SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended March 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 000-26427

Stamps.com Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

77-0454966

(I.R.S. Employer
Identification No.)

12959 Coral Tree Place

Los Angeles, California 90066

(Address of Principal Executive Offices)

Registrant's telephone number, including area code: **(310) 482-5800**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2006, there were approximately 23,895,107 shares of the Registrant's Common Stock issued and outstanding.

STAMPS.COM
NOTES TO FINANCIAL STATEMENTS
(ALL INFORMATION WITH RESPECT TO MARCH 31, 2006 AND 2005 IS UNAUDITED)

1. Summary of Significant Accounting Policies

Basis of Presentation

The financial statements included herein have been prepared by Stamps.com Inc. (Stamps.com or Company) without audit pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulation. The Company believes that the disclosures are adequate to make the information presented not misleading. It is suggested that these financial statements be read in conjunction with the financial statements and the notes thereto included in the Company's latest annual report on Form 10-K.

In the opinion of the Company, these unaudited financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly the financial position of the Company as of March 31, 2006, the results of its operations for the three months ended March 31, 2006 and 2005, and its cash flows for the three months ended March 31, 2006 and 2005.

Use of Estimates and Risk Management

The preparation of financial statements in conformity with US generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates and such differences may be material to the financial statements. Examples include estimates of loss contingencies, promotional coupon redemptions and estimates regarding the useful lives of patents and other amortizable intangibles.

The Company is involved in various litigation matters as a claimant and a defendant. The Company records any amounts recovered in these matters when received. The Company records liabilities for claims against it when the loss is probable and estimable. Amounts recorded are based on reviews by outside counsel, in-house counsel and management. Actual results could differ from estimates.

Income Taxes

The provision for income taxes consists solely of alternative minimum federal and state taxes. The Company's effective income tax rate differs from the statutory income tax rate primarily as a result of the establishment of a valuation allowance for the future benefits to be received from the deferred tax assets including net operating loss carryforwards and research tax credits carryforwards as well as the use of net operating losses to offset taxable income. The Company recorded a tax provision subject to the corporate alternative minimum federal and state taxes of approximately \$12,000 and \$37,000 for the three months ended March 31, 2006 and 2005, respectively.

2. Legal Proceedings

Please refer to "Part II - Other Information - Item 1 - Legal Proceedings" of this report for a discussion of legal proceedings.

3. Net Income per Share

Net income per share represents net income attributable to common stockholders divided by the weighted average number of common shares outstanding during a reported period. The diluted net income per share reflects the potential dilution that could occur if securities or other contracts to issue common stock, including convertible preferred stock and stock options and warrants (commonly and hereafter referred to as “common stock equivalents”), were exercised or converted into common stock. Diluted net income per share is calculated by dividing net income during a reported period by the sum of the weighted average number of common shares outstanding plus common stock equivalents for the period. The following table reconciles income and share amounts utilized to calculate basic and diluted net income per share (in thousands, except per share data):

STAMPS.COM
NOTES TO FINANCIAL STATEMENTS
 (ALL INFORMATION WITH RESPECT TO MARCH 31, 2006 AND 2005 IS UNAUDITED)

	Three Months Ended March 31,	
	2006	2005
Net income	\$ 3,357	\$ 1,641
Basic - weighted average common shares	23,268	22,514
Diluted effect of common stock equivalents	1,118	928
Diluted - weighted average common shares	24,386	23,442
Earnings per share:		
Basic	\$ 0.14	\$ 0.07
Diluted	\$ 0.14	\$ 0.07

The calculation of dilutive shares excludes the effect of the following options that are considered anti-dilutive (in thousands):

	Three Months Ended March 31,	
	2006	2005
Anti-dilutive stock option shares	183	1,268

4. Stock-Based Employee Compensation

Effective January 1, 2006, the Company adopted the Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" (SFAS 123R), and related SEC rules included in Staff Accounting Bulletin No. 107 (SAB 107), which require the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including employee stock options and employee stock purchases related to the Employee Stock Purchase Plan (employee stock purchases) based on estimated fair values.

The Company adopted SFAS 123R using the modified prospective transition method, which requires the application of the accounting standard as of January 1, 2006, the first day of the Company's fiscal year 2006. The Company's Financial Statements as of and for the three months ended March 31, 2006 reflect the impact of SFAS 123R. In accordance with the modified prospective transition method, the Company's Financial Statements for prior periods have not been restated to reflect, and do not include, the impact of SFAS 123R. Stock-based compensation expense recognized under SFAS 123R for the three months ended March 31, 2006 was \$795,000, which consists of stock-based compensation expense related to employee stock options and employee stock purchases of \$296,000 and \$499,000, respectively. Basic and diluted earnings per share for the three months ended March 31, 2006 would have been \$0.18 and \$0.17, respectively, if the Company had not adopted SFAS 123R, compared to reported basic and diluted earnings per share of \$0.14, respectively.

SFAS 123R requires companies to estimate the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's Statement of Income. Prior to the adoption of SFAS 123R, the Company accounted for stock-based awards to employees and directors using the intrinsic value method in accordance with APB 25 as allowed under Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS 123). Under the intrinsic value method, no stock-based compensation expense had been recognized in the Company's Statement of Income prior to January 1, 2006 because the exercise price of the Company's stock options granted to employees and directors was equal to or greater than the fair market value of the underlying stock at the date of grant.

STAMPS.COM
NOTES TO FINANCIAL STATEMENTS
 (ALL INFORMATION WITH RESPECT TO MARCH 31, 2006 AND 2005 IS UNAUDITED)

The following table illustrates the reported and pro forma effect on net income and earnings per share if the Company had elected to apply the fair value recognition provisions of SFAS 123 for the first quarter of 2005 (in thousands, except per share data):

	Three Months Ended March 31, 2005	
Net income as reported	\$	1,641
Add: Stock price based employee expense included in net income		—
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects		(328)
Net income pro forma	\$	1,313
Basic and diluted net income per common share-as reported	\$	0.07
Basic and diluted net income per common share-pro forma	\$	0.06

Stock-based compensation expense recognized during the period is based on the value of the portion of share-based payment awards that is ultimately expected to vest during the period. Stock-based compensation expense recognized in the Company's Statement of Income for the three months ended March 31, 2006 included 1) compensation expense for share-based payment awards granted prior to, but not yet vested as of January 1, 2006 based on the grant date fair value estimated in accordance with the pro forma provisions of SFAS 123 and 2) compensation expense for the share-based payment awards granted subsequent to December 31, 2005 based on the grant date fair value estimated in accordance with the provisions of SFAS 123R.

Compensation expense recognized for all employee stock options awards granted is recognized using the straight-line single method over their respective vesting periods of three or four years. As stock-based compensation expense recognized in the Statement of Income for the three months ended March 31, 2006 is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. SFAS 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. In the Company's pro forma information required under SFAS 123 for the periods prior to fiscal 2006, the Company accounted for forfeitures as they occurred.

SFAS 123R requires the cash flow resulting from tax benefits resulting from tax deduction in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. Prior to fiscal 2005 the Company had a history of net operating losses and because it is uncertain as to when and if it may realize its deferred tax assets, the Company has placed a valuation allowance against its otherwise recognizable deferred tax asset. Therefore, there are no excess tax benefits recorded in the financing cash inflow that would have been classified as an operating cash inflow if the Company had not adopted SFAS 123R. During the three months ended March 31, 2006, the Company received \$5.3 million in cash from stock options exercised and from shares issued through the Employee Stock Purchase Program.

