Notes to Condensed Consolidated Financial Statements (Unaudited)

March 27, 2010

(In thousands, except share and per share information)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the 13-week period ended March 27, 2010 are not necessarily indicative of the results that may be expected for the year ending December 25, 2010.

The condensed consolidated balance sheet at December 26, 2009 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 26, 2009.

The Company's fiscal year is based on a 52-53 week period ending on the last Saturday of the calendar year. Therefore the financial results of certain fiscal years, and the associated 14-week quarters, will not be exactly comparable to the prior and subsequent 52-week fiscal years and the associated quarters having only 13-weeks. The quarters ended March 27, 2010 and March 28, 2009 both contain operating results for 13-weeks for both year-to-date periods.

2. Inventories

The components of inventories consist of the following:

	March 27, 2010	December 26, 2009
Raw Materials	\$ 89,124	\$ 80,963
Work-in-process	38,671	32,587
Finished goods	265,582	235,286
Inventory Reserves	(37,304)	(38,898)
Inventory, net of reserves	\$ 356,073	\$ 309,938

3. Share Repurchase Plan

The Board of Directors approved a share repurchase program on February 12, 2010, authorizing the Company to purchase up to \$300,000 of its common shares as market and business conditions warrant on the open market or in negotiated transactions in compliance with the SEC's Rule 10b-18. The share repurchase authorization expires on December 31, 2010. In the quarter ended March 27, 2010, the Company repurchased 1,437,801 shares using cash of \$47,092. There remains approximately \$252,908 available for repurchase under this authorization.

4. Earnings Per Share

The following table sets forth the computation of basic and diluted net income per share:

	13-Weeks Ended

7. Warranty Reserves

The Company's products sold are generally covered by a warranty for periods ranging from one to two years. The Company's estimate of costs to service its warranty obligations are based on historical experience and expectation of future conditions and are recorded as a liability on the balance sheet. The following reconciliation provides an illustration of changes in the aggregate warranty reserve.

	13-Weeks Ended	
	March 27, 2010	March 28, 2009
Balance - beginning of the period	\$ 87,424	\$ 87,408
Change in accrual for products sold in prior periods	(21,776)	-
Accrual for products sold during the period	14,914	23,993
Expenditures	(21,748)	(42,554)
Balance - end of the period	\$ 58,814	\$ 68,847

The 13-weeks ended March 27, 2010 include the effect of a change in estimate in the warranty reserves which decreased the accrual for the period by \$21,776.

8. Commitments

Pursuant to certain supply agreements, the Company is contractually committed to make purchases of approximately \$68,415 over the next 5 years.

9. Income Taxes

Our earnings before taxes decreased 24% when compared to the same quarter in 2009, and our income tax expense decreased by \$3,192, to \$8,194 for the 13-week period ended March 27, 2010, from \$11,386 for the 13-week period ended March 28, 2009. The effective tax rate was 18.0% in the first quarter of 2010 and 19.0% in the first quarter of 2009. The slight decrease is due to the mix of income by tax jurisdiction.

10. Fair Value Measurements

The Accounting Standards Code (ASC) defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The ASC classifies the inputs used to measure fair value into the following hierarchy:

Level 1 Unadjusted quoted prices in active markets for identical assets or liability

Level 2 Unadjusted quoted prices in active markets for similar assets or liabilities

Level 3 Unobservable inputs for the asset or liability

The Company endeavors to utilize the best available information in measuring fair value. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

For fair value measurements using significant unobservable inputs, an independent third party provided the valuation. The collateral composition was used to estimate Weighted Average Life based on historical and projected payment information. Cash flows were projected for the issuing trusts, taking into account underlying loan principal, bonds outstanding, and payout formulas. Taking this information into account, assumptions were made as to the yields likely to be required, based upon then current market conditions for comparable or similar term Asset Based Securities as well as other fixed income securities.

