INTRODUCTORY NOTE. CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION AND RISK FACTORS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 about Solera National Bancorp, Inc. (the Company) and our subsidiary, Solera National Bank (the Bank, collectively with the Company, sometimes referred to as we, us and our) that are subject to risks and uncertainties. Forward-looking statements include information concerning future financial performance, business strategy, projected plans and objectives. Statements preceded by, followed by or that otherwise include the words anticipates, believes, estimates, expects, intends, plans, may increase, may fluctuate and similar expressions of future or verbs such as will, should, would, and could are generally forward-looking in nature and not historical facts. Actual results may differ materially from those projected, implied, anticipated or expected in the forward-looking statements. Readers of this quarterly report should not rely solely on the forward-looking statements and should consider all uncertainties and risks throughout this report. The statements are representative only as of the date they are made, and Solera National Bancorp, Inc. undertakes no obligation to update any forward-looking statement.

These forward-looking statements, implicitly and explicitly, include the assumptions underlying the statements and other information with respect to the Company's beliefs, plans, objectives, goals, expectations, anticipations, estimates, financial condition, results of operations, future performance and business, including management's expectations and estimates with respect to revenues, expenses, return on equity, return on assets, efficiency ratio, asset quality and other financial data and capital and performance ratios.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, these statements involve risks and uncertainties that are subject to change based on various important factors, some of which are beyond the control of the Company. The following factors, among others, could cause the Company's results or financial performance to differ materially from its goals, plans, objectives, intentions, expectations and other forward-looking statements:

- the Company's business may be adversely affected by conditions in the financial markets and economic conditions generally;
- continuation of the economic downturn could reduce our customer base, our level of deposits and demand for financial products such as loans;
- emergency measures designed to stabilize the U.S. financial system are beginning to wind down and the effect of that wind down is unpredictable;
- management of Solera National Bank may be unable to adequately measure and limit credit risk associated with the Bank's loan portfolio, which would affect our profitability;
- we are exposed to higher credit risk by commercial real estate, commercial business, and construction lending;

- our allowance for probable loan losses may be insufficient;
- interest rate volatility could significantly harm our business;
- funding to provide liquidity may not be available to us on favorable terms or at all;
- we may not be able to raise additional capital on terms favorable to us;
- the liquidity of our common stock is affected by its limited trading market;
- the departures of key personnel or directors may impair our operations;
- the Bank's legal lending limits may impair its ability to attract borrowers;

Table of Contents

- the Company is subject to extensive government regulation which may have an adverse effect on the Company's profitability and growth;
- managing reputational risk is important to attracting and maintaining customers, investors and employees;
- monetary policy and other economic factors could adversely affect the Company's profitability;
- the Company's certificate of incorporation and bylaws, and the employment agreements of our executive officers, contain provisions that could make a takeover more difficult;
- our directors and executive officers could have the ability to influence stockholder actions;
- the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds, and other financial institutions operating in our market area and elsewhere, including institutions operating regionally, nationally, and internationally, together with such competitors offering banking products and services by mail, telephone, computer, and the Internet; and
- management's ability to manage these and other risks.

For a discussion of these and other risks and uncertainties that could cause actual results to differ from those contained in the forward-looking statements, see "Risk Factors" in Item 1A of the Company's 2009 Annual Report filed on Form 10-K with the SEC, which is available on the SEC's website at www.sec.gov. All forward-looking statements are qualified in their entirety by this cautionary statement, and the Company undertakes no obligation to revise or update this Quarterly Report on Form 10-Q to reflect events or circumstances after the date hereof. New factors emerge from time to time, and it is not possible for us to predict which factors, if any, will arise. In addition, the Company cannot assess the impact of each factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

SOLERA NATIONAL BANCORP, INC.

UNAUDITED CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 SUMMARY OF ORGANIZATION

Solera National Bancorp, Inc. (the Company), is a Delaware corporation that was incorporated in 2006 to organize and serve as the holding company for Solera National Bank (the Bank), a national bank that opened for business on September 10, 2007. Solera National Bank is a full-service community, commercial bank headquartered in Lakewood, Colorado serving the Denver metropolitan area.

NOTE 2 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting only of normal recurring adjustments) which, in the opinion of management, are necessary to present fairly the financial position of the Company as of June 30, 2010, and the results of its operations for the three and six months ended June 30, 2010 and 2009. Cash flows are presented for the six months ended June 30, 2010 and 2009. Certain reclassifications have been made to the consolidated financial statements and related notes of prior periods to conform to the current presentation. These reclassifications had no impact on stockholders' equity or net income (loss) for the periods. Additionally, certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to rules and regulations of the U.S. Securities and Exchange Commission. The Company believes that the disclosures in the unaudited condensed consolidated financial statements are adequate to make the information presented not misleading. However, these unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K as of and for the year ended December 31, 2009.

The Company received approval as a bank in organization in the first quarter of 2007, conducted an initial closing of its common stock offering and commenced banking operations during the third quarter of 2007. Successful completion of the Company's development program and, ultimately, the attainment of sustained profitable operations are dependent on future events, including the successful execution of the Company's business plan and achieving a level of revenue adequate to support the Company's cost structure.

Critical Accounting Policies

The following is a description of the Company's significant accounting policies used in the preparation of the accompanying consolidated financial statements.

Allowance for loan losses: Implicit in the Company's lending activities is the fact that loan losses will be experienced and that the risk of loss will vary with the type of loan being made and the creditworthiness of the borrower over the term of the loan. The allowance for loan losses represents the Company's recognition of the risks of extending credit and its evaluation of the loan portfolio. The allowance for loan losses is maintained at a level considered adequate to provide for probable loan losses based on management's assessment of various factors affecting the loan portfolio, including a review of problem loans, business conditions, historical loss experience, evaluation of the quality of the underlying collateral, and holding and disposal costs. In addition, because the Bank has limited history on which to base future loan losses, a comparison of peer group allowance ratios to gross loans is made with the intention of maintaining similar levels during the Bank's de novo period of operation. The allowance for loan losses is increased by provisions charged to expense and reduced by loans charged off, net of recoveries. Loan losses are charged against the allowance for loan losses when management believes the loan balance is uncollectible.

The Company has established a formal process for determining an adequate allowance for loan losses. The allowance for loan losses calculation has two components. The first component represents the allowance for loan losses for impaired loans; that is loans where the Company believes collection of the contractual principal and interest payments is not probable. To determine this component of the calculation, collateral-dependent impaired loans are evaluated using internal analyses as well as third-party information, such as appraisals. If an impaired loan is unsecured, it is evaluated using a discounted cash flow of the payments expected over the life

Table of Contents

of the loan using the loan's effective interest rate and giving consideration to currently existing factors that would impact the amount or timing of the cash flows. The second component of the allowance for loan losses represents contingent losses—the estimated probable losses inherent within the portfolio due to uncertainties. Factors considered by management to estimate inherent losses include, but are not limited to, 1) historical and current trends in downgraded loans; 2) the level of the allowance in relation to total loans; 3) the level of the allowance in relation to the Bank's peer group; 4) the levels and trends in non-performing and past due loans; and 5) management's assessment of economic conditions and certain qualitative factors as defined by bank regulatory guidance, including but not limited to, changes in the size, composition and concentrations of the loan portfolio, changes in the legal and regulatory environment, and changes in lending management. The recorded allowance for loan losses is the aggregate of the impaired loans component and the contingent loss component.

At June 30, 2010, the Company had an allowance for loan losses of \$940,000. Management believes that this allowance for loan losses is adequate to cover probable losses based on all currently available evidence. Future additions to the allowance for loan losses may be required based on management's continuing evaluation of the inherent risks in the portfolio. Additional provisions for loan losses may need to be recorded if the economy declines, asset quality deteriorates, or the loss experience changes. Also, federal regulators, when reviewing the Bank's loan portfolio in the future, may require the Bank to increase the allowance for loan losses.

Share-based compensation: The Company grants stock options as incentive compensation to employees and directors. The cost of employee/director services received in exchange for an award of equity instruments is based on the grant-date fair value of the award, which is determined using a Black-Scholes-Merton model. This cost, net of estimated forfeitures, is expensed to salaries and employee benefits over the period which the recipient is required to provide services in exchange for the award, generally the vesting period.

Estimation of fair value: The estimation of fair value is significant to a number of the Company's assets, including available-for-sale investment securities. These are all recorded at either fair value or at the lower of cost or fair value. Furthermore, accounting principles generally accepted in the United States require disclosure of the fair value of financial instruments as a part of the notes to the consolidated financial statements. Fair values are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates and the shape of yield curves.

Impairment of investment securities: Investment securities are evaluated for impairment on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether a decline in their value below amortized cost is other-than-temporary. Securities are evaluated for impairment utilizing criteria such as the magnitude and duration of the decline, current market conditions, payment history, the credit worthiness of the obligator, the intent of the Company to retain the security or whether it is more likely than not that the Company will be required to sell the security before recovery of the value, as well as other qualitative factors. If a decline in value below amortized cost is determined to be other-than-temporary, which does not necessarily indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not favorable, the security is reviewed in more detail in order to determine the portion of the impairment that relates to credit (resulting in a charge to earnings) versus the portion of the impairment that is noncredit related (resulting in a charge to accumulated other comprehensive income). A credit loss is determined by comparing the amortized cost basis to the present value of cash flows expected to be collected, computed using the original yield as the discount rate.

