Bench of Alberta. The court will be asked to make an order approving the Arrangement and determine that the Arrangement is fair to the CPILP unitholders. CPILP and the General Partner will apply to the court for this order if the regulatory approvals described above have been obtained and the CPILP unitholders approve the Arrangement Resolution at the CPILP special meeting.

Summaries of Other Agreements Relating to the Arrangement

The Support Agreements (see page 104)

As part of the Plan of Arrangement, Atlantic Power will acquire all of the outstanding shares of CPI Investments (an entity indirectly owned by Capital Power and EPCOR), the direct and indirect holder of 16,513,504 CPILP units, on effectively the same basis as the acquisition of CPILP units under the Plan of Arrangement. In order to confirm the commitment of each shareholder of CPI Investments to support the Plan of Arrangement, contemporaneously with the entering into of the Arrangement Agreement, Atlantic Power entered into two support agreements, one with EPCOR and the other with Capital Power and Capital Power LP, the entity through which Capital Power holds its shares of CPI Investments. Pursuant to the support agreements, each of Capital Power LP and EPCOR agreed to, among other things, (i) vote all of its shares of CPI Investments in favor of the Plan of Arrangement and any related matters to give legal effect to the Plan of Arrangement, (ii) vote all of its shares of CPI Investments against any resolutions or proposals that might reasonably be expected to impede, frustrate, delay or prevent the Plan of Arrangement, (iii) not sell, transfer, pledge or assign its shares of CPI Investments or enter into a voting agreement with respect to such shares, (iv) not exercise any rights or remedies to impede, frustrate, delay or prevent the Plan of Arrangement and (v) abide by certain non-solicitation covenants in respect of CPILP and CPI Investments.

Pursuant to the support agreement among Atlantic Power, Capital Power LP and Capital Power, among other things, (i) Capital Power agreed to cause Capital Power LP to fulfill its obligations under the support agreement and not to make certain acquisition proposals in respect of CPILP or CPI Investments, (ii) Capital Power LP and CPI Investments made certain representations specific to the Plan of Arrangement, including with respect to the representations and warranties made by CPI Investments in the Arrangement Agreement and equipment and personal property owned by Capital Power LP and/or Capital Power and used in the operations of the CPILP or any of the CPILP's facilities and (iii) Capital Power LP agreed that for a period of 90 days commencing on the Effective Date, Capital Power LP will not, without the prior consent of Atlantic Power, offer, sell, pledge, grant any option to purchase, hedge, transfer, assign, make any short sale or otherwise dispose of any Atlantic Power common shares received pursuant to the Plan of Arrangement (or agree to, or announce, any intention to do so) with certain limited customary exceptions. For a further discussion of the support agreements, see "Summary of the Arrangement Agreement Summaries of Other Agreements Relating to the Arrangement Support Agreements."

Management Agreements Termination Agreement and Management Agreement Assignment Agreement (see page 106)

On June 20, 2011, certain subsidiaries of Capital Power entered into an agreement (the "**Management Agreements Termination Agreement**") with CPILP and certain of its subsidiaries pursuant to which the parties agreed to terminate each of the management and operations agreements between them, other than the Frederickson Agreement (as defined below), effective immediately upon completion of the Plan of Arrangement. In consideration for the termination of the management and operations agreements, CPILP and its subsidiaries agreed to pay to the subsidiaries of Capital Power an aggregate of C$8.5 million.

On June 20, 2011, a subsidiary of Capital Power entered into an agreement with Atlantic Power and Frederickson Power L.P., a subsidiary of CPILP, pursuant to which the subsidiary of Capital Power

agreed to assign its right, benefit, interest and obligation in, to and under the operations and maintenance agreement in respect of CPILP's Frederickson facility (the "**Frederickson Agreement**") to Atlantic Power. The assignment will be effective immediately upon completion of the Plan of Arrangement. In consideration for the assignment, Atlantic Power has agreed to pay C$1.5 million to the subsidiary of Capital Power. The assignment is conditional on, among other things, receipt of the consent of Puget Sound Energy, Inc., the counterparty to the Frederickson Agreement, to the assignment.

North Carolina Purchase and Sale Agreement (see page 106)

On June 20, 2011, a subsidiary of Capital Power entered into a purchase and sale agreement with certain subsidiaries of CPILP, pursuant to which the subsidiary of Capital Power agreed to purchase and the subsidiaries of CPILP agreed to sell indirectly all of the membership interests in the limited liability company that owns CPILP's Roxboro and Southport power plants in North Carolina. The purchase price for the membership interests is approximately C$121.4 million. Closing of the purchase and sale will take place on the Effective Date. Closing of the purchase and sale will be conditional on, among other things, receipt of all necessary regulatory approvals and consents, including, without limitation, expiration or early termination of the applicable waiting periods under the *Hart-Scott Rodino Antitrust Improvements Act of 1976* and prior authorization from the Federal Energy Regulatory Commission under Section 203 of the *United States Federal Power Act*.

Employee Hiring and Lease Assignment Agreement (see page 106)

On June 20, 2011, Atlantic Power, Capital Power and Capital Power Operations (USA) Inc. ("CPO USA") entered into an employee hiring and lease assignment agreement pursuant to which Atlantic Power agreed to assume the employment of certain designated employees who perform functions related to CPILP's business. This agreement was necessitated by the fact that neither CPILP nor the General Partner has any employees. Persons performing the functions of employees of CPILP are currently employed by Capital Power and CPO USA rather than directly by CPILP. For further details regarding CPILP employees, see "Business of the Partnership Employees of the Partnership" included in CPILP's Annual Information Form dated March 11, 2011, which is delivered with, and/or incorporated by reference into, this joint proxy statement.

Pursuant to the agreement, Atlantic Power will (i) be bound by the collective agreements currently in place for Capital Power's unionized employees and, (ii) for certain individuals whose employment is not governed by the collective agreements, Atlantic Power will make offers of employment on substantially the same (or better) terms and conditions of employment, in the aggregate, as are in effect on the date of the offer. Existing employee benefits provided by Capital Power will vest on closing of the Plan of Arrangement and be paid out by Capital Power. The agreement also contemplates the negotiation of the assignment of office leases for Capital Power's offices located in the cities of Richmond, B.C., Toronto, Ontario and Chicago, Illinois.

Canadian Pension Transfer Agreement (see page 107)

On June 20, 2011, Atlantic Power and Capital Power entered into a Canadian pension transfer agreement pursuant to which Atlantic Power agreed to assume the pension plan assets and obligations from Capital Power related to the employees that it assumes pursuant to the employee hiring and lease assignment agreement described above.

The agreement primarily relates to the Capital Power Pension Plan (which is a Canadian registered pension plan with both a defined benefit and defined contribution component). For further details regarding Capital Power's pension plan assets and obligations, see "Compensation Discussion and Analysis Pension Programs" included in CPILP's Annual Information Form dated March 11, 2011, which is delivered with, and/or incorporated by reference into, this joint proxy statement. The

Table of Contents

agreement provides that the assets associated with the pension plan obligations of the employees being transferred to Atlantic Power will be carved out of the Capital Power Pension Plan and transferred to a new plan to be established by Atlantic Power. The new pension plan for Atlantic Power will have equivalent terms to the Capital Power Pension Plan.

If there is a deficiency in the Capital Power Pension Plan on a going concern basis at the time of closing of the Plan of Arrangement, Capital Power is required to pay Atlantic Power the amount of the deficiency related to the assumed employees (and if there is a surplus, Atlantic Power is required to make a payment to Capital Power). Currently, it is estimated that there is a deficiency of approximately C$2.0 million. Atlantic Power is required to establish savings plans that are substantially the same as certain group RRSPs provided by Capital Power. Capital Power and Atlantic Power will take all commercially reasonable steps to permit transferring employees with balances in Capital Power's Group RRSPs to transfer their assets to Atlantic Power's Group RRSPs.

The Atlantic Power Special Meeting

Date, Time and Place (see page 34)

The special meeting of Atlantic Power shareholders will be held at the King Edward Hotel, , 37 King Street East, Toronto, Ontario on , the day of , 2011 at the hour of a.m. (Toronto time).

Purpose (see page 34)

At the Atlantic Power special meeting, Atlantic Power shareholders will be asked to vote on the following resolutions:

- to consider, and if thought advisable, to approve, with or without variation, the Share Issuance Resolution, the full text of which is set forth in Annex F to this management proxy circular and joint proxy statement, authorizing Atlantic Power to issue such number of common shares in the capital of Atlantic Power as is necessary to complete the Arrangement, being 1.3 Atlantic Power common shares for each CPILP unit to a maximum of 31,500,221 Atlantic Power common shares pursuant to the terms of the Arrangement Agreement (all as more particularly described in this joint proxy statement); and

- to transact such further or other business as may properly come before the Atlantic Power special meeting or any adjournments or postponements thereof.

Share Issuance Resolution (see page 34)

Pursuant to the rules of the NYSE and TSX, securityholder approval is required in instances where the number of securities issued or issuable in payment of the purchase price in a transaction such as the Plan of Arrangement exceeds 20% (NYSE) or 25% (TSX) of the number of securities of the listed issuer which are outstanding, on a non-diluted basis. Because the Arrangement Agreement contemplates the issuance of Atlantic Power common shares in excess of these thresholds on a non-diluted basis, the rules of the NYSE and TSX require that Atlantic Power must obtain approval of the Share Issuance Resolution by the holders of a majority of the Atlantic Power common shares represented in person or by proxy at the Atlantic Power special meeting.

As of the close of business on the date of this joint proxy statement, there were approximately 68.6 million outstanding Atlantic Power common shares. Pursuant to the Plan of Arrangement, Atlantic Power will issue approximately 31.5 million Atlantic Power common shares (equal to approximately 46% of Atlantic Power's current issued and outstanding common shares).

Table of Contents

Record Date; Shares Entitled to Vote (see page 35)

Only holders of Atlantic Power common shares at the close of business on , 2011, the record date for the Atlantic Power special meeting, will be entitled to notice of, and to vote at, the Atlantic Power special meeting or any adjournments or postponements thereof. On the record date, there were outstanding a total of approximately Atlantic Power common shares. Each outstanding Atlantic Power common share is entitled to one vote on the Share Issuance Resolution and any other matter properly coming before the Atlantic Power special meeting.

Required Vote (see page 35)

The Share Issuance Resolution will be approved if a majority of the votes cast by Atlantic Power shareholders, either in person or by proxy at the Atlantic Power special meeting are voted in favor of the resolution.

Share Ownership by and Voting Rights of Directors and Executive Officers (see page 35)

As of the close of business on the Atlantic Power record date, Atlantic Power's directors and executive officers and their affiliates beneficially owned and had the right to vote 0.36 million Atlantic Power common shares at the Atlantic Power special meeting, which represents approximately 0.01% of the Atlantic Power common shares entitled to vote at the Atlantic Power special meeting. Each of the directors and officers of Atlantic Power have indicated their intention to vote in favor of the Share Issuance Resolution.

Failure to Vote and Broker Non-Vote (see page 35)

If you are an Atlantic Power shareholder and fail to vote or fail to instruct your broker, investment dealer or other intermediary to vote, it will have no effect on any of the Atlantic Power proposals, assuming a quorum is present.

The CPILP Special Meeting

Date, Time and Place (see page 39)

The special meeting of CPILP unitholders will be held at the , on , the day of , 2011 at the hour of a.m. (Edmonton time).

Purpose (see page 39)

At the CPILP special meeting, CPILP unitholders will be asked to vote on the following resolutions:

- to consider, and, if thought advisable, to pass, with or without variation, pursuant to the Interim Order of the Court of Queen's Bench of Alberta, the Arrangement Resolution, the full text of which is set forth in Annex G to this management proxy circular and joint proxy statement, to approve an arrangement under section 192 of the CBCA (all as more particularly described in this joint proxy statement); and

- to transact such further or other business as may properly come before the CPILP special meeting or any adjournments or postponements thereof.

Record Date; Units Entitled to Vote (see page 39)

Only holders of CPILP units at the close of business on , 2011, the record date for the CPILP special meeting, will be entitled to notice of, and to vote at, the CPILP special meeting or any adjournments or postponements thereof. On the record date, there were outstanding a total of

Table of Contents

56,597,899 CPILP units. Each outstanding CPILP unit is entitled to one vote on the Arrangement Resolution and any other matter properly coming before the CPILP special meeting.

Required Vote (see page 40)

Pursuant to the Interim Order, the number of votes required to pass the Arrangement Resolution shall be not less than $66^2/_3$% of the votes cast by CPILP unitholders, either in person or by proxy, at the CPILP special meeting. In addition, the Arrangement Resolution must be approved by a simple majority of the votes cast by the CPILP unitholders present in person or by proxy at the CPILP special meeting, after excluding those votes required to be excluded pursuant to the minority approval provisions of MI 61-101, being the votes of "interested parties" and their related parties and joint actors, which includes the General Partner and CPI Investments. Notwithstanding the foregoing, the Arrangement Resolution authorizes the board of directors of the General Partner, without further notice to or approval of the CPILP unitholders, subject to the terms of the Plan of Arrangement and the Arrangement Agreement, to amend the Plan of Arrangement or the Arrangement Agreement or to decide not to proceed with the Plan of Arrangement at any time prior to the Plan of Arrangement becoming effective pursuant to the provisions of the CBCA.

Unit Ownership by and Voting Rights of Directors and Executive Officers (see page 39)

As of the close of business on the CPILP record date, CPILP's directors and executive officers and their affiliates beneficially owned and had the right to vote CPILP units at the CPILP special meeting, which represents approximately % of the CPILP units entitled to vote at the CPILP special meeting. It is expected that CPILP's directors and executive officers will vote in favor of the Arrangement Resolution.

Failure to Vote and Broker Non-Vote (see page 40)

If you are a CPILP unitholder and fail to vote or fail to instruct your broker, investment dealer or other intermediary to vote, it will have no effect on any of the CPILP proposals, assuming a quorum is present.

Procedures for the Surrender of Unit Certificate and Receipt of Consideration (see page 42)

Each registered holder of CPILP units is required to validly complete and duly sign a Letter of Transmittal and Election Form and submit such documents, together with such holder's CPILP unit certificate(s), if any, to the Depositary in order to receive the consideration under the Plan of Arrangement. The details of the procedures for the deposit of CPILP unit certificates and the delivery by the Depositary of Atlantic Power common shares and cash are set out in the Letter of Transmittal and Election Form accompanying this joint proxy statement. If you hold your CPILP units through a nominee such as a broker or dealer, you should carefully follow any instructions provided to you by such nominee for making an election. CDS Clearing and Depositary Services Inc. is the only registered holder of CPILP units. All other holders should consult their broker, dealer or other nominee through which they hold CPILP units for instructions and assistance in making an election. Pursuant to the terms of the Arrangement Agreement and the Plan of Arrangement, CPILP unitholders are entitled to receive, at their election, for each CPILP unit held (i) C$19.40 in cash (the "**Cash Consideration**") or (ii) 1.3 Atlantic Power common shares (the "**Share Consideration**"), subject to the Aggregate Cash Maximum and the Aggregate Share Maximum (together the "**Consideration**").

The Election Deadline to deposit such properly completed Letter of Transmittal and Election Form with the Depositary is 5:00 p.m. (Edmonton time) on the date that is three business days prior to the date of the CPILP special meeting. Assuming the CPILP special meeting is held on , 2011, the Election Deadline will be 5:00 p.m. (Edmonton time) on , 2011. CPILP unitholders who do

Table of Contents

not forward to the Depositary a validly completed and duly signed Letter of Transmittal and Election Form, together with their CPILP unit certificate(s), if any, will not receive the cash and/or Atlantic Power common shares, as applicable, to which they are otherwise entitled until such a deposit is made. Any CPILP unitholder who does not deposit a duly completed Letter of Transmittal and Election Form with the Depositary prior to the Election Deadline shall be deemed to have elected to receive the Share Consideration in respect of all of such holder's CPILP units.

Any certificate which immediately prior to the Effective Time represented outstanding CPILP units that is not deposited with the Depositary together with all other instruments or documents required by the Plan of Arrangement on or prior to the sixth anniversary of the Effective Date will cease to represent a claim or interest of any kind or nature as a CPILP unitholder or as a shareholder of Atlantic Power. On such date, the cash and Atlantic Power common shares to which the former holder of the certificate referred to in the preceding sentence was ultimately entitled under the Plan of Arrangement will be deemed to have been donated, surrendered and forfeited for no consideration to Atlantic Power.

Appraisal/Dissent Rights (see page 47)

The shareholders of Atlantic Power are not entitled to dissent rights in connection with the Share Issuance Resolution.

The unitholders of CPILP are not entitled to dissent rights in connection with the Arrangement Resolution.

U.S. Securities Law Matters (see page 87)

The common shares of Atlantic Power to be issued pursuant to the Plan of Arrangement will not be registered under the *Securities Act of 1933*, as amended (the "**Securities Act**"), or the securities laws of any state of the United States and will be issued in reliance upon the exemption from registration set forth in Section 3(a)(10) of the Securities Act. The common shares of Atlantic Power to be issued pursuant to the Plan of Arrangement will be freely transferable under U.S. federal securities laws, except for securities held by persons who are deemed to be "affiliates" of Atlantic Power following completion of the Plan of Arrangement.

Material Canadian Federal Income Tax Consequences (see page 108)

CPILP unitholders will realize a taxable disposition of their CPILP units under the Plan of Arrangement. Eligible holders that receive Atlantic Power common shares pursuant to the Plan of Arrangement will be entitled to make a joint tax election with Atlantic Power under the Tax Act that will, depending on the circumstances of each particular CPILP unitholder, allow for a full or partial deferral of taxable gains that would otherwise be realized.

Atlantic Power common shares will be considered "qualified investments" for registered retirement savings plans and other tax-exempt plans.

The primary Canadian federal income tax considerations arising in respect of the Plan of Arrangement, as well as the procedure to be followed by CPILP unitholders intending to make a joint tax election, are described more fully below under the heading "Material Canadian Federal Income Tax Considerations".

Material U.S. Federal Income Tax Consequences (see page 112)

CPILP does not permit non-residents of Canada (as determined for purposes of the Tax Act) to hold CPILP units. Persons who are not US Holders will not be subject to U.S. federal income tax with respect to their CPILP units or Atlantic Power common shares received in exchange therefor unless

Table of Contents

(1) such person's income with respect thereto is effectively connected with the conduct of a trade or business in the United States, or (2) such person is an individual who is present in the United States for 183 days or more during the taxable year and has a "tax home" in the United States. Even if a non-US Holder is subject to U.S. federal income tax under either test in the preceding sentence, such person may be eligible for relief from (or reduction to) any U.S. income tax under a tax treaty. See "Certain U.S. Federal Income Tax Considerations" beginning on page 112.

Atlantic Power Financing (see page 113)

Atlantic Power intends to finance the cash portion of the purchase price to complete the Plan of Arrangement by issuing up to approximately C$200.0 million of equity and up to approximately C$425.0 million of debt through public and private offerings. However, in the event that such financing is not available on terms satisfactory to Atlantic Power, Atlantic Power has received the TLB Commitment Letter, evidencing the commitment of a Canadian chartered bank and another financial institution to structure, arrange, underwrite and syndicate a senior secured credit facility consisting of the Tranche B Facility in the amount of $625 million, subject to the terms and conditions set forth therein.

(c) Diluted earnings (loss) per share is computed including dilutive potential shares, which include those issuable upon conversion of convertible debentures and under Atlantic Power's long term incentive plan. Because Atlantic Power reported a loss during the years ended December 31, 2010, 2009, 2007 and 2006, and for the six month period ended June 30, 2010, the effect of including potentially dilutive shares in the calculation during those periods is anti-dilutive. Please see the notes to Atlantic Power's historical consolidated financial statements for information relating to the number of shares used in calculating basic and diluted earnings per share for the periods presented.

(d) At the time of Atlantic Power's initial public offering, its publicly traded security was an income participating security, or an "IPS", each of which was comprised of one common share and C$5.767 principal amount of 11% subordinated notes due 2016. On November 27, 2009, Atlantic Power converted from the IPS structure to a traditional common share structure. In connection with the conversion, each IPS was exchanged for one new common share.

Certain Historical and Pro Forma Per Share/Unit Data

The following tables set forth certain historical, pro forma and pro forma equivalent per share financial information for Atlantic Power common shares and per unit financial information for CPILP units. The pro forma and pro forma equivalent per share/unit information gives effect to the Plan of Arrangement as if the Plan of Arrangement had occurred on June 30, 2011 in the case of book value per share data and as of January 1, 2010 in the case of net income per share/unit data.

The pro forma per share/unit balance sheet information combines CPILP's June 30, 2011 unaudited consolidated balance sheet with Atlantic Power's June 30, 2011 unaudited consolidated balance sheet. The pro forma per share/unit income statement information for the fiscal year ended December 31, 2010, combines CPILP's audited consolidated statement of income for the fiscal year ended December 31, 2010, with Atlantic Power's audited consolidated statement of operations for the fiscal year ended December 31, 2010. The pro forma per share/unit income statement information for the six months ended June 30, 2011, combines CPILP's unaudited consolidated statement of income for the six months ended June 30, 2011, with Atlantic Power's unaudited consolidated statement of operations for the six months ended June 30, 2011. The CPILP pro forma equivalent per share/unit financial information is calculated by multiplying the unaudited Atlantic Power pro forma combined per share/unit amounts by 1.3 (being the exchange ratio under the Plan of Arrangement). The balance sheet of CPILP as of June 30, 2011 has been translated using a C$/$ exchange rate of C$0.9643 to $1.00.

The per share data for the Combined Company on a pro forma basis presented below is not necessarily indicative of the financial condition of the Combined Company had the Plan of Arrangement been completed on June 30, 2011 and the operating results that would have been achieved by the Combined Company had the Plan of Arrangement been completed as of the beginning of the period presented, and should not be construed as representative of the Combined Company's future financial condition or operating results. The per share data for the Combined Company on a pro forma basis presented below has been derived from the unaudited pro forma condensed combined consolidated financial data of the Combined Company included in this joint proxy statement. In addition, the unaudited pro forma information does not purport to indicate balance sheet data or results of operations data as of any future date or for any future period.

RISK FACTORS

In addition to the other information included and incorporated by reference into this joint proxy statement, including the matters addressed in the section entitled "Cautionary Note Regarding Forward-Looking Statements," you should carefully consider the following risks before deciding whether to vote for the Share Issuance Resolution, in the case of Atlantic Power shareholders, or the Arrangement Resolution, in the case of CPILP unitholders. In addition, you should read and consider Atlantic Power's Annual Report on Form 10-K for the year ended December 31, 2010, as updated by subsequent Quarterly Reports on Form 10-Q, all of which are filed with the SEC and have been delivered with, and/or incorporated by reference into this joint proxy statement. See "Where You Can Find More Information" beginning on page 150.

Risk Factors Relating to the Plan of Arrangement

The exchange ratio is fixed and will not be adjusted in the event of any change in either CPILP's unit price or Atlantic Power's share price.

Under the Plan of Arrangement, for each CPILP unit held, CPILP unitholders will be entitled to elect to receive either C$19.40 in cash or 1.3 Atlantic Power common shares, subject to proration. This exchange ratio is fixed in the Plan of Arrangement and will not be adjusted for changes in the market price of either CPILP units or Atlantic Power shares. Changes in the price of Atlantic Power's shares prior to completion of the Plan of Arrangement may affect the market value that CPILP unitholders will receive on the date of the effective time for the Plan of Arrangement. Share price changes may result from a variety of factors (many of which are beyond Atlantic Power's or Capital Power's control).

Because the Plan of Arrangement will be completed after the date of the special meetings, at the time of the applicable special meeting, you will not know the exact market value of the Atlantic Power shares that CPILP unitholders will receive upon completion of the Plan of Arrangement.

If the price of Atlantic Power common shares increases between the time of the special meetings and the effective time of the Plan of Arrangement, CPILP unitholders will receive Atlantic Power common shares that have a market value that is greater than the market value of such shares at the time of the special meetings. If the price of Atlantic Power common shares decreases between the time of the special meetings and the effective time of the Plan of Arrangement, CPILP unitholders will receive Atlantic Power common shares that have a market value that is less than the market value of such shares at the time of the special meetings. Therefore, because the exchange ratio is fixed, Atlantic Power shareholders and CPILP unitholders cannot be sure at the time of the special meetings of the market value of the share consideration that will be paid to CPILP unitholders upon completion of the Plan of Arrangement.

Failure to complete the Plan of Arrangement could negatively impact the share or unit prices and the future business and financial results of Atlantic Power and CPILP.

If the Plan of Arrangement is not completed, the ongoing businesses of Atlantic Power and CPILP may be adversely affected. If the Plan of Arrangement is not completed, CPILP will have to consider alternative transactions, including the internalization of management. Additionally, if the Plan of Arrangement is not completed and the Arrangement Agreement is terminated, either Atlantic Power or CPILP, as the case may be, may be required to pay to the other a break-up fee under the Arrangement Agreement in the amount of C$35.0 million. The foregoing risks, or other risks arising in connection with the failure of the Plan of Arrangement, including the diversion of management attention from conducting the business of the respective entity and pursuing other opportunities during the pendency of the Plan of Arrangement, may have an adverse effect on the business, operations, financial results and share or unit prices of Atlantic Power and CPILP.

Table of Contents

The Arrangement Agreement contains provisions that could discourage a potential competing acquirer of CPILP.

The Arrangement Agreement contains "no shop" provisions that, subject to limited exceptions, restrict CPILP's and the General Partner's ability to solicit, encourage, facilitate or discuss competing third-party proposals to acquire units or assets of CPILP. In certain specified circumstances, one of the parties will be required to pay a break-up fee of C$35.0 million to the other party. See "Summary of the Arrangement Agreement Covenants Non-Solicitation" on page 100 and " Termination of the Arrangement Agreement Termination Payment" beginning on page 103.

These provisions could discourage a potential competing acquirer that might have an interest in acquiring all or a significant part of CPILP from considering or proposing that acquisition, even if it were prepared to pay consideration with a higher per share or unit cash or market value than the market value proposed to be received or realized in the Plan of Arrangement, or might result in a potential competing acquirer proposing to pay a lower price than it might otherwise have proposed to pay because of the added expense of the C$35.0 million termination fee that may become payable in certain circumstances.

In certain circumstances, if the Arrangement Agreement is terminated without any payment of a termination payment, Atlantic Power or CPILP may be required to make an expense reimbursement payment to the other party.

Under the Arrangement Agreement, CPILP would be required to make an expense reimbursement payment to Atlantic Power, up to a maximum of C$8.0 million, in the event the Arrangement Agreement is terminated in certain circumstances, including, but not limited to, if the CPILP unitholders do not approve the Arrangement Resolution at the CPILP special meeting.

Under the Arrangement Agreement, Atlantic Power would be required to make an expense reimbursement payment to CPILP, up to a maximum of C$8.0 million, in the event the Arrangement Agreement is terminated in certain circumstances, including, but not limited to, if the Atlantic Power shareholders do not approve the Share Issuance Resolution at the Atlantic Power special meeting.

If the Arrangement Agreement is terminated and either Atlantic Power or CPILP determines to seek another business combination, it may not be able to negotiate a transaction with another party on terms comparable to, or better than, the terms of the Plan of Arrangement.

If the financing for the transactions contemplated by the Arrangement Agreement becomes unavailable, the Plan of Arrangement may not be completed.

Atlantic Power intends to finance the cash portion of the purchase price to complete the Plan of Arrangement by issuing up to approximately C$200.0 million of equity and up to approximately C$425.0 million of debt through public and private offerings. However, in the event that such financing is not available on terms satisfactory to Atlantic Power, Atlantic Power has received the written commitment of a Canadian chartered bank and another financial institution to structure, arrange, underwrite and syndicate the Tranche B Facility, being a senior secured credit facility in the amount of $625 million. Funding under the Tranche B Facility is subject to certain conditions, including, without limitation, that there shall not have occurred a Material Adverse Effect (as defined in the Arrangement Agreement) in respect of Atlantic Power, CPILP, the General Partner and CPI Investments taken as a whole. In the event that the lenders under the Tranche B Facility fail to provide funding, Atlantic Power may not be able to complete the Plan of Arrangement and may be subject to a termination fee of C$35.0 million.

Table of Contents

Obtaining required governmental and court approvals necessary to satisfy closing conditions may delay or prevent completion of the Plan of Arrangement.

Completion of the Plan of Arrangement is conditioned upon the receipt of certain governmental authorizations, consents, orders or other approvals, including but not limited to approval under the *Investment Canada Act*, the *Competition Act* (Canada), the *Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended* (United States) and the *United States Federal Power Act*. The Plan of Arrangement must also be approved by the Court of Queen's Bench of Alberta. No assurance can be given that the approvals not obtained to date will be obtained, and, even if such approvals are obtained, no assurance can be given as to the terms, conditions and timing of the approvals or that they will satisfy the terms of the Arrangement Agreement. See Summary of the Arrangement Agreement Conditions Precedent to the Plan of Arrangement" beginning on page 94 for a discussion of the conditions to the completion of the Plan of Arrangement and "The Arrangement Agreement and Plan of Arrangement Regulatory Approvals Required for the Plan of Arrangement and Other Regulatory Matters" beginning on page 88 for a description of the regulatory approvals necessary in connection with the Plan of Arrangement.

Risk Factors Relating to the Combined Company Following the Plan of Arrangement

The failure to integrate successfully the businesses of Atlantic Power and CPILP in the expected timeframe would adversely affect the Combined Company's future results.

The success of the Plan of Arrangement will depend, in large part, on the ability of the Combined Company to realize the anticipated benefits, including cost savings, from combining the businesses of Atlantic Power and CPILP. To realize these anticipated benefits, the businesses of Atlantic Power and CPILP must be successfully integrated. This integration will be complex and time-consuming. The failure to integrate successfully and to manage successfully the challenges presented by the integration process may result in the Combined Company not fully achieving the anticipated benefits of the Plan of Arrangement.

Potential difficulties that may be encountered in the integration process include the following:

- challenges and difficulties associated with managing the larger, more complex, combined business;
- conforming standards, controls, procedures and policies, business cultures and compensation structures between the entities;
- integrating personnel from the two entities while maintaining focus on developing, producing and delivering consistent, high quality services;
- consolidating corporate and administrative infrastructures;
- coordinating geographically dispersed organizations;
- potential unknown liabilities and unforeseen expenses, delays or regulatory conditions associated with the Plan of Arrangement;
- performance shortfalls at one or both of the entities as a result of the diversion of management's attention caused by completing the Plan of Arrangement and integrating the entities' operations; and
- the ability of the Combined Company to deliver on its strategy going forward.

Table of Contents

The growth plans of the Combined Company are dependent on future acquisitions and growth opportunities that may not be realized.

The ability to expand through acquisitions and growth opportunities is integral to the Combined Company's business strategy and requires that it identifies and consummates suitable acquisition or investment opportunities that meet its investment criteria and are compatible with its growth strategy. The Combined Company may not be successful in identifying and consummating acquisitions or investments that meet its investment criteria on satisfactory terms or at all. The failure to identify and consummate suitable acquisitions, to take advantage of other investment opportunities, or to integrate successfully any acquisitions without substantial expense, delay or other operational or financial problems, would impede the Combined Company's growth and negatively affect its results of operations and cash available for distribution to its shareholders.

Increased debt and debt service obligations may adversely affect the Combined Company.

Atlantic Power intends to finance the cash portion of the purchase price to complete the Plan of Arrangement by issuing up to approximately C$200.0 million of equity and up to approximately C$425.0 million of debt through public and private offerings. However, in the event Atlantic Power is unable to successfully complete such offerings, it may need to borrow up to approximately $625.0 million pursuant to a senior secured term loan facility. Such facility will be guaranteed by Atlantic Power and each of its existing and subsequently acquired or organized direct or indirect subsidiaries (excluding CPILP and each of its subsidiaries), and to contain covenants restricting certain actions by Atlantic Power and its subsidiaries (including CPILP and its subsidiaries), including financial, affirmative and negative covenants, which may include limitations on the ability to incur indebtedness, create liens and merge and consolidate with other companies, in each case, subject to exceptions and baskets that may be mutually agreed upon by Atlantic Power and the lender parties thereto, the exact terms of which will be negotiated before the effective time for the Plan of Arrangement.

After the Plan of Arrangement, the Combined Company will have an increased amount of indebtedness. On a pro forma basis assuming the Plan of Arrangement was consummated on , the Combined Company would have had of indebtedness. The Combined Company may also obtain additional long-term debt and working capital lines of credit to meet future financing needs, subject to certain restrictions under its existing indebtedness, which would increase its total debt.

The potential significant negative consequences on the Combined Company's financial condition and results of operations that could result from its increased amount of debt include:

- limitations on the Combined Company's ability to obtain additional debt or equity financing;
- instances in which the Combined Company is unable to meet the financial covenants contained in its debt agreements or to generate cash sufficient to make required debt payments, which circumstances would have the potential of accelerating the maturity of some or all of the Combined Company's outstanding indebtedness;
- the allocation of a material portion of the Combined Company's cash flow from operations to service the Combined Company's debt, thus reducing the amount of the Combined Company's cash flow available for other purposes, including funding operating costs and capital expenditures that could improve the Combined Company's competitive position, results of operations or share price;
- requiring the Combined Company to sell debt or equity securities or to sell some of its core assets, possibly on unfavorable terms, to meet payment obligations;
- compromising the Combined Company's flexibility to plan for, or react to, competitive challenges in its business and the power industry;

Table of Contents

the possibility of the Combined Company being put at a competitive disadvantage with competitors that do not have as much debt as the Combined Company, and competitors that may be in a more favorable position to access additional capital resources in a timely manner; and

limitations on the Combined Company's ability to execute business development activities to support its strategies.

A downgrade in Atlantic Power's or CPILP's credit ratings or any deterioration in their credit quality could negatively affect the Combined Company's ability to access capital and its ability to hedge and could trigger termination rights under certain contracts.

A downgrade in Atlantic Power's or CPILP's credit ratings or deterioration in their credit quality could adversely affect the Combined Company's ability to renew existing, or obtain access to new, credit facilities and could increase the cost of such facilities and trigger termination rights or enhanced disclosure requirements under certain contracts to which CPILP is a party. Any downgrade of CPILP's corporate credit rating could cause counterparties and financial derivative markets to require CPILP to post letters of credit or other collateral, make cash prepayments, obtain a guarantee agreement or provide other security, all of which would expose CPILP to additional costs.

The Plan of Arrangement, if completed, will dilute the the ownership position of Atlantic Power's current common shareholders in the Combined Company.

If the Plan of Arrangement is completed, Atlantic Power would issue approximately 31.5 million common shares in connection with the Plan of Arrangement, representing approximately 31.49% of its outstanding common shares after giving effect to the Plan of Arrangement (based on the number of Atlantic Power common shares outstanding on June 20, 2011, being the date of the Arrangement Agreement, and excluding any common shares that may be issued to finance the cash portion of the purchase price under the Plan of Arrangement). Consequently, following the Plan of Arrangement, Atlantic Power's current shareholders, as a general matter, would have less influence over the management and policies of the Combined Company than they currently exercise over the management and policies of Atlantic Power.

The Combined Company's results of operations may differ significantly from the unaudited pro forma condensed combined financial data included in this joint proxy statement.

This joint proxy statement includes unaudited pro forma condensed combined financial statements to illustrate the effects of the Plan of Arrangement on Atlantic Power's historical financial position and operating results. The unaudited pro forma condensed combined statements of income for the fiscal year ended December 31, 2010 and for the six months ended June 30, 2011 combine the historical consolidated statements of income of Atlantic Power and CPILP, giving effect to the Plan of Arrangement, as if it had occurred on January 1, 2010. The unaudited pro forma condensed combined balance sheet as of June 30, 2011 combines the historical consolidated balance sheets of Atlantic Power and CPILP, giving effect to the Plan of Arrangement as if it had occurred on June 30, 2011. This unaudited pro forma financial data is presented for illustrative purposes only and does not necessarily indicate the results of operations or the combined financial position that would have resulted had the Plan of Arrangement been completed as of the dates or at the beginning of the periods presented, as applicable, nor is it indicative of the results of operations in future periods or the future financial position of the Combined Company.

Table of Contents

The Combined Company is expected to incur significant expenses related to the integration of Atlantic Power and CPILP.

The Combined Company is expected to incur significant expenses in connection with the Plan of Arrangement and the integration of Atlantic Power and CPILP. There are a large number of processes, policies, procedures, operations, technologies and systems that must be integrated. While Atlantic Power and CPILP have assumed that a certain level of expenses will be incurred, there are many factors beyond their control that could affect the total amount or the timing of the integration expenses. Moreover, many of the expenses that will be incurred are, by their nature, difficult to estimate accurately. These integration expenses likely will result in the Combined Company taking significant charges against earnings following the completion of the Plan of Arrangement, and the amount and timing of such charges are uncertain at present.

If goodwill or other intangible assets that the Combined Company records in connection with the Plan of Arrangement become impaired, the Combined Company could have to take significant charges against earnings.

In connection with the accounting for the Plan of Arrangement, the Combined Company expects to record a significant amount of goodwill and other intangible assets. Under U.S. GAAP, the Combined Company must assess, at least annually and potentially more frequently, whether the value of goodwill and other indefinite-lived intangible assets has been impaired. Amortizing intangible assets will be assessed for impairment in the event of an impairment indicator. Any reduction or impairment of the value of goodwill or other intangible assets will result in a charge against earnings, which could materially adversely affect the Combined Company's results of operations and shareholders' equity in future periods.

Atlantic Power, CPILP and, subsequently, the Combined Company must continue to retain, motivate and recruit executives and other key employees, which may be difficult in light of the uncertainty regarding the Plan of Arrangement, and failure to do so could negatively affect the Combined Company.

The Combined Company must be successful at retaining, recruiting and motivating key employees following the completion of the Plan of Arrangement. Experienced employees in the power industry are in high demand and competition for their talents can be intense. Employees of both Atlantic Power and CPILP may experience uncertainty about their future role with the Combined Company until, or even after, strategies with regard to the Combined Company are announced or executed. These potential distractions of the Plan of Arrangement may adversely affect the ability of Atlantic Power, CPILP or the Combined Company to attract, motivate and retain executives and other key employees and keep them focused on applicable strategies and goals. A failure by Atlantic Power, CPILP or the Combined Company to retain and motivate executives and other key employees during the period prior to or after the completion of the Plan of Arrangement could have an adverse impact on the business of Atlantic Power, CPILP or the Combined Company.

The Atlantic Power common shares to be received by CPILP unitholders as a result of the Plan of Arrangement will have different rights from the CPILP units.

Upon completion of the Plan of Arrangement, many CPILP unitholders will become Atlantic Power shareholders and their rights as shareholders will be governed by Atlantic Power's articles and the *Business Corporations Act* (British Columbia) (the "**BCBCA**"). The rights associated with CPILP units are different from the rights associated with Atlantic Power common shares. Please see "Comparison of Rights of Atlantic Power Shareholders and CPILP Unitholders" beginning on page 142 for a discussion of the different rights associated with Atlantic Power common shares.

Table of Contents

There are factors that could cause the Plan of Arrangement not to be accretive and could cause dilution to the Combined Company's distributable cash flow per share, which may negatively affect the market price of the Combined Company's common shares.

Atlantic Power and CPILP currently anticipate that the Plan of Arrangement will be immediately accretive to distributable cash flow per share of the Combined Company. This expectation is based on preliminary estimates, which may materially change. The Combined Company could also encounter additional transaction and integration-related costs or other factors such as the failure to realize all of the benefits anticipated in the Plan of Arrangement. All of these factors could cause dilution to the Combined Company's distributable cash flow per share or decrease or delay the expected accretive effect of the Plan of Arrangement and cause a decrease in the market price of the Combined Company's common shares. Accordingly, Atlantic Power may not be able to increase its dividends following completion of the Plan of Arrangement as currently planned.

Atlantic Power and CPI Preferred Equity Ltd. are subject to Canadian tax.

As a Canadian corporation, Atlantic Power is generally subject to Canadian federal, provincial and other taxes, and dividends paid by it are generally subject to Canadian withholding tax if paid to a shareholder that is not a resident of Canada. In connection with Atlantic Power's conversion from an IPS structure to a traditional common share structure in 2009 and the related reorganization of its organizational structure, Atlantic Power received a note from its primary US holding company (the "**Intercompany Note**"). Atlantic Power is required to include in computing its taxable income interest on the Intercompany Note and following the completion of the Plan of Arrangement, income earned by CPILP. Atlantic Power expects that its existing tax attributes initially will be available to offset this income inclusion such that it will not result in an immediate material increase to its liability for Canadian taxes. However, once Atlantic Power fully utilizes its existing tax attributes (or if, for any reason, these attributes were not available), Atlantic Power's Canadian tax liability would materially increase. Although Atlantic Power intends to explore potential opportunities in the future to preserve the tax efficiency of its structure, no assurances can be given that its Canadian tax liability will not materially increase at that time.

CPI Preferred Equity Ltd., a subsidiary of CPILP, is also a Canadian corporation and is generally subject to Canadian federal, provincial and other taxes. CPI Preferred Equity Ltd. is, and following the completion of the Plan of Arrangement will continue to be, liable to pay material Canadian cash taxes.

Atlantic Power's prior and current structure, and its incorporation of the CPILP structure following the Plan of Arrangement, may be subject to additional US federal income tax liability.

Under Atlantic Power's prior IPS structure, Atlantic Power treated the subordinated note represented by such IPS's as debt for US federal income tax purposes. Accordingly, Atlantic Power deducted the interest payments on the subordinated notes and reduced its net taxable income treated as "effectively connected income" for US federal income tax purposes. Under Atlantic Power's current structure, its subsidiaries that are incorporated in the United States are subject to US federal income tax on their income at regular corporate rates (currently as high as 35%, plus state and local taxes), and Atlantic Power's primary US holding company will claim interest deductions with respect to the Intercompany Note in computing its income for US federal income tax purposes. To the extent this interest expense is disallowed or is otherwise not deductible, the US federal income tax liability of Atlantic Power's primary US holding company will increase, which could materially affect the after-tax cash available to distribute to Atlantic Power. While Atlantic Power received advice from its US tax counsel, based on certain representations by Atlantic Power and its primary US holding company and determinations made by its independent advisors, as applicable, that the subordinated notes and the Intercompany Note should be treated as debt for US federal income tax purposes, it is possible that the Internal Revenue Service ("**IRS**") could successfully challenge those positions and assert that

Table of Contents

subordinated notes or the Intercompany Note should be treated as equity rather than debt for US federal income tax purposes. In this case, the otherwise deductible interest on the subordinated notes or the Intercompany Note would be treated as non-deductible distributions and, in the case of the Intercompany Note, would be subject to US withholding tax to the extent Atlantic Power's primary US holding company had current or accumulated earnings and profits. The determination of whether the subordinated notes and the primary US holding company's indebtedness to Atlantic Power is debt or equity for US federal income tax purposes is based on an analysis of the facts and circumstances. There is no clear statutory definition of debt for US federal income tax purposes, and its characterization is governed by principles developed in case law, which analyzes numerous factors that are intended to identify the nature of the purported creditor's interest in the borrower.

Furthermore, not all courts have applied this analysis in the same manner, and some courts have placed more emphasis on certain factors than other courts have. To the extent it were ultimately determined that the subordinated notes or the Intercompany Note were not debt, Atlantic Power's US federal income tax liability for the applicable open tax years would materially increase, which could materially affect the after-tax cash available to Atlantic Power to distribute. Alternatively, the IRS could argue that the interest on the subordinated notes or the Intercompany Note exceeded or exceeds an arm's length rate, in which case only the portion of the interest expense that does not exceed an arm's length rate may be deductible and, in the case of the Intercompany Note, the remainder would be subject to US withholding tax to the extent Atlantic Power's primary US holding company had current or accumulated earnings and profits. Atlantic Power has received advice from independent advisors that the interest rates on the subordinated notes and the Intercompany Note were, when issued, commercially reasonable under the circumstances, but the advice is not binding on the IRS.

Furthermore, pursuant to the US "earnings stripping" limitations, Atlantic Power's primary US holding company's deductions attributable to the interest expense on the Intercompany Note may be limited by the amount by which its net interest expense (the interest paid by the US holding company on all debt, including the Intercompany Note, less its interest income) exceeds 50% of its adjusted taxable income (generally, US federal taxable income before net interest expense, net operating loss carryovers, depreciation and amortization). Any disallowed interest expense may currently be carried forward to future years. Moreover, proposed legislation has been introduced, though not enacted, several times in recent years that would further limit the 50% of adjusted taxable income cap described above to 25% of adjusted taxable income, although recent proposals in the Fiscal Year Budget for 2010 would only apply the revised rules to certain foreign corporations that were expatriated. Furthermore, if Atlantic Power's primary US holding company does not make regular interest payments as required under the Intercompany Note, other limitations on the deductibility of interest under US federal income tax laws could apply to defer and/or eliminate all or a portion of the interest deduction that the US holding company would otherwise be entitled to with respect to the Intercompany Note.

CPILP's US structure has in place intercompany financing arrangements (the "**CPILP Financing Arrangements**"). While CPILP has received advice from its US accountants, based on certain representations by its holding companies, that the payments on the CPILP Financing Arrangements should be deductible for US federal income tax purposes, it is possible that the IRS could successfully challenge the deductibility of these payments. If the IRS were to succeed in characterizing these payments as non-deductible, the adverse consequences discussed above with respect to the Intercompany Loan could apply in connection with the CPILP Financing Arrangements. In addition, even if the payments are respected as interest, the deduction thereof could nevertheless be limited by the earnings stripping limitations, as discussed in the preceding paragraph. The earnings stripping limitations will also apply to other indebtedness of CPILP's US group that is guaranteed by CPILP or Atlantic Power. Finally, the applicability of recent changes to the US-Canada Income Tax Treaty to the structure associated with certain of the CPILP Financing Arrangements may result in distributions from CPILP's US group to its Canadian parent being subject to a 30% rate of withholding tax instead of the 5% rate that would otherwise have applied.

THE ENTITIES

Atlantic Power Corporation

Atlantic Power owns and operates a diverse fleet of power generation and infrastructure assets in the United States. Atlantic Power's generation projects sell electricity to utilities and other large commercial customers under long-term PPAs, which seek to minimize exposure to changes in commodity prices. Atlantic Power's power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,948 MW in which Atlantic Power's ownership interest is approximately 871 MW. Atlantic Power's corporate strategy is to generate stable cash flows from Atlantic Power's existing assets and to make accretive acquisitions to sustain Atlantic Power's dividend payout to shareholders, which is currently paid monthly at an annual rate of C$1.094 per share. Atlantic Power's current portfolio consists of interests in 12 operational power generation projects across nine states, one 53 MW biomass project under construction in Georgia, and an 84-mile, 500 kilovolt electric transmission line located in California. Atlantic Power also owns a majority interest in Rollcast Energy, a biomass power plant developer with several projects under development.

Atlantic Power sells the capacity and power from its projects under PPAs with a variety of utilities and other parties. Under the PPAs, which have expiration dates ranging from 2012 to 2037, Atlantic Power receives payments for electric energy sold to its customers (known as energy payments), in addition to payments for electric generation capacity (known as capacity payments). Atlantic Power also sells steam from a number of its projects under steam sales agreements to industrial purchasers. The transmission system rights owned by Atlantic Power in its power transmission project entitle it to payments indirectly from the utilities that make use of the transmission line.

Atlantic Power's projects generally operate pursuant to long-term supply agreements, typically accompanied by fuel transportation arrangements. In most cases, the fuel supply and transportation arrangements correspond to the term of the relevant PPAs and most of the PPAs and steam sales agreements provide for the pass-through or indexing of fuel costs to Atlantic Power's customers.

Atlantic Power partners with recognized leaders in the independent power business to operate and maintain its projects, including Caithness Energy LLC, Power Plant Management Services and the Western Area Power Administration. Under these operation, maintenance and management agreements, the operator is typically responsible for operations, maintenance and repair services.

THE ATLANTIC POWER SPECIAL MEETING

Date, Time and Place

The special meeting of Atlantic Power shareholders will be held at the King Edward Hotel, , 37 King Street East, Toronto, Ontario on , the day of , 2011 at the hour of a.m. (Toronto time).

Purpose of the Special Meeting

At the Atlantic Power special meeting, Atlantic Power shareholders will be asked to vote on the following resolutions:

to consider, and if thought advisable, to approve, with or without variation, the Share Issuance Resolution, the full text of which is set forth in Annex F to this management proxy circular and joint proxy statement, authorizing Atlantic Power to issue such number of common shares in the capital of Atlantic Power as is necessary to complete the Arrangement, being 1.3 Atlantic Power common shares for each CPILP unit to a maximum of 31,500,221 Atlantic Power common shares pursuant to the terms of the Arrangement Agreement (all as more particularly described in this joint proxy statement); and

to transact such further or other business as may properly come before the Atlantic Power special meeting or any adjournments or postponements thereof.

Recommendations of the Board of Directors of Atlantic Power

At a meeting held on June 19, 2011, after considering, Atlantic Power's board of directors unanimously determined that the Arrangement and the other transactions contemplated by the Arrangement Agreement, including the issuance of Atlantic Power common shares necessary to complete the Arrangement, are in the best interests of Atlantic Power and is fair to its stakeholders. **Accordingly, the Atlantic Power board of directors unanimously recommends that the Atlantic Power shareholders vote "FOR" the Share Issuance Resolution.** For a discussion of the material factors considered by the Atlantic Power board of directors in reaching its conclusions, see "The Arrangement Agreement and Plan of Arrangement Atlantic Power's Reasons for the Agreement"; Recommendations of the Atlantic Power Board of Directors; beginning on page 55.

Atlantic Power shareholders should carefully read this joint proxy statement in its entirety for more detailed information concerning the Plan of Arrangement and the Arrangement Agreement. In addition, Atlantic Power shareholders are directed to the Arrangement Agreement which is included as Annex A in this joint proxy statement.

Share Issuance Resolution

Pursuant to the rules of the NYSE and TSX, securityholder approval is required in instances where the number of securities issued or issuable in payment of the purchase price in a transaction such as the Plan of Arrangement exceeds 20% (NYSE) or 25% (TSX) of the number of securities of the listed issuer which are outstanding, on a non-diluted basis. Because the Arrangement Agreement contemplates the issuance of Atlantic Power common shares in excess of these thresholds on a non-diluted basis, the rules of the NYSE and TSX require that Atlantic Power must obtain approval of the Share Issuance Resolution by the holders of a majority of the Atlantic Power common shares represented in person or by proxy at the Atlantic Power special meeting.

As of the close of business on the date of this joint proxy statement, there were approximately 68.6 million outstanding Atlantic Power common shares. Pursuant to the Plan of Arrangement, Atlantic

Table of Contents

Power will issue approximately 31.5 million Atlantic Power common shares (equal to approximately 46% of Atlantic Power's current issued and outstanding common shares).

Record Date; Shares Entitled to Vote

Only holders of Atlantic Power common shares at the close of business on , 2011, the record date for the Atlantic Power special meeting, will be entitled to notice of, and to vote at, the Atlantic Power special meeting or any adjournments or postponements thereof, except to the extent the shareholder has transferred any such common shares after the record date and the transferee of such common shares establishes ownership thereof and makes a written demand to the Corporate Secretary of Atlantic Power, not later than 10 days before the date of the special meeting, to be included in the list of shareholders entitled to vote at the special meeting, in which case the transferee will be entitled to vote such common shares. On the record date, there were outstanding a total of approximately million Atlantic Power common shares. Each outstanding Atlantic Power common share is entitled to one vote on the Share Issuance Resolution and any other matter properly coming before the Atlantic Power special meeting. The Atlantic Power common shares represented by the proxy will be voted for, voted against or withheld from voting in accordance with the instructions of the shareholder on any ballot that may be called for. If the shareholder specifies that the shares registered in the shareholder's name be voted for, voted against or withheld with respect to any matter to be acted upon, the shares will be voted accordingly.

As of the close of business on the Atlantic Power record date, Atlantic Power's directors and executive officers and their affiliates beneficially owned and had the right to vote 0.36 million Atlantic Power common shares at the Atlantic Power special meeting, which represents approximately 0.01% of the Atlantic Power common shares entitled to vote at the Atlantic Power special meeting. Each of the directors and officers of Atlantic Power have indicated their intention to vote in favor of the Share Issuance Resolution.

Quorum

A quorum must be present at the Atlantic Power special meeting for any business to be conducted. Failure to Vote and Broker Non-Votes

If you are an Atlantic Power shareholder and fail to vote or fail to instruct your broker, investment dealer or other intermediary to vote, it will have no effect on any of the Atlantic Power proposals, assuming a quorum is present.

When the enclosed form of proxy is returned completed and properly executed, the Atlantic Power common shares represented by it will be voted at the Atlantic Power special meeting or any adjournment or postponement thereof in accordance with the instructions contained in the form of proxy and if the shareholder specifies a choice with respect to any matter to be acted upon, the Atlantic Power common shares will be voted accordingly. Your telephone or Internet vote authorizes the named proxies to vote your shares in the same manner as if you had completed, signed and returned a form of proxy.

Your vote is important. Accordingly, if you are a registered holder of Atlantic Power common shares as of the close of business on the record date, please sign and return the enclosed form of proxy or vote via telephone or the Internet whether or not you plan to attend the Atlantic Power special meeting in person.

If a proxy is signed and returned without an indication as to how the Atlantic Power common shares represented are to be voted with regard to a particular proposal, the Atlantic Power common shares represented by the proxy will be voted in favor of the Share Issuance Resolution. At the date hereof, the Atlantic Power board of directors has no knowledge of any business that will be presented for consideration at the special meeting and which would be required to be set forth in this joint proxy statement or the related Atlantic Power proxy other than the matters set forth in Atlantic Power's Notice of Special Meeting of Shareholders. Business transacted at the Atlantic Power special meeting is expected to be limited to those matters set forth in such notice. Nonetheless, if any amendments to matters identified in the accompanying Notice of Atlantic Power Special Meeting of Shareholders or any other matter is properly presented at the Atlantic Power special meeting for consideration, it is intended that the persons named in the enclosed proxy and acting thereunder will vote in accordance with their best judgment and pursuant to such discretionary authority on such matter.

In either case, you should carefully follow the instructions provided by the intermediary and contact the intermediary promptly if you need help.

A non-registered shareholder may revoke a proxy or voting instruction which has been previously given to an intermediary by written notice to the intermediary. In order to ensure that the intermediary acts upon a revocation, the written notice should be received by the intermediary well in advance of the Atlantic Power special meeting.

Record Holders

CDS Clearing and Depositary Services Inc. is the only registered holder of CPILP units. All other holders of CPILP units are non-registered holders. CPILP requests that you vote your shares by telephone or through the Internet, or sign the accompanying proxy card and return it promptly in the enclosed postage-paid envelope. accordance with the instructions contained in the proxy card and if the unitholder specifies a choice with respect to any matter to be acted upon, the CPILP units will be voted accordingly. Your telephone or Internet vote authorizes the named proxies to vote your units in the same manner as if you had marked, signed and returned a proxy card.

Your vote is important. Accordingly, if you are a registered holder of CPILP units as of the close of business on the record date, please sign and return the enclosed proxy card or vote via telephone or the Internet whether or not you plan to attend the CPILP special meeting in person.

If a proxy card is signed and returned without an indication as to how the CPILP units represented are to be voted with regard to a particular proposal, the CPILP units represented by the proxy will be voted in accordance with the recommendations of the General Partner's board of directors. At the date hereof, the board of directors of the General Partner has no knowledge of any business that will be presented for consideration at the special meeting and which would be required to be set forth in this joint proxy statement or the related CPILP proxy card other than the matters set forth in CPILP's Notice of Special Meeting of Unitholders. Business transacted at the CPILP special meeting is expected to be limited to those matters set forth in such notice. Nonetheless, if any amendments to matters identified in the accompanying Notice of CPILP Special Meeting of Unitholders or any other matter is properly presented at the CPILP special meeting for consideration, it is intended that the persons named in the enclosed proxy card and acting thereunder will vote in accordance with their best judgment and pursuant to such discretionary authority on such matter.

Units Held in Street Name/Non-Registered CPILP Unitholders

The proxy card provided with this joint proxy statement will indicate whether or not you are a registered unitholder. All holders other than CDS Clearing and Depositary Services Inc. are non-registered holders. Non-registered unitholders hold their CPILP units through intermediaries, such as banks, trust companies, securities dealers or brokers. If you are a non-registered unitholder, the intermediary holding your CPILP units should provide a voting instruction form which you must complete by using any one of the methods outlined therein. This voting instruction form will constitute voting instructions that the intermediary must follow and should be returned in accordance with the instructions to ensure it is counted for the CPILP special meeting. In order to expedite your vote, you may vote by using a touch-tone telephone or via the Internet, following the instructions outlined on the voting instruction form.

If, as a non-registered unitholder, you wish to attend the CPILP special meeting and vote your units in person, or have another person attend and vote your units on your behalf, you should fill your own name, or the name of your appointee, in the space provided on the voting instruction form. An intermediary's voting instruction form will likely provide corresponding instructions to cast your vote in person. In either case, you should carefully follow the instructions provided by the intermediary and contact the intermediary promptly if you need help.

A non-registered unitholder may revoke a proxy or voting instruction which has been previously given to an intermediary by written notice to the intermediary. In order to ensure that the intermediary acts upon a revocation, the written notice should be received by the intermediary well in advance of the CPILP special meeting.

Revocability of Proxy; Changing Your Vote

If you are a registered holder of CPILP units as of the close of business on the record date for the CPILP special meeting: You can change your vote at any time before the start of your special meeting, unless otherwise noted. you can deposit a signed notice of revocation at CPILP's registered office at any time up to and including the last business day preceding the day of the CPILP special meeting (or any adjournment or postponement thereof) or with the chair of the CPILP special meeting on the day of the CPILP special meeting (or any adjournment or postponement thereof); or

you can attend the special meeting and vote in person, which will automatically cancel any proxy previously given, or you may revoke your proxy in person, but your attendance alone will not revoke any proxy that you have previously given.

If you choose any of the foregoing methods, your notice of revocation or your new proxy must be received by CPILP no later than the beginning of the CPILP special meeting. If you have voted your units by telephone or through the Internet, you may revoke your prior telephone or Internet vote by any manner described above.

If you hold CPILP units in "street name": You must contact your broker, investment dealer or other intermediary in writing to change your vote. In order to ensure that the broker, investment dealer or other intermediary acts upon revocation, the written notice should be received by the broker, investment dealer or other intermediary well in advance of your special meeting.

Solicitation of Proxies

The management of the General Partner is soliciting proxies for use at the CPILP special meeting or at any adjournment or postponement thereof. In accordance with the Arrangement Agreement, the cost of proxy solicitation for the CPILP special meeting will be borne by CPILP. In addition to the use of the mail, proxies may be solicited by directors, officers and other employees of CPILP, without additional remuneration, by personal interview, telephone, facsimile or otherwise. CPILP will also request brokerage firms, nominees, custodians and fiduciaries to forward proxy materials to the beneficial owners of units and will provide customary reimbursement to such firms for the cost of forwarding these materials. CPILP has retained Georgeson Shareholder Communications Canada, Inc. to assist in its solicitation of proxies and has agreed to pay them a fee of approximately C$40,000, plus reasonable expenses, for these services.

Principal Unitholders

CPI Investments, together with its wholly-owned subsidiary CPI Incomes Services Ltd., holds 16,513,504 units representing approximately 29.18% of the issued and outstanding CPILP units. Table of Contents

Registered holders of CPILP units who have not received a Letter of Transmittal and Election Form should contact CPILP, Attention: , at or Computershare Investor Services Inc. at .

Only registered holders of CPILP units are required to submit a Letter of Transmittal and Election Form. CDS Clearing and Depositary Services Inc. is the only registered holder of CPILP units. All other holders of CPILP units are non-registered holders. If you are a non-registered holder, you should carefully follow any instructions provided to you by your broker, dealer or investment advisor for making an election. See " Units Registered in the Name of an Intermediary" beginning on page 46. Failure to return the Letter of Transmittal and Election Form and the certificates representing your CPILP units, if any, will result in a delay in you receiving your cash or Atlantic Power common shares under the Plan of Arrangement.

Each registered holder of CPILP units must validly complete, duly sign and return the enclosed Letter of Transmittal and Election Form, together with the certificate(s) representing their CPILP units, if any, to the Depositary at one of the offices specified in the Letter of Transmittal and Election Form.

CPILP unitholders who deposit a validly completed and duly signed Letter of Transmittal and Election Form, together with accompanying CPILP unit certificate(s), if any, will be entitled to receive in exchange therefor, and the Depositary will deliver as soon as possible to such CPILP unitholder following the Effective Time (i) a cheque for the cash consideration to which such CPILP unitholder is entitled to receive in accordance with the Plan of Arrangement, and (ii) a certificate representing that number of Atlantic Power common shares which such CPILP unitholder has the right to receive under the Plan of Arrangement (together with any dividends or distributions with respect thereto pursuant to the Plan of Arrangement), less any amounts required to be withheld. It is recommended that CPILP unitholders complete and return their Letter of Transmittal and Election Form to the Depositary on or before the Election Deadline (as defined below). Once CPILP unitholders surrender their CPILP unit certificates, they will not be entitled to sell the securities to which those certificates relate.

If a CPILP unitholder deposits CPILP units with the Depositary prior to the CPILP special meeting and if the Arrangement is approved at the CPILP special meeting (including any adjournment or postponement thereof) then the deposit of the CPILP units is irrevocable unless the Plan of Arrangement is not subsequently completed.

CPILP unitholders who do not forward to the Depositary a validly completed and duly signed Letter of Transmittal and Election Form, together with their CPILP unit certificate(s), if any, will not receive the cash and/or Atlantic Power common shares, as applicable, to which they are otherwise entitled until such a deposit is made. Whether or not CPILP unitholders forward their CPILP unit certificate(s) upon the completion of the Plan of Arrangement on the Effective Date, CPILP unitholders will cease to be unitholders of CPILP as of the Effective Date and will only be entitled to receive the cash and/or Atlantic Power common shares to which they are entitled under the Plan of Arrangement.

No commission will be charged to CPILP unitholders who deliver their certificate(s) evidencing CPILP units according to the instructions set out in the Letter of Transmittal and Election Form. It is not possible to determine precisely when the Plan of Arrangement will become effective. If the Final Order is obtained and all conditions set forth in the Arrangement Agreement are satisfied or waived, CPILP or the General Partner will file the Articles of Arrangement giving effect to the Plan of Arrangement as soon as reasonably practicable, such that the Effective Date is expected to be on or about , 2011.

How to Make an Election

Pursuant to the terms of the Arrangement Agreement and the Plan of Arrangement, CPILP unitholders are entitled to receive, at their election, for each CPILP unit held (i) C$19.40 in cash or

(ii) 1.3 Atlantic Power common shares, subject to the Aggregate Cash Maximum (as defined below) and the Aggregate Share Maximum (as defined below), by completing a Letter of Transmittal and Election Form and sending it to the Depositary, together with any certificates representing the CPILP units in accordance with the instructions provided on the form, at one of the offices specified in the Letter of Transmittal and Election Form.

The Election Deadline to deposit such properly completed Letter of Transmittal and Election Form with the Depositary is 5:00 p.m. (Edmonton time) on the date that is three business days prior to the date of the CPILP special meeting. Assuming the CPILP special meeting is held on , 2011, the Election Deadline will be 5:00 p.m. (Edmonton time) on , 2011. Each CPILP unitholder's election is subject to the proration provisions described below.

What Happens if a CPILP unitholder Fails to Make a Valid Election

Any CPILP unitholder who does not deposit a duly completed Letter of Transmittal and Election Form with the Depositary prior to the Election Deadline, or otherwise fails to comply with the requirements of the Plan of Arrangement and the Letter of Transmittal and Election Form with respect to such holder's election to receive Cash Consideration or Share Consideration, shall be deemed to have elected to receive the Share Consideration in respect of all of such holder's CPILP units.

Proration Provisions

With respect to the Cash Consideration, the Plan of Arrangement provides that the aggregate amount of cash available to be paid under the Plan of Arrangement is limited to C$506,513,834 (the "**Aggregate Cash Maximum**"). If the aggregate amount of Cash Consideration that would be paid to CPILP unitholders pursuant to the Plan of Arrangement (the "**Aggregate Cash Elected**"), but for prorationing pursuant to the Plan of Arrangement, exceeds the Aggregate Cash Maximum, then, notwithstanding any election to receive the Cash Consideration, the aggregate amount of cash paid to each CPILP unitholder that made an election to receive the Cash Consideration and to Capital Power LP (if it makes an election to receive Cash Consideration) will be prorated (based on the fraction equal to the Aggregate Cash Maximum divided by the Aggregate Cash Elected) so that the aggregate amount of cash payable to all such CPILP unitholders and Capital Power LP shall be equal to the Aggregate Cash Maximum (the amount of the reduction in cash payable to any CPILP unitholder being the "Cash Reduction" in respect of such holder). In lieu of the amount of cash equal to the Cash Reduction in respect of a CPILP unitholder, each such CPILP unitholder shall receive a number of Atlantic Power common shares equal to the product of (i) the Cash Reduction divided by the Cash Consideration per CPILP unit and (ii) 1.3.

With respect to the Share Consideration, the Plan of Arrangement provides that the aggregate number of Atlantic Power common shares to be issued under the Plan of Arrangement is limited to 31,500,221 shares (the "**Aggregate Share Maximum**"). If the aggregate number of Atlantic Power common shares that would be issued to CPILP unitholders pursuant to the Plan of Arrangement (the "**Aggregate Shares Elected**"), but for prorationing pursuant to the Plan of Arrangement, exceeds the Aggregate Share Maximum, then, notwithstanding any election or deemed election to receive the Share Consideration, the aggregate number of Atlantic Power common shares issued to each CPILP unitholder that made or was deemed to make an election to receive the Share Consideration and to Capital Power LP (if it makes or is deemed to make an election to receive Share Consideration) will be prorated (based on the fraction equal to the Aggregate Share Maximum divided by the Aggregate Shares Elected) so that the aggregate number of Atlantic Power common shares issuable to all such CPILP unitholders and Capital Power LP shall be equal to the Aggregate Share Maximum (the reduction in the number of Atlantic Power common shares payable to any CPILP unitholder being the "Share Reduction" in respect of such holder). In lieu of the number of the Atlantic Power common shares equal to the Share Reduction in respect of a CPILP unitholder, each such CPILP unitholder

Table of Contents

shall receive an amount of cash equal to the product of (i) the Share Reduction divided by 1.3 and (ii) the Cash Consideration per CPILP unit.

Fractional Shares

In no event shall any holder of CPILP units be entitled to receive a fraction of an Atlantic Power common share in consideration therefore. Where the aggregate number of Atlantic Power common shares to be issued to a holder of CPILP units as consideration under the Plan of Arrangement would result in a fraction of an Atlantic Power common share being issuable, the number of Atlantic Power common shares to be received by such holder shall be rounded down to the nearest whole number of Atlantic Power common shares and no CPILP unitholder will be entitled to any compensation in respect of such fractional Atlantic Power common share.

Fractional Cash

Any cash payable to a CPILP unitholder pursuant to the Plan of Arrangement shall be rounded down to the nearest whole cent.

Method of Delivery

The method of delivery of certificates representing CPILP units and all other required documents is at the option and risk of the person depositing his or her CPILP units. Any use of the mail to forward certificates representing CPILP units or the related Letter of Transmittal and Election Form is at the election and sole risk of the person depositing CPILP units, and documents so mailed shall be deemed to have been received by CPILP only upon actual receipt by the Depositary. If such certificates and other documents are to be mailed, CPILP recommends that insured mail be used with return receipt or acknowledgement of receipt requested.

Cheque(s) representing the cash payable and/or certificate(s) representing the Atlantic Power common shares issuable to a former holder of CPILP units who has complied with the procedures set out above will, as soon as practicable after the Effective Date and after the receipt of all required documents: (i) be forwarded to the former CPILP unitholder at the address specified in the Letter of Transmittal and Election Form by first-class mail; or (ii) be made available at the offices of the Depositary, Computershare Investor Services Inc., for pickup by the holder as requested by the holder, in the Letter of Transmittal and Election Form. Under no circumstances will interest accrue or be paid by CPILP, Atlantic Power or the Depositary on the consideration for the CPILP units to persons depositing CPILP units with the Depositary, regardless of any delay in issuing the applicable cheques and/or Atlantic Power common shares, as applicable, for the CPILP units.

Destroyed, Lost or Misplaced Unit Certificates

In the event any certificate which immediately prior to the Effective Time represented one or more outstanding CPILP units has been lost, stolen or destroyed, upon the making of an affidavit of that fact by the holder claiming such certificate to be lost, stolen or destroyed, the Depositary will deliver, in exchange for such lost, stolen or destroyed certificate, certificates representing Atlantic Power common shares and/or a cheque for the amount of any cash consideration to which such CPILP unitholder is entitled to receive in accordance with such holder's Letter of Transmittal and Election Form and the Plan of Arrangement, in each case, less any amounts required to be withheld. When authorizing such payment and delivery in exchange for any lost, stolen or destroyed certificate, the Person to whom cheques and/or certificates are to be issued shall, as a condition precedent to the payment and delivery thereof, give a bond satisfactory to Atlantic Power and the Depositary in such sum as Atlantic Power and the Depositary may direct, or otherwise indemnify CPILP, Atlantic Power and the Depositary in a manner satisfactory to Atlantic Power and the Depositary, against any claim that may be made with respect to the certificate alleged to have been lost, stolen or destroyed.

Table of Contents

Units Registered in the Name of Intermediary

Only registered holders of CPILP units are entitled to make an election as to the type of consideration they will receive under the Plan of Arrangement. CDS Clearing and Depositary Services Inc. ("**CDS**") is the only registered holder of CPILP units. CDS will establish an electronic facility which will allow intermediaries to communicate election instructions they receive from brokers and the holders of CPILP units they represent to CDS who will, in turn, make the election on their behalf as the registered holder of CPILP units. CPILP unitholders who are beneficial holders of CPILP units should contact their investment advisor to determine how their election can be made. CPILP unitholders may also contact in the manner set out on the back page of this management proxy circular and joint proxy statement for further information and assistance. If you fail to instruct your broker or investment advisor with respect to your election then, unless your broker or investment advisor has discretionary authority, they will not make an election on your behalf and you will be deemed to have elected Share Consideration in respect of your CPILP units.

Failure to Deliver Unit Certificates

Any certificate which immediately prior to the Effective Time represented outstanding CPILP units that is not deposited with the Depositary together with all other instruments or documents required by the Plan of Arrangement on or prior to the sixth anniversary of the Effective Date will cease to represent a claim or interest of any kind or nature as a CPILP unitholder or as a shareholder of Atlantic Power. On such date, the cash and Atlantic Power common shares to which the former holder of the certificate referred to in the preceding sentence was ultimately entitled under the Plan of Arrangement will be deemed to have been donated, surrendered and forfeited for no consideration to Atlantic Power. None of Atlantic Power, CPILP, the General Partner, CPI Investments or the Depositary shall be liable to any Person in respect of any cash or Atlantic Power common shares (or dividends, distributions and interest in respect thereof) delivered to a public official pursuant to any applicable abandoned property, escheat or similar law.

Withholding

A holder of CPILP units will be liable for, and Atlantic Power and the Depositary will be entitled to deduct and withhold from any amount paid to such holder, such amounts as each of Atlantic Power or the Depositary is required or permitted to deduct and withhold under the Tax Act, the *United States Internal Revenue Code of 1986*, as amended, or any provision of applicable federal, provincial, state, local or foreign tax law with respect to any consideration otherwise payable under the Plan of Arrangement to such holder, and Atlantic Power and the Depositary will be entitled to recover from such holder any portion of such amounts that is required to be withheld thereunder and is not otherwise deducted or withheld. To the extent that amounts are so withheld, such withheld amounts shall be treated for all purposes hereof as having been paid to the holder of the CPILP units in respect of which such deduction and withholding was made, provided that such withheld amounts are actually remitted by Atlantic Power or the Depositary to the appropriate taxing authority in the name of the relevant holder of CPILP units. To the extent that the amount so required or entitled to be deducted or withheld from any payment to such a holder exceeds the cash portion of the consideration otherwise payable to the holder, Atlantic Power and the Depositary are authorized pursuant to the Plan of Arrangement to sell or otherwise dispose of such portion of the Atlantic Power common shares otherwise deliverable to such holder as is necessary to provide sufficient funds to Atlantic Power or the Depositary, as the case may be, to enable it to comply with such deduction or withholding requirement or entitlement and Atlantic Power or the Depositary will notify the holder thereof and remit to such holder any unapplied balance of the net proceeds of such sale.

Under the terms of the Plan of Arrangement, CPILP unitholders will be entitled to elect to receive either C$19.40 in cash or 1.3 Atlantic Power common shares for each CPILP unit held. All cash elections will be subject to proration if total cash elections exceed approximately C$506.5 million and all share elections will be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares. As part of the Plan of Arrangement, Atlantic Power will acquire all of the outstanding shares of CPI Investments, the direct and indirect holder of 16,513,504 CPILP units, on effectively the same basis as the acquisition of CPILP units under the Plan of Arrangement. Atlantic Power shareholders will continue to hold their existing Atlantic Power common shares after the Plan of Arrangement. Based on the number of Atlantic Power common shares outstanding immediately prior to the Effective Date and excluding any common shares of Atlantic Power that may be issued to finance the cash portion of the purchase price under the Plan of Arrangement, Atlantic Power estimates that upon completion of the Plan of Arrangement current Atlantic Power shareholders will own approximately 70% of the Combined Company and former CPILP unitholders will own approximately 30% of the Combined Company, in each case on a fully-diluted basis.

Under the Plan of Arrangement, Atlantic Power will indirectly acquire the 16,513,504 CPILP units held by CPI Investments and the General Partner through the acquisition of all of the outstanding shares of CPI Investments from Capital Power L.P. and EPCOR.

Pursuant to the Plan of Arrangement, all of the shares of CPI Investments held by EPCOR will be transferred to Atlantic Power in exchange for C$1.00 in cash and all of the shares of CPI Investments held by Capital Power L.P. will be transferred to Atlantic Power in exchange for aggregate consideration comprised of (i) a non-interest bearing promissory note (the "**Purchaser Note**") to be issued by Atlantic Power in favor of Capital Power L.P. in the principal amount of C$121,405,211, and (ii) either (A) the Cash Consideration or (B) the Share Consideration, as elected or deemed to be elected by Capital Power L.P. Atlantic Power will subsequently, as part of the Plan of Arrangement, pay C$121,405,211 to Capital Power L.P. in satisfaction in full of the Purchaser Note.

If Capital Power L.P. elects to receive Cash Consideration, then, in addition to the C$121,405,211 payable in satisfaction of the Purchaser Note, it shall receive cash equal to (i) the product of (A) the Cash Consideration per CPILP unit and (B) the number of CPILP units held by CPI Investments and the General Partner, (ii) less the principal amount of the Purchaser Note, subject to proration as described under "The CPILP Special Meeting Procedures for the Surrender of Unit Certificate and Receipt of Consideration Letter of Transmittal and Election Form Proration Provisions" beginning on page 44.

If Capital Power L.P. elects to receive Share Consideration, then, in addition to the C$121,405,211 payable in satisfaction of the Purchaser Note, it shall receive that number of Atlantic Power common shares equal to (i) the product of (A) 1.3 and (B) the number of CPILP units held by CPI Investments and the General Partner, (ii) less the product of (A) the principal amount of the Purchaser Note divided by the Cash Consideration per CPILP unit and (B) 1.3, subject to proration as described under "The CPILP Special Meeting Procedures for the Surrender of Unit Certificate and Receipt of Consideration Letter of Transmittal and Election Form Proration Provisions" beginning on page 44.

Background of the Plan of Arrangement

The provisions of the Arrangement Agreement are the result of negotiations conducted between representatives of CPILP, the General Partner, the Manager and Atlantic Power and their respective

financial and legal advisors. The following is a summary of the principal events leading up to the settlement of the Arrangement Agreement and related transaction documents and the meetings, negotiations, discussions and actions between the parties that preceded the public announcement of the execution of the Arrangement Agreement.

At CPILP's annual strategic review meeting on June 7, 2010, the Manager delivered a presentation to the board of directors of the General Partner which questioned the status quo relationship between the Manager and CPILP, whereby the Manager (being two subsidiaries of Capital Power) was engaged by the General Partner to perform all of the management, employment and administrative services for CPILP and to operate and maintain all of CPILP's facilities pursuant to various management and operating agreements. Specifically, the Manager advised the board of directors of the General Partner that Capital Power was considering divesting itself of all of its CPILP interests in order to focus on its own core business. In this context, the Manager shared with the board of directors of the General Partner its preliminary analysis of strategic alternatives for CPILP, ultimately focusing on three: (i) internalization of management; (ii) merger with or sale to a third party; or (iii) purchase of CPILP by Capital Power. The Manager communicated Capital Power's commitment to continue managing CPILP to the best of its abilities and in accordance with the terms in the Management Agreements until the relationship was modified. The Manager also indicated that Capital Power would not be interested in acquiring CPILP.

Following this, the board of directors of the General Partner resolved to form the Special Committee comprised of members of the board who are considered to be independent and not related to the Manager or Capital Power, being Messrs. Francois Poirier (Chair), Brian Felesky, Allen Hagerman and Rod Wimer. The Special Committee's purpose was, among other things, to review and consider potential alternatives for the restructuring of the relationship between the Manager and CPILP and, if and when appropriate, to review and negotiate the terms and conditions of any transaction involving CPILP which may result.

Following the board meeting, the Special Committee met to discuss the Manager's preliminary analysis of alternatives. The Special Committee retained Greenhill as its independent financial advisor and McCarthy Tétrault LLP as its independent legal advisor. The Special Committee also retained Roades Advisors LLC ("**Roades**") to provide additional independent business and financial due diligence support. Between June 8, 2010 and June 18, 2011 (being the last meeting prior to the public announcement of the signing of the Arrangement Agreement), the Special Committee in executing its mandate would meet more than 30 times, most often with its financial advisors and legal counsel present at such meetings.

Throughout the summer of 2010, the Special Committee worked with its advisors to analyze a broad spectrum of strategic alternatives available to CPILP. The Special Committee directed its advisors to work with the Manager to analyze all reasonably viable alternatives including, but not limited to, the sale of CPILP to a third party, roll-up into Capital Power, a change in its distribution policy, one or more asset sales and/or the internalization of management.

On June 28, 2010, Greenhill and Roades met with the Manager to discuss their respective views on strategic alternatives. At this meeting, Capital Power reiterated that it did not feel that the status quo was the best option for CPILP or Capital Power.

On July 6, 2010, Greenhill made an initial presentation to the Special Committee. Greenhill noted that Capital Power's desire to terminate its relationship with CPILP raised a number of issues that needed to be carefully analyzed for each alternative to be considered. The Special Committee instructed Greenhill to carry out all analyses or preparatory work that it considered reasonably useful or necessary in connection with each potential alternative.

On August 9, 2010, Greenhill delivered its preliminary evaluation of strategic alternatives to the Special Committee. One alternative that Capital Power proposed involved the exchange of certain of

Table of Contents

CPILP's assets for Capital Power's partnership units. At the Special Committee's request, Greenhill examined a variety of asset swap scenarios. Based partially on Greenhill's examination, the Special Committee came to the preliminary conclusion that this alternative was unlikely to be in the best interests of CPILP and would, among other things, have a negative impact on CPILP's distribution sustainability. The other alternatives considered by Greenhill included maintaining the status quo and the internalization of management. With respect to this latter alternative, it was determined that, based on its preliminary analysis, the prospect of identifying and recruiting a credible management team would be time-consuming, may not ultimately be successful and would create uncertainty for CPILP in the meantime.

Over the next two months, the Special Committee and its advisors continued to conduct financial and legal analysis on various strategic alternatives. During this same period, the Special Committee and Capital Power met periodically to discuss the status of the Special Committee's strategic review process. On August 16, 2010, Messrs. Poirier and Hagerman met with Messrs. Vaasjo and Lee from Capital Power to discuss the Special Committee's preliminary view that pursuing a sale or merger transaction would be in CPILP's best interest. These same parties, and their respective financial advisors, met again on numerous occasions throughout September 2010 to discuss the most effective strategies to seek a successful sale or merger for CPILP. The parties worked collaboratively to align their interests on a number of issues in the event of a change of control transaction, including with respect to the treatment of the Management Agreements and CPILP's "right of first look" with respect to acquisition and disposition opportunities presented to it by Capital Power.

On August 20, 2010, Standard and Poor's published a credit ratings report which indicated that it had downgraded CPILP from BBB+ (outlook negative) to BBB (outlook stable). The reduced rating reflected, among other things, Standard and Poor's view that CPILP's financial risk profile had weakened as a result of debt-financed growth and the expectation that improvement in the medium term was unlikely as CPILP continued to execute its growth plan.

On October 1, 2010, the board of directors of the General Partner resolved to establish a strategic review sub-committee comprised of Messrs. Lee and Poirier. The strategic review sub-committee was to act in an administrative capacity only to investigate all available strategic alternatives in the best interests of CPILP. Notwithstanding the creation of the strategic review sub-committee, all material business and commercial decisions including, for example, the approval of a sale process, recommendation or rejection of any third party offer and any final unitholder recommendation, would be made by the Special Committee and the board of directors of the General Partner.

On October 5, 2010, CPILP and Capital Power issued a joint press release announcing that CPILP would initiate a process to review its strategic alternatives. The board of directors of the General Partner retained Greenhill and CIBC as co-financial advisors, and Roades Advisors LLC for due diligence support. McCarthy Tétrault LLP continued to act as legal advisors to CPILP, with Fraser Milner Casgrain LLP (Canadian counsel) and K&L Gates LLP (US counsel) acting for the General Partner and the Manager.

Under the direction of the board of directors of the General Partner, the strategic review sub-committee instructed its financial advisors to solicit indications of interest to acquire CPILP from a broad range of potential financial and strategic purchasers. With the assistance of the Manager and its advisors, CPILP and its advisors prepared a confidential information memorandum describing CPILP and its business. Greenhill and CIBC identified a list of over 60 prospective purchasers. These prospective purchasers were contacted by Greenhill and CIBC during the months of October and November 2010.

Of those prospective purchasers contacted, 27 of them executed confidentiality agreements and received a confidential information memorandum and were invited to submit preliminary indicative offers. On or before November 30, 2010, nine parties, including Atlantic Power, had submitted

Table of Contents

indicative offers to acquire all of CPILP or a selection of its assets. Of these nine parties, three were invited to proceed to a further round of enhanced due diligence access.

In order to facilitate their diligence review of CPILP and encourage the submission of more formal proposals, these three prospective purchasers were provided with access to an electronic data room containing detailed information regarding CPILP, and were also given access to certain of the Manager's personnel. Throughout this period, the strategic review sub-committee provided regular oversight and direction to CPILP's financial advisors. Informally, Mr. Poirier communicated regularly with the other members of the Special Committee to keep them informed about the status of the sales process.

At meetings of the independent directors' committee (the same directors that make up the Special Committee) on both December 17 and December 30, 2010, Mr. Poirier provided a status update on the steps undertaken to date in the sale process.

On January 17, 2011, the Special Committee met to discuss the uncertainty and timing issues surrounding the pending decision from the North Carolina Utilities Commission ("**NCUC**") pertaining to the Roxboro and Southport facilities in North Carolina (the "**North Carolina facilities**"), and its impact upon the sale process. At this meeting, Mr. Poirier and Greenhill also provided a further status update on the steps undertaken to date in the sale process.

On January 27, 2011, CPILP issued a press release announcing the issuance of an Order of Arbitration by the NCUC relating to the PPAs for CPILP's North Carolina facilities with Progress Energy Inc. In the months following the release of the Order, CPILP and Progress Energy Inc. negotiated the PPAs within the scope provided in the NCUC ruling. By the middle of March 2011, CPILP and Progress Energy Inc. concluded an interim contract setting out the material terms upon which the PPAs would ultimately be based. In the meantime, the remaining interested parties were asked to submit alternative offers for CPILP, one of which included the North Carolina facilities and another which excluded those assets.

On March 14, 2011, following their due diligence review period, two of the three parties, including Atlantic Power, submitted offers which included their respective comments on a draft form of the Arrangement Agreement. Atlantic Power's implied offer value was C$16.50 per outstanding CPILP unit and excluded the North Carolina assets. The strategic review sub-committee and its financial advisors reviewed each offer. At the request and direction of the strategic review sub-committee, Greenhill and CIBC continued discussions with both prospective purchasers regarding, among other things, offer price and the prospective purchasers' sources of financing. As a result of such discussions, Atlantic Power submitted a subsequent proposal on April 11, 2011 at an increased implied offer value of C$17.00 per outstanding CPILP unit, exclusive of the North Carolina assets. On April 26, 2011, Atlantic Power confirmed its implied offer value of C$17.00 per outstanding CPILP unit, exclusive of the North Carolina assets, and further indicated an implied offer value of C$18.50 per unit if the North Carolina assets were to be included. The other prospective purchaser elected not to amend its March 14, 2011 proposal.

Neither prospective purchaser had a strategic interest in acquiring the North Carolina facilities and, at the time, there remained uncertainty surrounding the negotiations and finalized terms of the PPAs for these facilities. Accordingly, the formal offers from both of these prospective purchasers either excluded or attributed less than fair value to these assets. CPILP proposed that Capital Power should enter into negotiations with CPILP to acquire these assets as a way to facilitate the sale process. On May 2, 2011, the Special Committee met to discuss the terms upon which CPILP would be willing to negotiate the sale of the North Carolina assets to Capital Power.

