PRESS RELEASE

Date 9 February 2005

Number 001

STRATEGIC INITIATIVES CONTINUE TO DRIVE PROFITABILITY

Fourth quarter 2004

Operating profit (EBITAE) from ongoing operations increased 16.3% at constant exchange rates and by 10.2% as reported at actual rates

Positive trend in added value growth continues due to further implementation of our private brands and preferred suppliers initiatives

Total organic sales up 4%; organic sales global office products activities up 3%

Net profit* per ordinary share (fully diluted) increased to 0.24; net profit* up to 48 million

Full year 2004

Net profit* increased to 139 million (2003: 43 million); Net result 80 million (2003: a loss of 132 million)

Net profit* per ordinary share (fully diluted) increased to 0.69 (2003: 0.19)

Dividend proposed of 0.14 per ordinary share (2003: 0.07)

CEO'S STATEMENT

Commenting on 2004, Buhrmann President and CEO Frans Koffrie said: I am pleased with the improved earnings. Positive trends continued into the fourth quarter with a further improvement in underlying sales, added value and operating profit. This reflects the beneficial impact that the implementation of our strategy is having on our results. In addition, we see a continued gradual improvement in market circumstances in North America, while business activity remained relatively weak in most European markets. Corporate Express Australia has again reported solid growth. All in all we are positive about prospects for further success in 2005, based on our expectations of a steady improvement in market conditions in North America and the anticipated positive effects of measures to enhance the performance of our office products activities in Europe.

FOURTH QUARTER CONFIRMS STEADY IMPROVEMENT IN BUSINESS PERFORMANCE

Organic sales for global office products were up 3%, compared with 2% in the third quarter. This reflects the continued growth of our North American and Australian operations, while sales in Europe are showing a lower rate of decline. The improvement in sales was driven by our ability to meet customer demands by offering them opportunities to consolidate their sourcing and reduce their procurement costs. At the same time we benefited from improving market conditions in North America, while business activity remained relatively subdued in most European markets. With an increase in machine sales, the Graphic Systems Division returned to profitability.

EBITAE as a percentage of net sales increased to 4.3% at constant rates in the fourth quarter versus 3.8% a year ago. Fourth quarter operating profit (EBITAE) for the total Buhrmann Group, excluding Paper Merchancing, increased 10.0% (up 16.2% at constant rates) compared to the previous year. Available cash flow was 96.3 million and balance sheet ratios continued to develop favourably. Interest-bearing net debt decreased by 129.3 million in 2004 to 707.0 million at year-end.

KEY FIGURES FULL YEAR

FULL YEAR RESULTS UNDERPINNED BY STRATEGIC INITIATIVES AND FINANCIAL DISCIPLINE

Full year 2004 operating profit (EBITAE) was 211.2 million. A further shift within the sales mix towards private brands and preferred suppliers products had a positive effect on added value margins. In addition, organic growth supported by our range extension and cost control contributed to the increase in profitability.

Following the successful launch of our renewed Corporate Express Brands offering in North America, private brands sales now constitute 20% of the Division's office supplies sales. In Europe private brands sales currently amount to about 25% of office supplies sales. Facility products

Edgar Filing: BUHRMANN NV - Form 6-K

sales showed a double-digit increase in North America. Our Australian business continued successfully its expansion of the single-source supplier concept. We continued to invest in broadening our customer-base through our mid-market initiatives. Integrated Sales Teams are now established in all the operating entities of our North American office products operations. Although results from our mid-market initiatives did not live up to our expectations, we are confident that these new steps will enable us to succeed in progressively extending our presence in this segment.

Financial items also had a positive impact on our results. These comprised significantly lower interest charges and some tax benefits.

Net profit on ordinary operations before amortisation of goodwill and exceptional items increased to 139.4 million, resulting in cash earnings per ordinary share of 0.69.