Upon adoption of SFAS 123R the Company continued to use the Black-Scholes option valuation model, which requires management to make certain assumptions for estimating the fair value of employee stock options granted at the date of the grant. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes

in the subjective input assumptions can materially affect the fair value estimates, in management's opinion the existing models may not necessarily provide a reliable single measure of the fair value of the Company's employee stock options. Although the fair value of employee stock options is determined in accordance with SFAS 123R using an option valuation model, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

7

STAMPS.COM
NOTES TO FINANCIAL STATEMENTS
(ALL INFORMATION WITH RESPECT TO MARCH 31, 2006 AND 2005 IS UNAUDITED)

For options granted, the Company's assumption of expected volatility for valuing options using the Black-Scholes model was based on the historical volatility of the Company's stock price for the period January 1, 2002 through the date of option grant because management believes the historical volatility since January 1, 2002 is more representative of prospective volatility. The risk-free interest rate is based on U.S. Treasury zero-coupon issues with a remaining term equal to the expected life assumed at the date of grant.

The following are the weighted average assumptions used in the Black-Scholes valuation model for the periods indicated:

	Three Months Ended	
	March 31, 2006	2005
Expected dividend yield	—	—
Risk-free interest rate	4.56%	3.74%
Expected volatility	49%	48%
Expected life (in years)	5	5
Expected forfeiture rate	12%	—

The following table summarizes stock option activity related to the Company's plan for the three months ended March 31, 2006:

	Number of Stock Options (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2005	2,608	\$ 15.03		
Granted	81	30.10		
Exercised	(390)	13.10		
Forfeited or expired	(10)	37.26		
Balance at March 31, 2006	2,289	15.81	6.9	\$ 47,489
Exercisable at March 31, 2006	1,853	15.18	6.4	\$ 40,519

The weighted average grant date fair value of options granted during the three months ended March 31, 2006 and 2005 was \$14.54 and \$6.64, respectively. The total intrinsic value of options exercised during the three months ended March 31, 2006 and 2005 was \$5,780,940 and \$1,678,452, respectively.

The following table summarizes the status of the Company's nonvested shares as of March 31, 2006:

Number of Stock Options (in thousands)	Weighted Average Grant Date Fair
--	--

	Value	
Nonvested at December 31, 2005	416 \$	7.37
Granted	81	14.54
Vested	(39)	5.60
Forfeited	(8)	8.41
Nonvested at March 31, 2006	441	8.90

As of March 31, 2006, there was approximately \$3.8 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements, which is expected to be recognized over a weighted-average period of 2.7 years.

STAMPS.COM
NOTES TO FINANCIAL STATEMENTS
 (ALL INFORMATION WITH RESPECT TO MARCH 31, 2006 AND 2005 IS UNAUDITED)

5. Goodwill and Intangible Assets

The Company wrote off all of its goodwill in the first quarter of 2001 due to impairment. The Company's other intangible assets, which consist of patents, trademarks and other intellectual property with a gross carrying value of \$8.9 million as of March 31, 2006 and December 31, 2005 and accumulated amortization of approximately \$5.5 million and \$5.2 million as of March 31, 2006 and December 31, 2005, respectively, continue to be amortized over their expected useful lives ranging from 4 to 17 years with a remaining weighted average amortization period of 1.9 years.

Aggregate amortization expense on intangible assets was approximately \$275,000 for the three months ended March 31, 2006 and 2005, respectively.

6. Comprehensive Income

The following table provides the data required to calculate comprehensive income (in thousands):

	Three Months Ended	
	March 31,	
	2006	2005
Net income	\$ 3,357	\$ 1,641
Unrealized loss on investments	(141)	(325)
Comprehensive income	\$ 3,216	\$ 1,316

7. Subsequent Event

On April 19, 2006, the Company settled the lawsuit against plaintiffs VCode Holdings, Inc. and VData regarding infringement of patent. Under the terms of the settlement, the Company paid the plaintiffs an immaterial amount of cash for a license to the patents involved in the lawsuit.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements relate to expectations concerning matters that are not historical facts. Words such as "projects," "believes," "anticipates," "estimates," "plans," "expects," "intends," and similar words and expressions are intended to identify forward-looking statements. Although Stamps.com believes that such forward-looking statements are reasonable, we cannot assure you that such expectations will prove to be correct. Factors that could cause actual results to differ materially from such expectations are disclosed herein including, without limitation, in the "Risk Factors" section of this report. All forward-looking statements attributable to Stamps.com are expressly qualified in their entirety by such language. Stamps.com does not undertake any obligation to update any forward-looking statements. You are also urged to carefully review and consider the various disclosures we have made which describe certain factors which affect our business, including the "Risk Factors" section of this report. The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our financial statements and the related notes thereto.

Stamps.com, NetStamps, PhotoStamps, Hidden Postage, Stamps.com Internet postage and the Stamps.com logo are our trademarks. This report also includes trademarks of entities other than Stamps.com.

Overview

Stamps.com is the leading provider of Internet-based postage solutions. Our core service allows customers to buy and print United States Postal Service ("US Postal Service" or "USPS") approved postage using any PC, an ordinary inkjet or laser printer, and an internet connection. Customers use our service to mail and ship a variety of mail pieces including postcards, envelopes, flats and packages, and using a wide range of USPS mail classes including First Class Mail®, Priority Mail®, Express Mail®, Media Mail®, Parcel Post®, and others. Our customers include home businesses, small businesses, corporations and individuals. In 1999, Stamps.com became the first ever USPS-licensed vendor to offer PC Postage® in a software-only business model in 1999. On August 10, 2004, we publicly launched a market test of PhotoStamps®, a new form of postage that allows consumers to turn digital photos, designs or images into valid US postage. We completed the first market test on September 30, 2004 and launched a second market test of PhotoStamps on May 17, 2005. Throughout this document and in general when we refer to our core business, we mean the PC Postage business which excludes only the PhotoStamps business.

Stamps.com Inc. (the "Company" or "Stamps.com") was founded in September 1996 to investigate the feasibility of entering into the US Postal Service's Information-Based Indicia Program and to initiate the certification process for our PC Postage service. In January 1998, we were incorporated in Delaware as StampMaster, Inc. and we changed our name to Stamps.com Inc. in December 1998. We completed our initial public offering in June 1999, and our common stock is listed on the Nasdaq stock market under the symbol "STMP."

Our principal executive offices are located at 12959 Coral Tree Place, Los Angeles, California, 90066, and our telephone number is (310) 482-5800.

Our Services and Products

We offer or have offered the following products and services to our customers:

PC Postage Service

Our U.S. Postal Service-approved PC Postage service enables users to print information-based indicia, or electronic stamps, directly onto envelopes, plain paper, or labels using ordinary laser or inkjet printers. Our service currently supports USPS classes including First-Class Mail®, Priority Mail®, Express Mail®, Parcel Post®, Media Mail® and Bound Printed Matter. Customers can also add USPS Special Services such as Delivery Confirmation™, Signature Confirmation™, Registered Mail, Certified Mail, Insured Mail, Return Receipt, Collect on Delivery and Restricted Delivery to their mail pieces. Our service requires only a standard PC, printer and Internet connection. Our free software can be downloaded from the Internet or installed from a CD-ROM. After installing the software and completing a registration process, customers can purchase and print postage 24 hours a day, seven days a week. When a customer purchases postage for use through our service, the customer pays face value, and the funds are transferred directly from the customer's account to the US Postal Service's account. The majority of new customers currently signing up for our service pay a monthly convenience fee of \$15.99. Our current customer mix includes monthly convenience fees ranging from \$4.49 to \$24.99 or more based on individual pricing and promotions.

