Orders booked in the quarter grew by 17% year-over-year and were flat sequentially at SEK 33.1 (28.3) b. Net sales in the quarter grew by 18% year-over-year to SEK 32.6 (27.6) b. and 16% sequentially as a result of ongoing 3G rollouts, continued GSM capacity expansions as well as upgrades to EDGE. Currency exchange effects negatively impacted sales by 6% year-over-year.

Edgar Filing: ERICSSON LM TELEPHONE CO - Form 6-K

Gross margin increased sequentially to 47.8% (35.1%) due to continued focus on operational excellence, higher volumes and a favorable product mix. The announced operating expense reduction target of an annualized run rate of SEK 33 b., was achieved at the end of this quarter, one quarter earlier than originally anticipated.

Income after financial items was SEK 7.8 (0.2) b. compared to SEK 4.3 b. in the first quarter, including a non-recurring positive effect of SEK 0.3 b. Net currency exchange effects, compared to rates one year ago, have had a negative impact of SEK -0.7 b. on operating income in the quarter.

Cash flow before financing was SEK 4.3 (5.1) b. Continued focus on workflow improvements has kept working capital close to flat despite the sales growth. The financial position improved consequently, with a net of financial assets and liabilities, i.e. net cash, of SEK 31.7 b.

CEO COMMENTS

Confidence has returned to the industry. 3G rollouts, GSM capacity expansions as well as EDGE upgrades creates momentum for us, says Carl-Henric Svanberg, president and CEO of Ericsson. With new and expansion contracts across all regions we are capitalizing on our technology leadership, our large installed base as well as our particularly strong position in high growth markets. Our competitive services offering is gaining operator recognition with eight new contracts for managed services and hosting.

We show healthy development in all technologies. Our organization's commitment to drive operational excellence creates strong results. Higher than anticipated sales drove an encouraging bottom line performance and it is our continued ambition to deliver best in class margins. We have now reached a point where targeted investments in R&D and customer support should further strengthen our leading position and ability to drive profitable growth.

The pace of 3G network rollout is accelerated by the growing number of handsets available. Experience from the introductory phase of WCDMA/CDMA2000 puts richer consumer offerings and enhanced system capacity in focus. We will leverage our 3G leadership by the introduction of Ericsson WCDMA Evolved, with HSDPA capabilities. This is a logical evolutionary step that will offer true mobile broadband with speeds of up to 14 Mbit/s.

It is clear that consumers want to use the same services irrespective of whether they are accessing them from a fixed or mobile network. Our end-to-end solutions, based on converged services and networks, support our customers in meeting these consumer demands. Our long experience in wireline, our leading wireless technology and our IP knowledge, are essential components in driving the convergence necessary to achieve ease-of-use and reachability for private as well as professional users.

We will reinforce our position as the leading infrastructure provider in the telecom industry through understanding of consumer needs, continued R&D leadership, operational excellence and by being the most innovative and responsive partner to our customers, concludes Carl-Henric Svanberg.

MARKET VIEW

Drivers for growth in both developed markets and in high growth markets continue to be positive. The traffic is steadily increasing as a result of new and richer services being offered and more competitive tariff schemes besides the continuously growing number of subscribers. Operators are increasing their focus on business development and activities aimed at growing revenues.

In developed markets, which are primarily capacity driven, continued 3G deployments, upgrades of GSM networks and rapid build-out of broadband access are driving the development. In addition there is a clear trend toward wireless/wireline convergence based on all-IP technologies. This will create efficiency gains, but equally important enable the new seamless services demanded by consumers.

Edgar Filing: ERICSSON LM TELEPHONE CO - Form 6-K

In high growth markets we see continued strong development both in subscriber additions and in usage. Investments in low cost coverage in these markets continue to be a strong driver. The cost efficient Ericsson Expander solution has been positively received and opens new business opportunities primarily in developing areas with a number of contracts signed in several countries around the world. In these markets there is also an often underestimated number of advanced users demanding services equivalent to those in developed markets.

Table of Contents

In Europe commercial launches of 3G is ongoing. By year-end WCDMA will be commercially launched across all of Western Europe. In addition, most operators in Europe are in the process of deploying EDGE. Though average minutes of use are substantially below the rest of the world, more attractive tariff schemes and an increasing number of new services should stimulate traffic growth.

The North American market shows healthy development. Along with convergence, operators in North America early on recognized the need to meet consumer demands for seamless services and the benefits of 3G technology. The consolidation among operators continues. The Cingular/AWS merger will create a strong player, however, the regulatory process is creating a normal temporary slow down in the AWS investments.