Assets and liabilities measured at estimated fair value on a recurring basis are summarized below:

Description	Total	Fair Value Measurements as of March 27, 2010		
		Level 1	Level 2	Level 3
Available for-sale securities	\$ 630,126	\$ 630,126	\$ -	\$ -
Failed Auction rate securities	70,558	-	-	70,558
Total	\$ 700,684	\$ 630,126	\$ -	\$ 70,558

Description	Fair Value Measurements as of December 26, 2009			
	Total	Level 1	Level 2	Level 3
Available for-sale securities	\$ 695,795	\$ 695,795	\$ -	\$ -
Failed Auction rate securities	70,252	-	-	70,252
Total	\$ 766,047	\$ 695,795	\$ -	\$ 70,252

All Level 3 investments have been in a continuous unrealized loss position for 12 months or longer. For assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the period, the ASC requires a reconciliation of the beginning and ending balances, separately for each major category of assets. The reconciliation is as follows:

Fair Value Measurements Using Significant Unobservable Inputs (Level 3) 13-Weeks Ended March 27, 2010	
Beginning balance of auction rate securities	\$ 70,252
Total unrealized gains included in other comprehensive income	856
Sales out of Level 3	(550)
Transfers in and/or out of Level 3	-
Ending balance of auction rate securities	\$ 70,558

The following is a summary of the company's marketable securities classified as available-for-sale securities at March 27, 2010:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Other Than Temporary Impairment	Estimated Fair Value (Net Carrying Amount)

	Cost	Estimated Fair Value
Due in one year or less (2010)	\$ 19,526	\$ 19,635
Due after one year through five years (2011-2015)	228,883	229,448

11. Recently Issued Accounting Pronouncements

In January 2010, the FASB issued ASU No. 2010-06, "Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"), which is included in the ASC Topic 820 (Fair Value Measurements and Disclosures). ASU 2010-06 requires new disclosures on the amount and reason for transfers in and out of Level 1 and 2 fair value measurements. ASU 2010-06 also requires disclosure of activities, including purchases, sales, issuances, and settlements within the Level 3 fair value measurements and clarifies existing disclosure requirements on levels of disaggregation and disclosures about inputs and valuation techniques. ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this standard did not have a material effect on our financial statements.

In February 2010, the FASB issued ASU No. 2010-09, "Amendments to Certain Recognition and Disclosure Requirements" ("ASU 2010-09"), which is included in the FASB Accounting Standards Codification (the "ASC") Topic 855 (Subsequent Events). ASU 2010-09 clarifies that an SEC filer is required to evaluate subsequent events through the date that the financial statements are issued. ASU 2010-09 is effective upon the issuance of the final update and did not have a significant impact on the Company's financial statements.

12. Subsequent Events

On April 28, 2010, Garmin announced a cash offer of 15 pence per share to acquire all the shares of Raymarine plc. This offer provides total consideration to Raymarine shareholders of approximately £12.5 million and implies an enterprise value of approximately £107.4 million when considering Raymarine's most recently reported net debt of £94.9 million. This offer remains subject to shareholder acceptance and regulatory approvals, but Garmin expects to obtain the necessary merger control approvals.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto included in this Form 10-Q and the audited financial statements and notes thereto in the Company's Annual Report on Form 10-K for the year ended December 26, 2009.

The Company is a leading worldwide provider of navigation, communications and information devices, most of which are enabled by Global Positioning System, or GPS, technology. We operate in four business segments, the outdoor/fitness, marine, automotive/mobile and aviation markets. Our segments offer products through our network of independent dealers and distributors. However, the nature of products and types of customers for the four segments may vary significantly. As such, the segments are managed separately.

The Company manages its operations in four segments: outdoor/fitness, marine, automotive/mobile, and aviation, and each of its segments employs the same accounting policies. Allocation of certain research and development expenses, and selling, general, and administrative expenses are made to each segment on a percent of revenue basis. The following table sets forth our results of operations (in thousands) including revenue (net sales), operating income, and income before taxes for each of our four segments during the periods shown. For each line item in the table, the total of the outdoor/fitness, marine, automotive/mobile, and aviation segments' amounts equals the amount in the condensed consolidated statements of income included in Item 1.