Stamps.com offers its customers three primary ways to print PC Postage. First, our NetStamps® feature enables customers to print postage for any value or any class of mail or package on NetStamps labels. After they are printed, NetStamps can be used just like regular stamps. Second, our shipping feature tab allows customers to print postage for packages on plain 8.5" x 11" paper or on special labels, and to add electronic Delivery or Signature Confirmation at discounted prices. Third, our mailing feature tab is typically used to print the postage and address directly on envelopes or on other types of mail or labels, in a single-step process that saves time and provides a professional look. Our PC Postage services also incorporate address verification technology that verifies each destination address for mail sent using our service against a database of all known addresses in the U.S. In addition, our PC Postage services have been designed to integrate into common small business and productivity software applications such as word processing, contact and address management, and accounting and financial applications.

PhotoStamps®

On May 17, 2005, we publicly launched our second market test of PhotoStamps, a new, patented form of postage that allows consumers to turn digital photos, designs or images into valid U.S. postage. For the first time ever, people can create customized U.S. postage using pictures of their children, pets, vacations, celebrations and more. PhotoStamps is used as regular postage to send letters, postcards or packages. The product is available via our separate website at www.photostamps.com. Customers upload a digital photograph or image file, customize the look and feel by choosing one of ten different border colors to compliment the photos, select the value of postage, and place the order online. Each sheet includes twenty individual PhotoStamps, and orders arrive via US Mail in a few business days.

Since the beginning of the second market test, PhotoStamps has been prominently featured in the national media: for example, in its December 19, 2005 issue, BusinessWeek named PhotoStamps one of the best products of 2005. From May 2005 to March 2006, we shipped approximately 740,000 PhotoStamps sheets, or more than 14.5 million individual PhotoStamps.

We are currently authorized to sell PhotoStamps under the one year phase II market test that began May 17, 2005 and goes through May 16, 2006. We currently expect a new phase for the USPS Customized Postage program to begin prior to the end of phase II of the market test. Beginning with this new phase, the U.S. Postal Service is expected to lift the restriction on business advertising on Customized Postage, which has been in place since the second market test began in May 2005.

Supplies Store

With the launch of NetStamps in July 2002, we began selling NetStamps labels directly to our customers via our Supplies Store (previously also referred to as our "Online Store") which is accessible by our customers from within our PC Postage software. Our Supplies Store has since expanded to sell themed NetStamps labels, shipping labels, other mailing labels, dedicated postage printers, OEM and private label inkjet and laser toner cartridges, scales, and other mailing and shipping-focused office supplies. We plan to continue to increase the breadth of products offered in our Supplies Store, in order to enhance customer convenience.

Branded Insurance

We offer Stamps.com branded insurance to our users so that they may insure their mail or packages in a fully integrated, online process that eliminates any trips to the post office or the need to complete any special forms. We also offer official US Postal Service insurance alongside our branded insurance product. Our insurance is provided in partnership with Parcel Insurance Plan and is underwritten by Fireman's Fund.

Recent Developments

On April 19, 2006, Stamps.com and the plaintiffs settled the VCode Holdings, Inc. and VData LLC lawsuit initiated against Stamps.com on December 30, 2004. Under the terms of the settlement, Stamps.com will pay the plaintiffs an immaterial amount of cash for a license to the patents involved in the lawsuit.

Critical Accounting Policies

General. The discussion and analysis of our financial condition and results of operations are based on our Company's financial statements which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to patents, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our financial statements.

Revenue Recognition. We recognize revenue from product sales or services rendered when the following four revenue recognition criteria are met: persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the selling price is fixed or determinable, and collectibility is reasonably assured.

Service revenue is based on monthly convenience fees and is recognized in the period that services are provided. Product sales, net of return allowances, are recorded when the products are shipped and title passes to customers. Items, including PhotoStamps, sold to customers are made pursuant to a sales contract that provides for transfer of both title and risk of loss upon our delivery to the carrier. Return allowances, which reduce product revenue by our best estimate of expected product returns, are estimated using historical experience. Licensing revenue is recognized ratably over the contract period. Commissions from the advertising or sale of products by a third party vendor to our customer base are recognized when the revenue is earned and collection is deemed probable.

Customers who purchase postage for use through our NetStamps, shipping label or mailing features, pay face value, and the funds are transferred directly from the customers to the US Postal Service. No revenue is recognized for this postage as it is purchased by our customers directly from the US Postal Service.

PhotoStamps revenue includes the price of postage and is made pursuant to a sales contract that provides for transfer of both title and risk of loss upon our delivery to the carrier.

On a limited basis, we allow third parties to offer products and promotions to the Stamps.com customer base. These arrangements generally provide payment in the form of a flat fee or revenue sharing arrangements where we receive payment upon customers accessing third party products and services. Total revenue from such advertising arrangements is currently immaterial.

We provide our customers with the opportunity to purchase parcel insurance directly through the Stamps.com software. The insurance information is communicated directly to Parcel Insurance Plan for processing. The insurance is underwritten by Fireman's Fund. We recognize revenue from our insurance offerings based on the shipment date of the item insured.

Licensing revenue for the use of our software and intellectual property is recognized when the following four revenue recognition criteria are met: persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the selling price is fixed or determinable, and collectibility is reasonably assured.

Advertising Costs. We expense the costs of producing advertisements as incurred, and expense the costs of communicating and placing the advertising in the period in which the advertising space or airtime is used.

Internet Advertising. We recognize expense based on the specifics of the individual agreements. Under partner and affiliate agreements, third parties refer prospects to our web site and we pay the third parties when the customer completes the customer registration process, completes the first purchase or in some cases, upon the first successful billing of a customer. We record these expenses on a monthly basis as prospects are successfully converted to customers.

Intangibles. We make an assessment of the estimated useful lives of our patents and other amortizable intangibles. These estimates are made using various assumptions that are subjective in nature and could change as economic and competitive conditions change. If events were to occur that would cause our assumptions to change, the amounts recorded as amortization would be adjusted.

Contingencies and Litigation. We are involved in various litigation matters as a claimant and as a defendant. We record any amounts recovered in these matters when collection is certain. We record liabilities for claims against us when the losses are probable and estimatable. Any amounts recorded would be based on reviews by outside counsel, in-house counsel and management. Actual results may differ from estimates.

Section 382 Update

Under Internal Revenue Code Section 382 rules, a change in ownership can occur whenever there is a shift in ownership by more than 50 percentage points by one or more five-percent shareholders within a three-year period. When a change of ownership is triggered, our net operating loss ("NOL" or "NOLs") asset may be impaired. We estimate that, as of March 31, 2006 we are approximately at 25% compared with the 50% level that would trigger impairment of our NOL asset. As part of our ongoing program to preserve future use of our NOL assets, *Stamps.com requests that all of our current stockholders and prospective investors contact us prior to allowing their ownership interest to reach a five-percent level.*

Results of Operations

During the first quarter of 2006, we experienced continued revenue growth in our core PC Postage business and PhotoStamps sales continued to be strong despite the expected first quarter seasonal slowdown following the holiday season. Our total revenue during the first quarter of 2006 was \$20.5 million, compared to \$11.8 million during the comparable period in 2005. Total postage printed using our service during the first quarter of 2006 was up 27% compared to the first quarter of 2005. Gross customer acquisition was approximately 99,000 during the first quarter of 2006, up from approximately 77,000 during the first quarter of 2005.

