Depreciations	209.0
Compensation of subsidised assets depreciation	(18.1)
Amortization of investments (goodwill)	23.4
Net provisions	(6.4)
Interests on hydrological correction account	2.5
Other	0.3
Interests and other financial expenses / (income)	86.7
Change in operating working capital	(48.2)
Capital expenditures	(143.3)
Net operating cash flow	331.8
Divestments of fixed assets	3.9
Financial divestments / (investments)	(3.6)
Interests and other financial expenses (income)	(86.7)
Dividends paid and results distributed to employees	
Other changes in non-operating working capital	(115.1)
Decrease / (increase) in financial debt	130.3

The EDP's Group net operating cash-flow in the 1Q2004 amounted to 331.8 million.

The core business is still the main contributor to the Group's cash flow with EDP Produção accounting for 67% (223.2 million) and EDP Distribuição accounting for 23% (75.2 million)

The cash-flow generation at the core business enabled the EDP Group to reduce its financial debt in 130.3 million from 7,492.7 million in 2003 to 7,362.5 million in the 1Q2004.

Capital Expenditures

Capital expenditures (m)	1Q2004	1Q2003
EDP Produção	8.3	39.7
Renewables	10.8	3.1
EDP Distribuição	63.4	59.0
(-) Subsidies in cash	16.0	14.6
(=) EDPD cash investments	47.4	44.5
Hidrocantábrico (40%)	25.8	19.5
Brazil	38.5	48.0
Other	12.5	24.1
Total	143.3	178.9

The EDP Group's capital expenditure totaled 143.3 million in the 1Q2004, down 20% year-on-year. Note that the figures presented correspond to the EDP Group's cash out flow on operating investments, considering the consolidation method of each subsidiary.

EDPP's investment fell 79% year-on-year, following a sharp decrease in the investment of a new CCGT (TER) Portugal. The first TER 400 MW unit started industrial service on the 14th February 2004 and the second 400 MW unit is forecasted to start operations in October 2004. EDP will build a third 400 MW unit in TER, which construction should start by the 2H2004 and concluded in 2006.

Within our electricity generation activity, investments in renewables increased to 10.8 million in the 1Q2004 from the 1Q2003 following the construction of three new wind farms (Alto do Talefe, Fonte da Quelha and Padrela) with a total installed capacity of 31.5 MW.

HC's investment increased 32.1% due to 34.1 million of investments made by the company at the Albacete wind farm (124 MW), which is forecasted to start industrial service in the 4Q2004. HC has already invested 60.3 million in this project.

The bulk of investment at EDPD was in the distribution network. These investments, aimed at improving the quality of service, enabled a drop in the equivalent interruption time, from 92 min in 1Q2003 to 50 min in the 1Q2004.

Most of our capex in Brazil is related to investments made in electricity distribution network at the concession areas of Bandeirante, Escelsa and Enersul. Capex in Brazil decreased 19.8% due to lower investments at Fafen and Peixe Angical power plants in the 1Q2004.

Capex in other activities decreased from 24.1 million in the 1Q2003 to 12.5 million in the 1Q2004 as a result of a decrease in our telecommunications activity operating investments, as the major investment required for the expansion of the network have already been completed, and a 10 million decrease in our IT activities operating investment as a result of the company's efforts into reducing the levels of investment.

Consolidated Income Statement

Consolidated profit and loss account (m)	1Q2004	1Q2003	Δ%
Electricity sales	1,584.9	1,531.9	3.5%

Compensation of deprec. of part-funded fixed assets	(18.1)	(18.5) ⁽¹⁾	2.2%
Provisions	19.9	27.3	-27.2%
Operating costs and expenses, net	1,474.7	1,403.9	5.0%
Operating margin	323.9	253.2⁽¹⁾	27.9%
Interest and related income / (expenses)	(94.6)	(71.5)	-32.3%
Other non-operating income / (expenses)	(7.1)	4.9 ⁽¹⁾	
Profit before taxes and minorities	222.2	186.6	19.1%
Provision for income taxes	76.9	67.4	14.0%
Provision for deferred taxes	(28.1)	(6.4)	-337.3%
Minority interests	(7.3)	(6.9)	-6.4%
Consolidated net profit	180.8	132.5	36.5%