At this time, the strategic review sub-committee instructed the financial advisors to seek from Atlantic Power an enhancement to its April 26, 2011 offer (excluding the North Carolina facilities). On May 5, 2011, Atlantic Power submitted a further amended proposal outlining the terms upon which it

would acquire CPILP (excluding the North Carolina facilities) for an implied offer value of C$17.50 per outstanding CPILP unit. Atlantic Power requested that CPILP commit to exclusive negotiations with Atlantic Power for a 21 day period. After consideration of the merits of acceding to this request, CPILP, the Manager and CPI Investments entered an Exclusivity Agreement dated May 9, 2011 with Atlantic Power.

On May 6, 2011, the strategic review sub-committee and its financial and legal advisors met with Atlantic Power and its financial and legal advisors in Toronto. At this meeting, the parties discussed, among other things, the Exclusivity Agreement, Atlantic Power's proposed plan to finance the acquisition of CPILP and the overall transaction structure and timing.

In order to facilitate CPILP's due diligence review of Atlantic Power, CPILP, the Manager and Capital Power entered into a confidentiality agreement dated May 6, 2011 with Atlantic Power. On May 11, 2011, the Special Committee met with its advisors to receive an update on the due diligence performed to date on Atlantic Power. Financial due diligence on Atlantic Power was performed by the Manager and the financial advisors, with support from Roades Advisors LLC. Legal due diligence on Atlantic Power was performed on behalf of the General Partner by the Manager's counsel, Fraser Milner Casgrain LLP and K&L Gates LLP, with oversight and support from CPILP's counsel, Ogilvy Renault LLP and Richard A. Shaw Professional Corporation (CPILP's new counsel). The Special Committee discussed the appropriateness of the Manager and its advisors conducting due diligence on behalf of CPILP. At this same meeting, the Special Committee also discussed the progress of negotiations with Capital Power to acquire CPILP's North Carolina facilities.

Over the ensuing weeks, both CPILP and Atlantic Power and their respective advisors conducted detailed due diligence reviews of the other's business, financial models and legal structures and commitments. A number of meetings took place between CPILP and its advisors and representatives of Atlantic Power and its advisors, during which information regarding each entity and its business and operations was shared, and the proposed terms of a transaction between the parties were discussed. During this same period, the Manager, on behalf of the General Partner, and CPILP and their legal advisors, Fraser Milner Casgrain LLP and Ogilvy Renault LLP, respectively, continued to negotiate the terms of the Plan of Arrangement and the Arrangement Agreement with Atlantic Power and its legal counsel, Goodmans LLP.

On May 20, 2011, Greenhill and CIBC provided the Special Committee with a process and due diligence update. There was also a thorough discussion about financial analyses of both CPILP and Atlantic Power, particularly in the context of Atlantic Power's offer which included a mixture of cash and equity. The financial advisors were instructed to refine their analysis in this regard, as more information about Atlantic Power became available through the due diligence process.

On May 26, 2011, the strategic review sub-committee and its financial and legal advisors met in Toronto with Atlantic Power and its financial and legal advisors to further negotiate the terms and timing of a potential transaction.

On May 30, 2011, the board of directors of the General Partner met to receive an updated report from Greenhill and CIBC with respect to negotiations to date with Atlantic Power. At that meeting, it was resolved to extend the exclusivity period for discussions with Atlantic Power. Accordingly, effective May 30, 2011, CPILP, the Manager and CPI Investments agreed to extend the Exclusivity Agreement for a further 14 days, to expire on June 13, 2011. In the following two weeks, representatives of Atlantic Power and its outside financial and legal advisors and other consultants, and representatives of CPILP and its outside financial and legal advisors and other consultants, continued their respective due diligence investigations, including in relation to CPILP's pension liabilities, financial, legal, environmental and operational matters and potential synergies.

On June 2, 2011, the Special Committee asked its legal advisors to review the legal duties and standards for directors to follow in the context of the Arrangement. There was a discussion about

Table of Contents

various governance issues, including further discussions of the appropriateness of CPILP relying upon the due diligence performed by the Manager and its advisors.

On June 3, 2011, Atlantic Power's senior management made a presentation to the board of directors of the General Partner in Calgary regarding Atlantic Power and its view of the anticipated strategic, financial and operational characteristics of the Combined Company. At this same meeting, Atlantic Power alerted CPILP to the prospect of a credit rating for the Combined Company that may be lower than that of CPILP. The parties also made progress in their discussions regarding the contractual and other business terms of a transaction. These discussions included the scope of the support agreements to be provided by each of Capital Power LP and EPCOR, the prospect that Capital Power would agree to a lock-up of any Atlantic Power shares it received as a result of the Plan of Arrangement, the terms of Atlantic Power's bridge financing commitment and a number of other terms that affected transaction certainty.

During a meeting on June 10, 2011, Atlantic Power informed CPILP that it intended to lower its offer price by $0.50 from $17.50 to $17.00 based on its due diligence findings, specifically, a newly-provided amendment to a PPA that was inconsistent with Atlantic Power's then-current model. The strategic review sub-committee met with its financial and legal advisors to discuss the implications of this information, in addition to the prospect of a credit ratings downgrade in the Combined Company.

On June 11, 2011, the Special Committee met with its legal advisors to review the status of negotiations with Atlantic Power. At this meeting, there was considerable discussion about the terms upon which CPILP would sell the North Carolina facilities to Capital Power, and the impact of that disposition upon a transaction with Atlantic Power for the remainder of CPILP. There was also a significant discussion about Atlantic Power's proposed reduction to the purchase price.

On June 15, 2011, the strategic review sub-committee and its financial and legal advisors met in Toronto with Atlantic Power and its financial and legal advisors to further negotiate the terms of a potential transaction. At this meeting, a broad list of issues were discussed including each parties' outstanding due diligence items, allocation of severance and pension deficit obligations, the scope of transitional services that would be required and the status of the legal documentation needed to consummate the Plan of Arrangement and the related transactions. Atlantic Power also provided the strategic review sub-committee and its advisors with the initial draft commitment letters in connection to the proposed bridge financing in support of the Plan of Arrangement. At the meeting, the terms and conditions of these commitment letters were reviewed in detail. There was also considerable discussion around Capital Power's acquisition of the North Carolina facilities, as well as Atlantic Power's request for a lock-up agreement from Capital Power to the extent that it received Atlantic Power common shares as consideration for its units. Over the course of the meeting, the parties and their respective advisors developed tentative agreement on each of the outstanding issues and were ultimately able to settle upon indicative terms pursuant to which Capital Power would acquire the North Carolina assets for an implied value of C$2.15 per CPILP unit, and Atlantic Power would acquire all of the CPILP units for an implied value of C$17.25 per unit, for a total implied value of C$19.40 per CPILP unit.

On June 16, 2011, the board of directors of the General Partner met with their financial and legal advisors to receive an update on the transaction with Atlantic Power, as well as to discuss the preliminary version of the due diligence report prepared by the Manager and its advisors. The meeting also discussed Atlantic Power's proposed bridge financing commitment, involving up to C$400 million to be drawn by CPILP, and its potential impact upon the credit profile and exposure of CPILP's existing debt instruments. In particular, the board of directors of the General Partner were particularly concerned about how the proposed bridge financing might impact the ability of CPILP and CPI Preferred Equity Ltd. to meet their respective payment obligations. In this regard, it was determined that Atlantic Power would be asked to provide parental guarantees to the payment obligations for the public debtholders at CPILP (medium term notes) in the event the portion of the bridge financing to be drawn by CPILP was drawn, and CPI Preferred Equity Ltd. (preferred shares). At this board

meeting, representatives of Greenhill and CIBC reviewed with the board their financial analyses with respect to Atlantic Power and the proposed Arrangement. Each of Greenhill and CIBC also rendered oral versions of their respective opinions to the Special Committee with respect to the fairness, from a financial point of view, to the holders of CPILP units (other than the General Partner, CPI Investments and Atlantic Power in respect of the Greenhill opinion and other than Capital Power and its affiliates in respect of the CIBC opinion) of the consideration to be received by such holders pursuant to the Arrangement Agreement. Finally, the board discussed a likely timetable for the completion of the remaining items in relation to the execution of the Arrangement Agreement and related materials.

On June 18, 2011, the Special Committee met with its financial and legal advisors, as well as the Manager's legal advisor, to review the status of the key transaction documents including the Arrangement Agreement and the support agreements. At the meeting, the Special Committee's legal advisors reviewed the legal duties imposed upon the directors in the circumstances, and Greenhill and CIBC made presentations with respect to their respective fairness opinions and supporting analyses. The Special Committee spent a considerable amount of this meeting reviewing with its advisors the impact of the Plan of Arrangement upon CPILP's stakeholders including, but not limited to, the unitholders, public debtholders, preferred shareholders and creditors and employees.

On June 19, 2011, the board of directors of the General Partner met to consider the terms of the Arrangement Agreement, at which meeting representatives of CPILP's and the Manager's financial and legal advisors were present. At this meeting, Fraser Milner Casgrain LLP reviewed the key elements of the transaction documents, with a focus on the deal protection provisions in each such document. After the meeting, the Special Committee went *in camera* with its financial and legal advisors.

During its *in camera* session, at the request of the Special Committee, Greenhill and CIBC each confirmed that nothing had occurred that would alter either of its financial analysis that was presented on June 16, 2011. Greenhill and CIBC also confirmed that they would deliver their respective written fairness opinions as of this date. Representatives of Norton Rose OR LLP (successor of Ogilvy Renault LLP) and Richard A. Shaw Professional Corporation reviewed for the Special Committee the terms of the Arrangement Agreement and the conduct of the negotiations to that point in time. Members of the Special Committee, with the assistance of their legal and financial advisors, reviewed and discussed the terms of the Arrangement Agreement and the process for completing the transaction. After a thorough review and discussion, the Special Committee resolved unanimously to recommend that the board of directors of the General Partner approve the Arrangement Agreement and the Plan of Arrangement, authorize CPILP to enter into the Arrangement Agreement and recommend that unitholders vote in favor of the Plan of Arrangement.

Following the conclusion of the Special Committee's *in camera* session, the board of directors of the General Partner reassembled to receive the report of the Special Committee. The Special Committee reported that Greenhill and CIBC reviewed and discussed its financial analyses with respect to Atlantic Power and the proposed Plan of Arrangement and rendered their respective opinions to the Special Committee with respect to the fairness, from a financial point of view, to the holders of CPILP units (other than Capital Power, CPI Investments and Atlantic Power), of the consideration to be received by such holders pursuant to the Arrangement Agreement. The Special Committee further reported that it had reviewed the definitive agreements with counsel and, following its review and deliberations, was recommending that the board of directors of the General Partner approve and authorize CPILP to enter into the Arrangement Agreement and recommend to unitholders that they vote in favor of the transaction at a special unitholders meeting to be convened. At this point, the CPC-elect directors recused themselves and left the board meeting. After a further discussion, and consideration of the advice received from its financial and legal advisors, the board of directors of the General Partner resolved (with Messrs. Vaasjo, Lee, Oosterbaan and Brown abstaining) to approve the Plan of Arrangement and to recommend to unitholders that they vote in favor of the Plan of Arrangement.

Later that day and into the following morning, the Arrangement Agreement, the support agreements, the Management Agreement Termination Agreement, the Management Agreement Assignment Agreement, Membership Interest Purchase Agreement with respect to the North Carolina facilities, the Employee Hiring Agreement and the Pension Transfer Agreement were finalized and executed by the appropriate parties.

Prior to the opening of the North American financial markets on June 20, 2011, Atlantic Power and CPILP issued a joint press release announcing the execution of the Arrangement Agreement and related aspects of the Plan of Arrangement.

Atlantic Power's Reasons for the Arrangement Agreement; Recommendations of Atlantic Power's Board of Directors

At a meeting held on June 19, 2011, Atlantic Power's board of directors, unanimously determined that the Arrangement and the other transactions contemplated by the Arrangement Agreement, including the issuance of Atlantic Power common shares to CPILP unitholders necessary to complete the Arrangement, are in the best interests of Atlantic Power and is fair to its stakeholders. **Accordingly, the Atlantic Power board of directors unanimously recommends that the Atlantic Power shareholders vote "FOR" the Share Issuance Resolution.** In reaching these determinations, the Atlantic Power board of directors consulted with Atlantic Power's management and its legal, financial and other advisors, and also considered numerous factors, including the following factors which the Atlantic Power board of directors viewed as supporting its decisions:

Strategic Benefits of the Plan of Arrangement. The Atlantic Power board of directors believes that the combination of Atlantic Power and CPILP should result in significant strategic benefits to the Combined Company, which benefits would accrue to Atlantic Power's shareholders, as shareholders of the Combined Company, and to the Combined Company. These strategic benefits include the following:

- Atlantic Power will become a leading publicly-traded power generation and infrastructure company, with a larger and more diversified portfolio of contracted power generation assets in the United States and Canada;
- combines Atlantic Power's proven management team with CPILP's highly qualified operations, maintenance, commercial management, accounting, human resources, legal and other personnel;
- Atlantic Power's market capitalization and enterprise value are expected to nearly double, which is expected to add liquidity and enhance access to capital to fuel the long term growth of Atlantic Power's asset base throughout North America;
- expands and diversifies Atlantic Power's asset portfolio to include projects in Canada and regions of the United States where Atlantic Power does not currently have a presence;
- enhanced geographic diversification is anticipated to lead to additional growth opportunities in those regions that Atlantic Power did not previously operate; and
- enhances diversification of the fuel types used by Atlantic Power's projects to include additional hydro, biomass and natural gas.

Financial Benefits of the Plan of Arrangement. The Atlantic Power board of directors believes that the combination of Atlantic Power and CPILP should result in significant financial benefits to Atlantic Power's shareholders and the Combined Company. These financial benefits include the following:

- upon completion of the Plan of Arrangement, Atlantic Power intends to increase dividends by 5%, from C$1.094 to C$1.15 per share on an annual basis;
- strengthens Atlantic Power's dividend sustainability for the foreseeable future with immediate accretion to cash available for distribution;

55

significant improvement in Atlantic Power's dividend payout ratio starting in 2012;

extends Atlantic Power's average PPA term from 8.8 to 9.1 years and enhances the credit quality of Atlantic Power's power offtakers; and

the combined companies will benefit from cost savings attributable to synergies from combining the two entities and eliminating the public company reporting costs for CPILP.

Other Factors Considered. During the course of its deliberations relating to the Arrangement Agreement and Plan of Arrangement, Atlantic Power's board of directors considered the following factors in addition to the benefits described above, which, taken together, supported proceeding with the transaction:

the results of Atlantic Power's significant due diligence review of CPILP, which were incorporated into the financial analyses of the transaction;

the expectation that Atlantic Power's management team would be able to successfully integrate the labor force and the operations of Atlantic Power and CPILP;

the opinion of TD Securities dated June 19, 2011 and the opinion of Morgan Stanley dated June 19, 2011, to the Atlantic Power board of directors to the effect that, as of that date and based on and subject to the various limitations, qualifications and assumptions described in the opinions, included with this joint proxy statement as Annexes B and C, the consideration to be paid by Atlantic Power to CPILP unitholders pursuant to the Arrangement Agreement was fair, from a financial point of view, to Atlantic Power (as more fully described below under the caption " Opinions of Atlantic Power's Financial Advisors");

the board's understanding of the current and prospective competitive space in the industry in which Atlantic Power and CPILP operate, including the board's belief of the potential for further consolidation;

the terms and conditions of the Arrangement Agreement, which the board of directors concluded were overall in the best interests of Atlantic Power, including the commitments by both Atlantic Power and CPILP to complete the Plan of Arrangement, and the likelihood of completing the Plan of Arrangement and the fees and expenses that might be payable if the Plan of Arrangement is not completed;

the board's belief that Atlantic Power would be able to obtain the necessary financing given the financing commitments from the commitment parties, and the fact that Atlantic Power would only be required to pay a break-up fee and would not be required to complete the transaction in the event that the financing contemplated by the Arrangement Agreement is not consummated;

the impact and fairness of the Plan of Arrangement on all stakeholders in Atlantic Power, including holders of Atlantic Power common shares;

the expectation that the regulatory and other approvals and consents required to complete the Plan of Arrangement could be obtained; and

the fact that the shareholders or unitholders of both Atlantic Power and CPILP, respectively, would have the opportunity to vote on approval of the transaction.

The Atlantic Power board of directors weighed these factors against a number of uncertainties, risks and potentially negative factors relevant to the Plan of Arrangement, including:

the challenges inherent in the combination of two entities of the size, geographic diversity and complexity of Atlantic Power and CPILP, including the possible diversion of management attention for an extended period of time;

Table of Contents

the restrictions on the conduct of Atlantic Power's business during the period between execution of the Arrangement Agreement and the consummation of the Plan of Arrangement;

the risk of not being able to realize all of the anticipated cost savings and operational synergies between Atlantic Power and CPILP and the risk that other anticipated benefits to the Combined Company might not be realized;

the risk that, despite the combined efforts of Atlantic Power and CPILP prior to the consummation of the Plan of Arrangement, the Combined Company may lose key personnel or that certain employees do not transfer as contemplated by the employee transfer arrangement;

the costs associated with completion of the Plan of Arrangement and the realization of the benefits expected to be obtained in connection with the Plan of Arrangement, including transaction expenses arising from the Plan of Arrangement;

the risk that regulatory agencies may not approve the Plan of Arrangement or may impose terms and conditions on their approvals that adversely affect the business and financial results of the Combined Company. See " Regulatory Approvals Required for the Plan of Arrangement and Other Regulatory Matters" on page 88;

the risk that the Plan of Arrangement may not be completed despite the parties' efforts or that completion may be unduly delayed, even if the requisite approval is obtained from Atlantic Power's shareholders and CPILP's unitholders;

the increased leverage of the Combined Company which will result in high interest payments and could negatively affect the Combined Company's credit ratings, limit access to credit markets or make such access more expensive and reduce operational and strategic flexibility; and

the risks of the type and nature described under the section entitled "Risk Factors," beginning on page 22 and the matters described under "Cautionary Note Regarding Forward-Looking Statements" beginning on page 30.

Atlantic Power's board of directors further considered the proposed form of consideration to be received by CPILP unitholders pursuant to the Plan of Arrangement and the ways in which Atlantic Power would finance the payment of the consideration. Atlantic Power's board of directors consulted with Atlantic Power's management and its legal, financial and other advisors and determined that an all-cash transaction would not be optimal for Atlantic Power since it would need to raise substantially the full amount of the consideration payable under the Plan of Arrangement by either borrowings under new or existing credit facilities and/or in one or more capital markets transactions. Raising that much cash over so short a period, even if possible, would also result in Atlantic Power incurring an overall higher cost of capital in the way of fees, commissions and expenses of the borrowings and/or offerings. In addition, an all-cash transaction would be immediately taxable to CPILP unitholders, whereas eligible holders that received Atlantic Power common shares pursuant to a plan of arrangement would be entitled to make a joint tax election that would, depending on the circumstances of each particular CPILP unitholder, allow for a full or partial deferral of taxable gains that would otherwise be realized. Accordingly, under the Plan of Arrangement as ultimately approved by Atlantic Power's board of directors, CPILP unitholders could elect to receive either C$19.40 in cash or 1.3 Atlantic Power common shares for each CPILP unit held but all cash elections would be subject to proration if total cash elections exceed approximately C$506.5 million, setting a maximum on the aggregate amount of cash Atlantic Power would need to complete the Plan of Arrangement. Likewise, all share elections would be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares, thereby setting a maximum on the number of Atlantic Power common shares that could be issued under the Plan of Arrangement.

Table of Contents

Overall, Atlantic Power's board of directors concluded that the uncertainties, risks and potentially negative factors relevant to the Plan of Arrangement were outweighed by the potential benefits that it expected Atlantic Power would achieve as a result of the Plan of Arrangement, each as discussed above.

This discussion of the information and factors considered by Atlantic Power's board of directors includes the principal positive and negative factors considered by the Atlantic Power board of directors, but is not intended to be exhaustive and may not include all of the factors considered by the Atlantic Power board of directors. In view of the wide variety of factors considered in connection with its evaluation of the Plan of Arrangement and the other transactions contemplated in connection with the Plan of Arrangement, and the complexity of these matters, Atlantic Power's board of directors did not find it useful and did not attempt to quantify or assign any relative or specific weights to the various factors that it considered in reaching its determination to approve the Plan of Arrangement and the other transactions contemplated in connection with the Plan of Arrangement and to make its recommendations to Atlantic Power shareholders. Rather, Atlantic Power's board of directors viewed its decisions as being based on the totality of the information presented to it and the factors it considered. In addition, individual members of Atlantic Power's board of directors may have given differing weights to different factors. It should be noted that this explanation of the reasoning of the Atlantic Power board of directors and certain information presented in this section is forward-looking in nature and, therefore, that information should be read in light of the factors discussed in the section entitled "Cautionary Note Regarding Forward-Looking Statements" in this joint proxy statement, beginning on page 30.

The TD Securities Fairness Opinion is premised and conditional upon such accuracy, completeness and fair presentation and upon there being no "misrepresentation" (as defined in the *Securities Act* (Ontario)) in the Data. In addition, TD Securities assumed that there is no information relating to the business, operations, assets, liabilities, condition (financial or otherwise), capital or prospects of Atlantic Power, CPILP or any of their respective affiliates that is or could reasonably be expected to be material to the TD Securities Fairness Opinion that was not disclosed or otherwise made available to TD Securities as part of the Data. Subject to the exercise of professional judgment and except as expressly described in the TD Securities Fairness Opinion, TD Securities did not attempt to verify independently the accuracy, completeness or fair presentation of any of the Data.

With respect to the budgets, forecasts, projections or estimates provided to TD Securities and used in its analyses, TD Securities noted that projecting future results is inherently subject to uncertainty. TD Securities assumed, however, that such budgets, forecasts, projections and estimates were prepared using the assumptions identified therein (as discussed between senior management of Atlantic Power and TD Securities) which TD Securities was advised are (or were at the time of preparation and continue to be), in the opinion of Atlantic Power, reasonable in the circumstances. In addition, TD Securities assumed that the expected synergies will be achieved at the times and in the amounts projected by Atlantic Power. TD Securities expressed no independent view as to the reasonableness of such budgets, forecasts, projections and estimates and the assumptions on which they are based.

TD Securities was not engaged to review and did not review any of the legal, accounting or tax aspects of the Proposed Transaction. In preparing the TD Securities Fairness Opinion, TD Securities assumed that the Proposed Transaction complies with all applicable laws and accounting requirements and has no adverse tax or other adverse consequences for Atlantic Power.

In preparing the TD Securities Fairness Opinion, TD Securities made several assumptions, including that all final executed versions of agreements and documents relating to the Proposed Transaction will conform in all material respects to the drafts provided to or terms discussed with TD Securities, all conditions to the completion of the Proposed Transaction can and will be satisfied in due course, that all consents, permissions, exemptions or orders of relevant regulatory authorities or third parties will be obtained, without adverse condition or qualification, and that the actions being taken and procedures being followed to implement the Proposed Transaction are valid and effective and comply with all applicable laws and regulatory requirements. In its analysis in connection with the preparation of the TD Securities Fairness Opinion, TD Securities made numerous assumptions with respect to industry performance, general business and economic conditions, and other matters, many of which are beyond the control of TD Securities, Atlantic Power, CPILP or their respective affiliates. Among other things, TD Securities assumed the accuracy, completeness and fair presentation of and relied upon the financial statements forming part of the Data. The TD Securities Fairness Opinion is conditional on all such assumptions being correct.

The TD Securities Fairness Opinion is directed to Atlantic Power's board of directors and is not intended to be, and does not constitute, a recommendation that Atlantic Power shareholders vote in favor of the Proposed Transaction or as an opinion concerning the trading price or value of any securities of Atlantic Power following the announcement or completion of the Proposed Transaction. The TD Securities Fairness Opinion does not address the relative merits of the Proposed Transaction as compared to other transactions or business strategies that might be available to Atlantic Power, nor does it address the underlying business decision to implement the Proposed Transaction. In preparing

Comparable Company Analysis

TD Securities performed a comparable company analysis, which is designed to provide an implied value of a company by comparing it to similar companies. TD Securities compared certain financial information of Atlantic Power and CPILP with publicly-available information for peer group companies and funds that operate in and are exposed to similar lines of business as Atlantic Power and CPILP, namely Canadian-traded independent power producers. The peer group included:

Algonquin Power & Utilities Corp.

Atlantic Power Corp.

Boralex Inc.

Brookfield Renewable Power Fund

Capital Power Income L.P.

Innergex Renewable Energy Inc.

Capstone Infrastructure Corp.

Northland Power Inc.

For this analysis, TD Securities considered the ratio of enterprise value (defined as equity value plus total debt, minority interest, capital lease obligations and preferred shares less cash and cash equivalents, referred to as EV) to 2011 estimated earnings before interest, taxes, depreciation and amortization (referred to as EBITDA), EV/EBITDA, to be the primary value multiple when analyzing each of these companies or funds. Based on estimates for the peer group companies or funds provided by the Institutional Brokers' Estimate System (I/B/E/S), and public filings, TD Securities calculated the relevant metrics for each of the comparable companies or funds. TD Securities selected, using its experience and judgment, a representative range of EV/EBITDA multiples of the comparable companies or funds and applied this range of multiples to the relevant financial statistics for Atlantic Power and CPILP. For purposes of estimated 2011 EBITDA, TD Securities utilized consensus metrics provided by I/B/E/S, as well as estimates prepared by Atlantic Power management.

TD Securities calculated the implied equity range for Atlantic Power common shares as follows:

	Estimated 2011 EBITDA (C$MM)	EV/EBITDA Multiple Range	Implied Range Per Atlantic Power Common Share
I/B/E/S Consensus	C$ 133	10.0x - 11.0x	C$10.40 - $12.34
Atlantic Power Management	C$ 147	10.0x - 11.0x	C$12.43 - $14.57

Table of Contents

TD Securities calculated the implied equity range per CPILP unit as follows:

	Estimated 2011 EBITDA (C$MM)	EV/EBITDA Multiple Range	Implied Range Per CPILP Unit
I/B/E/S Consensus	C$ 187	10.0x - 11.0x	C$ 17.79 - $21.10
Atlantic Power Management	C$ 174	10.0x - 11.0x	C$ 17.51 - $20.58

The process of analyzing EV/EBITDA multiples implied by comparable publicly traded companies or funds and applying these EV/EBITDA multiples to Atlantic Power and CPILP involved certain judgments concerning the financial and operating characteristics of the peer group compared to Atlantic Power and CPILP. Given differences in business mix, growth prospects and risks inherent in the comparable companies or funds identified, TD Securities did not consider any specific company to be directly comparable to Atlantic Power or CPILP.

Precedent Transaction Analysis

Using publicly-available information, TD Securities reviewed the terms of selected precedent transactions in which the targets were Canadian independent power producers, such as Atlantic Power and CPILP.

TD Securities reviewed the consideration given and calculated the ratio of EV to EBITDA ("EV/EBITDA Multiple").

For this analysis, TD Securities reviewed the following transactions:

Innergex Power Income Fund	Innergex Renewable Energy Inc.	02/01/2010

FPL Energy, LLC	Creststreet Power & Income Fund LP	04/18/2008
Cheung Kong Infrastructure Holdings Ltd.	TransAlta Power, LP	10/15/2007

EPCOR Utilities Inc.	TransCanada Power L.P. (30.6% interest in public units and control of the General Partner)	05/17/2005

Based on the analysis of the relevant characteristics for each of the selected precedent transactions and on the experience and judgment of TD Securities, TD Securities selected a representative range of EV/EBITDA Multiples of the selected precedent transactions and applied this range of multiples to the relevant EBITDA estimates for CPILP.

TD Securities calculated the implied equity range per CPILP unit as follows:

	Estimated 2011 EBITDA (C$MM)	EV/EBITDA Multiple Range	Implied Range Per CPILP Unit
I/B/E/S Consensus	C$ 187	9.5x - 11.0x	C$16.13 - $21.10
Atlantic Power Management	C$ 174	9.5x - 11.0x	C$15.97 - $20.58

Table of Contents

The process of analyzing EV/EBITDA Multiples implied by selected precedent transactions and applying these EV/EBITDA multiples to CPILP involved certain judgments concerning, among other things, the financial and operating characteristics of the companies or funds acquired in these transactions compared to the business of CPILP. Given the differences in business mix, economic and market conditions, growth prospects and risks inherent in the selected precedent transactions identified, TD Securities did not consider any specific selected precedent transaction to be directly comparable to CPILP.

Discounted Cash Flow Analysis

TD Securities performed discounted cash flow (DCF) analysis on Atlantic Power and CPILP, which is an analysis of the present value of expected future cash flows. The DCF methodology reflects the growth prospects and risks inherent in each business by taking into account the amount, timing and relative certainty of projected free cash flows expected to be generated by each business. The DCF approach requires that certain assumptions be made regarding, among other things, future free cash flows, discount rates and terminal values. The possibility that some of the assumptions will prove to be inaccurate is one factor involved in the determination of discount rates to be used in establishing a range of values. TD Securities' DCF analysis of Atlantic Power and CPILP involved discounting to a present value the projected levered after tax free cash flows from January 1, 2012 until December 31, 2024 for each of Atlantic Power and CPILP, plus terminal values determined as at December 31, 2024, utilizing an appropriate cost of equity as the discount rate.

TD Securities analyzed Atlantic Power's business through discussions with Atlantic Power management, a review of 2012 - 2024 financial forecasts prepared by Atlantic Power management and by using publicly-available information. The terminal value was calculated by applying a terminal year perpetual growth formula to 2025 free cash flow as projected by Atlantic Power management. The perpetual growth formula used a 0% terminal year growth rate and 8.5% - 9.5% was selected as the appropriate equity discount rate range. The discount rate range was selected based on an analysis of Atlantic Power's cost of equity. This analysis resulted in an implied equity range for Atlantic Power of C$9.49 - C$10.57 per share.

TD Securities analyzed CPILP's business through discussions with both Atlantic Power and CPILP management, a review of 2012 - 2024 financial forecasts prepared by Atlantic Power management and by using publicly-available information. Atlantic Power management prepared two financial forecasts for CPILP. A low case and a high case incorporating the results of the due diligence performed by Atlantic Power on CPILP. Atlantic Power management also identified synergies related to the elimination of certain public company costs and efficient use of available tax deductions. The terminal value was calculated by applying a terminal year perpetual growth formula to 2025 free cash flow, as projected by Atlantic Power management. The perpetual growth formula used a 0% terminal year growth rate and 8.5% - 9.5% was selected as the appropriate equity discount rate range. The discount rate range was selected based on an analysis of CPILP's cost of equity. This analysis resulted in an implied equity range for CPILP of C$15.72 - C$19.33 per unit including synergies.

TD Securities analyzed the implied value, using the DCF methodology described above, of Atlantic Power per common share on a pro forma basis, after giving effect to the Proposed Transaction. TD Securities assumed that Atlantic Power successfully completes the public market financings for the Proposed Transaction as contemplated at June 17, 2011. The public market financings contemplated at June 17, 2011 included, among other things, a term-debt issuance of approximately $430 million and an Atlantic Power public common share offering of approximately C$200 million. TD Securities performed its analysis using the low and high financial forecasts including the identified synergies above. The analysis resulted in an implied equity range for Atlantic Power on a pro forma basis, after giving effect to the Proposed Transaction of C$10.23 - C$12.52 per share including synergies.

General

In connection with the review of the Proposed Transaction by the board of directors of Atlantic Power, TD Securities performed a variety of financial and comparative analyses for purposes of rendering its opinion. The preparation of a financial opinion is a complex process and is not necessarily amenable to partial analysis or summary description. In arriving at its opinion, TD Securities considered the results of all of its analyses as a whole and did not attribute any particular weight to any single analysis or factor it considered. TD Securities believes that its analyses must be considered as a whole and that selecting portions of the analyses or the factors considered by it, without considering all factors and analyses together, could create an incomplete or misleading view of the process underlying the TD Securities Fairness Opinion. In addition, TD Securities may have given various analyses and factors more or less weight than other analyses and factors, and may have deemed various assumptions more or less probable than other assumptions. As a result, the ranges of implied values resulting from any particular analysis or combination of analyses described above should not be taken to be the view of TD Securities with respect to the actual value of Atlantic Power or CPILP. TD Securities has not prepared a valuation of Atlantic Power or CPILP or any of their respective securities or assets or liabilities and the Fairness Opinion should not be construed as such.

Table of Contents

In performing its analyses, TD Securities made numerous assumptions with respect to industry performance, general business, regulatory, economic, market and financial conditions and other matters. Many of these assumptions are beyond the control of Atlantic Power and CPILP. Any estimates contained in TD Securities' analyses are not necessarily indicative of future results or actual values, which may be significantly more or less favourable than those suggested by such estimates.

The analyses performed were prepared solely as part of TD Securities' analysis of the fairness of the Consideration to be paid by Atlantic Power in connection with the Proposed Transaction from a financial point of view to Atlantic Power, and were conducted in connection with the delivery of the TD Securities Fairness Opinion to the board of directors of Atlantic Power. These analyses do not purport to be appraisals or to reflect the prices at which shares of common stock of Atlantic Power or CPILP units might actually trade. The consideration to be paid to the holders of CPILP units and other terms of the Proposed Transaction were determined through arm's-length negotiations between Atlantic Power and CPILP and were approved by Atlantic Power's board of directors. TD Securities provided advice to Atlantic Power during such negotiations; however, TD Securities did not recommend any specific consideration to Atlantic Power or that any specific consideration constituted the only appropriate consideration for the Proposed Transaction. In addition, as described above, TD Securities' opinion and presentation to Atlantic Power's board of directors were one of many factors taken into consideration by such Board in making their decision to approve the Proposed Transaction. Consequently, the TD Securities analyses as described above should not be viewed as determinative of the opinion of Atlantic Power's board of directors with respect to the consideration or the value of CPILP, or of whether the board of directors of Atlantic Power would have been willing to agree to pay a different consideration. See the section entitled "Atlantic Power's Reasons for the Arrangement Agreement; Recommendations of Atlantic Power's Board of Directors" beginning on page 55.

The TD Securities Fairness Opinion was approved by a committee of senior investment banking professionals of TD Securities in accordance with its customary practice.

No company utilized in the selected companies analysis is identical to Atlantic Power or CPILP. Accordingly, an analysis of the results of the foregoing necessarily involves complex considerations and judgments concerning differences in financial and operating characteristics of Atlantic Power and CPILP and other factors that could affect the public trading value of the companies to which they are being compared. In evaluating the selected companies, Morgan Stanley made judgments and assumptions with regard to industry performance, general business, economic, market and financial conditions and other matters, many of which are beyond the control of Atlantic Power and CPILP, such as the impact of competition on the businesses of Atlantic Power or CPILP and the industry generally, industry growth and the absence of any adverse material change in the financial conditions and prospects of Atlantic Power or CPILP or the industry or in the financial markets in general. Mathematical analysis, such as determining the mean, median or average, is not in itself a meaningful method of using selected company data.

Discounted Cash Flow Analyses. Morgan Stanley performed a discounted cash flow analysis (DCF) on Atlantic Power and CPILP using projections provided by Atlantic Power management. A discounted cash flow analysis is designed to provide insight into the value of a company as a function of its future cash flows and terminal value. Morgan Stanley's DCF analysis of Atlantic Power and CPILP involved discounting to a present value the projected levered after tax free cash flows from January 1, 2012 until December 31, 2024 for each of Atlantic Power and CPILP, plus terminal values determined as at December 31, 2024, utilizing a range of costs of equity which were chosen by Morgan Stanley based upon an analysis of market discount rates applicable to selected companies.

Atlantic Power. Morgan Stanley calculated indications of net present value of levered after tax free cash flows for Atlantic Power for the years 2012 through 2024 using discount rates ranging from 8.0% to 9.0%, reflecting estimates of Atlantic Power's cost of equity. Morgan Stanley then calculated an implied terminal value for Atlantic Power by applying a perpetual growth rate of 0% to an illustrative terminal year levered after tax free cash flow, which is the cash flow assumed to continue into perpetuity following the initial projection period that ends in the year 2024. This illustrative terminal value was then discounted to calculate indications of present value using an illustrative terminal discount rate ranging from 8.0% to 9.0%. From this analysis, Morgan Stanley calculated an implied per share equity reference range for Atlantic Power common shares of C$8.24 to C$8.93.

CPILP. Morgan Stanley calculated indications of net present value of levered after tax free cash flows for CPILP for the years 2012 through 2024 using discount rates ranging from 8.0% to 9.0%, reflecting estimates of CPILP's cost of equity. Morgan Stanley then calculated an implied terminal value for CPILP by applying a perpetual growth rate of 0% to an illustrative terminal year levered after tax free cash flow, which is the cash flow assumed to continue into perpetuity following the initial projection period that ends in the year 2024. This illustrative terminal value was then discounted to calculate indications of present value using an illustrative terminal discount rate ranging from 8.0% to 9.0%. Morgan Stanley performed these analyses utilizing Cases 1 and 2, the two financial forecasts prepared for CPILP by Atlantic Power management. From this analysis, Morgan Stanley calculated an implied per share equity reference range for CPILP units of C$14.52 to C$18.85.

Pro Forma Analysis. Morgan Stanley calculated indications of net present value of levered after tax free cash flows for Atlantic Power on a pro forma basis for the transaction for the years 2012 through 2024 using discount rates ranging from 8.0% to 9.0%, reflecting estimates of Atlantic Power's pro forma cost of equity. Morgan Stanley then calculated an implied terminal value for Atlantic Power on a pro forma basis by applying a perpetual growth rate of 0% to an illustrative terminal year levered after tax free cash flow, which is the cash flow assumed to continue into perpetuity following the initial projection period that ends in the year 2024. This illustrative terminal value was then discounted to calculate indications of present value using an illustrative terminal discount rate ranging from 8.0% to 9.0%. Morgan Stanley performed these pro forma analyses utilizing Cases 1 and 2, the two financial

forecasts prepared for CPILP by Atlantic Power management. Included in this pro forma analysis were synergies related to the elimination of certain public company costs identified by Atlantic Power management. Morgan Stanley noted that the implied offer value per CPILP unit as of June 17, 2011 was C$19.42, based on the closing price of Atlantic Power common shares on June 17, 2011 of $14.96.

Distributable Cash Flow Accretion Analysis. Morgan Stanley performed distributable cash flow accretion analysis, which compares projected cash flows available for distribution to common shareholders of Atlantic Power on a standalone basis and pro forma for the transaction, using forecasts prepared by Atlantic Power management. For purposes of this analysis, cash flow available for distribution is cash from operations less maintenance capital expenditures and mandatory debt principal or amortization payments.

Distributable Cash Per Share	**2012 - 2016 Average**
Atlantic Power Standalone	C$0.96
Pro Forma Atlantic Power Management Case 1	C$1.23
Pro Forma Atlantic Power Management Case 2	C$1.29

Analysis of Selected Precedent Transactions. Morgan Stanley also performed an analysis of selected precedent transactions, which attempted to provide an implied value for CPILP by comparing it to other companies involved in business combinations. Using publicly available information, Morgan Stanley considered the following set of transactions:

Announcement Date	**Acquiror**	**Target**
May 2010	Boralex Inc.	Boralex Power Income Fund
February 2010	Innergex Power Income Fund	Innergex Renewable Energy Inc.

May 2005	EPCOR Utilities Inc.	TransCanada Power L.P. (30.6% interest of public units and control of the GP)

Morgan Stanley compared certain financial and market statistics of the selected precedent transactions. Based on an assessment of the selected precedent transactions, Morgan Stanley applied a representative range of multiples that were derived from the selected precedent transaction analysis and calculated an implied per share equity reference range for CPILP units with respect to aggregate value to 2011 estimated EBITDA.

Based on this analysis, Morgan Stanley derived an implied per share equity reference range for CPILP units of C$14.30 to C$21.32.

Table of Contents

Morgan Stanley noted that the implied offer value per CPILP unit as of June 17, 2011 was C$19.42, based on the closing price of Atlantic Power common shares on June 17, 2011 of $14.96.

No company or transaction utilized as a comparison in the analysis of selected precedent transactions is identical to CPILP, Atlantic Power, or the transaction in business mix, timing and size. Accordingly, an analysis of the results of the foregoing necessarily involves complex considerations and judgments concerning differences in financial and operating characteristics of CPILP and Atlantic Power and other factors that would affect the value of the companies to which they are being compared. In evaluating the precedent transactions, Morgan Stanley made judgments and assumptions with regard to industry performance, global business, economic, market and financial conditions and other matters, many of which are beyond the control of CPILP and Atlantic Power, such as the impact of competition on CPILP and Atlantic Power and the industry generally, industry growth and the absence of any adverse material change in the financial conditions and prospects of CPILP, Atlantic Power, or the industry or the financial markets in general. Mathematical analysis, such as determining the mean or median, is not in itself a meaningful method of using precedent transactions data.

General

In connection with the review of the transaction by Atlantic Power's board of directors, Morgan Stanley performed a variety of financial and comparative analyses for purposes of rendering its opinion. The preparation of a fairness opinion is a complex process and is not susceptible to partial analysis or summary description. In arriving at its opinion, Morgan Stanley considered the results of all of its analyses as a whole and did not attribute any particular weight to any analysis or factor considered. Furthermore, Morgan Stanley believes that the summary provided and the analyses described above must be considered as a whole and that selecting any portion of the analyses, without considering all of them, would create an incomplete view of the process underlying Morgan Stanley's analyses and opinion. In addition, Morgan Stanley may have given various analyses and factors more or less weight than other analyses and factors, and may have deemed various assumptions more or less probable than other assumptions. As a result, the ranges of valuations resulting from any particular analysis or combination of analyses described above should not be taken to be the view of Morgan Stanley with respect to the actual value of CPILP units or Atlantic Power common shares.

In performing its analyses, Morgan Stanley made numerous assumptions with respect to industry performance, general business and economic conditions and other matters, many of which are beyond the control of CPILP or Atlantic Power. Many of these assumptions are beyond the control of CPILP and Atlantic Power. Any estimates contained in Morgan Stanley's analyses are not necessarily indicative of future results or actual values, which may be significantly more or less favorable than those suggested by the estimates. The analyses were performed solely as part of Morgan Stanley's analysis of the fairness from a financial point of view of the consideration to be paid by Atlantic Power pursuant to the Arrangement Agreement and were conducted in connection with the delivery of Morgan Stanley's opinion dated June 19, 2011 to the Atlantic Power board of directors. The analyses do not purport to be appraisals or to reflect the prices at which CPILP units or Atlantic Power common shares might actually trade. The consideration under the Arrangement Agreement and other terms of the Arrangement Agreement were determined through arm's length negotiations between CPILP and Atlantic Power and approved by the Atlantic Power board of directors. Morgan Stanley provided advice to Atlantic Power during these negotiations, but did not, however, recommend any specific purchase price or transaction consideration to Atlantic Power, or that any specific purchase price or transaction consideration constituted the only appropriate purchase price or transaction consideration for the transaction. The opinion of Morgan Stanley was one of a number of factors taken into consideration by Atlantic Power's board of directors in making its decision to approve the Arrangement Agreement and the transactions contemplated by the Arrangement Agreement. Consequently, Morgan Stanley's analyses described above should not be viewed as determinative of the opinion of Atlantic Power's

board of directors with respect to the value of CPILP or Atlantic Power, or the consideration, or of whether the Atlantic Power board of directors would have been willing to agree to a different purchase price or transaction consideration. See the section entitled "The Arrangement Agreement and Plan of Arrangement Atlantic Power's Reasons for the Arrangement Agreement; Recommendations of Atlantic Power's Board of Directors" beginning on page 55. Morgan Stanley's opinion was approved by a committee of Morgan Stanley investment banking and other professionals in accordance with its customary practice.

Morgan Stanley, as part of its investment banking businesses, is continually engaged in the valuation of businesses and their securities in connection with mergers and acquisitions, negotiated underwritings, competitive biddings, secondary distributions of listed and unlisted securities, private placements and valuations for estate, corporate and other purposes. Atlantic Power selected Morgan Stanley as its financial advisor based upon the firm's qualifications, experience and expertise and because it is an internationally recognized investment banking firm with substantial experience in transactions similar to the transaction. In the ordinary course of its trading and brokerage activities, Morgan Stanley and its affiliates may at any time hold long or short positions, trade or otherwise effect transactions, for their own accounts or for the accounts of customers, in the equity or debt securities or senior loans of CPILP or Atlantic Power or any currency or commodity related to CPILP or Atlantic Power.

Pursuant to the terms of its engagement, Atlantic Power has agreed to pay Morgan Stanley a fee of $1,000,000, which became payable upon announcement of the execution of the Arrangement Agreement and an additional fee of $4,000,000 that is payable upon consummation of the Plan of Arrangement. A portion of this fee is creditable against any financing fees that Morgan Stanley may receive in connection with the proposed transaction. Atlantic Power has also agreed to reimburse Morgan Stanley for its fees and expenses incurred in performing its services. In addition, Atlantic Power has agreed to indemnify Morgan Stanley and its affiliates, their respective directors, officers, agents and employees and each person, if any, controlling Morgan Stanley or any of its affiliates against certain liabilities and expenses, including certain liabilities under the federal securities laws, related to or arising out of Morgan Stanley's engagement and any related transactions.

In addition, Morgan Stanley (jointly with TD Securities) has committed to provide a $625 million senior secured credit facility to Atlantic Power that can be utilized to fund the cash consideration required under the Plan of Arrangement and related fees and expenses, for which Morgan Stanley will receive customary compensation. Furthermore, Atlantic Power has agreed to retain Morgan Stanley and TD Securities to jointly lead any debt or equity offering related to the proposed transaction, for which Morgan Stanley will receive customary compensation.

Certain Atlantic Power Prospective Financial Information

Atlantic Power does not as a matter of course make public long-term forecasts as to future performance or other prospective financial information beyond the current fiscal year, and Atlantic Power is especially wary of making forecasts or projections for extended periods due to the unpredictability of the underlying assumptions and estimates. Atlantic Power's internal financial forecasts above reflect numerous judgments, estimates and assumptions with respect to industry performance, general business, economic, regulatory, market and financial conditions and other future events, as well as matters specific to Atlantic Power's business all of which are difficult to predict and many of which are beyond control. Atlantic Power's internal financial forecasts are subjective in many respects and thus are susceptible to multiple interpretations and periodic revisions based on actual experience and business developments. **As such, internal financial forecasts constitute forward-looking information and are subject to risks and uncertainties that could cause actual results to differ materially from the results forecasted in such projections, including the various risks described under the heading "Risk Factors" in this joint proxy statement and in Atlantic Power's Annual Report on Form 10-K for the year ended December 31, 2010, as updated by Atlantic Power's subsequent Quarterly Reports on Form 10-Q, all of which are filed with the SEC and/or incorporated by reference into this joint proxy statement. See also "Cautionary Note Regarding Forward-Looking Statements" beginning on page 30 of this joint proxy statement.** There can be no assurance that the forecasted results will be realized or that actual results will not be significantly higher or lower than forecasted. Atlantic Power's internal financial forecasts cannot be considered a reliable predictor of future results and should not be relied upon as such. Atlantic Power's internal financial forecasts cover multiple years and such information by its nature becomes less reliable with each successive year.

ATLANTIC POWER DOES NOT INTEND TO UPDATE OR OTHERWISE REVISE THE ABOVE INFORMATION TO REFLECT CIRCUMSTANCES EXISTING AFTER THE DATE WHEN MADE OR TO REFLECT THE OCCURRENCE OF FUTURE EVENTS, EVEN IN THE EVENT THAT ANY OR ALL OF THE ASSUMPTIONS UNDERLYING SUCH INFORMATION ARE NO LONGER APPROPRIATE, EXCEPT AS MAY BE REQUIRED BY APPLICABLE LAW.

CPILP's Reasons for the Plan of Arrangement; Recommendations of the Board of Directors of CPILP's General Partner

At a meeting held on June 19, 2011, after considering, among other things, the oral opinions of CIBC and Greenhill, subsequently confirmed in writing, the full text of which are attached as Annexes D and E, respectively, of this joint proxy statement, the members of the board of directors of the General Partner entitled to vote, being the independent directors, determined unanimously that the Arrangement is in the best interests of CPILP and is fair to the CPILP unitholders and resolved unanimously to recommend to the CPILP unitholders that they vote in favor of the Arrangement. The members of the board of directors of the General Partner entitled to vote also unanimously approved the Arrangement and the execution and performance of the Arrangement Agreement. **Accordingly, the board of directors of the General Partner unanimously recommends that the CPILP unitholders vote "FOR" the approval of the Arrangement Resolution.**

In considering the proposed business combination with Atlantic Power and in making its determination that the Arrangement is advisable and in the best interests of CPILP and its unitholders, the board of directors of the General Partner consulted with its management and financial, legal and other advisors, and considered a variety of factors weighing in favor of or relevant to the Plan of Arrangement, including the factors discussed below.

Table of Contents

Strategic Benefits of the Plan of Arrangement. The board of directors of the General Partner believes that the combination of Atlantic Power and CPILP should result in significant strategic benefits to the Combined Company, which would benefit CPILP and its unitholders to the extent they receive Atlantic Power common shares of the Combined Company. These strategic benefits include the following:

- the creation of a more diversified, larger combined power company than CPILP currently is alone;
- the enhancement to Atlantic Power's proven management team by combining it with CPILP's highly qualified operations and other personnel;
- the advantages presented by the larger scale and expanded scope of the Combined Company in meeting the challenges facing the power industry in light of current and potential future changes in regulatory, financial and economic conditions affecting the industry;
- the benefit of allowing the business of CPILP to grow independently of the Manager, which has its own power generation business, and the additional growth opportunities of the Combined Company;
- the complementary nature of the respective products and geographic markets of Atlantic Power and CPILP, and the opportunity created by the transaction to enhance the capabilities of both entities to operate more effectively and efficiently;
- the additional growth opportunities presented by the expanded operating platform of the Combined Company and strong and stable cash flows from existing Atlantic Power and CPILP facilities that are expected to support future growth; and
- the expected market capitalization, free cash flow, liquidity and capital structure of the Combined Company relative to CPILP on a stand-alone basis, including the potential for the Combined Company to participate in strategic opportunities that otherwise might not be available to CPILP.

Financial Benefits of the Plan of Arrangement. The board of directors of the General Partner believes that the combination of Atlantic Power and CPILP should result in significant financial benefits to CPILP's unitholders and the Combined Company. These financial benefits include the following:

- the fact that CPILP unitholders may receive as consideration for their units the Combined Company's common shares, which would allow CPILP unitholders to share in value-creation opportunities of the Combined Company;
- the belief that, after completion of the Plan of Arrangement, the Combined Company will have a strong cash generation profile; and
- the business operations and prospects of the Combined Company and each of Atlantic Power and CPILP, and the then-current financial market conditions and historical market prices, volatility and trading information with respect to Atlantic Power shares and CPILP units.

Other Factors Considered. During the course of its deliberations relating to the Arrangement Agreement, the board of directors of the General Partner considered the following factors in addition to the benefits described above:

- the inherent constraints associated with CPILP's current growth structure and the belief that the Combined Company will be well positioned and structured to generate and exploit future growth opportunities;

Table of Contents

the prospect of finding it necessary to develop or otherwise replace the management, employee work force and administrative functions performed by the Manager, given that Capital Power had advised CPILP that was considering divesting itself of all of its CPILP interests in order to focus on its own core business;

its analysis and understanding of the business, operations, financial performance, financial condition, earnings, strategy and future prospects of CPILP on a stand-alone basis, and the assessment, based on such analysis and understanding, that the Plan of Arrangement would be more favorable to CPILP and its unitholders in the long-term in light of the potential rewards, risks and uncertainties associated with CPILP continuing to operate as a stand-alone entity;

the reduction of the proposed per share dividend of the Combined Company relative to the per unit distributions of CPILP and the increased sustainability of the Combined Company's dividend over time;

the alternatives available to CPILP if it continued on a stand-alone basis;

the financial analyses reviewed and discussed with the board of directors of the General Partner by representatives of CIBC, as well as the opinion rendered by CIBC to the effect that, as of June 19, 2011 and based upon and subject to the various limitations, qualifications and assumptions set forth in its opinion, the consideration of C$19.40 per unit in cash or 1.3 Atlantic Power common shares per unit to be received by holders of CPILP pursuant to the Arrangement Agreement was fair from a financial point of view, to such holders units (other than Capital Power and its affiliates);

the financial analyses reviewed and discussed with the board of directors of the General Partner by representatives of Greenhill, as well as the written opinion rendered by Greenhill to the effect that, on June 19, 2011 and based upon and subject to the various limitations, qualifications and assumptions set forth in its written opinion, the purchase price of C$19.40 per unit in cash or 1.3 Atlantic Power common shares per unit to be paid to holders of CPILP units (other than the General Partner, CPI Investments and Atlantic Power) pursuant to the Arrangement Agreement was fair, from a financial point of view, to such holders;

the fact that the respective shareholders of Atlantic Power and unitholders of CPILP would vote on approval of the transaction, including the fact that the required vote of CPILP unitholders for the adoption of the Arrangement Agreement is (i) at least two-thirds of the votes cast by the unitholders of CPILP, and (ii) a majority of the votes cast by CPILP's unitholders (excluding the General Partner and CPI Investments and their respective associates and affiliates), at a special meeting of CPILP unitholders;

the results of the due diligence investigations of Atlantic Power by CPILP's management and financial, legal and other advisors;

the structure of the Plan of Arrangement and terms and conditions of the Arrangement Agreement, including the commitment by Atlantic Power and CPILP to take all actions to complete the Plan of Arrangement as soon as reasonably possible (see "Summary of the Arrangement Agreement" beginning on page 93); and

the fact that the Arrangement Agreement does not preclude a third party from making a proposal for an acquisition of or business combination with CPILP and that, under certain circumstances more fully described in the sections "Summary of the Arrangement Agreement Covenants Non-Solicitation" on page 100 and "Summary of the Arrangement Agreement Termination of the Arrangement Agreement" on page 102 of this joint proxy statement, CPILP may provide information to and negotiate with such a third party and the board of directors of

the General Partner may change its recommendation to CPILP unitholders regarding the transaction with Atlantic Power.

The board of directors of the General Partner weighed these factors against a number of uncertainties, risks and potentially negative factors relevant to the Arrangement Agreement, including:

the challenges inherent in the combination of entities of the size and geographic scope of Atlantic Power and CPILP, the risk of not capturing all of the anticipated synergies and the risk that other anticipated benefits might not be fully realized or may take longer than expected to achieve;

the risk that integration of the two businesses, including the transaction expenses associated with the Plan of Arrangement, may be more costly, and may divert management attention for a greater period of time, than anticipated and that it may be difficult to retain key employees;

the possibility that the efficiencies inherent in Atlantic Power's corporate structure cannot be fully realized for the Combined Company or may take longer to realize than expected;

the risk of not maintaining Atlantic Power's and CPILP's revenues given the challenges facing the power industry in light of changes in regulatory, financial and economic conditions affecting the industry, including possible industry consolidation;

the restrictions on the conduct of CPILP's business during the period between execution of the Arrangement Agreement and the completion of the Plan of Arrangement;

the risk that regulatory agencies may not approve the proposed Plan of Arrangement or may impose terms and conditions on their approvals that adversely affect the business and financial results of the Combined Company;

the risk that the Plan of Arrangement may not be completed despite the parties' efforts or that completion may be unduly delayed, even if the requisite approval is obtained from Atlantic Power's shareholders and CPILP's unitholders;

the fact that certain provisions of the Arrangement Agreement, although reciprocal, may have the effect of discouraging alternative acquisition transactions involving CPILP, including: (1) the restrictions on CPILP's ability to solicit proposals for alternative transactions; and (2) the requirement that CPILP pay a termination fee of C$35.0 million to Atlantic Power in certain circumstances following the termination of the Arrangement Agreement;

the increased leverage of the Combined Company which, while believed to be appropriate for a company with the expected earnings profile of the Combined Company, could negatively affect the Combined Company's credit ratings, limit access to credit markets or make such access more expensive and reduce operational and strategic flexibility; and

the other risks described in the sections entitled "Risk Factors" beginning on page 22 and "Cautionary Note Regarding Forward-Looking Statements" beginning on page 30.

The board of directors of the General Partner concluded that the uncertainties, risks and potentially negative factors relevant to the Plan of Arrangement were outweighed by the potential benefits that it expected CPILP and CPILP unitholders would achieve as a result of the Plan of Arrangement.

This discussion of the information and factors considered by the board of directors of the General Partner includes the principal positive and negative factors considered by the board of directors, but is not intended to be exhaustive and may not include all of the factors considered. The board of directors of the General Partner did not quantify or assign any relative or specific weights to the various factors that it considered in

reaching its determination that the Arrangement Agreement and the Arrangement

is in the best interests of CPILP and is fair to the CPILP unitholders . Rather, the board of directors of the General Partner viewed its position and recommendation as being based on the totality of the information presented to it and the factors it considered. In addition, individual members of the board of directors of the General Partner may have given differing weights to different factors. It should be noted that this explanation of the reasoning of the board of directors of the General Partner and certain information presented in this section is forward-looking in nature and, therefore, that information should be read in light of the factors discussed in the section entitled "Cautionary Note Regarding Forward-Looking Statements" in this joint proxy statement, beginning on page 30.

Opinions of CPILP's Financial Advisors

Opinion of CIBC World Markets Inc.

CIBC rendered its opinion to the board of directors of the General Partner that, as of June 19, 2011 and based upon and subject to the assumptions, limitations and qualifications set forth therein, the consideration to be received by holders of CPILP units, pursuant to the Arrangement Agreement was fair from a financial point of view to such holders (other than Capital Power and its affiliates).

The full text of the written opinion of CIBC, dated June 19, 2011, which sets forth assumptions made, procedures followed, matters considered and limitations on the review undertaken in connection with the opinion, is attached as Annex D to this joint proxy statement. CIBC provided its opinion for the information and assistance of the board of directors of CPILP's general partner in connection with its consideration of the Plan of Arrangement and was one of a number of factors taken into consideration by the board of directors of the General Partner in making its unanimous determination that the offer is in the best interests of CPILP and is fair to the unitholders and to recommend that CPILP unitholders vote in favor of the Arrangement. The CIBC opinion does not constitute a recommendation as to how any CPILP unitholder should vote with respect to the Plan of Arrangement or any other matter.

Opinion of Greenhill & Co. Canada Ltd.

The board of directors of the General Partner retained Greenhill to act as a financial advisor to the board of directors of the General Partner in connection with the Plan of Arrangement and to render to the board of directors of the General Partner an opinion as to the fairness to the holders of CPILP units (other than the General Partner, CPI Investments and Atlantic Power) of the purchase price pursuant to the Arrangement Agreement to be paid to such holders. At the meeting of the board of directors of CPILP's general partner on June 19, 2011, Greenhill rendered its opinion to the board of directors of CPILP's general partner to the effect that, as of that date and based upon and subject to various limitations, qualifications and assumptions set forth in its written opinion, the purchase price pursuant to the Arrangement Agreement to be paid to the holders of CPILP units (other than the General Partner, CPI Investments and Atlantic Power), was fair, from a financial point of view, to such holders.

The full text of the written opinion of Greenhill, dated as of June 19, 2011, is attached as Annex E to this joint proxy statement. Greenhill's opinion sets forth, among other things, the assumptions made, procedures followed, matters considered and limitations and qualifications on the scope of the review undertaken by Greenhill in rendering its opinion. CPILP encourages its unitholders to read the opinion carefully and in its entirety. Greenhill's opinion was directed to the board of directors of CPILP's general partner and addresses only the fairness from a financial point of view of the purchase price to the CPILP unitholders (other than the General Partner, CPI Investments and Atlantic Power), as of the date of the opinion. It does not address any other aspects of the Plan of Arrangement and does not constitute a recommendation as to how any holder of CPILP unit should vote on the Arrangement or any matter related thereto.

Interests of CPILP Directors and Officers in the Plan of Arrangement

Certain of the directors and officers of the general partner of CPILP are also officers and/or directors of Capital Power and its affiliates and are not considered to be independent of CPILP within the meaning of applicable Canadian securities laws. Capital Power and its affiliates have interests in the Plan of Arrangement and certain other transactions to be completed in connection with the Plan of Arrangement that are different from, or in addition to, the interests of the other CPILP unitholders. See "Canadian Securities Law Matters" beginning on page 85.

The board of directors of the General Partner was aware of and considered these interests, among other matters, in evaluating the Plan of Arrangement, and in recommending that CPILP unitholders vote in favor of the Arrangement Resolution. The members of the board of directors of the General Partner who are officers and/or directors of Capital Power and its affiliates did not participate in the vote to approve the Arrangement, as a result of the potential conflict of interest presented by their positions with Capital Power and its affiliates.

Certain CPILP Prospective Financial Information

CPILP does not as a matter of course make public long-term forecasts as to future performance or other prospective financial information beyond the current fiscal year, and CPILP is especially wary of making forecasts or projections for extended periods due to the unpredictability of the underlying assumptions and estimates. However, as part of the due diligence review of CPILP in connection with the Plan of Arrangement, CPILP's management prepared and provided to Atlantic Power, as well as to TD Securities, Morgan Stanley, CIBC and Greenhill in connection with their respective evaluation of the fairness of the Arrangement Agreement consideration, non-public, internal financial forecasts regarding CPILP's projected future operations for the 2011 through 2015 fiscal years. CPILP has included below a summary of these forecasts for the purpose of providing unitholders and investors access to certain non-public information that was furnished to third parties and such information may not be appropriate for other purposes. These forecasts were also considered by the CPILP's general partner's board of directors for purposes of evaluating the Plan of Arrangement. The CPILP's general partner's board of directors also considered non-public, financial forecasts prepared by Atlantic Power regarding Atlantic Power's anticipated future operations for the 2011 through 2015 fiscal years for purposes of evaluating Atlantic Power and the Plan of Arrangement. See "The Arrangement Agreement and Plan of Arrangement Certain Atlantic Power Prospective Financial Information" beginning on page 75 for more information about the forecasts prepared by Atlantic Power.

The CPILP internal financial forecasts are not guidance and were not prepared with a view toward public disclosure, nor were they prepared with a view toward compliance with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants for preparation and presentation of financial forecasts, the guidelines established by the Canadian Institute of Chartered Accountants Handbook, rules relating to future oriented financial information under Canadian securities laws or generally accepted accounting principles in the United States or Canada. KPMG has not examined, compiled or performed any procedures with respect to the accompanying prospective financial information and, accordingly, KPMG does not express an opinion or any other form of assurance with respect thereto. The KPMG reports incorporated by reference in this joint proxy statement relate to CPILP's historical financial information. They do not extend to the prospective financial information and should not be read to do so. The summary of these internal financial forecasts included below is not being included to influence your decision whether to vote for the Arrangement and the transactions contemplated in connection with the Arrangement, but because these internal financial forecasts were provided by CPILP to Atlantic Power and TD Securities, Morgan Stanley, CIBC and Greenhill.

The inclusion of a summary of these internal financial forecasts in this joint proxy statement should not be regarded as an indication that any of CPILP, Atlantic Power or their respective affiliates, advisors or representatives considered these internal financial forecasts to be predictive of actual future events, and these internal financial forecasts should not be relied upon as such nor should the information contained in these internal financial forecasts be considered appropriate for purposes of making investments decisions in relation to CPILP units or for any other purposes. None of Atlantic Power, CPILP or their respective affiliates, advisors, officers, directors, partners or representatives can give you any assurance that actual results will not differ materially from these internal financial forecasts, and none of them undertakes any obligation to update or otherwise revise or reconcile these internal financial forecasts to reflect circumstances existing after the date these internal financial forecasts were generated or to reflect the occurrence of future events, even in the event that any or all of the assumptions underlying these forecasts are shown to be in error. Since the forecasts cover multiple years, such information by its nature becomes less meaningful and predictive with each successive year. CPILP does not intend to make publicly available any update or other revision to these internal financial forecasts. None of CPILP or its affiliates, advisors, officers, directors, partners or representatives has made or makes any representation to any shareholder or other person regarding

CPILP's ultimate performance compared to the information contained in these internal financial forecasts or that the forecasted results will be achieved. CPILP has made no representation to Atlantic Power, in the Arrangement Agreement or otherwise, concerning these internal financial forecasts. The below forecasts do not give effect to the Plan of Arrangement. CPILP urges all unitholders to review CPILP's financial statements included in CPILP's Audited Consolidated Financial Statements as at and for the Years Ended December 31, 2010, 2009 and 2008 and Unaudited Condensed Interim Financial Statements as at and for the Six Months Ended June 30, 2011, which are delivered with, and/or incorporated by reference into, this joint proxy statement.

CPILP's internal financial forecasts above reflect numerous judgments, estimates and assumptions with respect to industry performance, general business, economic, regulatory, market and financial conditions and other future events, as well as matters specific to CPILP's business as set out in CPILP's "Forward Looking Statements" contained in CPILP's Management's Discussion and Analysis for the Year Ended December 31, 2010, which is delivered with, and/or incorporated by reference into this joint proxy statement. All of these assumptions and estimates are difficult to predict and many of which are beyond control. CPILP's internal financial forecasts cannot be considered a reliable predictor of future results and should not be relied upon as such. CPILP's internal financial forecasts cover multiple years and such information by its nature becomes less reliable with each successive year.

Accounting Treatment of the Arrangement

Atlantic Power will account for the acquisition using the acquisition method of accounting, as prescribed in Accounting Standards Codification 805, "Business Combinations," under US generally accepted accounting principles.

Court Approval Required for the Plan of Arrangement

Interim Order

On , 2011, the Court of Queen's Bench of Alberta (the "**Court**") granted the Interim Order facilitating the calling of the CPILP special meeting and prescribing the conduct of the CPILP special meeting and other matters. The Interim Order is attached hereto as Annex H to this joint proxy statement.

Final Order

The CBCA provides that an arrangement requires court approval. Subject to the terms of the Arrangement Agreement, and if the Arrangement Resolution is approved by CPILP unitholders at the CPILP special meeting in the manner required by the Interim Order, CPILP and the General Partner, as general partner of CPILP, will make an application to the Court for a final order (the "**Final Order**").

The application for the Final Order approving the Arrangement is scheduled for , 2011 at (Calgary time), at Calgary, Alberta, or as soon thereafter as counsel may be heard in Calgary, Alberta. The notice of application in respect of the Final Order is attached hereto as Annex I. At the hearing, the Court will consider, among other things, the fairness and reasonableness of the terms of the Arrangement, including the fairness of the Arrangement to CPILP unitholders. At the hearing, any CPILP unitholder and any other interested party who wishes to participate or to be represented or to present evidence or argument may do so, subject to filing with the Court and serving upon CPILP and Atlantic Power a notice of intention to appear together with any evidence or materials which such party intends to present to the Court on or before , 2011. **Service of such notice will be effected by service upon the General Partner's legal counsel, Fraser Milner Casgrain LLP, Bankers Court, 15th Floor, 850-2nd Street SW, Calgary, Alberta T2P 0R8, Attention: Brian Foster with a copy to Atlantic Power's legal counsel, Goodmans LLP, 333 Bay Street, Suite 3400, Toronto, Ontario M5H 2S7, Attention: Tom Friedland and Jason Wadden.**

The Court has broad discretion under the CBCA when making orders with respect to the Arrangement and that the Court will consider, among other things, the fairness and reasonableness of the Arrangement, both from a substantive and a procedural point of view. The Court may approve the Arrangement, either as proposed or as amended, in any manner the Court may direct, subject to compliance with such terms and conditions, if any, as the Court thinks fit. Depending upon the nature of any required amendments, CPILP, the General Partner, CPI Investments and Atlantic Power may determine not to proceed with the Arrangement.

If made, the Final Order will constitute the basis for an exemption, under Section 3(a)(10) of the Securities Act, from the registration requirements of the Securities Act with respect to the Plan of Arrangement and the Court will be so advised in advance.

Ongoing Canadian Reporting Obligations

CPILP is a reporting issuer (or the equivalent) in all of the provinces and territories of Canada. CPILP units currently trade on the TSX. After the Plan of Arrangement, Atlantic Power intends to delist the CPILP units from the TSX. The preferred shares of CPI Preferred Equity Ltd. will remain outstanding and listed on the TSX.

Special Transaction Rules

The Ontario and Quebec securities commissions have adopted Multilateral Instrument 61-101 *Protection of Minority Security Holders in Special Transactions* ("**MI 61-101**"), which governs transactions that raise the potential for conflicts of interest, including issuer bids, insider bids, related party transactions and business combinations.

For the reasons set out in the following paragraph, the Plan of Arrangement will constitute a "business combination" under MI 61-101 and the Arrangement Resolution will require "minority approval" in accordance with MI 61-101. The Arrangement Resolution will have to be approved by a simple majority of the votes cast by the CPILP unitholders, excluding those votes required to be excluded pursuant to the minority approval provisions of MI 61-101, being the votes of "interested parties" and their related parties and joint actors, which include CPI Investments and the General Partner. This approval is in addition to the requirement that the Arrangement Resolution must be approved by not less than $66^{2}/_{3}\%$ of the votes cast by the unitholders of CPILP that vote in person or by proxy at the CPILP special meeting.

As part of the Plan of Arrangement, an affiliate of Capital Power will acquire CPILP's Southport and Roxboro facilities in North Carolina. In addition, certain management and operations agreements between Capital Power and its subsidiaries and CPILP and its subsidiaries will be terminated and/or assigned in consideration for the payment by CPILP and its subsidiaries of C$10.0 million. See "Summary of the Arrangement Agreement Summaries of Other Agreements Relating to the Arrangement Management Agreements Termination Agreement and Management Agreement Assignment Agreement" beginning on page 106. Capital Power and its subsidiaries are "related parties" of CPILP within the meaning of MI 61-101 and the sale of the North Carolina facilities and the termination and/or assignment of the management and operations agreements would constitute "connected transactions" (collectively, the "**Connected Transactions**") within the meaning of MI 61-101. Accordingly, the Plan of Arrangement will constitute a "business combination" for CPILP under MI 61-101.

As a result of the foregoing, the votes attaching to CPILP units beneficially owned, or over which control or direction is exercised, by CPI Investments and the General Partner, representing approximately 29.18% of the outstanding CPILP units, will be excluded in determining whether minority approval of the Arrangement Resolution has been obtained.

The Plan of Arrangement is exempt from the formal valuation requirements of MI 61-101 for certain "business combinations" on the basis that at the time the Connected Transactions were agreed to, neither the fair market value of the subject matter of, nor the fair market value of the consideration for, the Connected Transactions, exceeded 25% of CPILP's market capitalization.

The foregoing was reviewed by the independent directors of the General Partner in connection with their review and approval process for the Plan of Arrangement. See "The Arrangement Agreement and Plan of Arrangement CPILP's Reasons for the Plan of Arrangement; Recommendations of the Board of Directors of CPILP's General Partner" beginning on page 77.

To the knowledge of CPILP and Atlantic Power, there have been no prior valuations of CPILP or Atlantic Power, the CPILP units or the Atlantic Power common shares, or the material assets of CPILP or Atlantic Power in the 24 months prior to the date of this joint proxy statement.

Judicial Developments

The Plan of Arrangement will be implemented pursuant to section 192 of the CBCA, which provides that, where it is not practicable for a corporation to effect a fundamental change in the nature of an arrangement under any other provisions of the CBCA, a corporation may apply to a court for an order approving the Plan of Arrangement proposed by such corporation. Pursuant to this section of the

Table of Contents

CBCA, such an application will be made by CPILP and the General Partner for approval of the Plan of Arrangement. See above under the heading " Court Approval Required for the Plan of Arrangement." Although there have been a number of judicial decisions considering this section of the CBCA and applications to various arrangements, there have not been, to the knowledge of CPILP or Atlantic Power, any recent significant decisions which would apply in this instance. **CPILP unitholders should consult their legal advisors with respect to the legal rights available to them in relation to the Plan of Arrangement**.

Restrictions on Sales of Shares (Canada)

The Atlantic Power common shares to be issued in exchange for CPILP units pursuant to the Plan of Arrangement will be issued in reliance upon exemptions from the prospectus requirements of securities legislation in each province and territory of Canada. Subject to customary restrictions applicable to distributions of shares that constitute "control distributions," Atlantic Power common shares issued pursuant to the Plan of Arrangement may be freely resold in each province and territory in Canada, subject to the conditions that: (i) no unusual effort has been made to prepare the market or create a demand for the common shares, (ii) no extraordinary commission or consideration is paid to a person or company in respect of the trade and (iii) if the selling securityholder is an insider or officer of Atlantic Power, the selling securityholder has no reasonable grounds to believe that Atlantic Power is in default of securities legislation.

United States Securities Law Matters

The Atlantic Power common shares to be issued pursuant to the Plan of Arrangement will not be registered under the Securities Act or the securities laws of any state of the United States and will be issued in reliance upon the exemption from registration set forth in Section 3(a)(10) of the Securities Act. Section 3(a)(10) of the Securities Act exempts from registration the distribution of a security that is issued in exchange for outstanding securities where the terms and conditions of such issuance and exchange are approved, after a hearing on the fairness of such terms and conditions at which all persons to whom it is proposed to issue securities in such exchange have the right to appear, by a court or by a governmental authority expressly authorized by law to grant such approval. Accordingly, Atlantic Power expects the Final Order of the Court will, if granted, constitute a basis for the exemption from the registration requirements of the Securities Act with respect to the Atlantic Power common shares issued in connection with the Plan of Arrangement.

The Atlantic Power common shares received by persons who will be an "affiliate" of Atlantic Power after the Plan of Arrangement will be subject to certain restrictions on resale in the U.S. imposed by the Securities Act. As defined in Rule 144 under the Securities Act, an "affiliate" of an issuer is a person that, directly or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with, the issuer and may include certain officers and directors of such issuer as well as principal shareholders of such issuer. Persons who are not affiliates after the Plan of Arrangement may resell the Atlantic Power common shares that they receive in connection with the Plan of Arrangement in the United States without restriction under the Securities Act.

Persons who are affiliates of Atlantic Power after the Plan of Arrangement may not sell their Atlantic Power common shares that they receive in connection with the Plan of Arrangement in the absence of registration under the Securities Act, unless an exemption from registration is available, such as the exemptions contained in Rule 144 or Rule 904 of Regulation S under the Securities Act, as described below.

Affiliates Rule 144. In general, under Rule 144, persons who are affiliates of Atlantic Power after the Plan of Arrangement will be entitled to sell in the United States, during any three-month period, a portion of the Atlantic Power common shares that they receive in connection with the Plan of

Arrangement, provided that the sale meets certain requirements. The number of such securities sold during such period may not exceed the greater of one percent of the then-outstanding securities of such class or, if such securities are listed on a United States securities exchange, the average weekly trading volume of such securities during the four-week period preceding the date of sale. The seller also must have held the Atlantic Power common shares for at least one year. In addition, the sale is subject to specified restrictions on manner of sale, notice requirements, aggregation rules and the availability of current public information about Atlantic Power. Persons who are affiliates of Atlantic Power after the Plan of Arrangement will continue to be subject to the resale restrictions described in this paragraph for so long as they continue to be affiliates of Atlantic Power.

Affiliates Regulation S. In general, under Regulation S, persons who are affiliates of Atlantic Power solely by virtue of their status as an officer or director of Atlantic Power may sell their Atlantic Power common shares outside the United States in an "offshore transaction" (which would include a sale through the TSX, if applicable) if neither the seller nor any person acting on its behalf engages in "directed selling efforts" in the United States. In the case of a sale of Atlantic Power common shares received in connection with the Plan of Arrangement by an officer or director who is an affiliate of Atlantic Power solely by virtue of holding such position, there is also a requirement that no selling commission, fee or other remuneration is paid in connection with such sale other than a usual and customary broker's commission. For purposes of Regulation S, "directed selling efforts" means "any activity undertaken for the purpose of, or that could reasonably be expected to have the effect of, conditioning the market in the United States for any of the securities being offered" in the sale transaction. Certain additional restrictions are applicable to a holder of Atlantic Power common shares received in connection with the Plan of Arrangement, who is an affiliate of Atlantic Power after the Plan of Arrangement other than by virtue of his or her status as an officer or director of Atlantic Power.

This document does not cover any resales of shares of Atlantic Power's common shares received in the Plan of Arrangement by any person who may be deemed an affiliate of Atlantic Power following completion of the Plan of Arrangement.

Stock Exchange Approvals

Atlantic Power common shares currently trade on the TSX and NYSE. Atlantic Power will also apply to list Atlantic Power common shares issuable under the Plan of Arrangement on the NYSE and the TSX, and it is a condition to the completion of the Plan of Arrangement that Atlantic Power shall have obtained approval for these listings.

Regulatory Approvals Required for the Plan of Arrangement and Other Regulatory Matters

Atlantic Power and CPILP have agreed to use their reasonable best efforts to obtain all governmental and regulatory approvals required to complete the transactions contemplated by the Arrangement Agreement.

Investment Canada Act (Canada)

Subject to certain limited exceptions, the direct acquisition of control of a Canadian business by a non-Canadian that exceeds a financial threshold prescribed under Part IV of the *Investment Canada Act* (a "**Reviewable Transaction**") cannot be implemented unless the transaction has been reviewed by the Minister responsible for the *Investment Canada Act* (the "**Minister**") and the Minister is satisfied or is deemed to be satisfied that the transaction is likely to be of net benefit to Canada (the "**net benefit ruling**"). Accordingly, in the case of a Reviewable Transaction, a non-Canadian purchaser must submit an application to the Minister (an "**Application for Review**") seeking approval of the Reviewable Transaction and cannot complete the transaction until it receives a net benefit ruling. The submission

Table of Contents

of the Application for Review triggers an initial review period of up to 45 days. If the Minister has not completed the review by that date, the Minister may unilaterally extend the review period for up to a further 30 days. If necessary, the Minister and the purchaser may agree to further extensions of the review period.

In determining whether to issue a net benefit ruling, the Minister is required to consider, among other things, the Application for Review and any written undertakings offered by the purchaser to Her Majesty in right of Canada. The prescribed factors that the Minister must consider when determining whether to issue a net benefit ruling include, among other things, the effect of the investment on the economic activity in Canada (including the effect on employment, resource processing, utilization of Canadian products and services and exports), the participation by Canadians in the acquired business, the effect of the investment on productivity, industrial, efficiency, technological development, product innovation, product variety and competition in Canada, the compatibility of the investment with national and provincial industrial, economic and cultural policies, and the contribution of the investment to Canada's ability to compete in world markets.

If, following his review during the initial review period or the extension(s) described above, the Minister is not satisfied or deemed to be satisfied that the Reviewable Transaction is likely to be of net benefit to Canada, the Minister is required to send a notice to that effect to the purchaser, advising the purchaser of its right to make further representations and submit (additional) undertakings within 30 days from the date of such notice or any further period that may be agreed to by the purchaser and the Minister.

At any time, and in any event within a reasonable time after the expiry of the last-mentioned period for making representations and submitting undertakings described above, the Minister shall send a notice to the purchaser that either the Minister is satisfied that the investment is likely to be of net benefit to Canada (i.e., a net benefit ruling) or confirmation that the Minister is not satisfied that the investment is likely to be of net benefit to Canada. In the latter case, the Reviewable Transaction may not be implemented.

The Plan of Arrangement is a Reviewable Transaction. An Application for Review under the *Investment Canada Act* was filed by Atlantic Power in due course.

Competition Act (Canada)

Part IX of the *Competition Act* (Canada) (the "**Competition Act**") requires that, subject to certain limited exceptions, the Commissioner of Competition ("**Commissioner**") be notified of certain classes of transactions that exceed the thresholds set out in Sections 109 and 110 of the Competition Act ("**Notifiable Transactions**") by the parties to the transaction.

The parties to a Notifiable Transaction cannot complete the transaction until they have submitted the information prescribed pursuant to subsection 114(1) of the Competition Act to the Commissioner and the applicable waiting period has expired or been terminated or waived by the Commissioner, provided that there is no order in effect prohibiting completion at the relevant time.

Atlantic Power filed with the Commissioner a request for an advance ruling certificate, pursuant to subsection 102(1) of the Competition Act, or in the alternative a no-action letter and a waiver from merger notification on August 12, 2011. On August 26, 2011, the Commissioner issued a "no-action" letter and waiver from merger notification in respect of the Plan of Arrangement, providing that, as at such date, the Commissioner does not intend to challenge the transaction by making an application under Section 92 of the Competition Act. The "no-action" letter acknowledges that the Commissioner reserves the right to challenge the Plan of Arrangement up to one year after it has been substantially completed.

HSR Act

Under the *Hart-Scott-Rodino Antitrust Improvements Act of 1976*, as amended (the "**HSR Act**"), certain transactions may not be completed until each party has filed a Notification and Report Form with the Antitrust Division of the US Department of Justice (the "**DOJ**") and with the US Federal Trade Commission (the "**FTC**") and the HSR Act's waiting period has expired or early termination of the waiting period has been granted. The transactions contemplated by the Plan of Arrangement are subject to the HSR Act.

Atlantic Power and CPILP filed the requisite Notification and Report Forms on August 12, 2011. The waiting period expired on August 26, 2011. The early termination of the waiting period does not bar the FTC or the DOJ from subsequently challenging the Plan of Arrangement.

At any time before or after the Plan of Arrangement is completed, the DOJ, the FTC, or others (including states and private parties) could attempt to take action under the antitrust laws, including seeking to prevent the Plan of Arrangement, to rescind the Plan of Arrangement, or to conditionally approve the completion of the Plan of Arrangement upon the divestiture of assets of Atlantic Power and CPILP. There can be no assurance that a challenge to the transactions contemplated by the Plan of Arrangement on antitrust grounds will not be made or, if a challenge is made, that it would not be successful.

Federal Power Act

Atlantic Power and CPILP each have public utility subsidiaries subject to the jurisdiction of the Federal Energy Regulatory Commission ("**FERC**"), under the *Federal Power Act* ("**FPA**"). Section 203 of the FPA provides that no holding company in a holding company system that includes a transmitting utility or an electric utility may purchase, acquire, merge or consolidate with a transmitting utility, an electric utility company or a holding company in a holding company system that includes a transmitting utility or electric utility company without prior FERC authorization. Further, Section 203 requires prior authorization from the FERC for certain transactions resulting in the direct or indirect change of control over a FERC jurisdictional public utility. Consequently, the FERC's approval of the Plan of Arrangement under Section 203 of the FPA is required.

The FERC must authorize the Plan of Arrangement if it finds that the Plan of Arrangement is consistent with the public interest. The FERC has stated that, in analyzing a merger or transaction under Section 203 of the FPA, it will evaluate the impact of the Plan of Arrangement on:

- competition in electric power markets;
- the applicants' wholesale rates; and
- state and federal regulation of the applicants.

In addition, in accordance with the *Energy Policy Act of 2005*, the FERC also must find that the Plan of Arrangement will not result in the cross-subsidization by utilities of their non-utility affiliates or the improper encumbrance or pledge of utility assets. If such cross-subsidization or encumbrances were to occur as a result of the Plan of Arrangement, the FERC then must find that such cross-subsidization or encumbrances are consistent with the public interest.

The FERC will review these factors to determine whether the Plan of Arrangement is consistent with the public interest. If the FERC finds that a transaction would adversely affect competition in wholesale electric power markets, rates for transmission or the wholesale sale of electric energy, or regulation, or that the transaction would result in cross-subsidies or improper encumbrances that are not consistent with the public interest, it may, pursuant to the FPA, impose upon the proposed transaction remedial conditions intended to mitigate such effects or it may decline to authorize the transaction. The FERC is required to rule on a completed Section 203 application not later than

Table of Contents

180 days from the date on which the completed application is filed. The FERC may, however, for good cause, issue an order extending the time for consideration of the Section 203 application by an additional 180 days. If the FERC does not issue an order within the statutory deadline, then the transaction is deemed to be approved. Atlantic Power and CPILP expect that the FERC will approve the Plan of Arrangement within the initial 180-day review period. However, there is no guarantee that the FERC will not extend the time period for its review or not impose conditions on its approval that are unacceptable to Atlantic Power or CPILP.

Atlantic Power and CPILP and their respective public utility subsidiaries filed their application under Section 203 on July 25, 2011.

General

In connection with obtaining the approval of all necessary governmental authorities to complete the Plan of Arrangement, including but not limited to the governmental authorities specified above, there can be no assurance that:

- governmental authorities will not impose any conditions on the granting of their approval and, if such conditions are imposed, that CPILP or Atlantic Power will be able to satisfy or comply with such conditions;
- compliance or non-compliance will not have adverse consequences on the Combined Company after completion of the Plan of Arrangement; or
- the required regulatory approvals will be obtained within the time frame contemplated by Atlantic Power and CPILP or on terms that will be satisfactory to Atlantic Power and CPILP.

Atlantic Power and CPILP cannot assure you that a regulatory challenge to the Plan of Arrangement will not be made or that, if a challenge is made, it will not prevail.

In the event that a governmental approval imposes conditions on, or requires divestitures relating to, the operations or assets of Atlantic Power or CPILP, each party has agreed that the other party would not be required, or permitted without prior written consent, to take any actions with respect to such conditions or divestitures if such actions would, or would reasonably be expected to, result (after giving effect to any reasonably expected proceeds of any divestiture or sale of assets) in a Material Adverse Effect on the Combined Company. See "Summary of the Arrangement Agreement Conditions Precedent to the Plan of Arrangement" on page 94.