Comparison of 13-Weeks Ended March 27, 2010 and March 28, 2009

(Amounts included in the following discussion are stated in thousands unless otherwise indicated)

Net Sales

	13-weeks ended March 27, 2010		13-weeks ended March 28, 2009		Quarter over Quarter	
	Net Sales	% of Revenues	Net Sales	% of Revenues	\$ Change	% Change
Outdoor/Fitness	\$ 102,736	23.8%	\$ 80,004	18.3%	\$ 22,732	28.4%
Marine	41,314	9.6%	38,017	8.7%	3,297	8.7%
Automotive/Mobile	220,924	51.3%	259,586	59.5%	(38,662)	-14.9%
Aviation	66,093	15.3%	59,092	13.5%	7,001	11.8%
Total	\$ 431,067	100.0%	\$ 436,699	100.0%	\$ (5,632)	-1.3%

Net sales decreased 1.3% for the 13-week period ended March 27, 2010 when compared to the year-ago quarter. The decline was driven by a 14.9% year-over-year decline in the automotive/mobile segment. This decline was largely offset by increased revenues in outdoor/fitness, aviation and marine. Automotive/mobile revenue remains the largest portion of our revenue mix, but declined from 59.5% in the first quarter of 2009 to 51.3% in the first quarter of 2010.

Total unit sales decreased 12% to 2,137,000 in the first quarter of 2010 from 2,416,000 in the same period of 2009. The lower unit sales volume in the first quarter of fiscal 2010 was attributable to declining volumes in automotive as excess retailer inventory cleared the channel in first quarter offset by unit growth in the outdoor/fitness, aviation and marine segments.

Automotive/mobile segment revenue declined 14.9% from the year-ago quarter, as the average selling price improvement was more than offset by volume declines associated with excess channel inventory levels and timing of orders from one of our major retail partners. The aviation and marine segments grew 11.8% and 8.7%, respectively, from the year-ago quarter as both industries have begun to recover from the weak macroeconomic conditions experienced in 2009. Revenues in our outdoor/fitness segment grew 28.4% relative to the first quarter of 2009 as global penetration of our outdoor and fitness products continues.

Gross Profit

	13-weeks ended March 27, 2010		13-weeks ended March 28, 2009		Quarter over Quarter	
	Gross Profit	% of Revenues	Gross Profit	% of Revenues	\$ Change	% Change
Outdoor/Fitness	\$ 65,561	63.8%	\$ 48,424	60.5%	\$ 17,137	35.4%
Marine	24,231	58.6%	22,878	60.2%	1,353	5.9%
Automotive/Mobile	94,775	42.9%	84,183	32.4%	10,592	12.6%
Aviation	46,342	70.1%	40,510	68.6%	5,832	14.4%
Total	\$ 230,909	53.6%	\$ 195,995	44.9%	\$ 34,914	17.8%

Gross profit dollars in the first quarter of 2010 increased 17.8% and gross profit margin increased 870 basis points compared to the first quarter of 2009. Gross margins were positively impacted by 510 basis points due to a \$21.8 million warranty adjustment related to a change in the estimated warranty reserve. This adjustment impacted all segments with automotive/mobile, outdoor/fitness and marine having the largest benefits.

The automotive/mobile segment's margin increased 1050 basis points as the average selling price increased and per unit costs decreased including the warranty benefit. The impact to total company gross margin of the automotive/mobile segment fell to 41.0% of total gross margin from 43.0% in the year-ago quarter. The Company benefited from increased margins in the outdoor/fitness and aviation segments. Outdoor/fitness margins improved 330 basis points due to slightly increased pricing and decreases in per unit costs including the warranty benefit. Marine gross margins decreased 160 basis points from the year-ago quarter due to product mix.

Advertising Expense

	13-weeks ended March 27, 2010		13-weeks ended March 28, 2009		Quarter over Quarter	
	Advertising	% of Revenues	Advertising	% of Revenues	\$ Change	% Change
Outdoor/Fitness	\$ 3,807	3.7%	\$ 2,698	3.4%	\$ 1,109	41.1%
Marine	2,425	5.9%	1,745	4.6%	680	39.0%
Automotive/Mobile	9,911	4.5%	17,662	6.8%	(7,751)	-43.9%
Aviation	1,257	1.9%	1,120	1.9%	137	12.2%
Total	\$ 17,400	4.0%	\$ 23,225	5.3%	\$ (5,825)	-25.1%

Advertising expense decreased both as a percentage of sales and in absolute dollars when compared with the year-ago period. As a percent of sales, advertising expenses declined to 4.0% in the first quarter of 2010 compared to 5.3% in first quarter of 2009. The decrease was primarily related to reduced cooperative advertising paid to our retail partners as volumes declined in the automotive/mobile segment. We continued to invest in advertising in the outdoor/fitness, aviation and marine segments which are experiencing revenue growth.

