

SAPPI LTD
Form 20-F
December 15, 2006

As filed with the Securities and Exchange Commission on December 15, 2006

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 20-F

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended October 1, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from [] to []

Commission file number 1-14872

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report []

SAPPI LIMITED

(Exact name of Registrant as specified in its charter)

Not Applicable

(Translation of Registrant's name into English)

Republic of South Africa

(Jurisdiction of incorporation or organisation)

**48 Ameshoff Street
Braamfontein
Johannesburg 2001
Republic of South Africa
(Telephone: +27-11-407-8111)**

(Address and telephone number of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Edgar Filing: SAPPI LTD - Form 20-F

**American Depositary Shares, evidenced by
American Depositary Receipts, each representing
1 Ordinary Share**

(Title of each class)

**New York Stock Exchange
Ordinary Shares, par value R1.00 per Share***

(Name of each exchange on which registered)

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

239,071,892 Ordinary Shares

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

YES x **NO o**

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

YES o **NO x**

Note: Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES x **NO o**

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer x **Accelerated filer o** **Non-accelerated filer o**

Indicate by check mark which financial statements item the registrant has elected to follow.

ITEM 17 o **ITEM 18 x**

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES o **NO x**

* Not for trading but only in connection with the registration of the American Depositary Shares, pursuant to the requirements of the Securities and Exchange Commission.

OUR USE OF TERMS AND CONVENTIONS IN THIS ANNUAL REPORT

Unless otherwise specified or the context requires otherwise in this Annual Report on Form 20-F (Annual Report):

- references to Sappi , Sappi Group , Group , we , us and our are to Sappi Limited together with its subsidiaries;
- references to IFRS are to the International Financial Reporting Standards;
- references to southern Africa are to the Republic of South Africa, the Kingdom of Swaziland, the Kingdom of Lesotho, the Republic of Namibia and the Republic of Botswana;
- references to North America are to the United States, Canada and the Caribbean;
- references to Latin America are to the countries located on the continent of South America and Mexico;
- references to Rand , ZAR and R are to South African Rand and references to SA cents are to South African cents, the currency of South Africa;
- references to US dollar(s) , dollar(s) , US\$, \$ and US cents are to United States dollars and cents, the currency of the United States;
- references to euro , EUR and are to the currency of those countries in the European Union that form part of the common currency of the euro.
- references to Guilders and NLG are to Dutch Guilders, the former currency of the Netherlands;
- references to Deutsche marks and DEM are to German Deutsche marks, the former currency of Germany;
- references to UK pounds sterling and GBP are to United Kingdom pounds sterling, the currency of the United Kingdom;
- references to m² are to square metres and references to hectares or ha are to a land area of 10,000 square metres or approximately 2.47 acres;
- references to tonnes are to metric tonnes (approximately 2,204.6 pounds or 1.1 short tonnes);
- references to market share are based upon sales volumes in a specified geographic region during the fiscal year ended October 1, 2006;
- references to "NBSK" are to northern bleached softwood kraft pulp frequently used as a pricing benchmark for pulp;
- references to "groundwood" or to mechanical are to pulp manufactured using a mechanical process, or where applicable to paper, made using a high proportion of such pulp; and
- references to "woodfree paper" are to paper made from chemical pulp, which is pulp made from wood fibre that has been produced in a chemical process.

Except as otherwise indicated, in this Annual Report the amounts of capacity or production capacity of our facilities or machines are based upon our best estimates of production capacity at the date of filing of this Annual Report. Actual production by machines may differ from production capacity as a result of products produced, variations in product mix and other factors.

Certain market share information and other statements presented herein regarding our position relative to our competitors with respect to the manufacture or distribution of particular products are not based on published statistical data or information obtained from independent third parties, but reflect our best estimates. We have based these estimates upon information obtained from our customers, trade and business organisations and associations and other contacts in our industries.

Unless otherwise provided in this Annual Report, trademarks identified by ® are registered trademarks of Sappi Limited or our subsidiaries.

**EXPLANATORY NOTE
RELATING TO THE FIRST TIME ADOPTION OF
INTERNATIONAL FINANCIAL REPORTING STANDARDS.**

The consolidated financial statements of the Sappi Group as of and for the years ended September 2006 and 2005, including the applicable notes thereto, contained in Item 18 Financial Statements of this Annual Report on Form 20-F and the consolidated financial information of the Sappi Group as of and for the years ended September 2006 and 2005 contained herein have been aligned with International Financial Reporting Standards (IFRS). The consolidated financial statements and related financial information of the Sappi Group as of and for each of the years ended September 2004, 2003 and 2002, cannot be provided on an IFRS aligned basis without unreasonable effort or expense. The Sappi Group has not amended, and does not intend to amend, its previously filed financial statements for the years affected by the change in accounting policy that ended prior to the year ended September 2005. For this reason, our Annual Reports on Form 20-F for those prior years, the consolidated financial statements and applicable notes thereto, auditors reports and related financial information contained in such reports should not be compared to this Annual Report on Form 20-F. For a description of the change in accounting policy and resulting adjustments, see Item 5 Operating and Financial Review and Prospects, and note 2 to our Group annual financial statements, included herein.

ACCOUNTING PERIODS AND PRINCIPLES

Unless otherwise specified, all references in this Annual Report to a fiscal year and year ended of Sappi Limited refer to a twelve-month financial period. All references in this Annual Report to fiscal 2006 and fiscal 2005, or the year ended September 2006 and 2005 refer to Sappi Limited s twelve-month financial periods ended on October 1, 2006 and October 2, 2005 respectively; references in this Annual Report to fiscal 2007 refer to the period beginning October 2, 2006 and ending September 30, 2007. Our Group annual financial statements included elsewhere in this Annual Report have been prepared in conformity with IFRS, which differ in certain respects from United States generally accepted accounting principles (United States GAAP or US GAAP); see note 35 to our Group annual financial statements included elsewhere in this Annual Report. On May 13, 2002, we acquired the coated fine paper business of Potlatch Corporation. Our Group financial data for the year ended September 2002 includes the results for the acquired coated fine paper business since its acquisition.

CURRENCY OF PRESENTATION AND EXCHANGE RATES

We publish our Group annual financial statements and all financial data presented in this Annual Report in US dollars on a nominal (non-inflation adjusted) basis. For information regarding the conversion to US dollars in fiscal 2006 and 2005, see note 2 to our Group annual financial statements included elsewhere in this Annual Report.

FORWARD-LOOKING STATEMENTS

In order to utilise the Safe Harbor provisions of the United States Private Securities Litigation Reform Act of 1995 (the Reform Act), we are providing the following cautionary statement. Except for historical information contained herein, statements contained in this Annual Report may constitute forward-looking statements within the meaning of the Reform Act. The words believe, anticipate, expect, intend, estimate, assume, positioned, will, may, should, risk and other similar expressions, which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this document includes forward-looking statements relating to our potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. You should not rely on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond our control and may cause our actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity, input costs (including raw materials, energy and employee costs) and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at our key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for our products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired and achieving expected savings and synergies; consequences of our leverage; adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions.

These factors are fully discussed in this Annual Report. For further discussion on these factors, see Item 3 Key Information Selected Financial Data, Item 3 Key Information Risk Factors, Item 4 Information on the Company, Item 5 Operating and Financial Review and Prospects Financial Condition and Results of Operations, Item 10 Additional Information Exchange Controls and note 31 to our Group annual financial statements included elsewhere in this Annual Report. You are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the filing of this Annual Report and are not intended to give any assurance as to future results. We undertake no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

v

PART I**ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS**

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION**Selected Financial Data**

The selected financial data set forth below has been derived from our Group annual financial statements and are qualified by reference to, and should be read in conjunction with, our Group annual financial statements and the notes thereto, which are included elsewhere in this Annual Report, and Item 5 Operating and Financial Review and Prospects .

We prepare our Group annual financial statements according to International Financial Reporting Standards. There are differences between these principles and those applied in the United States. You can read about the principal differences in note 35 to our Group annual financial statements included elsewhere in this Annual Report.

	Year Ended September

Shareholders' equity(2)	1,356	1,591	1,979	1,908	1,581

Other Information:

	Year Ended September	
	2006	2005
	(US\$ million, except number of shares data)	
International Financial Reporting Standards:		
EBITDA(5)	591	381
Weighted average number of ordinary shares in issue (in million)	226.2	225.8

	Year Ended September				
	2006	2005	2004	2003	2002
	(US\$ million, except number of shares data)				
United States GAAP:					
EBITDA(2)(5)	466	226	570	656	745
Weighted average number of ordinary shares in issue (in million)	225.3	224.7	225.0	227.6	228.8

(1) Sales are defined in note 2 to our Group annual financial statements included elsewhere in this Annual Report.

(2) In 2005, stock compensation of US\$12 million was included in the US GAAP equity reconciliation and has been removed. An amount of US\$13 million was charged to the 2005 profit and loss accounts in respect of the adoption of FAS 123R. This comprises a US\$10 million charge due to the adoption of IFRS 2 and an additional US\$3 million being the extra charge as a result of the earlier effective date of FAS 123R compared to IFRS 2. The effect is a change of US GAAP basic and diluted earnings per share from US 148 cents to US 154 cents per share. For a more detailed explanation see note 35 to our Group annual financial statements included elsewhere in this Annual Report.

(3) The dividends per share were, in each case, declared after the end of the year indicated. For further information on our dividend policy, see Item 8 Financial Information-Dividend Policy .

(4) Operating assets are defined in note 3 to our Group annual financial statements included elsewhere in this Annual Report.

(5) In connection with the U.S. Securities Exchange Commission (SEC) rules relating to Conditions for Use of Non-GAAP Financial Measures , we have reconciled EBITDA to net profit rather than

2

operating profit and recalculated EBITDA. As a result our definition has been amended to retain non-trading profit/loss and minority interest as part of EBITDA. EBITDA represents earnings before interest (net finance costs), taxation, depreciation and amortisation (including fellings). Net finance costs includes: gross interest paid; interest received; interest capitalised; net foreign exchange gains; and net fair value adjustments on interest rate financial instruments. See the Group income statement to our Group annual financial statements included elsewhere in this Annual Report for an explanation of the computation of net finance costs. We use EBITDA as an internal measure of performance to benchmark and compare performance, both between our own operations and as against other companies. EBITDA is a measure used by the group, together with measures of performance under IFRS and US GAAP, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe EBITDA is a useful and commonly used measure of financial performance in addition to net profit, operating profit and other profitability measures under IFRS or US GAAP because it facilitates operating performance comparisons from period to period and company to company. By eliminating potential differences in results of operations between periods or companies caused by factors such as depreciation and amortization methods, historic cost and age of assets, financing and capital structures and taxation positions or regimes we believe EBITDA can provide a useful additional basis for comparing the current performance of the underlying operations being evaluated. For these reasons, we believe EBITDA and similar measures are regularly used by the investment community as a means of comparison of companies in our industry. Different companies and analysts may calculate EBITDA differently, so making comparisons among companies on this basis should be done very carefully. EBITDA is not a measure of performance under IFRS or US GAAP and should not be considered in isolation or construed as a substitute for operating profit or net profit as an indicator of the company's operations in accordance with IFRS or US GAAP.

The following table reconciles net (loss) profit to EBITDA.

	Year Ended September	
	2006	2005
	(US\$ in million)	
International Financial Reporting Standards:		
Net (loss)	(4)	(184)
Add back:		
Depreciation and amortisation (fellings)	466	490
Net finance costs	130	80
Taxation	(1)	(5)
EBITDA	591	381

	Year Ended September				
	2006	2005	2004	2003	2002
	(US\$ in million)				
United States GAAP:					
Net (loss) profit	(116)	(345)	46	148	237
Add back:					
Depreciation and amortisation (fellings)	446	470	450	385	349
Net finance costs	106	55	93	90	74
Taxation	30	46	(19)	33	85
EBITDA	466	226	570	656	745

Risk Factors

In addition to other information contained in this Annual Report, you should carefully consider the following factors before deciding to invest in our ordinary shares and American Depositary Shares (ADSs). There may be additional risks that we do not currently know of or that we currently deem immaterial based on the information available to us. Our business, financial condition or results of operations could be materially adversely affected by any of these risks, resulting in a decline in the trading price of our ordinary shares and ADSs.

Risks Related to Our Industry.

We operate in a cyclical industry, which has in the past resulted in substantial fluctuations in our results.

The markets for our pulp and paper products are significantly affected by changes in industry capacity and output levels and by cyclical changes in the world economy. As a result of periodic supply/demand imbalances in the pulp and paper industry, these markets historically have been highly cyclical, with volatile pulp and paper prices. The timing and magnitude of price increases or decreases in the pulp and paper market have generally varied by region and by type of pulp and paper.

The selling prices of the majority of the products manufactured and purchase prices of many of our raw materials used generally fluctuate in line with commodity cycles; however, in fiscal 2006, we may not be able to increase selling prices sufficiently or in time to offset the effects of increased costs, which has an adverse impact on our profitability. Other than maintaining a high level of pulp integration, the hedging techniques applied on our raw materials and products are on a small scale and short term in nature. Movements in prices of pulp and paper products are difficult to predict. Also, there may be periods during which demand for our products is insufficient to enable us to operate our production facilities in an economical manner. A sustained period of weak demand or excess supply would be likely to adversely affect pulp and paper prices which could have a material adverse effect on our operating rates and financial results.

Despite a relatively high level of pulp integration on a Group-wide basis, a significant increase in the prices for pulp or pulpwood could adversely affect our non-integrated and partially integrated operations if they are unable to raise paper prices sufficiently to offset the effects of increased costs.

The majority of our fine paper sales consist of sales to merchants. The pricing of products for merchant sales can generally be changed upon between 30 to 90 days advance notice to the merchant. Sales to converters may be subject to longer notice periods for price changes. Such notice periods generally would not exceed 6 to 12 months. In southern Africa, we have entered into longer-term fixed-price agreements of between 6 to 12 months duration for primarily packaging paper and newsprint sales with domestic customers. Such agreements accounted for less than 5% of consolidated sales during fiscal 2006.

Most of our chemical cellulose sales contracts are multi-year contracts. The pricing is generally based on a formula linked to the NBSK price and reset on a quarterly basis.

For further information, see Item 4 Information on the Company Business Overview The Pulp and Paper Industry .

The markets for pulp and paper products are highly competitive, and many of our competitors have advantages that may adversely affect our ability to compete with them, particularly in North America.

We compete against a large number of pulp and paper producers located around the world. A recent trend towards consolidation in the pulp and paper industry has created larger, more focused pulp and paper companies. Some of these companies benefit from greater financial resources or operate mills that are lower cost producers of pulp and paper products than our mills. We cannot assure you that each of our

mills will be competitive. Furthermore, we cannot assure you that we will be able to take advantage of consolidation opportunities which may arise, or that any failure to exploit opportunities for growth would not make us less competitive. Increased competition, including import duties decrease in accordance with the terms of free trade agreements, could cause us to lose market share, increase expenditures or reduce pricing, any of which could have a material adverse effect on the results of our operations. In addition, competition may result in our being unable to increase selling prices of our products sufficiently or in time to offset the effects of increased costs without losing market share, as occurred in Europe in fiscal 2006, which has an adverse impact on profitability.

Our North American business has experienced significant losses in recent years partly due to competition, and it may face additional competitive challenges in returning to profitability. There was a significant amount of coated fine paper capacity added in China in 2005. Some of this capacity may be exported to the US, depressing domestic operating rates and potentially also depressing prices. While we believe our North American business is competitive compared to our US competitors, the assets of our North American business are small in comparison to new world-scale coated fine paper machines. The cost position of our machines in relation to imports from both Asia and Europe may be less competitive due to a variety of factors including currency, fuel costs, shipping charges, duties, and market pulp prices. A significant strengthening of the US dollar in comparison to the euro could attract a significant amount of imports from Europe.

The cost of complying with environmental regulation may be significant to our business.

Our operations are subject to a wide range of environmental requirements in the various jurisdictions in which we operate. We expect to continue to incur significant expenditures and may face operational constraints to maintain compliance with applicable environmental laws, to upgrade equipment at our mills and to meet new regulatory requirements, including those in the United States, South Africa and Europe. Expenditures to comply with future environmental laws and regulations could have a material adverse effect on our business and financial condition.

For further information, see Item 4 Information on the Company Business Overview Environmental and Safety Matters Environmental Matters and Item 5 Operating and Financial Review and Prospects Environmental Matters .

The availability and cost of Insurance cover can vary considerably from year to year as a result of events beyond our control, and this can result in our paying higher premiums and periodically being unable to maintain the levels or types of insurance carried.

The insurance industry remains cyclical and catastrophic events can change the state of the insurance market, leading to sudden and unexpected increases in premiums and deductibles and unavailability of coverage due to reasons totally unconnected with our business.

Although we have successfully placed the renewal of our 2006/2007 insurance cover at rates lower than 2005/2006 and self-insured deductibles for any one property damage occurrence have remained at \$25 million, with an unchanged aggregate limit of \$40 million, we are unable to predict whether past or future events will result in less favourable terms. For property damage and business interruption, there generally does not seem to be cost effective cover available to full value, however the directors believe that the loss limit cover of \$1 billion should be adequate for what they have determined as the reasonably foreseeable loss for any single claim.

While we believe our insurance provides adequate coverage for reasonably foreseeable losses, we continue working on improved enterprise risk management to lower the risk of incurring losses from uncontrolled incidents. We are unable to assure you that actual losses will not exceed our coverage or that such excess will not be material.

New technologies or changes in consumer preferences may affect our ability to compete successfully.

We believe that new technologies or novel processes may emerge and that existing technologies may be further developed in the fields in which we operate. These technologies or processes could have an impact on production methods or on product quality in these fields. Unexpected rapid changes in employed technologies or the development of novel processes that affect our operations and product range could render the technologies we utilise or the products we produce obsolete or less competitive in the future. Difficulties in assessing new technologies may impede us from implementing them and competitive pressures may force us to implement these new technologies at a substantial cost. Any such development could materially and adversely impact our revenues or net profits or both.

Consumer preferences may change as a result of the availability of alternative products or of services such as electronic media or the internet, which could impact consumption of our products.

Risks Related to Our Business

Our indebtedness may impair our financial and operating flexibility.

At September 2006, our total interest-bearing borrowings were \$2,328 million. While reduction of borrowings is a priority, opportunities to grow within our businesses will continue to be evaluated, and the financing of any future acquisition or capital investment may include the incurrence of additional indebtedness.

We are subject to South African exchange controls, which partially inhibit the free flow of funds from South Africa and can restrict activities of subsidiaries of the Sappi Group. These exchange controls have affected the geographic distribution of our debt. As a result, acquisitions in the United States and Europe were financed with indebtedness incurred by companies in those regions. The level of our debt has important consequences. For example, our ability to obtain additional financing may be limited, which could limit, among other things, our ability to exploit growth opportunities; a substantial portion of our cash flow from operations may be required to make debt service payments; we are exposed to increases in interest rates because a portion of our debt bears interest at variable rates; we may be more leveraged than certain of our competitors; we may be more vulnerable to economic downturns and adverse changes in our business; and our ability to withstand competitive pressure may be more limited.

In addition, certain of our financing arrangements contain covenants and conditions that restrict the activities of certain Group companies.

Exchange control restrictions may restrict the transfer of funds directly or indirectly between our subsidiaries or between the parent company and our subsidiaries. We may also incur tax costs in connection with these transfers of funds. As a consequence, the ability of Sappi Limited or any of our subsidiaries to make scheduled payments on its debt will depend on its financial and operating performance, which will depend on various factors beyond our control, such as prevailing economic and competitive conditions. If Sappi Limited or any of our subsidiaries is unable to achieve operating results or otherwise obtain access to funds sufficient to enable it to meet its debt service obligations, it could face substantial liquidity problems. As a result, it might need to delay investments or dispose of material assets or operations. The timing of and the proceeds to be realised from any such disposition would depend upon circumstances at the time.

Labour agreements are under negotiation at several of our mills.

The Cloquet and Muskegon Mills United Steelworkers union contracts that expired in April 2006 and August 2005 respectively are under negotiation. Collective labour agreements have been renegotiated for all sites in Europe during fiscal 2006, with minor disruption to operations at only one site. At our southern African mills wage negotiations occur annually and in 2006 negotiations were completed in August 2006.

While we hope to reach agreements on new contracts at all affected sites, in the event that agreements cannot be reached and a prolonged work stoppage that results in a curtailment of output ensues at any or all such sites, our business could be adversely affected.

Fluctuations in the value of currencies, particularly the Rand and the euro, in relation to the US dollar have in the past had and could in the future have a significant impact on our earnings in these currencies.

Exchange rates fluctuations have in the past, and may in the future, affect the competitiveness of our products in relation to the products of pulp and paper companies based in other countries.

Fluctuations in the exchange rate between currencies, particularly the Rand and euro, in relation to the US dollar have in the past significantly affected and could in the future significantly affect our earnings.

Since the adoption of the euro by the European Union on January 1, 1999 (when the euro was trading at approximately \$1.18 per euro), it has fluctuated against the US dollar to approximately \$1.27, \$1.20 and \$1.23 per euro at the end of fiscal 2006, 2005 and 2004, respectively. It reached a low of approximately \$0.83 per euro on October 25, 2000 and, on December 6, 2006, was trading at approximately \$1.33 per euro.

In recent years, the value of the Rand against the US dollar has fluctuated considerably. It has moved against the US dollar to approximately R7.77, R6.37 and R6.43 per US dollar at the end of fiscal 2006, 2005 and 2004, respectively. The Rand reached a low of approximately R13.90 per US dollar on December 21, 2001. Since then, it has appreciated and on December 6, 2006 was trading at approximately R7.08 per US dollar.

For further information, see notes 21 and 31 to our Group annual financial statements included elsewhere in this Annual Report and Item 5 Operating and Financial Review and Prospects Operating Results currency fluctuations .

There are risks relating to the many countries in which we operate that could impact our earnings or affect your investment in our Company.

We own manufacturing operations in five countries in Europe, four states in the United States, South Africa, Swaziland and have an investment in a joint venture in China. These risks arise from being subject to various economic, fiscal, monetary, regulatory operational and political factors that affect companies generally and which may change as economic, social or political circumstances change. See Item 5 Operating and Financial Review and Prospects South African Economic and Political Environment and Item 5 Operating and Financial Review and Prospects South African Exchange Controls .

Our geographic diversity may help to mitigate these risks. In fiscal 2006, 44% of our sales originated from Europe, 29% from North America and 27% from southern Africa. 42% of our operating assets were located in Europe, 26% in North America and 32% in southern Africa. In the fiscal year 2006 our operations outside southern Africa had an operating loss of US\$49 million and our operations in southern Africa had an operating profit of US\$174 million.

We face certain risks in dealing with HIV/AIDS which may have an adverse effect on our southern African operations.

There is a serious problem with HIV/AIDS infection among our southern African workforce, as there is in southern Africa generally. Although the HIV/AIDS infection rate of our southern African workforce is significantly lower than the national average, it is expected to increase over the next decade. While we have several programmes designed to mitigate the impact of the disease on our business, the costs and lost worker s time associated with HIV/AIDS may adversely affect our southern African operations.

Several customers account for a significant amount of our revenues.

We sell a significant portion of our products to several major customers, including PaperlinX, Unisource Worldwide Inc., xpedx and Antalis. Any adverse development affecting our principal customers or our relationships with our principal customers could have an adverse effect on our business and results of operations. See Item 4 Business Overview Marketing and Distribution Sappi Fine Paper Customers and Item 4 Business Overview Marketing and Distribution Sappi Forest Products Customers .

Because of the nature of our business and workforce, we are facing challenges in the retention and succession planning of management that could adversely affect our business.

We are facing an aging demographic work profile among our management due to the mature nature of our industry and the rural and often remote location of our mills, together with generally long tenure of employees at the mills. As a result we are likely to experience groups of employees leaving the company within a relatively short space of time of one another and may have difficulty attracting qualified replacements. The potential risks we face are a loss of institutional memory, skills, experience and management capabilities. Although we have put in place a number of initiatives to mitigate this risk, including implementing programs to promote phased retirement and transfer of knowledge, creating flexibility in career and job design and focussing greater effort on succession planning and talent review and effective skills training and leadership development we may be unable to attract and retain sufficient qualified replacements when and where necessary to avoid an adverse impact on our business.

Risks Related to Our Shares

Your ability to sell a substantial number of ordinary shares may be restricted by the limited liquidity of shares traded on the JSE Limited.

The principal trading market for the ordinary shares of Sappi Limited is the JSE Limited (JSE) (formerly the JSE Securities Exchange South Africa). Historically, trading volumes and liquidity of shares listed on the JSE have been low in comparison with other major international markets. In fiscal 2006, 251 million ordinary shares of Sappi Limited were traded on the JSE and 58 million ADSs were traded on the New York Stock Exchange. See Significant shareholders may be able to influence the affairs of our Company , Item 7 Major Shareholders and Related Party Transactions Major Shareholders , Item 9 The Offer and Listing Offer and Listing Details and Item 9 The Offer and Listing Markets .

Significant shareholders may be able to influence the affairs of our Company.

Although our investigation of beneficial ownership of our shares identified only two beneficial owners of more than 5% of our ordinary shares, holding approximately 19.9%, as shown in our shareholders register at September 30, 2006, the five largest shareholders of record, four of which are nominees that hold shares for a multitude of beneficial owners, owned approximately 93% of our ordinary shares. See Item 7 Major Shareholders and Related Party Transactions Major Shareholders .

ITEM 4. INFORMATION ON THE COMPANY

HISTORY AND DEVELOPMENT OF THE COMPANY

Sappi Limited is a public company incorporated in the Republic of South Africa. Its principal executive offices are located at 48 Ameshoff Street, Braamfontein, Johannesburg, 2001, Republic of South Africa and its telephone number is +27-11-407-8111.

Sappi Limited was founded and incorporated in 1936 in South Africa and is a corporation organised under the Companies Act 61 of 1973 of the Republic of South Africa.

Until 1990, we primarily expanded our operations within southern Africa. Since 1990, we have grown through acquisitions outside of southern Africa. In the mid 1990 s we acquired S.D. Warren Company, a market leader in the United States in coated fine paper and a major producer of other speciality paper products. It now conducts business as Sappi Fine Paper North America. In the late 1990 s we acquired KNP Leykam, a leading European producer of coated fine paper. KNP Leykam now conducts business as Sappi Fine Paper Europe. On May 13, 2002, we acquired Potlatch Corporation s coated fine paper business and have integrated it in Sappi Fine Paper North America.

In December 2004 we acquired 34% of Jiangxi Chenming Paper Company, a joint venture which commissioned in mid-2005 a coated mechanical paper machine, mechanical pulp mill and de-inked pulp mill in China.

In August 2006, we announced the expansion of the existing capacity at Sappi Saiccor in South Africa, where Chemical Cellulose products are produced. The current capacity of the mill is approximately 600,000 metric tonnes per annum. The expansion will increase capacity by a net 225,000 metric tonnes per annum. The estimated cost of the project is \$460 million. Funding for the project is to be sourced mainly from existing financing facilities in South Africa.

In April 2006, Sappi announced a black economic empowerment transaction involving the sale of identified forestry land to a South African empowerment partner. Certain conditions to the formal conclusion of the transaction have not yet been met, and therefore, no transactions under the arrangement have been effected.

For information on our principal investments and capital expenditures, see the description of our business in Business Overview and Item 5 Operating and Financial Review and Prospects Liquidity and Capital Resources .

We currently have our primary listing on the JSE Limited (Johannesburg Stock Exchange) and have secondary listings on the New York and London Stock Exchanges.

BUSINESS OVERVIEW

Business Strategy

Our objective for the coming years is to build on our position as a global leader in the coated fine paper market, which was from the beginning of the 1990 s one of the fastest growing market sectors in the paper industry, and to explore opportunities across the broad spectrum of coated paper to utilise our experience in paper coating as well as the chemical cellulose market and to support this with a high level of economic pulp integration. These represent our core products and sectors in the paper and forest products industry. We will continue to invest in our southern African businesses which have important market shares. The key elements of our business strategy are and have been as follows:

Strengthen our leadership position in our core businesses through organic growth and selective acquisitions.

We believe that opportunities for further consolidation remain in our sector. We intend to be at the forefront of this consolidation, aiming to strengthen our position in Europe, North America, and eventually Asia. We intend to focus on investment and acquisition opportunities that fit our strategies, that offer a potential return that exceeds our expected cost of capital and that in the medium term are more advantageous than buying back our shares.

Maintain a global presence.

One of Sappi's key strengths is our geographically diverse business base. We have a significant presence in each of Europe, North America and Africa, and a modest presence in Asia. The presence in Europe and North America has been built up over the past ten years, largely through strategic acquisitions. We will continue to pursue a strategy of geographic diversification supported by leading market positions.

Maintain a high level of economic pulp integration.

We intend to maintain a high level of economic pulp integration, which helps reduce the impact of pulp price volatility on our earnings.

Maintain cost efficient asset base and invest to increase efficiency/productivity.

We believe our asset base has some of the lowest cost and most efficient assets in the coated fine paper sector in the world. We maintain a rigorous focus on costs, and actively manage our asset base, including divesting or closing non-performing assets. We have closed 14 paper machines since 1995, including the recent closure of the Nash Mill.

We maintain an investment policy that is focused on high return projects. A significant portion of our investments are designed to increase production capacity, reduce costs and improve product quality.

Drive growth through market focus and innovation.

The Sappi Group operations represent the originators of many of the major innovations in the industry in the last century. We continue to maintain a focus on innovation through our research and development centres in Europe, North America and South Africa and have established multi-regional, multi-discipline teams to ensure that we transfer knowledge throughout the Group and implement best practice and that our research and development efforts are market oriented. We intend to allocate additional resources to marketing, innovation and technology. This includes the creation of multi-regional marketing teams and their links with the relevant technology teams.

Through our partnership with a leading global software provider, we are focused on developing unique information technology solutions that satisfy our customers' requirements and production capabilities, resulting in improved service delivery and operational efficiency.

The Pulp and Paper Industry

The paper industry is generally divided into the printing and writing paper segment, consisting of newsprint, groundwood paper and fine paper, and the packaging segment, consisting of containerboard, boxboard and sackkraft.

Long-term, paper and board consumption has grown in line with overall economic growth, but consumption patterns are also influenced by short-term economic developments. Pricing largely is influenced by the supply/demand balance for individual products, which is partially dependent on capacity and inventory levels in the industry. The ability to adapt capacity changes in response to shorter-term fluctuations in demand is limited, as large amounts of capital are required for the construction or upgrade of production facilities and as lead times are long between the planning and completion of new facilities. Industry-wide over-investment in new production capacity has in the past led to situations of significant oversupply, which has caused product prices to decrease. This has been exacerbated by inventory speculation, as purchasers have sought to benefit from the price trend. As a result, financial performance has deteriorated during periods of significant oversupply to again improve when demand has increased to levels that support the implementation of price increases.

In recent years the industry has experienced significant strategic changes. The high costs associated with building new paper mills and establishing and growing market share has led to companies focusing on acquisition, rather than construction, of new capacity. In China, however, rapid economic growth and government incentives spurred massive investment in the pulp and paper industry. Over the last 5 years, paper and board capacity increased 73%. This development has led to a reduction in events of significant dislocations in the supply/demand balance typically associated with the entry of new production capacity into established markets. With increased capacity in 2006 China is no longer a net importer of coated fine paper. Another result of this trend has been a greater concentration of production capacity among fewer producers. Many leading industry producers now focus on fewer core grades and have divested non-core assets that are not part of the industry or which have been considered not consistent with long-term strategies. The regional and global market shares of leading producers have increased significantly over the past decade.

The following table shows a breakdown and description of the major product categories Sappi participates in, the products in these categories and the typical uses for such products. We have produced and sold each of these products in each of our last three fiscal years.

Major Product Categories	Description and Typical Uses
<i>Fine Paper:</i>	
Coated paper	Higher level of smoothness than uncoated paper achieved by applying a coating (typically clay based) on the surface of the paper. As a result, higher reprographic quality and printability is achieved. Uses include brochures, catalogues, corporate communications materials, direct mail promotions, educational textbooks, luxury advertising, magazine covers and upscale magazines.
Uncoated paper	Uses include business forms, business stationery, general printing paper, tissue and photocopy paper.
Speciality paper	Can be either coated or uncoated. Uses include bags, labels, packaging and release paper for casting textured finishes (e.g., artificial leather).
<i>Packaging products:</i>	
Packaging paper	Heavy and lightweight grades of paper and board primarily used for primary and secondary packaging of fast moving consumer goods, agricultural and industrial products. Products include containerboard (corrugated shipping containers), sack kraft (multi-walled shipping sacks) and machine glazed kraft (grocers bags). Can be coated to enhance barrier and aesthetics properties.
<i>Groundwood products:</i>	
Newsprint	Manufactured from groundwood and bleached chemical pulp. Uses include advertising inserts and newspapers. Demand is highly dependent on newspaper circulation and retail advertising.
Coated groundwood paper	A coated groundwood fibre based paper, primarily used for magazines, catalogues and advertising material. Manufactured from mechanical pulp.

Pulp:

Paper pulp

Main raw material used in production of printing, writing and packaging paper. Pulp is the generic term that describes the cellulose fibre derived from wood. These cellulose fibres may be separated by mechanical, thermo-mechanical or chemical processes. The chemical processes involve removing the glues (lignins) which bind the wood fibres to leave cellulose fibres. Paper made from chemical pulp is generally termed woodfree. Uses include paper, paperboard and tissue.

Chemical cellulose

Manufactured by similar processes to paper pulp, but purified further to leave virtually pure cellulose fibres. Chemical cellulose is used in the manufacture of a variety of cellulose textile and non-woven fibre products, including viscose staple fibre (rayon), solvent spun fibre (lyocell) and filament. It is also used in various other cellulose-based applications in the food, cigarette, chemical and pharmaceutical industries. These include the manufacture of acetate tow microcrystalline cellulose, cellophane, ethers and moulding powders. The various grades of chemical cellulose are manufactured in accordance with the specific requirements of customers in different market segments. The purity of the chemical cellulose is one of the key determinants of its suitability for particular applications with the purer grades of chemical cellulose generally supplied into the speciality segments.

Timber products:

Sawn timber for construction and furniture manufacturing purposes.

The following table sets forth selected pulp and paper prices in certain markets for the periods presented.

	Year Ended September					
	2006		2005		2004	
	Low	High	Low	High	Low	High
Coated Fine Paper						
100 gsm delivered Germany (euro per metric tonne)(1)	790	825	845	845	840	855
60 lb. delivered US (US\$per short tonne)(2)	900	960	870	920	760	840
Uncoated Fine Paper						
50 lb. delivered US (US\$per short tonne)(3)	700	850	700	770	575	750
Paper Pulp						
NBSK (US\$per metric tonne)(4)	595	715	585	655	540	660
Chemical cellulose						
92 alpha (US\$per metric tonne)(5)	650	775	600	780	600	780

(1) 100 gsm sheets, RISI.

(2) 60 lb. Coated Web, RISI.

(3) 50 lb. Offset, RISI.

(4) Northern Bleached Softwood Kraft Pulp CIF Northern Europe, RISI.

(5) Selected indicative prices, Sappi.

Fine Papers

Our fine paper activities are divided into coated and uncoated fine paper and speciality paper grades.

Coated Fine Paper. Major end uses of coated fine paper include high-end magazines, catalogues, brochures, annual reports and commercial printing. Coated fine paper is made from chemical pulp and is coated on one or both sides for use where high reprographic quality is required. The majority of coated fine paper production is coated on two sides, permitting quality printing on both sides of the paper. Paper that is coated on one side is used in special applications such as consumer product and mailing label applications.

Our 2006 North American coated fine paper sales volume was 26% in sheet form and 74% in reel form. The sheet volume is largely influenced by brochure and general commercial printing activities and printers using mainly sheetfed offset lithographic printing processes, which are not particularly seasonal, and corporate annual reports, which result in heaviest demand during the first calendar quarter. Reels volume is heavily influenced by catalogue and text book activity, which results in heaviest demand during the third calendar quarter, and publication printer activity, which is not particularly seasonal. These printers principally use heatset web offset printing processes.

Our 2006 European business sales volumes of coated fine paper were 72% in sheet form and 28% in reels form. Due to the diversity in languages in the European market, the print editions of brochure and general commercial printing activities are considerably smaller than in the US market. This translates into a significantly higher volume in sheets. The seasonal patterns of both sheets and reels are mostly influenced by the catalogue business. This segment has its highest seasonal activity in the spring, when the fashion catalogues come out, and the autumn, when the Christmas catalogues and holiday brochures are printed. Commercial print and publishing business provide a more steady demand in this market.

See Item 5 Operating and Financial Review and Prospects Markets .

Uncoated Paper. Uncoated fine paper represents the largest industry fine paper grade in terms of both global capacity and consumption. Uncoated fine paper is used for bond/writing and offset printing papers, photocopy papers, writing tablets (e.g., legal pads), speciality lightweight printing paper (e.g., bibles) and thin paper.

The market for uncoated paper products generally follows cyclical trends, which do not necessarily coincide with cycles for coated paper but are impacted by capacity changes in uncoated fine paper output levels.

Speciality Paper. The high value-added speciality paper markets in which Sappi Fine Paper operates generally follow trends in the respective end use sectors in addition to changes in production capacity, output levels and cyclical changes in the world economy. Largely due to the highly specialised nature of speciality paper, price fluctuations have historically tended to lag and be less precipitous than price changes in the uncoated fine paper market.

Packaging Products

Our range of forest products comprises a variety of packaging papers produced in southern Africa at the Tugela, Cape Kraft and Ngodwana mills. We are one of the two major suppliers of packaging papers in South Africa.

Packaging Paper. As with fine paper, the market for packaging papers is affected by cyclical changes in the world economy, local economic growth, retail sales and by changes in production capacity and output levels. The southern African containerboard market has been positively affected by strong gross domestic product growth and corresponding growth in retail sales during fiscal 2006. Demand for sack kraft is largely driven by the demand for cement, potatoes, sugar and milling products. Sappi's sack kraft

market share was negatively affected by lower priced imported products and production constraints in 2005, a trend that continued through 2006 despite positive demand growth in the local market.

Over the past year, the kraft linerboard (KLB) price recovered. During September 2006 US East price for 42lb KLB traded at US\$ 515 per short ton, US\$120 higher than September 2005, which traded at US\$395. In the South African domestic market, we have entered into medium-term contractual commitments with converters of containers, sacks and bags. These commitments include certain volume targets and, in some cases, as is customary in the market, fixed prices for periods of 12 months.

Groundwood Products

Newsprint. The Ngodwana mill produces newsprint. The worldwide market for newsprint is a low growth sector in the paper industry and was adversely affected during the early 1990s by substantial increased capacity and stagnating demand from, and cost-cutting measures imposed by, major newsprint end-users. Since 1999 consumption of newsprint in the United States has declined every year and as of calendar year 2005 was 21% lower than in 1999. Consumption in South Africa has however grown on the back of new titles and greater penetration of freesheets.

Coated Groundwood. Coated groundwood paper, primarily used for magazines, catalogues and advertising materials, has been one of the fastest growing paper grades in the paper industry in recent years. The segment is also one of the most consolidated segments of the paper industry. Demand for coated magazine paper is influenced by magazine circulation and demand for advertising, and by the price difference relative to coated fine paper and to uncoated groundwood paper as substitution between these grades is possible, depending on quality requirements and price levels. Western European producers are the leading producers of coated groundwood globally. Rapid capacity expansion by leading producers in the early 1990s led to volatile pricing and the development of a significant export business from Europe, primarily to North America and Asia. Pricing development has been more stable in the past three years.

Pulp

We produce chemical cellulose, as well as a wide range of paper pulp grades, including groundwood pulp used in newsprint, unbleached kraft pulp, bleached kraft pulp and bleached sulphite pulp.

Paper Pulp. The market pulp industry is highly competitive and is sensitive to changes in industry capacity, producer inventories, demand for paper and cyclical changes in the world economy. The market price per metric tonne of northern bleached softwood kraft (NBSK) pulp, a pulp principally used for the manufacture of fine paper, is a benchmark widely used in the industry for comparative purposes.

In line with the global economy, pulp demand was low throughout 2002 and 2003 and price fluctuations were driven primarily by supply management and the consequent impact on inventories. Accordingly, NBSK prices fluctuated considerably with a difference of \$180 per metric tonne between a high of \$560 and a low of \$380 during fiscal 2002 and 2003. Higher demand during the first six months in fiscal 2004 caused pulp prices to trade at a higher base, with prices reaching a high of \$655 and a low of \$585. Lagging paper market demand in especially Asia and Europe caused pulp demand to decline during the latter part of 2004 and the beginning 2005. The pulp market however improved towards the end of 2005 and remained firm during 2006. As a result NBSK prices averaged \$695 during 2006, a \$50 premium compared to 2005, pulp prices continued to increase during 2006, trading at \$770 in October 2006.

Market unbleached kraft pulp (UKP) is used in the production of packaging papers, including kraft linerboard and sack kraft and for certain niche products such as oil and air filters. The market price of UKP generally follows the price trends of other paper pulp grades.

Chemical cellulose. The viscose staple fibre (VSF) industry which manufactures textile and non-woven fibres is the largest market segment for chemical cellulose. Prices of VSF grade chemical cellulose

generally follow those of the European NBSK. Over the past decade, the price of VSF grade chemical cellulose has ranged from a high of over \$1,000 per metric tonne in the fourth quarter of 1995, to a low of \$470 per metric tonne in the second quarter of 2002. During the past year, prices of VSF grade chemical cellulose were weaker at the beginning of the fiscal year but subsequently strengthened during the year, reaching a high in the fourth fiscal quarter of 2006 of \$775 per metric tonne. This level is expected to continue in the short term. Prices of the higher purity chemical cellulose used in applications other than for VSF products tend to be more stable and are largely unrelated to the price of NBSK. The manufacture of cellulose acetate flake (used in the manufacture of acetate tow for cigarette filter tips) is the second largest application for chemical cellulose after viscose staple fibre. The market price for chemical cellulose used for cellulose acetate flake production has increased to levels above \$900 per metric tonne and is set by competitive forces within this specific market.

Timber Products

Our timber products operations are concentrated in South Africa and consist of sawn timber for the building industry and components for the furniture and packaging industry.

Business Review

We are a leading global producer of coated fine paper and chemical cellulose.

We are a geographically diverse global paper company with significant manufacturing operations on three continents and sales in over 100 countries. During fiscal 2006, we had sales of \$4,941 million, operating profit of \$125 million and net loss of \$4 million. We currently have a paper production capacity of approximately 5.1 million metric tonnes per annum, chemical cellulose production capacity of 600,000 metric tonnes per annum and paper pulp production capacity of 2.9 million metric tonnes per annum.

Our operations are currently structured around two business units (segments):

- Sappi Fine Paper, which has fine paper and related paper pulp businesses in North America, Europe, South Africa and a 34% share in a Chinese joint venture; and
- Sappi Forest Products, which produces commodity paper products (newsprint and packaging papers), pulp (including chemical cellulose and hardwood and softwood pulp) and forest and timber products (including pulpwood, sawlogs and sawn timber) for southern Africa and export markets. Sappi Forest Products is based in South Africa.

We also operate a trading network for the international marketing and distribution of our products outside our core operating regions of North America, Europe and southern Africa. Our trading operation, which we refer to as Sappi Trading, co-ordinates our shipping and other logistical functions for exports from southern Africa, Europe and North America. All sales and costs associated with Sappi Trading are allocated to the two business units.

The markets for our pulp and paper products are significantly affected by changes in industry capacity and output levels and by cyclical changes in the world economy. For further information, see Information on the Company Business Overview The Pulp and Paper Industry and Item 5 Operating and Financial Review and Prospects .

The chart below represents the operational rather than the legal or ownership structure of Sappi as of November 2006. Units shown are not necessarily legal entities.

The following table sets forth certain information with respect to our operations for, or as at the end of, the year ended September 2006.

	Sappi Fine Paper			Sappi	Corporate	
	North	Europe	South	Forest	And	Total
	America		Africa	Products	Other	
	(US\$million, metric tonnes in thousands)					
Sales volume (metric tonnes)	1,426	2,450	328	2,995		7,199
Sales	1,439	2,194	325	983		4,941
Operating profit	(16)	(27)	(6)	175	(1)	125
Operating assets(1)	1,334	2,196	196	1,407	86	5,219

(1) Operating assets as defined in note 3 to our Group annual financial statements included elsewhere in this Annual Report.

SAPPI FINE PAPER

Overview

Sappi Fine Paper is the largest business sector of Sappi and contributed approximately 58% of our sales volumes in fiscal 2006. It has the capacity to produce 4.2 million metric tonnes of paper per annum at its 14 paper and related paper pulp mills located on three continents. Sappi Fine Paper manages its business in three principal regions: Sappi Fine Paper North America, Sappi Fine Paper Europe and Sappi Fine Paper South Africa.

The following chart sets forth certain information with respect to the mills and principal products of Sappi Fine Paper as of November 2006.

Edgar Filing: SAPPI LTD - Form 20-F

The following table sets forth approximate annual production capacity with respect to Sappi Fine Paper's products.

	Annual Production Capacity			
	North America	Europe	South Africa	Total
Production capacity (000s metric tonnes):				
Fine paper				
Coated(1)	1,260	2,605	80	3,945
Uncoated(2)		35	270	305
Total(3)	1,260	2,640	350	4,250
Paper pulp	900	680	160	1,740
Percentage paper pulp integration(4)	115 %	46 %	59 % ⁽⁵⁾	65 %

(1) Includes coated fine paper, coated groundwood paper and speciality papers.

(2) Includes 30,000 metric tonnes of tissue manufactured at the Stanger mill in South Africa and 14,000 metric tonnes of kraft manufactured at the Enstra and Adamas mills in South Africa.

(3) Excludes Chinese joint venture tons.

(4) Includes pulp used internally and pulp sold.

(5) Sappi Forest Products provides most of the additional pulp requirements of our South African fine paper operations.

Facilities and Operations

Sappi Fine Paper North America

Sappi Fine Paper North America is a leading producer and supplier of coated fine paper in the United States. Sappi Fine Paper North America also produces a variety of other fine paper, including coated speciality paper.

Sappi Fine Paper North America is headquartered in Boston, Massachusetts, and operates four paper mills in the United States in Somerset, Maine; Muskegon, Michigan; Westbrook, Maine; and Cloquet, Minnesota. These four mills have a total annual production capacity of approximately 1.3 million metric tonnes of paper and a capacity of approximately 0.9 million metric tonnes of paper pulp, which represents approximately 115% of Sappi Fine Paper North American pulp requirements. This significantly reduces Sappi Fine Paper North America's exposure to fluctuations in the price of market pulp that are not driven by fluctuations in wood or other major raw material prices. In July 2005, we announced the closure of the Number 4 paper machine and the mothballing of the pulp mill at Muskegon, which had an annual production capacity of 105,000 metric tonnes of paper and 110,000 metric tonnes of pulp, respectively.