EDP Group reported a 19.1% growth in the 1Q2004 at the Profit Before Taxes and Minorities mostly due to:

Entry into industrial service of the new 400 MW TER CCGT;

The 6.3% increase in electricity consumption in Portugal and 4.1% in Spain;

The first time consolidation of Naturcorp, since August 2004, following Hidrocontábrico's acquisition of this Basque Gas Company in July 2004;

The 2.4% increase in electricity demand in our distribution concession areas in Brazil, as well as last year's tariff revisions;

Cost control continued to bear fruits. Supplies and services were down 3.1%, while personnel costs fell 3.8% following the introduction of the HR Restructuring Program.

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

Interest and related income / (expenses) decreased since investment income received in the period was significantly lower. This is due to the fact that: i) dividends from BCP, which in 2003 were received in the 1Q, in 2004 were only received in the 2Q; and ii) following EDP's divestment from Iberdrola in the 2H2003, the dividend that was received in the 1Q2003, was not received in the 1Q2004.

- (1) The Compensation of depreciation of partly-funded fixed assets amounted to 18.1 million in the 1Q2004 and 18.5 million in the 1Q2003. Prior to 2004 we presented this item as an other non-operating income. In the 1Q2004, we have changed the presentation of Compensation of depreciation of partly-funded fixed assets which is now presented as an operating item. As such, our 1Q2003 Operating margin - that otherwise would have been 234.7 million - and our 1Q2003 Other non-operating income - that otherwise would have been 23.4 million - have been restated accordingly. This presentation change has no impact on the company's Profit before taxes and minorities or Net profit.

Fuel (m)	1Q2004	1Q2003	Δ%
Coal	36.1	27.1	33.1%

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

Fuel-oil	9.2	8.0	14.8%
Natural gas	4.1	2.3	77.8%
Diesel	0.2	0.2	29.9%
CPPE (PES)	49.6	37.6	31.9%
Natural gas (TER, Soporgen & Energin)	25.9	8.8	194.7%
Total EDP Produção	75.5	46.4	62.8%
Electricity purchases (m)	1Q2004	1Q2003	Δ%
Trading, autoconsumption & cogeneration	6.7	5.0	34.5%

In the 1Q2004, EDP's total emission reached 7,188 GWh, of which 51% was hydro generation (down from 71.5% in the 1Q2003). The first 400 MW TER CCGT unit, which started industrial service on the 14th February 2004, contributed with 596 GWh to total emissions to the network.

EDP's lower emission was due to lower rainfall in the 1Q2004 (hydro coefficient of 0.81 vs. 1.36 in the 1Q2004). Given that EDP owns nearly all the hydro capacity in Portugal, its contribution to the total energy delivered to the system fell from 75% in the 1Q2003 to 61% in the 1Q2004.

The PPA energy charge, the PPA component that allows for the pass-through to the tariffs of the fuel cost incurred by EDPP's power plants operating in the Public Electricity System, rose 41.2 % due to a higher utilization of EDPP's thermal power plants. EDPP was once again able to buy coal and fuel at a lower price than what it receives through the PPA energy charge (49.6 million vs. 56.3 million), which is based on the EU coal price index and the Platts index. EDPP's coal purchases benefited from long-term coal contracts that were negotiated before the rise in coal prices, as well as from the use of coal stocks at lower prices.

- (1) In the 1Q2003 the sales of the Hydro power plants with an installed capacity >10 MW were accounted in this item. In the 1Q2004 only the power plants <10 MW were accounted in this item (>10 MW are dispatch by the trading department).