Following the completion of the Plan of Arrangement, Atlantic Power intends to maintain its listings on the NYSE and TSX under the symbols "AT" and "ATP," respectively, and the preferred shares of CPI Preferred Equity Ltd. will remain outstanding and listed on the TSX.

SUMMARY OF THE ARRANGEMENT AGREEMENT

The transaction will be carried out pursuant to the Arrangement Agreement and the Plan of Arrangement. The following is a summary of the principal terms of the Arrangement Agreement and Plan of Arrangement. This summary does not purport to be complete and is qualified in its entirety by reference to the Arrangement Agreement, which is attached as Annex A to this joint proxy statement, and the Plan of Arrangement, which is attached as Schedule A to the Arrangement Agreement. Capitalized terms used in this section and not otherwise defined in this joint proxy statement have the meaning ascribed to them in the Arrangement Agreement.

On June 20, 2011, Atlantic Power, the General Partner, CPI Investments and CPILP entered into the Arrangement Agreement, pursuant to which the parties agreed that, subject to the terms and conditions set forth in the Arrangement Agreement, Atlantic Power will acquire all of the issued and outstanding CPILP units (directly, or indirectly through the acquisition of all of the outstanding shares of CPI Investment). Upon completion of the Plan of Arrangement, for each CPILP unit held, CPILP unitholders will receive at their election either C$19.40 in cash or 1.3 Atlantic Power common shares, subject to proration. The terms of the Arrangement Agreement are the result of arm's length negotiation between the parties and their respective advisors. Effective July 19, 2011, the Arrangement Agreement was amended to account for the entering into of the Tranche B Facility commitment letter, the termination of a commitment regarding certain bridge loans that Atlantic Power had entered into at the time of entering into the Arrangement Agreement and the correction of certain other references.

The Arrangement Agreement contains representations and warranties made by the Partnership Entities (the General Partner and CPILP being referred to herein as the "**Partnership Entities**") to Atlantic Power, by CPI Investments to Atlantic Power and by Atlantic Power to CPILP and CPI Investments Those representations and warranties were made for the purposes of the Arrangement Agreement and are subject to important qualifications and limitations agreed to by the parties in connection with negotiating its terms. Moreover, some of the representations and warranties contained in the Arrangement Agreement are subject to a contractual standard of materiality (including a Material Adverse Effect) that may be different from what might be viewed as material to shareholders of Atlantic Power or unitholders of CPILP, or may have been used for the purpose of allocating risk between parties to an agreement rather than establishing matters of fact. For the foregoing reasons, you should not rely on the representations and warranties contained in the Arrangement Agreement as statements of factual information at the time they were made or otherwise. Information concerning the subject matter of these representations and warranties may have changed since the date of the Arrangement Agreement. Atlantic Power and CPILP will provide additional disclosure in public reports to the extent that they are aware of the existence of any material facts that are required to be disclosed under the applicable securities laws and that might otherwise contradict the terms and information contained in the Arrangement Agreement and will update such disclosure as required by applicable securities laws.

Table of Contents

Atlantic Power Financing

Atlantic Power has represented in the Arrangement Agreement that the Tranche B Facility, when funded in accordance with the TLB Commitment Letter, and the available cash of Atlantic Power will provide Atlantic Power with cash proceeds sufficient to pay the cash consideration payable pursuant to the Plan of Arrangement and the fees and expenses of Atlantic Power.

Atlantic Power has agreed to use commercially reasonable efforts to fulfill and comply with all of its obligations under the TLB Commitment Letter and to satisfy or cause the satisfaction of all of the conditions precedent to the funding of the Tranche B Facility on or before the Effective Date (or such earlier date required by the TLB Commitment Letter).

Non-Solicitation

Pursuant to the Arrangement Agreement, the Partnership Entities shall not, directly or indirectly, through any officer, director, employee, representative, agent, subsidiary or otherwise:

knowingly make, solicit, assist, initiate, encourage or otherwise facilitate any inquiries, proposals or offers regarding any Partnership Acquisition Proposal;

engage in any discussions or negotiations regarding, or provide any information with respect to, or otherwise co-operate in any way with, or assist or participate in, facilitate or knowingly encourage, any effort or attempt by any other person to make or complete any Partnership Acquisition Proposal (provided that, for greater certainty, the Partnership Entities may advise any person making an unsolicited Partnership Acquisition Proposal that such Partnership Acquisition Proposal does not constitute a Superior Proposal when the board of directors of the General Partner has so determined);

withdraw, modify or qualify (or publicly propose to or publicly state that it intends to withdraw, modify or qualify) in any manner adverse to Atlantic Power the approval or recommendation of the board of directors of the General Partner (or any committee thereof) of the Arrangement Agreement or the Plan of Arrangement;

approve, recommend or remain neutral with respect to, or propose publicly to approve, recommend or remain neutral with respect to, any Partnership Acquisition Proposal; or

accept or enter into, or publicly propose to accept or enter into, any letter of intent, agreement in principle, agreement, understanding, arrangement or undertaking related to any Partnership Acquisition Proposal (other than a confidentiality agreement in certain limited circumstances).

The Partnership Entities shall be permitted to engage in discussions or negotiations, provide information and otherwise cooperate with and assist a person making an unsolicited Partnership Acquisition Proposal prior to the CPILP unitholder meeting upon certain conditions, including that the board of directors of the General Partner has determined in good faith, after consultation with its outside legal and financial advisors, that such Partnership Acquisition Proposal constitutes, or would reasonably be expected to lead to, a Superior Proposal and that, based on the advice of outside counsel, the failure to take such action would be inconsistent with its fiduciary duties under applicable laws and the CPILP partnership agreement.

The Partnership Entities are required, as soon as reasonably practicable (and in any event, within 24 hours) to notify Atlantic Power, at first orally and then in writing, of any proposal, inquiry, offer, expression of interest or request relating to or constituting a Partnership Acquisition Proposal, any request for discussions or negotiations, and any request for non-public information relating to the Partnership Entities received by the Partnership Entities' directors, officers, representatives or agents, or any material amendments to the foregoing.

Table of Contents

The Partnership Entities may not accept, approve or enter into any agreement (a "**Proposed Agreement**"), other than a confidentiality and standstill agreement under certain conditions, providing for or to facilitate any Partnership Acquisition Proposal unless:

the CPILP special meeting has not occurred;

the board of directors of the General Partner determines in good faith, after consultation with its outside legal and financial advisors, that such Partnership Acquisition Proposal constitutes a Superior Proposal and that the failure to take such action would be inconsistent with its fiduciary duties under applicable laws and the CPILP partnership agreement;

the Partnership Entities have complied with their non-solicitation restrictions in the Arrangement Agreement;

the Partnership Entities have provided Atlantic Power with a written notice that there is a Superior Proposal together with all documentation related to and detailing the Superior Proposal, including a copy of any Proposed Agreement relating to such Superior Proposal, and a written notice from the board of directors of the General Partner regarding the value in financial terms that the board of directors of the General Partner has in consultation with its financial advisors determined should be ascribed to any non-cash consideration offered under the Superior Proposal, such documents to be so provided to Atlantic Power not less than five Business Days prior to the proposed acceptance, approval, recommendation or execution of the Proposed Agreement by Partnership Entities;

five business days shall have elapsed from the date Atlantic Power received the notice and documentation under the Arrangement Agreement and, if Atlantic Power has proposed to amend the terms of the Plan of Arrangement, the board of directors of the General Partner shall have determined, in good faith, after consultation with its financial advisors and outside legal counsel, that the Partnership Acquisition Proposal continues to be a Superior Proposal compared to the proposed amendment to the terms of the Plan of Arrangement by Atlantic Power;

the Partnership Entities concurrently terminate the Arrangement Agreement; and

CPILP has previously, or concurrently will have, paid to Atlantic Power the Atlantic Power Termination Fee (defined below).

During the five business day period described above or such longer period as the Partnership Entities may approve, Atlantic Power shall have the opportunity, but not the obligation, to propose to amend the terms of the Arrangement Agreement and the Plan of Arrangement and the Partnership Entities shall co-operate with Atlantic Power with respect thereto, including negotiating in good faith with Atlantic Power to enable Atlantic Power to make such adjustments to the terms and conditions of the Arrangement Agreement and the Plan of Arrangement as Atlantic Power deems appropriate and as would enable Atlantic Power to proceed with the Plan of Arrangement and any related transactions on such adjusted terms. The board of directors of the General Partner will review any written definitive proposal made by Atlantic Power in good faith to amend the terms of the Plan of Arrangement in order to determine, in good faith in the exercise of its fiduciary duties, whether Atlantic Power's proposal to amend the Plan of Arrangement would result in the Partnership Acquisition Proposal not being a Superior Proposal compared to the proposed amendment to the terms of the Plan of Arrangement. If the board of directors of the General Partner determines that a Partnership Acquisition Proposal is not a Superior Proposal as compared to the proposed amendment to the terms of the Plan of Arrangement, it will promptly enter into the proposed amendment to the Plan of Arrangement.

The Arrangement Agreement also includes non-solicitation covenants of CPI Investments and Atlantic Power.

Summaries of Other Agreements Relating to the Arrangement

Support Agreements

As part of the Plan of Arrangement, Atlantic Power will acquire all of the outstanding shares of CPI Investments (an entity indirectly owned by Capital Power and EPCOR), the direct and indirect holder of 16,513,504 CPILP units, on effectively the same basis as the acquisition of CPILP units under the Plan of Arrangement. Accordingly, Atlantic Power's willingness to enter into the Arrangement Agreement was subject to, among other things, each of EPCOR, Capital Power and Capital Power LP, the entity through which Capital Power holds its shares of CPI Investments, entering into a support agreement, pursuant to which each shareholder of CPI Investments confirmed its commitment to support the Plan of Arrangement. Contemporaneously with the entering into of the Arrangement Agreement on June 20, 2011, Atlantic Power entered into two support agreements, one with EPCOR and the other with Capital Power LP and Capital Power.

Among other things, each of Capital Power LP and EPCOR agreed in its respective support agreement to:

vote or cause to be voted all of its CPI Investments shares in favor of any resolution, vote, consent or other approval (including by written resolution) by shareholders of CPI Investments of the Plan of Arrangement and any ancillary matters to give legal effect thereto;

vote or cause to be voted all voting rights attached to its CPI Investments shares against (i) certain acquisition proposals regarding CPI Investments; and (ii) any proposal, transaction or other proposed action that might reasonably be expected to impede, frustrate, delay or prevent the Plan of Arrangement or transactions contemplated by any transaction resolutions and/or reduce the likelihood of the Plan of Arrangement being approved under CPI Investments transaction approvals;

exchange its CPI Investments shares for the consideration available to it under the Plan of Arrangement;

not sell, transfer, pledge or assign any of its subject securities or enter into any voting arrangement in relation to such securities;

not exercise any securityholder rights or remedies available to it to impede, frustrate, delay or prevent the Plan of Arrangement or transactions contemplated by the transaction resolutions; and

certain non-solicitation covenants in respect of CPILP and CPI Investments.

Table of Contents

Given the more active role of Capital Power in the business of Capital Power LP and CPI Investments, the material terms of the support agreement among Atlantic Power, Capital Power LP and Capital Power also include the following:

Capital Power agrees, among other things, to cause Capital Power LP to fulfill its obligations under the support agreement and not to make certain acquisition proposals in respect of CPILP or CPI Investments.

Atlantic agrees that, within the later of 30 days following the termination of the transitional services agreement or 180 days following the Effective Date, it will use commercially reasonable efforts to cause each of CPILP, its general partner and subsidiaries to change its name to a name that does not include "Capital Power," "CPI" or "CP" and certain other actions related to the change of name.

In addition to customary representations and warranties from Capital Power LP, the support agreement includes certain additional representations specific to the Plan of Arrangement, including with respect to the representations and warranties made by CPI Investments in the Arrangement Agreement and equipment and personal property owned by Capital Power LP and/or Capital Power and used in the operations of the CPILP or any of the CPILP's facilities.

For a period of 90 days commencing on the Effective Date, Capital Power LP will not, without the prior consent of Atlantic, offer, sell, pledge, grant any option to purchase, hedge, transfer, assign, make any short sale or otherwise dispose of any Atlantic shares received pursuant to the Plan of Arrangement (or agree to, or announce, any intention to do so) with certain limited customary exceptions.

Upon and after the effective time for the Plan of Arrangement, Capital Power LP will indemnify Atlantic and CPI Investments and their respective, shareholders, officers, directors, employees, agents, successors and assigns against any claims in respect of:

- any failure of any representations, warranties or covenants by Capital Power LP or Capital Power;
- any liabilities, debts or obligations of CPI Investments arising prior to the effective time of the Plan of Arrangement; and
- any taxes payable by CPI Investments in respect of any taxation year or period ending on or before the Effective Date or the portion of any taxes payable by CPI Investments, as the case may be, for any taxation year or period ending after the Effective Date that is attributable to the portion of such year or period ending on the Effective Date.

The survival period for claims in respect of certain provisions under the support agreement is as follows:

- for claims with respect to certain more fundamental representations and warranties, the maximum period of time permitted by law;
- for claims with respect to representations and warranties relating to tax matters, within 90 days after the expiration of all periods allowed for objecting and appealing the determination of any proceedings relating to any assessment or reassessment of taxes by any governmental authority in respect of any taxation period ending on or prior to the effective time for the Plan of Arrangement or in which the effective time occurs;

for claims with respect to any other representation and warranties, within a period of 18 months following the effective time for the Plan of Arrangement; and

Table of Contents

for claims with respect to covenants of Capital Power LP and Capital Power, the completion of the Plan of Arrangement, the effective time and the date of any expiration or termination of each of the support agreement and the Arrangement Agreement, subject only to applicable limitation periods imposed by applicable law.

Each support agreement terminates on the earlier of (i) the effective time for the Plan of Arrangement and (ii) the termination of the Arrangement Agreement.

Management Agreements Termination Agreement and Management Agreement Assignment Agreement

On June 20, 2011, certain subsidiaries of Capital Power entered into an agreement (the "**Management Agreements Termination Agreement**") with CPILP and certain of its subsidiaries pursuant to which the parties agreed to terminate each of the management and operations agreements between them, other than the Frederickson Agreement (as defined below), effective immediately upon completion of the Plan of Arrangement. In consideration for the termination of the management and operations agreements, CPILP and its subsidiaries agreed to pay to the subsidiaries of Capital Power an aggregate of C$8.5 million.

On June 20, 2011, a subsidiary of Capital Power entered into an agreement with Atlantic Power and Frederickson Power L.P., a subsidiary of CPILP, pursuant to which the subsidiary of Capital Power agreed to assign its right, benefit, interest and obligation in, to and under the operations and maintenance agreement in respect of CPILP's Frederickson facility (the "**Frederickson Agreement**") to Atlantic Power. The assignment will be effective immediately upon completion of the Plan of Arrangement. In consideration for the assignment, Atlantic Power has agreed to pay to the subsidiary of Capital Power an aggregate of C$1.5 million. The assignment is conditional on, among other things, receipt of the consent of Puget Sound Energy, Inc. to the assignment.

North Carolina Purchase and Sale Agreement

On June 20, 2011, a subsidiary of Capital Power entered into a purchase and sale agreement with certain subsidiaries of CPILP, pursuant to which the subsidiary of Capital Power agreed to purchase and the subsidiaries of CPILP agreed to sell all of the membership interests in the limited liability company that owns CPILP's Roxboro and Southport power plants in North Carolina. The purchase price for the membership interests is C$121,405,211. Closing of the purchase and sale will take place on the Effective Date. Closing of the purchase and sale will be conditional on, among other things, receipt of all necessary regulatory approvals and consents, including, without limitation, expiration or early termination of the applicable waiting periods under the *Hart-Scott Rodino Antitrust Improvements Act of 1976* and prior authorization from FERC under Section 203 of the *United States Federal Power Act*.

Employee Hiring and Lease Assignment Agreement

On June 20, 2011, Atlantic Power, Capital Power and CPO USA entered into an employee hiring and lease assignment agreement pursuant to which Atlantic Power agreed to assume the employment of certain designated employees who perform functions related to CPILP's business. This agreement was necessitated by the fact that neither CPILP nor the General Partner has any employees. Persons performing the functions of employees of CPILP are currently employed by Capital Power and CPO USA rather than directly by CPILP. For further details regarding CPILP employees, see "Business of the Partnership Employees of the Partnership" included in CPILP's Annual Information Form dated March 11, 2011, which is delivered with, and/or incorporated by reference into, this joint proxy statement.

Pursuant to the agreement, Atlantic Power will (i) be bound by the collective agreements currently in place for Capital Power's unionized employees and, (ii) for certain individuals whose employment is not governed by the collective agreements, Atlantic Power will make offers of employment on

Table of Contents

substantially the same (or better) terms and conditions of employment, in the aggregate, as are in effect on the date of the offer. Existing employee benefits provided by Capital Power will vest on closing of the Plan of Arrangement and be paid out by Capital Power. The agreement also contemplates the negotiation of the assignment of office leases for Capital Power's offices located in the cities of Richmond, B.C., Toronto, Ontario and Chicago, Illinois.

Canadian Pension Transfer Agreement

On June 20, 2011, Atlantic Power and Capital Power entered into a Canadian pension transfer agreement, pursuant to which Atlantic Power agreed to assume the pension plan assets and obligations from Capital Power related to the employees that it assumes pursuant to the employee hiring and lease assignment agreement described above.

The agreement primarily relates to the Capital Power Pension Plan (which is a Canadian registered pension plan with both a defined benefit and defined contribution component). For further details regarding Capital Power's pension plan assets and obligations, see "Compensation Discussion and Analysis Pension Programs" included in CPILP's Annual Information Form dated March 11, 2011, which is delivered with, and/or incorporated by reference into, this joint proxy statement. The agreement provides that the assets associated with the pension plan obligations of the employees being transferred to Atlantic Power will be carved out of the Capital Power Pension Plan and transferred to a new plan to be established by Atlantic Power. The new pension plan for Atlantic Power will have equivalent terms to the Capital Power Pension Plan.

If there is a deficiency in the Capital Power Pension Plan on a going concern basis at the time of closing of the Plan of Arrangement, Capital Power is required to pay Atlantic Power the amount of the deficiency related to the assumed employees (and if there is a surplus, Atlantic Power is required to make a payment to Capital Power). Currently, it is estimated that there is a deficiency of approximately C$2.0 million. Atlantic Power is required to establish savings plans that are substantially the same as certain group RRSPs provided by Capital Power. Capital Power and Atlantic Power will take all commercially reasonable steps to permit transferring employees with balances in Capital Power's Group RRSPs to transfer their assets to Atlantic Power's Group RRSPs.

MATERIAL CANADIAN FEDERAL INCOME TAX CONSIDERATIONS

In the opinion of Fraser Milner Casgrain LLP, Canadian counsel to the General Partner, the following is a general summary of the principal Canadian federal income tax considerations generally applicable to a CPILP unitholder that disposes of CPILP units pursuant to the Plan of Arrangement and that, for purposes of the application of the Tax Act and at all relevant times (i) holds CPILP units and will hold any Atlantic Power common shares received pursuant to the Plan of Arrangement as capital property, (ii) deals at arm's length with and is not affiliated with CPILP or Atlantic Power, and (iii) is or is deemed to be resident in Canada (a "**Holder**" or "**Holders**"). CPILP units and Atlantic Power common shares will generally constitute capital property to a Holder provided the Holder does not hold such shares in the course of carrying on a business or as part of an adventure in the nature of trade.

This summary is based on the current provisions of the Tax Act and the regulations thereunder (the "**Regulations**"), and counsel's understanding of the current administrative policies and assessing practices of the Canada Revenue Agency ("**CRA**") published in writing prior to the date hereof. This summary takes into account all specific proposals to amend the Tax Act and the Regulations publicly announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof (the "**Proposed Amendments**"), and assumes that all Proposed Amendments will be enacted in the form proposed. However, no assurances can be given that the Proposed Amendments will be enacted as proposed, or at all. This summary does not otherwise take into account or anticipate any changes in law or administrative policy or assessing practice whether by legislative, administrative or judicial action nor does it take into account tax legislation or considerations of any province, territory or foreign jurisdiction (unless specifically provided for herein), which may differ from those discussed herein.

This summary is not applicable to a Holder: (i) that is a "specified financial institution," (ii) an interest in which is a "tax shelter investment," (iii) that is a "financial institution" for purposes of certain rules referred to as the mark-to-market rules, (iv) that is exempt from tax under Part I of the Tax Act, or (v) to which the "functional currency" reporting rules apply, each as defined in the Tax Act. Such Holders should consult their own tax advisors with respect to their own particular circumstances.

This summary is of a general nature only and is not, and is not intended to be, legal or tax advice to any particular Holder. This summary is not exhaustive of all Canadian federal income tax considerations. Accordingly, Holders should consult their own tax advisors having regard to their own particular circumstances.

Where a Holder jointly makes an election with Atlantic Power under section 85 of the Tax Act (a "**Section 85 Election**") in respect of its CPILP units as described below, the Atlantic Power common shares received in exchange for such CPILP units will not be "Canadian securities," as defined under subsection 39(6) of the Tax Act, to such Holder and therefore cannot be deemed to be capital property by making an election under subsection 39(4) of the Tax Act. Holders whose CPILP units might not otherwise be considered to be capital property or whose Atlantic Power common shares may not be considered to be capital property should consult their own tax advisors concerning this election.

Disposition of CPILP Units Pursuant to the Plan of Arrangement

Tax-Deferred Rollover Under the Tax Act

A Holder that exchanges CPILP units for Atlantic Power common shares or a combination of cash and Atlantic Power common shares and is either (i) a resident of Canada for purposes of the Tax Act (other than a person that is exempt from tax under Part I of the Tax Act or that holds its CPILP units in an Exempt Plan, defined below), or (ii) a partnership any member of which is a resident of Canada for purposes of the Tax Act and is not exempt from tax under Part I of the Tax Act (collectively referred to herein as an "**Eligible Unitholder**"), may make a Section 85 Election with Atlantic Power under subsection 85(1) of the Tax Act, or where the Eligible Unitholder is a partnership, subsection 85(2) of the Tax Act, (and in each case, the corresponding provisions of any applicable

Table of Contents

provincial or territorial tax legislation), and may thereby obtain a full or partial tax-deferred "rollover" for Canadian income tax purposes in respect of its disposition of its CPILP units, depending on the Elected Amount (as defined below) and the adjusted cost base to the Eligible Unitholder of its CPILP units at the time of the exchange, provided the Eligible Unitholder has properly completed and delivered to Atlantic Power the required election forms in the manner and within the time set out below and has properly and timely filed such election forms.

So long as the adjusted cost base to an Eligible Unitholder of the Eligible Unitholder's CPILP units at the time of the exchange, together with any reasonable costs of disposition, is not less than the Elected Amount, the Eligible Unitholder will not realize a capital gain for purposes of the Tax Act as a result of the exchange. The "Elected Amount" means the amount selected by an Eligible Unitholder in a Section 85 Election to be treated as the proceeds of disposition of its CPILP units, subject to the limitations described below.

Atlantic Power has agreed to make the Section 85 Election pursuant to subsection 85(1) or 85(2) of the Tax Act (and any similar provision of any provincial legislation) with an Eligible Unitholder at the Elected Amount determined by such Eligible Unitholder, subject to the limitations set out in subsection 85(1) or 85(2) of the Tax Act (or any applicable provincial legislation).

In general, the Elected Amount may not be:

- less than the amount of cash received by the Eligible Unitholder on the exchange,
- less than the lesser of (i) the Eligible Unitholder's adjusted cost base of the CPILP units and (ii) the fair market value of the CPILP units, in each case determined at the time of the exchange, or
- greater than the fair market value of the CPILP units at the time of the exchange.

The tax treatment to an Eligible Unitholder that makes a valid Section 85 Election jointly with Atlantic Power generally will be as follows:

- the Eligible Unitholder will be deemed to have disposed of the CPILP units held by such Eligible Unitholder for proceeds of disposition equal to the Elected Amount;
- the Eligible Unitholder will not realize any capital gain or capital loss if the Elected Amount equals the aggregate of the Eligible Unitholder's adjusted cost base of the CPILP units determined immediately before the exchange and any reasonable costs of disposition;
- the Eligible Unitholder will realize a capital gain (or a capital loss) to the extent that the Elected Amount exceeds (or is less than) the aggregate of the Eligible Unitholder's adjusted cost base of the CPILP units and any reasonable costs of disposition; and
- the aggregate cost to the Eligible Unitholder of the Atlantic Power common shares acquired on the exchange will equal the Elected Amount and for the purpose of determining the Eligible Unitholder's adjusted cost base of those shares, such cost will be averaged with the Eligible Unitholder's adjusted cost base of any other Atlantic Power common shares held by the Eligible Unitholder as capital property at that time.

The income tax consequences described below under "Material Canadian Federal Income Tax Considerations Taxation of Capital Gains and Capital Losses" will generally apply to a Holder that realizes a capital gain or capital loss from the disposition of CPILP units.

A tax instruction letter providing certain instructions on how to complete the Section 85 Election may be obtained from the Depositary by checking the appropriate box on the Letter of Transmittal and Election Form and by submitting the Letter of Transmittal to the Depositary on or before the Election Deadline, complying with the procedures set out in section 2.5 of the Plan of Arrangement.

Eligible Holders that wish to make a Section 85 Election must check the appropriate box on their duly completed and submitted Letter of Transmittal and Election Form. Eligible Holders should note

Table of Contents

that, because of the potential proration of cash and share consideration described above under the heading "The Arrangement Agreement and Plan of Arrangement Effects of the Plan of Arrangement", they may receive a combination of cash and Atlantic Power common shares in exchange for their CPILP units even if they elect to receive only cash consideration. Eligible Holders that would wish to make a Section 85 Election in such circumstances should check the appropriate box on the duly completed and submitted Letter of Transmittal and Election Form even if they elect to receive cash consideration.

The signed and properly completed Section 85 Election form of an Eligible Unitholder must be received by Atlantic Power no later than 90 days after the Effective Date. Any Eligible Unitholder that does not ensure that Atlantic Power has received the relevant election form(s) by such date may not be able to benefit from a Section 85 Election. Accordingly, all Eligible Unitholders that wish to make a Section 85 Election with Atlantic Power should give their immediate attention to this matter. With the exception of execution of a Section 85 Election form by Atlantic Power, compliance with the requirements for a valid election will be the sole responsibility of the Eligible Unitholder making the election. Accordingly, none of Atlantic Power, CPILP nor the Depositary will be responsible or liable for taxes, interest, penalties, damages or expenses resulting from the failure by anyone to deliver any election in accordance with the procedures set out in the tax instruction letter, to properly complete any Section 85 Election form(s) or to properly file such forms within the time prescribed and in the form prescribed under the Tax Act (or the corresponding provisions of any applicable provincial or territorial tax legislation).

An Eligible Unitholder that does not make a valid Section 85 Election (or the corresponding election under any applicable provincial or territorial tax legislation) may realize a taxable capital gain. The comments herein with respect to such elections are provided for general assistance only. Eligible Unitholders wishing to make the Section 85 Election should consult their own tax advisors.

Exchange of CPILP Units Without a Tax-Deferred Rollover

A Holder that exchanges its CPILP units and that does not make a valid Section 85 Election jointly with Atlantic Power with respect to the exchange will be considered to have disposed of such CPILP units for proceeds of disposition equal to the aggregate of the cash (if any) received on the exchange and the fair market value, at the time of the exchange, of the Atlantic Power common shares (if any) received on the exchange. As a result, the Holder will generally realize a capital gain (or capital loss) to the extent that such proceeds of disposition, net of any reasonable costs of disposition, exceed (or are less than) the adjusted cost base of the Holder's CPILP units immediately before the exchange. Holders will be entitled to increase the adjusted cost base of their CPILP units by the amount of CPILP income allocated by CPILP to such Holders for the 2011 taxation year.

Holding and Disposing of Atlantic Power common shares

Dividends on Atlantic Power common shares

In the case of a Holder that is an individual, including certain trusts, dividends received or deemed to be received on Atlantic Power common shares will be included in computing the Holder's income and, subject to certain exceptions that apply to trusts, will be subject to the gross-up and dividend tax credit rules applicable to dividends paid by taxable Canadian corporations under the Tax Act, including the enhanced gross-up and dividend tax credit applicable to any dividend designated as an "eligible dividend" in accordance with the provisions of the Tax Act.

A Holder that is a corporation will be required to include in its income any dividend received or deemed to be received on Atlantic Power common shares, and generally will be entitled to deduct an equivalent amount in computing its taxable income. A Holder that is a "private corporation" (as defined in the Tax Act) or any other corporation controlled, whether because of a beneficial interest in one or more trusts or otherwise, by or for the benefit of an individual (other than a trust) or a related

Table of Contents

group of individuals (other than trusts), will generally be liable to pay a refundable tax of 33$^{1}/_{3}$% under Part IV of the Tax Act on dividends received (or deemed to be received) on the Atlantic Power common shares to the extent such dividends are deductible in computing taxable income for the year.

Disposition of Atlantic Power common shares

Generally, a Holder that disposes of or is deemed to dispose of an Atlantic Power common share in a taxation year will be subject to the rules described below under "Material Canadian Federal Income Tax Considerations Taxation of Capital Gains and Capital Losses".

Taxation of Capital Gains and Capital Losses

Generally, a Holder is required to include in computing its income for a taxation year the amount of any taxable capital gain, which is one-half of the amount of any capital gain realized in the year. Subject to and in accordance with the provisions of the Tax Act, a Holder is permitted to deduct the allowable capital loss, which is one-half of the amount of any capital loss realized in a taxation year, from taxable capital gains realized in the year by such Holder. Allowable capital losses in excess of taxable capital gains may be carried back and deducted in any of the three preceding years or carried forward and deducted in any following year against net taxable capital gains realized in such year to the extent and under the circumstances described in the Tax Act.

A Holder that is throughout the year a "Canadian controlled private corporation" (as defined in the Tax Act) may be liable to pay, in addition to tax otherwise payable under the Tax Act, a refundable tax on certain investment income including taxable capital gains.

Alternative Minimum Tax

Taxable capital gains realized and dividends received by a Holder that is an individual or a trust, other than certain specified trusts, may give rise to alternative minimum tax under the Tax Act and such Holders should contact their own tax advisors in this regard.

Eligibility for Investment

In the opinion of Fraser Milner Casgrain LLP, the Atlantic Power common shares, if issued on the date of this joint proxy statement, would be qualified investments under the Tax Act and the Regulations for a trust governed by a registered retirement savings plan (an "**RRSP**"), a registered retirement income funds (an "**RRIF**"), a deferred profit sharing plan, a registered education savings plan, a registered disability savings plan or a tax-free savings account (a "**TFSA**"), each as defined in the Tax Act ("**Exempt Plans**").

Notwithstanding that the Atlantic Power common shares may, at a particular time, be qualified investments for a trust governed by a TFSA, the holder of a TFSA will be subject to a penalty tax with respect to the Atlantic Power common shares held in a TFSA if such shares are "prohibited investments" for the TFSA for the purposes of the Tax Act. Provided that the holder of a TFSA deals at arm's length with Atlantic Power and does not hold a "significant interest" (as defined in the Tax Act) in Atlantic Power or in a corporation, partnership or trust with which Atlantic Power does not deal at arm's length for the purposes of the Tax Act, the Atlantic Power common shares will not be "prohibited investments" for a trust governed by a TFSA.

On June 6, 2011, the Minister of Finance (Canada) reintroduced certain proposed amendments to the Tax Act that were originally tabled on March 22, 2011 which would extend the application of the rules governing "prohibited investments" and the penalty tax for holding "prohibited investments" to the annuitant of an RRSP or RRIF. No assurance can be given that these proposed amendments to the Tax Act will be enacted as proposed. **Holders that intend to hold the Atlantic Power common shares in their TFSA, RRSP or RRIF should consult with their own tax advisors regarding the application of the foregoing prohibited investment rules in their particular circumstances.**

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

CPILP does not permit non-residents of Canada (as determined for purposes of the Income Tax Act) to hold CPILP units. Accordingly, the following summary does not address the U.S. federal income tax consequences to CPILP unitholders that are U.S. residents or who are otherwise subject to US tax on their worldwide income as a result of their personal circumstances (each, a "**US Holder**"). Persons who are not US Holders will not be subject to U.S. federal income tax with respect to their CPILP units or Atlantic Power common shares received in exchange therefor unless (1) their income with respect thereto is effectively connected with the conduct of a trade or business in the United States, or (2) such person is an individual who is present in the United States for 183 days or more during the taxable year and has a "tax home" in the United States. Even if a non-US Holder is subject to US federal income tax under either test in the preceding sentence, such person may be eligible for relief from (or reduction to) any US income tax under a tax treaty.

Persons who may be subject to U.S. federal income tax, including US Holders, should consult their own tax advisors regarding the consequences of the disposition of their CPILP units and the ownership and disposition of Atlantic Power common shares.

ATLANTIC POWER FINANCING

Atlantic Power intends to finance the cash portion of the purchase price to complete the Plan of Arrangement by issuing up to approximately C$200.0 million of equity and up to approximately C$425.0 million of debt through public and private offerings. However, in the event that such financing is not available on terms satisfactory to Atlantic Power, Atlantic Power has also delivered to CPILP a copy of an executed letter evidencing the commitment of a Canadian chartered bank and another financial institution to structure, arrange, underwrite and syndicate a senior secured term loan facility in the amount of $625 million (the "**Tranche B Facility**") subject to the terms and conditions set forth therein. Advances under the Tranche B Facility may be made by way of Base Rate-based loans and LIBOR-based loans. Conditions precedent to funding under the Tranche B Facility include, without limitation, that there shall not have occurred a Material Adverse Effect (as defined in the Arrangement Agreement) in respect of Atlantic Power, CPILP, the General Partner and CPI Investments Inc. taken as a whole.

Interest for any Base Rate-based loans will be charged at the Base Rate plus a spread and for any LIBOR-based loans, interest will be charged at a rate equal to LIBOR for the corresponding deposits of U.S. dollars plus a spread. The Tranche B Facility will mature on the seventh anniversary following the closing date of the Tranche B Facility. The lenders will be provided with certain collateral, including a first priority security interest in respect of 100% of the units of CPILP and 100% of the shares of the General Partner and any intercompany indebtedness owing by CPILP to Atlantic Power or the General Partner.

INFORMATION REGARDING ATLANTIC POWER

General

Atlantic Power is an independent power producer, with power projects located in major markets in the United States. Its current portfolio consists of interests in 12 operational power generation projects across eight states, one wind project under construction in Idaho, a 500 kilovolt 84-mile electric transmission line located in California, and six development projects in five states. Atlantic Power's power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,948 megawatts (or "**MW**") in which our ownership interest is approximately 871 MW. Atlantic Power's corporate strategy is to generate stable cash flows from Atlantic Power's existing assets and to make accretive acquisitions to sustain Atlantic Power's dividend payout to shareholders, which is currently paid monthly at an annual rate of C$1.094 per share. Atlantic Power's current portfolio consists of interests in 12 operational power generation projects across nine states, one 53 MW biomass project under construction in Georgia, and an 84-mile, 500 kilovolt electric transmission line located in California. Atlantic Power also owns a majority interest in Rollcast Energy, a biomass power plant developer with several projects under development.

Atlantic Power sells the capacity and power from its projects under PPAs with a variety of utilities and other parties. Under the PPAs, which have expiration dates ranging from 2012 to 2037, Atlantic Power receives payments for electric energy sold to its customers (known as energy payments), in addition to payments for electric generation capacity (known as capacity payments). Atlantic Power also sells steam from a number of its projects under steam sales agreements to industrial purchasers. The transmission system rights owned by Atlantic Power in its power transmission project entitle it to payments indirectly from the utilities that make use of the transmission line.

Atlantic Power's projects generally operate pursuant to long-term supply agreements, typically accompanied by fuel transportation arrangements. In most cases, the fuel supply and transportation arrangements correspond to the term of the relevant PPAs and most of the PPAs and steam sales agreements provide for the pass-through or indexing of fuel costs to Atlantic Power's customers.

Atlantic Power partners with recognized leaders in the independent power business to operate and maintain its projects, including Caithness Energy LLC, Power Plant Management Services and the Western Area Power Administration. Under these operation, maintenance and management agreements, the operator is typically responsible for operations, maintenance and repair services.

Atlantic Power completed its initial public offering on the TSX in November 2004. At the time of Atlantic Power's initial public offering, its publicly traded security was an income participating security, or an "IPS", each of which was comprised of one common share and C$5.767 principal amount of 11% subordinated notes due 2016. On November 27, 2009, Atlantic Power converted from the IPS structure to a traditional common share structure. In connection with the conversion, each IPS was exchanged for one new common share. Atlantic Power's common shares trade on the TSX under the symbol "ATP" and began trading on the NYSE under the symbol "AT" on July 23, 2010.

The Unaudited Pro Forma Condensed Combined Consolidated Balance Sheet (which we refer to as the pro forma balance sheet) as of June 30, 2011, gives effect to the Plan of Arrangement as if it occurred on June 30, 2011.

As described in the accompanying notes, the pro forma financial statements have been prepared using the acquisition method of accounting under existing United States generally accepted accounting principles, or GAAP, and the regulations of the SEC. Atlantic Power has been treated as the acquirer in the transaction for accounting purposes. The acquisition accounting is dependent upon certain valuations and other studies that have yet to commence or progress to a stage where there is sufficient information for a definitive measurement. Accordingly, the pro forma financial statements are preliminary and have been made solely for the purpose of providing unaudited pro forma condensed combined consolidated financial information. Differences between these preliminary estimates and the final acquisition accounting will occur and these differences could have a material impact on the accompanying pro forma financial statements and the combined company's future results of operations and financial position.

The pro forma financial statements have been presented for informational purposes only and are not necessarily indicative of what the combined company's results of operations and financial position would have been had the transaction been completed on the dates indicated. In addition, the pro forma financial statements do not purport to project the future results of operations or financial position of the combined company.

NOTES TO THE UNAUDITED PRO FORMA CONDENSED

COMBINED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Description of the Transaction

On June 20, 2011, Atlantic Power, CPILP, the General Partner and CPI Investments entered into the Arrangement Agreement, which provides that Atlantic Power will acquire, directly or indirectly, all of the issued and outstanding CPILP units pursuant to a court-approved statutory Plan of Arrangement under the *CBCA*. Under the terms of the Plan of Arrangement, CPILP unitholders will be permitted to exchange each of their CPILP units for, at their election, C$19.40 in cash or 1.3 Atlantic Power common shares. All cash elections will be subject to proration if total cash elections exceed approximately C$506.5 million and all share elections will be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares.

Pursuant to the Plan of Arrangement, CPILP will sell its Roxboro and Southport facilities located in North Carolina to an affiliate of Capital Power, for approximately C$121.0 million. Additionally, in connection with the Plan of Arrangement, the management agreements between certain subsidiaries of Capital Power and CPILP and certain subsidiaries of CPILP will be terminated (or assigned to Atlantic Power) in consideration of a payment of C$10 million. Atlantic Power will assume the management of CPILP and enter into a transitional services agreement with Capital Power for a term of up to 12 months following closing, which will facilitate the integration of CPILP into Atlantic Power.

Note 2. Basis of Pro Forma Presentation

The pro forma financial statements were derived from historical consolidated financial statements of Atlantic Power and CPILP. Certain reclassifications have been made to the historical financial statements of CPILP to conform with Atlantic Power's presentation. This resulted in income statement adjustments to operating revenues, operating expenses, other income and deductions and balance sheet adjustments to current assets, long term assets, current liabilities and other long term liabilities.

The historical consolidated financial statements have been adjusted in the pro forma financial statements to give effect to pro forma events that are (1) directly attributable to the transaction, (2) factually supportable, and (3) with respect to the pro forma statement of operations, expected to have a continuing impact on the combined results. The following matters have not been reflected in the pro forma financial statements as they do not meet the aforementioned criteria.

Cost savings (or associated costs to achieve such savings) from operating efficiencies, synergies or other restructuring that could result from the transaction with CPILP. The timing and effect of actions associated with integration are currently uncertain.

A fair value adjustment for CPILP's pension and other postretirement benefit obligations. Atlantic Power management believes the actuarial assumptions and methods used to measure CPILP's obligations and costs for financial accounting purposes for 2010 and 2011 are appropriate in the circumstances. The final fair value determination of the pension and postretirement benefit obligations may differ materially, largely due to potential changes in discount rates, return on plan assets up to the date of completion of the transaction and the conforming of certain Atlantic Power and CPILP assumptions surrounding the determination of these obligations.

The pro forma financial statements were prepared using the acquisition method of accounting under GAAP and the regulations of the SEC. Atlantic Power has been treated as the acquirer in the transaction for accounting purposes. Acquisition accounting requires, among other things, that most assets acquired and liabilities assumed be recognized at fair value as of the acquisition date. In

addition, acquisition accounting establishes that the consideration transferred be measured at the closing date of the transaction at the then-current market price. Since acquisition accounting is dependent upon certain valuations and other studies that have yet to commence or progress to a stage where there is sufficient information for a definitive measurement, the pro forma financial statements are preliminary and have been prepared solely for the purpose of providing unaudited pro forma condensed combined consolidated financial information. Differences between these preliminary estimates and the final acquisition accounting will occur and these differences could have a material impact on the accompanying pro forma financial statements and the combined company's future results of operations and financial position.

Note 3. Significant Accounting Policies

Based upon Atlantic Power's initial review of CPILP's summary of significant accounting policies, as disclosed in the CPILP consolidated historical financial statements elsewhere in this joint proxy statement, as well as on preliminary discussions with CPILP's management, the pro forma combined consolidated financial statements assume there will be significant adjustments necessary to conform CPILP's accounting policies under International Financial Reporting Standards ("IFRS") to Atlantic Power's accounting policies under US GAAP. Upon completion of the transaction and a more comprehensive comparison and assessment, differences may be identified that would necessitate changes to CPILP's future accounting policies and such changes could result in material differences in future reported results of operations and financial position for CPILP as compared to historically reported amounts.

Note 4. Estimated Purchase Price and Preliminary Purchase Price Allocation

Atlantic Power is proposing to acquire all of the outstanding units of CPILP for a combination of either C$19.40 in cash or 1.3 Atlantic Power shares per CPILP unit. The purchase price for the business combination is estimated as follows (in thousands except conversion ratio and share price):

Fair value of consideration transferred:		
Cash	$	525,689
Equity		487,480
Total estimated purchase price		1,013,169
Preliminary purchase price allocation		
Working capital	$	10,932

Intangibles		633,620

Total estimated purchase price	$	1,013,169

COMBINED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 4. Estimated Purchase Price and Preliminary Purchase Price Allocation (Continued)

The preliminary purchase price was computed using CPILP's outstanding units as of June 30, 2011, adjusted for the exchange ratio. The preliminary purchase price reflects the market value of Atlantic Power's common stock to be issued in connection with the transaction based on the closing price of Atlantic Power's common stock on June 30, 2011.

The allocation of the preliminary purchase price to the fair values of assets acquired and liabilities assumed includes pro forma adjustments to reflect the fair values of CPILP's assets and liabilities at the time of the completion of the transaction. The final allocation of the purchase price could differ materially from the preliminary allocation used for the Unaudited Pro Forma Condensed Combined Consolidated Balance Sheet primarily because power market prices, interest rates and other valuation variables will fluctuate over time and be different at the time of completion of the transaction compared to the amounts assumed in the pro forma adjustments.

Note 5. Pro Forma Adjustments to Financial Statements

The pro forma adjustments included in the pro forma financial statements are as follows:

(a)

Atlantic Power and CPILP historical presentation Based on the amounts reported in the consolidated statements of operations and balance sheets of Atlantic Power and CPILP for the year ended December 31, 2010 and for the six months ended and as of June 30, 2011. Certain financial statement line items included in CPILP's historical presentation have been reclassified to corresponding line items included in Atlantic Power's historical presentation. These reclassifications had no impact on the historical operating income, net income from continuing operations or partners' equity reported by CPILP. The adjustments to total assets and liabilities were not material to CPILP's balance sheet.

(b)

CPILP conversion to US dollars Based on the amounts reported in the historical consolidated statements of operations of CPILP for the year ended December 31, 2010 and for the six months ended June 30, 2011, the amounts have been converted from Canadian dollars to US dollars using average exchange rates for the applicable periods. For the historical consolidated balance sheet as of June 30, 2011, the amounts have been converted from Canadian dollars to US dollars using ending exchange rates for that period. The adjustments to total assets, total liabilities, revenues and expenses were not material to CPILP's consolidated balance sheet and income statements.

(c)

CPILP conversion to US GAAP Based on the amounts reported in the consolidated statements of operations and balance sheets of CPILP for the year ended December 31, 2010 and for the six months ended and as of June 30, 2011. Certain financial statement line items included in CPILP's historical presentation have been reclassified or adjusted to confirm to US GAAP presentation. For the six months ended June 30, 2011, the CPILP statements conform to the IFRS and for the year ended December 31, 2010 the CPILP statements conform to Canadian GAAP. The adjustments to total assets, total liabilities, revenues and expenses were not material to CPILP's consolidated balance sheet and income statements.

(d)

CPILP exclusion of the North Carolina Plants CPILP will sell its Roxboro and Southport facilities located in North Carolina to an affiliate of Capital Power. Based on the amounts reported in the historical consolidated statements of operations and balance sheets of CPILP

for the year ended December 31, 2010 and for the six months ended and as of June 30, 2011, the following amounts have been excluded from the unaudited pro forma condensed combined consolidated financial statements:

	Six months ended June 30, 2011	Year ended December 31, 2010
Project revenue	$ 24,210	$ 34,726

	As of June 30, 2011
Asset held for sale	$ 130,613
Liabilities held for sale	(15,367)
Retained earnings	$ 115,246

(e)

Power Purchase Agreements and Plants The pro forma balance sheet includes pro forma adjustments to reflect the fair value of CPILP's power contracts (including those designated as "normal purchases normal sales") recorded to intangible assets and additional fair value of plants in the amounts of $353.3 million and $136.5 million, respectively. The pro forma statements of operations include pro forma adjustments to reflect the increase in expense resulting from the amortization of the valuation adjustment related to CPILP's intangibles and the depreciation of the plants of $21.9 million and $40.4 million for the six months ended June 30, 2011 and the year ended December 31, 2010, respectively. The pro forma estimated annual amortization for the power contracts is $39.3 million based on the timing and fair value of the underlying contracts. This estimate is preliminary, subject to change and could vary materially from the actual adjustments at the time the transaction is completed, driven by various factors including changes in energy commodity prices and fuel prices.

(f)

Debt and Equity issuance The pro forma balance sheet includes a pro forma adjustment of $425.0 million to reflect Atlantic Power's proceeds from third-party debt and proceeds of $200.0 million from the issuance of 13.1 million common shares. The assumptions for the $425.0 million debt facility would include a term of 5 years at 6.00% per annum. The proceeds from the debt and equity offering will be used to pay the CPILP unitholders the cash portion of the purchase price. The debt and equity amounts are offset by $11.7 million and $10.1 million of transaction costs classified as deferred financing costs and a reduction of common stock, respectively. The pro forma statements of operations include pro forma

adjustments to reflect the net incremental interest expense resulting from the new debt and amortization of deferred financing costs of $14.0 million and $27.8 million for the six months ended June 30, 2011 and the year ended December 31, 2010, respectively.

(g)

Transaction Costs The pro forma balance sheet includes a pro forma adjustment to accounts payable and accrued liabilities to reflect estimated transaction costs of $25.7 million. The transaction costs have been excluded from the pro forma statements of operations as they reflect non-recurring charges not expected to have a continuing impact on the combined results.

(h)

Goodwill The pro forma balance sheet includes a preliminary estimate of the allocation of the excess of the purchase price paid over the fair value of CPILP's identifiable assets acquired and liabilities assumed. The estimated purchase price of the transaction, based on the closing price of Atlantic Power's common stock on the NYSE on June 30, 2011, is $1,013.2 million, and the excess purchase price over the fair value of the identifiable net assets acquired is $441.3 million.

(i)

Deferred Tax Assets and Liabilities: The pro forma balance sheet includes a preliminary estimated deferred tax impact of $40.6 million to deferred tax liabilities. This adjustment reflect the estimated deferred tax impacts of the acquisition on the balance sheet, primarily related to the reversal of the Atlantic Power's valuation allowance associated with its Canadian accumulated net operating losses as of June 30, 2011. For purposes of the unaudited pro forma condensed combined consolidated financial statements, deferred taxes are provided at the Canadian enacted statutory rate of 25%. This rate does not reflect Atlantic Power's effective tax rate, which includes other tax items, such as non-deductible items, as well as other tax charges or benefits, and does not take into account any historical or possible future tax events that may impact the combined company. When the transaction is completed and additional information becomes available, it is likely the applicable income tax rate will change.

The $159,874 deferred tax liability adjustment reflects the estimated deferred tax liability impact of the acquisition on the balance sheet, primarily related to estimated fair value adjustments for acquired tangible and intangible assets. For purposes of the unaudited pro forma condensed combined consolidated financial information, deferred taxes are provided at Atlantic Power's deferred tax rate of 33%, which includes the U.S. federal statutory income tax rate plus the Canadian statutory income tax rate. This rate does not reflect Atlantic Power's effective tax rate, which includes other tax items, such as state taxes, as well as other tax charges or benefits and does not take into account any historical or possible future tax events that may impact the combined company. When the transaction is completed and additional information becomes available, it is likely the applicable income tax rate will change.

(j)

Common Stock Shares outstanding Reflects the elimination of the CPILP units offset by issuance of 31.5 million shares of Atlantic Power common stock as part of purchase price and the issuance of 13.1 million shares of Atlantic Power common stock in new equity . The pro forma weighted average number of basic shares outstanding is calculated by adding these

CERTAIN HISTORICAL AND PRO FORMA PER SHARE/UNIT DATA

The following tables set forth certain historical, pro forma and pro forma equivalent per share financial information for Atlantic Power common shares and per unit financial information for CPILP units. The pro forma and pro forma equivalent per share/unit information gives effect to the Plan of Arrangement as if the Plan of Arrangement had occurred on June 30, 2011 in the case of book value per share data and as of January 1, 2010 in the case of net income per share/unit data.

The pro forma per share balance sheet information combines CPILP's June 30, 2011 unaudited consolidated balance sheet with Atlantic Power's June 30, 2011 unaudited consolidated balance sheet. The pro forma per share income statement information for the fiscal year ended December 31, 2010, combines CPILP's audited consolidated statement of income for the fiscal year ended December 31, 2010, with Atlantic Power's audited consolidated statement of operations for the fiscal year ended December 31, 2010. The pro forma per share income statement information for the six months ended June 30, 2011, combines CPILP's unaudited consolidated statement of income for the six months ended June 30, 2011, with Atlantic Power's unaudited consolidated statement of operations for the six months ended June 30, 2011. The CPILP pro forma equivalent per share financial information is calculated by multiplying the unaudited Atlantic Power pro forma combined per share amounts by 1.3 (being the exchange ratio under the Plan of Arrangement). The balance sheet of CPILP as of June 30, 2011 has been translated using a C$/$ exchange rate of C$0.9643 to $1.00.

The per share data for the Combined Company on a pro forma basis presented below is not necessarily indicative of the financial condition of the Combined Company had the Plan of Arrangement been completed on June 30, 2011 and the operating results that would have been achieved by the Combined Company had the Plan of Arrangement been completed as of the beginning of the period presented, and should not be construed as representative of the Combined Company's future financial condition or operating results. The per share data for the Combined Company on a pro forma basis presented below has been derived from the unaudited pro forma condensed combined consolidated financial data of the Combined Company included in this joint proxy statement. In addition, the unaudited pro forma information does not purport to indicate balance sheet data or results of operations data as of any future date or for any future period.

The cash distributions are made in respect of each calendar month to unitholders of record on the last day of each month commencing. Partnership Acquisition Proposal and shall not release any third party from any confidentiality, non-solicitation or standstill agreement to which it is a party (it being understood that the automatic termination of the standstill provisions of any such agreements in accordance with their terms shall not be a violation of this Section 4.13(b)). The Partnership Entities undertake to enforce, or cause the Partnership Subsidiaries to enforce, all standstill, non-disclosure, non-disturbance, non-solicitation and similar covenants that they or any of their Subsidiaries have entered into prior to the date hereof or enter into after the date hereof.

(c)

From and after the date of this Agreement and until this Agreement is terminated in accordance with its terms, the Partnership Entities shall as soon as reasonably practicable (and in any event within 24 hours) notify the Purchaser, at first orally and then in writing, of any proposal, inquiry, offer, expression of interest or request relating to or constituting a Partnership Acquisition Proposal, any request for discussions or negotiations, and any request for non-public information relating to the Partnership Entities or the Partnership Subsidiaries received by the Partnership Entities' directors, officers, representatives or agents, or any material amendments to the foregoing. the Partnership Entities have provided the Purchaser with the notice required by Section 4.13(c) in respect of such Partnership Acquisition Proposal;

(ii)

the GP Board determines in good faith, after consultation with its outside legal and financial advisors, that such Partnership Acquisition Proposal constitutes, or would reasonably be expected to lead to, a Superior Proposal and that, based on the advice of outside counsel, the failure to take such action would be inconsistent with its fiduciary duties under applicable Laws and the Partnership Agreement;

(iii)

prior to providing any information or data in respect of any of the Partnership Entities or the Partnership Subsidiaries, the Partnership receives from the Person making the Partnership Acquisition Proposal an executed confidentiality agreement that contains provisions that are not less favourable to the Partnership than those contained in the Confidentiality Agreement including a standstill provision and the Partnership Entities promptly and in any event not less than 24 hours after its execution send a copy of any such confidentiality agreement to the Purchaser; and

(iv)

the Purchaser is provided with a list of, or in the case of information on or after the date hereof that was not previously made available to the Purchaser, copies of, any information provided to the Person making the Partnership Acquisition Proposal.

Table of Contents

(e)

The Partnership Entities agree that they will not accept, approve or enter into any agreement (a **"Proposed Agreement"**), other than a confidentiality agreement as contemplated by Section 4.13(d), with any Person providing for or to facilitate any Partnership Acquisition Proposal, unless:

(i)

the Partnership Meeting has not occurred;

(ii)

the GP Board determines in good faith, after consultation with its outside legal and financial advisors, that such Partnership Acquisition Proposal constitutes a Superior Proposal and that the failure to take such action would be inconsistent with its fiduciary duties under applicable Laws and the Partnership Agreement;

(iii)

the Partnership Entities have complied with Sections 4.13(a) through 4.13(d) inclusive;

(iv)

the Partnership Entities have provided the Purchaser with a written notice that there is a Superior Proposal together with all documentation related to and detailing the Superior Proposal, including a copy of any Proposed Agreement relating to such Superior Proposal, and a written notice from the GP Board regarding the value in financial terms that the GP Board has in consultation with its financial advisors determined should be ascribed to any non-cash consideration offered under the Superior Proposal, such documents to be so provided to the Purchaser not less than five Business Days prior to the proposed acceptance, approval, recommendation or execution of the Proposed Agreement by Partnership Entities;

(v)

five Business Days shall have elapsed from the date the Purchaser received the notice and documentation required by Section 4.13(e)(iv) and, if the Purchaser has proposed to amend the terms of the Arrangement in accordance with Section 4.13(f), the GP Board shall have determined, in good faith, after consultation with its financial advisors and outside legal counsel, that the Partnership Acquisition Proposal continues to be a Superior Proposal compared to the proposed amendment to the terms of the Arrangement by the Purchaser;

(vi)

the Partnership Entities concurrently terminate this Agreement pursuant to Section 6.3(d)(iii); and

(vii)

the Partnership has previously, or concurrently will have, paid to the Purchaser the Purchaser Termination Fee,

and the Partnership Entities further agree that they and the GP Board will not withdraw, modify or qualify (or propose to withdraw, modify or qualify) in any manner adverse to the Purchaser the approval or recommendation of the Arrangement, nor accept, approve or recommend any Partnership Acquisition Proposal unless the requirements of Sections 4.13(e)(i) through 4.13(e)(vii) have been satisfied.

(f)

The Partnership Entities acknowledge and agree that, during the five Business Day periods referred to in Sections 4.13(e)(i) through 4.13(e)(vii) or such longer period as the Partnership Entities may approve for such purpose, the Purchaser shall have the opportunity, but not the obligation, to propose to amend the terms of this Agreement and the Arrangement and the Partnership Entities shall co-operate with the Purchaser with respect thereto, including negotiating in good faith with the Purchaser to enable the Purchaser to make such adjustments to the terms and conditions of this Agreement and the Arrangement as the Purchaser deems appropriate and as would enable the Purchaser to proceed with the Arrangement and any related transactions on such adjusted terms. The GP Board will review any written definitive proposal by the Purchaser to amend the terms of the Arrangement in order to determine, in good faith in the exercise of its fiduciary duties and consistent with

Table of Contents

Section 4.13(a), whether the Purchaser's written definitive proposal to amend the Arrangement would result in the Partnership Acquisition Proposal not being a Superior Proposal compared to the proposed amendment to the terms of the Arrangement. If the GP Board determines that a Partnership Acquisition Proposal is not a Superior Proposal as compared to the proposed written definitive amendment to the terms of the Arrangement, it will promptly enter into the proposed written definitive amendment to the Arrangement.

(g)

The GP Board shall promptly reaffirm its recommendation of the Arrangement by press release after: (x) any Partnership Acquisition Proposal which the GP Board determines not to be a Superior Proposal is publicly announced or made; or (y) the GP Board determines that a proposed amendment to the terms of the Arrangement would result in the Partnership Acquisition Proposal which has been publicly announced or made not being a Superior Proposal, and the Purchaser has so amended the terms of the Arrangement. The Purchaser and its counsel shall be given a reasonable opportunity to review and comment on the form and content of any such press release, recognizing that whether or not such comments are appropriate will be determined by the GP Board, acting reasonably.

(h)

Nothing in this Agreement shall prevent the GP Board from responding through a directors' circular or otherwise as required by applicable Securities Laws to a Partnership Acquisition Proposal that it determines is not a Superior Proposal. The Purchaser and its counsel shall be given a reasonable opportunity to review and comment on the form and content of any such disclosure, recognizing that whether or not such comments are appropriate will be determined by the GP Board, acting reasonably.

(i)

Each of the Partnership Entities and the Purchaser agree that all information that may be provided to it by the other with respect to any Partnership Acquisition Proposal pursuant to this Section 4.13 shall be treated as "Evaluation Material" as that term is defined in the Confidentiality Agreement, and shall not be disclosed or used except in accordance with the provisions of the Confidentiality Agreement or in order to enforce its rights under this Agreement in legal proceedings.

(j)

Each of the Partnership Entities shall ensure that its officers, directors and key employees and any financial advisors or other advisors, representatives or agents retained by it are aware of the provisions of this Section 4.13, and shall be responsible for any breach of this Section 4.13 by such officers, directors, key employees, financial advisors or other advisors, representatives or agents.

(k)

The Partnership Entities acknowledge and agree that each successive modification of any Partnership Acquisition Proposal shall constitute a new Partnership Acquisition Proposal for purposes of this Section 4.13, and, for greater certainty, of the requirement of Sections 4.13(e) and 4.13(f) to initiate an additional five Business Day response period for the Purchaser.

(l)

If the Partnership Entities provide the Purchaser with the notice of a Partnership Acquisition Proposal contemplated in this Section 4.13 on a date that is less than five Business Days prior to the Partnership Meeting, if requested by the Purchaser, the Partnership Entities shall adjourn or postpone the Partnership Meeting to a date that is not less than five Business Days and not more than 10 calendar days after the date of such notice, provided, however, that the Partnership Meeting shall not be adjourned or postponed to a date later than the fifth Business Day prior to the Outside Date and, if requested by the Partnership Entities, the Purchaser shall adjourn or postpone the Purchaser Meeting to the same date.

7.2 Entire Agreement, Binding Effect and Assignment

This Agreement shall be binding on and shall enure to the benefit of the Parties and their respective successors and permitted assigns. This Agreement (including the schedules hereto), the Partnership Entity Disclosure Letter, the Corporation Disclosure Letter, the Purchaser Disclosure Letter and the Confidentiality Agreement constitute the entire agreement, and supersede all other prior agreements and understandings, both written and oral, between the Parties with respect to the subject matter hereof and thereof. Neither this Agreement nor any of the rights, interests or obligations hereunder may be assigned by any of the Parties without the prior written consent of the other Parties. The Parties hereby confirm that they remain bound by the terms of the Confidentiality Agreement in accordance with the terms thereof, notwithstanding that this Agreement may be terminated for any reason whatsoever.

7.3 Severability

If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced by any rule or Law or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the transactions contemplated hereby is not affected in any manner materially adverse to any Party.

Upon such determination that any term or other provision is invalid, illegal or incapable of being enforced, the Parties shall negotiate in good faith to modify this Agreement so as to effect the original intent of the Parties as closely as possible in an acceptable manner to the end that the transactions contemplated hereby are fulfilled to the fullest extent possible.

7.4 No Third Party Beneficiaries

Except as provided in Sections 4.16 and 7.10 and except for the rights of the Partnership Unitholders and the Corporation Shareholders to receive the consideration for their Partnership Units and the Corporation Shares, respectively, following the Effective Time, and other rights and benefits, pursuant to the Arrangement, which rights are hereby acknowledged and agreed by the Purchaser, this Agreement is not intended to confer any rights or remedies upon any person other than the Parties to this Agreement. This Section 7.4 shall survive the Effective Time and any termination of this Agreement.

7.5 Time of Essence

Time shall be of the essence in this Agreement.

7.6 Further Assurances

Each Party hereto shall, from time to time and at all times hereafter, at the request of the other Party hereto, but without further consideration, do all such further acts, and execute and deliver all such further documents and instruments and provide all such further assurances as may be reasonable required in order to fully perform and carry out the terms and intent hereof.

7.7 Remedies

Except as provided in Section 6.7, the Parties agree that irreparable harm would occur for which money damages would not be an adequate remedy at law in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms or were otherwise breached. It is accordingly agreed that the Parties shall be entitled to equitable remedies, including specific performance, a restraining order and interlocutory, preliminary and permanent injunctive relief and other equitable relief to prevent breaches of this Agreement, any requirement for the securing or

posting of any bond in connection with the obtaining of any such injunctive or other equitable relief hereby being waived. Except as provided in Section 6.7, such remedies will not be the exclusive remedies for any breach of this Agreement but will be in additions to all other remedies available at law or equity to each of the Parties.

7.8 Costs and Expenses

Except as provided in Sections 4.10 and 6.6 and as otherwise agreed to in writing between the Parties, the Parties agree that all costs and expenses of the Parties relating to the Arrangement and the transactions contemplated hereby, including legal fees, accounting fees, financial advisory fees, regulatory filing fees, stock exchange fees, all disbursements of advisors and printing and mailing costs, shall be paid by the Party incurring such expenses.

7.9 Governing Law

This Agreement shall be governed, including as to validity, interpretation and effect, by the laws of the Province of Alberta and the federal laws of Canada applicable therein, and shall be construed and treated in all respects as an Alberta contract. Each of the Parties hereby irrevocably attorns to the exclusive jurisdiction of the Courts in the Province of Alberta in respect of all matters arising under and in relation to this Agreement and the Arrangement.

7.10 Notice of Limitation

The Purchaser covenants and agrees that no Partnership Unitholder shall have any liability for or obligation in respect of, the covenants and obligations of the Partnership hereunder. This Section 7.10 shall survive the Effective Time and any termination of this Agreement.

7.11 Filing of Agreement

The Parties acknowledge and agree that this Agreement and all other documents required under applicable Securities Laws will be filed on the SEDAR and/or EDGAR website, together with other documents required by Securities Law.

7.12 Waiver

Any Party may, on its own behalf only, (i) extend the time for the performance of any of the obligations or acts of another Party, (ii) waive compliance with another Party's agreements or the fulfillment of any conditions to its own obligations contained herein, or (iii) waive inaccuracies in another Party's representations or warranties contained herein or in any document delivered by another Party; provided, however, that any such extension or waiver shall be valid only if set forth in an instrument in writing signed on behalf of such Party and, unless otherwise provided in the written waiver, will be limited to the specific breach or condition waived.

7.13 Counterparts, Execution

This Agreement may be executed in two or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The Parties shall be entitled to rely upon delivery of an executed facsimile or similar executed electronic copy of this Agreement, and such facsimile or similar executed electronic copy shall be legally effective to create a valid and binding agreement among the Parties.

CAPITAL POWER L.P. and CAPITAL POWER CORPORATION

Dear Sir/Madam:

Re:

Proposed Acquisition by Atlantic Power Corporation (the "Purchaser") of Capital Power Income L.P. (the "Partnership") and CPI Investments Inc. (the "Corporation")

Reference is made to the Arrangement Agreement dated as of the date hereof (the "**Arrangement Agreement**") among the Purchaser, the Partnership, CPI Income Services Ltd., and the Corporation regarding the proposed acquisition of the Partnership and the Corporation by the Purchaser pursuant to a plan of arrangement under the *Canada Business Corporations Act* on the terms and conditions set out in the Arrangement Agreement (the "**Proposed Transaction**"). The entering into of the Arrangement Agreement by the Purchaser is subject to, among other things, the execution and delivery of this Support Agreement and the approval of the Arrangement by the Corporation Shareholders.

All capitalized terms and phrases used in this Support Agreement but not defined herein shall have the respective meanings given to them in the Arrangement Agreement.

The purpose of this Support Agreement is to confirm the commitment of the undersigned securityholder of the Corporation (the "**Securityholder**") to vote or cause to be voted at any meeting of holders of the Corporation Shares, including any adjournment or postponement thereof, or in any other circumstances (including by way of written resolution) upon which a vote, consent or other approval with respect to the special resolution and/or any other resolution to approve the Arrangement and any ancillary matters required to give legal effect to the foregoing is sought (the "**Corporation Transaction Approvals**"), all Corporation Shares owned (beneficially or otherwise) by the Securityholder, directly or indirectly, or over which the Securityholder exercises control or direction (collectively, the "**Subject Securities**"), in favour of the Arrangement and to otherwise support the Proposed Transaction on the terms and conditions of this Support Agreement to the extent the requisite approval of the Arrangement by the Corporation Shareholders has not already been obtained or any such approval is otherwise necessary or reasonably desirable in connection with the completion of the Arrangement or any transactions or steps to be completed in connection therewith.

NOW THEREFORE, in consideration of the promises and mutual covenants and agreements set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the parties hereto, the parties hereto agree as follows:

(C) in the case of a Claim with respect to any other representation and warranties, within a period of 18 months following the Effective Time,

and, upon the expiry of the relevant limitation period referred to in clauses (A), (B) or (C) of this Section 6(a), the Securityholder shall have no further liability to the Purchaser Indemnified Parties with respect to the representations or warranties referred to in such clauses, respectively, except in respect of Claims for which notice of Claim shall have been given to the Securityholder before the expiry of that period, in which case the representation and warranty to which such notice applies shall survive in respect of that Claim until the final determination or settlement of that Claim.

(ii) All covenants of the Securityholder and CPC, as the case may be, in this Support Agreement shall survive the completion of the Arrangement, the Effective Time and the date of any expiration or termination of each of this Support Agreement and the Arrangement Agreement for the benefit of the Purchaser Indemnified Parties, subject only to applicable limitation periods imposed by applicable Law.

(b) ***Indemnification by the Securityholder***

(i) Upon and after the Effective Time, subject to Section 6(a), the Securityholder shall indemnify and hold the Purchaser and the Corporation and each of their respective shareholders, officers, directors, employees, agents, successors and assigns (each, a "**Purchaser Indemnified Party**"), harmless from and against any claim, demand, complaint, grievance, action, cause or right of action, damage, loss (other than lost profits), costs, liability, obligation or expense, assessments or reassessments, including, without limitation, reasonable professional fees and all reasonable costs incurred in investigating or pursuing any of the foregoing, or any proceeding, arbitration, mediation or other dispute resolution procedure relating to any of the foregoing, or any orders, writs, injunctions or decrees of any Governmental Authority (collectively, "**Claims**" and each, a "**Claim**") which may be made or brought against any Purchaser Indemnified Party or which any Purchaser Indemnified Party may suffer or incur, directly or indirectly, in respect of, as a result of, or arising out of or in connection with:

(A) any failure of any representation or warranty made by the Securityholder hereunder to be true and correct in all respects as of the date of this Support Agreement and as of the Effective Date;

(B) any non-fulfillment or breach of any covenant, agreement or undertaking made by the Securityholder or CPC in this Support Agreement;

(C) any liabilities, debts or obligations of the Corporation arising prior to the Effective Time; and

(D) any Taxes payable by the Corporation in respect of any taxation year or period ending on or before the Effective Date or the portion of any Taxes payable by the Corporation, as the case may be, for any taxation year or period ending after the Effective Date that is attributable to the portion of such year or period ending on the Effective Date.

(c) ***Procedure for Indemnification***

(i) Within a reasonable period of time after the incurrence of any losses by any Purchaser Indemnified Party entitled to indemnification pursuant to Section 6(b) hereof, including any Claim by a third Person described in Section 6(d), which might give rise to

Table of Contents

indemnification hereunder, the Purchaser Indemnified Party shall deliver to the Securityholder a certificate (the "**Certificate**"), which Certificate shall:

(A) state that the Purchaser Indemnified Party has paid or properly accrued losses or anticipates that it will incur liability for losses for which such Purchaser Indemnified Party is entitled to indemnification pursuant to this Support Agreement; and

(B) specify in reasonable detail each individual item of loss included in the amount so stated, the date such item was paid or properly accrued, the basis for any anticipated liability and the nature of the misrepresentation, breach of warranty, breach of covenant or claim to which each such item is related and the computation of the amount to which such Purchaser Indemnified Party claims to be entitled hereunder.

(ii) In the event that the Securityholder shall object to the indemnification of an Purchaser Indemnified Party in respect of any Claim or Claims specified in any Certificate, the Securityholder shall, within 10 days after receipt by the Securityholder of such Certificate, deliver to the Purchaser Indemnified Party a notice to such effect and the Securityholder and the Purchaser Indemnified Party shall, within the 30 day period beginning on the date of receipt by the Purchaser Indemnified Party of such objection, attempt in good faith to agree upon the rights of the respective parties with respect to each of such Claims to which the Securityholder shall have so objected. If the Purchaser Indemnified Party and the Securityholder shall succeed in reaching agreement on their respective rights with respect to any of such Claims, the Purchaser Indemnified Party and the Securityholder shall promptly prepare and sign a memorandum setting forth such agreement. Should the Purchaser Indemnified Party and the Securityholder be unable to agree as to any particular item or items or amount or amounts, then the Purchaser Indemnified Party and the Securityholder shall submit such dispute to a court of competent jurisdiction. The party which receives a final judgment in such dispute shall be indemnified and held harmless for all reasonable attorney and consultant's fees or expenses by the other party.

(iii) Claims for losses specified in any Certificate to which the Securityholder shall not object in writing within 10 days of receipt of such Certificate, Claims for losses the validity and amount of which have been the subject of judicial determination as described in Section 6(c)(ii) and Claims for losses the validity and amount of which shall have been the subject of a final judicial determination, or shall have been settled with the consent of the Securityholder, as described in Section 6(d) below, are hereinafter referred to, collectively, as "**Agreed Claims**". Within 10 days of the determination of the amount of any Agreed Claims, the Securityholder shall pay to the Purchaser Indemnified Party an amount equal to the Agreed Claim by wire transfer in immediately available funds to the bank account or accounts designated by the Purchaser Indemnified Party in a notice to the Securityholder not less than two Business Days prior to such payment.

(d) ***Third Party Claims***

If a Claim by a third Person is made against any Purchaser Indemnified Party, and if such Purchaser Indemnified Party intends to seek indemnity with respect thereto under this Section 6, such Purchaser Indemnified Party shall promptly notify the Securityholder of such Claim; provided that the failure to so notify shall not relieve the Securityholder of its obligations hereunder, except to the extent that the Securityholder is actually and materially prejudiced thereby. The Securityholder shall have 30 days after receipt of such notice to assume the conduct and control, through counsel reasonably acceptable to the Purchaser Indemnified Party at the expense of the Securityholder, of the settlement or defence thereof; provided that (a) the Securityholder shall permit the Purchaser Indemnified Party to participate in such settlement or defence through counsel chosen by such Purchaser Indemnified

Table of Contents

Party, provided that the fees and expenses of such counsel shall be borne by such Purchaser Indemnified Party, and (b) the Securityholder shall promptly be entitled to assume the defence of such action only to the extent the Securityholder acknowledges its indemnity obligation and assumes and holds such Purchaser Indemnified Party harmless from and against the full amount of any loss resulting therefrom; and provided further that the Securityholder shall not be entitled to assume control of such defence and shall pay the fees and expenses of counsel retained by the Purchaser Indemnified Party if: (i) the parties agree, reasonably and in good faith, that such third Person Claim would give rise to losses which are more than twice the amount indemnifiable by the Securityholder pursuant to this Section 6; (ii) the Claim for indemnification relates to or arises in connection with any criminal proceeding, action, indictment, allegation or investigation; (iii) the Claim seeks an injunction or equitable relief against the Purchaser Indemnified Party; (iv) the Purchaser Indemnified Party has been advised by counsel that a reasonable likelihood exists of a conflict of interest between the Securityholder and the Purchaser Indemnified Party; (v) the Purchaser Indemnified Party reasonably believes an adverse determination with respect to the action, lawsuit, investigation, proceeding or other claim giving rise to such Claim for indemnification would be detrimental to or injure the Purchaser Indemnified Party's reputation or future business prospects; or (vi) upon petition by the Purchaser Indemnified Party, the appropriate court rules that the Securityholder failed or is failing to vigorously prosecute or defend such claim. Any Purchaser Indemnified Party shall have the right to employ separate counsel in any such action or Claim and to participate in the defence thereof, but the fees and expenses of such counsel shall not be at the expense of the Securityholder unless (x) the Securityholder shall have failed, within a reasonable time after having been notified by the Purchaser Indemnified Party of the existence of such Claim as provided in the preceding sentence, to assume the defence of such Claim, (y) the employment of such counsel has been specifically authorized by the Securityholder, which authorization shall not be unreasonably withheld, conditioned or delayed, or (z) the named parties to any such action include both such Purchaser Indemnified Party and the Securityholder and such Purchaser Indemnified Party shall have been advised by such counsel that there may be one or more legal defences available to the Purchaser Indemnified Party which are not available to the Securityholder, or available to the Securityholder the assertion of which would be adverse to the interests of the Purchaser Indemnified Party. So long as the Securityholder is reasonably contesting any such Claim in good faith, the Purchaser Indemnified Party shall not pay or settle any such Claim. Notwithstanding the foregoing, the Purchaser Indemnified Party shall have the right to pay or settle any such Claim, provided that in such event it shall waive any right to indemnity therefor by the Securityholder for such Claim unless the Securityholder shall have consented to such payment or settlement. If the Securityholder does not notify the Purchaser Indemnified Party within 30 days after the receipt of the Purchaser Indemnified Party's notice of a Claim of indemnity hereunder that it elects to undertake the defence thereof, the Purchaser Indemnified Party shall have the right to contest, settle or compromise the Claim but shall not thereby waive any right to indemnity therefor pursuant to this Support Agreement. The Securityholder shall not, except with the consent of the Purchaser Indemnified Party, enter into any settlement that is not entirely indemnifiable by the Securityholder pursuant to this Section 6 and does not include as an unconditional term thereof the giving by the Person or Persons asserting such Claim to all Purchaser Indemnified Parties of an unconditional release from all liability with respect to such Claim or consent to entry of any judgment. Notwithstanding any of the foregoing, in the event that it is reasonably foreseeable that the amount of any loss to be incurred by the Purchaser Indemnified Party with respect to any third Person Claim is more than twice the amount indemnifiable by the Securityholder, the Purchaser Indemnified Party shall be entitled to conduct and control the defence and/or settlement of any such Claim without the consent of the Securityholder. The Securityholder and the Purchaser Indemnified Party shall cooperate with each other in all reasonable respects in connection with the defence of any Claim, including making available records relating to such Claim and furnishing, without expense to the Securityholder and/or its counsel, such employees of the Purchaser Indemnified Party as may be reasonably necessary for the preparation of the defence of any such Claim or for testimony as witnesses in any proceeding relating to such claim.

Additional Rules and Procedures

The obligation of the Securityholder to indemnify the Purchaser Indemnified Parties pursuant to this Section 6 shall also be subject to the following:

(i) if any third Person Claim is of a nature such that the Purchaser Indemnified Party is required by applicable Law to make a payment to any Person with respect to such third Person Claim before the completion of settlement negotiations or related legal proceedings, the Purchaser Indemnified Party may make such payment and the Securityholder shall, forthwith after demand by the Purchaser Indemnified Party, reimburse the Purchaser Indemnified Party for any such payment. If the amount of any liability under the third Person Claim in respect of which such a payment was made, as finally determined, is less than the amount which was paid by the Securityholder to the Purchaser Indemnified Party, the Purchaser Indemnified Party shall, forthwith after receipt of the difference from such third Person, pay such difference to the Securityholder; and

(ii) the Securityholder and the Purchaser Indemnified Party shall provide each other on an ongoing basis with all information which may be relevant to the other's liability hereunder and shall supply copies of all relevant documentation promptly as they become available.

Reference is made to the Arrangement Agreement dated as of the date hereof (the "**Arrangement Agreement**") among the Purchaser, the Partnership, CPI Income Services Ltd., and the Corporation regarding the proposed acquisition of the Partnership and the Corporation by the Purchaser pursuant to a plan of arrangement under the *Canada Business Corporations Act* on the terms and conditions set out in the Arrangement Agreement (the "**Proposed Transaction**"). The entering into of the Arrangement Agreement by the Purchaser is subject to, among other things, the execution and delivery of this Support Agreement and the approval of the Arrangement by the Corporation Shareholders.

All capitalized terms and phrases used in this Support Agreement but not defined herein shall have the respective meanings given to them in Schedule "A" hereto.

The purpose of this Support Agreement is to confirm the commitment of the undersigned securityholder of the Corporation (the "**Securityholder**") to vote or cause to be voted at any meeting of holders of the Corporation Shares, including any adjournment or postponement thereof, or in any other circumstances (including by way of written resolution) upon which a vote, consent or other approval with respect to the special resolution and/or any other resolution to approve the Arrangement and any ancillary matters required to give legal effect to the foregoing is sought (the "**Corporation Transaction Approvals**"), all Corporation Shares owned (beneficially or otherwise) by the Securityholder, directly or indirectly, or over which the Securityholder exercises control or direction (collectively, the "**Subject Securities**"), in favour of the Arrangement and to otherwise support the Proposed Transaction on the terms and conditions of this Support Agreement to the extent the requisite approval of the Arrangement by the Corporation Shareholders has not already been obtained or any such approval is otherwise necessary or reasonably desirable in connection with the completion of the Arrangement or any transactions or steps to be completed in connection therewith.

NOW THEREFORE, in consideration of the promises and mutual covenants and agreements set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the parties hereto, the parties hereto agree as follows:

The Guarantor irrevocably and unconditionally guarantees in favour of the Holders the due and punctual payment of the Preferred Share Obligations (without duplication of amounts theretofore paid by or on behalf of the Corporation), regardless of any defense (except for the defense of payment by the Corporation), right of setoff or counterclaim which the Guarantor may have or assert. The Guarantor's obligation to pay a Preferred Share Obligation may be satisfied by (i) direct payment to the Holders or (ii) payment to the Holders through the facilities of the Trustee. The Guarantor shall give prompt written notice to the Trustee in the event it makes a direct payment to the Holders hereunder.

2.2 Waiver of Notice

The Guarantor hereby waives notice of acceptance of this Guarantee.

2.3 Guarantee Absolute

The Guarantor guarantees that the Preferred Share Obligations will be paid strictly in accordance with the terms of the Series 1 Shares and this Guarantee within the time required by Section 2.1 regardless of any law, regulation or order now or hereafter in effect in any jurisdiction affecting any such terms or the rights of the Holders with respect thereto. The liability of the Guarantor under this Guarantee shall be absolute and unconditional irrespective of:

(a) any sale, transfer or assignment by any Holder of any Series 1 Shares or any right, title, benefit or interest of such Holder therein or thereto;

(b) any amendment or change in or to, or any waiver of, any of the terms of the Series 1 Shares;

(c) any change in the name, objects, constitution, capacity, capital or the constating documents of the Guarantor;

(d) any change in the name, objects, constitution, capacity, capital or the constating documents of the Corporation;

(h) the recovery of any judgment against the Corporation, any voluntary or involuntary liquidation, dissolution, sale of any collateral, winding up, merger or amalgamation of the Corporation or the Guarantor, any sale or other disposition of all or substantially all of the assets of the Corporation, or any judicial or extra-judicial receivership, insolvency, bankruptcy, assignment for the benefit of, or proposal to, creditors, reorganization, moratorium,

arrangement, composition with creditors, or readjustment of debt of, or other proceedings affecting the Corporation, the Guarantor or any of the assets of the Corporation;

(i) any circumstance, act or omission that would prevent subrogation operating in favour of the Guarantor;

(j) any invalidity of, or defect or deficiency in, the Series 1 Shares or this Guarantee;

(k) the settlement or compromise of any obligation guaranteed hereby or hereby incurred; or

(l) any other circumstance, act or omission that might otherwise constitute a defence available to, or a discharge of, the Corporation in respect of any of the Preferred Share Obligations, or the Guarantor in respect of any of the Preferred Share Obligations (other than, and to the extent of, the payment or satisfaction thereof);

it being the intent of the Guarantor that its obligations in respect of Preferred Share Obligations shall be absolute and unconditional under all circumstances and shall not be discharged except by payment in full of the Preferred Share Obligations or as otherwise set out herein. The Holders shall not be bound or obliged to exhaust their recourse against the Corporation or any other persons or to take any other action before being entitled to demand payment from the Guarantor hereunder.

There shall be no obligation of the Holders to give notice to, or obtain the consent of, the Guarantor with respect to the happening of any of the foregoing.

2.4 Continuing Guarantee

This Guarantee shall apply to and secure any ultimate balance due or remaining due to the Holders in respect of the Preferred Share Obligations and shall be binding as an absolute and continuing obligation of the Guarantor. This Guarantee shall continue to be effective or be reinstated, as the case may be, if at any time payment of any of the Preferred Share Obligations must be rescinded, is declared voidable, or must otherwise be returned by the Holders for any reason, including the insolvency, bankruptcy, dissolution or reorganization of the Corporation or upon or as a result of the appointment of a custodian, receiver, trustee or other officer with similar powers with respect to the Corporation or any substantial part of its property, all as though such payment had not been made. If at any time the Corporation is precluded from making payment when due in respect of any Preferred Share Obligations by reason of the provisions of the ABCA or otherwise, such amounts shall nonetheless be deemed to be due and payable by the Corporation to the Holders for all purposes of this Guarantee and the Preferred Share Obligations shall be immediately due and payable to the Holders. This is a guarantee of payment, and not merely a deficiency or collection guarantee.

2.5 Rights of Holders

The Guarantor expressly acknowledges that: (i) this Guarantee will be deposited with the Trustee to be held for the benefit of the Holders; and (ii) the Trustee has the right to enforce this Guarantee on behalf of the Holders.

2.6 Guarantee of Payment

Notwithstanding anything to the contrary herein, the Holders or the

Table of Contents

Trustee shall first seek payment of the Preferred Share Obligations under the Guarantee Indenture dated as of May 25, 2007 among Capital Power Income L.P., the Corporation and the Trustee.

2.7 Subrogation

The Guarantor shall have no right of subrogation in respect of any payment made to the Holders hereunder until such time as the Preferred Share Obligations have been fully satisfied. In the case of the liquidation, dissolution, winding-up or bankruptcy of the Corporation (whether voluntary or involuntary), or if the Corporation makes an arrangement or compromise or proposal with its creditors, the Holders shall have the right to rank for their full claim and to receive all dividends or other payments in respect thereof until their claims have been paid in full, and the Guarantor shall continue to be liable to the Holders for any balance which may be owing to the Holders by the Corporation. The Preferred Share Obligations shall not, however, be released, discharged, limited or affected by the failure or omission of the Holders to prove the whole or part of any claim against the Corporation. If any amount is paid to the Guarantor on account of any subrogation arising hereunder at any time when the Preferred Share Obligations have not been fully satisfied, such amount shall be held in trust for the benefit of the Holders and shall forthwith be paid to the Holders to be credited and applied against the Preferred Share Obligations.

2.8 Independent Obligations

The Guarantor acknowledges that its obligations hereunder are independent of the obligations of the Corporation with respect to the Series 1 Shares and that the Guarantor shall be liable as principal and as debtor hereunder to make Preferred Share Obligations pursuant to the terms of this Guarantee notwithstanding the occurrence of any event referred to in subsections (a) through (l), inclusive, of Section 2.3, if the Holders should make a demand upon the Guarantor. The Guarantor will pay the Preferred Share Obligations without regard to any equities between it and the Corporation or any defence or right of set-off, compensation, abatement, combination of accounts or cross-claim that it or the Corporation may have.

2.9 Guarantor to Investigate Financial Condition of the Corporation

The Guarantor acknowledges that it has fully informed itself about the financial condition of the Corporation. The Guarantor assumes full responsibility for keeping fully informed of the financial condition of the Corporation and all other circumstances affecting the Corporation's ability to pay the Preferred Share Obligations.