Coated paper accounted for approximately 76% of Sappi Fine Paper North America's sales in fiscal 2006. Speciality paper and pulp accounted for the remaining 24%.

Edgar Filing: SAPPI LTD - Form 20-F

The following table sets forth sales by product for our North American operations, including contribution from the closed Muskegon assets in fiscal 2005.

	Year Ended September	
	2006	2005(1)
Sales (US\$ million)		
Coated fine paper	1,094	1,148
Speciality paper and other(2)	345	310
Total	1,439	1,458

(1) Includes sales for the Number 4 paper machine at Muskegon mill during fiscal 2005, which contributed \$83 million of sales (68,300 metric tonnes).

(2) Other consists primarily of market pulp.

For the year ended September 2006, Sappi Fine Paper North America sold approximately 1,426,000 metric tonnes of paper and pulp products. The following table sets forth, as of September 2006, the production capacity, number of paper machines, products, pulp integration and capital expenditures at each of our continuing mills in North America.

	Mill Locations			
	Somerset	Muskegon	Westbrook	Cloquet
Production capacity (000s metric tonnes)				
Paper	760	170	30	300
Market pulp	110			230
Number of paper machines	3	1	1	2
Products:				
Paper	Coated Fine Paper	Coated Fine Paper	Casting release paper	Coated fine paper
Market pulp	Bleached kraft pulp			Bleached kraft pulp
Percentage pulp integration(1)	101 %	None	None	227 %
Capital expenditures (October 2004- September 2006) (US\$million)	45	14	8	39

(1) Includes pulp sold to third parties.

Cloquet. The Cloquet mill has two paper machines and an offline coater, producing premium coated paper. The newest machine and coater were installed in 1988 and 1989, respectively. The pulp mill started up by the previous owner in 2000 at a total cost of \$525 million is the newest pulp mill in the United States. The Cloquet paper machines have an annual production capacity of 300,000 metric tonnes of coated paper, and the state-of-the-art pulp mill has an annual production capacity of 410,000 metric tonnes.

Somerset. The Somerset mill is a low-cost producer and has an annual production capacity of approximately 760,000 metric tonnes of paper and approximately 490,000 metric tonnes of pulp. The pulp mill was built in 1976, and Somerset became an integrated facility with the completion of Paper Machine 1 (PM1) in 1982. Each of the three paper machines at the Somerset facility employs Sappi Fine Paper North America's patented on-line coating and finishing technology. This technology combines the three steps (paper making, coating and finishing) in the manufacture of coated paper into one continuous process. It is well suited for the lightweight coated papers produced at Somerset, because it allows the production of high gloss, consistent quality products at high speeds.

Muskegon. The Muskegon mill consists of one continuing paper machine with an annual winder capacity of approximately 170,000 metric tonnes of text and cover weight coated paper using Sappi Fine

Paper North America's on-line finishing technology. On July 28, 2005, we announced the closure of the Number 4 paper machine and the mothballing of the pulp mill at Muskegon, which had an annual production capacity of 105,000 metric tonnes of paper and 110,000 metric tons of pulp, respectively.

Westbrook. Westbrook is Sappi Fine Paper North America's original mill, with origins dating back to 1854. After the closure of one of its paper machines, the mill is primarily a speciality paper production facility with an annual capacity of 34,000 metric tonnes of coated fine and casting release paper. Its paper machine primarily produces base paper, which is coated off-line. Westbrook also has six speciality coaters, including four employing Sappi Fine Paper North America's patented Ultracast® process. This process uses an electron beam to cure coating against a finely engraved steel roll, resulting in a virtually exact replication of the roll pattern. Sappi Fine Paper North America also has a research and development facility at Westbrook.

Sappi Fine Paper North America also operates a coated paper sheeting and distribution facility in Allentown, Pennsylvania, which was completed in 1994 and has an annual sheeting capacity of approximately 100,000 metric tonnes. The Allentown facility produces sheet paper primarily from the Cloquet mill.

Sappi Fine Paper Europe

Sappi Fine Paper is a leading producer of coated fine paper in Europe and a producer of commercial printing paper, coated groundwood paper and speciality paper used in packaging, labelling and laminating. Sappi Fine Paper Europe's operations consist of seven mills with an aggregate annual production capacity of approximately 2.6 million metric tonnes of paper and 680,000 metric tonnes of related paper pulp. Sappi Fine Paper Europe's headquarters are located in Brussels, Belgium.

The following table sets forth sales by product for our Sappi Fine Paper Europe operations, including contribution from the Nash mill until May 2006.

	Year Ended	
	September 2006	2005
Sales (US\$ million):(1)		
Coated fine paper(2)	1,917	1,934
Uncoated fine paper	38	35
Speciality coated paper and other	239	270
Total	2,194	2,239

(1) Includes sales for the Nash mill, which contributed \$23 million of sales (16,442 metric tonnes) in fiscal 2006 and \$42 million of sales (31,651 metric tonnes) in fiscal 2005.

(2) Includes coated mechanical paper produced at Lanaken mill.

For the year ended September 2006, Sappi Fine Paper Europe sold approximately 2,450,000 metric tonnes of paper and pulp products. The following table sets forth the annual production capacity, number of paper machines, products, pulp integration and capital expenditures at each of Sappi Fine Paper Europe's mills in Europe.

	Mill Location													
	Germany Alfeld		Ehingen		Austria Gratkorn		Netherlands Maastricht		Nijmegen		Belgium Lanaken		United Kingdom Blackburn	
Paper capacity (000s metric tonnes)	360		250		860		320		240		490		120	
Number of paper machines	5		1		2		2		1		2		1	
Products	Coated and Uncoated fine paper, coated specialities paper		Coated fine paper and uncoated fine paper		Coated fine paper and uncoated fine paper		Coated fine paper and coated speciality paper		Coated fine paper		Coated groundwood paper and coated fine paper		Coated fine paper	
Percentage pulp integration(1)	60	%	79	%	58	%	None		None		53	%	None	
Capital expenditures (October 2004 to September 2006) (US\$ million)	19		94		67		22		7		24		3	

(1) Includes pulp sold to third parties.

Alfeld. The Alfeld mill is located to the south of Hannover, Germany, and its origins date back to 1706. It has a paper production capacity of approximately 360,000 metric tonnes and a pulp production capacity of approximately 120,000 metric tonnes per annum. It produces coated fine and speciality paper products, which are mainly coated and have a variety of finishes. In 1995 a major rebuild of Alfeld's Paper Machine 3 (PM3) was completed, enhancing the production of low substance flexible packaging papers. Alfeld's PM3 employs a fully integrated concept of in-line coating and calendaring. The Alfeld mill produces totally chlorine-free (TCF) bleached sulphite pulp for its own use. In early 2002, a rebuild of Alfeld's Paper Machine 2 (PM2) was completed. Alfeld spent approximately 50 million on the rebuild of PM2.

Ehingen. The Ehingen mill is located to the southeast of Stuttgart, Germany and was acquired by Hannover Papier, predecessor entity to Sappi Alfeld, in 1987. A paper machine with a capacity of 180,000 metric tonnes per annum of coated fine paper was commissioned in July 1991, expanding Ehingen from a market pulp mill into an integrated pulp and paper mill. During 1994 the construction of a high-rack warehouse was completed. As a result of upgrades during 1994 and 1996, Ehingen's total paper capacity was increased to 235,000 metric tonnes per annum. During August and September 2006 the paper machine was rebuilt and started up together with a new coater allowing a significant quality upgrade from single coated to triple coated fine paper with capacity of approximately 250,000 metric tons per annum. The pulp mill's capacity is currently 135,000 metric tonnes per annum of TCF bleached sulphite pulp. The pulp is produced mainly for internal use, but is also sold to third party customers.

Gratkorn. Paper has been produced at the Gratkorn, Austria site for more than four centuries. In course of a major expansion and renovation project the Gratkorn mill has been transformed from a five-machine mill into a two-machine mill. As a result of this project, Gratkorn now has an annual capacity

of 860,000 metric tonnes of triple-coated fine paper on just two paper machines and 250,000 metric tonnes of TCF chemical pulp. The machines at Gratkorn are among the largest and most efficient paper machines in the world. After extension of Gratkorn's sheeting plant it also has an annual sheet finishing capacity of 800,000 metric tonnes.

Maastricht. The Maastricht, Netherlands, mill has the capacity to produce over 320,000 metric tonnes per annum of coated fine paper and board and one-side coated paper used primarily for printing labels. Paper was first produced in Maastricht in 1852. Paper Machine 6 (PM6), which was installed at Maastricht in 1962, was first rebuilt in 1977. In 1996, PM6 underwent an extensive NLG224 million (€102 million) rebuild. Maastricht specialises in high basis-weight triple-coated fine paper and board for graphics applications. PM6's production complements that of the Gratkorn mill, which produces lower weight coated fine paper. Paper Machine 5 (PM5) at Maastricht was constructed in 1952. It underwent a rebuild in 1995, when it was reconfigured at a total cost, including the related upgrade of PM5's entire line, of \$13 million and a further upgrading in 2001. Following the reconfiguration, PM5 is utilised as a dedicated one-side coated speciality paper machine.

Nijmegen. The Nijmegen, Netherlands mill began operations in 1955 and operates one paper machine. The mill specialises in the production of reels of coated fine paper for web offset printing. It also produces special coated fine paper for use in digital printing. The Nijmegen mill was upgraded in 2001. The upgrade increased its capacity by 40,000 metric tonnes per annum. With an annual production capacity of 240,000 metric tonnes, the Nijmegen mill is one of Europe's largest suppliers of coated fine web offset paper. Rotary, or web, offset paper is used for commercial printing and publishing.

Lanaken. The Lanaken, Belgium mill began commercial operations in 1966. It produces coated groundwood paper and lower weight wood-containing coated paper for offset printing. Coated groundwood paper for web offset presses is used primarily in the production of advertising materials and magazines. Lanaken's two paper machines have a total annual capacity of 490,000 metric tonnes. One machine principally produces coated groundwood paper. It was completely overhauled in 1992, and an additional off-line coater was installed to provide triple coating capability. The other paper machine produces lower-weight wood-containing paper. Its capacity was increased to 285,000 metric tonnes per annum as a result of an optimisation process during the mid-1990s. Lanaken produces chemo-thermo-mechanical pulp (CTMP) in an integrated plant which has been extended to an annual capacity of 165,000 metric tonnes in 2003. This enables the mill to supply approximately 52% of its fibre requirements for paper production.

Blackburn. The Blackburn, England mill was established in 1875, and has been a major producer of cast coated paper. The Blackburn mill was rebuilt completely in 1996. In May 2000, we sold our Astralux brand of cast coated papers produced at the mill to the Favini Group in Italy. The production of cast coated papers at the Blackburn mill ceased at the end of May 2000. The Blackburn mill will continue to focus on its main business, the production of coated fine paper in reels.

Nash. The Nash mill in Hemel Hempstead, England operated as a paper mill since the 1800s and manufactured a variety of different grades of paper and board. The mill's principal products were its branded and watermarked business papers, sold under the Croxley brand name, and its wide range of white and coloured boards, sold under the Vanguard brand name. The mill had the capacity to produce 30,000 metric tonnes of paper and board per annum. During May 2006 production at Nash mill was terminated and the production of several special grades has been transferred to facilities in Sappi Southern Africa.

Sappi Fine Paper South Africa

Sappi Fine Paper, through Sappi Fine Paper South Africa, produces and markets a wide range of coated, uncoated and speciality papers as well as crêped tissue and fibreboard in South Africa. Sappi Fine Paper South Africa is headquartered in Johannesburg. In the uncoated fine paper sector, Sappi Fine Paper operates one integrated pulp and uncoated paper mill, Enstra (located near Johannesburg). Stanger (located north of Durban) uses bagasse (the fibrous residue of sugar cane) to produce coated fine paper and tissue. A smaller paper mill, Adamas (located in Port Elizabeth) utilises pulp from our pulp mills and waste paper to produce speciality paper and some kraft products. Adamas now also produces branded printing paper and board, previously produced at the Nash mill in the United Kingdom. Sappi Fine Paper South Africa is the only producer of coated fine paper in South Africa.

The following table sets forth sales by product for our Sappi Fine Paper South Africa operations.

	Year Ended September	
	2006	2005
Sales (US\$million):		
Coated fine paper	61	67
Uncoated fine paper	191	188
Speciality paper and other	73	68
Total	325	323

The following table sets forth the annual paper production capacity, number of machines, products, pulp integration and capital expenditures at each of the mills of Sappi Fine Paper South Africa.

	Mill Locations		
	Enstra	Stanger	Adamas
Paper capacity (000s metric tonnes)	200	110	40
Number of paper machines	3	2	2
Products	Uncoated fine Paper	Coated fine Paper, coated label paper and tissue	Prestige stationary, branded printing paper and board, envelope paper and corrugated medium
Percentage pulp integration	63	%	77
Capital expenditures (October 2004-September 2006) (US\$million)	16	%	17
			8

Enstra. The Enstra mill is the largest mill of Sappi Fine Paper South Africa, with a capacity of approximately 200,000 metric tonnes of elemental chlorine-free uncoated fine paper products per annum. In 1996, the Enstra mill completed a \$96 million capital expenditure programme. This programme increased capacity by 50,000 metric tonnes per annum and has resulted in improved production efficiency and product quality. The product range at the Enstra mill caters to the business forms, scholastic, office, envelope and general printing industries. The mill has a capacity of 105,000 metric tonnes per annum of bleached hardwood pulp. The mill uses an oxygen bleaching process, which is a process that was developed at the mill in the 1970s and has since become the industry standard.

Stanger. The Stanger mill commenced operations in 1976. It is unique in South Africa in that it uses bagasse as its basic raw material to produce high quality matte and gloss coated art papers and tissue. Art paper is used for high quality books and magazines, brochures, annual reports and labels. A \$26 million upgrade of the mill's paper machine was completed in August 2001, increasing the coated paper capacity to 80,000 metric tonnes per annum. The mill also produces 30,000 metric tonnes of tissue per annum and has

a capacity of 60,000 metric tonnes of bleached bagasse pulp per annum. A \$11 million upgrade on the bleach plant in 2006 converted the mill to an elemental chlorine free bleaching process.

Adamas. The Adamas mill is a small speciality mill. It produces high quality, uncoated prestige papers and boards in a variety of colours and embossing patterns. It also produces branded printing paper and board, previously produced at the Sappi Nash mill in the United Kingdom. The Adamas mill also produces packaging and industrial grades from waste paper. The mill has a capacity of 40,000 metric tonnes of paper per annum. This mill purchases wastepaper and bleached pulp from other mills in the Sappi Group.

Marketing and Distribution

Overview

The further integration of our international marketing and distribution efforts is one of our main strategic objectives. In order to attain this objective, we have adopted a system whereby the marketing and distribution of our fine paper products is performed by our operating business in the respective region, supplemented by a trading network outside these core regions.

Our trading network, Sappi Trading, co-ordinates the international marketing and distribution of our fine paper products outside our core regions. Sappi Trading operates in Hong Kong (China), Sydney (Australia), Sao Paulo (Brazil), Shanghai (China), Konstanz (Germany), Nairobi (Kenya), Mexico City (Mexico), Singapore, Johannesburg and Durban (South Africa), Zurich (Switzerland), Taipei (Taiwan), New York (United States). It manages a network of agents around the world handling exports to over 100 countries. Sappi Trading also manages the export logistics of the southern African and United States operations.

We sell the vast majority of our coated and uncoated fine paper through merchants. We also sell paper directly to converters. We generally deliver products sold to converters from the mill or via a distribution warehouse. Electronic business-to-business interaction has become more important to us, and we will continue to focus on increasing service and efficiency through business-to-business interaction. The systems and structures have been put in place to actively continue these efforts.

Merchants are authorised to distribute Sappi Fine Paper's products by geographic area and to carry competitors' product lines to cover all segments of the market. Merchants perform numerous functions, including holding inventory, sales promotion and marketing, taking credit risk on sales and delivery, and distribution of the products. Merchants buy paper from Sappi Fine Paper and resell it, placing a mark-up on their purchase price. A merchant may either deliver to the customer from its own stock or arrange for delivery directly from the mill or one of Sappi Fine Paper distribution warehouses.

Sappi Fine Paper North America

Sappi Fine Paper North America's coated paper sales structure is organised in 6 regions with sales representatives located in all major market areas, and 6 technical representatives located in different regions in North America supporting the sales effort.

Approximately 6% of Sappi Fine Paper North America's coated fine paper sales for fiscal 2006 were outside North America. Sappi Fine Paper North America's sales outside North America are handled in southern Africa by Sappi Fine Paper South Africa, in Europe by Sappi Fine Paper Europe and by Sappi Trading outside those regions.

In 2006, the Sappi Fine Paper North America sales force sold coated graphic paper to approximately 350 merchant distribution locations. By selling exclusively through merchant channels, Sappi Fine Paper North America believes it has created a loyal group of merchant customers. Rather than competing with

merchant distributors, the Sappi Fine Paper North America sales force focuses on generating demand with key printers, publishers and end users, which are then serviced by the merchant distributors.

In the United States, we market speciality paper through a dedicated speciality paper sales team directly to customers. Sappi Fine Paper North America also sells paper directly to large users of coated technical products utilising a dedicated sales team. The special end-use requirements often require a paper made to fit the customer's specific application.

Sappi Fine Paper Europe

As part of the formation of Sappi Fine Paper in April 1998, the sales and marketing operations of Sappi Fine Paper Europe were reorganised into graphic paper, comprising printing and writing paper, and speciality paper, comprising paper for labelling, packaging and other speciality uses.

The sales division of the graphic paper unit is responsible for all sales of coated fine and groundwood papers in Europe. This includes European sales on behalf of Sappi Fine Paper North America and Sappi Fine Paper South Africa. It is also responsible for export sales to markets outside Europe. Sappi Fine Paper Europe's graphic products are distributed primarily by merchants. The export sales office manages exports to markets outside Europe through Sappi Trading, Sappi Fine Paper North America and Sappi Fine Paper South Africa.

Sappi Fine Paper Europe's centralised logistics department was formed in early 1998. It is responsible for the development and optimisation of the logistics of the graphic and speciality papers business units and the re-engineering of the supply chain.

Sappi Fine Paper South Africa

Sappi Fine Paper South Africa has a marketing and sales and technical support team based in four major centres in South Africa and one in the United Kingdom (Nash). Approximately 22% of the sales of Sappi Fine Paper South Africa in fiscal 2006 were outside of southern Africa to markets in Europe, Africa, Asia and North and Latin America. The products of Sappi Fine Paper South Africa are distributed in southern Africa primarily through merchants. In addition, some large volume orders are sold directly to printers and converters.

Customers

Sappi Fine Paper sells its products to a large number of customers, many of whom have long-standing relationships with us. These customers include merchants, converters and other direct consumers.

The most significant merchant customers, based on sales during fiscal 2006, include:

North America: xpedx (a division of International Paper Company), Unisource Worldwide, Inc. (a majority interest of which is owned by Bain Capital Corporation), Lindenmeyr Paper Company (owned by Central National Gottesman Inc.) and a select number of regionally strong merchants;

Europe: **PaperlinX, Antalis (owned by Sequana Capital), IGEPA group and Papyrus.**

Southern Africa: **Antalis SA (Pty) Limited, Peters Papers and Finwood Papers (a division of Buhrmann Paper Merchant Division).**

Only one of these merchant distributors, PaperlinX, represented more than 10% of our total sales during fiscal 2006.

Sappi Fine Paper's converter customers include both multinational and regional converters. The most significant converter customers, based on sales during fiscal 2006, include: VanLeer, Fasson, Jackstadt, VAW Flexible Packaging, Alcan, UCB Transpac, Lawson Mardon Packaging and Perstop. These

customers use our products in the production of pressure sensitive and other types of labels as well as flexible packaging. Nampak, the CTP Group of companies, Paarl Media Lithotech, Merpak and Freedom Stationery and Silvery are also significant converter customers. These companies use our products in the production of packaging products. No converter customer, however, represented more than 10% of our total sales during fiscal 2006.

Merchant sales constitute the majority of our fine paper sales. Pricing of fine paper products is generally subject to change upon notice of 30 days with longer notice periods (typically 3 to 6 months) for some large end-use customers. Sales to converters may be subject to longer notice periods, which would generally not exceed 12 months. We have long-standing relationships with most of our customers, with volume and pricing generally agreed on a quarterly basis.

Competition

Overview

Although the markets for pulp and paper have regional characteristics, they are highly competitive international markets involving a large number of producers located around the world.

Pulp and paper are subject to relatively low tariff protection in major markets, with existing tariff protections being further reduced under the World Trade Organization (*WTO*). In South Africa, for example, no tariffs are imposed on imports of pulp and newsprint as well as most uncoated and coated woodfree products, with the exception of A4 office paper.

Competition in markets for our products is primarily based on price, quality, service, breadth of product line, product innovation and sales and distribution support. The speciality paper market puts greater emphasis on product innovation and quality as well as technical considerations. The packaging paper and newsprint markets place more emphasis on price.

In Europe and North America production capacity closures of more than one million metric tonnes of coated fine paper and 800,000 metric tonnes of mechanical coated paper has been announced during 2005 and 2006 by the industry of which 15% was by Sappi. Of these announcements, approximately 900,000 metric tonnes of coated fine paper and 520,000 metric tonnes of mechanical coated paper closures were realised at the end of fiscal 2006.

North America

The major domestic coated fine paper producers which compete with Sappi Fine Paper in North America are NewPage (formerly part of MeadWestvaco and now owned by Cerberus), Stora Enso and Verso Paper (formerly part of International Paper Company and now owned by an affiliate of Apollo Management L.P.). In addition, approximately 31% of US consumption is supplied by foreign producers, primarily Asian and European.

Europe

The market leaders in coated fine paper production in Europe are Sappi, M-real, Stora Enso, Burgo-Marchi Group, UPM-Kymmene and CVC Partners (Lecta).

Southern Africa

Mondi Paper Company Limited is a significant competitor of Sappi Fine Paper in southern Africa in the uncoated fine paper sector. Coated fine paper imports, primarily from Europe and Asia, have gained an increased share of the southern African fine paper market, after the lifting of sanctions and boycotts against South Africa in the early 1990s and as a result of declining import duties, which were removed in 2006. A substantial part of the imports originate from Sappi Fine Paper's European mills.

SAPPI FOREST PRODUCTS

Overview

Sappi Forest Products, headquartered in Johannesburg, South Africa, is an integrated pulp, packaging paper and timber products producer. Sappi Forest Products operates five pulp and paper mills and one sawmill and is managed in three operating divisions: Sappi Saiccor, Sappi Kraft and Sappi Forests.

Sappi Forest Products is a major pulp and paper producer in Africa with a production capacity of 830,000 metric tonnes of paper, 600,000 metric tonnes of chemical cellulose and 1,090,000 metric tonnes of paper pulp per annum. It is also a major timber grower and manages approximately 546,000 hectares of forestland, of which, approximately 398,000 hectares is planted with primarily pine and eucalyptus. Approximately 70% of our southern African pulpwood and sawlog requirements are from our own plantations.

The following chart sets forth certain information with respect to the mills and principal products of Sappi Forest Products as of November 2006.

The following table sets forth sales by product for Sappi Forest Products operations:

	Year Ended	
	September 2006	2005
Sales (US\$million):		
Commodity paper products(1)	410	430
Chemical cellulose	384	360
Paper pulp(2)	102	118
Timber and timber products	87	90
Total	983	998

- (1) Includes newsprint and packaging products.
- (2) Excludes sales related to paper pulp produced by Sappi Fine Paper facilities.

Sappi Forest Products sold approximately 2,995,000 metric tonnes of paper, pulp and forest products during the year ended September 2006.

The following table sets forth annual production capacity with respect to Sappi Forest Products products:

Production capacity (000s metric tonnes):		
Paper products		
Packaging paper		690
Newsprint		140
Total		830
Pulp		
Chemical cellulose		600
Paper pulp(1)		1,090
Total		1,690
Timber products	41	(2)
Percentage paper pulp integration	142	%(3)

- (1) Excludes production capacity related to paper pulp produced by Sappi Fine Paper facilities.
- (2) Represents 78,000 cubic metres.
- (3) Excludes pulp produced by Sappi Saiccor. Our southern African operations are net sellers of pulp.

Facilities and Operations

Sappi Saiccor

Sappi Saiccor was established in 1951 and acquired by us in 1988. It is a low-cost producer and the world's largest single producer of chemical cellulose. In 1995, we completed an approximately \$221 million expansion project to increase capacity by one third to approximately 600,000 metric tonnes per annum. Capital expenditures during the period from October 2004 to September 2006 were approximately \$86 million. During 2006 most of the equipment for the modernisation project to de-bottleneck production at Sappi Saiccor was commissioned, at an approximate cost of \$40 million.

In August 2006 Sappi announced a \$460 million expansion project to increase Sappi Saiccor's chemical cellulose capacity by a net 225,000 metric tonnes per annum. Construction commenced in the same month with commissioning scheduled for the first half of 2008. Capital expenditure for the project during fiscal 2006 amounted to approximately \$32 million.

Virtually all of Sappi Saiccor's chemical cellulose production is exported from South Africa and marketed and distributed internationally by Sappi Trading. The pulp we principally produce is the type used in the manufacture of a variety of cellulose products, including viscose staple fibres (rayon) and solvent spun fibres (lyocell). Both viscose and lyocell fibres are used in the manufacture of fashion and decorating textiles which have a soft, natural feel and excellent breathing properties. Given their particularly high absorbency properties, these fibres are also used in non-woven applications in the healthcare, industrial and disposable product markets. Chemical cellulose is also used in the manufacture of acetate flake, which is used in products such as filter tow for cigarette filters, and high quality yarns and fabrics. It is also used to manufacture microcrystalline cellulose, which is used as a rheological modifier in the food industry, a tableting agent in the pharmaceutical industry, and in various ethers for the chemical industry. It is also used to manufacture cellophane film for use in a variety of packaging applications.

The mill's timber consumption is comprised primarily of eucalyptus hardwoods. These fast growing trees are grown in relatively close proximity to the mill, which contributes to Sappi Saiccor's position as a low cost producer of chemical cellulose.

Sappi Kraft

Based upon volume sold in fiscal 2006, Sappi Kraft supplies approximately 55% of South Africa's packaging paper requirements, other than cartonboard, from its Ngodwana, Tugela and Cape Kraft mills.

The following chart sets forth the annual paper production capacity, number of machines, products, pulp integration and capital expenditures at each of Sappi Kraft's mills in South Africa.

	Mill Locations in South Africa		
	Ngodwana	Tugela	Cape Kraft
Paper capacity (000s metric tonnes)	380	390	60
Number of paper machines	2	4	1
Products	Newsprint, kraft linerboard, white top linerboard, plasterboard and bleached and unbleached market pulp	Kraft linerboard, corrugating medium, sackkraft and machine glazed kraft	Linerboard, corrugating medium and coated products
Percentage pulp integration(1)	134%	100%	None(2)
Capital expenditures (October 2004-September 2006) (US\$million)	48	28	4

(1) Excludes pulp produced from recycled paper by the respective plants at the mills.

(2) Cape Kraft's raw material requirements are met from waste fibre supplied by Sappi Waste Paper.

Ngodwana. Ngodwana was expanded between 1981 and 1985 from an unbleached kraft mill with a capacity of 100,000 metric tonnes per annum to a modernised mill with a capacity of approximately 240,000 metric tonnes of linerboard and 140,000 metric tonnes of newsprint per annum. The linerboard machine also produces White Top Liner (included in total linerboard capacity). The mill produces nearly 410,000 metric tonnes of bleached and unbleached pulp and 100,000 metric tonnes of groundwood pulp annually.

The mill markets paper and excess pulp locally and in the export market. The mill is a large consumer of waste paper, which is used in the production of packaging paper. In 1995 the mill commissioned the world's first ozone bleaching plant, thus eliminating the use of elemental chlorine and significantly reducing mill effluent.

Tugela. Tugela is Sappi Kraft's largest integrated unbleached kraft mill, with a capacity of approximately 390,000 metric tonnes of packaging paper per annum. The mill supplies kraft linerboard and corrugating medium and most of South Africa's requirements for sackkraft, used in the production of multiwall sacks. Machine glazed packaging papers are also produced at the mill. The Kraft Linerboard machine was upgraded in 1996 at a cost of approximately \$81 million and the Sack Kraft machine and components of the pulp plant were upgraded in 2003/4 at a cost of approximately \$50 million. It is the only mill in South Africa to offer high performance containerboard packaging and extensible Sack Kraft.

Cape Kraft. The Cape Kraft mill was built during 1980, commissioned in 1981 and upgraded in 1995. The mill presently has a capacity of 60,000 metric tonnes of linerboard and corrugating medium per annum, which it sells principally to the corrugating industry in the Western Cape. The mill uses approximately 67,000 metric tonnes per annum of waste paper to produce 60,000 metric tonnes per annum of paper. The fact that the mill's product is produced from 100% recycled paper can provide a competitive edge in our markets, which are becoming increasingly environmentally aware.

Usutu Pulp. Usutu Pulp began production in 1961 and was upgraded during 1995 and 1996 at a cost of approximately \$69 million. During the period from October 2002 to September 2006, an additional \$23 million was invested. The mill has a capacity of 230,000 metric tonnes of unbleached kraft pulp and supplies approximately 6% of the world market for unbleached market kraft pulp (based upon tonnes sold in 2006). The mill is situated in Swaziland and is surrounded by 70,000 hectares of forestlands, which it leases from the Swazi nation under a long-term lease extendable to 2089. The location of these forestlands, combined with the very compact areas the trees are planted on, provides for low wood delivery costs. See Supply Requirements Southern Africa Wood for more information.

Sappi Kraft also manages Sappi Waste Paper. Sappi Waste Paper collected approximately 166,000 metric tonnes of waste paper in fiscal 2006. Most of the waste paper collected was supplied to our mills. Waste represents approximately 30% of the fibre requirements of our packaging grades.

Sappi Forests

Sappi Forests, together with Usutu Forests, supplies or procures all of Sappi Forest Products' and Sappi Fine Paper South Africa's domestic pulpwood requirements of approximately 6 million metric tonnes per annum. 88% of the pulpwood comes from owned or contracted sources. Together they manage or control, through contracts, about 546,000 hectares of land situated in: Mpumalanga (46%), KwaZulu-Natal (41%) and Swaziland (13%). Securing raw material for the future is a vital element in the long-term planning of Sappi Forest Products' business. Sappi Forests has an extensive research operation which concentrates on programmes to improve the yield per hectare of forestland used. Significant progress has been made in developing faster-growing trees with enhanced fibre yields. Sophisticated nurseries have been developed to accommodate the seedling requirements of Sappi Forest Products' operations. Approximately 50 million seedlings are grown annually at Sappi Forests' and Usutu Forests nurseries.

Sappi Forests and Usutu Forests have invested approximately \$89 million in maintaining, acquiring and expanding plantations and other capital expenditure projects in the period from October 2004 to September 2006.

The sawmill division operates one mill with a total production capacity of 78,000 cubic metres per annum of structural timber for the building industry and components for the furniture and packaging industry.

Marketing and Distribution

Overview

Each of Sappi Forest Products' divisions with major South African markets has its own marketing and sales team. Sappi Trading manages the exports of the Sappi Forest Products' divisions, in particular the marketing and distribution of the market pulp produced at Saiccor and Usutu.

Customers

Sappi Forest Products sells its products to a large number of customers, including merchants, converters, printers and other direct customers, many of whom have long-standing relations with us.

The most significant converter customers, based on sales in fiscal 2006, include: The CTP Group and Media 24, which uses Sappi Forest Products' newsprint; Nampak Limited; Mondipak; APL (Pty) Ltd and Houers Co-operative. A significant number of the viscose staple fibre manufacturers around the world purchase chemical cellulose from Sappi Forest Products, including large groups such as the Aditya Birla Group and the Lenzing Group. Most of our chemical cellulose sales contracts are multi-year contracts with pricing generally based on a formula linked to the NBSK price and reset on a quarterly basis.

Approximately 53% of the total sales of Sappi Forest Products during fiscal 2006 consisted of export sales.

Competition

Mondi Paper Company Limited is a significant competitor in most of the markets in which Sappi Forest Products operates in southern Africa. In recent years the regional recycled containerboard capacity has increased by approximately 60,000 metric tonnes. Due to exchange rate fluctuations a number of offshore containerboard suppliers have also entered the southern African packaging markets. In respect of chemical cellulose, competitors include Borregaard ChemCell Atisholz, Tembec Inc., Western Pulp Inc., Buckeye Technologies Inc. and Rayonier Inc.

SUPPLY REQUIREMENTS

Overview

The principal supply requirements for the manufacture of our products are wood, pulp, energy and chemicals. Large amounts of water are also required for the manufacture of pulp and paper products. See "Environmental and Safety Matters" "Environmental Matters" "South Africa". We believe that we have adequate sources of these and other raw materials and supplies necessary for the manufacture of pulp and paper for the foreseeable future.

North America

Wood

In connection with the 1998 sale of our US timberlands to Plum Creek Timber Company L.P., Sappi Fine Paper North America and Plum Creek are parties to a fibre supply agreement with an initial term expiring in December 2023 and with three five-year renewal options. Under the supply agreement, Sappi Fine Paper North America is required to purchase from Plum Creek and Plum Creek is required to sell to Sappi Fine Paper North America a guaranteed annual minimum of 318,000 metric tonnes of hardwood pulpwood, or approximately 10% of Sappi Fine Paper North America's annual requirements, at prices calculated based on a formula tied to market prices. Sappi Fine Paper North America has the option to purchase additional quantities of hardwood pulpwood harvested from these timberlands at prices generally higher than the ones paid for the guaranteed quantities. The remainder of Sappi Fine Paper North America's wood requirements is met through market purchases.

Pulp

Sappi Fine Paper North America's mills, taken together, are fully integrated on an economic basis with respect to hardwood pulp usage. Mills that are not fully integrated make market purchases, and mills that produce more pulp than they utilise make market sales.

Sappi Fine Paper North America currently offers recycled products in most coated grade lines. It uses reprocessed fibres recovered from its existing operations and purchases de-inked post consumer waste pulp to meet market requirements for recycled products.

Sappi Fine Paper North America manufactures, in aggregate, pulp and fibre equivalent to approximately 115% of its own pulp and fibre requirements. This vertical integration reduces its exposure to fluctuations in the market price for pulp.

Energy Requirements

Sappi Fine Paper North America's energy requirements are satisfied through wood and by-products derived from the pulping process, coal, oil, purchased electricity, purchased steam, natural gas and other sources.

A substantial majority of Sappi Fine Paper North America's electricity requirements are satisfied through its own electricity generation or co-generation agreements. In July 2002, Sappi Fine Paper North America entered a series of contracts with Central Maine Power (CMP) and a third party energy provider. The contracts provide that Somerset sell all of its excess generated power to CMP and purchase all of its power needs beyond its generation capacity from the third party provider, each at market rates. The agreements expire in 2012. Sappi Fine Paper North America also sells excess electricity it co-generates at the Westbrook mill.

The Cloquet mill, is supplied partly with internally generated electricity. The Cloquet mill includes a hydroelectric facility that is licensed by the Federal Energy Regulatory Commission. In addition to generating a portion of its own power, the Cloquet mill has entered into a take-or-pay agreement which terminates in 2008, to purchase a portion of its power from Minnesota Power.

Chemicals

Major chemicals used by Sappi Fine Paper North America include clays, carbonates, latices and plastic pigments, titanium dioxide, caustic soda, other pulping and bleaching chemicals and chemicals for the specialty business. Sappi Fine Paper North America purchases these chemicals from a variety of suppliers. There are generally adequate sources of supply, and in no case is Sappi Fine Paper North America dependent upon a sole source of supply. However, chemical supplies have tightened due to the rationalization of capacity over the last several years. Most of these chemicals are subject to price fluctuations based upon a number of factors, including energy and crude oil prices and transportation costs, and commodity demand vs. supply imbalances.

Europe

Wood

Sappi Fine Paper Europe purchases approximately 2,500,000 cubic metres of pulpwood per annum for its pulp mills. The wood is purchased both on contract and in the open market. Wood supply contracts are fixed for one year in terms of volumes. Price agreements range from three months for wood chips to one year for logwood.

Edgar Filing: SAPPI LTD - Form 20-F

The wood logs and wood chips used in the Gratkorn TCF pulp mill are purchased through the Papierholz Austria GmbH joint venture arrangement amongst Sappi, the Norske Skog Bruck mill and the Frantschach Group. We hold a 42.5% ownership interest in Papierholz.

The wood chips used in the Lanaken CTMP plant are purchased through Sapin S.A. (Sapin), a 50%-50% joint venture company operated together with Norske Skog. Sapin was initially formed on November 25, 1986, pursuant to a joint venture agreement between Sappi Lanaken and Parenco. Under the agreement, as amended in September 2003, the parties agree to utilise Sapin exclusively to furnish the entire wood requirements of the joint venture partners' affiliated mills.

Pulp

Sappi Fine Paper Europe produces approximately 45% of its pulp requirements. The remainder is supplied through open market purchases and, to a lesser extent, supply agreements.

Energy Requirements

Sappi Fine Paper Europe's energy requirements are generally met by internally generated sources and purchases of electricity, gas and, to a lesser extent, oil. In Germany, Sappi Fine Paper Europe internally generates approximately 65% of the electricity used at its mills. Approximately 45% of the energy requirements for the Gratkorn mill are internally generated. The remaining requirements are met by purchasing electricity, oil, coal and gas in accordance with various supply agreements.

Substantially all of the electricity requirements of the Maastricht mill are satisfied by a 60 megawatt combined heat/power plant operated through a joint venture with Essent. All surplus electrical energy is supplied to the public electricity grid. We hold an ownership interest of 50% in the VOF Warmte/Kracht Maastricht Mill, the joint venture, which was formed in 1992, and are obligated to purchase all of the steam and electricity requirements of the Maastricht mill from the joint venture facility under a long-term supply agreement. Essent purchases the surplus electrical energy of the VOF. The Maastricht mill also purchases natural gas pursuant to a contract with a natural gas supplier.

Nijmegen mill's electricity requirements are largely satisfied by its co-generation power plant. The Nijmegen mill additionally purchases natural gas from Gasunie, a local supplier.

Lanaken mill's energy requirements are generally met by purchases of natural gas and electricity. Certain of the energy requirements of the Lanaken mill are furnished by a combined heat and power unit constructed and operated pursuant to the Albertcentrale N.V. joint venture arrangement between Sappi, the Belgian power company Electrabel and Rabo Energy. Sappi holds a 49% ownership interest in the Albertcentrale facility and is obligated to purchase 85% of the plant's energy requirements from the joint venture facility under a long-term supply agreement. The facility commenced operations in April 1997.

Chemicals

Major chemicals used by Sappi Fine Paper Europe include clays, carbonates, latexes and starches and chemicals for the specialty business. Sappi Fine Paper Europe purchases most of these chemicals from a portfolio of suppliers, and in only one case is Sappi Fine Paper Europe dependent on a sole source of supply. There are generally adequate sources of supply in the market. Most of these chemicals are subject to price fluctuations based upon a number of factors, including energy and crude oil prices and transportation costs, and commodity demand vs. supply imbalances.

Southern Africa

Wood

Edgar Filing: SAPPI LTD - Form 20-F

Sappi Forest Products manages approximately 546,000 hectares of forestland in southern Africa, of which approximately 398,000 hectares are forested, which produces approximately 83% of the timber

33

required for its operations. Sappi Forests owns approximately 372,000 hectares and manages the majority of the remainder. Usutu Pulp owns 54,000 hectares of pine on 70,000 hectares of land that is leased from the Swazi nation on a long-term lease, which we have the option to extend until 2089. Sappi Forests presently has supply contracts for the timber from approximately 95,000 hectares of plantations planted by small growers with our technical and financial support. The remaining timber requirements are met through a number of significant medium-term contracts and open market purchases.

Pulp

Sappi Forest Products and Sappi Fine Paper South Africa in aggregate manufacture all of the pulp required in their respective papermaking operations, except minimal quantities of specialised pulps, and together are a net seller of bleached and unbleached paper pulp. This vertical integration substantially reduces our exposure to fluctuations in the market price for pulp.

Energy Requirements

Our energy requirements in southern Africa are met principally by purchases of coal and electricity supplemented by purchases of fuel oil and gas. Much of the energy demand is met by internally generated biomass and spent liquors from the pulping process. Electricity is supplied by Eskom, the state-owned electricity company, or generated internally. The electricity generated by our plants in southern Africa is equivalent to approximately 43% of our total electricity requirements. Coal, both for steam raising and gas production, and oil are purchased on contract.

Chemicals

Major chemicals used by Sappi Forest Products and Sappi Fine Paper South Africa include caustic soda, calcium carbonates, latexes and starches and sulphur and sulphuric acid. Sappi Forest Products and Sappi Fine Paper South Africa purchase these chemicals from a variety of South African and overseas suppliers. There are generally adequate sources of supply, and in only one case is Sappi Fine Paper South Africa dependent upon a sole source of supply. Most of these chemicals are subject to price fluctuations based upon a number of factors, including energy and crude oil prices and transportation costs, and commodity demand vs. supply imbalances.

ENVIRONMENTAL AND SAFETY MATTERS

Environmental Matters

We are subject to a wide range of environmental laws and regulations in the various jurisdictions in which we operate, and these laws and regulations have tended to become more stringent over time. Environmental compliance is an increasingly important consideration in our businesses, and we expect to continue to incur significant capital expenditures and operational and maintenance costs related to reductions in air emissions (including greenhouse gases), wastewater discharges and waste management. We constantly monitor the potential for changes in the laws regulating air emissions and other pollution control and take actions with respect to our operations accordingly. See note 34 to our Group annual financial statements included elsewhere in this Annual Report for more information.

North America

Sappi Fine Paper North America is subject to stringent environmental laws in the United States. These laws include the Federal Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act and their respective state counterparts. In December 2003, Sappi Fine Paper North America received a notice of violation and a finding of violation from the US Environmental Protection Agency, alleging violations of the Clean Air Act's new source performance standards in connection with repairs performed at the Muskegon pulp mill in the early 1990s. In July 2005, Sappi announced its decision to

cease operations at the Muskegon pulp mill. In September 2006 Sappi Fine Paper North America entered into a consent decree with the US Environmental Protection Agency, in which Sappi (i) agreed to more stringent permit requirements should the pulp mill ever start up again and (ii) paid a fine of \$586,106.

The US is a non-signatory of the Kyoto Protocol, but we closely monitor State and Federal Greenhouse Gas (GHG) initiatives in anticipation of potential effects, if any, on our operations.

Europe

Our European facilities are subject to extensive environmental regulation in the various countries in which they operate. For example:

- In Germany, where two Sappi Fine Paper Europe mills are located, the Federal Emission Control Act, the Federal Water Act and the Federal Ground Act regulate air emissions, wastewater discharges and liability for contaminated sites, respectively.
- In the Netherlands, where two Sappi Fine Paper Europe mills are located, paper manufacturers, including Sappi, have made an agreement with the national government to improve environmental management and further limit emissions.
- At our Nijmegen mill, we are subject to a potential damage charge of approximately \$264,000 (euro 208,000), representing the alleged cost of cleaning up contaminated pulp from the local sewer system. The proposed charge relates to a discharge of pulp from our Nijmegen mill in 2000. We are pursuing a settlement of this matter with the local authorities.
- In Austria and Belgium, water emissions and waste disposal requirements similar to those in Germany, the United Kingdom and the Netherlands apply to our facilities.
- In the United Kingdom, we received the required permits under the Pollution Prevention and Control Regulations, which were enacted to implement the EC Directive 96/61/EC on Integrated Pollution Prevention and Control.
- The Sappi Fine Paper Europe organisation is certified according to the international standard of environmental management systems (ISO 14001), and to the European EMAS (Eco-Management and Audit Scheme). All of our European mills publish their environmental reports on an annual basis.
- The countries within which we operate in Europe are all signatories of the Kyoto Protocol and we have developed a GHG strategy in line with this protocol. Our European mills have been set CO₂ emission limits for the allocation period 2005 to 2007. Based on an analysis of our mill production by a Sappi Fine Paper Europe team, we believe that it is unlikely our European mills will exceed their CO₂ emission limits. Consequently we sold 90,000 surplus CO₂ credits in 2005 and 208,650 in 2006 on the European Climate Exchange.

South Africa

The primary South African environmental laws affecting our operations are:

- The National Water Act, addresses the water shortages in South Africa in a manner that we believe will not significantly impact our manufacturing and forestry operations. Abstraction of water, discharge of effluent and management of forests are all regulated under a license system in which first allocations go to, among other things, human consumption, before allocations are made to agriculture, industry and forestry. All water use is subject to a charge. We expect to incur additional costs over the next decade to comply with the National Water Act, but are unable to quantify these at this time.

- The National Environmental Management Act, adopted the philosophy of integrated environmental management, which provides for the integration of environmental considerations into all stages of any development process. The Act includes a number of significant principles, such as private prosecution of companies in the interest of the protection of the environment and the establishment of aggressive waste reduction goals. We expect to incur additional costs to comply with the National Environmental Management Act, which will not be material.
- The National Environmental Management Act (Air Quality Act) was promulgated in the beginning of 2005. The Air Quality Act will eventually replace the 1965 Atmospheric Pollution Prevention Act and will impose stringent compliance standards on our operations when implemented, including those related to carbon dioxide and sulphur dioxide air emissions. Limited sections of the Act were implemented in September 2005. We expect to incur additional costs to comply with the Air Quality Act, which we believe will not be material.
- South Africa is also a signatory of the Kyoto Protocol. We are identifying and initiating Clean Development Mechanism projects, as defined in the Kyoto Protocol, at a number of our South African mills.

The requirements under these statutes may result in additional expenditures and operational constraints. Although we are in frequent contact with regulatory authorities during the phasing in of the legislation, we are uncertain as to the ultimate effect on our operations. Our current assessment of the legislation is that any compliance expenditures or operational constraints, will not be material to our financial condition.

Safety Matters

The forestry, timber and pulp and paper industries involve inherently hazardous activities including, among other things, the operation of heavy machinery. Nearly all countries in which we have significant manufacturing operations including South Africa, the United States and European countries, regulate health and safety in the workplace. We actively seek to reduce the frequency of accidents in our workplaces and to improve health and safety conditions by extensive training and educational programmes.

