**Item 8.01 Other Events.**

On September 24, 2005, Hurricane Rita made landfall as a Category 3 storm and hit all of Cleco Power's service territory, including the area north of Lake Pontchartrain, which was devastated by Hurricane Katrina 27 days earlier. Cleco Power had approximately 136,000 customers (out of approximately 265,000 customers) without power immediately following the hurricane. As of October 7, 2005, Cleco Power is still working to restore power to a small number of customers in the more remote areas of the company's rural service territory.

On October 7, 2005, Cleco Corporation announced its preliminary estimates of storm restoration costs associated with Hurricane Rita. Total restoration costs of Cleco Power's electric system facilities damaged by Hurricane Rita are currently estimated to be approximately \$50 million. Cleco Power has requested and received regulatory approval from the Louisiana Public Service Commission to create a regulatory asset that represents non-capitalized storm damage costs incurred as a result of Hurricanes Katrina and Rita. This regulatory asset will be amortized over a ten-year period beginning in October 2005. For more information about Cleco Power's recovery efforts, see the press release issued October 7, 2005, a copy of which is furnished as Exhibit 99.1 to this Report.

Cleco Power believes it has sufficient liquidity to meet its current obligations and to fund restoration efforts from a combination of cash on hand and available capacity under its revolving credit facilities.