Recently Issued Accounting Pronouncements

In January 2010, the FASB issued guidance requiring increased fair value disclosures. There are two components to the increased disclosure requirements set forth in the update: (1) a description of, as well as the disclosure of, the dollar amount of transfers in or out of level one or level

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

two (2) in the reconciliation for fair value measurements using significant unobservable inputs (level three), a reporting entity should present separately information about purchases, sales, issuances and settlements (that is, gross amounts shall be disclosed as opposed to a single net figure). Increased disclosures regarding the transfers in/out of level one and two are required for interim and annual periods beginning after December 15, 2009. The adoption of this portion of the standard did not have a material impact on the Company's consolidated financial position, results of operations or cash flows. Increased disclosures regarding the level three fair value reconciliation are required for fiscal years beginning after December 15, 2010.

Table of Contents

The adoption of this portion of the standard is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

In April 2010, the FASB issued accounting guidance for loan modifications when the loan is part of a pool of loans accounted for as a single asset. Diversity in practice developed surrounding how to account for loans that are part of a pool subsequent to a modification that would constitute a troubled debt restructuring. To eliminate the diversity in practice, the new guidance requires loans that are accounted for as part of a pool to continue to be accounted for as part of the pool subsequent to a modification, even if the modification constitutes a troubled debt restructuring. Upon adoption of the update an entity may make a one time election to terminate accounting for loans in a pool, and the election may be applied on a pool by pool basis. This accounting treatment for the modification of loans accounted for as part of pools is effective for all interim and annual reporting periods beginning on or after July 15, 2010. As the Company does not currently have any pools of loans accounted for as a single asset, we do not expect that the adoption of this standard will have a material impact on the Company's consolidated financial position, results of operations or cash flows.

In July 2010, the FASB updated disclosure requirements with respect to the credit quality of loans and leases and the allowance for credit losses. According to the guidance there are two levels of detail at which credit information will be presented - the portfolio segment level and the class level. The portfolio segment level is the aggregated level used by the company in developing their systematic method for calculating the allowance for credit losses. The class level represents a more detailed level of categorization than the portfolio segment level. Companies will be required to provide the following new or amended disclosures as a result of this update:

1. A rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the reporting period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the impairment method
2. For each disaggregated ending balance in item (1) above, the related recorded investment in loans and leases
3. The nonaccrual status of loans and leases by class
4. Impaired loans and leases by class
5. Credit quality indicators of loans and leases as of each balance sheet date, presented by class
6. The aging of past due loans and leases at the end of the reporting period by class
7. The nature and extent of troubled debt restructurings that occurred during the period by class and their effect on the allowance for credit losses
8. The nature and extent of loans and leases modified as troubled debt restructurings within the previous 12 months that defaulted during the period by class and their effect on the allowance for credit losses
9. Significant purchases and sales of loans and leases during the reporting period disaggregated by portfolio segment.

The increased disclosure requirements become effective for periods ending on or after December 15, 2010. The provisions of this update will expand our current disclosures with respect to the Allowance for Loan Losses.

NOTE 3 INVESTMENTS

The amortized costs and estimated fair values of investment securities as of June 30, 2010 and December 31, 2009 are as follows:

(\$ in thousands)	June 30, 2010			Estimated Fair Value
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	
Securities available-for-sale:				
U.S. government agencies	\$ 11,386	\$ 67	\$	\$ 11,453
Corporate	10,681	273	(87)	10,867
State and municipal	20,684	863	(5)	21,542
Agency mortgage-backed securities (MBS)	30,177	935		31,112
Total securities available-for-sale	\$ 72,928	\$ 2,138	\$ (92)	\$ 74,974

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

Table of Contents

(\$ in thousands)	December 31, 2009			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

Corporate	9,822	306	(5)	10,123
State and municipal	22,101	395	(295)	22,201
Agency MBS	35,386	760	(198)	35,948
Total securities available-for-sale	\$ 72,485	\$ 1,489	\$ (533)	\$ 73,441

The amortized cost and estimated fair value of debt securities by contractual maturity at June 30, 2010 and December 31, 2009 are shown below. Agency mortgage-backed securities are classified in accordance with their contractual lives. Expected maturities may differ from contractual maturities because borrowers may have the right to prepay obligations with or without call or prepay penalties. Additionally, accelerated principal payments are routinely received on agency mortgage-backed securities making it common for them to mature prior to the contractual maturity date.

(\$ in thousands)	June 30, 2010		December 31, 2009	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value

Table of Contents

Management evaluates investment securities for other-than-temporary impairment taking into consideration the extent and length of time the fair value has been less than cost, the financial condition of the issuer, whether the Company has the intent to retain the security and whether it is more-likely-than-not that the Company will be required to sell the security before recovery of the value, as well as other qualitative factors. As of June 30, 2010, no securities were in a continuous unrealized loss position for 12 months or longer. The Company has the intent to hold the five securities in an unrealized loss position as of June 30, 2010 and does not anticipate that these securities will be required to be sold before recovery of value, which may be upon maturity. Accordingly, as of June 30, 2010, no decline in value was deemed to be other than temporary. Similarly, management's evaluation of the three securities in a continuous unrealized loss position for 12 months or longer at December 31, 2009, determined these securities were not other than temporarily impaired.

The Company recorded a net unrealized gain in the investment portfolio of \$2.0 million at June 30, 2010. This was an increase over the \$956,000 unrealized gain at December 31, 2009.

In an effort to both capitalize on current market conditions, while funding our loan portfolio growth, as well as to clean-up some odd-lots within the investment portfolio, the Company sold securities for gross realized gains of \$553,000 and gross realized losses of \$22,000 during the first six months of 2010. The Company sold securities for gross realized gains of \$112,000 and gross realized losses of \$5,000 during the first six months of 2009. Realized gains and losses on sales are computed on a specific identification basis based on amortized cost on the date of sale.

Securities with carrying values of \$13.3 million at June 30, 2010 and \$16.9 million at December 31, 2009, were pledged as collateral to secure public deposits, borrowings from the FHLB, repurchase agreements and for other purposes as required or permitted by law.

NOTE 4 LOANS

The composition of the loan portfolio follows:

(\$ in thousands)	June 30, 2010	December 31, 2009
Real estate commercial	\$ 39,813	\$ 26,063
Real estate residential	7,765	8,059
Construction and land development	2,671	7,067
Commercial and industrial	8,408	8,324
Lease financing	1,543	
Consumer	568	991
Gross loans	60,768	50,504
Less:		
Deferred loan (fees) / expenses, net	(83)	(114)
Allowance for loan losses	(940)	(830)
Loans, net	\$ 59,745	\$ 49,560

As of June 30, 2010, the Bank had one nonaccrual loan for which a partial charge-off was recognized during the second quarter 2010 taking the loan's value from \$1.0 million to \$815,000. No loans were transferred to foreclosed properties and no loans were past due more than 90 days and still accruing interest as of June 30, 2010. During all of 2009, no loans were impaired, no loans were transferred to foreclosed properties and one loan, with a principal balance of approximately \$3,000, was past due more than 90 days but still accruing interest.

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

In the ordinary course of business, and only if consistent with permissible exceptions to Section 402 of the Sarbanes- Oxley Act of 2002, the Bank may make loans to directors, executive officers, principal stockholders (holders of more than five percent of the outstanding common shares) and the businesses with which they are associated. In the Company's opinion, all loans and loan commitments to such parties are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons.

There were approximately \$2.1 million and \$2.6 million in loans receivable from related parties at June 30, 2010 and December 31, 2009, respectively.

Table of Contents**NOTE 5 ALLOWANCE FOR LOAN LOSSES**

Activity in the allowance for loan losses for the three and six months ended June 2010 and 2009 is summarized as follows:

(\$ in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Balance, beginning of period	\$ 945	\$ 385	\$ 830	\$ 268
Loans charged off	(185)		(185)	
Recoveries on loans previously charged off				
Provision for loan losses	180	135	295	252
Balance, end of period	\$ 940	\$ 520	\$ 940	\$ 520

The following table details information regarding impaired loans at the dates indicated:

(\$ in thousands)	June 30, 2010	December 31, 2009
Impaired loans with a valuation allowance:	\$	\$
Impaired loans without a valuation allowance:		815
Total impaired loans	\$ 815	\$
Valuation allowance related to impaired loans	\$	\$

The impaired loan no longer has a valuation allowance, as the loan was partially charged-off during the second quarter 2010. No interest income has been recognized while this loan has been classified as impaired. The gross interest income that would have been recorded for the six months ended June 30, 2010 if the impaired loan had been current throughout this period in accordance with its original terms was approximately \$9,000.