ARTICLE 3

(a) all Senior Indebtedness shall first be paid in full, or provision made for such payment before any payment is made on account of the Preferred Share Obligations; and

(b) any payment or distribution of assets of the Guarantor, whether in cash, property or securities, to which the Holders of the Series 1 Shares or the Trustee on behalf of such Holders would be entitled except for the provisions of this Article 3, shall be paid or delivered by the trustee in bankruptcy, receiver, assignee for the benefit of creditors, or other liquidating agent making such payment or distribution, directly to the holders of Senior Indebtedness or their representative or representatives, or to the trustee or trustees under any indenture pursuant to which any instruments evidencing any of such Senior Indebtedness may have been issued, to the extent necessary to pay all Senior Indebtedness in full after giving effect to any concurrent payment or distribution, or provision therefor, to the holders of such Senior Indebtedness.

3.3 Subrogation to Rights of Holders of Senior Indebtedness

Subject to the payment in full of all Senior Indebtedness, the Holders of the Series 1 Shares shall be subrogated to the rights of the holders of Senior Indebtedness to receive payments or distributions of assets of the Guarantor (to the extent of the application thereto of such payments or other assets which would have been received by the Holders of the Series 1 Shares but for the provisions hereof) until the Preferred Share Obligations shall be paid in full, and no such payments or distributions to the Holders of the Series 1 Shares of cash, property or securities, which otherwise would be payable or distributable to the holders of the Senior Indebtedness, shall, as between the Guarantor, its creditors (other than the holders of Senior Indebtedness), and the Holders of Series 1 Shares, be deemed to be a payment by the Guarantor to the holders of the Senior Indebtedness or on account of the Senior Indebtedness, it being understood that the provisions of this Article 3 are and are intended solely for the purpose of defining the relative rights of the Holders of the Series 1 Shares, on the one hand, and the holders of Senior Indebtedness, on the other hand.

3.4 Obligation to Pay Not Impaired

Nothing contained in this Article 3 or elsewhere in this Guarantee or in the Series 1 Shares is intended to or shall impair, as between the Guarantor, its creditors (other than the holders of Senior Indebtedness), and the Holders of the Series 1 Shares, the obligation of the Guarantor, which is absolute and unconditional, to pay to the Holders of the Series 1 Shares the Preferred Share Obligations in accordance herewith, as and when the same shall become due and payable in accordance with this Guarantee, or affect the relative rights of the Holders of the Series 1 Shares and creditors of the Guarantor other than the holders of the Senior Indebtedness, nor shall anything herein or therein prevent the Trustee or the Holder of any Series 1 Share from exercising all remedies otherwise permitted by applicable law upon default under this Guarantee, subject to the rights, if any, under this Article 3 of the holders of Senior Indebtedness in respect of cash, property or securities of the Guarantor received upon the exercise of any such remedy.

3.5 No Payment if Senior Indebtedness In Default

Upon the maturity of any Senior Indebtedness by lapse of time, acceleration or otherwise, then, except as provided in Section 3.6, all principal of and interest on all such matured Senior Indebtedness shall first be paid in full, or shall first have been duly provided for, before any payment is made on account of the Preferred Share Obligations.

In case of default with respect to any Senior Indebtedness permitting the holders thereof to accelerate the maturity thereof, unless and until such default shall have been cured or waived or shall

have ceased to exist, no payment (by purchase of the Series 1 Shares or otherwise) shall be made by the Guarantor with respect to the Preferred Share Obligations and neither the Trustee nor the Holders of Series 1 Shares shall be entitled to demand, institute proceedings for the collection of, or receive any payment or benefit (including without limitation by set-off, combination of accounts or otherwise in any manner whatsoever) on account of the Preferred Share Obligations after the happening of such a default (except as provided in Section 3.8), and unless and until such default shall have been cured or waived or shall have ceased to exist, such payments shall be held in trust for the benefit of, and, if and when such Senior Indebtedness shall have become due and payable, shall be paid over to, the holders of the Senior Indebtedness or their representative or representatives or to the trustee or trustees under any indenture under which any instruments evidencing an amount of the Senior Indebtedness remaining unpaid until all such Senior Indebtedness shall have been paid in full, after giving effect to any concurrent payment of distribution to the holders of such Senior Indebtedness.

The fact that any payment hereunder is prohibited by this Section 3.5 shall not prevent the failure to make such payment from being an Event of Default hereunder.

3.6 Payment on Series 1 Shares Permitted

Nothing contained in this Article 3 or elsewhere in this Guarantee, or in any of the Series 1 Shares, shall affect the obligation of the Guarantor to make, or prevent the Guarantor from making, at any time except during the pendency of any dissolution, winding up or liquidation of the Guarantor or reorganization proceedings specified in Section 3.2 affecting the affairs of the Guarantor, any payment on account of the Preferred Share Obligations, except that the Guarantor shall not make any such payment other than as contemplated by this Article 3, if it is in default in payment of any Senior Indebtedness. The fact that any such payment is prohibited by this Section 3.6 shall not prevent the failure to make such payment from being an Event of Default hereunder. Nothing contained in this Article 3 or elsewhere in this Guarantee, or in any of the Series 1 Shares, shall prevent the application by the Trustee of any moneys deposited with the Trustee hereunder for the purpose so deposited, to the payment of or on account of the Preferred Share Obligations unless and until the Trustee shall have received written notice from the Guarantor or from the holder of Senior Indebtedness or from the representative of any such holder of default with respect to any Senior Indebtedness permitting the holders thereof to accelerate the maturity thereof.

3.7 Confirmation of Subordination

As a condition to the benefits conferred hereby on each Holder of Series 1 Shares, each such Holder by his acceptance thereof authorizes and directs the Trustee on the Holder's behalf to take such action as may be necessary or appropriate to effectuate the subordination as provided in this Article 3 and appoints the Trustee as the Holder's attorney-in-fact for any and all such purposes. Upon request of the Guarantor, and upon being furnished an Officers' Certificate stating that one or more named persons are holders of Senior Indebtedness, or the representative or representatives of such holders, or the trustee or trustees under which any instrument evidencing such Senior Indebtedness may have been issued, and specifying the amount and nature of such Senior Indebtedness, the Trustee shall enter into a written agreement or agreements with the Guarantor and the person or persons named in such Officers' Certificate providing that such person or persons are entitled to all the rights and benefits of this Article 3 as the holder or holders, representative or representatives, or trustee or trustees of the Senior Indebtedness specified in such Officers' Certificate and in such agreement. Such agreement shall be conclusive evidence that the indebtedness specified therein is Senior Indebtedness, however, nothing herein shall impair the rights of any holder of Senior Indebtedness who has not entered into such an agreement.

The Trustee is entitled to all the rights set forth in this Article 3 with respect to any Senior Indebtedness at the time held by it, to the same extent as any other holder of Senior Indebtedness, and nothing in this Guarantee deprives the Trustee of any of its rights as such holder.

3.9 Rights of Holders of Senior Indebtedness Not Impaired

No right of any present or future holder of any Senior Indebtedness to enforce the subordination herein will at any time or in any way be prejudiced or impaired by any act or failure to act on the part of the Guarantor or by any non-compliance by the Guarantor with the terms, provisions and covenants of this Guarantee, regardless of any knowledge thereof which any such holder may have or be otherwise charged with.

3.10 Altering the Senior Indebtedness

Nothing herein contained shall be deemed to authorize the Trustee to authorize or consent to or accept or adopt on behalf of any Holder any plan of reorganization, arrangement, adjustment or composition affecting the Series 1 Shares or the rights of any Holder thereof or to authorize the Trustee to vote in respect of the claim of any Holder in any such proceeding.

4.4 Trustee May Enforce Claims Without Possession of Series 1 Shares

4.8 Rights and Remedies Cumulative

No right or remedy herein conferred upon or reserved to the Trustee or to the Holders of Series 1 Shares is intended to be exclusive of any other right or remedy, and every right and remedy shall, to the extent permitted by law, be cumulative and in addition to every other right and remedy given hereunder or now or hereafter existing at law or in equity or otherwise. The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent assertion or employment of any other appropriate right or remedy.

4.9 Delay or Omission Not Waiver

No delay or omission of the Trustee or of any Holder of any Series 1 Shares to exercise any right or remedy accruing upon an Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. Every right and remedy given by this Article or by law to the Trustee or to the Holders may be exercised from time to time, and as often as may be deemed expedient, by the Trustee or by the Holders, as the case may be.

The Guarantor covenants (to the extent that it may lawfully do so) that it will not at any time insist upon or plead, or in any manner whatsoever claim or take the benefit or advantage of, any stay or extension law wherever enacted, now or at any time hereafter in force, which may affect the covenants or the performance of this Guarantee, and the Guarantor (to the extent that it may lawfully do so) hereby expressly waives all benefit or advantage of any such law and covenants that it will not hinder, delay or impede the execution of any power herein granted to the Trustee, but will suffer and permit the execution of every such power as though no such law had been enacted.

4.12 Undertaking for Costs

All parties to this Guarantee agree, and each Holder of any Series 1 Shares by acceptance thereof and by acceptance of the benefits hereof shall be deemed to have agreed, that any court may in its discretion require, in any suit for the enforcement of any right or remedy under this Guarantee, or in any suit against the Trustee for any action taken, suffered or omitted by it as Trustee, the filing by any party litigant in such suit of an undertaking to pay the costs of such suit and that such court may in its discretion assess reasonable costs, including reasonable lawyers' fees, against any party litigant in such suit, having due regard to the merits and good faith of the claims or defenses made by such party litigant; but the provisions of this Section shall not apply to (i) any suit instituted by the Guarantor, (ii) any suit instituted by the Trustee, (iii) any suit instituted by any Holder, or group of Holders, holding in the aggregate more than 25% of the aggregate Liquidation Amount of all of the then

(b)

The Trustee, in exercising its powers and discharging its duties prescribed or conferred by this Guarantee, shall

(i)

act honestly and in good faith with a view to the best interests of the Holders of the Series 1 Shares, and

(ii)

exercise that degree of care, diligence and skill a reasonably prudent trustee, appointed in respect of a guarantee indenture would exercise in comparable circumstances.

(c)

In the absence of bad faith on its part, the Trustee, in the exercise of its rights and duties hereunder, may conclusively act and rely, as to the truth of the statements and the correctness of the opinions expressed therein, upon certificates, opinions or other evidence furnished to the Trustee and conforming to the requirements of this Guarantee. The Trustee shall not be liable for or by reason of any statements of fact or recitals in this Guarantee or be required to verify the same, but all such statements or recitals are and shall be deemed to be made by the Guarantor (or by its agents). The Trustee shall not in any way be responsible for the consequence of any breach on the part of the Guarantor (or by its agents) of any of the Guarantor's covenants herein.

(d)

No provision of this Guarantee shall be construed to relieve the Trustee from the duties imposed on it in Section 5.1(b) or from liability for its own gross negligence or its own wilful misconduct, except that:

(i)

this Section 5.1(d) shall not be construed to limit the effect of Section 5.1(a) and (b);

(ii)

the Trustee shall not be liable for any error of judgment made in good faith by a Responsible Officer, unless it shall be proved that the Trustee was grossly negligent in ascertaining the pertinent facts;

(iii)

(iv)

no provision of this Guarantee shall require the Trustee to expend or risk its own funds or otherwise incur any personal financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers except as herein expressly provided.

(e)

Whether or not herein expressly so provided, every provision of this Guarantee relating to the conduct or affecting the liability of or affording protection to the Trustee shall be subject to the provisions of this Section.

Subject to applicable law, the Trustee or any other agent of the Guarantor, in its individual or in any other capacity, may become the owner or pledgee of the Series 1 Shares and, subject to Section 5.8, may otherwise deal with the Guarantor with the same rights it would have if it were not the Trustee, and without being liable to account for any profit made thereby.

5.7 Moneys Held in Trust

Any money held by the Trustee, which under the trusts of this Guarantee may be invested, shall be invested and reinvested by the Trustee, in accordance with Schedule A hereto. Pending such investment, such money shall be placed by the Trustee on deposit at interest at the then current rate in a Canadian chartered bank or trust company.

5.8 Conflict of Interest

(a)

The Trustee represents to the Guarantor that at the time of the execution and delivery hereof no material conflict of interest exists in respect of the Trustee's role as a fiduciary hereunder and agrees that in the event of a material conflict of interest arising hereafter it will, within 90 days after becoming aware that a material conflict of interest exists, either eliminate the same or resign its trust hereunder.

(b)

If, notwithstanding Section 5.8(a), the Trustee has a material conflict of interest, the validity and enforceability of this Guarantee shall not be affected in any manner whatsoever by reason only of the existence of such material conflict of interest.

(c)

If the Trustee contravenes Section 5.8(a), the Guarantor or the Holders representing not less than 25% of the aggregate Liquidation Amount of all of the then outstanding Series 1 Shares affected thereby may apply to the Court of Queen's Bench of Alberta for an order that the Trustee be replaced, and such court may make an order on such terms as it thinks fit.

5.9 Corporate Trustee Required; Eligibility

There shall at all times be a Trustee hereunder which shall be a corporation resident or authorized to carry on the business of a trust company in the Province of Alberta. (d)

If any time:

(i)

If the Trustee shall resign, be removed or become incapable of acting or if a vacancy shall occur in the office of the Trustee for any reason, the Guarantor, by a Board Resolution, shall promptly appoint a successor Trustee or Trustees and shall comply with the applicable requirements of Section 5.11. If, within one year after such resignation, removal or incapability or the occurrence of such vacancy, a successor Trustee shall be appointed by Act of the Holders representing a majority of the aggregate Liquidation Amount of all of the then outstanding Series 1 Shares delivered to the Guarantor and the retiring Trustee, the successor Trustee so appointed shall, forthwith upon its acceptance of such appointment in accordance with the applicable requirements of Section 5.11, become the successor Trustee and to that extent supersede the successor Trustee appointed by the Guarantor. If no successor Trustee shall have been so appointed by the Guarantor or the Holders and such appointment accepted in the manner required by Section 5.11, the Trustee (at the Guarantor's expense) or any Holder who has been a *bona fide* Holder of the Series 1 Shares may, on behalf of such Holder and all other Holders, apply to the Court of Queen's Bench of Alberta for any order for the appointment of a successor Trustee.

(f)

The Guarantor shall give notice of each resignation and each removal of the Trustee and each appointment of a successor Trustee to the Holders thereof by mailing such notice to such Holders at their addresses as they shall appear on the list of Holders as provided by the Corporation to the Guarantor. (b)

(c)

Upon request of any such successor Trustee, the Guarantor shall execute any and all instruments for more fully and certainly vesting in and confirming to such successor Trustee all rights, power and trusts referred to in subsection (a) or (b) of this Section, as the case may be.

(d)

No successor Trustee shall accept its appointment unless at the time of such acceptance such successor Trustee shall be qualified and eligible under this Article.

5.12 Merger, Consolidation, Amalgamation or Succession to Business

5.13 Not Bound to Act

The Trustee shall retain the right not to act and shall not be liable for refusing to act if, due to a lack of information or for any other reason whatsoever, the Trustee, in its sole judgment, determines that such act might cause it to be in non-compliance with any applicable anti-money laundering or anti-terrorist legislation, regulation or guideline. Further, should the Trustee, in its sole judgment, determine at any time that its acting under this Guarantee has resulted in its being in non-compliance with any applicable anti-money laundering, or anti-terrorist legislation, regulation or guideline, then it shall have the right to resign on 10 days written notice to the Guarantor, provided that (i) the Trustee's

written notice shall describe the circumstances of such non-compliance; and (ii) if such circumstances are rectified to the Trustee's satisfaction, acting reasonably, within such 10 day period, then such resignation shall not be effective.

The parties acknowledge that federal and/or provincial legislation that addresses the protection of individuals' personal information (collectively, "**Privacy Laws**") applies to obligations and activities under this Guarantee. Despite any other provision of this Guarantee, no party shall take or direct any action that would contravene, or cause the other to contravene, applicable Privacy Laws. The Guarantor shall, prior to transferring or causing to be transferred personal information to the Trustee, obtain and retain required consents of the relevant individuals to the collection, use and disclosure of their personal information, or shall have determined that such consents either have previously been given upon which the parties can rely or are not required under the Privacy Laws. GUARANTEE

2.1 Guarantee

The Guarantor irrevocably and unconditionally guarantees in favour of the Holders the due and punctual payment of the Preferred Share Obligations (without duplication of amounts theretofore paid by or on behalf of the Corporation), regardless of any defense (except for the defense of payment by the Corporation), right of setoff or counterclaim which the Guarantor may have or assert. The Guarantor's obligation to pay a Preferred Share Obligation may be satisfied by (i) direct payment to the Holders or (ii) payment to the Holders through the facilities of the Security Trustee. The Guarantor shall give prompt written notice to the Security Trustee in the event it makes a direct payment to the Holders hereunder.

2.2 Waiver of Notice

The Guarantor hereby waives notice of acceptance of this Guarantee.

2.3 Guarantee Absolute

The Guarantor guarantees that the Preferred Share Obligations will be paid strictly in accordance with the terms of the Series 2 Shares and this Guarantee within the time required by Section 2.1 regardless of any law, regulation or order now or hereafter in effect in any jurisdiction affecting any such terms or the rights of the Holders with respect thereto. The liability of the Guarantor under this Guarantee shall be absolute and unconditional irrespective of:

(a) any sale, transfer or assignment by any Holder of any Series 2 Shares or any right, title, benefit or interest of such Holder therein or thereto;

(b) any amendment or change in or to, or any waiver of, any of the terms of the Series 2 Shares;

(c) any change in the name, objects, constitution, capacity, capital or the constating documents of the Guarantor;

(d) any change in the name, objects, constitution, capacity, capital or the constating documents of the Corporation;

(e) any partial payment by the Corporation, or any release or waiver, by operation of law or otherwise, of the performance or observance by the Corporation of any express or implied agreement, covenant, term or condition relating to the Series 2 Shares to be performed or observed by the Corporation;

(f) the extension of time for the payment by the Corporation of all or any portion of the Preferred Share Obligations or the extension of time for the performance of any other obligation under, arising out of, or in connection with, the Series 2 Shares;

(g) any failure, omission, delay or lack of diligence on the part of the Holders to enforce, assert or exercise any right, privilege, power or remedy conferred on the Holders pursuant to the terms of the Series 2 Shares, or any action on the part of the Corporation granting indulgence or extension of any kind;

(h) the recovery of any judgment against the Corporation, any voluntary or involuntary liquidation, dissolution, sale of any collateral, winding up, merger or amalgamation of the Corporation or the Guarantor, any sale or other disposition of all or substantially all of the assets of the Corporation, or any judicial or extra-judicial receivership, insolvency, bankruptcy, assignment for the benefit of, or proposal to, creditors, reorganization, moratorium, arrangement, composition with creditors, or readjustment of debt of, or other proceedings

affecting the Corporation, the Guarantor or any of the assets of the Corporation or the Guarantor;

(i) any circumstance, act or omission that would prevent subrogation operating in favour of the Guarantor;

(j) any invalidity of, or defect or deficiency in, the Series 2 Shares or this Guarantee;

(k) the settlement or compromise of any obligation guaranteed hereby or hereby incurred; or

(l) any other circumstance, act or omission that might otherwise constitute a defence available to, or a discharge of, the Corporation in respect of any of the Preferred Share Obligations, or the Guarantor in respect of any of the Preferred Share Obligations (other than, and to the extent of, the payment or satisfaction thereof);

it being the intent of the Guarantor that its obligations in respect of Preferred Share Obligations shall be absolute and unconditional under all circumstances and shall not be discharged except by payment in full of the Preferred Share Obligations. The Holders shall not be bound or obliged to exhaust their recourse against the Corporation or any other persons or to take any other action before being entitled to demand payment from the Guarantor hereunder.

There shall be no obligation of the Holders to give notice to, or obtain the consent of, the Guarantor with respect to the happening of any of the foregoing.

2.4 Continuing Guarantee

This Guarantee shall apply to and secure any ultimate balance due or remaining due to the Holders in respect of the Preferred Share Obligations and shall be binding as an absolute and continuing obligation of the Guarantor. This Guarantee shall continue to be effective or be reinstated, as the case may be, if at any time payment of any of the Preferred Share Obligations must or may be rescinded, is declared or may become voidable, or must or may otherwise be returned by the Holders for any reason, including the insolvency, bankruptcy, dissolution or reorganization of the Corporation or upon or as a result of the appointment of a custodian, receiver, trustee or other officer with similar powers with respect to the Corporation or any substantial part of its property, all as though such payment had not been made. If at any time the Corporation is precluded from making payment when due in respect of any Preferred Share Obligations by reason of the provisions of the ABCA or otherwise, such amounts shall nonetheless be deemed to be due and payable by the Corporation to the Holders for all purposes of this Guarantee and the Preferred Share Obligations shall be immediately due and payable to the Holders. This is a guarantee of payment, and not merely a deficiency or collection guarantee.

2.5 Rights of Holders

The Guarantor expressly acknowledges that: (i) this Guarantee will be deposited with the Security Trustee to be held for the benefit of the Holders; and (ii) the Security Trustee has the right to enforce this Guarantee on behalf of the Holders.

2.6 Guarantee of Payment

If the Corporation shall fail to pay any of the Preferred Share Obligations when due, the Guarantor shall pay to the Holders the Preferred Share Obligations immediately after demand made in writing by one or more Holders or the Security Trustee, but in any event within 15 days of any failure by the Corporation to pay the Preferred Share Obligations when due, without any evidence that the Holders or the Security Trustee have demanded that the Corporation or the Guarantor pay any of the Preferred Share Obligations or that the Corporation has failed to do so.

2.7 Subrogation

The Guarantor shall have no right of subrogation in respect of any payment made to the Holders hereunder until such time as the Preferred Share Obligations have been fully satisfied. In the case of the liquidation, dissolution, winding-up or bankruptcy of the Corporation (whether voluntary or involuntary), or if the Corporation makes an arrangement or compromise or proposal with its creditors, the Holders shall have the right to rank for their full claim and to receive all dividends or other payments in respect thereof until their claims have been paid in full, and the Guarantor shall continue to be liable to the Holders for any balance which may be owing to the Holders by the Corporation. The Preferred Share Obligations shall not, however, be released, discharged, limited or affected by the failure or omission of the Holders to prove the whole or part of any claim against the Corporation. If any amount is paid to the Guarantor on account of any subrogation arising hereunder at any time when the Preferred Share Obligations have not been fully satisfied, such amount shall be held in trust for the benefit of the Holders and shall forthwith be paid to the Holders to be credited and applied against the Preferred Share Obligations.

2.8 Independent Obligations

The Guarantor acknowledges that its obligations hereunder are independent of the obligations of the Corporation with respect to the Series 2 Shares and that the Guarantor shall be liable as principal and as debtor hereunder to make payment of the Preferred Share Obligations pursuant to the terms of this Guarantee notwithstanding the occurrence of any event referred to in subsections (a) through (l), inclusive, of Section 2.3, if the Holders should make a demand upon the Guarantor. The Guarantor will pay the Preferred Share Obligations without regard to any equities between it and the Corporation or any defence or right of set-off, compensation, abatement, combination of accounts or cross-claim that it or the Corporation may have.

2.9 Guarantor to Investigate Financial Condition of the Corporation

The Guarantor acknowledges that it has fully informed itself about the financial condition of the Corporation. Subject to the payment in full of all Senior Indebtedness, the Holders of the Series 2 Shares shall be subrogated to the rights of the holders of Senior Indebtedness to receive payments or distributions of assets of the Guarantor (to the extent of the application thereto of such payments or other assets which would have been received by the Holders of the Series 2 Shares but for the provisions hereof) until the Preferred Share Obligations shall be paid in full, and no such payments or distributions to the Holders of the Series 2 Shares of cash, property or securities, which otherwise would be payable or distributable to the holders of the Senior Indebtedness, shall, as between the Guarantor, its creditors (other than the holders of Senior Indebtedness), and the Holders of Series 2 Shares, be deemed to be a payment by the Guarantor to the holders of the Senior Indebtedness or on account of the Senior Indebtedness, it being understood that the provisions of this Article 3 are and are intended solely for the purpose of defining the relative rights of the Holders of the Series 2 Shares, on the one hand, and the holders of Senior Indebtedness, on the other hand.

3.4 Pari Passu Ranking

Notwithstanding anything herein contained to the contrary, the obligations of the Guarantor hereunder rank on a pro rata and *pari passu* basis with the obligations of the Guarantor under the Guarantee Indenture dated , 2011 among the Guarantor, the Corporation and CIBC Mellon Trust Company relating to the 4.85% cumulative redeemable preferred shares, Series 1 of the Corporation and with any other obligations of the Guarantor in respect of similar guarantees that may be provided by the Guarantor in respect of other series of cumulative redeemable preferred shares of the Corporation (collectively, the "**Guaranteed Obligations**"), including, without limitation, the guarantee provided by the Guarantor in respect of the Series 3 Shares.

3.7 Payment on Series 2 Shares Permitted

Nothing contained in this Article 3 or elsewhere in this Guarantee, or in any of the Series 2 Shares, shall affect the obligation of the Guarantor to make, or prevent the Guarantor from making, at any time except during the pendency of any dissolution, winding up or liquidation of the Guarantor or reorganization proceedings specified in Section 3.2 affecting the affairs of the Guarantor, any payment on account of the Preferred Share Obligations, except that the Guarantor shall not make any such payment other than as contemplated by this Article 3, if it is in default in payment of any Senior Indebtedness. The fact that any such payment is prohibited by this Section 3.6 shall not prevent the failure to make such payment from being an Event of Default hereunder. Nothing contained in this Article 3 or elsewhere in this Guarantee, or in any of the Series 2 Shares, shall prevent the application by the Security Trustee of any moneys deposited with the Security Trustee hereunder for the purpose so deposited, to the payment of or on account of the Preferred Share Obligations unless and until the Security Trustee shall have received written notice from the Guarantor or from the holder of Senior Indebtedness or from the representative of any such holder of default with respect to any Senior Indebtedness permitting the holders thereof to accelerate the maturity thereof.

4.9 Delay or Omission Not Waiver

No delay or omission of the Security Trustee or of any Holder of any Series 2 Shares to exercise any right or remedy accruing upon an Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. THE SECURITY TRUSTEE

5.1 Certain Duties and Responsibilities

(a)

The Security Trustee undertakes to perform such duties and only such duties as are specifically set forth in this Guarantee, and no implied covenants or obligations shall be read into this Guarantee against the Security Trustee.

(b)

The Security Trustee, in exercising its powers and discharging its duties prescribed or conferred by this Guarantee, shall

(i)

act honestly and in good faith with a view to the best interests of the Holders of the Series 2 Shares, and

(ii)

exercise that degree of care, diligence and skill a reasonably prudent trustee, appointed in respect of a guarantee indenture would exercise in comparable circumstances.

(c)

In the absence of bad faith on its part, the Security Trustee, in the exercise of its rights and duties hereunder, may conclusively act and rely, as to the truth of the statements and the correctness of the opinions expressed therein, upon certificates, opinions or other evidence furnished to the Security Trustee and conforming to the requirements of this Guarantee. The Security Trustee shall not be liable for or by reason of any statements of fact or recitals in this Guarantee or be required to verify the same, but all such statements or recitals are and shall be deemed to be made by the Guarantor (or by its agents). The Security Trustee shall not in any way be responsible for the consequence of any breach on the part of the Guarantor (or by its agents) of any of the Guarantor's covenants herein.

(d)

No provision of this Guarantee shall be construed to relieve the Security Trustee from the duties imposed on it in Section 5.1(b) or from liability for its own gross negligence or its own wilful misconduct, except that:

(i)

this Section 5.1(d) shall not be construed to limit the effect of Section 5.1(a) and (b);

(ii)

the Security Trustee shall not be liable for any error of judgment made in good faith by a Responsible Officer, unless it shall be proved that the Security Trustee was grossly negligent in ascertaining the pertinent facts;

(iii)

Table of Contents

(iv) no provision of this Guarantee shall require the Security Trustee to expend or risk its own funds or otherwise incur any personal financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers except as herein expressly provided.

(e) Whether or not herein expressly so provided, every provision of this Guarantee relating to the conduct or affecting the liability of or affording protection to the Security Trustee shall be subject to the provisions of this Section.

5.2 Certain Rights of Security Trustee

Subject to the provisions of Section 5.1:

(a) the Security Trustee may rely absolutely and shall be protected in acting or refraining from acting upon any resolution, Officers' Certificate or other certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties;

(b) any order, request or direction of the Guarantor mentioned herein shall be sufficiently evidenced by a Guarantor Request or Guarantor Order and any resolution of the Board of Directors shall be sufficiently evidenced by a Board Resolution;

(c) whenever in the administration of this Guarantee the Security Trustee shall deem it desirable that a matter be proved or established prior to taking, suffering or omitting any action hereunder, the Security Trustee (unless other evidence be herein specifically prescribed) may act and rely upon an Officers' Certificate (i) as evidence of the truth of any statements of fact, and (ii) to the effect that any particular dealing or transaction or step or thing is, in the opinion of the officers so certifying, expedient, as evidence that it is expedient; provided that the Security Trustee may in its sole discretion, acting reasonably, require from the Guarantor or otherwise further evidence or information before acting or relying on such certificate;

(d) the Security Trustee may employ or retain such agents, counsel and other assistants as it may reasonably require for the proper determination and discharge of its duties hereunder and shall be entitled to receive reasonable remuneration for all services performed by it and compensation for all disbursements, costs and expenses made or incurred by it in the discharge of its duties hereunder and shall not be responsible for any misconduct on the part of any of them, any such costs and expenses which shall immediately become and form part of the Security Trustee's fees hereunder.

(e) the Security Trustee may, in relation to this Guarantee, act on the opinion or advice of or on information obtained from any counsel, notary, valuer, surveyor, engineer, broker, auctioneer, accountant or other expert, whether retained by the Security Trustee or by the Guarantor or otherwise;

(f) the Security Trustee may consult with counsel and the written advice of such counsel or any Opinion of Counsel shall be full and complete authorization and protection in respect of any action taken, suffered or omitted by it hereunder in reliance thereon;

(g) the Security Trustee shall be under no obligation to exercise any of the rights or powers vested in it by this Guarantee at the request or direction of any of the Holders pursuant to this Guarantee, unless such Holders shall have furnished to the Security Trustee reasonable funding and a reasonable indemnity, satisfactory to the Security Trustee, to protect and hold harmless the Security Trustee against the costs, expenses and liabilities which might be incurred by it in compliance with such request or direction and/or damage it may suffer by reason thereof as a condition to the commencement or continuation of such act, action or

proceeding. The Security Trustee may, before commencing or at any time during the continuance of any such act, action or proceeding require the Holders at whose instance it is acting, to deposit with the Security Trustee the share certificates held by them respecting the Series 2 Shares for which such share certificates the Security Trustee shall issue receipts;

(h)

the Security Trustee shall not be required to take notice of any default under this Guarantee, other than payment of any moneys required by any provision of this Guarantee to be paid to it, unless and until notified in writing of such default, which notice shall clearly set out the nature of the default desired to be brought to the attention of the Security Trustee;

(i)

prior to the occurrence of an Event of Default under this Guarantee and after the curing of any such Event of Default which may have occurred, the Security Trustee shall not be bound to make any investigation into the facts or matters stated in any resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, or other paper or document or any investigation of the books and records of the Guarantor (but the Security Trustee, in its discretion, may make such further inquiry or investigation into such facts or matters as it may see fit, and, if the Security Trustee shall determine to make such further inquiry or investigation, it shall be entitled to examine the books, records and premises of the Guarantor, personally or by agent or attorney), unless requested to do so by the Act of the Holders representing a majority of the aggregate Liquidation Amount of all of the then outstanding Series 2 Shares; provided, however, that the Security Trustee may require reasonable indemnity against the costs, expenses or liabilities likely to be incurred by it in the making of such investigation; and

(j)

the Security Trustee may execute any of the trusts or powers hereunder or perform any duties hereunder either directly or by or through agents or attorneys, and the Security Trustee shall not be responsible for any misconduct or negligence on the part of any agent or attorney appointed with due care by it hereunder. Any solicitors employed or consulted by the Security Trustee as counsel may, but need not be solicitors for the Guarantor.

5.3 Protection of Security Trustee

By way of supplement to the provisions of any law for the time being relating to trustees, it is expressly declared and agreed as follows:

(a)

the recitals contained herein, shall be taken as the statements of the Guarantor, and the Security Trustee shall not be liable for or assume any responsibility for their correctness;

(b)

the Security Trustee makes no representations as to, and shall not be liable for, the validity or sufficiency of this Guarantee;

(c)

nothing herein contained shall impose any obligation on the Security Trustee to see or to require evidence of registration or filing (or renewals thereof) of this Guarantee or any instrument ancillary or supplemental hereto;

(d)

the Security Trustee shall not be bound to give any notice of the execution hereof,

(e)

the Security Trustee shall not incur any liability or responsibility whatever or be in any way responsible for the consequence of any breach on the part of the Guarantor of any of the covenants herein contained or of any act of the agents or servants of the Guarantor; and

(f)

the Guarantor shall indemnify the Security Trustee (including its directors, officers, employees, representatives and agents) for, and hold it harmless against, any loss, liability or expense incurred without negligence or bad faith on its part, arising out of or in connection with the acceptance or administration of the trust or trusts hereunder, including the costs and expenses of defending itself against any claim or liability in connection with the exercise or performance

of any of its powers or duties hereunder. This indemnity will survive the termination or discharge of this Guarantee and the resignation or removal of the Security Trustee.

5.4 Security Trustee Not Required to Give Security

The Security Trustee shall not be required to give security for the execution of the trusts or its conduct or administration hereunder.

5.5 No Person Dealing with Security Trustee Need Enquire

No person dealing with the Security Trustee shall be concerned to enquire whether the powers that the Security Trustee is purporting to exercise have become exercisable, or whether any money remains due upon the Series 2 Shares or to see to the application of any money paid to the Security Trustee.

5.6 May Hold Series 2 Shares

Subject to applicable law, the Security Trustee or any other agent of the Guarantor, in its individual or in any other capacity, may become the owner or pledgee of the Series 2 Shares and, subject to Section 5.8, may otherwise deal with the Guarantor with the same rights it would have if it were not the Security Trustee, and without being liable to account for any profit made thereby.

5.7 Moneys Held in Trust

(a)

Any money held by the Security Trustee, which under the trusts of this Guarantee may be invested, shall be invested and reinvested by the Security Trustee, in accordance with Schedule A hereto.

(b)

Pending such investment, such money shall be placed by the Security Trustee on deposit in an account with a Canadian chartered bank bearing interest at the then current rate.

5.8 Conflict of Interest

(a)

The Security Trustee represents to the Guarantor that at the time of the execution and delivery hereof no material conflict of interest exists in respect of the Security Trustee's role as a fiduciary hereunder and agrees that in the event of a material conflict of interest arising hereafter it will, within 90 days after becoming aware that a material conflict of interest exists, either eliminate the same or resign its trust hereunder.

(b)

If, notwithstanding Section 5.8(a), the Security Trustee has a material conflict of interest, the validity and enforceability of this Guarantee shall not be affected in any manner whatsoever by reason only of the existence of such material conflict of interest.

(c)

If the Security Trustee contravenes Section 5.8(a), the Guarantor or the Holders representing not less than 25% of the aggregate Liquidation Amount of all of the then outstanding Series 2 Shares affected thereby may apply to the Court of Queen's Bench of Alberta for an order that the Security Trustee be replaced, and such court may make an order on such terms as it thinks fit.

5.9 Corporate Security Trustee Required; Eligibility

There shall at all times be a Security Trustee hereunder which shall be a corporation resident or authorized to carry on the business of a trust company in the Province of Alberta. Neither the Guarantor nor any affiliate of the Guarantor shall serve as Security Trustee. If at any time the Security Trustee shall cease to be eligible in accordance with the provisions of this Section, the Security Trustee shall resign immediately in the manner and with the effect hereinafter specified in this Article.

(a)

Notwithstanding any other provisions hereof, no resignation or removal of the Security Trustee and no appointment of a successor Trustee pursuant to this Article shall become effective until the acceptance of appointment by the successor Trustee in accordance with the applicable requirements of Section 5.11.

(b)

The Security Trustee may resign its trust and be discharged from all further duties and liabilities hereunder at any time with respect to the Guarantee by giving to the Guarantor two months' notice in writing or such shorter notice as the Guarantor may accept as sufficient. If the instrument of acceptance by a successor Trustee required by Section 5.11 shall not have been delivered to the Security Trustee within 60 days after the giving of such notice of resignation, the resigning Trustee may apply to the Court of Queen's Bench of Alberta for an order for the appointment of a successor Trustee with respect to the Guarantee.

(c)

The Security Trustee may be removed at any time by the Guarantor, except during an Event of Default.

(d)

If any time:

(i)

the Security Trustee shall fail to comply with Section 5.8(a); or

(ii)

the Security Trustee shall cease to be eligible under Section 5.9 and shall fail to resign after written request to do so by the Guarantor; or

(iii)

the Security Trustee shall be dissolved, shall become incapable of acting or shall become or be adjudged a bankrupt or insolvent or a receiver of the Security Trustee or of its property shall be appointed or any public officer shall take charge or control of the Security Trustee or of its property or affairs for the purpose of rehabilitation, conservation or liquidation,

(e)

If the Security Trustee shall resign, be removed or become incapable of acting or if a vacancy shall occur in the office of the Security Trustee for any other reason, the Guarantor, by a Board Resolution, shall promptly appoint a successor Trustee or Trustees and shall comply with the applicable requirements of Section 5.11. If, within one year after such resignation, removal or incapability or the occurrence of such vacancy, a successor Trustee shall be appointed by Act of the Holders representing a majority of the aggregate Liquidation Amount of all of the then outstanding Series 2 Shares delivered to the Guarantor and the retiring Trustee, the successor Trustee so appointed by the Holders shall, forthwith upon its acceptance of such appointment in accordance with the applicable requirements of Section 5.11, become the successor Trustee and to that extent supersede the successor Trustee appointed by the Guarantor. If no successor Trustee shall have been so appointed by the Guarantor or the Holders and such appointment accepted in the manner required by Section 5.11, the Security Trustee (at the Guarantor's expense) or any Holder who has been a *bona fide* Holder of the Series 2 Shares may, on behalf of such Holder and all other Holders, apply to the Court of Queen's Bench of Alberta for any order for the appointment of a successor Trustee.

(f)

The Guarantor shall give notice of each resignation and each removal of the Security Trustee and each appointment of a successor Trustee to the Holders by mailing such notice to such Holders at their addresses as they shall appear on the list of Holders as provided by the Corporation to the Guarantor. If the Guarantor shall fail to give such notice within 10 days after acceptance of appointment by the successor Trustee, the successor Trustee shall cause

5.11 Acceptance of Appointment by Successor

(a)

In case of the appointment hereunder of a successor Trustee, each successor Trustee so appointed shall execute, acknowledge and deliver to the Guarantor and to the retiring Trustee an instrument accepting such appointment, and thereupon the resignation or removal of the retiring Trustee shall become effective and such successor Trustee, without any further act, deed or conveyance (but subject to Section 5.11(b)), shall become vested with all the rights, powers, trusts and duties of the retiring Trustee; but, on the request of the Guarantor or the successor Trustee, such retiring Trustee shall, upon payment of its fees and expenses then unpaid, execute, acknowledge and deliver an instrument transferring to such successor Trustee all such rights, powers and trusts of the retiring Trustee and shall duly assign, transfer and deliver to such successor Trustee all property and money, if any, held by such retiring Trustee hereunder.

(b)

In case of the appointment hereunder of a successor Trustee, the Guarantor, the retiring Trustee and such successor Trustee shall execute, acknowledge and deliver an indenture supplemental hereto in which each successor Trustee shall accept such appointment and which shall (i) contain such provisions as shall be deemed necessary or desirable to transfer and confirm to, and to vest in, such successor Trustee all the rights, powers, trusts and duties of the retiring Trustee to which the appointment of such successor Trustee relates, (ii) add to or change any of the provisions of this Guarantee to the extent necessary to provide for or facilitate the administration of the trusts hereunder by more than one Trustee, it being understood that nothing herein or in such supplemental indenture (except as specifically provided for therein) shall constitute such Trustees co-trustees of the same trust and that each such Trustee shall be trustee of a trust or trusts hereunder separate and apart from any trust or trusts hereunder administered by any other such Trustee; and upon the execution and delivery of such supplemental indenture, the resignation or removal of the retiring Trustee shall become effective to the extent provided therein, and each such successor Trustee, without any further act, deed or conveyance, shall become vested with all the rights, powers, trusts and duties of the retiring Trustee with respect to the Guarantee to which the appointment of such successor Trustee relates, and such retiring Trustee shall duly assign, transfer and deliver to each successor Trustee all property and money held, if any, by such retiring Trustee hereunder which the appointment of such successor Trustee relates.

(c)

Upon request of any such successor Trustee, the Guarantor shall execute any and all instruments for more fully and certainly vesting in and confirming to such successor Trustee all rights, power and trusts referred to in subsection (a) or (b) of this Section, as the case may be.

(d)

No successor Trustee shall accept its appointment unless at the time of such acceptance such successor Trustee shall be qualified and eligible under this Article.

5.12 Merger, Consolidation, Amalgamation or Succession to Business

Any corporation into which the Security Trustee may be merged or with which it may be consolidated or amalgamated, or any corporation resulting from any merger, consolidation or amalgamation to which the Security Trustee shall be a party, or any corporation succeeding to all or substantially all of the corporate trust business of the Security Trustee, shall be the successor of the Security Trustee hereunder, provided such corporation shall be otherwise qualified and eligible under this Article, without the execution or filing of any paper or instrument or any further act on the part of any of the parties hereto.

5.13 Not Bound to Act

The Security Trustee shall retain the right not to act and shall not be liable for refusing to act if, due to a lack of information or for any other reason whatsoever, the Security Trustee, in its sole judgment, determines that such act might cause it to be in non-compliance with any applicable anti-money laundering or anti-terrorist legislation, regulation or guideline. Further, should the Security Trustee, in its sole judgment, determine at any time that its acting under this Guarantee has resulted in its being in non-compliance with any applicable anti-money laundering, or anti-terrorist legislation, regulation or guideline, then it shall have the right to resign on 10 days written notice to the Guarantor, provided that (i) the Security Trustee's written notice shall describe the circumstances of such non-compliance; and (ii) if such circumstances are rectified to the Security Trustee's satisfaction, acting reasonably, within such 10 day period, then such resignation shall not be effective.

5.14 Security Trustee's Privacy Clause

The parties acknowledge that federal and/or provincial legislation that addresses the protection of individuals' personal information (collectively, "**Privacy Laws**") applies to obligations and activities under this Guarantee. Despite any other provision of this Guarantee, no party shall take or direct any action that would contravene, or cause the other to contravene, applicable Privacy Laws. The Guarantor shall, prior to transferring or causing to be transferred personal information to the Security Trustee, obtain and retain required consents of the relevant individuals to the collection, use and disclosure of their personal information, or shall have determined that such consents either have previously been given upon which the parties can rely or are not required under the Privacy Laws. The Security Trustee shall use commercially reasonable efforts to ensure that its services hereunder comply with Privacy Laws. Specifically, the Security Trustee agrees: (i) to have a designated chief privacy officer; (ii) to maintain policies and procedures to protect personal information and to receive and respond to any privacy complaint or inquiry; (iii) to use personal information solely for the purposes of providing its services under or ancillary to this Guarantee and not to use it for any other purpose except with the consent of or direction from the Guarantor or the individual involved; (iv) not to sell or otherwise improperly disclose personal information to any third party; and (v) to employ administrative, physical and technological safeguards to reasonably secure and protect personal information against loss, theft, or unauthorized access, use or modification.

5.15 Compensation and Reimbursement

The Guarantor agrees:

(a) to pay to the Security Trustee from time to time reasonable compensation for all services rendered by it hereunder (which compensation shall not be limited by any provision of law in regard to the compensation of a trustee of an express trust); and

(b) except as otherwise expressly provided herein, to reimburse the Security Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Security Trustee in accordance with any, provision of this Guarantee (including the reasonable compensation and the expenses and disbursements of its agents and counsel), except any such expense, disbursement or advance as may be attributable to its negligence or bad faith.

The Security Trustee's remuneration, shall be payable out of any funds coming into the possession of the Security Trustee in priority to any payment of the Preferred Share Obligations. The said remuneration shall continue to be payable whether or not this Guarantee shall be in the course of administration by or under the direction of a court of competent jurisdiction. Any amount due under this Section and unpaid within 30 days after demand for such payment by the Security Trustee, shall bear interest at the then current rate of interest charged by the Security Trustee to its corporate customers. This Section 5.15 shall survive the removal or termination of the Security Trustee and the termination of this Guarantee.

assets of the Corporation, or any judicial or extra-judicial receivership, insolvency, bankruptcy, assignment for the benefit of, or proposal to, creditors, reorganization, moratorium, arrangement, composition with creditors, or readjustment of debt of, or other proceedings affecting the Corporation, the Guarantor or any of the assets of the Corporation or the Guarantor;

it being the intent of the Guarantor that its obligations in respect of Preferred Share Obligations shall be absolute and unconditional under all circumstances and shall not be discharged except by payment in full of the Preferred Share Obligations. The Holders shall not be bound or obliged to exhaust their recourse against the Corporation or any other persons or to take any other action before being entitled to demand payment from the Guarantor hereunder.

There shall be no obligation of the Holders to give notice to, or obtain the consent of, the Guarantor with respect to the happening of any of the foregoing.

2.4 Continuing Guarantee

This Guarantee shall apply to and secure any ultimate balance due or remaining due to the Holders in respect of the Preferred Share Obligations and shall be binding as an absolute and continuing obligation of the Guarantor. This Guarantee shall continue to be effective or be reinstated, as the case may be, if at any time payment of any of the Preferred Share Obligations must or may be rescinded, is declared or may become voidable, or must or may otherwise be returned by the Holders for any reason, including the insolvency, bankruptcy, dissolution or reorganization of the Corporation or upon or as a result of the appointment of a custodian, receiver, trustee or other officer with similar powers with respect to the Corporation or any substantial part of its property, all as though such payment had not been made. If at any time the Corporation is precluded from making payment when due in respect of any Preferred Share Obligations by reason of the provisions of the ABCA or otherwise, such amounts shall nonetheless be deemed to be due and payable by the Corporation to the Holders for all purposes of this Guarantee and the Preferred Share Obligations shall be immediately due and payable to the Holders. This is a guarantee of payment, and not merely a deficiency or collection guarantee.

2.5 Rights of Holders

The Guarantor expressly acknowledges that: (i) this Guarantee will be deposited with the Security Trustee to be held for the benefit of the Holders; and (ii) the Security Trustee has the right to enforce this Guarantee on behalf of the Holders.

2.6 Guarantee of Payment

If the Corporation shall fail to pay any of the Preferred Share Obligations when due, the Guarantor shall pay to the Holders the Preferred Share Obligations immediately after demand made in writing by one or more Holders or the Security Trustee, but in any event within 15 days of any failure by the Corporation to pay the Preferred Share Obligations when due, without any evidence that the Holders or the Security Trustee have demanded that the Corporation or the Guarantor pay any of the Preferred Share Obligations or that the Corporation has failed to do so.

2.7 Subrogation

The Guarantor shall have no right of subrogation in respect of any payment made to the Holders hereunder until such time as the Preferred Share Obligations have been fully satisfied. In the case of the liquidation, dissolution, winding-up or bankruptcy of the Corporation (whether voluntary or involuntary), or if the Corporation makes an arrangement or compromise or proposal with its creditors, the Holders shall have the right to rank for their full claim and to receive all dividends or other payments in respect thereof until their claims have been paid in full, and the Guarantor shall continue to be liable to the Holders for any balance which may be owing to the Holders by the Corporation. The Preferred Share Obligations shall not, however, be released, discharged, limited or affected by the failure or omission of the Holders to prove the whole or part of any claim against the Corporation. If any amount is paid to the Guarantor on account of any subrogation arising hereunder at any time when the Preferred Share Obligations have not been fully satisfied, such amount shall be held in trust for the benefit of the Holders and shall forthwith be paid to the Holders to be credited and applied against the Preferred Share Obligations.

2.8 Independent Obligations

The Guarantor acknowledges that its obligations hereunder are independent of the obligations of the Corporation with respect to the Series 3 Shares and that the Guarantor shall be liable as principal and as debtor hereunder to make payment of the Preferred Share Obligations pursuant to the terms of this Guarantee notwithstanding the occurrence of any event referred to in subsections (a) through (l), inclusive, of Section 2.3, if the Holders should make a demand upon the Guarantor. The Guarantor will pay the Preferred Share Obligations without regard to any equities between it and the Corporation or any defence or right of set-off, compensation, abatement, combination of accounts or cross-claim that it or the Corporation may have.

2.9 Guarantor to Investigate Financial Condition of the Corporation

The Guarantor acknowledges that it has fully informed itself about the financial condition of the Corporation. The Guarantor assumes full responsibility for keeping fully informed of the financial condition of the Corporation and all other circumstances affecting the Corporation's ability to pay the Preferred Share Obligations.

ARTICLE 3

3.3 Subrogation to Rights of Holders of Senior Indebtedness

Subject to the payment in full of all Senior Indebtedness, the Holders of the Series 3 Shares shall be subrogated to the rights of the holders of Senior Indebtedness to receive payments or distributions of assets of the Guarantor (to the extent of the application thereto of such payments or other assets which would have been received by the Holders of the Series 3 Shares but for the provisions hereof) until the Preferred Share Obligations shall be paid in full, and no such payments or distributions to the Holders of the Series 3 Shares of cash, property or securities, which otherwise would be payable or distributable to the holders of the Senior Indebtedness, shall, as between the Guarantor, its creditors (other than the holders of Senior Indebtedness), and the Holders of Series 3 Shares, be deemed to be a payment by the Guarantor to the holders of the Senior Indebtedness or on account of the Senior Indebtedness, it being understood that the provisions of this Article 3 are and are intended solely for the purpose of defining the relative rights of the Holders of the Series 3 Shares, on the one hand, and the holders of Senior Indebtedness, on the other hand.

3.4 Pari Passu Ranking

Notwithstanding anything herein contained to the contrary, the obligations of the Guarantor hereunder rank on a pro rata and *pari passu* basis with the obligations of the Guarantor under the Guarantee Indenture dated , 2011 among the Guarantor, the Corporation and CIBC Mellon Trust Company relating to the 4.85% cumulative redeemable preferred shares, Series 1 of the Corporation and with any other obligations of the Guarantor in respect of similar guarantees that may be provided by the Guarantor in respect of other series of cumulative redeemable preferred shares of the Corporation (collectively, the "**Guaranteed Obligations**"), including, without limitation, the guarantee provided by the Guarantor in respect of the Series 3 Shares.

3.5 Obligation to Pay Not Impaired

Nothing contained in this Article 3 or elsewhere in this Guarantee or in the Series 3 Shares is intended to or shall impair, as between the Guarantor, its creditors (other than the holders of Senior Indebtedness), and the Holders of the Series 3 Shares, the obligation of the Guarantor, which is absolute and unconditional, to pay to the Holders of the Series 3 Shares the Preferred Share Obligations in accordance herewith, as and when the same shall become due and payable in accordance with this Guarantee, or affect the relative rights of the Holders of the Series 3 Shares and creditors of the Guarantor other than the holders of the Senior Indebtedness, nor shall anything herein or therein prevent the Security Trustee or the Holder of any Series 3 Share from exercising all remedies otherwise permitted by applicable law upon default under this Guarantee, subject to the rights, if any, under this Article 3 of the holders of Senior Indebtedness in respect of cash, property or securities of the Guarantor received upon the exercise of any such remedy.

3.6 No Payment if Senior Indebtedness In Default

Upon the maturity of any Senior Indebtedness by lapse of time, acceleration or otherwise, then, except as provided in Section 3.6, all principal of and interest on all such matured Senior Indebtedness shall first be paid in full, or shall first have been duly provided for, before any payment is made on account of the Preferred Share Obligations.

Table of Contents

In case of default with respect to any Senior Indebtedness permitting the holders thereof to accelerate the maturity thereof, unless and until such default shall have been cured or waived or shall have ceased to exist, no payment (by purchase of the Series 3 Shares or otherwise) shall be made by the Guarantor with respect to the Preferred Share Obligations and neither the Security Trustee nor the Holders of Series 3 Shares shall be entitled to demand, institute proceedings for the collection of, or receive any payment or benefit (including without limitation by set-off, combination of accounts or otherwise in any manner whatsoever) on account of the Preferred Share Obligations after the happening of such a default (except as provided in Section 3.8), and unless and until such default shall have been cured or waived or shall have ceased to exist, such payments shall be held in trust for the benefit of, and, if and when such Senior Indebtedness shall have become due and payable, shall be paid over to, the holders of the Senior Indebtedness or their representative or representatives or to the trustee or trustees under any indenture under which any instruments evidencing an amount of the Senior Indebtedness remaining unpaid until all such Senior Indebtedness shall have been paid in full, after giving effect to any concurrent payment of distribution to the holders of such Senior Indebtedness.

The fact that any payment hereunder is prohibited by this Section 3.5 shall not prevent the failure to make such payment from being an Event of Default hereunder.

3.7 Payment on Series 3 Shares Permitted

Nothing contained in this Article 3 or elsewhere in this Guarantee, or in any of the Series 3 Shares, shall affect the obligation of the Guarantor to make, or prevent the Guarantor from making, at any time except during the pendency of any dissolution, winding up or liquidation of the Guarantor or reorganization proceedings specified in Section 3.2 affecting the affairs of the Guarantor, any payment on account of the Preferred Share Obligations, except that the Guarantor shall not make any such payment other than as contemplated by this Article 3, if it is in default in payment of any Senior Indebtedness. The fact that any such payment is prohibited by this Section 3.6 shall not prevent the failure to make such payment from being an Event of Default hereunder. Nothing contained in this Article 3 or elsewhere in this Guarantee, or in any of the Series 3 Shares, shall prevent the application by the Security Trustee of any moneys deposited with the Security Trustee hereunder for the purpose so deposited, to the payment of or on account of the Preferred Share Obligations unless and until the Security Trustee shall have received written notice from the Guarantor or from the holder of Senior Indebtedness or from the representative of any such holder of default with respect to any Senior Indebtedness permitting the holders thereof to accelerate the maturity thereof.

Upon request of the Guarantor, and upon being furnished with an Officers' Certificate stating that one or more named persons are holders of Senior Indebtedness, or the representative or representatives of such holders, or the trustee or trustees under which any instrument evidencing such Senior Indebtedness may have been issued, and specifying the amount and nature of such Senior Indebtedness, the Security Trustee shall enter into a written agreement or agreements with the Guarantor and the person or persons named in such Officers' Certificate providing that such person or persons are entitled to all the rights and benefits of this Article 3 as the holder or holders, representative or representatives, or trustee or trustees of the Senior Indebtedness specified in such Officers' Certificate and in such agreement. Such agreement shall be conclusive evidence that the indebtedness specified therein is Senior Indebtedness, however, nothing herein shall impair the rights of any holder of Senior Indebtedness who has not entered into such an agreement.

The Security Trustee is entitled to all the rights set forth in this Article 3 with respect to any Senior Indebtedness at the time held by it, to the same extent as any other holder of Senior Indebtedness, and nothing in this Guarantee deprives the Security Trustee of any of its rights as such holder.

3.10 Rights of Holders of Senior Indebtedness Not Impaired

No right of any present or future holder of any Senior Indebtedness to enforce the subordination herein will at any time or in any way be prejudiced or impaired by any act or failure to act on the part of the Guarantor or by any non-compliance by the Guarantor with the terms, provisions and covenants of this Guarantee, regardless of any knowledge thereof which any such holder may have or be otherwise charged with.

4.2 Suits for Enforcement by the Security Trustee

In the event that the Guarantor fails to pay the Preferred Share Obligations as required (an "**Event of Default**") pursuant to the terms of this Guarantee, the Holders may institute judicial proceedings for the collection of the moneys so due and unpaid, may prosecute such proceeding to judgment or final decree and may enforce the same against the Corporation and/or the Guarantor and may collect the moneys adjudged or decreed to be payable in the manner provided by law out of the property of the Guarantor.

If an Event of Default occurs and is continuing, the Security Trustee may in its discretion proceed to protect and enforce its rights, and the rights of the Holders, upon being indemnified and funded to its satisfaction by the Holders, by such appropriate judicial proceedings as the Security Trustee shall deem most effectual to protect and enforce any such rights, whether for the specific enforcement of any covenant or agreement in this Guarantee or in aid of the exercise of any power granted herein, or to enforce any other proper remedy.

4.3 Security Trustee May File Proofs of Claim

Nothing herein contained shall be deemed to authorize the Security Trustee to authorize or consent to or accept or adopt on behalf of any Holder any plan of reorganization, arrangement, adjustment or composition affecting the Series 3 Shares or the rights of any Holder thereof or to authorize the Security Trustee to vote in respect of the claim of any Holder in any such proceeding.

4.4 Security Trustee May Enforce Claims Without Possession of Series 3 Shares

All rights of action and claims under this Guarantee may be prosecuted and enforced by the Security Trustee without the possession of any of the Series 3 Shares in any proceeding relating thereto, and any such proceeding instituted by the Security Trustee shall be brought in its own name as trustee of an express trust, and any recovery of judgment shall, after provision for the payment of the reasonable compensation, expenses, disbursements and advances of the Security Trustee, its agents and

THIRD, To the payment of any Preferred Share Obligation then due and unpaid; and

4.6 Limitation on Suits

No Holder of any outstanding Series 3 Shares shall have any right to institute any proceeding, judicial or otherwise, with respect to this Guarantee, or for the appointment of a receiver or trustee, or for any other remedy hereunder, unless:

(a) such Holder has previously given written notice to the Security Trustee of a continuing Event of Default with respect to this Guarantee;

(b) the Holders representing not less than 25% of the aggregate Liquidation Amount of all of the then outstanding Series 3 Shares affected by such Event of Default (determined as one class), shall have made written request to the Security Trustee to institute proceedings in respect of such Event of Default in its own name as Security Trustee hereunder;

(c) such Holder or Holders have offered to the Security Trustee reasonable indemnity against the costs, expenses and liabilities to be incurred in compliance with such request;

(d) the Security Trustee for 15 days after its receipt of such notice, request and offer of indemnity has failed to institute any such proceeding; and

been determined adversely to the Security Trustee or to such Holder, then and in every such case, subject to any determination in such proceeding, the Guarantor, the Security Trustee and the Holders of Series 3 Shares shall be restored severally and respectively to their former positions hereunder and thereafter all rights and remedies of the Security Trustee and the Holders shall continue as though no such proceeding had been instituted.

4.8 Rights and Remedies Cumulative

The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent assertion or employment of any other appropriate right or remedy.

4.9 Delay or Omission Not Waiver

No delay or omission of the Security Trustee or of any Holder of any Series 3 Shares to exercise any right or remedy accruing upon an Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. Every right and remedy given by this Article or by law to the Security Trustee or to the Holders may be exercised from time to time, and as often as may be deemed expedient, by the Security Trustee or by the Holders, as the case may be.

4.10 Control by Holders

The Holders representing not less than a majority of the aggregate Liquidation Amount of all of the then outstanding Series 3 Shares affected by an Event of Default (determined as one class) shall have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Security Trustee, or exercising any trust or power conferred on the Security Trustee, with respect to this Guarantee, provided that in each case:

(a) such direction shall not be in conflict with any rule of law or with this Guarantee;

(b) the Security Trustee may take any other action deemed proper by the Security Trustee which is not inconsistent with such direction; and

(c) the Security Trustee need not take any action which might involve it in personal liability or be unjustly prejudicial to the Holders of outstanding Series 3 Shares not consenting to any such direction.

4.11 Waiver of Stay or Extension Laws

The Guarantor covenants (to the extent that it may lawfully do so) that it will not at any time insist upon or plead, or in any manner whatsoever claim or take the benefit or advantage of, any stay or extension law wherever enacted, now or at any time hereafter in force, which may affect the covenants or the performance of this Guarantee, and the Guarantor (to the extent that it may lawfully do so) hereby expressly waives all benefit or advantage of any such law and covenants that it will not hinder, delay or impede the execution of any power herein granted to the Security Trustee, but will suffer and permit the execution of every such power as though no such law had been enacted.

4.12 Undertaking for Costs

All parties to this Guarantee agree, and each Holder of any Series 3 Shares by acceptance thereof and by acceptance of the benefits hereof shall be deemed to have agreed, that any court may in its

(i)

this Section 5.1(d) shall not be construed to limit the effect of Section 5.1(a) and (b);

(e) Whether or not herein expressly so provided, every provision of this Guarantee relating to the conduct or affecting the liability of or affording protection to the Security Trustee shall be subject to the provisions of this Section.

5.2 Certain Rights of Security Trustee

Subject to the provisions of Section 5.1:

(a) the Security Trustee may rely absolutely and shall be protected in acting or refraining from acting upon any resolution, Officers' Certificate or other certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties;

(a)

Any money held by the Security Trustee, which under the trusts of this Guarantee may be invested, shall be invested and reinvested by the Security Trustee, in accordance with Schedule A hereto.

(b)

The Security Trustee represents to the Guarantor that at the time of the execution and delivery hereof no material conflict of interest exists in respect of the Security Trustee's role as a fiduciary hereunder and agrees that in the event of a material conflict of interest arising hereafter it will, within 90 days after becoming aware that a material conflict of interest exists, either eliminate the same or resign its trust hereunder.

(b)

If, notwithstanding Section 5.8(a), the Security Trustee has a material conflict of interest, the validity and enforceability of this Guarantee shall not be affected in any manner whatsoever by reason only of the existence of such material conflict of interest.

The Board of Directors
Atlantic Power Corporation

To the Board of Directors:

TD Securities Inc. ("TD Securities") understands that Atlantic Power Corporation ("Atlantic"), intends to enter into an Arrangement Agreement (the "Arrangement Agreement") with Capital Power Income L.P. ("CPILP"), CPI Income Services Ltd., and CPI Investments Inc. (the "Corporation"), to acquire, directly and indirectly, all of the outstanding partnership units ("Units") of CPILP, (the "Proposed Transaction" or "Transaction") for consideration of $19.40 per Unit. Atlantic will indirectly acquire approximately 29% of the Units through its acquisition of all of the outstanding shares of the Corporation. A sale of the CPILP assets located in North Carolina to an indirect subsidiary of Capital Power L.P. will be completed in connection with the Transaction. The Transaction will be implemented by way of a plan of arrangement under section 192 of the Canada Business Corporations Act pursuant to which CPILP unitholders will have the option to elect, for each Unit sold, to receive either (i) 1.3 common shares of Atlantic, or (ii) $19.40 in cash, subject to certain proration procedures as more fully set forth in the Arrangement Agreement (the "Consideration"). The price payable for the shares of the Corporation pursuant to the Transaction is effectively the same as the Consideration in respect of the Units held by the Corporation, a portion of which will be satisfied with cash distributed to Atlantic from the proceeds of the sale of CPILP's North Carolina assets.

TD Securities understands that CPILP will arrange a meeting of its unitholders to seek approval of at least 66$^{2}/_{3}$% of the votes cast on an arrangement resolution by CPILP unitholders and of at least a majority of the votes cast excluding the Units owned by Capital Power Corporation ("CPX") and parties related to CPX. TD Securities has been advised that CPX, which is CPILP's largest unitholder, and the shareholders of the Corporation have each agreed to support the Transaction and to cause the Corporation to vote its Units (representing approximately 29% of the total Units outstanding) in support of the arrangement resolution. TD Securities also understands that Atlantic will arrange a meeting of Atlantic shareholders to seek the approval of at least a majority of votes cast on a resolution authorizing the issuance by Atlantic of that number of Atlantic common shares required to complete the Proposed Transaction. The above description is summary in nature. The specific terms of the Proposed Transaction will be set out in the Arrangement Agreement.

ENGAGEMENT OF TD SECURITIES

TD Securities was engaged by Atlantic Power Holdings Inc. pursuant to an engagement agreement dated as of October 20, 2010 (the "Engagement Agreement") to provide, among other things, financial advisory services to Atlantic Power Holdings Inc. and/or any of its subsidiary, parent or affiliated companies (collectively, "Atlantic Power Holdings"). These financial advisory services included, among other things, the preparation and delivery to the Board of Directors of Atlantic (the "Board") of TD Securities' opinion (the "Fairness Opinion") as to the fairness to Atlantic, from a financial point of

view, of the Consideration to be paid by Atlantic in connection with the Proposed Transaction. TD Securities has not prepared a valuation of CPILP or any of its respective securities or assets or liabilities nor has TD Securities prepared a valuation of Atlantic or any of its respective securities or assets or liabilities and the Fairness Opinion should not be construed as such.

The terms of the Engagement Agreement provide that TD Securities will receive a fee for its services, a portion of which is payable upon public announcement of the Proposed Transaction and upon delivery of the Fairness Opinion and a significant portion of which is contingent upon completion of the Proposed Transaction or in the event Atlantic receives a termination fee, and is to be reimbursed for its reasonable out-of-pocket expenses. In addition, Atlantic Power Holdings Inc. has agreed to indemnify TD Securities, in certain circumstances, against certain expenses, losses, claims, actions, suits, proceedings, damages and liabilities incurred in connection with the provision of its services.

The Fairness Opinion is being provided to the Board pursuant to the terms of the Engagement Agreement. The Fairness Opinion is intended solely for the use of the Board with respect to the Proposed Transaction, and the Fairness Opinion (including the fact that it has been delivered by TD Securities) must not be published, reproduced, disseminated, quoted from, made public or referred to, in whole or in part, or be used or relied upon by any other person, or for any other purpose, without TD Securities' prior written consent, except that a copy of this opinion may be included in its entirety in the management information circular to be sent to the shareholders of Atlantic in respect of the Transaction and any filing Atlantic is required to make with the Securities and Exchange Commission in connection with the Transaction, if such inclusion is required by applicable law.

With respect to the budgets, forecasts, projections or estimates provided to TD Securities and used in its analyses, TD Securities notes that projecting future results is inherently subject to uncertainty. TD Securities has assumed, however, that such budgets, forecasts, projections and estimates were prepared using the assumptions identified therein (as discussed between senior management of Atlantic and TD Securities) which TD Securities has been advised are (or were at the time of preparation and continue to be), in the opinion of Atlantic, reasonable in the circumstances. In addition, TD Securities has assumed that the expected synergies will be achieved at the times and in the amounts projected by Atlantic. TD Securities expresses no independent view as to the reasonableness of such budgets, forecasts, projections and estimates and the assumptions on which they are based.

TD Securities was not engaged to review and has not reviewed any of the legal, accounting or tax aspects of the Proposed Transaction. In preparing the Fairness Opinion, TD Securities has made several assumptions, including that all final executed versions of agreements and documents relating to the Proposed Transaction will conform in all material respects to the drafts provided to or terms discussed with TD Securities, all conditions to the completion of the Proposed Transaction can and will be satisfied in due course, that all consents, permissions, exemptions or orders of relevant regulatory authorities or third parties will be obtained, without adverse condition or qualification, and that the actions being taken and procedures being followed to implement the Proposed Transaction are valid and effective and comply with all applicable laws and regulatory requirements. In its analysis in connection with the preparation of the Fairness Opinion, TD Securities made numerous assumptions with respect to industry performance, general business and economic conditions, and other matters, many of which are beyond the control of TD Securities, Atlantic, CPILP or their respective affiliates. Among other things, TD Securities has assumed the accuracy, completeness and fair presentation of and has relied upon the financial statements forming part of the Data. The Fairness Opinion is conditional on all such assumptions being correct.

The Fairness Opinion has been provided for the exclusive use of the Board and is not intended to and does not constitute a recommendation to the Board. Furthermore, the Fairness Opinion is not intended to be, and does not constitute, a recommendation that Atlantic shareholders vote in favour of the Proposed Transaction or as an opinion concerning the trading price or value of any securities of Atlantic following the announcement or completion of the Proposed Transaction. The Fairness Opinion does not address the relative merits of the Proposed Transaction as compared to other transactions or business strategies that might be available to Atlantic, nor does it address the underlying business decision to implement the Proposed Transaction. In preparing the Fairness Opinion TD Securities did not consider the economic or other interests of either individual, or particular groups of, Atlantic stakeholders. The Fairness Opinion must not be used by any other person or relied upon by any other person other than the Board without the express prior written consent of TD Securities. The Fairness Opinion is rendered as of June 19, 2011, on the basis of securities markets, economic and general business and financial conditions prevailing on that date and the condition and prospects, financial and

otherwise, of Atlantic and CPILP and their respective subsidiaries and affiliates as they were reflected in the Data provided or otherwise available to TD Securities. Although TD Securities reserves the right to change, modify, update, supplement or withdraw the Fairness Opinion in the event that there is any material change in any fact or matter affecting the Fairness Opinion, it disclaims any undertaking or obligation to advise any person of any such material change that may come to its attention or to change, modify, update, supplement or withdraw the Fairness Opinion as a result of any such material change. TD Securities has not undertaken an independent evaluation, appraisal or physical inspection of any assets or liabilities of Atlantic or CPILP or their respective subsidiaries. TD Securities is not an expert on, and did not render advice to the Board regarding, legal, accounting, regulatory or tax matters. The Fairness Opinion (including the fact that it has been delivered by TD Securities) is not to be reproduced, disseminated, quoted from, made public or referred to (in whole or in part) without TD Securities' prior written consent, except that a copy of this opinion may be included in its entirety in the management information circular to be sent to the shareholders of Atlantic in respect of the Transaction and any filing Atlantic is required to make with the Securities and Exchange Commission in connection with the Transaction, if such inclusion is required by applicable law.

TD Securities' conclusion as to the fairness, from a financial point of view, of the Consideration to be paid by Atlantic in connection with the Proposed Transaction is based on its review of the Proposed Transaction taken as a whole, rather than on any particular element of the Proposed Transaction, and this Fairness Opinion should be read in its entirety.

The preparation of a fairness opinion is a complex process and is not necessarily amenable to partial analysis or summary description. TD Securities believes that its analyses must be considered as a whole and that selecting portions of the analyses or the factors considered by it, without considering all factors and analyses together, could create an incomplete or misleading view of the process underlying the Fairness Opinion.

FAIRNESS CONCLUSION

Based upon and subject to the foregoing, TD Securities is of the opinion that, as of June 19, 2011, the Consideration to be paid by Atlantic in connection with the Proposed Transaction is fair, from a financial point of view, to Atlantic.

Yours very truly,

TD Securities Inc.

We further understand that in connection with the transactions contemplated by the Plan of Arrangement, CPI USA Holdings LLC, CPI Power Holdings Inc. Pursuant to the Plan of Arrangement, and a distribution agreement to be entered into in connection with the Plan of Arrangement by the Buyer, the Partnership and a number of direct and indirect subsidiaries of the Partnership, the NC Proceeds will ultimately be transferred to the Partnership and used in part to repay the Partnership's senior credit facilities, and the balance will be transferred to the Buyer. The Buyer will use that portion of the NC Proceeds, along with other cash, to fully pay and satisfy the Purchaser Note, which will subsequently be cancelled. The Plan of Arrangement and all of the related transactions contemplated by the Arrangement Agreement are referred to herein as the "Transaction," and the terms and conditions of the Transaction are more fully set forth in the Arrangement Agreement and the related agreements referenced therein.

for purposes of our opinion. In addition, we have assumed that the Synergies/Cost Savings will be achieved at the times and in the amounts projected. In rendering this opinion, we have assumed that the final form of the Arrangement Agreement will not differ in any material respect from the draft reviewed by us. In addition, we have assumed that the Transaction will be consummated in accordance with the terms set forth in the Arrangement Agreement without any waiver, amendment or delay of any terms or conditions. Morgan Stanley has assumed that in connection with the receipt of all the necessary governmental, regulatory or other approvals and consents required for the proposed Transaction, no delays, limitations, conditions or restrictions will be imposed that would have a material adverse effect on the contemplated benefits expected to be derived in the proposed Transaction. We are not legal, tax or regulatory advisors. We express no opinion as to the relative fairness of any portion of the Consideration to be paid by the Buyer for the Partnership Units and the Corporation Shares. We express no opinion with respect to the fairness of the amount or nature of the compensation to any of the officers, directors or employees of the Partnership or the Corporation, or any class of such persons, relative to the consideration to be paid to the holders of the Partnership Units and the Corporation Shares in the Transaction. We have not made any independent valuation or appraisal of the assets or liabilities of the Partnership, the Corporation or the Buyer, nor have we been furnished with any such valuations or appraisals. Our opinion is necessarily based on financial, economic, market and other conditions as in effect on, and the information made available to us as of, the date hereof. Events occurring after the date hereof may affect this opinion and the assumptions used in preparing it, and we do not assume any obligation to update, revise or reaffirm this opinion.

We have acted as financial advisor to the Board of Directors of the Buyer in connection with the Transaction and will receive a fee for our services, a substantial portion of which is contingent upon the closing of the Transaction. In addition, Morgan Stanley or one or more of its affiliates may provide to the Buyer a portion of the financing required in connection with the Transaction, for which Morgan Stanley would receive additional fees from the Buyer. Morgan Stanley may also seek to provide financial advisory and financing services to the Buyer in the future and expects to receive fees for the rendering of these services.

Please note that Morgan Stanley is a global financial services firm engaged in the securities, investment management and individual wealth management businesses. Our securities business is engaged in securities underwriting, trading and brokerage activities, foreign exchange, commodities and derivatives trading, prime brokerage, as well as providing investment banking, financing and financial advisory services. Morgan Stanley, its affiliates, directors and officers may at any time invest on a principal basis or manage funds that invest, hold long or short positions, finance positions, and may trade or otherwise structure and effect transactions, for their own account or the accounts of their customers, in debt or equity securities or loans of the Buyer, the Partnership, or any other company, or any currency or commodity, that may be involved in the Transaction, or any related derivative instrument.

This opinion has been approved by a committee of Morgan Stanley investment banking and other professionals in accordance with our customary practice. This opinion is for the information of the Board of Directors of the Buyer (in its capacity as such) and may not be used for any other purpose without our prior written consent, except that a copy of this opinion may be included in its entirety in the management information circular to be sent to the shareholders of the Buyer in respect of the

Transaction and any filing the Buyer is required to make with the Securities and Exchange Commission in connection with the Transaction if such inclusion is required by applicable law. In addition, this opinion does not in any manner address the prices at which the Buyer Shares will trade following consummation of the Transaction or at any time and Morgan Stanley expresses no opinion or recommendation as to how the shareholders of the Buyer and the Partnership Unitholders should vote at the security-holders' meetings to be held in connection with the Transaction.

Based on and subject to the foregoing, we are of the opinion on the date hereof that the Consideration to be paid by the Buyer pursuant to the Arrangement Agreement is fair from a financial point of view to the Buyer.

Very truly yours,

Assumptions and Limitations

Our Opinion is subject to the assumptions, qualifications and limitations set forth below.

We have not been asked to prepare and have not prepared a formal valuation or appraisal of any of the assets or securities of the Company, the Purchaser or any of their respective affiliates and our Opinion should not be construed as such.

With your permission, we have relied upon, and have assumed the completeness, accuracy and fair presentation of all financial and other information, data, advice, opinions and representations obtained by us from public sources, or provided to us by the Company, the Purchaser or their respective affiliates or advisors or otherwise obtained by us pursuant to our engagement, and our Opinion is conditional upon such completeness, accuracy and fair presentation. We have not been requested to or attempted to verify independently the accuracy, completeness or fairness of presentation of any such information, data, advice, opinions and representations. We have not met separately with the independent auditors of the Company or the Purchaser in connection with preparing this Opinion and with your permission, we have assumed the accuracy and fair presentation of, and relied upon, the Company's and the Purchaser's audited financial statements and the reports of the auditors thereon and the Company's and the Purchaser's interim unaudited financial statements.

With respect to the historical financial data, operating and financial forecasts and budgets provided to us concerning the Company and the Purchaser and relied upon in our financial analyses, we have assumed that they have been reasonably prepared on bases reflecting the most reasonable assumptions, estimates and judgements of management of the Company and the Purchaser, having regard to their respective business, plans, financial condition and prospects.

We have also assumed that all of the representations and warranties contained in the Arrangement Agreement are correct as of the date hereof and that the Proposed Transaction will be completed substantially in accordance with all of the terms and conditions set forth therein and all applicable laws and that the Circular will disclose all material facts relating to the Proposed Transaction and will satisfy all applicable legal requirements.

Table of Contents

The Company has represented to us, in a certificate of two senior officers of the General Partner dated the date hereof, among other things, that the information, data and other material (financial or otherwise) provided to us by or on behalf of the Company and, to the best of their knowledge, the Purchaser, including the written information and discussions concerning the Company and the Purchaser referred to above under the heading "Scope of Review" (collectively, the "Information"), are complete and correct in all material respects at the date the Information was provided to us and that, since the date on which the Information was provided to us, there has been no material change, financial or otherwise, in the financial condition, assets, liabilities (contingent or otherwise), business, operations or prospects of the Company or any of its affiliates, or, to the best of their knowledge, the Purchaser, and no material change has occurred in the Information or any part thereof which would have or which would reasonably be expected to have a material effect on the Opinion.

We are not legal, tax or accounting experts and we express no opinion concerning any legal, tax or accounting matters concerning the Proposed Transaction or the sufficiency of this letter for your purposes.

Our Opinion is rendered on the basis of securities markets, economic and general business and financial conditions prevailing as at the date hereof and the conditions and prospects, financial and otherwise, of the Company and the Purchaser as they are reflected in the Information and as they were represented to us in our discussions with management of the Company, the Purchaser and their respective affiliates and advisors. In our analyses and in connection with the preparation of our Opinion, we made numerous assumptions with respect to industry performance, general business, markets and economic conditions and other matters, many of which are beyond the control of any party involved in the Proposed Transaction.

The Opinion is being provided to the Board of Directors for its exclusive use only in considering the Proposed Transaction and may not be published, disclosed to any other person, relied upon by any other person, or used for any other purpose, without the prior written consent of CIBC. Our Opinion is not intended to be and does not constitute a recommendation to the Board of Directors as to whether they should approve the Arrangement Agreement nor as a recommendation to any Unitholder as to how to vote or act at the Special Meeting or as an opinion concerning the trading price or value of any securities of the Company, the Purchaser or any of their respective affiliates following the announcement or completion of the Proposed Transaction.

CIBC believes that its financial analyses must be considered as a whole and that selecting portions of its analyses and the factors considered by it, without considering all factors and analyses together, could create a misleading view of the process underlying the Opinion. The preparation of a fairness opinion is complex and is not necessarily susceptible to partial analysis or summary description and any attempt to carry out such could lead to undue emphasis on any particular factor or analysis.

The Opinion is given as of the date hereof and, although we reserve the right to change or withdraw the Opinion if we learn that any of the information that we relied upon in preparing the Opinion was inaccurate, incomplete or misleading in any material respect, we disclaim any obligation to change or withdraw the Opinion, to advise any person of any change that may come to our attention or to update the Opinion after the date of this Opinion.

Opinion

Based upon and subject to the foregoing and such other matters as we considered relevant, it is our opinion, as of the date hereof, that the Consideration to be received by Unitholders pursuant to the Arrangement Agreement is fair, from a financial point of view, to Unitholders other than CPC and its affiliates.

Yours very truly,

The Fairness Opinion is conditional upon such completeness, accuracy and fair presentation of such Information. Subject to the exercise of professional judgment, we have not attempted to independently verify the completeness, accuracy or fair presentation of any of the Information. With respect to the Company Forecasts and the Purchaser Forecasts that have been furnished to us as part of the Information ("Forecasts"), we have assumed that such Forecasts were reasonably prepared on a basis reflecting the best currently available estimates and good faith judgments of the management of the Company and Purchaser, respectively, as to such matters, and, with the approval of the Board of Directors of the General Partner, we have relied upon such Forecasts in arriving at our Fairness Opinion.

Table of Contents

In preparing the Fairness Opinion, we have made several assumptions, including that the Arrangement will be completed on the terms contemplated in the draft Agreement provided to us, that all of the conditions set out in the Agreement (including the completion of the transactions contemplated by the Partnership Reorganization Agreements in accordance with their terms) will be satisfied, that all of the representations and warranties to be contained in the Agreement are correct as of the date hereof and that the disclosure provided or incorporated by reference in the Partnership Circular to be delivered to the Company's unitholders will be accurate in all material respects.

This Fairness Opinion is rendered on the basis of securities markets, economic and general business and financial conditions prevailing as at the date hereof and the conditions and prospects, financial and otherwise, of the Company and its subsidiaries and affiliates, as reflected in the information, data and other material (financial or otherwise) reviewed by us and as represented to us in our discussions with the management of the Company. In our analyses and in connection with preparing the Fairness Opinion, we made numerous assumptions with respect to industry performance, general business and economic conditions and other matters, many of which are beyond the control of any party.

We are not legal, tax or accounting experts and we express no opinion concerning any legal, tax or accounting matters concerning the Arrangement.

We are not expressing any opinion as to any other aspects of the Arrangement or the related transactions contemplated by the Agreement. In particular, we are not expressing any opinion as to the consideration to be received by EPCOR or CPLP in respect of the Corporation Shares held by them. We express no opinion as to the prices at which the Purchaser Shares will trade at any future time.

The Fairness Opinion is effective on the date hereof and we disclaim any undertaking or obligation to advise any person of any change in any fact, information or matter affecting the Fairness Opinion that may come or be brought to our attention after the date hereof. Without limiting the foregoing, if there is any material change in any fact, information or matter affecting the Fairness Opinion after the date hereof, we reserve the right to change, modify or withdraw the Fairness Opinion. This Fairness Opinion is addressed to and is for the sole use and benefit of the Board of Directors of the General Partner, and may not be referred to, summarized, circulated, publicized or reproduced by the Company, other than in the Partnership Circular as herein expressly specified, or disclosed to, used or relied upon by any other party without the express prior written consent of Greenhill. This Fairness Opinion is not to be construed as a recommendation to the Board of Directors of the General Partner as to whether they should approve the Agreement and/or the Arrangement nor to any holder of Partnership Units as to whether or not to vote in favour of the Arrangement or take any other action in respect of its Partnership Units.

We believe that our analyses must be considered as a whole and that selecting portions of our analyses or the factors considered by us, without considering all factors and analyses together, could create a misleading view of the process underlying the Fairness Opinion. The preparation of a Fairness Opinion is a complex process and is not necessarily susceptible to partial analysis or summary description. Any attempt to do so could lead to undue emphasis on any particular factor or analysis.

Based on and subject to the foregoing, including the limitations and assumptions set forth herein and such other matters as we considered relevant, we are of the opinion that, as of the date hereof, the Consideration to be received by the holders of Partnership Units (other than Purchaser, the General Partner and the Corporation) under the Arrangement, is fair from a financial point of view, to such holders.

Very best regards,

PART I

ITEM 1. BUSINESS

OVERVIEW

Atlantic Power Corporation owns interest in 13 operational power generation projects across ten states, one biomass project under construction in Georgia, a 500 kilovolt 84-mile electric transmission line located in California and several development projects. Our power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,962 megawatts ("MW"), in which our ownership interest is approximately 878 MW.

The following map shows the location of our projects, including joint venture interests, across the United States:

We sell the capacity and energy from our projects under power purchase agreements ("PPAs") with a variety of utilities and other parties. Under the PPAs, which have expiration dates ranging from 2011 to 2037, we receive payments for electric energy sold to our customers (known as energy payments), in addition to payments for electric generation capacity (known as capacity payments). We also sell steam from a number of our projects under steam sales agreements to industrial purchasers. The transmission system rights we own in our power transmission project entitle us to payments indirectly from the utilities that make use of the transmission line.

Our projects generally operate pursuant to long-term fuel supply agreements, typically accompanied by fuel transportation arrangements. In most cases, the terms of the fuel supply and

Table of Contents

transportation arrangements correspond to the terms of the relevant PPAs. Many of the PPAs and steam sales agreements provide for the pass-through or indexing of fuel costs to our customers.

We partner with recognized leaders in the power business to operate and maintain our projects, including Caithness Energy ("Caithness"), Power Plant Management Services ("PPMS"), Delta Power Services and the Western Area Power Administration ("Western"). Our asset management team works with these operators to proactively pursue opportunities to both improve the performance of our physical assets and optimize the various project contracts for enhanced financial performance.

Atlantic Power Corporation is organized under the laws of the Province of British Columbia. Our registered office is located at 355 Burrard Street, Suite 1900, Vancouver, British Columbia, Canada V6C 2G8 and our headquarters are located at 200 Clarendon Street, Floor 25, Boston, Massachusetts, USA 02116. Our website is www.atlanticpower.com. Information contained on our website is not part of this Form 10-K.

We completed our initial public offering on the Toronto Stock Exchange ("TSX") in November 2004. At the time of our initial public offering, or IPO, our publicly traded security was an income participating security ("IPS") comprised of one common share and Cdn$5.767 principal value of 11% subordinated notes due 2016. On November 17, 2009, our shareholders approved a conversion from the IPS structure to a traditional common share structure. Each IPS was exchanged for one new common share and each old common share that did not form part of an IPS was exchanged for approximately 0.44 of a new common share. Our shares trade on the TSX under the symbol "ATP" and began trading on July 23, 2010 on the New York Stock Exchange ("NYSE") under the symbol "AT".