LOOKING AHEAD

Profitable sales growth remains our key priority. We are encouraged by the successes we achieved in 2004 in delivering value from our strategic initiatives. In addition we see continued, steady improvement in market conditions in North America. In Europe the positive effects of measures to enhance the performance of our office products activities are expected to bear fruit. Given the current trend in sales Corporate Express Australia is forecasting further growth in 2005. The Graphic Systems Division is entering a slow recovery phase evidenced by recent sales growth and an increased order book.

For 2005, at current exchange rates, we expect cash financial expenses of around 85 million (cash interest plus dividends on preference shares). Cash tax payments are estimated to be between 20 million to 25 million. Capital expenditure is expected to be around 70 million for 2005, while the outflow reported under other operational payments (current provisions for restructuring) is foreseen between 10 million to 15 million. In view of normal seasonality we expect available cash flow for the first quarter of 2005 to be negative, but for the full year we expect a positive available cash flow.

Note to editors

Press conference to be held at 10.00 a.m. at Hotel The Grand, Amsterdam. **Press presentation** will be available via www.buhrmann.com

Analyst/investor conference to be held at 12.00 p.m. at Hotel The Grand, Amsterdam.

With market share increasing in the large account segment our global office products delivered further sales growth in 2004, thanks to the extension of our product offering, growth in software licensing and other specialty businesses. The resulting organic growth rate for total office products amounted to 3%. The share of our eCommerce sales for global office products was 37% in the fourth quarter of 2004 (32% a year ago).

Given our continued success in the large account segment, our competitive position remains strong. All divisions maintained high customer satisfaction ratings reflecting the operational quality demonstrated throughout our organisation. In addition, customer response to our Corporate Express branded product offering has been very positive. Through this initiative we are successfully meeting customer demand for quality (private brand) products at competitive prices. In addition, large corporate customers and government institutions are at the forefront of exploring opportunities to consolidate their facility product spend through Corporate Express.

NORTH AMERICA

CORPORATE EXPRESS BRANDS PENETRATION DRIVEN BY STRONG CUSTOMER DEMAND

Another solid quarter for our North American operations resulted in a 15.4% increase in operating profit (EBITAE) at constant exchange rates. Total fourth quarter sales increased 0.6% at constant exchange rates and 4% organically. Organic sales growth in our office supplies businesses amounted to 1%. When adjusted for the impact of increased private brand penetration, organic sales growth was 3%. Double-digit sales growth was reported for facility products and our Corporate Express Promotional Marketing business, while furniture sales continued to show improvement.

Edgar Filing: BUHRMANN NV - Form 6-K

Growing numbers of customers are selecting Corporate Express Brands, resulting in a further increase in private brands sales which totalled 20% of the North America division's total office supplies sales. The strength of our single-source supplier concept was confirmed by our successes in linking our office supplies sales channels more closely with our other lines of business. In addition, integrated

Sales Teams are now established in all divisions and will be fully deployed in the first quarter of 2005.

A mobile proof-of-delivery solution was implemented across our entire fleet of 1,400 dedicated U.S. delivery vehicles in only nine months. This technology provides Corporate Express customers with the ability to gain real-time visibility into the delivery cycle from the time a package leaves the warehouse up to confirmation that the invoice has been charged to their account. Also, the Roadnet Route Management system is currently being implemented throughout the United States. This will improve service by optimising driver routes while reducing fuel costs.

The depreciation charge for North America includes an incidental charge of 1.8 million for the write-off of software that could not be effectively used.

For ASAP Software fourth quarter sales of 210.5 million (US\$ 271.5 million) decreased 1.9% at constant rates compared with 229.3 million (US\$ 270.2 million) in 2003, but were up 12% in organic terms. Added value increased 15% at constant rates to 19.9 million (US\$ 25.7 million). Operating profit (EBITAE) was 10.0 million (US\$ 12.8 million) in the fourth quarter of 2004 versus 8.4 million (US\$ 9.8 million) the previous year.

EUROPE AND AUSTRALIA STRATEGIC INITIATIVES SUPPORT POSITIVE BUSINESS DEVELOPMENT

In Europe, our office products operations in the UK and France reported continued solid sales growth. In addition, we further increased our market share in office supplies in Germany. In the Benelux the reduction in office products sales was less than in the previous quarter.

