LETTER FROM THE CHAIRMAN

R. JAY GERKEN, CFA

*Chairman, President and
Chief Executive Officer*

Dear Shareholder,

We are pleased to present the annual report of the Intermediate Muni Fund, Inc. for the 12-month period ended December 31, 2004.

Despite sharply rising oil prices, threats of terrorism, geopolitical concerns and uncertainties surrounding the Presidential election, the U.S. economy continued to expand during the reporting period. Following a robust 4.5% gain in the first quarter of 2004, gross domestic product (GDP) growth was 3.3% in the second quarter of the year. This decline was largely attributed to higher energy prices. However, third quarter 2004 GDP growth rose to a solid 4.0%. While fourth quarter GDP figures have not yet been released, continued growth is expected.

Given the overall strength of the economy, Federal Reserve Board (Fed) monetary policy was seen as highly accommodative and expectations were that it would start raising rates to ward off the threat of inflation. As expected, the Fed raised its target for the federal funds rateⁱⁱⁱ by 0.25% to 1.25% at the end of June 2004 – the first rate increase in four years. The Fed again raised rates in 0.25% increments during August, September, November, and December, bringing the target for the federal funds rate to 2.25%. After the end of the fund's reporting period, at their February meeting, the Fed once again raised the target rate by 0.25% to 2.50%. Regardless of the economic expansion and higher interest rates, the overall bond market generated positive returns during the fiscal year.

Please read on for a more detailed look at prevailing economic and market conditions during the fund's fiscal year and to learn how those conditions have affected fund performance.

Information About Your Fund

As you may be aware, several issues in the mutual fund industry have recently come under the scrutiny of federal and state regulators. The fund's Adviser and some of its affiliates have received requests for information from various government regulators regarding market timing, late trading, fees, and other mutual fund issues in connection with various investigations. The fund has been informed that the Adviser and its affiliates are responding to those information requests, but are not in a position to predict the outcome of these requests and investigations.

Edgar Filing: INTERMEDIATE MUNI FUND INC - Form N-CSR/A

As previously disclosed by Citigroup, the Staff of the Securities and Exchange Commission (SEC) has notified Citigroup Asset Management (CAM) and Citicorp Trust Bank (CTB), an affiliate of CAM, that the Staff is considering recommending a civil injunctive action and/or an administrative proceeding against CAM, CTB, the former CEO of CAM, two former employees and a current employee of CAM, relating to the creation, operation and fees of an internal transfer agent unit that serves various CAM-managed funds. Citigroup is cooperating with the SEC and will seek to resolve this matter in discussion with the SEC Staff. Although there can be no assurance, Citigroup does not believe that this matter will have a material adverse effect on the fund. For further information, please see the *Additional Information* note in the Notes to the Financial Statements included in this report.

As always, thank you for your confidence in our stewardship of your assets. We look forward to helping you continue to meet your financial goals.

Sincerely,

R. Jay Gerken, CFA
Chairman, President and Chief Executive Officer

2 *2004 Annual Report*

MANAGER OVERVIEW

PETER M. COFFEY

*Vice President
and Investment Officer*

Performance Review

For the 12 months ended December 31, 2004, the Intermediate Muni Fund, Inc. returned -2.19%, based on its American Stock Exchange (AMEX) market price and 3.99% based on its net asset value (NAV) per share. In comparison, the Lehman Brothers Municipal Bond Index returned 4.48% and its Lipper General Muni Debt closed-end funds category average^v was 6.63% over the same time frame. Please note that Lipper performance returns are based on each fund s NAV.

During the 12-month period, the fund distributed dividends to shareholders totaling \$0.612 per share. The performance table shows the fund s 30-day SEC yield as well as its 12-month total return based on its NAV and market price as of December 31, 2004. **Past performance is no guarantee of future results. The fund s yields will vary.**

**FUND PERFORMANCE
AS OF DECEMBER 31, 2004
(unaudited)**

Price Per Share	30-Day SEC Yield	12 Month Total Return
\$ 10.02 (NAV)	5.09%	3.99%
\$ 9.36 (AMEX)	5.40%	2.19%

All figures represent past performance and are not a guarantee of future results. The fund s yields will vary.

