**Operating Results and Financial Conditions**

**2003 Third Quarter in Review**

Looking back at the global economy in the third quarter of 2003, the U.S. economy, while showing no improvement in the job market, achieved an economic upturn attributable to healthy consumer spending as a result of tax cuts, and growth in capital investment in the private sector, particularly in the area of information technology. The economies of Europe remained stagnant due to a decrease in exports and restrained production resulting from the appreciation of the euro, while Asian economies, including China and Thailand, showed economic growth. The Japanese economy, while experiencing a gradual improvement in exports for the term, remained flat overall and showed no signs of recovery in consumer spending or employment and income conditions.

As for the markets in which the Canon Group operates, the digital camera market continued to show robust growth while network digital multifunction devices (MFDs) and computer peripherals, such as printers, struggled amid severe price competition. In the field of optical equipment, although signs of a full-fledged recovery remain to be seen in demand for semiconductor-production equipment, the market for projection aligners used in the production of liquid crystal displays (LCDs) expanded, fueled by increased demand for LCD televisions. The average value of the yen for the half was ¥117.54 to the U.S. dollar and ¥132.07 to the euro, representing a year-on-year increase of 2% against the dollar, and a decrease of 11% against the euro.

Amid these conditions, Canon's consolidated net sales for the third quarter increased by 10.6% from the year-ago period to ¥767.6 billion (U.S.\$6,915 million), boosted again by a significant rise in sales of digital cameras and color network digital MFDs. On a quarterly basis, net income recorded an all-time high of ¥73.0 billion (U.S.\$658 million), a year-on-year increase of 27.0%. Canon's gross profit for the quarter increased by 17.0% compared to the corresponding period last year, which was made possible through R&D reforms, which have supported the timely launch of competitive new products, and cost savings realized through sustained production reforms. Selling, general and administrative expenses for the third quarter rose 9.9% year on year which is within the increase in sales owing to increases in advertising and sales-promotion spending. Consequently, operating profit in the third quarter totaled ¥125.6 billion (U.S.\$1,131 million), a substantial increase of 35.4%. Other income (deductions) declined by ¥13.9 billion (U.S.\$125 million) as a result of increased currency exchange losses on foreign-currency-denominated trade receivables arising from the sudden appreciation of the yen against the dollar in the latter half of September. As a result, income before income taxes in the third quarter totaled ¥117.3 billion (U.S.\$1,057 million), a year-on-year increase of 19.3%. The effective tax rate during the quarter decreased by 4.2% compared with the previous year as a result of an increased tax credit for R&D expenditures arising from an amendment to Japanese tax regulations. Consequently, net income in the third quarter of 2003 totaled ¥73.0 billion (U.S.\$658 million), a year-on-year increase of 27.0%.

Basic earnings per share for the quarter amounted to ¥83.03 (U.S.\$0.75), a year-on-year increase of ¥17.49 (U.S.\$0.16).

**Results by Product Segment**

In the business machine segment, Canon's powerful imageRUNNER (iR)-series lineup of digital networked black-and-white multifunction copying machines realized healthy sales growth worldwide. In particular, the low-end iR 1600 series continued to record strong sales during the term. Among color network digital MFDs, the iR C3200/iR C3200N, released domestically at the end of last year, has been well received in both Japan and abroad, which also substantially contributed to increased sales of office imaging products. Overall, sales of office imaging products for the quarter realized a year-on-year increase of 7.3%. In the field of computer peripherals, unit sales of laser beam printers showed robust growth, particularly among low-end models. Inkjet printers also recorded a strong unit-sales performance, with sales of the i550 and i850 models remaining brisk, and products such as the MultiPASS MP700/MP730 high-speed multifunction inkjet systems and the i70 portable color printer achieving substantial sales growth. As a result, sales of computer peripherals in the third quarter increased by 4.1% despite the effects of severe price competition. Sales of business information products, including computers, micrographics and calculators, decreased by 12.5% due to declining personal computer sales in the domestic market. As a result of the above, third quarter sales of business machines overall totaled ¥544.1 billion (U.S.\$4,901 million), a 4.4% increase year on year. In addition to cost-cutting measures and the introduction of new price-competitive products, which contributed to a 2.8% improvement in the operating profit margin, a steady increase in sales volume boosted third-quarter operating profit by 19.3% year on year to ¥123.4 billion (U.S.\$1,112 million).

Within the camera segment, amid the continued strong demand for digital models worldwide, the PowerShot-series, including the PowerShot-A70, and the Digital ELPH-series, including the S400 Digital

## **Table of Contents**

ELPH, have contributed to a significant increase in sales. Canon's digital SLR models have also achieved strong sales growth, particularly the EOS 10D, which was introduced in the first half of this year. The company's new EOS DIGITAL REBEL, just released in September, has also been well received. Sales of conventional film cameras, however, continued to slip during the quarter amid the increasing popularity of digital models and price competition. In the field of digital video camcorders, the Optura 300 and Optura Xi mega-pixel models, and the ZR70MC and ZR65MC entry-level models achieved healthy sales for the period. As a result, camera sales overall reached ¥155.8 billion (U.S.\$1,403 million) for the third quarter, representing an increase of 34.4% year on year for continued double-digit growth performance. Operating profit for the camera segment appreciably advanced 91.9% to ¥38.7 billion (U.S.\$349 million), attributable to the rapid growth in sales of digital cameras, along with a substantial 7.4% improvement in the operating profit margin due to the effects of cost-saving initiatives.

