PART I

Item 1. Description of Business

American Home Food Products, Inc. (hereinafter "the Company") will be subject to numerous and substantial economic, operational and other risks, which should be carefully evaluated. For a more detailed discussion of the risk factors involved in the investment being offered in this offering, see the following **Risk Factors**. At its Annual Meeting of Shareholders on January 28, 2005, the Company announced a new strategy that it was contemplating to advance the Company from a royalty collecting business into one that engages in the manufacturing and marketing of private label and specialty food products. (See **Executive Summary**). As of the filing date of this Form 10-KSB, the Company was not subject to any agreements to acquire an operating business, although management is pursuing various opportunities.

RISK FACTORS

Historical losses. The Company has recorded net losses in prior years, in addition a significant portion of the Company's assets are attributable to intangibles. Management will periodically review the recoverability of intangibles to determine if it has been impaired. Events that may cause an impairment would be the Company's future intentions regarding its operations and the operations forecasted undiscounted cash flows. Any reduction in the value of intangibles would be to the extent that the present value of the expected future cash flows are less than the carrying amount of intangibles. This analysis may result in a complete or partial write-off or acceleration of the amortization period. A write-down of part or all of the intangibles will negatively impact the Company's current operating results. See **Management's Discussion and Analysis of Financial Conditions and Results of Operations and Financial Statements and Notes.**

Because the Company has no patent protection for its product formulae, its competitors could copy its products and market them under another name which could decrease the Company's revenues and hamper its ability to achieve profitability. The formulae used to produce the Company's products are not subject to patents, however the actual trade names for the products are all registered and in good standing. The Company believes that its products are purchased because of performance and trust and that the brand name provides the greater value to the products. Patent protection would not be warranted in the case of the Company's products, and could be injurious through the public disclosure of the formulae.

If a trading market is not maintained, holders of the common stock may experience difficulty in reselling such Common Shares or may be unable to resell them at all. The Common Shares of the Company are presently quoted on the NASDAQ Over-The-Counter (OTC) Bulletin Board, a regulated quotation service that captures and displays real-time quotes and indications of interest in securities not listed on The NASDAQ Stock Market, or any U.S. securities exchange. The current trading ticker symbol for the Common Shares is AHFP. The Company may, but has not, entered into any agreements with market makers to make a market in the Company's Common Stock. In addition, any such market making activity would be subject to the limits imposed by the Securities Act, and the Securities Exchange Act of 1934, as amended, (Exchange Act) and it is possible that the market in the common stock can be discontinued at any time. Accordingly, if there is no active market available for the common shares, no liquidity or if the market is discontinued, holders of the common stock may have difficulty or may be unable to sell the shares which he or she may hold.

Because our stock is presently considered to be a penny stock, the applicability of Penny Stock Rules could make it difficult for investors to sell their shares in the future in the secondary trading market.

1

Federal regulations under the Exchange Act regulate the trading of so-called penny stocks (the Penny Stock Rules), which are generally defined as any security not listed on a national securities exchange or NASDAQ, priced at less than \$5.00 per share, and offered by an issuer with limited net tangible assets and revenues. In addition, equity securities listed on NASDAQ that are priced at less than \$5.00 per share are deemed penny stocks for the limited purpose of Section 15(b)(6) of the Exchange Act. Therefore, during the time which the common stock is quoted on the NASDAQ OTC Bulletin Board at a price below \$5.00 per share, trading of the common stock will be subject to the full range of the Penny Stock Rules. Under these rules, broker-dealers must take certain steps prior to selling a penny stock, which steps include: (i) obtaining financial and investment information from the investor; (ii) obtaining a written suitability questionnaire and purchase agreement signed by the investor; and (iii) providing the investor a written identification of the shares being offered and in what quantity. If the Penny Stock Rules are not followed by the broker-dealer, the investor has no obligation to purchase the shares. Accordingly, the application of the comprehensive Penny Stock Rules may be more difficult for broker-dealers to sell the common stock, and purchasers of the shares of common stock offered hereby may have difficulty in selling their shares in the future in the secondary trading market.

Certain information included in this Form 10-KSB contain statements that are forward-looking, such as statements relating to future anticipated direction of the Company, plans for expansion, corporate acquisitions, anticipated sales growth and capital funding sources. Such forward-looking information involves risks and uncertainties that could significantly affect anticipated results in the future, and accordingly, such results may even materially differ from those expressed in any forward-looking statements made by or on behalf of the Company.

BUSINESS

a. General Business Development

The Company is a corporation formed under the laws of New York and has its principal place of business and executive offices located at 42 Forest Lane, Bronxville, New York 10708, telephone 914-337-0231.

Pursuant to a Licensing Agreement the Company currently operates as a licensing entity that collects monthly royalty payments from its Licensee that are derived from sales of building materials that bear the Company's trade names. The royalties are paid monthly by the Licensee based on sales of goods made one month from the payment date. For instance, the royalty for sales of goods in August will be paid on October 1st. The royalty agreement provides for a fixed licensing fee for each account. The Company is to provide marketing and sales support to the Licensee.

In addition, management believes that the Company's publicly-traded status and its net operating loss carry forward would be useful in the execution of the Company's business plan to develop a large scale business that concentrates on the manufacturing and marketing of private label food products. Following is an executive summary of the Company's business plan, which will illustrate the Company's current plan and the industry in which the Company seeks to penetrate.

EXECUTIVE SUMMARY

The Company and Its Industry

American Home Food Products, Inc. is undertaking a business plan to create a large-scale diversified private label food manufacturing and marketing business. The Company has pursued several operating businesses that could serve as growth platforms in each of the selected product categories, however for various reasons not

2

attributable to the Company the transaction could not be brought to a close. The Company will be formally located in New York City.

The total U.S. market for private label food and grocery products is estimated to be \$42.9 billion and growing by the Chicago-based, Information Resources, Inc. (IRI).¹ Influencing this growth is the consolidation of large food retail chains and the emergence of mass merchandisers, such as, Costco, B.J. s and Wal-Mart and large drug chains that are also offering food and grocery products. According to IRI, sales of private label products increased by nearly \$1 billion in supermarkets and \$270 million in drug chains in 2003 versus the prior year. Over the past five years, private label products have added \$6.5 billion in annual revenue in U.S. supermarkets, an increase of 17.9% versus 14.0% for national brands over the same period.