NOTE 6 DEPOSITS

Deposits are summarized as follows:

(\$ in thousands)	June 30, 2010		December 31, 2009	
	Amount	% of Total	Amount	% of Total
Noninterest-bearing demand	\$ 1,712	1%	\$ 2,624	2%
Interest-bearing demand	9,910	9	6,830	7
Money market accounts	6,488	6	3,555	3
Savings accounts	49,372	44	51,763	50
Certificates of deposit, less than \$100,000	12,598	11	16,624	16

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

Certificates of deposit, greater than \$100,000		32,265	29	23,005	22
Total deposits	\$	112,345	100% \$	104,401	100%

In the ordinary course of business, certain officers, directors, stockholders, and employees of the Bank have deposits with the Bank. In the Bank's opinion, all deposit relationships with such parties are made on substantially the same terms including interest rates and maturities, as those prevailing at the time for comparable transactions with other persons. The balance of related party deposits at June 30, 2010 and December 31, 2009 was approximately \$4.3 million and \$4.0 million, respectively.

NOTE 7 STOCK-BASED COMPENSATION

The Company's 2007 Stock Incentive Plan (the Plan) was approved by the Company's Board of Directors (the Board) with an effective date of September 10, 2007 and was approved by the Company's stockholders at the annual meeting held on June 17, 2008. Under the terms of the Plan, officers and key employees may be granted both nonqualified and incentive stock options and directors and other consultants, who are not also officers or

Table of Contents

employees, may only be granted nonqualified stock options. The Board reserved 510,734 shares of common stock for issuance under the Plan. The Plan provides for options to purchase shares of common stock at a price not less than 100% of the fair market value of the stock on the date of grant. Stock options expire no later than ten years from the date of the grant and generally vest over four years. The Plan provides for accelerated vesting if there is a change of control, as defined in the Plan. The Company recognized stock-based compensation cost of approximately \$92,000 and \$102,000 during the six months ended June 30, 2010 and 2009, respectively.

The Company accounts for its stock-based compensation under the provisions of ASC 718-20 *Stock Compensation Awards Classified as Equity*. The fair value of each option grant is estimated on the date of grant using the Black-Scholes-Merton option pricing model. The Company granted 1,250 options during the second quarter 2010 as incentive compensation to newly hired employees and 16,500 options during the first quarter 2010 as incentive compensation to existing and newly hired employees. Similarly, the Company granted 7,250 options as incentive compensation to newly hired employees during the second quarter of 2009.

During the six months ended June 30, 2010, 5,688 options were forfeited and 4,657 vested options expired unexercised. No options were exercised during the six months ended June 30, 2010 or 2009. The Company recognized expense for approximately 20,000 options, representing a pro-rata amount of the options earned during the second quarter 2010 that are expected to vest. As of June 30, 2010, there was approximately \$286,000 of total unrecognized compensation cost related to the outstanding stock options that will be recognized over a weighted-average period of 1.5 years.

The following is a summary of the Company's outstanding stock options at June 30, 2010:

	Options	Weighted-Average Grant Date Fair Value	Weighted-Average Exercise Price
Outstanding at January 1, 2010	305,353	\$ 2.44	\$ 9.19
Granted	17,750	1.21	5.29
Exercised			
Forfeited	(5,688)	1.77	7.52
Expired	(4,657)	2.44	9.33
Outstanding at June 30, 2010	312,758	\$ 2.38	\$ 9.00

NOTE 8 NONINTEREST EXPENSE

The following table details the items comprising other general and administrative expenses:

(\$ in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Data processing	\$ 65	\$ 64	\$ 132	\$ 130

Miscellaneous	17	12	38	24
Total	\$ 253	\$ 264	\$ 476	\$ 445

Table of Contents**NOTE 9 INCOME TAXES**

Deferred taxes are a result of differences between income tax accounting and generally accepted accounting principles with respect to income and expense recognition. The following is a summary of the components of the net deferred tax asset account recognized in the accompanying consolidated statements of financial condition:

(\$ in thousands)	June 30, 2010	December 31, 2009
Deferred tax assets:		
Start-up and organizational expenses	\$ 1,076	\$ 1,120
Net operating loss carryforward	1,190	1,368
Allowance for loan losses	394	284
Nonqualified stock options	34	28
Other	68	77
Total deferred tax assets	2,762	2,877
Deferred tax liabilities:		
Net unrealized gain on securities available-for-sale	(758)	(354)
Federal Home Loan Bank stock dividend	(12)	(9)
Tax over book depreciation	(5)	(26)
Total deferred tax liabilities	(775)	(389)
Net deferred tax assets	1,987	2,488
Valuation allowance	(1,987)	(2,488)
Net deferred taxes	\$	\$

The Company has provided a 100% valuation allowance for its net deferred tax asset due to uncertainty of realization during the carryforward period. As of June 30, 2010, the Company has net operating loss carryforwards of approximately \$3.2 million for federal income tax purposes. Federal net operating loss carryforwards, to the extent not used, will expire beginning in 2027.

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate of 35% to pretax income from continuing operations for the three and six months ended June 30, 2010 and 2009:

(\$ in thousands)	June 30, 2010		June 30, 2009	
	Three Months Ended	Six Months Ended	Three Months Ended	Six Months Ended
Computed expected tax expense (benefit)	\$ 38	\$ 74	\$ (183)	\$ (352)
Change in income taxes resulting from:				
Change in valuation allowance	(63)	(97)	101	259
Other	25	23	82	93
Income tax provision	\$	\$	\$	\$

NOTE 10 COMMITMENTS AND CONTINGENCIES

The Company is a party to credit related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet. The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

Table of Contents

At June 30, 2010 and December 31, 2009 the following financial instruments were outstanding whose contract amounts represent credit risk:

(\$ in thousands)	June 30, 2010		December 31, 2009	
Financial instruments whose contractual amounts represent credit risk:				
Commitments to extend credit	\$	8,277	\$	7,182
Letters of credit				
Total commitments	\$	8,277	\$	7,182

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the commitments do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained is based on management's credit evaluation. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment and income producing commercial properties.

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

NOTE 11 FAIR VALUE

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the most advantageous market for the asset or liability in an orderly transaction between market participants. The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair values:

- Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2 inputs are other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

The Company carries its available-for-sale securities at fair value. Fair value measurement is obtained from independent pricing services which utilize observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bonds' terms and conditions, among other things. As of June 30, 2010 and December 31, 2009, all of the Company's available-for-sale securities were valued using Level 2 inputs.

Impaired loans are valued at the lower of cost or fair value and are generally classified as Level 3 in the fair value hierarchy. Fair value is measured based on the value of the collateral securing the loan or discounting estimated future cash flows. Collateral is valued based on appraisals performed by qualified licensed appraisers. Such appraisal values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation and/or similar factors. Impaired loans that are not secured by collateral are valued by using the discounted estimated future cash flows at the loans' effective interest rate. The cash flow estimates are made by management using historical knowledge, market conditions, and knowledge of the borrower's business, among other factors.

Table of Contents*Assets and Liabilities Measured on a Recurring Basis*

Assets and liabilities measured at fair value on a recurring basis are summarized below:

(\$ in thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Assets at June 30, 2010				
Investment securities, available-for-sale:				
U.S. government agencies	\$	\$ 11,453	\$	\$ 11,453
Corporate		10,867		10,867
State and municipal		21,542		21,542
Agency MBS		31,112		31,112
Total	\$	\$ 74,974	\$	\$ 74,974
Assets at December 31, 2009				
Investment securities, available-for-sale:				
U.S. government agencies	\$	\$ 5,169	\$	\$ 5,169
Corporate		10,123		10,123
State and municipal		22,201		22,201
Agency MBS		35,948		35,948
Total	\$	\$ 73,441	\$	\$ 73,441

There were no transfers in or out of Level 1 and Level 2 during the periods presented.

Assets and Liabilities Measured on a Nonrecurring Basis

Assets and liabilities measured at fair value on a nonrecurring basis are summarized below:

(\$ in thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Assets at June 30, 2010				
Impaired loans	\$	\$	\$ 815	\$ 815
Assets at December 31, 2009				
Impaired loans	\$	\$	\$	\$

Fair Value of Financial Instruments

Disclosure of fair value information about financial instruments, whether or not recognized in the consolidated balance sheets, for which it is practicable to estimate that value is required. Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instrument. Because no market value exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature, involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value information is not required to be disclosed for certain financial instruments and all nonfinancial instruments. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company. Fair value estimates are based on financial instruments both on and off the balance sheet without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Additionally, tax consequences related to the realization of the unrealized

Table of Contents

gains and losses can have a potential effect on fair value estimates and have not been considered in many of the estimates.

The following methods and assumptions were used to estimate the fair value of significant financial instruments:

Cash and cash equivalents: The carrying amounts of cash and due from banks and federal funds sold approximate their fair values.

Interest-bearing deposits with banks: The carrying amount of interest-bearing deposits with banks approximates fair values due to the relatively stable level of short-term interest rates.