HISTORY OF OUR COMPANY

Atlantic Power Corporation is a Canadian corporation that was formed in 2004. The following timeline illustrates significant events in the development of our business since our initial public offering. Further details about these events are included below:

Schedule I-4

Table of Contents

We used the proceeds from our IPO to acquire a 58% interest in Atlantic Power Holdings, LLC (now Atlantic Power Holdings, Inc., which we refer to herein as "Atlantic Holdings") from two private equity funds managed by ArcLight Capital Partners, LLC and from Caithness. Until December 31, 2009, we were externally managed by Atlantic Power Management, LLC, an affiliate of ArcLight. Under this external management arrangement, ArcLight provided administrative and office support services to us and was required to give us the opportunity to pursue investment opportunities that did not fit ArcLight's investment guidelines for its private equity funds. At the time of our IPO, Atlantic Holdings was granted a right of first offer related to ArcLight's interest in 11 power generating projects. Our acquisitions of a 40% interest in the Chambers project in 2005 and the Auburndale project in 2008 were completed under the terms of this right of first offer, which has since expired.

In August 2005, we acquired Epsilon Power Partners, LLC, which owns a 40% interest in the Chambers project, for approximately $63 million in cash and the assumption of $43 million in non-recourse debt.

In October 2005, we completed a private placement of 7,500,000 IPSs. We used the net proceeds of the private placement to increase our ownership in Atlantic Holdings to 70.1%.

In September 2006, we acquired 100% of the equity interests in Trans-Elect NTD Holdings Path 15, LLC (Path 15), which has since been renamed Atlantic Path 15 Holdings, LLC and indirectly owns approximately 72% of the transmission system rights in the transmission line upgrade along the Path 15 transmission corridor located in central California. The purchase price was approximately $78.4 million.

In October 2006, we completed a sale of 8,531,000 IPSs and debentures for gross proceeds of Cdn$150 million. The IPSs were sold at a price of Cdn$10.55 per IPS for gross proceeds of Cdn$90 million and Cdn$60 million aggregate principal amount of debentures were issued. The IPSs and debentures were sold on a bought deal basis to a syndicate of underwriters. We used the net proceeds in February 2007 to acquire all of the remaining interest of ArcLight and Caithness in Atlantic Holdings.

In December 2006, we completed a private placement of 8,600,000 IPSs and Cdn$3.0 million principal amount of separate subordinated notes to three institutional investors. In February 2007, we used the net proceeds of the private placement to increase our ownership in Atlantic Holdings to 100%.

In November 2008, we acquired a 100% ownership interest in Auburndale Power Partners, L.P, which owns the Auburndale project, for a purchase price of approximately $140.0 million. The acquisition was funded with cash on hand, a $55 million borrowing under our credit facility and non-recourse acquisition debt of $35 million. The non-recourse acquisition debt associated with this transaction amortizes fully over the remaining term of the project's power purchase agreement, which expires in 2013. The borrowing under the credit facility was repaid in 2009.

In the first quarter of 2009, we transferred our remaining net interest in Onondaga Cogeneration Limited Partnership, at net book value, into a 50% owned joint venture, Onondaga Renewables, LLC, which is engaged in the redevelopment of the Onondaga project into a 40 MW biomass power plant.

In March 2009, we acquired a 40% equity interest in Rollcast Energy, Inc., a North Carolina corporation. Rollcast is a developer of biomass power plants in the southeastern U.S. with a number of additional 50 MW projects in various stages of development. We agreed to invest $2.0 million in March 2010 to increase our ownership interest in Rollcast to 60%. Under the terms of the agreement, $1.2 million of the investment was made in March 2010 and the remaining $0.8 million was made in April 2010. As a result of this additional investment, we began to consolidate our investment in Rollcast beginning March 1, 2010. We have the option, but not the obligation, to invest directly in biomass power plants developed by Rollcast.

Table of Contents

In October 2009, we agreed to pay ArcLight an aggregate of $15 million to terminate its management agreement with us, satisfied by a payment of $6 million on the termination date of December 31, 2009, and additional payments of $5 million, $3 million and $1 million on the respective first, second and third anniversaries of the termination date. In connection with the termination of the management agreements, we hired all of the then-current employees of Atlantic Power Management and entered into employment agreements with its officers.

In December 2009, we issued, in a public offering, 6.25% convertible unsecured subordinated debentures due March 15, 2017, the 2009 Debentures, at a price of Cdn$1,000 per debenture for total gross proceeds of Cdn$86.25 million. The 2009 Debentures are convertible at any time, at the option of the holder, into approximately 76.9231 common shares per Cdn$1,000 principal amount of the 2009 Debentures, representing a conversion price of Cdn$13.00 per common share. Approximately Cdn$42.9 million of the net proceeds from the offering were used to redeem our 11% subordinated notes. The remainder of the net proceeds was made available to fund growth opportunities including biomass development and for general corporate purposes.

RECENT DEVELOPMENTS

On July 2, 2010, we acquired a 27.6% equity interest in Idaho Wind Partners 1, LLC ("Idaho Wind") for approximately $40.0 million. Idaho Wind recently completed construction of a 183 MW wind power project located near Twin Falls, Idaho. Idaho Wind has 20-year PPAs with Idaho Power Company. Our investment in Idaho Wind was funded with cash on hand and a $20.0 million borrowing under our credit facility, which was subsequently paid in full in November 2010. We made a short-term $22.8 million loan to Idaho Wind to provide temporary funding for construction of the project until a portion of the project-level construction financing is completed. See additional details on page 28. Member loans will be paid down with a combination of excess proceeds from the federal stimulus cash grant after repaying the cash grant loan facility, funds from a third closing for additional project-level debt, and project cash flow. The federal stimulus grant is expected in the second quarter of 2011 and a third closing is expected by the end of the year. As of March 18, 2011, $5.1 million of the loan has been repaid. Our investment in Idaho Wind is accounted for under the equity method of accounting.

On October 20, 2010, we completed a public offering of 6,029,000 common shares, including 784,000 common shares issued pursuant to the exercise in full of the underwriters' over-allotment option, at a price of $13.35 per common share. We received net proceeds from the common share offering, after deducting the underwriting discounts and expenses, of approximately $75.3 million.

On October 20, 2010, we also completed the closing of a public offering of Cdn$80.5 million aggregate principal amount of convertible unsecured subordinated debentures at a price of Cdn$1,000 per debenture, including Cdn$10.5 million aggregate principal amount of debentures pursuant to the exercise in full of the underwriters' over-allotment option. The debentures bear interest at a rate of 5.60%, and will mature on June 30, 2017, unless earlier redeemed. The debentures are convertible into our common shares at an initial conversion rate of 55.2486 common shares per Cdn$1,000 principal amount of debentures, representing an initial conversion price of approximately Cdn$18.10 per common share (equivalent to US$18.03 per common share). We received net proceeds from the debenture offering, after deducting the underwriting discounts and expenses, of approximately Cdn$76.1 million ($74.6 million). The net proceeds from these offerings were used as follows: (i) approximately US$20.0 million to repay indebtedness incurred under our credit facility entered into in June 2010 to partially fund acquisition of a 27.6% equity interest in Idaho Wind, and (ii) approximately US$75.0 million to fund an investment in the Piedmont Green Power project for substantially all of the equity interest in the project. Any remaining net proceeds were used to fund the Cadillac acquisition and for general corporate purposes.

Table of Contents

In November 2010, we closed the construction and term financing for the Piedmont Green Power, LLC ("Piedmont") project, a 53.5 MW biomass project located in Barnesville, Georgia and we agreed to invest approximately $75.0 million in the project to own substantially all of the equity interests. Construction of the project commenced immediately following the financial closing. The Piedmont Green Power project has a 20-year PPA with Georgia Power Company which includes an adjustment related to the cost of biomass fuel for the plant.

On December 20, 2010, we closed the acquisition of 100% of the membership interests in Cadillac Renewable Energy, LLC ("Cadillac"), a 39.6 MW biomass-fired generating facility located in Cadillac, Michigan that has been operating since 1993. The purchase price of approximately $80.0 million was funded by $37.0 million using a portion of the cash raised in the public equity and convertible debenture offerings in October 2010 and $43.0 million of assumed non-recourse, project-level debt.

OUR COMPETITIVE STRENGTHS

Access to capital. Our shares are publicly traded on the NYSE and the TSX. We have a history of successfully raising public equity in Canada and the U.S. and public convertible debentures in Canada. We have also issued private equity in Canada. In addition, we have used non-recourse project-level financing as a source of capital. Project-level financing can be attractive as it typically has a lower cost than equity, is non-recourse to the company and amortizes over the term of the project's power purchase agreement. Having significant experience in accessing all of these markets provides flexibility such that we can pursue transactions in the most cost-effective market at the time capital is needed for growth opportunities.

Experienced management team. Our management team has a tremendous depth of experience in project development, asset management, mergers and acquisitions, finance and accounting. Our network of industry contacts and our reputation allow us to see proprietary acquisition opportunities on a regular basis.

Diversified projects. Our power generation projects have an aggregate gross electric generation capacity of approximately 1,962 MW, and our net ownership interest in the electric generation capacity of these projects is approximately 878 MW. These projects are diversified by fuel type, electricity and steam customers, and project operators. Many are located in the deregulated and more liquid electricity markets of California, Mid-Atlantic, New York, and Texas.

Our power transmission project, known as the Path 15 project, is an 84-mile, 500-kilovolt transmission line built in order to alleviate north-south transmission congestion in California. It is a traditional rate-base asset whose revenues are regulated by the Federal Energy Regulatory Commission ("FERC") and is owned and operated by Western, a U.S. Federal power agency.

Stability of project cash flow. Each of our power generation projects currently in operation has been in operation for over ten years, except for the Idaho Wind Power project, portions of which commenced commercial operation in December 2010. Cash flows from each project are generally supported by PPAs with investment-grade utilities and other creditworthy counterparties. We believe that each project's combination of PPA(s), fuel supply agreement(s) and/or commodity hedges help stabilize operating margins as fuel prices fluctuate.

Strong customer base. Our customers are generally large utilities and other parties with investment-grade credit ratings. The largest customers of our power generation projects are Progress Energy Florida, Inc. ("PEF"), Tampa Electric Company ("TECO"), and Atlantic City Electric ("ACE"), which purchase approximately 37%, 14% and 10%, respectively, of the net electric generation capacity of our projects. No other electric customer purchases more than 7% of the net electric generation capacity of our power generation projects.

Table of Contents

Leading third-party operators. Our power generation projects utilize experienced firms for their operation and maintenance, which are recognized leaders in independent power. Affiliates of Caithness, Power Plant Management Services and Babcock and Wilcox Power Generation Group, Inc. operate projects representing approximately 45%, 19% and 12%, respectively, of the net electric generation capacity of our power generation projects. No other operator is responsible for the operation of projects representing more than 7% of the net electric generation capacity of our power generation projects.

OUR OBJECTIVES AND BUSINESS STRATEGY

Our objectives include maintaining the stability and sustainability of dividends to shareholders and to maximize the value of our company. In order to achieve these objectives, we intend to focus on enhancing the operating and financial performance of our current projects and pursuing additional accretive acquisitions primarily in the electric power industry in the United States and Canada.

Organic growth

We intend to enhance the operation and financial performance of our projects through:

achievement of improved operating efficiencies, output, reliability and operation and maintenance costs through the upgrade or enhancement of existing equipment or plant configurations;

optimization of commercial arrangements such as PPAs, fuel supply and transportation contracts, steam sales agreements, operations and maintenance agreements and hedge agreements; and

expansion of existing projects.

Extending PPAs following their expiration

PPAs in our portfolio have expiration dates ranging from 2011 to 2037. In each case, we plan for expirations by evaluating various options in the market for maximizing long-term project cash flows and passing through to purchasers as effectively as possible the potential changes in fuel costs. New arrangements may involve responses to utility solicitations for capacity and energy, direct negotiations with the original purchasing utility for PPA extensions, "reverse" request for proposals by the projects to likely bilateral counterparty arrangements with creditworthy energy trading firms for tolling agreements, full service PPAs or the use of derivatives to lock in value. We do not assume that revenues or operating margins under existing PPAs will necessarily be sustained after PPA expirations, since most original PPAs included capacity payments related to return of and return on original capital invested, and counterparties or evolving regional electricity markets may or may not provide similar payments under new or extended PPAs.

Acquisition and investment strategy

We believe that new electricity generation projects will be required in the United States and Canada over the next several years as a result of growth in electricity demand, transmission constraints and the retirement of older generation projects due to obsolescence or environmental concerns. In addition, Renewable Portfolio Standards in over 31 states and the recently extended American Recovery and Reinvestment Act's 1603 grant program have greatly facilitated strong PPAs and financial returns for significant renewable project opportunities. There is also a very active secondary market for existing projects.

We intend to expand our operations by making accretive acquisitions with a focus on power generation, transmission, distribution and related facilities in the United States and Canada. We may also invest in other forms of energy-related projects, utility projects and infrastructure projects, as well

Table of Contents

as make additional investments in development stage projects or companies where the prospects for creating long-term predictable cash flows are attractive. Since the time of our initial public offering on the TSX in late 2004, we have twice acquired the interest of another partner in one of our existing projects and will continue to look for such opportunities.

Our senior management has significant experience in the independent power industry and we believe that their experience, reputation and industry relationships will provide us with enhanced access to future acquisition opportunities on a proprietary basis.

Acquisition guidelines

We use the following general guidelines when reviewing and evaluating possible acquisitions:

each acquisition or investment should result in an increase in cash available for distribution to shareholders;

in the case of an acquisition of power generation facilities, facilities with long-term PPAs with investment grade electrical utilities or other creditworthy customers will be preferred; and, for facilities without such agreements, market electricity price assumptions used in acquisition evaluations will be obtained from a recognized independent source; and

the expected useful life of the facility and associated structures will, with regular maintenance, be long enough to conform with our objective of providing stable long-term dividends to shareholders.

POWER INDUSTRY OVERVIEW

Historically, the North American electricity industry was characterized by vertically-integrated monopolies. During the late 1980s, several jurisdictions began a process of restructuring by moving away from vertically integrated monopolies toward more competitive market models. Rapid growth in electricity demand, environmental concerns, increasing electricity rates, technological advances and other concerns prompted government policies to encourage the supply of electricity from independent power producers.

In the independent power generation sector, electricity is generated from a number of energy sources, including natural gas, coal, water, waste products such as biomass (e.g., wood, wood waste, agricultural waste), landfill gas, geothermal, solar and wind. According to the North American Electric Reliability Council's Long-Term Reliability Assessment, published in December 2009, summer peak demand within the United States in the ten-year period from 2010 through 2019 is projected to increase 1.3%, while winter peak demand in Canada is projected to increase 0.9%.

The non-utility power generation industry

Our 13 power generation projects are non-utility electric generating facilities that operate in the U.S. electric power generation industry. The electric power industry is one of the largest industries in the United States, generating retail electricity sales of approximately $353 billion in 2009, based on information published by the Energy Information Administration. A growing portion of the power produced in the United States is generated by non-utility generators. According to the Energy Information Administration, there were approximately 8,448 non-utility generators representing approximately 475 gigawatts of capacity (equal to 47% of total generating plants and 42% of nameplate capacity) in 2009, the most recent year for which data is available. Non-utility generators sell the electricity that they generate to electric utilities and other load-serving entities (such as municipalities and electric cooperatives) by way of bilateral contracts or open power exchanges. The electric utilities and other load-serving entities, in turn, generally sell this electricity to industrial, commercial and residential customers.

OUR POWER PROJECTS

The following table outlines our portfolio of power generating and transmission assets in operation and under construction as of March 18, 2011, including our interest in each facility. Management believes the portfolio is well diversified in terms of electricity and steam buyers, fuel type, regulatory jurisdictions and regional power pools, thereby partially mitigating exposure to market, regulatory or environmental conditions specific to any single region.

Auburndale segment

General description

The Auburndale segment consists of a 155 MW dual-fired (natural gas and oil), combined-cycle, cogeneration plant located in Polk County, Florida, which commenced operations in July 1994. We own 100% of the Auburndale project, which is a "qualifying facility" (or "QF") under the rules promulgated by FERC. We acquired Auburndale from ArcLight Energy Partners Fund I, L.P. and Calpine Corporation in a transaction that was completed on November 21, 2008.

Auburndale is located on an 11-acre site in the City of Auburndale, Florida. Capacity and energy from the project is sold to Progress Energy Florida, Inc. ("PEF") under three PPAs expiring at the end of 2013. Auburndale typically operates during on-peak periods. Steam is supplied to Florida Distillers Company and Cutrale Citrus Juices USA, Inc. The Florida Distillers steam agreement is renewed annually, and the Cutrale Citrus Juices steam agreement expires in 2013.

Auburndale has non-recourse debt outstanding of $21.7 million as of December 31, 2010 which is required to be fully amortized over the term of its PPAs expiring in 2013. See "Project-level debt" on page 72 of this Form 10-K for additional details. Atlantic Power has provided

letters of credit in the

Table of Contents

total amount of $13.4 million to support certain Auburndale obligations: $5.5 million to support its debt service reserve, $4.4 million to support its PPAs, and $3.5 million to support its fuel supply agreement.

Power purchase agreements

Auburndale sells capacity and electricity to PEF under three PPAs each of which expires on December 31, 2013. Under the largest of the PPAs, Auburndale sells 114 MW of capacity and energy. An additional 17 MW of committed capacity is sold under two identical 8.5 MW agreements with PEF. Revenue from the sale of electricity under the three PPAs consists of capacity payments based on a fixed schedule of prices, and energy payments. Capacity payments under the largest PPA are dependent on the plant maintaining a minimum on-peak capacity factor of 92 percent on a rolling twelve-month average basis. On-peak capacity factor refers to the ratio of actual electricity generated during periods of peak demand to the capacity rating of the plant during such periods. The project has achieved the minimum on-peak capacity factor continuously since commercial operation. Capacity payments under the smaller two agreements are dependent on the project maintaining a minimum on-peak capacity factor of 70 percent. Energy payments under the largest PPA are comprised of a fuel component based on the cost of coal consumed at two PEF-owned coal-fired generating stations and a component intended to recover operating and maintenance costs. Energy payments under the smaller two agreements are based on the lesser of PEF's actual avoided energy cost or an energy price index based on the cost of fuel burned at a specific coal-fired power plant owned by TECO.

Auburndale entered into an agreement with TECO to transmit electric energy from the project to PEF. The agreement expires in 2024, unless extended as provided for in the agreement. Auburndale's cost for these services is based on a contractual formula derived from TECO's cost of providing such services.

Steam sales agreements

Auburndale provides steam to Florida Distillers and Cutrale Citrus Juices under two separate steam purchase agreements. The Florida Distillers agreement automatically extends on an annual basis, and can be terminated by either party with 90 days notice. The Cutrale Citrus Juices agreement terminates on December 31, 2013 and contains automatic two-year renewal terms.

Fuel supply arrangements

Auburndale receives the majority of its required natural gas through a gas supply agreement with El Paso Merchant Energy, L.P. that expires on June 30, 2012. Under the agreement, El Paso provides a fixed amount of gas on a daily basis. The gas price escalates annually and is below current market prices. At historic utilization rates, the gas supplied under the El Paso contract has accounted for approximately 80% of the gas required by the project under its PPA commitments and the remaining required fuel is purchased at spot prices.

The required natural gas for the project is delivered through firm gas transportation agreements with Central Florida Gas Company ("Florida Gas") and Florida Gas Transmission Company and is transported through the gas distribution system owned by Peoples Gas Transmission, Inc. ("Peoples Gas"). The gas transportation agreements are co-terminous with the PPAs, expiring on December 31, 2013.

During the term of the gas supply agreement, approximately 80% of the natural gas required to fulfill the project's PPAs is purchased at fixed prices. The remainder of the natural gas is purchased on the spot market. As a result, the project's operating margin is exposed to changes in spot market natural gas prices because the PPAs do not pass through those price changes to PEF. In order to mitigate this risk, Auburndale has entered into a series of financial swaps that effectively fix most of the price of natural gas to be purchased. See Item 7A "Quantitative and Qualitative Disclosure About Market Risk" for a summary of the hedge position related to natural gas requirements at Auburndale.

Table of Contents

We will continue to periodically analyze whether to execute further hedge transactions intended to mitigate natural gas price exposure at Auburndale through the expiration of the PPAs with PEF.

Operations & maintenance

The Auburndale project is operated and maintained by an affiliate of Caithness. In 2006, Auburndale entered into a maintenance agreement with Siemens Energy, Inc. for the long-term supply of certain parts, repair services and outage services related to the gas turbine. The term of the maintenance agreement is dependent on the timing of completion of a certain number of maintenance inspections. The final maintenance event under the agreement is scheduled for late 2012, with the final monthly payment under the agreement scheduled for September 2013.

Factors influencing project results

Auburndale derives a significant portion of its revenue through capacity payments received under the PPAs with PEF. In the event the project's on-peak capacity factor falls below a specified level, capacity payments will be adjusted downward or terminated altogether. Since it began commercial operation in 1994, the project has received full capacity payments.

The energy portion of Auburndale's revenue under the PPA with PEF is impacted by changes in the price of coal used by two of their power plants in Florida. Because these power plants secure a significant portion of their coal through contracts of varying lengths, the price of coal burned at those plants does not move in tandem with changes in spot coal prices.

Lake segment

General description

The Lake segment consists of a 121 MW dual-fuel, combined-cycle QF cogeneration plant located in Umatilla Florida, which began commercial operation in July 1993. We own 100% of the Lake project. In late 2007, the existing combustion turbines at the facility were upgraded to increase their efficiency by approximately 4% and output from 110 MW to 121 MW.

The Lake project is located on a 16-acre site leased from an adjacent citrus processing facility in Umatilla, Florida. Lake sells all of its capacity and electric energy to Progress Energy Florida, Inc. ("PEF") under the terms of a PPA expiring in July 2013. The project is generally operated as a mid-merit facility typically running during peak hours daily. Steam is sold to Citrus World, Inc. for use at its citrus processing facility and is also used to make distilled water in distillation units which is sold to various parties.

The Lake project does not have any debt outstanding. Atlantic Power has provided a $4.3 million letter of credit in favor of PEF to support the Lake project's obligations under its PPA.

Power purchase agreement

Electricity is sold to PEF pursuant to a PPA that expires on July 31, 2013. Revenues from the sale of electricity consist of a fixed capacity payment and an energy payment. Capacity payments are subject to the project maintaining a capacity factor of at least 90% during on-peak hours (11 hours daily), on a 12-month rolling average basis. Lake is subject to reductions in its capacity payment should it not achieve the 90% on-peak capacity factor. The project generally has achieved the minimum on-peak capacity factor continuously since commercial operation. Energy payments are comprised of a fuel component based on the cost of coal consumed at two PEF-owned coal-fired generating stations, a component intended to recover operations and maintenance costs, a voltage adjustment and an hourly performance adjustment.

Table of Contents

Steam sales agreement

The Lake project provides steam to Citrus World under a steam purchase agreement that expires in 2013. The project also supplies steam to an affiliate that uses steam to make distilled water, which is sold to unaffiliated third parties.

Fuel supply arrangements

The natural gas requirements for the facility are provided by Iberdrola Renewables, Inc. and TECO Gas Services, Inc. ("TGS"). Both the Iberdrola and TGS agreements contain market index based prices, commenced on July 1, 2009 and expire on July 31, 2013. Natural gas is transported to the project from supply points in Texas, Louisiana and Mississippi to Florida under contracts with Peoples Gas System, Inc.

Operations & maintenance

The Lake project is operated and maintained by an affiliate of Caithness. Lake also has a long-term services agreement and a lease engine agreement in place with General Electric ("GE"). The long-term services agreement provides for planned and unplanned maintenance on the two gas turbines at the plant. Under the lease engine agreement, GE rapidly provides temporary replacement natural gas turbines to the project to support operations when the project's turbines are removed from the site for significant maintenance.

Factors influencing project results

The Lake project derives a significant portion of its operating margin through capacity revenues received under the PPA with PEF. In the event the facility's on-peak capacity factor falls below a specified level, capacity payments will be adjusted downward, although the project has rarely experienced such reductions. During the term of the current gas supply agreement, effective July 1, 2009, Lake's operating margins are exposed to changes in natural gas prices through the end of the PEF PPA in 2013. As a result, we have entered into a series of financial swaps that effectively fix most of the price of natural gas required by Lake, thereby substantially mitigating fuel price risk. See Item 7A "Quantitative and Qualitative Disclosures About Market Risk" for a summary of the hedge position related to natural gas requirements at Lake.

We will continue to analyze whether to execute further hedge transactions to mitigate natural gas price exposure at Lake through expiration of the PPA with PEF.

The energy portion of Lake's revenue under the PPA with PEF is impacted by changes in the price of coal used by two of their power plants in Florida. Because these power plants secure a significant portion of their coal through contracts of varying lengths, the price of coal burned at those plants does not move in tandem with changes in spot coal prices.

Our Lake project is currently involved in a dispute with Progress Energy Florida over off-peak energy sales in 2010. All amounts billed for off-peak energy during 2010 by the Lake project have been paid in full by Progress. The Lake project has filed a claim against Progress in which we seek to confirm our contractual right to sell off-peak energy at the contractual price for such sales. Progress filed a counter-claim against the Lake project, seeking, among other things, the return of amounts paid for off-peak power sales during 2010 and a declaratory order clarifying Lake's rights and obligations under the PPA. The Lake project has stopped dispatching during off-peak periods and our forward guidance for distributions does not include proceeds from off-peak sales, pending the outcome of the dispute. However, we strongly believe that the court will confirm our contractual right to sell off-peak power using the contractual price that was used during 2010 and that we will be able to continue such off-peak power sales for the remainder of the term of the PPA. We have not recorded any reserves related to this dispute and expect that the outcome will not have a material adverse effect on our financial position or results of operations.

Table of Contents

Pasco segment

General description

The Pasco segment consists of the 100% owned Pasco project, a 121 MW dual fuel, combined-cycle cogeneration plant located in Dade City, Florida, which began commercial operations in 1993 as a QF. With the expiration of the original PPA with PEF in 2008, and the commencement of the tolling agreement with TECO in 2009, Pasco self-certified with the FERC as an exempt wholesale generator and was no longer required to maintain QF status. The project owns the 2.7 acre site approximately 45 miles north of Tampa, Florida.

Power purchase agreement

Electricity is sold to TECO pursuant to a tolling agreement that commenced on January 1, 2009 and expires on December 31, 2018. Under the tolling agreement, TECO purchases the project's capacity and energy conversion services. Pasco converts fuel supplied by a TECO affiliate into electricity. Revenues consist of capacity payments, start-up charges, variable payments based on the amount of electricity generated and heat rate bonus payments based on the actual efficiency of the plant versus the contract efficiency. Atlantic Power has provided a $10 million letter of credit in favor of TECO to support the project's obligations under the tolling agreement.

In exchange for obtaining the right to sell any potential excess emissions allowances from the plant, TECO accepted financial responsibility for any future costs associated with obtaining additional allowances, offsets or credits required due to changes to environmental laws, including state or federal carbon legislation.

Fuel supply arrangements

Under the terms of the tolling agreement, TECO is responsible for the fuel supply and is financially responsible for fuel transportation to the project.

Operations & maintenance

The Pasco project is operated and maintained by an affiliate of Caithness. Pasco also has a services agreement and a lease engine agreement in place with GE. The services agreement provides for discounts for planned and unplanned maintenance on the project's two natural gas turbines, and commits the project to use GE for gas turbine maintenance activities. Under the lease engine agreement, GE rapidly provides temporary replacement natural gas turbines to the project to support operations when the project's turbines are removed from the site for significant maintenance.

Factors influencing project results

The Pasco project derives the majority of its revenues under the tolling agreement with TECO through capacity payments. In the event the project does not maintain certain levels of availability, the capacity payments will be reduced. Based on historical performance, we expect the project to continue to exceed the availability requirement of 93% in the summer and 90% in the winter. A portion of the project's operating margin is based on three variable payments from TECO, consisting of a variable operation and maintenance charge, a start charge and a heat rate bonus. As a result, the project achieves a variable margin during periods of operation; and as a result, the level of variable margin is impacted by how much the plant is called on to produce electricity.

Chambers segment

General description

The Chambers segment consists of our 40% equity investment in the Chambers project, a 262 MW pulverized coal-fired cogeneration facility located at the E.I. du Pont de Nemours and Company Chambers Works chemical complex near Carney's Point, New Jersey, which began commercial operation in March 1994 as a QF. Affiliates of Goldman Sachs Group, Inc. and Energy Investors Funds, an established private equity fund manager that invests in the U.S. energy and electric power sector, in the aggregate hold 60% of the general partner interests. Chambers sells electricity to ACE under two separate power purchase agreements, a "Base PPA" and a power sales agreement. Historically, the project has operated as a baseload plant, however, during periods of low energy market pricing, the facility has run at partial or minimum load. Steam and electricity are sold to DuPont pursuant to an energy services agreement. The project site is leased from DuPont. Under the terms of the ground lease, DuPont has a right to purchase the project within 60 days of the lease expiration in 2024, or upon earlier termination of the lease, at fair market value.

Chambers financed the construction of the project with a combination of term debt due March 31, 2014 and New Jersey Economic Development Authority bonds due July 1, 2021. The term loan amortizes over its remaining term, while the bonds are repayable at maturity. Both are non-recourse to Atlantic Power. Our 40% share of the total debt outstanding at the Chambers project as of December 31, 2010 is $75.0 million. See "Project-level debt" on page 72 of this Form 10-K for additional details.

Epsilon Power Partners, L.P., our wholly-owned subsidiary, directly owns our interest in Chambers. Epsilon has outstanding debt of $36.5 million as of December 31, 2010 which fully amortizes by its final maturity in 2019 and is non-recourse to Atlantic Power. See "Project-level debt" on page 72 of this Form 10-K for additional details.

Power purchase agreements

Base PPA

The 30-year term of the Base PPA with ACE expires in 2024. ACE has agreed to purchase 184 MW of capacity and has dispatch rights for energy of up to 187.6 MW during the summer season (May 1 to October 31) and 173.2 MW during the winter season (November 1 to April 30) and a minimum dispatch level of 46 MW. The project must be available to deliver power to ACE at 90% of the average availability rate of a specific group of mid-Atlantic generating stations, which in 2010 was approximately 86.0%. Capacity prices are determined using a fixed price with a capacity factor adjustment. The energy payment under the Base PPA is divided between on-peak and off-peak periods and linked to a coal index that is identical to the project's coal supply contract escalation provisions. Chambers is guaranteed a minimum energy payment equivalent to 3,500 hours of operation per contract year, whether or not it has dispatched that many hours, provided the project is available for energy production for at least 3,500 hours during the course of the contract year.

DuPont energy services agreement

DuPont purchases all its electrical needs for its Chambers Works chemical complex from the Chambers project, subject to a peak requirement of 40 MW, under the energy services agreement ("ESA"). The initial term of the agreement expires in 2024 but will continue thereafter unless terminated by at least 36 months prior written notice. The electricity sold under the ESA contains a fixed price, which is adjusted quarterly by the lesser of either: (i) the price of coal delivered to the facility; and (ii) the change in ACE's average retail rate.

Table of Contents

In December 2008, Chambers filed suit against DuPont for breach of the ESA related to unpaid amounts associated with disputed price change calculations for electricity. DuPont subsequently filed a counterclaim for an unspecified level of damages. In February 2011, Chambers received a favorable ruling from the court on its summary judgment motion as to liability. The court's decision included a description of the pricing methodology that is consistent with the project's position. In the event the dispute cannot be resolved through settlement, a trial to determine the level of damages is expected in the second quarter of 2011.

Power sales agreement

Energy generated at the Chambers project in excess of amounts delivered to ACE under the Base PPA and to DuPont under the ESA is sold to ACE under a separate power sales agreement (the "PSA"). Under this agreement, energy that ACE does not find economically attractive at the Base PPA's energy rate, but which may be cost effective to sell into the spot market ("Undispatched Energy"), may be self-scheduled by the project to capture additional profits. Margins on Undispatched Energy sales are shared between ACE (40%) and the project (60%). Excess energy not committed to ACE under the Base PPA (above 188 MW in the summer months and 173 MW in the winter months) and not called upon by DuPont under the ESA may also be sold into the market under a similar margin sharing arrangement (30% to ACE and 70% to Chambers). The ESA also provides for the sale by Chambers into the market via annual auctions of capacity not contracted under the Base PPA pursuant to the same margin sharing arrangement (30% to ACE and 70% to Chambers).

The PSA expired in July 2010 and we entered into a replacement agreement on similar terms that will expire December 31, 2011.

Steam sales agreement

Some of the steam generated at the Chambers project is sold to DuPont under the ESA, which expires in 2024, but will continue in effect thereafter unless terminated by either party on at least 36 months prior notice. The agreement requires steam to be provided to and budgeted by DuPont up to specified peak steam requirement levels that vary throughout the year. DuPont may purchase steam in excess of the peak steam requirement from any third party, subject to Chambers' right of first refusal to provide steam at the same price. After 2014, DuPont has the option to construct and operate its own steam generation facility for steam volumes in excess of DuPont's take obligations under the ESA, if it can demonstrate that it can generate steam more economically than the project. Chambers has the right to provide steam at an equivalent price as the steam generation project proposed by DuPont. DuPont is required to purchase a minimum quantity of steam necessary for the project to maintain its status as a QF. The steam price is subject to quarterly adjustments based on the price of coal delivered to the project. DuPont has the option in certain circumstances to take over operation of the steam facility in the event of prolonged failure to deliver steam.

Fuel supply arrangements

Coal is supplied to the Chambers project pursuant to a coal purchase agreement with Consol Energy Inc. ("Consol"), which expires in 2014 and is subject to a five to ten-year renewal based on good faith negotiations. The agreement governs the sale of coal (including transportation) to the project and the disposal of related ash. Consol is obligated to supply the entire coal requirements for the project, which may include stockpiling. The price escalator under the Base PPA with ACE uses the same index as the coal supply agreement (average coal cost of 25 mid-Atlantic region coal power plants), effectively passing through changes in coal prices to ACE.

Table of Contents

Operations & maintenance

Operations and maintenance of the Chambers project is performed pursuant to an agreement with Power Plant Management Services, LLC ("PPMS"), which expires in April 2014. Thereafter, the agreement will be automatically renewed for periods of five years until terminated by either party on six months notice. PPMS is paid a base annual fee in addition to cost reimbursement. PPMS is also eligible for performance fees based on facility net availability, efficiency and excess energy optimization, and is eligible for an additional management performance bonus. The majority owner of the project transferred management services from Cogentrix Energy, Inc. to PPMS in December 2010.

Regional greenhouse gas initiative

With New Jersey's implementation of the Regional Greenhouse Gas Initiative on January 1, 2009, the Chambers project was required to obtain carbon dioxide ("CO_2") allowances in an amount corresponding to the CO_2 emissions of the facility. Previously in 2008, the State of New Jersey passed legislation that provided for the sale of CO_2 allowances at the price of $2.00 per allowance to certain generating facilities which were certified by the New Jersey Department of Environmental Protection ("NJDEP"). Chambers received this certification from the NJDEP in late 2009. The project maintains the required level of CO_2 allowances through a combination of purchases in the quarterly Regional Greenhouse Gas Initiative auctions, broker purchases and purchases from the NJDEP.

Factors influencing project results

The Chambers project derives a significant portion of its operating margin through capacity revenues received under the Base PPA. In the event the facility does not maintain a minimum level of availability under the Base PPA, the project's capacity payments from ACE would be reduced or eliminated, although it has never experienced such a reduction since commencing operation in 1994. Energy sales under the Base PPA are expected to generate positive margins due to the effective hedging of energy prices and coal costs through the use of identical indexing in the energy payment under the Base PPA and the coal prices under the coal supply contract. While the indexing is identical, adjustments to the energy price under the Base PPA occur annually, whereas coal price adjustments occur quarterly.

During periods of low spot market electricity prices, energy sales margins may be negatively impacted due to the pricing structure under the Base PPA and PSA. ACE will reduce purchases under the Base PPA to the minimum requirement of 46 MW when the spot electricity price is below the price under the Base PPA. When spot market prices drop below the Base PPA price, but exceed the project's variable production cost, ACE pays for energy based on the PSA, under which a portion of the margin above the project's production cost is shared with ACE. In the unusual situation when the spot electricity price is in excess of the Base PPA but less than the project's variable production cost (which may occur during off-peak periods), Chambers is required to sell energy to ACE at below its production cost. In some cases, the project is further negatively impacted by the facility's reduced fuel efficiency while operating at partial load.

Path 15 segment

General description

The Path 15 segment consists of our ownership of 72% of the transmission system rights in the Path 15 project, an 84-mile, 500-kilovolt transmission line built along an existing transmission corridor in central California. The Path 15 project commenced commercial operations in 2004. The Path 15 project facilitates the movement of power from the Pacific Northwest to southern California in the summer months and from generators in southern California to northern California in the winter months. The transmission system rights entitle us to receive an annual revenue requirement that is

Table of Contents

regulated by the FERC which established a 30-year regulatory life for the project in connection with its first rate case. The annual revenue requirement is collected from California utilities and remitted to owners of transmission system rights by the California Independent System Operator.

The Path 15 project and right of way is owned and operated by the Western Area Power Administration, a U.S. Federal power agency that operates and maintains approximately 17,000 miles of transmission lines. The operation of the Path 15 project consists entirely of the transmission of electric power, which is not subject to the same operating risks of a power plant or the volatility that may arise from changes in the price of electricity or fuel.

The California Independent System Operator ("CAISO") is a not-for-profit corporation that acts as a clearinghouse to settle third-party transactions involving the purchase and sale of power in California. Owners of transmission assets such as Path 15 must place their assets under the operational control of the California Independent System Operator by entering into a standard transmission control agreement with them. In general, the California Independent System Operator coordinates the dispatch of power generation and manages the reliability of, and provides open access to, the transmission grid.

Three of our wholly-owned subsidiaries have incurred non-recourse debt relating to our interest in the Path 15 project. Total debt outstanding at the Path 15 project as of December 31, 2010 is $153.9 million, which is required to fully amortize over their remaining terms through 2028. See "Project-level debt" on page 72 of this Form 10-K for additional details. We have provided letters of credit totaling $8.0 million to support these debt service obligations.

Annual revenue requirement FERC triennial rate case

The revenue collected by Path 15 is regulated by the FERC on a cost-of-service rate base methodology. Path 15 files a rate case with the FERC every three years to establish its revenue requirement for the next three-year period. The revenue requirement includes all prudently incurred operating costs, depreciation and amortization, taxes, and a return on capital.

In February 2011, we filed a rate application with the FERC to establish Path 15's revenue requirement for the 2011 - 2013 period. Similar to our rate application filed with the FERC for the three-year period ending 2010, we expect parties to file protests and interventions to become parties to the rate case proceeding. In the event we cannot negotiate a settlement with intervenors, which was accomplished in the last two rate cases, a trial type evidentiary hearing will be held.

Factors influencing project results

The primary factor influencing the Path 15 project results is its FERC-regulated revenue requirement. Under the FERC's cost-of-service methodology, all prudently incurred expenses are permitted to be recovered in the revenue requirement including costs of the rate case itself every three years. Cash distributions to us could be adversely impacted if the FERC does not continue to approve a return on equity of at least 13.5% in future rate cases.

Other project assets segment

Orlando project

General description

The Orlando project, a 129 MW natural gas-fired combined-cycle cogeneration facility located in an industrial park near Orlando in Orange County, Florida, commenced commercial operation in 1993 as a QF. We own a 50% interest in the project and Northern Star Generation, LLC ("Northern Star") owns the remaining 50% interest. The project is situated on a four acre site located adjacent to an air separation facility owned by Air Products and Chemicals, Inc. ("Air Products and Chemicals"), which

Table of Contents

serves as the project's steam customer. Orlando sells all of its electricity to PEF and Reedy Creek Improvement District ("Reedy Creek") under long-term PPAs, and also sells chilled water produced using steam from the project to Air Products and Chemicals. The Orlando project typically operates as a baseload plant. Both we and Northern Star have provided letters of credit in the amount of $1.6 million each in support of the project's obligations under the PEF PPA.

Power purchase agreements

Progress Energy Florida

Orlando sells electrical capacity and energy to PEF under a PPA that expires on December 31, 2023. The project is obligated to sell and deliver a committed capacity of 79.2 MW and has committed to a 93% on-peak capacity factor. Orlando receives a monthly capacity payment based on achieving the on-peak capacity factor and a monthly energy payment based on the total amount of electric energy actually delivered to PEF. The capacity payment escalates at 5.1% annually and is reduced if the facility's on-peak capacity factor is below 93%, on a 12-month rolling average basis. Energy payments are comprised of a fuel component based on the cost of coal consumed at two PEF-owned coal-fired generating stations, an operations and maintenance component, a voltage adjustment and an hourly performance adjustment. Off-peak energy prices are based on the on-peak spot market energy price discounted by 10%.

On August 4, 2009, PEF provided notice to Orlando that the committed capacity under its PPA would be increased to 115 MW upon expiration of the Reedy Creek PPA in 2013, upon meeting certain conditions.

Reedy Creek Improvement District

Orlando sells electrical capacity and energy to Reedy Creek, a municipal district serving the Walt Disney World complex, under a PPA that expires in 2013. Orlando is obligated to sell and deliver 35 MW of electricity and has committed to a 93% average on-peak capacity factor. Orlando receives a monthly capacity payment based on the actual average on-peak capacity factor and a monthly energy payment based on the total amount of electric energy actually delivered to Reedy Creek. The PPA may be extended for an additional ten-year term upon the consent of both parties. The capacity payment is fixed at a rate that escalates at 4.5% annually and is based upon achieving a 93% average on-peak capacity factor, calculated on a three-year rolling average basis. The agreement provides both incentive and penalty provisions for performance above and below a 93% average on-peak capacity factor, respectively. Reedy Creek also reimburses Orlando for a portion of the reservation charges associated with the project's firm gas transportation agreement with Florida Gas. In 2005, Orlando executed an agreement with Reedy Creek for periodic sales of up to 15 MW of non-firm available energy at firm rates.

Excess energy sales

In 2006, Orlando executed a master purchase and sale agreement with Rainbow Energy Marketing Corporation ("Rainbow"). Under the agreement, Rainbow markets up to 15 MW of non-firm energy at spot market rates subject to the profitability of such sales. The arrangements with Rainbow can be terminated by either party upon 30 days notice.

Steam sales agreement

Orlando entered into an agreement with a subsidiary of Air Products and Chemicals to supply chilled water produced using steam from the project to its cryogenic air separation facility. Orlando does not have any minimum steam delivery requirements beyond the thermal and efficiency requirements required to maintain its QF status. Orlando is required to purchase its nitrogen

Table of Contents

requirements from Air Products and Chemicals, but does not have a minimum purchase requirement. Both the purchase price of nitrogen and the sale price of chilled water are at fixed prices that adjust based on the percentage increase/decrease in the producer price index.

Because of reduced demand for chilled water at Air Products and Chemicals during certain periods, and to ensure continued compliance with QF requirements, Orlando procured and installed water distiller units in 2009, and entered into contracts to provide the distilled water to unaffiliated third parties in the local area.

Fuel supply arrangements

Orlando buys natural gas from Orlando Power Holdings, LLC, which is indirectly owned by Northern Star, under an agreement expiring on December 31, 2013. Orlando Power has a back-to-back agreement for the purchase and supply of natural gas from Vastar Gas Marketing, Inc. ("Vastar"), which is a wholly-owned subsidiary of BP Energy Company. Under the agreement, which expires on December 31, 2013, Vastar is obligated to provide Orlando Power with its entire daily natural gas requirement. Orlando's purchase price is tied to the same coal-based and fixed escalators used for calculating the energy payments under the PPAs.

Affiliates of Orlando Power Holdings, LLC entered into co-terminous back-to-back agreements with Florida Gas for the delivery of natural gas to the project. Orlando has a contractual right to extend these agreements. Transportation costs under the agreements are determined by Florida Gas' rate schedule as filed with the FERC. These agreements provide for the transportation of up to 23,600 Mmbtu per day to the project.

Operations & maintenance

The Orlando project is operated and maintained by an affiliate of Northern Star under an operations and administrative services agreement expiring on December 31, 2023. The operator is compensated on a cost-reimbursement basis plus a fixed general and administrative charge. In addition, the operator is entitled to receive an incentive fee equal to a percentage of the excess of Orlando's operating cash flow after deducting originally anticipated maintenance capital and anticipated debt service. In 1997, Orlando also entered into a long-term maintenance agreement with Alstom Power Inc. for the long-term supply of hot gas path gas turbine parts, under which Alstom receives a monthly fee from the partnership and additional fees in certain circumstances.

Factors influencing project results

The Orlando project receives a significant portion of its revenues through capacity payments received under the PPA with PEF. In the event the facility's on-peak capacity factor falls below a specified level, capacity payments will be adjusted downward or eliminated. The energy payment under the PEF PPA largely consists of an energy component, which is adjusted based on the same coal index as used in the gas supply pricing.

The energy payment under the PPA with PEF includes a performance adjustment. During on-peak periods in which the market price for energy exceeds the PPA energy rate, for energy deliveries in excess of PEF scheduled capacity, the project receives the then as-available energy rate, determined according to regulatory methodology. Conversely, during on-peak periods when the project delivers less than the scheduled capacity, the project incurs negative performance adjustment charges corresponding to the difference between the then as-available energy rate and the PPA energy rate.

The Reedy Creek PPA also contains incentive and penalty provisions for performance above and below a specified capacity factor.

Selkirk project

General description

The Selkirk project is a 345 MW dual-fuel, combined-cycle cogeneration plant located in the Town of Bethlehem in Albany County, New York, which commenced commercial operation in 1994 as a QF. The project includes two units: Unit I (80 MW) currently sells electricity into the New York merchant market and Unit II (265 MW) sells electricity to Consolidated Edison Company of New York, Inc. (or "Con Ed"). The Selkirk project is typically operated as a mid-merit plant. The other partners include affiliates of Cogentrix, Energy Investors Funds, The McNair Group, and Fort Point Power LLC (an affiliate of Osaka Gas Energy America Corporation). Each of the partners has an interest in cash distributions by the project which changes when certain partners achieve a specified return on their equity contributions as set forth in the partnership agreement. We own: (i) 13.62% interest in the priority distributions up to a fixed semi-annual amount as described below; (ii) 19.94% interest on any distributions in excess of the priority distributions; and (iii) 17.7% of all distributions made after the last priority distribution is made, estimated to occur in 2012. If priority distributions are not made at the maximum amount, the unpaid amounts accumulate and are paid when funds are available in subsequent periods. As of December 31, 2010, our 13.62% share of unpaid priority distributions was $1.8 million. In addition to this accumulated amount, our share of the maximum semi-annual priority distributions in 2011 and 2012 is approximately $0.8 million and $0.7 million, respectively. The 15.7 acre project site is situated adjacent to a Saudi Arabia Basic Industries Corporation (or "SABIC") plastics manufacturing plant, which also purchases steam from the project. Selkirk leases the project site under a long-term lease from SABIC.

The Selkirk project has 8.98% first mortgage bonds outstanding. Our share of the outstanding amount of these bonds was $16.8 million as of December 31, 2010, which fully amortizes over the remaining term ending in 2012. See "Project-level debt" on page 72 of this Form 10-K for additional details.

Power purchase agreements

Since the expiration of Selkirk's agreement to sell 80 MW of capacity and energy from Unit I to National Grid in July 2008, Selkirk has been selling energy from Unit 1 into the New York merchant market. 265 MW of capacity and energy from Unit II is sold to Con Ed under a PPA that expires on September 1, 2014, subject to a ten-year extension at the option of Con Ed under certain conditions. It is not known whether Con Ed intends to exercise this option. The Unit II PPA provides for a capacity payment, a fuel payment, an operations and maintenance payment and a payment for transmission from the project to Con Ed. The capacity payment, a portion of the fuel payment, a portion of the operations and maintenance payment and the transmission payment are paid on the basis of plant availability.

Steam sales agreement

Selkirk sells steam generated at the project to the SABIC plastics manufacturing plant under an agreement that expires on September 1, 2014. Under the agreement, SABIC is not charged for steam in an amount up to the annual equivalent of 160,000 lbs/hr during each hour in which the SABIC plant is in production. SABIC pays the project a variable price for steam in excess of this amount. SABIC is required to purchase the minimum thermal output necessary for Selkirk to maintain its QF status.

Fuel supply arrangements

Selkirk buys natural gas for Unit I at spot market prices under a contract with Coral Energy Canada Inc. expiring on October 31, 2012. Selkirk has gas supply agreements for Unit II with Imperial

Table of Contents

Oil Resources Limited, EnCana Corporation and Canadian Forest Oil Ltd., which expire on October 31, 2014.

The project also has long-term contracts for the transportation of Units I and II natural gas volume on a firm 365-day per year basis in place with TransCanada Pipelines Limited, Iroquois Gas Transmission System LP and Tennessee Gas Pipeline Company. The Unit I and Unit II gas transportation contracts expire on November 1, 2012 and November 1, 2014, respectively.

Natural gas that is not used by Selkirk to generate power under its gas supply arrangements may be remarketed. Units I and II have the capability to operate on fuel oil subject to certain limitations under the project's air permit and are able to switch fuel sources from natural gas to fuel oil and back without interrupting the generation of electricity.

Operations & maintenance

GE operates the Selkirk project under an agreement expiring on December 31, 2012. The agreement provides for a fixed fee, capital parts discounts, a pass-through of management costs and a performance bonus. Management services for Selkirk are provided by PPMS under an administrative services agreement that expires in September 2014. PPMS is entitled to compensation under the agreement which is subject to renegotiation every four years and provides for the full recovery of its actual costs and properly allocated overhead plus a reasonable fee which must be approved by all of the Selkirk partners. In August 2010, the partners consented to the transfer of management services from Cogentrix to PPMS.

Regional greenhouse gas initiative

In 2009, in order to comply with the Regional Greenhouse Gas Initiative, the project commenced purchasing CO_2 allowances in the quarterly Regional Greenhouse Gas Initiative auctions. Under the Regional Greenhouse Gas Initiative rules, a compliance period consists of three years, during which time the emitter is required to obtain allowances corresponding to its CO_2 emissions during the same period. New York State allocates a limited number of free allowances to generators that have long-term contracts. A portion of the project's annual requirement is met with these free allowances. In resolution of a lawsuit brought by an unaffiliated owner of another New York independent power plant in 2009 challenging New York's Regional Greenhouse Gas Initiative rules, a consent decree was finalized under which Con Ed reimburses the Selkirk project for the cost of additional allowances needed in excess of the free allowances allocated by New York through that term of the PPA.

Factors influencing project results

Energy produced by Unit I (80 MW) is sold at market prices based on the project's bid into the spot market. The project is therefore exposed to fluctuations in market energy prices which may impact Unit I energy sales margins. Under the PPA with Con Ed, the project receives significant capacity revenues based on meeting availability requirements and also receives an energy payment whenever Con Ed calls on Unit II (265 MW) to generate electricity. The energy payment is primarily dependent on the fuel price component, which is indexed predominantly to natural gas prices, but also has a small component based on oil prices.

In periods when Unit I or Unit II is not generating electricity, substantial volumes of natural gas are available to be re-sold. Depending on market prices when reselling compared to contract prices when the gas was nominated at the beginning of each month, the excess gas has been resold at significant positive margins and occasionally at a loss.

TransCanada transports natural gas for the project from Selkirk's suppliers in Empress, Alberta to the interconnection with Iroquois Gas Pipeline in eastern Ontario. Under "cost of service" tolling

Table of Contents

methodology established by the National Energy Board of Canada ("NEB"), TransCanada's tolls are determined by dividing its total annual operating costs by the projected volumes of gas transported. Due to a number of factors, the volumes shipped on TransCanada have decreased significantly over the last few years. In late 2010, TransCanada commenced settlement discussions with its shippers to determine, for the period 2011 2013, the toll for gas transportation from Empress to eastern Canada. Early in the rate making process in December, based on settlement discussions, TransCanada applied for interim tolls that would have represented a reduction from the level in 2010. However after subsequent TransCanada filings, the NEB approved interim tolls that temporarily reflect an increase from the level in 2010. The NEB has instructed TransCanada to submit its final 2011 toll application by May 2011. If TransCanada cannot negotiate a settlement with its major shippers by that time, the NEB will hold hearings to obtain the shipper's arguments and recommendations before it renders a final decision.

Gregory project

General description

The Gregory project is a 400 MW natural gas-fired combined cycle cogeneration QF located near Corpus Christi, Texas that commenced commercial operation in 2000. The Gregory project is owned by Gregory Power Partners, LP, a Texas limited partnership, and our ownership interest in Gregory Power is approximately 17%. The other owners are affiliates of JP Morgan Chase & Co. and John Hancock Life Insurance Company. Gregory currently sells approximately 345 MW of its capacity to Fortis Energy Marketing and Trading GP ("Fortis") and sells up to 33 MW of electric energy and capacity to Sherwin Alumina Company ("Sherwin"), which is owned by Glencore International AG, with the remainder sold in the spot market. The project is located on a site adjacent to Sherwin's production facility, which also serves as the project's steam customer. Gregory leases the land on which the project is located from Sherwin under an operating lease which expires in August 2035.

The Gregory project was financed, in part, with a non-recourse debt that matures in 2017 and is required to be amortized over its remaining term. Our share of the total debt outstanding at the Gregory project as of December 31, 2010 was $14.4 million. See "Project-level debt" on page 72 of this Form 10-K for additional details.

In November 2008, Gregory's managing partner discovered that the state authorization of the project's Prevention of Significant Deterioration Air Permit had lapsed due to a discrepancy in the representation of the renewal date of the state authorization by a consultant in 2002. The issue was self-reported to the Texas Commission of Environmental Quality ("TCEQ"). During the first quarter of 2009, Gregory submitted its initial draft permit application to the TCEQ, which deemed it administratively complete, and completed the technical aspects of the permitting process. In December 2009, TCEQ provided Gregory Power a draft of a new permit, and on March 15, 2010, TCEQ issued the new permit at emissions limits achievable by the project and not requiring the installation of additional emissions control equipment.

Power purchase agreement

Gregory sells 345 MW of its output to Fortis under a PPA that began on January 1, 2009 and expires December 31, 2013. Under the terms of the Fortis agreement, Fortis pays a fixed capacity payment based on a fixed capacity rate and an energy payment that is based on the price of natural gas at Houston Ship Channel and a contract heat rate. (Heat rate refers to the amount of energy that is required to generate one kilowatt hour of electricity.) Energy sales to Fortis consist of two tranches: a 234 MW "must-run" block and a 111 MW "dispatchable" block. The must-run block corresponds to the project's minimum energy output while satisfying Sherwin's electricity and steam requirements without the use of Gregory's auxiliary boilers. The dispatchable block is the portion of Gregory's output

Table of Contents

that can be scheduled at the option of Fortis as either energy, ancillary services or balancing energy. Credit support for the PPA consists of a $10 million letter of credit issued by ING which is backed by letters of credit from the project's partners, including a $1.7 million letter of credit provided by Atlantic Power.

Steam sales agreement

Gregory sells steam to Sherwin under an agreement that expires in 2020. Under the terms of the agreement, Gregory is the exclusive source of steam to Sherwin's alumina plant, up to a maximum of 1,500,000 lbs/hr.

Fuel supply arrangements

Gregory purchases natural gas under various short-term and long-term agreements. Gregory has the option of procuring 100% of its natural gas requirements from Kinder Morgan Tejas Pipeline, L.P., under a market-based gas supply agreement that expires in August 2012.

In March and June 2008, the project entered into pay fixed, receive floating, natural gas swap agreements with Sempra Energy Trading Corp. for the period January 2009 through December 2010. While Gregory has structured its power and steam sales agreements to mitigate the price risk between its fuel supply and electricity sales agreements, the project has some residual exposure to natural gas price risk due to the difference between the project's actual heat rate and the contractually guaranteed heat rate under the Fortis PPA. The swap agreements partially mitigated this natural gas price risk.

Operations & maintenance

An affiliate of Babcock and Wilcox Power Generation Group, Inc. is responsible for the operation and maintenance of the Gregory project under an agreement that terminates in July 14, 2015. The operator receives a fee for management of the facility (subject to escalation) and reimbursement of certain costs.

Energy management services

Tenaska Power Services, Co. ("Tenaska") provides Gregory with energy management services such as marketing excess power from the Project through the end of 2011. Tenaska optimizes Gregory's assets in the ancillary services market of the Electric Reliability Council of Texas, purchases natural gas for operations, provides scheduling services, provides back-office support and serves as Gregory's retail energy provider and qualified scheduling entity.

Factors influencing project results

The Gregory project derives a significant portion of its operating margin through energy revenues under its PPA with Fortis. Energy revenues are dependent on the price of natural gas at Houston Ship Channel and a contract heat rate. The project achieves a margin on its energy revenue due to the facility's actual heat rate being lower than the contractually guaranteed heat rate.

Gregory also receives a capacity payment under the Fortis PPA which is dependent on maintaining certain minimum performance requirements. The project's capacity payments are subject to reduction or elimination if it fails to meet these requirements. Due to a forced outage in 2009, the project only received 98% of the full capacity revenue. However, historically the project has met all of the performance standards under the Fortis PPA.

Gregory benefits from the heat rate differential between the heat rate of the facility and the contracted heat rate under the terms of the PPA with Fortis. The heat rate of the facility is impacted by the amount of steam that Sherwin is able to accept. If Sherwin's alumina plant were to discontinue

Table of Contents

operations or decrease production levels, it would have adverse impacts on the efficiency of the Gregory facility.

Topsham project

General description

The Topsham project is a 14 MW hydroelectric facility located on the Androscoggin River at the Pejepscot dam near Topsham, Maine which began commercial operation in 1987 as a QF. A 100% undivided interest in the Topsham project and a 100% undivided interest in the Topsham project site are owned by a financial institution, in its capacity as owner trustee for the benefit of Atlantic Power (50%) and DaimlerChrysler Services North America LLC (50%) as owner participants. Electricity is sold to the Central Maine Power Company ("CMP") under a PPA that expires in 2011.

The Topsham project is leased and operated by Topsham Hydro Partners Limited Partnership ("THP"), a Minnesota limited partnership. Pursuant to a sale and lease back transaction, THP leases both our interests in the project and in the project site until November 17, 2011. At the end of the lease term, THP has the option to renew the lease or acquire our share of the project and the project site.

On February 28, 2011, we entered into a purchase and sale agreement with a third party for the purchase of our lessor interest in the project. Closing of the transaction is expected to occur in the second quarter of 2011.

Power purchase agreement

Electrical output from the Topsham project is sold to CMP under a PPA that contains a fixed price schedule and terminates on December 31, 2011.

Operations & maintenance

THP operates the project and provides all general and administrative services for the project under an agreement in effect until the earlier of December 31, 2027 or upon THP becoming the owner of 100% of the project and the project site.

Badger Creek project

General description

The Badger Creek project is a 46 MW simple-cycle, cogeneration facility located near Bakersfield, California which began commercial operation in 1991 as a QF. The Badger Creek project is owned by Badger Creek Limited, L.P. ("Badger"), a Texas limited partnership in which we own a 50% partnership interest. Juniper Generation, LLC, which is indirectly owned by affiliates of ArcLight Capital Partners, LLC, owns the other 50% partnership interest. Electricity is sold to Pacific Gas & Electric Corporation ("PG&E") under a PPA expiring in 2011. The project typically operates in a baseload configuration. Steam is sold to OXY USA Inc. ("OXY"), an affiliate of Occidental Petroleum Corporation, under an agreement that expires in 2011. Badger leases the approximately 3.5 acre site for the Badger Creek project under a ground lease. The term of the lease expires in July 2021 and the parties may extend it for up to 10 additional one-year periods.

Power purchase agreement

Electricity generated by the Badger Creek project is purchased by PG&E under a PPA that expires in 2011. The PPA provides for monthly capacity and energy payments, and Badger is entitled to receive a performance bonus if the average on-peak capacity factor exceeds 85%. The energy price received

Table of Contents

under the PPA is linked to PG&E's interim "short-run avoided cost," as discussed below. Badger Creek has commenced discussions with PG&E regarding a new PPA. It is expected that these negotiations will not be completed before the expiry of the existing PPA, at which time the project will enter into a one-year interim agreement as provided for under the California Public Utilities Commission ("CPUC") regulations.

Steam sales agreement

Steam from the Badger Creek project is sold to OXY under an agreement which expires in 2011. The agreement provides for successive renewal terms of one year unless either party gives advance notice of termination. OXY utilizes the steam in its enhanced oil recovery operations to allow for more effective and efficient extraction of heavy crude oil. Subject to certain conditions, OXY has an obligation to buy steam under this agreement in an amount not less than the minimum requirements necessary to maintain the project's status as a QF. Although OXY is not currently purchasing any power from the project, the steam agreement allows for up to 1 MW of electricity to be sold to OXY.

Fuel supply arrangements

Natural gas is delivered to Badger Creek via a private pipeline that connects with the Kern River-Mojave Pipeline. The pipeline was constructed by a joint venture in which the project owns approximately 16.8% following the assignment of a portion of the interests in the joint venture in January 2010 to an affiliate of OXY. An affiliate of Juniper operates the pipeline. In October 2006, Badger entered into a gas supply agreement, including transportation, with Sempra Energy Trading Corporation. In March 2008, the gas agreement was extended to cover fuel procurements through April 30, 2011.

Operations & maintenance

Operations and maintenance for the Badger Creek project is performed by an affiliate of Juniper Generation, LLC under a fixed price operations and maintenance agreement. The agreement expires in April 2011. The operator receives a base monthly fee, which is adjusted annually. In addition, the agreement provides for incentive fees and penalties based on the project's availability. An affiliate of Juniper also provides all day-to-day management services required by the project and is paid a semi-annual fee for such management services based on a percentage of gross cash receipts of the project.

Factors influencing project results

The Badger Creek project derives a portion of its operating margin through energy revenues under the PG&E PPA. Energy revenues are dependent on PG&E's short-run avoided costs ("SRAC"), which is generally defined as the cost of electricity that a utility avoids incurring by purchasing the power from an independent power producer versus constructing and operating additional generating resources on its own. PG&E's SRAC is determined by the CPUC in conjunction with input from independent power producers, investor owned utilities and consumer groups through the state utility regulatory process. SRAC has been, and continues to be, a highly contested issue resulting in numerous CPUC proceedings and litigation.

In April 2009, California's Market Reform and Technology Update energy market ("MRTU") commenced operation. The MRTU is expected to provide a robustly traded day-ahead market for energy that reflects the avoided marginal energy costs of California's utilities.

SRAC was based on an administratively determined formula until August 2009, when the CPUC implemented a new SRAC methodology called the market index formula ("MIF"), which includes both a market-based component and an administratively determined component. Ultimately, the CPUC is

Table of Contents

moving toward a 100% market-based SRAC. Upon the determination by the CPUC that the MRTU is functioning properly, MIF will no longer include the administratively determined component, which is expected to be lower than the original MIF pricing and create larger differences between peak and off-peak prices. Such a determination has not been made by the CPUC.

Badger has been a party to settlement negotiations among other QF facilities, California's major investor-owned utilities, and numerous consumer and independent power producer groups on a new energy pricing formula and possible extensions of firm capacity payments for projects with existing contracts that will resolve many outstanding issues between the parties. Many of the SRAC and MIF related CPUC proceedings and litigation were held in abeyance pending the outcome of the settlement negotiations. In December 2010, a settlement was approved by the CPUC, however several parties have filed requests for rehearing. The settlement is expected to be finalized and implemented in 2011.

Badger Creek's PPA and steam sales agreements expire in April 2011. To the extent the agreements cannot be extended or replaced on economical terms, the financial viability of the project would be jeopardized.

Koma Kulshan project

General description

The Koma Kulshan project is a 13.3 MW run-of-the-river hydroelectric generation facility located on the slopes of Mount Baker, approximately 80 miles north of Seattle, Washington, which began commercial operation in 1990 as a QF. The Koma Kulshan project is owned by Koma Kulshan Associates, a California limited partnership in which we own a 49.75% economic interest, Mt. Baker Corporation owns a 0.25% economic interest and Covanta Energy Corporation ("Covanta") owns the remaining 50%. The Koma Kulshan project was issued a 50-year hydro license from the FERC which expires in 2037. The project and its electrical output is sold to Puget Sound Energy, Inc. under a PPA expiring in 2037.

Our and Mt. Baker Corporation's interests in the project are held through Concrete Hydro Partners, L.P. ("Concrete"). Under the Concrete partnership agreement, Mt. Baker Corporation is entitled to reimbursement of certain deferred costs associated with the original development of the project from a portion of the distributions from the project. The full repayment of these deferred costs occurred in 2010, following which distributions are projected to be made ratably to us and Mt. Baker Corporation.

Power purchase agreement

Energy generated by the Koma Kulshan project is sold to Puget Sound Energy pursuant to a long-term PPA expiring in 2037. Power is sold at a per kilowatt hour rate that is adjusted annually. The term of the PPA is co-terminous with the FERC license. Puget Sound Energy has the right to renew the PPA for a term equivalent to the term of any subsequent license or annual license granted by the FERC for the project.

Table of Contents

Operations & maintenance

Covanta performs the operations and maintenance of the facility pursuant to an operations and maintenance agreement which expires December 31, 2010. In addition to being reimbursed for actual costs incurred, Covanta receives an annual fee adjusted for inflation.

Delta-Person project

General description

The Delta-Person project, a 132 MW natural gas-fired peaking facility located near Albuquerque, New Mexico, is an exempt wholesale generator that commenced commercial operation in 2000. We own a 40% interest in Delta-Person and affiliates of Olympus Power, LLC, John Hancock Mutual Life Insurance Company, and ArcLight Capital Partners, LLC own the remaining interests. The Delta-Person project is situated on PNM's (formerly Public Service of New Mexico) retired Delta Generating Station site under a lease agreement which is co-terminous with the project's PPA. The project operates as a peaking facility, which means that it is called upon to generate electricity only during unusually high periods of demand. The Delta-Person project sells all of its electrical output to PNM under a long-term PPA that expires in 2020.

The Delta-Person project was financed with two non-recourse term loans: (i) Tranche A due March 31, 2017; and (ii) Tranche B due March 31, 2019, both of which amortize over their remaining terms. Our share of the total debt outstanding at the Delta-Person project as of December 31, 2010 was $10.5 million. See "Project-level debt" on page 72 of this Form 10-K for additional details.

Power purchase agreement

Electrical power generated by the Delta-Person project is purchased by PNM under a PPA that will expire in 2020. PNM has the unilateral right to extend the PPA for five years by giving written notice of such extension no later than two years prior to the end of the original term of the PPA. Subject to adjustments provided for in the PPA, PNM will purchase and accept the entire output of the project when PNM calls upon the capacity. Payments consist of: (i) the energy purchase price multiplied by the kilowatt hours delivered; (ii) the capacity purchase price multiplied by the dependable capacity; (iii) the project's cost of purchasing electric service from PNM for the operations and maintenance of the facility; and (iv) any other applicable charges. In order to earn full capacity payments, the project must maintain availability of at least 97%, which the project has historically achieved.

Fuel supply arrangements

The project purchases fuel from PNM Gas Services, a division of PNM, with fuel costs passed through to PNM under the PPA. The project has access to an interruptible gas supply and transportation like other standard industrial customers on PNM Gas Services' system.

Operations & maintenance

As a simple cycle peaking facility, the project operations do not require extensive staffing and technical resources. Olympus Power provides asset management services, which include operational and contractual oversight of the facility, budget setting and environmental compliance. The project has a contractual services agreement in place with GE that covers major maintenance expenses. The costs incurred under this agreement are passed through PNM under the PPA.

Table of Contents

Factors influencing project results

The Delta-Person project derives a significant portion of its operating margin through capacity payments under the PPA with PNM. The capacity payment is based on two components which adjust annually with changes in inflation and interest rates. The capacity payment may be reduced in any monthif the project's average availability falls below 97% during that month. The project has rarely experienced such adjustment. Energy payments are based on a variable operations and maintenance component, a fuel component and an availability incentive. The fuel component is based on the actual price the project pays for fuel and a contract heat rate. The contractually guaranteed heat rate is slightly higher than the project's average operating heat rate which generates additional energy margin when the project operates. PNM will normally choose to purchase power from higher efficiency plants during periods of reduced demand. Reduced overall economic activity and related lower demand for electricity in the past two years has resulted in lower dispatch of Delta-Person by PNM.

Idaho Wind project

General description

The Idaho Wind project is a 183 MW wind power project comprised of 11 wind farms located near Twin Falls, Idaho. Construction of the projects began in June 2010 and began commercial operation in 2011 as QFs. The Idaho Wind project is owned by Idaho Wind Partners 1, LLC ("Idaho Wind"), a Delaware limited partnership in which we own a 27.6% partnership interest. Our equity interest in the project was purchased in July 2010. The other owners are affiliates of GE Energy Financial Services, Reunion Power, and Exergy Development Group, the original project developer. Electricity is sold to Idaho Power Company under eleven PPAs expiring in 2030. Idaho Wind leases the land on which the wind projects are located from various land owners under long-term leases that expire in 2040 or after.

The project was financed by Bank of Tokyo-Mitsubishi and a consortium of other lenders. On October 8, 2010, Idaho Wind closed a $221.7 million project-level credit facility. The facility is composed of two tranches, which include a $138.5 million construction loan that will convert to a 17-year term loan following commercial operation, and an $83.2 million cash grant facility which will be repaid with federal stimulus grant proceeds after completion of construction. On January 20, 2011, Idaho Wind had a second closing for an additional $19.0 million to increase the construction loan to $157.5 million. The construction loan is expected to convert to a term loan in the first quarter of 2011 and will amortize over its life and will mature in 2027.

The remaining costs of the project of approximately $200 million were funded with a combination of equity from the owners and member loans from affiliates of Atlantic Power and GE Energy Financial Services. As of December 31, 2010, our share of total debt outstanding for Idaho Wind was $48.4 million, and our share of the member loans was $22.8 million. Member loans will be paid down with a combination of excess proceeds from the federal stimulus cash grant after repaying the cash grant facility, funds from a third closing for additional debt, and project cash flow. The federal stimulus grant is expected in the second quarter of 2011 and a third closing is expected by the end of the year. As of March 18, 2011, $5.1 million of the loan has been repaid. See "Project-level debt" on page 72 on this Form 10-K for additional details.

Power Purchase Agreements

Idaho Wind sells all of its output to Idaho Power Company under 11 separate 20-year power purchase agreements that expire in 2030. Under the terms of the agreements, Idaho Power purchases all of the electricity at fixed prices, although the pricing structure under the agreements differs. For eight of the eleven PPAs, the fixed price paid for electricity escalates annually through the life of the agreement. For the remaining three agreements, the price paid for electricity remains unchanged for the term of the agreements.

Table of Contents

In the event the wind farms do not maintain a minimum level of availability or underperform relative to monthly nominations under the PPA, the price paid for electricity would be reduced. The Credit support for the PPAs consists of approximately $20.0 million of letters of credit issued by the project lenders.

Operations and Maintenance

The Idaho Wind project consists of 122 GE 1.5 MW wind turbines purchased under a turbine supply agreement with GE. The turbine supply agreement includes a two-year warranty for removal and replacement of parts.

Idaho Wind also has an 8-year operations support agreement in place with GE. The operations support agreement provides for ongoing monitoring of the performance of the wind turbine generators as well as planned and unplanned maintenance. The operations support agreement includes a warranty on wind turbine availability. Idaho Wind also has a balance of plant maintenance contract with Caribou Construction, which provides service of the substations and other maintenance not associated with the wind turbines.

Idaho Wind is operated and maintained on a day-to-day basis by an affiliate of Reunion Power pursuant to a 7-year management service agreement.

Factors influencing project results

Wind is used to generate electricity utilizing wind turbines to transform the kinetic energy of wind into electrical energy. The Idaho Wind project energy forecast and revenue projections are based on detailed wind studies. Wind speed data were collected on site for over five years then analyzed using complex computer modeling by third party consultants. If there is insufficient wind, the underlying financial performance could be materially adversely affected.

Idaho Wind is subject to operational risks that could have an adverse effect on financial performance. The risks associated with the project are partially mitigated by the operations support agreement with the original equipment supplier.

Piedmont Green Power project

General Description

Piedmont is a 53.5 MW biomass-fired electric generating facility under construction in Barnesville, Georgia approximately 60 miles southeast of Atlanta. It was developed by our 60% owned subsidiary Rollcast Energy, Inc. The project will sell 100% of its output to Georgia Power Company under a 20-year PPA. Piedmont has executed two long-term biomass fuel supply contracts with pricing terms that largely track the energy payment under the PPA. Zachry Industrial ("ZHI") is constructing the facility under a turn-key engineering procurement and construction contract. The project is being constructed on a 49.8 acre site and will consist of a wood fuel handling system, bubbling fluidized bed boiler technology and a steam turbine generator. Total project costs of approximately $207.4 million were financed in part with an $82.0 million construction loan which will convert to a term loan upon commercial operation, a $51.0 million bridge loan and approximately $75.0 million of equity to be contributed by Atlantic Power. The bridge loan will be repaid from the proceeds of a federal stimulus grant which is expected to be received two months after achieving commercial operation. Notice to proceed was authorized in October 2010 and commercial operation of the project is expected in late 2012.

Table of Contents

Power purchase agreement

The Project has a twenty-year PPA with Georgia Power for the purchase of capacity and energy expiring in September 2032. The capacity payment rate is seasonally weighted with higher payments in the summer. The capacity payment will be based on the output of the project as demonstrated in performance tests that may be administered annually, if requested by Georgia Power. The capacity payment will be adjusted seasonally based on seasonal plant availability. If contract availability is less than 96% (excluding scheduled maintenance outages, and outages caused by force majeure events) the capacity payment will be reduced by 1.5% for each 1% reduction in availability below 96%. If contract availability is below 60%, no capacity payment will be made. Over 55% of the project's revenue stream consists of capacity payments.

The energy payment is based on several factors that reflect the cost of acquiring biomass fuel in Georgia. Similar factors are reflected in the pricing of biomass under Piedmont's fuel supply contracts.

Interconnection Agreement

The project has entered into a 10-year interconnection agreement with Southern Company Services. The agreement is subject to automatic renewal for one year periods thereafter. This agreement will provide for the interconnection of the project with the transmission system of Southern Company Services.

Fuel Supply Agreements

The project's primary source of biomass fuel is urban wood waste provided through long-term supply contracts with two local suppliers. Each contract has minimum take obligations which in aggregate represent 84.0% of Piedmont's total annual biomass fuel requirements. When biomass prices in the spot market are lower than Piedmont's contracted supply, the project will have the ability to take the minimum contract amounts and obtain up to approximately 16% of its annual fuel requirements from the spot biomass market.

The two fuel supply agreements have terms of 10 and 20 years and each has automatic extension provisions. Pricing under both contracts escalates based on periodic changes in a basket of widely available indices reflecting the cost of obtaining, processing and delivery of urban wood waste biomass. Several biomass fuel studies were prepared in conjunction with the development and financing of the project, which indicated an available and sustainable biomass fuel supply exceeding several times the project's fuel requirements.

Operations & Management

Piedmont has executed a five-year operations and management agreement with Delta Power Services ("DPS"). DPS will be paid its actual direct operating costs plus an annual fee. A portion of the annual fee consists of an operating bonus which is earned by success in five performance metrics based on safety, environmental/emissions compliance, availability, fuel budget and operating budget.

Piedmont has executed a management services agreement with Rollcast for the provision of administrative services and asset management.

Factors influencing project results

The Piedmont project is currently under construction and is expected to achieve commercial operation in late 2012. The operation and financial performance of the project may be negatively impacted as a result of circumstances which prevent its timely completion, cause construction costs to exceed the level budgeted, or result in operating performance standards or permit conditions not being met. The terms of the engineering, construction and procurement agreement with ZHI provide for the

Table of Contents

project to be paid significant liquidated damages in the event certain construction milestones or performance testing requirements are not met. These liquidated damages provisions are structured to mitigate the negative impact associated with construction delays or performance shortfalls. Cost overruns are also mitigated by construction contingencies built into the construction budget.

The Piedmont project will derive a significant portion of its revenue from capacity payments under the Georgia Power PPA. In the event the project does not maintain a high availability factor, these revenues would be adversely impacted.

The project's results could be reduced due to a divergence in the energy payment under the PPA and the price that Piedmont is paying for fuel, resulting in the project under recovering its fuel expenses. The energy payment under the PPA is based on indices similar to the pricing components in the fuel supply agreements.

Piedmont is dependent on two fuel suppliers for nearly all of its fuel requirements. In the event either supplier was unable to meet its contractual obligations, the project would need to seek alternative sources for its biomass fuel supply. The project is located in an area of central Georgia, where there are significant and sustainable biomass fuel resources, including urban wood waste, forest residues, and mill residues that are capable of meeting several times the annual fuel requirements of Piedmont.

Cadillac Project

General Description

The Cadillac project is a 39.6 MW biomass power generation facility located in north central Michigan approximately 200 miles north of Detroit. The project achieved commercial operation in July 1993 and is a QF. In December 2010, Atlantic Power acquired a 100% indirect ownership in Cadillac Renewable Energy, LLC, the owner of the project, from Arclight Energy Partners Fund II and Olympus Power, LLC.

The project is located in Cadillac, Michigan. Cadillac sells up to 34 MW of its capacity and energy under a PPA with Consumers Energy Company ("Consumers"), which expires in 2028, with the remaining output sold in the spot market. The project utilizes approximately 325,000 tons of biomass fuel per year, predominantly derived from the forest products industry in the region. The project is operated by DPS under an operation and maintenance agreement.

Cadillac has non-recourse debt outstanding of $41.1 million at December 31, 2010, which fully amortizes through 2025. In addition there are notes in the aggregate amount of approximately $1.4 million with Beaver Michigan Associates, LP, a party involved in the early development of the project, due April 15, 2012. We have provided letters of credit of $3.9 million to support the PPA with Consumers.

Power purchase agreement

Energy and capacity is sold to Consumers pursuant to a PPA that expires on August 1, 2028. Revenues from the sale of electricity consist of a fixed capacity payment and an energy payment. Capacity payments are subject to the project maintaining an availability factor of at least 95% during on-peak hours, on a 12-month calendar year basis. Cadillac is subject to reductions in its capacity payment should it not achieve the 95% availability factor. The project generally has achieved the 95% availability factor continuously since commercial operations began in 1993. Energy payments are comprised of a fixed energy payment and a variable energy payment. The fixed energy payment, paid whether or not the project generates energy, is indexed to several factors related to costs associated with Consumers' costs of generation at established base load coal-fired generating facilities during the most recent calendar year. The variable energy payment is based on the amount of energy delivered to

Table of Contents

Consumers, the average operating costs of certain Consumers base plants during the most recent 12-month period, and the weighted average cost per kWh of coal burned in certain Consumers base plants for the most recent 12-month period.

In 2007, Cadillac entered into a Reduced Dispatch Agreement ("RDA") with Consumers under which the project shares in the benefit when Consumers reduces the dispatch level of the project to a specified minimum during periods in which it can purchase replacement power in the wholesale market at a price that is less than Cadillac's variable cost of production. Cadillac receives 80% of the net benefits associated with the purchase of displacement power and Consumers receive the remaining 20%. The term of the RDA runs through 2016.

The project can generate up to 4 MW of power above the maximum 34 MW that is sold to Consumers under the PPA. The excess power is sold into the Michigan Independent System Operator ("ISO"). Cadillac bids the excess power into the Michigan ISO day ahead market when prices exceed its marginal cost of production, plus a minimum gross margin.

The facility is a qualifying facility under the Michigan Renewable Portfolio Standard ("MRPS") and generates approximately 51,800 MWh of Renewable Energy Credits ("RECs") annually. The RECs are sold into the secondary market.

Fuel Supply arrangements

The project purchases fuel under numerous short-term supply contracts from approximately 30 local suppliers. The biomass fuel consists of approximately 85% forestry residue. The balance is comprised of sawdust, recycled wood and grindings. The project has annual fuel requirements of approximately 360,000 tons per year, most of which is delivered from within a 75 mile radius of the project.

Operations and maintenance

The project has a long-term operations and management agreement with DPS that is co-terminous with the PPA in July 2028. Following the acquisition of the project by Atlantic Power, DPS has retained key members of the project's management team, many of whom had been with the project since it began commercial operation 17 years ago.

Factors influencing project results

As a qualifying facility under the MRPS, the project is reimbursed for a portion of its operating expenses, including fuel, as provided for by Michigan House Bill 5524. The Bill, which does not require annual authorization or appropriation, provides for the reimbursement to qualified facilities of variable operating costs (including fuel) incurred in the production of renewable energy in excess of any variable energy payment received under a PPA. The project receives a monthly payment from Consumers for 80% of the reimbursement. The remaining 20% is withheld for an annual reconciliation. The benefits of House Bill 5524 are limited to seven qualifying facilities in Michigan and payments to the qualifying facilities are capped at $1 million per month. Cadillac's share of the total payments is based on the project's pro rata share of aggregate generation among the six other qualifying facilities. In 2010 the project received $1.5 million under the Bill. Variable costs of operation, including fuel costs in excess of the variable energy payment under the Consumers PPA are eligible for reimbursement.

A proceeding is currently underway before the Michigan Public Service Commission to, among other things, finalize the reconciliation of reimbursement payments by Consumers for the period of October 2008 through December 2009. A final order from the Michigan Public Service Commission is expected in the second half of 2011.

Biomass development projects

Biomass-derived power is a well-established, conventional technology. In biomass power plants, the fuel is burned in a boiler to create steam that turns a turbine to generate electricity. In general, biomass power plants are designed to be operated as baseload units. While biomass encompasses a broad range of potential fuels, our activities are focused on "wood-residue" biomass. This feedstock includes virgin wood (from forests, wood processing facilities, etc.), agricultural residues, industrial and commercial wood waste, etc. These facilities are eligible for renewable energy credits and may also qualify for certain federal tax benefits, depending on their construction schedule. We are pursuing several biomass projects with partners who bring specific skills to their development, as more fully described below.

Rollcast Energy, Inc.

Rollcast Energy, Inc. ("Rollcast") develops, owns and operates renewable power plants that use wood or biomass fuel. Rollcast, based in Charlotte, North Carolina, has four 50 MW biomass power plants in various stages of development in the southeastern U.S. In March 2009, we acquired a 40% equity interest in Rollcast for $3.0 million. In March 2010, we acquired an additional 15% interest for $1.2 million and in April 2010, we invested an additional $0.8 million to bring our total ownership interest to 60%. The terms of our investment in Rollcast provide us the option, but not the obligation, to invest directly in biomass power plants under development by Rollcast. Two of the development projects have obtained 20-year PPAs with terms that allow for the pass-through of fuel costs to the utility customer. In October 2010, financing closed on one of our Rollcast development projects (Piedmont) and is currently under construction. We have currently invested $68.5 million and expect to invest up to a total of $75.0 million in the Piedmont project, representing substantially all of the equity interests in the project.

Onondaga Renewables, LLC

Onondaga Renewables, LLC is a 50/50 joint venture between us and Catalyst Renewables LLC formed in December 2008 to repower our decommissioned 91 MW gas-fired cogeneration facility located in Geddes, New York. Utilizing locally acquired biomass fuel, the proposed facility is expected to have a capacity of approximately 45 MW. Onondaga is currently in the process of obtaining a PPA for the full output of the facility. Our share of development expenditures to date is approximately $1.2 million.

ASSET MANAGEMENT

Our asset management strategy is to ensure that our projects receive appropriate preventative maintenance and capital expenditures if required to provide for their safety, efficiency, availability and longevity. We also proactively look for opportunities to optimize power, fuel supply and other agreements to deliver strong and predictable financial performance. For operations and maintenance services, we partner with recognized leaders in the independent power business. Most of our projects are managed by Caithness; Power Plant Management Services; and, in the case of Path 15, Western, a U.S. Federal power agency. On a case-by-case basis, Caithness, Power Plant Management Services, and Western may provide: (i) day-to-day project-level management, such as operations and maintenance and asset management activities; (ii) partnership level management tasks, such as insurance renewals, annual budgets; and (iii) partnership level management, such as acting as limited partner. In some cases these project managers or the project partnerships may subcontract with other firms experienced in project operations, such as GE, to provide for day-to-day plant operations. In addition, employees of Atlantic Power Corporation with significant experience managing similar assets are involved in all significant decisions with the objective of proactively identifying value-creating opportunities such as

contract renewals or restructurings, asset-level refinancings, add-on acquisitions, divestitures and attend partnership meetings and calls.

Caithness is one of the largest privately-held independent power producers in the United States. For over 25 years in the independent power business, Caithness has been actively engaged in the development, acquisition and management of independent power facilities for its own account as well as in venture arrangements with other entities. Caithness operates our Auburndale, Lake and Pasco projects and provides other asset management services for our Orlando, Selkirk and Badger Creek projects.

Power Plant Management Services is a management services company focused on providing senior level energy industry expertise to the independent power market. Founded in 2006, Power Plant Management provides management services to a large portfolio of solid fuel and gas-fired generating stations. Previously, Cogentrix provided these services to our Selkirk and Chambers facilities. In August 2010, Energy Investors Funds, which holds the controlling interest in a portfolio of 13 power generating projects (of which Chambers and Selkirk are a part), terminated its management services agreement with Cogentrix and entered into a new agreement with Power Plant Management Services.

