See page 34 for a glossary of certain terms used in this Report.

- (a) The Executive Summary and Consolidated Income Statement Review Noninterest Income-Summary portions of the Financial Review section of this Report provide information regarding items impacting the comparability of the periods presented.
- (b) The interest income earned on certain assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than taxable investments. To provide more meaningful comparisons of yields and margins for all earning assets, we also provide revenue on a taxable-equivalent basis by increasing the interest income earned on tax-exempt assets to make it fully equivalent to interest income earned on taxable investments. This adjustment is not permitted under GAAP in the Consolidated Income Statement.

The following is a reconciliation of net interest income as reported in the Consolidated Income Statement to net interest income on a taxable-equivalent basis (in millions):

	Three months ended March 31	
	2007	2006
Net interest income, GAAP basis	\$ 623	\$ 556
Taxable-equivalent adjustment	6	7
Net interest income, taxable-equivalent basis	\$ 629	\$ 563

- (c) On April 5, 2007, our Board of Directors approved a quarterly cash dividend payable on April 24, 2007 of \$.63 per common share, an increase of 15% from the previous dividend paid in the first quarter of 2007.
- (d) Calculated as noninterest income divided by the sum of net interest income (GAAP basis) and noninterest income. Noninterest income for the first quarter 2006 included the impact of BlackRock on a consolidated basis, primarily consisting of asset management fees. First quarter 2007 noninterest income reflected income from our equity investment in BlackRock included in the Asset management line item.
- (e) Calculated as noninterest expense divided by the sum of net interest income (GAAP basis) and noninterest income.

FINANCIAL REVIEW

THE PNC FINANCIAL SERVICES GROUP, INC.

This Financial Review should be read together with our unaudited Consolidated Financial Statements and unaudited Statistical Information included elsewhere in this Report and with Items 6, 7, 8 and 9A of our 2006 Annual Report on Form 10-K (2006 Form 10-K). We have reclassified certain prior period amounts to conform with the current period presentation. For information regarding certain business and regulatory risks, see the Risk Management section in this Financial Review and Items 1A and 7 of our 2006 Form 10-K. Also, see the Cautionary Statement Regarding Forward-Looking Information and Critical Accounting Policies And Judgments sections in this Financial Review for certain other factors that could cause actual results or future events to differ, perhaps materially, from those anticipated in the forward-looking statements included in this Report or from historical performance. See Note 14 Segment Reporting in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report for a reconciliation of total business segment earnings to total PNC consolidated net income as reported on a generally accepted accounting principles (GAAP) basis.

EXECUTIVE SUMMARY

THE PNC FINANCIAL SERVICES GROUP, INC.

PNC is one of the largest diversified financial services companies in the United States based on assets, with businesses engaged in retail banking, corporate and institutional banking, asset management and global fund processing services. We provide many of our products and services nationally and others in our primary geographic markets located in Pennsylvania; New Jersey; Washington, DC; Maryland; Virginia; Ohio; Kentucky and Delaware. We also provide certain global fund processing services internationally.

KEY STRATEGIC GOALS

Our strategy to enhance shareholder value centers on driving positive operating leverage by achieving growth in revenue from our diverse business mix that exceeds growth in expenses as a result of disciplined cost management. In each of our business segments, the primary drivers of revenue growth are the acquisition, expansion and retention of customer relationships. We strive to expand our customer base by providing convenient banking options, leading technological systems and a broad range of fee-based products and services. We also intend to grow revenue through appropriate and targeted acquisitions and, in certain businesses, by expanding into new geographical markets.

In recent years, we have maintained a moderate risk profile characterized by strong credit quality and limited exposure to earnings volatility resulting from interest rate fluctuations and the shape of the interest rate yield curve. Our actions have created a balance sheet reflecting a strong capital position and investment flexibility to adjust, where appropriate, to changing interest rates and market conditions. We continue to invest capital in our businesses while returning a portion to shareholders through dividends and share repurchases.

MERCANTILE BANKSHARES ACQUISITION

We acquired Mercantile effective March 2, 2007 for approximately 53 million shares of PNC common stock and

\$2.1 billion in cash. Total consideration paid was approximately \$5.9 billion in stock and cash.

Mercantile has added banking and investment and wealth management services through 235 branches in Maryland, Virginia, the District of Columbia, Delaware and Southeastern Pennsylvania. This transaction has significantly expanded our presence in the mid-Atlantic region, particularly within the attractive Baltimore and Washington, DC markets.

The integration of Mercantile is on track and we are optimistic about the opportunities within our new region and customer base. We refer you to our Form 8-K filed March 8, 2007 for additional information on this transaction.

KEY FACTORS AFFECTING FINANCIAL PERFORMANCE

Our financial performance is substantially affected by several external factors outside of our control, including:

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

- General economic conditions,
- Loan demand and utilization of credit commitments,
- Movement of customer deposits from lower to higher rate accounts or to investment alternatives,
- The level of interest rates, and the shape of the interest rate yield curve,
- The performance of the capital markets, and
- Customer demand for other products and services.

In addition to changes in general economic conditions, including the direction, timing and magnitude of movement in interest rates and the performance of the capital markets, our success in the remainder of 2007 will depend, among other things, upon:

- Further success in the acquisition, growth and retention of customers,
- The successful integration of Mercantile,
- Revenue growth,
- A sustained focus on expense management and creating positive operating leverage,
- Maintaining strong overall asset quality, and
- Prudent risk and capital management.

Table of Contents**SUMMARY FINANCIAL RESULTS**

In millions, except per share data	Three months ended	
	Mar. 31, 2007	Mar. 31, 2006
Net income	\$ 459	\$ 354
Diluted earnings per share	\$ 1.46	\$ 1.19
Return on		
Average common shareholders' equity	15.59%	16.67%
Average assets	1.73%	1.56%

Earnings for the first quarter of 2007 included the after-tax impact of the following items:

A gain of \$53 million, or \$.17 per diluted share, recognized in connection with the transfer of BlackRock shares to satisfy a portion of our 2002 BlackRock LTIP shares obligation,

A loss of \$20 million, or \$.06 per diluted share, from the net mark-to-market adjustment on our remaining BlackRock long-term incentive plan (LTIP) shares obligation, and

Acquisition integration costs related to the Mercantile acquisition and the 2006 BlackRock/MLIM transaction totaling \$8 million, or \$.03 per diluted share.

Our first quarter 2007 results included the following accomplishments consistent with our strategy:

We closed on the acquisition of Mercantile, increasing total assets to a record \$123 billion.

Our business segments each grew earnings over the prior year first quarter. The rates of growth were 6% for Retail Banking, 29% for Corporate & Institutional Banking, 6% for BlackRock and 15% for PFPC.

We created positive operating leverage compared with the first quarter of 2006.

First quarter 2007 net interest income grew 12% compared with the first quarter of 2006. The net interest margin improved to 2.95% from 2.88% for the fourth quarter of 2006 and was unchanged from the first quarter of 2006.

Average loans increased \$5.0 billion, or 10%, compared with the first quarter of 2006, largely due to the partial first quarter 2007 impact of Mercantile as well as growth in commercial loans.

Average deposits for the first quarter of 2007 increased \$8.7 billion, or 14%, compared with the first quarter of 2006 due to growth in interest- and noninterest-bearing deposits and to the partial quarter impact of Mercantile.

Asset quality remained very strong. Nonperforming assets to total assets were .17% at March 31, 2007 compared with .22% at March 31, 2006.

BLACKROCK/MLIM TRANSACTION

As further described in our 2006 Form 10-K, on September 29, 2006 Merrill Lynch contributed its investment management business (MLIM) to BlackRock in exchange for 65 million shares of newly issued BlackRock common and preferred stock.

For the three months ended March 31, 2006, our Consolidated Income Statement included our former 69% ownership interest in BlackRock. However, our Consolidated Balance Sheet as of March 31, 2007 and December 31, 2006 reflected the September 29, 2006 deconsolidation of BlackRock's balance sheet amounts and recognized our approximate 34% ownership interest in BlackRock as an investment accounted for under the equity method. This accounting has resulted in a reduction in certain revenue and noninterest expense categories on our Consolidated Income Statement as our share of BlackRock's net income is now reported within asset management noninterest income. In addition, beginning with fourth quarter 2006, we recognize gain or loss each quarter-end on our then-remaining liability to provide shares of BlackRock common stock to help fund BlackRock LTIP programs as that liability is marked to market based on changes in BlackRock's common stock price. As in the first quarter of 2007, we will also recognize gains or losses on the future transfer of shares for payouts under such LTIP programs.