Investment securities: Fair value measurement is obtained from independent pricing services which utilize observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bonds' terms and conditions, among other things.

Loans, net: The fair value of fixed rate loans is estimated by discounting the future cash flows using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are estimated to be equivalent to carrying values. Variable rate loans that are currently priced at their contractual floor or ceiling, and thus similar to fixed rate loans, are reviewed to determine the interest rate that would be currently offered on similar credits. If the current floor/ceiling rate is equivalent to current market rates, fair value is estimated to be equivalent to carrying value. If the current market rates differ from the loan's current rate, the contractual cash flows are discounted using the current market rate to derive the loan's estimated fair value. Both the estimated fair value and the carrying value have been reduced by specific and general reserves for loan losses.

Investment in FHLB and Federal Reserve Bank (FRB) stocks: It is not practical to determine the fair value of bank stocks due to the restrictions placed on the transferability of FHLB stock and FRB stock.

Interest receivable: The carrying value of interest receivable approximates fair value due to the short period of time between accrual and receipt of payment.

Deposits: The fair value of noninterest-bearing demand deposits, interest-bearing demand deposits and savings and money market accounts is determined to be the amount payable on demand at the reporting date. The fair value of fixed rate time deposits is estimated using a discounted cash flow calculation that utilizes interest rates currently being offered for deposits of similar remaining maturities. Carrying value is assumed to approximate fair value for all variable rate time deposits.

Federal funds purchased and securities sold under agreements to repurchase: The carrying amount of federal funds purchased and securities sold under agreements to repurchase approximates fair value due to the short-term nature of these agreements, which generally mature within

one to four days from the transaction date.

Capital lease liability: Management did not fair value the capital lease liability as it is specifically excluded from the disclosure requirements.

Federal Home Loan Bank advances: Fair value of the Federal Home Loan Bank advances is estimated using a discounted cash flow model that utilizes current market rates for similar types of borrowing arrangements with similar remaining maturities.

Interest payable: The carrying value of interest payable approximates fair value due to the short period of time between accrual and payment.

Loan commitments and letters of credit: The fair values of commitments are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. The difference between the carrying value of commitments to fund loans or

Table of Contents

standby letters of credit and their fair values are not significant and, therefore, are not included in the following table.

The carrying amounts and estimated fair values of financial instruments are summarized as follows:

(\$ in thousands)	June 30, 2010		December 31, 2009	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial Assets:				
Cash and cash equivalents	\$ 1,064	\$ 1,064	\$ 2,516	\$ 2,516

Interest payable	91	91	82	82

NOTE 12 SUBSEQUENT EVENTS

On August 5, 2010, the Bank entered into a purchase and assumption agreement with Liberty Savings Bank, FSB (Liberty), a wholly-owned subsidiary of Liberty Capital, Inc. to assume approximately \$40 million in customer deposits from Liberty's branch located in Lakewood, Colorado. Additionally, the Bank will acquire approximately \$30 million in Colorado-based, performing loans. The transaction is expected to close in the fourth quarter 2010 conditioned upon receiving approval from the appropriate bank regulatory agencies. The Bank will pay a 3.8% premium for deposits and will acquire the loans at par value.

The Bank expects to account for this as a purchase of assets in accordance with ASC 805-50, *Acquisition of Assets Rather than a Business*. The assets purchased and liabilities assumed will be recognized at cost plus allocated transaction costs, which will be allocated based on the relative fair values of the assets acquired and liabilities assumed. Since the Bank is assuming \$10 million more deposits than loans, the Company will have a net increase in cash rather than a cash outflow.

As of the date of issuance of this Report on Form 10-Q, the Company has determined that only the aforementioned subsequent event disclosure is necessary.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis presents the Company's consolidated financial condition as of June 30, 2010 and results of operations for the three and six months ended June 30, 2010 and 2009. The discussion should be read in conjunction with the financial statements and the notes related thereto which appear elsewhere in this Quarterly Report on Form 10-Q.

Executive Overview

We are a Delaware corporation that was incorporated on January 12, 2006 to organize and serve as the holding company for Solera National Bank, a national bank that opened for business on September 10, 2007. Solera National Bank is a full-service commercial bank headquartered in Lakewood, Colorado serving the Denver metropolitan area. Our main banking office is located at 319 S. Sheridan Blvd., Lakewood, Colorado 80226. Our telephone number is (303) 209-8600.

Earnings are derived primarily from our net interest income, which is interest income less interest expense, and our noninterest income earned from gains on investment securities and banking service fees, offset by noninterest expense. As the majority of our assets are interest-earning and our liabilities are interest-bearing, changes in interest rates impact our net interest margin. We manage our interest-earning assets and interest-bearing liabilities to reduce the impact of interest rate changes on our operating results.

We offer a broad range of commercial and consumer banking services to small and medium-sized businesses, licensed professionals and individuals who are particularly responsive to the personalized service that Solera National Bank provides to its customers. We believe that local ownership and control allows the Bank to serve customers more efficiently and effectively. Solera National Bank competes on the basis of providing a unique and personalized banking experience combined with a full range of services, customized and tailored to fit the individual needs of its clients. Solera National Bank serves the entire market area and, in addition, has a special niche focus on the local Hispanic population due to the significant growth of this demographic. Since opening the bank in September of 2007, management has successfully executed its strategy of delivering prudent and controlled growth to efficiently leverage the Company's capital and expense base with the goal of achieving sustained profitability. During the first and second quarters of 2010, the Company delivered its first quarterly profits.

Subsequent to June 30, 2010, the Bank entered into a definitive purchase and assumption agreement (the Agreement) with Liberty Savings Bank, FSB (Liberty) to assume approximately \$40 million in customer deposits from Liberty's branch located in Lakewood, Colorado. Additionally, the Bank will acquire approximately \$30 million in Colorado-based, performing loans from Liberty. Pursuant to the Agreement, the Bank will pay a deposit premium of 3.8% and will acquire the loans at par value. For further disclosure, see Note 12, *Subsequent Events*, to our consolidated financial statements.

Overview

While the nation's economy is still growing, many fear the pace of growth will continue to slow as difficult labor markets and credit conditions impact households and businesses. The Bureau of Economic Analysis' preliminary estimate of second quarter 2010 GDP growth was 2.4%,

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

down from 3.7% in the first quarter 2010. The Federal Reserve Open Market Committee's mid-June assessment of economic conditions reflected a shaky recovery. The committee noted that high unemployment continues to constrain household spending, new home construction has weakened, and global financial markets are not yet healthy. The Federal Reserve expects the nation's economic recovery to continue despite these challenges, although the pace of growth could be more moderate than initially expected. The Open Market Committee voted to leave the federal funds target rate in the range of zero to 0.25%.

The unemployment rate has remained stubbornly high. The U.S. Bureau of Labor Statistics reported on August 6, 2010 that total nonfarm payroll employment declined by 131,000 in July, and the unemployment rate was unchanged at 9.5%. Federal government employment fell, as 143,000 temporary workers hired for the decennial census completed their work. Private-sector payroll employment edged up by 71,000.

Like many national and international economic reports, the Federal Reserve's most recent *Beige Book* report for the Tenth District which includes Colorado gives a mixed assessment of current conditions. Consumer spending,

Table of Contents

manufacturing activity, and housing markets have strengthened throughout the Tenth District, although still weak commercial real estate markets and the potential for a slump in housing remain as risks.

Other regional economic reports also describe mixed conditions. The Brookings Institution's latest quarterly *Mountain Monitor* report which tracks output, jobs, and residential real estate in Colorado and six other western states suggests the Mountain Region economy is beginning to recover but lags other regional economies. Despite these challenges, Metro Denver and many other Mountain Region metros have reported faster-than-average growth in output.

Bank failures have continued to weigh on the industry and have increased assessment rates for all banks. During 2009, 140 banks failed and went into receivership with the FDIC. The FDIC's problem list stood at 775 at March 31, 2010, up from 702 at December 31, 2009 and 252 at the end of 2008. Between January and July 9, 2010, another 90 banks have gone into receivership.

In the first quarter of 2010, FDIC insured commercial banks reported a combined net income of \$18 billion, up from \$914 million during the fourth quarter of 2009. While net charge-offs increased for the 13th consecutive quarter, the quarterly provision for loan losses declined. The overall financial condition of the industry continued to improve as both capital and deposit balances grew during in the first six months of 2010.

Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act, (the Act), was signed into legislation. The Act includes, among others, the creation of a new Consumer Financial Protection Bureau with power to promulgate and enforce consumer protection laws; the creation of a Financial Stability Oversight Council with authority to identify institutions and practices that might pose a systemic risk; provisions affecting corporate governance and executive compensation of all companies whose securities are registered with the SEC; a provision that would broaden the base for FDIC insurance assessments; a provision under which interchange fees for debit cards would be set by the Federal Reserve; a provision that would require bank regulators to set minimum capital levels for bank holding companies that are as strong as those required for their insured depository subsidiaries; and new restrictions on how mortgage brokers and loan originators may be compensated. Certain provisions of the Act only apply to institutions with more than \$10 billion in assets.