The subscriber growth in the Asia Pacific region continues, led by China and India, where India is on track to become the world's second largest market in number of mobile subscriptions. In parallel with the ongoing 3G license discussions in China, demand for coverage and capacity expansions in 2G and 2.5G networks remains strong. 3G is being rolled out in a number of markets in South East Asia along with continued demand for 2G and 2.5G.

Ten new WCDMA networks were commercially launched during the quarter, reaching a total of 37. During the quarter the number of WCDMA subscriptions grew from 4.4 million to almost 7 million. The number of CDMA2000 1X subscriptions has now reached more than 100 million.

Worldwide subscription penetration is 24% with a total of 1.5 billion subscriptions, of which close to 1.1 billion is in GSM. The global number of subscriptions has been estimated to pass two billion early 2007 with most of the increase coming from high growth markets. Worldwide subscription penetration in 2007 is estimated to reach 30%.

OUTLOOK

The traffic growth in the world's mobile networks should generate a slight to moderate growth in the global mobile systems market. In addition to this underlying growth there is an effect from operators catching up on previous years' limited investments. This effect continues but should abate over time. All estimates refer to 2004 compared to 2003 and are measured in USD.

In the first quarter report 2004 we stated we estimate that the global mobile systems market in 2004, measured in USD, will show slight to moderate growth, compared to 2003. There is also an element of operators catching up on previous years' limited investments.

We maintain our view that the addressable market for professional services, also measured in USD, is expected to continue to show good growth.

With our technology leadership and global presence we are well positioned to take advantage of these market opportunities.

CONSOLIDATED ACCOUNTS

FINANCIAL REVIEW

All comparative numbers are stated excluding restructuring charges.

Income

Orders booked were SEK 33.1 (28.3) b., an increase by 17% year-over-year, driven by generally strong development, especially in Italy, Russia, South East Asia and Brazil. Sequentially, orders booked were flat reflecting continued good demand in Western Europe, Asia Pacific and Latin America. However, North America showed a weaker development both year-over-year and sequentially due to operator consolidation affecting short-term investment plans.

Sales were SEK 32.6 (27.6) b., an increase of 18% year-over-year. All regions were strong, especially high growth markets such as India, China and Mexico. Currency exchange effected sales negatively by 6%. Sequentially, sales increased by 16% driven by overall strong demand.

Gross margin increased sequentially by 3.1 percentage points to 47.8% (35.1%), due to continued focus on operational excellence, higher volumes and a favorable product mix.

Operating expenses amounted to SEK 9.2 (9.7) b. The annualized run rate was SEK 34 (42) b., down from SEK 35 b. in the previous quarter. The announced operating expense reduction target of an annualized run rate of SEK 33 b., was achieved at the end of this quarter, one quarter earlier than originally anticipated.

Operating income was SEK 7.7 (0.2) b. compared to SEK 4.5 b. the previous quarter, including a non-recurring positive effect of SEK 0.3 b. due to the closure of a subsidiary. Operating margin was 23.7% (0.8%). Income after financial items was SEK 7.8 (0.2) b. compared to SEK 4.3 b. in the first quarter.

Net effects of currency exchange differences on operating income compared to the rates one year ago were SEK -0.7 b. in the quarter. Excluding effects from currency hedging the effects would have been -0.5 b.

Net income was SEK 5.3 (-2.7) b. for the quarter.

Earnings per share were SEK 0.33 (-0.17).

The number of employees amounted to 50,700 (57,600) at the end of the quarter of which 22,400 (27,700) in Sweden.

Balance sheet and financing

Numbers within brackets indicate year-end 2003.

The financial position remained strong with net of financial assets and debt, i.e. net cash, at SEK 31.7 (27.0) b. compared to SEK 26.8 b. at the end of the first quarter 2004. Cash improved by SEK 3.6 b. sequentially to SEK 78.0 (73.2) b.

Days sales outstanding (DSO) for trade receivables were 88 (79), an improvement of 14 days sequentially, mainly due to better collections. Inventory, including work in progress, increased by SEK 0.4 b. sequentially to SEK 14.8 (11.0) b., due to the higher business activity. Inventory turnover was 5.1 (6.1), up sequentially from 4.9.

Gross customer financing exposure decreased sequentially by SEK 1.8 b. to SEK 9.4 (12.3) b. Net customer financing credits on balance sheet were reduced sequentially by SEK 0.9 b. to SEK 3.0 (4.0) b.

The equity ratio was 37.5% (34.4%) compared to 35.0% at the end of the previous quarter.

Table of Contents**Cash flow**

Cash flow from operations remained strong at SEK 6.5 (5.7) b. Cash flow before financing activities amounted to SEK 4.3 (5.1) b. Cash flow from investing activities was SEK -2.2 (-0.6) b. net. The cash flow is affected by increased work in progress as a result of the higher business activity.