Market Overview

Municipal bonds traded in a fairly narrow range during the first two months of 2004. During this time, the economy grew at a more robust pace versus early 2003.^{vi} Although labor market growth^{vii} languished throughout 2003 into the first quarter of this year, it rose significantly and remained strong in the early spring, and inflation picked up as well.^{viii}

Total returns are based on changes in NAV or market price, respectively. Total returns assume the reinvestment of all dividends and/or capital gains distributions, if any, in additional shares. The SEC yield is a return figure often quoted by bond and other fixed-income mutual funds. This quotation is based on the most recent 30-day (or one-month) period covered by the fund s filings with the SEC. The yield figure reflects the

Edgar Filing: INTERMEDIATE MUNI FUND INC - Form N-CSR/A

dividends and interest earned during the period after deduction of the fund's expenses for the period. These yields are as of December 31, 2004 and are subject to change.

Intermediate Muni Fund, Inc.

3

After an extended period of monetary easing, the Federal Reserve's monetary policymaking committee raised its federal funds rate target from a four-decade low of 1.00% to 1.25% at the end of June—the Fed's first hike in four years. The increase marked a significant reversal from the Fed's monetary policy position from June 2003, when it last slashed its rate target following a long series of accommodative rate cuts. The rate hike was widely anticipated due to comments from the Fed regarding the momentum behind the economy and signals that it was prepared to push rates higher from their near-historic lows. As a result, bond prices declined and yields rose sharply in April before prices stabilized somewhat in the early summer.

The Fed again raised its fed funds target by 0.25% in August and to 1.75% in September. Given that bond prices had already factored in rate hikes to a significant extent, and coupling this with a lack of inflationary pressures, bond prices held up and actually rose over the third quarter. In September and October, the bond market benefited from falling stock and rising oil prices, which encouraged investors to reallocate capital into fixed-income securities.

Yields on bonds rose as their prices dropped in reaction to an employment report issued in November that yielded surprisingly robust labor market results.^{vii} The Fed subsequently raised its fed funds rate target to 2.00% on November 10th and then again to 2.25% on December 14th. After the end of the fund's reporting period, at their February meeting, the Fed once again raised the target rate by 0.25% to 2.50%.

Factors that Influenced Fund Performance

During the reporting period, yields on shorter-term municipal securities with maturities from one to seven years rose substantially, with the largest increase in issues with one to three year maturities. At the same time, yields on municipal securities in the 10-year area and those with maturities of 25 to 30 years were up only slightly. Surprisingly, yields on municipals with 15-20 year maturities declined slightly during the year.

Looking at the fiscal year as a whole, the fund's results were enhanced by the strong performance of its exposure to the hospital sector. In this area, certain securities appreciated after their advance refunding. Generally speaking, an existing bond cannot be prematurely retired, or called, except on specific dates. However, through advance refunding, a security can be refinanced as long as the proceeds of the new bonds are held in reserve to pay the interest and principal on the old bonds until they become callable. In the case of the fund's holdings in this area, the proceeds of the advance refunding are being held in escrow in high quality U.S. government securities. Another of the fund's hospital securities also aided returns, as market perceptions of its underlying balance sheet improved.

Other areas contributing to performance were select fund holdings in the transportation sector and its toll road zero coupon bonds.

Conversely, several of the fund's holdings in lifecare and multi-family housing (low income) sectors detracted from results. Our escrow-to-maturity bonds with very short average lives due to operating sinking funds, were a drag on performance as short-term interest rates rose, even as longer-term rates declined. Finally a short-position in U.S.Treasury futures, designed to hedge against a possible rise in rates, hurt results as yields on intermediate- and long-term bonds declined.

Looking for Additional Information?

The fund is traded under the symbol SBI and its closing market price is available in most newspapers under the AMEX listings. The daily NAV is available on-line under symbol XSBIX. *Barron's* and *The Wall Street Journal's* Monday editions carry closed-end fund tables that will provide additional information. In addition, the fund issues a quarterly press release that can be found on most major financial websites as well as www.citigroupassetmanagement.com.

In a continuing effort to provide information concerning the fund, shareholders may call 1-888-735-6507, Monday through Friday from 8:00 a.m. to 6:00 p.m. Eastern Time, for the fund's current net asset value, market price, and other information.