Western markets, transmits and delivers hydroelectric power and related services within a 15-state region of the central and western United States. Western is one of four power marketing administrations within the U.S. Department of Energy whose role is to market and transmit electricity from multi-use water projects. Western's transmission system carries electricity from 57 power plants operated by the Bureau of Reclamation, U.S. Army Corps of Engineers and the International Boundary and Water Commission. Together, these plants have an operating capacity of approximately 8,785 MW. Western owns and maintains the Path 15 transmission line.

INDUSTRY REGULATION

Overview

In the United States, the trend towards restructuring the electric power industry and the introduction of competition in electricity generation began with the passage and implementation of the Public Utility Regulatory Policies Act of 1978, as amended ("PURPA"). Among other things, PURPA, as implemented by the FERC, generally required that vertically integrated electric utilities purchase power from QFs at their avoided cost. The FERC defines avoided cost as the incremental cost to a utility of energy or capacity which, but for the purchase from QFs, the utility would itself generate or purchase from another source. This requirement was modified in 2005, as discussed below.

Electric transmission assets, such as our Path 15 project, are regulated by the FERC on a traditional cost-of-service rate base methodology. This approach allows a transmission company to establish a revenue requirement which provides an opportunity to recover operating costs, depreciation and amortization, and a return on capital. The revenue requirement and calculation methodology is reviewed by the FERC in periodic rate cases. As determined by the FERC, all prudently incurred operating and maintenance costs, capital expenditures, debt costs and a return on equity may be collected in rates charged.

Regulation generating projects

Ten of our power generating projects are qualifying facilities under PURPA and related FERC regulations. The Delta-Person and Pasco projects are not QFs but are both exempt wholesale generators under the Public Utility Holding Company Act of 2005, as amended ("PUHCA"). The generating projects with QF status and which are currently party to a power purchase agreement with a utility or have been granted authority to charge market-based rates are exempt from FERC rate-making authority. The FERC has granted seven of the projects the authority to charge market-based rates based primarily on a finding that the projects lack market power. These projects are thus

Table of Contents

not subject to FERC rate-making. The generating projects are exempt from regulation under PUHCA and the projects with QF status are also exempt from state regulation respecting the rates of electric utilities and the financial or organizational regulation of electric utilities.

A QF falls into one or both of two primary classes, both of which would facilitate more efficient use of fossil fuels to generate electricity than typical utility plants. The first class of QFs includes energy producers that generate power using renewable energy sources such as wind, solar, geothermal, hydro, biomass or waste fuels. The second class of QFs includes cogeneration facilities, which must meet specific fossil fuel efficiency requirements by producing both electricity and steam versus electricity only. With the exception of QFs, generation, transmission and distribution of electricity remained largely owned by vertically integrated electric utilities until the enactment of the Energy Policy Act of 1992 (the "EP Act of 1992") and subsequent orders in 1996, along with electric industry restructuring initiated at the state level. Among other things, the EP Act of 1992 enhanced the FERC's power to order open access to power transmission systems, contributing to significant growth in the independent power generation industry.

In August 2005, the Energy Policy Act of 2005 (the "EP Act of 2005") was enacted, which removed certain regulatory constraints on investment in utility power producers. The EP Act of 2005 also limited the requirement from PURPA that electric utilities buy electricity from QFs to certain markets that lack competitive characteristics. Finally, the EP Act of 2005 amended and expanded the reach of the FERC's corporate merger approval authority under Section 203 of the Federal Power Act.

All of our projects are subject to reliability standards developed and enforced by the North American Electric Reliability Corporation ("NERC"). NERC is a self-regulatory non-governmental organization which has statutory responsibility to regulate bulk power system users, generation and transmission owners and operators through the adoption and enforcement of standards for fair, ethical and efficient practices.

In March 2007, the FERC issued an order approving mandatory reliability standards proposed by NERC in response to the August 2003 northeastern U.S. blackouts. As a result, users, owners and operators of the bulk power system can be penalized significantly for failing to comply with the FERC-approved reliability standards. We have designated our Senior Director for Asset Management as our FERC Compliance Officer responsible for meeting the FERC and NERC requirements and an outside law firm specializing in this area advises us on FERC and NERC compliance, including annual compliance training for relevant employees.

Regulation transmission project

The revenues received by the Path 15 project are regulated by the FERC through a rate review process every three years that sets an annual revenue requirement. Under terms of the initial rate case settlement, the project must go through the FERC review every three years.

On February 18, 2011, the project filed its revenue requirement with the FERC for the period of 2011 through 2013. Under the project's prior rate case proceeding at the FERC that set the project's revenue requirement for the period of 2008 through 2010, the Path 15 project was required to file its subsequent rate case no later than February 18, 2011.

Carbon emissions

In the United States, government policy addressing carbon emissions had gained momentum over the last two years, but has slowed at the federal level more recently. Beginning in 2009, the Regional Greenhouse Gas Initiative was established in ten Northeast and Mid-Atlantic states as the first cap-and-trade program in the United States for CO_2 emissions. These states have varied implementation plans and schedules. The two states where we have project interests, New York and New Jersey, also provide cost mitigation for independent power projects with certain types of power

Table of Contents

contracts. Other states and regions in the United Sates are developing similar regulations and it is expected that federal climate legislation will be established in the future.

Federal bills to create both a cap-and-trade allowance system and a renewable/efficiency portfolio standard have been introduced in both the U.S. House and Senate. Separately, the U.S. Environmental Protection Agency has taken several recent actions to potentially regulate CO_2 emissions.

Additionally, more than half of the U.S. states and most Canadian provinces have set mandates requiring certain levels of renewable energy production and/or energy efficiency during target timeframes. This includes generation from wind, solar and biomass. In order to meet CO_2 reduction goals, changes in the generation fuel mix are forecasted to include a reduction in existing coal resources, higher reliance on nuclear, natural gas, and renewable energy resources and an increase in demand-side resources. Investments in new or upgraded transmission lines will be required to move increasing renewable generation from more remote locations to load centers.

COMPETITION

The power generation industry is characterized by intense competition, and we compete with utilities, industrial companies and other independent power producers. In recent years, there has been increasing competition among generators in an effort to obtain power sales agreements, and this competition has contributed to a reduction in electricity prices in certain markets where supply has surpassed demand plus appropriate reserve margins. In addition, many states and regions have aggressive Demand Side Management programs designed to reduce current load and future local growth.

The U.S. power industry is continuing to undergo consolidation which may provide attractive acquisition and investment opportunities, although we believe that we will continue to confront significant competition for those opportunities and, to the extent that any opportunities are identified, we may be unable to effect acquisitions or investments on attractive terms.

We compete for acquisition opportunities with numerous private equity funds, infrastructure funds, Canadian and U.S. independent power firms, utility genco subsidiaries and other strategic and financial players. Our competitive advantages include our competitive access to capital, experienced management team, diversified projects, strong customer base, leading third-party operators and stability of project cash flow. We have similar strength in asset management and optimization.

EMPLOYEES

As of March 18, 2011, we had 13 employees. None of our employees is represented by any collective bargaining unit or a party to any collective bargaining agreement.

ITEM 1A. RISK FACTORS

Risks Related to Our Business and Our Projects

Our revenue may be reduced upon the expiration or termination of our power purchase agreements

Power generated by our projects, in most cases, is sold under PPAs that expire at various times. For example, the PPA at our Badger Creek project expires in 2011 and represent 23 MWs of our net generating capacity. PPAs at our Auburndale, Lake and Gregory projects expire by the end of 2013 and represent 335 MWs of our net generating capacity. The table on page 8 contains details about our projects' PPAs. In addition, these PPAs may be subject to termination in certain circumstances, including default by the project. When a PPA expires or is terminated, it is possible that the price received by the project for power under subsequent arrangements may be reduced significantly. It is possible that subsequent PPAs may not be available at prices that permit the operation of the project

Table of Contents

on a profitable basis. If this occurs, the affected project may temporarily or permanently cease operations.

Our projects depend on their electricity, thermal energy and transmission services customers

Each of our projects rely on one or more PPAs, steam sales agreements or other agreements with one or more utilities or other customers for a substantial portion of its revenue. The largest customers of our power generation projects, including projects recorded under the equity method of accounting, are Progress Energy Florida, Inc. ("PEF"), Tampa Electric Company ("TECO"), and Atlantic City Electric ("ACE"), which purchase approximately 37%, 14% and 10%, respectively, of the net electric generation capacity of our projects. The amount of cash available to pay dividends to shareholders is highly dependent upon customers under such agreements fulfilling their contractual obligations. There is no assurance that these customers will perform their obligations or make required payments.

Certain of our projects are exposed to fluctuations in the price of electricity

Those of our projects with no PPA or PPAs based on spot market pricing will be exposed to fluctuations in the wholesale price of electricity. In addition, should any of the long-term PPAs expire or terminate, the relevant project will be required to either negotiate a new PPA or sell into the electricity wholesale market, in which case the prices for electricity will depend on market conditions at the time.

Our most significant exposure to market power prices is at the Selkirk and Chambers projects. At Chambers, our utility customer has the right to sell a portion of the plant's output into the spot power market if it is economical to do so and the Chambers project shares in the profits from these sales. In addition, during periods of low spot electricity prices the customer takes less generation, which negatively affects the project's profitability. At Selkirk, approximately 23% of the capacity of the facility is not contracted and is sold at market prices or not sold at all if market prices do not support the profitable operation of that portion of the facility.

Our projects may not operate as planned

The revenue generated by our power generation projects is dependent, in whole or in part, on their availability, performance and the amount of electric energy and steam generated by them. The ability of our projects to meet availability requirements and generate the required amount of power to be sold to customers under the PPAs are primary determinants of the amount of cash that will be distributed from the projects to us, and that will in turn be available for dividends paid to our shareholders. There is a risk of equipment failure due to wear and tear, latent defect, design error or operator error, or force majeure events among other things, which could adversely affect revenues and cash flow. To the extent that our projects' equipment requires more frequent and/or longer than forecast down times for maintenance and repair, or suffers disruptions of plant availability and power generation for other reasons, the amount of cash available for dividends may be adversely affected.

In general, our power generation projects transmit electric power to the transmission grid for purchase under the PPAs through a single step up transformer. As a result, the transformer represents a single point of vulnerability and may exhibit no abnormal behavior in advance of a catastrophic failure that could cause a temporary shutdown of the facility until a replacement transformer can be found or manufactured.

If the reason for a shutdown is outside of the control of the operator, a power generation project may be able to make a force majeure claim for temporary relief of its obligations under the project contracts such as the PPA, fuel supply, steam sales agreement, or otherwise mitigate impacts through business interruption insurance policies maintenance and debt service reserves. If successful, such insurance claims may prevent a default or reduce monetary losses under such contracts. However, a force majeure claim may be challenged by the contract counterparty and, to the extent the challenge is successful, the outage may still have a materially adverse effect on the project.

Table of Contents

We provide letters of credit under our senior credit facility for contractual credit support at some of our projects. If the projects fail to perform under the related project-level agreements, the letters of credit could be drawn and the company would be required to reimburse our senior lenders for the amounts drawn.

Our projects depend on suppliers under fuel supply agreements and increases in fuel costs may adversely affect the profitability of the projects

Revenues earned by our projects may be affected by the availability, or lack of availability, of a stable supply of fuel at reasonable or predictable prices. To the extent possible, the projects attempt to match fuel cost setting mechanisms in supply agreements to energy payment formulas in the PPA. To the extent that fuel costs are not matched well to PPA energy payments, increases in fuel costs may adversely affect the profitability of the projects.

The amount of energy generated at the projects is highly dependent on suppliers under certain fuel supply agreements fulfilling their contractual obligations. The loss of significant fuel supply agreements or an inability or failure by any supplier to meet its contractual commitments may adversely affect our results.

Upon the expiration or termination of existing fuel supply agreements, we or our project operators will have to renegotiate these agreements or may need to source fuel from other suppliers. Our project operators may not be able to renegotiate these agreements or enter into new agreements on similar terms. Furthermore, there can be no assurance as to availability of the supply or pricing of fuel under new arrangements and it can be very difficult to accurately predict the future prices of fuel. For example, a portion of the required natural gas at our Auburndale project and all of the natural gas required at our Lake project is purchased at market prices, but the projects' PPAs that expire in 2013 do not effectively pass through changes in natural gas prices. We have executed a hedging program to substantially mitigate this risk through 2013.

The amount of energy generated at the projects is dependent upon the availability of natural gas, coal, oil or biomass. The long-term availability of such resources could change in the future.

Generation from windpower projects may be less than anticipated

We now own a windpower project, which is exposed to the risk of its wind resource having unfavorable characteristics, which in conjunction with the wind resource study, could result in unfavorable financial impacts to its expected generation and revenues.

Our operations are subject to the provisions of various energy laws and regulations

Generally, in the United States, our projects are subject to regulation by the Federal Energy Regulatory Commission, or "FERC," regarding the terms and conditions of wholesale service and rates, as well as by state agencies regarding PPAs entered into by qualifying facility projects and the siting of the generation facilities. The majority of our generation is sold by qualifying facility projects under PPAs that required approval by state authorities.

In August 2005, the Energy Policy Act of 2005 was enacted, which removed certain regulatory constraints on investment in utility power producers. The Energy Policy Act of 2005 also limited the requirement that electric utilities buy electricity from qualifying facilities to certain markets that lack competitive characteristics, potentially making it more difficult for our current and future projects to negotiate favorable PPAs with these utilities. Finally, the Energy Policy Act of 2005 amended and expanded the reach of the FERC's merger approval authority.

If any project that is a qualifying facility were to lose its status as a qualifying facility, then such project may no longer be entitled to exemption from provisions of the Public Utility Holding Company Act of 2005 or from provisions of the Federal Power Act and state law and regulations. Such project

may be able to obtain exempt wholesale generator status to maintain its exemption from the provisions of the Public Utility Holding Company Act of 2005; however, our projects may not be able to obtain such exemptions. Loss of qualifying facility status could trigger defaults under covenants to maintain qualifying facility status in the PPAs and project-level debt agreements and if not cured within allowed cure periods, could result in termination of agreements, penalties or acceleration of indebtedness under such agreements, plus interest.

Our projects require licenses, permits and approvals which can be in addition to any required environmental permits. No assurance can be provided that we will be able to obtain, comply with and renew, as required, all necessary licenses, permits and approvals for these facilities. If we cannot comply with and renew as required all applicable licenses, permits and approvals, our business, results of operations and financial condition could be adversely affected.

The Energy Policy Act of 2005 provides incentives for various forms of electric generation technologies, which may subsidize our competitors. In addition, pursuant to the Energy Policy Act of 2005, the FERC selected an electric reliability organization to impose mandatory reliability rules and standards. Among other things, the FERC's rules implementing these provisions allow such reliability organizations to impose sanctions on generators that violate their new reliability rules.

The introductions of new laws, or other future regulatory developments, may have a material adverse impact on our business, operations or financial condition.

Future FERC rate determinations could negatively impact Path 15's cash flows

The stability of Path 15's cash flows will continue to be subject to the risk of the FERC's adjusting the expected formulation of revenues upon its rate review every three years. Such a rate review has commenced in February 2011. The cost-of-service methodology currently applied by the FERC is well established and transparent; however, certain inputs in the FERC's determination of rates are subject to its discretion, including its response to protests from intervenors in such rate cases, which include return on equity and the recovery of certain extraordinary expenses. Unfavorable decisions on these matters could adversely affect the cash flow, financial position and results of operations of us and Path 15, and could adversely affect our cash available for dividends.

Noncompliance with federal reliability standards may subject us and our projects to penalties

Our operations are subject to the regulations of the North American Electric Reliability Corporation ("NERC"), a self-regulatory non-governmental organization which has statutory responsibility to regulate bulk power system users, generation and transmission owners and operators. NERC groups the users, owners, and operators of the bulk power system into 17 categories, known as functional entities e.g., Generator Owner, Generator Operator, Purchasing-Selling Entity, etc. according to the tasks they perform. The NERC Compliance Registry lists the entities responsible for complying with the mandatory reliability standards and the FERC, NERC, or a regional reliability organization may assess penalties against any responsible entity found to be in noncompliance. Violations may be discovered through self-certification, compliance audits, spot checking, self-reporting, compliance investigations by NERC (or a regional reliability organization) and the FERC, periodic data submittals, exception reporting, and complaints. The penalty that might be imposed for violating the requirements of the standards is a function of the Violation Risk Factor. Penalties for the most severe violations can reach as high as $1 million per violation, per day, and our projects could be exposed to these penalties if violations occur.

Our projects are subject to significant environmental and other regulations

Our projects are subject to numerous and significant federal, state and local laws, including statutes, regulations, by-laws, guidelines, policies, directives and other requirements governing or relating to, among other things: air emissions; discharges into water; ash disposal; the storage, handling,

Table of Contents

use, transportation and distribution of dangerous goods and hazardous, residual and other regulated materials, such as chemicals; the prevention of releases of hazardous materials into the environment; the prevention, presence and remediation of hazardous materials in soil and groundwater, both on and off site; land use and zoning matters; and workers' health and safety matters. As such, the operation of our projects carries an inherent risk of environmental, health and safety liabilities (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in the projects being involved from time to time in administrative and judicial proceedings relating to such matters.

The Clean Air Act and related regulations and programs of the Environmental Protection Agency extensively regulate the air emissions of sulfur dioxide, nitrogen oxides, mercury and other compounds emitted by power plants. Environmental laws and regulations have generally become more stringent over time, and this trend may continue. In particular, the Environmental Protection Agency has promulgated regulations under the federal Clean Air Interstate Rule ("CAIR") requiring additional reductions in nitrogen oxides, or "NOX," and sulphur dioxide, or "SO_2," emissions, beginning in 2009 and 2010 respectively, and has also promulgated regulations requiring reductions in mercury emissions from coal-fired electric generating units, beginning in 2010 with more substantial reductions expected in 2018. Moreover, certain of the states in which we operate have promulgated air pollution control regulations which are more stringent than existing and proposed federal regulations.

While CAIR was set aside by a court decision in 2008, that decision allowed the CAIR requirements to remain in place pending further rulemaking by the Environmental Protection Agency. On July 6, 2010, the Environmental Protection Agency proposed to replace CAIR with the Interstate Transport Rule which would require 31 states and the District of Columbia to curb emissions of sulfur dioxide and nitrogen oxides from power plants through more aggressive state-by-state emissions budgets for nitrogen oxides and sulfur dioxide. The Environmental Protection Agency expects to finalize the interstate transport rule in late spring of 2011. The first phase of compliance would be required by early 2012 and the second phase by early 2014. Compliance with the proposed rule may have a material adverse impact on our business, operations or financial condition.

The Environmental Protection Agency proposed new mercury emissions standards for power plants on March 16, 2011 and is expected to have new standards in place by November 2014. Meeting these new standards at our coal-fired facility may have a material adverse impact on our business, operations or financial condition.

The Resource Conservation and Recovery Act has historically exempted fossil fuel combustion wastes from hazardous waste regulation. However, in June 2010 the Environmental Protection Agency proposed two alternative sets of regulations governing coal ash. One set of proposed regulations would designate coal ash as "special waste" and bring ash impoundments at coal-fired power plants under federal regulations governing hazardous solid waste under Subtitle C of the Resource Conservation and Recovery Act. Another set of proposed regulations would regulate coal ash as a non-hazardous solid waste. If the Environmental Protection Agency determines to regulate coal ash as a hazardous waste, our coal-fired facility may be subject to increased compliance obligations and costs that may have a material adverse impact on our business, operations or financial condition.

Significant expenditures may be required for either capital expenditures or the purchase of allowances under any or all of these programs to keep the projects compliant with environmental laws and regulations. The projects' PPAs do not allow for the pass through of emissions allowance or emission reduction capital expenditure costs, with the exception of Pasco. If it is not economical to make those expenditures it may be necessary to retire or mothball facilities, or restrict or modify our operations to comply with more stringent standards.

Our projects have obtained environmental permits and other approvals that are required for their operations. Compliance with applicable environmental laws, regulations, permits and approvals and

Table of Contents

material future changes to them could materially impact our businesses. Although we believe the operations of the projects are currently in material compliance with applicable environmental laws, licenses, permits and other authorizations required for the operation of the projects and although there are environmental monitoring and reporting systems in place with respect to all the projects, there is no guarantee that more stringent laws will not be imposed, that there will not be more stringent enforcement of applicable laws or that such systems may not fail, which may result in material expenditures. Failure by the projects to comply with any environmental, health or safety requirements, or increases in the cost of such compliance, including as a result of unanticipated liabilities or expenditures for investigation, assessment, remediation or prevention, could result in additional expense, capital expenditures, restrictions and delays in the projects' activities, the extent of which cannot be predicted.

Our projects are subject to regulation of CO_2 and other greenhouse gases

Ongoing public concerns about emissions of CO_2 and other greenhouse gases have resulted in the enactment of, and proposals for, laws and regulations at the federal, state and regional levels, some of which do or could apply to some of our project operations. For example, the multi-state CO_2 cap-and-trade program known as the Regional Greenhouse Gas Initiative applies to our fossil fuel facilities in the Northeast region. The Regional Greenhouse Gas Initiative program went into effect on January 1, 2009. CO_2 allowances are now a tradable commodity, currently averaging in the $1.86/ton range. The State of Florida has conducted stakeholder meetings as part of the process of developing greenhouse gas emissions regulations, the most recent of which was in January 2009. Discussions indicate favoring a program similar to that of the Regional Greenhouse Gas Initiative.

California, New Mexico, Washington and other states are part of the Western Climate Initiative, which is developing a regional cap-and-trade program to reduce greenhouse gas emissions in the region to 15% below 2005 levels by 2020.

In 2006, the State of California passed legislation initiating two programs to control/reduce the creation of greenhouse gases. The two laws, more commonly known as AB 32 and SB 1368, are currently in the regulatory rulemaking phase which will involve public comment and negotiations over specific provisions. Development towards the implementation of these programs continues.

Under AB 32 (the California Global Warming Act of 2006) the California Air Resources Board ("CARB") is required to adopt a greenhouse gas emissions cap on all major sources (not limited to the electric sector). In order to do so, it must adopt regulations for the mandatory reporting and verification of greenhouse gas emissions and to reduce state-wide emissions of greenhouse gases to 1990 levels by 2020. This will most likely require that electric generating facilities reduce their emissions of greenhouse gases or pay for the right to emit by the implementation date of January 1, 2012. The program has yet to be finalized and the decision as to whether allocations will be distributed or auctioned will be determined in the rulemaking process that is currently underway. Discussion to date favors an auction-based allocation program.

Since the 2010 elections in California, the legality of AB 32 has been challenged by several parties. On January 21, 2011, the San Francisco Superior Court issued a proposed decision that could significantly delay the implementation of AB 32. In *Association of Irritated Residents, et al. v. California Air Resources Board*, Case No. CPF-09-509562, the Court held that the CARB failed to comply with the California Environmental Quality Act. The Court found the CARB to have neglected to conduct a sufficient environmental impact review prior to adopting the AB 32 Scoping Plan. Specifically, CARB failed to adequately analyze all potential alternatives and prematurely adopted the Scoping Plan prior to fully responding to public comment.

SB 1368 added the requirement that the California Energy Commission, in consultation with the California Public Utilities Commission (the "CPUC") and the CARB establish greenhouse gas emission performance standards and implement regulations for power purchase agreements that exceed five

Table of Contents

years entered into prospectively by publicly-owned electric utilities. The legislation directs the California Energy Commission to establish the performance standard as one not exceeding the rate of greenhouse gas emitted per megawatt-hour associated with combined-cycle, gas turbine baseload generation, such as our Badger Creek project. Provisions are under consideration in the rulemaking process to allow facilities that have higher CO_2 emissions to be able to negotiate PPAs for up to a five-year period or sell power to entities not subject to SB 1368.

In addition to the regional initiatives, legislation for the reduction of greenhouse gases has been introduced at the federal level and if passed, may eventually override the regional efforts with a national cap and trade program. Federal bills to create both a cap-and-trade allowance system and a renewable/efficiency portfolio standard have been introduced in both the House and Senate. Separately, the Environmental Protection Agency has taken several recent actions proposing possible regulation of greenhouse gas emissions.

The Environmental Protection Agency's actions include its finding of "endangerment" to public health and welfare from greenhouse gases, its issuance in September 2009 of the Final Mandatory Reporting of Greenhouse Gases Rule which requires large sources, including power plants, to monitor and report greenhouse gas emissions to the Environmental Protection Agency annually starting in 2011, and its publication in May 2010 of its final Prevention of Significant Deterioration and Title V Greenhouse Gas Tailoring Rule, to take effect in 2011, which requires large industrial facilities, including power plants, to obtain permits to emit, and to use best available control technology to curb emissions of, greenhouse gases.

The implementation of existing CO_2 and other greenhouse gas legislation or regulation, the introduction of new regulation, or other future regulatory developments may subject the Company to increased compliance obligations and costs that could have a material adverse impact on our business, operations or financial condition.

All of our generating facilities are prepared to meet the March 31, 2011 requirement to submit 40 CFR Part 98 Mandatory Greenhouse Gas reporting for the emission of eligible site generated greenhouse gases in 2010. This is a national requirement and stands as a start in developing a baseline for greenhouse gases emissions at a national level.

Increasing competition could adversely affect our performance and the performance of our projects

The power generation industry is characterized by intense competition, and our projects encounter competition from utilities, industrial companies and other independent power producers, in particular with respect to uncontracted output. In recent years, there has been increasing competition among generators for power sales agreements, and this has contributed to a reduction in electricity prices in certain markets where supply has surpassed demand plus appropriate reserve margins. In addition, many states have implemented or are considering regulatory initiatives designed to increase competition in the U.S. power industry. Increasing competition among participants in the power generation industry may adversely affect our performance and the performance of our projects.

We have limited control over management decisions at certain projects

In a number of cases, our projects are not wholly-owned by us or we have contracted for their operations and maintenance, and in some cases we have limited control over the operation of the projects. Although we generally prefer to acquire projects where we have control, we may make acquisitions in non-control situations to the extent that we consider it advantageous to do so and consistent with regulatory requirements and restrictions, including the Investment Company Act of 1940. Third-party operators (such as Caithness, PPMS and Western) operate many of the projects. As such, we must rely on the technical and management expertise of these third-party operators, although typically we are represented on a management or operating committee if we do not own 100% of a project. To the extent that such third-party operators do not fulfill their obligations to manage the

Table of Contents

operations of the projects or are not effective in doing so, the amount of cash available to pay dividends may be adversely affected.

We may face significant competition for acquisitions and may not successfully integrate acquisitions

Our business plan includes growth through identifying suitable acquisition opportunities, pursuing such opportunities, consummating acquisitions and effectively integrating them with our business. We may be unable to identify attractive acquisition candidates in the power industry in the future, and we may not be able to make acquisitions on an accretive basis or be sure that acquisitions will be successfully integrated into our existing operations, any of which could negatively impact our ability to continue paying dividends in the future at current rates.

Although electricity demand is expected to grow, creating the need for more generation, and the U.S. power industry is continuing to undergo consolidation and may offer attractive acquisition opportunities, we are likely to confront significant competition for those opportunities and, to the extent that any opportunities are identified, we may be unable to effect acquisitions or investments.

Any acquisition or investment may involve potential risks, including an increase in indebtedness, the inability to successfully integrate operations, the potential disruption of our ongoing business, the diversion of management's attention from other business concerns and the possibility that we pay more than the acquired company or interest is worth. There may also be liabilities that we fail to discover, or are unable to discover, in our due diligence prior to the consummation of an acquisition, and we may not be indemnified for some or all these liabilities. In addition, our funding requirements associated with acquisitions and integration costs may reduce the funds available to us to make dividend payments.

Insurance may not be sufficient to cover all losses

Our business involves significant operating hazards related to the generation of electricity. While we believe that the projects' insurance coverage addresses all material insurable risks, provides coverage that is similar to what would be maintained by a prudent owner/operator of similar facilities, and are subject to deductibles, limits and exclusions which are customary or reasonable given the cost of procuring insurance, current operating conditions and insurance market conditions, there can be no assurance that such insurance will continue to be offered on an economically feasible basis, nor that all events that could give rise to a loss or liability are insurable, nor that the amounts of insurance will at all times be sufficient to cover each and every loss or claim that may occur involving our assets or operations of our projects. Any losses in excess of those covered by insurance, which may include a significant judgment against any project or project operator, the loss of a significant permit or other approval or the imposition of a significant fine or penalty, could have a material adverse effect on our business, financial condition and future prospects and could adversely affect dividends to our shareholders.

Financing arrangements could negatively impact our business

Our current or future borrowings could increase the level of financial risk to us and, to the extent that the interest rates are not fixed and rise, or that borrowings are refinanced at higher rates, then cash available for dividends could be adversely affected. As of March 18, 2011, we had no borrowings outstanding under our revolving credit facility, $212.9 million of outstanding convertible debentures, and $251.8 million of outstanding non-recourse project-level debt. Covenants in these borrowings may also adversely affect cash available for dividends. In addition, most of the projects currently have non-recourse term loans or other financing arrangements in place with various lenders. These financing arrangements are typically secured by all of the project assets and contracts as well as our equity interests in the project. The terms of these financing arrangements generally impose many covenants and obligations on the part of the borrower. For example, some agreements contain requirements to

Table of Contents

maintain specified debt service coverage ratios before cash may be distributed from the relevant project to us. In many cases, a default by any party under key project agreements (such as a PPA or a fuel supply agreement) will also constitute a default under the project's term loan or other financing arrangement. Failure to comply with the terms of these term loans or other financing arrangements, or events of default thereunder, may prevent cash distributions by the project to us and may entitle the lenders to demand repayment and/or enforce their security interests.

Our failure to refinance or repay any indebtedness when due could constitute a default under such indebtedness. Under such circumstances, it is expected that dividends to our shareholders would not be permitted until such indebtedness was refinanced or repaid and we may be required to sell assets or take other actions, including the initiation of bankruptcy proceedings or the commencement of an out-of-court debt restructuring.

Our equity interests in our projects may be subject to transfer restrictions

The partnership or other agreements governing some of the projects may limit a partner's ability to sell its interest. Specifically, these agreements may prohibit any sale, pledge, transfer, assignment or other conveyance of the interest in a project without the consent of the other partners. In some cases, other partners may have rights of first offer or rights of first refusal in the event of a proposed sale or transfer of our interest. These restrictions may limit or prevent us from managing our interests in the projects in the manner we see fit, and may have an adverse effect on our ability to sell our interests in these projects at the prices we desire.

The projects are exposed to risks inherent in the use of derivative instruments

We and the projects may use derivative instruments, including futures, forwards, options and swaps, to manage commodity and financial market risks. In the future, the project operators could recognize financial losses on these arrangements as a result of volatility in the market values of the underlying commodities or if a counterparty fails to perform under a contract. If actively quoted market prices and pricing information from external sources are not available, the valuation of these contracts would involve judgment or use of estimates. As a result, changes in the underlying assumptions or use of alternative valuation methods could affect the reported fair value of these contracts.

Most of these contracts are recorded at fair value with changes in fair value recorded currently in earnings, resulting in significant volatility in our income (as calculated in accordance with GAAP) that does not significantly affect current period cash flows or the underlying risk management purpose of the derivative instruments. As a result, we may be unable to accurately predict the impact that our risk management decisions may have on our quarterly and annual income (as calculated in accordance with GAAP).

If the values of these financial contracts change in a manner that we do not anticipate, or if a counterparty fails to perform under a contract, it could harm our financial condition, results of operations and cash flows. We have executed natural gas swaps to reduce our risks to changes in the market price of natural gas, which is the fuel consumed at many of our projects. Due to declining natural gas prices, we have incurred losses on these natural gas swaps. We execute these swaps only for the purpose of managing risks and not for speculative trading.

Our Piedmont project is subject to construction risk

The Piedmont project commenced construction in November 2010 and is expected to be completed in late 2012. In any construction project, there is a risk that circumstances occur which prevent the timely completion of a project, cause construction costs to exceed the level budgeted, or result in operating performance standards not being met.

Table of Contents

In the event a power project does not achieve commercial operation by its expected date, the project may be subject to increased construction costs associated with the continuing accrual of interest on the project's construction loan, which customarily matures at the start of commercial operation and converts to a term loan. A delay in completion of construction may also impact a project under its PPA which may include penalty provisions for a delay in commercial operation date or in situations of extreme delay, termination of the PPA.

Construction cost overruns which exceed the project's construction contingency amount may require that the project owner infuse additional funds in order to complete construction.

At the completion of construction, the power project may not meet its expected operating performance levels. Adverse circumstances may impact the design, construction, and commissioning of the project that could result in reduced output, increased heat rate or excessive air emissions.

RISKS RELATED TO OUR STRUCTURE

We are dependent on our projects for virtually all cash available for dividends

We are dependent on the operations and assets of the projects through our indirect ownership of interests in the projects. The actual amount of cash available for dividends to our shareholders depends upon numerous factors, including profitability, changes in revenues, fluctuations in working capital, availability under existing credit facilities, capital expenditure levels, applicable laws, compliance with contracts and contractual restrictive covenants contained in any debt documentation.

Distribution of available cash may restrict our potential growth

A payout of a significant portion of substantially all of our operating cash flow will make additional capital and operating expenditures dependent on increased cash flow or additional financing in the future. Lack of these funds could limit our future growth and cash flow. In addition, we may be precluded from pursuing otherwise attractive acquisitions or investments if the projected short-term cash flow from the acquisition or investment are not adequate to service the capital raised to fund the acquisition or investment.

Future dividends are not guaranteed

Dividends to shareholders are paid at the discretion of our board of directors. Future dividends, if any, will depend on, among other things, the results of operations, working capital requirements, financial condition, restrictive covenants, business opportunities, provisions of applicable law and other factors that our board of directors may deem relevant. Our board of directors may decrease the level of or entirely discontinue payment of dividends.

Exchange rate fluctuations may impact the amount of cash available for dividends

Our payments to shareholders and convertible debenture holders are denominated in Canadian dollars. Conversely, all of our projects' revenues and expenses are denominated in U.S. dollars. As a result, we are exposed to currency exchange rate risks. Despite our hedges against this risk through 2013, any arrangements to mitigate this exchange rate risk may not be sufficient to fully protect against this risk. If hedging transactions do not fully protect against this risk, changes in the currency exchange rate between U.S. and Canadian dollars could adversely affect our cash available for distribution.

Our indebtedness could negatively impact our business and our projects

The degree to which we are leveraged on a consolidated basis could increase and have important consequences for our shareholders, including:

- our ability in the future to obtain additional financing for working capital, capital expenditures, acquisitions or other purposes may be limited;

Table of Contents

our ability to refinance indebtedness on terms acceptable to us or at all; and

our ability to react to competitive pressures.

As of March 18, 2011, our consolidated long-term debt and our share of the debt of our unconsolidated affiliates represented approximately 50.3% of our total capitalization, comprised of debt and balance sheet equity.

Changes in our creditworthiness may affect the value of our common shares

Changes to our perceived creditworthiness may affect the market price or value and the liquidity of our common shares. The interest rate we pay on our credit facility may increase if certain credit ratios deteriorate.

Future issuances of our common shares could result in dilution

Our articles of incorporation authorize the issuance of an unlimited number of common shares for such consideration and on such terms and conditions as are established by our board of directors without the approval of any of our shareholders. We may issue additional common shares in connection with a future financing or acquisition. The issuance of additional common shares may dilute an investor's investment in us and reduce cash available for distribution per common share.

Investment eligibility

There can be no assurance that our common shares will continue to be qualified investments under relevant Canadian tax laws for trusts governed by registered retirement savings plans, registered retirement income funds, deferred profit sharing plans, registered education savings plans, registered disability savings plans and tax-free savings accounts.

We are subject to Canadian tax

As a Canadian corporation, we are generally subject to Canadian federal, provincial and other taxes, and dividends paid by us are generally subject to Canadian withholding tax if paid to a shareholder that is not a resident of Canada. We completed our initial public offering on the TSX in November 2004. At the time of the initial public offering, our public security was an IPS. Each IPS was comprised of one common share and Cdn$5.767 principal value of 11% subordinated notes due 2016. In the fourth quarter of 2009, we converted to a traditional common share company through a shareholder approved plan of arrangement in which each IPS was exchanged for one of our new common shares. Our new common shares were listed and posted for trading on the TSX commencing on December 2, 2009 and trade under the symbol "ATP," and the former IPSs, which traded under the symbol "ATP.UN," were delisted at that time. In connection with our conversion from an IPS structure to a traditional common share structure and the related reorganization of our organizational structure, we received a note from our primary U.S. holding company (the "Intercompany Note"). We are required to include in computing our taxable income interest on the Intercompany Note. We expect that our existing tax attributes initially will be available to offset this income inclusion such that it will not result in an immediate material increase to our liability for Canadian taxes. However, once we fully utilize our existing tax attributes (or if, for any reason, these attributes were not available to us), our Canadian tax liability would materially increase. Although we intend to explore potential opportunities in the future to preserve the tax efficiency of our structure, no assurances can be given that our Canadian tax liability will not materially increase at that time.

Other Canadian federal income tax risks

There can be no assurance that Canadian federal income tax laws and Canada Revenue Agency ("CRA") administrative policies respecting the Canadian federal income tax consequences generally

Table of Contents

applicable to us, to our subsidiaries, or to a holder of common shares will not be changed in a manner which adversely affects holders of our common shares.

Our prior and current structure may be subject to additional U.S. federal income tax liability

Under our prior IPS structure, we treated the subordinated notes as debt for U.S. federal income tax purposes. Accordingly, we deducted the interest payments on the subordinated notes and reduced our net taxable income treated as "effectively connected income" for U.S. federal income tax purposes. Under our current structure, our subsidiaries that are incorporated in the United States are subject to U.S. federal income tax on their income at regular corporate rates (currently as high as 35%, plus state and local taxes), and one of our U.S. holding companies will claim interest deductions with respect to the Intercompany Note in computing its income for U.S. federal income tax purposes. To the extent this interest expense under either the subordinated notes or the Intercompany Note is disallowed or is otherwise not deductible, the U.S. federal income tax liability of our U.S. holding company will increase, which could materially affect the after-tax cash available to distribute to us. While we received advice from our U.S. tax counsel, based on certain representations by us and our U.S. holding company and determinations made by our independent advisors, as applicable, that the subordinated notes and the Intercompany Note should be treated as debt for U.S. federal income tax purposes, it is possible that the Internal Revenue Service ("IRS") could successfully challenge those positions and assert that subordinated notes or the Intercompany Note should be treated as equity rather than debt for U.S. federal income tax purposes. In this case, the otherwise deductible interest on the subordinated notes or the Intercompany Note would be treated as non-deductible distributions and, in the case of the Intercompany Note, would be subject to U.S. withholding tax to the extent our U.S. holding company had current or accumulated earnings and profits. The determination of whether the subordinated notes and the U.S. holding company's indebtedness to us is debt or equity for U.S. federal income tax purposes is based on an analysis of the facts and circumstances. There is no clear statutory definition of debt for U.S. federal income tax purposes, and its characterization is governed by principles developed in case law, which analyzes numerous factors that are intended to identify the nature of the purported creditor's interest in the borrower. Furthermore, not all courts have applied this analysis in the same manner, and some courts have placed more emphasis on certain factors than other courts have. To the extent it were ultimately determined that our interest expense on either the subordinated notes or the Intercompany Note were disallowed, our U.S. federal income tax liability for the applicable open tax years would materially increase, which could materially affect the after-tax cash available to us to distribute. Alternatively, the IRS could argue that the interest on the subordinated notes or the Intercompany Note exceeded or exceeds an arm's length rate, in which case only the portion of the interest expense that does not exceed an arm's length rate may be deductible and, in the case of the Intercompany Note, the remainder would be subject to U.S. withholding tax to the extent our U.S. holding company had current or accumulated earnings and profits. We have received advice from independent advisors that the interest rate on the subordinated notes and the Intercompany Note was and is, as applicable, commercially reasonable in the circumstances, but the advice is not binding on the IRS. Furthermore, our U.S. holding company's deductions attributable to the interest expense on the Intercompany Note may be limited by the amount by which its net interest expense (the interest paid by our U.S. holding company on all debt, including the Intercompany Note, less its interest income) exceeds 50% of its adjusted taxable income (generally, U.S. federal taxable income before net interest expense, net operating loss carryovers, depreciation and amortization). Any disallowed interest expense may currently be carried forward to future years. Moreover, proposed legislation has been introduced, though not enacted, several times in recent years that would further limit the 50% of adjusted taxable income cap described above to 25% of adjusted taxable income, although recent proposals in the Fiscal Year Budget for 2010 would only apply the revised rules to certain foreign corporations that were expatriated. Furthermore, if our U.S. holding company does not make regular interest payments as required under the Intercompany Note, other limitations on the deductibility of interest under U.S.

Table of Contents

federal income tax laws could apply to defer and/or eliminate all or a portion of the interest deduction that our U.S. holding company would otherwise be entitled to with respect to the Intercompany Note.

Passive foreign investment company treatment

We do not believe that we are a passive foreign investment company, and we do not expect to become a passive foreign investment company. However, if we were a passive foreign investment company while a taxable U.S. holder held common shares, such U.S. holder could be subject to an interest charge on any deferred taxation and the treatment of gain upon the sale of our stock as ordinary income.

ITEM 2. PROPERTIES

We have included descriptions of the locations and general character of our principal physical operating properties, including an identification of the segments that use such properties, in "Item 1. Business," which is incorporated herein by reference. A significant portion of our equity interests in the entities owning these properties is pledged as collateral under our senior credit facility or under non-recourse operating level debt arrangements. See Note 1 to the consolidated financial statements for additional information regarding our operating properties.

Our principal executive office is located at 200 Clarendon Street, Floor 25, Boston, Massachusetts under a lease that expires in 2015.

ITEM 3. LEGAL PROCEEDINGS

Our Lake project is currently involved in a dispute with Progress Energy Florida over off-peak energy sales in 2010. All amounts billed for off-peak energy during 2010 by the Lake project have been paid in full by Progress. The Lake project has filed a claim against Progress in which we seek to confirm our contractual right to sell off-peak energy at the contractual price for such sales. Progress filed a counter-claim against the Lake project, seeking, among other things, the return of amounts paid for off-peak power sales during 2010 and a declaratory order clarifying Lake's rights and obligations under the PPA. The Lake project has stopped dispatching during off-peak periods and our forward guidance for distributions does not include proceeds from off-peak sales, pending the outcome of the dispute. However, we strongly believe that the court will confirm our contractual right to sell off-peak power using the contractual price that was used during 2010 and that we will be able to continue such off-peak power sales for the remainder of the term of the PPA. We have not recorded any reserves related to this dispute and expect that the outcome will not have a material adverse effect on our financial position or results of operations.

From time to time, Atlantic Power, its subsidiaries and the projects are parties to disputes and litigation that arise in the normal course of business. We assess our exposure to these matters and record estimated loss contingencies when a loss is likely and can be reasonably estimated. There are no matters pending as of December 31, 2010 that are expected to have a material impact on our financial position or results of operations.

(c) Diluted earnings (loss) per share US$ is computed including dilutive potential shares, which include those issuable upon conversion of convertible debentures and under our long term incentive plan. Because we reported a loss during the years ended December 31, 2010, 2009, 2007 and 2006, the effect of including potentially dilutive shares in the calculation during those periods is anti-dilutive. Please see the notes to our historical consolidated financial statements included elsewhere in this Form 10-K for information relating to the number of shares used in calculating basic and diluted earnings per share for the periods presented.

Overview

Atlantic Power Corporation owns interest in power projects and one transmission line located in the United States. Our current portfolio consists of interests in 13 operational power generation projects across ten states, a 500 kilovolt 84-mile electric transmission line located in California, one biomass project under construction in Georgia and several development stage generating projects. Our power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,962 megawatts ("MW"), in which our ownership interest is approximately 878 MW.

We sell the capacity and energy from our power generation projects under power purchase agreements (or "PPAs") with a variety of utilities and other parties. Under the PPAs, which have expiration dates ranging from 2011 to 2037, we receive payments for electric energy sold to our customers (known as energy payments), in addition to payments for electric generation capacity (known as capacity payments). We also sell steam from a number of our projects under steam sales agreements to industrial purchasers. The transmission system rights (or "TSRs") we own in our power transmission project entitle us to payments indirectly from the utilities that make use of the transmission line.

Our power generation projects generally operate pursuant to long-term fuel supply agreements, typically accompanied by fuel transportation arrangements. In most cases, the fuel supply and transportation arrangements correspond to the term of the relevant PPAs and many of the PPAs and steam sales agreements provide for the indexing or pass-through of fuel costs to our customers. In cases where there is not a pass-through of fuel costs, we use a financial hedging strategy designed to mitigate the market price risk of fuel purchases.

We partner with recognized leaders in the independent power industry to operate and maintain our projects, including Caithness Energy, LLC, Power Plant Management Services and the Western Area Power Administration. Under these operation, maintenance and management agreements, the operator is typically responsible for operations, maintenance and repair services.

We completed our initial public offering on the Toronto Stock Exchange (TSX: ATP) in November 2004. Our shares began trading on the NYSE under the symbol "AT" on July 23, 2010.

As of March 18, 2011, we had 68,108,042 common shares, Cdn$49.6 million principal amount of 6.50% convertible secured debentures due October 31, 2014 (the "2006 Debentures"), Cdn$76.7 million principal amount of 6.25% convertible debentures due March 15, 2017 (the "2009 Debentures"), and Cdn$80.5 million principal amount of 5.60% convertible debentures due June 30, 2017 (the "2010 Debentures" and together with the 2006 and 2009 Debentures, the "Debentures") outstanding. The

Table of Contents

2006 Debentures, 2009 Debentures and 2010 Debentures are convertible at any time, at the option of the holder, into 80.645, 76.923 and 55.249, respectively, common shares per Cdn$1,000 principal amount of Debentures, representing a conversion price of Cdn$12.40, Cdn$13.00 and Cdn$18.10, respectively, per common share. Holders of common shares currently receive a monthly dividend at a current annual rate of Cdn$1.094 per common share.

On November 24, 2009, our shareholders approved our conversion from the previous Income Participating Security ("IPS") structure to a traditional common share structure. An IPS was comprised of one common share and Cdn$5.767 principal value of 11% subordinated notes due 2016. Each IPS was exchanged for one new common share and each old common share that did not form part of an IPS was exchanged for approximately 0.44 of a new common share. This transaction resulted in the extinguishment of Cdn$347.8 million ($327.7 million) principal value of 11% subordinated notes due 2016 that previously formed a part of each IPS.

Current Trends in Our Business

Macroeconomic impacts

The recession caused significant decreases in both peak electricity demand and consumption that varied by region, although as always, summer and winter peak demand will also be greatly influenced by weather. This has the effect of delaying projected increases in capacity requirements in varying degrees by region. Typically, electricity demand makes a strong recovery to pre-recession levels along with the economic recovery and the projected delays in capacity needs tend to revert to some extent as well, depending on the pace of the recovery. The reduced electricity peak demand and consumption during a recession tends to impact base load (plants that typically operate at all times) and peaking plants (those that only operate in periods of very high demand) more than mid-merit plants (those that operate for a portion of most days, but not at night or in other lower demand periods). During recessionary periods, base load plants may be called on for lower levels of off-peak generation and peaking plants may be called on less frequently as a function of their efficiency and the overall peak demand level. The actual financial impacts on particular plants depend on whether contractual provisions, such as minimum load levels and/or significant capacity payments, partially mitigate the impact of reduced demand. One other recession-related industry impact was an easing of commodity costs, whose previous escalation had greatly increased new plant construction costs. The economic recovery has moved prices higher again for copper, steel and other inputs, with labor costs a function of regional power plant and general construction activity levels, which in some locations includes increased renewable project construction.

Increased renewable power projects

The combination of federal stimulus provisions, state renewable portfolio standards and state or regional CO_2/greenhouse gases reduction programs has provided powerful incentives to build new renewable power capacity. One simple impact of this trend is the offsetting reduction in new fossil-fired generation, with the following exception. Because significant renewable capacity is being built as intermittent resources (e.g., wind and solar) there will be an increased need by system operators to have more "firming resources." These are units that can be started quickly or idle at low levels in order to be available to compensate for sudden decreases in output from the solar or wind projects. These firming resources are generally natural gas-fired generators or, in more limited locations, pumped storage or reservoir-based hydro resources. The second significant impact of increased renewable projects is the increased need for new transmission lines to move power from renewable resources in typically more remote locations to the more highly-populated electricity load centers. This transmission requirement will require significant capital and tends to encounter a long and risky development and siting cycle.

Table of Contents

Increased shale gas resources

The substantial additions of economically viable shale gas reserves and increasing production levels have put strong downward pressure on natural gas prices in both the spot and forward markets. One impact of the reduced prices is that gas-fired generators have displaced some generation from base load coal plants, particularly in the southeast U.S. Lower natural gas prices also have compressed, and in some cases turned negative, the "spark spread", which is the industry term for the profit margin between fuel and power prices. Reduced spark spreads directly impact the profitability of plants selling power into the spot market with no contract, which are referred to as merchant plants.

The lower power prices can have a stifling impact on development of new renewable projects whose owners are attempting to negotiate power purchase agreements at favorable levels to support the financing and construction of the projects. The sense of reduced future volatility of gas prices due to increased supply has reinforced a growing expectation of the role of natural gas as a "bridging fuel," helping from a carbon policy perspective to bridge the desired U.S. transition to both cleaner fuels and more commercially viable carbon removal and sequestration technologies.

Credit markets

Weak credit markets over the past two years reduced the number of lenders providing power project financing, as well as the size and length of loans, resulting in higher costs for such financing. This reduces the number of new power projects that could be feasibly financed and built. Credit market conditions for project-lending have generally improved, but are still weaker than pre-recession levels. However, base lending rates such as LIBOR have stayed quite low by historical standards, somewhat compensating for the increased interest rate spreads demanded by project lenders. Corporate-level credit markets experienced similar adverse impacts, which impeded the ability of development companies to obtain financing for new power projects.

Factors That May Influence Our Results

Our primary objective is to generate consistent levels of cash flow to support dividends to our shareholders, which we refer to as "Cash Available for Distribution." Because we believe that our shareholders are primarily focused on income and secondarily on capital appreciation, we provide supplementary cash flow-based non-GAAP information in this Item 7 and discuss our results in terms of these non-GAAP measures, in addition to analysis of our results on a GAAP basis. See "Supplementary Non-GAAP Financial Information" included elsewhere in this Form 10-K for additional details.

The primary components of our financial results are (i) the financial performance of our projects, (ii) non-cash gains and losses associated with derivative instruments and (iii) interest expense and foreign exchange impacts on corporate-level debt. We have recorded net losses in four of the past five years, primarily as a result of non-cash losses associated with items (ii) and (iii) above, which are described in more detail in the following paragraphs.

Financial performance of our projects

The operating performance of our projects supports cash distributions that are made to us after all operating, maintenance, capital expenditures and debt service requirements are satisfied at the project-level. Our projects are able to generate Cash Available for Distribution because they generally receive revenues from long-term contracts that provide relatively stable cash flows. Risks to the stability of these distributions include the following:

While approximately 48% of our power generation revenue in 2010 was related to contractual capacity payments, commodity prices do influence our revenues and cost of fuel. Our PPAs are

Table of Contents

generally structured to minimize our risk to fluctuations in commodity prices by passing the cost of fuel through to the utility customers, but some of our projects do have exposure to market power and fuel prices. For example, a portion of the natural gas required for our Auburndale and Lake projects is purchased at spot market prices but not effectively passed through in their PPAs. Our Orlando project should benefit from switching to market prices for natural gas when its fuel contract expires in 2013 since the contract prices are above current and projected spot prices. We have executed a hedging strategy to partially mitigate this risk. See Item 7A "Quantitative and Qualitative Disclosures About Market Risk", in this Form 10-K for additional details about our hedging program at Auburndale, Lake and Orlando. Our most significant exposure to market power prices exists at the Selkirk and Chambers projects. At Chambers, our utility customer has the right to sell a portion of the plant's output to the spot power market if it is economical to do so, and the Chambers project shares in the profits from those sales. With low demand for electricity the utility reduces its dispatch to minimum contracted levels during off-peak hours. At Selkirk, approximately 23% of the capacity of the facility is currently not contracted and is sold at market power prices or not sold at all if market prices do not support profitable operation of that portion of the facility.

When revenue or fuel contracts at our projects expire, we may not be able to sell power or procure fuel under new arrangements that provide the same level or stability of project cash flows. In particular, the power agreements for our Lake and Auburndale projects expire in 2013. We expect these projects to continue operating under new PPAs and generating Cash Available for Distribution after their existing power contracts expire, but at significantly lower levels. The degree of the expected decline in Cash Available for Distribution is subject to market conditions at such time as we execute new power agreements for these projects and cannot be estimated at this time. Both of these projects will be free of debt when their PPAs expire in 2013, which provides us with some flexibility to pursue the most economic type of contract without restrictions that are sometimes imposed by project-level debt.

Some of our projects have non-recourse project-level debt that can restrict the ability of the project to make cash distributions. The project-level debt agreements typically contain cash flow coverage ratio tests that restrict the project's cash distributions if project cash flows do not exceed project-level debt service requirements by a specified amount. The Selkirk, Gregory and Delta-Person projects and Epsilon Power Partners, the holding company for our ownership in the Chambers project, are currently not meeting their cash flow coverage ratio tests and they are restricted from making cash distributions. We expect to resume receiving distributions from Epsilon Power Partners and Delta-Person in 2011, Selkirk in 2012 and Gregory in 2014. See the "Project-level debt" section of "Liquidity and Capital Resources" elsewhere in this Form 10-K for additional details.

Non-cash gains and losses on derivatives instruments

In the ordinary course of our business, we execute natural gas swap contracts to manage our exposure to fluctuations in commodity prices, forward foreign currency contracts to manage our exposure to fluctuations in foreign exchange rates and interest rate swaps to manage our exposure to changes in interest rates on variable rate project-level debt. Most of these contracts are recorded at fair value with changes in fair value recorded currently in earnings, resulting in significant volatility in our income that does not significantly affect current period cash flows or the underlying risk management purpose of the derivative instruments. See Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", in this Form 10-K for additional details about our derivative instruments.

Table of Contents

Interest expense and other costs associated with debt

Interest expense relates to both non-recourse project-level debt and corporate-level debt. In addition, in connection with our common share conversion transaction in 2009, we recorded $16.2 million of charges to interest expense associated with the costs of the conversion and the write-off of unamortized debt issuance costs associated with the subordinated notes that were retired. The conversion transaction resulted in Cdn$347.8 million ($327.7 million) of subordinated notes bearing interest at 11% being converted to equity and, as a result, we experienced a significant decrease in our interest expense beginning in 2010. Our convertible debentures are denominated in Canadian dollars and, prior to our common share conversion transaction, the outstanding subordinated notes were also denominated in Canadian dollars. These debt instruments are revalued at each balance sheet date based on the U.S. dollar to Canadian dollar foreign exchange rate at the balance sheet date, with changes in the value of the debt recorded in the consolidated statements of operations. The U.S. dollar to Canadian dollar foreign exchange rate has been volatile in recent years, which in turn creates volatility in our results due to the revaluation of our Canadian dollar-denominated debt.

Outlook

Based on our actual performance to date and projections for the remainder of the year, we expect to receive distributions from our projects in the range of $80 million to $90 million for the full year 2011. We expect overall levels of operating cash flows in 2011 to be improved over actual 2010 levels. Higher distributions from existing projects, initial distributions from our recent investment in Idaho Wind and Cadillac, and a slightly lower payment under the management termination agreement are expected to be partially offset by the non-recurrence of $8.0 million of cash tax refunds in 2010. In 2012, additional increases in distributions from projects are expected to further increase operating cash flow compared to 2011. The most significant factor in the expected higher operating cash flow in 2012 is increased distributions from Selkirk following the final payment of its non-recourse project-level debt in 2012.

The following items comprise the most significant increases in projected 2011 project distributions compared to 2010.

lower fuel costs at the Lake project

resumption of distributions from the Chambers project

annual increase in contractual capacity payments from the Auburndale project

distributions from the recently acquired Cadillac and Idaho Wind projects

In 2010, the following five projects comprised approximately 90% of project distributions received: Auburndale, Lake, Orlando, Path 15 and Pasco. For 2011, we expect these same five projects to contribute approximately 85% of total project distributions.

In addition to the items above, the following is a summary of other projections for project distributions in 2011 and beyond:

Lake

The Lake project is exposed to changes in natural gas prices from the expiration of its natural gas supply contract on June 30, 2009 through to the expiration of its PPA in July 2013 that are not passed through in its PPAs. We have executed a hedging strategy to mitigate this exposure by periodically entering into financial swaps that effectively fix the forward price of natural gas expected to be purchased at the project. These hedges are summarized in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", in this Form 10-K. We intend to continue, when appropriate, to evaluate opportunities to further mitigate natural gas price exposure at Lake in 2013, but do not intend

Table of Contents

to execute additional hedges at Lake for 2011 and 2012 because our natural gas exposure for those years is already substantially hedged.

The variable energy revenues in the Lake project's PPA are indexed, in part, to the price of coal consumed by a specific utility plant in Florida, the Crystal River facility. The components of this coal price are proprietary to the utility, but we believe that the utility purchases coal for that plant under a combination of short to medium term contracts and spot market transactions.

Coal prices used in the energy revenue component of the projected distributions from the Lake project incorporate a forecast of the applicable Crystal River facility coal cost provided by the utility based on their internal projections. The projected annual cash distributions change by approximately $1.0 million for every $0.25/Mmbtu change in the projected price of coal.

We expect to receive distributions from the Lake project of approximately $30 million to $34 million in both 2011 and 2012. The increases in 2011 and 2012 over the $28.8 million of distributions in 2010 are primarily due to higher contractual capacity payments and lower hedged natural gas prices than in 2010.

Auburndale

Based on the current forecast, we expect distributions from Auburndale of $25 million to $27 million per year from 2011 through 2013, when the project's current PPA expires. Distributions received from Auburndale in the 2011 through 2013 period will be impacted by projected coal and gas prices in the forecast period.

The projected revenue from the Auburndale PPA contains a component related to the costs of coal consumed at the utility off-taker's Crystal River facility as described above for the Lake project. Because that mechanism does not pass through changes in the project's fuel costs, Auburndale's operating margin is exposed to changes in natural gas prices for approximately 20% of its natural gas requirements through the expiration of the project's gas supply contract. The remaining 80% of the project's fuel requirements are supplied under an agreement with fixed prices through its expiration in mid-2012. We have been executing a strategy to mitigate the future exposure to changes in natural gas prices at Auburndale by periodically entering into financial swaps that effectively fix the forward price of natural gas required at the project. These hedges are summarized in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", in this Form 10-K. The 2011 natural gas price exposure at Auburndale has been substantially hedged. We intend to continue, when appropriate, to evaluate opportunities to further mitigate natural gas price exposure at Auburndale in 2012 and 2013.

Chambers

As previously reported, reduced cash flows resulted in the project not meeting cash flow coverage ratio tests in its non-recourse debt, so we received no distributions from Chambers in 2009 and in the first nine months of 2010. The Chambers project began to meet the cash flow coverage ratio for its non-recourse debt again as of September 30, 2010 and the project distributed $2.8 million to our project holding company, Epsilon Power Partners in October 2010. However, the required cash flow coverage ratio on the debt at Epsilon Power Partners has not been achieved and, as a result, Epsilon has not made any distributions to the Company during 2009 and 2010. Based on our current projections, Epsilon will continue receiving distributions from the project in 2011 based on meeting the required debt service coverage ratios and we expect Epsilon to resume making distributions to the Company in late 2011.

Consolidated Overview

We have six reportable segments: Auburndale, Lake, Pasco, Path 15, Chambers and Other Project Assets. The results of operations are discussed below by reportable segment.

Project income is the primary GAAP measure of our operating results and is discussed in "Project Operations Performance" below. In addition, an analysis of non-project expenses impacting our results is set out in "Administrative and Other Expenses (Income)" below.

Significant non-cash items, which are subject to potentially significant fluctuations, include: (1) the change in fair value of certain derivative financial instruments that are required by GAAP to be revalued at each balance sheet date (see "Quantitative and Qualitative Disclosures About Market Risk" for additional information); (2) the non-cash impact of foreign exchange fluctuations from period to period on the U.S. dollar equivalent of our Canadian dollar-denominated obligations; and (3) the related deferred income tax expense (benefit) associated with these non-cash items.

Cash available for distribution was $65.5 million, $66.3 million and $91.0 million for the years ended December 31, 2010, 2009 and 2008, respectively. See "Cash Available for Distribution" elsewhere in this Form 10-K for additional information.

Income (loss) from operations before income taxes for the years ended December 31, 2010, 2009 and 2008 was $15.1 million, $(54.2) million and $34.5 million, respectively. See "Project Income" below for additional information.

Project Income

Auburndale Segment

The decrease in project income for our Auburndale segment of $6.3 million to $4.2 million in the year ended December 31, 2010 from $10.5 million in 2009 is primarily attributable to the $6.3 million increase in the charge associated with non-cash change in fair value of derivative instruments associated with its natural gas swaps. These swaps were executed to financially hedge the project's exposure to changes in the market prices of natural gas. See Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", for additional details about our derivative instruments and other financial instruments. Project revenue at Auburndale increased by $3.0 million in 2010 due to favorable energy pricing compared to 2009, as well as the annual contractual escalation of capacity payments. This increased revenue was entirely offset by higher fuel and maintenance costs associated with the hot gas path inspection during 2010.

Lake Segment

Project income for our Lake segment increased $3.4 million to $13.6 million in the year ended December 31, 2010, from $10.2 million in 2009. The increase is primarily attributable to earnings from favorable off-peak dispatch during the summer months as well as the annual escalation of capacity payments, partially offset by higher fuel costs in 2010. In addition, there was a $3.7 million increase in the charge associated with the non-cash change in fair value of derivative instruments associated with its natural gas swaps. These swaps were executed to financially hedge the project's exposure to changes in the market prices of natural gas. See Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", for additional details about our derivative instruments and other financial instruments.

Table of Contents

Pasco Segment

The increase in project income for our Pasco segment of $1.4 million to $1.7 million in the year ended December 31, 2010 from $0.3 million in 2009 is due to lower operations and maintenance expenses attributable to an unplanned outage in 2009.

Path 15 Segment

Project income for our Path 15 segment increased $0.4 million to $7.9 million in the year ended December 31, 2010 from $7.5 million in 2009 due to lower interest and operations and maintenance expenses in 2010, partially offset by a non-recurring gain in the prior year related to the settlement of disputes with landowners over right-of-way issues.

Chambers Segment

Project income for our Chambers segment, which is recorded under the equity method of accounting, increased $6.4 million to $10.3 million in the year ended December 31, 2010 from $3.9 million in 2009. The increase in project income at Chambers is primarily attributable to lower maintenance costs as 2009 maintenance costs included a planned steam turbine overhaul, higher dispatch during a warmer summer in 2010 compared to 2009, and a $1.2 million non-cash change in fair value of derivative instruments associated with its interest rate swaps.

Other Project Assets Segment

Project income (loss) for our Other Project Assets segment decreased $11.7 million, to $4.2 million for the year ended December 31, 2010 compared to income of $15.9 million in 2009. The most significant components of the change are as follows:

- a non-cash gain in change in fair value of derivative instruments associated with the interest rate swap related to non-recourse construction financing at the Piedmont project;
- a pre-tax gain on sale of equity investment in the Rumford project of $1.5 million during the fourth quarter of 2010;
- a pre-tax long-lived asset impairment charge at the Topsham and Badger Creek projects of $2.0 million and $1.2 million, respectively, during the fourth quarter of 2010;
- a pre-tax long-lived asset impairment charge at the Rumford project of $5.5 million during the third quarter of 2009, partially offset by the absence of revenue at Rumford in 2010 as the contract that provided substantially all of the project's income expired in the fourth quarter of 2009; and
- a pre-tax gain on sale at the Mid-Georgia project of $15.8 million, which was sold in the fourth quarter of 2009.

Administrative and Other Expenses (Income)

Management fees and administration includes the costs of operating as a public company and, through December 2009, the fees and costs associated with our management by Atlantic Power Management, LLC (the "Manager"). Effective December 31, 2009, the Manager no longer provides management and administrative services for our company. The Manager is indirectly owned by the ArcLight Funds and received compensation in the form of an annual base fee that was indexed to inflation and an incentive fee that was equal to 25% of the cash distributions to shareholders in excess of Cdn$1.00 per year per IPS. We also reimbursed the Manager for reasonable costs incurred to manage our company. Management fees and administration decreased $9.9 million to $16.1 million for the year ended December 31, 2010 from $26.0 million in 2009. The decrease is attributable to the

Table of Contents

$14.1 million charge associated with the termination of the management agreements at the end of 2009 offset by a $2.2 million increase in employee share-based compensation plan expense in 2010. The expense associated with the plan varies, in part, with the market price of our common shares, which increased significantly during the year ended December 31, 2010 compared to the year ended December 31, 2009, resulting in higher expense in 2010. In addition, we incurred $1.0 million of expenses associated with our initial NYSE listing completed in July 2010 and business development costs associated with potential acquisitions.

Interest expense at the corporate level in 2010 primarily relates to our convertible debentures. Interest expense, net decreased $44.0 million to $11.7 million in 2010 from $55.7 million in 2009. This decrease is primarily due to the extinguishment of the subordinated notes that were outstanding during 2009. In November 2009 we completed our common share conversion, which resulted in the extinguishment of Cdn$347.8 million ($327.7 million) principal value of 11% subordinated notes due 2016 that previously formed a part of each IPS.

Foreign exchange loss (gain) primarily reflects the unrealized impact of changes in foreign exchange rates on the U.S. dollar equivalent of our Canadian dollar-denominated obligations to holders of the convertible debentures and, through 2009, our subordinated notes. In addition, unrealized and realized gains and losses on our forward contracts for the purchase of Canadian dollars to satisfy these obligations and our dividends to shareholders are included in foreign exchange loss (gain). Unrealized gains and losses on our forward contracts are reclassified to realized gains and losses upon cash settlement of the contracts. Foreign exchange (gain) loss increased $21.5 million to a $1.0 million gain in 2010 compared to a $20.5 million loss in 2009. The U.S. dollar to Canadian dollar exchange rate decreased by 5.7% during the year ended December 31, 2010, compared to a decrease of 15.9% in the comparable period in 2009. See Item 7A "Quantitative and Qualitative Disclosures About Market Risk" for additional details about our management of foreign currency risk and the components of the foreign exchange loss (gain) recognized during the year ended December 31, 2010 compared to the foreign exchange loss (gain) in 2009.

Year ended December 31, 2009 compared with Year ended December 31, 2008

Project Income

Auburndale Segment

Project income for our Auburndale segment increased $8.4 million to $10.5 million in 2009 from $2.1 million in 2008. The increase in project income for the twelve months ended December 31, 2009 is attributable to the fact that 2009 was the first full year of ownership of the project. The Auburndale project was acquired in November 2008.

Lake Segment

Project income for our Lake segment decreased $11.5 million, or 53%, to $10.2 million in 2009 from $21.7 million in 2008. The decrease is primarily attributable to higher fuel expense at Lake due to the expiration of its natural gas supply agreement as of June 30, 2009. A new gas supply agreement at higher prices was effective for the second half of 2009. In addition, non-cash losses associated with natural gas swaps were recorded in the change in fair value of derivative instruments during 2009 of $5.1 million. These swaps were executed to financially hedge the project's exposure to changes in the market prices of natural gas. See Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", for additional details about our derivative instruments and other financial instruments.

Table of Contents

Pasco Segment

Project income for our Pasco segment decreased $6.1 million, or 95%, to $0.3 million in 2009 from $6.4 million in 2008. The decrease in project income at Pasco was attributable to lower revenues of $47.5 million from the project's new ten-year tolling agreement effective January 1, 2009, which provides for lower rates than the power purchase agreement that expired December 31, 2008, partially offset by lower fuel expense of $26.7 million, since the new agreement requires the utility to provide the natural gas needed to generate electricity at the plant. In addition, depreciation expense decreased by $8.2 million due to the full amortization of the intangible asset associated with the project's PPA that expired on December 31, 2008. The Pasco project also recorded a $3.4 million charge in the change in fair value of derivative instruments in 2008 associated with natural gas swaps that terminated at the end of 2008.

Path 15 Segment

Project income at Path 15 for the year ended December 31, 2009 did not change significantly from 2008.

Chambers Segment

Project income for our Chambers segment, which is recorded under the equity method of accounting, decreased $7.3 million, or 65%, to $3.9 million in 2009 from $11.2 million in 2008 as a result of $9.4 million lower gross margin due to lower electricity sales volumes and prices throughout 2009 and a $4.6 million increase in operation and maintenance costs from a planned major maintenance outage in the second quarter of 2009. In addition, non-cash gains of $2.6 million associated with interest swaps were recorded in the change in fair value of derivative instruments during 2009 compared to $4.3 million of losses in 2008.

Other Project Assets Segment

Project income (loss) for our Other Project Assets segment increased $24.1 million, to $15.9 million in 2009 compared to an $(8.2) million loss in 2008, primarily due to the following:

- the gain on the sale of Mid-Georgia of $15.8 million in 2009;
- an impairment charge of $18.5 million at Stockton in 2008;
- the absence of revenue at Onondaga in 2009 as the contract that provided substantially all of the project's cash flow expired in the second quarter of 2008;
- reduced expense at Selkirk in 2009 associated with the change in fair value of derivative instruments; and
- an impairment of our equity investment in Rumford of $5.5 million in 2009.

Administrative and Other Expenses (Income)

Management fees and administration increased $16 million, or 160%, to $26 million in 2009 from $10.0 million in 2008. The increase is primarily attributable to a $14.1 million charge associated with the termination of the management agreements at the end of 2009. In addition, employee and director share-based compensation plan expense increased in 2009. The expense associated with these plans varies, in part, with the market price of our common shares, which increased significantly during 2009 compared to a decrease during the twelve months of 2008, resulting in higher expense in the 2009 period.

Table of Contents

Interest expense primarily relates to required interest costs associated with the subordinated notes and the debentures. Interest expense, net increased $12.4 million, or 29%, to $55.7 million in 2009 from $43.3 million in 2008. This increase is primarily due to the write-off of unamortized subordinated note deferred finance costs of $7.5 million, the write-off of the unamortized subordinated note premium of $0.9 million and transaction costs of $4.7 million upon closing of our conversion to a common share structure. A charge of $3.1 million was also recorded when we redeemed the remaining subordinated notes in December 2009. This charge was comprised of a premium paid on the redemption of $1.9 million and the write-off of unamortized subordinated note deferred finance costs of $1.2 million. In addition, there were amounts outstanding on our revolving credit facility for a portion of the year ended December 31, 2009 related to the temporary financing of the acquisition of the Auburndale project in late 2008.

Foreign exchange loss (gain) primarily reflects the unrealized impact of changes in foreign exchange rates on the U.S. dollar equivalent of our Canadian dollar-denominated obligations to holders of subordinated notes and debentures. In addition, unrealized and realized gains and losses on our forward contracts for the purchase of Canadian dollars to satisfy these obligations are included in foreign exchange loss (gain). Foreign exchange loss (gain) increased $67.7 million to a $20.5 million loss in 2009 compared to a $(47.2 million) gain in 2008. The U.S. dollar to Canadian dollar exchange rate decreased by 15.9% during the year ended December 31, 2009. During the year ended December 31, 2008, the rate increased by 18.6%. See Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", below for additional details about our management of foreign currency risk and the components of the foreign exchange loss (gain) recognized during the year ended December 31, 2009 compared to the foreign exchange loss (gain) in 2008.

Supplementary Non-GAAP Financial Information

The key measure we use to evaluate the results of our projects is Cash Available for Distribution. Cash Available for Distribution is not a measure recognized under GAAP, does not have a standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other issuers. We believe Cash Available for Distribution is a relevant supplemental measure of our ability to pay dividends to our shareholders. A reconciliation of net cash provided by operating activities to Cash Available for Distribution is set out below under "Cash Available for Distribution." Investors are cautioned that we may calculate this measure in a manner that is different from other companies.

The primary factor influencing Cash Available for Distribution is cash distributions received from the projects. These distributions received are generally funded from Project Adjusted EBITDA generated by the projects, reduced by project-level debt service and capital expenditures, and adjusted for changes in project-level working capital and cash reserves. Project Adjusted EBITDA is defined as project income less interest, taxes, depreciation and amortization (including non-cash impairment charges) and changes in fair value of derivative instruments. Project Adjusted EBITDA is not a measure recognized under GAAP and does not have a standardized meaning prescribed by GAAP and is therefore unlikely to be comparable to similar measures presented by other companies. We use unaudited Project Adjusted EBITDA to provide comparative information about project performance without considering how projects are capitalized or whether they contain derivative contracts that are required to be recorded at fair value. A reconciliation of project income to Project Adjusted EBITDA is set out below under "Project Adjusted EBITDA." Investors are cautioned that we may calculate this measure in a manner that is different from other companies.

Because Project Adjusted EBITDA and project distributions are key drivers of both the performance of our projects and Cash Available for Distribution, please see the following supplementary unaudited non-GAAP information that summarizes Project Adjusted EBITDA by

Project Operations Performance Year ended December 31, 2010 compared with Year ended December 31, 2009

Aggregate Project Adjusted EBITDA increased $8.4 million to $152.6 million in the year ended December 31, 2010 from $144.2 million in 2009 and included the following factors:

increased EBITDA of $6.1 million at Lake due to earnings from favorable off-peak dispatch during the summer months and increased contractual capacity payments under the project's PPA;

increased EBITDA of $5.7 million at Chambers due to lower operations and maintenance costs in 2010 as compared to 2009, which had a planned steam turbine generator overhaul outage, as well as higher generation due to better market prices on the ACE PPA;

increased EBITDA of $1.4 million at Pasco primarily attributable to a maintenance outage during the year ended December 31, 2009; partially offset by

decreased EBITDA of $1.0 million at Auburndale due to higher maintenance costs in 2010 and a longer scheduled down-time during a planned outage;

the absence of Rumford EBITDA as the project was sold in the fourth quarter of 2010; and

Table of Contents

the absence of Stockton and Mid-Georgia's EBITDA as both projects were sold in the fourth quarter of 2009.

Aggregate power generation for projects in operation at December 31, 2010 was 2.5% less than the year ended December 31, 2009. Generation during the year ended December 31, 2010 compared to the prior year was favorably impacted primarily by increased generation at Lake associated with dispatch during off-peak hours due to favorable market conditions, Chambers due to higher dispatch also as a result of favorable market conditions. The favorable variance was offset by the absence of Stockton and Mid-Georgia generation as the projects were sold in the fourth quarter of 2009 and by lower Phase II dispatch at Selkirk.

The project portfolio achieved a weighted average availability of 95.3% for the year ended December 31, 2010 compared to 95.1% in the 2009 period. The increase in portfolio availability for the year ended December 31, 2010 was primarily due to planned and forced outages at Chambers and Badger, respectively, in 2009 offset by planned outages at Lake and Auburndale in 2010. Each of the projects with reduced availability was nevertheless able to achieve substantially all of their respective capacity payments as a result of contract terms that provide for certain levels of planned and unplanned outages.

Project Operations Performance Year ended December 31, 2009 compared with Year ended December 31, 2008

Aggregate Project Adjusted EBITDA for the segments decreased $30.5 million, or 17%, to $144.2 million in 2009 from $174.7 million in 2008 and included the following factors:

increased EBITDA attributable to the acquisition of the Auburndale project in November 2008;

decreased EBITDA at Chambers attributable to lower levels of dispatch by the utility off-taker in connection with reduced demand and lower natural gas and power prices in the region. Operating the plant at a lower capacity factor also decreased its efficiency, further contributing to reduced operating margins. Additionally, decreased EBITDA attributable to a planned major outage at Chambers in the second quarter of 2009;

decreased EBITDA at Lake attributable to higher fuel expense resulting from natural gas purchases at higher prices than those under the supply contract that expired in June 2009. We have a hedging strategy to mitigate its future exposure to changes in natural gas prices. See "Quantitative and Qualitative Disclosures About Market Risk" for additional information;

decreased EBITDA at Pasco due to the commencement of the project's new ten-year tolling agreement on January 1, 2009 at lower rates than the power purchase agreement that expired December 31, 2008; and

the absence of EBITDA at Onondaga as the contracts that provided substantially all of the project's cash flow expired in the second quarter of 2008.

Aggregate power generation for projects in operation at December 31, 2009 was 2.6% lower during 2009 as compared to 2008. Weighted average plant availability increased 1.1% over the same period. Generation during the twelve months of 2009 versus the prior year period was unfavorably impacted primarily by reduced dispatch at Chambers. This was due to low market prices and a planned major maintenance outage, offset by the acquisition of Auburndale in November 2008. Also contributing to the lower generation during the period was reduced generation at Pasco as a result of the expected lower dispatch under the new tolling agreement that went into effect on January 1, 2009, which was partially offset by increased generation at Orlando in 2009 due to its unscheduled outage in March 2008.

Table of Contents

The project portfolio achieved a weighted average availability of 94.5% for 2009 versus 93.4% in 2008. The higher portfolio availability was primarily driven by the increased availability of Orlando versus the prior period resulting from the March 2008 unplanned outage as well as higher availability at Mid-Georgia due to a scheduled outage in April 2008, and the acquisition of Auburndale in November 2008, offset slightly by reduced availability at Chambers associated with a longer planned outage versus the prior period. Each of the projects with reduced availability was nevertheless able to achieve substantially all of its respective capacity payments as a result of contract terms that provide for certain levels of planned and unplanned outages.

Cash Flow from Operating Activities

Our cash flow from the projects may vary from year to year based on, among other things, changes in prices under the PPAs, fuel supply and transportation agreements, steam sales agreements and other project contracts, changes in regulated transmission rates, compliance with the terms of non-recourse project-level financing including debt repayment schedules, the transition to market or recontracted pricing following the expiration of PPAs, fuel supply and transportation contracts, working capital requirements and the operating performance of the projects. Project cash flows may have some seasonality and the pattern and frequency of distributions to us from the projects during the year can also vary, although such seasonal variances do not typically have a material impact on our business.

Cash flow from operating activities increased by $36.5 million for the year ended December 31, 2010 over the comparable period in 2009. The change from the prior year is primarily attributable to a significant decrease in cash interest expense as a result of our common share conversion in November 2009, which eliminated Cdn$347.8 million ($327.7 million) of outstanding subordinated notes, as well as higher net cash tax refunds of $8.0 million. The positive change in operating cash flow attributable to the reduced interest expense was partially offset by a $5.8 million decrease in distributions from our Orlando project and no distributions in 2010 from our Selkirk project, both of which are equity method investments. The decrease in distributions from Orlando was the result of a one-time receipt of insurance proceeds in 2009 related to an unplanned outage that occurred in 2008. The Selkirk project is currently not making distributions to partners as a result of restrictions in its non-recourse project-level debt. We expect to resume receiving distributions from Selkirk in late 2011 or early 2012.

Cash flow from operating activities decreased by $27.3 million for the year ended December 31, 2009 as compared to 2008. The changes from the prior period are consistent with and primarily attributable to the changes in Project Adjusted EBITDA described above. In addition, the $6.0 million payment in December 2009 under the terms of the management agreement termination reduced operating cash flow for the twelve months ended December 31, 2009.

Cash Flow from Investing Activities

Cash flow from investing activities includes restricted cash. Restricted cash fluctuates from period to period in part because non-recourse project-level financing arrangements typically require all operating cash flow from the project to be deposited in restricted accounts and then released at the time that principal payments are made and project-level debt service coverage ratios are met. As a result, the timing of principal payments on project-level debt causes significant fluctuations in restricted cash balances, which typically benefits investing cash flow in the second and fourth quarters of the year and decreases investing cash flow in the first and third quarters of the year.

Cash flows used in investing activities for the year ended December 31, 2010 were $147.0 million compared to cash flows provided by investing activities of $25.0 million for the year ended December 31, 2009. We acquired a 27.6% equity interest in Idaho Wind for $38.9 million and approximately $3.1 million in transaction costs. In addition, we loaned $22.8 million to Idaho Wind to temporarily fund a portion of construction costs at the project. We acquired 100% interest of Cadillac Renewable Energy for $36.6 million and assumed $43.1 million in non-recourse project-level debt. We invested $47.7 million for the construction-in-progress for our Piedmont biomass project.

Table of Contents

Cash flows provided by investing activities for the year ended December 31, 2009 were $25.0 million compared to cash flows used in investing activities of $128.6 million for the year ended December 31, 2008. We sold the assets of Mid Georgia in 2009 for proceeds of $29.1 million compared to no asset sales in 2008. In addition, we acquired Auburndale in 2008 for a total purchase price of $141.7 million compared to no acquisitions in 2009.

Cash Flow from Financing Activities

Cash provided by financing activities for the year ended December 31, 2010 resulted in a net inflow of $55.7 million compared to a net outflow of $62.9 million for the same period in 2009. The change from the prior year is primarily attributable to $72.8 million in net proceeds from our equity offering and $74.6 million in net proceeds from the issuance of convertible debentures, offset by a $40.0 million increase in dividends paid and a $6.1 million increase in project-level debt payments. We completed our common share conversion in November 2009. As a result, Cdn$347.8 million ($327.7 million) of subordinated notes were extinguished and our entire monthly distribution to shareholders is now paid in the form of a dividend as opposed to the monthly distribution being split between a subordinated notes interest payment and a common share dividend during the year ended December 31, 2009.

Cash used in financing activities for the year ended December 31, 2009 resulted in a net outflow of $62.9 million compared to a net inflow of $38.4 million for the same period in 2008. Our significant cash flows from our 2009 and 2008 financing transactions are described below:

During the year ended December 31, 2009, we repaid $55 million previously borrowed under our revolving credit facility that had been used to partially fund the acquisition of Auburndale in 2008.

During the year ended December 31, 2009, the cash used to repay project-level debt was lower compared to 2008 due to the maturity of the Pasco debt in 2008.

During December 2009, we issued, in a public offering, Cdn$86.2 million aggregate principal amount of 6.25% convertible unsecured debentures for net proceeds of $78.3 million. The proceeds were partially used to redeem the remaining Cdn$40.7 million principal value of subordinated notes.

Cash Available for Distribution

Prior to our conversion to a common share structure, holders of our IPSs received monthly cash distributions in the form of interest payments on subordinated notes and dividends on common shares. Subsequent to the conversion, holders of common shares receive the same monthly cash distributions of Cdn$1.094 per year in the form of a dividend on the new common shares. The payout ratio for the year ended December 31, 2010 was 100%.

(1) Prior to the common share conversion in November 2009, a portion of our monthly distribution to IPS holders was paid in the form of interest on the subordinated notes comprising a part of the IPSs. Subsequent to the conversion, the entire monthly cash distribution is paid in the form of a dividend on our common shares.

(2) Excludes construction-in-progress costs related to our Piedmont biomass project.

(3) Cash Available for Distribution is not a recognized measure under GAAP and does not have any standardized meaning prescribed by GAAP. Therefore, this measure may not be comparable to similar measures presented by other companies. See "Supplementary Non-GAAP Financial Information" above.

Liquidity and Capital Resources

Overview

Our primary source of liquidity is distributions from our projects and availability under our revolving credit facility. A significant portion of the cash received from project distributions is used to pay dividends to our shareholders and interest on our outstanding convertible debentures. We may fund future acquisitions with a combination of cash on hand, the issuance of additional corporate debt or equity securities and the incurrence of privately-placed bank or institutional non-recourse operating level debt.

We believe that we will be able to generate sufficient amounts of cash and cash equivalents to maintain our operations and meet obligations as they become due.

With the exception of our commitment to the construction of Piedmont Green Power, we do not expect any material unusual requirements for cash outflows for 2011 for capital expenditures or other required investments. We expect to contribute approximately $75.0 million to fund the equity portion of the construction costs for Piedmont. Approximately $59.0 million of this amount has been contributed in the fourth quarter of 2010, with the remaining balance to be paid in the first quarter of 2011. In addition, there are no debt instruments with significant maturities or refinancing requirements in 2011.

Table of Contents

See "Outlook" above for information about changes in expected distributions from our projects in 2011 and beyond.

Credit facility

We maintain a credit facility with a capacity of $100 million, $50 million of which may be utilized for letters of credit. The credit facility matures in August 2012.

The credit facility bears interest at the London Interbank Offered Rate ("LIBOR") plus an applicable margin between 1.5% and 3.25% that varies based on the credit statistics of one of our subsidiaries. As of December 31, 2010, the applicable margin was 1.5%. As of December 31, 2010, $48.6 million was allocated, but not drawn, to support letters of credit for contractual credit support at eight of our projects. In June 2010, we borrowed $20 million under the credit facility and used the proceeds to partially fund the acquisition of Idaho Wind in July 2010. In October 2010, we repaid the $20 million borrowing with proceeds from our common stock and convertible debt offerings.

We must meet certain financial covenants under the terms of the credit facility, which are generally based on the cash flow coverage ratios and also require us to report indebtedness ratios to our lenders. The facility is secured by pledges of assets and interests in certain subsidiaries. We expect to remain in compliance with the covenants of the credit facility for at least the next 12 months.