EDP Produção

Profit and loss account (m)	1Q2004	1Q2003	Δ%
Electricity sales	332.7	284.9	16.8%

Compensation of deprec. of part-funded fixed assets	(1.0)	(1.0) ⁽¹⁾	-4.0%
Provisions	2.8	2.4	18.8%
Operating costs and expenses, net	176.8	148.8	18.8%
Operating margin	177.5	138.5⁽¹⁾	28.1%
Personnel	1Q2004	1Q2003	Δ%
Personnel costs (m)	29.8	29.6	0.8%
Number of employees	1,975	2,098	-5.9%
Average cost per employee (th)	15.1	14.1	7.1%
Capital expenditures (m)	1Q2004	1Q2003	Δ%
Binding generation	2.2	6.2	-65.3%
Non-binding generation	1.8	30.8	-94.1%
Other investments	0.7	1.4	-51.2%
Financial costs (capitalised)	3.7	1.3	187.4%
Capital expenditures	8.3	39.7	-79.0%

Revenues increased from 287.3 million in the 1Q2003 to 354.3 million in the 1Q2004 due to the higher revenues from the PPA Energy charge, the beginning of industrial operations of the new TER CCGT and an increase in revenues from services provided, which includes mostly intra-group transactions with EDP Energia related with the supply of electricity to non-binding customers.

The implementation of the Human Resources restructuring program at EDPP resulted in a reduction of 109 employees (mostly towards the end of 2003). However, personnel costs increased 0.8% year on year, reflecting the 2004 salary increase of 2.8%.

The transfer of the energy management into EDPP, following TER's operational start-up, in conjunction with an efficient fuel procurement and cost cutting, resulted in a 29.1% improvement in EDPP's Operating Margin to 177.5 million in the 1Q2004.

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

EDPP's investment fell 79% year-on-year, following a sharp decrease in the TER investment. However, the remaining investment in the second group of 400 MW of TER is expected to total approximately 130 million until the end of this year (the 2nd group will start operating in October 2004).

- (1) The Compensation of depreciation of partly-funded fixed assets amounted to 1.0 million in both the 1Q2004 and the 1Q2003. Prior to 2004 we presented this item as an other non-operating income. In the 1Q2004, we have changed the presentation of Compensation of depreciation of partly-funded fixed assets which is now presented as an operating item. As such, our 1Q2003 Operating margin - that otherwise would have been 137.5 million - has been restated accordingly. This presentation change has no impact on the company's Profit before taxes and minorities or Net profit.

Electricity purchases	565.1	590.1	-4.2%
Electricity gross profit	335.6	308.8	8.7%

Total electricity distributed reached 10,673 GWh in the 1Q2004, which represents an annual growth of 6.3%. In the BES, the continued transfer of MV clients to the NBES translated into a 1.8% decrease in energy sales. Between the 1Q2003 and the 1Q2004, EDPD gained 4 industrial clients and 20 HV clients that explain the 39.7% and 17.2% growth in VHV and HV energy sales, respectively.

EDPD's number of clients in the BES increased 1.4% to 5,749,919. In the NBES, EDP Energia achieved a 65.7% market share selling 963 GWh to 1,633 clients. Since February 2004, the eligibility threshold for the NBES was extended to the SLV clients. By the end of the 1Q2004, the number of clients with non-binding status totalled 2,935, out of which 2,250 were acquiring energy in the NBES.

Allowed revenues for energy acquisition activity relate mostly to the recovery of: (i) the 2002 differences between estimated and real EDPD's costs with energy acquisition in the non-binding system (12.5 million); (ii) the 2003 differences between estimated and real fuel costs for the LV segments (5.0 million) and (iii) costs with the tariff convergence mechanism.

Electricity purchases reflect a decrease in both the energy sales to the binding system and the estimates for fuel costs used by ERSE when calculating 2004 tariffs.

(1) Figures presented include Sales to EDP Group.

(2) BES - Binding Electricity System.

(3) NBES - Non-Binding Electricity System.

EDP Distribuição

Profit and loss account (m)	1Q2004	1Q2003	Δ%

Concession fees, calculated based on the previous year LV sales, reflect a 0.25 p.p. increase in the average rate paid to municipalities to 7.5%, and a 7.4% increase in LV Sales between 2002 and 2003.