The Sappi global safety improvement initiative, Project Zero, has been in operation for more than a year and is now a mature business initiative accepted throughout the Sappi Group. Project Zero symbolises the goal of no injuries and involves standardising behaviour-based safety programmes throughout the Sappi Group and focusing on the particular activities which have resulted in injuries or fatalities.

In the United States, Sappi Fine Paper North America must comply with a number of federal and state regulations regarding health and safety in the workplace. The most important of these regulations is the Federal Occupational Safety and Health Act.

In Europe, we participate in various governmental worker accident and occupational health insurance programmes. In Belgium, and The Netherlands, these programmes are funded by mandatory contributions by employers and employees. In Germany, we participate in a similar mandatory contribution scheme controlled by the German government, which permits employer and employee participation in its administration. In Austria and the United Kingdom, employee liability insurance is funded by the employer. The safety and health issues are integrated into the management systems and all mills of Sappi Fine Paper Europe comply with health and safety legislation and are OHSAS 18001 certified.

In South Africa, we must comply with the Occupational Health and Safety Act (Number 85 of 1993) and related regulations. Our South African businesses have instituted measurement for evaluating compliance with this legislation. Of the nine mills / business units, seven are OHSAS 18001 certified.

ORGANISATIONAL STRUCTURE

Sappi Limited is the ultimate holding company of the Sappi Group. The following table sets forth the more significant subsidiaries and joint ventures owned directly or indirectly by Sappi Limited.

Name of Company	Trading Name	Country of Incorporation	Type of Company	% Holding and Voting Power
North America				
S.D. Warren Company	Sappi Fine Paper	United States	Operating	100
Sappi Cloquet LLC	Sappi Fine Paper	United States	Operating	100

PROPERTY, PLANT AND EQUIPMENT

For a description of the production capacity of our mills, see Sappi Fine Paper Facilities and Operations and Sappi Forest Products Facilities and Operations .

For a description of the timberlands we own or have recently sold, see Sappi Fine Paper Facilities and Operations Sappi Fine Paper North America , Sappi Forest Products Facilities and Operations Sappi Forests and Supply Requirements .

For a description of our capital expenditures, see Item 5 Operating and Financial Review and Prospects Liquidity and Capital Resources .

The following table sets forth the location and use of our principal headquarters, manufacturing and distribution facilities. These facilities are owned unless otherwise indicated.

Location	Use	Approximate Size(1)
Sappi Limited		
Johannesburg, South Africa	Sappi Headquarters(2)	15,078 m ²
Sappi Fine Paper		
Sappi Fine Paper North America(3)		
Boston, Massachusetts	Headquarters(4)	34,928 sq ft
Skowhegan, Maine (Somerset Mill)	Manufacturing facility: coated paper, softwood and hardwood pulp	2,355 acres
Muskegon, Michigan	Manufacturing facility: coated paper and a warehouse(5)	5,185,000 sq ft
Westbrook, Maine	Manufacturing facility: speciality and high bulk coated paper and research and development facility	275 acres
	Storage and shredding facility	13,446 sq ft
	Roll coating facility	13,575 sq ft
Allentown, Pennsylvania	Coated paper sheeting facility	30 acres
Dayton, New Jersey	Distribution centre(6)	607,489 sq ft
Cloquet, Minnesota	Manufacturing facility: coated paper and pulp(10)	650 acres
South Portland, Maine	Shared financial and customer service office(11)	48,433 sq ft
Sappi Fine Paper Europe		
Brussels, Belgium	Headquarters(9)	3,836 m ²
Gratkorn, Austria	Manufacturing facility: coated paper and pulp	999,053 m ²
Maastricht, Netherlands	Manufacturing facility: coated paper and research and development facility	14.7 ha
Nijmegen, Netherlands	Manufacturing facility: coated paper	10.7 ha
Lanaken, Belgium	Manufacturing facility: coated paper and pulp	35.0 ha
Alfeld, Germany	Manufacturing facility: coated paper, uncoated paper and pulp	332,844 m ²
Ehingen, Germany	Manufacturing facility: coated paper and pulp	356,951 m ²
Blackburn, England	Manufacturing facility: coated paper	36 ha
Wesel, Germany	Distribution centre(8)	62,140 m ²

Sappi Fine Paper South Africa		
Enstra, South Africa	Manufacturing facility: uncoated paper and hardwood pulp(10)	582.7 ha
Stanger, South Africa	Manufacturing facility: coated paper, tissue and bagasse pulp(10)	55.4 ha
Adamas, South Africa	Manufacturing facility: uncoated paper and recycled packaging paper	7.2 ha
Sappi Forest Products		
Johannesburg, South Africa	Headquarters	Included under Sappi Limited headquarters
Sappi Saiccor		
Umkomaas, South Africa	Manufacturing facility: chemical cellulose(10)	159.4 ha
Sappi Kraft		
Ngodwana, South Africa	Manufacturing facility: linerboard, newsprint and kraft pulp	1,282.9 ha
Tugela, South Africa	Manufacturing facility: linerboard, corrugating medium, sackkraft and industrial kraft	914.4 ha
Cape Kraft, South Africa	Manufacturing facility: linerboard and corrugating medium	9.5 ha
Bunya, Swaziland (Usutu Pulp Mill)	Manufacturing facility: kraft pulp	45.0 ha
Sappi Forests		
Barberton, South Africa (Lomati Sawmill)	Sawmill	24.6 ha

- (1) The approximate size measurement relates to, in the case of manufacturing and distribution facilities, the perimeter of the property on which the principal manufacturing or distribution facilities are situated and, in the case of offices, the interior offices space owned or leased.
- (2) Subject to a lease expiring in 2015.
- (3) All of Sappi Fine Paper North America principal properties are pledged as collateral under Sappi Fine Paper North America's credit facilities.
- (4) Subject to a lease expiring in 2011.
- (5) Subject to a lease that operates on a month-to-month basis.
- (6) Subject to a lease expiring in 2010.
- (8) Of the total 62,140 m², 8,800m² is subject to a lease that operates on a year-to-year basis. The remainder of the property is subject to a heritable building right (Erbbaurecht).
- (9) Subject to leases expiring in 2008.
- (10) Substantial assets are leased pursuant to capital lease agreements. During fiscal 2006, Sappi announced the expansion of the existing capacity at Saiccor mill. The current capacity of the mill is approximately 600,000 metric tonnes per annum. The result of the expansion is an expected increase in capacity of 300,000 tonnes, of which 75,000 tonnes is to replace existing higher cost capacity, while simultaneously reducing the environmental impact of the operation. The estimated cost of the project is \$460 million.

(11) Subject to a lease expiring in 2015.

39

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

You should read the following discussion and analysis together with our Group annual financial statements, including the notes, included elsewhere in this Annual Report. Certain information contained in the discussion and analysis set forth below and elsewhere in this Annual Report includes forward-looking statements that involve risk and uncertainties. See Forward-Looking Statements , Item 3 Key Information Selected Financial Data , Item 3 Key Information Risk Factors , Item 4 Information on the Company , Item 10 Additional Information Exchange Controls and notes 2, 12, 15, 17, 21, 22, 23, 25, 26, 28, 29, 31, 35 and 36 to our Group annual financial statements included elsewhere in this Annual Report for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in this Annual Report. The following discussion and analysis are based on the results of operations prepared in accordance with International Financial Reporting Standards (IFRS), which differ from United States Generally Accepted Accounting Principles (US GAAP).

The consolidated financial statements of the Sappi Group as of and for the years ended September 2006 and 2005, including the applicable notes thereto, contained in Item 18 Financial Statements of this Annual Report on Form 20-F and the consolidated financial information of the Sappi Group as of and for the years ended September 2006 and 2005 contained herein have been aligned with International Financial Reporting Standards (IFRS). The consolidated financial statements and related financial information of the Sappi Group as of and for each of the years ended September 2004, 2003 and 2002, cannot be provided on an IFRS aligned basis without unreasonable effort or expense. The Sappi Group has not amended, and does not intend to amend, its previously filed financial statements for the years affected by the change in accounting policy that ended prior to the year ended September 2005. For this reason, our Annual Reports on Form 20-F for those prior years, the consolidated financial statements and applicable notes thereto, auditors reports and related financial information contained in such reports should not be compared to this Annual Report on Form 20-F. For a description of the change in accounting policy and resulting adjustments, see Item 5 Operating and Financial Review and Prospects, and note 2 to our Group annual financial statements, included herein.

Fiscal 2006 included 52 accounting weeks, compared to 53 accounting weeks in fiscal 2005. Our fiscal years operate on a 52 accounting week cycle, except every 6th fiscal year which includes an additional accounting week (additional accounting week). The following discussion of our operating and financial review and prospects refers to the impact of the additional accounting week in fiscal 2005 on our sales, raw material and other input costs of manufacturing, operating expenses and, selling, general and administration expense (SG&A expense), based on average weekly sales and costs for the fiscal year.

Company and Business Overview

We are a global company which through acquisitions in the 1990s has been transformed into a global market leader in coated fine paper. Two acquisitions were pivotal in establishing us as a global company, namely the acquisition in 1994 of S.D. Warren Company, now known as Sappi Fine Paper North America, and the acquisition in 1997 of KNP Leykam, now integrated into Sappi Fine Paper Europe. Opportunities to grow within our core businesses will continue to be evaluated.

We have integrated our fine paper acquisitions into a single fine paper business, which operates under the name Sappi Fine Paper. We are organised into two operating segments; Sappi Fine Paper and Sappi Forest Products. We also operate a trading network, called Sappi Trading, for the international marketing and distribution of chemical cellulose and market pulp throughout the world and of the group s other products in areas outside our core operating regions of North America, Europe and Southern Africa.

Sappi Fine Paper generated approximately 80% of our sales during fiscal 2006 and fiscal 2005. Of our sales for fiscal 2006 and fiscal 2005, approximately 84% were made in US\$, Euro and other non-ZAR denominated currencies. Our South African businesses sell approximately 45% of their products in US\$.

See Inflation and Foreign Exchange and note 31 to our Group annual financial statements included elsewhere in this Annual Report. Our sales by source and destination in fiscal 2006 and fiscal 2005 were as follows:

	Sales by Source 2006	Sales by Source 2005	Sales by Destination 2006	Sales by Destination 2005
North America	29 %	29 %	30 %	30 %
Europe	44 %	45 %	40 %	40 %
Southern Africa	27 %	26 %	15 %	15 %
Far East and others			15 %	15 %
Total	100 %	100 %	100 %	100 %

Sappi Fine Paper has a total paper production capacity of 4.2 million metric tonnes per annum. We are a global leader in the coated fine paper business with a capacity of 3.9 million metric tonnes of coated fine paper per annum.

Our North American market share increased towards the end of fiscal 2005 to slightly above fiscal 2004 levels. This market share declined during 2006, due to a surge in US imports. After declining during fiscal 2005, our European market share increased during fiscal 2006; although still not at the same levels as seen during fiscal 2004. We are one of the world's largest producers of chemical cellulose. The Group is 100% integrated on a net basis in terms of pulp usage, meaning that, while some of our facilities are market buyers of pulp and others are market sellers, in the aggregate we produce slightly more pulp than we utilise. By region, the Southern African operations are net sellers of pulp, Sappi Fine Paper North America is fully integrated and the European operations are approximately 46% self-sufficient for pulp in Continental Europe, but entirely dependent on market pulp in the United Kingdom. We supply approximately 70% of the wood requirements for our South African businesses from sources we own or manage. Both our North American and European operations are dependent on outside suppliers of wood for their production requirements.

Despite a decline in fiscal 2006 we have, in recent years, sought to internationalise our shareholder base and increase our exposure in the world's major financial markets. On November 5, 1998, our American Depository Receipts commenced trading on the New York Stock Exchange. We believe that, as at the end of fiscal 2006, based on registered addresses and disclosure by nominee companies, excluding the shares owned by a subsidiary of Sappi, our beneficially held shareholding by Region is as follows:

	2006	2005
North America	30 %	46 %
Europe & Elsewhere	10 %	12 %
Southern Africa	60 %	42 %

Principal Factors Impacting on our Results

The results of operations of our business are affected by numerous factors. Given the high fixed cost base of pulp and paper manufacturers, industry profitability is highly sensitive to changes in prices. Prices are significantly affected by changes in industry capacity and output levels, customer inventory levels and cyclical changes in the world economy. Profitability in our industry is, however, also influenced by factors such as sales volume, the level of raw material, energy and other input costs, exchange rates, and operational efficiency.

The principal factors that have impacted our business during the financial periods presented in the following discussion and analysis and that are likely to continue to impact our business are:

- a) Cyclical nature of our industry and its impact on sales volume;

- b) Movement in market prices for our products;
- c) Sensitivity to currency movements;
- d) Movement in market prices for raw materials and other input costs of manufacturing; and
- e) Other significant factors impacting costs, including new acquisitions, restructuring and cost reduction initiatives.
- f) Our ability to maintain and continuously improve operational efficiencies and performance.

Because many of the factors are beyond our control and certain of these factors have historically been volatile, past performance will not necessarily be indicative of future performance and it is difficult to predict future performance with any degree of certainty.

Markets

The markets for our pulp and paper products are cyclical, with prices significantly affected by factors such as changes in industry capacity and output levels, customer inventory levels and cyclical changes in the world economy. The pulp and paper industry has often been characterised by periods of imbalances between supply and demand, causing prices to be volatile. Prices also vary significantly by geographic region and product. Coated fine paper, our core product used for many types of publications, is susceptible to the highly cyclical advertising market, a major driver in our business.

Coated Fine Paper

Paper demand from fiscal 2004 to fiscal 2006 remained positive as the upswing in world economic growth and resultant increase in advertising activities resulted in a significant increase in demand for coated fine papers. The increase in demand was particularly pronounced in Europe where coated fine paper demand remained buoyant with a growth rate of 7.3% during fiscal 2004 and 4.3% in fiscal 2005, despite a temporary retreating rate of economic growth during 2005. The temporary slump is evident as demand for coated fine paper during fiscal 2006 increased by only 1.4% compared to previous years. North American demand growth, which lagged that of Europe during 2005 (1.1%), improved during fiscal 2006 and reached 4.3%.

Increases in industry capacity in Europe and North America were limited during this period, with companies reluctant to undertake major new capital projects in these regions due to the large amount of excess capacity already present. Despite global overcapacity, high Asian demand growth rates and freely available funding led to significant coated fine paper capacity additions between fiscal 2000 and fiscal 2006 in Asia, particularly in China. This wave of expansion finished by the end of calendar 2005 and as of early December 2006, to the best of our knowledge, no new coated fine paper machines were under construction or in the final stages of planning anywhere in the world.

Despite increased demand, operating rates were low in fiscal 2002 through the first half of fiscal 2004 due to excess capacity, causing price erosion in both Europe and North America. Despite the weakening US\$ during this period, net imports into the United States continued to grow, putting further pressure on prices. Prices in North America, however, did start to improve in the latter half of fiscal 2004 due to a sharp increase in seasonal demand. These tight supply/demand conditions in North America continued into fiscal 2005, and more so in fiscal 2006 as inventory throughout the supply chain dropped, giving rise to further price increases. In total, North American apparent consumption grew by 4.3% in fiscal 2006, largely due to increased advertising pages and printer consumption of coated fine papers.

In Europe, demand for coated fine paper grew by 1.4% in fiscal 2006, a significant decline on the previous years' growth of 4.3%. Despite demand growth and sharp increases in input costs, our attempt to

increase prices in the European market in fiscal 2005 was unsuccessful due to intense competition for market share.

Input unit costs increased further in 2006, but the impact on operating cost per tonne sold was limited by the non-reoccurrence of impairment and restructuring charges and some operational performance improvements. The effect of this was a decrease in a decreased operating cost per tonne sold of US\$17 per metric tonne from US\$686 per metric tonne in fiscal 2005 to US\$669 per metric tonne in fiscal 2006.

Average selling prices realised for the Sappi Fine Paper businesses decreased by US\$21 per metric tonne, from US\$962 per metric tonne to US\$941 per metric tonne.

The graph below reflects apparent consumption. Apparent consumption is consumption as indicated by mill sales volumes, which ignores the impact of customer inventory. The sales volume to our customers is used as the indicator of demand, with the difference between apparent and real demand being the movement in inventories.

US vs. European Apparent Consumption of Coated Paper

Pulp

Pulp prices tend to display higher volatility than paper prices. In recent years the price of the benchmark pulp grade, Northern Bleached Softwood Kraft (NBSK), has ranged from a low of US\$395 (Nov-1993) to a high of US\$925 (Sept-1995) per metric tonne.

Throughout fiscal 2004 and fiscal 2005, global demand for pulp was low in comparison to fiscal 2006 and price fluctuations were driven primarily by currency changes, inventory movement and non-integrated paper capacity expansion.

High pulp demand during fiscal 2006 resulted in the continued increase of pulp prices, trading at the end of fiscal 2006 (NBSK: US\$712 per metric tonne) at US\$128 per metric tonne higher than at the end of fiscal 2005 (NBSK: US\$583 per metric tonne). The pulp demand during the latter part of fiscal 2006 remained high with none of the usual seasonal lulls experienced. As a result inventory levels declined considerably to levels last seen during 2000.

The traditional softwood pulp price premium to hardwood was disrupted in fiscal 2005 as a result of pulp mills shifting from hardwood to softwood production, and hardwood pulp mills closing temporarily. This led to hardwood pulp prices exceeding that of softwood in the final quarter of fiscal 2005. However, during October 2005 softwood price premiums were restored as some softwood mills closed in Eastern Canada, while hardwood supply increased during the latter part of fiscal 2005 as an additional 1.9 million

metric tonnes came on stream with large expansions at Hainan Island in China and Veracel in Brazil. As a result, the softwood pulp price premium to hardwood increased considerably during fiscal 2006.

Since Sappi sells roughly as much pulp as is purchased, fluctuations in market pulp prices have a negligible direct impact on the Group's overall profitability. At a divisional level, pulp prices do, however, affect profitability since Sappi Fine Paper Europe is a net buyer of hardwood pulp and Sappi Forest Products is a net seller of hardwood pulp.

The price of NBSK and NBHK pulp is depicted in the following chart:

Northern Bleached Softwood and Hardwood Kraft Pulp

January 2000 - November 2006

Source: PIX

Chemical cellulose accounts for the majority of Sappi's third party pulp sales. The chemical cellulose we produce, at our Saiccor operation in Southern Africa (Saiccor), is used principally as an input in the production of various synthetic textiles and acetate flake used in the manufacturing of acetate tow for cigarette filter tips.

The movement in price of certain chemical cellulose grades is linked to the price of NBSK. Higher technical specifications allow chemical cellulose to typically trade at a premium to NBSK. BHK (Bleached Hardwood Kraft pulp) generally sells at a lower price than NBSK.

We diversified our range of chemical cellulose products and secured new agreements to supply customers in the acetate sector during fiscal 2003. We increased sales significantly in this sector in fiscal 2004 and continued to achieve growth in volumes and prices in each of fiscal 2005 and 2006. Also, a significant competitive source of supply was recently removed from the industry when Weyerhaeuser closed its 140,000 tonne per annum Cosmopolis plant in September 2006. The full impact of this closure will only be felt as from fiscal 2007.

Demand from all of the market segments in which Saiccor is active was strong throughout fiscal 2004 with prices also increasing steadily, but showing some weakness towards the end of fiscal 2004. Saiccor's capacity during fiscal 2005 continued to be fully booked with overall demand steady, despite a general fall off in the demand for Saiccor's chemical cellulose from China during that year. In line with the movement in the NBSK prices, Saiccor prices increased in the early part of fiscal 2005, but this trend was reversed later in the year. In fiscal 2006 our chemical cellulose business, which is 100% export-based, continued to be fully booked. We maintained a strong market position in the key Viscose Staple Fibre segment but also posted record sales of higher alpha products, which are primarily sold into the acetate tow segment.

Following the successful completion of an environmental impact assessment, a project to expand the mill's annual capacity by more than 200,000 metric tonnes commenced during the latter part of fiscal 2006.

Currency Fluctuations

The principal currencies in which our subsidiaries conduct business are the US\$, Euro and ZAR. Although our reporting currency is the US\$, a significant portion of our sales and purchases are made in currencies other than the US\$. In Europe and North America, sales and expenses are generally denominated in Euro and US\$, respectively; however, pulp purchases in Europe are primarily denominated in US\$. In Southern Africa, costs incurred are generally denominated in ZAR, as are local sales. Exports from our Southern African businesses to other regions, which represent approximately 45% of sales in fiscal 2006, are denominated primarily in US\$.

We made sales in a range of foreign currencies in fiscal 2006 and fiscal 2005 as follows:

(Percentage of Sales)	2006	2005
US\$	45.8	44.8
Euro	30.3	30.5
ZAR	15.6	15.7
Other	8.3	9.0
Total	100	100

The appreciation of the ZAR or the Euro against the US\$ tends to diminish the value of exports from Southern Africa and Europe in local currencies, while depreciation of these currencies against the US\$ will have the opposite impact. Since expenses are generally denominated in local currencies, the depreciation of the US\$ has a negative effect on gross margins on exports and such domestic sales, which are priced relative to international US\$ prices. The appreciation of the US\$ has the opposite impact. European importers of pulp denominated in US\$ have experienced cost increases, in terms of local currency, due to a weakening of the Euro against the US\$. Our consolidated financial position, results of operation and cash flows may be materially affected by movements in the exchange rate between the US\$ and the respective local currencies to which our subsidiaries are exposed. The principal currencies in which our subsidiaries conduct business that are subject to the risks described in this paragraph are the Euro and ZAR. The following table depicts the average and year end exchange rates for the ZAR and Euro against the US\$ used in the preparation of our financial statements in fiscal 2006 and fiscal 2005:

	2006	2005
Average Exchange Rate(1)		
ZAR(2)	6.6039	6.2418
Euro(2)	1.2315	1.2659
Year end Exchange Rate(1)		
ZAR(2)	7.7738	6.3656
Euro(2)	1.2672	1.2030

(1) Source: audited Group annual financial statements of Sappi Limited.

(2) US\$1 = ZAR, Euro 1 = US\$.

The Euro declined to approximately US\$1.20 per Euro at the end of fiscal 2005. It reached a high of US\$1.17 at the end of November 2005, a low of US\$1.28 at the end of June 2006 and closed fiscal 2006 at US\$1.27. The ZAR strengthened to a level of approximately R5.59 per US\$ on December 27, 2004, but weakened again to R6.91 per US\$ on June 6, 2005. The ZAR was trading at approximately R6.37 per US\$ at the end of fiscal 2005. During fiscal 2006 the ZAR weakened to US\$6.71 at the end of October 2005 before strengthening to US\$6.00 at the end of April 2006. Thereafter it again weakened to end the year at US\$7.77, with an average of US\$6.60 for fiscal 2006. The profitability of certain of our Southern African operations are directly dependent on the ZAR proceeds of the US\$ exports. Furthermore, prices in the local market are also influenced by import parity competitive pricing. If the ZAR remains at the year end levels, import parity pricing pressure on margins will be reduced and at the same time the margin, in local currency, on US\$ denominated exports will increase. The following graph depicts currency movements for the ZAR and Euro against the US\$:

Euro and ZAR Exchange Rate Movement against USD

Daily Close January 1999 to November 2006

US\$1 = ZAR, Euro 1 = US\$.

Raw Material and Other Input Costs of Manufacturing

Our business is sensitive to fluctuations in market prices of raw materials used in the manufacture of our products. These comprise mainly purchased materials, (such as wood and caustic soda), pulp, energy and chemicals (including calcium carbonate and latex). Total raw material costs (excluding pulp purchases) of approximately US\$1,501 million in fiscal 2006, increased by US\$91 million (3.7%) from fiscal 2005. Raw material costs were made up as follows:

	2006	%	2005	%	Variance	%	Variance Analysis			Total	Price
	US\$ million		US\$ million		US\$ million		Additional	Price	Volume		Increase
							Week 2005		and Mix		%
Raw Material Costs											
Wood	410	16.3	416	17.1	(6)	(1.5)	8	32	(46)	(6)	8
Energy	433	17.2	365	15.0	68	18.8	7	83	(22)	68	23
Chemicals	658	26.1	653	26.9	5	0.8	12	(0)	(7)	5	(0)
Pulp	563	22.4	514	21.2	49	9.6	10	38	1	49	7
Other	452	18.0	479	19.7	(27)	(5.6)	9		(36)	(27)	
Total Raw Materials	2,516	100	2,426	100	89	3.7	46	153	(110)	89	6

During fiscal 2006 we experienced significant increases in the cost of wood (8%), energy (23%) and pulp (7%). Our energy and chemical raw material costs, especially coating chemicals, are driven to a large extent by oil prices. The average cost of Brent Crude Oil increased on average by 23.1% during fiscal 2006, to US\$64 per barrel, from US\$52 per barrel during fiscal 2005. The cost of our raw materials, on a constant US\$ per metric tonne basis in fiscal 2006, increased by 7.7% (US\$25 per metric tonne) over fiscal 2005.

Sappi Fine Paper Europe's materials, energy and chemical costs increased by US\$64 million in fiscal 2006. An analysis of raw material costs is as follows:

	2006	%	2005	%	Variance	%	Variance Analysis			Total	Price
	US\$ million		US\$ million		US\$ million		Additional	Price	Volume		Increase
							Week 2005		and Mix		%
Raw Material Costs											
Wood	123	10.0	112	9.6	11	10.0	2	15	(6)	11	14
Energy	197	16.0	151	12.9	46	30.4	3	52	(9)	46	34
Chemicals	375	30.4	387	33.1	(13)	(3.2)	7	(6)	(14)	(13)	(2)
Pulp	377	30.6	353	30.2	24	6.9	7	31	(14)	24	9
Other	160	13.0	165	14.2	(6)	(3.4)	3		(9)	(6)	
Total Raw Materials	1,232	100	1,168	100	64	5.5	22	92	(51)	64	8

	2006	2005	Variance	%
US\$/ metric tonne	503	481	21	4.4
Euro / metric tonne	408	380	28	7.4

The exchange rate impact on raw material costs was US\$32 million positive. Average raw materials costs in Euro per metric tonne increased 7.4% to Euro 408 per metric tonne in fiscal 2006, compared to fiscal 2005 (Euro380 per metric tonne). In US\$ per metric tonne costs increased 4.4% to US\$503 per metric tonne. Energy cost increases contributed 4% US\$21 per metric tonne, wood costs 1% US\$6 per metric tonne and pulp 3% US\$13 per metric tonne to cost increases.

Edgar Filing: SAPPI LTD - Form 20-F

Sappi Fine Paper North America's materials, energy and chemical costs increased US\$43 million in fiscal 2006. An analysis of raw material costs is as follows:

	2006	%	2005	%	Variance	%	Variance Analysis		Volume	Total	Price
	US\$ million		US\$ million		US\$ million		Additional	Price	and Mix		Increase
							Week 2005				%
Raw Material Costs											
Wood	184	22.3	186	23.8	(2)	(1.0)	4	6	(12)	(2)	3
Energy	135	16.3	119	15.2	16	13.8	2	24	(10)	16	20
Chemicals	192	23.2	190	24.3	2	1.2	4	2	(3)	2	1
Pulp	122	14.8	92	11.7	30	32.7	2	6	22	30	6
Other	193	23.4	196	25.0	(3)	(1.6)	4		(7)	(3)	
Total Raw Materials	826	100	783	100	43	5.4	16	38	(10)	43	5

	2006	2005	Variance	%
US\$/ metric tonne	579	546	33	6.0

Average raw material costs in US\$ per metric ton increased by 6.0% to US\$579 per metric tonne in fiscal 2006. Energy cost increases contributed US\$17 (3%) per metric tonne and wood costs US\$4 (1%) per metric tonne to cost increases.

Sappi Fine Paper South Africa showed no significant overall cost variations year on year. An analysis of raw material costs is as follows:

	2006	%	2005	%	Variance	%	Variance Analysis		Volume	Total	Price
	US\$ million		US\$ million		US\$ million		Additional	Price	and Mix		Increase
							Week 2005				%
Raw Material Costs											
Wood											
Energy	22	11.7	23	12.6	(1)	(3.2)	0	1	(1)	(1)	2
Chemicals	41	21.4	40	21.5	1	3.5	1	(1)	1	1	(2)
Pulp	63	33.0	67	36.4	(4)	(6.0)	1	1	(6)	(4)	2
Other	65	33.9	54	29.5	11	19.4	1		10	11	
Total Raw Materials	191	100	184	100	7	3.9	3	1	3	7	0

	2006	2005	Variance	%
US\$/ metric tonne	583	581	2	0.4
ZAR / metric tonne	3,852	3,627	225	6.2

The exchange rate impact on raw material costs was to reduce reported costs by US\$10 million. The average raw material costs in ZAR increased 6.2% to ZAR3, 852 per metric tonne.

Forest Products material costs increased US\$6 million in fiscal 2006. An analysis of raw material costs is as follows:

	2006	%	2005	%	Variance	%	Variance Analysis		Volume	Total	Price
	US\$ million		US\$ million		US\$ million		Additional	Price	and Mix		Increase
							Week 2005				%

Edgar Filing: SAPPI LTD - Form 20-F

US\$/ metric tonne	92	82	10	12.3
ZAR / metric tonne	608	512	96	18.8

49

The exchange rate impact on raw material costs was to reduce reported costs by US\$15 million. The average raw material costs in ZAR increased 18.8% to ZAR608 per metric tonne. In US\$ per metric tonne material costs increased 12.3% to US\$92 per metric tonne.

Restructuring

We announced the restructuring and impairment of our North American Muskegon mill during the third quarter of fiscal 2005, to eliminate high cost capacity and to position the mill as a high quality, low cost mill. This is part of our ongoing plan to achieve acceptable returns in our North American operations. We recorded impairment charges of US\$183 million in the third and fourth quarters of fiscal 2005. We closed PM4, which had an annual capacity of 105,000 metric tonnes of coated fine paper and closed and mothballed the pulp mill, which had an annual capacity of 110,000 metric tonnes of bleached chemical pulp. We also restructured our North American regional overhead structure to reduce Selling, General and Administrative expenses (SG&A), and in the fourth quarter of fiscal 2005 we recorded a restructuring charge of approximately US\$21 million, mainly in respect of manpower reduction. The combined effect of the Muskegon restructuring and the restructuring of the regional SG&A function was expected to result in a reduction of approximately 420 people or 14% of our North American headcount, a pre-tax benefit of approximately US\$50 million compared to fiscal 2005. During fiscal 2006 we continued with the implementation of the restructuring plan. The reduction in headcount has been revised to 377 people. At the end of fiscal 2006 headcount had been reduced by 353 people.

During the first quarter of fiscal 2005 we announced the impairment of our Usutu mill. The Usutu mill is an unbleached kraft pulp mill and forms part of the Sappi Forest Products reporting segment. Due to continued losses, an impairment review was conducted which led to the recognition of impairment charges during fiscal 2005 of US\$50 million to meet the requirements of Accounting Standard IAS36 Impairment of Assets. A detailed discussion of this impairment is contained in the section Mill Closures, Acquisitions, Dispositions and Impairment; and Joint Venture , elsewhere in this Operating and Financial Review and Prospects. As a result of improved pulp prices a weakening of the ZAR against the US\$ and improved operational performances the Usutu mill, has seen an improved performance to a level where impairment was reversed under IFRS, in terms of IAS 36. This resulted in a write back of the impairment provision in fiscal 2006 of US\$40 million.

A major cost reduction and restructuring project was undertaken in Europe, during fiscal 2006, which will result in a head count reduction of approximately 650 employees mainly throughout 2007. This project resulted in a restructuring charge of US\$47 million in 2006.

For further information see note 23 to our Group annual financial statements included elsewhere in this Annual Report.

South African Economic and Political Environment

South Africa features a highly developed sophisticated first world infrastructure at the core of its economy. The South African economy is expected to grow at approximately 4.7% in calendar 2007. South Africa's long-term foreign currency investment ratings have remained constant over the last year at Baa1 from Moody's Investor Services Inc. and BBB+ from Standard & Poor's Rating Service (S&P). While exchange controls have been relaxed in recent years and are continuing to be relaxed, South African companies remain subject to restrictions on their ability to raise and deploy capital outside of the Southern African Common Monetary Area (See Liquidity and Capital Resources Financing).

South Africa celebrated 12 years of democracy in calendar 2006; however the country continues to face challenges in overcoming substantial differences in levels of economic and social development among its people. Access to land, poverty, unemployment, crime and a growing prevalence of HIV/AIDS are some of the social and economic factors that affect businesses operating in this country.

The Restitution of Land Rights Act (Act 22 of 1994), as amended, provides for the restoration of rights in land or other equitable redress to persons or communities dispossessed of their land rights after June 19, 1913 as a result of old laws or practices discriminating on the basis of race. The legislation empowers the Minister of Land Affairs to expropriate land in order to restore it to a successful claimant provided that there is just and equitable compensation to the owner of the land. Claims under the Act were required to be filed on or before December 31, 1998 and are presently being processed by the Commission on Restitution of Land Rights and adjudicated upon by the Land Court. This process is expected to continue for many years. As one of the largest land owners in South Africa, we anticipate that a substantial number of claims may affect land we own. The process of determining the extent of claims filed in respect of our land and the potential impact of these claims on our South African operations continues. To date, we have been notified of twenty-four formal Land Claims made in respect of portions of Sappi plantations in the Mpumalanga area, and twenty-eight others made in respect of portions of Sappi plantations in KwaZulu Natal. These claims have not been finalized and are still under investigation by the Regional Land Claims Commissioner.

The southern African region has one of the highest infection rates of HIV/AIDS in the world. In 1992, Sappi started a programme to address the effects of HIV/AIDS and its impact on our employees and our business. Our aim is to ensure that our programme prevents new infections and to treat the HIV positive employees. Each operating unit has an elected HIV/AIDS committee and a workplace HIV/AIDS prevention programme which are adapted to suit the needs of each particular business unit and to ensure that they are active owners and managers of their programmes. Each Sappi operation in southern Africa has also identified the relevant role players in their geographical area and is working with them on the implementation of a comprehensive HIV/AIDS programme, eliminating duplication and making optimum use of relevant resources.

Following an initial anonymous, voluntary prevalence test in 2003, a second comprehensive voluntary study was conducted in 2006 in all of our southern African operations. Based on a participation rate of greater than 80%, at the locations tested, we estimate that the overall infection rate in our southern African operations is approximately 14%. With the information of the prevalence testing and the Knowledge, Attitude and Practices study (KAP) we planned a comprehensive programme for 2007. We are planning interventions to focus on the stigma surrounding HIV and on wellness and healthy living.

Our HIV/AIDS response strategy places special emphasis on testing and counselling to ensure the staff knows their HIV status to enable them to make informed decisions as to their life choices. Since August 2002, our medical care for employees has included treatment to prevent mother to child transmission. Anti-retroviral treatment has been offered to HIV-infected permanent employees from the beginning of 2003. We estimate that 40% of HIV positive employees participate in our HIV/AIDS management programme, which is an improvement on the prior year's participation rate. To ensure that our programme remains current, we became a member of the Global Business Coalition (GBC) on HIV/AIDS in 2005, a global partnership focused on developing an integrated strategy for dealing with the disease.

The government and organised business have taken a number of steps in recent years to increase the participation of black people in the South African economy. To this end, the Employment Equity Act (No 55 of 1998), the Skills Development Act (No 97 of 1998) and the Preferential Procurement Policy Framework Act (No 5 of 2000) were promulgated. More recently, the Broad-Based Black Economic Empowerment Act (No. 53 of 2003) has formalised the country's approach to distributing skills, employment and wealth more equitably between races and genders. Broad-Based Black Economic Empowerment (BBBEE) focuses on increasing equity in ownership, management and control of businesses, and improving Black representation in all levels of employment. It also promotes the development of skills within a business, the nurturing of Black entrepreneurship through preferential procurement and enterprise development, and the uplifting of communities through social investment.

Our South African businesses have formulated a BBBEE scorecard, based on guidelines set out by the Codes of Good Practice from the government Department of Trade and Industry. The scorecard set out in the following table was verified by Empowerdex, a leading BBBEE rating agent and reflects our significant achievements in the categories of empowerment, equity, skills development, preferential procurement, enterprise development and social development. The decline from a rating of C to D in the employment equity category results from the application of our new 5 year empowerment plan within which White females are excluded for the purposes of economic empowerment reporting. This has resulted in significantly more challenging targets as the benchmark. White females are however included in employment equity statistics for all other statutory equity reporting requirements. The shortage of experience and developed skills continues to pose challenges in meeting targets at the higher levels in our operations, contributing to the current employment equity rating. In general, targets for improvement in the various categories in the scorecard are set to be achieved by 2015.

Sappi's rating

	2006	2005
BBBEE factor status*		
Overall Rating	BBB	BB
Equity in ownership	E	E
Equity in management	D	D
Employment equity	D	C
Skills development	A	B
Preferential procurement	B	C
Enterprise development	A	B
Social development	A	A

* A is the highest score.

The shares of Sappi are widely held by South African and international investors. The company does not currently intend to undertake an empowerment transaction in respect of these shares. We will consider and are pursuing empowerment transactions related to specific southern African assets or business units where they add to the value of our business and meet our empowerment criteria.

The representation of Black people, particularly Black women, in management and all levels of employment within the company is a focus within the organisation, driven by employment equity targets set in each occupational category. Skills development initiatives, particularly programmes aimed at improving management and leadership skills, are geared to meet these targets. Where practical, Sappi purchases goods and services from Black-owned businesses and seeks opportunities to develop future Black vendors. Sappi is committed to the support of its Project Grow initiative through financial and technical input, as well as by providing a secure market during the start-up phase of these small tree farming enterprises. This initiative has been extended to encourage aspirant tree farmers who wish to undertake forestry activities on a larger scale. We have a number of enterprise development initiatives and have established programmes to train new entrepreneurs. These initiatives involve the transfer of business skills, technical assistance, financial support and preferential payment terms to assist new enterprises to enter the market. Sappi has a history of investment in the communities in which it operates. Initiatives to promote education, health and welfare, arts and culture, and rural and community development, amongst others, are regularly undertaken.

The South African constitution guarantees ownership rights of assets, and it is the stated intent of the Bill that transfer of ownership will occur at market prices. It should be noted that BBBEE equity participation need not necessarily occur at the corporate level, and can be effected at divisional, business

unit or lower levels. Because the BBBEE Bill sets forth a framework for plans rather than specific requirements or goals, it is not possible to predict whether or how our business or assets may be impacted.

For further information, see Item 4 Information on History and Development of the Company

Inflation and Interest Rates

The following table sets forth South African inflation for fiscal 2006 and fiscal 2005:

	2006	2005
Inflation(1)	5.4 %	4.4 %

(1) South African Consumer Price Index (CPI). The CPI is for the Sappi fiscal years.

South African prime overdraft interest rates continued to decline in 2005 to reach a new low of 10.5% in April 2005. The rates remained at these levels until April 2006 when they increased to 11%. They increased in August 2006 to 11.5%. The ZAR strengthened to ZAR 5.61 against the US\$ on 31 December 2004 and started fiscal 2006 at ZAR 6.34 on 3 October 2005. Partly due to the stronger ZAR during fiscal 2005 and fiscal 2004, the South African inflation rate decreased significantly to 1.3% at the end of fiscal 2004, but increased to 4.4% as at the end of fiscal 2005 and 5.4% at the end of fiscal 2006, within the target range of 3-6% as set by the South African Reserve Bank (the SARB). This increase is largely the effect of the impact of higher oil prices on the South African economy. The SARB reduced its repurchase rate to 7.0% in April 2005. In June 2006 it increased to 7.5% and to 8% in August 2006. The rate at the end of fiscal 2006 was 8%. The repurchase rate is the rate at which the SARB lends assistance to the banking sector and therefore represents the cost of credit to the banking sector. When the repurchase rate is changed, the interest rates on overdrafts and other loans extended by the banks also change. In this way the SARB indirectly affects interest rates in the economy. Although South African interest rates impact the cost of our South African borrowings, the majority of our borrowings have been incurred by subsidiaries outside southern Africa, denominated in either US\$ or Euro.

In the US and Europe inflation rates were relatively stable in recent years, and accordingly had a lesser impact on our North American and European businesses. The three-month LIBOR interest rate for the US\$ reached 6.8%, in May 2000 and remained unchanged through to the end of fiscal 2000. Fiscal 2001 saw a period of significant rate reductions to 2.6% at the end of fiscal 2001. The rate reduced further to 1.14% at the end of fiscal 2003. Since then it increased to 1.96% by the end of fiscal 2004 and increased further to 4.06% by the end of fiscal 2005. On 28 September, 2006 it was 4.37%.

The three-month EURIBOR interest rate in Europe decreased sharply from 4.9% at the end of fiscal 2000 and was 2.13% at the end of fiscal 2003 and 2.12% at the end of fiscal 2004. It increased slightly to 2.17% at the end of fiscal 2005 and on 28 September 2006 it was 3.38%. The relatively low interest rates in the United States and Europe continue to represent a significant interest rate differential when compared to South Africa's 8.0% repurchase rate as determined by the SARB, and could result in further short-term strengthening of the ZAR.

We borrow in the currencies of the countries in which we invest. As a result, finance costs are related to the location of our activities and not our domicile.

Our foreign exchange policy consists of the following principal elements:

- External borrowings are taken up in the functional currency of the operating company concerned and, if not, then the exposure is hedged. Where appropriate we aim, in accordance with IFRS, to apply hedge accounting treatment to avoid volatility in our results due to mark-to-market effects of such hedging instruments.

- Any debtors or creditors not in the operating currency of the mill are hedged. Sales are hedged from the time of invoicing, purchases from the time of capex approval in the case of capex, and all other purchases are hedged in most instances at the time the order is placed.
- These exposures are hedged through our central treasury, where external hedging instruments are contracted after netting the various exposures.
- Variations in this policy are considered from time to time, but any deviations from the central treasury policy are always subject to prior board approval.
- No speculative positions are permitted.

Translation risks are not hedged. As a general rule we manage our relative debt and equity ratios by financing our investments in different currencies with similar debt to asset ratios.

External dollar borrowings for our North American operations (with the exception of US\$107 million public long-term bonds) were replaced during fiscal 2002 by inter-group financing from Sappi Papier Holding GmbH (SPH), our European holding company. Accordingly, there is a larger proportion of external borrowings in our European operations when compared to the position before fiscal 2002. We have a current policy of not hedging translation risks. Our South African and European operations use the South African ZAR and the Euro as their respective functional currencies. Any translation of the value of these operations into US\$ results in foreign exchange translation differences as the ZAR and the Euro exchange rates move against the US\$. These changes are booked to the foreign currency translation reserve account. We prefer not to hedge this exposure with financial instruments, as these result in cash settlements which impact our results on a permanent basis. Borrowings taken up in a currency other than the functional currency of the borrowing entity are specifically hedged with financial instruments, such as currency swaps and forward exchange contracts. With regard to interest rate swaps, hedge accounting is permitted when the hedging relationship between the hedge and the underlying debt meets the requirements of the relevant IFRS. For example, on our public bonds we have fixed to variable swaps. The terms of the swaps match the terms of the bonds exactly in respect of interest settlements and capital repayments etc. With regard to maturity, the 10-year bond is hedged to full maturity, the 30-year bond for the first ten years. If the relationship between the hedge and the debt is not matched, hedge accounting cannot be applied. We only enter interest rate swaps when hedge accounting can be applied or any volatility due to the mark-to-market movements of the swaps to the income statement avoided. For a description of hedge accounting with regard to interest rate swaps in accordance with United States GAAP, see note 35 to our Group annual financial statements included elsewhere in this Annual Report. For a description of our interest and exchange rate risks, see note 31 to our Group annual financial statements included elsewhere in this Annual Report.

Financial Condition and Results of Operations

Our operations are organised into two business units:

- I. *Sappi Fine Paper, which consists of Sappi Fine Paper North America, Sappi Fine Paper Europe and Sappi Fine Paper South Africa; and*
- II. *Sappi Forest Products, which consists of Sappi Kraft, Sappi Saiccor and Sappi Forests.*

Edgar Filing: SAPPI LTD - Form 20-F

The following table sets forth sales and operating profit for Sappi, Sappi Fine Paper by region, and Sappi Forest Products, in US\$, and as a percentage of sales for fiscal 2006 and fiscal 2005. Operating profit percentages are expressed as a percentage of sales of the applicable business unit.

	2006	%	2005	%
	Amount (US\$ millions)	of Sales	Amount	of Sales
Sales:				
Sappi Fine Paper				
Sappi Fine Paper North America	1,439	29.1	1,458	29.1
Sappi Fine Paper Europe	2,194	44.4	2,239	44.6
Sappi Fine Paper South Africa	325	6.6	323	6.4
Total	3 958	80.1	4,020	80.1

Group Operating Profit (Loss)	125	2.5	(109)	(2.2)

Our 2006 financial year included 52 accounting weeks, compared to 53 accounting weeks last year. Our financial years operate on a 52 accounting week cycle, except every 6th year which includes an additional accounting week (additional accounting week). The impact of the additional accounting week, based on the average of 53 accounting weeks, (average sales) for example, accounted for a sales volume decrease of 141,000 tons and US\$95 million decrease in total sales.

Group volumes sold in fiscal 2006 decreased by 280,000 metric tonnes (3.7%). Consolidated group sales decreased by US\$77 million (1.5%) over fiscal 2005. The additional accounting week in fiscal 2005 accounted for additional sales volume of approximately 141,000 metric tonnes. The decrease was attributable to, the one less accounting week and decreased timber and timber product volumes of 217 000 tonnes, partly offset by volume growth in other pulp and paper volumes. The additional accounting week in fiscal 2005 contributed additional sales of US\$95 million.

The impact of the additional accounting week on expenses in fiscal 2005 was US\$97 million, based on the average weekly expenses of the 53 accounting weeks, or average expenses .

A more detailed discussion and explanation of the material factors that affect our results of operations described below, is contained in the sections Markets , Principal Factors Impacting our Results , Currency Fluctuations , Raw Material and Other Input Costs of Manufacturing , Restructuring , Inflation and Interest Rates and Mill Closures, Acquisitions, Dispositions and Impairment; and Joint Venture , elsewhere in this Operating and Financial Review and Prospects. These factors include market fluctuations, exchange rates, taxation, net finance costs, impairment costs and significant cost factors, including raw material and other input costs of manufacturing as well as restructuring and cost reduction initiatives.

Year Ended September 2006 Compared to Year Ended September 2005

North American coated fine paper apparent demand growth was significantly better in fiscal 2006 in comparison to fiscal 2005. Demand for coated woodfree paper grades grew 4.3% in comparison to 1% growth in fiscal 2005. Sappi Fine Paper North America's average price realised decreased by 0.6% to US\$1,009 per metric tonne in fiscal 2006, mainly due to competitive import price pressure and mix. In Europe, demand for coated woodfree paper grew by 7.3% in fiscal 2006, compared to growth of 4.3% in fiscal 2005. Despite sharp input costs increases and significant temporary capacity closures during fiscal 2005, prices in Europe were flat.