Thank you for your investment in the Intermediate Muni Fund, Inc. As ever, we appreciate that you have chosen us to manage your assets and we remain focused on achieving the fund's investment goals.

Sincerely,

Peter M. Coffey
Vice President
and Investment Officer

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.

RISKS: Keep in mind the fund's investments are subject to interest rate and credit risks. As interest rates rise, bond prices fall, reducing the value of the Fund's share price. Lower-rated, higher yielding bonds, known as junk bonds, are subject to greater credit risk, including the risk of default, than higher-rated obligations. The fund may use derivatives, such as options and futures, which can be illiquid, may disproportionately increase losses, and have a potentially large impact on fund performance.

All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

- i Gross domestic product is the market value of goods and services produced by labor and property in a given country.
- ii The Fed is responsible for the formulation of a policy designed to promote economic growth, full employment, stable prices, and a sustainable pattern of international trade and payments.
- iii The federal funds rate is the interest rate that banks with excess reserves at a Federal Reserve district bank charge other banks that need overnight loans.
- iv NAV is calculated by subtracting total liabilities and outstanding preferred stock from the closing value of all securities held by the fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the fund has invested. However, the price at which an investor may buy or sell shares of the fund is at the fund's market price as determined by supply of and demand for the fund's shares.
- v Lipper, Inc. is a major independent mutual-fund tracking organization. Returns are based on the 12-month period ended December 31, 2004, including the reinvestment of dividends and capital gains, if any, calculated among the 65 funds in the fund's Lipper category, and excluding sales charges.
- vi Source: Commerce Department (Bureau of Economic Analysis). Refers to quarterly growth of GDP.
- vii Source: Bureau of Labor Statistics based upon the growth of non-farm payroll jobs.
- viii Sources: Lehman Brothers. Inflation data based upon Consumer Price Index/deflation data.

Take Advantage of the Fund's Dividend Reinvestment Plan!

As an investor in the Fund, you can participate in its Dividend Reinvestment Plan (Plan), a convenient, simple and efficient way to reinvest your dividends and capital gains distributions, if any, in additional shares of the Fund. Below is a short summary of how the Plan works.

Plan Summary

If you are a Plan participant who has not elected to receive your dividends in the form of a cash payment, then your dividend and capital gain distributions will be reinvested automatically in additional shares of the Fund.

The number of common stock shares in the Fund you will receive in lieu of a cash dividend is determined in the following manner. If the market price of the common stock is equal to or exceeds the net asset value per share (NAV) on the determination date, you will be issued shares by the Fund at a price reflecting the NAV, or 95% of the market price, whichever is greater.

If the market price is less than the NAV at the time of valuation (the close of business on the determination date), PFPC Inc. (Plan Agent) will buy common stock for your account in the open market.

If the Plan Agent begins to purchase additional shares in the open market and the market price of the shares subsequently rises above the previously determined NAV before the purchases are completed, the Plan Agent will attempt to terminate purchases and have the Fund issue the remaining dividend or distribution in shares at the greater of the previously determined NAV or 95% of the market price. In that case, the number of Fund shares you receive will be based on the weighted average of prices paid for shares purchased in the open market and the price at which the Fund issues the remaining shares.

A more complete description of the current Plan appears in the section of this report beginning on page 39. To find out more detailed information about the Plan and about how you can participate, please call PFPC Inc. at (800) 331-1710.

Bond Ratings (unaudited)

The definitions of the applicable rating symbols are set forth below:

Standard & Poor's Ratings Service (Standard & Poor's) Ratings from AA to CCC may be modified by the addition of a plus (+) or a minus (-) sign to show relative standings within the major rating categories.

AAA Bonds rated AAA have the highest rating assigned by Standard & Poor's. Capacity to pay interest and repay principal is extremely strong.

AA Bonds rated AA have a very strong capacity to pay interest and repay principal and differs from the highest rated issue only in a small degree.

A Bonds rated A have a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

BBB Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.

BB, B, CCC and CC Bonds rated BB, B, CCC and CC are regarded, on balance, as predominantly speculative and with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents a lower degree of speculation than B, and CC the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

Moody's Investors Service (Moody's) Numerical modifiers 1, 2, and 3 may be applied to each generic rating from Aaa to Caa, where 1 is the highest and 3 the lowest rating within its generic category.