We are currently evaluating the potential impact of the Act on our business but expect that some provisions of the Act may have an adverse impact due to, among others, the cost of complying with the numerous new regulations and reporting requirements mandated by the Act, a potential increase in competition for deposits resulting from the increased cost of funding using non-deposit liabilities, and the potential loss of interchange fee income from debit card transactions. However, some provisions of the Act will benefit our business, such as the permanent exemption from Sarbanes-Oxley Section 404(b) for companies with market capitalization of less than \$75 million, which should maintain our external audit fees at current levels as our external auditors will not be required to provide an attestation report on our internal control over financial reporting in our annual report on Form 10-K.

Comparative Results of Operations for the Three Months Ended June 30, 2010 and 2009

The following discussion focuses on the Company's financial condition and results of operations for the three months ended June 30, 2010 compared to the financial condition and results of operations for the three months ended June 30, 2009.

Net income for the quarter ended June 30, 2010 was \$108,000, or \$0.04 per share, compared with an \$523,000 loss, or (\$0.20) per share for the second quarter of 2009. The profitable results of the second quarter 2010 were primarily the result of increases in interest-earning assets and increased gains on the sale of investment securities. Noninterest expenses were well-controlled, reducing by approximately 10% during the second quarter 2010, despite the growth of the Company.

As of June 30, 2010, the Company had total assets of \$140.3 million, an increase of \$7.5 million, or 6%, from December 31, 2009. Net loans increased \$10.2 million, or 21%, from \$49.6 million at December 31, 2009 to \$59.7 million at June 30, 2010. Similarly, the Company's total deposits grew \$7.9 million, or 8%, from \$104.4 million at December 31, 2009 to \$112.3 million as of June 30, 2010. This growth was achieved as a result of an effective business development program.

Table of Contents

The following table presents, for the periods indicated, average assets, liabilities and stockholders equity, as well as the net interest income from average interest-earning assets and the resultant annualized yields expressed in percentages.

Table 1

Table of Contents

The following table presents the dollar amount of changes in interest income and interest expense for the major categories of interest-earning assets and interest-bearing liabilities. The information details the changes attributable to a change in volume (i.e. change in average balance multiplied by the prior-period average rate) and changes attributable to a change in rate (i.e. change in average rate multiplied by the prior-period average balance). There is a component that is attributable to both a change in volume and a change in rate. This component has been allocated proportionately to the rate and volume columns.

Net Interest Income and Net Interest Margin

Net interest income is the difference between interest and fee income, principally from loan and investment security portfolios, and interest expense, principally on customer deposits and borrowings. Net interest income is our principal source of earnings. Changes in net interest income result from changes in volume, spread and margin. Volume refers to the average dollar level of interest-earning assets and interest-bearing liabilities. Spread refers to the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities. Margin refers to net interest income divided by average interest-earning assets, and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities.

The Federal Reserve Board influences the general market rates of short-term interest, including the deposit and loan rates offered by the Bank. The Bank's loan portfolio is significantly affected by changes in the prime interest rate. The prime interest rate, which is the rate offered on loans to borrowers with strong credit, has remained unchanged throughout 2009 and thus far in 2010 at 3.25%. Rates on our loan portfolio have increased slightly, up 37 basis points over the second quarter 2009, primarily due to a shift in the loan mix to more fixed-rate loans at higher interest rates.

The 114 basis points decrease in the Bank's investment portfolio compared to the second quarter of 2009 is primarily due to the sale of longer-maturity, higher-yielding investments which were reinvested in shorter-term, lower-yielding bonds to help shorten the duration of the investment portfolio. Also contributing to the decrease was the action taken by Fannie Mae during the second quarter 2010 in which they repurchased delinquent mortgages

Table of Contents

from MBS pools. The higher than normal principal payments resulted in higher premium amortization.

The impact of the 50 basis point decrease in the Company's yield on interest-earning assets was mitigated by decreases in the cost of interest-bearing liabilities, resulting in a flat net interest margin year-over-year. As reflected in Table 1, the cost of money market and savings deposits decreased 101 basis points and the cost of time deposits decreased 73 basis points year-over-year, primarily due to eliminating the promotional rates that were offered during the first two years in business and the general decline in the level of interest rates compared to the prior year.

The Company's balance sheet is marginally liability sensitive, meaning that interest-earning assets generally reprice slower than interest-bearing liabilities. Therefore, the Company could experience compression in its net interest margin during periods of rising interest rates.

Total interest income was \$1.6 million for the second quarter 2010, consisting primarily of interest on loans of \$876,000 and interest on investment securities of \$719,000. This compared to total interest income of \$1.1 million for the same period of 2009, consisting primarily of interest on investment securities of \$650,000 and interest on loans of \$469,000. Average loans, net of unearned fees, increased \$25.6 million, from \$34.0 million at June 30, 2009 to \$59.5 million at June 30, 2010. Average investment securities increased \$22.0 million from \$51.4 million at June 30, 2009 to \$73.4 million at June 30, 2010. These increases were funded with increased average deposits which grew \$56.7 million from \$53.9 million at June 30, 2009 to \$110.6 million at June 30, 2010.

Total interest expense was \$563,000 in the second quarter of 2010, an increase of \$101,000 from \$462,000 during the second quarter of 2009. As evident in Table 2 above, this increase was largely due to increased volumes, partially offset by lower rates on deposits. Overall, the interest rate on total interest-bearing liabilities decreased 88 basis points from 2.79% at June 30, 2009 to 1.91% at June 30, 2010.

Net interest income was \$1.0 million in the second quarter 2010, an increase of \$377,000, or 57%, from \$667,000 in the second quarter of 2009. Our annualized net interest margin was 3.07% for the three months ended June 30, 2010 which was relatively unchanged from the 3.08% for the three months ended June 30, 2009.

Provision for Loan Losses

We determine a provision for loan losses that we consider sufficient to maintain an allowance to absorb probable losses inherent in our portfolio as of the balance sheet date. For additional information concerning this determination, see the section of this discussion and analysis captioned *Allowance for Loan Losses*.

During the second quarter of 2010, our provision for loan losses was \$180,000 reflecting the growth of our loan portfolio and the estimated probable losses inherent within the portfolio due to uncertainties in economic conditions. There was one impaired loan at June 30, 2010, which was written down to its estimated net realizable value during the second quarter, resulting in a charge-off of \$185,000 (see additional discussion below under *Financial Condition - Loan Portfolio*).

Noninterest Income

Noninterest income for the quarter ended June 30, 2010 was \$287,000, an increase of \$186,000 from \$101,000 for the second quarter ended June 30, 2009. The Company sold securities for net gains of \$268,000 during the second quarter 2010 compared to net gains of \$30,000 during the second quarter of 2009. Service charges on deposits decreased \$52,000 from \$71,000 during the second quarter 2009 to \$19,000 during the second quarter 2010 due to the loss of a significant money-services-business customer in October 2009.

Noninterest Expense

Our total noninterest expense for the quarter ended June 30, 2010 was \$1.0 million, a decrease of \$113,000 from \$1.2 million for the quarter ended June 30, 2009. This consisted of a decrease in salaries and employee benefits of \$93,000, or 14%, primarily related to increased costs during the second quarter of 2009 for a separation agreement of an employee who also served as a director and secondarily due to reduced incentive compensation expense during the second quarter 2010. Occupancy expense remained constant quarter-over-quarter increasing only \$3,000 during the second quarter 2010. Professional fees decreased \$12,000, or 18%, quarter-over-quarter, partially due to the

Table of Contents

timing of outsourced internal audit reviews, which have been scheduled later in the 2010 year, and partially due to decreased legal fees which were higher than usual in 2009 in conjunction with the separation agreement of an employee who also served as a director. These cost reductions were partially offset by increased Compliance and Bank Secrecy Act consulting.

Other general and administrative expenses decreased \$11,000, or 4%, quarter-over-quarter, as detailed in the following table:

(\$ in thousands)	Three Months Ended			Increase/ (Decrease)		
	2010	June 30,	2009			
Other general and administrative expenses:						
Data processing	\$	65	\$	64	\$	1
FDIC assessment		53		64		(11)
Marketing and promotions		26		35		(9)
Printing, stationery and supplies		9		13		(4)
Regulatory and reporting fees		38		36		2
Travel and entertainment		16		10		6
Telephone/communication		11		9		2
Dues and memberships		6		6		
Insurance		6		5		1
Postage and shipping		4		5		(1)
Training and education		2		5		(3)
Miscellaneous		17		12		5
Total	\$	253	\$	264	\$	(11)

The most significant changes include an increase of \$6,000 in travel and entertainment costs due partially to compensating directors for their attendance at committee meetings and partially to increased employee attendance at seminars and conferences as the Company focused efforts on increasing its presence in the community; an increase of \$5,000 in other miscellaneous related to small increases in several items due to overall increases in customer and account activity. These increases were partially offset by decreases of \$11,000 in Federal Deposit Insurance Corporation (FDIC) fees due to the one-time special assessment imposed during second quarter 2009 of \$41,000 to help build insurance reserves. Without that one-time special assessment, FDIC fees would have increased \$30,000 during second quarter 2010 due to significant increases in average deposit volumes. The \$9,000 decrease in marketing costs also contributed to the Company's overall reduction in other general and administrative expenses.