BALANCE SHEET HIGHLIGHTS

Total assets were \$122.6 billion at March 31, 2007 compared with \$101.8 billion at December 31, 2006. The increase compared with December 31, 2006 was primarily due to the addition of approximately \$21 billion of assets related to Mercantile.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Total average assets were \$107.4 billion for the first quarter of 2007 compared with \$92.1 billion for the first quarter of 2006. This increase was primarily attributable to an \$8.8 billion increase in average interest-earning assets and a \$6.5 billion increase in average other noninterest-earning assets. An increase of \$5.0 billion in loans, a \$2.5 billion increase in securities, and a \$1.6 billion increase in federal funds sold and resale agreements were the primary factors for the increase in average interest-earning assets.

The increase in average other noninterest-earning assets for the first quarter of 2007 reflected our equity investment in BlackRock, which averaged \$3.8 billion for the first quarter of 2007 and which had been consolidated for the first quarter of 2006, and an increase in average goodwill of \$1.4 billion related to the Mercantile acquisition.

Average total loans were \$54.1 billion for the first quarter of 2007 and \$49.1 billion in the first quarter of 2006. The increase in average total loans included the partial effect of the Mercantile acquisition during the quarter, and higher commercial loans. The increase in average total loans included growth in commercial real estate loans of approximately \$2.5

Table of Contents

billion and growth in commercial loans of approximately \$1.9 billion. Loans represented 63% of average interest-earning assets for the first quarter of 2007 and 64% for the first quarter 2006.

Average securities totaled \$23.4 billion for the first three months of 2007 and \$20.9 billion for the first three months of 2006. The partial quarter impact of Mercantile contributed to the increase in average securities for 2007. By primary classification, the increase in average securities reflected a \$5.4 billion increase in mortgage-backed and asset-backed securities, which was partially offset by a \$3.1 billion decline in US Treasury and government agencies securities. Securities comprised 27% of average interest-earning assets for both the first quarter 2007 and the first quarter 2006.

Average total deposits were \$69.7 billion for the first quarter of 2007, an increase of \$8.7 billion over the first quarter of 2006. Average deposits grew from the prior year quarter primarily as a result of an increase in money market, noninterest-bearing demand deposits, retail certificates of deposit and the partial quarter impact of the Mercantile acquisition.

Average total deposits represented 65% of average total assets for the first quarter of 2007 and 66% for the first quarter of 2006. Average transaction deposits were \$47.0 billion for the first quarter of 2007 compared with \$40.8 billion for the first quarter of 2006.

Average borrowed funds were \$16.8 billion for the first quarter of 2007 and \$15.8 billion for the first quarter of 2006.

Shareholders' equity totaled \$14.7 billion at March 31, 2007, compared with \$10.8 billion at December 31, 2006. The increase resulted primarily from the Mercantile acquisition completed in March 2007. See the Consolidated Balance Sheet Review section of this Financial Review for additional information.

BUSINESS SEGMENT HIGHLIGHTS

Total business segment earnings increased 13%, to \$416 million, for the first quarter of 2007 compared with the first quarter of 2006. We refer you to page 15 of this Report for a Results of Businesses Summary table. Highlights of results for the first quarter 2007 in comparison to the prior year period follow. Further analysis of business segment results for the first quarter 2007 is provided on pages 16 through 23.

We provide a reconciliation of total business segment earnings to total PNC consolidated net income as reported on a GAAP basis in Note 14 Segment Reporting in the Notes To Consolidated Financial Statements in this Report.

Retail Banking

Retail Banking earned \$201 million for the first quarter of 2007 compared with \$190 million for the same period in 2006. The 6% increase over the first quarter of 2006 was driven by the Mercantile acquisition, strong market related fees, and continued customer and balance sheet growth, partially offset by an increase in the provision for credit losses.

Corporate & Institutional Banking

Corporate & Institutional Banking earned \$132 million in the first quarter of 2007 compared with \$102 million in the first quarter of 2006. The 29% increase compared with the first quarter of 2006 was largely the result of a lower provision for credit losses, due to improving asset quality, and positive operating leverage.

BlackRock

Our BlackRock business segment earned \$52 million for the first quarter of 2007 and \$49 million for the first quarter of 2006. The higher earnings reflected our approximate 34% ownership interest in a larger BlackRock entity for the first quarter of 2007 compared with the first quarter of 2006.

PFPC

PFPC earned \$31 million for the first quarter of 2007 compared with \$27 million in the year-earlier period. The 15% earnings increase from the first quarter of 2006 reflected new business, organic growth and market appreciation, partly offset by client deconversions. Certain tax benefits

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

also contributed to the increase in earnings compared with the first three months of 2006.

Other

Other earnings for the first three months of 2007 totaled \$43 million, while Other for the first three months of 2006 was a net loss of \$14 million. The increase in Other in the comparison was primarily due to the impact of the \$33 million after-tax net gain recognized during the first quarter of 2007 related to BlackRock LTIP activity, higher equity management gains in 2007 and a portion of the earnings contribution from Mercantile asset and liability management activities.

Table of Contents**CONSOLIDATED INCOME STATEMENT REVIEW***NET INTEREST INCOME AND NET INTEREST MARGIN*

Dollars in millions	Three months ended	
	Mar. 31, 2007	Mar. 31, 2006
Taxable-equivalent net interest income	\$ 629	\$ 563
Net interest margin	2.95%	2.95%

We provide a reconciliation of net interest income as reported under GAAP to net interest income presented on a taxable-equivalent basis in the Consolidated Financial Highlights section on page 1 of this Report.

Changes in net interest income and margin result from the interaction of the volume and composition of interest-earning assets and related yields, interest-bearing liabilities and related rates paid, and noninterest-bearing sources of funding. See Statistical Information-Average Consolidated Balance Sheet And Net Interest Analysis included on pages 65 and 66 of this Report for additional information.

The 12% increase in taxable-equivalent net interest income for the first quarter of 2007 compared with the first quarter of 2006 was consistent with the \$8.8 billion, or 12%, increase in average interest-earning assets over these periods. The reasons driving the higher interest-earning assets in this comparison are further discussed in the Balance Sheet Highlights portion of the Executive Summary section of this Report.

The net interest margin was 2.95% for both the first quarters of 2007 and 2006. The following factors offset each other in the comparison:

The yield on interest-earning assets increased 59 basis points. Loans, the single largest component, increased 54 basis points. The impact of noninterest-bearing sources of funding increased 9 basis points for the first quarter of 2007 due to higher rates. These factors were offset by an increase in the rate paid on interest-bearing liabilities of 68 basis points. The rate paid on interest-bearing deposits, the single large component, increased 71 basis points.

During the first quarter of 2007, the average federal funds rate was 5.26% compared with 4.46% for the first quarter of 2006.

We believe that net interest margins for our industry will continue to be challenged if the yield curve remains flat or inverted, as competition for loans and deposits remains intense, as customers continue to migrate from lower rate to higher rate deposits or other products, and as the benefit of adding or repricing investment securities is diminished. However, we expect that taxable-equivalent net interest income for full year 2007 will grow in the mid-20% range compared with full year 2006 and the net interest margin will improve. These

expected increases are primarily due to the Mercantile acquisition as well as projected earning asset growth, funding composition and pricing, and interest rate changes.

PROVISION FOR CREDIT LOSSES

The provision for credit losses decreased \$14 million, to \$8 million, in the first quarter of 2007 compared with the first quarter of 2006. The decrease in the quarterly comparison was primarily the result of improving overall asset quality.

We do not expect to sustain asset quality at its current level. However, based on the assets we currently hold and current business trends and activities, we believe that overall asset quality will remain strong by historical standards for the near term. We anticipate that the provision will be higher for the second quarter of 2007 compared with the first quarter of 2007. To the extent actual outcomes differ from our estimates, additional provision for credit losses may be required that would reduce future earnings. See the Credit Risk Management portion of the Risk Management section of this Financial Review for additional information regarding factors that impact the provision for credit losses.