Aaa Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as gilt edge. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa Bonds rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.

A Bonds rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa Bonds rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba Bonds rated Ba are judged to have speculative elements; their future cannot be

Edgar Filing: INTERMEDIATE MUNI FUND INC - Form N-CSR/A

considered as well assured. Often the protection of interest and principal payments may be very moderate, and therefore not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B Bonds rated B generally lack characteristics of the desirable investments. Assurance of interest and principal payments or maintenance of other terms of the contract over any long period of time may be small.

Caa Bonds rated Caa are of poor standing. These issues may be in default, or there may be present elements of danger with respect to principal or interest.

Bond Ratings (unaudited) (continued)

Ca Bonds rated Ca represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.
 C Bonds rated C are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Fitch Ratings (Fitch) Ratings from AA to BBB may be modified by addition of a plus (+) sign or minus () sign to show relative standings within the major ratings categories.

AA Bonds rated AA are considered to be investment-grade and of very high credit quality. The obligor's ability to pay interest and/or dividends and repay principal is very strong.
 A Bonds and preferred stock considered to be investment-grade and of high credit quality. The obligor's ability to pay interest and/or dividends and repay principal is considered to be strong, but may be more vulnerable to adverse changes in economic conditions and circumstances than debt or preferred securities with higher ratings.
 BBB Bonds rated BBB are considered to be investment-grade and of satisfactory credit quality. The obligor's ability to pay interest or dividends and repay principal is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to have adverse impact on these securities and, therefore, impair timely payment. The likelihood that the ratings of these bonds will fall below investment grade is higher than for securities with higher ratings.
 NR Indicates that the bond is not rated by Standard & Poor's, Moody's or Fitch.

Short-Term Security Ratings (unaudited)

SP-1 Standard & Poor's highest rating indicating very strong or strong capacity to pay principal and interest; those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign.
 A-1 Standard & Poor's highest commercial paper and variable-rate demand obligation (VRDO) rating indicating that the degree of safety regarding timely payment is either overwhelming or very strong; those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign.
 VMIG 1 Moody's highest rating for issues having a demand feature VRDO.

See Notes to Financial Statements.

Financial Highlights (continued)

	2004	2003	2002	2001	2000
Municipal Auction Rate Cumulative Preferred Stock(4):					
Total Amount Outstanding (000s)	\$ 50,000	\$ 50,000	\$ 50,000		
Asset Coverage Per Share	95,272	96,840	96,942		
Involuntary Liquidating Preference Per Share(5)	25,000	25,000	25,000		
Average Market Value Per Share(5)	25,000	25,000	25,000		

(1) Effective January 1, 2001, the Fund adopted a change in the accounting method that requires the Fund to amortize premiums and accrete all discounts. Without the adoption of this change, for the year ended December 31, 2001, the ratio of net investment income to average net assets would have been 5.31%. Per share information, ratios and supplemental data for the periods prior to January 1, 2001 have not been restated to reflect this change in presentation. In addition, the impact of this change to net investment income and net realized and unrealized gain was less than \$0.01 per share.

(2) The total return calculation assumes that dividends are reinvested in accordance with the Fund's dividend reinvestment plan.

(3) Calculated on basis of average net assets of common shareholders. Ratios do not reflect the effect of dividend payments to preferred shareholders.

(4) On January 28, 2002, the Fund issued 2,000 shares of Series M Municipal Auction Rate Cumulative Preferred Stock at \$25,000 a share.

(5) Excludes accumulated and unpaid dividends.

* Amount represents less than \$0.01 per share.

See Notes to Financial Statements.

Notes to Financial Statements

1. Organization and Significant Accounting Policies

The Intermediate Muni Fund, Inc. (Fund), a Maryland corporation, is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP). Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ.

(a) Investment Valuation. Securities are valued at the mean between the bid and asked prices provided by an independent pricing service that are based on transactions in municipal obligations, quotations from municipal bond dealers, market transactions in comparable securities and various relationships between securities. Securities for which market quotations are not readily available or where market quotations are determined not to reflect fair value, will be valued in good faith by or under the direction of the Fund 's Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates value.

