PIK - Payment In Kind.

- (1) Senior floating-rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior floating-rate interests will have an expected average life of approximately two to three years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London-Interbank Offered Rate (LIBOR), and secondarily the prime rate offered by one or more major United States banks (the Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders.
- (2) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees.

- (3) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At January 31, 2005, the aggregate value of the securities is \$284,489,537 or 13.5% of the Fund's net assets.
- (4) Adjustable rate mortgage.
- (5) All or a portion of these securities were on loan at January 31, 2005.
- (6) Defaulted security.

The Fund did not have any open financial instruments at January 31, 2005.

The cost and unrealized appreciation (depreciation) in value of the investments owned at January 31, 2005, as computed on a federal income tax basis, were as follows:

Aggregate cost	\$	3,097,509,820
Gross unrealized appreciation	\$	74,757,430
Gross unrealized depreciation		(18,496,637)
Net unrealized appreciation	\$	56,260,793