NONINTEREST INCOMESummary

Noninterest income was \$991 million for the first quarter of 2007 compared with \$1.185 billion for the first quarter of 2006. In 2007, we refined our accounting and reporting of PFPC's distribution fee revenue and related expense amounts. Due to this change, amounts for these items for the

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

first quarter of 2007 are lower than as reported in conjunction with our first quarter 2007 earnings release. These amounts, which offset each other entirely and which have no impact on earnings, were previously shown on a gross basis within the fund servicing fee component of noninterest income and within other noninterest expense. This change was made on a prospective basis, effective January 1, 2007.

Total noninterest income for the first quarter of 2007 and first quarter 2006 included the following items:

First quarter 2007 included a net gain related to our equity investment in BlackRock of \$52 million, representing an \$82 million gain recognized in connection with our transfer of BlackRock shares to satisfy a portion of our 2002 LTIP shares obligation, partially offset by a net mark-to-market adjustment totaling \$30 million on our remaining BlackRock LTIP shares obligation, and

First quarter of 2006 noninterest income included the impact of BlackRock on a consolidated basis in the amount of \$406 million. Had BlackRock been on the equity method for the first quarter of 2006, BlackRock's reported noninterest income would have been \$52 million for that quarter, or lower by \$354 million.

Table of Contents

Apart from the impact of these items, noninterest income increased \$108 million, or 13%, compared with the first quarter of 2006 largely as a result of organic growth and the acquisition of Mercantile.

Additional Analysis

Asset management fees totaled \$165 million in the first quarter of 2007, a decrease of \$296 million compared with the first quarter of 2006. Our equity income from BlackRock was included in asset management fees for the first quarter of 2007, while asset management fees in the prior year quarter reflected the impact of BlackRock's revenue on a consolidated basis.

Assets managed at March 31, 2007 totaled \$76 billion compared with \$504 billion at March 31, 2006. BlackRock's assets under management, which were no longer included in assets managed by us at March 31, 2007 due to our deconsolidation of BlackRock effective September 29, 2006, were included in the March 31, 2006 totals. We refer you to the Retail Banking section of the Business Segments Review section of this Report for further discussion of our assets under management.

Fund servicing fees of \$203 million for the first quarter of 2007 represented an \$18 million decrease from the prior year period. Included in these amounts were out-of-pocket revenue amounts at PFPC totaling \$14 million for the first three months of 2007 and distribution/out-of-pocket revenue amounts of \$37 million for the first three months of 2006. These revenue amounts are passed through to PFPC's customers, and therefore their impact was offset by expenses in the same amounts each year.

PFPC provided fund accounting/administration services for \$822 billion of net fund investment assets and provided custody services for \$435 billion of fund investment assets at March 31, 2007, compared with \$750 billion and \$383 billion, respectively, at March 31, 2006. These increases were the result of new business attained, organic growth from current customers and market appreciation.

Service charges on deposits grew \$4 million, to \$77 million, in the first three months of 2007 compared with the first three months of 2006. This increase can be attributed primarily to the partial quarter impact of Mercantile and to customer growth.

Brokerage fees totaled \$66 million in the first quarter of 2007 and \$59 million in the first quarter of 2006. The increase was primarily due to higher annuity income and mutual fund related revenues, including a favorable impact from products related to the fee-based fund advisory business.

Consumer services fees grew \$2 million, to \$91 million, for the first three months of 2007 compared with the first three months of 2006. This increase reflected the partial quarter

impact of Mercantile, higher debit card revenues resulting from higher transaction volumes, and revenue from the credit card business that began in the latter part of 2006. These factors were partially offset by lower ATM surcharge revenue in the 2007 period compared with the prior year period as a result of changing customer behavior and a strategic decision to reduce the out-of-footprint ATM network.

Corporate services revenue totaling \$159 million in the first quarter of 2007 represented a \$24 million increase over the first quarter of 2006. Higher revenue from various sources, including treasury management and mergers and acquisitions advisory and related services, contributed to this increase.

Equity management (private equity) net gains on portfolio investments totaled \$32 million for the first three months of 2007 compared with \$7 million for the first three months of 2006. Based on the nature of private equity activities, net gains or losses may be volatile from period to period.

Noninterest revenue from trading activities, more than one-half of which is customer-related, was \$52 million for the first quarter of 2007 compared with \$57 million for the first quarter of 2006. We provide additional information on our trading activities under Market Risk Management - Trading Risk in the Risk Management section of this Financial Review.

Other noninterest income of \$97 million for the first three months of 2007 represented a \$10 million increase compared with the first three months of 2006. Other noninterest income typically fluctuates from period to period depending on the nature and magnitude of transactions completed.

Due to the BlackRock/MLIM transaction, which resulted in a \$2.1 billion pretax gain in 2006, we expect that total noninterest income will decline significantly for full year 2007 compared with full year 2006. Changes in noninterest income compared with the prior year also will be

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

impacted by the deconsolidation of BlackRock and balance sheet repositioning actions in 2006, and our BlackRock LTIP obligation. Our remaining noninterest income sources are expected to increase, in aggregate, by a low teens percentage for full year 2007 compared with 2006 as a result of organic growth and the Mercantile acquisition.

PRODUCT REVENUE

In addition to credit products to commercial customers, Corporate & Institutional Banking offers treasury management and capital markets-related products and services, commercial loan servicing and equipment leasing products that are marketed by several businesses across PNC.

Treasury management revenue, which includes fees as well as net interest income from customer deposit balances, increased 9% to \$110 million for the first quarter of 2007 from \$101

Table of Contents

million for the first quarter of 2006. The higher revenue reflected continued expansion and client utilization of commercial payment card services, strong revenue growth in various electronic payment and information services, and a steady increase in business-to-business processing volumes.

Revenue from capital markets-related products and services was \$67 million for the first three months of 2007 compared with \$64 million in the first three months of 2006, primarily driven by increased revenues from mergers and acquisitions advisory and related services.

Midland Loan Services offers servicing, real estate advisory and technology solutions for the commercial real estate finance industry. Midland's revenue, which includes servicing fees and net interest income from servicing portfolio deposit balances, totaled \$54 million for first quarter of 2007 and \$42 million for first quarter of 2006. The 29% revenue growth was primarily driven by growth in the commercial mortgage servicing portfolio and related services.

As a component of our advisory services to clients, we provide a select set of insurance products to fulfill specific customer financial needs. Primary insurance offerings include:

- Annuities,
- Life,
- Credit life,
- Health,
- Disability, and
- Commercial lines coverage.

Client segments served by these insurance products include those in Retail Banking and Corporate & Institutional Banking. Insurance products are sold by licensed PNC insurance agents and through licensed third-party arrangements. Revenue from these products was \$18 million in the first quarter of 2007 and \$17 million in the first quarter of 2006.

PNC, through subsidiary companies Alpine Indemnity Limited and PNC Insurance Corp., participates as a direct writer for its general liability, automobile liability, workers' compensation, property and terrorism insurance programs.

In the normal course of business, Alpine Indemnity Limited and PNC Insurance Corp. maintain insurance reserves for reported claims and for claims incurred but not reported based on actuarial assessments. We believe these reserves were adequate at March 31, 2007.

NONINTEREST EXPENSE

Total noninterest expense was \$944 million for the first quarter of 2007 and \$1.162 billion for the first quarter of 2006.

As noted above under Noninterest Income, in 2007 we refined our accounting and reporting of PFPC's distribution fee revenue and related expense amounts. This change was made on a prospective basis, effective January 1, 2007.

Noninterest expense for the first quarter 2007 and first quarter 2006 included the following:

- Integration costs of \$11 million in the first quarter of 2007 related to our acquisition of Mercantile; and
- First quarter 2006 noninterest expense included \$291 million of expenses related to BlackRock, which was still consolidated during that time. In addition, noninterest expense for the first quarter 2006 included \$6 million of BlackRock/MLIM transaction integration costs.

Apart from the impact of these items, noninterest expense increased \$68 million, or 8%, compared with the first quarter of 2006 largely as a result of increased compensation expenses, investments in growth initiatives and the acquisition of Mercantile.