Personnel costs decreased 6.4% during the period, reflecting the HR restructuring program started last year. The decrease in Pension Premiums that followed the 2004 actuarial study reflects: (i) the creation of a Regulatory Asset that covers early retirement responsibilities contemplated in the HR Restructuring Program at EDPD; (ii) the anticipation of the legal retirement age of early retirees. During the 1Q2004, 208 early retirees at EDPD opted to bring forward their retirement age.

Remunerations paid to early retirees within the scope of the HR Restructuring Program amounted to 3.2 million in the 1Q2004. Nevertheless, this cost was compensated with the amortisation of the Deferred Income created in 2003 for this purpose.

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

During the 1Q2004, EDPD reduced 39 employees, of which 6 were part of the restructuring program (negotiated dismissals). Negotiated dismissals implied an extraordinary cost of 1.3 million and a matching other non-operating income accounting for the increase of the Regulatory Asset.

- ⁽¹⁾ The Compensation of depreciation of partly-funded fixed assets amounted to 16.7 million in the 1Q2004 and 17.1 million in the 1Q2003. Prior to 2004 we presented this item as an other non-operating income. In the 1Q2004, we have changed the presentation of Compensation of depreciation of partly-funded fixed assets which is now presented as an operating item. As such, our 1Q2003 Operating margin - that otherwise would have been 36.7 million - has been restated accordingly. This presentation change has no impact on the company's Profit before taxes and minorities or Net profit.

-
- ⁽¹⁾ Includes Cash Subsidies.

Energy delivered to the Pool	3,633	3,143	15.6%
HC s market share in wholesale market	7.4%	6.8%	6.8 p.p.

Demand in the Spanish electricity market grew 4.1% versus 1Q2003, or 3.6% adjusted for working days and temperature effects. Due to a dry first quarter the hydrological coefficient dropped from 1.23 in the 1Q2003 to 0.76. Hidroantábriico was able to increase its net emission by 14.9% in the 1Q2004 not only because of a lower hydrological coefficient, but also due to: i) a higher net emission at the Aboño power plant because of higher availability (in the 1Q2003 Aboño I stopped for maintenance works); and ii) a higher net emission at CCGT Castejón as a result of a lower variable cost in the 1Q2004 vis-à-vis 1Q2003.

To compensate for the low prices, Hidroantábriico was able to account as a receivable 11.8 million of CTCs (40% consolidation at EDP amounts to 4.7 million). The increase of the average fuel costs due to a hike in the imported coal prices following an increase in shipping costs, put pressure on Hidroantábriico's generation margins. As for the supply activity, Hidroantábriico was able to increase its average selling price 4.3% to 57.6/MWh in 1Q2004, offsetting the modest increase in the pool price.

Overall, Gross Profit of the Generation and Supply activities decreased 8.7% mostly explained by the increase of the average fuel costs, which had a negative impact in Hidroantábriico of 19.0 million (40% consolidation at EDP amounts to 7.6 million). Nonetheless, this negative impact was partly offset by the increase in net emission (+ 8.7 million for Hidroantábriico / 40% consolidation at EDP amounts to 3.5 million) and a higher selling price in the generation activity (+ 1.6 million for Hidroantábriico / 40% consolidation at EDP amounts to 0.6 million).

(1) Includes wholesale market, ancillary services and capacity payment.

(2) Excluding hydroelectric emission.

Hidroantabrico - Electricity Distribution & Gas Activity

Electricity Distribution

According to the Decree Law (Real Decreto 1802/2003) that sets the revenues for the Spanish regulated electricity activities for 2004, out of the 2,823.4 million attributed to the Spanish electricity distribution activity, 90.1 million or 3.2% were allocated to Hidroantabrico.

The rise in the transmission revenue is related with new transmission grid that was put in service.