The following table sets forth our results of operation as a percentage of total revenue for the periods indicated:

	Three Months ended	
	2006	March 31, 2005
Revenues		
Service	66%	77%
PhotoStamps	19%	—
Product and other	15%	23%
Total revenues	100%	100%
Cost of revenues		
Service	13%	21%
PhotoStamps	12%	—
Product and other	4%	6%
Total cost of revenues	29%	27%
Gross profit	71%	73%
Operating expenses:		
Sales and marketing	33%	31%
Research and development	11%	13%
General and administrative	15%	20%
Total operating expenses	59%	64%
Income from operations	12%	9%
Other income, net	5%	5%
Income before income taxes	17%	14%
Provision for income taxes	0%	0%
Net income	17%	14%

Revenue. Revenue was derived primarily from three sources: (1) service fees charged to customers for use of our PC Postage service; (2) PhotoStamps revenue from the sale of PhotoStamps; and (3) product sales and other revenue, consisting of Supplies Store revenue from the direct sale of consumables and supplies, advertising revenue from controlled access advertising to our existing customer base, insurance revenue from our branded insurance offering, and licensing revenue. Revenue increased from \$11.8 million in first quarter 2005 to \$20.5 million in first quarter 2006, an increase of 74%.

Service fee revenue increased from \$9.1 million in the first quarter of 2005 to \$13.5 million in the first quarter of 2006, an increase of 48%. The increase in service fee revenue is primarily due to the growth of our customer base and the migration of our existing customers from our Simple Plan price point of \$4.49 per month to the Power/Pro Plan at \$15.99 per month and the Premier Plan at higher price points, resulting in higher service fee revenue per customer. During the first quarter of 2006, we successfully billed approximately 324,000 unique customers as compared to approximately 291,000 successfully billed in the first quarter of 2005. Average subscription revenue per successfully billed customer was approximately \$39 and \$52 during the first quarter of 2005 and 2006, respectively. As a percentage of total revenue, service fee revenue decreased eleven percentage points from 77% in the first quarter of 2005 to 66% in the first quarter of 2006. The decrease in service fee revenue as a percentage of total revenue is attributable to the increase in revenue from our PhotoStamps product which was not available for sale in the first quarter of 2005. As a percentage of revenue, service fee revenue may decline over future periods if the USPS allows us to continue to sell PhotoStamps beyond the May 2006 end of our second test period.

PhotoStamps revenue was approximately \$3.9 million for the first quarter of 2006. We had no PhotoStamps revenue during the first quarter of 2005 as the second market test had not yet been launched. PhotoStamps revenue as a percentage of total revenue was 19% for the first quarter of 2006. In April 2005, we received authorization from the US Postal Service for a second year-long market test that began on May 17, 2005. We expect PhotoStamps revenue to grow in future periods as we expand our sales of PhotoStamps in the next phase of the program, and if so permitted by the USPS, beyond that period..

Product sales and other revenue increased from \$2.7 million in the first quarter of 2005 to \$3.2 million in the first quarter of 2006, an increase of 20%. The increase is primarily due to the expansion of our consumable and supplies sales through our Supplies Store and enhanced insurance sales as a result of our continued effort to market these offerings to our existing customers. As a percentage of total revenue, product sales and other revenue decreased eight percentage points from 23% in the first quarter of 2005 to 15% in the first quarter of 2006 as a result of a greater increase in revenue from service fees and the existence of revenue from PhotoStamps. We expect product sales and other revenue to continue to increase on an absolute basis as we add additional SKUs to our Supplies Store, and as we continue to market the use of our insurance offering to our existing and new customers.

Cost of Revenue. Cost of revenue principally consists of the cost of customer service, certain promotional expenses, system operating costs, credit card processing fees, the cost of postage for PhotoStamps, image review, printing and fulfillment costs for PhotoStamps, parcel insurance offering costs, customer misprints and products sold through our Supplies Store and the related costs of shipping and handling. Cost of revenue increased from \$3.1 million in the first quarter of 2005 to \$5.9 million in the first quarter of 2006, an increase of 89%. As a percentage of total revenue, cost of revenue increased two percentage points from 27% in the first quarter of 2005 to 29% in the first quarter of 2006.

Cost of service revenue increased from \$2.5 million in the first quarter of 2005 to \$2.6 million in the first quarter of 2006, an increase of 4%. This increase is primarily due to the increase in customer support costs and credit card fees offset by the decrease in promotional expense. Additionally, included in cost of service revenue for the first quarter of 2006 is approximately \$99,000 of stock-based employee compensation expense related to our adoption of the new accounting pronouncement effective on January 1, 2006. As a percentage of total revenue, cost of service revenue decreased eight percentage points from 21% in the first quarter of 2005 to 13% in the first quarter of 2006. The decrease in cost of service as a percentage of total revenue is primarily due to the increase in PhotoStamps revenue.

The decrease in promotional expense is attributable to the decrease in the redemption rate of our promotional offerings as well as a reduced carrying cost of promotional items. Promotional expenses are primarily incurred as customers are acquired and thereby may not correlate directly with changes in revenue. Promotional expense includes free postage and a free digital scale offered to new customers, and was approximately \$691,000 and \$723,000 in the first quarter of 2006 and 2005, respectively. Promotional expense, which represents a material portion of total cost of service revenue, is expensed in the period in which a customer is acquired. However, the revenue associated with the acquired customer is earned over the customer's lifetime. Therefore, promotional expense for newly acquired customers may be higher than the revenue earned from those customers in that period.

Cost of PhotoStamps revenue was approximately \$2.4 million for the first quarter of 2006. Of this amount, stock-based employee compensation expense related to our adoption of the new accounting pronouncement effective on January 1, 2006 was approximately \$19,000. We had no cost of PhotoStamps revenue during the first quarter of 2005 as we had not yet launched our second market test. Cost of PhotoStamps revenue as a percentage of total revenue was 12% for the first quarter of 2006. In April 2005, we received authorization from the US Postal Service for a second year-long market test that began on May 17, 2005. We expect cost of PhotoStamps revenue to grow in future periods as we expand our sales of PhotoStamps.

Cost of product sales and other revenue increased from \$659,000 in the first quarter of 2005 to \$896,000 in the first quarter of 2006, an increase of 40%. The increase in cost of product sales and other revenue is primarily due to the increased revenue from sale of products offered through our Supplies Store. As a percentage of total revenue, cost of product sales and other revenue decreased two percentage points from 6% in the first quarter of 2005 to 4% in the first quarter of 2006. We expect the cost of product sales and other revenue to continue to increase in future periods which is consistent with the aforementioned expectation that product sales and other revenue will also increase in future periods.

Sales and Marketing. Sales and marketing expense principally consists of costs associated with strategic partnership relationships, advertising, and compensation and related expenses for personnel engaged in sales, marketing, and business development activities. Sales and marketing expense increased from \$3.7 million in the first quarter of 2005 to \$6.8 million in the first quarter of 2006, an increase of 84%. The increase in sales and marketing expense is primarily due to the increase in various marketing program expenditures relating to the acquisition of customers for our core business and for PhotoStamps. Ongoing marketing programs include the following: traditional advertising, partnerships, customer referral programs, customer remarketing efforts, telemarketing, direct mail, and online advertising. Additionally, included in sales and marketing expense for the first quarter of 2006 is approximately \$105,000 of stock-based employee compensation expense related to our adoption of the new accounting pronouncement effective on January 1, 2006. We did not incur a similar charge in the first quarter of 2005. As a percentage of total revenue, sales and marketing expense was 31% and 33% in first quarter of 2005 and 2006, respectively. We currently expect sales and marketing expenses to increase in fiscal 2006 as compared to fiscal 2005 as we increase our marketing activity and customer acquisition.