Selling, General and Administrative Expense

	13-weeks ended March 27, 2010		13-weeks ended March 28, 2009		Quarter over Quarter	
	Selling, General & Admin. Expenses	% of Revenues	Selling, General & Admin. Expenses	% of Revenues	\$ Change	% Change
Outdoor/Fitness	\$ 16,213	15.8%	\$ 11,396	14.2%	\$ 4,817	42.3%
Marine	6,989	16.9%	5,382	14.2%	1,607	29.9%
Automotive/Mobile	39,225	17.8%	37,036	14.3%	2,189	5.9%
Aviation	5,251	7.9%	5,963	10.1%	(712)	-11.9%
Total	\$ 67,678	15.7%	\$ 59,777	13.7%	\$ 7,901	13.2%

Selling, general and administrative expense increased both as a percentage of sales and in absolute dollars compared to the year-ago quarter as costs increased in information technology, administration, legal and finance. This increase is partially related to expenses associated with the Company's proposed redomestication to Switzerland. The increased expense for the outdoor/fitness segment is driven by the allocation of costs based on revenues. As a percent of sales, selling, general and administrative expenses increased from 13.7% of sales in the first quarter of 2009 to 15.7% of sales in the first quarter of 2010, as revenues declined slightly.

Research and Development Expense

	13-weeks ended March 27, 2010		13-weeks ended March 28, 2009		Quarter over Quarter	
	Research & Development	% of Revenues	Research & Development	% of Revenues	\$ Change	% Change

Total	\$ 62,483	14.5%	\$ 55,034	12.6%	\$ 7,449	13.5%

The 13.5% increase in research and development expense was due to ongoing development activities for new products and the addition of over 300 new engineering personnel to our staff since the year-ago quarter as a result of our continued emphasis on product innovation. Research and development costs increased \$7.4 million when compared with the year-ago quarter representing a 190 basis point increase as a percent of revenue, as revenues declined slightly.

Operating Income

	13-weeks ended March 27, 2010		13-weeks ended March 28, 2009		Quarter over Quarter	
	Operating Income	% of Revenues	Operating Income	% of Revenues	\$ Change	% Change
Outdoor/Fitness	\$ 38,568	37.5%	\$ 28,504	35.6%	\$ 10,065	35.3%
Marine	8,929	21.6%	10,572	27.8%	(1,643)	-15.5%

Total	\$ 83,348	19.3%	\$ 57,959	13.3%	\$ 25,389	43.8%

Operating income increased 600 basis points as a percent of revenue when compared to the first quarter of 2009 due to the significant improvement in gross margins and reduced advertising expense offset by continued growth in research and development expense and selling, general and administrative costs. Operating margins increased in all segments excluding marine when compared with the first quarter in 2009. Operating income increased \$25.4 million, or 43.8%, when compared to the year ago quarter, with outdoor/fitness contributing 46% of the operating income. Management expects operating margins in the automotive/mobile segment to increase sequentially as volumes increase in the second quarter of 2010.

Other Income (Expense)

	13-weeks ended March 27, 2010	13-weeks ended March 28, 2009
Interest Income	\$ 6,879	\$ 5,097
Foreign Currency Exchange	(46,537)	(2,438)
Other	1,833	(694)
Total	\$ (37,825)	\$ 1,965

The average interest rate return on cash and investments during the first quarter of 2010 was 1.4% compared to 1.8% during the same quarter of 2009. The increase in interest income is attributable to increasing cash balances offset by decreasing interest rates.