Other Private Label Food Companies

The leading diversified private label manufacturer, Ralcorp (NYSE:RAH), generates approximately \$1 billion in annual sales in essentially four food categories – cereals, bakery, snacks and condiments. Cott Beverages (NYSE:COT) is the leading private-label beverage producer and will be distinguishable from the Company due to its narrow product offering which excludes food products. Most of the other large scale private label food competitors are owned by major branded food companies like ConAgra (\$350m. in private label canned pasta, peanut butter, breakfast bars, cereals), Delmonte Foods, Inc. (\$150m. in private label canned broths, gravies, soups). In 2005, Dallas-based Dean Foods Company announced a spin-off Treehouse Foods (NYSE: THS) to create a \$700 million in sales publicly-traded, private label and branded food company. The new management team invested \$10 million in the spin-off company for 1.67% of the common stock giving the entire business a market capitalization of \$598 million, or a value of 85% of annual sales.

The Company s Strategy

The consolidation in the food industry has created large-scale food retailers that can all compete intensively on price. To create a point of differentiation and customer loyalty, large food retailers are offering greater percentages of store merchandise under their own private label (aka Store Brands), like Kirkland (Costco), Great Value (Wal-Mart), Master s Choice (A&P). Private label products have a proprietary advantage in that they can create customer loyalty for retailers. However, the proprietary nature of the retailers private label product offering(s) is a double-edge sword that creates a significant competitive advantage for the Company.

Foremost, the Company will not operate like a branded food product company, which primarily offer private label products opportunistically to utilize excess manufacturing capacity – branded companies prefer to sell branded goods to avoid market share dilution from private label products. In addition to its product offering, the Company will aggressively promote merchandising and promotional plans that have been honed by its management team through years of experience to foster growth of its retail customers private label products. The Company will become the de facto marketing partner of the retail buyer. It will also offer new products and innovative ideas to increase the percentage of private label products offered by its retail customers, while not being concerned with the impact that a private label product could have on a branded product. Most consumer food product companies will not nurture, promote and expand sales of private label products out of fear that it will erode the market share for its branded products. The Company will not have this inherent conflict.

¹ IRI data does not include sales at Wal-Mart, which has discontinued reporting its own sales data.

Acquisition Targets

The Company's initial acquisition targets will be closely-held food businesses that can produce private label products and private label food product divisions of major branded food manufacturers in the categories identified by management. The Company plans to centralize the selling, general and administrative functions into a New York City-based office to consolidate duplicative SG&A expenses. The highest level of management in an operating facility will be a general manager. All senior level executive positions will be based out of the Company's New York office.

The Company's operating targets will cause it to focus on product lines that in the aggregate can generate gross margins in the 20-25% range, or higher. Assuming selling expenses would be within the industry range of 3-5% and general and administrative costs were held at 7% (including finance charges), the Company could achieve its targeted operating margin of 10-15%.

The Company's growth would derive from: (i) increased sales to existing retail customers from management's merchandising expertise with private label products, (ii) additional sales from new retail accounts, (iii) new product offerings utilizing the same factory assets, and (iv) new fold-in acquisitions to add scale to the Company's existing operation(s).

Prior Business Development

In August 7, 1999, the Company acquired its existing assets from The Sherwin-Williams Company.

On August 1, 2000, the Company acquired substantially all of the assets of the The Sta-Dri Company located in Odenton, Maryland (Sta-Dri). Sta-Dri manufactured a well-known line of waterproofing and building material products that have been in existence for over 40 years. Due to operating difficulties at its plant, the Company contracted out all its manufacturing to a larger private held business and currently collects a royalty on monthly sales of its product line.

b. Financial Information About Industry Segments

All assets, revenues and operating expenses are dedicated to one business segment -- the marketing of building materials. Accordingly, the Company accounts for its business operations within one industry, i.e. the building materials industry.

Based upon its current operations and its operating activity for the past three fiscal years, the Company believes that its financial information is adequately presented in its audited financial statements and is cross-referenced in this Form 10-KSB to the Company's balance sheet and statement of operations appearing on pages F-3 and F-4, respectively.

c. Current Business Operation

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

The Company is engaged in the business of marketing premium building product materials through the Licensing Agreement. The first line of products are pre-packaged concrete repair and floor resurfacing products that are marketed to contractors directly and also to distributors of building material products under the tradenames Por-Rok and Dash Patch. The second line of products are masonry waterproofing products also marketed to contractors and distributors of building materials and paint products under the brand name Sta-Dri. The third line of products is a line of polypropylene concrete reinforcing fibers that are sold under the Fiberforce trade name. **(See Description of Products).**

The Company currently has its executive offices at 42 Forest Lane, Bronxville, New York 10708.

4

d. How the Company Markets Its Products

The Company markets all its products in conjunction with the sales and marketing staff of its Licensee. Most of these efforts involve direct contact with existing and new customers and periodic incentive based promotions to attract new sales.

e. Description of the Company's Products

As of the filing of this registration statement, the following is a list of the Company's products.

POR-ROK PRODUCTS (A Line of Grouts and Patching Products) these products are shipped in various packaging sizes and sold to retail hardware stores and contractor outlets. The products are either cement- or gypsum-based and used in various interior and exterior applications for anchoring equipment or other permanent fixtures, vertical and horizontal repairs of concrete and wood structures.

STA-DRI PRODUCTS (A Line of Masonry Waterproofing Products) these products are shipped in various packaging sizes and sold to retail hardware stores and contractor outlets. The products come in powder form (need to be mixed with water) or ready-mixed (similar to paint products) and are used in various application of waterproof masonry structures.

f. The Company's Competitors

The principal methods of competition in our industry are price, service and the reliability of the product as demonstrated by performance. Each product offered by the Company currently has been on the market for at least 10 years and in some cases over 50 years. Because the products have been used for so long, they have achieved a level of market acceptance. The Company's prices are competitive with other like products and it does not aim to be the lowest nor the highest price on the market, but to be competitive.

Brand

Major Competitors

Por-Rok Products

Conspec, Tamms, Master Builders, Quikcrete
Sonneborn, Sika, W.R. Meadows, ChemMasters
Rockite, Oldcastle, Mapei, DAP

Sta-Dri Products

Thoro seal, UGL

g. Seasonality

Most of the Company's products are used in the maintenance of existing structures and have interior and exterior applications. Even in winter months a significant portion of construction and building maintenance continues, especially on interior projects where the company's products are used most. Although the high points of the construction season tends to be the busier period for sales, the Company does experience stable sales in the winter months.

