-

Item 2.05 Costs Associated with Exit or Disposal Activities

On June 13, 2011, Array BioPharma Inc. (the Company) implemented a reduction in its workforce by approximately 70 employees. The employees being terminated were notified on June 13, 2011 and were primarily in discovery research and support positions. These reductions were primarily in discovery research and support positions, which will better balance the staffing between the discovery and development groups. The Company continues to focus on the discovery and development of drugs to treat cancer and inflammatory diseases. The Company anticipates that the actions associated with the reductions will be completed during June 2011.

As a result of the reductions, the Company expects to record a one-time restructuring charge of approximately \$3.5 million in the fourth quarter of fiscal 2011, which may increase later in the year, depending on potential facility-related charges and other write-downs that have not yet been finalized. The restructuring charge is associated with the payment of one-time termination benefits that the Company expects to pay out in cash during the fourth quarter of fiscal 2011 and first quarter of fiscal 2012. These termination benefits consist of a severance payment based on the affected employee's length of service with the Company, a health benefit payment that the employee may use to pay the premiums required to continue health care coverage under COBRA and outplacement assistance. Payment of these termination benefits is contingent on the affected employee entering into a separation agreement with the Company containing a general release of claims against the Company.

The Company's estimated restructuring charge is based on a number of assumptions. Actual results may differ materially and additional charges not currently expected may be incurred in connection with or as a result of the reductions.

This current report on Form 8-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements relating to the expected costs associated with the Company's reduction in force, the expected timing of the payment of such costs and of the completion of actions relating to the reductions, and the Company's goal of scaling back discovery research and development activities. These statements involve significant risks and uncertainties, including those discussed in our annual report filed on form 10-K for the year ended June 30, 2010, and in other reports filed by the Company with the Securities and Exchange Commission. Because these statements reflect current expectations concerning future events, actual results and the timing of events could differ materially from those anticipated in these forward-looking statements as a result of many factors. These factors include, but are not limited to, the impact of the workforce reduction on the Company's business, unanticipated charges not currently contemplated that may occur as a result of the reduction in force, the Company's ability to execute on its strategy and general business and economic conditions. The Company is providing this information as of June 13, 2011. The Company undertakes no duty to update any forward-looking statements to reflect the occurrence of events or circumstances after the date of such statements or of anticipated or unanticipated events that alter any assumptions underlying such statements.