We expect total noninterest expense to decline for full year 2007 compared with full year 2006 due to the impact of the deconsolidation of BlackRock. Apart from this impact, we expect noninterest expense to grow by a low teens percentage for full year 2007 compared with 2006 primarily as a result of the Mercantile acquisition. In addition, we expect to continue to incur pretax integration costs related to Mercantile that are currently estimated to be \$40 million for the remainder of 2007.

PERIOD-END EMPLOYEES

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

	March 31, 2007	December 31, 2006	March 31, 2006
Full-time	24,635	21,455	23,642
Part-time	3,060	2,328	2,003
Total	27,695	23,783	25,645

Of the numbers at March 31, 2007, approximately 3,000 full-time and approximately 700 part-time employees were added as a result of our acquisition of Mercantile. BlackRock employees were included in these numbers at March 31, 2006.

EFFECTIVE TAX RATE

Our effective tax rate for the first three months of 2007 was 30.7% compared with 32.5% for the first three months of 2006. The lower effective rate for first quarter of 2007 reflected the deconsolidation of BlackRock effective September 29, 2006 and certain tax adjustments. We expect our effective tax rate to increase to approximately 32% for the remainder of 2007 resulting from the Mercantile acquisition.

Our Consolidated Balance Sheet is presented in Part I, Item 1 on page 38 of this Report.

Our Consolidated Balance Sheet at March 31, 2007 reflects the addition of approximately \$21 billion of assets resulting from our Mercantile acquisition.

Various seasonal and other factors impact our period-end balances whereas average balances (discussed under the Balance Sheet Highlights section of this Financial Review above and included in the Statistical Information section of this Report on pages 63 and 64) are more indicative of underlying business trends.

An analysis of changes in certain balance sheet categories follows.

LOANS, NET OF UNEARNED INCOME

Loans increased \$12.8 billion, to \$62.9 billion, at March 31, 2007 compared with the balance at December 31, 2006. Our acquisition of Mercantile added \$12.4 billion of loans including \$5.8 billion of commercial real estate, \$2.7 billion of commercial, \$2.3 billion of residential mortgage and \$1.6 billion of consumer loans.

Total, net of unearned income	\$ 62,925	\$ 50,105

Our total loan portfolio continued to be diversified among numerous industries and types of businesses. The loans that we hold are also concentrated in, and diversified across, our principal geographic markets.

Commercial lending outstandings in the table above are the largest category and are the most sensitive to changes in assumptions and judgments underlying the determination of the allowance for loan and lease losses. We have allocated approximately \$477 million, or 69%, of the total allowance for loan and lease losses at March 31, 2007 to these loans. This allocation also considers other relevant factors such as:

- Actual versus estimated losses,
- Regional and national economic conditions,
- Business segment and portfolio concentrations,
- Industry conditions,
- The impact of government regulations, and
- Risk of potential estimation or judgmental errors, including the accuracy of risk ratings.

Table of Contents***Net Unfunded Credit Commitments***

In millions	March 31 2007	December 31 2006
Commercial	\$ 33,613	\$ 31,009
Consumer	11,525	10,495
Commercial real estate	3,855	2,752
Other	270	579
Total	\$ 49,263	\$ 44,835

Unfunded commitments are concentrated in our primary geographic markets. Net unfunded commitments at March 31, 2007 include \$5.0 billion related to our acquisition of Mercantile. Commitments to extend credit represent arrangements to lend funds or provide liquidity subject to specified contractual conditions. Commercial commitments are reported net of participations, assignments and syndications, primarily to financial institutions, totaling \$8.5 billion at March 31, 2007 and \$8.3 billion at December 31, 2006.

Unfunded liquidity facility commitments and standby bond purchase agreements totaled \$6.0 billion at March 31, 2007 and \$6.0 billion at December 31, 2006 and are included in the preceding table primarily within the Commercial and Consumer categories.

In addition to credit commitments, our net outstanding standby letters of credit totaled \$4.8 billion at March 31, 2007 and \$4.4 billion at December 31, 2006. Standby letters of credit commit us to make payments on behalf of our customers if specified future events occur.

Leases and Related Tax and Accounting Matters

The equipment lease portfolio totaled \$3.5 billion at March 31, 2007. Aggregate residual value at risk on the lease portfolio at March 31, 2007 was \$1.1 billion. We have taken steps to mitigate \$6 billion of this residual risk, including residual value insurance coverage with third parties, third party guarantees, and other actions. The portfolio included approximately \$1.7 billion of cross-border leases at March 31, 2007. Cross-border leases are leveraged leases of equipment located in foreign countries, primarily in western Europe and Australia. We have not entered into cross-border lease transactions since 2003.

Upon completing an examination of our 1998-2000 and 2001-2003 consolidated federal income tax returns, the IRS provided us with examination reports which propose increases in our tax liability, principally arising from adjustments to the timing of tax deductions from our cross-border lease transactions.

While the situation with respect to these proposed adjustments remains unresolved, we believe our reserves for these exposures were appropriate at March 31, 2007.

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 13-2, *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction* (FSP 13-2). FSP 13-2 became effective January 1, 2007 and will require a recalculation of the timing of income recognition for actual or projected changes in the timing of tax benefits for leveraged leases. Any cumulative adjustment must be recognized through retained earnings upon adoption of FSP 13-2. See Note 1 Accounting Policies in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report and in Item 8 of our 2006 Form 10-K for additional information. Effective January 1, 2007, we recalculated our leases and recorded a cumulative adjustment to beginning retained earnings of \$149 million, after-tax, as required by FSP 13-2. This adjustment was based on our best estimate as to the timing and amount of ultimate settlement of this exposure. Any immediate or future reductions in earnings from our adoption of FSP 13-2 would be recovered in subsequent years.

The adjustment includes amounts related to three lease-to-service contract transactions that we were party to that were structured as partnerships for tax purposes. The partnership tax returns, depending on the particular partnership, have either been examined or are under examination by the IRS. We do not believe that our exposure from these transactions is material to our consolidated results of operations or financial position.

Additional information on cross-border lease transactions is included under Leases and Related Tax and Accounting Matters in the Consolidated Balance Sheet Review section of Item 7 of our 2006 Form 10-K.

Table of Contents*SECURITIES**Details Of Securities (a)*

In millions	Amortized Cost	Fair Value

Total securities available for sale	\$ 26,535	\$ 26,475
December 31, 2006		
SECURITIES AVAILABLE FOR SALE		
Debt securities		
Residential mortgage-backed	\$ 17,325	\$ 17,208
Commercial mortgage-backed	3,231	3,219
Asset-backed	1,615	1,609
US Treasury and government agencies	611	608
State and municipal	140	139
Other debt	90	87
Corporate stocks and other	321	321
Total securities available for sale	\$ 23,333	\$ 23,191

(a) Securities held to maturity at March 31, 2007 and December 31, 2006 were less than \$.5 million.

Securities represented 22% of total assets at March 31, 2007 and 23% of total assets at December 31, 2006. Our acquisition of Mercantile added approximately \$3 billion of securities, of which approximately \$1 billion we classified as trading and sold and the remainder of which we classified as securities available for sale.

We evaluate our portfolio of securities available for sale in light of changing market conditions and other factors and, where appropriate, take steps intended to improve our overall positioning.

At March 31, 2007, securities available for sale included a net unrealized loss of \$60 million, which represented the difference between fair value and amortized cost. The comparable amount at December 31, 2006 was a net unrealized loss of \$142 million. Net unrealized gains and losses in the securities available for sale portfolio are included in shareholders' equity as accumulated other comprehensive income (loss), net of tax.

The fair value of securities available for sale generally decreases when market interest rates increase and vice versa. Consequently, increases in interest rates after March 31, 2007, could adversely impact the fair value of securities available for sale compared with March 31, 2007.

The expected weighted-average life of securities available for sale (excluding corporate stocks and other) was 3 years and 8 months at March 31, 2007 and December 31, 2006.

We estimate that at March 31, 2007 the effective duration of securities available for sale is 2.6 years for an immediate 50 basis points parallel increase in interest rates and 2.2 years for an immediate 50 basis points parallel decrease in interest rates. These estimates are unchanged from those at December 31, 2006.

