Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company  X

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.  X

**Item 8.01. Other Events.**

On October 31, 2017, the Company announced additional data from its Phase 3 SECURE trial of Twirla® (AG200-15), an investigational, once-weekly, low-dose hormonal contraceptive patch, which showed women experienced mean decreases in length of bleeding and spotting episodes. These data were presented during an oral presentation by Anita Nelson, MD, Professor and Chair, Obstetrics and Gynecology, College of Osteopathic Medicine of the Pacific, and Co-Principal Investigator of the Agile Therapeutics, Inc., SECURE Phase 3 clinical trial, at the American Society for Reproductive Medicine (ASRM) Scientific Congress & Expo 2017 in San Antonio, Texas, and the abstract was published in *Fertility and Sterility*.

The presentation reported, among other items, that over 12 months, women on Twirla reported a gradual decrease in the mean total number of bleeding and/or spotting episodes from 6.0 to 4.9 days from cycles two through 13. Scheduled bleeding, or withdrawal bleeding during the patch-free week, decreased from 4.7 days at cycle two to 4.1 days at the end of the trial. The mean number of days of unscheduled bleeding, or breakthrough bleeding, decreased from 6.3 to 5.2 from cycle two through 13. While the duration of scheduled and unscheduled bleeding decreased, the mean number of episodes were consistent during the trial. Only 2.2% of women discontinued from the trial due to bleeding-related adverse events. presented data which showed women experienced mean decreases in length of bleeding and spotting episodes.

SECURE was a Phase 3, one-year, multicenter, single-arm, open-label trial that evaluated the safety, efficacy and tolerability of Twirla in 2032 healthy women, aged 18 and over, at 102 experienced investigative sites across the United States. Agile announced top-line results of the SECURE clinical trial in January 2017. The Company's new drug application ( NDA ) for Twirla is currently under review by the U.S. Food and Drug Administration with a target Prescription Drug User Fee Act (PDUFA) goal date of December 26, 2017.

Copies of the press release and presentation are attached hereto as Exhibit 99.1 and 99.2 respectively and are hereby incorporated by reference herein.