Foreign currency gains and losses for the Company are primarily tied to movements by the Taiwan Dollar, the Euro, and the British Pound Sterling. The U.S. Dollar remains the functional currency of Garmin (Europe) Ltd. The Euro is the functional currency of all other European subsidiaries excluding Garmin Danmark and Garmin Sweden. As these entities have grown, Euro currency moves generate material gains and losses. Additionally, Euro-based inter-company transactions in Garmin Ltd. can also generate currency gains and losses. The Canadian Dollar, Danish Krone, Swedish Krona, and Australian Dollar are the functional currency of Dynastream Innovations, Inc., Garmin Danmark, Garmin Sweden, and Garmin Australasia, respectively; due to these entities' relative size, currency moves are not expected to have a material impact on the Company's financial statements.

The majority of the \$46.5 million currency loss in the first quarter of 2010 was due to the strengthening of the U.S. Dollar compared to the Euro and the British Pound Sterling. The weakening of the U.S. Dollar compared to the Taiwan Dollar also contributed to the loss. The currency movement of the Taiwan Dollar and Euro both generated losses in the current quarter due to the revaluation of EUR denominated assets (cash and receivables) in Garmin Ltd. and Garmin Europe, and also the revaluation of the USD denominated assets/liabilities (cash, receivables and payables) in Garmin Corp. (Taiwan). During the first quarter of 2010, the U.S. Dollar strengthened 7.0% and 6.9%, respectively, compared to the Euro and the British Pound Sterling, resulting in a loss of \$39.1 million. In addition, the U.S. Dollar weakened 1.3% against the Taiwan Dollar, resulting in a \$9.1 million loss. The remaining net currency gain of \$1.7 million related to other currencies and timing of transactions.

The majority of the \$2.4 million currency loss in the first quarter of 2009 was due to the strengthening of the U.S. Dollar compared to the Euro, the British Pound Sterling, and the Taiwan Dollar. During the first quarter of fiscal 2009, the U.S. Dollar strengthened 4.3% and 2.3%, respectively, compared to the Euro and the British Pound Sterling, resulting in a loss of \$13.6 million. Offsetting this loss was a gain of \$11.1 million due to the U.S. Dollar strengthening 2.1% against the Taiwan Dollar. The remaining net currency gain of \$0.1 million related to other currencies and timing of transactions.

Income Tax Provision

Our earnings before taxes decreased 24% when compared to the same quarter in 2009, and our income tax expense decreased by \$3.2 million, to \$8.2 million, for the 13-week period ended March 27, 2010, from \$11.4 million for the 13-week period ended March 28, 2009. The effective tax rate was 18.0% in the first quarter of 2010 and 19.0% in the first quarter of 2009.

Net Income

As a result of the above, net income decreased 23.1% for the 13-week period ended March 27, 2010 to \$37.3 million compared to \$48.5 million for the 13-week period ended March 28, 2009.

Liquidity and Capital Resources

Net cash generated by operating activities was \$200.1 million for the 13-week period ended March 27, 2010 compared to \$299.4 million for the 13-week period ended March 28, 2009. Primary drivers of the cash generation included \$37.3 million of net income with non-cash adjustments for depreciation/amortization of \$21.9 million and foreign currency losses of \$47.8 million, \$436.4 million related to accounts receivable collections following the seasonally strong fourth quarter and \$14.3 million of cash received but deferred due to revenue recognition policies. This cash generation was offset by uses of cash including \$94.7 million reduction in accounts payable following the seasonally strong fourth quarter, \$216.9 million reduction in other current and noncurrent liabilities related to the timing of royalty payments and a \$50.2 million increase in inventories as we prepare for the seasonally strong second quarter.

Cash flow provided by investing activities during the 13-week period ending March 27, 2010 was \$63.9 million. Cash flow provided by investing activities principally related to the net redemption of \$71.8 million of fixed income securities associated with the investment of our on-hand cash balances offset by \$3.9 million in capital expenditures primarily related to business operation and maintenance activities, and the purchase of intangible assets for \$5.0 million. It is management's goal to invest the on-hand cash consistent with the Company's investment policy, which has been approved by the Board of Directors. The investment policy's primary purpose is to preserve capital, maintain an acceptable degree of liquidity, and maximize yield within the constraint of maximum safety. The average interest rate return on cash and investments during the first quarter of 2010 was 1.4%

Net cash used in financing activities during the period was \$43.1 million resulting from the use of \$47.2 million for stock repurchased under our stock repurchase plan, offset by \$4.1 million from the issuance of common stock related to our Company stock option plan and stock based compensation tax benefits.