5

h. Customer Dependence

The Company is not dependent upon any one customer nor does it anticipate becoming dependent upon one customer in the future. Its marketing strategy is to diversify its sales through major distributors that are located in various geographical areas and to a large number of construction professionals, such as engineers, architects, contractors, construction managers and end-users all of whom are involved in separate construction projects. The Por-Rok, Sta-Dri and Fiberforce products are sold to various distributors and retailers none of which account for more than 5% of the respective line of product sales.

i. Raw Materials

The raw materials used in manufacturing products using the Company's trade names are readily available in the United States and Canada. The raw materials are purchased on an as needed basis and at market prices at the time of purchase. The Company does not anticipate that the prices and supplies of the raw materials will fluctuate substantially since the majority of the raw materials are commodity items such as sands and cement.

j. Intellectual Property Rights

The Company received a certificate of registration for the use of the trademark "Novacrete" from the Canadian Intellectual Property Office on June 15, 1997. The Certificate remains in effect until June 5, 2012 and can be renewed by the Company. On March 3, 1998, the Company received a Certificate of Trademark Registration No. 2,140,062 to use the trademark "Novacrete" in the United States. The term of the U.S. trademark registration is for ten years. With the Company's acquisitions of Por-Rok in August 1999 and Sta-Dri in August 2000, the Company acquired the registered trade names for all Por-Rok, Dash Patch and Sta-Dri products currently being produced.

The Company has not filed an application for a patent on its proprietary technology. The core technology that is used in each of the Company's products is not easily replicated. However, if patented the technology would ultimately become public information. The Company has developed internal controls to protect the confidentiality of its technology and does not believe that the lack of legal patent protection will impair its ability to effectively compete with other manufacturers of like products or cause the Company to incur unnecessary risk of loss of the technology. Even if the Company had patent protection over its technology, it still assumes the risk that a competitor may misappropriate the technology and then its only recourse would be to commence costly and time consuming litigation. The existence or absence of a patent poses no commercial disadvantage to marketing the Company's products.

Even if the Company were required to change its corporate name, this would not diminish our sales since our products are marketed under the brand names Por-Rok, Sta-Dri and Fiberforce. These product names are protected by registered trademarks in the United States, Canada and the United Kingdom.

k. The Company's Working Capital Requirements To Operate Its Business

For the fiscal year ended May 31, 2006, the Company experienced substantially less fluctuations in its working capital requirements to finance its operations due to it having entered into the Licensing Agreement. The Company currently requires approximately \$20,000 monthly to cover its fixed operating expenses before interest charges and it has no variable expenses.

6

l. No Backlog Orders

As of May 31, 2006, the Company did not have any backlog orders on account of its new business operation as a licensing company.

m. Government Contracts

The Company does not have any material contracts with the Government or any government agency and therefore does not have any exposure to these types of agreements.

n. Financial Information About Foreign and Domestic Operations and Export Sales.

The Company exports a small percentage of its annual sales to customers located outside of the United States. Whenever goods are sold outside of the United States the invoice is either paid in full prior to the shipment, or the goods are released upon confirmation of an irrevocable letter of credit.

o. The Company's Research and Development Activities

The Company currently markets products that have been widely accepted in the marketplace for building materials in both the commercial and consumer channels. The Company is not actively seeking to develop new innovative products, but to capitalize on sales of its existing products.

p. Environmental Compliance

The Company does not manufacture its products nor does it use raw materials in its products that are deemed to be subject to rules or regulations relating to the discharge of certain materials into the environment. With the conveyance of its real property to Dime on July 17, 2003, the Company no longer has any exposure to environmental claims on the property, although in its best judgment it does not believe there are any environmental liabilities at the property.

q. The Company's Future Operations

The Company's plan to combine its Licensee's sales and marketing staff with its own efforts to increase sales of products sold under the Company's trade names and consequently its monthly royalty payments. The Company will also continue to assess the prospects of merging with an operating business to better utilize the Company's publicly-traded status.

r. Number of Employees

As of May 31, 2006, the Company employed one (1) full-time employee.

Item 2. Description of Property

The Company's principal executive offices are located at 42 Forest Lane, Bronxville, New York 10708, telephone number 914-337-0231.

7

Item 3. Legal Proceedings

On June 18, 2004 the settlement agreement with Dime was released from escrow. Dime Commercial Corp. v. Novex Systems International, Inc., Superior Court of New Jersey, Docket No. PAS-L-1577-2.

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

The former shareholders of the Sta-Dri company filed a lawsuit for unpaid royalty payments and received a judgment in the amount of \$95,000.

Other trade creditors have commenced lawsuits against the Company to secure payment on unsecured claims, however none of these judgment can be satisfied against the Company assets due to there being a properly perfected security interest in place with a financial creditor that is willing to work with the company.

Item 4. Submission of Matters to a Vote of Security Holders

The last Annual Meeting of Shareholders was held on January 28, 2005 at which the Company received majority votes in favor of: changing the Company's name to American Home Food Products, undertaking a 1-for-7 reverse stock split and ratifying the election of its independent outside counsel. In light of the Company's plan to make an acquisition in 2006, it has not scheduled a meeting of shareholders and expects that as part of the acquisition or shortly thereafter it will schedule an annual meeting of shareholders.

PART II

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters

The Company's common stock, \$.001 par value, is traded on the Over-the-Counter (OTC) Bulletin Board operated by the National Association of Securities Dealers under the ticker symbol AHFP . The table below presents the high and low closing bid prices for each of the quarters of the fiscal years ending May 31, 2006 and May 31, 2005, respectively. The quotations reflect interdealer prices without retail mark-up, mark-down or commissions and may not necessarily represent actual transactions. The Company's common stock became actively traded in July, 1995. Effective June 8, 2005, a 1-for-7 reverse split was undertaken, which increased the Company's stock price to \$.15 per share with 3,606,455 shares of its \$.001 par value common stock issued and outstanding. On May 31, 2006, the closing bid price was \$.12. The Company has never paid a cash dividend and does not expect to change its dividend policy in the foreseeable future.