(b) Futures Contracts. The Fund may enter into futures contracts to the extent permitted by its investment policies and objectives. Upon entering into a futures contract, the Fund is required to deposit cash or pledge securities as initial margin. Additional securities are also segregated up to the current market value of the futures contracts. Subsequent payments, which are dependent on the daily fluctuations in the value of the underlying financial instrument, are made or received by the Fund each day (daily variation margin) and are recorded as unrealized gains or losses until the contracts are closed. When the contracts are closed, the Fund records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transactions and the Fund 's basis in the contracts. The Fund enters into such contracts typically to hedge a portion of the portfolio. The risks associated with entering into futures contracts include the possibility that a change in the value of the contract may not correlate with the changes in the value of the underlying instruments. In addition, investing in futures contracts involves the risk that the Fund could lose more than the original margin deposit and subsequent payments required for a futures transaction.

(c) Security Transactions and Investment Income. Security transactions are accounted for on trade date. Interest income, adjusted for amortization of premium or accretion of discount, is recorded on the accrual basis. The cost of

Notes to Financial Statements (continued)

investments sold is determined by use of the specific identification method for both financial reporting and income tax purposes.

(d) Dividends and Distributions to Shareholders. Dividends from net investment income for the Fund, if any, are declared and paid on a monthly basis. The Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from federal income tax and from designated state income taxes, to retain such tax-exempt status when distributed to the shareholders of the Fund. Distributions of net realized gains to shareholders of the Fund, if any, are taxable and are declared at least annually. Dividends and distributions to shareholders of the Fund are recorded on the ex-dividend date for the shareholders of Common Stock and are determined in accordance with income tax regulations, which may differ from GAAP. In addition, the holders of the Municipal Auction Rate Cumulative Preferred Stock shall be entitled to receive dividends in accordance with an auction that will normally be held weekly and out of the funds legally available to shareholders.

(e) Net Asset Value. The net asset value of the Fund's Common Stock is determined no less frequently than the close of business on the Fund's last business day of each week (generally Friday) and on the last business day of the month. It is determined by dividing the value of the net assets available to Common Stock by the total number of shares of Common Stock outstanding. For the purpose of determining the net asset value per share of the Common Stock, the value of the Fund's net assets shall be deemed to equal the value of the Fund's assets less (1) the Fund's liabilities, and (2) the aggregate liquidation value (i.e., \$25,000 per outstanding share) of the Municipal Auction Rate Cumulative Preferred Stock.

(f) Federal and Other Taxes. It is the Fund's policy to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute substantially all of its taxable income and net realized gains on investments, if any, to shareholders each year. Therefore, no federal income tax provision is required.

(g) Reclassifications. GAAP requires that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. Accordingly, during the current year, \$1,878 has been reclassified between undistributed net investment income and accumulated net realized loss from investment transactions and futures contracts as a result of permanent differences attributable to differences between book and tax amortization of premium on fixed income securities. These reclassifications have no effect on net assets or net asset values per share.

Notes to Financial Statements (continued)

2. Management Agreement and Other Transactions with Affiliates

Smith Barney Fund Management LLC (SBFM), an indirect wholly-owned subsidiary of Citigroup Inc. (Citigroup), acts as investment manager to the Fund. As compensation for its services, the Fund pays SBFM a management fee calculated at an annual rate of 0.60% of the Fund's average daily net assets. For purposes of calculating the management fee, the liquidation value of any preferred stock of the Fund is not deducted in determining the Fund's average daily net assets. This fee is calculated daily and paid monthly.

All officers and one Director of the Fund are employees of Citigroup or its affiliates and do not receive compensation from the Fund.

3. Investments

During the year ended December 31, 2004, the aggregate cost of purchases and proceeds from sales of investments (but excluding short-term investments) were as follows:

Purchases	\$ 59,598,122
Sales	62,332,186

At December 31, 2004, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were as follows:

Gross unrealized appreciation	\$ 10,777,383
Gross unrealized depreciation	(1,941,104)
Net unrealized appreciation	\$ 8,836,279

At December 31, 2004, the Fund had the following open futures contracts:

Number of	Expiration	Basis
-----------	------------	-------