LOANS HELD FOR SALE

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Education loans held for sale totaled \$1.5 billion at March 31, 2007 and \$1.3 billion at December 31, 2006 and represented the majority of our loans held for sale at each date. We classify substantially all of our education loans as loans held for sale. Generally, we sell education loans when the loans are placed into repayment status. Gains on sales of education loans are reflected in the other noninterest income line item in our Consolidated Income Statement and in the results for the Retail Banking business segment.

FUNDING AND CAPITAL SOURCES

Details of Funding Sources

In millions	March 31 2007	December 31 2006
Deposits		
Money market	\$ 31,040	\$ 28,580
Demand	21,121	16,833
Retail certificates of deposit	17,714	14,725
Savings	3,010	1,864
Other time	2,902	1,326
Time deposits in foreign offices	1,580	2,973
Total deposits	77,367	66,301
Borrowed funds		
Federal funds purchased	5,638	2,711
Repurchase agreements	2,586	2,051
Bank notes and senior debt	4,551	3,633
Subordinated debt	4,628	3,962
Other	3,053	2,671
Total borrowed funds	20,456	15,028
Total	\$ 97,823	\$ 81,329

Total funding sources increased \$16.5 billion at March 31, 2007 compared with the balance at December 31, 2006, as total deposits increased \$11.1 billion and total borrowed funds increased \$5.4 billion. Our acquisition of Mercantile added \$12.5 billion of deposits and \$2.1 billion of borrowed funds.

Capital

We manage our capital position by making adjustments to our balance sheet size and composition, issuing debt, equity or hybrid instruments, executing treasury stock transactions, maintaining dividend policies and retaining earnings.

Total shareholders' equity increased \$4.0 billion, to \$14.7 billion, at March 31, 2007 compared with December 31, 2006.

Table of Contents

This increase reflected a \$2.9 billion reduction in treasury stock and a \$.9 billion increase in capital surplus, largely due to the Mercantile acquisition.

Common shares outstanding at March 31, 2007 were 346 million compared with 293 million at December 31, 2006. The increase in shares outstanding during the first quarter of 2007 reflected the issuance of approximately 53 million shares in connection with the Mercantile acquisition.

We purchased 1.4 million common shares under our common stock repurchase program during the first three months of 2007. Our current program, which permits us to purchase up to 20 million shares on the open market or in privately negotiated transactions, will remain in effect until fully utilized or until modified, superseded or terminated. As of March 31, 2007, remaining availability for purchases under this program was 13.1 million shares. The extent and timing of additional share repurchases under this program will depend on a number of factors including, among others, market and general economic conditions, economic and regulatory capital considerations, alternative uses of capital, regulatory limitations resulting from merger activity, and the potential impact on our credit rating. We expect to continue to be active in share repurchases.

Risk-Based Capital

The access to, and cost of, funding new business initiatives including acquisitions, the ability to engage in expanded business activities, the ability to pay dividends, the level of deposit insurance costs, and the level and nature of regulatory oversight depend, in part, on a financial

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

institution's capital strength. At March 31, 2007, each of our banking subsidiaries was considered well-capitalized based on regulatory capital ratio requirements, as indicated in the Capital Ratios section of Consolidated Financial Highlights on page 2 of this Report. We believe our bank subsidiaries will continue to meet these requirements during the remainder of 2007.

Table of Contents**OFF-BALANCE SHEET ARRANGEMENTS AND VARIABLE INTEREST ENTITIES**

We engage in a variety of activities that involve unconsolidated entities or that are otherwise not reflected in our Consolidated Balance Sheet that are generally referred to as off-balance sheet arrangements. The following sections of this Report provide further information on these types of activities:

Commitments, including contractual obligations and other commitments, included within the Risk Management section of this Financial Review, and

Note 15 Commitments And Guarantees in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report. The following provides a summary of variable interest entities (VIEs), including those in which we hold a significant variable interest but have not consolidated and those that we have consolidated into our financial statements as of March 31, 2007 and December 31, 2006. Additional information on our partnership interests in low income housing projects is included in our 2006 Form 10-K under this same heading in Part I, Item 7 and Note 3 Variable Interest Entities in the Notes To Consolidated Financial Statements included in Part II, Item 8 of that report.

Non-Consolidated VIEs - Significant Variable Interests

In millions	Aggregate Assets	Aggregate Liabilities	PNC Risk of Loss
March 31, 2007			
Market Street	\$3,820	\$3,819	\$6,149^(a)

Market Street	\$4,020	\$4,020	\$6,117 ^(a)
Collateralized debt obligations	815	570	22
Partnership interests in low income housing projects	33	30	8
Total	\$4,868	\$4,620	\$6,147

(a) PNC's risk of loss consists of off-balance sheet liquidity commitments to Market Street of \$5.6 billion and other credit enhancements of \$.5 billion at March 31, 2007. The comparable amounts at December 31, 2006 were \$5.6 billion and \$.6 billion, respectively.

Market Street

Market Street Funding LLC (Market Street), is a multi-seller asset-backed commercial paper conduit that is owned by an independent third party. Market Street's activities are limited to the purchasing of assets or making of loans secured by interests primarily in pools of receivables from US corporations that desire access to the commercial paper

market. Market Street funds the purchases or loans by issuing commercial paper which has been rated A1/P1 by Standard & Poor's and Moody's, respectively, and is supported by pool-specific credit enhancement, liquidity facilities and program-level credit enhancement.

PNC Bank, National Association (PNC Bank, N.A.) provides certain administrative services, a portion of the program-level credit enhancement and the majority of liquidity facilities to Market Street in exchange for fees negotiated based on market rates. All of Market Street's assets at March 31, 2007 and December 31, 2006 collateralize the commercial paper obligations. PNC views its credit exposure for the Market Street transactions as limited. Facilities requiring PNC to fund for defaulted assets totaled \$890 million at March 31, 2007. For 84% of the liquidity facilities at March 31, 2007, PNC is not required to fund if the assets are in default. PNC may be liable for funding under liquidity facilities for events such as borrower bankruptcies, collateral deficiencies or covenant violations. Additionally, PNC's obligations under the liquidity facilities are secondary to the risk of first loss provided by the borrower or another third party in the form of deal-specific credit enhancement for example, by the over collateralization of the assets. Deal-specific credit enhancement that supports the commercial paper issued by Market Street is generally structured to cover a multiple of the expected historical losses for the pool of assets and is sized to generally meet rating agency standards for comparably structured transactions. Credit enhancement is provided in part by PNC Bank, N.A. in the form of a cash collateral account that is funded by a loan facility that expires March 23, 2012. See Note 15 Commitments And Guarantees included in Part I, Item 1 of this Report for additional information. Neither creditors nor equity investors in Market Street have any recourse to our general credit. PNC recognized program administrator fees and commitment fees related to PNC's portion of the liquidity facilities of \$2.9 million and \$1 million, respectively, for the quarter ended March 31, 2007.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

As more fully described in our 2006 Form 10-K, Market Street was restructured as a limited liability company in October 2005 and entered into a subordinated Note Purchase Agreement (Note) with an unrelated third party.

The Note provides first loss coverage whereby the investor absorbs losses up to the amount of the Note, which was \$6.0 million as of March 31, 2007. Proceeds from the issuance of the Note are held by Market Street in a first loss reserve account that will be used to reimburse any losses incurred by Market Street, PNC Bank, N.A. or other providers under the liquidity facilities and the credit enhancement arrangements.

As a result of the Note issuance, we reevaluated the design of Market Street, its capital structure and relationships among the variable interest holders under the provisions of FASB Interpretation No. 46, (Revised 2003) Consolidation of

Table of Contents

Variable Interest Entities (FIN 46R). Based on this analysis, we determined that we were no longer the primary beneficiary as defined by FIN 46R and deconsolidated Market Street from our Consolidated Balance Sheet effective October 17, 2005. There have been no events or changes in the contractual terms of the Note since that date that would change this conclusion.