Quarterly Common Stock Bid Price Ranges

<u>Quarter</u>	<u>High*</u>	<u>Low*</u>	<u>Last Day of Quarter</u>
1 st	\$.15	\$.15	August 31, 2005

4th	\$.02	\$.02	May 31, 2005

**pre-split prices

The Company may, but has not, entered into any agreements with market makers to make a market in the Company's common stock. In addition, any market making activity would be subject to the limits imposed by the Securities Act, and the Securities Exchange Act of 1934, as amended. For example, federal regulations under the Exchange Act regulate the trading of so-called penny stocks (the Penny Stock Rules), which are generally defined as any security not listed on a national securities exchange or NASDAQ, priced at less than \$5.00 per share, and offered by an issuer with limited net tangible assets and revenues. In addition, equity securities listed on NASDAQ that are priced at less than \$5.00 per share are deemed penny stocks for the limited purpose of Section 15(b)(6) of the Exchange Act. Therefore, during the time which the common stock is quoted on the NASDAQ OTC Bulletin Board at a price below \$5.00 per share, trading of the common stock will be subject to the full range of the Penny Stock Rules. Under these rules, broker dealers must take certain steps before selling a penny stock, which steps include: (i) obtaining financial and investment information from the investor; (ii) obtaining a written suitability questionnaire and purchase agreement signed by the investor; and (iii) providing the investor a written identification of the shares being offered and in what quantity. If the Penny Stock Rules are not followed by the broker-dealer, the investor has no obligation to purchase the shares. Given the application of the comprehensive Penny Stock Rules it may be more difficult for broker-dealers to sell the common stock.

Accordingly, no assurance can be given that an active market will always be available for the Common stock, or as to the liquidity of the trading market for the Common stock. If a trading market is not maintained, holders of the Common stock may experience difficulty in reselling them or may be unable to resell them at all. In addition, there is no assurance that the price of the Common stock in the market will be equal to or greater than the offering price when a particular offer of securities is made by or on behalf of a Selling Securityholder, whether or not the Company employs market makers to make a market in the Company's stock.

Item 6. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Year ended May 31, 2006 (Fiscal 2006) as compared to May 31, 2005 (Fiscal 2005)

The royalties for the year ending May 31, 2006 were \$223,522, while the royalties for the same period ended May 31, 2005, were \$209,258. The Company achieved a gross profit of 100% for the year ending May 31, 2006 due to the licensing nature of the Company's business.

For the year ending May 31, 2006, the Company generated a net loss of \$306,621, which included \$159,325 of accrued interest and non-cash expenses for depreciation and amortization of \$50,512 and stock issuances of \$27,600. On a monthly basis, the Company incurs approximately

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

\$35,000 in selling, general and administrative expenses expense. The monthly selling, general and administrative expenses

9

are predominantly comprised of \$20,000 in payroll expenses, \$3,000 in amortization expense of the intangibles and \$4,000 of professional fees.

As of May 31, 2006, the Company had \$17,452 in current assets representing the royalty receivable. The Company has intangibles of \$440,159, which is attributable to the two acquisitions that the Company completed in 1999 and 2000.

Year ended May 31, 2005 (Fiscal 2005) as compared to May 31, 2004 (Fiscal 2004)

While royalties for the year ending May 31, 2005 were \$209,258, royalties for the same period ended May 31, 2004 were \$230,275. The Company also generated \$15,821 in Other Income.

The Company achieved a gross profit of 100% for the year ending May 31, 2005 due to the Company's termination of its manufacturing business.

For the year ending May 31, 2005, the Company generated a net loss of \$382,211, which included \$160,107 of accrued interest and non-cash expenses for depreciation and amortization of \$50,512.

As of May 31, 2005, the Company had \$19,064 in current assets representing the royalty receivable. The Company has intangibles of \$490,671, which is attributable to the two acquisitions that the Company completed in 1999 and 2000.

Selected Financial Data

The following selected historical statement of operations for the three years ended May 31, 2006, 2005 and 2004 and balance sheet as of May 31, 2006 and 2005 have been derived from the financial statements of the Company that are included elsewhere in this Form 10-KSB and that have been audited by Sherb and Co. LLP (except as noted below) whose reports with respect to the financial statements are also included elsewhere in this Prospectus. This information should be read in conjunction with the financial statements and notes to the financial statements appearing elsewhere in this Form 10-KSB and Management's Discussion and Analysis of Financial Condition and Results of Operations .

Liquidity and Financial Resources

As of May 31, 2006, the Company had \$3,541,013 in current liabilities, which includes loans (including interest) that are now due totaling \$2,479,928, which were used to fund the Company's operations. These loans are principally to shareholders of the Company. It had accounts payable and accrued expenses of \$576,519 and accrued taxes of \$484,566.

Of the principal loans outstanding, \$1,120,958 is held by one person that has properly perfected security interest against the Company's remaining assets, being all its intangible property.

The Company is planning to increase its royalty revenue and use excess cash proceeds to pay down its debt while it continues to pursue a new business that could be merged with the Company. (See **Executive Summary**). With any merger the Company will seek to refinance its debt by either paying off all debt in cash or an offer of cash and stock. Although the Company is required to carry its intangible property at a net value of \$440,159, it believes that the fair market value for these assets are much higher. As such, the Company believes that a refinancing that would enable creditors to receive cash and some additional equity in the company will eliminate all debts.

Until such time as the Company shall merge with another entity, its current cash flow is sufficient to meet its fixed monthly expenses.

Inflation and Changing Prices

The Company no longer manufactures its products and is no longer subject to risks associated with inflation or substantial price increase in the near future.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses, and related disclosure on contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions and conditions.

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and potentially result in materially different results under different assumptions and conditions. We believe that our critical accounting policies are limited to those described below. For a detailed discussion on the application of these and other accounting policies see our note 2 to our financial statements.

Long-Lived Assets (including Tangible and Intangible Assets)

We acquired businesses in recent years, which resulted in tangible assets being recorded. The determination of the value of such intangible assets requires management to make estimates and assumptions that affect our financial statements. We assess potential impairment to the intangible and tangible assets on a quarterly basis or when evidence that events or changes in circumstances indicate that

11

the carrying amount of an assets may not be recovered. Our judgments regarding the existence of impairment indicators, if any, and future cash flows related to these assets are based on operational performance of our business, market conditions and other factors.

Accounting for Income Taxes

As part of the process of preparing our financial statements we are required to estimate our income taxes. Management judgment is required in determining our provision of our deferred tax asset. We recorded a valuation for the full deferred tax asset from our net operating losses carried forward due to the Company not demonstrating any consistent profitable operations. In the event that the actual results differ from these estimates or we adjust these estimates in future periods we may need to adjust such valuation recorded.