Furniture sales in Germany saw modest declines. The restructuring of our copier business in Germany is progressing well as the company is working towards applying the successful Veenman model from the Netherlands. In general operations in other European countries were relatively stable as they continued to be successful in the mid-market while progressing with expansion in the large accounts segment.

Customers (purchasing managers as well as end-users) continue to be positive about our private brands products, which comprised about 25% of fourth quarter office supplies sales in Europe. Our product rationalisation programme is creating opportunities for suppliers to gain preferred status and work more closely with us on joint marketing initiatives to drive end-user demand. As part of our single-source supplier strategy, we have started the rollout of facility products in Europe. Between 2,500 and 3,500 product lines have been added to our offering. In order to strengthen our coordinated efforts across geographic regions, we centralised European procurement, marketing and our international sales organisation in the head office in Amsterdam.

Corporate Express Australia continued to leverage its single-source supplier strategy successfully. As in other regions, customers in Australia and New Zealand are keen to benefit from the advantages of our private brands offering. A dedicated marketing team has been appointed further to develop the direct sales model related to the small/mid-market initiative that was launched in 2003 under the banner of CE Direct.

Edgar Filing: BUHRMANN NV - Form 6-K

Corporate Express Australia has today announced that it is considering an off-market share buyback in the order of AUS\$ 50 million and will make further announcements once details are finalised.

Based on the present situation, we anticipate that Buhrmann will not be selling shares back.

Review Second half of 2004

Corporate Express Australia issues financial statements twice a year, but will switch to quarterly reporting as of the first quarter of 2005. In line with our existing disclosure practice, we provide the following key figures to facilitate a more detailed performance analysis per division:

Net sales of the combined Europe and Australia Divisions for the second half of 2004 were 754.2 million. Operating result before exceptional items (EBITAE) amounted to 30.9 million.

Sales for Europe Division alone totalled 452.2 million, decreasing 5.3% at constant exchange rates. The Division's operating profit before exceptional items (EBITAE) for the second half of 2004 was 3.6 million, against 2.4 million in the corresponding period in 2003.

Corporate Express Australia's sales increased 14.7% at constant exchange rates, totalling 302.0 million for the second half of 2004. The operating result before exceptional items (EBITAE) was up 24.8% at constant exchange rates, totalling 27.3 million.

GRAPHIC SYSTEMS

CAUTIOUS MARKET RECOVERY RESULTS IN RETURN TO PROFITABILITY IN 4th QUARTER

Sales for the full year increased 11.6% (18.5% in the fourth quarter). In contrast with our previously stated expectations, a larger number of new printing presses was delivered and installed at our customers in the fourth quarter. Higher machine sales and the reduction of our cost base were the main drivers of the improved operating profit. Fourth quarter EBITAE totalled 5.7 million (0.6 million for the full year).

Capital expenditure in the commercial print sector started to recover slowly. The positive trend in order intake continued into the fourth quarter, but was below our expectations as compared with previous cyclical recoveries in this market.

In 2004 we maintained our strong position in machines and increased our market share in services, supplies and spare parts (Triple S) sales. Our strategy of increasing the number of service contracts in an increasingly complex production environment had a noticeably positive effect. For the first time Triple S added value contribution covered more than 60% of the division's operating costs. Internet orders for supplies increased to 30% from 25% a year ago. Capital employed was 13% lower than the previous year.

HOLDINGS

EBITAE reported under Holdings was 3.6 million negative (fourth quarter 2003: 0.5 million positive, due to the inclusion of some non-recurring benefits in operating costs).

EXCEPTIONAL ITEMS

Exceptional operating items in the fourth quarter led to a charge of \$ 5.2 million, primarily related to a reorganisation provision for copier activities in Germany and right-sizing of the Benelux organisation (completed already). The exceptional (non-cash) interest charges consist of actuarial results on the pensions of our U.S. forms management business (\$ 3.6 million negative) and a benefit of \$ 2.1 million for an adjustment of capitalised financing fees related to the refinancing earlier in the year. Exceptional other (non-cash) financial results of about \$ 3.9 million relate to the net release of provisions, most notably for the divested Paper Merchanting Division.