Comparative Results of Operations for the Six Months Ended June 30, 2010 and 2009

The following discussion focuses on the Company's financial condition and results of operations for the six months ended June 30, 2010 compared to the financial condition and results of operations for the six months ended June 30, 2009. The Company's principal operations for each of these periods consisted of the operations of Solera National Bank, which opened for business September 10, 2007.

Net income for the six months ended June 30, 2010 was \$211,000, or \$0.08 per share compared with a net loss \$1.0 million, or (\$0.39) per share for the six months ended June 30, 2009. The profitable results of the six months ended June 30, 2010 were primarily the result of increases in interest-earning assets combined with increased gains on the sale of investment securities while reducing noninterest expenses.

The following table presents, for the periods indicated, average assets, liabilities and stockholders' equity, as well as the net interest income from average interest-earning assets and the resultant annualized yields expressed in percentages.

Net Interest Income and Net Interest Margin

Net interest income is the difference between interest income, principally from loan and investment security portfolios, and interest expense, principally on customer deposits and borrowings. Net interest income is our principal source of earnings. Changes in net interest income result from changes in volume, spread and margin. Volume refers to the average dollar level of interest-earning assets and interest-bearing liabilities. Spread refers to the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities. Margin refers to net interest income divided by average interest-earning assets, and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities.

The Federal Reserve Board influences the general market rates of short-term interest, including the deposit and loan rates offered by the Bank. The Bank's loan portfolio is significantly affected by changes in the prime interest rate. The prime interest rate has remained at 3.25% since December 2008 and, thus, has had no impact on the change in loan yields during this time period.

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

The federal funds rate, which is the cost of immediately available, overnight funds, has behaved in a similar manner, changing insignificantly since the end of 2008.

The three basis point increase in the Company's net interest margin, from 3.01% at June 30, 2009 to 3.04% at June 30, 2010 is reflective of these minor changes in key interest rates. Overall, the Bank has lost yield on interest-earning assets, dropping 37 basis points from 5.17% for the six-months ended June 30, 2009 to 4.80% for the six months ended June 30, 2010. This decline is primarily due to a decrease in the Bank's yield on its investment

Table of Contents

securities which decreased 90 basis points during this time period. This decrease is primarily due to the sale of longer-maturity, higher-yielding investments which were reinvested in shorter-term, lower-yielding bonds to help shorten the duration of the investment portfolio. Also contributing to the decrease was the action taken by Fannie Mae and the Federal Home Loan Mortgage Corporation to repurchase delinquent mortgages during the first and second quarters of 2010. This resulted in higher than normal pay downs on our agency mortgage-backed securities causing an increase in premium amortization on those securities which adversely impacted the portfolio's yield. The loss in yield on the investment portfolio was partially offset by an increase in the loan yield, which increased 44 basis points year-over-year. This increase was primarily due to a shift in the loan mix to more fixed-rate loans at higher interest rates.

The decrease in the cost of interest-bearing liabilities was more than enough to offset the loss of yield on interest-earning assets, which enabled the Bank's overall net interest margin to slightly increase. The cost of money market, savings and time deposits all decreased year-over-year as the Bank eliminated the promotional rates that were offered during the first two years in business along with the general decline in the level of interest rates compared to the prior year. This enabled the Bank to save 84 basis points on the cost of interest-bearing liabilities during the six months ended June 30, 2010 as compared to the same period of 2009.

The Company's balance sheet is currently marginally liability sensitive, meaning that interest-earning liabilities generally reprice more quickly than interest-bearing assets. Therefore, the Company could experience losses in its net interest margin during periods of rising short-term interest rates.

Total interest income was \$3.2 million for the six months ended June 30, 2010, consisting primarily of interest on loans of \$1.6 million and interest on investment securities of \$1.5 million. This compared to total interest income of \$2.1 million during the six months ended June 30, 2009, consisting primarily of interest on investment securities of \$1.2 million and interest on loans of \$782,000. Average gross loans, net of unearned fees, increased \$26.2 million, from \$29.3 million at June 30, 2009 to \$55.5 million at June 30, 2010. Average investment securities increased \$24.5 million from \$48.8 million at June 30, 2009 to \$73.3 million at June 30, 2010.

Total interest expense was \$1.2 million for the six months ended June 30, 2010, an increase of \$307,000 from \$855,000 during the same period of 2009. This increase was due to increased deposit volumes which grew, on average, \$58.6 million from June 2009 to June 2010.

Net interest income was \$2.0 million for the first six months of 2010, an increase of \$822,000, or 69%, from \$1.2 million for the same period of 2009. Our annualized net interest margin was 3.04% for the six months ended June 30, 2010 compared to 3.01% for the six months ended June 30, 2009.

Provision for Loan Losses

We determine a provision for loan losses that we consider sufficient to maintain an allowance to absorb probable losses inherent in our portfolio as of the balance sheet date. For additional information concerning this determination, see the section of this discussion and analysis captioned *Allowance for Loan Losses*.

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

During the first six months of 2010, our provision for loan losses was \$295,000 compared to \$252,000 for the same time period of 2009. The amount of the provision reflects the growth of our loan portfolio and the estimated probable losses inherent within the portfolio due to uncertainties in economic conditions. There was one impaired loan at June 30, 2010, which was written-down to its net realizable value during the second quarter resulting in a charge-off of \$185,000 (see additional discussion below under *Financial Condition - Loan Portfolio*). There were no impaired or charged-off loans during the same period in 2009.

Noninterest Income

Noninterest income for the six months ended June 30, 2010 was \$567,000, an increase of \$316,000 from \$251,000 for the six months ended June 30, 2009. The increase was due to a \$424,000 increase in gains on sales of investment securities as the Bank capitalized on current market conditions and sold some securities for gains, while working to shorten the overall duration of the investment portfolio. This increase was offset by a decrease of \$104,000 in service charges and fees on deposits a direct result of the loss of a significant money-services-business deposit customer.

Table of Contents**Noninterest Expense**

Our total noninterest expense was \$2.1 million for the six months ended June 30, 2010, a 6%, or \$122,000, decrease from \$2.2 million for the six months ended June 30, 2009. This consisted of a decrease in salaries and employee benefits of \$160,000, or 12%, related primarily due to the costs associated with a separation agreement of an employee who also served as a director during 2009. Occupancy expense remained substantially unchanged, increasing only \$6,000, or 2% year-over-year. Professional fees also remained unchanged, increasing only \$1,000 year-over-year.

Other general and administrative expenses increased \$31,000, or 7%, year-over-year, as detailed in the following table:

(\$ in thousands)	Six Months Ended		Increase/ (Decrease)
	2010	June 30, 2009	
Other general and administrative expenses:			
Data processing	\$ 132	\$ 130	\$ 2
FDIC assessment	96	80	16
Marketing and promotions	42	56	(14)
Printing, stationery and supplies	17	20	(3)
Regulatory and reporting fees	64	54	10
Travel and entertainment	24	17	7
Telephone/communication	21	20	1
Dues and memberships	17	16	1
Insurance	12	10	2
Postage and shipping	9	11	(2)
Training and education	4	7	(3)
Miscellaneous	38	24	14
Total	\$ 476	\$ 445	\$ 31

The most significant changes included an increase of \$16,000 in FDIC assessments due to increased deposit volumes; an increase of \$10,000 in regulatory and reporting fees due primarily to an increase in OCC assessment fees, again due to the Company's overall growth; an increase of \$7,000 in travel and entertainment costs due partially to compensating directors for their attendance at committee meetings and partially to increased employee attendance at seminars and conferences as we focused efforts on raising our presence in the community; and an increase of \$14,000 in other miscellaneous related to small increases in several items due to overall increases in customer and account activity. These increases were partially offset by a decrease of \$14,000 in marketing and promotions as the Company reduced some of its marketing expenditures.

Income Taxes

No federal or state tax expense has been recorded for the three or six months ended June 30, 2010 and 2009, based upon significant operating loss carry-forwards that can be used to offset approximately \$3.2 million of taxable income. Since it is uncertain that the Company will remain profitable, the deferred tax benefit accumulated to date has a full valuation allowance so that the net deferred tax benefit at June 30, 2010 is \$0.

Financial Condition

At June 30, 2010, the Company had total assets of \$140.3 million, a \$7.5 million increase from \$132.8 million in total assets at December 31, 2009. The increase in assets is primarily due to the \$10.3 million increase in gross loans during this period, offset primarily by decreases in interest-bearing deposits with banks which were not renewed in order to help fund loan growth.

As of June 30, 2010, stockholders' equity was \$20.1 million, an increase of \$1.4 million from December 31, 2009, as a result of increases in accumulated other comprehensive income, which increased \$1.1 million during this period. The small reduction in the accumulated deficit, due to the profitable results of the six-months ended June 30, 2010, also contributed to the increase in stockholders' equity.