The aggregate assets and liabilities of VIEs that we have consolidated in our financial statements are as follows:

Consolidated VIEs PNC Is Primary Beneficiary

In millions	Aggregate Assets	Aggregate Liabilities
Partnership interests in low income housing projects		
March 31, 2007	\$ 780	\$ 780
December 31, 2006	\$ 834	\$ 834

Investment Company Accounting Deferred Application

We also have subsidiaries that invest in and act as the investment manager for private equity funds organized as limited partnerships as part of our equity management activities. The funds invest in private equity investments to generate capital appreciation and profits. As permitted by FIN 46R, we have deferred applying the provisions of the interpretation for these entities pending further action by the FASB. These entities are not consolidated into our financial statements as of March 31, 2007 or December 31, 2006. Information on these entities follows:

In millions	Aggregate Assets	Aggregate Equity	PNC Risk of Loss
<u>Private Equity Funds</u>			
March 31, 2007	\$ 110	\$ 110	\$ 102
December 31, 2006	\$ 102	\$ 102	\$ 104

PNC's risk of loss in the table above includes both the value of our equity investments and any unfunded commitments to the respective entities. These equity investments are included in our private equity portfolio discussed under Market Risk Management Equity and Other Investment Risk in this Financial Review.

Perpetual Trust Securities

We issue certain hybrid capital vehicles that qualify as capital for regulatory and rating agency purposes.

In December 2006, one of our indirect subsidiaries, PNC REIT Corp., sold \$500 million of 6.517% Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities (the Trust Securities) of PNC Preferred Funding Trust I (Trust I), in a private placement. PNC REIT Corp. had previously acquired the Trust Securities from the trust in exchange for an equivalent amount of Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Securities (the LLC Preferred Securities), of PNC Preferred Funding LLC (the LLC), held by PNC REIT Corp. The LLC's initial material

assets consist of indirect interests in mortgages and mortgage-related assets previously owned by PNC REIT Corp. Our 2006 Form 10-K includes additional information regarding the Perpetual Trust Securities, including descriptions of replacement capital and dividend restriction covenants.

In March 2007, PNC Preferred Funding LLC sold \$500 million of 6.113% Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities of PNC Preferred Funding Trust II (Trust II), in a private placement. In connection with the private placement, Trust II acquired \$500 million of LLC Preferred Securities.

PNC REIT Corp. owns 100% of the LLC's common voting securities. As a result, the LLC is an indirect subsidiary of PNC and is consolidated on our Consolidated Balance Sheet. Trust I and Trust II's investment in the LLC Preferred Securities is characterized as a minority interest on our Consolidated Balance Sheet since we are not the primary beneficiary of Trust I and Trust II. This minority interest totaled approximately \$981 million at March 31, 2007.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Each Trust II Security is automatically exchangeable into a share of Series I Non-Cumulative Perpetual Preferred Stock of PNC (the Series I Preferred Stock) under certain conditions relating to the capitalization or the financial condition of PNC Bank, N.A. and upon the direction of the Office of the Comptroller of the Currency.

Simultaneously with the closing of the Trust II Securities sale, we entered into a replacement capital covenant (the Covenant) for the benefit of holders of a specified series of our long-term indebtedness (the Covered Debt). As of March 31, 2007, Covered Debt consists of our \$200 million Floating Rate Junior Subordinated Notes issued on June 9, 1998. We agreed in the Covenant that until March 29, 2017, neither we nor our subsidiaries would purchase or redeem the Trust Securities, the LLC Preferred Securities or the Series I Preferred Stock (collectively, the Covenant Securities) unless: (i) we have received the prior approval of the Federal Reserve Board, if such approval is then required by the Federal Reserve Board and (ii) during the 180-day period prior to the date of purchase, PNC, PNC Bank, N.A. or PNC Bank, N.A.'s subsidiaries, as applicable, have received proceeds from the sale of Qualifying Securities in the amounts specified in the Covenant (which amounts will vary based on the type of securities sold). Qualifying Securities means debt and equity securities having terms and provisions specified in the Covenant and that, generally described, are intended to contribute to our capital base in a manner that is similar to the contribution to our capital base made by the Covenant Securities. We filed a copy of the Covenant with the SEC as Exhibit 99.1 to PNC's Form 8-K filed on March 30, 2007.

We have also entered into an Exchange Agreement with Trust II in which we have agreed that if full dividends are not paid

Table of Contents

in a dividend period on the Trust II Securities and the LLC Preferred Securities held by Trust II, PNC will not declare or pay dividends with respect to, or redeem, purchase or acquire, any of its equity capital securities during the next succeeding dividend period, other than: (i) purchases, redemptions or other acquisitions of shares of capital stock of PNC in connection with any employment contract, benefit plan or other similar arrangement with or for the benefit of employees, officers, directors or consultants, (ii) purchases of shares of common stock of PNC pursuant to a contractually binding requirement to buy stock existing prior to the commencement of the extension period, including under a contractually binding stock repurchase plan, (iii) any dividend in connection with the implementation of a shareholders' rights plan, or the redemption or repurchase of any rights under any such plan, (iv) as a result of an exchange or conversion of any class or series of PNC's capital stock for any other class or series of PNC's capital stock, (v) the purchase of fractional interests in shares of PNC capital stock pursuant to the conversion or exchange provisions of such stock or the security being converted or exchanged or (vi) any stock dividends paid by PNC where the dividend stock is the same stock as that on which the dividend is being paid. We filed a copy of the Exchange Agreement with the SEC as Exhibit 4.16 to PNC's Form 8-K filed on March 30, 2007.

Table of Contents***BUSINESS SEGMENTS REVIEW***

We have four major businesses engaged in providing banking, asset management and global fund processing products and services. Business segment results, including inter-segment revenues, and a description of each business are included in Note 14 Segment Reporting included in the Notes To Consolidated Financial Statements under Part I, Item 1 of this Report.

Results of individual businesses are presented based on our management accounting practices and our management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to GAAP; therefore, the financial results of individual businesses are not necessarily comparable with similar information for any other company. We refine our methodologies from time to time as our management accounting practices are enhanced and our businesses and management structure change. Financial results are presented, to the extent practicable, as if each business, with the exception of our BlackRock segment, operated on a stand-alone basis. As permitted under GAAP, we have aggregated the business results for certain operating segments for financial reporting purposes.

Assets receive a funding charge and liabilities and capital receive a funding credit based on a transfer pricing methodology that incorporates product maturities, duration and other factors. Capital is intended to cover unexpected losses and is assigned to the banking and processing businesses using our risk-based economic capital model. We have assigned to Retail Banking capital equal to 6% of funds to reflect the capital required for well-capitalized banks and to approximate market comparables for this business. The capital assigned for PFPC reflects its legal entity shareholders' equity.

BlackRock business segment results for the three months ended March 31, 2006 reflected our majority ownership in BlackRock during that period. Subsequent to the September 29, 2006 BlackRock/MLIM transaction closing, which had the effect of reducing our ownership interest to approximately 34%, our investment in BlackRock has been accounted for under the equity method but continues to be a separate reportable business segment of PNC.

We have allocated the allowances for loan and lease losses and unfunded loan commitments and letters of credit based on our assessment of risk inherent in the loan portfolios. Our allocation of the costs incurred by operations and other support areas not directly aligned with the businesses is primarily based on the use of services.

Total business segment financial results differ from total consolidated results. The impact of these differences is reflected in the *Other* category.

Other includes residual activities that do not meet the criteria for disclosure as a separate reportable business, such as gains or losses related to BlackRock transactions including LTIP distributions and obligations, Mercantile and BlackRock/MLIM acquisition integration costs, asset and liability management activities, net securities gains or losses, certain trading activities, equity management activities and minority interest in income of BlackRock for the first quarter of 2006, differences between business segment performance reporting and financial statement reporting (GAAP), intercompany eliminations, and most corporate overhead.

Employee data as reported by each business segment in the tables that follow reflects staff directly employed by the respective business and excludes corporate and shared services employees.