Gas distribution (GWh)	1Q2004	1Q2003	Δ%

Gas Distribution

The inclusion of Naturcorp in Hidrocarbónico since the 1st August 2003 had an impact of 5,466 GWh of gas distributed in the 1Q2004. In this period Hidrocarbónico reached a 7.3% market share of gas distributed in Spain.

According to the Law (Orden Eco/31/2004) that sets the revenues for the Spanish regulated gas activities for 2004, of the 1,091.6 million attributed to the Spanish gas distribution companies, 107.8 or 10% were allocated to Naturcorp and its subsidiaries. In terms of gas transport regulated revenues, 8.9 million were allocated to Naturcorp and its subsidiaries.

Gas Supply

Gas supplied had a strong increase as a result of the inclusion of Naturcorp since the 1st August 2003. In the 1Q2004 Hidrocarbónico was able to achieve a 5.7% share of the liberalised market (excluding supply to the electricity sector). In the total Spanish gas market, both regulated and non-regulated, Hidrocarbónico sold 5,200 GWh of gas, corresponding to a 7.0% market share (excluding supply to the electricity sector).

In the 1Q2004 the consumption in the Spanish gas sector increased 16%, explained mostly by the liberalised segment as a result of the increase of the generation of electricity based on CCGT technology. In addition, the low temperatures and the increase of the number of clients, particularly in the liberalised segment, also contributed to this growth.

⁽¹⁾ Operating data considers 100% of Naturcorp's gas distribution subsidiaries' figures, while all financial data considers the consolidation method.

Hidroantábrico

Profit and loss account - 40% (m)	1Q2004	1Q2003	Δ%

(-) Subsidies	1.1	1.9	-43.2%
Capital expenditures	25.8	17.6	46.7%

Operating margin in 1Q2004 was affected by:

the inclusion of Naturcorp;

higher fuel costs at the generation activity due to a rise of the imported coal prices;

the increase in electricity distribution regulated revenues;

lower network implementation costs associated with the markets outside Asturias, which partly offset the increase in the supplies and services;

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

the 172% increase of special regime net emission to 112 GWh, as a result of a higher wind-power capacity.

1Q2004's Net Profit is not directly comparable with the 1Q2003 since at the beginning of last year Hidrocantábrico accounted 25 million (40% consolidation at EDP amounts to 10 million) related to the tax benefit on the investment made in Castejón CCGT. In the 4Q2003, pursuant to IAS rules, the tax benefit accounted in the 1Q2003 was reverted and will be accounted during the Castejón CCGT plant's useful life.

⁽¹⁾ The Compensation of depreciation of partly-funded fixed assets amounted to 0.3 million in the 1Q2004 and 0.2 million in the 1Q2003. Prior to 2004 we presented this item as an other non-operating income. In the 1Q2004, we have changed the presentation of Compensation of depreciation of partly-funded fixed assets which is now presented as an operating item. As such, our 1Q2003 Operating margin - that otherwise would have been 18.0 million - and our 1Q2003 Other non-operating income - that otherwise would have been 2.0 million - have been restated accordingly. This presentation change has no impact on the company's Profit before taxes and minorities or Net profit

Note: Hidrocantábrico was proportionally consolidated in accordance with EDP's stake in Hidrocantábrico (40%).

Total electricity distributed by EDP's subsidiaries in the Brazilian market increased 2.4%, reflecting the increase in demand of almost 5% in Bandeirante and Enersul's regions, and the drop in consumption in Escelsa's concession area (especially in the residential segment) due to the mild temperatures this summer.

Regarding electricity sales to customers and gross profit, Bandeirante and Enersul had a remarkable performance on the back of 2003's tariff revisions. Escelsa's annual tariff adjustment (+17.30%) in August 2003 was not reflected at the gross profit level, which dropped 9.1% as a result of: i) a 2.0% decline in the consumption; and ii) the increase of federal taxes on revenues (PIS and COFINS) from 3.0% to 7.6% for all distribution companies, since February 2004.