Convertible Debentures

In October 2006, we issued, in a public offering, Cdn$60 million aggregate principal amount of 6.25% convertible secured debentures, which we refer to as the 2006 Debentures, for gross proceeds of $52.8 million. The 2006 Debentures pay interest semi-annually on April 30 and October 31 of each year. The Debentures initially had a maturity date of October 31, 2011 and are convertible into approximately 80.6452 common shares per Cdn$1,000 principal amount of 2006 Debentures, at any time, at the option of the holder, representing a conversion price of Cdn$12.40 per common share. The 2006 Debentures are secured by a subordinated pledge of our interest in certain subsidiaries and contain certain restrictive covenants. In connection with our conversion to a common share structure on November 27, 2009, the holders of the 2006 Debentures approved an amendment to increase the annual interest rate from 6.25% to 6.50% and separately, an extension of the maturity date from October 2011 to October 2014. During fiscal year 2010 and fiscal year 2011 through March 18, 2011, Cdn$4.2 million and Cdn$6.2 million of the 2006 Debentures, respectively, were converted to 0.3 million and 0.5 million common shares, respectively. As of March 18, 2011 the 2006 Debentures balance is Cdn$49.6 million ($50.8 million).

In December 2009, we issued, in a public offering, Cdn$86.25 million aggregate principal amount of 6.25% convertible unsecured subordinated debentures, which we refer to as the 2009 Debentures, for gross proceeds of $82.1 million. The 2009 Debentures pay interest semi-annually on March 15 and September 15 of each year beginning September 15, 2010. The 2009 Debentures mature on March 15, 2017 and are convertible into approximately 76.9231 common shares per Cdn$1,000 principal amount of 2009 Debentures, at any time, at the option of the holder, representing a conversion price of Cdn$13.00 per common share. During fiscal year 2010 and fiscal year 2011 through March 18, 2011, Cdn$3.1 million and Cdn$6.4 million of the 2009 Debentures, respectively, were converted to 0.2 million and 0.5 million common shares, respectively. As of March 18, 2011 the 2009 Debentures balance is Cdn$76.7 million ($78.6 million).

In October 2010, we issued, in a public offering, Cdn$80.5 million aggregate principal amount of 5.60% convertible unsecured subordinated debentures, which we refer to as the 2010 Debentures, for gross proceeds of $78.9 million. The 2010 Debentures pay interest semi-annually on June 30 and December 30 of each year beginning June 30, 2011. The 2010 Debentures mature on June 30, 2017, unless earlier redeemed. The debentures are convertible into our common shares at an initial

Table of Contents

conversion rate of 55.2486 common shares per Cdn$1,000 principal amount of debentures, representing an initial conversion price of approximately Cdn$18.10 per common share. As of March 18, 2011 the 2010 debentures balance is Cdn$80.5 million ($82.5 million).

Project-level debt

The following table summarizes the maturities of project-level debt. The amounts represent our share of the non-recourse project-level debt balances at December 31, 2010 and exclude any purchase accounting adjustments recorded to adjust the debt to its fair value at the time the project was acquired. Certain of the projects have more than one tranche of debt outstanding with different maturities, different interest rates and/or debt containing variable interest rates. Project-level debt agreements contain covenants that restrict the amount of cash distributed by the project if certain debt service coverage ratios are not attained. As of December 31, 2010, the covenants at the Selkirk, Gregory and Delta-Person projects and at Epsilon Power Partners are temporarily preventing those projects from making cash distributions to us. We expect to resume receiving distributions from Epsilon Power Partners and Delta-Person in 2011, Selkirk in 2012 and Gregory in 2014. All project-level debt is non-recourse to us and substantially the entire principal is amortized over the life of the projects' PPAs. The non-recourse holding company debt relating to our investment in Chambers is held at Epsilon Power Partners, our wholly-owned subsidiary. For the year ended December 31, 2010, we have contributed approximately $3.1 million to Epsilon Power Partners for debt service payments on the holding company debt and an additional $0.48 million in January 2011 but do not anticipate any additional required contributions to Epsilon.

The range of interest rates presented represents the rates in effect at December 31, 2010. The amounts listed below are in thousands of U.S. dollars, except as otherwise stated.

We also obtained project-level bank financing for Piedmont. The terms of the financing include an $82.0 million construction and term loan and a $51.0 million bridge loan for approximately 95.0% of the stimulus grant expected to be received from the U.S. Treasury 60 days after the start of commercial operations.

Restricted cash

The projects generally have reserve requirements to support payments for major maintenance costs and project-level debt service. For projects that are consolidated, our share of these amounts is

Table of Contents

reflected as restricted cash on the consolidated balance sheet. At December 31, 2010, restricted cash at the consolidated projects totaled $15.7 million.

Capital Expenditures

Capital expenditures for the projects are generally made at the project level using project cash flows and project reserves. Therefore, the distributions that we receive from the projects are made net of capital expenditures needed at the projects. The projects in which we have investments generally consist of large capital assets that have established commercial operations. Ongoing capital expenditures for assets of this nature are generally not significant because most major expenditures relate to planned repairs and maintenance and are expensed when incurred.

In 2011, several of the projects have planned outages to complete maintenance work. The level of maintenance and capital expenditures is slightly higher than in 2010. During 2010, Selkirk completed a minor inspection of one of its combustion turbines, with costs and lost margin largely covered by reserves and gas resales proceeds, respectively. Selkirk's planned major overhaul of a steam turbine has been postponed to 2011 due to maintaining a high steam quality. In the second quarter of 2010, Chambers completed its scheduled outage to inspect and complete customary repairs on one boiler. Due to the facility's low dispatch, the planned outage of its other boiler originally scheduled for the fourth quarter of 2010 has been postponed to 2011. At Orlando, a minor gas turbine inspection was completed in May, the cost of which was largely covered under its long-term maintenance agreement with the gas turbine manufacturer. During the fourth quarter of 2010, Auburndale conducted an inspection of one of the facility's combustion turbines, which is covered by its long-term service agreement, in conjunction with other maintenance work.

In 2010, we incurred approximately $48.0 million in capital expenditures for the construction of our Piedmont biomass project. In 2011, we expect to incur approximately $95.0 million in capital expenditures related to the Piedmont project, with total project costs through expected completion in late 2012 of approximately $207.0 million. The project will be funded with an $82.0 million construction loan which will convert to a term loan upon commercial operation, a $51.0 million bridge loan and approximately $75.0 million of equity contributed by Atlantic Power. The bridge loan will be repaid from the proceeds of a federal stimulus grant which is expected to be received two months after achieving commercial operation.

Contractual Obligations and Commercial Commitments

The following table summarizes our contractual obligations as of December 31, 2010 (in thousands of U.S. dollars).

	Less than 1 Year	1 - 3 Years	3 - 5 Years	Thereafter	Total
Debt[(a)]	$ 21,587	$ 111,829	$ 216,953	$ 124,829	$ 475,198
Interest payments on debt	31,824	84,008	57,177	48,254	221,263
Total operating lease obligation	922	1,949	78		2,949
Total purchase obligations[(b)]	102,730	50,830	6,649	17,572	177,781
Total other long-term liabilities	5,914	2,048		791	8,753
Total contractual obligations	$ 162,977	$ 250,664	$ 280,857	$ 191,446	$ 885,944

(a) Debt represents our consolidated share of project long-term debt and corporate-level debt. The amount presented excludes the net unamortized purchase price adjustment of $11.3 million related to the fair value of debt assumed in the Path 15 acquisition. Project debt is non-recourse to us and is generally amortized during the term of the respective revenue generating contracts of the

Table of Contents

projects. The range of interest rates on long-term consolidated project debt at December 31, 2010 was 5.1% to 9.0%.

(b) Included in purchase obligations is $131.7 million related to construction costs for our Piedmont project.

Off-Balance Sheet Arrangements

As of December 31, 2010, we had no off-balance sheet arrangements as defined in Item 303(a)(4) of Regulation S-K.

Critical Accounting Policies and Estimates

Accounting standards require information be included in financial statements about the risks and uncertainties inherent in significant estimates, and the application of generally accepted accounting principles involves the exercise of varying degrees of judgment. Certain amounts included in or affecting our consolidated financial statements and related disclosures must be estimated, requiring us to make certain assumptions with respect to values or conditions that cannot be known with certainty at the time our financial statements are prepared. These estimates and assumptions affect the amounts we report for our assets and liabilities, our revenues and expenses during the reporting period, and our disclosure of contingent assets and liabilities at the date of our financial statements. We routinely evaluate these estimates utilizing historical experience, consultation with experts and other methods we consider reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates and any effects on our business, financial position or results of operations resulting from revisions to these estimates are recorded in the period in which the facts that give rise to the revision become known.

In preparing our consolidated financial statements and related disclosures, examples of certain areas that require more judgment relative to others include our use of estimates in determining fair values of acquired assets, the useful lives and recoverability of property, plant and equipment and PPAs, the recoverability of equity investments, the recoverability of deferred tax assets, the valuation of shares associated with our Long-Term Incentive Plan and the fair value of derivatives.

For a summary of our significant accounting policies, see Note 2 to our consolidated financial statements included in this Form 10-K. We believe that certain accounting policies are of more significance in our consolidated financial statement preparation process than others; these policies are discussed below.

Impairment of long-lived assets and equity investments

Long-lived assets, which include property, plant and equipment, transmission system rights and other intangible assets subject to depreciation and amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets by factoring in the probability weighting of different courses of action available. Generally, fair value will be determined using valuation techniques such as the present value of expected future cash flows. We discount the estimated future cash flows associated with the asset using a single interest rate representative of the risk involved with such an investment or employ an expected present value method that probability weights a range of possible outcomes. We also consider quoted market prices in active markets to the extent they are available. In the absence of such information, we may consider prices of similar assets, consult with brokers or employ other valuation techniques. We use our best estimates in making these evaluations. However, actual results could vary from the assumptions used in our estimates and the impact of such variations could be material.

Table of Contents

Investments in and the operating results of 50%-or-less owned entities not required to be consolidated are included in the consolidated financial statements on the basis of the equity method of accounting. We review our investments in unconsolidated entities for impairment whenever events or changes in business circumstances indicate that the carrying amount of the investments may not be fully recoverable. Evidence of a loss in value that is other than temporary might include the absence of an ability to recover the carrying amount of the investment, the inability of the investee to sustain an earnings capacity which would justify the carrying amount of the investment, failure of cash flow coverage ratio tests included in project-level, non-recourse debt or, where applicable, estimated sales proceeds which are insufficient to recover the carrying amount of the investment. Our assessment as to whether any decline in value is other than temporary is based on our ability and intent to hold the investment and whether evidence indicating the carrying value of the investment is recoverable within a reasonable period of time outweighs evidence to the contrary.

When we determine that an impairment test is required, the future projected cash flows from the equity investment are the most significant factor in determining whether impairment exists and, if so, the amount of the impairment charges. We use our best estimates of market prices of power and fuel and our knowledge of the operations of the project and our related contracts when developing these cash flow estimates. In addition, when determining fair value using discounted cash flows, the discount rate used can have a material impact on the fair value determination. Discount rates are based on our risk of the cash flows in the estimate, including, when applicable, the credit risk of the counterparty that is contractually obligated to purchase electricity or steam from the project.

We generally consider our investments in our equity method investees to be strategic long-term investments that comprise a significant portion of our core operating business. Therefore, we complete our assessments with a long-term view. If the fair value of the investment is determined to be less than the carrying value and the decline in value is considered to be other than temporary, an appropriate write-down is recorded based on the excess of the carrying value over the best estimate of fair value of the investment. The use of these methods involves the same inherent uncertainty of future cash flows as previously discussed with respect to undiscounted cash flows. Actual future market prices and project costs could vary from those used in our estimates and the impact of such variations could be material.

Fair Value of Derivatives

We utilize derivative contracts to mitigate our exposure to fluctuations in fuel commodity prices and foreign currency and to balance our exposure to variable interest rates. We believe that these derivatives are generally effective in realizing these objectives.

In determining fair value for our derivative assets and liabilities, we generally use the market approach and incorporate assumptions that market participants would use in pricing the asset or liability, including assumptions about market risk and/or the risks inherent in the inputs to the valuation techniques.

A fair value hierarchy exists for inputs used in measuring fair value that maximizes the use of observable inputs (Level 1 or Level 2) and minimizes the use of unobservable inputs (Level 3) by requiring that the observable inputs be used when available. Our derivative instruments are classified as Level 2. The fair value measurements of these derivative assets and liabilities are based largely on quoted prices from independent brokers in active markets who regularly facilitate our transactions. An active market is considered to have transactions with sufficient frequency and volume to provide pricing information on an ongoing basis.

Derivative assets are discounted for credit risk using credit spreads representative of the counter-party's probability of default. For derivative liabilities, fair value measurement reflects the nonperformance risk related to that liability, which is our own credit risk. We derive our

Table of Contents

nonperformance risk by applying credit spreads approximating our estimate of corporate credit rating against the respective derivative liability.

Certain derivative instruments qualify for a scope exception to fair value accounting, as they are considered normal purchases or normal sales. The availability of this exception is based upon the assumption that we have the ability and it is probable to deliver or take delivery of the underlying physical commodity. Derivatives that are considered to be normal purchases and normal sales are exempt from derivative accounting treatment and are recorded as executory contracts.

Income Taxes and Valuation Allowance for Deferred Tax Assets

In assessing the recoverability of our deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon projected future taxable income in the United States and in Canada and available tax planning strategies. The valuation allowance is comprised primarily of provisions against available Canadian and U.S. net operating loss carryforwards.

Long-term incentive plan

The officers and other employees of Atlantic Power are eligible to participate in the LTIP that was implemented in 2007. In the second quarter of 2010, the Board of Directors approved an amendment to the LTIP and the amended plan was approved by our shareholders on June 29, 2010. The amended LTIP will be effective for grants beginning with the 2010 performance year. Under the amended LTIP, the notional units granted to plan participants will have the same characteristics as notional units under the old LTIP. However, the number of notional units that vest will be based, in part, on the total shareholder return of Atlantic Power compared to a group of peer companies in Canada. In addition, vesting of the notional units for officers of Atlantic Power will occur on a three-year cliff basis as opposed to ratable vesting over three years for officers' grants made prior to the amendments.

Unvested notional units are entitled to receive dividends equal to the dividends per common share during the vesting period in the form of additional notional units. Unvested units are subject to forfeiture if the participant is not an employee at the vesting date or if we do not meet certain ongoing cash flow performance targets.

Compensation expense related to awards granted to participants in the LTIP is recorded over the vesting period based on the estimated fair value of the award on the grant date for notional units accounted for as equity awards and the fair value of the award at each balance sheet date for notional units accounted for as liability awards. The fair value of the awards granted prior to the 2010 amendment is determined by projecting the total number of notional units that will vest in future periods, including dividends received on notional units during the vesting period, and applying the current market price per share to the projected number of notional units that will vest. The fair value of awards granted for the 2010 performance period with market vesting conditions is based upon a Monte Carlo simulation model on their grant date. The aggregate number of shares which may be issued from treasury under the amended LTIP is limited to one million. Unvested notional units are recorded as either a liability or equity award based on management's intended method of redeeming the notional units when they vest.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and commodity prices, will affect our cash flows or the value of our holdings of financial instruments. The objective of market risk management is to minimize the impact that market risks have on our cash flows as described in the following paragraphs.

Table of Contents

Our market risk-sensitive instruments and positions have been determined to be "other than trading." Our exposure to market risk as discussed below includes forward-looking statements and represents an estimate of possible changes in fair value or future earnings that would occur assuming hypothetical future movements in fuel commodity prices, currency exchange rates or interest rates. Our views on market risk are not necessarily indicative of actual results that may occur and do not represent the maximum possible gains and losses that may occur, since actual gains and losses will differ from those estimated based on actual fluctuations in fuel commodity prices, currency exchange rates or interest rates and the timing of transactions.

Fuel Commodity Market Risk

Our current and future cash flows are impacted by changes in electricity, natural gas and coal prices. The combination of long-term energy sales and fuel purchase agreements is generally designed to mitigate the impacts to cash flows of changes in commodity prices by generally passing through changes in fuel prices to the buyer of the energy.

The Lake project's operating margin is exposed to changes in the market price of natural gas from the expiration of its natural gas supply contract on June 30, 2009 through to the expiration of its PPA on July 31, 2013 not passed through in their PPAs. The Auburndale project purchases natural gas under a fuel supply agreement which provides approximately 80% of the project's fuel requirements at fixed prices through June 30, 2012. The remaining 20% is purchased at market prices and therefore the project is exposed to changes in natural gas prices for that portion of its gas requirements through the termination of the fuel supply agreement and 100% of its natural gas requirements from the expiration of the fuel contract in mid-2012 until the termination of its PPA at the end of 2013.

We have executed a strategy to mitigate the future exposure to changes in natural gas prices at Lake and Auburndale by periodically entering into financial swaps that effectively fix the price of natural gas required at these projects. These natural gas swaps are derivative financial instruments and are recorded in the consolidated balance sheet at fair value. Changes in the fair value of the natural gas swaps at Lake and Auburndale, through June 30, 2009 were recorded in other comprehensive income (loss) as they were designated as a hedge of the risk associated with changes in market prices of natural gas. As of July 1, 2009, these natural gas swap hedges were de-designated and the changes in their fair value are recorded in change in fair value of derivative instruments in the consolidated statements of operations.

In 2011, projected cash distributions at Auburndale would change by approximately $0.8 million per $1.00/Mmbtu change in the price of natural gas based on the current level of un-hedged natural gas volumes at the project. In 2011, projected cash distributions at Lake would change by approximately $0.8 million per $1.00/Mmbtu change in the price of natural gas based on the current level of un-hedged natural gas volumes at the project.

Coal prices used in the revenue component of the projected distributions from the Lake and Auburndale projects incorporate a forecast of the applicable Crystal River facility coal cost provided by the utility based on their internal projections. The projected annual cash distributions from Lake and Auburndale combined would change by approximately $2.5 million for every $0.25/Mmbtu change in the projected price of coal.

Table of Contents

The following table summarizes the hedge position related to natural gas needed to meet PPA requirements at Lake and Auburndale as of December 31, 2010 and March 18, 2011:

Auburndale	$ 6.68	$ 6.51	$ 6.92

On October 18, 2010, we entered into natural gas swaps that are effective in 2014 and 2015. The natural gas swaps are related to our 50% share of expected fuel purchases at our Orlando project as its operating margin is exposed to changes in natural gas prices following the expiration of its fuel contract at the end of 2013. These financial swaps effectively fix the price of 1.2 million Mmbtu of natural gas at the Orlando project at a weighted average price of $5.76/Mmbtu and represent approximately 25% of our share of the expected natural gas purchases at the project during 2014 and 2015.

We expect cash distributions from Orlando to increase significantly following the expiration of the project's gas contract at the end of 2013 because both projected natural gas prices at that time and the prices in the natural gas swaps we have executed are lower than the price of natural gas being purchased under the project's gas contract.

Foreign Currency Exchange Risk

We use forward foreign currency contracts to manage our exposure to changes in foreign exchange rates as we earn our income in U.S. dollars but pay dividends to shareholders in Canadian dollars.

Table of Contents

Since our inception, we have had an established hedging strategy for the purpose of mitigating the currency risk impact on the long-term sustainability of our dividends to shareholders. We have executed this strategy by entering into forward contracts to purchase Canadian dollars at fixed rates of exchange to hedge approximately 86% of our expected dividend and convertible debenture interest payments through 2013. Changes in the fair value of the forward contracts partially offset foreign exchange gains or losses on the U.S. dollar equivalent of our Canadian dollar obligations. The forward contracts consist of (1) monthly purchases through the end of 2013 of Cdn$6.0 million at an exchange rate of Cdn$1.134 per U.S. dollar and (2) purchases in both April and October 2011 of Cdn$1.9 million at an exchange rate of Cdn$1.1075 per U.S. dollar.

It is our intention to periodically consider extending the length of these forward contracts. In addition, we will consider executing additional foreign currency forward contracts to hedge expected additional dividend and interest payments associated with the common shares and convertible debentures issued in our October 2010 public offering.

The foreign exchange forward contracts are recorded at estimated fair value based on quoted market prices and the estimation of the counter-party's credit risk. Changes in the fair value of the foreign currency forward contracts are recorded in foreign exchange (gain) loss in the consolidated statements of operations.

The following table contains the components of recorded foreign exchange (gain) loss for the years ended December 31, 2010, 2009 and 2008:

	Year ended December 31,		
	2010	**2009**	**2008**
Unrealized foreign exchange (gain) loss:			
Subordinated notes and convertible debentures	$ 9,153	$ 55,508	$ (85,212)
Forward contracts and other	(3,542)	(31,138)	46,009
	5,611	24,370	(39,203)
Realized foreign exchange gains on forward contract settlements	(6,625)	(3,864)	(8,044)
	$ (1,014)	$ 20,506	$ (47,247)

The following table illustrates the impact on the fair value of our financial instruments of a 10% hypothetical change in the value of the U.S. dollar compared to the Canadian dollar as of December 31, 2010:

Convertible debentures	$ 22,062
Foreign currency forward contracts	$ (23,893)

Interest Rate Risk

Changes in interest rates do not have a significant impact on cash payments that are required on our debt instruments as approximately 86% of our debt, including our share of the project-level debt associated with equity investments in affiliates, either bears interest at fixed rates or is financially hedged through the use of interest rate swaps.

We have executed an interest rate swap at our consolidated Auburndale project to economically fix a portion of its exposure to changes in interest rates related to the variable-rate debt. The interest rate swap agreement was designated as a cash flow hedge of the forecasted interest payments under the project-level Auburndale debt. The interest rate swap was executed in November 2009 and expires on November 30, 2013.

Table of Contents

We have an interest rate swap at our consolidated Cadillac project to economically fix a portion of its exposure to changes in interest rates related to the variable-rate debt. The interest rate swap agreement was designated as a cash flow hedge of the forecasted interest payments under the project-level Cadillac debt. The interest rate swap expires on June 30, 2025.

We executed two interest rate swaps at our consolidated Piedmont project to economically fix its exposure to changes in interest rates related to its variable-rate debt. The interest rate swap agreements are not designated as hedges and changes in their fair market value are recorded in the statements of operations. The interest rate swaps were executed on October 21, 2010 and November 2, 2010 and expire on February 29, 2016 and November 30, 2030, respectively.

In accounting for cash flow hedges, gains and losses on the derivative contracts are reported in other comprehensive income, but only to the extent that the gains and losses from the change in value of the derivative contracts can later offset the loss or gain from the change in value of the hedged future cash flows during the period in which the hedged cash flows affect net income. That is, for cash flow hedges, all effective components of the derivative contracts' gains and losses are recorded in other comprehensive income (loss), pending occurrence of the expected transaction. Other comprehensive income (loss) consists of those financial items that are included in "Accumulated other comprehensive loss" in our accompanying consolidated balance sheets but not included in our net income. Thus, in highly effective cash flow hedges, where there is no ineffectiveness, other comprehensive income changes by exactly as much as the derivative contracts and there is no impact on earnings until the expected transaction occurs.

After considering the impact of interest rate swaps, a hypothetical change in the average interest rate of 100 basis points would change annual interest costs, including interest at equity investments, by approximately $0.9 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Nature of Business

Overview

Atlantic Power Corporation ("Atlantic Power") is a corporation established under the laws of the Province of Ontario, Canada on June 18, 2004 and continued to the Province of British Columbia on July 8, 2005. We issued income participating securities ("IPSs") for cash pursuant to an initial public offering on the Toronto Stock Exchange, or the TSX, on November 18, 2004. Each IPS was comprised of one common share and Cdn$5.767 principal value of 11% subordinated notes due 2016. On November 27, 2009 our shareholders approved a conversion from the IPS structure to a traditional common share structure. Each IPS has been exchanged for one new common share and each old common share that did not form a part of an IPS was exchanged for approximately 0.44 of a new common share. Our shares trade on the TSX under the symbol "ATP" and began trading on the New York Stock Exchange, or the NYSE, under the symbol "AT" on July 23, 2010.

We own interests in power projects for 13 operational power generation projects across ten states, one biomass project under construction in Georgia, a 500 kilovolt 84-mile electric transmission line located in California and a number of development projects. Our power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,962 megawatts (or "MW"), in which our ownership interest is approximately 878 MW. Five of our projects are wholly-owned subsidiaries: Lake Cogen, Ltd., Pasco Cogen, Ltd., Auburndale Power Partners, L.P., Cadillac Renewable Energy, LLC and Atlantic Path 15, LLC. The consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles ("GAAP") with a reconciliation to Canadian GAAP in Note 22. The Canadian securities legislation allows issuers that are required to file reports with the Securities and Exchange Commission ("SEC") in the United States to file financial statements under United States GAAP to meet their continuous disclosure obligations in Canada. Prior to 2010, we prepared our consolidated financial statements in accordance with Canadian GAAP.

Our registered office is located at 355 Burrard Street, Suite 1900, Vancouver, British Columbia V6C 2G8 and our headquarters is located at 200 Clarendon Street, Floor 25, Boston, Massachusetts, USA 02116. The telephone number is (617) 977-2400. The address of our website is www.atlanticpower.com. Our recent U.S. and Canadian securities filings are available through our website.

2. Summary of significant accounting policies

(a) Principles of consolidation and basis of presentation:

The accompanying consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and include the consolidated accounts and operations of our subsidiaries in which we have a controlling financial interest. The usual condition for a controlling financial interest is ownership of the majority of the voting interest of an entity. However, a controlling financial interest may also exist in entities, such as a variable interest entity, through arrangements that do not involve controlling voting interests.

We apply the standard that requires consolidation of variable interest entities ("VIEs"), for which we are the primary beneficiary. The guidance requires a variable interest holder to consolidate a VIE if that party has both the power to direct the activities that most significantly impact the entities' economic performance, as well as either the obligation to absorb losses or the right to receive benefits

that could potentially be significant to the VIE. We have determined that our investments are not VIEs by evaluating their design and capital structure. Accordingly, we use the equity method of accounting for all of our investments in which we do not have an economic controlling interest. We eliminate all intercompany accounts and transactions in consolidation.

(b) Use of estimates:

The preparation of financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the year. Actual results could differ from those estimates. During the periods presented, we have made a number of estimates and valuation assumptions, including the fair values of acquired assets, the useful lives and recoverability of property, plant and equipment and power purchase agreements ("PPAs"), the recoverability of equity investments, the recoverability of deferred tax assets, tax provisions, the valuation of shares associated with our Long-Term Incentive Plan and the fair value of financial instruments and derivatives. In addition, estimates are used to test long-lived assets and goodwill for impairment and to determine the fair value of impaired assets. These estimates and valuation assumptions are based on present conditions and our planned course of action, as well as assumptions about future business and economic conditions. As better information becomes available or actual amounts are determinable, the recorded estimates are revised. Should the underlying valuation assumptions and estimates change, the recorded amounts could change by a material amount.

(c) Regulatory accounting:

Path 15 accounts for certain income and expense items in accordance with a standard where certain costs are deferred, which would otherwise be charged to expense, as regulatory assets based on Path 15's ability to recover these costs in future rates.

(d) Revenue:

We recognize energy sales revenue on a gross basis when electricity and steam are delivered under the terms of the related contracts. Revenue associated with capacity payments under the PPAs are recognized as the lesser of (1) the amount billable under the PPA or (2) an amount determined by the kilowatt hours made available during the period multiplied by the estimated average revenue per kilowatt hour over the term of the PPA.

Transmission services revenue is recognized as transmission services are provided. The annual revenue requirement for transmission services is regulated by the Federal Energy Regulatory Commission ("FERC") and is established through a rate-making process that occurs every three years. When actual cash receipts from transmission services revenue are different than the regulated revenue requirement because of timing differences, the over or under collections are deferred until the timing differences reverse in future periods.

(e) Cash and cash equivalents:

Cash and cash equivalents include cash deposited at banks and highly liquid investments with original maturities of 90 days or less when purchased.

2. Summary of significant accounting policies (Continued)

(f) Restricted cash:

Restricted cash represents cash and cash equivalents that are maintained by the Projects to support payments for major maintenance costs and meet project-level contractual debt obligations.

(g) Use of fair value:

We utilize a fair value hierarchy that gives the highest priority to quoted prices in active markets and is applicable to fair value measurements of derivative contracts and other instruments that are subject to mark-to-market accounting. Refer to Note 11 for more information.

(h) Derivative financial instruments:

We use derivative financial instruments in the form of interest rate swaps and foreign exchange forward contracts to manage our current and anticipated exposure to fluctuations in interest rates and foreign currency exchange rates. We have also entered into natural gas supply contracts and natural gas forwards or swaps to minimize the effects of the price volatility of natural gas, which is a major production cost. We do not enter into derivative financial instruments for trading or speculative purposes; however, not all derivatives qualify for hedge accounting.

Derivative financial instruments not designated as a hedge are measured at fair value with changes in fair value recorded in the consolidated statements of operations.

The following table summarizes derivative financial instruments that are not designated as hedges for accounting purposes and the accounting treatment in the consolidated statements of operations of the changes in fair value and cash settlements of such derivative financial instrument:

Derivative financial instrument	Classification of changes in fair value	Classification of cash settlements
Foreign currency forward contracts	Foreign exchange loss (gain)	Foreign exchange loss (gain)
Lake natural gas swaps	Change in fair value of derivative instruments	Fuel expense
Auburndale natural gas swaps	Change in fair value of derivative instruments	Fuel expense
Orlando natural gas swaps	Change in fair value of derivative instruments	Fuel expense
Interest rate swaps	Change in fair value of derivative instruments	Interest expense

Certain derivative instruments qualify for a scope exception to fair value accounting because they are considered normal purchases or normal sales. This exception applies when we have the ability to and it is probable that we will deliver or take delivery of the underlying physical commodity. Derivatives that are considered to be normal purchases and normal sales are exempt from derivative accounting treatment and are recorded as executory contracts.

We have designated two of our interest rate swaps as a hedge of cash flows for accounting purposes. Tests are performed to evaluate hedge effectiveness and ineffectiveness at inception and on an ongoing basis, both retroactively and prospectively. Unrealized gains or losses on the interest rate swap designated as a hedge are deferred and recorded as a component of accumulated other comprehensive income (loss) until the hedged transactions occur and are recognized in earnings. The ineffective portion of the cash flow hedge, if any, is immediately recognized in earnings.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Summary of significant accounting policies (Continued)

(i) Property, plant and equipment:

Property, plant and equipment are stated at cost, net of accumulated depreciation. Depreciation is provided on a straight-line basis over the estimated useful life of the related asset. As major maintenance occurs and parts are replaced on the plant's combustion and steam turbines, maintenance costs are either expensed or transferred to property, plant and equipment if the maintenance extends the useful lives of the major parts. These costs are depreciated over the parts' estimated useful lives, which is generally three to six years, depending on the nature of maintenance activity performed.

(j) Transmission system rights:

Transmission system rights are an intangible asset that represents the long-term right to approximately 72% of the capacity of the Path 15 transmission line in California. Transmission system rights are amortized on a straight-line basis over 30 years, the regulatory life of Path 15.

(k) Asset retirement obligations:

The fair value for an asset retirement obligation is recorded in the period in which it is incurred. Retirement obligations associated with long-lived assets are those for which a legal obligation exists under enacted laws, statutes, and written or oral contracts, including obligations arising under the doctrine of promissory estoppel, and for which the timing and/or method of settlement may be conditional on a future event. When the liability is initially recorded, we capitalize the cost by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period and the capitalized cost is depreciated over the useful life of the related asset. Upon settlement of the liability, an entity either settles the obligation for its recorded amount or incurs a gain or loss.

(l) Impairment of long-lived assets, non-amortizing intangible assets and equity method investments:

Long-lived assets, such as property, plant and equipment, transmission system rights and other intangible assets subject to depreciation and amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds its fair value.

Investments in and the operating results of 50%-or-less owned entities not required to be consolidated are included in the consolidated financial statements on the basis of the equity method of accounting. We review our investments in such unconsolidated entities for impairment whenever events or changes in business circumstances indicate that the carrying amount of the investments may not be fully recoverable. Evidence of a loss in value that is other than temporary might include the absence of an ability to recover the carrying amount of the investment, the inability of the investee to sustain an earnings capacity which would justify the carrying amount of the investment, failure of cash flow coverage ratio tests included in project-level non-recourse debt or, where applicable, estimated sales proceeds which are insufficient to recover the carrying amount of the investment. Our assessment as to whether any decline in value is other than temporary is based on our ability and intent to hold the investment and whether evidence indicating the carrying value of the investment is recoverable within a

reasonable period of time outweighs evidence to the contrary. We generally consider our investments in our equity method investees to be strategic long-term investments. Therefore, we complete our assessments with a long-term view. If the fair value of the investment is determined to be less than the carrying value and the decline in value is considered to be other than temporary, the asset is written down to its fair value.

(m) Distributions from equity method investments:

We make investments in entities that own power producing assets with the objective of generating accretive cash flow that is available to be distributed to our shareholders. The cash flows that are distributed to us from these unconsolidated affiliates are directly related to the operations of the affiliates' power producing assets and are classified as cash flows from operating activities in the consolidated statements of cash flows.

We record the return of our investments in equity investees as cash flows from investing activities. Cash flows from equity investees are considered a return of capital when distributions are generated from proceeds of either the sale of our investment in its entirety or a sale by the investee of all or a portion of its capital assets.

(n) Goodwill:

Goodwill is the residual amount that results when the purchase price of an acquired business exceeds the sum of the amounts allocated to the assets acquired, less liabilities assumed, based on their fair values. Goodwill is allocated, as of the date of the business combination, to our reporting units that are expected to benefit from the synergies of the business combination.

Goodwill is not amortized and is tested for impairment, annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. The impairment test is carried out in two steps. In the first step, the carrying amount of the reporting unit is compared with its fair value. When the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not to be impaired and the second step of the impairment test is unnecessary.

The second step is carried out when the carrying amount of a reporting unit exceeds its fair value, in which case, the implied fair value of the reporting unit's goodwill is compared with its carrying amount to measure the amount of the impairment loss, if any. The implied fair value of goodwill is determined in the same manner as the value of goodwill is determined in a business combination described in the preceding paragraph, using the fair value of the reporting unit as if it were the purchase price. When the carrying amount of reporting unit goodwill exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to the excess and is recorded in the consolidated statements of operations.

(o) Other intangible assets:

Other intangible assets include PPAs and fuel supply agreements at our projects.

PPAs are valued at the time of acquisition based on the contract prices under the PPAs compared to projected market prices. Fuel supply agreements are valued at the time of acquisition based on the contract prices under the fuel supply agreement compared to projected market prices. The balances are

presented net of accumulated amortization in the consolidated balance sheets. Amortization is recorded on a straight-line basis over the remaining term of the agreement.

(p) Income taxes:

Income tax expense includes the current tax obligation or benefit and change in deferred income tax asset or liability for the period. We use the asset and liability method of accounting for deferred income taxes and record deferred income taxes for all significant temporary differences. Income tax benefits associated with uncertain tax positions are recognized when we determine that it is more-likely-than-not that the tax position will be ultimately sustained. Refer to Note 13 for more information.

(q) Foreign currency translation:

Our functional currency and reporting currency is the United States dollar. The functional currency of our subsidiaries and other investments is the United States dollar. Monetary assets and liabilities denominated in Canadian dollars are translated into United States dollars using the rate of exchange in effect at the end of the period. All transactions denominated in Canadian dollars are translated into United States dollars at average exchange rates.

(r) Long-term incentive plan:

The officers and other employees of Atlantic Power are eligible to participate in the Long-Term Incentive Plan ("LTIP") that was implemented in 2007. In the second quarter of 2010, the Board of Directors approved an amendment to the LTIP and the amended plan was approved by our shareholders on June 29, 2010. The amended LTIP will be effective for grants beginning with the 2010 performance year. Under the amended LTIP, the notional units granted to plan participants will have the same characteristics as notional units under the old LTIP. However, the number of notional units that vest will be based, in part, on the total shareholder return of Atlantic Power compared to a group of peer companies in Canada. In addition, vesting of the notional units for officers of Atlantic Power will occur on a three-year cliff basis as opposed to ratable vesting over three years for grants made prior to the amendment.

Unvested notional units are entitled to receive dividends equal to the dividends per common share during the vesting period in the form of additional notional units. Unvested units are subject to forfeiture if the participant is not an employee at the vesting date or if we do not meet certain ongoing cash flow performance targets.

Compensation expense related to awards granted to participants in the LTIP is recorded over the vesting period based on the estimated fair value of the award on the grant date for notional units accounted for as equity awards and the fair value of the award at each balance sheet date for notional units accounted for as liability awards. Fair value of the awards granted prior to the 2010 amendment is determined by projecting the total number of notional units that will vest in future periods, including dividends received on notional units during the vesting period, and applying the current market price per share to the projected number of notional units that will vest. The fair value of awards granted for the 2010 performance period with market vesting conditions is based upon a Monte Carlo simulation model on their grant date. The aggregate number of shares which may be issued from treasury under

the LTIP is limited to one million. Unvested notional units are recorded as either a liability or equity award based on management's intended method of redeeming the notional units when they vest.

(s) Deferred financing costs:

Deferred financing costs represent costs to obtain long-term financing and are amortized using the effective interest method over the term of the related debt which range from five to 28 years. The net carrying amount of deferred financing costs recorded in other assets on the consolidated balance sheets was $16.7 million and $5.5 million at December 31, 2010 and 2009, respectively. Amortization expense for the years ended December 31, 2010, 2009 and 2008 was $1.2 million, $14.6 million, and $1.1 million, respectively.

(t) Concentration of credit risk:

The financial instruments that potentially expose us to credit risk consist primarily of cash and cash equivalents, restricted cash, derivative instruments and accounts receivable. Cash and restricted cash are held by major financial institutions that are also counterparties to our derivative instruments. We have long-term agreements to sell electricity, gas and steam to public utilities and corporations. We have exposure to trends within the energy industry, including declines in the creditworthiness of our customers. We do not normally require collateral or other security to support energy-related accounts receivable. We do not believe there is significant credit risk associated with accounts receivable due to payment history. See Note 16, *Segment and related information*, for a further discussion of customer concentrations.

(u) Segments:

We have six reportable segments: Auburndale, Lake, Pasco, Chambers, Path 15 and Other Project Assets. Each of our projects is an operating segment. Based on similar economic and other characteristics, we aggregate several of the projects into the Other Project Assets reportable segment.

(v) Recently issued accounting standards:

Adopted

In December 2010, the FASB issued changes to the disclosure of pro forma information for business combinations. These changes clarify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. Also, the existing supplemental pro forma disclosures were expanded to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. We adopted these changes beginning January 1, 2011. Upon adoption, we determined these changes did not impact the consolidated financial statements.

In December 2010, the FASB issued changes to the testing of goodwill for impairment. These changes require an entity to perform all steps in the test for a reporting unit whose carrying value is zero or negative if it is more likely than not (more than 50%) that a goodwill impairment exists based on qualitative factors, resulting in the elimination of an entity's ability to assert that such a reporting unit's goodwill is not impaired and additional testing is not necessary despite the existence of

qualitative factors that indicate otherwise. We adopted these changes beginning January 1, 2011. Based on the most recent impairment review of our goodwill (2010 fourth quarter), we determined these changes did not impact the consolidated financial statements.

On January 1, 2010, we adopted changes issued by the Financial Accounting Standards Board (FASB) to accounting for variable interest entities. These changes require an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity; to require ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity; to eliminate the solely quantitative approach previously required for determining the primary beneficiary of a variable interest entity; to add an additional reconsideration event for determining whether an entity is a variable interest entity when any changes in facts and circumstances occur such that holders of the equity investment at risk, as a group, lose the power from voting rights or similar rights of those investments to direct the activities of the entity that most significantly impact the entity's economic performance; and to require enhanced disclosures that will provide users of financial statements with more transparent information about an enterprise's involvement in a variable interest entity. The adoption of these changes had no impact on the consolidated financial statements.

On January 1, 2010, we adopted changes issued by the FASB to accounting for transfers of financial assets. These changes remove the concept of a qualifying special-purpose entity and remove the exception from the application of variable interest accounting to variable interest entities that are qualifying special-purpose entities; limit the circumstances in which a transferor derecognizes a portion or component of a financial asset; define a participating interest; require a transferor to recognize and initially measure at fair value all assets obtained and liabilities incurred as a result of a transfer accounted for as a sale; and require enhanced disclosure. The adoption of these changes had no impact on the consolidated financial statements.

Effective January 1, 2010, we adopted changes issued by the FASB on January 6, 2010 for a scope clarification to the FASB's previously-issued guidance on accounting for noncontrolling interests in consolidated financial statements. These changes clarify the accounting and reporting guidance for noncontrolling interests and changes in ownership interests of a consolidated subsidiary. An entity is required to deconsolidate a subsidiary when the entity ceases to have a controlling financial interest in the subsidiary. Upon deconsolidation of a subsidiary, an entity recognizes a gain or loss on the transaction and measures any retained investment in the subsidiary at fair value. The gain or loss includes any gain or loss associated with the difference between the fair value of the retained investment in the subsidiary and its carrying amount at the date the subsidiary is deconsolidated. In contrast, an entity is required to account for a decrease in its ownership interest of a subsidiary that does not result in a change of control of the subsidiary as an equity transaction. The adoption of these changes had no impact on the consolidated financial statements.

Effective January 1, 2010, we adopted changes issued by the FASB on January 21, 2010 to disclosure requirements for fair value measurements. Specifically, the changes require a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers. The changes also clarify existing disclosure requirements related to how assets and liabilities should be grouped by class and valuation techniques used for recurring and nonrecurring fair value measurements. The adoption of these changes had no impact on the consolidated financial statements.

2. Summary of significant accounting policies (Continued)

Effective January 1, 2010, we adopted changes issued by the FASB on February 24, 2010 to accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued, otherwise known as "subsequent events." Specifically, these changes clarify that an entity that is required to file or furnish its financial statements with the Securities and Exchange Commission is not required to disclose the date through which subsequent events have been evaluated. The adoption of these changes had no impact on the consolidated financial statements.

On July 1, 2010, we adopted changes to existing accounting requirements for embedded credit derivatives. Specifically, the changes clarify the scope exception regarding when embedded credit derivative features are not considered embedded derivatives subject to potential bifurcation and separate accounting. The adoption of these changes had no impact on the consolidated financial statements.

Issued

In October 2009, the FASB issued changes to revenue recognition for multiple-deliverable arrangements. These changes require separation of consideration received in such arrangements by establishing a selling price hierarchy (not the same as fair value) for determining the selling price of a deliverable, which will be based on available information in the following order: vendor-specific objective evidence, third-party evidence, or estimated selling price; eliminate the residual method of allocation and require that the consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method, which allocates any discount in the arrangement to each deliverable on the basis of each deliverable's selling price; require that a vendor determine its best estimate of selling price in a manner that is consistent with that used to determine the price to sell the deliverable on a standalone basis; and expand the disclosures related to multiple-deliverable revenue arrangements. These changes become effective on January 1, 2011. We have determined that the adoption of these changes will not have an impact on the consolidated financial statements, as our projects do not currently have any such arrangements with their customers.

In January 2010, the FASB issued changes to disclosure requirements for fair value measurements. Specifically, the changes require a reporting entity to disclose, in the reconciliation of fair value measurements using significant unobservable inputs (Level 3), separate information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number) of these Level 3 financial instruments. These changes become effective beginning January 1, 2011. Other than the additional disclosure requirements, we have determined these changes will not have an impact on the consolidated financial statements.

In April 2010, the FASB issued changes to the classification of certain employee share-based payment awards. These changes clarify that there is not an indication of a condition that is other than market, performance, or service if an employee share-based payment award's exercise price is denominated in the currency of a market in which a substantial portion of the entity's equity securities trade and differs from the functional currency of the employer entity or payroll currency of the employee. An employee share-based payment award is required to be classified as a liability if the award does not contain a market, performance, or service condition. These changes become effective on January 1, 2011. We have determined these changes will not have an impact on the consolidated financial statements.

3. Acquisitions and divestments

(a) Cadillac

On December 21, 2010, we acquired 100% of Cadillac Renewable Energy, LLC, which owns and operates a 39.6 MW wood fired facility in Cadillac, Michigan. The purchase price was funded by $37.0 million using a portion of the cash raised in the public equity and convertible debenture offerings in October 2010 and the assumption of $43.1 million of project-level debt. The cash payment for the acquisition was allocated to the net assets acquired based on our preliminary estimates of fair value.

Total cash paid for the acquisition, less cash acquired in December 2010 was $35.1 million.

The allocation of the purchase price to the net assets acquired is as follows:

Recognized amounts of identifiable assets acquired and liabilities assumed:		
Working capital	$	5,643
Property, plant and equipment		42,101
Power purchase agreements		36,420
Interest rate swap derivative		(4,038)
Project-level debt		(43,131)
Total purchase price		36,995
Less cash acquired		(1,870)
Cash paid, net of cash acquired	$	35,125

(b) Topsham

During the three months ended December 31, 2010, we reviewed the recoverability of our 50.0% equity investment in the Topsham project. The review was undertaken as a result of the PPA expiring on December 31, 2011 and our view about the long-term economic viability of the plant upon this expiration.

Based on this review we determined that the carrying value of the Topsham project was impaired and recorded a pre-tax long-lived asset impairment of $2.0 million during 2010. The Topsham project is accounted for under the equity method of accounting and the impairment charge is included in equity in earnings of unconsolidated affiliates in the consolidated statements of operations.

On February 28, 2011, we entered into a purchase and sale agreement with a third party for the purchase of our lessor interest in the project. Closing of the transaction is expected to occur in the second quarter of 2011.

(c) Rumford

During the three months ended September 30, 2009, we reviewed the recoverability of our 23.5% equity investment in the Rumford project. The review was undertaken as a result of not receiving distributions from the Project through the first nine months of 2009 and our view about the long-term economic viability of the plant upon expiration of the project's PPA on December 31, 2009.

Based on this review, we determined that the carrying value of the Rumford project was impaired and recorded a pre-tax long-lived asset impairment of $5.5 million during 2009. The Rumford project is

accounted for under the equity method of accounting and the impairment charge is included in equity in earnings of unconsolidated affiliates in the consolidated statements of operations.

In the fourth quarter of 2009, Atlantic Power and the other limited partners in the Rumford project settled a dispute with the general partner related to the general partner's failure to pay distributions to the limited partners in 2009. Under the terms of the settlement, we received $2.9 million in distributions from Rumford in the fourth quarter of 2009. In addition, the general partner had agreed to purchase the interests of all the limited partners in June 2010. In November 2010 we received our share of the proceeds of $2.0 million and recognized a gain on sale of investment of $1.5 million.

(d) Piedmont

On October 21, 2010 we completed the closing of non-recourse, project-level bank financing for our Piedmont Green Power project ("Piedmont"). The terms of the financing include an $82.0 million construction and term loan and a $51.0 million bridge loan for approximately 95% of the stimulus grant expected to be received from the U.S. Treasury 60 days after the start of commercial operations. In addition, we will make an equity contribution of approximately $75.0 million for substantially all of the equity interest in the project. As of December 31, 2010 we have contributed $58.7 million and construction has commenced.

Piedmont is a 53.5 MW biomass plant located in Barnesville, Georgia, approximately 70 miles south of Atlanta. The Project was developed and will be managed by Rollcast Energy, Inc., a biomass developer in which we own a 60% interest.

(e) Idaho Wind

On July 2, 2010, we acquired a 27.6% equity interest in Idaho Wind Partners 1, LLC ("Idaho Wind") for $38.9 million and approximately $3.1 million in transaction costs. Idaho Wind recently commenced construction of a 183 MW wind power project located near Twin Falls, Idaho, which is expected to be completed in early 2011. Idaho Wind has 20-year PPAs with Idaho Power Company. Our investment in Idaho Wind was funded with cash on hand and a $20.0 million borrowing under our senior credit facility, which was repaid in October 2010 with a portion of the proceeds from our public offering (see Note 10 and Note 18). Idaho Wind is accounted for under the equity method of accounting.

During 2010, we made a short-term $22.8 million loan to Idaho Wind to provide temporary funding for construction of the project until a portion of the project-level construction financing is completed. Member loans will be paid down with a combination of excess proceeds from the federal stimulus cash grant after repaying the cash grant facility, funds from a third closing for additional debt, and project cash flow. The federal stimulus grant is expected in the second quarter of 2011 and a third closing is expected by the end of the year. The outstanding loans bear interest at a prime rate plus 10% (13.25% as December 31, 2010). As of March 18, 2011, $5.1 million of the loan has been repaid.

(f) Rollcast

On March 31, 2009, we acquired a 40% equity interest in Rollcast Energy, Inc., a North Carolina Corporation for $3.0 million in cash. On March 1, 2010, we paid $1.2 million in cash for an additional

15% of the shares of Rollcast, increasing our interest from 40% to 55% and providing us control of Rollcast. We consolidated Rollcast as of that date. We previously accounted for our 40% interest in Rollcast as an equity method investment. On April 28, 2010, we paid an additional $0.8 million to increase our ownership interest in Rollcast to 60%.

Rollcast is a developer of biomass power plants in the southeastern U.S. with several projects in various stages of development. The investment in Rollcast gives us the option but not the obligation to invest equity in Rollcast's biomass power plants.

The following table summarizes the consideration transferred to acquire Rollcast and the preliminary estimated amounts of identifiable assets acquired and liabilities assumed at the March 1, 2010 acquisition date, as well as the fair value of the noncontrolling interest in Rollcast at the acquisition date:

Fair value of consideration transferred:	
Cash	$ 1,200
Other items to be allocated to identifiable assets acquired and liabilities assumed:	
Fair value of our investment in Rollcast at the acquisition date	2,758
Fair value of noncontrolling interest in Rollcast	3,410
Gain recognized on the step acquisition	211
Total	$ 7,579
Recognized amounts of identifiable assets acquired and liabilities assumed:	
Cash	$ 1,524
Property, plant and equipment	130
Prepaid expenses and other assets	133
Capitalized development costs	2,705
Trade and other payables	(448)
Total identifiable net assets	4,044
Goodwill	3,535
	$ 7,579

As a result of obtaining control over Rollcast, our previously held 40% interest was remeasured to fair value, resulting in a gain of $0.2 million. This has been recognized in other income (expense) in the consolidated statements of operations.

The fair value of the noncontrolling interest of $3.4 million in Rollcast was estimated by applying an income approach using the discounted cash flow method. This fair value measurement is based on significant inputs not observable in the market and thus represents a Level 3 fair value measurement. The fair value estimate utilized an assumed discount rate of 9.4% which is composed of a risk-free rate and an equity risk premium determined by the capital asset pricing of companies deemed to be similar to Rollcast. The estimate assumed that no fair value adjustments are required because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the noncontrolling interest in Rollcast.

The goodwill is attributable to the value of future biomass power plant development opportunities. It is not expected to be deductible for tax purposes. All of the $3.5 million of goodwill was assigned to the Other Project Assets segment.

(g) Stockton

On November 30, 2009, we sold our 50% interest in the assets of Stockton Cogen Company LP for a nominal cash payment. Stockton is a 55 MW coal/biomass cogeneration facility located in Stockton, California. During the year ended December 31, 2009, we recorded a loss on the sale of $2.0 million. The loss on sale was recorded in gain (loss) on sales of equity investments in the consolidated statements of operations.

(h) Mid-Georgia

On November 24, 2009, we sold our 50% interest in the assets of Mid-Georgia Cogen LP for $29.1 million. Mid-Georgia is a 308 MW dual-fueled, combined-cycle cogeneration plant located in Kathleen, Georgia. We recorded a gain on sale of asset of $15.8 million. The gain on sale was recorded in gain (loss) on sales of equity investments in the consolidated statements of operations.

(i) Onondaga Renewables

In the first quarter of 2009, we transferred our remaining net assets of Onondaga Cogeneration Limited Partnership at net book value, into a 50% owned joint venture, Onondaga Renewables, LLC, which is redeveloping the project into a 35-40 MW biomass power plant. Our investment in Onondaga Renewables is accounted for under the equity method of accounting.

(j) Auburndale

On November 21, 2008, we acquired 100% of Auburndale Power Partners, L.P., which owns and operates a 155 MW natural gas-fired combined cycle cogeneration facility located in Polk County, Florida. The purchase price was funded by cash on hand, a borrowing under our credit facility and $35 million of acquisition debt. The cash payment for the acquisition, including acquisition costs, was allocated to the net assets acquired based on our estimate of the fair value.

Total cash paid for the acquisition, less cash acquired, during 2008 was $141.7 million. In 2009, we received a working capital adjustment from the sellers in the amount of $1.8 million, resulting in a final purchase price of $139.9 million.

Fuel supply agreements	33,846
Other long-term assets	663

Cash paid, net of cash acquired	$ 139,908

4. Equity method investments

During the three months ended December 31, 2010, we reviewed the recoverability of our 50.0% equity investment in the Badger Creek project. The review was undertaken as a result of the project's recent discussions with utilities in California, the current status of the regulatory proceedings related to contract pricing for qualified facilities in California and recent comparable market transactions in the region.

Based on this review we determined that the carrying value of the Badger Creek project was impaired and recorded a pre-tax long-lived asset impairment of $1.2 million during 2010. The Badger Creek project is accounted for under the equity method of accounting and the impairment charge is included in equity in earnings of unconsolidated affiliates in the consolidated statements of operations.

The following tables summarize our equity method investments:

6. Other intangible assets and transmission system rights

Other intangible assets include power purchase agreements that are not separately recorded as financial instruments, fuel supply agreements and development costs. Transmission system rights represent the long-term right to approximately 72% of the regulated revenues of the Path 15 transmission line.

The following tables summarize the components of our intangible assets subject to amortization for the years ended December 31, 2010 and 2009:

7. Credit facility

We maintain a credit facility with a capacity of $100.0 million, $50.0 million of which may be utilized for letters of credit. The credit facility matures in August 2012.

In November 2008, we borrowed $55.0 million under the credit facility and used the proceeds to partially fund the acquisition of Auburndale. We executed an interest rate swap to fix the interest rate at 2.4% through November 2011 for $40.0 million of the balance outstanding under this borrowing. During 2009, the outstanding borrowings under the credit facility were repaid with cash on hand and the interest rate swap was terminated. The remaining amount in accumulated other comprehensive income for this swap was recorded as interest expense in the consolidated statement of operations.

In June 2010, we borrowed $20.0 million under the credit facility and used the proceeds to partially fund the acquisition of Idaho Wind in July 2010. In October 2010, we repaid the $20.0 million borrowing with proceeds from our common stock and convertible debt offerings.

The credit facility bears interest at the London Interbank Offered Rate ("LIBOR") plus an applicable margin between 1.50% and 3.25% that varies based on certain credit statistics of one of our subsidiaries. As of December 31, 2010, the applicable margin was 1.5% (1.5% in 2009). As of December 31, 2010, $48.6 million of the credit facility capacity was allocated, but not drawn, to support letters of credit for contractual credit support at several of our projects.

We must meet certain financial covenants under the terms of the credit facility, which are generally based on our cash flow coverage ratio and indebtedness ratios and also require us to report indebtedness ratios to the bank. The facility is secured by pledges of assets and interests in certain subsidiaries. We expect to remain in compliance with the covenants of the credit facility for at least the next 12 months.

8. Long-term debt

Long-term debt represents project-level long-term debt of our consolidated subsidiaries and the unamortized balance of purchase accounting adjustments that were recorded in connection with the Path 15 acquisition in order to adjust the debt to its fair value on the acquisition date. Project debt is non-recourse to Atlantic Power and generally amortizes during the term of the respective revenue generating contracts of the projects.

	December 31, 2010	December 31, 2009
Project debt, interest rates ranging from 5.1% to 9.0% maturing through 2028	$ 254,581	$ 230,331
Purchase accounting fair value adjustments	11,305	12,030
Less: current portion of long-term debt	(21,587)	(18,280)
Long-term debt	$ 244,299	$ 224,081

Principal payments due in the next five years and thereafter are as follows:

2011	$ 21,587
2012	20,958
2013	19,702
2014	15,065
2015	16,999
Thereafter	160,270
	$ 254,581

All of the debt in the table above is represented by non-recourse debt of the projects. Project-level debt is secured by the respective project and its contracts with no other recourse to us. The loans have certain financial covenants that must be met. At December 31, 2010, all of our projects were in compliance with the covenants contained in project-level debt. However, our Epsilon Power Partners, Gregory, Selkirk and Delta-Person projects had not achieved the levels of debt service coverage ratios required by the project-level debt arrangements as a condition to make distributions and were therefore restricted from making distributions to us.

The required coverage ratio at Epsilon Power Partners is calculated based on the most recent four quarters cash flow results from Chambers. Reduced cash flows resulted in the project not meeting cash flow coverage ratio tests in its non-recourse debt, so we received no distributions from Chambers in 2009 and in the first nine months of 2010. The Chambers project began to meet the cash flow coverage ratio for its non-recourse debt again as of September 30, 2010 and the project distributed $2.8 million to our project holding company, Epsilon Power Partners in October 2010. However, the required cash flow coverage ratio on the debt at Epsilon Power Partners has not been achieved and, as a result, Epsilon has not made any distributions to the Company during 2009 and 2010. Based on our current projections, Epsilon will continue receiving distributions from the project in 2011 based on meeting the required debt service coverage ratios and we expect Epsilon to resume making distributions to the Company in late 2011.

The required coverage ratio at Selkirk is calculated based on both historical project cash flows for the previous six months, as well as projected project cash flows for the next six months. Increased natural gas transportation costs attributable to a contractual price increase at Selkirk are the primary contributors to the project not currently meeting its minimum coverage ratio.

The required coverage ratio at Delta-Person is based on the most recent four-quarter period. In 2009, Delta-Person incurred higher than anticipated operations and maintenance costs due to an unanticipated repair. The higher operations and maintenance costs caused Delta-Person to fail its debt service coverage ratio and restrict cash distributions for 2010.

8. Long-term debt (Continued)

The required coverage ratio at Gregory is calculated based on both historical project cash flows for the previous six months, as well as projected cash flows for the next six months. Increased fuel costs in 2011 attributable to fuel hedges expiring at the end of 2010 are the primary contributors to the project not currently meeting its debt service coverage ratio requirements.

As at December 31, 2010, the amount of restricted net assets of our unconsolidated subsidiaries that may not be distributed to us in the form of a dividend is approximately $298.4 million and the amount of undistributed earnings of unconsolidated subsidiaries was approximately $151.3 million. Project-level debt is secured by the respective projects and their contracts with no other recourse to us. At December 31, 2010, all of our projects were in compliance with the covenants contained in project-level debt agreements.

9. Subordinated notes

On November 27, 2009 our shareholders approved a conversion from the IPS structure to a traditional common share structure. Each IPS has been exchanged for one new common share of Atlantic Power and each old common share that did not form part of an IPS was exchanged for approximately 0.44 of a new common share. This transaction resulted in the extinguishment of Cdn$347.8 million ($327.7 million) principal value of subordinated notes.

A loss on the common share conversion in the amount of $13.1 million was recorded in interest expense within administrative and other expenses and was comprised of the write off of unamortized deferred financing costs of $7.5 million, the costs associated with the common share conversion of $4.7 million and the write off of the unamortized subordinated note premium of $0.9 million.

On December 17, 2009, we exercised our subordinated note call option to redeem the remaining Cdn$40.7 million ($38.7 million) principal value of Subordinated Notes at 105% of the principal amount. A loss on the redemption of the subordinated notes in the amount of $3.1 million was recorded in interest expense within administrative and other expenses and was comprised of the write off of unamortized deferred financing costs of $1.2 million and the 5% premium paid in the amount of $1.9 million.

The subordinated notes were due to mature in November 2016 subject to redemption under specified conditions at the option of Atlantic Power, commencing on or after November 18, 2009. Interest was payable monthly in arrears at an annual rate of 11% and the principal repayment was to occur at maturity.

The subordinated notes were denominated in Canadian dollars and were secured by a subordinated pledge of our interest in certain subsidiaries, and contained certain restrictive covenants. Cdn$39.5 million principal value of the subordinated notes were separately held by two investors and the remaining amount of the outstanding subordinated notes formed a part of our publicly traded IPSs.

Interest expense related to the subordinated notes was $36.4 million and $40.2 million for the years ended December 31, 2009 and 2008, respectively.

10. Convertible debentures

In 2006 we issued, in a public offering, Cdn$60 million aggregate principal amount of 6.25% convertible secured debentures (the "2006 Debentures") for gross proceeds of $52.8 million. The 2006 Debentures pay interest semi-annually on April 30 and October 31 of each year. The 2006 Debentures had an initial maturity date of October 31, 2011 and are convertible into approximately 80.6452

common shares per Cdn$1,000 principal amount of 2006 Debentures, at any time, at the option of the holder, representing a conversion price of Cdn$12.40 per common share.

In connection with the common share conversion on November 27, 2009, the holders of the 2006 Debentures approved an amendment to increase the annual interest rate from 6.25% to 6.50% and separately, an extension of the maturity date from October 2011 to October 2014.

During 2010, Cdn$4.2 million of the 2006 Debentures were converted to 338,627 common shares. As of December 31, 2010 the 2006 Debentures balance is Cdn$55.8 million ($56.1 million).

On December 17, 2009, we issued, in a public offering, Cdn$86.3 million aggregate principal amount of 6.25% convertible unsecured debentures (the "2009 Debentures") for gross proceeds of $82.1 million. The 2009 Debentures pay interest semi-annually on March 15 and September 15 of each year beginning on September 15, 2010. The 2009 Debentures mature on March 15, 2017 and are convertible into approximately 76.9231 common shares per Cdn$1,000 principal amount of 2009 Debentures, at any time, at the option of the holder, representing a conversion price of Cdn$13.00 per common share.

During 2010, Cdn$3.1 million of the 2009 Debentures were converted to 240,458 common shares. As of December 31, 2010 the 2009 Debentures balance is Cdn$83.1 million ($83.6 million).

On October 20, 2010, we issued, in a public offering, Cdn$80.5 million aggregate principal amount of 5.60% convertible unsecured subordinated debentures (the "2010 Debentures") for gross proceeds of $78.9 million. The 2010 Debentures pay interest semi-annually on June 30 and December 30 of each year beginning June 30, 2011. The 2010 Debentures mature on June 30, 2017, unless earlier redeemed. The debentures are convertible into our common shares at an initial conversion rate of 55.2486 common shares per Cdn$1,000 principal amount of 2010 Debentures, at any time, at the option of the holder, representing an initial conversion price of approximately Cdn$18.10 per common share. As of December 31, 2010 the 2010 Debentures balance is Cdn$80.5 million ($80.9 million).

Aggregate interest expense related to the 2006, 2009 and 2010 Debentures was $9.9 million, $3.5 million and $3.5 million for the years ended December 31, 2010, 2009 and 2008, respectively.

11. Fair value of financial instruments (Continued)

Our financial instruments that are recorded at fair value have been classified into levels using a fair value hierarchy.

The three levels of the fair value hierarchy are defined below:

Level 1 Unadjusted quoted prices available in active markets for identical assets or liabilities as of the reporting date. Financial assets utilizing Level 1 inputs include active exchange-traded securities.

Level 2 Quoted prices available in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are directly observable, and inputs derived principally from market data.

Level 3 Unobservable inputs from objective sources. These inputs may be based on entity-specific inputs. Level 3 inputs include all inputs that do not meet the requirements of Level 1 or Level 2.

The following represents the recurring measurements of fair value hierarchy of our financial assets and liabilities that were recognized at fair value as of December 31, 2010 and December 31, 2009. Financial assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement.

adjust the fair value of financial assets and liabilities to reflect credit risk, which is calculated based on our credit rating or the credit rating of our counterparties. As of December 31, 2010, the credit reserve resulted in a $0.6 million net increase in fair value, which is comprised of a $0.2 million pre-tax gain in other comprehensive income and a $0.5 million gain in change in fair value of derivative instruments offset by a $0.1 million loss in foreign exchange. As of December 31, 2009, the credit reserve resulted in a $0.1 million increase in fair value which is comprised of a $0.1 million gain in OCI and a $0.3 million gain in change in fair value of derivative instruments and a $0.3 million loss in foreign exchange.

The carrying amounts for cash and cash equivalents and restricted cash approximate fair value due to their short-term nature. The fair value of long-term debt, subordinated notes and convertible debentures was determined using quoted market prices, as well as discounting the remaining contractual cash flows using a rate at which we could issue debt with a similar maturity as of the balance sheet date.

As of December 31, 2007, approximately $26 million of our cash and cash equivalents were invested in auction-rate securities ("ARSs"). ARSs typically have an underlying maturity of up to 40 years but have historically traded in seven or 28 day intervals in a highly liquid market. The ARSs that were held at December 31, 2007 were redeemed at auctions held in January 2008 and the proceeds were re-invested in ARSs.

In early 2008, the overall market for ARSs suffered a significant decline in liquidity and most of the auctions of ARSs were unsuccessful, resulting in our continuing to hold these securities and the issuers paying interest at the maximum contractual rate. In September and November 2008, all of our investments in ARSs were sold at par plus accrued interest for $36.5 million. Purchases and sales of ARSs are presented gross in the consolidated statements of cash flows because they are classified as available-for-sale securities.

Natural gas swaps

The Lake project's operating margin is exposed to changes in natural gas spot market prices from the expiration of its natural gas supply contract on June 30, 2009 through the expiration of its PPA on July 31, 2013. The Auburndale project purchases natural gas under a fuel supply agreement which provides approximately 80% of the project's fuel requirements at fixed prices through June 30, 2012. The remaining 20% is purchased at spot market prices and therefore the project is exposed to changes in natural gas prices for that portion of its gas requirements through the termination of the fuel supply agreement and 100% of its natural gas requirements from the expiry of the fuel supply agreement in mid-2012 until the termination of its PPA at the end of 2013.

The Orlando project's operating margin is exposed to changes in natural gas spot market prices from the expiration of its gas supply agreement in 2013 until its PPA expires in 2023. In October 2010, we executed two fuel swap agreements which become effective on January 1, 2014 and January 1, 2015 and terminate on December 31, 2014 and 2015, respectively. These swap agreements were entered into at Atlantic Power Corporation and not at the project level. Orlando is accounted for under the equity method of accounting.

Our strategy to mitigate the future exposure to changes in natural gas prices at Lake, Auburndale and Orlando consists of periodically entering into financial swaps that effectively fix the price of natural gas expected to be purchased at these projects. These natural gas swaps are derivative financial instruments and are recorded in the consolidated balance sheet at fair value.

Changes in the fair value of the natural gas swaps related to Lake and Auburndale through June 30, 2009 were recorded in other comprehensive income (loss) as they were designated as a hedge of the risk associated with changes in market prices of natural gas. As of July 1, 2009, we de-designated these natural gas swap hedges and the changes in their fair value subsequent to July 1, 2009 are now recorded in change in fair value of derivative instruments in the consolidated statements of operations. Amounts in accumulated other comprehensive income (loss) remaining prior to de-designation are amortized into the consolidated statements of operations over the remaining term of the natural gas swaps.

Interest Rate Swaps

We have executed an interest rate swap at our consolidated Auburndale project to economically fix a portion of its exposure to changes in interest rates related to its variable-rate debt. The interest rate swap agreement was designated as a cash flow hedge of the forecasted interest payments under the project-level Auburndale debt agreement. The interest rate swap was executed in November 2009 and expires on November 30, 2013.

The interest rate swap is a derivative financial instrument designated as a cash flow hedge and is recorded in the balance sheet at fair value. Changes in the fair value of the interest rate swap are recorded in accumulated other comprehensive income (loss) and reclassified to interest expense when settled in cash. This swap agreement is effective November 2009 through November 2013.

In February 2008, Cadillac entered into an interest rate swap agreement that effectively fixed the interest rate at 5.90% from February 20, 2008 to February 15, 2011, 6.02% from February 16, 2011 to February 15, 2015, 6.14% from February 16, 2015 to February 15, 2019, 6.26% from February 16, 2019 to February 15, 2023, and 6.38% thereafter. The notional amount of the interest rate swap agreement

mirrors the outstanding principal balance over the remaining life of Cadillac's debt. This swap agreement, which qualifies and is designated as a cash flow hedge, is effective through June 2025.

We executed two interest rate swaps at our consolidated Piedmont project to economically fix its exposure to changes in interest rates related to its variable-rate debt. The interest rate swap agreements are not designated as hedges and changes in their fair market value are recorded in the consolidated statements of operations. The interest rate swaps were executed on October 21, 2010 and November 2, 2010 and expire on February 29, 2016 and November 30, 2030, respectively.

Impact of derivative instruments on the consolidated income statements

Unrealized gains on interest rate swaps designated as cash flow hedges, net of tax, have been recorded in the consolidated statements of shareholders' equity as a gain in other comprehensive income of $0.4 million, $0.6 million and $0.5 million for the years ended December 31, 2010, 2009 and 2008, respectively. Realized losses on these interest rate swaps of $0.5 million, $0.5 million and $0.0 million were recorded in interest expense, net for the years ended December 31, 2010, 2009 and 2008, respectively.

Unrealized gains and losses on natural gas swaps previously designated as cash flow hedges are recorded in other comprehensive income. In the period in which the unrealized gains and losses are settled, the cash settlement payments are recorded as fuel expense. Other comprehensive loss recorded for natural gas swap contracts accounted for as cash flow hedges totaled $5.1 million, net of tax, prior to July 1, 2009 when hedge accounting for these natural gas swaps was discontinued prospectively. Amortization of the loss of $1.0 million and $4.3 million, net of tax, was recorded in change in fair value of derivative instruments for the years ended December 31, 2010 and 2009, respectively.

Unrealized gains and losses on derivative instruments not designated as cash flow hedges are recorded in change in fair value of derivative instruments in the consolidated statements of operations.

The following table summarizes realized gains and losses for derivative instruments not designated as cash flow hedges:

	Classification of (gain) loss recognized in income	2010	2009
Natural gas swaps	Fuel	$ 9,141	$ 10,089
Foreign currency forwards	Foreign exchange gain	(6,625)	(3,864)
Interest rate swaps	Interest, net	1,664	1,446

Unrealized gains and losses associated with changes in the fair value of derivative instruments not designated as cash flow hedges and ineffectiveness of derivatives designated as cash flow hedges are reflected in current period earnings. We entered into derivative instruments in order to economically hedge the following notional volumes of forecasted transactions as summarized below, by type, excluding those derivatives that qualified for the normal purchases and normal sales exception as of December 31, 2010:

	Units	December 31, 2010
Interest rate swaps	Interest (US$)	$ 44,228
Currency forwards	Dollars (Cdn$)	$ 219,800
Natural gas swaps	Natural Gas (Mmbtu)	15,540

Foreign currency forward contracts

We use foreign currency forward contracts to manage our exposure to changes in foreign exchange rates, as we generate cash flow in U.S. dollars but pay dividends to shareholders and interest on convertible debentures predominantly in Canadian dollars. We have a hedging strategy for the purpose of mitigating the currency risk impact on the long-term sustainability of dividends to shareholders. We have executed this strategy by entering into forward contracts to purchase Canadian dollars at a fixed rate to hedge approximately 86% of our expected dividend and convertible debenture interest payments through 2013. Changes in the fair value of the forward contracts partially offset foreign exchange gain or losses on the U.S. dollar equivalent of our Canadian dollar obligations. The forward contracts consist of (1) monthly purchases through the end of 2013 of Cdn$6.0 million at an exchange rate of Cdn$1.134 per U.S. dollar and (2) purchases in both April and October 2011 of Cdn$1.9 million at an exchange rate of Cdn$1.1075 per U.S. dollar.

It is our intention to periodically consider extending the length of these forward contracts. In addition, we will consider executing additional foreign currency forward contracts to hedge expected additional dividend and interest payments associated with the common shares and convertible debentures issued in our October 2010 public offering (see Note 10 and Note 18).

The foreign exchange forward contracts are recorded at estimated fair value based on quoted market prices and our estimation of the counterparty's credit risk. The fair value of our forward foreign currency contracts is $23.4 million and $19.9 million for the years ended December 31, 2010 and 2009, respectively. Changes in the fair value of the foreign currency forward contracts are recorded in foreign exchange (gain) loss in the consolidated statements of operations.

As of December 31, 2010, we have recorded a valuation allowance of $79.4 million. This amount is comprised primarily of provisions against available Canadian and U.S. net operating loss carryforwards. In assessing the recoverability of our deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon projected future taxable income in the United States and in Canada and available tax planning strategies.

As of December 31, 2010, we had the following net operating loss carryforwards that are scheduled to expire in the following years:

Outstanding at December 31, 2010	600,981	$ 10.28

In the second quarter of 2010, the Board of Directors approved an amendment to the LTIP. The amended LTIP will be effective for grants beginning with the 2010 performance year. Under the amended LTIP, the notional units granted to plan participants will have the same characteristics as notional units under the old LTIP. However, the number of notional units that vest will be based, in part, on the total shareholder return of Atlantic Power compared to a group of peer companies in Canada. In addition, vesting of the notional units for officers of Atlantic Power will occur on a three year cliff basis as opposed to ratable vesting over three years for grants made prior to the amendment.

Vested notional units are expected to be redeemed one-third in cash and two-thirds in shares of our common stock. Notional units granted that are expected to be redeemed in cash upon vesting are accounted for as liability awards. Notional units granted that are expected to be redeemed in common shares upon vesting are accounted for as equity awards. Notional units granted prior to the 2010 performance period are subject to the vesting conditions of the LTIP before the amendments made in 2010. We reclassified the portion of outstanding awards expected to vest in common shares totaling $1.4 million from accounts payable and accrued liabilities and other non-current liabilities to common shares as of June 29, 2010, the date the amended LTIP was approved by our shareholders.

On March 29, 2010, our board of directors approved the grant of 138,892 notional LTIP units for the 2009 performance period under the terms of the LTIP before the 2010 amendments. In May 2010, our board of directors approved the initial grant of 83,110 notional LTIP units for executive officers under the amended LTIP for the 2010-2012 performance period, subject to final shareholder approval of the amended LTIP, which occurred on June 29, 2010. Also in May 2010 and subject to the final shareholder approval of the amended LTIP, our board of directors granted transition awards to our executive officers consisting of an additional 83,110 notional LTIP units. The transition awards are designed to mitigate the impact of the changes in vesting provisions of the LTIP from a ratable vesting

over three years to cliff vesting at the end of three years. The transition awards are subject to the performance measurement and other provisions of the amended LTIP, except that one-third of the transition awards vest in the first quarter of 2011 and the other two-thirds vest in the first quarter of 2012.

The notional units, other than the transition awards, granted under the amended LTIP cliff-vest three years after the grant date. The final number of notional units that will vest, if any, at the end of the three year vesting period will be based on our achievement of target levels of relative total shareholder return, which is the change in the value of an investment in our common stock, including reinvestment of dividends, compared to that of a peer group of companies during the performance period. The total number of notional units vesting will range from zero up to a maximum 150% of the number of notional units in the executives' accounts on the vesting date for that award, depending on the level of achievement of relative total shareholder return during the measurement period.

Compensation expense related to awards granted to participants in the LTIP is recorded over the vesting period based on the estimated fair value of the award on the grant date for notional units accounted for as equity awards and the fair value of the award at each balance sheet date for notional units accounted for as liability awards. Fair value of the awards granted prior to the 2010 LTIP amendment is determined by projecting the total number of notional units that will vest in future periods, including dividends received on notional units during the vesting period, and applying the current market price per share to the projected number of notional units that will vest. The fair value of awards granted in 2010 under the amended LTIP with market vesting conditions is based upon a Monte Carlo simulation model on their grant date. Compensation expense is recognized regardless of the relative total shareholder return performance, provided that the LTIP participant remains employed by Atlantic Power Corporation. The fair value of all outstanding notional units under the amended LTIP at December 31, 2010, is approximately $7.8 million. The aggregate number of shares which may be issued from treasury under the amended LTIP is limited to one million. Unvested notional units are recorded as either a liability or equity award based on management's intended method of redeeming the notional units when they vest.

Both the total shareholder return performance and the fair value of the notional units under the Monte Carlo simulation are determined with the assistance of a third party.

In calculating the fair value of the awards granted in 2010 under the amended LTIP, the Monte Carlo simulation model utilizes multiple input variables over the performance period in order to determine the likely relative total shareholder return. The Monte Carlo simulation model computed simulated our total shareholder return and for our peer companies during the remaining time in the performance period with the following inputs: (i) stock price on the measurement date; (ii) expected volatility; (iii) risk-free interest rate; (iv) dividend yield; and (v) correlations of historical common stock returns between Atlantic Power Coporation and the peer companies and among the peer companies. Expected volatilities utilized in the Monte Carlo model are based on historical volatility of the Company's and the peer companies' stock prices over a period equal in length to that of the remaining vesting period. The risk free interest rate is derived from the U.S. Treasury yield curve in effect at the time of grant with a term equal to the performance period assumption at the time of grant.

The calculation of simulated total shareholder return under the Monte Carlo model for the remaining time in the performance period included the following assumptions:

	Year ended December 31, 2010
Weighted average risk free rate of return	0.71%
Dividend yield	9.39%
Expected volatility Company	40.0%
Expected volatility peer companies	25.0 - 55.0%
Weighted average remaining measurement period	1.43 years

15. Basic and diluted earnings (loss) per share

Basic earnings (loss) per share is calculated by dividing net income (loss) by the weighted average common shares outstanding during their respective period. Diluted earnings (loss) per share is computed including dilutive potential shares as if they were outstanding shares during the year. Dilutive potential shares include shares that would be issued if all of the convertible debentures were converted into shares at January 1, 2010. Dilutive potential shares also include the weighted average number of shares, as of the date such notional units were granted, that would be issued if the unvested notional units outstanding under the LTIP were vested and redeemed for shares under the terms of the LTIP.

Because we reported a loss for the years ended December 31, 2010 and 2009, diluted earnings per share are equal to basic earnings per share as the inclusion of potentially dilutive shares in the computation is anti-dilutive.

The following table sets forth the diluted net income and potentially dilutive shares utilized in the per share calculation for the years ended December 31, 2010, 2009 and 2008:

	2010	2009	2008
Numerator:			
Net income (loss) attributable to Atlantic Power Corporation	$ (3,752)	$ (38,486)	$ 48,101
Add: interest expense for potentially dilutive convertible debentures, net(1)			382
Diluted net loss attributable to Atlantic Power Corporation	(3,752)	(38,486)	48,483

(1) The above adjustment for net interest on the potential common shares that would be issued on the conversion of the convertible debentures has been determined by eliminating the actual interest on the convertible debentures and, for periods prior to our conversion from an IPS to common share structure on November 27, 2009, including the imputed interest on the additional subordinated notes that would be issued on the conversion (the conversion of the debentures is into additional IPSs, each consisting of one common share and Cdn$5.767 principal amount of subordinated notes).

We have six reportable segments: Path 15, Auburndale, Lake, Pasco, Chambers and Other Project Assets.

We analyze the performance of our operating segments based on Project Adjusted EBITDA which is defined as project income less interest, taxes, depreciation and amortization (including non-cash impairment charges) and changes in fair value of derivative instruments. Project Adjusted EBITDA is not a measure recognized under GAAP and does not have a standardized meaning prescribed by GAAP and is therefore unlikely to be comparable to similar measures presented by other companies. We use Project Adjusted EBITDA to provide comparative information about project performance without considering how projects are capitalized or whether they contain derivative contracts that are

During 2010, we made a short-term $22.8 million loan to Idaho Wind (see Note 3(e)) to provide temporary funding for construction of the project until a portion of the project-level construction financing is completed. Member loans will be paid down with a combination of excess proceeds from the federal stimulus cash grant after repaying the cash grant facility, funds from a third closing for additional debt, and project cash flow. The federal stimulus grant is expected in the second quarter of 2011 and a third closing is expected by the end of the year. The outstanding loans bear interest at a prime rate plus 10% (13.25% as December 31, 2010). As of March 18, 2011, $5.1 million of the loan has been repaid.

Prior to December 31, 2009, Atlantic Power was managed by Atlantic Power Management, LLC (the "Manager"), which was owned by two private equity funds managed by Arclight Capital Partners, LLC ("ArcLight"). On December 31, 2009, we terminated our management agreements with the Manager and have agreed to pay the ArcLight funds an aggregate of $15 million, to be satisfied by a payment of $6 million that was made at the termination date, and additional payments of $5 million, $3 million and $1 million on the respective first, second and third anniversaries of the termination date. We recorded the remaining liability associated with the termination fee at its estimated fair value of

$3.7 million at December 31, 2010. The contract termination liability is being accreted to the final amounts due over the term of these payments.

18. Common stock and normal course issuer bid

On October 20, 2010, we completed a public offering of 6,029,000 common shares, including 784,000 common shares issued pursuant to the exercise in full of the underwriters' over-allotment option, at a price of $13.35 per common share. We received net proceeds from the common share offering, after deducting the underwriters discounts and expenses, of approximately $75.3 million.

On November 27, 2009 the shareholders approved the conversion from the IPS structure to a traditional common share structure. Each IPS has been exchanged for one new common share of and each old common share not forming part of an IPS was exchanged for approximately 0.44 of a new common share.

In 2008, we approved a normal course issuer bid to purchase up to four million IPSs, representing approximately 8% of Atlantic Power's public float at the same time. As of December 31, 2009 and 2008, we acquired 481,600 and 558,620 IPSs at an average price of Cdn$8.42 and Cdn$8.78, respectively, under the terms of our existing normal course issuer bid. As of December 31, 2009, we have acquired a cumulative total of 1,040,220 IPSs at an average price of Cdn$8.61 since the inception of the issuer bid in July 2008. We paid the market price at the time of acquisition for any IPSs purchased through the facilities of the Toronto Stock Exchange, and all IPSs acquired under the bid have been cancelled. The issuer bid expired on July 24, 2009.

19. Commitments and contingencies

Our Lake project is currently involved in a dispute with Progress Energy Florida over off-peak energy sales in 2010. All amounts billed for off-peak energy during 2010 by the Lake project have been paid in full by Progress. The Lake project has filed a claim against Progress in which we seek to confirm our contractual right to sell off-peak energy at the contractual price for such sales. Progress filed a counter-claim against the Lake project, seeking, among other things, the return of amounts paid for off-peak power sales during 2010 and a declaratory order clarifying Lake's rights and obligations under the PPA. The Lake project has stopped dispatching during off-peak periods pending the outcome of the dispute. However, we strongly believe that the court will confirm our contractual right to sell off-peak power using the contractual price that was used during 2010 and that we will be able to continue such off-peak power sales for the remainder of the term of the PPA. We have not recorded any reserves related to this dispute and expect that the outcome will not have a material adverse effect on our financial position or results of operations.

From time to time, Atlantic Power, its subsidiaries and the projects are parties to disputes and litigation that arise in the normal course of business. We assess our exposure to these matters and record estimated loss contingencies when a loss is likely and can be reasonably estimated. There are no matters pending as of December 31, 2010 which are expected to have a material adverse impact on our financial position or results of operations.

highlighting the material differences between our consolidated financial statements prepared in accordance with United States GAAP compared to our consolidated financial statements prepared in accordance with Canadian GAAP below.

Consolidated reconciliation of net income and shareholders' equity

Net income (loss) and shareholders' equity reconciled to Canadian GAAP are as follows:

	2010	2009
Net income (loss), based on United States GAAP	$ (3,855)	$ (38,486)
Changes in fair value of power purchase agreement, net of tax[1]	(12,704)	15,899
Projects accounted for under the cost method of accounting, net of tax[2]	3,393	4,314
Net income (loss), based on Canadian GAAP	$ (13,166)	$ (18,273)

	2010	2009
Shareholders' equity, based on United States GAAP	$ 433,376	$ 414,117
Adjusted for cumulative effect of US/Canadian differences	56,254	65,566
Shareholders' equity, based on Canadian GAAP	$ 489,630	$ 479,683

(1) The accounting standard under United States GAAP for derivative instruments provides an exemption for PPAs that contain both a capacity payment and an energy component which, if certain criteria are met, qualifies the PPA for the normal purchases and normal sales treatment. A similar exemption does not exist under Canadian GAAP and accordingly, a PPA with a capacity payment, a minimum or specified quantity of energy and delivery into a liquid market is subject to fair value accounting. Our PPA at the Chambers project meets the normal purchases and normal sales exemption under United States GAAP and is not subject to fair value accounting.

(2) We follow a standard under United States GAAP that establishes a presumption of significant influence with a low threshold of ownership in investments in limited partnerships and requires accounting under the equity method. Our investments in the Selkirk and Gregory projects are accounted for under the cost method for Canadian GAAP because there is not a different threshold for ownership interest in limited partnerships and we do not exercise significant influence over the operating and financial policies of these investments.

NOTES TO RECONCILIATION TO CANADIAN GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

Entity name	Proportion consolidated
Badger Creek Limited	50.0%
Orlando Cogen, LP	50.0%
Topsham Hydro Assets	50.0%

Chambers Cogen, LP	40.0%

The following summarizes the balance sheets at December 31, 2010 and 2009, and operating results and distributions paid to for the years ended December 31, 2010 and 2009 for our proportionate share of the six joint venture entities:

Net loss	(18,503)	(194)
Distributions paid from joint ventures	$ 15,411	$ 18,373

B) Capital management

Our overall objectives in capital management are to optimize the cost of capital related to existing assets and growth opportunities, as well as maintaining a prudent capital structure whose risk characteristics do not jeopardize realization of long term value from our assets. Our capital structure consists of non-recourse project-level debt, a credit facility, convertible debentures and common stock.

We currently pay a monthly dividend at an annual rate of Cdn$1.094 per common share. We have historically raised debt capital at the operating or project-level at lower interest rates than what would be required on corporate-level debt. These financings are structured as non-recourse to us and an adverse impact to debt at any single project has no influence on debt at other projects, and in virtually all cases the principal fully amortizes before the primary PPA expires.