Due to weak market conditions in fiscal 2005 and 2006 and to contain rising costs, the company continued its restructuring initiatives as described in the *Company and Business Overview* section. This gave rise to a US\$47 million restructuring charge at Sappi Fine Paper Europe.

The translation of our annual results, from local currencies to US\$ for reporting purposes, tends to distort comparisons between financial periods when currencies are volatile. During 2006 the US\$ strengthened by 2.7% on average against the Euro, and by 5.8% on average against the South African Rand (ZAR). For example, as a result of the strengthening of the average US\$ rate against the Euro and the ZAR during 2006, a 1.1% decrease in average selling price realised in Euro translates to a 3.8% decrease in US\$, and a 12.4% increase in average selling price realised in ZAR translates to a 5.9% increase in US\$. We refer to this as the currency translation effect in the following discussion of our financial condition and results of operations.

Sales

Sales represent the net sales value of all products sold to outside parties. For a full description see our revenue recognition policy in note 2 of our Group annual financial statements included elsewhere in this Annual Report.

Sappi Group:

	Fiscal 2006	2005	Variance Value	%
	Tonnes 000			
Sales Volume				
Sales Volume	7,199	7,479	(280)	(3.7)
Impact of Additional Accounting Week		141	(141)	
	US\$ Millions			
Sales Value				
Sales Value	4,941	5,018	(77)	(1.5)
Impact of Additional Accounting Week		95	(95)	

The total volume of product (including pulp) sold by the Group in fiscal 2006 decreased by 280,000 metric tonnes from fiscal 2005. The impact of additional accounting week in fiscal 2005 was 141,000 metric tonnes. Sales volumes in fiscal 2006 were impacted by a reduction in timber and timber product volumes of 212,000 metric tonnes, partly offset by a 72,000 metric tonne volume growth in other core pulp and paper volumes, and the impact of the additional accounting week in fiscal 2005. The increase of 72,000 metric tonnes in volume of products sold consisted of increased volume sold for Sappi Fine Paper Europe (69,000 metric tonnes), Sappi Fine Paper North America (20,000 metric tonnes) and Sappi Fine Paper South Africa (17,000 metric tonnes), partly offset by reduced volumes sold at Forest Products (34,000 metric tonnes), excluding the impact of the additional accounting week in fiscal 2005.

Edgar Filing: SAPPI LTD - Form 20-F

Consolidated sales decreased by US\$77 million to US\$4,941 million in 2006 from US\$5,018 million in 2005 (1.5%). The impact of additional volume sold, due to the additional accounting week in 2005, was US\$95 million, based on average weekly sales. The US\$77 million decrease is primarily due to a currency translation effect of US\$133 million and lower volumes sold of US\$39 million, partly offset by higher selling prices of US\$95 million. The sales of our Fine Paper division decreased by US\$62 million and Forest Products by US\$15 million. The total volume of products sold, in metric tons, in 2006 decreased by 0.3 million tons to 7.2 million tons. Volumes sold increased for Sappi Fine Paper (27,000 metric tonnes), despite 79,000 metric tonnes of additional volume in fiscal 2005 due to the additional accounting week, and decreased for Forest Products (307,000 metric tonnes), with 62,000 metric tonnes attributable to the additional accounting week in fiscal 2005. The increase in volumes for Fine Paper was largely at our European operations (23,000 metric tonnes), while the decrease for Forest Products is primarily due to lower volumes of timber products (212,000 metric tonnes) and paper pulp (95,000 metric tonnes).

An analysis by business unit is as follows:

Sappi Fine Paper:

	Fiscal 2006	2005	Variance Value	%
	Tonnes 000			
Sales Volume				
Sales Volume	4,204	4,177	27	0.7
Impact of Additional Accounting Week		79	(79)	
	US\$ Millions			
Sales Value				
Sales Value	3,958	4,020	(62)	(1.5)
Impact of Additional Accounting Week		76	(76)	

The total volume sold by Sappi Fine Paper (including pulp) in 2006 increased by 27,000 (0.7%) metric tonnes to 4.2 million metric tonnes, even taking into account the impact of the additional accounting week in 2005 of 79,000 metric tonnes additional volume, based on average weekly sales. For Sappi Fine Paper North America, volumes sold decreased by 7,000 metric tonnes (0.5%), to 1.4 million metric tonnes, the impact of the additional accounting week in 2005 was 27,000 metric tonnes, based on average sales. Industry demand for coated fine paper in North America increased at an annualised rate of 4.3% in fiscal 2006. Sappi Fine Paper North America saw a decline in market share due mainly to increased imports. Sappi Fine Paper Europe's volumes increased by 23,000 metric tonnes to 2.5 million tons (1.0%), compared with industry-wide coated fine paper growth of 7.3% for 2006, compared to 1.6% in 2005. The impact of the additional accounting week in fiscal 2005 was 46,000 metric tonnes, based on average sales. The market share lost in Europe in the second and third quarters of fiscal 2005 was regained by Sappi Fine Paper Europe in the last fiscal quarter of fiscal 2005. Sappi Fine Paper South Africa maintained market share in 2006 with volumes flat at 0.3 million tons.

Total sales for Sappi Fine Paper (including pulp) decreased by only US\$62 million (1.5%) to US\$3,958 million in fiscal 2006 despite the impact of the additional accounting week in fiscal 2005 of US\$76 million additional sales. The US\$62 million decrease is due primarily to the currency translation effect (US\$79 million) and lower average selling prices realised in local currencies (US\$7 million), partly offset by increased volume (US\$24 million). Average prices realised in US\$ terms in fiscal 2006 decreased by US\$21 per metric tonne (2.2%) to US\$941 per metric tonne, down from US\$962 per metric tonne in fiscal 2005.

Sales for Sappi Fine Paper North America decreased by US\$19 million (1.3%) to US\$1,439 million in fiscal 2006, based on average sales, the impact of the additional accounting week in fiscal 2005 was

Edgar Filing: SAPPI LTD - Form 20-F

US\$28 million. Decreased selling prices reduced sales by US\$12 million, and lower volumes contributed to a decrease of US\$7 million in sales. The decrease in volume was impacted by the additional accounting week in fiscal 2005. The average price realised decreased by 0.8% to US\$1,009 per metric tonne in fiscal 2006, from US\$1,017 per metric tonne in 2005.

Sales for Sappi Fine Paper Europe decreased by US\$45 million (2%) to US\$2,194 million in fiscal 2006. Based on average sales, the impact of the additional accounting week in fiscal 2005 was US\$42 million. The US\$45 million decrease is due to the currency translation effect (US\$61 million) and reduced selling prices in Euro terms (US\$5 million), partly offset by increased volume, (US\$21 million). The increase in volume was impacted by the additional accounting week in fiscal 2005. The increase in volume, excluding the impact of the additional accounting week in 2005, was mainly the effect of our improved market share as from the final quarter of fiscal 2005. Average prices realised in US\$ terms were US\$896 per metric tonne in fiscal 2006, US\$27 per metric tonne (2.9%) down from the US\$923 per metric tonne in fiscal 2005. In Euro terms average prices per metric tonne were 1.1% lower.

For Sappi Fine Paper South Africa, sales increased by US\$2 million (0.6%) to US\$325 million in fiscal 2006. Based on average sales, the impact of the additional accounting week in fiscal 2005 was US\$6 million additional sales in fiscal 2005. The increase is primarily attributable to higher average selling prices realised in ZAR terms (US\$9 million) and increased volumes (US\$11 million), being partly offset by the decrease due to currency translation effect (US\$18 million). The average price realised for fine paper products in South Africa in US\$ terms decreased by 2.8% to US\$991 per metric tonne in fiscal 2006 as a result of the currency translation effect, while in ZAR terms, the average price realised in fiscal 2006 increased by 2.9% as a result of reduced pressure from imports into South Africa and by the ZAR weakening against the US\$. The weakening of the currency also resulted in better margins in ZAR terms on export sales in fiscal 2006.

Sappi Forest Products:

	Fiscal 2006	2005	Variance Value	%
	Tonnes 000			
Sales Volume				
Pulp and Paper	1,470	1,565	(95)	(6.1)
Timber and Timber Products	1,525	1,737	(212)	(12.2)
Total Volume	2,995	3,302	(307)	(9.3)
Impact of Additional Accounting Week		62	(62)	
	US\$ Millions			
Sales Value				
Pulp and Paper	896	908	(12)	(1.3)
Timber and Timber Products	87	90	(3)	(3.3)
Total Value	983	998	(15)	(1.5)
Impact of Additional Accounting Week		19	(19)	

Total sales volumes, for Sappi Forest Products, decreased 9.3% to 3.0 million tons in 2006. The volume of timber sold decreased by 212,000 metric tonnes (12.2%) and the volume of paper pulp sold decreased by 27.6%, due to the additional accounting week in fiscal 2005 as well as operational performance issues in 2006, while chemical cellulose volumes were 3.5% higher, despite the additional accounting week in fiscal 2005. The impact of the additional accounting week in fiscal 2005 was 62,000 metric tonnes (US\$19 million), based on average sales. Sappi Forest Product s total sales decreased by US\$15 million (1.5%), to US\$983 million in fiscal 2006, from US\$998 million in fiscal 2005. This decrease is

attributable mainly to the currency effect (US\$55 million) and decreased volumes (US\$63 million), partly reduced by increased selling prices in ZAR terms and mix (US\$103 million). The average price for chemical cellulose increased by 3.0% in fiscal 2006, mainly due to higher international pulp prices. The higher average prices at Sappi Forest Products, are mainly attributable to improved product mix and higher international pulp prices in 2006. The product mix improvement mainly reflects the decrease in timber product sales (212,000 metric tonnes) and increase in chemical cellulose sales. Chemical cellulose sales increased 16.2% in fiscal 2005 of total Sappi Forest Products sales volume to 18.5% in fiscal 2006. Timber and timber product sales volume decreased from 52.6% in fiscal 2005 to 51.0% in fiscal 2006. In fiscal 2006 the average selling price of chemical cellulose was US\$692 per metric tonne and that of timber and timber products US\$56 per metric tonne. International pulp prices (NBSK: US\$583 per metric tonnes) were US\$128 per metric tonne higher than at the end of 2005, which benefited both chemical cellulose and paper pulp sales. Export sales margins in local currency, especially chemical cellulose sales which are all exported, benefited from the weakening of the ZAR against the US\$.

Operating Expenses

Group operating expenses (comprising cost of goods sold, SG&A expenses and other expenses) decreased by US\$311 million (6.1%) to US\$4,816 million in fiscal 2006. An analysis of group operating expenses is as follows:

	2006		2005		Variance	
	US\$ million	%	US\$ million	%	US\$ million	%
Total Operating Costs						
Delivery	441	9.2	451	8.8	(10)	(2.2)
Material Costs	2,516	52.2	2,426	47.3	91	3.7
Manufacturing Costs	1,428	29.7	1,602	31.2	(174)	(10.9)
Silvicultural Costs	43	0.9	45	0.9	4	10.3
SG&A	366	7.6	363	7.1	3	0.8
Inventory Revaluation			13	0.3	(13)	(100.0)
Impairment	9	0.2	229	4.5	(220)	(96.1)
Restructuring	43	0.9	22	0.4	21	95.5
Other	(30)	(0.7)	(24)	(0.5)	(13)	71.9
	4,816	100	5,127	100	(311)	(6.1)

Cost of goods sold decreased by US\$87 million, reflecting the positive impact of the US\$114 million currency effect and US\$74 million volume decrease impact being partly offset by the negative impact of US\$79 million raw material and energy cost increases and US\$22 million adverse fair value pricing adjustment. Major cost drivers during 2006 were price increases of wood (US\$32 million), energy (US\$83 million) and pulp (US\$38 million), partly offset by volume reductions. Selling, general and administrative expenses (SG&A) increased by US\$3 million. The impact of the additional accounting week in 2005 was an additional US\$85 million cost of goods sold and US\$7 million additional SG&A costs, based on the average weekly costs in fiscal 2005. We have been vigilant in controlling costs and offsetting cost increases where possible.

Group fixed costs for the year decreased US\$194 million (10%) compared to the previous year. The decrease in fixed costs was mainly due to the one less accounting week, decreased personnel costs (US\$93 million), decreased maintenance costs (US\$25 million) and decreased depreciation (US\$28 million). The impact of the additional accounting week in fiscal 2005, based on average weekly expense, was US\$37 million.

Other expenses decreased US\$229 million mainly due to the non-reoccurrence of fiscal 2005 impairment charges of US\$229 million, impairment charges in fiscal 2006 were US\$9 million. In 2006 the

benefit of the reversal of the Usutu Mill impairment (US\$40 million), in terms of IAS 36, was offset by restructuring charges in Europe (US\$40 million).

Operating expenses for Sappi Fine Paper North America decreased by US\$262 million, primarily as a result of decreased other expenses (US\$207 million) and partly as a result of decreased raw material costs (US\$32 million) for chemicals, energy and wood costs and decreased SG&A costs (US\$21 million). The reduction in other expenses relates mainly to a reduction in impairment and restructuring charges (US\$203 million) and SG&A costs decreased mainly due to a release of a pension fund provision (US\$18 million). The impact of the additional accounting week in fiscal 2005 was US\$32 million, based on average weekly costs.

Operating expenses for Sappi Fine Paper Europe increased US\$66 million (3.1%). The benefit of the currency translation (US\$53 million) and one less accounting week (US\$37 million) was offset by increased volumes (US\$18 million), raw material (US\$40 million) and energy (US\$52 million) cost increases and restructuring charges (US\$40 million). Raw material cost increases were due to timber (US\$15 million) and pulp (US\$32 million).

Operating expenses for Sappi Fine Paper South Africa remained flat in US\$, but increased 6.0% in ZAR. The currency translation benefit (US\$17 million) was offset by increased volumes (US\$10 million) and increased costs (US\$8 million).

Operating expenses for Sappi Forest Products decreased US\$107 million (11.7%) The benefit of the currency translation (US\$43 million), volume decrease (US\$95 million), decreased SG&A (US\$5 million) and decreased other expenses (US\$87 million) was partly offset by operating cost increases (US\$102 million) and fair value pricing adjustment (US\$22 million). Other expenses reduced mainly as a result of the Usutu mill impairment charge (US\$50 million) in fiscal 2005 being partially reversed in fiscal 2006 (US\$40 million).

SG&A, which is included in the group operating expenses discussed above, increased by US\$3 million (0.8%) to US\$366 million in 2006. SG&A costs were favourably impacted by sales of emission credits at Sappi Fine Paper Europe (US\$7 million), reversal of a Pension Fund Provision in Sappi Fine Paper North America (US\$18 million), the result of the currency effect (US\$16 million) and US\$6 million impact due to the extra accounting week in 2005, based on average weekly expenses.

Other expenses which are included in the group operating expenses described above represent all profit and expenditure relating to activities outside what is regarded as normal trading. Other expenses of US\$30 million in 2006 (US\$259 million in 2005) relates mainly to significantly lower asset impairment charges of US\$9 million (US\$229 million in 2005) and increased restructuring charges of US\$43 million (US\$22 million in 2005), partly offset by the reversal of a impairment of Usutu mill at Sappi Forest Products (US\$40 million). The US\$229 million asset impairment charges in 2005 related mainly to our North American Muskegon Mill (US\$183 million) and our Southern African Usutu Mill (US\$50 million). The restructuring charges of US\$43 million in 2006 relate mainly to a specific operating expense reduction and efficiency improvement project in Sappi Fine Paper Europe (US\$47 million), partly offset by the reversal of a provision (US\$4 million) in Sappi Fine Paper North America, no longer required.

Group operating expenses per metric tonne decreased by US\$17 (2.5%) to US\$669 in fiscal 2006 from US\$686 per metric tonne in fiscal 2005. The decrease of 2.9% was largely the result of the non-reoccurrence of the Muskegon and Usutu impairment charges (US\$32 per metric tonne or 4.7%), the currency translation effect (US\$16 per metric tonne or 2.6%) as well as lower raw materials and energy costs (US\$2 per metric tonne or 0.3%).

At our North American operations the operating expense were US\$1,198 per metric tonne in 2006 compared to US\$1,020 in 2005, with the impact of the impairment charges in 2005 were US\$128 per metric tonne. At our European operations the operating expenses were US\$907 per metric tonne in 2006

compared to US\$888 in 2005, mainly due to restructuring charges and increased material costs. At our Fine Paper Southern Africa operations the operating expenses were US\$1,009 per metric tonne in 2006 compared to US\$1,054 in 2005. At our Forest Products operations the operating expenses were US\$270 per metric tonne in 2006 compared to US\$277 in 2005, the impact of the Usutu mill impairment charge in 2005 accounting for US\$14 per metric tonne.

Operating Loss/Profit

Group operating income amounted to US\$125 million in 2006, compared to an operating loss of US\$109 million in 2005. The operating loss of our Fine Paper division decreased by US\$137 million; and Forest Products operating profit increased by US\$92 million.

The group operating margin was positive 2.5% compared to negative 2.2% in 2005. This reflects the effect of the non-reoccurrence of the impairment charges (US\$233 million) in 2005 and the reversal of the Usutu mill impairment of US\$40 million in 2006.

Sappi Fine Paper. Operating loss for Sappi Fine Paper decreased by US\$137 million to a loss of US\$49 million in 2006 primarily due to decreased operating losses at Sappi Fine Paper North America (US\$243 million) and Sappi Southern Africa (US\$5 million), partly offset by a US\$111 million decrease in operating income to a loss of US\$27 million at Sappi Fine Paper Europe in 2006. Operating margin was for Sappi Fine Paper negative 1.2% in 2006 as compared to negative 4.6% in 2005.

Sappi Fine Paper North America incurred operating losses of US\$16 million in 2006 and US\$259 million in 2005. This improvement in 2006 is mainly due to the non-reoccurrence of the Muskegon impairment charge (US\$183 million) and restructuring charges (US\$22 million) in 2005 and the pension provision release (US\$18 million) in fiscal 2006, partly offset by the impact of lower selling prices (US\$18 million) and higher raw material and energy costs (US\$32 million) in 2006.

Sappi Fine Paper Europe operating profit decreased by US\$111 million to a loss of US\$27 million in 2006. Operating margin decreased to negative 1.2% in 2006 from positive 3.8% in 2005. The decrease was mainly attributable to increased raw material and energy cost (US\$47 million), reduced sales due to currency and pricing (US\$66 million) and increased restructuring charges (US\$40 million), partly offset by the benefit of increased sales volumes (US\$21 million).

Sappi Fine Paper South Africa operating loss decreased US\$5 million to a loss of US\$6 million; in 2006. The improvement was mainly attributable to pricing (US\$9 million), partly offset by increased costs.

Sappi Forest Products. Sappi Forest Products operating profit increased by US\$92 million to US\$175 million in 2006. The increase was mainly due to improved volume, pricing and mix (US\$135 million), reduced SG&A costs (US\$14 million), reduced other expenses (US\$87 million), mainly impairment reversal, partly offset by increased operating costs (US\$102 million), adverse fair value pricing adjustment (US\$22 million) and the impact of currency translation (US\$12 million). US\$40 million of the Usutu impairment charge (US\$50 million) in 2005 was reversed in 2006. Operating margin was 17.7% in 2006, compared to 8.3% in 2005.

Corporate. Corporate operating expenses decreased by US\$5 million.

Net Finance Costs

Net finance costs consists of gross interest and other finance costs net of interest received, interest capitalised, foreign exchange gains and losses and change in fair value of financial instruments. Net finance costs were US\$130 million in 2006 compared to US\$80 million in 2005. Gross interest cost remained largely unchanged from 2005, increasing by US\$1 million to US\$162 million. Net interest-bearing debt of US\$2,113 million in 2006 increased by US\$105 million compared to US\$2,008 million in 2005. Net finance costs also included fair value adjustments for which 2005 included gains of US\$13 million due to an

accounting mismatch, as a result of our inability to apply hedge accounting in respect of interest rate swaps during the third quarter in 2005. As a result of IFRS adoption, the prior year was restated by a US\$22 million gain due to cash flow hedges, previously accounted for in equity no longer qualifying for hedge accounting under IAS 39. These instruments are now recognized at fair value through profit and loss.

Cash interest cover (cash generated by operations divided by net finance costs (before capitalised interest)) decreased to 3.6 times in 2006 compared to 7.1 times for 2005. The decrease in 2006 is mainly due to lower cash generated by operations as well as higher net finance costs as a result of the fair value adjustments, which were gains in 2005.

Finance costs capitalised were US\$2 million in 2006 and US\$1 million in 2005. Finance costs capitalised relate primarily to the capitalised interest on major projects under construction.

Taxation

The 2006 taxation credit was taxation credit of US\$1 million in fiscal 2006, compared to a credit of US\$5 million in fiscal 2005. The effective taxation rate this year was 14.9% (2.8% in 2005). Despite the loss in fiscal 2006, the decrease in the taxation benefit and the increase in the effective taxation rate in fiscal 2006 were primarily as a result of taxation losses carried forward, arising in North America and Austria, not being recognized under applicable accounting rules. Our North American operations, where the nominal taxation rate is 39.5%, reported a net loss before taxation of US\$79 million, with the Austrian operations reporting a loss of US\$87 million. In addition a provision for Secondary Tax on Companies (STC) of US\$9 million, being 12.5% of dividends declared, was provided. Tax risk provisions to the value of US\$13 million have been raised in Europe. Offsetting the negative consequences of losses not being tax relieved and the risk provisions raised was the release of risk provisions against matters which have now been finalised and settled, the recognition of taxation assets in Belgium and the effect of the Usutu impairment reversal not being tax effected, due to the prior non-recognition of the deferred tax asset.

The effective taxation rate of 2.8% in fiscal 2005 was primarily affected by the net loss before taxation of US\$327 million for Sappi Fine Paper North America not being fully recognized and the non-relief of the impairment charges relating to the Usutu mill. This was, however, partially offset by tax rate reductions in the Netherlands and South Africa.

Taxation liabilities are calculated according to the tax laws applicable to the jurisdiction in which a legal entity has fiscal residence. Certain jurisdictions apply group taxation and the taxation liabilities of legal entities trading in such jurisdictions are calculated in accordance with group taxation principles. In certain cases entities are subject to taxation in more than one jurisdiction. Where the entity is entitled to a corresponding taxation credit in the country of fiscal residence, this entitlement is reflected in the taxation charge. Should there not be any entitlement to a taxation credit, the foreign taxation paid is included as part of the taxation charge for an entity.

Certain of our companies are subject to taxation queries, which could give rise to additional taxation costs. While amounts have been provided for such costs in addition to amounts disclosed as contingent liabilities, management currently believes that no further material costs will arise. See note 24.4 to our Group annual financial statements included elsewhere in this Annual Report.

Sappi International S.A. (SISA) our group treasury, operates in Belgium under a co-ordination centre license granted by the Belgium government that includes an alternative method of calculating the taxation liability of the co-ordination centre. This license was renewed in July 2003 and it is our current understanding that this license will be renewed until the end of 2010. The Belgian government legislated a new general tax measure with effect from January 1, 2006. This tax measure allows for a tax deduction on the notional cost of a company's equity. This will apply to Sappi once the co-ordination centre status expires and will result in similar benefits.

Sappi accounts for taxation using the undistributed taxation rate for IFRS and using the distributed rate for US GAAP. This is reflected as a reconciling item in the annual financial statements (refer note 35 to our Group Annual Financial Statements included elsewhere in this Annual Report). The company currently has an after tax Secondary Tax on Companies (STC) credit of US\$18 million (fiscal 2005 US\$31 million). Deferred tax assets are recognised for unused STC credits to the extent that they will be utilised in the future. When STC credits are utilised with declaration of dividends, it will result in the recognition of a deferred tax charge for STC in the income statement in the period that the dividend is declared.

Basis of Income Taxation

South Africa has a dual income tax system in terms of which residents are taxed on their worldwide income and non-residents are taxed on their South African source (or deemed source) income. Certain categories of income and activities are exempt from taxation.

Residence, in the case of natural persons, is established either by being ordinarily resident in South Africa or by satisfying a physical presence test in terms of which they become residents by virtue of their being physically present in South Africa for certain prescribed periods of time. In the case of legal entities, residence is established by virtue of incorporation or formation, or having a place of effective management in South Africa. Excluded from the definition of resident are persons or entities which are, in terms of double taxation agreements entered into by South Africa, not treated as resident in South Africa.

Resident companies of South Africa are subject to corporate income tax at a rate of 29%. The South African tax law exempts dividends received from domestic entities from taxation, in part to avoid double taxation of corporate earnings. However, resident companies are subject to Secondary Tax on Companies (STC) upon the declaration of a dividend, equal to 12.5% of such dividend, net of the STC tax liability. Any excess of dividends received by a company in a relevant dividend cycle, excluding those foreign dividends which are not exempt from South African income tax, over the dividends paid in such cycle is carried forward by the company to the succeeding dividend cycle as an STC credit.

The imposition of STC, together with the corporate income taxes, effectively imposes a dual corporate tax system in South Africa, with a liability for both the 12.5% STC and the 29% corporate income tax. This creates an effective tax rate on South African companies of 36.9% on distributed earnings. STC tax on companies is however only recognised under current IFRS when a dividend is distributed. The STC becomes payable one month after the end of the month in which the dividend was declared.

Dividends received by or accruing to South African residents from companies which are not tax resident in South Africa are subject to tax, but certain foreign dividends are exempt from tax, including:

- Foreign dividends declared by a company listed on a stock exchange licensed in South Africa or on an exchange recognised by the Minister of Finance in the Government Gazette to a shareholder if more than 10% of the equity share capital of the listed company at the time of declaration is held by South African residents;
- Foreign dividends to residents holding a certain minimum interest (currently 20% of the total equity shares and voting rights) in the foreign company declaring the dividend, however certain dividends are excluded from this exemption in terms of certain anti-avoidance measures;
- Foreign dividends declared out of profits that are subject to tax in the hands of the South African resident recipient of the dividend in terms of South Africa's controlled foreign company legislation;
- Foreign dividends declared out of profits that are subject to full South African tax; and
- Foreign dividends declared by a company out of profits which arose from dividends declared to such company by a South African resident company.

South African residents, who are natural persons earning interest and non-exempt dividends from foreign sources, are allowed an exemption on the first R2,500 of such income (the exemption is firstly to be applied to foreign dividends and only if they do not exceed R2,500, the excess is to be applied to foreign interest). There is also an exemption applicable to the first R16,500 of the aggregate of any interest received from local sources and any dividends which are not exempt from tax (other than foreign dividends), however, this exemption will be reduced by the amount of the exemption which may be applicable to foreign interest or dividends referred to above.

Income Tax and Capital Gains Tax

Profits derived from the sale of shares in a South African company will generally only be subject to income tax (at a corporate rate of 29% and a maximum individual rate of 40% based on a sliding scale) in South Africa if the seller carries on business in South Africa as a share dealer, and the profits are realised in the ordinary course of that business.

Capital Gains Tax was introduced with effect from October 1, 2001 and has been introduced in the Income Tax Act 58 of 1962 by way of the incorporation of the Eighth Schedule therein (Eighth Schedule). Under the Eighth Schedule, all natural persons, legal persons and trusts resident in South Africa are liable to pay capital gains tax on the disposal of a capital asset. The definition of an asset is very wide and includes assets that are movable, immovable, corporeal or incorporeal, but excludes certain limited items. Non-residents of South Africa will not be subject to capital gains tax except in respect of the disposal of immovable property situated in South Africa (or any interest or right in such immovable property) and any assets of his/its permanent establishment through which a trade is being carried on in South Africa. Profits derived from the sale of South African shares held by non-residents as long-term investments will generally not be subject to capital gains tax in South Africa. However, the sale of South African shares held by a non-resident will attract capital gains tax in the event that the shares comprise an asset of that non-resident's permanent establishment in South Africa, or if the foreign shareholder (alone or together with any connected persons) holds more than 20% of the issued share capital of the South African company and more than 80% of the net asset value of that company is attributable to immovable property situated in South Africa. An American Depository Share will be regarded as a share for the purpose of Capital Gains Tax in South Africa. The Treaty only permits the imposition of South African tax on capital gains of a United States resident seller from the sale of shares where such shares form part of the business property of a permanent establishment which the seller has in South Africa or pertain to a fixed base available to the seller in South Africa for the purpose of performing independent personal services. Companies will be liable to capital gains tax on 50% of the net capital gain. At the current corporate tax rate of 29%, the effective tax rate on net capital gains will therefore be 14.5%.

For further information see Item 10 Additional Information Taxation .

Net Loss

Net loss decreased to US\$4 million in 2006 from a net loss of US\$184 million in 2005, primarily due to the non-reoccurrence of the Muskegon and Usutu impairment charges of US\$233 million pre-tax. Lower selling prices, higher raw material and energy costs, especially in our North American and European operations continue to place margins under pressure. A weakening of the Euro and ZAR against the US\$ impacts margins of our European and southern African businesses favourably. Restructuring charges in Europe were partly offset, in fiscal 2006, by the reversal of impairment of our Usutu Mill at Sappi Forest Products.

Basic loss per share decreased to a loss of 2 US cents per share in 2006, from a loss per share of 81 US cents per share in 2005.

Liquidity and Capital Resources**Operations**

Cash retained from operating activities amounted to US\$228 million in 2006 compared to US\$301 million in 2005.

During 2006 we generated cash from operations of US\$464 million compared to US\$569 million in 2005, a reduction of US\$105 million in cash generated compared to 2005. Although operating profit (US\$125 million) improved by US\$234 million as against 2005 operating loss (US\$109 million), the improvement in operating profit relates mainly to, non-cash, impairment charges of US\$229 million in 2005 becoming a reversal of US\$31 million in 2006. Cash generated was reduced by finance costs paid (net of interest income) of US\$138 million (US\$11 million more than 2005), taxation paid of US\$13 million (US\$30 million less than 2005) and also by US\$17 million cash being utilised by working capital (2005 utilised US\$30 million).

Total non-cash items in 2006 amounted to US\$339 million, which was US\$339 million lower than the US\$678 million in 2005, and included:

	2006	2005
	US\$ million	
Depreciation	390	422
Fellings & Amortisation	76	68
Asset Impairments, Mill Closure & Non-cash items	(127)	188
	339	678

The changes in other non-cash items were as follows:

	2006	2005	Variance
	US\$ million		
Fair Value Pricing adjustment	(104)	(118)	14
Asset (Reversals)/Impairments	(31)	236	(267)
Other	8	70	(62)
Other Non-Cash Items	(127)	188	(315)

- The fair value pricing adjustment was lower because of the impact of cost escalations in fiscal 2006, mainly due to the impact of the oil price.
- The 2005 impairment charges related mainly to the Sappi North American Muskegon and Forest Products Usutu mills. The Usutu impairment was partially reversed in 2006 (US\$40 million).
- Depreciation and felling charges were lower due to the effect of one less accounting week (US\$9 million), currency translation effect (US\$14 million).

The increase in 2006 in working capital of US\$17 million compared to a US\$30 million increase in 2005, consisted of:

- A decrease in accounts payable (US\$12 million). The decrease in payables consisted mainly of a decrease in payables at Sappi Fine Paper Europe (US\$20 million), partly offset by an increase at Sappi Fine Paper Southern Africa (US\$5 million).
- A minimal increase in receivables (US\$3 million).
- A US\$3 million increase in inventories related mainly to increases at our Sappi Fine Paper Europe (US\$8 million) and Sappi Fine Paper South African (US\$15 million) operations, partly offset by decreases at our North American (US\$15 million) and Forest Products (US\$2 million) operations.

The increase of US\$11 million in finance costs paid in 2006 was primarily due to increased levels of average borrowings and higher interest rates paid on borrowings.

Taxation paid of US\$13 million in 2006 was US\$30 million lower than 2005.

Investing

Cash utilised in investing activities was US\$355 million in 2006 and US\$379 million in 2005. Cash utilised in investing activities in 2006 related primarily to capital expenditure on non-current assets of US\$303 million, increased pension and other post retirement payments (US\$68 million), partly offset by proceeds on non-current asset disposals (US\$4 million) and a decrease (US\$12 million) in investments and loans. Increased pension and other post retirement payments were mainly at Sappi Fine Paper Europe (US\$13 million) and Sappi Fine Paper North America (US\$43 million).

Cash capital expenditure increased to US\$303 million in 2006 from US\$294 million in 2005. The lower cash capital expenditure of US\$9 million in 2005 was impacted by currency movements of US\$11 million. The US\$303 million spent in 2006 consisted of US\$160 million (US\$183 million in 2005) relating to expenditure to maintain operations and US\$143 million (US\$111 million in 2005) of expenditure to expand operations.

The capital expenditure of US\$143 million in 2006 to expand operations primarily consisted of:

- Expenditure of US\$81 million at our Sappi Fine Paper Europe operations, relating mainly to process improvements, particularly at the Ehingen mill (US\$65 million). The purpose of the Ehingen investment was to enable the mill to move from a single to a multi-coated product.
- Expenditure of US\$61 million at our Sappi Forest Product operations, relating mainly to process de-bottlenecking at Saiccor (US\$17 million), initial expenditure on the major capacity increase project at Saiccor (US\$32 million), a product improvement project at Usutu mill (US\$3 million) and various other process improvement projects.
- Expenditure of US\$1 million at our Sappi Fine Paper Southern Africa operations.

Our capital expenditure programme varies from year to year, and expenditure in one year is not necessarily indicative of future capital expenditure.

The capital expenditure of US\$111 million in fiscal 2005 to expand operations mainly consisted of:

- Projects at our European operations amounting to US\$58 million, including the replacement of operating equipment and finishing house automation of US\$14 million at our Gratkorn mill and US\$11 million on the rebuild of our Ehingen mill.
- US\$27 million at our Forest Product division, including US\$18 million on de-bottlenecking at Saiccor mill.
- Expenditure of US\$26 million at our North American operations, including US\$17 million at the Cloquet mill on product improvements and cost reductions.

Financing

At September 2006 our gross debt, which is all interest-bearing borrowings plus overdraft, decreased to US\$2,337 million, from US\$2,375 million last year. Cash and cash equivalents of US\$224 million in 2006 decreased by US\$143 million from last year, primarily due to the dividend payment (US\$68 million) and the repayment of loans in 2006. Our net debt, which is gross debt less cash and cash equivalents, at September 2006 increased by US\$105 million to US\$2,113 million from US\$2,008 million last year, of

Edgar Filing: SAPPI LTD - Form 20-F

which US\$28 million was a result of currency movements and fair value adjustments. At the end of 2006, the ratio of net debt to total capitalization was 46%, up from 41% at the end of 2005.

The currency profile of our gross debt at the end of 2006 and 2005 is detailed below:

	September 2006 US\$ million	% of total	September 2005 US\$ million	% of total
US Dollar	1,125	48.1	1,012	42.6
Euro & Swiss Franc	933	39.9	1,105	46.5
South African ZAR	279	12.0	258	10.9
Total	2,337	100.0	2,375	100.0

Debt is preferably taken up in the functional currency of the borrowing entity. Where external loans are raised in currencies other than the domestic operating currency of the entity to which the funds are applied, the currency exposure is covered by forward exchange contracts or currency swaps.

The increased proportion of South African debt in 2006 is mainly the result of increased capital expenditure.

The maturity profile of our gross debt at the end of 2006 and 2005 is detailed below:

	September 2006 US\$ million	% of total	September 2005 US\$ million	% of total
2006			775	32.6
2007*	703	30.1	141	5.9
2008	66	2.8	65	2.7
2009	10	0.4	11	0.6
2010	62	2.7	67	2.8
2011(2005 Thereafter)	553	23.7	1,316	55.4
Thereafter	943	40.3		
Total	2,337	100.0	2,375	100.0

* Included in the US\$703 million reflected as payable in 2007 is US\$347 million debt relating to securitisation funding which has the character of a revolving facility.

The maturity profile of our debt with an average time to maturity of 7.6 years reflects the long-term nature of our assets (2005: 8.4 years).

We have a policy of maintaining a balance between fixed and variable rate loans that enables us to minimise, on a cost effective basis, the impact on reported earnings while maintaining a reasonably competitive, market-related cost of funding. The specific balance is determined by currency to reflect more accurately the relevant interest rate environments. We monitor market conditions and may utilise interest rate derivatives to alter the existing balance between fixed and variable interest loans in response to changes in the market. At the end of 2006, 40.2% of our gross debt was at fixed rates compared to 35.3% in 2005. See note 31 to our Group annual financial statements.

In June 2002, SPH issued US\$500 million 6.75% Guaranteed Notes due 2012 and US\$250 million 7.50% Guaranteed Notes due 2032 (the Notes), both fully and unconditionally guaranteed on an unsecured basis by each of Sappi Ltd and SISA. The interest on the Notes is payable semi-annually on June 15 and December 15 of each year, which commenced on December 15, 2002.

In August 2005, Sappi Papier Holding GmbH (SPH) raised a facility of US\$54 million from OeKB, repayable in two tranches. Tranche A (OeKB A tranche) of US\$16 million is repayable in a single repayment in March 2007 and Tranche B (OeKB B tranche) of US\$38 million in a single repayment in

June 2010. The OeKB A tranche and the OeKB B tranche attract interest at an agreed fixed rate of 4.53%. Interest is payable quarterly in arrears on both tranches. The proceeds were used to pay for Sappi's equity participation in the Jiangxi Chenming joint venture.

In June 2005 SPH raised a new revolving credit facility of 600 million, with a maturity date of June 2010. The previous syndicated loan facility of 562.5 million raised in 2001, at our disposal until July 2006, was replaced with this new facility. The early replacement of the syndicated loan facility, 12 months prior to maturity, was undertaken to improve the terms and conditions of the replacement facility, specifically pricing of the margin and the commitment fee, and also to ensure continuity in the long-term nature of this facility. The funding margin under the new revolving credit facility is determined by a rating grid and based on our current credit rating attracts a margin between 60 and 67.5 basis points over EURIBOR, depending on the level of utilisation. This new revolving credit facility is to be used for general corporate purposes and was utilized to the extent of US\$131.9 million at the end of 2006 (unutilised at the end of 2005).

Sappi Manufacturing took up a public bond of ZAR1 billion (approximately US\$129 million) during fiscal 2006, at a fixed rate of 9.34%, repayable in June 2013. The bond was raised primarily to replace other maturing debt.

In previous years our banking covenants were calculated at the combined level of SPH and Sappi International S.A. During 2005 this was changed to measure the covenants at the consolidated Sappi Limited level, following the issuance in 2005 of a Sappi Limited guarantee for the long-term borrowings of the SPH/Sappi International S.A. group. Accordingly, it is more appropriate to measure the covenants at the consolidated group level. Covenants that exist for Sappi Manufacturing (Pty) Ltd have not been affected and remain at that level.

We presently meet all the financial ratios and covenants that apply to our major credit agreements. The covenants are not subject to any rating triggers, however ratings impact our interest rates.

The Group has adequate cash on hand and short and long-term banking facilities to meet its short-term commitments. At the end of 2006, Sappi's divisions had aggregate unused borrowing facilities available of US\$1,069 million (US\$134 million in South Africa, US\$935 million in Europe) (2005: US\$1,229 million) of which US\$654 million is committed (2005: US\$753 million). In addition, at the end of September 2006 the group had cash and cash equivalents on hand of US\$224 million (2005: US\$367 million).

There are at present some limitations on our ability to utilise facilities in any one of our divisions to finance activities, or refinance indebtedness of any other division due to covenant restrictions and South African exchange control regulations. These limitations have been significantly reduced following the refinancing of our various North American debt instruments. These restrictions include limitations on our ability to significantly increase the borrowings of our subsidiaries. A constraint applicable to South African companies is the application of exchange controls, which may inhibit the free flow of funds from South Africa. See south African Exchange Controls. This affected the geographic distribution of our borrowings. As a result, our acquisitions in the United States and Europe were financed initially with indebtedness incurred by companies in these Regions. We now have access to and have extensively utilised long-term borrowings of generally unsecured nature (except in the case of asset-linked finance). Interest rates reflect long-term rates for the currencies being borrowed. Short-term borrowings are generally freely available at commercial rates in all countries in which we operate and are mainly to finance working capital.

Off-Balance Sheet Arrangements

We have entered into certain asset-related finance arrangements for which various obligations, which are significant, and related assets are not included in our Group annual financial statements under IFRS. These Off-Balance Sheet Arrangements include lease arrangements described in note 26, securitisation facilities described in note 17 and an equity accounted investment described in note 14, in each case to our Group annual financial statements included elsewhere in this Annual Report, and are detailed as follows:

Lease Arrangements. In 1997 we sold one of our paper machines at our Somerset mill for US\$150 million and entered into a leaseback arrangement. This transaction diversified our sources of funding and provides a longer-term horizon to our repayment profile. This qualifies as an operating lease under the applicable accounting principles. The lease term expires after 15 years, and we have an option to either return the paper machine; renew the lease for at least 2 years, but for no longer than 80% of its remaining useful life; or repurchase it at its fair market value at the end of the lease term. An option exists to repurchase the paper machine at an earlier date of January 29, 2008 for the original purchase price multiplied by a factor of 50.1%. To exercise the option, we must provide notice of between 180 and 360 days prior to the early buyout date. There is no right of refusal associated with the early buyout option. The future minimum obligations under this lease are included in the amounts presented in note 26 to the group annual financial statements.

In 1982 a cogeneration facility was installed adjacent to our Westbrook mill at a cost of US\$86 million, to supply steam and electricity to the mill on a take-or-pay basis. We have taken the position that this is an operating lease. An unrelated investor owns the facility. The agreement expires in 2008 and we have an option to purchase the facility at the end of the basic term or any renewal term, at its fair market value at that time. We also have a right of first refusal to buy the facility should the owner elect to sell it. The future minimum obligations under this arrangement are included in the amounts presented in note 26 to the group annual financial statements.

Although those lease arrangements are a method of financing, a leasing arrangement that qualifies for accounting treatment as an operating lease results in neither debt nor the relevant assets being reflected on our balance sheet.

Trade Receivables Securitisation. To improve our cash flows in a cost-effective manner, we sell between 86% and 99% of our eligible trade receivables on a non-recourse basis to special purpose entities (SPEs) that are owned and controlled by third party financial institutions. These SPEs are funded in the commercial paper market. Following our first-time adoption of IFRS in 2006, the majority of these receivables are now reflected on our balance sheet with the exception of the southern Africa receivables. The funds received are reflected as interest-bearing borrowings (refer note 21). This accounting treatment is in-line with the strict derecognition criteria introduced through amendments to IAS 39 Financial Instruments .

In the southern African region the sale of receivables to iNdwa Investments Limited is not reflected on-balance sheet. The key difference in the securitisation programme in this region is that there are no first tier loss provisions which reduce the bank's credit risk. In this region virtually all receivables are securitised, however, we retain 15% of the credit risk on the receivables on a proportionate basis, after all recoveries, including insurance recoveries. The total amount of trade receivables sold and derecognised at the end of fiscal 2006 amounted to US\$107 million (fiscal 2005: US\$129 million).

If this securitisation facility was to be terminated, we would discontinue further sales of trade receivables and would not incur any losses in respect of receivables previously sold. There are a number of events which may trigger termination of the facility, amongst others, an unacceptable amount of defaults; terms and conditions of the agreements not being met; or breaches of various credit insurance ratios. The

impact on liquidity varies according to the terms of the agreement; generally however, future trade receivables would be recorded on balance sheet until a replacement agreement was entered into.

An impairment of accounts receivable has been recorded for any receivables which may be un-collectable. The determination of this allowance is restricted to the 15% risk retained by Sappi.

Equity Accounted Investment. In 1998, our interests in timberlands located in Maine and certain equipment and machinery were sold to a third party timber company, Plum Creek Timberlands LLP, in exchange for cash of US\$3 million and three promissory notes receivable in the aggregate amount of US\$171 million. In 1999, the Company contributed these promissory notes to a special purpose entity (SPE). The promissory notes were pledged as collateral for the SPE to issue bonds to investors in the amount of US\$156 million. In 2001, the Company contributed its interest in the SPE to a limited liability company in exchange for 90% of the outstanding limited liability membership interest. All voting control of the limited liability company is controlled by an unrelated investor that has significant capital at risk and therefore has not been consolidated by the Company in its financial statements. The SPE is not consolidated in our financial statements because we have taken the position that it is controlled by an unrelated investor which has sufficient equity capital at risk to support such a position. The Company's investment in the SPE is US\$19 million as of October 1, 2006.

The SPE may not be liquidated prior to repayment of the bonds it issued, which mature in three tranches on February 11, 2007, February 11, 2009, and February 11, 2011. The Company may not redeem its investment in the SPE (via its ownership interest in the limited liability company) prior to complete repayment of the bonds issued by the SPE and our investment has a subordinate interest to the payment of the outstanding bonds. We have not guaranteed the obligations of the SPE and the holders of the notes payable issued by the SPE have no recourse to us.

The SPE is bankruptcy remote and serves to protect the investors in the notes from any credit risk relating to Sappi Limited by isolating cash flows from the Plum Creek notes receivable. The structure was set up to raise funding using the promissory notes as collateral in a manner that would not result in either debt or the Plum Creek Timberlands LLP notes being reflected on balance sheet. This would not be the case if we monetised the promissory notes through an issuance of secured notes directly or by an entity that was required to be consolidated in our financial statements under the applicable accounting principles.

Capital Expenditures

Capital expenditures in 2006 and 2005 consisted of the following:

	September 2006 US\$ million	September 2005 US\$ million
Sappi Fine Paper		
Sappi Fine Paper North America	48	90
Sappi Fine Paper Europe	136	124
Sappi Fine Paper South Africa	19	27
Total	203	241
Sappi Forest Products	99	101
Corporate	1	3
Consolidated Total	303	345

Of the US\$303 million of capital expenditure in 2006 (2005: US\$345 million), approximately US\$160 million were investments to maintain operations (2005: US\$183 million) and US\$143 million were investments to expand operations. The capital expenditure to expand operations during 2006 included major projects at Sappi Fine Paper Europe US\$81 million, Sappi Forest Products US\$61 million, and

Sappi Fine Paper North America US\$1 million. Total capital expenditure amounted to 77% of depreciation in 2006. Capital expenditure to expand operations in fiscal 2006 was US\$143 million (US\$111 million in 2005). Capital expenditure to expand operations primarily consisted of investments at Sappi Fine Paper Europe related mainly to process improvements, particularly at the Ehingen mill (US\$65 million). The purpose of the Ehingen investment was to enable the mill to move from a single to a multi-coated product. The investments at Sappi Forest Products related mainly to process de-bottlenecking at Saiccor (US\$17 million), initial expenditure on the major capacity increase project at Saiccor (US\$32 million) and various other process improvement projects. Capital expenditure to expand operations during fiscal 2005 included major projects at our European Gratkorn and Ehingen mills, South African Saiccor mill and Cloquet mill in North America. Total capital spending for the Sappi Group during fiscal 2005 amounted to 82% of depreciation. Due to cash flow restrictions during fiscal 2006 capital expenditure was intentionally curtailed. Capital spending for the Sappi Group during 2007 is not expected to exceed depreciation, including the proposed expansion of the Sappi Forest Products Saiccor mill. Capital spending is expected to be funded primarily through internally generated funds. For further details about our capital commitments, see note 26 to our Group annual financial statements included elsewhere in this Annual Report.