The optical and other products segment registered a sales increase of 18.9% to ¥67.8 billion (U.S.\$611 million), due to a substantial increase in sales of aligners for the production of LCDs, reflecting the shift from CRT computer displays to LCD monitors, as well as an expansion of the LCD television market. Though registering increased sales, a reduced gross profit ratio due to severe competition in the market resulted in the optical and other products segment suffering an operating loss of ¥3.6 billion (U.S.\$32 million) for the quarter, compared with a ¥2.9 billion operating loss for the corresponding period of the previous year.

### **Cash Flows**

Between January 1 and September 30, 2003, Canon maintained cash flows from operating activities of ¥326.4 billion (U.S.\$2,941 million), a year-on-year increase of ¥12.1 billion (U.S.\$109 million) for the period, reflecting substantial net income growth, as well as an increase in depreciation. Capital expenditure totaled ¥150.1 billion (U.S.\$1,352 million), which was used mainly to expand production capabilities in Japan and overseas. Cash flows from investing activities totaled ¥159.9 billion (U.S.\$1,441 million), including a ¥12.7 billion (U.S.\$114 million) outlay for the acquisition of Sumitomo Metal System Solutions Co. Ltd., now Canon System Solutions Inc. As a result, free cash flow, or cash flow from operating activities minus cash flow from investing activities, totaled positive ¥166.5 billion (U.S.\$1,500 million).

Cash flows from financing activities recorded an outlay of ¥94.2 billion (U.S.\$848 million), mainly resulting from active efforts to repay short-term and long-term loans toward the goal of improving the company's financial position. Consequently, cash and cash equivalents, which totaled ¥585.2 billion (U.S.\$5,272 million), remained at a high level, representing a ¥64.0 billion (U.S.\$576 million) increase from the end of last year.

### **Outlook**

Regarding the outlook for the global economy in the fourth quarter, the U.S. economy is likely to show a moderate recovery while personal consumption is expected to lose momentum due to the diminishing effects of tax cuts. The Japanese economy is expected to remain sluggish owing to flat consumer spending and a slowdown in export expansion, reflecting the rapid appreciation of the yen since the latter half of September. While the appreciation of the euro seems to have settled, the economies of Europe will probably show stagnant growth as exports and production are not expected to improve significantly. In China and Southeast Asia, exports are expected to make a recovery and the economy will likely show steady growth.

In the businesses in which Canon is involved, the digital camera market is expected to continue enjoying rapid growth while stable demand is projected for full-color network digital MFDs and laser beam printers. Within the semiconductor-production equipment market, capital investment by memory device manufacturers is expected to show an upward trend sometime after next year while orders for aligners by LCD manufacturers are expected to enjoy continued growth.

Although uncertainty surrounds several factors that could affect currency exchange rates, significant changes in rates are not anticipated. The yen is expected to be stronger against the U.S. dollar by about 8%, and weaker against the euro by about 9% compared with the previous year.

Upon considering the current market and currency exchange environments, the company has revised upward its net sales forecasts for fiscal 2003, now anticipating consolidated net sales of ¥3,183.0 billion (U.S.\$28,676 million), while maintaining previous forecasts for consolidated income before income taxes and consolidated net income. The company also projects non-consolidated net sales of ¥2,017 billion (U.S.\$18,171 million), non-consolidated ordinary profit of ¥325.0 billion (U.S.\$2,928 million), and non-consolidated net income of ¥232.0 billion (U.S.\$2,090 million). These forecasts assume currency exchange rates of ¥110.00 to the U.S. dollar and ¥127.00 to the euro for the remainder of 2003.

## (2) SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial statements reflect the adjustments which management believes are necessary to conform them with accounting principles generally accepted in the United States of America, except for the segment information, as required by Statement of Financial Accounting Standards No.131, Disclosures about Segments of an Enterprise and Related Information.

We have engaged KPMG to complete a review of the consolidated financial statements as of and for nine months ended September 30, 2003, in accordance with Statement of Auditing Standards No.100, Interim Financial Information, established by the American Institute of Certified Public Accountants.

(Note)

From the 1st quarter of 2003, facsimiles which included personal digital MFDs etc. based on electrophotography technology were reclassified and are now included in Copying Machines, renamed Office Imaging Products. Those products based on inkjet technology were moved to Inkjet Printers in Computer Peripherals. In connection with this adjustment, Business Systems were renamed Business Information Products. Values for the previous year are restated to conform to the reclassification.