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

On April 8th 2004 ANNEL granted, at Enersul's annual tariff adjustment, an average tariff increase of 17.02%:

- i) 4.60% is the pass through of the non-controllable costs to the final tariff and 1.68% is the adjustment of controllable costs to the IGP-M inflation index;
- ii) 2.60% is related to 50% of the deviation between the non-controllable costs settled in April 2002 and the true non-controllable costs incurred until April 2003;
- iii) 3.02 % is related to the deviation between the non-controllable costs settled in April 2003 and the true non-controllable costs incurred until April 2004;
- ivi) 4.94% is related to the partial amount of the tariff increase that was not granted in the last tariff revision (which is being recovered until 2007);
- iv) 0.18% is related to past costs incurred during the rationing programme.

⁽¹⁾ Includes the Regulatory Tariff Repositions, Taxes over Revenues, Non-Invoiced Electricity and other revenues

The Brazilian operations had a remarkable performance at the operating margin level following tariff revisions at Bandeirante and Enersul (October and April 2003, respectively), which allowed for a more adequate return on invested capital. The increase in consumption of almost 5% in these companies also contributed positively.

Escelsa will have its next tariff revision in August 2004 and a marked improvement in results is expected from then on.

The 24.8% increase in operating costs and expenses, is mostly due to the rise in personnel costs following annual salary adjustments of approximately 10% in the second half of 2003.

Note: the compulsory contribution for the Energy Development Account (regulatory contribution for the development of renewable energy, natural gas and national coal fired-power) was accounted for in the raw materials and consumables item since January 2004, due to its pass-through nature to the final tariff.

In Euro terms, operating margin had a stronger improvement due to the slight appreciation of the Real against the Euro compared to the same period last year. Average BRL/ in the 1Q2003 was 3.78 against 3.60 in the 1Q2004, representing a 5% rise of the Real in average terms.

Other non-operating income / (expenses)	(7.1)	4.9⁽¹⁾	

The fall of 23.1 million on the **Interest and related income / (expenses)** is mostly due to:

Edgar Filing: EDP ELECTRICIDADE DE PORTUGAL SA - Form 6-K

A drop in Investment Income explained by: i) the 7.0 million received in dividends, in 1Q2003, from our 3% stake in Iberdrola that we sold in the 2H2003; and ii) last year's 10.1 million received in dividends from BCP (4.36% stake) which this year were received in the second quarter (7.2 million).

In January 2003 EDP received 16.9 million from the semi-annual coupon of the 83% of Escelsa Senior Notes acquired by the end of 2002. The coupons are currently being accrued monthly as an interest receivable.

Net forex differences were 7.0 million lower mainly due to a stronger Real appreciation against the US Dollar in the 1Q2003 than in the 1Q2004, affecting the dollar denominated debt of the Brazilian subsidiaries (note: Escelsa's Senior Notes forex differences are offset in Group consolidation).

The 8.6 million improvement in Other is related to lower losses recorded in Bandeirante's financing contracts linked to the IGP-M price index (32.5% in March 2003 and 5.1% in March 2004).

Other non-operating income / (expenses) amounted to a 7.1 million loss in the 1Q2004, compared to a 23.4 million gain in the 1Q2003:

The 18 million compensation of the amortisation of subsidised assets, which had been considered an extraordinary gain last year, was accounted for as an operating item;

Other extraordinary gains/(losses) include a 9.0 million cost with compensations paid to early retirees that accepted the anticipation of the legal retirement age (see page 9 EDP Distribuição). This was partly offset by a 6.2 million tax recovery at Brazil.

- ⁽¹⁾ The Compensation of depreciation of partly-funded fixed assets amounted to 18.1 million in the 1Q2004 and 18.5 million in the 1Q2003. Prior to 2004 we presented this item as an other non-operating income. In the 1Q2004, we have changed the presentation of Compensation of depreciation of partly-funded fixed assets which is now presented as an operating item. As such, our 1Q2003 Other non-operating income - that otherwise would have been 23.4 million - have been restated accordingly. This presentation change has no impact on the company's Profit before taxes and minorities or Net profit.