Research and Development. Research and development expense principally consists of compensation for personnel involved in the development of our services and expenditures for consulting services and third party software. Research and development expense increased from \$1.5 million in the first quarter of 2005 to \$2.3 million in the first quarter of 2006, an increase of 55%. This increase is primarily due to the increase in salary, software maintenance, and depreciation expense. Additionally, included in research and development expense for the first quarter of 2006 is approximately \$303,000 of stock-based employee compensation expense related to our adoption of the new accounting pronouncement effective on January 1, 2006. We did not incur a similar charge in the first quarter of 2005. As a percentage of total revenue, research and development expense was 13% and 11% in first quarter of 2005 and 2006, respectively. We currently expect research and development expense to increase in fiscal 2006 as compared to fiscal 2005 as we expect to continue to increase our investment in our technology.

General and Administrative. General and administrative expense principally consist of compensation and related costs for executive and administrative personnel, fees for legal and other professional services, depreciation of equipment and software used for general corporate purposes and amortization of intangible assets. General and administrative expense increased from \$2.4 million in the first quarter of 2005 to \$3.2 million in first quarter of 2006, an increase of 32%. The increase in general and administrative expense is primarily due to the increase in legal fee expense. Additionally, included in general and administrative expense for the first quarter of 2006 is approximately \$268,000 of stock-based employee compensation expense related to our adoption of the new accounting pronouncement effective on January 1, 2006. We did not incur a similar charge in the first quarter of 2005. As a percentage of total revenue, general and administrative decreased from 20% in the first quarter of 2005 to 15% in first quarter of 2006, a decrease of five percentage points. The decrease in general and administrative expense as a percentage of total revenue is primarily due to the growth of total revenue. We currently expect general and administrative expenses to increase in fiscal 2006 as compared to fiscal 2005, but decrease as a percentage of total revenue.

Other Income, Net. Other income, net consists of interest income from cash equivalents and short-term and long-term investments. Other income, net increased from \$551,000 in the first quarter of 2005 to \$1.1 million in the first quarter of 2006, an increase of 96%. The increase is due to the increase in interest rates and invested balance as we continue to achieve profitability. As a percentage of total revenue, other income, net was 5% for each of the first quarter of 2005 and 2006, respectively. We currently expect other income to increase in fiscal 2006 as compared to fiscal 2005 due to increased invested balances.

Liquidity and Capital Resources

As of March 31, 2006 and 2005 we had approximately \$114 million and \$89 million, respectively, in cash, restricted cash and short-term and long-term investments. We invest available funds in short and long-term money market funds, commercial paper, corporate notes and municipal securities and do not engage in hedging or speculative activities.

In November 2003, we entered into a facility lease agreement commencing in March 2004 for our new corporate headquarters with aggregate lease payments of approximately \$4 million through February 2010.

The following table is a schedule of our contractual obligations and commercial commitments which is comprised of the future minimum lease payments under operating leases at March 31, 2006 (in thousands):

Operating

Nine months ending December 31,	
2006	\$ 477
Years ending December 31:	
2007	694
2008	751
2009	794
2010	134
Thereafter	---
	\$ 2,850

Net cash provided by operating activities was \$5.0 million and \$1.1 million in the first quarter of 2006 and 2005, respectively. The increase in net cash provided by operating activities resulted primarily from the increase in revenue and expanding gross margin and operating cash flow.

Net cash used in investing activities was \$8.2 million and \$2.6 million in the first quarter of 2006 and 2005, respectively. The increase in net cash used in investing activities resulted primarily from the additional purchase of investments as a result of the Company's profitability.

Net cash provided by financing activities was \$5.3 million and \$891,000 in the first quarter of 2006 and 2005, respectively. The increase in net cash provided by financing activities resulted primarily from the exercise of stock options by our employees.

We believe our available cash and marketable securities, together with the cash flow from operations will be sufficient to fund our business for the foreseeable future.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market rate risk for changes in interest rates relates primarily to our investment portfolio. We have not used derivative financial instruments in our investment portfolio. Our cash equivalents and investments are comprised of Money Market, U.S. government obligations and public corporate debt securities with weighted average maturities of 357 days at March 31, 2006. Our cash equivalents and investments, net of restricted cash, approximated \$113 million and had a related weighted average interest rate of approximately 4.20%. Interest rate fluctuations impact the carrying value of the portfolio. We do not believe that the future market risks related to the above securities will have a material adverse impact on our financial position, results of operations or liquidity.

ITEM 4. CONTROLS AND PROCEDURES*Evaluation of Disclosure Controls and Procedures*

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Based on the foregoing, our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that our disclosure controls and procedures were effective and adequate to ensure that material information and other information requiring disclosure is identified and communicated on a timely basis.

Changes in Internal Controls

There have been no changes in our internal controls over financial reporting or in other factors during the period covered by this report that has affected or could affect these controls subsequent to the date of their evaluation.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On October 22, 2004, Kara Technology Incorporated filed suit against us in the United States District Court for the Southern District of New York, alleging, among other claims, that Stamps.com infringed certain Kara Technology patents and that Stamps.com misappropriated trade secrets owned by Kara Technology, most particularly with respect to our NetStamps feature. Kara Technology seeks an injunction, unspecified damages, and attorneys' fees. On February 9, 2005, the court granted our motion to transfer this suit to the United States District Court for the Central District of California. The court has scheduled a "Markman" hearing to construe the terms of the Kara Technology patents for August 21, 2006, and has scheduled a trial commencement date of January 9, 2007. We dispute Kara Technology's claims and intend to defend the lawsuit vigorously.

On October 25, 2004, VCode Holdings, Inc. and VData LLC filed suit against Adidas Salomon AG in the United States District Court for the District of Minnesota, alleging infringement of U.S. Patent No. 5,612,524 ("the '524 patent"), which allegedly covers use of data matrices. The complaint sought an injunction, unspecified damages, and attorneys' fees. On or about December 30, 2004, the plaintiffs filed a First Amended Complaint against us, as well as Adidas Salomon AG, Adidas America, Inc., Advanced Micro Devices, Inc., Boston Scientific Corp. and Hitachi Global Storage Technologies (Thailand), Ltd., alleging infringement of the '524 patent. On July 25, 2005, the Court granted the plaintiffs' motion to file a Second Amended Complaint adding Hitachi Global Storage Technologies, Inc. as a defendant. Each of our co-defendants has settled for undisclosed terms. On April 19, 2006, Stamps.com and the plaintiffs settled. Under the terms of the settlement, Stamps.com paid the plaintiffs an immaterial amount of cash for a license to the patents involved in the lawsuit.