Going Concern

The financial statements of the Company have been prepared assuming that the Company will continue as a going concern. The Company has had negative working capital for each of the last two years ended May 31, 2006 and 2005. The Company has recently relinquished title to its property and equipment due to default of its bank line of credit and mortgage on its property. The Company is in arrears with paying payroll taxes for several months. Those conditions raise substantial doubt about the abilities to continue as a going concern. The financial statements of the Company do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stockholders and Directors
 American Home Food Products, Inc.
 Bronxville, New York

We have audited the accompanying balance sheet of American Home Food Products, Inc. as of May 31, 2006, and the related statements of operations, shareholders' deficiency, cash flows for each of the years ended May 31, 2006 and 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of American Home Food Products, Inc. as of May 31, 2006, and the results of its operations and its cash flows for each of the years ended May 31, 2006 and 2005, in conformity with accounting principles generally accepted in the United States.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has suffered recurring losses from operations, including a net loss of approximately \$.3 million for the year ended May 31, 2006, and has a working capital deficiency as of May 31, 2006. These factors raise substantial doubt the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

AMERICAN HOME FOOD PRODUCTS, INC.

NOTES TO FINANCIAL STATEMENTS

YEARS ENDED MAY 31, 2006 AND 2005

1. DESCRIPTION OF BUSINESS

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

American Home Food Products, Inc. (the Company) currently receives a monthly royalty from the business of manufacturing and marketing a diversified line of construction products including pre-packaged concrete repair, grouting and patching products and masonry waterproofing products. The principal markets for the Company's products are retailers, construction professionals and distributors located through the United States and in certain areas of Canada.

2. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

a. Basis of Presentation - The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has incurred a net loss of \$306,621 for the year ended May 31, 2006 and a net loss of \$382,211 for the year ended May 31, 2005. Additionally the Company had a net working capital deficiency, a shareholders' deficiency and negative cash flow from operations for the years ended May 31, 2006 and 2005. The Company is also in arrears with paying payroll taxes and in default with certain of its debt holders. These factors raise substantial doubt as to the Company's ability to continue as a going concern. Management expects to incur additional losses in the foreseeable future and recognizes the need to raise capital to achieve their business plans. The accompanying financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

b. Impairment of Long-Lived Assets - The Company reviews long-lived assets, certain identifiable assets and goodwill related to those assets on a quarterly basis for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. Any impairment losses have been recorded in the statement of operations.

c. Fair Value of Financial Instruments - The carrying value of cash and cash equivalents, accounts receivable, other receivables, accounts payable and accrued expenses approximate their fair values based on the short-term maturity of these instruments. The carrying amounts of long-term debt were also estimated to approximate fair value.

d. Revenue Recognition - Revenue is recognized when the product is shipped by the Licensee to its customer. Allowances for estimated bad debts, sales returns and allowances are provided when sales are recorded.

e. Advertising Costs - All advertising costs, excluding cooperative advertising programs, are expensed as incurred or the first time the advertisement takes place. The Company establishes an allowance for cooperative advertising costs at the time the related sale is recognized. Advertising expenses charge to operations for the years ended May 31, 2006 and 2005 amounted to approximately \$5,133 and \$3,583, respectively.

F-7

f. Loss Per Share - Basic net loss per common share is computed by dividing net loss by the weighted average number of shares of common stock outstanding. For the years ended May 31, 2006 and 2005, diluted loss per share is the same as basic loss per share since the inclusion of stock operations and warrants would be antidilutive.

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

g. Stock-Based Compensation - The Company accounts for its stock-based compensation plans under Accounting Principles Board Opinion 25, (APB25) Accounting for Stock Issued to Employees and the related interpretation, for which no compensation cost is recorded in the statement of operations for the estimated fair value of stock options issued with an exercise price equal to the fair value of the common stock on the date of grant. Statement of Financial Accounting Standards No. 123 (SFAS 123) Accounting for Stock-Based Compensation, as amended by Statement of Financial Accounting Standards No. 148 (SFAS 148) Accounting for Stock-Based Compensation Transition and Disclosure, requires the companies, which do not elect to account for stock-based compensation as prescribed by this statement, to disclose the pro-forma effects on earnings and earnings per share as if SFAS 123 has been adopted. No options or warrants have been granted to employees, officers and directors during fiscal years ended 2006 and 2005. Effective June 1, 2006, the Company has adopted SFAS 123R.

h. Use of Estimates The preparation of financials statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

i. Segment Information SFAS No. 131, Disclosure About Segments of an Enterprise and Related Information, defines operating segments as components of an enterprise for which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Based on the way it organizes its business for making operating decisions and assessing performance, the Company has determined that it has a single reportable operating segment.

j. Recent Accounting Pronouncements -

FASB 123 (revised 2005) Share-Based Payments

In December 2004, the FASB issued a revision to FASB Statement No. 123, Accounting for Stock Based Compensation. This Statement supercedes APB Opinion No. 25, Accounting for Stock Issued to Employees, and its related implementation guidance. This Statement establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. This Statement focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. This Statement does not change the accounting guidance for share-based payment transactions with parties other than employees

F-8

provided in Statement 123 as originally issued and EITF Issue No. 96-18, Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services. This Statement does not address the accounting for employee share ownership plans, which are subject to AICPA Statement of Position 93-6, Employers Accounting for Employee Stock Ownership Plans.

A nonpublic entity will measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of those instruments, except in certain circumstances.

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

A public entity will initially measure the cost of employee services received in exchange for an award of liability instruments based on its current fair value; the fair value of that award will be re-measured subsequently at each reporting date through the settlement date. Changes in fair value during the requisite service period will be recognized as compensation cost over that period. A nonpublic entity may elect to measure its liability awards at their intrinsic value through the date of settlement.

The grant-date fair value of employee share options and similar instruments will be estimated using the option-pricing models adjusted for the unique characteristics of those instruments (unless observable market prices for the same or similar instruments are available).

Excess tax benefits, as defined by this Statement, will be recognized as an addition to paid-in-capital. Cash retained as a result of those excess tax benefits will be presented in the statement of cash flows as financing cash inflows. The write-off of deferred tax assets relating to unrealized tax benefits associated with recognized compensation cost will be recognized as income tax expense unless there are excess tax benefits from previous awards remaining in paid-in capital to which it can be offset.

The notes to the financial statements of both public and nonpublic entities will disclose information to assist users of financial information to understand the nature of share-based payment transactions and the effects of those transactions on the financial statements.