Table of Contents**Federal Home Loan Bank (FHLB) and Federal Reserve Bank Stocks**

At June 30, 2010, the Bank had a total of \$1.1 million invested in FHLB and Federal Reserve Bank stocks carried at cost consisting of \$490,000 in Federal Reserve Bank stock and \$639,000 in FHLB stock. These investments allow Solera National Bank to conduct business with these entities. As of June 30, 2010, the Federal Reserve Bank stock is yielding an average of 6.0% and the FHLB stock is yielding an average rate of 2.3%.

Investment Securities

Our investment portfolio serves as a source of interest income and, secondarily, as a source of liquidity and a management tool for our interest rate sensitivity. We manage our investment portfolio according to a written investment policy established by our Board of Directors.

At June 30, 2010, Solera National Bank's securities consisted of available-for-sale securities of \$75.0 million. The following tables set forth the estimated market values and approximate weighted average yields of the debt securities in the investment portfolio by contractual maturity at June 30, 2010 and December 31, 2009:

(\$ in thousands)	At June 30, 2010											
	Within One Year		After One Year but within Five Years		After Five Years but within Ten Years		After Ten Years					
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield				
Securities available-for-sale												
U.S. government agencies	\$		%	\$		%	\$	6,437	3.03%	\$	5,016	3.18%
Corporate		1,010	5.86		4,218	4.51		5,639	4.44			
State and municipal					510	5.90		20,515	4.74		517	5.23

Agency MBS								500	3.05		35,448	4.52
Total	\$	1,560	5.99%	\$	5,823	5.49%	\$	19,735	4.97%	\$	46,323	4.77%

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

As evidenced by the above tables, the weighted-average book yield decreased during the first six months of 2010 in nearly every category. This was due partially to declines in market rates, the sale of longer maturity state and municipal bonds to reduce price risk, and partially due to the Federal Home Loan Mortgage Corporation's (FHLMC) and Fannie Mae's repurchase of substantially all 120 days or more delinquent mortgage loans, which resulted in larger than normal principal pay downs on our agency mortgage-backed securities. The FHLMC's and Fannie Mae's repurchase of delinquent loans caused increased amortization on the purchase premiums associated with these securities. The increased premium amortization negatively impacted our investment yields. Management does not anticipate accelerated premium amortization during the second half of 2010, as the repurchasing of currently delinquent mortgages by government agencies was essentially complete as of June 30, 2010.

Table of Contents**Loan Portfolio**

The following table presents the composition of our loan portfolio by category as of the dates indicated:

(\$ in thousands)	June 30, 2010		December 31, 2009	
	Amount	% of Total	Amount	% of Total
Real estate commercial	\$ 39,813	65%	\$ 26,063	52%
Real estate residential	7,765	13	8,059	16
Construction and land development	2,671	4	7,067	14
Commercial and industrial	8,408	14	8,324	16
Lease financing	1,543	3		
Consumer	568	1	991	2
Gross loans	60,768	100%	50,504	100%
Less: Deferred loan (fees) / expenses, net	(83)		(114)	
Allowance for loan losses	(940)		(830)	
Loans, net	\$ 59,745		\$ 49,560	

As of June 30, 2010, net loans were \$59.7 million, a \$10.2 million, or 21%, increase from \$49.6 million at December 31, 2009. Net loans as a percentage of total assets were 43% as of June 30, 2010, compared to 37% at December 31, 2009.

The real estate commercial loan portfolio consists primarily of lines of credit or term loans to businesses that are secured by real estate. Our primary focus is on owner-occupied commercial real estate, including SBA 504 loans. At June 30, 2010, there were \$39.8 million commercial real estate loans in the loan portfolio, an increase of 53%, or \$13.8 million, from \$26.1 million at December 31, 2009. Given our focus on this loan category, it now represents 65% of our total portfolio, which is well within our established concentration guidelines.

The real estate residential loan portfolio consists of residential second mortgage loans, home equity loans and lines of credit and home improvement loans. At June 30, 2010, \$7.8 million was outstanding for residential real estate loans, a decrease of 4% from \$8.1 million outstanding at December 31, 2009.

The construction and land development loan portfolio is comprised of construction loans for owner-occupied construction and development loans for property being constructed and sold to third parties. At June 30, 2010, construction and land development loans totaled \$2.7 million, a decrease of \$4.4 million, or 62%, from \$7.1 million at December 31, 2009.

The commercial and industrial loan portfolio consists of loans to businesses primarily for working capital lines of credit. At June 30, 2010, commercial and industrial loans totaled \$8.4 million, an \$84,000 increase from \$8.3 million at December 31, 2009.

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

During the second quarter 2010, the Bank closed its first lease financing agreement for the purchase of equipment. At June 30, 2010, lease financing comprised 3% of the Bank's loan portfolio.

The consumer and other loan portfolio consists of personal lines of credit, loans to acquire personal assets such as automobiles and overdraft protection balances for our deposit customers. As of June 30, 2010, consumer and other loans comprised 1% of the total loan portfolio at \$568,000, a decrease of \$423,000 from December 31, 2009.

Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers engaged in similar activities that would cause them to be similarly impacted by economic or other conditions. The Company's loan portfolio generally consists of loans to borrowers within Colorado. Although the Company seeks to avoid concentrations of loans to a single industry or based upon a single class of collateral, the Company's loan portfolio consists primarily of real estate loans secured by real estate located in Colorado, making the value of the portfolio more susceptible to declines in real estate values and other changes in economic conditions in Colorado. As the Bank's loan portfolio continues to grow, the concentration to any single borrower diminishes. As of June 30, 2010, the Bank's five largest loans represented approximately 17% of the total loan portfolio compared to 20% of

Table of Contents

the total loan portfolio as of December 31, 2009. No single borrower can be approved for a loan over the Bank's current legal lending limit of approximately \$2.4 million. This regulatory requirement helps to ensure the Bank's exposure to one individual customer is limited.

Management may renew loans at maturity when requested by a customer whose financial strength appears to support such a renewal or when such a renewal appears to be in the best interest of Solera National Bank. Solera National Bank requires payment of accrued interest in such instances and may adjust the rate of interest, require a principal reduction, or modify other terms of the loan at the time of renewal.

The following tables set forth information at June 30, 2010 and December 31, 2009, regarding the dollar amount of loans maturing in the Bank's portfolio based on the contractual terms to maturity. The tables do not give effect to potential prepayments or contractual principal payments.

(\$ in thousands)	June 30, 2010					Total Loans
	<1 Year	1 - 5 Years	5 - 15 Years	Over 15 Years		
Real estate commercial	\$ 7,400	\$ 11,381	\$ 21,032	\$	\$	\$ 39,813
Real estate residential		439		7,326		7,765

Table of Contents**Nonperforming Loans, Leases and Assets**

Nonperforming assets consist of loans and leases on nonaccrual status, loans 90 days or more past due and still accruing interest, loans that have been restructured resulting in a reduction or deferral of interest or principal, other real estate owned (OREO), and other repossessed assets. As of June 30, 2010, there was \$815,000 in nonperforming assets, consisting of one loan.

The following table summarizes information regarding nonperforming assets:

(\$ in thousands)	June 30, 2010	December 31, 2009
Nonaccrual loans and leases	\$ 815	\$
Other impaired loans		
Total nonperforming loans	\$ 815	\$
Impaired loans	\$ 815	\$
Allocated allowance for loan losses to impaired loans		
Net investment in impaired loans	\$ 815	
Accruing loans past due 90 days or more		3
Loans past due 30-89 days	\$ 827	\$ 1,298
Loans charged-off	\$ 185	\$
Recoveries		
Net charge-offs	\$ 185	\$
Allowance for loan losses	\$ 940	\$ 830
Allowance for loan losses to loans, net of deferred fees/expenses	1.55%	1.64%
Allowance for loan losses to nonaccrual loans	115.34%	NA
Allowance for loan losses to nonperforming loans	115.34%	NA
Nonaccrual loans to loans, net of deferred fees/expenses	1.34%	NA
Loans 30-89 days past due to loans, net of deferred fees/expenses	1.36%	2.56%

Federal regulations require that each insured financial institution classify its assets on a regular basis. In addition, in connection with examinations of insured institutions, federal examiners have authority to identify problem assets and, if appropriate, classify them. The Bank has established three classifications for potential problem assets: substandard, doubtful and loss. Loans classified as substandard are those loans with well-defined weaknesses, such that future capacity to repay the loan has been negatively impacted. Loans classified as doubtful are those loans that have characteristics similar to substandard loans, but the weaknesses have moved to the point where complete collection of the obligation from all sources is unlikely and a portion of the principal may be charged-off. Although loans classified as substandard do not duplicate loans classified as doubtful, both substandard and doubtful loans may include some loans that are past due at least 90 days, are on nonaccrual status or have been restructured. Loans classified as loss are those loans that are in the process of being charged-off. At June 30, 2010, Solera National Bank had substandard loans totaling \$3.3 million, a doubtful loan totaling \$815,000, and no loans classified as loss. Of the \$3.3 million in substandard loans, only \$757,000 was 30 days or more past due. As of December 31, 2009, the Bank had no loans classified as doubtful or loss and had substandard loans totaling \$3.8 million. Of the \$3.8 million of substandard loans, only \$953,000 was 30 days or more past due.