Results Of Businesses - Summary

Total consolidated	\$ 459	\$ 354	\$ 1,620	\$ 1,748	\$ 107,422	\$ 92,129

- (a) Business segment revenue is presented on a taxable-equivalent basis. A reconciliation of total consolidated revenue on a book (GAAP) basis to total consolidated revenue on a taxable-equivalent basis follows:

Three months ended March 31 - (in millions)	2007	2006
Total consolidated revenue, book (GAAP) basis	\$ 1,614	\$ 1,741
Taxable-equivalent adjustment	6	7
Total consolidated revenue, taxable-equivalent basis	\$ 1,620	\$ 1,748

- (b) Period-end balances for BlackRock and PFPC. BlackRock was an equity investment at March 31, 2007 and was consolidated at March 31, 2006.
- (c) For our segment reporting presentation, our share of pretax BlackRock/MLIM transaction integration costs totaling \$2 million and \$6 million for the three months ended March 31, 2007 and March 31, 2006 have been reclassified from BlackRock to Other. Other for the first three months of 2007 also includes \$11 million of pretax Mercantile acquisition integration costs.
- (d) For the first quarter of 2007, revenue represents our equity income from BlackRock. For the first quarter of 2006, revenue represents the sum of total operating revenue and nonoperating income.
- (e) PFPC revenue represents the sum of servicing revenue and nonoperating income (expense) less debt financing costs. Prior period servicing revenue amounts have been reclassified to conform with the current period presentation.

Table of Contents

Retail Banking's earnings were \$201 million for the first quarter of 2007 compared with \$190 million for the same period in 2006. The 6% increase over the first quarter of 2006 was driven by the Mercantile acquisition, strong market-related fees, and continued customer and balance sheet growth, partially offset by an increase in the provision for credit losses.

Highlights of Retail Banking's performance during the first quarter of 2007 include the following:

The acquisition of Mercantile added approximately \$10.3 billion of loans and \$12.0 billion in deposits to Retail Banking, as of March 31, 2007. Other salient points related to the acquisition include the following:

- Added 235 branches and 256 ATMs,
- Significantly increased our presence in Maryland,
- Added to our presence in Virginia and the Washington, DC area,
- Expanded our wealth management business with the addition of \$22 billion in assets under management, and
- Significantly increased the size of our small business banking franchise.

In September 2006 we launched our own PNC-branded credit card product. As of March 31, 2007, more than 89,000 cards have been issued and we have \$186 million in receivable balances. The results to date have exceeded our expectations.

Consumer and small business checking relationships increased 12,000 compared with March 31, 2006 and increased 8,000 since December 31, 2006, not including the impact of Mercantile. The low-value account closures resulting from One PNC pricing initiatives appear to have run their course. The new checking account product line has increased the average balance of new accounts by approximately 20%.

Our wealth management and brokerage businesses have benefited from the recent market conditions, as follows:

- Excluding the \$22 billion of assets under management related to our acquisition of Mercantile, assets under management increased \$4 billion compared with the first quarter of 2006,
- Brokerage assets increased \$3 billion or 7% from March 31, 2006, and
- Asset management and brokerage fees increased \$18 million or 12% over the first quarter of 2006.

Recent investments in our on-line capabilities are paying dividends:

- Since March 31, 2006, consumer-related checking households using online banking increased 9% and checking households using online bill payment increased 78%, and

Based on benchmarking reports of a study performed by the Change Sciences Group of consumer on-line experiences on the websites of 38 leading national and regional banks, we have moved from the 36th

rated site (May 2006) to the 7th rated site (March 2007), the largest movement within the benchmarking group.

Customer service and customer retention have been and continue to be our focus. During the first quarter of 2007 we partnered with the Gallup organization to evaluate customer and employee satisfaction at the branch level.

In addition to Mercantile, we opened 6 new branches and consolidated 16 branches in the first quarter as we continue to work to optimize our network by opening new branches in high growth areas, relocating branches to areas of higher opportunity, and consolidating branches in areas of declining market opportunity. We relocated 2 branches during the first quarter of 2007.

Total revenue for the first quarter of 2007 was \$839 million compared with \$753 million for 2006. Taxable-equivalent net interest income of \$452 million increased \$44 million, or 11%, compared with 2006 due to an 11% increase in average deposits and a 15% increase in average loan balances. Net interest income growth has been somewhat mitigated by declining spreads on the loan portfolio. In the current rate environment, we expect the spread we receive on both loans and deposits to be under pressure.

Noninterest income increased \$42 million, or 12%, compared with the prior year first quarter primarily driven by increased asset management fees, brokerage fees, and service charges on deposits and consumer services. This growth can be attributed primarily to the following:

- Mercantile acquisition,
- Comparatively favorable equity markets,
- Increased assets under management,
- Increased brokerage account assets and activities,
- Higher gains on asset sales,
- Increased third party loan servicing activities, and
- Customer growth.

The provision for credit losses increased \$14 million when compared with the first quarter of 2006. The increased provision is primarily a result of growth within the commercial loan portfolio and charge-offs returning to a more normal level. Charge-offs over the last couple of years have been low compared to historical averages.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Noninterest expense for the first quarter of 2007 totaled \$496 million, an increase of \$56 million, or 13%, compared with 2006. Expense increases were primarily attributable to the Mercantile acquisition, continued growth of the company's branch network, expansion of the private client group, investments in various initiatives such as the new simplified checking account product line and new PNC-branded credit card, and an increase in volume-related expenses tied to noninterest income.

The new simplified checking account product line is expected to continue to increase checking account households and average balances per account. Features of the new product line could negatively impact growth rates on service charges on deposits fee income and noninterest expenses.

Table of Contents

Full-time employees at March 31, 2007 totaled 11,645, an increase of 1,920 from March 31, 2006. Excluding the impact of the Mercantile acquisition, full-time employees declined by 100 since March 31, 2006. Part-time employees have increased by 1,044 since March 31, 2006. The increase in part-time employees is a result of the Mercantile acquisition and various customer service enhancement and efficiency initiatives. These initiatives include utilizing more part-time customer-facing employees during peak business hours versus full-time employees for the entire day.

Growing core checking deposits as a lower-cost funding source and as the cornerstone product to build customer relationships is the primary objective of our deposit strategy. Average total deposits increased \$5.1 billion, or 11%, compared with the first quarter of 2006. The deposit growth was driven by the Mercantile acquisition, the recapture of consumer certificate of deposit balances as interest rates have risen, and increases in the number of checking relationships.

In the current rate environment, we expect the rate of growth in demand deposit balances to be equal to or less than the rate of overall growth for customer checking relationships. Additionally, we continue to expect to see customers shift their funds from lower yielding interest-bearing deposits to higher yielding deposits or investment products, and to pay off loans. The shift has been evident during the past year and has impacted the level of average demand deposits in that period.

Certificates of deposits increased \$2.6 billion and money market deposits increased \$1.0 billion. These increases were attributable to the Mercantile acquisition and the current interest rate environment attracting customers back into these products.

Average demand deposit growth of \$1.4 billion, or 9%, was almost solely due to the Mercantile acquisition as the core growth was impacted by customers shifting funds into higher yielding deposits, small business sweep checking products, and investment products.

Small business and consumer-related checking relationships retention remained strong and stable. Consumer-related checking relationship retention has benefited from improved penetration rates of debit cards, online banking and online bill payment.

Currently, we are focused on a relationship-based lending strategy to target specific customer sectors (homeowners, small businesses and auto dealerships) while seeking to maintain a moderate risk profile in the loan portfolio.

Average commercial loans grew \$2.8 billion, or 51%, compared with the first quarter of 2006. The increase is attributable to the Mercantile acquisition and organic loan growth on the strength of increased loan demand from existing small business customers and the acquisition of new relationships through our sales efforts.

Average home equity loans grew by \$103 million, or 1%, compared with the first quarter of 2006. Consumer loan demand has slowed as a result of the current rate environment.

Average indirect loans grew \$493 million, or 50%, compared with the first quarter of 2006. The increase is attributable to the Mercantile acquisition and growth in our core portfolio that has benefited from increased sales and marketing efforts.

Average residential mortgage loans increased \$133 million, or 8%, primarily due to the addition of loans from the Mercantile acquisition.

Payoffs in our existing portfolio, which will continue throughout 2007, partially offset the impact of the additional loans acquired.

Additionally, our transfer of residential mortgages to held for sale and subsequent sale of those loans at the end of September 2006 reduced the size of this loan portfolio from the first quarter of 2006.