The effective date for public entities that do not file as small business issuers will be as of the beginning of the first fiscal year that begins after June 15, 2005. For public entities that file as small business issuers and nonpublic entities the effective date will be as of the beginning of the first fiscal year that begins after December 15, 2005. Management intends to comply with this Statement at the scheduled effective date for the relevant financial statements of the Company.

FIN 47 Accounting for Asset Retirement Obligations

In March 2005, FASB Interpretation No.47 FIN 47 was issued, which clarifies certain terminology as used in FASB Statement No. 143, Accounting for Asset Retirement Obligations. In addition it clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. FIN 47 is effective

F-9

no later than the end of fiscal years ending after December 15, 2005. Early adoption of FIN 47 is encouraged. Management believes the adoption of FIN 47 will have no impact on the financials of the Company, once adopted.

FASB 154 - Accounting Changes and Error Corrections

In May 2005, the FASB issued FASB Statement No. 154, which replaces APB Opinion No.20 and FASB No. 3. This Statement provides guidance on the reporting of accounting changes and error corrections. It established, unless impracticable retrospective application as the required method for reporting a change in accounting principle in the absence of explicit transition requirements to a newly adopted accounting principle. The Statement also provides guidance when the retrospective application for reporting of a change in accounting principle is impracticable. The reporting of a correction of an error by restating previously issued financial statements is also addressed by this Statement. This Statement is effective for financial statements for fiscal years beginning after December 15, 2005. Earlier application is permitted for accounting changes and corrections of errors made in fiscal years beginning after the date this Statement is issued. Management believes this Statement will have no impact on the financial statements of the Company once adopted.

FASB 155 Accounting for Certain Hybrid Financial Instruments

In February 2006, the FASB issued FASB Statement No. 155, which is an amendment of FASB Statements No. 133 and 140. This Statement; a) permits fair value re-measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, b) clarifies which interest-only strip and principal-only strip are not subject to the requirements of Statement 133, c) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, d) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives, e) amends Statement 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. This Statement is effective for financial statements for fiscal years beginning after September 15, 2006. Earlier adoption of this Statement is permitted as of the beginning of an entity's fiscal year, provided the entity has not yet issued any financial statements for that fiscal year. Management believes this Statement will have no impact on the financial statements of the Company once adopted.

FASB 156 Accounting for Servicing of Financial Assets

In March 2006, the FASB issued FASB Statement No. 156, which amends FASB Statement No. 140. This Statement establishes, among other things, the accounting for all separately recognized servicing assets and servicing liabilities. This Statement amends Statement 140 to require that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable. This Statement

F-10

permits, but does not require, the subsequent measurement of separately recognized servicing assets and servicing liabilities at fair value. An entity that uses derivative instruments to mitigate the risks inherent in servicing assets and servicing liabilities is required to account for those derivative instruments at fair value. Under this Statement, an entity can elect subsequent fair value measurement to account for its separately recognized servicing assets and servicing liabilities. By electing that option, an entity may simplify its accounting because this Statement permits income statement recognition of the potential offsetting changes in fair value of those servicing assets and servicing liabilities and derivative instruments in the same accounting period. This Statement is effective for financial statements for fiscal years beginning after September 15, 2006. Earlier adoption of this Statement is permitted as of the beginning of an entity's fiscal year, provided the entity has not yet issued any financial statements for that fiscal year. Management believes this Statement will have no impact on the financial statements of the Company

once adopted.

3. CONCENTRATION OF CREDIT RISK

The Company's accounts receivable and royalty revenues are concentrated 100% with one customer.

4. ROYALTY AGREEMENT

On January 31, 2003, the Company entered into a licensing agreement, until December 2005, with C.G.M., Inc. of Ben Salem, Pennsylvania (Licensee), to manufacture, market and distribute the Company's Por-Rok, Dash Patch and Sta-Dri products in exchange for monthly royalty payments ranging from 15% to 25% of the net invoice value to the customer. The Licensee purchased at cost the inventory on hand from the Company, payable in three installments through March 31, 2003. Although the Licensee had the right to terminate the agreement within 180 days from the commencement date of the agreement, the Licensee did not exercise that right. Had the Licensee elected to terminate this licensing agreement, the Company would have been obligated to purchase all inventory that cannot be used by the Licensee due to the termination of the licensing agreement. Licensor reserves the right to terminate the licensing agreement for the following reasons; failure to ship a minimum of \$375,000 of merchandise in two consecutive quarters, Licensee having become subject to a 50% change in control, Licensee becoming subject to involuntary or voluntary bankruptcy.

5. DEBT AND EQUITY TRANSACTION

In January 2005, the Company authorized a reverse stock split of seven shares of common stock for one share of common stock. All related per share and common share presentation have been adjusted to compensate for such reverse stock split.

In late November 2005, a judgment creditor served a writ of attachment on the Company's licensee. In January 2006, the parties reached an agreement whereby the creditor agreed to refrain from any further litigation and to limit the judgment to \$400,000 in exchange for a

F-11

monthly payment of interest on the creditor's original loan to the Company and the Company's commitment to pay the judgment upon the earlier of the recapitalization of the Company or September 30, 2006. The parties further agreed that the warrant to purchase 600,000 shares of common stock (pre-split) which the creditor had received as part of the original transaction would be cancelled and that the Company would issue to the creditor 150,000 shares of common stock (post-split), for which a \$27,000 expense was recorded. (See **Subsequent Events.**)

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

In May 2006, the Company issued 5,000 shares of stock to a lender in exchange for a loan to the Company for which a \$600 expense was recorded.

6. ACCRUED EXPENSES AND OTHER LIABILITIES

As of May 31, 2006, accrued expenses and other liabilities consist of the following:

Accrued interest payable	\$	609,925
Other accrued		105,449
	\$	715,374

7. INTANGIBLES

Intangibles arose in connection with the acquisitions of Arm Pro in September 1998, and with the acquisition of Allied / Por-Rok lines in August 1999 and Sta-Dri in August 2000. The intangible assets have been re-characterized pursuant to SFAS 142 from Goodwill to be Intangibles, since such intangibles are actually comprised of trademarks, acquired proprietary technology and customer lists. These intangibles are being amortized over a fifteen-year life on a straight-line basis. The Company continues to periodically review these long-lived assets for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. Accumulated amortization at May 31, 2006 was \$317,547. The amortization expense will approximate \$50,000 per annum for the next five years.