In the second quarter, we will use cash flow from operations for payment of our declared dividend, to fund our capital expenditures and to support our working capital requirements. We expect that future cash requirements will principally be for capital expenditures, working capital requirements, repurchase of shares, and payment of dividends declared.

We believe that our existing cash balances and cash flow from operations will be sufficient to meet our projected capital expenditures, working capital, repurchase of shares, and other cash requirements at least through the end of fiscal 2010.

Contractual Obligations and Commercial Commitments

Pursuant to certain supply agreements, the Company is contractually committed to make purchases of approximately \$68.4 million over the next 5 years.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Sensitivity

We have market risk primarily in connection with the pricing of our products and services and the purchase of raw materials. Product pricing and raw material costs are both significantly influenced by semiconductor market conditions. Historically, during cyclical economic downturns, we have been able to offset pricing declines for our products through a combination of improved product mix and success in obtaining price reductions in raw material costs.

Inflation

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could adversely affect our business, financial condition and results of operations.

Foreign Currency Exchange Rate Risk

The operation of the Company's subsidiaries in international markets results in exposure to movements in currency exchange rates. The potential of volatile foreign exchange rate fluctuations in the future could have a significant effect on our results of operations. In accordance with the Accounting Standards Code, the financial statements of all Company entities with functional currencies that are not United States dollars (USD) are translated for consolidation purposes into USD, the functional currency of Garmin Ltd. and Garmin International, Inc. Sales, costs, and expenses are translated at rates prevailing during the reporting periods and at end-of-period rates for all assets and liabilities. The effect of this translation is recorded in a separate component of stockholders' equity and have been included in accumulated other comprehensive gain/(loss) in the accompanying consolidated balance sheets.

Foreign currency gains and losses for the Company are primarily tied to movements by the Taiwan Dollar (TD), the Euro, and the British Pound Sterling. The U.S. Dollar (USD) remains the functional currency of Garmin (Europe) Ltd. The Euro is the functional currency of all European subsidiaries excluding Garmin Denmark and Garmin Sweden. As these entities have grown, Euro currency moves generated material gains and losses. Additionally, Euro-based inter-company transactions in Garmin Ltd. can also generate currency gains and losses. The Canadian Dollar and Danish Krone, and Swedish Krona are the functional currency of Dynastream Innovations, Inc., Garmin Denmark, and Garmin Sweden respectively; due to these entities' relative size, currency moves are not expected to have a material impact on the Company's financial statements.

Interest Rate Risk

As of March 27, 2010, we are exposed to interest rate risk in connection with our investments in marketable securities. As interest rates change, the unrealized gains and losses associated with those securities will fluctuate accordingly. As we have no outstanding long term debt we have no meaningful debt-related interest rate risk.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures. The Company maintains a system of disclosure controls and procedures that are designed to provide reasonable assurance that information, which is required to be timely disclosed, is accumulated and communicated to management in a timely fashion. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. As of March 27, 2010, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded as of March 27, 2010 that our disclosure controls and procedures were effective such that the information relating to the Company, required to be disclosed in our Securities and Exchange Commission ("SEC") reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in internal control over financial reporting. There has been no change in the Company's internal controls over financial reporting that occurred during the Company's fiscal quarter ended March 27, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II - Other Information

Item 1. Legal Proceedings

Encyclopaedia Britannica, Inc. v. Alpine Electronics of America, Inc., Alpine Electronics, Inc., Denso Corporation, Toyota Motor Sales, U.S.A., Inc., American Honda Motor Co., Inc., and Garmin International, Inc.

On May 16, 2005, Encyclopaedia Britannica, Inc. (“Encyclopaedia Britannica”) filed suit in the United States District Court for the Western District of Texas, Austin Division, against Garmin International, Inc. and five other unrelated companies, alleging infringement of U.S. Patent No. 5,241,671 (“the ‘671 patent”). On December 30, 2005, Garmin International filed a Motion for Summary Judgment for Claim Invalidity Based on Indefiniteness. On September 30, 2008, the court issued a Memorandum Opinion and Order granting Garmin International’s Motion for Summary Judgment for Claim Invalidity Based on Indefiniteness with respect to the ‘671 patent. On October 8, 2008, the court issued an Amended Final Judgment ordering that Encyclopaedia Britannica take nothing from its action against Garmin International with respect to the ‘671 patent and closed that case. On November 12, 2008, Encyclopaedia Britannica filed a Notice of Appeal to the Federal Circuit Court of Appeals. On December 4, 2009, the Federal Circuit issued its decision affirming the district court’s judgment.