Table of Contents

ATLANTIC POWER CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

22. United States and Canadian accounting policy differences (Continued)

In some cases we may raise an additional tranche of non-recourse, fully-amortizing debt at a holding company that owns the project equity. The appropriate degree of total operating leverage is a function of assessing the potential volatility of projected cash flows to maintain a low probability that a temporary project operating issue could cause our equity in the project to be at risk before curing the problem. There are also lender safeguards in these financings such as debt service and major maintenance reserves that help mitigate impacts to our cash flow from temporary project operating issues.

The credit facility is designed for several purposes: 1) to support letters of credit covering certain contingent performance risks at several projects, 2) to provide corporate liquidity in the case of significant unexpected temporary interruption or reductions to operating cash flows, and 3) to contribute to bridge financing for potential acquisitions. The credit facility has a total capacity of $100 million with two equal bank participants.

Acquisition bridge facilities have also historically been placed at this senior corporate level with the revolving credit facility lenders. The capital structure is periodically reviewed by our management and Board of Directors to determine whether changes are required to meet the objectives outlined above. Other than the capital management decisions discussed, there were no other changes in our approach to capital management during the period. Neither we, nor any of our subsidiaries are subject to externally imposed capital requirements.

C) Financial risk management

We have exposure to market risk, credit risk and liquidity risk from our use of financial instruments:

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and commodity prices, will affect our cash flows or the value of its holdings of financial instruments. The objective of market risk management is to minimize the impact that market risks have on our cash flows as described in the following paragraphs.

We are exposed to changes in foreign currency exchange rates because it earns all of its income in U.S. dollars but has substantial obligations in Canadian dollars. We manage this risk through the use of foreign currency forward contracts and, where possible, establishing any new obligations in U.S. dollars instead of Canadian dollars.

The impact of changes in interest rates do not have a significant impact on cash payments that are required on our debt instruments as approximately 86% of our debt, including non-recourse project-level debt and our share of debt at unconsolidated projects, bears interest at fixed rates.

The debt obligations at our proportionately consolidated Chambers project bears interest at variable rates. Exposure to changes in interest rates related to this variable rate debt has been partially mitigated through the use of interest rate swaps. After considering the impact of interest rate swaps, a hypothetical change in the average interest rate of 100 basis points would change annual interest costs, including interest at proportionately consolidated projects, by approximately $0.9 million.

Table of Contents

ATLANTIC POWER CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

22. United States and Canadian accounting policy differences (Continued)

Our current and future cash flows are impacted by changes in electricity, natural gas and coal prices. The combination of long-term energy sales and fuel purchase agreements are designed to generally mitigate the impacts to cash flows of changes in commodity prices by generally passing through changes in fuel prices to the buyer of the energy.

Credit risk

Credit risk is the risk of financial loss if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Our maximum exposure to credit risk is the carrying value of financial assets included in the consolidated balance sheet. Our exposure to credit losses from accounts receivable at its projects is mitigated by the fact that most projects sell power under long-term contracts with investment-grade utilities and other counterparties. We do not have a history of credit losses related to long-term contracts at the projects and no significant amounts are currently past due. Our risk of credit loss on other financial instruments is managed by conducting business with financial institutions that have strong credit ratings.

Liquidity risk

Liquidity risk is the risk that we will not be able to meet its financial obligations as they become due. We believe that future cash flows from operating activities and access to additional liquidity through capital and bank markets will be adequate to meet its financial obligations.

D) Recently adopted Canadian accounting pronouncements

a) Goodwill and intangible assets

Effective January 1, 2009, we adopted CICA Handbook Section 3064, "Goodwill and Intangible Assets", which replaces Section 3062, "Goodwill and Other Intangible Assets", and Section 3450, "Research and Development Costs" and establishes standards for the recognition, measurement and disclosure of goodwill and intangible assets. The provisions relating to the definition and initial recognition of intangible assets, including internally generated intangible assets, are equivalent to the corresponding provisions of International Accounting Standard IAS 38, "Intangible Assets". The adoption of this standard did not impact our consolidated financial statements.

b) Business combinations

On January 1, 2010, we adopted CICA Handbook Section 1582, "Business Combinations". This section establishes standards for the accounting of business combinations, and states that all assets and liabilities of an acquired business will be recorded at fair value. Obligations for contingent consideration and contingencies will also be recorded at fair value at the acquisition date. The standard also states that acquisition related costs will be expensed as incurred, that restructuring charges will be expensed in periods after the acquisition date and that non-controlling interests should be measured at fair value at the date of acquisition. This standard is to be applied prospectively to business combinations with acquisition dates on or after January 1, 2010. This new standard was applied to the step-up acquisition of Rollcast and the acquisition of Cadillac.

c) Consolidated financial statements

On January 1, 2010, we adopted CICA Handbook Section 1601, "Consolidated Financial Statements". The new standard replaces Section 1600, "Consolidated Financial Statements". This Section carries forward existing Canadian guidance for preparing consolidated financial statements other than guidance for non-controlling interests. The adoption of this standard did not have a material impact on our consolidated financial statements.

d) Non-controlling interests

On January 1, 2010, we adopted CICA Handbook Section 1602, "Non-Controlling Interests". The new standard establishes standards for the accounting of non-controlling interests of a subsidiary in the preparation of consolidated financial statements subsequent to a business combination. The adoption of this standard did not have a material impact on our consolidated financial statements.

E) Recent Canadian accounting pronouncements announced but not yet effective

International Financial Reporting Standards (IFRS)

The Canadian Accounting Standards Board has set January 1, 2011 as the date that IFRS will replace Canadian GAAP for publicly accountable enterprises, which includes Canadian reporting issuers. Financial reporting under IFRS differs from Canadian GAAP in a number of respects, some of which are significant. We report in U.S. GAAP and are not planning to adopt IFRS as we will no longer be required to provide a reconciliation to Canadian GAAP beyond December 31, 2010.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of presentation and summary of significant accounting policies

Overview

Atlantic Power Corporation owns and operates a diverse fleet of power generation and infrastructure assets in the United States. Our power generation projects sell electricity to utilities and other large commercial customers under long-term power purchase agreements, which seek to minimize exposure to changes in commodity prices. Our power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,948 megawatts (or "MW") in which our ownership interest is approximately 871 MW. Our current portfolio consists of interests in 12 operational power generation projects across nine states, one biomass project under construction in Georgia, and a 500 kilovolt 84-mile electric transmission line located in California. We also own a majority interest in Rollcast Energy, a biomass power plant developer with several projects under development. Six of our projects are wholly-owned subsidiaries: Lake Cogen, Ltd., Pasco Cogen, Ltd., Auburndale Power Partners, L.P., Cadillac Renewable Energy, LLC, Piedmont Green Power, LLC and Atlantic Path 15, LLC.

The interim consolidated financial statements have been prepared in accordance with the Securities and Exchange Commission ("SEC") regulations for interim financial information and with the instructions to Form 10-Q. The following notes should be read in conjunction with the accounting policies and other disclosures as set forth in the notes to our consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2010. Interim results are not necessarily indicative of results for the full year.

In our opinion, the accompanying unaudited interim consolidated financial statements contain all material adjustments consisting of normal and recurring accruals necessary to present fairly our consolidated financial position as of June 30, 2011, the results of operations for the three and six-month periods ended June 30, 2011 and 2010, and our cash flows for the six-month periods ended June 30, 2011 and 2010.

Use of estimates:

The preparation of financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. During the periods presented, we have made a number of estimates and assumptions, including the fair values of acquired assets, the useful lives and recoverability of property, plant and equipment and power purchase agreements ("PPAs"), the recoverability of equity investments, the recoverability of deferred tax assets, tax provisions, the valuation of shares associated with our long-term incentive plan and the fair value of financial instruments and derivatives. In addition, estimates are used to test long-lived assets and goodwill for impairment and to determine the fair value of impaired assets if indications of impairment exist during the period. These estimates and assumptions are based on present conditions and our planned course of action, as well as assumptions about future business and economic conditions. As better information becomes available or actual amounts are determinable, the recorded estimates are revised. Should the underlying assumptions and estimates change, the recorded amounts could change by a material amount.

Reclassifications:

Certain prior year amounts have been reclassified to conform to the current year presentation.

Recently issued accounting standards:

Adopted

In December 2010, the FASB issued changes to the disclosure of pro forma information for business combinations. These changes clarify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. Also, the existing supplemental pro forma disclosures were expanded to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. We adopted these changes beginning January 1, 2011. Upon adoption, we determined these changes did not impact the consolidated financial statements.

In December 2010, the FASB issued changes to the testing of goodwill for impairment. These changes require an entity to perform all steps in the test for a reporting unit whose carrying value is zero or negative if it is more likely than not (more than 50%) that a goodwill impairment exists based on qualitative factors, resulting in the elimination of an entity's ability to assert that such a reporting unit's goodwill is not impaired and additional testing is not necessary despite the existence of qualitative factors that indicate otherwise. We adopted these changes beginning January 1, 2011. Based on the most recent impairment review of our goodwill (2010 fourth quarter), we determined these changes did not impact the consolidated financial statements.

In January 2010, the FASB issued changes to disclosure requirements for fair value measurements. Specifically, the changes require a reporting entity to disclose, in the reconciliation of fair value measurements using significant unobservable inputs (Level 3), separate information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number) of these Level 3 financial instruments. We adopted these changes beginning January 1, 2011. We determined that these changes did not have an impact on the consolidated financial statements.

In April 2010, the FASB issued changes to the classification of certain employee share-based payment awards. These changes clarify that there is not an indication of a condition that is other than market, performance, or service if an employee share-based payment award's exercise price is denominated in the currency of a market in which a substantial portion of the entity's equity securities trade and differs from the functional currency of the employer entity or payroll currency of the employee. An employee share-based payment award is required to be classified as a liability if the award does not contain a market, performance, or service condition. These changes were adopted beginning on January 1, 2011. We determined that these changes did not have an impact on the consolidated financial statements.

Issued

In May 2011, the FASB issued changes to conform existing guidance regarding fair value measurement and disclosure between GAAP and International Financial Reporting Standards. These changes both clarify the FASB's intent about the application of existing fair value measurement and

disclosure requirements and amend certain principles or requirements for measuring fair value or for disclosing information about fair value measurements. The clarifying changes relate to the application of the highest and best use and valuation premise concepts, measuring the fair value of an instrument classified in a reporting entity's shareholders' equity, and disclosure of quantitative information about unobservable inputs used for Level 3 fair value measurements. The amendments relate to measuring the fair value of financial instruments that are managed within a portfolio; application of premiums and discounts in a fair value measurement; and additional disclosures concerning the valuation processes used and sensitivity of the fair value measurement to changes in unobservable inputs for those items categorized as Level 3, a reporting entity's use of a nonfinancial asset in a way that differs from the asset's highest and best use, and the categorization by level in the fair value hierarchy for items required to be measured at fair value for disclosure purposes only. These changes become effective on January 1, 2012. We are currently evaluating the potential impact of these changes on the consolidated financial statements.

In June 2011, the FASB issued changes to the presentation of comprehensive income. These changes give an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements; the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity was eliminated. The items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income were not changed. Additionally, no changes were made to the calculation and presentation of earnings per share. These changes become effective on January 1, 2012. We are currently evaluating these changes to determine which option will be chosen for the presentation of comprehensive income. Other than the change in presentation, we have determined these changes will not have an impact on the consolidated financial statements

Capital Power Income L.P.

On June 20, 2011, Atlantic Power, Capital Power Income L.P. ("CPILP"), CPI Income Services Ltd., the general partner of CPILP, and CPI Investments Inc., a unitholder of CPILP that is owned by EPCOR Utilities Inc. and Capital Power Corporation, entered into the Arrangement Agreement, which provides that Atlantic Power will acquire, directly or indirectly, all of the issued and outstanding CPILP units pursuant to the Plan of Arrangement under the Canada Business Corporations Act. Under the terms of the Plan of Arrangement, CPILP unitholders will be permitted to exchange each of their CPILP units for, at their election, Cdn$19.40 in cash or 1.3 Atlantic Power common shares. All cash elections will be subject to proration if total cash elections exceed approximately Cdn$506.5 million and all share elections will be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares.

Pursuant to the Plan of Arrangement, CPILP will sell its Roxboro and Southport facilities located in North Carolina to an affiliate of Capital Power, for approximately Cdn$121.0 million which equates to approximately Cdn$2.15 per unit of CPILP. Additionally, in connection with the Plan of Arrangement, the management agreements between certain subsidiaries of Capital Power and CPILP and certain of its subsidiaries will be terminated (or assigned) in consideration of a payment of Cdn$10.0 million. Atlantic Power or its subsidiaries will assume the management of CPILP and enter into a transitional services agreement with Capital Power for a term of 6 to 9 months following the completion of the Plan of Arrangement, which will facilitate the integration of CPILP into Atlantic Power.

The Arrangement Agreement contains customary representations, warranties and covenants. Among these covenants, CPILP and CPI Income Services Ltd. have each agreed not to solicit alternative transactions, except that CPILP may respond to an alternative transaction proposal that constitutes, or would reasonably expect to lead to, a superior proposal that we would have the right to match. In addition, Atlantic Power or CPILP may be required to pay a Cdn$35.0 million fee if the Arrangement Agreement is terminated in certain unlikely circumstances.

The completion of the Plan of Arrangement is subject to the receipt of all necessary court and regulatory approvals in Canada and the United States and certain other closing conditions. Atlantic Power and CPILP currently expect to complete the Plan of Arrangement in the fourth quarter of 2011, subject to receipt of required shareholder/unitholder, court and regulatory approvals and the satisfaction or waiver of the financing and other conditions to the Plan of Arrangement described in the Arrangement Agreement.

5. Accumulated depreciation and amortization

The following table presents accumulated depreciation of property, plant and equipment and the accumulated amortization of transmission system rights and other intangible assets as of June 30, 2011 and December 31, 2010:

	June 30, 2011	December 31, 2010
Property, plant and equipment	$ 98,248	$ 91,851
Transmission system rights	47,461	43,535
Other intangible assets	68,472	57,000

6. Long-term debt

Long-term debt represents project-level long-term debt of our consolidated subsidiaries and the unamortized balance of purchase accounting adjustments that were recorded in connection with the Path 15 acquisition in order to adjust the debt to its fair value on the acquisition date. Project-level debt is non-recourse to Atlantic Power and generally amortizes during the term of the respective revenue generating contracts of the projects.

	June 30, 2011	December 31, 2010
Project debt, interest rates ranging from 5.1% to 9.0% maturing through 2028	$ 274,131	$ 254,581
Purchase accounting fair value adjustments	10,942	11,305
Less: current portion of long-term debt	(21,962)	(21,587)
Long-term debt	$ 263,111	$ 244,299

Project-level debt is secured by the respective project and its contracts with no other recourse to us. The loans have certain financial covenants that must be met. At June 30, 2011, all of our projects were in compliance with the covenants contained in the project-level debt. However, the holding company for our investment in the Chambers project, Epsilon Power Partners and the Delta-Person project had not achieved the levels of debt service coverage ratios required by the project-level debt arrangements as a condition to make distributions and were therefore restricted from making distributions to us.

As of June 30, 2011 the inception to date balance on the Piedmont construction debt funded by the related bridge loan was $29.9 million. The Piedmont debt outstanding is funded by the bridge loan. The terms of the Piedmont project-level debt refinancing include an $82.0 million construction and term loan and a $51.0 million bridge loan for approximately 95.0% of the stimulus grant expected to be received from the U.S. Treasury 60 days after the start of commercial operations. The $51.0 million bridge loan will be repaid in 2012 and repayment of the expected $82.0 million term loan will commence in 2013.

8. Fair value of financial instruments (Continued)

The fair value of our derivative instruments are based on price quotes from brokers in active markets who regularly facilitate those transactions and we believe such price quotes are executable. We adjust the fair value of financial assets and liabilities to reflect credit risk, which is calculated based on our credit rating or the credit rating of our counterparties. As of June 30, 2011, the credit reserve resulted in a $0.6 million net increase in fair value, which is attributable to a $0.4 million pre-tax gain in other comprehensive income and a $0.4 million gain in change in fair value of derivative instruments, partially offset by a $0.2 million loss in foreign exchange. As of December 31, 2010, the credit reserve resulted in a $0.6 million net increase in fair value, which is attributable to a $0.2 million pre-tax gain in other comprehensive income and a $0.5 million gain in change in fair value of derivative instruments, partially offset by a $0.1 million loss in foreign exchange.

Natural gas swaps

The Lake project's operating margin is exposed to changes in natural gas spot market prices through the expiration of its PPA on July 31, 2013. The Auburndale project purchases natural gas under a fuel supply agreement which provides approximately 80% of the project's fuel requirements at fixed prices through June 30, 2012. The remaining 20% is purchased at spot market prices and therefore the project is exposed to changes in natural gas prices for that portion of its gas requirements through the termination of the fuel supply agreement and 100% of its natural gas requirements from the expiration of the fuel supply agreement in mid-2012 until the termination of its PPA at the end of 2013.

In October 2010, we entered into natural gas swaps that are effective in 2014 and 2015. The natural gas swaps are related to our 50% share of expected fuel purchases at our Orlando project as its operating margin is exposed to changes in natural gas prices following the expiration of its fuel contract at the end of 2013. In 2014, both the projected natural gas prices and the prices of these natural gas swaps are lower than the current price of natural gas being purchased under the project's gas contract. These financial swaps effectively fix the price of 1.2 million Mmbtu of natural gas at the Orlando project at a weighted average price of $5.76/Mmbtu and represent approximately 25% of our share of the expected natural gas purchases at the project during 2014 and 2015. These swap agreements were entered into by us and not at the project level. Orlando is accounted for under the equity method of accounting.

Our strategy to mitigate the future exposure to changes in natural gas prices at Lake, Auburndale and Orlando consists of periodically entering into financial swaps that effectively fix the price of natural gas expected to be purchased at these projects. These natural gas swaps are derivative financial instruments and are recorded in the consolidated balance sheet at fair value.

Interest Rate Swaps

We have executed an interest rate swap at our consolidated Auburndale project to economically fix a portion of its exposure to changes in interest rates related to its variable-rate debt. The interest rate swap agreement was designated as a cash flow hedge of the forecasted interest payments under the project-level Auburndale debt agreement. The interest rate swap agreement effectively converted the floating rate debt to a fixed interest rate of 3.12%. The notional amount of the swap matches the outstanding principal balance over the remaining life of Auburndale's debt. The interest rate swap was executed in November 2009 and expires on November 30, 2013.

The Cadillac project has an interest rate swap agreement that effectively fixes the interest rate at 6.02% from February 16, 2011 to February 15, 2015, 6.14% from February 16, 2015 to February 15, 2019, 6.26% from February 16, 2019 to February 15, 2023, and 6.38% thereafter. The notional amount of the interest rate swap agreement matches the outstanding principal balance over the remaining life of Cadillac's debt. This swap agreement, which qualifies for and is designated as a cash flow hedge, is effective through June 2025.

We executed two interest rate swaps at our consolidated Piedmont project to economically fix its exposure to changes in interest rates related to its variable-rate debt. The interest rate swap agreements are not designated as hedges and changes in their fair market value are recorded in the consolidated statements of operations. The interest rate swap agreement effectively converted the floating rate debt to a fixed interest rate of 1.7% plus an applicable margin ranging from 3.5% to 3.75% from March 31, 2011 to February 29, 2016. From February 2016 until the maturity of the debt in November 2017, the fixed rate of the swap is 4.47% and the applicable margin is 4.0%, resulting in an all-in rate of 8.47%. The swap continues at the fixed rate of 4.47% from the maturity of the debt in November 2017 until November 2030. The notional amounts of the interest rate swap agreements match the estimated outstanding principal balance of Piedmont's cash grant bridge loan and the construction loan facility which will convert to a term loan. The interest rate swaps were executed on October 21, 2010 and November 2, 2010 and expire on February 29, 2016 and November 30, 2030, respectively.

Impact of derivative instruments on the consolidated income statements

Unrealized gains (losses) on interest rate swaps designated as cash flow hedges have been recorded, net of tax, in shareholders' equity in other comprehensive income as a loss of $0.1 million and a gain of $0.4 million for the three-month periods ended June 30, 2011 and 2010, respectively, and a gain of $0.7 million and $0.6 million for the six-month periods ended June 30, 2011 and 2010 respectively. Settlements of these interest rate swaps of $0.6 million and $0.4 million were recorded in interest expense, net for the three-month periods ended June 30, 2011 and 2010, respectively, and $1.2 million and $0.7 million for the six-month periods ended June 30, 2011 and 2010, respectively.

Unrealized gains and losses on natural gas swaps previously designated as cash flow hedges are recorded in other comprehensive income. In the period in which the unrealized gains and losses are settled, the cash settlement payments are recorded as fuel expense. A $5.1 million loss was recorded in other comprehensive loss for natural gas swap contracts accounted for as cash flow hedges prior to July 1, 2009 when hedge accounting for these natural gas swaps was discontinued prospectively. Amortization of the remaining loss in other comprehensive income of $(0.2) million and $0.4 million was recorded in change in fair value of derivative instruments for the three-month periods ended

Foreign currency forward contracts

We use foreign currency forward contracts to manage our exposure to changes in foreign exchange rates, as we generate cash flow in U.S. dollars but pay dividends to shareholders and interest on convertible debentures predominantly in Canadian dollars. We have a hedging strategy for the purpose of mitigating the currency risk impact on the long-term sustainability of dividends to shareholders. We have executed this strategy by entering into forward contracts to purchase Canadian dollars at a fixed rate to hedge approximately 86% of our expected dividend and convertible debenture interest payments through 2013. Changes in the fair value of the forward contracts partially offset foreign exchange gain or losses on the U.S. dollar equivalent of our Canadian dollar obligations. The forward contracts consist of (1) monthly purchases through the end of 2013 of Cdn$6.0 million at an exchange rate of Cdn$1.134 per U.S. dollar and (2) purchases in both April and October 2011 of Cdn$1.9 million at an exchange rate of Cdn$1.1075 per U.S. dollar.

It is our intention to periodically consider extending the length of these forward contracts.

The foreign exchange forward contracts are recorded at fair value based on quoted market prices and our estimation of the counterparty's credit risk. The fair value of our forward foreign currency contracts is $25.6 million and $23.4 million at June 30, 2011 and December 31, 2010, respectively. Changes in the fair value of the foreign currency forward contracts are recorded in foreign exchange (gain) loss in the consolidated statements of operations.

Valuation Allowance

As of June 30, 2011, we have recorded a valuation allowance of $78.4 million. This amount is comprised primarily of provisions against available Canadian and U.S net operating loss carryforwards. In assessing the recoverability of our deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon projected future taxable income in the United States and in Canada and available tax planning strategies.

11. Long-Term Incentive Plan

The following table summarizes the changes in outstanding LTIP notional units during the six months ended June 30, 2011:

Certain awards have a market condition based on our total shareholder return during the performance period compared to a group of peer companies. Compensation expense for notional units granted in 2011 is recorded net of estimated forfeitures. See further details as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010.

The calculation of simulated total shareholder return under the Monte Carlo model for the remaining time in the performance period for awards with market conditions included the following assumptions as of June 30, 2011:

Weighted average risk free rate of return	0.39%	0.72%
Dividend yield		7.5%
Expected volatility Company	20.5%	25.9%
Expected volatility peer companies	15.2%	92.7%
Weighted average remaining measurement period		1.26 years

12. Basic and diluted earnings (loss) per share

Basic earnings (loss) per share is calculated by dividing net income (loss) by the weighted average common shares outstanding during their respective period. Diluted earnings (loss) per share is computed including dilutive potential shares as if they were outstanding shares during the year. Dilutive potential shares include shares that would be issued if all of the convertible debentures were converted into shares at January 1, 2011. Dilutive potential shares also include the weighted average number of shares, as of the date such notional units were granted, that would be issued if the unvested notional units outstanding under the LTIP were vested and redeemed for shares under the terms of the LTIP.

Because we reported a loss for the six months ended June 30, 2010, diluted earnings per share are equal to basic earnings per share as the inclusion of potentially dilutive shares in the computation is

anti-dilutive. The following table sets forth the diluted net income (loss) and potentially dilutive shares utilized in the per share calculation for the three and six month periods ended June 30, 2011 and 2010:

13. Segment and related information

We have six reportable segments: Path 15, Auburndale, Lake, Pasco, Chambers and Other Project Assets.

We analyze the performance of our operating segments based on Project Adjusted EBITDA which is defined as project income plus interest, taxes, depreciation and amortization (including non-cash impairment charges) and changes in fair value of derivative instruments. Project Adjusted EBITDA is not a measure recognized under GAAP and does not have a standardized meaning prescribed by GAAP and is therefore unlikely to be comparable to similar measures presented by other companies. We use Project Adjusted EBITDA to provide comparative information about project performance without considering how projects are capitalized or whether they contain derivative contracts that are

Progress Energy Florida and the California Independent System Operator ("CAISO") provide for 69% and 14%, respectively, of total consolidated revenues for the three-months ended June 30, 2011 and 77% and 16% for the three-months ended June 30, 2010. Progress Energy Florida and CAISO provide for 70% and 14%, respectively, of total consolidated revenues for the six-months ended June 30, 2011 and 77% and 16% for the six-months ended June 30, 2010. Progress Energy Florida purchases electricity from Auburndale and Lake, and the CAISO makes

payments to Path 15.

14. Related party transactions

On February 28, 2011, we entered into a purchase and sale agreement with an affiliate of ArcLight for the purchase of our lessor interest in the Topsham project. The transaction closed on May 6, 2011 and we received proceeds of $8.5 million, resulting in no gain or loss on the sale.

During 2010, we made short-term loans totaling $22.8 million to Idaho Wind to provide temporary funding for construction of the project until a portion of the project-level construction financing is completed. Member loans will be paid down with a combination of excess proceeds from the federal stimulus grant after repaying the cash grant facility, funds from a third closing for additional debt and project cash flow. The federal stimulus grant was approved in June of 2011 and the funds have been received. The third closing from additional debt is expected by the end of the year. The outstanding loans bear interest at a prime rate plus 10% (13.25% as June 30, 2011). During the six-months ended June 30, 2011, we received $1.2 million in interest payments related to the member loans. As of August 10, 2011, $15.5 million of the loans have been repaid.

Prior to December 31, 2009, Atlantic Power was managed by Atlantic Power Management, LLC (the "Manager"), which was owned by two private equity funds managed by ArcLight. On December 31, 2009, we terminated our management agreements with the Manager and have agreed to pay the ArcLight funds an aggregate of $15.0 million, to be satisfied by a payment of $6.0 million that was made at the termination date, and additional payments of $5.0 million, $3.0 million and $1.0 million on the respective first, second and third anniversaries of the termination date. The remaining liability associated with the termination fee is recorded at its estimated fair value of $3.8 million at June 30, 2011. The contract termination liability is being accreted to the final amounts due over the term of these payments.

15. Commitments and contingencies

Our Lake project is currently involved in a dispute with Progress Energy Florida over off-peak energy sales in 2010. All amounts billed for off-peak energy during 2010 by the Lake project have been paid in full by Progress. The Lake project has filed a claim against Progress in which we seek to confirm our contractual right to sell off-peak energy at the contractual price for such sales. Progress filed a counter-claim against the Lake project, seeking, among other things, the return of amounts paid for off-peak power sales during 2010 and a declaratory order clarifying Lake's rights and obligations under the PPA. The Lake project has stopped dispatching during off-peak periods pending the outcome of the dispute. However, we strongly believe that the court will confirm our contractual right to sell off-peak power using the contractual price that was used during 2010 and that we will be able to continue such off-peak power sales for the remainder of the term of the PPA. We have not recorded any reserves related to this dispute and expect that the outcome will not have a material adverse effect on our financial position or results of operations.

From time to time, Atlantic Power, its subsidiaries and the projects are parties to disputes and litigation that arise in the normal course of business. We assess our exposure to these matters and record estimated loss contingencies when a loss is likely and can be reasonably estimated. There are no matters pending as of June 30, 2011 which are expected to have a material adverse impact on our financial position or results of operations.

16. Subsequent event

On July 27, 2011, August 3, 2011 and August 5, 2011 we executed a series of financial transactions with an exercise date of January 18, 2012, to economically hedge a portion of the foreign currency exchange risk associated with the closing of the CPILP transaction.

The July 27, 2011 transactions include a forward purchase of $32.0 million at $0.9460 per Cdn$1.00, a call option to purchase $84.7 million at $0.94565 per Cdn$1.00 and a put option to sell $116.7 million at $0.90 per Cdn$1.00. The August 3, 2011 transactions include a forward purchase of $76.0 million at $0.9665 per Cdn$1.00, a call option to purchase $14.5 million at $0.9665 per Cdn$1.00 and a put option to sell $90.5 million at $0.90 per Cdn$1.00. The August 5, 2011 transactions include a forward purchase of $81.2 million at $0.9872 per Cdn$1.00, a call option to purchase $9.3 million at $0.9872 per Cdn$1.00 and a put option to sell $90.5 million at $0.90 per Cdn$1.00.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Quarterly Report on Form 10-Q constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements generally can be identified by the use of forward-looking terminology such as "outlook," "objective," "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should," "plans," "continue," or similar expressions suggesting future outcomes or events. Examples of such statements in this Quarterly Report on Form 10-Q include, but are not limited to, statements with respect to the following:

- the amount of distributions expected to be received from the projects for the full year 2011 and 2012;
- our expectation of higher operating cash flow in 2012, primarily attributable to increased distributions from Selkirk;
- our expectation of a significant increase in cash distributions from Orlando beginning in 2014;
- our forecast of expected annual cash distributions from the Lake and Auburndale projects through 2012;
- the expected resumption of distributions from the holding company on our Chambers project in 2012;
- the expectation of the Piedmont Construction to be completed in late 2012; and
- the expectation to complete the Plan of Arrangement in the fourth quarter.

Such forward-looking statements reflect our current expectations regarding future events and operating performance and speak only as of the date of this Quarterly Report on Form 10-Q. Such forward-looking statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to the assumption that the projects will operate and perform in accordance with our expectations. Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not or the times at or by which such performance or results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements, including, but not limited to, the factors discussed under "Risk Factors" included in the filings we make from time to time with the SEC. Our business is both competitive and subject to various risks.

These risks include, without limitation:

- a reduction in revenue upon expiration or termination of power purchase agreements;
- the dependence of our projects on their electricity, thermal energy and transmission services customers;
- exposure of certain of our projects to fluctuations in the price of electricity or natural gas;
- projects not operating according to plan;
- the impact of significant environmental and other regulations on our projects;

increased competition, including for acquisitions;

our limited control over the operation of certain minority owned projects;

the failure to receive, on a timely basis or otherwise, the required approvals by Atlantic Power shareholders, CPILP unitholders and government or regulatory agencies (including the terms of such approvals) for the Plan of Arrangement; and

the risk that a condition to closing of the transaction contemplated by the Arrangement Agreement may not be satisfied.

Other factors, such as general economic conditions, including exchange rate fluctuations, also may have an effect on the results of our operations. Many of these risks and uncertainties can affect our actual results and could cause our actual results to differ materially from those expressed or implied in any forward-looking statement made by us or on our behalf.

Material factors or assumptions that were applied in drawing a conclusion or making an estimate set out in the forward-looking information include third party projections of regional fuel and electric capacity and energy prices or cash flows that are based on assumptions about future economic conditions and courses of action. Although the forward-looking statements contained in this Quarterly Report on Form 10-Q are based upon what are believed to be reasonable assumptions, investors cannot be assured that actual results will be consistent with these forward-looking statements, and the differences may be material. Certain statements included in this Quarterly Report on Form 10-Q may be considered "financial outlook" for the purposes of applicable securities laws, and such financial outlook may not be appropriate for purposes other than this Quarterly Report on Form 10-Q.

These forward-looking statements are made as of the date of this Form 10-Q, except as expressly required by applicable law, we assume no obligation to update or revise them to reflect new events or circumstances.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the financial condition and results of operations of Atlantic Power Corporation should be read in conjunction with the interim consolidated financial statements and the related notes thereto included elsewhere in this Quarterly Report on Form 10-Q.

OVERVIEW

Atlantic Power Corporation owns and operates a diverse fleet of power generation and infrastructure assets in the United States. Our power generation projects sell electricity to utilities and other large commercial customers under long-term power purchase agreements, which seek to minimize exposure to changes in commodity prices. Our power generation projects in operation have an aggregate gross electric generation capacity of approximately 1,948 MW in which our ownership interest is approximately 871 MW. Our current portfolio consists of interests in 12 operational power generation projects across nine states, one biomass project under construction in Georgia, and a 500 kilovolt 84-mile electric transmission line located in California. We also own a majority interest in Rollcast Energy, a biomass power plant developer with several projects under development. We sell the capacity and energy from our power generation projects under power purchase agreements (or "PPAs") with a variety of utilities and other parties. Under the PPAs, which have expiration dates ranging from 2011 to 2037, we receive payments for electric energy sold to our customers (known as energy payments), in addition to payments for electric generation capacity (known as capacity payments). We also sell steam from a number of our projects under steam sales agreements to industrial purchasers. The transmission system rights (or "TSRs") we own in our power transmission project entitle us to payments indirectly from the utilities that make use of the transmission line.

Our power generation projects generally operate pursuant to long-term fuel supply agreements, typically accompanied by fuel transportation arrangements. In most cases, the fuel supply and transportation arrangements correspond to the term of the relevant PPAs and many of the PPAs and steam sales agreements provide for the indexing or pass-through of fuel costs to our customers. In cases where there is not a pass-through of fuel costs, we use a financial hedging strategy designed to mitigate a portion of the market price risk of fuel purchases.

We partner with recognized leaders in the independent power industry to operate and maintain our projects, including Caithness Energy, LLC, Power Plant Management Services, Delta Power

Services and the Western Area Power Administration. Under these operation, maintenance and management agreements, the operator is typically responsible for operations, maintenance and repair services.

We completed our initial public offering on the Toronto Stock Exchange (TSX: ATP) in November 2004. Our shares began trading on the NYSE under the symbol "AT" on July 23, 2010.

As of August 10, 2011, we had 68,963,203 common shares, Cdn$45.2 million ($47.5 million) principal amount of 6.50% convertible secured debentures due October 31, 2014 (the "2006 Debentures"), Cdn$72.4million ($76.1 million) principal amount of 6.25% convertible debentures due March 15, 2017 (the "2009 Debentures"), and Cdn$80.5 million ($84.6 million) principal amount of 5.60% convertible debentures due June 30, 2017 (the "2010 Debentures" and together with the 2006 and 2009 Debentures, the "Debentures") outstanding. The 2006 Debentures, 2009 Debentures and 2010 Debentures are convertible at any time, at the option of the holder, into 80.645, 76.923 and 55.249, respectively, common shares per Cdn$1,000 principal amount of Debentures, representing a conversion price of Cdn$12.40, Cdn$13.00 and Cdn$18.10, respectively, per common share. Holders of common shares currently receive a monthly dividend at a current annual rate of Cdn$1.094 per common share.

RECENT DEVELOPMENTS

On June 20, 2011, Atlantic Power, Capital Power Income L.P. ("CPILP"), CPI Income Services Ltd., the general partner of CPILP, and CPI Investments Inc., a unitholder of CPILP that is owned by EPCOR Utilities Inc. and Capital Power Corporation, entered into the Arrangement Agreement, which provides that Atlantic Power will acquire, directly or indirectly, all of the issued and outstanding CPILP units pursuant to the Plan of Arrangement under the Canada Business Corporations Act. Under the terms of the Plan of Arrangement, CPILP unitholders will be permitted to exchange each of their CPILP units for, at their election, Cdn$19.40 in cash or 1.3 Atlantic Power common shares. All cash elections will be subject to proration if total cash elections exceed approximately Cdn$506.5 million and all share elections will be subject to proration if total share elections exceed approximately 31.5 million Atlantic Power common shares.

Pursuant to the Plan of Arrangement, CPILP will sell its Roxboro and Southport facilities located in North Carolina to an affiliate of Capital Power, for approximately Cdn$121.0 million which equates to approximately Cdn$2.15 per unit of CPILP. Additionally, in connection with the Plan of Arrangement, the management agreements between certain subsidiaries of Capital Power and CPILP and certain of its subsidiaries will be terminated (or assigned) in consideration of a payment of Cdn$10.0 million. Atlantic Power or its subsidiaries will assume the management of CPILP and enter into a transitional services agreement with Capital Power for a term of up to 6 to 9 months following the completion of the Plan of Arrangement, which will facilitate the integration of CPILP into Atlantic Power.

The Arrangement Agreement contains customary representations, warranties and covenants. Among these covenants, CPILP and CPI Income Services Ltd. have each agreed not to solicit alternative transactions, except that CPILP may respond to an alternative transaction proposal that constitutes, or would reasonably expect to lead to, a superior proposal, that we have a right to match. In addition, Atlantic Power or CPILP may be required to pay a Cdn$35.0 million fee if the Arrangement Agreement is terminated in certain unlikely circumstances.

The completion of the Plan of Arrangement is subject to the receipt of all necessary court and regulatory approvals in Canada and the United States and certain other closing conditions. Atlantic Power and CPILP currently expect to complete the Plan of Arrangement in the fourth quarter of 2011, subject to receipt of required shareholder/unitholder, court and regulatory approvals and other conditions to the Plan of Arrangement described in the Arrangement Agreement.

On May 6, 2011 we closed the sale of our 50.0% lessor interest in the Topsham project for $8.5 million, resulting in no gain or loss on the sale.

OUR POWER PROJECTS

The following table outlines our portfolio of power generating and transmission assets in operation and under construction as of August10, 2011, including our interest in each facility. Management believes the portfolio is well diversified in terms of electricity and steam buyers, fuel type, regulatory jurisdictions and regional power pools, thereby partially mitigating exposure to market, regulatory or environmental conditions specific to any single region.

(1) Except as otherwise noted, economic interest represents the percentage ownership interest in the project held indirectly by Atlantic Power.

(2) Represents our interest in each project's electric generation capacity based on our economic interest.

(3) Includes a separate power sales agreement in which the project and Atlantic City Electric ("ACE") share profits on spot sales of energy and capacity not purchased by ACE under the base PPA.

(4) California utilities pay transmission access charges to the California Independent System Operator, who then pays owners of Transmission system rights, such as Path 15, in accordance with its annual revenue requirement approved every three years by the Federal Energy Regulatory Commission ("FERC").

(5) Path 15 is a FERC regulated asset with a FERC-approved regulatory life of 30 years: through 2034.

(6) Largest payers of transmission access charges supporting Path 15's annual revenue requirement are Pacific Gas & Electric (BBB+), Southern California Edison (BBB+) and San Diego Gas & Electric (A). The California Independent System Operator imposes minimum credit quality requirements for any participants rated A or better unless collateral is posted per the California Independent System Operator imposed schedule.

(7) Upon the expiry of the Reedy Creek PPA, the associated capacity and energy will be sold to PEF under the terms of the current agreement.

(8) Fitch rating on Reedy Creek Improvement District bonds.

(9) Represents our residual interest in the project after all priority distributions are paid to us and the other partners, which is estimated to occur in 2012.

(10) Entered into a one-year interim agreement in April 2011.

(11) Project currently under construction and is expected to be completed in late 2012.

Consolidated Overview

We have six reportable segments: Auburndale, Chambers, Lake, Pasco, Path 15 and Other Project Assets. The results of operations are discussed below by reportable segment.

Project income is the primary GAAP measure of our operating results and is discussed in "Project Operations Performance" below. In addition, an analysis of non-project expenses impacting our results is set out in "Administrative and Other Expenses (Income)" below.

Significant non-cash items, which are subject to potentially significant fluctuations, include: (1) the change in fair value of certain derivative financial instruments that are required by GAAP to be revalued at each balance sheet date (see "Quantitative and Qualitative Disclosures About Market Risk" for additional information); (2) the non-cash impact of foreign exchange fluctuations from period to period on the U.S. dollar equivalent of our Canadian dollar denominated obligations and; (3) the related deferred income tax expense (benefit) associated with these non-cash items.

Cash available for distribution was $18.0 million and $7.5 million for the three-months ended June 30, 2011 and 2010, respectively and $34.6 million and $25.3 million for the six-months ended June 30, 2011 and 2010, respectively. See "Cash Available for Distribution" in this Form 10-Q for additional information.

Income from operations before income taxes for the three-months ended June 30, 2011 and 2010 was $5.4 million and $5.0 million, respectively and $12.9 million and $3.7 million for the six-months ended June 30, 2011 and 2010, respectively. See "Project Income" below for additional information.

Three months ended June 30, 2011 compared with three months ended June 30, 2010

Project Income

Auburndale Segment

The increase in project income for our Auburndale segment of $0.7 million to $5.2 million in the three-month period ended June 30, 2011 from income of $4.5 million in the comparable 2010 period is primarily attributable to the annual contractual escalation of capacity payments under the project's PPA, as well as favorable gas transportation cost compared to 2010.

Lake Segment

Project income for our Lake segment decreased $0.3 million to $6.4 million in the three-month period ended June 30, 2011, from income of $6.7 million in the comparable 2010 period. The decrease is primarily attributable to a $1.4 million change in the benefit associated with the non-cash change in fair value of derivative instruments associated with its natural gas swaps. These swaps were executed to financially hedge the project's exposure to changes in the market prices of natural gas. See Item 3, "Quantitative and Qualitative Disclosures About Market Risk", for additional details about our derivative instruments and other financial instruments. This was partially offset by lower fuel expenses attributable to lower prices on natural gas swaps.

Pasco Segment

Project income for our Pasco segment increased $0.4 million to $0.7 million in the three-month period ended June 30, 2011, from project income of $0.3 million in the comparable 2010 period. The increase is due to higher dispatch compared to 2010 of the project.

Table of Contents

Path 15 Segment

Project income for our Path 15 segment increased $0.3 million to $2.2 million in the three-month period ended June 30, 2011 from $1.9 million in the comparable 2010 period due to decreased operation and maintenance costs.

Chambers Segment

The change in project income for our Chambers segment, which is recorded under the equity method of accounting, was not significant in the three-month period ended June 30, 2011 compared to same period in 2010.

Other Project Assets Segment

Project income for our Other Project Assets segment decreased $3.7 million to a project loss of $(3.2) million for the three-month period ended June 30, 2011 compared to project income of $0.5 million in 2010. The most significant components to the change are as follows:

increased expense at Piedmont in 2011 associated with the non-cash change in fair value of interest rate swaps recorded at fair value;

increased expense at Orlando due to higher operation and maintenance costs attributable to a planned gas turbine overhaul;

reduced revenue at Badger Creek due to lower capacity payments under the new one year interim power purchase agreement;

the absence of income from Topsham. The project was sold in May 2011;

project loss at Idaho Wind of $0.7 million which became operational in Q1 2011; offset by

project income of $1.1 million at Cadillac, which was acquired in December 2010.

Administrative and Other Expenses (Income)

Administration includes the non-project related costs of operating the company. Administration increased $0.9 million to $4.7 million in the three-month period ended June 30, 2011 from $3.8 million in the comparable 2010 period primarily due to higher business development costs associated with the CPILP transaction and increases in compensation costs attributable to an increase in corporate office staff levels.

Interest expense at the corporate level primarily relates to our convertible debentures. Interest expense, net increased $1.0 million to $3.5 million in the three-month period ended June 30, 2011 from $2.5 million in the comparable 2010 period. This increase is due to the issuance of Cdn$80.5 million of convertible debentures in October of 2010.

Foreign exchange loss (gain) primarily reflects the unrealized impact of changes in foreign exchange rates on the U.S. dollar equivalent of our Canadian dollar denominated obligations to holders of the convertible debentures. In addition, unrealized and realized gains and losses on our forward contracts for the purchase of Canadian dollars to satisfy these obligations and our dividends to shareholders are included in foreign exchange loss (gain). Unrealized gains and losses on our forward contracts are reclassified to realized gains and losses upon cash settlement of the contracts. Foreign exchange loss decreased $4.7 million to a $0.5 million gain in the three-month period ended June 30, 2011 compared to a $(4.2) million loss in the comparable 2010 period. The U.S. dollar to Canadian dollar exchange rate increased by 0.5% during the three-month period ended June 30, 2011, compared to a decrease of 4.6% in the comparable period in 2010. See Item 3 "Quantitative and Qualitative Disclosures About Market Risk" for additional details about our management of foreign currency risk

Project Income

Auburndale Segment

The increase in project income for our Auburndale segment of $7.0 million to $11.2 million in the six-month period ended June 30, 2011 from income of $4.2 million in the comparable 2010 period is primarily attributable to the $4.6 million change in the benefit associated with the non-cash change in fair value of derivative instruments associated with its natural gas swaps. These swaps were executed to financially hedge the project's exposure to changes in the market prices of natural gas. See Item 3, "Quantitative and Qualitative Disclosures About Market Risk", for additional details about our derivative instruments and other financial instruments. Project revenue at Auburndale increased by $2.1 million in the six-month period ended June 30, 2011 due to favorable energy pricing compared to 2010, as well as the annual contractual escalation of capacity payments. Interest expense on project-level debt decreased by $0.3 million in the six-month period ended June 30, 2011 as compared to the comparable period in 2010.

Lake Segment

Project income for our Lake segment increased $10.3 million to $14.2 million in the six-month period ended June 30, 2011, from income of $3.9 million in the comparable 2010 period. The increase is primarily attributable to the $8.1 million change in the benefit associated with the non-cash change in fair value of derivative instruments associated with its natural gas swaps. These swaps were executed to financially hedge the project's exposure to changes in the market prices of natural gas. See Item 3, "Quantitative and Qualitative Disclosures About Market Risk", for additional details about our derivative instruments and other financial instruments. In addition, fuel costs at Lake decreased due to the lower price on natural gas swaps.

Pasco Segment

Project income for our Pasco segment decreased $2.0 million to a project loss of $(1.1) million in the six-month period ended June 30, 2011, from project income of $0.9 million in the comparable 2010 period. The decrease is due to higher operations and maintenance expenses attributable to the unplanned replacement of gas turbine components during 2011.

Path 15 Segment

Project income for our Path 15 segment was consistent for the six-month period ended June 30, 2011and 2010.

Chambers Segment

Project income for our Chambers segment, which is recorded under the equity method of accounting, decreased $0.4 million to $4.7 million in the six-month period ended June 30, 2011 from $5.1 million in the comparable 2010 period. The decrease in project income at Chambers is primarily attributable to lower dispatch compared to 2010.

Table of Contents

Other Project Assets Segment

Project income for our Other Project Assets segment decreased $6.5 million to a project loss of $(4.9) million for the six-month period ended June 30, 2011 compared to project income of $1.6 million in 2010. The most significant components to the change are as follows:

increased expense at Piedmont in 2011 associated with a non-cash change in the fair value of an interest rate swap that is recorded at fair value;

decreased income at Selkirk due to a planned outage lasting longer than expected that delayed recognition of capacity payments until the third quarter of 2011;

increased expense at Orlando due to higher operation and maintenance costs attributable to a planned gas turbine overhaul;

reduced revenue at Badger Creek due to lower capacity payments under the new one year interim power purchase agreement;

the absence of income from Topsham. The project was sold in May 2011;

project loss at Idaho Wind of $0.6 million which became operational in Q1 2011; offset by

project income at Cadillac of $1.3 million, which was acquired in December 2010.

Administrative and Other Expenses (Income)

Administration includes the non-project related costs of operating the company. Administration increased $0.8 million to $8.7 million for the six-month period ended June 30, 2011 from $7.9 million in the comparable 2010 period primarily due to higher business development costs associated with the CPILP transaction and increased compensation costs attributable to an increase in corporate office staff levels.

Interest expense at the corporate level primarily relates to our convertible debentures. Interest expense, net increased $2.2 million to $7.5 million in the six-month period ended June 30, 2011 from $5.3 million in the comparable 2010 period. This increase is due to the issuance of Cdn$80.5 million of convertible debentures in October of 2010.

Foreign exchange loss (gain) primarily reflects the unrealized impact of changes in foreign exchange rates on the U.S. dollar equivalent of our Canadian dollar-denominated obligations to holders of the convertible debentures. In addition, unrealized and realized gains and losses on our forward contracts for the purchase of Canadian dollars to satisfy these obligations and our dividends to shareholders are included in foreign exchange loss (gain). Unrealized gains and losses on our forward contracts are reclassified to realized gains and losses upon cash settlement of the contracts. Foreign exchange loss decreased $3.6 million to a $1.2 million gain in the six-month period ended 2011 compared to a $(2.4) million loss in the comparable 2010 period. The U.S. dollar to Canadian dollar exchange rate increased by 3.1% during the six-month period ended June 30, 2011, compared to a decrease of 1.3% in the comparable period in 2010. See Item 3 "Quantitative and Qualitative Disclosures About Market Risk" for additional details about our management of foreign currency risk and the components of the foreign exchange gain recognized during the six-month period ended June 30, 2011 compared to the foreign exchange loss in the comparable 2010 period.

Supplementary Non-GAAP Financial Information

The key measure we use to evaluate the results of our projects is Cash Available for Distribution. Cash Available for Distribution is not a measure recognized under GAAP, does not have a standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other issuers. We believe Cash Available for Distribution is a relevant supplemental measure of our

ability to pay dividends to our shareholders. A reconciliation of net cash provided by operating activities to Cash Available for Distribution is set out below under "Cash Available for Distribution." Investors are cautioned that we may calculate this measure in a manner that is different from other companies.

The primary factor influencing Cash Available for Distribution is cash distributions received from the projects. These distributions received are generally funded from Project Adjusted EBITDA generated by the projects, reduced by project-level debt service and capital expenditures, and adjusted for changes in project-level working capital and cash reserves. Project Adjusted EBITDA is defined as project income plus interest, taxes, depreciation and amortization (including non-cash impairment charges) and changes in fair value of derivative instruments. Project Adjusted EBITDA is not a measure recognized under GAAP and does not have a standardized meaning prescribed by GAAP and is therefore unlikely to be comparable to similar measures presented by other companies. We use unaudited Project Adjusted EBITDA to provide comparative information about project performance without considering how projects are capitalized or whether they contain derivative contracts that are required to be recorded at fair value. A reconciliation of project income to Project Adjusted EBITDA is set out below under "Project Adjusted EBITDA." Investors are cautioned that we may calculate this measure in a manner that is different from other companies.

Because Project Adjusted EBITDA and project distributions are key drivers of both the performance of our projects and Cash Available for Distribution, please see the following supplementary unaudited non-GAAP information that summarizes Project Adjusted EBITDA by project and a reconciliation of Project Adjusted EBITDA by project to project distributions actually received by us.

Project Operations Performance Three months ended June 30, 2011 compared with three months ended June 30, 2010

Aggregate Project Adjusted EBITDA increased $4.4 million to $42.9 million in the three-month period ended June 30, 2011 from $38.5 million in the comparable 2010 period and included the following factors:

project Adjusted EBITDA of $2.6 million at Cadillac, which was acquired in December 2010;

project Adjusted EBITDA of $1.2 million at Idaho Wind, which became operational in the first quarter of 2011;

increased Project Adjusted EBITDA of $1.2 million at Auburndale due to the annual contractual escalation of capacity payments, as well as favorable gas transportation costs;

increased Project Adjusted EBITDA of $1.1 million at Lake due to decreased fuel costs attributable to the lower prices on natural gas swaps; offset by

decreased Project Adjusted EBITDA of $0.7 million at Badger Creek due to lower capacity payments under the new one year interim power purchase agreement in April 2011;

decreased Project Adjusted EBITDA of $0.7 million at Orlando due to higher operation and maintenance costs attributable to a planned gas turbine overhaul in 2011; and

decreased Project Adjusted EBITDA of $0.5 million at Topsham. The project was sold in May 2011.

Table of Contents

Aggregate power generation for projects in operation for the three-months ended June 30, 2011 was 8.8% greater than the three-month period ended June 30, 2010. Generation during the three-month period ended June 30, 2011 compared to the comparable 2010 period was favorably impacted primarily by additional generation associated with the acquisition of Cadillac in the fourth quarter of 2010 and with Idaho Wind achieving commercial operation in the first quarter of 2011, as well as increased dispatch at Selkirk and Pasco. The favorable variance was partially offset by lower generation at Chambers and Badger Creek due to reduced dispatch, and at Lake which had no off-peak deliveries and a planned major maintenance outage at Orlando in 2011.

The project portfolio achieved a weighted average availability of 95.5% for the three-month period ended June 30, 2011 compared to 95.2% in the 2010 period. The increase in portfolio availability for the three-month period ended June 30, 2011 versus the prior period was primarily due to a planned outage at Selkirk completed in 2010 offset by outages at Orlando and Badger Creek in 2011. Each of the projects with reduced availability was nevertheless able to achieve substantially all of their respective capacity payments as a result of contract terms that provide for certain levels of planned and unplanned outages.

Project Operations Performance Six months ended June 30, 2011 compared with six months ended June 30, 2010

Aggregate Project Adjusted EBITDA increased $1.6 million to $78.9 million in the six-month period ended June 30, 2011 from $77.3 million in the comparable 2010 period and included the following factors:

project Adjusted EBITDA of $4.4 million at Cadillac, which was acquired in December 2010;

increased Project Adjusted EBITDA of $2.3 million at Lake due to decreased fuel costs attributable to the lower price on natural gas swaps;

project Adjusted EBITDA of $2.1 million at Idaho Wind, which became operational in the first quarter of 2011;

increased Project Adjusted EBITDA of $2.1 million at Auburndale due to the annual contractual escalation of capacity payments and increased dispatch; offset by

decreased Project Adjusted EBITDA of $2.7 million at Selkirk due to lower capacity revenue. A planned outage was longer than expected and resulted in a delay in recognition of capacity payments until the third quarter of 2011;

decreased Project Adjusted EBITDA of $2.0 million at Pasco primarily due to higher operations and maintenance expenses attributable to the unplanned replacement of gas turbine blades during a maintenance outage;

decreased Project Adjusted EBITDA of $1.1 million at Chambers attributable lower dispatch;

decreased Project Adjusted EBITDA of $1.0 million at Topsham. The project was sold in May 2011;

decreased Project Adjusted EBITDA of $0.7 million at Badger Creek primarily attributable to lower capacity payments under the new one year interim power purchase agreement in April 2011;

decreased Project Adjusted EBITDA of $0.6 million at Orlando due to higher operation and maintenance costs attributable to a planned gas turbine overhaul in 2011;

Table of Contents

decreased Project Adjusted EBITDA of $0.6 million at Gregory due to lower dispatch and higher fuel costs; and

decreased Project Adjusted EBITDA of $0.4 million at Path 15 due to higher operation and maintenance costs.

Aggregate power generation for projects in operation for the six-months ended June 30, 2011 was 4.6% greater than the six-month period ended June 30, 2010. Generation during the six-month period ended June 30, 2011 was favorably impacted primarily by additional generation associated with the acquisition of Cadillac in the fourth quarter of 2010 and with Idaho Wind achieving commercial operation in the first quarter of 2011, as well as increased dispatch at Selkirk. The favorable variance was partially offset by lower generation at Chambers and Badger Creek due to reduced dispatch and a planned major maintenance outage at Orlando in 2011 and increased generation at Lake associated with off-peak energy sales in 2010.

The project portfolio achieved a weighted average availability of 94.6% for the six-month period ended June 30, 2011 compared to 96.7% in the 2010 period. The decrease in portfolio availability for the six-month period ended June 30, 2011 versus the prior period was primarily due to planned outages at Badger Creek, Chambers and Selkirk and a forced outage at Delta-Person. Each of the projects with reduced availability was nevertheless able to achieve substantially all of their respective capacity payments as a result of contract terms that provide for certain levels of planned and unplanned outages.

Cash Flow from Operating Activities

Our cash flow from the projects may vary from year to year based on, among other things, changes in prices under the PPAs, fuel supply and transportation agreements, steam sales agreements and other project contracts, changes in regulated transmission rates, compliance with the terms of non-recourse project-level financing including debt repayment schedules, the transition to market or re-contracted pricing following the expiration of PPAs, fuel supply and transportation contracts, working capital requirements and the operating performance of the projects. Project cash flows may have some seasonality and the pattern and frequency of distributions to us from the projects during the year can also vary, although such seasonal variances do not typically have a material impact on our business.

Cash flow from operating activities increased by $8.7 million for the six-month period ended June 30, 2011 over the comparable period in 2010. The changes from the prior period are partially attributable to the changes in Project Adjusted EBITDA described above, the release of $4.2 million of previously restricted cash at our equity accounted Selkirk project, as well as changes in working capital at both consolidated and unconsolidated affiliates.

Cash Flow from Investing Activities

Cash flow from investing activities includes restricted cash. Restricted cash fluctuates from period to period in part because non-recourse project-level financing arrangements typically require all operating cash flow from the project to be deposited in restricted accounts and then released at the time that principal payments are made and project-level debt service coverage ratios are met. As a result, the timing of principal payments on project-level debt causes significant fluctuations in restricted cash balances, which typically benefits investing cash flow in the second and fourth quarters of the year and decreases investing cash flow in the first and third quarters of the year.

Cash flows used in investing activities for the six-month period ended June 30, 2011 were $24.8 million compared to cash flows used in investing activities of $1.9 million for the comparable 2010 period. We invested $42.4 million for the construction-in-progress for our Piedmont biomass project offset by the repayment of $15.5 million from our related party loan to Idaho Wind.

Table of Contents

Cash Flow from Financing Activities

Cash used in financing activities for the six-month period ended June 30, 2011 resulted in a net outflow of $18.8 million compared to a net outflow of $20.7 million for the same period in 2010. The change from the comparable period is primarily attributable to a $6.7 million increase in dividends paid due to a higher number of common shares outstanding to the comparable period in 2010. Since the year ended December 31, 2010, Cdn$17.2 million of convertible debentures have converted to common stock. In addition, we issued common shares in a public offering in October 2010. The increase in dividends is partially offset by proceeds of $29.9 million of project-level debt related to our Piedmont biomass project.

Cash Available for Distribution

Holders of our common shares receive monthly cash dividends at an annual rate of Cdn$1.094 per share. Total dividends paid to shareholders for the three and six-month periods ended June 30, 2011 increased over the respective prior year amounts as a result of (i) increases in the value of the Canadian dollar, which is the currency in which the dividends are paid; and (ii) a higher number of common shares outstanding in the 2011 periods as a result of the conversion of convertible debentures into common shares and the issuance of vested shares from our long-term incentive plan. This increase in dividends paid is generally offset by realized gains on our foreign currency forward contracts, which are included in cash flows from operating activities. See "Foreign Currency Exchange Rate Risk" in Item 3 of this Form 10-Q for additional information about our foreign currency forward contracts. The payout ratio for the three-month periods ended June 30, 2011 and 2010 was 109% and 212%, respectively and 111% and 125% for the six-month periods ended June 30, 2011 and 2010, respectively.

Outlook

Based on our actual performance to date and projections for the remainder of the year, we continue to expect to receive distributions from our projects in the range of $80 million to $90 million for the full year 2011. We expect overall levels of operating cash flows in 2011 to be improved over actual 2010 levels. Higher distributions from existing projects, initial distributions from our recent investment in Idaho Wind and Cadillac, and a slightly lower payment under the management termination agreement are expected to be partially offset by the one-time cash tax refund of $8.0 million received in 2010. In 2012, additional increases in distributions from projects are expected to further increase operating cash flow compared to 2011. The most significant factor in the expected higher operating cash flow in 2012 is increased distributions from Selkirk following the final payment of its non-recourse project-level debt in 2012.

The following items comprise the most significant increases in projected 2011 project distributions compared to 2010:

lower fuel costs at the Lake project;

resumption of distributions from the Selkirk project;

annual increase in contractual capacity payments from the Auburndale and Lake projects; and

distributions from the recently acquired Cadillac and Idaho Wind projects.

In 2010, the following five projects comprised approximately 90% of project distributions received: Auburndale, Lake, Orlando, Path 15 and Pasco. For 2011, we expect these same five projects to contribute approximately 85% of total project distributions.

In addition to the items above, the following is a summary of other projections for project distributions in 2011 and beyond:

Lake

The Lake project is exposed to changes in natural gas prices from the expiration of its natural gas supply contract on June 30, 2009 through to the expiration of its PPA in July 2013 that are not passed through its PPAs. We have executed a hedging strategy to mitigate this exposure by periodically entering into financial swaps that effectively fix the forward price of natural gas expected to be purchased at the project. These hedges are summarized in Item 3, "Quantitative and Qualitative Disclosures About Market Risk", in this Form 10-Q. We intend to continue, when appropriate, to evaluate opportunities to further mitigate natural gas price exposure at Lake in 2013, but do not intend to execute additional hedges at Lake for 2011 and 2012 because our natural gas exposure for those years is already substantially hedged.

The variable energy revenues in the Lake project's PPA are indexed, in part, to the price of coal consumed by a specific utility plant in Florida, the Crystal River facility. The components of this coal price are proprietary to the utility, but we believe that the utility purchases coal for that plant under a combination of short to medium term contracts and spot market transactions.

Coal prices used in the energy revenue component of the projected distributions from the Lake project incorporate a forecast of the applicable Crystal River facility coal cost provided by the utility based on their internal projections. The projected annual cash distributions change by approximately $1.0 million for every $0.25/Mmbtu change in the projected price of coal.

We expect to receive distributions from the Lake project of approximately $30 million to $34 million in both 2011 and 2012. The increases in 2011 and 2012 over the $28.8 million of distributions in 2010 are primarily due to higher contractual capacity payments and lower hedged and unhedged natural gas prices than in 2010.

Table of Contents

Auburndale

Based on the current forecast, we expect distributions from Auburndale of $25 million to $27 million per year from 2011 through 2013, when the project's current PPA expires. Distributions received from Auburndale in the 2011 through 2013 period will be impacted by projected coal and gas prices in the forecast period.

The projected revenue from the Auburndale PPA contains a component related to the costs of coal consumed at the utility off-taker's Crystal River facility as described above for the Lake project. Because that mechanism does not pass through changes in the project's fuel costs, Auburndale's operating margin is exposed to changes in natural gas prices for approximately 20% of its natural gas requirements through the expiration of the project's gas supply contract. The remaining 80% of the project's fuel requirements are supplied under an agreement with fixed prices through its expiration in mid-2012. We have been executing a strategy to mitigate the future exposure to changes in natural gas prices at Auburndale by periodically entering into financial swaps that effectively fix the forward price of natural gas required at the project. These hedges are summarized in Item 3, "Quantitative and Qualitative Disclosures About Market Risk", in this Form 10-Q. The 2011 natural gas price exposure at Auburndale has been substantially hedged. We intend to continue, when appropriate, to evaluate opportunities to further mitigate natural gas price exposure at Auburndale in 2012 and 2013.

Orlando

The PPA at the Orlando project extends through 2023. However, the project's natural gas supply agreement expires in 2013. Currently projected market prices for natural gas following the expiration of the current supply agreement are lower than the price of natural gas currently being purchased under the project's gas contract. As a result, we expect a significant increase in cash distributions from the Orlando project beginning in 2014. We have been executing a hedging strategy to reduce the market price risk associated with expected natural gas requirements at Orlando in 2014 and beyond. See "Item 3. Quantitative and Qualitative Disclosures About Market Risks" in this Form 10-Q for further details.

Liquidity and Capital Resources

Overview

Our primary source of liquidity is distributions from our projects and availability under our revolving credit facility. A significant portion of the cash received from project distributions is used to pay dividends to our shareholders and interest on our outstanding convertible debentures. We may fund future acquisitions with a combination of cash on hand, the issuance of additional corporate debt or equity securities and the incurrence of privately placed bank or institutional non-recourse operating level debt.

We believe that we will be able to generate sufficient amounts of cash and cash equivalents to maintain our operations and meet obligations as they become due.

Other than the capital requirements stated below for the CPILP acquisition, we do not expect any additional material or unusual requirements for cash outflows for 2011 for capital expenditures or other required investments. We have contributed approximately $75.0 million to fund the equity portion of the construction costs for Piedmont. Approximately $59.0 million of this amount was contributed in the fourth quarter of 2010 and the remaining balance was paid in the quarter ending March 31, 2011. In addition, there are no debt instruments with significant maturities or refinancing requirements in 2011. See "Outlook" above for information about changes in expected distributions from our projects in 2011 and beyond.

Table of Contents

We intend to finance the cash portion of the purchase price for the transaction with CPILP by issuing up to approximately Cdn$200.0 million of equity and up to approximately $425.0 million of debt through public and private offerings. However, in the event that such financing is not available on terms satisfactory to us, we have received a commitment letter, evidencing the commitment of a Canadian chartered bank and another financial institution to structure, arrange, underwrite and syndicate a senior secured credit facility consisting of a Tranche B Facility in the amount of $625 million, subject to the terms and conditions set forth therein.

Credit facility

We maintain a credit facility with a capacity of $100 million, $50 million of which may be utilized for letters of credit. The credit facility matures in August 2012.

The credit facility bears interest at the London Interbank Offered Rate ("LIBOR") plus an applicable margin between 1.5% and 3.35% that varies based on the credit statistics of one of our subsidiaries. As of June 30, 2011, the applicable margin was 1.5%. As of June 30, 2011, $48.6 million were issued in letters of credit, but not drawn, to support contractual credit requirements at eight of our projects.

We must meet certain financial covenants under the terms of the credit facility, which are generally based on the cash flow coverage ratios and also require us to report indebtedness ratios to our lenders. The facility is secured by pledges of assets and interests in certain subsidiaries. We expect to remain in compliance with the covenants of the credit facility for at least the next 12 months.

Convertible Debentures

In October 2006, we issued, in a public offering, Cdn$60 million aggregate principal amount of 6.25% convertible secured debentures, which we refer to as the 2006 Debentures. In 2009 the holders agreed to change the rate to 6.50% and extend the maturity date to 2014. The 2006 Debentures pay interest semi-annually on April 30 and October 31 of each year. The Debentures have a maturity date of October 31, 2014 and are convertible into approximately 80.6452 common shares per Cdn$1,000 principal amount of 2006 Debentures, at any time, at the option of the holder, representing a conversion price of Cdn$12.40 per common share. The 2006 Debentures are secured by a subordinated pledge of our interest in certain subsidiaries and contain certain restrictive covenants. Through August 10, 2011, a cumulative Cdn$14.5 million of the 2006 Debentures have been converted to 1.2 million common shares. As of August 10, 2011 the 2006 Debentures balance is Cdn$45.2 million ($47.5 million).

In December 2009, we issued, in a public offering, Cdn$86.25 million aggregate principal amount of 6.25% convertible unsecured subordinated debentures, which we refer to as the 2009 Debentures. The 2009 Debentures pay interest semi-annually on March 15 and September 15 of each year beginning September 15, 2010. The 2009 Debentures mature on March 15, 2017 and are convertible into approximately 76.9231 common shares per Cdn$1,000 principal amount of 2009 Debentures, at any time, at the option of the holder, representing a conversion price of Cdn$13.00 per common share. Through August 10, 2011, a cumulative Cdn$13.9million of the 2009 Debentures have been converted to 1.1 million common shares. As of August 10, 2011 the 2009 Debentures balance is Cdn$72.4 million ($76.1 million).

In October 2010, we issued, in a public offering, Cdn$80.5 million aggregate principal amount of 5.60% convertible unsecured subordinated debentures, which we refer to as the 2010 Debentures. The 2010 Debentures pay interest semi-annually on June 30 and December 30 of each year beginning June 30, 2011. The 2010 Debentures mature on June 30, 2017, unless earlier redeemed. The debentures are convertible into our common shares at an initial conversion rate of 55.2486 common shares per Cdn$1,000 principal amount of debentures, representing an initial conversion price of approximately

Cdn$18.10 per common share. As of August 10, 2011 the 2010 debentures balance is Cdn$80.5 million ($84.6 million).

Project-level debt

The following table summarizes the maturities of project-level debt. The amounts represent our share of the non-recourse project-level debt balances at June 30, 2011 and exclude any purchase accounting adjustments recorded to adjust the debt to its fair value at the time the project was acquired. Certain of the projects have more than one tranche of debt outstanding with different maturities, different interest rates and/or debt containing variable interest rates. Project-level debt agreements contain covenants that restrict the amount of cash distributed by the project if certain debt service coverage ratios are not attained. As of June 30, 2011, the covenants at the Delta-Person project and at Epsilon Power Partners are temporarily preventing those subsidiaries from making cash distributions to us. We expect to resume receiving distributions from Delta-Person and Epsilon Power Partners in 2012. All project-level debt is non-recourse to us and substantially the entire principal is amortized over the life of the projects' PPAs. The non-recourse holding company debt relating to our investment in Chambers is held at Epsilon Power Partners, our wholly-owned subsidiary. For the six-month period ended June 30, 2011, we have contributed approximately $0.5 million to Epsilon Power Partners for debt service payments on the holding company debt but do not anticipate any additional required contributions to Epsilon.

The range of interest rates presented represents the rates in effect at June 30, 2011.

(1) The Piedmont debt outstanding is the inception to date balance on the construction debt funded by the related bridge loan. The terms of the Piedmont project-level debt refinancing include an $82.0 million construction and term loan and a $51.0 million bridge loan for approximately 95.0% of the stimulus grant expected to be received from the U.S. Treasury 60 days after the start of commercial operations. The $51.0 million bridge loan will be repaid in 2012 and repayment of the expected $82.0 million term loan will commence in 2013.

(2) The Idaho Wind project-level credit facility is composed of two tranches, which include a $157.5 million construction loan that was converted to a 17-year term loan upon commercial operations, and a $83.2 million cash grant facility which was repaid in June with federal stimulus grant proceeds after completion of construction, The remaining costs of the project were funded with a combination of equity from the owners

and member loans from affiliates of Atlantic Power and GE Energy Financial Services. As of June 30, 2011, our share of total debt outstanding for Idaho Wind was $43.4 million, and our share of the member loans was $7.3 million. Member loans will be paid down with a combination of funds from a third closing for additional debt and project cash flow.

Restricted cash

The projects generally have reserve requirements to support payments for major maintenance costs and project-level debt service. For projects that are consolidated, our share of these amounts is reflected as restricted cash on the consolidated balance sheet. At June 30, 2011, restricted cash at the consolidated projects totaled $21.0 million.

Capital Expenditures

Capital expenditures for the projects are generally made at the project level using project cash flows and project reserves. Therefore, the distributions that we receive from the projects are made net of capital expenditures needed at the projects. The projects in which we have investments generally consist of large capital assets that have established commercial operations. Ongoing capital expenditures for assets of this nature are generally not significant because most major expenditures relate to planned repairs and maintenance and are expensed when incurred.

In 2011, several of the projects have planned outages to complete maintenance work. The level of maintenance and capital expenditures is slightly higher than in 2010. During the second quarter of 2011, Badger Creek replaced the combustor section of its gas turbine, the cost of which was covered under the operations and maintenance fee to the project's operator. Orlando undertook a scheduled major overhaul of its gas turbine and a major overhaul of its steam turbine in the second quarter. A substantial portion of Orlando's outage costs are paid through monthly payments under the project's long-term maintenance agreement with Alstom Power. Lake took two planned outages in the second quarter to replace one of its gas turbines and a portion of the other with temporary engine components available under Lake's lease engine agreement with GE, which permits Lake to install replacement engines while the project's components are being repaired. The cost of the repairs to Lake's engines is expected to be covered under the services agreement with GE that provides for unplanned maintenance.

In the six-month period ended June 30, 2011, we incurred approximately $45.6 million in capital expenditures for the construction of our Piedmont biomass project. For the remainder of 2011, we expect to incur approximately $62.5 million in capital expenditures related to the Piedmont project, with total project costs through expected completion in late 2012 of approximately $207.0 million. The project is being funded with an $82.0 million construction loan which will convert to a term loan upon commercial operation, a $51.0 million bridge loan and approximately $75.0 million of equity contributed by Atlantic Power. The bridge loan will be repaid from the proceeds of a federal stimulus grant which is expected to be received two months after achieving commercial operation.

Off-Balance Sheet Arrangements

As of June 30, 2011, we had no off-balance sheet arrangements as defined in Item 303(a)(4) of Regulation S-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and commodity prices, will affect our cash flows or the value of our holdings of financial instruments. The objective of market risk management is to minimize the impact that market risks have on our cash flows as described in the following paragraphs.

Our market risk-sensitive instruments and positions have been determined to be "other than trading." Our exposure to market risk as discussed below includes forward-looking statements and represents an estimate of possible changes in fair value or future earnings that would occur assuming hypothetical future movements in fuel commodity prices, currency exchange rates or interest rates. Our views on market risk are not necessarily indicative of actual results that may occur and do not represent the maximum possible gains and losses that may occur, since actual gains and losses will differ from those estimated based on actual fluctuations in fuel commodity prices, currency exchange rates or interest rates and the timing of transactions.

Fuel Commodity Market Risk

Our current and future cash flows are impacted by changes in electricity, natural gas and coal prices. The combination of long-term energy sales and fuel purchase agreements is generally designed to mitigate the impacts to cash flows of changes in commodity prices by generally passing through changes in fuel prices to the buyer of the energy.

The Lake project's operating margin is exposed to changes in the market price of natural gas until the expiration of its PPA on July 31, 2013. The Auburndale project purchases natural gas under a fuel supply agreement which provides approximately 80% of the project's fuel requirements at fixed prices through June 30, 2012. The remaining 20% is purchased at market prices and therefore the project is exposed to changes in natural gas prices for that portion of its gas requirements through the termination of the fuel supply agreement and 100% of its natural gas requirements from the expiration of the fuel contract in mid-2012 until the termination of its PPA at the end of 2013.

We have executed a strategy to mitigate the future exposure to changes in natural gas prices at Lake and Auburndale by periodically entering into financial swaps that effectively fix the price of natural gas required at these projects. These natural gas swaps are derivative financial instruments and are recorded in the consolidated balance sheet at fair value. Changes in the fair value of the natural gas swaps at Lake and Auburndale, through June 30, 2009 were recorded in other comprehensive income (loss) as they were designated as a hedge of the risk associated with changes in market prices of natural gas. As of July 1, 2009, these natural gas swap hedges were de-designated and the changes in their fair value are recorded in change in fair value of derivative instruments in the consolidated statements of operations.

In 2011, projected cash distributions at Auburndale would change by approximately $0.5 million per $1.00/Mmbtu change in the price of natural gas based on the current level of un-hedged natural gas volumes at the project. In 2011, projected cash distributions at Lake would change by approximately $0.8 million per $1.00/Mmbtu change in the price of natural gas based on the current level of un-hedged natural gas volumes at the project.

Coal prices used in the revenue component of the projected distributions from the Lake and Auburndale projects incorporate a forecast of the applicable Crystal River facility coal cost provided by the utility based on their internal projections. The projected annual cash distributions from Lake and Auburndale combined would change by approximately $2.4 million for every $0.25/Mmbtu change in the projected price of coal.

Table of Contents

The following table summarizes the hedge position related to natural gas needed to meet PPA requirements at Lake and Auburndale as of June 30, 2011 and August 10, 2011:

	2011	2012	2013
Portion of gas volumes currently hedged:			
Lake:			
Contracted			
Financially hedged	78%	90%	83%
Total	78%	90%	83%
Auburndale:			
Contracted	80%	0%	0%
Financially hedged	13%	32%	79%
Total	93%	32%	79%
Average price of financially hedged volumes (per Mmbtu)			
Lake	$ 6.52	$ 6.90	$ 6.63
Auburndale	$ 6.68	$ 6.51	$ 6.92

In October 2010, we entered into natural gas swaps that are effective in 2014 and 2015. The natural gas swaps are related to our 50% share of expected fuel purchases at our Orlando project as its operating margin is exposed to changes in natural gas prices following the expiration of its fuel contract at the end of 2013. These financial swaps effectively fix the price of 1.2 million Mmbtu of natural gas at the Orlando project at a weighted average price of $5.76/Mmbtu and represent approximately 25% of our share of the expected natural gas purchases at the project during 2014 and 2015.

We expect cash distributions from Orlando to increase significantly following the expiration of the project's gas contract at the end of 2013 because both projected natural gas prices at that time and the prices in the natural gas swaps we have executed are lower than the price of natural gas being purchased under the project's gas contract.

Foreign Currency Exchange Rate Risk

We use forward foreign currency contracts to manage our exposure to changes in foreign exchange rates, as we generate cash flow in U.S. dollars but pay dividends to shareholders and interest on convertible debentures predominately in Canadian dollars. Since our inception, we have had an established hedging strategy for the purpose of mitigating the currency risk impact on the long-term sustainability of our dividends to shareholders. We have executed this strategy by entering into forward contracts to purchase Canadian dollars at fixed rates of exchange to hedge approximately 86% of our expected dividend and convertible debenture interest payments through 2013. Changes in the fair value of the forward contracts partially offset foreign exchange gains or losses on the U.S. dollar equivalent of our Canadian dollar obligations. The forward contracts consist of (1) monthly purchases through the end of 2013 of Cdn$6.0 million at an exchange rate of Cdn$1.134 per U.S. dollar and (2) purchases in both April and October 2011 of Cdn$1.9 million at an exchange rate of Cdn$1.1075 per U.S. dollar.

It is our intention to periodically consider extending the length of these forward contracts.

The foreign exchange forward contracts are recorded at fair value based on quoted market prices and the estimation of our credit rating or the credit rating of our counterparties. Changes in the fair value of the foreign currency forward contracts are recorded in foreign exchange (gain) loss in the consolidated statements of operations.

Table of Contents

The following table contains the components of recorded foreign exchange (gain) loss for the three and six-month periods ended June 30, 2011 and 2010:

	Three months ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Unrealized foreign exchange (gain) loss:				
Convertible debentures	$ 1,317	$ (6,486)	$ 6,632	$ (2,505)
Forward contracts and other	1,303	12,309	(2,133)	7,704
	2,620	5,823	4,499	5,199
Realized foreign exchange gains on forward contract settlements	(3,155)	(1,599)	(5,692)	(2,767)
	$ (535)	$ 4,224	$ (1,193)	$ 2,432

The following table illustrates the impact on the fair value of our financial instruments of a 10% hypothetical change in the value of the U.S. dollar compared to the Canadian dollar as of June 30, 2011:

Convertible debentures, at carrying value	$ 20,970
Foreign currency forward contracts	$ (20,548)

On July 27, 2011, August 3, 2011 and August 5, 2011 we executed a series of financial transactions with an exercise date of January 18, 2012, to economically hedge a portion of the foreign currency exchange risk associated with the closing of the CPILP transaction.

The July 27, 2011 transactions include a forward purchase of $32.0 million at $0.9460 per Cdn$1.00, a call option to purchase $84.7 million at $0.94565 per Cdn$1.00 and a put option to sell $116.7 million at $0.90 per Cdn$1.00. The August 3, 2011 transactions include a forward purchase of $76.0 million at $0.9665 per Cdn$1.00, a call option to purchase $14.5 million at $0.9665 per Cdn$1.00 and a put option to sell $90.5 million at $0.90 per Cdn$1.00. The August 5, 2011 transactions include a forward purchase of $81.2 million at $0.9872 per Cdn$1.00, a call option to purchase $9.3 million at $0.9872 per Cdn$1.00 and a put option to sell $90.5 million at $0.90 per Cdn$1.00.

Interest Rate Risk

Changes in interest rates do not have a significant impact on cash payments that are required on our debt instruments as approximately 89% of our debt, including our share of the project-level debt associated with equity investments in affiliates, either bears interest at fixed rates or is financially hedged through the use of interest rate swaps.

We have executed an interest rate swap at our consolidated Auburndale project to economically fix a portion of its exposure to changes in interest rates related to the variable-rate debt. The interest rate swap agreement was designated as a cash flow hedge of the forecasted interest payments under the project-level Auburndale debt. The interest rate swap was executed in November 2009 and expires on November 30, 2013.

We have an interest rate swap at our consolidated Cadillac project to economically fix a portion of its exposure to changes in interest rates related to the variable-rate debt. The interest rate swap agreement was designated as a cash flow hedge of the forecasted interest payments under the project-level Cadillac debt. The interest rate swap expires on June 30, 2025.

We executed two interest rate swaps at our consolidated Piedmont project to economically fix its exposure to changes in interest rates related to its variable-rate debt. The interest rate swap agreements

Table of Contents

are not designated as hedges and changes in their fair market value are recorded in the statements of operations. The interest rate swaps were executed on October 21, 2010 and November 2, 2010 and expire on February 29, 2016 and November 30, 2030, respectively.

In accounting for cash flow hedges, gains and losses on the derivative contracts are reported in other comprehensive income, but only to the extent that the gains and losses from the change in value of the derivative contracts can later offset the loss or gain from the change in value of the hedged future cash flows during the period in which the hedged cash flows affect net income. That is, for cash flow hedges, all effective components of the derivative contracts' gains and losses are recorded in other comprehensive income (loss), pending occurrence of the expected transaction. Other comprehensive income (loss) consists of those financial items that are included in "Accumulated other comprehensive loss" in our accompanying consolidated balance sheets but not included in our net income. Thus, in highly effective cash flow hedges, where there is no ineffectiveness, other comprehensive income changes by exactly as much as the derivative contracts and there is no impact on earnings until the expected transaction occurs.

After considering the impact of interest rate swaps, a hypothetical change in the average interest rate of 100 basis points would change annual interest costs, including interest at equity investments, by approximately $0.7 million.

ITEM 4. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Based on this evaluation, our principal executive officer and principal financial officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report on Form 10-Q.

Changes in Internal Controls over Financial Reporting

There were no changes in our internal controls over financial reporting (as such term is defined in Rules 13a-15(f) under the Exchange Act) that occurred during the period covered by this report that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations over Internal Controls

Our internal controls over financial reporting are designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. However, internal controls over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations, including the possibility of human error and circumvention by collusion or overriding of controls. Accordingly, even an effective internal control system may not prevent or detect material misstatements on a timely basis. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Our Lake project is currently involved in a dispute with Progress Energy Florida over off-peak energy sales in 2010. All amounts billed for off-peak energy during 2010 by the Lake project have been paid in full by Progress. The Lake project has filed a claim against Progress in which we seek to confirm our contractual right to sell off-peak energy at the contractual price for such sales. Progress filed a counter-claim against the Lake project, seeking, among other things, the return of amounts paid for off-peak power sales during 2010 and a declaratory order clarifying Lake's rights and obligations under the PPA. The Lake project has stopped dispatching during off-peak periods pending the outcome of the dispute. However, we strongly believe that the court will confirm our contractual right to sell off-peak power using the contractual price that was used during 2010 and that we will be able to continue such off-peak power sales for the remainder of the term of the PPA. We have not recorded any reserves related to this dispute and expect that the outcome will not have a material adverse effect on our financial position or results of operations.

From time to time, Atlantic Power, its subsidiaries and the projects are parties to disputes and litigation that arise in the normal course of business. We assess our exposure to these matters and record estimated loss contingencies when a loss is likely and can be reasonably estimated. There are no matters pending as of June 30, 2011 which are expected to have a material adverse impact on our financial position or results of operations.

ITEM 1A. RISK FACTORS

Except to the extent additional factual information disclosed elsewhere in this Quarterly Report on Form 10-Q relates to such risk factors (including, without limitation, the matters discussed in Part I, "Item 2-Management's Discussion and Analysis of Financial Condition and Results of Operations"), there were no material changes to the risk factors disclosed in Part I, "Item 1A. Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2010.

GENERAL DEVELOPMENT OF THE BUSINESS

Relationship with Capital Power

As part of the sale by EPCOR Utilities Inc. (EUI, and collectively with its subsidiaries, EPCOR) of a 27.8% interest in its power generation business to Capital Power: (i) in June 2009, CPI Investments Inc. (CPI Investments) acquired 16,511,104 limited partnership units (Units) in the capital of the Partnership and all of the common shares of the General Partner of the Partnership, which entity directly owns 2,400 Units in the capital of the Partnership, representing collectively 30.6% of the then total outstanding units of the Partnership (the Acquisition), and (ii) in July 2009, Capital Power acquired 100% ownership of the entities that provide management and operations services to the Partnership and its subsidiaries pursuant to the Management and Operations Agreements. EPCOR owns 51 voting, non-participating shares of CPI Investments and Capital Power indirectly owns 49 voting, participating shares of CPI Investments. In connection with the Acquisition, the Partnership, Capital Power and EUI entered into a Memorandum of Agreement dated June 7, 2009, pursuant to which the parties agreed on certain matters, including: (i) an approach by which Capital Power and the Partnership will work together early in the process to review Capital Power development opportunities in which the Partnership might have an interest in participating and acquisitions under the Partnership's right of first look applicable to operating power generation acquisitions (including brownfield development opportunities tied to such assets) on which Capital Power plans to bid (including through joint venture opportunities); (ii) the Partnership will have a right of first look on the sale of Capital Power generation assets so it may become the acquiring vehicle at not less than the fair market value for such assets; (iii) amendments to the incentive fee pursuant to which the Manager is compensated by the Partnership, and (iv) the basis on which the Partnership would in the future provide relief to Capital Power with respect to maintaining its minimum 30% interest in the Partnership. See "Interests of Management and Others in Material Transactions" and "Material Contracts". In addition, the Partnership and each of EPCOR and Capital Power entered into standstill agreements pursuant to which Capital Power and EPCOR agreed not to increase their ownership in the Partnership without the consent of the Independent Directors of the Partnership until July 1, 2010.

As a result of the Premium Distribution™ and Distribution Reinvestment Plan (the DRIP), as of December 31, 2010, CPI Investments, through its direct ownership of Units and 100% ownership of the General Partner, indirectly owned 29.6% of the outstanding Units.