In May and June 2001, we were named, together with certain of our current and former board members and/or officers, as a defendant in 11 purported class-action lawsuits, filed in the United States District Court for the Southern District of New York. The lawsuits allege violations of the Securities Act of 1933 and the Securities Exchange Act of 1934 in connection with our initial public offering and secondary offering of our common stock. The lawsuits also name as defendants the principal underwriters in connection with our initial and secondary public offerings, including Goldman, Sachs & Co. (in some of the lawsuits sued as The Goldman Sachs Group Inc.) and BancBoston Robertson Stephens, Inc. The lawsuits allege that the underwriters engaged in improper commission practices and stock price manipulations in connection with the sale of our common stock. The lawsuits also allege that we and/or certain of our officers or directors knew of or recklessly disregarded these practices by the underwriter defendants, and failed to disclose them in our public filings. Plaintiffs seek damages and statutory compensation, including prejudgment and post-judgment interest, costs and expenses (including attorneys' fees), and rescissory damages. In April 2002, plaintiffs filed a consolidated amended class action complaint against us and certain of our current and former board members and/or officers. The consolidated amended class action complaint includes similar allegations to those described above and seeks similar relief. In July 2002, we moved to dismiss the consolidated amended class action complaint. In October 2002, pursuant to a stipulation and tolling agreement with plaintiffs, our current and former board members and/or officers were dismissed without prejudice. In February 2003, the court denied our motion to dismiss the consolidated amended class action complaint. In June 2003, we approved a proposed Memorandum of Understanding among the plaintiffs, issuers and insurers as to terms for a settlement of the litigation against us which was further documented in a Stipulation and Agreement of Settlement filed with the court. The proposed settlement terms would not require Stamps.com to make any payments. The proposed settlement was preliminarily approved by the court in February 2005, was the subject of fairness hearing in April 2006, but remains subject to final approval by the court which has not yet occurred.

In addition to the class action lawsuits against us, over 1,000 similar lawsuits have also been brought against over 250 companies which issued stock to the public in 1998, 1999, and 2000, and their underwriters. These lawsuits (including

those naming us) followed publicized reports that the Securities and Exchange Commission was investigating the practice of certain underwriters in connection with initial public offerings. All of these lawsuits have been consolidated for pretrial purposes before United States District Court Judge Shira Scheindlin of the Southern District of New York. We have placed our underwriters on notice of our rights to indemnification, pursuant to our agreements with the underwriters, but under the terms of the proposed settlement, we cannot assert these claims except as a defense to a claim against us by the underwriters. We have also provided notice to our directors' and officers' insurers who have agreed to fund the proposed settlement. If the proposed settlement does not receive final approval or is not consummated for any reason, we intend to defend the lawsuits vigorously because we believe that the claims against us and our officers and directors are without merit.

We are not currently involved in any other material legal proceedings, nor are we aware of any other material legal proceedings pending against us.

ITEM 1A. RISK FACTORS

You should carefully consider the following risks and the other information in this Report and our other filings with the SEC before you decide to invest in our company or to maintain or increase your investment. The risks and uncertainties described below are not the only ones facing Stamps.com. Additional risks and uncertainties may also adversely impact and impair our business. If any of the following risks actually occur, our business, results of operations or financial condition would likely suffer. In that case, the trading price of our common stock could decline, and you may lose all or part of your investment.

This Report contains forward-looking statements based on the current expectations, assumptions, estimates and projections about Stamps.com and the Internet. These forward-looking statements involve risks and uncertainties. Our actual results could differ materially from those discussed in these forward-looking statements as a result of many factors, including those described in this section and elsewhere in this Report. Stamps.com does not undertake to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur in the future.

Risks Related to Our Business

We may not successfully implement strategies to increase the adoption of our services and products which would limit our growth, adversely affect our business and cause the price of our common stock to decline.

Our continuing profitability depends on our ability to successfully implement our strategy of increasing the adoption of our services and products. Factors that might cause our revenues, margins and operating results to fluctuate include the factors described in the subheadings below as well as:

- The costs of our marketing programs to establish and promote the Stamps.com brands;
- The demand for our services and products;
- Our ability to develop and maintain strategic distribution relationships;
- The number, timing and significance of new products or services introduced by us and by our competitors;
- Our ability to develop, market and introduce new and enhanced products and services on a timely basis;
- The level of service and price competition;
- Our operating expenses;
- US Postal Service regulation and policies relating to PC Postage and PhotoStamps; and
- General economic factors.

We have a history of losses and we may incur losses in the future which may reduce the trading price of our common stock.

Though we realized net income of \$3.4 million and \$1.6 million for the three months ended March 31, 2006 and 2005 respectively, we have experienced significant net losses since our inception and we may experience net losses in the future. Although we achieved profitability during fiscal year 2005, we cannot be certain that we will be able to sustain or increase such profitability in the future.

We implemented pricing plans that may adversely affect our future revenues and margins.

Our ability to generate gross margins depends upon the ability to generate significant revenues from a large base of active customers. In order to attract customers in the future, we may run special promotions and offers such as free trials, discounts on fees, postage and supplies, and other promotions. We cannot be sure that customers will be receptive to future fee structures and special promotions that we may implement. Even though we have established a sizeable base of users, we still may not generate sufficient gross margins to remain profitable. In addition, our ability to generate revenues or sustain profitability could be adversely affected by the special promotions or additional changes to our pricing plans.

If we do not successfully attract and retain skilled personnel for permanent management and other key personnel positions, we may not be able to effectively implement our business plan.

Our success depends largely on the skills, experience and performance of the members of our senior management and other key personnel. Any of the individuals can terminate his or her employment with us at any time. If we lose key employees and are unable to replace them with qualified individuals, our business and operating results could be seriously harmed. In addition, our future success will depend largely on our ability to continue attracting and retaining highly skilled personnel. As a result, we may be unable to successfully attract, assimilate or retain qualified personnel. Further, we may be unable to retain the employees we currently employ or attract additional qualified personnel to replace those key employees that may depart. The failure to attract and retain the necessary personnel could seriously harm our business, financial condition and results of operations.

The success of our business will depend upon the continued acceptance by customers of our service.

We must minimize the rate of loss of existing customers while adding new customers. Customers cancel their subscription to our service for many reasons, including a perception that they do not use the service sufficiently that the costs for service are too high, because they are going out of business, or other issues that are not satisfactorily resolved. We must continually add new customers both to replace customers who cancel and to continue to grow our business beyond our current customer base. If too many of our customers cancel our service, or if we are unable to attract new customers in numbers sufficient to grow our business, our operating results will be adversely affected. Further, if excessive numbers of customers cancel our service, we may be required to incur significantly higher marketing expenditures than we currently anticipate to replace these customers with new customers.

If we fail to effectively market and sell our services and products, our business will be substantially harmed and could fail.

In order to acquire customers and achieve widespread distribution and use of our services and products, we must develop and execute cost-effective marketing campaigns and sales programs. We currently rely on a combination of marketing techniques to attract new customers including direct mail, online marketing and business partnerships. We may be unable to continue marketing our services and products in a cost-effective manner. If we fail to acquire customers in a cost-effective manner, our results of operations will be adversely affected.

If we fail to meet the demands of our customers, our business will be substantially harmed and could fail.

Our services and products must meet the commercial demands of our customers, which include home businesses, small businesses, corporations and individuals. We cannot be sure that our services will appeal to or be adopted by an ever-growing range of customers. If we are unable to ship products such as items from our Supplies Store or PhotoStamps in a timely manner to our customers, our business may be harmed. Moreover, our ability to obtain and retain customers depends, in part, on our customer service capabilities. If we are unable at any time to address customer service issues adequately or to provide a satisfactory customer experience for current or potential customers,

our business and reputation may be harmed. If we fail to meet the demands of our customers our results of operations will be adversely affected.

A failure to further develop and upgrade our services and products could adversely affect our business.

Any delays or failures in developing our services and products, including upgrades of current services and products, may have a harmful impact on our results of operations. The need to extend our core technologies into new features and services and to anticipate or respond to technological changes could affect our ability to develop these services and features. Delays in features or upgrade introductions could cause a decline in our revenue, earnings or stock price. We cannot determine the ultimate effect these delays or the introduction of new features or upgrades will have on our revenue or results of operations.