8. INCOME TAXES

At May 31, 2006, the Company has available unused net operating loss carryforward (NOL) of approximately \$11,200,000 that may be applied against future taxable income and expire at various dates through 2025. The Company has a deferred tax assets arising from such net operating loss deductions and has recorded a valuation allowance for the full amount of such deferred tax asset since the likelihood of realization of the tax benefits cannot be determined.

	2006
Deferred tax asset:	
Net operating loss carryforward	\$ 3,808,000
Valuation allowance	(3,808,000)
Net deferred tax asset	\$

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

A reconciliation of the statutory federal income tax benefit to actual tax benefit is as follows:

	2006	2005
Statutory federal income tax benefit	\$104,000	\$130,000
Income tax benefit not utilized	\$(104,000)	\$(130,000)
Actual tax benefit		

If the Company has a greater than 50% change in ownership of certain stock holdings by shareholders of the Company pursuant to Section 382 of the Internal Revenue Code, the net operating losses may be limited. Currently no such evaluation has been performed. The Company has not filed its federal or state income tax returns for May 31, 2005 or May 31, 2006.

9. LONG TERM DEBT

At May 31, 2006, long-term debt consists of:

Notes payable (a)	\$ 1,120,958
Debenture payable (b)	125,000
Notes payable (c)	400,000
Notes payable affiliate (d)	18,548
	1,664,506
Less: Current portion	1,664,506
	\$

The company is in default of substantially all of the aforementioned debt, as such debt has matured or is being litigated.

- a) From December 2000 through May 2002, the Company raised \$1,120,958 from an outside investor. The notes payable bear interest at 10% per annum and the principal plus accrued interest is due on demand. The notes payable were secured by a subordinated security interest in the Company's property, plant and equipment. The notes payable are due to parties associated with a director of the Company and provide the holder with piggyback registration rights.

F-13

-
- b) Included in long-term debt are debentures owing to a stockholder of the company, Quilcap, Corp., in the amount of \$125,000. This debenture from February 25, 1999, bears interest at 15% per annum and matured on May 31, 1999.
- c) In May and June 2002, the Company raised \$325,000 from outside investors. The note payable bears interest at 10% per annum and the principal plus accrued interest was due on July 23, 2002, by which time the parties had expected to close a sale-leaseback of the Company's property. In connection with this loan the Company issued 600,000 stock options as consideration for the financing and recorded as debt discount \$16,000, of which \$1,600 has been expensed. The investors aborted the sale-leaseback transaction

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

immediately prior to closing. In April 2005, the investors commenced litigation against the Company and its president for repayment of the loans. In January 2006, the parties reached an agreement whereby the creditor agreed to refrain from any further litigation and to limit the judgment to \$400,000 in exchange for a monthly payment of interest on the creditor's original loan to the Company and the Company's commitment to pay the judgment upon the earlier of the recapitalization of the Company or September 30, 2006. The parties further agreed that the option to purchase 600,000 shares of common stock (pre-split) which the creditor had received as part of the original transaction would be cancelled and that the Company would issue to the creditor 150,000 shares of common stock (post-split), for which a \$27,000 expense was recorded.

- d) Included in long-term debt is a revolving non-interest bearing loan owing to AHF Acquisition Corp. (an affiliate) in the amount of \$18,548. AHF Acquisition Corp. provides monthly working capital to the Company which is immediately paid upon receipt of the following month's royalty payment.

10. SHAREHOLDERS DEFICIENCY

Common Stock

- a. During fiscal 1996, former management of the Company issued 257,143 shares for an amount that present management is unable to determine. The Company has been contacting the registered shareholders to determine if appropriate consideration was received for these shares. The shares have been recorded as outstanding with no consideration received for their issuance. During the years ended May 31, 1999 and 1998, a total of 17,143 and 69,107 shares of common stock, respectively, were returned by the registered shareholders and have been canceled by the Company. The Company intends to continue to pursue litigation against the remaining shareholders that it alleges have received securities without paying fair consideration to the Company.
- b. Equity transactions during fiscal year 2005 were as follows:

In January 2005, the Company authorized a reverse stock split of seven shares of common stock for one share of common stock. All related per share and common share presentation have been adjusted to compensate for such reverse stock split.

F-14

-
- c. Equity transactions during fiscal year 2006 were as follows:

The Company issued 5,000 shares of common stock to an investor who loaned the company money in during fiscal 2006.

The Company issued 150,000 shares of common stock to a creditor in connection with a settlement agreement entered in April 2006.

11. STOCK OPTIONS

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

The following table summarizes the activity with regard to options and warrants for the years ended May 31, 2005 and 2006. No options or warrants were granted, cancelled or exercised in fiscal 2005.

	Stock Options			Warrants		
	Options	Exercise Price	Exercisable	Warrants	Exercise Price	Exercisable
May 31, 2005	0	0	0	78,571	0.49	78,571
Options/Warrants Expired	0	0	0	(78,571)	0.49	(78,571)
May 31, 2006	0	0	0	0	0	0

13. COMMITMENTS AND CONTINGENCY

- a. The Company leased an automobile, telecommunication and reproduction equipment under long-term lease agreements. These lease agreements require cumulative monthly payments of approximately \$880 per month for the terms of the respective leases expiring between December 2003 and February 2005. All leases expired, without renewal, and no further commitments exist.

- b. The Company has a licensing agreement for certain concrete related products, including an admixture that is capable of enhancing the basic characteristic of cementitious products. The Company is obligated to pay royalties based on a percentage of sales, subject to an annual guaranteed minimum royalty. Currently, the Company has not had to pay royalties as the licensed products are still in the development stage and therefore have not been ready for sale to customers. Furthermore, the Company has had several discussions with the licensor who has agreed to defer the minimum royalty payments until the Novacrete Admixture product emerges from the research and development stage.

- c. During fiscal 1997, a shareholder commenced an action against the Company and its former President to enjoin the Company and the former President from taking any action that would restrict the sale of common stock that he allegedly owns. In the opinion of management, this action is without merit and will not have a material adverse effect on the Company's financial position or results of operations.

F-15

-
- d. The Company is involved in several lawsuits arising from the non-payment of recorded payables including the non-payment of royalties to a former shareholder for which a \$95,000 judgment has been rendered against the Company.

 - e. The Company operates from the residence of its chief executive officer rent free.