We operate in an industry that requires high capital expenditures and, as a result, we need to devote a significant part of our cash flow to capital expenditure programmes, including investments relating to maintaining operations. Capital spending for investment relating to maintaining operations during fiscal 2006 and fiscal 2005 amounted to approximately US\$160 million and US\$183 million, respectively. The capital expenditure programme for these fiscal years was funded primarily through internally generated funds.

Our mills are generally well invested. Sappi Fine Paper North America's former corporate parent invested approximately US\$1 billion on capital and investment expenditures from 1988 to 1994. In addition, there was approximately NLG 1,383 million of capital expenditures by KNP Leykam in the two years preceding our acquisition of that company in December 1997, which included the commissioning of PM 11 at Gratkorn. Consequently, during fiscal 1997 to fiscal 2004, capital spending incurred related mainly to maintaining existing operations and selected high-return capacity expansion or quality-enhancing projects. At Muskegon in North America, Gratkorn in Europe, and Stanger in South Africa, major projects were completed to upgrade operating equipment. These projects are expected to improve product quality, reduce costs and increase capacity. Potlatch spent approximately US\$525 million on the Cloquet mill during the period 1993 to 2000, resulting in a substantially new pulp mill.

Contractual Obligations

We have various obligations and commitments to make future cash payments under contracts, such as debt instruments, lease arrangements, supply agreements and other contracts. The following table includes information contained within the Group annual financial statements included elsewhere in this Annual Report, as well as information regarding purchase obligations. The tables reflect those contractual obligations at the end of fiscal 2006 that can be quantified.

	Payments Due by Period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Long-Term Debt Obligations(1)	2,286	687	61	612	926
Capital Lease Obligations(1)	42	7	14	4	17
Operating Lease Obligations(2)	235	54	77	45	59
Purchase Obligations(3)	56	24	27	5	
Other Long-term Liabilities Reflected on Balance Sheet(4)	472				
Group Total	3,091	772	179	666	1,002

- (1) Refer to note 21 of our Group annual financial statements included elsewhere in this Annual Report.
- (2) Operating leases are future minimum obligations under operating leases. Refer to note 26.
- (3) Unconditional Purchase Obligations are obligations to transfer funds in the future for fixed or minimum amounts or quantities of goods or services at fixed or minimum prices (for example, as in take-or-pay contracts or throughput contracts, relating to among others, timber and power).
- (4) The Other Long-Term Liabilities of US\$472 million (fiscal 2005 US\$577 million) on balance sheet, relate mainly to post-employment benefits, post-retirement benefits other than pensions obligations, workmen's compensation, and other items which do not have a payment profile. Refer to note 22 of our Group annual financial statements included elsewhere in this Annual Report.

Share Buy Back

Following an initial approval of our shareholders, on December 15, 2000, of purchases by our subsidiaries of Sappi ordinary shares, further approval to purchase was obtained at the annual general meeting of shareholders held on 6 March 2005. A special resolution granting authority to Sappi Limited or Sappi subsidiaries to buy back, up to 10%, of the issued shares of Sappi Limited in any one year, was approved. Pursuant to this approval, Sappi Limited or its subsidiaries may buy back shares from time to time. This authority is valid until the next annual general meeting. Under the South African Companies Act, subsidiaries may not hold more than 10% of the issued share capital of the parent company.

Following the initial approval in December 2000, our cumulative buy back by Group entities, at the end of 2005, is approximately 19.4 million shares (or approximately 8.1% of our issued shares) at an average price of US\$9.61 (ZAR74.55) per share, of which 7.0 million shares had been utilised by the Sappi Limited Share Incentive Trust to meet its obligations. During 2005 we acquired approximately 1.3 million shares for a total consideration of approximately US\$15.9 million. We held approximately 13.2 million treasury shares (or approximately 5.5% of our issued shares) at the end of 2005. On December 6, 2006, the closing price for our shares on the JSE was 11,425 SA cents per share and the closing price of the ADSs on the NYSE was US\$16.09 per ADS. No shares were acquired during 2006.

The JSE Limited listing requirements changed during 2003. Under the revised rules a company may not repurchase its shares during a closed period, which is defined as the period between the end of a financial reporting period and the publication of the results for that period and any period during which

the company is trading under a cautionary announcement. Previously this was restricted for periods of 40 trading days prior to the announcement of half-year and full-year results.

Dividends

In 2006, Sappi Limited declared dividends in respect of ordinary shares of 30 US cents per share (2005: 30 US cents per share).

We aim to declare annual dividends, which, over time, incorporate real growth for shareholders. To this end, dividend cover in each year will vary in line with changes in the business cycle, but our current intention is to maintain a long-term average of three times net profit. Notwithstanding our inability to meet this target in recent years, we remain committed to this policy in the longer term.

Mill Closures, Acquisitions, Dispositions and Impairment; and Joint Venture

Usutu impairment reversal. During the first quarter of 2005 we announced the impairment of our Usutu mill. The Usutu mill is an unbleached kraft pulp mill and forms part of the Sappi Forest Products reporting segment. Due to continued losses an impairment review was conducted which led to the recognition of an impairment charge of US\$50 million in 2005. During the fourth quarter of 2006 the impairment of Usutu mill was reversed, in terms of IAS 36, because, as a result of improved pulp prices, weakening of the ZAR against the US\$, improved economic conditions and improved operational performance, profitability has improved. Demand for the mills product has improved as international pulp prices improved as the differential between bleached and unbleached pulp prices widens resulting in unbleached capacity reverting back to bleached pulp production. The improved international pricing and improved product quality have resulted in improved pricing and the weakening of the local currency against the US\$ is improving margins in local currency as costs are mainly local currency denominated. The impairment reversal for the year was US\$40 million.

Nash Mill Closure. In May 2006 paper production at our Nash mill was stopped. The mill had been suffering from escalating costs, especially energy, which made it uncompetitive. The plant and equipment has been scrapped or transferred within the Group. The product previously manufactured at the mill is now produced elsewhere in the Group. The land and buildings are currently available for sale and are expected to be sold by the end of the next financial year. The assets are held in the Sappi Fine Paper Europe. The closure resulted in an impairment charge of US\$2 million. An initial impairment charge of US\$3 million was taken during fiscal 2005.

Restructuring. During 2006 Sappi Fine Paper Europe undertook a major cost reduction and productivity improvement project which will result in a headcount reduction of 650 employees mainly throughout 2007. This project resulted in a restructuring charge of US\$40 million in quarter four of 2006.

Muskegon impairment. During the third quarter of fiscal 2005 we announced the impairment of our North American Muskegon mill, and recorded impairment charges of US\$183 million in fiscal 2005. During fiscal 2006 impairment charges of US\$4 million were incurred. A detailed discussion of this impairment is contained in the section *Restructuring*, elsewhere in this Operating and Financial Review and Prospects.

Joint Venture with Shandong Chenming Paper Holdings Limited. During 2004 we acquired 34% of Jiangxi Chenming Paper Company Limited (Jiangxi Chenming) in a joint venture with Shandong Chenming Paper Holdings Limited (Shandong Chenming) (51%), Moorim Paper Manufacturing Company Limited of South Korea (7.5%), and the International Finance Corporation (IFC) (7.5%). Our equity contribution was approximately US\$60 million.

The mill has an annual capacity of 350,000 metric tons per annum light-weight coated paper machine together with a bleached thermo mechanical pulp (BTMP) mill, de-inked pulp plant, and power plant. The

mill is located in Nanchang, the capital of Jiangxi Province which is in southeast China. The mill was commissioned in August 2005. The total cost of the project is approximately US\$440 million. The IFC had arranged the debt financing for the project, which is without recourse to Sappi. The IFC holds 7.5% of the equity and has also approved US\$50 million in long-term debt for its own account.

Pensions and Post-retirement Benefits Other than Pensions

The Group provides various post-retirement benefits to its active and retired employees worldwide, including: pension, post-retirement health and other life benefits.

The under funded status of the Company's pension plans decreased by US\$139 million from the deficit of US\$367 million as of September 2005 to a deficit of US\$228 million as of September 2006. Post-retirement benefit liabilities (other than pension) decreased US\$14 million to US\$164 million from US\$178 million as at September 2005.

Benefit obligations and fair value of plan assets across the regions are as follows:

	September 2006 Benefit Obligation (US\$ in million)	Fair value of plan Assets	September 2005 Benefit Obligation	Fair value of plan assets
Pensions	1,513	1,285	1,589	1,222
The South African Surplus Recognition Restriction	41		(6)	
Post-retirement Benefits Other than Pensions	164		178	

Actual returns for the various regional pension funds during 2006 were significantly better than actuarial projections, which improved asset levels as of September 2006. Discount rates in funds have been adjusted upwards, reflecting higher prevailing interest rates. The higher discount rates across the regions decreased liabilities by US\$76 million, thereby having a positive effect on the funded status of the Group's plans from September 2005 to September 2006.

The key assumptions used to compile plan assets and liabilities at September 2006 were as follows:

	Europe		North America		United Kingdom		South Africa	
	2006	2005	2006	2005	2006	2005	2006	2005
	%	%	%	%	%	%	%	%
Discount rate	4.50	3.68	5.75	5.50	5.00	5.00	8.50	8.10
Return on assets	5.50	5.19	8.25	8.25	5.75	5.75	10.50	9.71
Salary increase	3.04	2.99	3.50	3.50	4.00	4.00	6.00	5.49

A 1% increase in discount rates would decrease the pension liability by approximately US\$220 million and the related pension expense by approximately US\$16 million per annum.

A 1% increase in the healthcare cost trend rates would increase the accumulated other post-retirement benefit obligation by US\$13 million and the aggregate of the service and interest cost components of net periodic other post-retirement benefit expense by US\$2 million after tax per annum.

The South African pension fund is, from 2005, closed to new employees. Due to uncertainties in interpretation of the South African pensions legislation, the surplus in the South African fund cannot be recognized.

For further information see notes 28 and 29 to our Group annual financial statements.

Insurance

The Group has an active programme of risk management in each of its geographical operating regions to address and to reduce exposure to property damage and business interruption. All production and distribution units are subject to regular risk assessments, the results of which receive the attention of senior management. The risk assessment and mitigation programmes are co-ordinated at Group level in order to achieve a harmonisation of methodology.

Sappi follows a practice of insuring its assets against unavoidable loss arising from catastrophic events. These include fire, flood, explosion, earthquake and machinery breakdown. Insurance also covers the business interruption costs which may result from these events. Specific environmental risks are also insured. In line with the previous years the Board decided not to take separate cover for losses from acts of terrorism, which is consistent with current practice in the paper manufacturing industry.

Sappi has a global insurance structure and the bulk of the insurance is placed with its own captive insurance company, Lignin Insurance Company Limited, which in turn reinsures the vast majority of the risk with third-party insurance companies.

Sappi has successfully placed the renewal of its 2007 insurance cover at rates lower than 2006. Self-insured retention for any one property damage occurrence has remained at US\$25 million, with an unchanged annual aggregate limit of US\$40 million. For property damage and business interruption, there generally does not seem to be cost effective cover available to full value. However the directors believe that the loss limit cover of US\$1 billion should be adequate for what they have determined as the reasonably foreseeable loss for any single claim.

Insurance cover for credit risks currently applies to Sappi's North American, European and South African domestic trade receivables.

Critical accounting policies and estimates

Our Group financial statements have been prepared in accordance with IFRS. The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions about future events that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities. Future events and their effects cannot be determined with absolute certainty. Therefore, the determination of estimates requires the exercise of judgment based on various assumptions and other factors such as historical experience, current and expected economic conditions, and in some cases, actuarial techniques. The group constantly re-evaluates these significant factors and makes adjustments where facts and circumstances dictate. Historically, actual results have not significantly deviated from those determined using the estimates described above, except for post-employment benefits. The group believes that the following accounting policies are critical due to the degree of estimation required and/or the potential material impact they may have on the groups financial position and performance.

Asset impairments. The group periodically evaluates its long-lived assets for impairment, including identifiable intangibles and goodwill, whenever events or changes in circumstance indicate that the carrying amount of the asset may not be recoverable. Our judgements regarding the existence of impairment indicators are based on market conditions and operational performance of the business. Future events could cause management to conclude that impairment indicators exist.

In order to assess if there is any impairment, we estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the carrying amount exceeds the recoverable amount (being the greater of the discounted expected future cash flows and the net selling price of the asset) of the asset, we will recognise an impairment loss for the difference. Considerable management judgement is necessary to estimate discounted future cash flows, including judgements and estimates as to future

product pricing, raw material costs, volumes of product sold, changes in the planned use of machinery or equipment or closing of facilities. The calculation of appropriate pre-tax discount rates (weighted average cost of capital) is another sensitive input to the valuation. While every effort is made to make use of independent information and apply consistent methodology, actual circumstances or outcomes could vary significantly from such estimates, including as a result of changes in the economic and business environment. These variances could result in changes in useful lives or impairment. These changes can have either a positive or negative impact on our estimates of impairment and can result in additional charges.

Goodwill impairment tests are performed annually to compare the fair value of each of our reporting units (cash generating) to its carrying amount. Goodwill impairment testing is conducted at reporting unit levels of our business and is based on a cash flow based valuation model to determine the fair value of the reporting unit. The assumptions used in estimating future cash flows were based upon our business forecasts and incorporated external information from industry sources, where applicable. Actual outcomes could vary significantly from our business forecasts. Changes in certain of these estimates could have a material effect on the estimated fair value of the reporting unit. In addition to the judgments described in the preceding paragraph that are necessary in estimating future cash flows, significant judgments in estimating discounted cash flows also include the selection of the pre-tax discount rate (weighted average cost of capital) and the terminal value (net present value at end of period where there is a willing buyer and seller) multiple used in our valuation model. The discount rate used in our valuation model considered a targeted debt and equity mix, a market risk premium, and other factors consistent with valuation methodologies. The terminal value multiple used in our valuation model considered the valuations for comparable companies. Based on the results of the impairment evaluation described above, the recorded goodwill was not impaired as the fair value of each reporting unit exceeded the carrying value.

Small changes to the valuation model would not significantly impact the results of our valuation; however, if future cash flows were materially different than our forecasts, then the assessment of the potential impairment of the carrying value may be impacted.

Property, plant and equipment. Property, plant and equipment represents tangible items and intangible items that are integrated with tangible items that are held-for-use in the production or supply of goods or services, for rental to others, or for administrative purposes and are expected to be used during more than one period.

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes the estimated cost of dismantling and removing the assets, where specifically required in terms of legislative requirements or a constructive obligation exists.

Owner-occupied investment properties and properties in the course of construction are carried at cost, less any impairment loss where the recoverable amount of the asset is estimated to be lower than its carrying value. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Depreciation commences, on the same basis as other property assets, when the assets are ready for their intended use. The Group currently does not hold any investment properties.

Subsequent expenditure is capitalised when it is measurable and will result in probable future economic benefits. Expenditure incurred to replace a component of an item of owner-occupied property or equipment is capitalised to the cost of the item of owner-occupied property and equipment and the part replaced is derecognised. All other expenditure is recognised in profit or loss as an expense when incurred.

Depreciation is charged so as to write off the depreciable amount of the assets, other than land, over their estimated useful lives to estimated residual values, using a method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the entity.

Where significant parts of an item have different useful lives to the item itself, these parts are depreciated over their estimated useful lives. The methods of depreciation, useful lives and residual values are reviewed annually.

The following methods and rates were used during the year to depreciate property, plant and equipment to estimated residual values:

Buildings straight line 40 years

Plant straight line 5 to 20 years

Vehicles straight line 5 to 10 years

Furniture and equipment straight line 3 to 6 years

Assets held under finance leases are depreciated over their expected useful lives or the term of the relevant lease, where shorter. Previously the cost of assets was written-off over the assets expected useful life, depending on the class of asset. Under IFRS these useful lives have to be reassessed annually and the depreciation charge adjusted accordingly. This process is, by its nature, dependant on certain key assumptions. Management believes that the assigned values and useful lives, including the underlying assumptions have been adequately considered and consistently applied. Different assumptions and assigned useful lives could have an impact on the reported amounts.

The gain or loss arising on the disposal or scrapping of property, plant and equipment is recognised in profit or loss.

For material items of property, plant and equipment an internal engineer is used to assist in determining the remaining useful lives and residual values. Management believes that the assigned values and useful lives, including the underlying assumptions have been adequately considered and consistently applied. Different assumptions and assigned useful lives could have an impact on the reported amounts.

Taxation. The group estimates its income taxes in each of the jurisdictions in which it operates. This process involves estimating its current tax liability together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within the consolidated balance sheet.

The group then assesses the likelihood that the deferred tax assets will be recovered from future taxable income and, to the extent recovery is not likely, a valuation allowance is established. In recognising deferred tax assets the Company considers profit forecasts including the effect of exchange rate fluctuations on sales and external market conditions. Where it is probable that a position may be successfully challenged, based on reported challenges by revenue authorities of similar positions taken by other taxpayers, as well as items already raised by revenue authorities during audits, but for which resolution has not yet been reached, a valuation allowance or tax provision is raised for the tax on the probable adjustment. Management's judgement is required in determining the provision for income taxes, deferred tax assets and liabilities and any valuation allowance recorded against the net deferred tax assets. Deferred tax assets have been recognised where management believes there are sufficient taxable temporary differences or convincing other evidence that sufficient taxable profits will be available in to realise deferred tax assets. Although the deferred tax assets for which valuation allowances have not been recognised are considered realisable, actual amounts could be reduced if future taxable income is not achieved. This can materially affect our reported net income and financial position.

Hedge accounting for financial instruments. For the purposes of hedge accounting, we classify hedges into two categories: (a) fair value hedges which hedge the exposure to changes in the fair value of a recognised asset or liability; and (b) cash flow hedges, which hedge exposure to variability in cash flows that are either attributable to a particular risk associated with a recognised asset or liability or a forecasted transaction. The financial instruments that are used in hedging transactions are assessed both at inception and quarterly thereafter to ensure they are effective in offsetting changes in either the fair value or cash

flows of the related underlying exposures. Hedge accounting is mainly used for debt instruments to hedge interest rate and foreign currency risk exposures and for firm commitments to hedge foreign currency risk exposures. We do not use hedge accounting for trading transactions.

In relation to fair value hedges, which meet the conditions for hedge accounting, any gain or loss from re-measuring the hedging instrument to fair value is recognised immediately against income. Any gain or loss on the hedged item attributable to the hedged risk is adjusted against the carrying amount of the hedged item and recognised against income. Any residual ineffectiveness related to fair value hedges can affect our reported net income. External market data is applied in re-measuring the hedging financial instrument.

In relation to cash flow hedges, which meet the conditions for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in shareholders' equity and the ineffective portion is recognised in income. The gains or losses, which are recognised directly in shareholders' equity, are transferred to income in the same period in which the hedged transaction affects income. Any residual ineffectiveness related to cash flow hedges can affect our reported net income. External market data is applied in measuring the hedge effectiveness of the financial instrument. Hedge ineffectiveness is recognised immediately against income. The group does not currently have any cash flow hedges.

Refer to note 31.5 of the Group Annual Financial Statements contained elsewhere in this Annual Report for details of the fair value hedging relationships.

The group has the following fair value hedges which qualify for hedge accounting:

Bonds at fixed interest rates with a total principle amount of US\$856 million are hedged by seven external interest rate swaps (IRS), with a negative fair value of US\$23 million which convert the US\$ fixed interest rates into floating 6-month LIBOR in arrears.

In fiscal 2005 the hedge was de-designated at the end of March 2005 and was only re-designated three months later. During this period hedge accounting was interrupted. The changes in fair value of the bonds until the moment of de-designation are amortised over the remaining life of the hedge.

The following is an analysis of the impact on pre-tax profit and loss for the period

	2006 US\$ million	2005 US\$ million
(without brackets favourable)		
De/re designation		12.9
Amortisation	(1.6)	(1.2)
Residual ineffectiveness	3.5	10.5
Total	1.9	22.2

During 2006, Sappi's firm commitments for the purchase of equipment in foreign currency were hedged for foreign exchange risk by forward exchange contracts and were designated as a fair value hedge. The value of the firm commitments hedge accounted for was EUR15.4 million and US\$1.1 million. These foreign currency forward exchange contracts had a negative fair value of US\$0.3 million. Since the critical terms perfectly match, there was no residual ineffectiveness affecting profit and loss for the period.

Plantations. We state our plantations at their fair value, less estimated costs to sell at the harvesting stage. Fair value is determined using the present value method for immature timber and the standing value method for mature timber. All changes in fair value are recognised in income in the period in which they arise.

Land, logging roads and related facilities are accounted for under property, plant and equipment. The trees are accounted for as plantations. Land is not depreciated. Logging roads and related facilities are depreciated at various rates over a period of 3 to 10 years depending on expected life of each road or related facility. Trees are generally felled at the optimum age when ready for intended use. At the time the tree is felled it is taken out of plantations (non-current assets) and accounted for under inventory (current assets).

Assumptions and estimates are used in the recording of plantation volumes, cost per metric tonne, and depletion. Changes in the assumptions or estimates used in these calculations may affect the Group's results, in particular, plantation and depletion costs.

A major assumption and estimation is the growth estimation. The inputs to our growth model are complex and involve estimations, all of which are regularly updated. Growth models derived from measured data from permanent sample plots are used for growth estimation. The long-term sample plot network is representative of the species and sites on which we grow trees. Periodic adjustments are made to existing models for new genetic material.

Depletions include the fair value of timber felled, which is determined on the average method, plus amounts written off standing timber to cover loss or damage caused by, for example, fire, disease and stunted growth. Depletions are accounted for on a cost per metric tonne allocation method. Tonnes are calculated using the projected growth to rotation age and extrapolated to current age on a straight line basis.

The fair value of immature timber (softwood less than eight years and hardwood less than five years) is the discounted value of the expected delivered market price for estimated timber volumes less cost of delivery and estimated maintenance costs up to when the timber becomes usable by our own mills. The discount rate used is the pre-tax Rand cost of capital of the South African companies. The fair value of mature timber is based on the market price for estimated timber volumes less cost of delivery.

Cost of delivery includes all costs associated with getting the harvested agricultural produce to the market, being harvesting, loading, transport and allocated fixed overheads.

The Group is exposed to financial risks arising from climatic changes, disease and other natural risks such as fire, flooding and storms and human-induced losses arising from strikes, civil commotion and malicious damage. These risks are covered by an appropriate level of insurance as determined by management. In addition, management focuses close attention to good husbandry techniques and fire-fighting methods. The plantations have an integrated management system that is certified to ISO 9001, ISO 14001, OHSAS 18001 and FSC standards.

For further information see note 11 of our Group annual financial statements included elsewhere in this Annual Report.

Post employment benefits. The group accounts for its pension benefits and its other post retirement benefits using actuarial models. These models use an attribution approach that generally spreads individual events over the service lives of the employees in the plan. Examples of events are changes in actuarial assumptions such as discount rate, expected long-term rate of return on plan assets, and rate of compensation increases. The principle underlying the required attribution approach is that employees render service over their service lives on a relatively consistent basis and, therefore, the income statement effects of pension benefits or post retirement healthcare benefits are earned in, and should be expensed in the same pattern.

Numerous estimates and assumptions are required, in the actuarial models, to determine the proper amount of pension and other post retirement liabilities to record in the Group's consolidated financial statements and set the expense for the next fiscal year. These include discount rate, return on assets, salary

Edgar Filing: SAPPI LTD - Form 20-F

increases, health care cost trends, longevity and service lives of employees. Although there is authoritative guidance on how to select these assumptions, our management and its actuaries exercise some degree of judgement when selecting these assumptions. Selecting different assumptions, as well as actual versus expected results, would change the net periodic benefit cost and funded status of the benefit plans recognised in the financial statements.

The impact on the future financial results of the group in relation to post employment benefits is dependent on economic conditions, employee demographics and investment performance.

Pension plans

The key assumptions used to compile pension plan assets and liabilities at the end of fiscal 2006 and fiscal 2005 were as follows:

	Europe		North America		United Kingdom		South Africa	
	2006 %	2005 %	2006 %	2005 %	2006 %	2005 %	2006 %	2005 %
Discount rate	4.50	3.68	5.75	5.50	5.00	5.00	8.50	8.10
Return on assets	5.50	5.19	8.25	8.25	5.75	5.75	10.50	9.71
Salary increase	3.04	2.99	3.50	3.50	4.00	4.00	6.00	5.49

The benefit obligations and fair value of plan assets at the end of fiscal 2006 were as follows:

	Benefit obligation US\$ million	Fair value of Plan assets	Net Funded/ (Unfunded) status
Pension funds			
Europe	585	466	(119)
North America	438	329	(109)
United Kingdom	234	195	(39)
South Africa	256	295	39
	1,513	1,285	(228)

The higher discount rates across the regions decreased liabilities by US\$76 million, thereby having a positive effect on the funded status of the Group's plans at the end of fiscal 2006 compared to the end of fiscal 2005.

The unfunded status of the Company's pension plans decreased by US\$139 million to a deficit of US\$228 million at the end of fiscal 2006 from a deficit of US\$367 million at the end of fiscal 2005.

Net periodic pension costs using the assumptions above were as follows at the end of fiscal 2006 and fiscal 2005:

	2006 US\$ million	2005
Pension costs		
Europe		12
North America	(6)	17
United Kingdom	4	4
South Africa	1	8
	(1)	41

Employer contributions in fiscal 2007 for pensions are expected to rise by approximately US\$25 million to US\$86 million.

Edgar Filing: SAPPI LTD - Form 20-F

A 1% increase in discount rates would decrease the pension liability by approximately US\$220 million.

Post retirement benefits other than pensions

The key assumptions used to compile post retirement benefit obligations other than pensions were as follows at the end of fiscal 2006 and fiscal 2005:

	North America		South Africa	
	2006	2005	2006	2005
	%	%	%	%
Discount rate to estimate accumulated benefit	5.75	5.50	8.50	8.10
Health care cost trends to value APBO	10.00	10.00	6.50	5.60
Which gradually reduce to an ultimate rate of	5.00	5.00	5.60	5.60
Over a period of (years)	5	5		

The benefit obligations and fair value of plan assets at the end of fiscal 2006 were as follows:

	Benefit obligation US\$ million	Fair value of Plan assets
Other post-retirement benefits		
North America	103	
South Africa	61	
	164	

Discount rates are drawn from high quality corporate bond yield indices with terms similar to those of fund liability profiles. Discount rate assumptions have been adjusted upwards in all funds, reflecting, respectively, prevailing higher interest rates. This has decreased the net unfunded status of other post-retirement benefits plans by US\$14 million to US\$164 million at the end of fiscal 2006 from the end of fiscal 2005.

Post retirement benefit costs other than pensions using the assumptions above were as follows at the end of fiscal 2006 and fiscal 2005:

	2006	2005
	US\$ million	
Other post-retirement benefits cost		
North America	6	9
South Africa	6	7
	12	16

A 1% increase in the health care cost trend rates would increase the accumulated other post-retirement benefit obligation by approximately US\$14 million and the aggregate of the service and interest cost components of net periodic other post-retirement benefit cost by US\$2 million per annum.

A 1% decrease in the health care cost trend rates would decrease the accumulated other post-retirement benefit obligation by approximately US\$13 million and the aggregate of the service and interest cost components of net periodic other post-retirement benefit cost by US\$2 million per annum.

Provisions. Provisions are required to be recorded when the group has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of economic benefits will occur, and where a reliable estimate can be made of the amount of the obligation. Best estimates, being the amount that the Group would rationally pay to settle the obligation, are recognised as provisions at

balance sheet date. Risks, uncertainties and future events, such as changes in law and technology, are taken into account by management in determining the best estimates.

Where the effect of discounting is material, provisions are discounted. The discount rate used is the pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability, all of which requires management judgement.

The establishment and review of the provisions requires significant judgement by management as to whether or not there is a probable obligation and as to whether or not a reliable estimate can be made of the amount of the obligation, which requires judgements as to the likelihood of future payment. All provisions are reviewed at each balance sheet date. Various uncertainties can result in obligations not being considered probable or estimable for significant periods of time. As a consequence, potentially material obligations may have no provisions and a change in facts or circumstances that results in an obligation becoming probable or estimable can lead to a need for the establishment of material provisions. In addition, where estimated amounts vary from initial estimates the provisions may be revised materially, up or down, based on the facts.

The Group periodically restructures its business units for productivity and business improvement initiatives and records charges for reductions in its workforce, the closure of manufacturing facilities, and other actions related thereto. These events require estimates of liabilities for employee separation payments and related benefits, equipment removal, environmental cleanup and other costs. The actual costs incurred could differ materially from those estimated at balance sheet date.

The Group is required to record provisions for estimated environmental liabilities, based on current interpretations of environmental laws and regulations, when expenditures are considered probable and can be reasonably estimated. These estimates reflect management assumptions and judgements as to the probable nature, magnitude and timing of required investigations, remediation and monitoring activities, changes in governmental regulations, insurance recoveries and the contributions by other potentially responsible parties. These assumptions and judgements are subject to various uncertainties which could result in estimated costs that could materially differ from the actual costs incurred.

The Group is required to record provisions for legal contingencies when the contingency is probable of occurring and the amount of the loss can be reasonably estimated. Liabilities provided for legal matters require judgements regarding projected outcomes and ranges of losses based on historical experience and recommendations of legal counsel. Litigation is however unpredictable and actual costs incurred could differ materially from those estimated at the balance sheet date.

Provisions for dismantling of property, plant and equipment are only recognised when a legal or constructive obligation arises.

For further information, see Item 8 Financial Information Legal Proceedings .

Adoption of IFRS during the year

The group has adopted International Financial Reporting Standards (IFRS) in preparing the consolidated financial statements for the year ending September 2006. The transition to IFRS is accounted for in accordance with IFRS 1 First-time Adoption of International Financial Reporting Standards with October 2004 as the date of transition. The changes in accounting policies as a consequence of the transition to IFRS are described below as well as reconciliations of the effects of the transition to IFRS.

IFRS 1 provides a number of exemptions in respect of the first time adoption of IFRS. These are areas where the retrospective application of IFRS is prohibited:

- The recognition of previously derecognised financial assets and financial liabilities under previous standards

- The designation of financial instruments for hedge accounting
- Changes to estimates, where estimates were previously determined with due consideration
- Assets classified as held for sale and discontinued operations

The application of the compulsory exemptions by Sappi Limited did not have a material impact on the financial position, financial results and cash flows of the group.

The group did not elect the following optional transitional provisions in terms of IFRS 1, due to the exemptions having no material impact on the group:

- Compound financial instruments
- Assets and liabilities of subsidiaries, associates and joint ventures
- Designation of previously recognised financial instruments
- Insurance contracts
- Decommissioning liabilities included in the cost of property, plant and equipment
- Leases
- Fair value measurement of financial assets or liabilities at initial recognition

The following exemptions in accordance with IFRS 1 were elected:

- ***Business Combinations IFRS 3***

The group has elected not to retrospectively apply the requirements of IFRS 3 for Business Combinations that occurred prior to October 2004. The estimates and measurement of fair values that would have been required at prior dates of acquisition to apply IFRS 3 retrospectively to all previous business combinations are not readily available and management is of the opinion that the cost would outweigh the benefit in applying aforementioned changes retrospectively. If the group had applied the statement retrospectively it would have been required to restate the value of goodwill and assess whether any intangible assets should have been recognised.

The prospective application of IFRS 3 had no impact on the prior year annual reported results due to the following:

- In terms of IFRS 3 original fair values are not required to be re-measured for business combination.
- Assets and liabilities acquired in business combinations are recognised and measured in the opening balance sheet in accordance with IFRS.
- No adjustment to goodwill is required for recognition of intangible assets of previous business combinations.
- No derecognition of intangible assets that do not satisfy the criteria for recognition under IAS 38 Intangible assets required.
- There is no contingency affecting the amount of the purchase consideration for past business combinations.

- The carrying amount of goodwill in the opening IFRS balance sheet is the carrying amount under SA GAAP at the date of transition to IFRS. Goodwill is no longer amortised.
- Goodwill is now tested for impairment annually.

83

If the Group had applied IFRS 3 retrospectively, the carrying value of property, plant and equipment; intangible assets; financial liabilities; contingent liabilities and goodwill may have been different from those currently reported.

- ***Share-based payment IFRS 2***

The group has elected the share-based payment exemption therefore IFRS 2 is only applicable to equity instruments granted after 7 November 2002 that were not vested by January 1 2005. For instruments vesting on or after 1 January 2005, Sappi has recognised a charge in the income statement and set up a separate category in shareholders' equity for all share options and awards, based on the fair value of the awards as calculated at the grant date. The date was selected as it was permitted in terms of IFRS 2.

If the group had applied the provision of IFRS 2, it would have resulted in an increased share-based payment expense in the period, for all outstanding share options awarded. If the group had applied the statement retrospectively it would have resulted in an increase of the expense recognised of US\$2 million.

- ***The Effects of Changes in Foreign Exchange Rates IAS 21***

Sappi has elected to apply the exemption in IFRS 1 which allows the cumulative translation differences of all foreign operations to be reset to zero by transfer to distributable reserve at the date of transition to IFRS which is October 2004. An amount of US\$244 million was transferred from the Foreign Currency Translation Reserve to retained income on the transition to IFRS.

If the group had not reset the cumulative translation difference (Foreign Currency Translation Reserves, FCTR) to zero, this would have resulted in a decrease in distributable reserves and an increase in the FCTR balance.

Adjustments on adoption of IFRS

The adoption of IFRS led to changes in the Group's financial position, financial performance and cash flows. The significant differences between previously reported SA GAAP financial statements and IFRS are as follows:

- a Share-based Payment IFRS 2**

Sappi has recognised a charge of US\$10 million for the year ended September 2005 in the income statement and set up a separate category in shareholders' equity for all share options and awards, based on the fair value of the awards as calculated at the grant date. The cost of the share options and grants are reflected in the income statement over the vesting period. This IFRS change had no impact on the comparative total shareholders' equity as a Share Based Payment Reserve (US\$20 million at September 2005) is created with the equal and opposite amount included in retained earnings.

- b The Effects of Changes in Foreign Exchange Rates IAS 21**

Sappi has elected to apply the exemption in IFRS 1 which allows the cumulative translation differences of all foreign operations to be reset to zero at the date of transition to IFRS which is October 2004. The Foreign Currency Translation Reserve (Non-Distributable Reserve) was transferred to retained earnings. This resulted in a decrease of the Foreign currency translation reserve of US\$244 million and a corresponding increase in retained earnings of US\$244 million at the date of transition. This IFRS change did not impact on total shareholders' equity.

c Financial Instruments IAS 39

The amendments to IAS 39 include a change in emphasis whereby a transfer of risks and rewards associated with financial assets becomes the primary test in determining whether a financial asset should be derecognised. A secondary test is then whether the entity has control over the related special purpose entity. A significant portion of our securitised receivables has now been reflected on our balance sheet, increasing trade and other receivables by US\$268 million and short-term debt by US\$346 million and decreasing other payables by US\$78 million at September 2005. The related expense is no longer reflected in SG&A but is included under finance costs. This caused an increase in finance costs and decrease in SG&A of US\$15 million for the year ended September 2005.

Cash flow hedges on inter-company loans, previously accounted for in equity as a Hedging reserve, no longer qualify for hedge accounting under IAS 39. As a result these instruments are now recognised at fair value through profit and loss. A profit of US\$22 million was recognised for the year ended September 2005. This amendment had no impact on total shareholders' equity as the Hedging reserve disclosed in last year's financial statements of US\$14 million is now included in retained earnings.

d Employee Benefits IAS 19

In December 2004, the IASB (International Accounting Standards Board) published an amended version of IAS 19 which introduced an option to recognise actuarial gains and losses in the period in which they occur outside profit or loss in a statement of recognised income and expense. Sappi has elected to adopt this amendment at the date of transition (October 2004). Previously unrecognised actuarial employee benefit losses were recognised at October 2004, resulting in an increase in pension and other post employment benefits liabilities (September 2005: US\$249 million, October 2004: US\$227 million), a decrease in pension and other post employment benefit assets (September 2005: US\$86 million, October 2004: US\$74 million) and a corresponding reduction in equity and deferred tax liability. At October 2004 the deferred tax assets increased by US\$56 million and deferred tax liabilities decreased by US\$37 million. At September 2005 deferred tax liabilities decreased by US\$44 million and deferred tax asset by US\$2 million. This amendment also led to a reduction in employee benefit expense for the year of US\$23 million.

The actuarial gains and losses are recognised outside of profit for the period in the statement of recognised income and expense (SORIE). Items processed through SORIE are tax effected through SORIE. Part of the first time adoption of this method of accounting included a historic analysis of all pension fund movements to determine the portion of our deferred tax balances that relate to SORIE. During 2005 the deferred tax asset for Sappi Fine Paper North America was derecognised therefore the deferred tax asset raised at October 2004 of US\$57 million was released. This valuation allowance raised against the deferred tax asset resulted in a credit to deferred tax in profit and loss of US\$5 million and a debit to SORIE of US\$62 million.

The option of setting the corridor to zero was not applicable because the group elected to apply SORIE accounting to actuarial gains and losses.

e Property, Plant and Equipment IAS 16

Changes to IAS 16 Property, Plant and Equipment include the requirement that the useful lives of fixed assets are re-evaluated on an annual basis, changed capitalisation criteria and more explicit guidance on the capitalisation of fixed assets. These changes have led to the revision of the relevant accounting policies. In addition a detailed review of the Group's assets including a benchmarking exercise against peer-group companies was completed. Management concluded that no adjustment to the carrying value of property, plant and equipment was necessary with the first-time adoption of

IFRS. The Group did not apply the exemption to deem the fair value or re-valued amounts of property, plant and equipment as deemed cost due to the previous accounting standard being consistently applied.

Changes in Accounting Policies and Practices

The following standards and interpretations, which have been issued but which are not yet effective, have not been applied in these financial statements:

Amendment to IAS 1: Presentation of Financial Statements (added disclosure about an entity's capital)

The revised IAS 1 requires an entity to disclose qualitative information about its objectives, policies and processes for managing capital and a summary of quantitative data about what it manages as capital. It also requires disclosure of whether during the period it complied with any externally imposed capital requirements to which it is subject and when the entity has not complied with such externally imposed capital requirements, the consequences of such non-compliance. This standard has no impact on the figures presented in the income statement and balance sheet.

IAS 21: Amendment to International Accounting Standard 21 The Effects of Changes in Foreign Exchange Rates: Net Investment in a Foreign Operation

The amendment clarifies the requirements of IAS 21 regarding an entity's investment in foreign operations. The amendment does not have an impact on the group, and first becomes applicable for the financial year ending September 2007.

IAS 39: Financial Instruments: Recognition and Measurement Amendments

The amendment clarifies embedded derivatives (paragraph 11A) and fair value considerations (paragraph 48A). The application of the amendments is not expected to have a significant impact on the group's reported results, financial position and cash flows. The amendment first becomes applicable for the financial year ending September 2007.

IFRS 7: Financial Instruments: Disclosures

This standard prescribes the level of disclosure required for financial instruments, both in terms of quantitative data and qualitative data. The implementation of this standard will not have a material impact on the presented financial position or results of operations.

IFRS 8: Operating Segments

IFRS 8 requires an entity to report financial and descriptive information about its reportable segments. Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Generally, financial information is required to be reported on the basis that it is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments.

The effective date of IFRS 8 for the group is for the financial year ending September 2009 and the impact is currently being assessed by management.

IFRIC 4: Determining whether an Arrangement contains a Lease

The Interpretation states that an arrangement that grants the right to control the use of an underlying specific asset is, or contains, a lease that should be accounted for in accordance with IAS 17 Leases.

The implementation of this interpretation is not expected to have a material impact on the results of operations.

IFRIC 8: Scope of IFRS 2

This interpretation clarifies that IFRS 2 Share-based Payment applies to arrangements where an entity makes share-based payments for apparently nil or inadequate consideration.

IFRIC 8 states that, if the identifiable consideration given appears to be less than the fair value of the equity instruments granted or liability incurred, this situation typically indicates that other consideration has been or will be received. IFRS 2 therefore applies.

IFRIC 8 is effective for the group for the year ending September 2007. Management is of the opinion that the adoption of this statement will not have a material impact on the financial position of the Group.

IFRIC 9: Reassessment of Embedded Derivatives

This interpretation states that management is only required to re-examine embedded derivative when it enters into a new contract or modifies an existing contract. The implementation of this interpretation is not expected to have a material impact on the Group.

Management has not finalised their assessment of the potential impact that the implementation of these standards and interpretations will have on the group financial statements.

IFRIC 10: Interim Financial Reporting

The interpretation addresses an apparent conflict between the requirements of IAS 34 Interim Financial Reporting and those in other standards on the recognition and reversal in financial statements of impairment losses on goodwill and certain financial assets. The interpretation concludes that an entity shall not reverse an impairment loss recognised in a previous interim period in respect of goodwill, or an investment in either an equity instrument or a financial asset carried at cost.

The interpretation will have no impact on the Group's results, and first becomes applicable for the financial year ending September 2008.

IFRIC 11, IFRS 2: Group and Treasury Share Transactions

This interpretation provides guidance on applying IFRS 2 in three circumstances:

Share-based payment involving an entity's own equity instruments in which the entity chooses or is required to buy its own equity instruments (treasury shares) to settle the share-based payment obligation – is this an equity-settled or cash-settled transaction?

A parent grants rights to its equity instruments to employees of its subsidiary – how to account in the individual entities' financial statements?

A subsidiary grants rights to equity instruments of its parent to its employees – how to account in the individual entities' financial statements?

IFRIC 11 is effective for the Group's results for the year ending September 2008. Management are currently reviewing the impact that this interpretation will have on the Group.

AC 503: Accounting for Black Economic Empowerment (BEE) Transactions

AC 503 covers the following three issues:

a Should the difference between the fair value of the equity instruments granted and the cash and other assets received, i.e. BEE equity credentials, be recognised as an intangible asset, or as an expense?

b Where BEE equity credentials are obtained as part of the net assets acquired in a business combination, how should the BEE equity credentials acquired be accounted for?

c Assuming that BEE equity credentials do not meet the criteria for recognition as an intangible asset, how should vesting be interpreted in the context of BEE transactions?

AC 503 will not have an impact on the Group, and becomes applicable for the year ending September 2007. The group will evaluate this standard when implementing potential BEE transactions.

For a detailed analysis of the impact of the first time adoption of IFRS refer note 2.5 to our Group annual financial statements included elsewhere in this Annual Report.

United States GAAP Reconciliation

Our Group Annual Financial Statements are prepared in accordance with IFRS, which differs from United State GAAP in certain respects. We reconcile our results annually with United States Generally Accepted Accounting Principles (GAAP) (see note 35 to the Group Annual Financial Statements).

A comparison of our restated results and shareholders' equity for fiscal 2006 and fiscal 2005 under IFRS and after reflecting certain adjustments which would arise if United States GAAP were to be applied instead of IFRS, is as follows:

	2006 US\$ million	2005 US\$ million
Net Income		
Net Loss under IFRS	(4)	(184)
United States GAAP reconciling items	(112)	(161)
Net Loss under United States GAAP	(116)	(345)
Basic loss per share under United States GAAP (US cents)	(52)	(154)
	US\$ million	US\$ million
Shareholders' equity		
Shareholders' equity under IFRS	1,386	1,589
United States GAAP reconciling items	(30)	2
Shareholders' equity under United States GAAP	1,356	1,591

As more fully described and quantified in note 35 to our Group annual financial statements, the major differences between IFRS and United States GAAP relate mainly to secondary tax on undistributed reserves, fair value hedges, accounting for plantations, accounting for business combinations, defined benefit pensions and post-retirement medical benefits. The US GAAP numbers for prior years have been restated for new accounting policies. See note 35 to our Group annual financial statements included elsewhere in this Annual Report for further detail.

Other Items

South African Exchange Controls

South Africa's exchange control regulations provide for restrictions on the exporting of capital and for various other exchange control matters. Transactions between residents of the Common Monetary Area (comprising the Republic of South Africa, the Republic of Namibia and the Kingdoms of Lesotho and Swaziland), on the one hand (including corporations), and non-residents of the Common Monetary Area, on the other hand, are subject to these exchange control regulations which are enforced by the Exchange Control Department of the South African Reserve Bank (Excon).

The present exchange control system in South Africa is used principally to control capital movements. South African companies are generally not permitted to export capital from South Africa or to hold foreign currency or foreign assets without the approval of the South African exchange control authorities. Foreign investment by South African companies is also restricted. As a result, a South African company's ability to raise and deploy capital outside the Common Monetary Area is restricted. The granting of loans from outside South Africa to Sappi Limited or its South African subsidiaries and their ability to borrow from non-resident sources is regulated. Further, where 75% or more of a South African company's capital, assets, earnings, voting securities, voting power, power of control or earnings are directly or indirectly controlled by or vested in non-residents of South Africa, the company is designated an "affected person" and certain restrictions are placed on its ability to obtain local financial assistance.

The South African authorities have expressed a commitment to a phased liberalisation of exchange controls and have relaxed certain exchange controls over recent years.

Some of the more salient recent changes to the South African exchange control regulations regarding South African corporations are as follows:

- South African corporations wishing to establish new approved foreign ventures are now permitted to transfer funds abroad for this purpose. There is no limit to the amount of funds which may be transferred except that, the foreign investment may only be acquired and such funds may only be transferred abroad once Excon has approved the type of foreign investment, which it will only do if the foreign investment accords with its foreign investment criteria (applicable at the relevant time), and with regard to larger foreign investments Excon may require capital outflows to be staggered in order to manage the potential impact on the foreign exchange market. Excon approved investments into Africa no longer require the South African investor to exercise control (namely 50% plus one share) over the foreign investment into Africa.
- South African corporations which have been granted approval to transfer funds abroad for purposes of acquiring an approved foreign investment, will now be entitled to retain abroad foreign dividends which relate to the operation of the approved foreign investment and any foreign dividend which may have been repatriated to South Africa after 26 October 2004, may thereafter be transferred abroad again, at any time and for any purpose other than for purposes of a non-resident (which is directly or indirectly controlled by a South African resident) using such funds to reinvest into the South African market.
- South African corporations wishing to invest abroad may apply for permission to use corporate assets or share swaps and share placement transactions to finance approved foreign investments. The latter mechanism entails the placement of the locally quoted company's shares with long term overseas holders who, in payment for the shares, provide the foreign currency abroad which the company then uses to acquire the target investment. Since February 2001, institutional investors are no longer entitled to make use of the asset swap mechanism but are, however, entitled to acquire foreign portfolio investments of either 20% or 25% of total assets, depending on the type of institutional investor.