Third party assertions of violations of their intellectual property rights could adversely affect our business.

Substantial litigation regarding intellectual property rights exists in our industry. Third parties may currently have, or may eventually be issued, patents upon which our products or technology infringe. Any of these third parties might make a claim of infringement against us. We may become aware of, or we may increasingly receive correspondence claiming, potential infringement of other parties' intellectual property rights. We are currently a defendant in two such cases filed in the fourth quarter of 2004. We could incur significant costs and diversion of management time and resources to defend claims against us regardless of their validity. Any associated costs and distractions could have a material adverse effect on our business, financial condition and results of operations. In addition, litigation in which we are accused of infringement might cause product development delays, require us to develop non-infringing technology or require us to enter into royalty or license agreements, which might not be available on acceptable terms, or at all. If a successful claim of infringement were made against us and we could not develop non-infringing technology or license the infringed or similar technology on a timely and cost-effective basis, our business could be significantly harmed or fail. Any loss resulting from intellectual property litigation could severely limit our operations, cause us to pay license fees, or prevent us from doing business.

A failure to protect our own intellectual property could harm our competitive position.

We rely on a combination of patent, trade secret, copyright and trademark laws and contractual restrictions, such as confidentiality agreements and licenses, to establish and protect our rights in our products, services, know-how and information. We have 54 issued US patents, 78 pending US patent applications, 12 international patents and 20 pending international patent applications. We also have a number of registered and unregistered trademarks. We plan to apply for more patents in the future. We may not receive patents for any of our patent applications. Even if patents are issued to us, claims issued in these patents may not protect our technology. In addition, a court might hold any of our patents, trademarks or service marks invalid or unenforceable. Even if our patents are upheld or are not challenged, third parties may develop alternative technologies or products without infringing our patents. If our patents fail to protect our technology or our trademarks and service marks are successfully challenged, our competitive position could be harmed. We also generally enter into confidentiality agreements with our employees, consultants and other third parties to control and limit access and disclosure of our confidential information. These contractual arrangements or other steps taken to protect our intellectual property may not prove to be sufficient to prevent misappropriation of technology or deter independent third party development of similar technologies. Additionally, the laws of foreign countries may not protect our services or intellectual property rights to the same extent as do the laws of the United States.

System and online security failures could harm our business and operating results.

Our services depend on the efficient and uninterrupted operation of our computer and communications hardware systems. In addition, we must provide a high level of security for the transactions we execute. We rely on internally-developed and third-party technology to provide secure transmission of postage and other confidential information. Any breach of these security measures would severely impact our business and reputation and would likely result in the loss of customers. Furthermore, if we are unable to provide adequate security, the US Postal Service could prohibit us from selling postage over the Internet.

Our systems and operations are vulnerable to damage or interruption from a number of sources, including fire, flood, power loss, telecommunications failure, break-ins, earthquakes and similar events. Our Internet host provider does not guarantee that our Internet access will be uninterrupted, error-free or secure. Our servers are also vulnerable to computer viruses, physical, electrical or electronic break-ins and similar disruptions. We have experienced minor system interruptions in the past and may experience them again in the future. Any substantial interruptions in the future could result in the loss of data and could completely impair our ability to generate revenues from our service. We do not presently have a full disaster recovery plan in effect to cover the loss of facilities and equipment. In

addition, we do not have a fail-over site that mirrors our infrastructure to allow us to operate from a second location. We have business interruption insurance; however, we cannot be certain that our coverage will be sufficient to compensate us for losses that may occur as a result of business interruptions.

A significant barrier to electronic commerce and communications is the secure transmission of confidential information over public networks. Anyone who is able to circumvent our security measures could misappropriate confidential information or cause interruptions in our operations. We may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by any breach. We rely on specialized technology from within our own infrastructure to provide the security necessary for secure transmission of postage and other confidential information. Advances in computer capabilities, new discoveries in security technology, or other events or developments may result in a compromise or breach of the algorithms we use to protect customer transaction data. Should someone circumvent our security measures, our reputation, business, financial condition and results of operations could be seriously harmed. Security breaches could also expose us to a risk of loss or litigation and possible liability for failing to secure confidential customer information. As a result, we may be required to expend a significant amount of financial and other resources to protect against security breaches or to alleviate any problems that they may cause.

Risks Related to Our Industry

US Postal Service regulations or fee assessments may cause disruptions or discontinuance of our business.

We are subject to continued US Postal Service scrutiny and other government regulations. The availability of our services is dependent upon our service continuing to meet US Postal Service performance specifications and regulations. The US Postal Service could change its certification requirements or specifications for PC Postage or revoke or suspend the approval of one or more of our services at any time. If at any time our service fails to meet US Postal Service requirements, we may be prohibited from offering this service and our business would be severely and negatively impacted. In addition, the US Postal Service could suspend or terminate our approval or offer services which compete against us, any of which could stop or negatively impact the commercial adoption of our service. Any changes in requirements or specifications for PC Postage could adversely affect our pricing, cost of revenues, operating results and margins by increasing the cost of providing our service.

The US Postal Service could also decide that PC Postage should no longer be an approved postage service due to security concerns or other issues. Our business would suffer dramatically if we are unable to adapt our services to any new requirements or specifications or if the US Postal Service were to discontinue PC Postage as an approved postage method. Alternatively, the US Postal Service could introduce competitive programs or amend PC Postage requirements to make certification easier to obtain, which could lead to more competition from third parties or the US Postal Service itself. If we are unable to compete successfully, particularly against large, traditional providers of postage products like Pitney Bowes who enter the online postage market, our revenues and operating results will suffer.

The US Postal Service could decide to suspend or cancel the current market test of PhotoStamps, and may do so in the event that there is sufficient cause to believe that the market test presents unacceptable risk to US Postal Service revenues, degrades the ability of the US Postal Service to process or deliver mail produced by the test participants, exposes the US Postal Service or its customers to legal liability, or causes public or political embarrassment or harm to the US Postal Service in any way. If the US Postal Service decides to suspend or cancel the market test of PhotoStamps, our revenues and operating results will likely suffer.

Additionally, the US Postal Service could decide to amend, renegotiate or terminate our credit card cost sharing agreement, which is a key agreement that governs the allocation of credit card fees paid by the US Postal Service and us for the postage purchased by our customers. If the US Postal Service decides to amend, renegotiate or terminate our credit card cost sharing agreement, our revenues and operating results will likely suffer.

In addition, US Postal Service regulations may require that our personnel with access to postal information or resources receive security clearance prior to doing relevant work. We may experience delays or disruptions if our personnel cannot receive necessary security clearances in a timely manner, if at all. The regulations may limit our ability to hire qualified personnel. For example, sensitive clearance may only be provided to US citizens or aliens who are specifically approved to work on US Postal Service projects.

If we are unable to compete successfully, particularly against large, traditional providers of postage products such as Pitney Bowes, our revenues and operating results will suffer.

The PC Postage segment of the market for postage is relatively new and is competitive. At present, Pitney Bowes and Endicia.com are authorized PC Postage providers with commercially available software and Zazzle.com offers a competitive product to PhotoStamps using Pitney Bowes technology. If any more providers become authorized, or if Pitney Bowes or Endicia.com provide enhanced offerings, our operations could be adversely impacted. We also compete with other forms of postage, including traditional postage meters provided by companies such as Pitney

Bowes, postage stamps and permit mail.