CASH FLOW AND FINANCING

Available cash flow was 96.3 million in the fourth quarter and 140.9 million for the full year 2004. A decrease in working capital of 61.1 million was particularly due to extended supplier credit. Working capital as a percentage of sales stabilised at 9.5% on a rolling four-quarter basis.

Financial payments at 11.2 million reflect the lower level of debt and lower interest rates. Capital expenditure amounted to 17.8 million (full year 2004 59.1 million).

Interest cover (EBITDAE/cash interest) on a rolling four-quarter basis improved to 4.8 times (previous quarter: 4.0 times). At 31 December 2004, interest-bearing net debt amounted to 707.0 million (third quarter: 857.9 million). The reduction in debt of 150.9 million compared to the third quarter includes a currency translation effect of 48.0 million.

DIVIDEND PROPOSAL

Of the consolidated net result of 80.2 million, 11.2 million will be paid to holders of Preference Shares A and 20.7 million will be paid to holders of Preference Shares C. The dividend on the Preference Shares C will be paid in cash.

With regard to the ordinary shares, a proposal will be submitted to the Annual General Meeting of Shareholders to be held on 14 April 2005 to pay a dividend of 0.14 per ordinary share. In line with our policy on additions to reserves and dividends, this represents about 35% of the consolidated net result (including a correction for non-cash exceptional items) available to holders of ordinary shares amounting to 56.1 million, divided by the number of ordinary shares outstanding at 31 December 2004. The remaining part of the profit will be added to the reserves.

The dividend on ordinary shares will be paid either wholly in cash or in new ordinary shares, at the option of the shareholder.

CHANGES IN SUPERVISORY BOARD COMPOSITION

A number of changes in the composition of the Supervisory Board will be proposed at the Annual General Meeting to be held on 14 April 2005. Mr. R. Zwartendijk, who has been a member of our Supervisory Board since 1999, has advised that he is not available for reappointment. We are grateful for his valued contributions over the past six years and wish him every success. Shareholders will be asked to approve the reappointment of Mr. G.W. Smit, former Chairman of the Executive Board of Vedio, currently Managing Director of TriFinance Holding. Shareholders will also be asked for their approval regarding the proposed appointment of two new Supervisory Board members: Mr. G. Izeboud (former partner of PricewaterhouseCoopers, and member of the Dutch Tabaksblat Corporate Governance Committee) and Mr. B. J. Noteboom (CEO of Randstad Holding).

IFRS

As per 1 January 2005, Buhrmann applies IFRS. An indicative reconciliation between the consolidated accounts based on Dutch GAAP and IFRS is provided for the 2004 opening balance sheet, the 2004 full year income statement and the closing balance sheet. See the IFRS Appendix for more information.

Safe Harbour Statement

Statements included in this press release, which are not historical facts are forward-looking statements made pursuant to the safe harbour provisions of the Private Securities Litigation Reform Act of 1995 and the Securities Exchange Act of 1934. Such forward-looking statements are made based upon management's expectations and beliefs concerning future events impacting Buhrmann and therefore involve a number of uncertainties and risks, including, but not limited to industry conditions, changes in product supply, pricing and customer demand, competition, risks in integrating new businesses, currency fluctuations, the transition from Dutch GAAP to IFRS reporting and the other risks described from time to time in the Company's filings with the US Securities and Exchange Commission, including the Company's Annual Report on Form 20-F filed with the Securities and Exchange Commission on June 21, 2004. As a result, the actual results of operations or financial conditions of the Company could differ materially from those expressed or implied in such forward-looking statements.

All IFRS information is unaudited containing details of the transitional adjustments required to present certain historical financial results of the Company under IFRS. Future presentation of this historical financial information may represent different results than those in this report. The transitional adjustments presented have been calculated on the basis of the specific facts of the transaction and should not be used as indicators of future adjustments between Dutch GAAP and IFRS. IFRS statements are subject to change and should be carefully considered, and it should be understood that still factors could cause forecasted and actual results to differ from these statements. These factors include, but are not limited to, changes in regulations or interpretations related to the implementation and reporting under IFRS, decisions to apply a different option of presentation permitted by IFRS, and various other factors related to the implementation of IFRS. Shareholders and other readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. The Company undertakes no obligation to update publicly or revise any forward-looking statements.