Controls on current account transactions, with the exception of certain discretionary expenses, have been abolished and are now dealt with by authorised dealers in terms of the Exchange Control Rulings.

Authorised dealers in foreign exchange may, against the production of suitable documentary evidence, provide forward cover to South African residents in respect of fixed and ascertained foreign exchange commitments covering the movement of goods.

It is not possible to predict whether existing exchange controls will be abolished, continued or modified by the South African Government in the future.

For further information, see Item 10 Additional Information Exchange Controls .

Environmental Matters

We operate in an industry subject to extensive environmental regulations. Typically, we do not separately account for environmental operating expenses but do not anticipate any material expenditures related to such matters. We do separately account for environmental capital expenditures. See note 34 to our Group annual financial statements included elsewhere in this Annual Report for a discussion of these matters.

For further information, see Item 4 Information on the Company Environmental and Safety Matters .

Research and Development, Patents and Licenses, etc.

Our research and development efforts focus on the improvement of product quality and production processes as well as the development of new products. Research and development is managed at a number of regional technology centres. These centres of excellence provide the basis to leverage unique sets of skills and provide customer focused product development. We spent approximately US\$24 million and US\$27 million on research and development activities during fiscal 2006 and fiscal 2005, respectively.

North America

Sappi Fine Paper North America's research and development activities are centred at Westbrook. This centre has a proud history of product innovation; for example, it developed both one- and two-sided coated paper.

In addition, Sappi Fine Paper North America has a number of proprietary technologies, including the on-line finishing technology and its Ultracast® electron-beam technology. Sappi Fine Paper North America on-line finishing technology is used in its production of coated paper at Somerset and Muskegon. Sappi Fine Paper North America's Ultracast® technology is utilised in speciality papers such as release papers used in the production of high fidelity imitation leather and other surfaces.

Europe

Sappi Fine Paper Europe maintains research and development centres at its Maastricht and Gratkorn sites. These facilities work closely with the research facility at Sappi Fine Paper North America in order to achieve efficiencies and ensure rapid implementation of improvements.

Sappi Fine Paper Europe's research and development centres have concentrated on developing new paper qualities. The research and development effort has developed coated fine paper of outstanding quality. The paper which was developed satisfies the demands of modern high performance printing machines, while maintaining a consistent quality between the paper produced at the various Sappi mills. The Maastricht research and development centre also has overseen the introduction of triple coating through the use of its triple blade coating concept. More recently, the research and development centres have concentrated on optimising product characteristics in relation to various types of paper machines at each mill, in order to improve efficiencies and quality of production. In 1990, the Alfeld mill became the first mill to produce coated fine paper using 100% totally chlorine-free (TCF) pulp.

Southern Africa

Sappi Forest Products focuses upon developing technology related to plantation forestry, pulping, bleaching and related environmental technology and chemical cellulose (dissolving pulp) technology. In the 1970s, we patented the Sapoxal oxygen bleaching process and licensed the technology in major pulp and paper manufacturing countries. This process facilitates the reduction or elimination of elemental chlorine in pulp bleaching. Oxygen bleaching has subsequently become an industry standard. At our

Technology Centre in Pretoria, we continue our research and development related to bleaching, and are currently involved in biotechnology research, which is being conducted in order to develop a more environmentally friendly pulping and bleaching process. We are also a leader in technology aimed at reducing water consumption in pulp and paper mills. At our forest research centre in Tweedie, we focus upon the genetic improvement of plantation forests so as to maximise the yield of high quality pulp. Research on the modification of fibres to enhance characteristics for end products is also currently being conducted.

We are also active in chemical cellulose research for Saiccor. The focus is largely on product development to provide more product options and this has allowed us to expand the value added product range from Saiccor. Most significantly our chemical cellulose is used to produce high quality viscose, acetate, feminine healthcare products and food additives.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Directors and Senior Management

The Articles of Association of Sappi Limited provide that the Board of Directors (the Board) must consist of not less than four nor more than twenty Directors at any time. The Board currently consists of twelve Directors.

The business address for all of the Directors is 48 Ameshoff Street, Braamfontein, Johannesburg 2001, Republic of South Africa. The Directors are South African citizens except for Meyer Feldberg and James Healey (United States citizens), Wolfgang Pfarl (an Austrian citizen), Klaas de Kluis (a Dutch citizen), Helmut Mamsch (a German citizen) and Sir Nigel Rudd (a British citizen).

Chairman

Eugene van As (67).

Mr van As joined Sappi in December 1976 as the Managing Director of Sappi Kraft (Pty) Limited and was appointed to the board in January 1977. In 1978, Mr van As was appointed Group Managing Director and Chief Executive Officer, Sappi Limited, becoming Executive Chairman in 1991 and Non-executive Chairman on his retirement as an Executive Director in 2003. Following Mr Jonathan Leslie's resignation as Chief Executive Officer of Sappi in March 2006, Mr van As was requested by the board to assume executive responsibilities for the group until a new Chief Executive Officer is appointed. Mr van As is also a Director of Sanlam Limited and a trustee of a number of education and research bodies.

Non-Executive Directors

David Charles Brink (67) (independent, senior non-executive). MSc Eng (Mining), DCom (hc), Graduate Diploma (Company Direction).

Mr Brink was appointed a Non-executive Director of Sappi Limited in March 1994 and in March 2006 he was appointed senior independent director upon Mr Jonathan Leslie's resignation as chief executive officer and Eugene van As agreeing to assume executive responsibilities until the appointment of a new chief executive officer. Mr Brink is currently a member of the Audit Committee, Chairman of the Compensation Committee and a member of the Nomination and Governance Committee. He is Chairman of Unitrans Limited and Deputy Chairman of Absa Bank Limited and Absa Group Limited. He is a director of BHP Billiton Limited and BHP Billiton plc. Mr Brink is also a board member of the National Business Initiative, co-chairman of the Business Trust, a founder member of the Independent Directors Initiative and vice-president of the South African Institute of Directors.

Klaas de Kluis (70) (independent). Master of Law.

From January 1998 until July 1998, Mr de Kluis acted as Chairman of the Executive board of NV Koninklijke KNP BT (now Buhrmann NV). He held the position of Vice Chairman of the Executive board of NV Koninklijke KNP BT from March 1993 to April 1996. Presently he is a member of the supervisory boards of a number of private companies in the Netherlands and is Chairman of the Audit Committee of the board of directors of Sappi Limited. Mr de Kluis was appointed to the board of directors of Sappi Limited in January 1998. Having reached the mandatory retirement age for non-executive directors of Sappi Limited, Mr de Kluis will retire from the board at the end of December 2006.

Meyer Feldberg (64) (independent). BA, MBA, PhD.

Professor Feldberg's career has included teaching and leadership positions in the business schools of the universities of Cape Town, Northwestern and Tulane. He is currently Dean Emeritus and Sanford C. Bernstein Professor of Leadership and Ethics at Columbia Business School. He is also a Senior Advisor to Morgan Stanley in New York. Professor Feldberg serves on the Advisory Board of the British American Business Council and has served on the Council of Competitiveness in Washington, DC. In 2001, the International Centre in New York honored Professor Feldberg as a distinguished foreign-born American who has made a significant contribution to American life. He is a director of major public companies including Federated Department Stores, Inc., Revlon, Inc., Primedia, Inc. and UBS Funds. Professor Feldberg was appointed to the Board of Directors of Sappi Limited in March, 2002 and is currently Chairman of the Nomination and Governance Committee and a member of the Compensation Committee.

James Edward Healey (65) (independent). BSc (Public Accounting), Honorary Doctor (Commercial Science), Certified Public Accountant (USA).

Mr Healey joined the Sappi Limited board with effect from July 2004. He is a member of the Audit Committee of Sappi Limited and also a member of the Human Resources Committee. He is Chairman of the Audit Committee of Sappi Fine Paper North America. He has held various senior financial positions in a career spanning 37 years. In 1995, Mr Healey became Vice President and Treasurer of Bestfoods, formerly CPC International Inc. In 1997 he became Executive Vice President and Chief Financial Officer of Nabisco Holdings Inc, one of the world's largest snack food manufacturers, a position from which he retired at the end of 2000. He is a member of the board of directors of Interchange Financial Services Corporation.

Deenadayalen (Len) Konar (52) (independent) BCom, MAS, DCom, CA (SA).

Previously Professor and Head of the Department of Accountancy at the University of Durban-Westville. He is a member of the King Committee on Corporate Governance, the Securities Regulation Panel and the Institute of Directors. Companies of which he is a Non-executive Director include Old Mutual South Africa, the South African Reserve Bank, Kumba Resources Limited, Illovo Sugar, JD Group and Steinhoff International Holdings. Dr Konar joined the board of Sappi Limited in March 2002. He is a member of the Audit Committee and the Human Resources Committee as well as the Chairman of the Audit Committee of Sappi southern Africa region. He is a member and is Chairman of the External Audit Committee of the International Monetary Fund in Washington.

Helmut Claus-Jurgen Mamsch (62) (independent).

Mr Mamsch studied economics at Deutsche Aussenhandels-und Verkehrs-Akademie, Bremen and also received training in business administration and shipping in Germany, the UK and Belgium. He worked for 20 years in international trade and shipping. In 1989 he joined VEBA AG (now E.ON AG), Germany's largest utility-based conglomerate. From 1993 to 2000 he was a VEBA AG management board member and as from 1998 responsible for their US electronic businesses and their Corporate Strategy and

Development. In 1997 he joined Logica as a Non-executive Director and in 2002 was appointed Deputy Chairman. He is chairman of Electrocomponents plc and also a Non-executive Director of GKN plc. Mr Mamsch was appointed as a Non-executive Director of Sappi Limited in January 2004 and is currently a member of both the Audit Committee and the Compensation Committee of Sappi Limited. He is Chairman of the Audit Committee of Sappi Fine Paper Europe.

Bridgette Radebe (46) (independent). BA (Pol Sc & Socio)

In the last 16 years, Ms Radebe has worked in a broad range of sectors across industry and commerce with a particular focus in mining. Ms Radebe is the founder and Executive Chairperson of Mmakau Mining, President of the South African Mining Development Association and Vice Chairman of the Minerals and Mining Development Board. She was closely involved in developing the Mineral & Petroleum Resources Development Act and the Mining Charter. She is a Director of the Women Private Equity Fund. Ms Radebe joined the Sappi Limited board in May 2004 and is a member of the Human Resources Committee and also the Non-executive representative on the Sustainability Committee, a management committee of Sappi Limited.

Nigel Rudd (60) (independent) DL, Chartered Accountant

Sir Nigel Rudd joined the Sappi board in April 2006. He has held various senior management and board positions in a career spanning more than 35 years. He founded Williams plc in 1982 and the company went on to become one of the largest industrial holding companies in the United Kingdom. He is chairman of Alliance Boots plc and Pendragon plc, deputy chairman of Barclays plc and a non-executive director of BAE Systems plc. He was non-executive chairman of Pilkington plc from August 1994 to June 2006. He was knighted by the Queen for services to the manufacturing industry in 1996 and holds honorary doctorates at both Loughborough and Derby Universities. In 1995 he was awarded the Founding Societies Centenary Award by the Institute of Chartered Accountants. He is a Deputy Lieutenant of Derbyshire and a Freeman of the City of London.

Franklin Abraham Sonn (67) (Independent), BA Hons, HdipEd

Dr Sonn was appointed to the board of directors of Sappi Limited in July 1999 and is currently also a member of the Nomination and Governance Committee. He was formerly Rector of Peninsula Technikon for 17 years and appointed democratic South Africa's first ambassador to the United States from 1995 to 1998. Dr Sonn is the recipient of twelve honorary doctorates in law, education, humanities and philosophy from various institutions in South Africa, Europe and North America. His current board positions include amongst others, Chairman of African Star Ventures (Pty) Ltd, Airports Company of South Africa Ltd, Kwezi V3 Engineers (Pty) Ltd and Ekapa Mining (Pty) Ltd. He is non-executive Director of Absa Group Ltd, Absa Bank Ltd, Absa Personal Bank, Steinhoff International Holdings Ltd, Pioneer Food Group Ltd, RGA Reinsurance Co. of S.A. Ltd, Metropolitan Holdings Ltd and Macsteel Holdings (Pty) Ltd. He currently serves as Chancellor of the University of the Free State (since 2002), Executive in Residence at the University of Cape Town Graduate School of Business since 2005 and as Chairman, Trustee and Patron to numerous organizations of civil society.

Executive Directors

Wolfgang Pfarl (62) MS (Economics and Business Administration).

Chief Executive Officer of Sappi Fine Paper Europe. Mr Pfarl was appointed to his present position in December 1997 following Sappi's acquisition of KNP Leykam. In 1989, he was appointed Chairman of the Executive board of Leykam-Mürztaler and became Executive Chairman of KNP Leykam after the merger in 1993 of the fine paper production activities of NV Koninklijke KNP BT (now Buhrmann NV) and the Austrian paper producer Leykam-Mürztaler. Mr Pfarl was appointed to the board of Sappi Limited in December 1997.

Mark Richard Thompson (54) BCom, BAcc, LLB, Chartered Accountant (South Africa)

Chief Financial Officer of Sappi Limited. Mr Thompson joined Sappi in 1999 as Group Corporate Counsel. He was appointed to his present position in August 2006 when he was also appointed to the board of Sappi Limited. Prior to joining Sappi, he was group Treasurer at Anglo American, Managing Director of Discount House Merchant Bank and previously Head of Corporate Finance Division of Senbank.

Senior Management

Veronica(Ronee) Hagen (60), Chief Executive Officer: Sappi Fine Paper North America

Ronee joined Sappi in November 2004. Prior to joining Sappi Ronee was Chief Customer Officer at Alcoa, Inc., in Chicago. She previously was Business Unit President of Alcoa Engineered Products. Ronee joined Alcoa after owning and operating Metal Sales Associates. She holds a B.A. in International Relations from the University of Southern California and has participated in executive education programs at the Wharton School and Harvard Business School.

Robert Hope (54), BA (Hons) Economics, MRICS. Group Head Strategic Development

Since joining Sappi in 1976, Robert Hope has held a number of management roles including General Manager of Sappi Sawmills, Managing Director of Sappi Trading and is currently Group Head Strategic Development.

André Wagenaar (61), Chief Executive Officer: Sappi Forest Products (Pty) Ltd

André joined Sappi in 1992 as Managing Director of Sappi Timber Industries. In 2000, he was appointed Managing Director of Sappi Forests, responsible for Sappi's plantations and sawmills in South Africa. He was appointed to his current position on 01 January 2004. André holds a B.Sc degree in Chemistry from the University of Stellenbosch, South Africa.

Dr Rudolf Thummer (59), Group Head Technology

Rudolf Thummer joined Hannover Papier in 1979 (later purchased by Sappi) as Manager of Research and Development. In 1982, he became the Paper Mill Manager at Alfeld Mill. In 1990, he was appointed Technical Director of Alfeld Mill. In 1992 Rudolf became an Executive Board Member of the Hannover Papier Group, responsible for Manufacturing at the Alfeld and Ehingen mills. 1998, he moved to Sappi Fine Paper Europe based in Brussels, as Technical Director and Executive Board Member. He was appointed to his current position on 01 January 2006. Rudolf holds a Doctorate in Technical Sciences, and a qualified engineer's degree from the Graz Technical University in Austria.

Executive Officers

The Executive Directors and the people listed as senior management above are the Executive Officers of Sappi.

Board Practices

At every annual general meeting of Sappi Limited, as near as possible to, but not less than, one third of the Directors are required to retire from office but are eligible for re-election. The Directors to retire are those who have been longest in office since their last election, or as between Directors who have been in office for an equal length of time since their last election, in the absence of agreement, determined by lot. In addition, the appointment of any Director appointed since the last annual general meeting will require to be confirmed, failing which the appointment will cease.

Following the Board's decision to split the roles of Chairman and Chief Executive Officer, Jonathan Leslie was appointed as Director and Chief Executive of Sappi Limited effective from April 2003 and Eugene van As was appointed as Non-Executive Chairman. However subsequent to Mr Leslie's resignation in March 2006, at the request of the Board, Mr. van As agreed to assume executive responsibilities for the Group until the appointment of a new chief executive. At the same time Mr D C Brink was appointed senior independent director by the Board.

In terms of the Articles of Association of Sappi Limited, Mr. van As' term of office in line with all other Directors will be a maximum of three years per term. His current term will end at the annual general meeting in March 2009. Likewise Mr. Brink's term of office remains a maximum of three years per term and his current term will end at the annual general meeting in March 2008.

The following table sets forth the terms of office of the other Directors.

Name	Start of term	Latest date of end of term
David Charles Brink	2005	2008
Meyer Feldberg	2005	2008
James Edward Healey	2005	2008
*Klaas de Kluis	2006	2006
Deenadayalen Konar	2006	2009
Helmut Claus-Jürgen Mamsch	2004	2007
Wolfgang Pfarl	2005	2008
Bridgette Radebe	2005	2008
Sir Nigel Anthony Russell Rudd	2006	2007
Franklin Abraham Sonn	2005	2008
Eugene van As	2006	2009
Mark Richard Thompson	2006	2007

* Having reached mandatory retirement age, Mr de Kluis will retire from the board at the end of December 2006.

No retirement or other benefits arise from the retirement of Directors by rotation or on termination for any other reason.

Compensation

The non-executive directors fees are proposed by the Executive Committee and agreed by the Human Resources Committee and approved by the Board. In addition to these non-executive directors fees, Sappi agreed in fiscal 2006 to compensate Mr. E van As through the delivery of 100,000 shares, of which 50,000 shares were purchased on his behalf and delivered in September 2006 (US\$646,884) and 50,000 shares are deliverable in March 2007. In fiscal 2005 he received a retainer of US\$166,886.

See notes 37 to 39 to our Group annual financial statements contained elsewhere in this Annual Report for details, by director, on Directors remuneration, Directors' interests and Directors' participation in the Sappi Limited Share Incentive Trust and Sappi Limited Performance Share Incentive Plan.

See note 32 to our Group annual financial statements for details of payments to senior management which is reflected under related party interests.

Audit Committee

An Audit Committee of the Board was established in 1984 and assists the Board in discharging its responsibilities to safeguard the Group's assets, maintain adequate accounting records and develop and maintain effective systems of internal financial control. It also oversees the financial reporting process and is concerned with compliance with accounting policies, Group policies, legal requirements and internal controls within the Group. It interacts with and evaluates the effectiveness of the external and internal audit process and reviews compliance with the Group's code of ethics.

The Audit Committee consists of five independent Non-Executive Directors of the Board (Klaas de Kluis (Chairman), David Charles Brink, James Edward Healey, Deenadayalen Konar and Helmut Claus Jürgen Mamsch) and is directed by a specific mandate from the Board. The adequacy of the mandate is reviewed and reassessed annually. The Audit Committee meets with senior management, which includes the Chief Executive Officer (at present including the Chairman, Mr van As as part of his executive responsibilities until the appointment of a new chief executive officer) and the Chief Financial Officer, at least four times a year. The external and internal auditors attend these meetings and have unrestricted access to the Committee and its Chairman. The Audit Committee also meets at least once per year with the management Disclosure Committee. The external and internal auditors meet privately with the Audit Committee Chairman on a regular basis. The Audit Committee Chairman attends the annual general meeting.

Regional audit committees exist in the three major regions and are chaired by independent Non-Executive Directors. These committees have a mandate from the group's audit committee, to whom they report on a regular basis and they meet at least four times per year.

Nomination and Governance Committee

The Nomination and Governance Committee of the Board consists of three independent Non-Executive Directors (David Charles Brink, Meyer Feldberg (Chairman) and Franklin Abraham Sonn) and Eugene van As, the Chairman of the Group. The Committee considers the composition of the Board, retirements and appointments of additional and replacement Non-Executive Directors and makes appropriate recommendations to the Board. As Chief Executive Officer Mr Leslie attended meetings by invitation prior to his resignation and once appointed, his successor will likewise be invited to attend meetings.

Human Resources Committee

The Human Resources Committee of the Board consists of three independent Non-Executive Directors (James Edward Healey, Deenadayalen Konar and Bridgette Radebe) and Eugene van As, the Chairman of the Group and of the Human Resources Committee. The responsibilities of the Committee are, among other things, to determine human resource policy and strategy. Human Resources Committees exist for all the company's major operating subsidiaries outside of southern Africa.

Compensation Committee

The Compensation Committee of the Board consists of four independent Non-Executive Directors (David Charles Brink (Chairman), Meyer Feldberg, Helmut Claus-Jurgen Mamsch and Nigel Rudd. The responsibilities of the Committee are mainly to determine the remuneration and incentives in respect of the Chief Executive Officer (when appointed) and those executives reporting directly to the Chief Executive Officer (at present to the Chairman Mr van As as part of his executive responsibilities).

Corporate Governance

The New York Stock Exchange (NYSE) requires compliance with its corporate governance rules. The application of these NYSE rules is restricted for foreign companies, recognizing that such companies have to comply with domestic requirements. As a foreign private issuer, Sappi must comply with four NYSE corporate governance rules:

- Satisfy the audit committee requirements of the Securities and Exchange Commission (SEC);
- Chief Executive Officer must promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any material non-compliance with any applicable provisions of Section 303(A) of the Sarbanes-Oxley Act of 2002;
- Provide a brief description of any significant difference between its corporate governance practices and those followed by US companies under the NYSE listing standards, and
- Maintain a publicly accessible website that includes a printable version of its audit committee charter and the description of significant differences in corporate governance practices mentioned above. In accordance with new NYSE rules, Sappi continues to make available on its website its Annual Reports on Form 20-F.

As Sappi is listed on the JSE Limited in Johannesburg, Sappi is required to comply with the King Report on Corporate Governance for South Africa 2002. Although there are differences between the King Report and the NYSE corporate governance rules, Sappi believes it is in compliance with the King Report and has otherwise voluntarily adopted corporate governance practices comparable in all significant respects to the requirements of the NYSE corporate governance rules except as described below.

New York Stock Exchange (NYSE)

Corporate Governance Rules

1. *Nominations / Corporate Governance Committee*

Listed companies must have a nomination/corporate governance committee composed entirely of independent directors

Sappi's Governance Practice

Sappi has a nominations committee composed of four non-executive directors, of whom three are independent.

Employees

The following table sets forth the number of employees as at the close of each fiscal year ended September.

	2006	2005
Sappi Fine Paper		
North America	2,630	2,781
Europe	5,163	5,437
Southern Africa	1,910	1,879
Sappi Forest Products	5,251	5,254
Sappi Trading	154	162
Corporate Office	91	105
Total	15,199	15,618

North America

At the end of September 2006, Sappi Fine Paper North America had 2,630 employees, down from 2,781 in September 2005. The headcount reductions during fiscal 2006 are the result of closing out the

restructuring initiatives that occurred at Muskegon Mill and throughout the regional head office staff with the closure of the PM 4 machine and pulp mill.

Approximately 65% of employees are represented by twelve international unions under nine different contracts. The labour contracts for Cloquet, Allentown and the Westbrook Mill mechanical unions (four) were successfully negotiated in 2003. In fiscal 2006, there was significant progress in completing contract negotiations with the United Steel Workers Union (USW). Labour contracts for Westbrook and Somerset mills were successfully negotiated in August 2006 for a two year and four year period respectively. Contracts at Muskegon and Cloquet are under negotiation. The Muskegon contract expired in August 2005 and the Cloquet contract in April 2006.

In addition to USW negotiations, a one year contract extension was successfully negotiated with the Westbrook Mill's four trade locals.

Sappi Fine Paper North America has experienced no work stoppage in the past fifteen years and believes that its relationship with its employees is satisfactory. While we hope to reach agreements in Muskegon and Cloquet, in the event that agreements cannot be reached and a prolonged work stoppage that results in a curtailment of output ensues at either of these sites, our business could be negatively affected.

Europe

Sappi Fine Paper Europe employed 5,163 people at the end of September 2006.

Headcount reductions of 650 people will take place in fiscal 2007 across all mills as well as support functions at the regional head office in Brussels. This is a result of detailed diagnostics and redesign of our systems, processes and structures to improve cost efficiencies and to position the organisation for growth.

Employees and their representative unions and work councils have been informed and consulted in line with statutory requirements and past practice. Social plans have been initiated at all sites and are at different stages of being finalised.

A substantial number of Sappi Fine Paper Europe employees are represented by trade unions.

Sappi Fine Paper Europe is subject to industry-wide collective agreements that are in place with trade unions in Germany, Austria and Belgium and which relate to its employees in each of the relevant mills. At our mills in The Netherlands and in the United Kingdom, Sappi Fine Paper Europe has entered into shop-floor agreements with the respective trade unions. Overall labour relations have been very stable in each of these countries.

In addition to trade unions, Sappi Fine Paper Europe also consults with various local, national and European works councils. These work councils serve primarily in an advisory role. Sappi Fine Paper Europe is required, under certain circumstances, to keep the works councils informed of activities that affect the work force and to consult with one or more of the works councils before proceeding with a course of action. This is especially relevant for any major reorganisation.

Southern Africa

Sappi employed 7,298 people in Southern Africa at the end of September 2006. Of this total, Sappi Fine Paper South Africa and Sappi Forest Products employed 1,910 and 5,251 people respectively, with the balance being employed by Sappi Trading 46 and Corporate 91. Unionized employees belong to one of four unions that enjoy recognition by Sappi, namely United Association of South Africa (UASA), Solidarity, the Swaziland Agricultural and Plantations Workers Union (SAPWU) and the Chemical, Energy, Paper, Printing, Wood and Allied Workers Union (CEPPWAWU), of which the latter is the largest.

In fiscal 2006, CEPPWAWU negotiated successfully to extend the bargaining unit to include salaried employees in the lower job categories (clerical and administrative staff). Under certain conditions, management retains the right to top-up salaries and other benefits of these employees to address market scarcity or performance.

We believe that we generally have had satisfactory relations with the trade unions operating at our southern African mills.

Recognising the impact of HIV on the workforce, the implementation of work place HIV prevention and care programmes have become essential components in maintaining productivity and global competitiveness. Following an initial anonymous voluntary study in 2003, a second comprehensive study was conducted at all operating units during 2005/6. The HIV prevalence rate is currently at 14% from 12.3% in 2003. Despite this percentage increase, indications are that there has been a slowing and in certain operating units a peaking of the infection rate due to a maturing of the disease. Statistically, the HIV prevalence in Sappi falls within the predicted prevalence in the total workforce in the country. The national average is 19.2%.

Our HIV/Aids response strategy places special emphasis on testing and counselling. Since August 2002, our medical care for employees has included treatment to prevent mother to child transmission. Anti-retroviral treatment has been offered to HIV-infected permanent employees from the beginning of 2003. Approximately 40% of the predicted HIV positive Sappi employees are registered on managed care programmes. Sappi has been quite successful in encouraging employees to join the voluntary counselling and testing programmes and where appropriate, ensure the registration on treatment programmes. Industry norm figures indicate a registration rate on treatment programmes of between 18.2% and 28%

In fiscal 2006 and 2007 the main objective of the HIV/AIDS prevention programmes is prevention of new infections and treatment of the already infected employee.

The Employment Equity Act (No. 55 of 1998) requires employers who employ 50 or more employees to implement affirmative action measures designed to ensure that suitably qualified persons from previously disadvantaged groups have equal employment opportunities and are equitably represented in the workforce of such employers. The provisions of the Employment Equity Act which pertain to the prohibition of unfair discrimination, the monitoring by employees and trade union representatives of compliance with the Act, the institution of legal proceedings concerning contraventions of the Act, the protection of employee rights and the formulation of codes of good practice and regulations pertaining to the Act were implemented on August 9, 1999. The implementation of the balance of the Act, dealing primarily with affirmative action measures, commenced on December 1, 1999. As required by the Act, Sappi drafted employment equity plans after consultation with representative employee forums and has submitted the prescribed reports to the Department of Labour as from May 2000. In October 2005, Sappi submitted an updated employment equity plan for the next five years.

The Skills Development Act (No. 97 of 1998), which came into force on September 10, 1999, provided an institutional framework to devise and implement workplace strategies in order to develop and improve the skills of the South African workforce. The financing of skills development is provided for under the Skills Development Levies Act by means of a levy/grant system.

The Skills Development Act, Skills Development Levies Act and the South African Qualifications Authorities Act (No. 58 of 1995), including amendments to the latter, have continued to receive significant attention during the past year. Equity forums established under the Employment Equity Act are mandated to serve as Learning Forums, and their constitutions, roles and responsibilities continue to be encouraged. The forums played a major role in preparing the Skills Plans submitted to the Forests Industries Education & Training Authority. A skills levy of 1%, specified in accordance with the Skills Development

Levies Act, was paid via Internal Revenue to the Forest Industries Education and Training Authority. With the amendments to the National Skills strategy for 2005 to 2010, the grant amounts and claim processes have significantly changed to ensure agreement between management and employee representatives is attained and that a project driven approach to initiatives is encouraged.

An amendment to the Skills Levy Act has resulted in the maximum recovery on the Skills Levies paid reducing to 50% with all other recoverable funds being allocated to project funding at the discretion of the Sector Education and Training Authority (SETA). The application and lobbying for a National Skills Grant has been successful with the Pulp and Paper Sector having been given principle approval for a ZAR32 million project of which ZAR22.6 million will come from National Skills Funds on confirmation of a memorandum of understanding. The project will focus on Artisan, Engineer, Technician and Management Practical Skills Development over the next three years.

Share Ownership

The Sappi Limited Share Incentive Scheme

We have offered a share purchase scheme to eligible Officers and employees since 1979. During March 1997, The Sappi Limited Share Incentive Scheme, as amended from time to time (the Share Incentive Scheme), was adopted at the Annual General Meeting of Sappi Limited. Under the Share Incentive Scheme, Officers or other employees of Sappi, its subsidiaries and other entities controlled or jointly controlled by Sappi selected by the Sappi Board of Directors are offered the opportunity to acquire shares (Scheme Shares), options to acquire shares (Share Options) or rights and options to enter into agreements with Sappi Limited or the Sappi Limited Share Incentive Trust to acquire shares (Allocation Shares). Participants may also be given the opportunity to acquire a combination of Scheme Shares, Share Options and Allocation Shares.

The Sappi Limited Performance Incentive Plan

From the 2005 fiscal year we have also offered a performance share scheme to eligible officers and employees. Under the Sappi Limited Performance Share Incentive Plan (the Performance Share Incentive Plan), officers or other employees of Sappi, its subsidiaries and other entities controlled or jointly controlled by Sappi selected by the Sappi Board of Directors are offered Conditional Contracts to acquire Shares for no cash consideration. If the performance criteria from time to time determined by the Human Resources Committee or Compensation Committee of the Board (Performance Criteria) applicable to each Conditional Contract are met or exceeded, then Participants are entitled to receive such number of shares as specified in the Conditional Contract for no cash consideration after the fourth anniversary of the date on which the board resolves to award a Conditional Contract to that Participant. The Performance Criteria entails a benchmarking of the company's performance against an appropriate peer group of companies.

For a detailed description of the Share Incentive Scheme, the Performance Shares Incentive Plan and recent amendments thereto, see note 30 to our Group annual financial statements included elsewhere in this Annual Report.

Directors and Senior Management

Edgar Filing: SAPPI LTD - Form 20-F

As of November 24, 2006, certain Directors of Sappi had been granted an aggregate of 165,500 Share Options, 258,500 Allocation Shares and 134,000 Performance Shares. None of the Directors and Senior Management of Sappi holds more than 1% of our issued share capital.

100

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**Major Shareholders**

The following table sets forth certain information with respect to the ownership of the ordinary shares, R1.00 par value, of Sappi Limited by the shareholders of record of Sappi Limited as of September 30, 2006, holding 5% or more of the outstanding ordinary shares.

Name of Registered Holder	Number of Shares	Percentage
Nedcor Bank Nominees Limited(1)	64,568,732	28.4
First National Nominees (Proprietary) Limited(1)	59,470,900	26.2
ABSA Nominees (Proprietary) Limited	36,078,654	15.9
Standard Bank Nominees (Transvaal) (Proprietary) Limited(1)	35,301,059	15.6

All Directors and Executive Officers as a Group(2)(3)	1,774,503	0.8

(1) The registered holders have advised us that they hold shares for numerous clients and there has not been any significant percentage change in the holdings for the last three years.

(2) Includes shares issuable upon exercise of options granted under Sappi's Share Incentive Scheme. See Item 6 Directors, Senior Management and Employees Compensation.

(3) On September 12, 2006 Mr E van As entered into a zero cost collar contract with a commercial bank for 246,959 shares that are indirectly beneficially held by himself. The collar contract has a put strike price of R94.07 per share and call strike price of R111.99 per share. The term of the contract is for 364 days.

The authorised share capital of Sappi Limited consists of 325,000,000 shares. As of September 30, 2006, the issued share capital consisted of 239,071,892 shares. Due to shares bought back and being held in a subsidiary company, the issued share capital, less treasury shares, was 226,994,031 as of September 30, 2006. It is common in South Africa for shares to be held through nominees. As of September 30, 2006, the five largest shareholders of record (four of which are nominees) owned approximately 93% of the shares. We believe that, as of September 30, 2006, based on registered addresses and disclosure by nominee companies, 30% of our shares were held beneficially in North America, 60% of our shares were held beneficially in South Africa and 10% of our shares were held beneficially in Europe and elsewhere, excluding the shares owned by subsidiaries of Sappi.

On September 30, 2006, there were approximately 46 record holders (including nominees) of ADSs and 71 record holders of shares in the United States. At that date, there were 23,442,229 ADSs and 49,786,387 shares (totalling 73,229,616 shares) held beneficially by holders with registered addresses in the United States.

Pursuant to the Companies Amendment Act Number 37 of 1999, where securities of an issuer are registered in the name of a person and that person is not the holder of the beneficial interest in all of the securities held by the registered shareholder, the registered shareholder is obliged, at the end of every three-month period to disclose to the issuer the identity of each person on whose behalf the registered holder holds securities and the number and price of securities issued by that issuer held on behalf of each such person. We have authorised Thomson Financial to conduct a monthly investigation into the beneficial ownership of Sappi Limited shares including those in nominee holdings. All beneficial holdings are investigated to determine whether there are any shareholders which hold 5% or more of our shares and these investigations have as of September 30, 2006, revealed the following beneficial holders of more than 5% of the issued share capital of Sappi Limited:

Name of Shareholder	Number of Shares	Percentage
Public Investment Commissioner (South Africa)	29,792,067	13.1
Industrial Development Corporation (South Africa)	15,420,640	6.8

Further, as a result of these investigations, we have ascertained that some of the shares registered in the names of the nominee holders are managed by various fund managers and that, as of September 30, 2006, the following fund managers were responsible for 5% or more of the issued share capital of Sappi Limited.

Name of Fund Manager	Number of Shares Managed	Percentage
RMB Asset Management (South Africa)	35,900,211	15.8
Templeton Investment Council LLC	30,469,146	13.4
Allan Gray Limited	26,809,365	11.8
Old Mutual Asset Managers (South Africa) (Pty) Ltd.	19,443,133	8.6
Sanlam Investment Management Company (Pty) Ltd.	16,363,829	7.2

Under South African law, there is no obligation on the part of shareholders of Sappi Limited to disclose to Sappi Limited arrangements or understandings that may exist between or among them with respect to the holding or voting of shares unless such arrangement or understanding constitutes an affected transaction under the Securities Regulation Code on Takeovers and Mergers. An affected transaction means, among other things, any transaction which has or will have the effect of vesting control of any company in any person or two or more persons acting in concert in whom control did not vest prior to such transaction or scheme. Control is defined with reference to a specified percentage, which is currently 35% of the entire issued share capital of a company. The major shareholders have no different voting rights.

Related Party Transactions

For information on related party transactions, see note 32 to our Group annual financial statements contained elsewhere in this Annual Report.

ITEM 8. FINANCIAL INFORMATION

Consolidated Statements and Other Financial Information

See Item 18 Financial Statements and the F-pages for the Report of the Independent Auditors.

First time adoption of International Financial Reporting Standards

The consolidated financial statements of the Sappi Group as of and for the years ended September 2006 and 2005, including the applicable notes thereto, contained in Item 18 Financial Statements of this Annual Report on Form 20-F and the consolidated financial information of the Sappi Group as of and for the years ended September 2006 and 2005 contained herein have been aligned with International Financial Reporting Standards (IFRS). The consolidated financial statements and related financial information of the Sappi Group as of and for each of the years ended September 2004, 2003 and 2002, cannot be provided on an IFRS aligned basis without unreasonable effort or expense. The Sappi Group has not amended, and does not intend to amend, its previously filed financial statements for the years affected by the change in accounting policy that ended prior to the year ended September 2005. For this reason, our Annual Reports on Form 20-F for those prior years, the consolidated financial statements and applicable notes thereto, auditors reports and related financial information contained in such reports should not be compared to this Annual Report on Form 20-F. For a description of the change in accounting policy and resulting adjustments, see Item 5 Operating and Financial Review and Prospects, and note 2 to our Group annual financial statements, included herein.

Legal Proceedings

We become involved from time to time in various claims and lawsuits incidental to the ordinary course of our business. We are not currently involved in legal proceedings which, either individually or in the aggregate, are expected to have a material adverse effect on our business, assets or properties.

North America

Since May 2004, a number of class and individual actions have been filed in federal and state courts alleging that Sappi Limited and Sappi Fine Paper North America participated in a price fixing conspiracy with other manufacturers of publication paper. The cases assert violations of the federal and state antitrust laws and state unfair competition statutes. These lawsuits seek treble damages and injunctive relief, as well as other costs associated with the litigation. In November 2006, the plaintiffs in the class action case brought on behalf of most direct purchasers dismissed Sappi Limited and Sappi Fine Paper North America without prejudice. The cases brought by certain of the individual direct purchasers and the indirect purchasers remain outstanding.

Europe

On May 25 and 26, 2004 the EU Commission carried out an unannounced inspection visit at Sappi Fine Paper Europe's headquarters in Brussels in the context of what appeared to be an industry wide antitrust examination. The EU Commission copied and took away a substantial quantity of business documents. In its decision to authorise the inspection visit, the EU Commission alleged that Sappi Fine Paper Europe was involved in antitrust infringing collusive action with competitors. On August 8, 2006 Sappi Fine Paper Europe was informed by the EU Commission that it has closed its investigation in this matter.

South Africa

The Restitution of Land Rights Act (Act 22 of 1994), as amended, provides for the restoration of rights in land or other equitable redress to persons or communities dispossessed of their land rights after June 19, 1913 as a result of old laws or practices discriminating on the basis of race. The legislation empowers the Minister of Land Affairs to expropriate land in order to restore it to a successful claimant provided that there is just and equitable compensation to the owner of the land. Claims under the Act were required to be filed on or before December 31, 1998 and are presently being processed by the Commission

on Restitution of Land Rights and adjudicated upon by the Land Court. This process is expected to continue for many years. As one of the largest land owners in South Africa, we anticipate that a substantial number of claims may affect land we own. The process of determining the extent of claims filed in respect of our land and the potential impact of these claims on our South African operations continues. To date, we have been notified of twenty-four formal Land Claims made in respect of portions of Sappi plantations in the Mpumalanga area, and twenty-eight others made in respect of portions of Sappi plantations in KwaZulu Natal. These claims have not been finalized and are still under investigation by the Regional Land Claims Commissioner.

Dividend Policy

Our current policy is to consider dividends on an annual basis and to declare cash dividends in US dollars. We declared a dividend number 83 of 30 US cents for fiscal 2006. South African shareholders will be paid the Rand equivalent of the US dollar denominated declaration.

We aim to declare annual dividends, which, over time, incorporate real growth for shareholders. To this end, dividend cover in each year will vary in line with changes in the business cycle, but our current intention is to maintain a long-term average of three times net profit.

Notwithstanding our inability to meet this target in recent years, we remain committed to this policy in the longer term. See **Item 5 Operating and Financial Review and Prospects Dividends** for the dividend cover in recent years.

In accordance with South African common law, dividends may be declared only out of distributable profits. Holders of American Depositary Receipts (ADRs) on the relevant record date will be entitled to receive any dividends payable in respect of the shares underlying the ADSs, subject to the terms of the Deposit Agreement among us, The Bank of New York and the ADR holders (the **Deposit Agreement**). There is no restriction under South African exchange control regulations on the free transferability of cash dividends to non-resident shareholders or ADS holders. See **Item 10 Additional Information Exchange Controls**.

South African companies pay Secondary Tax on Companies at the flat rate of 12.5% in respect of the amount of dividends declared by the company less certain dividends which accrue to the company during its relevant dividend cycle. See **Item 10 Additional Information Taxation**.

Significant Changes

Except as otherwise disclosed in this Annual Report, no significant change has occurred in our financial position since October 1, 2006.

ITEM 9. THE OFFER AND LISTING**Offer and Listing Details**

The table below sets forth, for the periods indicated, the high and low prices and the volume of trading activity in the shares on the JSE, as reported by the JSE, and the high and low prices and the volume of trading activity in the ADSs on the New York Stock Exchange (NYSE), as reported by the NYSE.

	Shares		Trading Volume (million)	ADSs		Trading Volume (million)
	High (SA cents per share)	Low		High (\$ per ADS)	Low	
Annual highs and lows						
Fiscal 2006	10,100	6,105	252.6	15.40	9.46	57.6
Fiscal 2005	9,550	5,780	264.7	15.50	9.14	83.6
Fiscal 2004	10,450	7,720	302.5	16.13	12.60	51.3
Fiscal 2003	12,950	8,550	245.8	14.52	10.30	48.3
Fiscal 2002	16,200	7,650	181.8	15.00	8.40	48.1
Quarterly highs and lows						
2006						
Fourth quarter	10,100	8,530	51.5	14.40	12.06	10.0
Third quarter	9,250	6,850	56.1	15.28	10.67	10.0
Second quarter	9,700	6,958	90.8	15.40	11.21	18.6
First quarter	8,050	6,105	54.2	11.90	9.46	19.0
2005						
Fourth quarter	7,990	6,610	48.1	12.17	10.05	16.2
Third quarter	7,750	5,780	63.6	12.40	9.14	24.8
Second quarter	8,600	7,255	67.3	15.50	11.92	18.1
First quarter	9,550	7,450	85.7	14.90	12.20	24.5
Monthly highs and lows						
2006						
November	8,050	6,350	18.3	11.42	9.49	5.9
October	7,590	6,105	21.2	11.55	9.46	6.9
September	10,049	9,000	16.5	13.11	12.48	1.9
August	10,100	8,605	20.7	14.40	12.40	5.7
July	9,800	8,530	14.2	14.10	12.06	2.4
June	9,190	6,850	16.1	12.95	10.67	3.2

On December 6, 2006, the closing price for our shares on the JSE was 11,425 SA cents per share and the closing price of the ADSs on the NYSE was \$16.09 per ADS.

Markets

The principal market for the ordinary shares of Sappi Limited is the JSE. The ordinary shares of Sappi Limited are also listed on the London Stock Exchange. In February 2000, we announced our decision to delist our shares from the Paris Bourse with effect from March 29, 2000. This decision was based on the low volume of shares traded, the cost of maintaining the listing and the additional reporting standards required by the Bourse. On September 21, 2005, we announced our decision to delist our shares from the Frankfurt Stock Exchange with effect from November 10, 2005. This decision was based on the low volume of shares traded on the Exchange. On November 5, 1998, ADRs evidencing ADSs of Sappi Limited commenced trading on the NYSE under the symbol SPP. The Bank of New York serves as depositary

(the Depository) with respect to the ADSs. Prior to the commencement of trading of the ADSs on the NYSE, our ordinary shares were traded in the United States in the over-the-counter market pursuant to a sponsored unrestricted American Depositary Receipt facility established in 1994. Price data relating to that trading is not considered meaningful and has not been included in this Annual Report.

On October 26, 1999, Sappi and The Bank of New York amended the Deposit Agreement to change, with effect from October 27, 1999, the number of ordinary shares represented by each ADS from 10 ordinary shares per ADS to 1 ordinary share per ADS. The prices for ADSs set forth in the following paragraphs and the table above reflect this change.

Prior to our global equity offering, which was completed on November 22, 1999, trading of the ADSs on the NYSE had been sporadic with the volumes traded varying between zero and 231,000 ADSs per day. Since that offering, trading of the ADSs has increased substantially. The ADS price has reached a high of \$16.45 and a low of \$3.22 since trading commenced. On some days, trading volume in ADSs on the NYSE has exceeded the volume traded on the JSE.

The JSE Limited

The JSE Limited (JSE) was formed in 1887 and provides facilities for the buying and selling of a wide range of securities, including equity, corporate debt securities, warrants in respect of securities, as well as Krugerrands. The JSE is a self-regulatory organisation operating under the supervision of the South African Ministry of Finance, through the Financial Services Board and its representative, the Registrar of Stock Exchanges.

The market capitalisation of South African equity securities was approximately \$412 billion as at September 30, 2006. The actual float available for public trading is significantly smaller than the aggregate market capitalisation because of the large number of long-term holdings by listed holding companies in listed subsidiaries and associates, the existence of listed pyramid companies and cross holdings between listed companies. Liquidity on the JSE (measured by reference to the total market value of securities traded as a percentage of the total market capitalisation at the end of the period) was 58% for the 12 months ended September 30, 2006. Trading is concentrated in a growing, but small, number of companies. As of the end of September 2006, there were 268 listed companies on the JSE.

Following the introduction of the FTSE/JSE free float indices, the FTSE/JSE All Share Index only includes those companies that constitute the top 99% of the market capitalisation of the JSE. The three main sectors in the market are Resources, Financials and Industrials. As of September 30, 2006, the All Share Index included 162 companies. The Financial and Industrial Index and the Resources Index included 31 and 20 companies, respectively, and accounted for approximately 45% and 43%, respectively, of the total market capitalisation of the JSE.

The JSE settles securities trades electronically through STRATE (Share Transactions Totally Electronic). All trades are downloaded from the JSE SETS automated trading system to the JSE's Broker Deal Accounting (BDA) system, which manages the settlement status of every trade. The BDA system interfaces with STRATE's system which in turn interfaces with those of the custodian banks. The JSE's Settlement Authority monitors all trades from time of execution to settlement to ensure performance.