On April 26, Ericsson announced its intention to make a public cash offer for the 28,44% of the shares in its Italian subsidiary Ericsson S.p.A., not already owned by Ericsson. The cash offer has affected cash flow by SEK 1.3 b. during the quarter. Ericsson now holds 88,32% of the shares. Although no final decision to this effect has been taken by the competent bodies, Ericsson intends to proceed with the delisting of the Ericsson S.p.A. shares from the Milan Stock Exchange through the merger between Ericsson S.p.A. and a fully owned unlisted Italian company, in the absence of the conditions for making the residual offer or for exercising the squeeze-out right.

Payment readiness increased sequentially by SEK 4.7 b. to SEK 83.1 (68.8) b., mainly due to improved earnings.

Cash outlays of SEK 5.0 b., with regard to restructuring, are expected during 2004. Of this SEK 1.5 b. was paid in the second quarter.

SONY ERICSSON MOBILE COMMUNICATIONS

Sony Ericsson Mobile Communications (Sony Ericsson) reported a fourth consecutive quarter of profit with a sales increase of 34% year-over-year while sustaining a consistent level of profitability. Ericsson's share in Sony Ericsson's income after financial items was SEK 0.5 b. compared to SEK 0.5 b. in the previous quarter.

Units shipped in the quarter reached 10.4 million, a 55% increase compared to the same period last year, reflecting a continued strong demand for its style-oriented line-up of imaging and multi-media phones. Average selling price (ASP) decreased sequentially in line with expectation due to an increase in GSM phones in the overall product mix.

The company maintained momentum in an increasingly competitive market environment, and has established a solid basis for sustained growth going forward. Sony Ericsson is revising its global market outlook for 2004 to approximately 600 million units from its previously stated level of over 550 million.

ACCOUNTING POLICIES AND REPORTING

ACCOUNTING POLICIES

Interim reports are prepared in accordance with RR20 Interim Financial Reporting .

CHANGED ACCOUNTING POLICIES AND REPORTING IN 2004

RR29 Employee Benefits , which is based on IAS 19 Employee Benefits issued by International Accounting Standards Committee (IASC), has been adopted as from January 1, 2004. When applying RR 29, defined benefit plans for pensions and other post-employment benefits are accounted for using consistent principles. Prior to 2004, such plans have been accounted for by using local principles for each country in the consolidated accounts. The effect of this standard is mainly a change in timing of pension costs compared to previous principles, so that pension costs for future salary increases are estimated and recognized during the service period. In accordance with the transition rules, a transition liability was determined as of 1 January 2004. This transition liability exceeded the liability for pensions recognized per December 31, 2003 in accordance with earlier principles and the net effect of the change in accounting principles at adoption has in accordance with RR29 been charged to stockholders equity. The one-time effect of adopting RR29 was an increase of the pension liability as of January 1, 2004, by SEK 1.8 billion. The effect on equity, net after taxes, was SEK 1.3 billion. RR29 has not had material impact on reported Net Income or Earnings Per Share.

The company has chosen to follow the guidance of the draft interpretation URA43 Accounting for particular social taxes and wealth tax issued by The Swedish Accounting Standards Council.

INTERNATIONAL FINANCIAL REPORTING STANDARDS 2005

From 2005, Ericsson will be required to report according to IFRS. An internal project is underway to identify differences between current GAAP and what changes will be necessary. The company is in the process of evaluating the impact. It is expected that IAS 39 regarding financial instruments, IFRS 3 Business combinations and IAS 38 Intangible Assets will be the standards with the largest impact.

REPORTING

LONG TERM INCENTIVE PLAN 2004

The Annual General Meeting decided to implement a Long Term Incentive Plan 2004 (LTI 2004) directed to 200 senior managers and 4,500 other key contributors. Participation in the LTI 2004 presupposes that the employees participate in the Stock Purchase Plan 2003 (SPP 2003) directed to all employees, i.e. save money for the purchase of shares in Ericsson.

In addition to the regular one matching share under the SPP 2003, participants in the LTI 2004 will be entitled to additional matching of shares free of consideration. 4,500 key contributors will be entitled to an additional match of one share for each one purchased. Further, 150 senior managers and 50 top senior managers may be entitled to an additional performance match of up to four shares or six shares respectively for each one purchased. The performance match is based on average annual percentage growth rate in earnings per share.

For more information regarding the Stock Purchase Plan 2003 see the 2003 Annual Report.

CHANGED DEFINITIONS COMPARED TO PREVIOUS ANNUAL REPORT

Items affecting comparability

During 2003 restructuring costs, non-operational capital gains/losses and capitalization of development expenses were reported as items affecting comparability. Due to the immateriality of the non-operational capital gains/losses for 2003 and the fact that the capitalization of development expenses are no longer, per se, affecting comparability, these items are no longer reported as items affecting comparability.