Accounting policies

Exceptional items – during the course of a year, certain events take place that may be viewed as part of a company's normal business operations. These events however, have unique characteristics that set them apart from the company's standard day-to-day operations, these events may be so infrequent and of such a size that reporting them as exceptional items provides the opportunity to give a more operationally oriented view on the results of the business. Other events, such as restructurings are so large and impact the company's operations and cost structure so significantly, that reporting them as exceptional items aims to clarify the effect of these decisions on the results of operations. In order to increase transparency these events have been separately disclosed as exceptional results.

Revenue recognition (for equipment sales of the Graphic Systems Division) – Following the release of the new Guideline for Annual Reporting on Revenue Recognition (270.2) from 2003 onwards the equipment sales are recorded after installation, instead of at delivery.

Organic growth rates exclude all factors that disturb a like-for-like comparison, such as: currency exchange rate movements, acquisitions, divestments, variations in the number of working days, the change to a commission-based model at our ASAP Software subsidiary, and the change in the sales recognition of the Graphic Systems Division.

Non-GAAP measures: Figures are often presented before exceptional items and where applicable before amortisation and impairment of goodwill. These figures are regarded by Buhrmann as key performance indicators increasing the transparency of the reporting.

The figures included in this report were not audited by the external accountant.

Appendix

International Financial Reporting Standards (IFRS)

The 2004 financial statements of Buhrmann are reported under generally accepted accounting principles in the Netherlands (Dutch GAAP). From 1 January 2005, Buhrmann reports on the basis of IFRS.

This IFRS appendix has been prepared in order to provide an initial overview of our indicative IFRS figures for 2004 which will serve as a comparison for 2005. The IFRS figures are in this publication compared with our reported Dutch GAAP numbers. The sources of change for the most visible effects on the consolidated balance sheet and income statement are explained below. As accounting rules do not affect our cash flow, no overview is provided (however the classification and presentation of cash flow items is anticipated to change). The effects of adopting IFRS as of January 2004 will be recorded in Shareholders' equity in the 2004 opening balance sheet, hence a provisional reconciliation of shareholders' equity in the opening balance sheet 2004 from Dutch GAAP to IFRS is also included. All figures presented are unaudited.

Within the limits of the IFRS framework we strive towards convergence with our U.S. GAAP reporting (Form 20-F). In respect of the standards IAS 32 and IAS 39, we have chosen to include the effects in our 2004 IFRS presentation (i.e. we have not used the exemptions) in order to provide a high level of comparability.

Effects of reporting under IFRS

The main sources of change of IFRS in comparison with Dutch GAAP are listed below. Minor adjustments or reclassifications are excluded.

Business Combinations / Goodwill (IFRS 3 / IAS 36 / IAS 38)

Goodwill is no longer systematically amortised, but at least annually a goodwill impairment test will be performed. Under Dutch GAAP and U.S. GAAP Buhrmann performed very similar goodwill impairment tests.

Long term employee benefits / Pensions (IAS 19)

IFRS requires defined benefit obligations measured at present value and plan assets measured at fair value to be taken on balance sheet, similar to U.S. GAAP. Fair values and related income statement movements are based on actuarial assumptions taking into account factors like expected salary increases and returns on plan assets. Buhrmann has several pension plans based on local employment practice. The most material defined benefit pension scheme in this respect is the Dutch Buhrmann Pension Fund.

Under IFRS this Dutch pension plan results currently in a net asset. All other defined benefit plans that have been recognised are resulting in a net liability. Under IFRS, the net periodic pension costs of our defined benefit plans (consisting of service costs, interest costs and the expected return on assets) are recognised as operating expenses.