Shares may not be traded on the JSE unless they have been dematerialized through STRATE. Contractual, rolling settlement has been introduced by the JSE in order to increase the speed, certainty and efficiency of the settlement mechanism and to fall into line with international practices. While settlement on the JSE is currently made five days after each trade (T + 5), the JSE in conjunction with STRATE is exploring with the industry how best to reduce the settlement period further to (T+3) without introducing undue risk.

ITEM 10. ADDITIONAL INFORMATION

Memorandum and Articles of Association

The following description is a summary of various provisions of the Memorandum (Memorandum) and Articles of Association (Articles) of Sappi Limited, the South African Companies Act (the Companies Act) and the listings requirements of the JSE, which does not purport to be complete and is qualified in its entirety by reference to all of the provisions of those sources.

Sappi Limited is a public company incorporated in South Africa with registration number 1936/008963/06.

Purpose of the Company

Paragraph 3 of the Memorandum states that Sappi Limited is established, among other things, to manufacture, produce, buy, sell and deal in pulp, timber, paper, cardboard and other stated products.

Directors

In terms of the articles:

At every annual general meeting of Sappi Limited, as near as possible to, but not less than one third of the Directors (excluding any Director appointed after the conclusion of the preceding annual general meeting, the Executive Chairman, the Chief Executive Officer and the Managing Director) are required to retire from office but are eligible for re-election. The Directors to retire are those who have been longest in office since their last election or, as between Directors who have been in office for an equal length of time since their last election, in the absence of agreement, determined by lot. Any Director who has held office for three years since his last election is also required to retire at such annual general meeting. In addition, the appointment of any Director appointed after the conclusion of the preceding annual general meeting will require to be confirmed at the next annual general meeting, failing which the appointment will cease.

Except as set out in the following paragraph, a Director may not vote in respect of any contract or arrangement or any other proposal in which he has any material interest other than by virtue of his interest in ordinary shares or debentures or other securities of or otherwise in or through Sappi Limited. A Director will not be counted in the quorum at a meeting in relation to any resolution on which he is barred from voting.

A Director shall be entitled to vote and be counted in the quorum in respect of any resolution concerning any of the following matters:

- the giving of any security or indemnity to him in respect of money lent or obligations incurred by him at the request of or for the benefit of Sappi Limited or any of its subsidiaries;
- the giving of any security or indemnity to a third party in respect of a debt or obligation of Sappi Limited or any of its subsidiaries for which he himself has assumed responsibility in whole or in part under a guarantee or indemnity or by the giving of security;
- any proposal concerning an offer of shares or debentures or other securities of or by Sappi Limited or any of its subsidiaries for subscription or purchase in which offer he is or is to be interested as a participant in the underwriting or sub-underwriting of these securities;
- any proposal concerning any other company in which he is interested directly or indirectly and whether as an officer, shareholder or otherwise; provided that he is not the holder of or beneficially interested in 1% or more of any class of the equity share capital of that company or of the voting rights available to shareholders of that company; and

- any proposal concerning the adoption, modification or operation of a superannuation fund or retirement benefits scheme under which he may benefit and which has been approved by or is subject to and conditional upon approval of the Commissioner of Inland Revenue for taxation purposes.

The remuneration of the Directors for their services as such shall be determined from time to time by a general meeting, save that in the discretion of the Board, there may in each year be paid out of the funds of Sappi Limited to, and divided among, the Directors who have held office during the year in respect of which the remuneration is to be paid, a sum, by way of remuneration for their services as Directors, not exceeding US\$ 500 000 (five hundred thousand dollars), which remuneration shall be paid in such proportions as shall be determined by the Directors or a majority of them. If any Director is required to perform extra services or reside abroad or is otherwise specially occupied about Sappi Limited's business, he is entitled to receive remuneration to be fixed by the Directors (either in addition to, or in substitution for, the aforementioned remuneration). The Directors shall be paid all their travelling and other expenses properly and necessarily expended by them in and about the business of Sappi Limited.

The Directors may exercise all the powers of Sappi Limited to borrow money and to mortgage or charge its undertaking and property or any part thereof and to issue debentures, which may be issued at par, at a discount or at a premium, and other securities. The borrowings will be restricted so that, except with the previous sanction of an ordinary resolution of Sappi Limited in general meeting, the aggregate principal amount outstanding of all moneys borrowed by Sappi Limited and/or any of its subsidiaries will not at any time exceed an amount equal to 2.5 times the aggregate of the nominal amount of the issued share capital of Sappi Limited and the total of the amounts standing to the credit of the combined capital and revenue reserve accounts of Sappi Limited and its subsidiaries (including any share premium account, capital redemption reserve fund and retained surplus after deducting the amounts of any debit balance in the income statement but excluding sums set aside for taxation and amounts attributable to outside shareholders in subsidiaries), as shown in the latest consolidated balance sheet, adjusted as may be necessary in respect of any variation in the share premium account of Sappi Limited since the date of the latest audited balance sheet.

Secretary

The Companies Act requires the directors of each public company to appoint a secretary who is permanently resident in South Africa, and who, in the opinion of the directors, has the requisite knowledge and experience to carry out the duties of a secretary of a public company.

Disclosure of Interest in Shares

The Companies Act requires the disclosure of beneficial interests in the outstanding shares of a company. Where securities of an issuer are registered in the name of a person and that person is not the holder of the beneficial interest in all of the securities held by the registered shareholder, the registered shareholder is obliged, at the end of every three-month period after June 30, 1999, that is, commencing on September 30, 1999, to disclose to the issuer the identity of each person on whose behalf the registered holder holds securities and the number and class of securities issued by that issuer held on behalf of each such person. Moreover, an issuer of securities may, by notice in writing, require a person who is a registered shareholder of, or whom the issuer knows or has reasonable cause to believe to have a beneficial interest in, a security issued by the issuer, to confirm or deny whether or not such person holds that beneficial interest and, if the security is held for another person, the person to whom the request is made is obliged to disclose to the issuer the identity of the person on whose behalf a security is held. The addressee of the notice may also be required to give particulars of the extent of the beneficial interest held during the three years preceding the date of the notice. All issuers of securities are obliged to establish and maintain a register of the disclosures described above and to publish in their annual financial statements a list of the

persons who hold beneficial interests equal to or in excess of 5% of the total number of securities of that class issued by the issuer together with the extent of those beneficial interests.

Register of Members

Sappi Limited keeps a register of Shareholders in South Africa and London, England. Sappi Limited may keep a branch share register in any foreign country, subject to the approval of the Reserve Bank.

Share Capital

The authorised share capital of Sappi Limited consists of 325,000,000 ordinary shares with a par value R1.00 per share. All the ordinary shares in issue rank *pari passu* with each other and are fully paid and not subject to calls for additional payments of any kind. Trading in the ordinary shares in Sappi Limited has been dematerialised under the terms of the STRATE initiative of the JSE and the provisions of section 91A of the Companies Act relating to uncertified securities apply in respect of those shares which have been dematerialised.

The ADSs trade on the NYSE. The rights of holders of ADSs are governed by the Deposit Agreement pursuant to which the ADSs are issued and such rights differ in certain respects from the rights of holders of ordinary shares.

Dividends

Sappi Limited in general meeting or the Board may, from time to time, declare a dividend to be paid to the registered holders of shares (the Shareholders) in proportion to the number of ordinary shares held by them. No dividend on ordinary shares will bear interest. Dividends are declared payable to Shareholders registered as such on a date subsequent to the date of the declaration of the dividend as determined by the Board. This date may not be less than 14 days after the date of the publication of the announcement of the declaration of the dividend.

Sappi Limited in general meeting may not declare a dividend in excess of the amount recommended by the Board. All unclaimed dividends may be retained by Sappi Limited, invested or otherwise utilised by the Board for the benefit of Sappi Limited until claimed; provided that dividends unclaimed after a period of twelve years may be declared forfeited by the Board. Forfeited dividends revert to Sappi Limited and may be dealt with by the Directors as they deem fit.

Any dividend or other amount payable to a Shareholder may be transmitted by electronic bank transfer or ordinary post to the address of the Shareholder recorded in the register or any other address the Shareholder may previously have given to Sappi Limited in writing. Sappi Limited will not be responsible for any loss in transmission.

Any dividend may be paid and satisfied, either wholly or in part, by the distribution of specific assets as the Board may at the time of declaring the dividend determine and direct.

It is Sappi Limited's policy to declare dividends in US dollars and the Board may at the time of declaring a dividend make such regulations as it may think fit in regard to the payment in any currency and rate of exchange. For further information on our dividend policy, see Item 8 Financial Information Dividend Policy .

Holders of ADSs on the relevant record date will be entitled to receive any dividends payable in respect of the ordinary shares underlying the ADSs, subject to the terms of the Deposit Agreement. Cash dividends will be paid by the Depositary to holders of ADSs in accordance with the Deposit Agreement.

Voting Rights

Subject to any rights or restrictions attached to any class of shares, every Shareholder present in person, by authorised representative or by proxy, will have, on a show of hands, one vote only and, in the case of a poll, every Shareholder present in person, by authorised representative or by proxy, will have that proportion of the total votes in Sappi Limited which the aggregate amount of the nominal value of the shares held by that Shareholder bears to the aggregate of the nominal value of all the shares issued by Sappi Limited and, accordingly, since there is currently only one class of issued shares, one vote for every share held by him.

Issue of Additional Shares and Pre-emption Rights

Subject to the provisions of the Companies Act and the listings requirements of the JSE, Sappi Limited in a general meeting may issue, or may authorise the Board to issue, unissued shares.

Holders of shares have no pre-emptive rights under the Articles. Under the listings requirements of the JSE, however, any unissued shares of Sappi Limited must first be offered to existing Shareholders pro rata to their holdings of shares unless these shares are issued for the acquisition of assets or a specific or general approval is granted to the Directors at any general meeting authorising the issue of shares for cash. Whenever Sappi Limited wishes to sell for cash shares held as treasury stock by a subsidiary of Sappi Limited, such use must comply with the listings requirements as if such use was a new issue of shares for cash.

Sappi Limited in general meeting may upon the recommendation of the Board resolve to capitalise all or any part of the amount of the undivided profits, reserves resulting from a sale or revaluation of assets of Sappi Limited or premium created on the issue of any shares or debentures and may apply such sums in paying up unissued shares of Sappi Limited to be issued as fully paid capitalisation shares to Shareholders.

Variation of Rights

Whenever the capital of Sappi Limited is divided into different classes of shares, the rights or restrictions attached to any class of shares in issue may be amended, varied, modified or cancelled by general meeting of Sappi Limited; provided that the consent in writing of the holders of at least three fourths of the issued shares of that class or of a special resolution passed at a separate general meeting of the holders of such shares is required if the amendment, variation, modification or cancellation will directly or indirectly adversely affect those rights or restrictions.

The rights or restrictions attached to any class of shares will not, unless otherwise expressly provided by the conditions of issue of such shares, be deemed to be directly or indirectly adversely affected by the creation or issue of other shares ranking equally with them.

Distribution of Assets on Liquidation

If Sappi Limited is liquidated, whether voluntarily or compulsorily, the assets remaining after the payment of all the liabilities of Sappi Limited and the costs of winding-up shall be distributed among the Shareholders in proportion to the numbers of shares respectively held by them, subject to the rights of any Shareholders to whom shares have been issued on special conditions and subject to Sappi Limited's right to apply set-off against the liability, if any, of Shareholders for unpaid capital or premium. Furthermore, the liquidator, with the authority of a special resolution, may divide among the Shareholders, in specie or kind, the whole or any part of the assets, whether or not those assets consist of property of one kind or different kinds.

Share Repurchases and Capital Reductions

Subject to the provisions of the Companies Act and the listings requirements of the JSE, Sappi Limited may with the prior approval of a special resolution of its shareholders in general meeting

- acquire any shares issued by Sappi Limited on the basis that all or a portion of the price payable on such acquisition may be paid out of any funds of or available to Sappi Limited whether or not such payment results in a reduction of the issued share capital, share premium, reserves (including statutory non-distributable reserves), stated capital or any capital or redemption reserve fund of Sappi Limited;
- authorise any subsidiary of Sappi Limited to acquire shares in Sappi Limited.

Subject to the provisions of the Companies Act and the listings requirements of the JSE, Sappi Limited may reduce its issued share capital, share premium, stated capital, reserves (including statutory non-distributable reserves) and/or capital redemption reserve fund by way of an ordinary resolution of shareholders in general meeting and a resolution of directors. Similarly, subject to the provisions of the Companies Act and the requirements of the JSE, Sappi Limited may by way of an ordinary resolution of shareholders in general meeting and a resolution of directors make payments to its shareholders, whether or not such payments result in a reduction of the issued share capital, share premium, stated capital, reserves (including statutory non-distributable reserves) and/or any capital redemption reserve fund. An ordinary resolution of shareholders is not, however, required for the payment of dividends.

Changes in Capital or Objects and Powers of Sappi Limited

Subject to the provisions of the Companies Act, Sappi Limited may from time to time by special resolution:

- increase, consolidate, sub-divide or cancel all or any part of its capital;
- convert any of its shares, whether issued or not, into shares of another class;
- convert all or any of its paid-up shares into stock and re-convert such stock into paid-up shares; or
- convert any shares having a par value into shares having no par value and vice versa.

Rights of Minority Shareholders and Fiduciary Duties

Majority shareholders of South African companies have no fiduciary obligations under South African common law to minority shareholders. However, under the Companies Act, a shareholder may, under certain circumstances, seek relief from the court if he has been unfairly prejudiced by the company. The provisions in the Companies Act are designed to provide relief for oppressed shareholders without necessarily overruling the majority's decision. There may also be common law personal actions available to a shareholder of a company. The fiduciary obligations of Directors may differ from those in the United States and certain other countries. In South Africa, the common law imposes on Directors a duty to act with care and skill and a fiduciary duty to conduct the company's affairs in the best interests of the company.

General Meetings of Shareholders

Sappi Limited is obliged to hold an annual general meeting not more than nine months after the end of every financial year of Sappi Limited and within fifteen months after the date of the last preceding annual general meeting of Sappi Limited. The Board may, whenever it thinks fit, convene a general meeting and must do so on the request of 100 Shareholders or of Shareholders holding at the date of

request not less than one-twentieth of the total voting rights of all Shareholders having a right to vote at general meetings of Sappi Limited.

Sappi Limited is required by law to provide at least 21 clear days' notice for any annual general meeting and for meetings at which special resolutions are proposed, and at least 14 clear days' notice for all other meetings.

Notice under the Articles must be given or served on any Shareholder or Director, as the case may be, either by delivery, electronic mail, telefacsimile or by sending it through the post. Any notice to Shareholders must simultaneously be given to the secretary or other suitable official of any recognised stock exchange on which the shares of Sappi Limited are listed in accordance with the requirements of that stock exchange. Every such notice shall be deemed, unless the contrary is proved, to have been received, if it is delivered, on the date on which it is so delivered, if it is sent by post, on the day on which it is posted, if it is sent by electronic mail, on the day it was sent or, if it is sent by telefacsimile, on the day on which it was successfully transmitted.

No business may be transacted at any general meeting unless the requisite quorum is present when the meeting proceeds to business. The quorum for the passing of special resolutions is Shareholders holding in the aggregate not less than 25% of the total votes of all Shareholders entitled to vote at the meeting, present in person or by proxy. In all other cases, the quorum is three Shareholders present in person or by proxy and entitled to vote or, if a Shareholder is a body corporate, represented. If within ten minutes from the time appointed for the meeting a quorum is not present, the meeting, if convened upon the requisition of Shareholders, will be dissolved and, in all other cases, will stand adjourned to the same day in the next week, or if that be a public holiday, the next business day, at the same time and place. At the adjourned meeting, those Shareholders who are present or represented thereat shall constitute a quorum.

At a general meeting, a resolution put to the vote will be decided by a show of hands unless a poll is demanded by (1) the chairman, (2) not less than five Shareholders having the right to vote at such meeting, (3) a Shareholder or Shareholders representing not less than one tenth of the total voting rights of all Shareholders having the right to vote at the meeting or (4) in accordance with the Companies Act.

Resolutions will be carried by a majority of the votes recorded at the meeting except in the case of a special resolution which must be passed either, on a show of hands, by not less than 75% of the number of Shareholders entitled to vote who are present in person or by proxy or, where a poll has been demanded, by not less than 75% of the total votes to which the Shareholders present in person or by proxy are entitled. In the event of a tie, the chairman has the deciding vote if he is a Shareholder.

Annual Report and Accounts

The Board is required to keep such accounting records and books of account as are prescribed by the Companies Act. Generally, no Shareholder (other than a Director) has any right to inspect any accounting record book, account or document of Sappi Limited.

The Board is required, in respect of every financial year of Sappi Limited, to prepare annual consolidated financial statements of Sappi Limited and present them before the annual general meeting required to be held in that year.

The annual consolidated financial statements of Sappi Limited must, in conformity with generally accepted accounting practice in South Africa, fairly present the state of affairs and business of Sappi Limited and all its consolidated subsidiaries at the end of the financial year concerned and the profit or loss of Sappi Limited and all its consolidated subsidiaries for that financial year.

Transfer of Shares

All ordinary shares are free from any restriction under the Articles on the right to transfer. A Shareholder who holds his shares in dematerialised form will have an account with a Central Securities Depository Participant. Transfer of ownership of such shares will be effected by debiting the account from which transfer is effected and crediting the account to which transfer is effected. The transferor will be deemed to remain the holder of the shares until the name of the transferee is entered in the share register or relevant subregister of Sappi Limited in respect of these shares. Only Shareholders that have handed in their paper share certificates have an account with a Central Securities Depository Participant. Under the rules of the JSE Shareholders cannot sell their shares on the JSE until the shares have been dematerialised.

Rights of Shareholders

There are no limitations in the Memorandum or Articles and general limitations under South African law on the right of Shareholders to hold or exercise voting rights attaching to any ordinary shares in Sappi Limited.

Changes in Control

Any person acquiring shares of Sappi will (in addition to any regulatory and legal requirements outside South Africa) need to comply with the following to the extent applicable. Various transactions including, without limitation, those which result in a person or a group of persons acting in concert holding shares entitling the holder or holders to exercise or cause to be exercised 35% or more of the voting rights at meetings of Sappi Shareholders and those transactions entailing a disposal of the whole or substantially the whole of the undertaking of Sappi Limited or the whole or the greater part of its assets will be subject to the Securities Regulation Code on Takeovers and Mergers (the Code) which is regulated by the Securities Regulation Panel. The Code imposes various obligations in such circumstances including the requirement of an offer to minority shareholders. A transaction will be subject to the approval of the competition authorities under the Competition Act No. 89 of 1998, as amended (the Competition Act) if it results in the acquisition of control, as defined in the Competition Act, and otherwise falls within the scope of the Competition Act. The Competition Act prevents a transaction falling within its scope from being implemented without the required approvals. To the extent applicable, the transaction will be subject to the listings requirements of the JSE. Depending on the circumstances, approvals of the Exchange Control Department of the South African Reserve Bank and other applicable regulatory authorities may also be required.

Amendment of Memorandum or Articles

The Memorandum or Articles may only be amended by way of a special resolution, proposed at a general meeting of Shareholders at which Shareholders holding at least 25% of the total votes of all Shareholders entitled to vote thereat are present in person or by proxy, which is passed, on a show of hands, by not less than 75% of those present in person or by proxy or, on a poll, by not less than 75% of the total votes to which Shareholders present in person or by proxy are entitled.

South African Corporate Laws Amendment Bill

The Corporate Laws Amendment Bill (Bill) was passed by the South African Parliament in October 2006 and has been sent to the President. The President has yet to assent to the Bill. Once it is assented to by the President, commencement is still to be proclaimed, although it is expected to come into effect by December 2006.

The Bill effects a number of important changes to the South African Companies Act.

Financial Assistance

The Bill enhances the ability of a company to provide financial assistance for the acquisition of its own shares. Section 38 of the current Companies Act prohibits a company from providing financial assistance to any person (other than an employee) in connection with the purchase of (or subscription for) its shares or those of its holding company. The Bill amends section 38 to the effect that a company will be able to provide financial assistance provided that it meets a solvency and liquidity test. The amendments will drastically simplify the financing structures that have traditionally been used for mergers and acquisitions, and in particular, Black Economic Empowerment transactions.

Sale of Assets and Business

In terms of section 228 of the current Companies Act, a company only requires the approval of a simple majority of its shareholders in order to dispose of the whole or substantially the whole of its business, or the whole or the greater part of its assets. In terms of the proposed amendment to section 228, the disposal of the whole or the greater part of the business or assets of a company will require a special resolution of shareholders.

Under the proposed amendments, shareholders of a holding company will have to pass a special resolution approving the sale of the whole or the greater part of the assets or business of any of its subsidiaries, if the disposal by its subsidiary would constitute a disposal by the holding company of the whole or the greater part of its assets or business.

Audit Committees and Auditors

The Bill imposes an obligation on widely-held companies to appoint audit committees. A company is a widely-held company if it allows unrestricted transfer of its shares or it offers its shares to the public. An audit committee must have at least two members and consist only of independent non-executive directors.

The functions of the audit committee include the duty to nominate an auditor for appointment by the board, to fix the terms of his/her engagement and to determine which non-audit services the auditor may provide to the company. The audit committee is also required to report on the company's internal accounting and audit procedures and deal with complaints in respect of its auditing procedures.

The Bill also imposes certain requirements regarding the identity of the auditor; the rotation of the auditor; restrictions on services that the auditor can provide; and the attendance of the auditor at the annual general meeting.

Financial Statements

The Bill inserts a new section in the Companies Act which provides that the financial statements of public companies must comply with IFRS. These are statements of Generally Accepted Accounting Practice which are to be issued by the Minister of Trade and Industry by publication in the Government Gazette from time to time on the advice of a fifteen member body to be established called the Financial Reporting Standards Council (FSRC). These requirements are more onerous than the current standards. The FSRC must ensure that financial reporting standards accord with IFRS.

The Bill establishes a further body, the Financial Reporting Investigations Panel, which will investigate alleged non-compliance with the Financial Reporting Standards and recommend appropriate measures for rectification or restitution. Its report may, if it is in the interests of users, be published in the news media and made available for inspection by the public.

Under the Bill, a public company and each of its directors or officers who is a party to the issue, circulation or publication of any financial statements which are materially incomplete or which do not

otherwise comply with the above requirements will be guilty of an offence. It is also an offence for any person to be a party to the preparation, approval, publication, issue or supply of a financial report that is false or misleading in a material respect if such person knows or ought reasonably to suspect that it is false or misleading.

Material Contracts

On May 7, 2003, a syndicated loan of EURO 500,106,406 was provided to Sappi Papier Holding GmbH (SPH). This loan was arranged by Bank Austria Creditanstalt and was supported by a syndicate of 18 European banks. Funding of the facility was provided by the Oesterreichische Kontrollbank Aktiengesellschaft (OeKB), a banking corporation incorporated in Austria, and the syndicate of banks assumed the credit risk by providing a guarantee to the OeKB. The loan to SPH is fully and unconditionally guaranteed by Sappi International SA (SISA), a corporation incorporated in Belgium. The loan consists of two tranches, repayable in two bullet payments. Tranche A (amounting to EURO 100,021,281) was repaid on December 31, 2004. Tranche B (amounting to EURO 400,085,124) bears interest at the OeKB EURO fixed financing rate plus an applicable facility fee. The interest on the loan is payable semi-annually on June 30 and December 31 of each year, commencing on June 30, 2003. SPH may prepay the whole or any part of the loan by giving 30-days notice. SPH has agreed to pay certain additional amounts should they arise in respect of withholdings or deductions for taxes in certain jurisdictions on payments to the syndicate banks. SPH and SISA have also agreed to observe certain covenants with respect to the loan and the guarantee, including limitations on liens, sale and leaseback transactions and on mergers and consolidations. It is an event of default if Sappi Limited ceases to own, directly or indirectly, a majority of SPH's share capital, without the prior written consent of a majority of the lenders. On November 18, 2005, an amendment to this loan agreement was signed to harmonise the terms and conditions of all SPH's long-term debt in line with the terms and conditions of the recently completed EURO 600,000,000 multi-currency revolving credit facility (see below). The loan to SPH is now fully and unconditionally guaranteed by Sappi Limited in addition to SISA and partially guaranteed by Sappi Trading Pulp AG, a corporation incorporated in Switzerland.

On June 29, 2005, a five-year multi-currency revolving credit facility (maturing in June 2010) in a maximum aggregate amount of EURO 600,000,000 was provided to Sappi Papier Holding GmbH (SPH), Sappi International S.A. (SISA) and Sappi Trading Pulp AG as borrowers. This facility was arranged by BNP Paribas, J P Morgan PLC and SG Corporate and Investment Banking and was supported by a syndicate of 16 additional financial institutions. The facility is currently fully and unconditionally guaranteed by Sappi Limited and SPH. SISA and Sappi Trading Pulp AG have also provided limited guarantees of the facility. The facility replaces the outstanding amount of the A Tranche (amounting to EUR 562.5 million) of the syndicated credit facility raised in July 2001. The early replacement of this A Tranche was undertaken to improve the terms and conditions thereof, including the pricing of the margin and commitment fee, and also to ensure the long-term nature of the new facility. The funding margin is determined by a rating grid and, based on the current credit rating, attracts a margin between 60 and 67.5 basis points over Euribor or Libor, depending on the currency of the loan and the level of utilisation. This facility is to be used for general corporate purposes and was drawn at the end of September 2005 to the extent of CHF 165,000,000. It is subject to interest coverage and debt covenants measured at the Sappi Limited consolidated level. SPH, Sappi Limited, SISA and Sappi Trading Pulp have agreed to observe certain covenants which include limitations on liens, sale and leaseback transactions and on mergers and consolidations. In addition, if any of SPH, SISA or Sappi Trading Pulp cease to be wholly owned, directly or indirectly, by Sappi Limited, or if a third party becomes the beneficial owner of more than 35% of the shares of Sappi Limited, then each financial institution has the option of demanding repayment of its participation in any outstanding loans and terminating its obligations under the facility.

At the Annual General Meeting of Shareholders held on March 7, 2005, shareholders adopted the Sappi Limited Performance Share Incentive Plan (Plan) in addition to the Sappi Limited Share Incentive Trust (Trust) which had been adopted on March 5, 1997, and fixed the aggregate number of shares which may be acquired by all participants under the Plan together with the Trust at 19,000,000 shares, which constitute 7.9% of the issued share capital of Sappi Limited. In terms of the Plan, Participants (who must be officers and other employees of the company) may be awarded conditional contracts to acquire shares for no cash consideration. If the performance criteria determined from time to time by the Human Resources Committee or Compensation Committee of the Board (Performance Criteria) applicable to each Conditional Contract, are met or exceeded, then Participants would be entitled to receive the number of shares specified in the Conditional Contract for no cash consideration after the fourth anniversary of the date on which the Conditional Contract was awarded to the Participant. The Performance Criteria entail benchmarking the company s performance against an appropriate peer group of companies. If the board determines that the Performance Criteria embodied in a Conditional Contract have not been satisfied or exceeded, the number of shares allotted and issued and/or transferred to a Participant under the Conditional Contract will be adjusted downwards.

Exchange Controls

Introduction

South Africa s exchange control regulations provide for restrictions on the exporting of capital and for various other exchange control matters. Transactions between residents of the Common Monetary Area (comprising the Republic of South Africa, the Republic of Namibia and the Kingdoms of Lesotho and Swaziland), on the one hand (including corporations), and non-residents of the Common Monetary Area, on the other hand, are subject to these exchange control regulations which are enforced by the Exchange Control Department of the South African Reserve Bank (Excon).

The present exchange control system in South Africa is used principally to control capital movements. South African companies are generally not permitted to export capital from South Africa or to hold foreign currency or foreign assets without the approval of the South African exchange control authorities. Foreign investment by South African companies is also restricted. As a result, a South African company s ability to raise and deploy capital outside the Common Monetary Area is restricted. The granting of loans from outside South Africa to Sappi Limited or its South African subsidiaries and their ability to borrow from non-resident sources is regulated. Further, where 75% or more of a South African company s capital, assets, earnings, voting securities, voting power, power of control or earnings are directly or indirectly controlled by or vested in non-residents of South Africa, the company is designated an affected person and certain restrictions are placed on its ability to obtain local financial assistance.

The South African authorities have expressed a commitment to a phased liberalisation of exchange controls and have relaxed certain exchange controls over recent years.

Some of the more salient recent changes to the South African exchange control regulations regarding South African corporations are as follows:

- South African corporations wishing to establish new approved foreign ventures are now permitted to transfer funds abroad for this purpose. There is no limit to the amount of funds which may be transferred except that, the foreign investment may only be acquired and such funds may only be transferred abroad once Excon has approved the type of foreign investment, which it will only do if the foreign investment accords with its foreign investment criteria (applicable at the relevant time), and with regard to larger foreign investments Excon may require capital outflows to be staggered in order to manage the potential impact on the foreign exchange market. Excon approved investments into Africa no longer require the South African investor to exercise control (namely 50% plus one share) over the foreign investment into Africa.

- South African corporations which have been granted approval to transfer funds abroad for purposes of acquiring an approved foreign investment, will now be entitled to retain abroad foreign dividends which relate to the operation of the approved foreign investment and any foreign dividend which may have been repatriated to South Africa after 26 October 2004, may thereafter be transferred abroad again, at any time and for any purpose other than for purposes of a non-resident (which is directly or indirectly controlled by a South African resident) using such funds to reinvest into the South African market.
- South African corporations wishing to invest abroad may apply for permission to use corporate assets or share swaps and share placement transactions to finance approved foreign investments. The latter mechanism entails the placement of the locally quoted company's shares with long term overseas holders who, in payment for the shares, provide the foreign currency abroad which the company then uses to acquire the target investment. Since February 2001, institutional investors are no longer entitled to make use of the asset swap mechanism but are, however, entitled to acquire foreign portfolio investments of either 20% or 25% of total assets, depending on the type of institutional investor.

Controls on current account transactions, with the exception of certain discretionary expenses, have been abolished and are now dealt with by authorised dealers in terms of the Exchange Control Rulings.

Authorised dealers in foreign exchange may, against the production of suitable documentary evidence, provide forward cover to South African residents in respect of fixed and ascertained foreign exchange commitments covering the movement of goods.

It is not possible to predict whether existing exchange controls will be abolished, continued or modified by the South African Government in the future.

For further information, see [Item 5 Operating and Financial Review and Prospects](#) [Other Items](#) [South African Exchange Controls](#) .

Sales of Shares

Under present South African exchange control regulations, the ordinary shares and ADSs of Sappi Limited are freely transferable outside the Common Monetary Area between non-residents of the Common Monetary Area. In addition, the proceeds from the sale of shares on the JSE on behalf of shareholders who are not residents of the Common Monetary Area are freely remittable to such shareholders (other than former residents of South Africa). Share holdings of non-residents must however be endorsed with the words "non-resident" .

Dividends

There is no restriction under South African exchange control regulations on the free transferability of cash dividends to shareholders or ADR holders who have never been resident in South Africa. Dividends declared to a former resident of South Africa out of capital gains, or out of income earned from normal trading activities prior to the date of emigration, must be placed to the credit of a blocked account with a South African authorised dealer in foreign exchange. Dividends declared out of income earned from normal trading activities subsequent to the date of emigration are, however, remittable. See [Taxation](#) and [Item 8 Financial Information Dividend Policy](#) . The Minister of Finance stated on February 26, 2003 that emigrants' blocked assets are to be unwound and such emigrants are entitled, on application to the South African Reserve Bank, and subject to an exiting schedule and an exit charge of 10% to exit such blocked assets from South Africa.

Prior to fiscal 2000, it was our policy to declare cash dividends in Rand. It is now our policy to declare cash dividends in US dollars. We declared a dividend (number 83) of 30 US cents for fiscal 2006. South

African shareholders will be paid the Rand equivalent of the US dollar denominated declaration. Shareholders on the UK registry will be paid the UK pounds sterling equivalent of the US dollar denominated declaration and ADS holders will be paid in US dollars. Holders of ADSs on the relevant record date will be entitled to receive any dividends payable in respect of the shares underlying the ADSs, subject to the terms of the Deposit Agreement. Subject to exceptions provided in the Deposit Agreement, cash dividends will be paid by the Depositary to holders of ADSs in accordance with the Deposit Agreement. The Depositary will charge holders of ADSs, to the extent applicable, taxes and other governmental charges and specified fees and other expenses, including a fee not in excess of \$0.02 per ADS (or portion thereof) for any cash distributions made pursuant to the Deposit Agreement, other than distributions of cash dividends. See Item 8 Financial Information Dividend Policy .

Subject to exceptions relating to former residents of South Africa, shareholders who are not residents of the Common Monetary Area who are in receipt of script dividends and who elect to dispose of the relevant shares may remit the proceeds arising from the sale of the relevant shares.

Taxation

Prospective investors should consult their professional advisers on the possible tax consequences of buying, holding or selling any Securities under the laws of their country of citizenship, residence or domicile. The discussions that follow for each jurisdiction are based upon the applicable laws and interpretations thereof as in effect as of the date hereof, all of which laws and interpretations are subject to change or differing interpretations, which changes or differing interpretations could apply retroactively.

South Africa

The following discussion represents the views of Werksmans, our South African counsel.

General

The discussion below is based on current legislation. A new Revenue Laws Amendment Bill (the draft Bill) was recently released in draft form. The promulgation of the draft Bill as legislation may impact on what is stated below.

Basis of Income Taxation

South Africa has a dual income tax system in terms of which residents are taxed on their worldwide income and non-residents are taxed on their South African source (or deemed source) income. Certain categories of income and activities are exempt from taxation.

Residence, in the case of natural persons, is established either by being ordinarily resident in South Africa or by satisfying a physical presence test in terms of which they become residents by virtue of their being physically present in South Africa for certain prescribed periods of time. In the case of legal entities, residence is established by virtue of incorporation or formation, or having a place of effective management, in South Africa. Excluded from the definition of resident are persons or entities which are, in terms of double taxation agreements entered into by South Africa, not treated as resident in South Africa.

Dividends received by or accruing to South African residents from companies which are not tax resident in South Africa are subject to tax, but certain foreign dividends are exempt from tax, including:

- foreign dividends declared by a company listed on a stock exchange licensed in South Africa or on an exchange recognised by the Minister of Finance in the Government Gazette to a shareholder if more than 10% of the equity share capital of the listed company at the time of declaration is held by South African residents;

- foreign dividends to residents holding a certain minimum interest (currently 20% of the total equity shares and voting rights) in the foreign company declaring the dividend, however certain dividends are excluded from this exemption by certain anti-avoidance measures;
- foreign dividends declared out of profits that are subject to tax in the hands of the South African resident recipient of the dividend in terms of South Africa's controlled foreign company legislation;
- foreign dividends declared out of profits that are subject to full South African tax; and
- foreign dividends declared by a company out of profits which arose from dividends declared to such company by a South African resident company.

South African residents, who are natural persons earning interest and non exempt dividends from foreign sources, are allowed an exemption on the first R2,500 of such income (the exemption is firstly to be applied to foreign dividends and only if they do not exceed R2,500, the excess is to be applied to foreign interest). There is also an exemption applicable to the first R16,500 of the aggregate of any interest received from local sources and any dividends which are not exempt from tax (other than foreign dividends), however, this exemption will be reduced by the amount of the exemption which may be applicable to foreign interest or dividends referred to above.

Withholding Tax on Dividends

Sappi Limited will not be obliged to withhold any form of non-resident shareholders' tax on dividends paid to non-residents of South Africa. However, any future decision to re-impose a withholding tax on dividends declared by South African residents to non-resident shareholders is generally permissible under the terms of a reciprocal tax treaty entered into between South Africa and the United States (the Treaty); provided that the Treaty generally limits the withholding tax to 5% of the gross amount of the dividends if the beneficial owner of the shares is a company holding directly at least 10% of the voting stock of the company paying the dividends and to 15% of the gross amount of the dividends in all other cases.

Income Tax and Capital Gains Tax

Profits derived from the sale of shares in a South African company will generally only be subject to income tax (at a corporate rate of 29% and a maximum individual rate of 40% based on a sliding scale) in South Africa if the seller carries on business in South Africa as a share dealer, and the profits are realised in the ordinary course of that business.

Capital Gains Tax was introduced with effect from October 1, 2001 and has been introduced in the Income Tax Act 58 of 1962 by way of the incorporation of the Eighth Schedule therein (Eighth Schedule). Under the Eighth Schedule, all natural persons, legal persons and trusts resident in South Africa are liable to pay capital gains tax on the disposal of a capital asset. The definition of an asset is very wide and includes assets that are movable, immovable, corporeal or incorporeal, but excludes certain limited items. Non-residents of South Africa will not be subject to capital gains tax except in respect of the disposal of immovable property situated in South Africa (or any interest or right in such immovable property) and any assets of his/its permanent establishment through which a trade is being carried on in South Africa. Profits derived from the sale of South African shares held by non-residents as long-term investments will generally not be subject to capital gains tax in South Africa. However, the sale of South African shares held by a non-resident will attract capital gains tax in the event that the shares comprise an asset of that non-resident's permanent establishment in South Africa, or if the foreign shareholder (alone or together with any connected persons) holds more than 20% of the issued share capital of the South African company and more than 80% of the net asset value of that company is attributable to immovable property situated in South Africa. An American Depository Share will be regarded as a share for the

purpose of Capital Gains Tax in South Africa. The Treaty only permits the imposition of South African tax on capital gains of a United States resident seller from the sale of shares where such shares form part of the business property of a permanent establishment which the seller has in South Africa or pertain to a fixed base available to the seller in South Africa for the purpose of performing independent personal services. Companies will be liable to capital gains tax on 50% of the net capital gain. At the current corporate tax rate of 29%, the effective tax rate on net capital gains will therefore be 14.5%.

Duty on the Shares

On a subsequent change of beneficial ownership of the shares, South African uncertificated securities tax (UST) is generally payable in respect of transactions involving listed shares purchased from or through a member of a stock exchange or a depository institution and stamp duty is generally payable for the registration of transfer of all other shares, both duties generally being payable at 0.25% of the higher of the consideration or the market value of the share concerned. South African stamp duty is payable regardless of whether the transfer is executed within or outside South Africa. There are certain exceptions to the payment of stamp duty where, for example, the instrument of transfer is executed outside South Africa and registration of transfer is effected in any branch register kept by the relevant company, subject to certain provisions set forth in the South African Stamp Duties Act of 1968.

Transfers of ADSs between non-residents of South Africa will not attract South African duties. However, if shares are withdrawn from the deposit facility, or are acquired from the Depository in exchange for ADSs representing the shares or the relevant Depository Receipt is cancelled so that the underlying shares are sold, duties will become payable on the same basis and at the same rates set out above.

Secondary Tax on Companies (STC)

This tax is paid by South African companies at the flat rate of 12.5% in respect of the amount of dividends declared less all dividends which accrued to them (but subject to certain exclusions) during its relevant dividend cycle . Dividend cycle means the period commencing on the day following the date of accrual to a company s shareholders of the last dividend declared by that company and ending on the date on which the dividend in question accrues to the shareholder concerned. An excess of dividends accruing to a company over dividends paid may be carried forward to subsequent dividend cycles as an STC credit.

The imposition of STC effectively means that a dual corporate tax system exists in South Africa comprising a normal income tax and STC. Liability for STC is determined independently from normal income tax. Accordingly, a company without a normal tax liability may have a liability for STC, and vice versa, and may be liable for both normal tax and STC. The nominal value of capitalisation shares awarded to shareholders as part of the equity share capital of a company by transferring reserves or undistributed profits to the company s equity share capital do not incur STC and it has become common practice for listed South African companies to offer capitalisation shares forming part of the equity share capital of a company in lieu of cash dividends. The capitalisation shares must carry the right to participate to an unlimited extent in the dividends or capital of the company in order to constitute equity share capital. However, any amount transferred from reserves (excluding any share premium account not consisting of capitalised profits) or undistributed profits to the equity share capital of a company is, in principle, deemed to be profits available for distribution to shareholders and may constitute a dividend (i.e., be subject to STC) on a subsequent partial reduction or redemption of capital, or upon reconstruction or liquidation of the company. Capitalisation shares which do not qualify as equity shares and are awarded by a transfer of reserves or undistributed profits (other than that portion of the share premium account not consisting of capitalised profits) are regarded as dividends and, as such, attract STC. Foreign dividends do not serve to reduce a company s STC liability.

A double taxation treaty between South Africa and the United States came into effect during 1997 and was promulgated under Government Notice R. 1721 (Government Gazette 18553) on December 15, 1997.

United States

Introduction

This section, which represents the views of Cravath, Swaine & Moore LLP, our US counsel, summarises the material US Federal income tax consequences to holders of our ordinary shares and ADSs as of the date of this Annual Report. The summary applies to you only if you hold our ordinary shares or ADSs, as applicable, as a capital asset for tax purposes (that is, for investment purposes). The summary does not cover US state or local or non-US law. This summary is based in part upon representations of the Depositary made to Sappi and the assumption that each obligation in the Deposit Agreement and any related agreements will be performed in accordance with its terms. In addition, this summary does not apply to you if you are a member of a class of holders subject to special rules, such as:

- a dealer in securities or currencies;
- a trader in securities that elects to use a mark-to-market method of accounting for your securities holdings;
- a bank;
- a life insurance company;
- a tax-exempt organisation;
- a person that holds our ordinary shares or ADSs as part of a straddle or a hedging, integrated, constructive sale or conversion transaction for tax purposes;
- US holder (as defined below) whose functional currency for tax purposes is not the US dollar;
- a person liable for alternative minimum tax; or
- a person that owns, or is treated as owning, 10% or more of any class of our ordinary shares.

For purposes of the discussion below, you are a US holder if you are a beneficial owner of our ordinary shares or ADSs who or which is:

- an individual US citizen or resident alien;
- a corporation, or entity taxable as a corporation, that was created under US law (federal or state); or
- an estate or trust whose worldwide income is subject to US Federal income tax.

If you are not a US holder, you are a non-US holder and the discussion below titled -US Federal Income Tax Consequences to non-US Holders will apply to you.

If a partnership holds our ordinary shares or ADSs, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner of a partnership holding our ordinary shares or ADSs, you should consult your tax advisor.

US Federal Income Tax Consequences to US Holders

ADSs. In general, for US Federal income tax purposes, US Holders of ADSs will be treated as the beneficial owners of the ordinary shares underlying those ADSs.

Distributions. The gross amount of any distribution (other than in liquidation), including the fair market value of all distributions of ordinary shares whenever a holder may elect to receive cash distributions in lieu of ordinary share distributions, that you receive with respect to our ordinary shares or ADSs (before reduction for South African income tax, if any, withheld from such distributions) generally will be included in your gross income on the day on which you, in the case where you own ordinary shares, or the Depositary, in the case where you own ADSs, receive the distribution. This distribution will be taxed to you as a dividend (that is, ordinary income) to the extent such distribution does not exceed our current or accumulated earnings and profits, as calculated for US Federal income tax purposes (E&P). Dividends received by an individual US holder during taxable years before 2011 will generally be taxed at a maximum rate of 15%, provided certain holding period requirements and other conditions are satisfied. Dividends received by an individual US holder for taxable years after 2010 will be subject to tax at ordinary income rates. To the extent any distribution exceeds our E&P, the distribution will first be treated as a tax-free return of capital to the extent of your adjusted tax basis in our ordinary shares or ADSs, as applicable, and will be applied against and reduce such basis on a dollar-for-dollar basis (thereby increasing the amount of gain and decreasing the amount of loss recognised on a subsequent disposition of such ordinary shares or ADSs). To the extent that such distribution exceeds your adjusted tax basis, the distribution will be taxed as gain recognised on a sale or exchange of our ordinary shares or ADSs, as applicable. See -Sale or Other Disposition of Company Ordinary Shares and ADSs , below. Because we are not a US corporation, no dividends-received deduction will be allowed to a corporate US holder with respect to dividends paid by us.

Distributions on the ordinary shares and ADSs are expected to be made by us in US dollars, to the extent necessary. In the event that distributions on the ordinary shares and ADSs are made by us in Rand, any dividends paid in Rand generally will be included in your gross income in a US dollar amount calculated by reference to the exchange rate in effect on the day you, in the case of ordinary shares, or the Depositary, in the case of ADSs, receive the dividend. It is anticipated that the Depositary will, in the ordinary course, convert Rand received by it as distributions on the ADSs into US dollars. To the extent that the Depositary does not convert the Rand into US dollars at the time that you are required to take the distribution into your gross income for US Federal income tax purposes, you may recognise foreign exchange gain or loss, taxable as ordinary income or loss, on the later conversion of the Rand into US dollars. The gain or loss recognised will generally be based upon the difference between the exchange rate in effect when the Rand are actually converted and the spot exchange rate in effect at the time the distribution is taken into account and any such gain or loss will generally be treated as United States source income for US foreign tax credit purposes.

Dividends paid by us will generally be treated as foreign source income for US foreign tax credit limitation purposes. Subject to certain limitations, US holders may elect to claim a foreign tax credit against their US Federal income tax liability for South African tax withheld (if any) from dividends received in respect of our ordinary shares or ADSs, as applicable. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. For this purpose, for taxable years ending prior to January 1, 2007, dividends paid by us in respect of our ordinary shares or ADSs, as applicable, generally will be passive income or, in the case of certain types of US holders, financial services income and therefore any US tax imposed on these dividends cannot be offset by excess foreign tax credits that you may have from foreign source income not qualifying as passive income or financial service income, respectively. Under the revised foreign tax credit limitation rules effective for taxable years ending after December 31, 2006, any such dividend income generally will be passive income or, in the case of certain types of US holders, general income. Additional limitations on the credit apply to individual US holders receiving dividends if the dividends are eligible for the 15% maximum tax rate on dividends described above. US holders that do not elect to claim a foreign tax credit may instead claim a deduction for South African tax withheld (if any).

Sale or Other Disposition of Company Ordinary Shares and ADSs. Subject to the discussion of passive foreign investment companies below, generally speaking, in connection with the sale or other taxable disposition of our ordinary shares or ADSs, as applicable:

- you will recognise gain or loss equal to the difference (if any) between:
- the US dollar value of the amount realised on such sale or other taxable disposition; and
- your adjusted tax basis in such ordinary shares or ADSs;
- any gain or loss will be capital gain or loss and will be long-term capital gain or loss if your holding period for our ordinary shares or ADSs, as applicable, is more than one year at the time of such sale or other taxable disposition;
- long-term capital gains recognised by individual US holders during taxable years before 2011 will generally be taxed at a maximum rate of 15%;
- any gain or loss will generally be treated as having a United States source for United States foreign tax credit purposes; and
- your ability to deduct capital losses (if any) is subject to limitations.