Table of Contents*Allowance for Loan Losses*

Implicit in Solera National Bank's lending activities is the fact that loan losses will be experienced and that the risk of loss will vary with the type of loan being made and the creditworthiness of the borrower over the term of the loan. To reflect the currently perceived risk of loss associated with the loan portfolio, additions are made to the allowance for loan losses in the form of direct charges against income to ensure that the allowance is available to absorb possible loan losses. The Bank's allowance for estimated loan losses is based on a number of quantitative and qualitative factors. Factors used to assess the adequacy of the allowance for loan losses are established based upon management's assessment of the credit risk in the portfolio, historical loan loss, changes in the size, composition and concentrations of the loan portfolio, general economic conditions, and changes in the legal and regulatory environment, among others. In addition, because the Bank has limited history on which to base future loan losses, a comparison of peer group allowance ratios to gross loans is made with the intention of maintaining similar levels during the Bank's de novo period of operation.

Provisions for loan losses may be provided both on a specific and general basis. Specific and general valuation allowances are increased by provisions charged to expense and decreased by charge-offs of loans, net of recoveries. Specific allowances are provided for impaired loans for which the expected loss is measurable. General valuation allowances are provided based on a formula that incorporates the factors discussed above. The Bank periodically reviews the assumptions and formula by which additions are made to the specific and general valuation allowances for losses in an effort to refine such allowances in light of the current status of the aforementioned factors.

The amount of the allowance equals the cumulative total of the provisions made from time to time, reduced by loan charge-offs and increased by recoveries of loans previously charged-off. The allowance was \$940,000, or 1.55% of outstanding principal as of June 30, 2010 compared to \$830,000, or 1.64% of outstanding principal as of December 31, 2009.

Credit and loan decisions are made by management and the Board of Directors in conformity with loan policies established by the Board of Directors. Solera National Bank's practice is to charge-off any loan or portion of a loan when the loan is determined by management to be uncollectible due to the borrower's failure to meet repayment terms, the borrower's deteriorating or deteriorated financial condition, the depreciation of the underlying collateral, the loan's classification as a loss by regulatory examiners, or other reasons. During the six months ended June 30, 2010 the Bank recorded charge-offs of \$185,000 related to its one impaired loan. No charge-offs were recorded during the six months ended June 30, 2009.

Off-Balance-Sheet Arrangements

In the ordinary course of business, the Company enters into various off-balance-sheet commitments and other arrangements to extend credit that are not reflected in the consolidated balance sheets of the Company. The business purpose of these off-balance-sheet commitments is the routine extension of credit. The total amounts of off-balance-sheet financial instruments with credit risk were as follows:

(\$ in thousands)	June 30, 2010	December 31, 2009
Financial instruments whose contractual amounts represent credit risk:		
Commitments to extend credit	\$ 8,277	\$ 7,182

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

Letters of credit

Total commitments	\$	8,277	\$	7,182
-------------------	----	-------	----	-------

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Commitments also include revolving lines of credit arrangements and unused commitments for commercial and real estate secured loans. Since many of the commitments are expected to expire without being drawn upon, the commitments do not necessarily represent future cash requirements.

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending

Table of Contents

loan facilities to customers and, therefore, the Company applies the same rigorous underwriting standards to letters of credit.

The Company faces the risk of deteriorating credit quality of borrowers to whom a commitment to extend credit has been made; however, no significant credit losses are expected from these commitments and arrangements.

Borrowings

As of June 30, 2010, the Bank had \$5.5 million in fixed-rate borrowings from the Federal Home Loan Bank of Topeka (FHLB) with varying maturity dates between April 2011 and June 2013 and a weighted-average fixed interest rate of 4.19%. Additionally, the Bank had \$1.0 million in variable-rate, overnight borrowings from the FHLB. As of June 30, 2010, the overnight advance rate was 0.20%.

The Bank has also established unsecured Federal Funds lines-of-credit totaling \$11.7 million with various correspondent banks. Additionally, the Bank has access to a secured Federal Funds line with a correspondent bank. As of June 30, 2010, the Company had \$400,000 outstanding on these lines.

Loan Commitments

At June 30, 2010, the Company had \$8.3 million in outstanding loan origination commitments. Management believes Solera National Bank has sufficient funds available to meet current origination and other lending commitments.

Capital Resources and Capital Adequacy Requirements

The risk-based capital regulations established and administered by the banking regulatory agencies are applicable to Solera National Bank. Risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Under the regulations, assets and off-balance-sheet items are assigned to broad risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance-sheet items. Under the prompt corrective action regulations, to be adequately capitalized a bank must maintain minimum ratios of total capital to risk-weighted assets of 8.0%, Tier 1 capital to risk-weighted assets of 4.0%, and Tier 1 capital to total average assets of 4.0%. Failure to meet these capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on Solera National Bank's financial statements.

As of June 30, 2010, Solera National Bank was categorized as well-capitalized. A well-capitalized institution must maintain a minimum ratio of total capital to risk-weighted assets of at least 10.0%, a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, and a minimum ratio of Tier 1 capital to total average assets of at least 5.0% and must not be subject to any written order, agreement, or directive requiring it to

Edgar Filing: Solera National Bancorp, Inc. - Form 10-Q

meet or maintain a specific capital level.

The following table summarizes the ratios of the Bank and the regulatory minimum capital requirements at June 30, 2010:

As of June 30, 2010 (\$ in thousands)	Actual		For Capital Adequacy Purposes		To Be Well-Capitalized Under Prompt Corrective Action Provisions	
	Amount	%	Amount	%	Amount	%
Total capital (to risk-weighted assets)	\$ 16,326	18.6%	\$ 7,036	>8.0%	\$ 8,795	>10.0%
Tier 1 capital (to risk-weighted assets)	\$ 15,386	17.5%	\$ 3,518	>4.0%	\$ 5,277	>6.0%
Tier 1 capital (to average assets)	\$ 15,386	11.1%	\$ 5,566	>4.0%	\$ 6,957	>5.0%

Table of Contents

Liquidity

The primary source of liquidity for the Company will be dividends paid by Solera National Bank. Solera National Bank is currently restricted from paying dividends without regulatory approval that will not be granted until the accumulated deficit has been eliminated.

Solera National Bank's liquidity is monitored by its staff, the Asset Liability Committee and the Board of Directors, who review historical funding requirements, the current liquidity position, sources and stability of funding, marketability of assets, options for attracting additional funds, and anticipated future funding needs, including the level of unfunded commitments.

Solera National Bank's primary sources of funds are retail and commercial deposits, loan and securities repayments, other short-term borrowings, and other funds provided by operations. While scheduled loan repayments and maturing investments are relatively predictable, deposit flows and early loan prepayments are more influenced by interest rates, general economic conditions, and competition. Solera National Bank will maintain investments in liquid assets based upon management's assessment of (1) the need for funds, (2) expected deposit flows, (3) yields available on short-term liquid assets, and (4) objectives of the asset/liability management program.

As loan demand increases, greater pressure will be exerted on Solera National Bank's liquidity. However, it is management's intention to maintain a conservative loan to deposit ratio in the range of 80 - 90% over time. Given this goal, Solera National Bank will not aggressively pursue lending opportunities if sufficient funding sources (e.g., deposits, Federal Funds, etc.) are not available, nor will Solera National Bank seek to attract transient volatile, non-local deposits with above market interest rates. As of June 30, 2010, the loan to deposit ratio was 54% an increase from 48% at December 31, 2009.

Solera National Bank had cash and cash equivalents of \$1.1 million, or 0.7% of total Bank assets, at June 30, 2010. Additionally, the Bank had \$75.0 million in available-for-sale investment securities, or 53% of the Company's total assets, at June 30, 2010. Management feels Solera National Bank should have adequate liquidity to meet anticipated future funding needs.

Subsequent to June 30, 2010, the Bank signed a purchase and assumption agreement with Liberty Savings Bank, FSB, to acquire approximately \$30 million in loans and assume approximately \$40 million in deposits. This transaction, if consummated, will provide approximately \$8 million in additional cash and cash equivalents during the fourth quarter 2010, when the transaction is expected to close. However, our liquidity position could be affected by a higher than anticipated run-off of acquired deposits.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, the Company is not required to provide the information required by this Item.

ITEM 4(T). CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for maintaining effective disclosure controls and procedures. As of the end of the period covered by this Quarterly Report on Form 10-Q, management evaluated the effectiveness and operation of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). Based on that evaluation, both the Company's Principal Executive Officer and Principal Accounting and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective to ensure that the information required to be disclosed by the Company in reports that are filed or submitted under the Exchange Act are recorded, processed, summarized and reported to management within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding disclosure.