On May 23, 2006, Encyclopaedia Britannica filed an amended complaint claiming that Garmin International and the other defendants also infringe U.S. Patent No. 7,051,018 (“the ‘018 patent”), a continuation patent of the ‘671 patent, which issued on May 23, 2006. On July 25, 2006, Encyclopaedia Britannica filed a new complaint claiming that Garmin International and the other defendants also infringe U.S. Patent No. 7,082,437 (“the ‘437 patent”), a continuation patent of the ‘671 patent, which issued on July 25, 2006. Encyclopaedia Britannica also asserted the ‘018 and ‘437 patents against other parties in a separate lawsuit, Encyclopaedia Britannica v. Magellan Navigation, Inc., et al., Case No. 07-CA-787 (LY)(W.D. Tex).

On February 6, 2009, the court entered a scheduling order enabling all defendants in these cases to file a consolidated Joint Motion for Summary Judgment of Invalidity of the ‘018 and ‘437 patents and stayed all proceedings pending the court’s ruling on the joint motion for summary judgment. On February 20, 2009, the defendants filed a consolidated Joint Motion for Summary Judgment of Invalidity of the ‘018 and ‘437 patents. On August 3, 2009, the court issued a Memorandum Opinion and Order granting the defendants’ consolidated Joint Motion for Summary Judgment of Invalidity of the ‘018 and ‘437 patents and holding that these patents are invalid. On August 24, 2009, Encyclopaedia Britannica filed a Notice of Appeal to the Federal Circuit Court of Appeals. The briefing has been completed and the Federal Circuit will hold an oral argument on May 4, 2010. Garmin International believes the Federal Circuit will affirm the district court’s judgment.

SP Technologies, LLC v. Garmin Ltd., Garmin International, Inc., TomTom, Inc., and Magellan Navigation, Inc.

On June 5, 2008, SP Technologies, LLC filed suit in the United States District Court for the Northern District of Illinois against Garmin Ltd. and Garmin International, Inc. alleging infringement of U.S. Patent No. 6,784,873 (“the ‘873 patent”). On July 7, 2008, SP Technologies, LLC filed an amended complaint removing all claims against Garmin Ltd. and alleging infringement of the ‘873 patent against additional defendants TomTom, Inc. and Magellan Navigation, Inc. Garmin believes that it should not be found liable for infringement of the ‘873 patent and additionally that the ‘873 patent is invalid. On August 18, 2008, Garmin filed its answer to the amended complaint along with a motion for dismissal of SP Technologies, LLC’s claims of willful and inducement infringement of the ‘873 patent. On October 16, 2008, the court granted Garmin’s motion for partial dismissal, striking the willful and inducement infringement allegations from the amended complaint.

On January 7, 2009, Garmin filed an Amended Answer and Counterclaims asserting the '873 patent is not infringed, is invalid, and that the plaintiff committed inequitable conduct resulting in unenforceability of the '873 patent. On February 2, 2009, codefendant TomTom, Inc. filed a Motion for Summary Judgment of Unenforceability of the '873 Patent Due to Inequitable Conduct. On September 30, 2009, the Court denied TomTom, Inc.'s Motion for Summary Judgment. On October 9, 2009, the Court issued an order construing the claims of the '873 patent. On October 28, 2009, Garmin filed a Motion for Summary Judgment of Invalidity of the '873 Patent. On January 6, 2010, SP Technologies, LLC filed its response and on January 20, 2010, Garmin filed its reply. The parties await the court's ruling on Garmin's motion. Although there can be no assurance that an unfavorable outcome of this litigation would not have a material adverse effect on our operating results, liquidity or financial position, Garmin believes that the claims are without merit and intends to vigorously defend this lawsuit.