22

We may not be able to establish or maintain a competitive position against current or future competitors as they enter the market. Many of our competitors have longer operating histories, larger customer bases, greater brand recognition, greater financial, marketing, service, support, technical, intellectual property and other resources than us. As a result, our competitors may be able to devote greater resources to marketing and promotional campaigns, adopt more aggressive pricing policies and devote substantially more resources to web site and systems development than us. This increased competition may result in reduced operating margins, loss of market share and a diminished brand. We may from time to time make pricing, service or marketing decisions or acquisitions as a strategic response to changes in the competitive environment. These actions could result in reduced margins and seriously harm our business.

We could face competitive pressures from new technologies or the expansion of existing technologies approved for use by the US Postal Service. We may also face competition from a number of indirect competitors that specialize in electronic commerce and other companies with substantial customer bases in the computer and other technical fields. Additionally, companies that control access to transactions through a network or Web browsers could also promote our competitors or charge us a substantial fee for inclusion. In addition, changes in postal regulations could adversely affect our service and significantly impact our competitive position. We may be unable to compete successfully against current and future competitors, and the competitive pressures we face could seriously harm our business.

If we do not respond effectively to technological change, our services and products could become obsolete and our business will suffer.

The development of our services, products and other technology entails significant technical and business risks. To remain competitive, we must continue to enhance and improve the responsiveness, functionality and features of our online operations. The Internet and the electronic commerce industry are characterized by rapid technological change; changes in user and customer requirements and preferences; frequent new product and service introductions embodying new technologies; and the emergence of new industry standards and practices.

The evolving nature of the Internet or the postage markets could render our existing technology and systems obsolete. Our success will depend, in part, on our ability to license or acquire leading technologies useful in our business; enhance our existing services; develop new services or features and technology that address the increasingly sophisticated and varied needs of our current and prospective users; and respond to technological advances and emerging industry and regulatory standards and practices in a cost-effective and timely manner.

Future advances in technology may not be beneficial to, or compatible with, our business. Furthermore, we may not be successful in using new technologies effectively or adapting our technology and systems to user requirements or emerging industry standards on a timely basis. Our ability to remain technologically competitive may require substantial expenditures and lead time. If we are unable to adapt in a timely manner to changing market conditions or user requirements, our business, financial condition and results of operations could be seriously harmed.

Our operating results could be impaired if we or the Internet become subject to additional government regulation and legal uncertainties.

Due to the increasing popularity and use of the Internet, it is possible that a number of laws and regulations may be adopted with respect to the Internet, relating to user privacy, pricing, content, copyrights, distribution, characteristics and quality of products and services, and export controls.

The adoption of any additional laws or regulations may hinder the expansion of the Internet. A decline in the growth of the Internet could decrease demand for our products and services and increase our cost of doing business. Moreover, the applicability of existing laws to the Internet is uncertain with regard to many issues, including property ownership, export of specialized technology, sales tax, libel and personal privacy. Our business, financial condition

and results of operations could be seriously harmed by any new legislation or regulation. The application of laws and regulations from jurisdictions whose laws do not currently apply to our business, or the application of existing laws and regulations to the Internet and other online services could also harm our business.

We have employees and offer our services in multiple states, and we may in the future expand internationally. These jurisdictions may claim that we are required to qualify to do business as a foreign corporation in each state or foreign country. Our failure to qualify as a foreign corporation in a jurisdiction where we are required to do so could subject us to taxes and penalties. Other states and foreign countries may also attempt to regulate our services or prosecute us for violations of their laws. Further, we might unintentionally violate the laws of foreign jurisdictions and those laws may be modified and new laws may be enacted in the future.

Risks Related to Our Stock

Changes in stock option accounting rules will have an adverse affect on our operating results.

We use options to acquire our common stock to attract, incentivize and retain our employees in a competitive marketplace. Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for Stock-Based Compensation," allowed companies the choice of either using a fair value method of accounting for options that would result in expense recognition for all options granted, or using an intrinsic value method, as prescribed by Accounting Principles Board Opinion ("APB") No. 25, "Accounting for Stock Issued to Employees", with a pro forma disclosure of the impact on net income (loss) of using the fair value option expense recognition method. Prior to our adoption of SFAS No. 123 (revised 2004), "Share Based Payment," or Statement 123R, on January 1, 2006, we had elected to apply APB No.25 and accordingly we generally did not recognize any expense with respect to employee options to acquire our common stock in periods ended on or prior to December 31, 2005 as long as such options were granted at exercise prices equal to the fair value of our common stock on the date of grant.

In December 2004, the Financial Accounting Standards Board ("FASB") issued Statement 123R. Statement 123R requires that the compensation cost relating to share-based payment transactions be recognized in financial statements. This cost will be measured based on the fair value of the equity instruments issued. We adopted Statement 123R on January 1, 2006, which is the first day of our 2006 fiscal year. We expect the adoption of Statement 123R to have an adverse effect on our operating results, as we continue to use options to attract, incentivize and retain our employees.

The tax value of our net operating losses could be impaired if we trigger a change of control pursuant to Section 382 of the Internal Revenue Code.

Under the complicated rules of IRC Section 382, a change in ownership can occur whenever there is a shift in ownership by more than 50% by one or more five-percent shareholders within a three-year period. If a change of ownership is triggered, our NOLs may be impaired, which could harm stockholder value.

Our charter documents could deter a takeover effort, which could inhibit your ability to receive an acquisition premium for your shares.

The provisions of our certificate of incorporation, bylaws and Delaware law could make it difficult for a third party to acquire us, even if it would be beneficial to our stockholders. In addition, we are subject to the provisions of Section 203 of the Delaware General Corporation Law, which could prohibit or delay a merger or other takeover of our Company, and discourage attempts to acquire us.

The US Postal Service may object to a change of control of our common stock.

The US Postal Service may raise national security or similar concerns to prevent foreign persons from acquiring significant ownership of our common stock or of Stamps.com. The US Postal Service also has regulations regarding the change of control of approved PC Postage providers. These concerns may prohibit or delay a merger or other takeover of our Company. Our competitors may also seek to have the US Postal Service block the acquisition by a foreign person of our common stock or our Company in order to prevent the combined company from becoming a more effective competitor in the market for PC Postage.

Our stock price is volatile

The price at which our common stock has traded since our initial public offering in June 1999 has fluctuated significantly. The price may continue to be volatile due to a number of factors, including the following, some of which are beyond our control:

- variations in our operating results,
- variations between our actual operating results and the expectations of securities analysts,
- investors and the financial community,
- announcements of developments affecting our business, systems or expansion plans by us or others,
- and market volatility in general.

As a result of these and other factors, investors in our common stock may not be able to resell their shares at or above their original purchase price. In the past, securities class action litigation often has been instituted against companies following periods of volatility in the market price of their securities. This type of litigation, if directed at us, could result in substantial costs and a diversion of management's attention and resources.

Shares of our common stock held by existing stockholders may be sold into the public market, which could cause the price of our common stock to decline.

If our stockholders sell into the public market substantial amounts of our common stock purchased in private financings prior to our initial public offering, or purchased upon the exercise of stock options or warrants, or if there is a perception that these sales could occur, the market price of our common stock could decline. All of these shares are available for immediate sale, subject to the volume and other restrictions under Rule 144 of the Securities Act of 1933.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

On April 25, 2006, Stamps.com filed a report on Form 8-K, which reported earnings for the quarter ended March 31, 2006.

ITEM 6. EXHIBITS

31.1 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.3 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.

32.3 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