14. SUBSEQUENT EVENT

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

In January 2006, the Company and a judgment creditor reached an agreement whereby the creditor agreed to refrain from enforcing its judgment in exchange for a monthly payment of interest on the creditor's original loan to the Company and the Company's commitment to pay the judgment upon the earlier of the recapitalization of the Company or September 30, 2006. In September 2006, the judgment creditor agreed to extend the agreement to December 31, 2006. In exchange for the extension, the Company agreed to increase the monthly interest payment and to issue 40,000 shares of common stock to the creditor.

F-16

Item 8. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

The Company has engaged the certified public accounting firm of Sherb & Co., LLP as its outside auditors to audit the company's annual financial statements for the fiscal year ending May 31, 2006 and has had no disagreements with them.

Item 8a. Controls and Procedures

Our principal executive officer and principal financial officer, who is the sole officer and employee, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on this evaluation, the principal executive officer and principal financial officer have concluded that the controls and procedures are effective in providing reasonable assurance that the information required to be disclosed in this report has been recorded, processed, summarized and reported as of the end of the period covered by this report.

During the period covered by this report, there have not been any significant changes in our internal controls or, to our knowledge, in other factors that could significantly affect our internal controls.

PART III

Item 9. Directors and Executive Officers, Promoters and Control Persons; Compliance with Section 16(a) of the Exchange Act

The following provides certain information concerning the directors and executive officers of the Company and its subsidiaries as of May 31, 2006.

Edgar Filing: American Home Food Products, Inc. - Form 10KSB

<u>Name</u>	<u>Age</u>	<u>Position</u>
William K. Lavin	62	Chairman, Secretary
Daniel W. Dowe	44	Director, President and Chief Executive Officer
Edward J. Malloy	70	Director
Kevin DeMatteis	42	Director

William K. Lavin. Mr. Lavin became a director in October, 1997 and currently operates his own consulting business that he formed in 1994. Before forming his firm, he was Chief Executive Officer of Woolworth Corporation (renamed Venator) from 1993 to 1994 and immediately before that position he served as Woolworth's Chief Administrative and Financial Officer. Mr. Lavin also serves on the board of directors of the Allegheny Corporation (NYSE:Y) and Chicago Title Corporation (NYSE:CTZ).

Daniel W. Dowe. Mr. Dowe became a director in March, 1997, Acting President on November 17, 1997 and President and Chief Executive Officer on April 1, 1998. He was the founder of Dowe & Dowe, a New York City-based law firm that provided legal services to the Company and was focused on corporate and securities law. Before practicing law, he was employed by Alliance Capital Management Company, Salomon Brothers (Salomon Smith Barney, a division of Citigroup, Inc.) and J.P. Morgan Bank.

13

Edward J. Malloy. Mr. Malloy became a director of the Company in January, 1998. Since 1993 he has been President of the Building and Construction Council of Greater New York. Mr. Malloy represents the interests of over 200,000 laborers involved in the building trades in the Greater New York City area. He is responsible for developing building projects in both the public and private sectors to ensure an adequate level of work for his union members. Mr. Malloy brings to the Company an extensive level of contacts and industry experience.

Kevin DeMatteis. Mr. DeMatteis became a director of the Company in January 2001. Mr. DeMatteis is part of the DeMatteis Development Organization, which is a closely-held developer of large scale real estate projects in the United States and in international markets.

Committees of the Board of Directors

The Board of Directors does not have a standing audit or nominating committee or any other committees performing similar functions. The Company does have a compensation committee consisting of Messrs. Lavin and Malloy (the Compensation Committee). The Compensation Committee is responsible for assuring that the officers and key management of the Company are effectively compensated in terms of salaries, incentive compensation and benefits which are internally equitable and externally competitive. The Compensation Committee is responsible for setting the compensation of the executive officers.

Executive Officers

At present, Mr. Dowe is the Company's only executive officer. As a result, Mr. Dowe handles all financial matters with certain bookkeeping and administrative duties being performed by clerical workers and certain accounting and tax-related matters being performed by outside professionals.

Item 10. Executive Compensation

The following table shows all remuneration in excess of \$100,000 paid by the Company and its subsidiaries through May 31, 2006, to all directors and officers:

Table 1
Summary Compensation Table

<u>Annual compensation</u>		Compen- Salary (\$)	Bonus (\$)	Other Annual Restricted Stock Comp. (\$)	Securities Underlying Options Awards (#)	Long-Term Compensation <u>Awards</u>		
						SARs #	Other LTIP Payout (\$)	All Other (\$)
Name and Principal Position	Year							
Daniel Dowe President	2006	\$180,000						
	2005	\$180,000						
	2004	\$180,000						

14

Item 11. Security Ownership of Certain Beneficial Owners

DIRECTORS AND EXECUTIVE OFFICERS

The following table shows the amount of common stock owned as of May 31, 2006 by each director and officer and affiliates and by all directors and officers as a group. Each individual has beneficial ownership of the shares which are subject to unexercised stock options and stock warrants held by him, and each individual has sole voting power and sole investment power with respect to the number of shares beneficially owned:

Table 1**Security Ownership of Certain Beneficial Owners and Management**

Name and Address of Beneficial owner (1)	Amount and Nature of Beneficial Ownership	Percent of Class	
Daniel W. Dowe Director, President	409,956	11.00	%
William K. Lavin Chairman, Secretary	15,045	0.4	%
Kevin DeMatties, Director	28,571	0.8	%
Edward J. Malloy, Director	9,331	0.3	%
All Directors and Officers as a group	462,903	12.5	%

1. As of May 31, 2006 there were 3,761,455 shares issued and outstanding and 3,761,455 on a fully diluted basis. Percentages are stated on a fully diluted basis.

Director Compensation

None of the Company's directors are compensated for serving as directors.

Table 2**Security Ownership of Certain Beneficial Owners****(Non-Management)**

Name and Address of Beneficial owner	Amount and Nature of Beneficial Ownership	Percent of Class
Not Applicable.		

Item 12. Related Transactions

Mr. Dowe's spouse, Janet L. Dowe periodically provided legal and administrative services to the Company.

David A. Dowe who is the brother of Daniel W. Dowe has made loans to the company and has purchased common stock under the same terms and conditions as other non-affiliated investors that either loaned money to the company or purchased securities.

With respect to the foregoing transactions, the Company believes that the terms of these transactions were as fair to the Company as could be obtained from an unrelated third party. Future transactions with affiliates including loans will be on terms no less favorable than could be obtained from unaffiliated parties and will be approved by a majority of the independent disinterested members of the board of directors.