If you are a cash basis US holder who receives foreign currency (e.g., Rand) in connection with a sale or other taxable disposition of our ordinary shares or ADSs, as applicable, the amount realised will be based on the US dollar value of the foreign currency received with respect to such ordinary shares or ADSs, as determined on the settlement date of such sale or other taxable disposition.

If you are an accrual basis US holder, you may elect the same treatment required of cash basis taxpayers with respect to a sale or other taxable disposition of our ordinary shares or ADSs, as applicable, provided that the election is applied consistently from year to year. Such election may not be changed without the consent of the Internal Revenue Service. If you are an accrual basis US holder and do not elect to be treated as a cash basis taxpayer (pursuant to the Treasury Regulations applicable to foreign currency transactions) for this purpose, you may have a foreign currency gain or loss for US Federal income tax purposes because of differences between the US dollar value of the foreign currency received prevailing on the date of the sale or other taxable disposition of our ordinary shares or ADSs, as applicable, and the date of payment. Any such currency gain or loss generally will be treated as ordinary income or loss and would be in addition to gain or loss, if any, that you recognised on the sale or other taxable disposition of our ordinary shares or ADSs, as applicable.

You may incur South African stamp duty or MST in connection with a subsequent registration of transfer of ordinary shares. See *South Africa Duty on the Shares*. In such case, stamp duty or MST, as applicable will not be a creditable tax for US foreign tax credit purposes, but will be deductible. In the case of an individual US holder, such deduction will be subject to specified limits on the deductibility of investment expenses.

Passive Foreign Investment Company. US holders (who are not tax-exempt) would be subject to a special, adverse tax regime (that would differ in certain respects from that described above) if we were or were to become a passive foreign investment company for US Federal income tax purposes. Although the determination of whether a corporation is a passive foreign investment company is made annually, and thus may be subject to change, we do not believe that we are, nor do we expect to become, a passive foreign investment company. Notwithstanding the foregoing, we urge you to consult your own US tax advisor regarding the adverse US Federal income tax consequences of owning the stock of a passive foreign investment company and of making certain elections designed to lessen those adverse consequences.

US Federal Income Tax Consequences to Non-US Holders

Distributions. If you are a non-US holder, you generally will not be subject to US Federal income tax on distributions made on our ordinary shares or ADSs unless:

- you conduct a trade or business in the United States; and
- the dividends are effectively connected with the conduct of that trade or business (and, if an applicable income tax treaty so requires as a condition for you to be subject to US Federal income tax on a net income basis in respect of income from our ordinary shares or ADSs, as applicable, such dividends are attributable to a permanent establishment that you maintain in the United States).

If you fail the above test, you generally will be subject to tax in respect of such dividends in the same manner as a US holder, as described above. In addition, any effectively connected dividends received by a non-US corporation may also, under certain circumstances, be subject to an additional branch profits tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

Sale or Other Disposition of Company Ordinary Shares and ADSs. If you are a non-US holder, you will not be subject to US Federal income tax, including withholding tax, in respect of gain recognised on a sale or other taxable disposition of our ordinary shares or ADSs, as applicable, unless:

- your gain is effectively connected with a trade or business that you conduct in the United States (and, if an applicable income tax treaty so requires as a condition for you to be subject to US Federal income tax on a net income basis in respect of gain from the sale or other disposition of our ordinary shares or ADSs, as applicable, such gain is attributable to a permanent establishment maintained by you in the United States) or
- you are an individual and are present in the United States for at least 183 days in the taxable year of the sale or other disposition, and either:
 - your gain is attributable to an office or other fixed place of business that you maintain in the United States; or
 - you have a tax home in the United States.

Effectively connected gains realised by a non-US corporation may also, under certain circumstances, be subject to an additional branch profits tax at a rate of 30% or such lower rate as may be specified by an applicable income tax treaty.

Backup Withholding and Information Reporting

Payments and sale proceeds in respect of our ordinary shares or ADSs, as applicable, that are made in the United States or by a US related financial intermediary may be subject to US information reporting rules. You will not be subject to backup withholding of US Federal income tax provided that:

- you are a corporation or other exempt recipient; or
- you provide a taxpayer identification number (which, in the case of an individual, is his or her social security number) and meet other information reporting and certification requirements.

If you are a non-US holder, you generally are not subject to information reporting and backup withholding, but you may be required to provide a certification of your non-US status in order to establish that you are exempt. You may be subject to information reporting and backup withholding if you sell your ordinary shares or ADSs through a US broker and you are not eligible for an exemption. You may be subject to information reporting, but not backup withholding if you sell your shares or ADSs through a broker with certain connections with the US and you are not eligible for an exemption.

Amounts withheld under the backup withholding rules may be credited against your US Federal income tax liability, and you may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service.

Documents on Display

The documents concerning Sappi Limited referred to in this Annual Report may be inspected at the registered office of Sappi Limited at 48 Ameshoff Street, Braamfontein, Johannesburg, Republic of South Africa.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The principal market risks (that is, the risk of loss arising from adverse changes in market rates and prices) to which Sappi is exposed are:

- interest rates on interest bearing debt;
- foreign exchange rates, generating translation and transaction gains and losses;
- fair value fluctuations on financial instruments;
- fair value fluctuations on plantations,
- credit risk;
- commodity prices, affecting the cost of products, and.
- discount rates for post employment benefits.

For a detailed description of these risks, see notes 1, 2, 11, 28, 29 and 31 to our Group annual financial statements included elsewhere in this Annual Report.

Commodity Price Risk

The selling prices of the majority of products manufactured and purchase prices of many raw materials used generally fluctuate in line with commodity cycles. Prices of chemical cellulose generally follow those of paper pulp, although the cycle is generally less volatile. As a result, the sale of chemical cellulose also tends to act as a natural hedge for paper pulp. Our total pulp production capacity is over 100% of our total pulp requirements. However, there are differences between the types of pulp required in our paper making operations and the grades of pulp we produce, as well as regional differences. We are therefore a buyer as well as a seller of paper pulp. Other than maintaining a high level of pulp integration, no hedging techniques are applied. For a description of our level of pulp integration, see Item 4 Information on the Company The Pulp and Paper Industry Pulp , Item 4 Information on the Company Sappi Fine Paper , Item 4 Information on the Company Supply Requirements and Item 5 Operating and Financial Review and Prospects Markets . Despite our present relatively high level of pulp integration on a Group-wide basis, in the event of significant increases in the prices of pulp on a Group-wide basis, our non-integrated and partially integrated operations could be adversely affected if they are unable to raise paper prices by amounts sufficient to maintain margins.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

As of the end of the period covered by this report (the Evaluation Date) Sappi's management (with the participation of its Chief Executive Officer and Chief Financial Officer), conducted an evaluation pursuant to Rule 13a-15 promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act), of the effectiveness of the design and operation of its disclosure controls and procedures. Based on this evaluation, Sappi's chief executive officer and chief financial officer concluded that, as of the Evaluation Date, such disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by Sappi in reports it files or submits under the Exchange Act is recorded, processed, summarised and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

We reported a material weakness in our Annual Report on Form 20-F for fiscal 2005 relating to weakness in our disclosure controls over US GAAP reconciliation. Subsequent to the reporting of that weakness, a number of steps have been taken to improve these controls. These include:

- An external review by PriceWaterhouseCoopers of our US GAAP disclosure in an effort to identify any further control weaknesses
- The establishment of an internal consulting process for all technical accounting decisions. In terms of this process all technical accounting decisions and accounting policies are subject to specific review in our North American office from a US GAAP standpoint
- A formal training programme for all accountants in management positions that includes both International Financial Reporting Standards and US GAAP

Changes referred to last year in the business and information technology (IT) systems have continued in the current financial year:

North America

A number of IT systems previously developed in Europe have been deployed in North America. The number of peripheral IT technologies used previously has been reduced and more reliance has been placed on our core Enterprise Resource Planning system (ERP), SAP. In particular we are anticipating an improvement in the control environment surrounding our sales, logistical and operations planning environments. These systems are at an advanced stage of deployment.

(b) Management's Report on Internal Control over Financial Reporting

Management of Sappi, together with its consolidated subsidiaries, is responsible for establishing and maintaining adequate internal control over financial reporting. Sappi's internal control over financial reporting is a process designed under the supervision of the chief executive and chief financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Sappi's

financial statements for external reporting purposes in accordance with International Financial Reporting Standards.

As of September, 2006, we conducted an assessment of the effectiveness of Sappi's internal control over financial reporting based on the framework established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on this assessment, we have determined that Sappi's internal control over financial reporting as of September 2006 is effective. We also determined that there were no material weaknesses as of this date.

Our assessment of the effectiveness of the Company's internal control over financial reporting as of September 2006 has been audited by Deloitte, an independent registered public accounting firm, as stated in their report appearing in Item 15(c) below.

(c) **Attestation report of the independent registered public accounting firm**

To the board of directors and shareholders of Sappi Limited:

We have audited management's assessment, included in Item 15 (b) above, that Sappi Limited and its subsidiaries (the Company) maintained effective internal control over financial reporting as of September 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that

the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of September 2006, is fairly stated, in all material respects, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedules as of and for the year ended September 2006 of the Company and our report dated December 15, 2006 expressed an unqualified opinion on those financial statements and financial statement schedules.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

The Board has determined that Dr Deenadayalen Konar qualifies as an audit committee financial expert on the Audit Committee of Sappi Limited. The Board determined that Dr Konar acquired the required attributes by way of education, practical experience, practice as a registered accountant and auditor, and participation as a member of the audit committees of significant entities that have applied International Financial Reporting Standards. See Item 6 for a description of Dr Konar's background and relevant experience. Dr Konar is an independent Non-Executive Director of Sappi.

ITEM 16B. CODE OF ETHICS

We have adopted the Sappi Code of Ethics (the "Code") that applies to all of our employees, including our Chief Executive Officer, Chief Financial Officer and Group Financial Manager (such officers, collectively, the "senior officers"). The Code, as it applies to our senior officers, is complemented by a Corporate Compliance Policy adopted by our Board of Directors regarding Ethics Guidelines for Senior Officers (the "Senior Officer Corporate Compliance Policy"). We believe the Code, as supplemented by our Senior Officer Corporate Compliance Policy, constitutes a code of ethics as defined in Item 16B of Form 20-F.

We have filed a copy of the Code and the Senior Officer Corporate Compliance Policy as an exhibit.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Principal independent auditor fees paid for the year ended September 2006 and 2005 were as follows:

	2006	2005
	(US\$ million)	
Audit-fees(1)	5	5
Audit-related fees	2	
Sub-total	7	5
Tax services(2)	2	5
All other fees		
	9	10

(1) Audit-fees consist of assurance and related services that are reasonably related to the performance of the audit or review of the group's financial statements.

(2) These are fees for professional services performed by Deloitte & Touche with respect to tax compliance, tax advice and tax planning. This includes advice on tax aspects of group acquisitions, disposals, reorganisations, and financing, as well as analysis of the impact on the group for changes to tax laws in various countries.

Audit Committee Pre-Approval Policy

In accordance with our audit committee pre-approval policy, all audit and non-audit services performed for us by our independent accountants were pre-approved by the audit committee of our board of directors, which concluded that the provision of such services by the independent accountants was compatible with the maintenance of that firm's independence in the conduct of its auditing functions.

The pre-approval policy provides for specific audit committee pre-approval, prior to engagement, of any services, other than audit services covered by the annual engagement letter. In addition, services to be provided by the independent accountants that are not within the category of pre-approved services must be approved by the audit committee prior to engagement, regardless of the service being requested and the amount.

Requests or applications for services that require specific separate approval by the audit committee are required to be submitted to the audit committee by both management and the independent accountants, and must include a detailed description of the services to be provided and a joint statement confirming that the provision of the proposed services does not impair the independence of the independent accountants.

Pre-approval may be granted either by the audit committee or its chairman or any member of the audit committee to whom this authority has been delegated by the audit committee. Where pre-approval is granted by an individual member of the audit committee, the matter is tabled for noting at the next meeting of the full Sappi Limited audit committee.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASER

During the 2006 fiscal year no Sappi Limited share repurchases were made.

Sappi stated its intention, on November 9, 2000, to acquire Sappi shares through a wholly owned Sappi subsidiary, subject to applicable stock exchange and legal limitations. Sappi has been given approval at its annual general meetings of shareholders, including the meetings held on March 7, 2005 and March 6, 2006, to purchase its shares up to a maximum of 10% of the issued ordinary share capital in any one financial year. The general authority is subject to the Listings Requirements of the JSE Limited and the Companies Act No. 61 of 1973 of South Africa, as amended, and is granted until the next annual general meeting. Some of the repurchased shares, have been, and will continue to be, utilised to meet the requirements of the Sappi Limited Share Incentive Trust from time to time.

PART III

ITEM 17. FINANCIAL STATEMENTS

Sappi Limited is furnishing financial statements pursuant to the instructions of Item 18 of Form 20-F.

ITEM 18. FINANCIAL STATEMENTS

The Group annual financial statements and schedules together with the Report of the Independent Auditors are included as the F pages to this Annual Report.

ITEM 19. EXHIBITS

- 1.1 Memorandum and Articles of Association of Sappi Limited, as amended and restated on March 4, 1999, incorporated by reference to Exhibit 1.1 to the 1998 Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on March 29, 1999.
- 1.2 Special Resolution of Sappi Limited dated March 2, 2000 pursuant to the South African Companies Act effecting certain amendments to the Articles of Association of Sappi Limited, incorporated by reference to Exhibit 1.1 to the 1999 Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on March 23, 2000.
- 2.1 Specimen Ordinary Share Certificate, incorporated by reference to Exhibit 2.1 to the Registration Statement on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on October 22, 1998.
- 2.2 Amended and Restated Deposit Agreement among Sappi Limited, The Bank of New York, as depositary, and the Owners from time to time of American Depositary Receipts dated October 26, 1999, incorporated by reference to Exhibit 2.2 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 27, 2001.
- 2.3 Form of American Depositary Receipt (included in Exhibit 2.2).
- 2.6 Long-term debt instruments not exceeding 10% of our total assets. Sappi Limited undertakes to provide the Securities and Exchange Commission with copies upon request.
- 4.1 Sappi Limited Share Incentive Scheme, incorporated by reference to Exhibit 3.12 to the Registration Statement on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on October 22, 1998.
- 4.2 Form of Deed of Amendment to The Sappi Limited Share Incentive Scheme dated January 19, 1998 between Sappi Limited, David Charles Brink and Thomas Louw de Beer, incorporated by reference to Exhibit 2.1 to the 1999 Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on March 23, 2000.
- 4.3 Second Deed of Amendment to The Sappi Limited Share Incentive Scheme dated March 2, 2000 between Sappi Limited, David Charles Brink and Thomas Louw de Beer, incorporated by reference to Exhibit 2.2 to the 1999 Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on March 23, 2000.
- 4.4 Agreement among KNP Leykam Zellstoff GmbH, Norske Skog Bruck GmbH, Patria Papier und Zellstoff AG and Zellstoff Pöls AG dated December 17, 1996, incorporated by reference to Exhibit 3.13 to the Registration Statement on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on October 22, 1998.
- 4.7 Contract of Sale between the South African Forestry Company Limited (SAFCOL) and Sappi Manufacturing (Pty) Limited dated May 12, 1995, incorporated by reference to Exhibit 3.16 to the Registration Statement on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on October 22, 1998.
- 4.9 Asset Purchase Agreement between Potlatch Corporation and Northern Holdings LLC (renamed Sappi Cloquet LLC) dated March 18, 2001, incorporated by reference to Exhibit 4.9 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 30, 2002.

131

- 4.10 Credit Facility, dated May 7, 2003, among Sappi Papier Holding AG as borrower, Sappi International S.A. as guarantor, Bank Austria Creditanstalt AG as mandated lead arranger and agent and various financial institutions as lenders, incorporated by reference to Exhibit 4.10 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 19, 2003.
- 4.11 Resolution passed by the members of the Human Resources Committee of Sappi Limited on amendments to the Sappi Limited Share Incentive Scheme, incorporated by reference to Exhibit 4.11 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 17, 2004.
- 4.12 An amendment dated November 18, 2005, to the Credit Facility, dated May 7, 2003 as described in 4.10., incorporated by reference to Exhibit 4.12 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 20, 2005.
- 4.13 Multi-Currency Revolving Credit Facility, dated June 29, 2005, among Sappi Papier Holding GmbH (SPH), Sappi International S.A. (SISA) and Sappi Trading Pulp AG as borrowers and BNP Paribas, J P Morgan PLC, SG Corporate and Investment Banking, as mandated lead arrangers and the additional financial institutions named therein, incorporated by reference to Exhibit 4.13 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 20, 2005.
- 4.14 The Sappi Limited Performance Share Incentive Plan, dated March 7, 2005 between Sappi Limited, David Charles Brink, and Meyer Feldberg (as Trustees), incorporated by reference to Exhibit 4.3 to the Registration Statement on Form S-8 of Sappi Limited filed with the Securities and Exchange Commission on December 15, 2004.
- 6.1 Computation of Earnings per Share, incorporated by reference to note 7 of the notes to the Group annual financial statements included elsewhere in this Annual Report.
- 7.1 An explanation of other ratios used in this Annual Report, incorporated by reference to Exhibit 7.1 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 30, 2002.
- 8.1 List of significant subsidiaries, incorporated by reference to Item 4 Information on the Company Organisational Structure included elsewhere in this Annual Report.
- 11.1 Sappi Limited Corporate Compliance Policies Ethics Code Guidelines for Senior Officers, incorporated by reference to Exhibit 11.1 to the Annual Report on Form 20-F of Sappi Limited filed with the Securities and Exchange Commission on December 19, 2003.
- 12.1 Certification of Eugene van As, Chairman and Chief Executive Officer of Sappi Limited pursuant to Exchange Act Rule 13a-14(a).
- 12.2 Certification of Mark Thompson, Chief Financial Officer of Sappi Limited pursuant to Exchange Act Rule 13a-14(a).
- 13.1 Certification of Eugene van As, Chairman and acting Chief Executive Officer of Sappi Limited and Mark Thompson, Chief Financial Officer of Sappi Limited pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 15.1 Consent of independent registered public accounting firm.

SIGNATURES

The registrant hereby certifies that it meets all of the requirements for filing on Form 20-F and that it has duly caused and authorised the undersigned to sign this annual report on its behalf.

REPORT OF THE INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the board of directors and shareholders of Sappi Limited:

We have audited the accompanying consolidated balance sheets of Sappi Limited and its subsidiaries as at September 2006 and 2005, and the related consolidated income statements, cash flow statements and statements of recognised income and expense for each of the two years in the period ended September 2006. Our audits also included the financial statement schedules listed in the Index on page F-1. These financial statements and financial statement schedules are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sappi Limited and its subsidiaries at September 2006 and 2005 and the results of their operations and cash flows for each of the two years in the period ended September 2006 in conformity with International Financial Reporting Standards. Also, in our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of September 2006, based on the criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 15, 2006 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

International Financial Reporting Standards vary in certain respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in note 35 to the consolidated financial statements.

SAPPI
notes to the group annual financial statements
for the year ended September 2006

1. Business

Sappi Limited, a corporation organised under the laws of the Republic of South Africa (the company and, together with its consolidated subsidiaries, Sappi or the group), was formed in 1936 and is a major, vertically integrated international pulp and paper producer. Sappi is a leading global producer of coated fine paper and chemical cellulose. The group has manufacturing facilities in nine countries, on four continents, and customers in over 100 countries across the globe.

The group is composed of its Sappi Fine Paper and Sappi Forest Products business units. Sappi Fine Paper has manufacturing and marketing facilities in North America, Europe, southern Africa and Asia and produces mainly high quality branded coated fine paper. It also manufactures uncoated graphic and business paper, coated and uncoated speciality paper, and casting release paper used in the manufacture of artificial leather and textured polyurethane applications. Sappi Forest Products, based in southern Africa, produces commodity paper products, pulp, chemical cellulose and forest and timber products for southern Africa and export markets. The group operates a trading network called Sappi Trading for the international marketing and distribution of chemical cellulose and market pulp throughout the world and of the group's other products in areas outside our core operating regions of North America, Europe and southern Africa. All sales and costs associated with Sappi Trading are allocated to our two reporting segments.

2. Accounting policies

The following principal accounting policies have been consistently applied in dealing with items that are considered material in relation to the Sappi Limited group financial statements.

2.1 Basis of preparation

The group's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) adopted by the International Accounting Standards Board (IASB) and Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) of the IASB, and the requirements of the South African Companies Act of 1973. These are the group's first consolidated annual financial statements prepared in accordance with IFRS. In prior years the group prepared its consolidated financial statements in accordance with South African Statements of Generally Accepted Accounting Practice (SA GAAP). The group has restated its opening balance sheet at October 2004 applying IFRS retrospectively, except with regard to IFRS 1: First-time Adoption of International Financial Reporting Standards which either permits, prohibits or modifies the retrospective application of IFRS as set out in note 2.5 of the financial statements.

The financial statements are presented in United States Dollars (US\$) and are rounded to the nearest million dollars. US\$ is the presentation currency of the group because the majority of the group's revenue is denominated in USD and it is the currency in which the pulp and paper industry is measured.

They are prepared on the historical-cost basis, except for the following assets and liabilities that are stated at their fair value:

- derivative financial instruments;
- financial assets and financial liabilities classified as held-for-trading;

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

- financial assets and financial liabilities designated at fair value through profit or loss;
- financial assets classified as available-for-sale; and
- plantations (refer note 2.2.14).

Non-current assets and disposal groups held for sale are stated at the lower of carrying amount and fair value less costs to sell.

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements and in preparing an opening IFRS balance sheet at October 2004 for the purposes of the transition to IFRS.

The accounting policies have been applied consistently by all the group entities.

(i) Fiscal year

The group's financial year end is on Sunday closest to the last day of September.

Accordingly the last two financial years ended as follows:

- 01 October 2006 (year ended September 2006) (52 weeks)
- 02 October 2005 (year ended September 2005) (53 weeks)

The financial years commenced as follows:

- 03 October 2005 (October 2005)
- 27 September 2004 (October 2004)

(ii) Underlying concepts

The financial statements are prepared on the going concern basis.

Assets and liabilities and income and expenses are not offset in the income statement or balance sheet unless specifically permitted by an accounting standard or an interpretation.

Financial assets and financial liabilities are offset and the net amount reported only when a legally enforceable right to set off the amounts exists and the intention is either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Changes in accounting estimates are recognised prospectively in profit or loss, except to the extent that they give rise to changes in the carrying amount of recognised assets and liabilities where the change in estimate is recognised immediately.

Prior period errors are retrospectively restated if material.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

(iii) Recognition of assets and liabilities

Assets are only recognised if they meet the definition of an asset, ie, if it is a resource controlled by the group and it is probable that future economic benefits associated with the asset will flow to the group and the cost or fair value can be measured reliably.

Liabilities are only recognised if they meet the definition of a liability, ie if it is a present obligation and it is probable that future economic benefits associated with the liability will flow from the entity and the cost or fair value can be measured reliably.

Financial instruments are recognised when the entity becomes a party to the contractual provisions of the instrument. Financial assets and liabilities as a result of firm commitments are only recognised when one of the parties has performed under the contract.

(iv) Derecognition of assets and liabilities

Financial assets are derecognised when the contractual rights to receive cash flows have been transferred or have expired or when substantially all the risks and rewards of ownership have passed (refer to 2.2.5 (vi)).

Financial liabilities are derecognised when the relevant obligation has either been discharged or cancelled or has expired.

All other assets are derecognised on disposal or when no future economic benefits are expected from their use.

2.2 Accounting policies

2.2.1 Foreign currencies

(i) Foreign currency transactions

Transactions in foreign currencies are converted into the functional currency at the rate of exchange ruling at the date of such transactions. The functional currency of the group's individual operations is the currency of the primary economic environment in which these entities operate.

Monetary assets and liabilities in foreign currencies are translated into the functional currency of the group at rates of exchange ruling at the balance sheet date. Non-monetary assets (plantations) denominated in foreign currencies that are stated at fair value are translated into the functional currency of the group at foreign exchange rates ruling at the reporting date. Non-monetary assets and liabilities denominated in foreign currencies that are stated at cost are converted into the functional currency of the group at the rate of exchange ruling at the date of initial recognition and are not subsequently retranslated.

Exchange gains and losses on the translation and settlement of foreign currency monetary assets and liabilities during the period are recognised in the income statement in the period in which they arise.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

(ii) Investments in foreign operations

The group's presentation currency is United States Dollar (USD). The assets and liabilities, including goodwill, of a foreign entity that has a non-dollar functional currency are translated at the closing rate, while the income and expenses are translated using the average exchange rate. The differences that arise on translation are reported directly in equity. These translation differences are recognised in profit or loss for the period on disposal of the foreign operation.

All other foreign entities are reported in dollar functional currency, with translation differences being reported in income.

The primary determinants of non-dollar functional currencies are the economic factors that determine the sales price for goods and services, and costs. Additional supplementary factors to be considered are the funding, autonomy and cash flows.

Goodwill and fair value adjustments arising on the acquisition of a non dollar functional currency entity are treated as assets and liabilities of the entity and are translated at the closing rate.

The group used the following exchange rates for financial reporting purposes:

	Rate at	
	Sep 06	Sep 05
ZAR to one US\$	7.7738	6.3656
GBP to one US\$	0.5340	0.5669
EUR to one US\$	0.7891	0.8313

	Average annual rate	
	Sep 06	Sep 05
ZAR to one US\$	6.6039	6.2418
GBP to one US\$	0.5560	0.5435
EUR to one US\$	0.8120	0.7900

2.2.2 Group accounting

(i) Subsidiary undertakings and special-purpose entities

Subsidiary undertakings are those enterprises controlled by the group. Subsidiary undertakings include special purpose entities created to accomplish a narrow, well-defined objective, which may take the form of a company, corporation, trust, partnership or an unincorporated entity. The substance of the relationship between the group and a special-purpose entity indicates that the group controls the entity.

Control is deemed to exist when the group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The group considers the existence and effect of potential voting rights that are currently exercisable or convertible when assessing whether it has control. Entities in which the company holds half or less of the voting rights, but which are controlled by the group by retaining the majority of risks or benefits, are also included in the consolidated financial statements.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

The group financial statements include the assets, liabilities and results of the company and subsidiary undertakings (including special-purpose entities) controlled by the group. The results of subsidiary undertakings acquired or disposed of in the year are included in the consolidated income statement from the date of acquisition or up to the date of disposal or cessation of control.

Where required, the financial statements of subsidiaries are adjusted to bring the accounting policies in line with those used by the group.

Intragroup balances and transactions, and profits and losses arising from intragroup transactions, are eliminated in the preparation of the group financial statements. Unrealised losses are not eliminated to the extent that they provide objective evidence of impairment.

(ii) Associates

An associate is an enterprise, including an unincorporated entity such as a partnership, over which the group has the ability to exercise significant influence, but not control, through participation in the financial and operating policy decisions of the investee (that is neither a subsidiary nor an investment in a joint venture).

The results and assets and liabilities of associates are incorporated in the group's financial statements using the equity method of accounting. The share of the associates' retained income, which is the profit after tax, is determined from their latest financial statements. The carrying amount of such investments is reduced to recognise any impairment in the value of individual investments. When the group's share of losses exceeds the carrying amount of the associate, the carrying amount is reduced to nil, inclusive of any debt outstanding, and recognition of further losses is discontinued, except to the extent that the group has incurred or guaranteed obligations in respect of the associate.

Where an entity within the group transacts with an associate of the group, unrealised profits and losses are eliminated to the extent of the group's interest in the relevant associate.

Investments in associates held with the intention of disposing thereof within 12 months are accounted for as non-current assets held for sale.

(iii) Joint ventures

Joint ventures are those entities over which the group has joint control in terms of a contractual agreement. Joint ventures are included in the group's financial statements using the equity method of accounting. The carrying amount of such investments is reduced to recognise any impairment in the value of individual investments.

Where an entity within the group transacts with a joint venture of the group, unrealised profits and losses are eliminated to the extent of the group's interest in the joint venture. When the group's share of losses exceeds the carrying amount of the joint venture, the carrying amount is reduced to nil and recognition of further losses is discontinued, except to the extent that the group has incurred losses or guaranteed obligations in respect of the joint venture. Investments in joint ventures held with the intention of disposing thereof within 12 months are accounted for as non-current assets held for sale.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

(iv) Goodwill

All business combinations are accounted for by applying the purchase method of accounting. At acquisition date the group recognises the acquiree's identifiable assets, liabilities and contingent liabilities that satisfy the recognition criteria at their respective fair values. The cost of a business combination is the fair value of the purchase consideration due at date of acquisition plus any directly attributable transaction costs. Any contingent purchase consideration is recognised to the extent that it is probable and can be measured reliably. Any excess between the cost of the business combination and the group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities acquired is recognised as goodwill in the balance sheet. Goodwill is adjusted for any subsequent remeasurement of contingent purchase consideration.

Goodwill is subsequently held at cost less any accumulated impairment losses. Goodwill is not amortised but tested for impairment annually or more frequently where there is an indication of impairment.

Goodwill is tested for impairment based on an allocation to one or more cash-generating units (CGUs), being the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or group of assets. Goodwill is allocated to the CGUs in which the synergies from the business combinations are expected. Each CGU containing goodwill is tested annually for impairment. An impairment loss is recognised whenever the carrying amount of an asset or its CGU exceeds its recoverable amount.

Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to a CGU and then to reduce the carrying amount of the other assets in the CGU on a pro rata basis.

The recoverable amount of a CGU is the higher of its fair value less cost to sell and its value-in-use. The fair value less cost to sell is determined by ascertaining the current market value of an asset and deducting any costs related to the realisation of the asset.

In assessing value-in-use, the expected future cash flows from the CGU are discounted to their present value using a pre-taxation discount rate that reflects current market assessment of the time value of money and the risks specific to the CGU.

Impairment losses relating to goodwill are not reversed.

On the disposal of a subsidiary, the attributable amount of goodwill is included in the determination of profit or loss on disposal.

2.2.3 Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value, with maturities of less than three months. Similar investments with maturities beyond three months are considered short-term marketable securities.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

2.2.4 Environmental expenditures and liabilities

Environmental expenditure that pertains to current operations or relate to future revenues are expensed or capitalised, consistent with the company's capitalisation policy. Expenditures that result from the remediation of an existing condition caused by past operations, and do not contribute to current or future revenues, are recognised in profit and loss for the period.

Environmental accruals are recorded based on current interpretation of environmental laws and regulations when it is probable that a liability has been incurred and the amount of such liability can be reliably estimated. Amounts accrued do not include third-party recoveries. Liabilities are recognised for remedial activities when the clean-up is probable and the cost can be reliably estimated. All available information is considered including the results of remedial investigation/feasibility studies (RI/FS). In evaluating any disposal site environmental exposure, an assessment is made of the company's potential share of the remediation costs by reference to the known or estimated volume of the company's waste that was sent to the site and the range of costs to treat similar waste at other sites if a RI/FS is not available.

2.2.5 Financial instruments

Financial instruments are any contracts that give rise to a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. Items which are treated under other accounting standards are not treated as financial instruments, under IAS 32 and IAS 39.

(i) Initial recognition

Financial instruments are recognised on the balance sheet when the group becomes a party to the contractual provisions of a financial instrument. All purchases of financial assets that require delivery within the time frame established by regulation or market convention (regular way purchases) are recognised at trade date, which is the date on which the group commits to purchase the asset. Financial liabilities are recognised when the group becomes a party to the contractual provisions of the financial instrument.

(ii) Initial measurement

Financial instruments are initially recognised at fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are incremental to the group and directly attributable to the acquisition or issue of the financial asset or financial liability.

(iii) Subsequent measurement

Subsequent to initial measurement, financial instruments are either measured at fair value or amortised cost, depending on their classification:

- **Financial assets and financial liabilities at fair value through profit or loss**

Financial instruments at fair value through profit or loss consist of trading instruments and instruments that the group has elected, on initial recognition, to designate as fair value through profit or loss.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

Trading instruments are financial assets or financial liabilities that were acquired or incurred principally for the purpose of sale or repurchase in the near term, form part of a portfolio with a recent actual pattern of short-term profit-taking or are derivatives that do not form part of a designated and effective hedging relationship. The group's approved derivative transactions include foreign exchange contracts, forward rate agreements, currency and interest rate swaps, currency and interest rate options (both written and purchased).

- **Non-trading financial liabilities**

All financial liabilities, other than those at fair value through profit or loss, are classified as non-trading financial liabilities and are measured at amortised cost.

- **Held-to-maturity financial assets**

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturity that the group has both the intent and ability to hold to maturity, other than those that meet the definition of loans and receivables or those that were designated as at fair value through profit or loss or available-for-sale. Held-to-maturity financial assets are measured at amortised cost, with interest income recognised in profit and loss for the period.

The group does not presently have any held-to-maturity financial assets.

- **Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those classified by the group as at fair value through profit or loss or as available-for-sale.

Financial assets classified as loans and receivables are carried at amortised cost, with interest revenue recognised in profit and loss for the period. The majority of the group's receivables are included in the loans and receivables category.

- **Available-for-sale financial assets**

Financial assets are classified as available-for-sale where the intention with regard to the instrument and its origination and designation does not fall within the ambit of the other financial asset classifications. Available-for-sale instruments are typically assets that are held for a longer period and in respect of which short-term fluctuations in value do not affect the group's hold or sell decision.

Available-for-sale financial assets are measured at fair value, with fair value gains and losses recognised directly in equity along with the associated deferred taxation. Any foreign currency translation gains or losses or interest revenue, measured on an effective-yield basis, are removed from equity to the income statement on debt instruments when they arise.

When available-for-sale equity instruments are determined to be impaired to the extent that the fair value declines below its original cost, the resultant losses are recognised in profit or loss.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

(iv) Embedded derivatives

Certain derivatives embedded in financial and non-financial instruments, are treated as separate derivatives and recognised on a standalone basis, when their risks and characteristics are not closely related to those of the host contract and the host contract is not carried at fair value, with unrealised gains and losses reported in profit or loss.

(v) Measurement basis of financial instruments

- **Amortised cost**

Financial assets and liabilities measured at amortised cost are measured at fair value on initial recognition, plus or minus the cumulative amortisation using the effective interest rate method of any difference between that initial amount and the maturity amount, less any cumulative impairment losses.

- **Fair value**

Direct and incremental transaction costs are included in the initial fair value of financial assets and financial liabilities, other than those at fair value through profit or loss. The best evidence of the fair value of a financial asset or financial liability at initial recognition is the transaction price, unless the fair value of the instrument is evidenced by comparison with other current observable market transactions in the same instrument or based on a valuation technique whose variables include only market observable data.

Where quoted market prices or rates are available, such market data is used to determine the fair value of financial assets and financial liabilities that are measured at fair value. The bid price is used to measure financial assets held and the offer price is used to measure the fair value of financial liabilities. Mid-market prices are used to measure fair value only to the extent that the group has assets and liabilities with offsetting risk positions.

If quoted bid prices are unavailable, the fair value of financial assets and financial liabilities is estimated using pricing models or discounted cash flow techniques. Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market-related rate at the balance sheet date for an instrument with similar terms and conditions. Where pricing models are used, inputs are based on market-related measures at the balance sheet date.

The fair value of a financial liability with a demand feature is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid. In cases where the fair value of financial liabilities cannot be reliably determined, these liabilities are recorded at the amount due.

Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, and derivatives that are linked to and have to be settled by delivery of such unquoted equity instruments, are not measured at fair value but at cost.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

(vi) Derecognition

All financial assets and financial liabilities are derecognised when the group commits to selling a financial asset or redeeming a financial liability.

The group derecognises a financial asset when:

- the contractual rights to the cash flows arising from the financial asset have expired or have been forfeited by the group; or
- it transfers (or it assumes an obligation to transfer) the financial asset, including substantially all the risks and rewards of ownership of the asset; or
- it transfers the financial asset, neither retaining nor transferring substantially all the risks and rewards of ownership of the asset, but no longer retains control of the asset.

A financial liability is derecognised when and only when the liability is extinguished, ie when the obligation specified in the contract is discharged, cancelled or has expired.

The difference between the carrying amount of a financial asset or financial liability (or part thereof) that is derecognised and the consideration paid or received, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss for the period.

(vii) Impairment of financial assets

The group assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets may be impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a loss event) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of assets is impaired includes observable data that come to the attention of the group about the following loss events:

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- the group, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the group would not otherwise consider;
- it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for that financial asset because of financial difficulties; or
- observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:

- adverse changes in the payment status of borrowers in the group; or

F-16

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

- national or local economic conditions that correlate with defaults on the assets in the group.
- **Assets carried at amortised cost**

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in profit or loss.

The group first assesses whether there is objective evidence of impairment individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the group determines that there is no objective evidence of impairment for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date on which the impairment is reversed. The amount of the reversal is recognised in profit or loss for the period.

- **Available-for-sale financial assets**

When a decline in the fair value of an available-for-sale financial asset has been recognised directly in equity and there is objective evidence that the asset is impaired, the cumulative loss that has been recognised directly in equity is removed from equity and recognised in profit or loss even though the financial asset has not been derecognised. The amount of the cumulative loss that is removed from equity and recognised in profit or loss is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss. Impairment losses recognised in profit or loss for an investment in an equity instrument classified as available-for-sale are not reversed through profit or loss.

If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed, with the amount of the reversal recognised in profit or loss for the period.

(viii) Hedge accounting

Hedge accounting recognises the offsetting effects on profit or loss of changes in the fair values of the hedging instrument and the hedged item.

Hedging relationships are of three types:

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

- **Fair value hedge**

A hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment, or an identified portion of such an asset, liability or firm commitment, that is attributable to a particular risk and could affect profit or loss.

If a fair value hedge meets the conditions for hedge accounting, any gain or loss on the hedged item attributable to the hedged risk is included in the carrying amount of the hedged item and recognised in profit or loss. The changes in the fair value of the hedging instrument is recognised in profit and loss.

- **Cash flow hedge**

A hedge of the exposure to variability in cash flows that (i) is attributable to a particular risk associated with a recognised asset or liability (such as all or some future interest payments on variable rate debt) or a highly probable forecast transaction and (ii) could affect profit or loss.

If a cash flow hedge meets the conditions for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in equity and the ineffective portion is recognised in profit or loss. A hedge of the foreign currency risk of a firm commitment is designated and accounted for as a cash flow hedge. The group does not currently apply cash flow hedge accounting.

If an effective hedge of a forecast transaction subsequently results in the recognition of a financial asset or financial liability, the associated gains or losses recognised in equity are transferred to income in the same period in which the asset or liability affects profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, the associated gains or losses recognised in equity are included in the initial measurement of the acquisition cost or other carrying amount of the asset or liability.

- **Hedge of a net investment in a foreign operation**

If a hedge of a net investment in a foreign entity meets the conditions for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in equity and the ineffective portion is recognised in profit or loss. On disposal of a foreign entity, the gain or loss recognised in equity is transferred to profit or loss. The group does not have any hedges of net investments.

- **Discontinuance of hedge accounting**

Hedge accounting is discontinued on a prospective basis when the hedge no longer meets the hedge accounting criteria (including when it becomes ineffective), when the hedge instrument is sold, terminated or exercised when, for cash flow hedges, the designation is revoked and the forecast transaction is no longer expected to occur. Any cumulative gain or loss on the hedging instrument for a forecast transaction is retained in equity until the transaction occurs, unless the transaction is no longer expected to occur, in which case it is transferred to profit or loss for the period.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

(ix) Offsetting financial instruments and related income

Financial assets and liabilities are offset and the net amount reported in the balance sheet only when there is a legally enforceable right to set off and there is an intention of settling on a net basis or realising the asset and settling the liability simultaneously. Income and expense items are offset only to the extent that their related instruments have been offset in the balance sheet, with the exception of those relating to hedges, which are disclosed in accordance with the profit or loss effect of the hedged item.

(x) Interest income and expense

Interest income and expense are recognised in profit or loss using the effective interest rate method taking into account the expected timing and amount of cash flows. The effective interest rate method is a method of calculating the amortised cost of a financial asset or financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. Interest income and expense include the amortisation of any discount or premium or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis.

(xi) Other

Dividends from investments and gains or losses on the sale of investments is recognised in profit or loss when the amount of revenue from the transaction or service can be measured reliably, it is probable that the economic benefits of the transaction or service will flow to the group and the costs associated with the transaction or service can be measured reliably.

Gains or losses on derecognition of any financial assets or financial liabilities are included in finance costs. Dividends receivable are included separately in dividend income, within finance income, when a dividend is declared.

2.2.6 Government grants

Government grants are recognised in income over the periods necessary to match them with the related costs which they are intended to compensate.

Government grants related to assets are recognised by deducting the grant from the carrying amount of the related asset.

2.2.7 Intangible assets

Research activities

Expenditure on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding, and expenditure on internally generated goodwill and brands are recognised in profit or loss as an expense as incurred.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

Development activities

Expenditure on engineering projects, computer software and other development activities, whereby set procedures and processes are applied to a project for the production of new or substantially improved products and processes, is capitalised if the engineering projects, computer software and other developed products or processes are technically and commercially feasible and the group has sufficient resources to complete development. The expenditure capitalised includes the cost of materials and directly attributable employee and other costs. Computer development expenditure is amortised only once the relevant software has been commissioned. Intangible assets are stated at cost less accumulated amortisation and impairment losses. Intangible assets, which have not yet been commissioned, are stated at cost less impairment losses.

Amortisation of engineering projects, computer software and development costs is charged to profit or loss on a straight-line basis over the estimated useful lives of these assets, not exceeding five years. Subsequent expenditure relating to computer software is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other subsequent expenditure is recognised as an expense in the period in which it is incurred.

Surpluses or deficits on the disposal of computer software are recognised in profit or loss in the period in which they are incurred. The profit or loss is the difference between the net disposal proceeds and the carrying amount of the asset.

Patents

Patents acquired are capitalized and amortized on a straight line basis over their estimated useful lives, which is on average 10 years.

2.2.8 Impairment of assets other than goodwill and financial instruments

The group assesses all assets (other than goodwill and intangible assets not yet available for use) at each balance sheet date for indications of an impairment or the reversal of a previously recognised impairment. Should there be any indications of impairment, the recoverable amounts of the assets are estimated. These impairments, where the carrying value of an asset exceeds its recoverable amount, or the reversal of a previously recognised impairment, are recognised in profit or loss for the period.

Intangible assets not yet available for use are tested at least annually for impairment.

An impairment loss is recognised in profit or loss whenever the carrying amount of an asset exceeds its recoverable amount.

The recoverable amount of an asset is the higher of its fair value less cost to sell and its value-in-use. The fair value less cost to sell is determined by ascertaining the current market value of an asset and deducting any costs related to the realisation of the asset.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

In assessing value-in-use, the expected future cash flows from the asset are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset whose cash flows are largely dependent on those of other assets the recoverable amount is determined for the cash-generating unit to which the asset belongs.

A previously recognised impairment loss will be reversed if the recoverable amount increases as a result of a change in the estimates used previously to determine the recoverable amount, but not to an amount higher than the carrying amount that would have been determined, net of depreciation or amortisation, had no impairment loss been recognised in prior periods.

2.2.9 Inventories

Inventories are assets held-for-sale in the ordinary course of business, in the process of production for such sale or in the form of materials or supplies to be consumed in the production process or in the rendering of services.

Inventories are stated at the lower of cost or net realisable value. Cost includes all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their preset location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion, distribution and selling.

Cost is determined on the following basis:-

- First in first out (FIFO):- finished goods
- Weighted average:- raw materials, work in progress and consumable stores
- The specific identification basis is used to arrive at the cost of items that are not interchangeable.

The cost of raw materials and consumable stores is the delivered landed cost, while the cost of work in progress and finished goods includes both direct costs and production overheads.

2.2.10 Leases

(i) The group as lessee

Leases in respect of which the group bears substantially all the risks and rewards incidental to ownership are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of the lease property or the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges to achieve an effective rate of interest on the balance outstanding. The corresponding rental obligations, net of finance charges, are included in other long-term payables. The interest element of the finance cost is charged to profit or loss over the lease period.

Capitalized leased assets are depreciated on a straight-line basis over the shorter of the lease period and the expected useful life of the asset.

Leases in respect of which a significant portion of the risks and rewards of ownership is retained by the lessor are classified as operating leases. These leases are mainly for the use of premises and certain

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

office equipment. Payments made under operating leases (net of any incentives received from the lessor) are charged to income on a straight-line basis over the term of the lease. When another systematic basis is more representative of the time pattern of the user's benefit, then that method is used.

(ii) Recognition of lease of land

Leases of land and buildings are classified as operating or finance leases in the same way as leases of other assets.

However, when a single lease covers both land and a building, the minimum lease payments at the inception of the lease (including any upfront payments) are allocated between the land and the building in proportion to the relative fair values of the respective leasehold interests. Any upfront premium allocated to the land element that is normally classified as an operating lease represents prepaid lease payments. These payments are amortized over the lease term in accordance with the time pattern of benefits provided. If the lease payments cannot be allocated reliably between these two elements, the entire lease is classified as a finance lease, unless it is clear that both elements are operating leases.

2.2.11 Non-current assets held for sale and discontinued operations

Non-current assets (or disposal groups) are classified as held for sale when their carrying value will be recovered principally through sale within 12 months rather than use. Non-current assets held for sale are measured at the lower of carrying amount and fair value less cost to sell and are not depreciated.

A discontinued operation is a clearly distinguishable component of the group's business that has been disposed of or is held for sale within 12 months of initial identification, which:

- represents a separate line of a major line of business or geographical area of operations;
- is part of a single coordinated plan to dispose of a major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to resale within 12 months.

The entire asset or disposal group must be available for immediate sale in its present condition and the sale should be highly probable, with an active programme to find a buyer and the appropriate level of management approving the sale. The group does not currently have any discontinued operations.

2.2.12 Provisions

Provisions are recognised when the group has a present legal or constructive obligation as a result of a past event, in respect of which it is probable that an outflow of economic benefits will occur and a reliable estimate can be made of the amount of the obligation. Where the effect of discounting (time value) is material, provisions are discounted and the discount rate used is a pre-taxation rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

SAPPI
notes to the group annual financial statements (Continued)
for the year ended September 2006

2. Accounting policies (Continued)

The following specific policies are applied:-

- A provision for onerous contracts is recognised when the expected benefits to be derived by the group from a contract are lower than the unavoidable cost of meeting the obligations under the contract.
- A provision for restructuring is recognised only if the group has created a detailed formal plan and raised a valid expectation, among those parties directly affected, that the plan will be carried out, either by having begun implementation or by publicly announcing the plan's main features. Future operating costs or losses are not provided for.

2.2.13 Pension plans and other post-retirement benefits

(i) Post employment benefits pensions

Defined-benefit and defined-contribution plans have been established for eligible employees of the group, with the assets held in separate trustee-a