Share based payments / options (IFRS 2)

All share-based payments are recognised as expense in the income statement, measured at fair value. For Buhrmann this applies to the Buhrmann Incentive Plan and the Corporate Express Australia share plans. Under Dutch GAAP share based payments did not result in charges in the income statement (but were disclosed in a footnote). The calculated value of an option series is equally expensed over the vesting period as an operating cost.

Besides any potential tax effects, equity as at 1 January 2004 will not change resulting from IFRS 2. The composition of equity however will change with the introduction of the option reserve. The option reserve needs to reflect the options that have been granted but have not yet been exercised.

Convertible bond (IAS 32 / IAS 39)

Under IFRS, our convertible bond is recognised as a compound financial instrument. It creates a financial liability of the entity and grants an option to the holder to convert the bond into ordinary shares of the entity (equity instrument). Both components are to be recognised separately. The carrying amount of the liability component has been valued by measuring the fair value of a similar liability that does not have an associated equity component.

The carrying amount of the equity instrument is determined by deducting the fair value of the financial liability from the face value of the financial instrument as a whole. Interest charges are calculated under the effective interest method (resulting in imputed interest).

Preference Shares A and C (IAS 32 / IAS 39)

Under IFRS our preference shares A and C qualify as a liability. As the liability of preference shares A is perpetual, the related financing fees are not amortised. For the preference shares A, the (non-tax deductible) interest charge equals the dividend payable on the instrument. For the preference shares C, the (non-tax deductible) interest charges are calculated under the effective interest method.

The preference shares C have a conversion option. As this option is indexed to both the share price and the USD/EUR exchange rate, the conversion option classifies as a derivative under IFRS rather than as equity. Therefore it is valued separately as a derivative (liability) at fair value. The changes in fair value of this derivative (liability) will be accounted for in the income statement.

Financing and related transaction costs (IAS 39)

In our Dutch GAAP accounts financing fees are capitalised under financial assets and amortised linearly over the term of the related financing. Under IFRS transaction costs are deducted from the proceeds received. These net proceeds including any discounts or premiums make up the amortised costs.

The difference between the amortised costs and the redemption value is recognised (accretion) in the income statement over the period of the financing using the effective interest method.

Current liabilities/interest rate swaps (IAS 32 / IAS 39)

Under IFRS all derivatives must be recognised on the balance sheet at fair values. Movements in fair values are to be accounted for in the income statement, unless they qualify for hedge accounting (movements through equity). Hedge accounting is applied as from quarter 4, 2004. In our Dutch GAAP accounts, the fair value of interest rate swaps was already disclosed as a footnote.

Taxation (IAS 12 and other adjustments for IFRS)

Our IFRS accounting results in a different tax position than under Dutch GAAP. It is fairly similar to our U.S. GAAP accounting. Specific IFRS accounting rules may generate in some cases tax effects (which are reflected in the presented consolidated financial statements and the equity reconciliation).

Receivables (IAS 39)

Certain instalment receivables resulting from machine sales in the Graphic Systems Division are sold to financial institutions. However the financial institutions keep a limited right of recourse and therefore derecognising of the receivables is not allowed under IFRS. This results in the recognition of an asset and corresponding liability.

Accounting for catalogue income/inventories (Other adjustments for IFRS)

In the opening balance sheet for IFRS a change in the application of the accounting policy for catalogue income has been made. Under Dutch GAAP catalogue income is recognised on the principle of revenue matching. In practice, that is the period that the catalogue is in use (street life). Although under IFRS the accounting policy for unconditional catalogue income will remain unchanged, conditional catalogue income is now deemed to be volume related and consequently earned based on volumes purchased. This rebate income is deferred under inventory and released to income when the relevant merchandise has been sold, identical to volume related vendor rebates.

Property, Plant and Equipment (IAS 16)

Under IFRS assets for rental and demonstration machines like we have in our Graphic Systems Division are reclassified from Inventories to Property, Plant and Equipment.

Leases (IAS 17)

After evaluating our lease portfolio, it is currently anticipated that no operational leases pursuant to Dutch GAAP and U.S. GAAP are to be classified as financial leases under IFRS.
