The earnings release contains certain non-GAAP financial measures. A “non-GAAP financial measure” is defined as a numerical measure of a company’s financial performance that excludes or includes amounts so as to be different than the most directly comparable measure calculated and presented in accordance with GAAP in the statements of income, balance sheets or statements of cash flow of the Company. - § Fourth quarter and fiscal year gross profit by business segment, excluding restructuring items, for the current and prior year in dollars and as a percent of revenue
- § Fourth quarter and fiscal year consolidated operating income, excluding restructuring items, for the current and prior year in dollars and as a percent of revenue
- § Fourth quarter and fiscal year operating income by business segment, excluding restructuring items, for the current and prior year in dollars and as a percent of revenue.

These measures are presented because management uses this information to monitor and evaluate financial results and trends. Therefore, management believes this information is also useful for investors.

The information furnished pursuant to this Current Report on Form 8-K (including the exhibit hereto) shall not be considered “filed” under the Securities Exchange Act of 1934, as amended, nor shall it be incorporated by reference into future filings by the Company under the Securities Act of 1933, as amended, or under the Securities Exchange Act of 1934, as amended, unless the Company expressly sets forth in such future filing that such information is to be considered “filed” or incorporated by reference therein.
