Table of Contents

- (1) Amortization of goodwill in French GAAP is reversed, since goodwill is no longer amortized under US GAAP.
- (2) Different basis of trademark amortization recognized in US GAAP.
- (3) In 2003, FAS 133 reconciliation items 60 million; financial instruments related to treasury shares 42 million. In 2002, reversal of accruals for and recognition of losses under French GAAP related to put and call options on treasury shares of 888 million; reversal of reserves related to available for sale assets recognized in profit and loss under French GAAP of 173 million (Dupont); reversal of mark-to market of sold marketable securities (239) million.
- (4) The valuation of the Class B Preferred Interest and the Put/Call provisions has been performed by Standard & Poor's (S&P) under an engagement with Vivendi Universal. After a review by S&P of their methodology and assumptions, S&P has changed the methodology it uses as of June 30, 2003. Had that methodology been applied to the March 31, 2003 valuation, financial instruments would have been valued at 446 million and US GAAP net loss would have been (254) million.
- (5) In 2003, these adjustments related mainly to Veolia Environment (VE).
- (6) In 2003, adoption of FAS 143 asset retirement obligations. VE has estimated the impact as of June 30, 2003 of the adoption of this standard as of January 1, 2003; this estimate may be revised by at December 31, 2003 in connection with the preparation by VE of its audited financial statements for the full year 2003. However, in the opinion of management, any revision would not result in an amount that would be materially different than the estimate reflected in the adjustment set forth above. In 2002, adoption of FAS 142 impairment. This impairment was effectively recorded under French GAAP in 2001.