Assets under management of \$76 billion at March 31, 2007 increased \$26 billion compared with the balance at March 31, 2006. Asset growth included \$22 billion from the Mercantile acquisition and PNC portfolio growth of \$4 billion as a result of the effects of comparatively higher equity markets and a breakeven position in client net asset flows. Client net asset flows are the result of investment additions from new and existing clients offset by ordinary course distributions from trust and investment management accounts and account closures.

Nondiscretionary assets under administration of \$111 billion at March 31, 2007 increased \$24 billion compared with the balance at March 31, 2006. The growth included \$23 billion from the Mercantile acquisition and PNC portfolio growth of \$1 billion due primarily to the effect of comparatively higher equity markets.

(a) Includes lease financing.

Corporate & Institutional Banking earned \$132 million in the first quarter of 2007 compared with \$102 million in the first quarter of 2006. The increase compared with the first quarter of 2006 was largely the result of a lower provision for credit losses due to improving asset quality and increases in total revenue partly offset by an increase in noninterest expense.

(a) Represents consolidated PNC amounts.

(b) At March 31.

(c) Includes nonperforming loans of \$51 million at March 31, 2007 and \$97 million at March 31, 2006.

Highlights of the first three months of 2007 for Corporate & Institutional Banking included:

Average loan balances increased \$1.6 billion from the prior year first quarter. Growth in all loan categories resulted from the Mercantile acquisition and continuing customer demand. Competitive pressures for risk-adjusted returns have increased due to larger amounts of liquidity in the credit markets, which has resulted in shrinking loan spreads and slowing loan growth. We expect this trend to continue through 2007 as we seek to maintain our moderate risk profile.

Asset quality continued to be strong with nonperforming assets declining \$47 million, or 42%, at March 31, 2007 compared with March 31, 2006 and consistent with levels of \$63 million at December 31, 2006. The provision for credit losses declined \$28 million in the comparison of the first quarters of 2007 and 2006. Consistent with our strategy to maintain a moderate risk profile, these changes reflect actions we took to reduce our credit exposure. In addition, the continued improvement in asset quality reflected in PNC and industry experience led to a reduction in default factors used to determine required reserves.

Table of Contents

Average deposit balances for the first three months of 2007 increased \$3.0 billion, or 31%, compared with the first three months of 2006. The increase was primarily the result of corporate deposits in money market accounts and noninterest-bearing deposit growth related to our commercial mortgage servicing portfolio.

Total revenue increased \$35 million, or 10%, for the first three months of 2007 compared with the first three months of 2006. The increase was driven by higher corporate service fees from mergers and acquisitions advisory services, treasury management products and services and commercial mortgage servicing. In addition, other noninterest income increased due to higher gains on sale of loans. Net interest income increased in the comparison due primarily to the higher level of noninterest-bearing deposits.

Commercial mortgage servicing revenue, which includes fees and net interest income, totaled \$54 million for the first three months of 2007. The 29% revenue growth over the first three months of 2006 was primarily driven by growth in the commercial mortgage servicing portfolio, which increased to \$206 billion. The associated increase in deposits has increased the net interest income portion of Midland Loan Services' total revenue.

Noninterest expense increased 10% compared with the first quarter of 2006 consistent with the growth in total revenue. This reflects the continued investment in various growth and fee-based initiatives, customer growth, and increase in the commercial mortgage servicing portfolio.

See the additional revenue discussion regarding treasury management and capital markets-related products and services and commercial loan servicing on page 7.

Table of Contents

BLACKROCK

Our BlackRock business segment earned \$52 million for the first quarter of 2007 and \$49 million for the first quarter of 2006. For this PNC business segment presentation, our share of MLIM transaction integration costs for both periods has been reclassified from BlackRock to Other. In addition, these business segment earnings for the first three months of 2006 have been reduced by minority interest in income of BlackRock, excluding MLIM transaction integration costs, totaling \$23 million. Also, these business segment earnings are net of additional PNC income taxes recorded on PNC's share of BlackRock's earnings.

We have modified the presentation of historical BlackRock business segment results as described above to conform with the current business segment reporting presentation in this Financial Review.

PNC's investment in BlackRock was \$3.8 billion at March 31, 2007 compared with \$3.9 billion at December 31, 2006. Based upon BlackRock's closing market price of \$156.31 per common share at March 31, 2007, the market value of our investment in BlackRock was approximately \$6.7 billion at that date. As such, an additional \$2.9 billion of value was not recognized in our investment account at that date.

BLACKROCK/MLIM TRANSACTION

As further described in our 2006 Form 10-K, on September 29, 2006 Merrill Lynch contributed its investment management business (MLIM) to BlackRock in exchange for 65 million shares of newly issued BlackRock common and preferred stock.

For the three months ended March 31, 2006, our Consolidated Income Statement included our former 69% ownership interest in BlackRock. However, our Consolidated Balance Sheet as of March 31, 2007 and December 31, 2006 reflected the September 29, 2006 deconsolidation of BlackRock's balance sheet amounts and recognized our approximate 34% ownership interest in BlackRock as an investment accounted for under the equity method. This accounting has resulted in a reduction in certain revenue and noninterest expense categories on our Consolidated Income Statement as our share of BlackRock's net income is now reported within asset management noninterest income.

BLACKROCK LTIP PROGRAMS

As further described in our 2006 Form 10-K, BlackRock adopted the 2002 LTIP program to help attract and retain qualified professionals. We agreed to transfer 4 million of the shares of BlackRock common stock then held by us to fund the 2002 and future programs approved by BlackRock's board of directors, subject to certain conditions and limitations. Prior to 2006, BlackRock granted awards under the 2002 LTIP program of approximately \$230 million, of which approximately \$210 million were paid on January 30, 2007. The awards were funded by approximately 17% in cash from BlackRock and the remainder in BlackRock common stock transferred by PNC and distributed to LTIP participants (approximately 1 million shares).

We recognized a pretax gain of \$82 million in the first quarter of 2007 from the transfer of BlackRock shares to satisfy the majority of our 2002 LTIP obligation. The gain was reflected in noninterest income and reflected the excess of market value over book value of approximately 1 million shares transferred in January 2007.

PNC's noninterest income in the first quarter of 2007 also included a \$30 million pretax charge related to our commitment to fund additional BlackRock LTIP programs. This charge represents the mark-to-market of our remaining BlackRock LTIP obligation as of March 31, 2007.

BlackRock granted additional restricted stock unit awards in January 2007, all of which are subject to achieving earnings performance goals prior to the vesting date of September 29, 2011. Of the shares of BlackRock common stock that we have agreed to transfer to help fund their LTIP programs, approximately 1.6 million shares of the remaining 3.0 million share obligation have been committed to fund the restricted stock unit awards vesting in 2011 and the amount remaining would then be available for future awards. While we may continue to see volatility in earnings as we mark to market our LTIP shares obligation each quarter-end, we will not be able to recognize additional gains, if applicable, for the difference between the market value and the book value of the committed BlackRock common shares until the shares are distributed to LTIP participants.

Full-time employees (at March 31)	4,400	4,291
(a) Certain out-of-pocket expense items which are then client billable are included in both servicing revenue and operating expense above, but offset each other entirely and therefore have no net effect on operating income. Distribution revenue and expenses which relate to 12b-1 fees that PFPC receives from certain fund clients for the payment of marketing, sales and service expenses also entirely offset each other, but are netted for presentation purposes above. Prior period amounts have been reclassified to conform with the current period presentation.		
(b) Net of nonoperating expense.		
(c) Total operating income divided by total servicing revenue.		
(d) Includes alternative investment net assets serviced.		

PFPC earned \$31 million for the first quarter of 2007 compared with \$27 million in the year-earlier period. The earnings increase from the first quarter of 2006 reflected new business, organic growth and market appreciation, partly offset by client deconversions. Certain tax benefits also

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

contributed to the increase in earnings compared with the first three months of 2006.

Highlights of PFPC's performance in the first quarter of 2007 included:

Securities lending revenue increased 43% as loan outstandings grew by 91%.

Managed accounts revenue increased 19% due to a 59% increase in assets serviced.

Domestic alternative investment service revenues were up 16% fueled by a 13% increase in assets serviced. Servicing revenue for the first quarter of 2007 increased by \$3 million to \$208 million over the first quarter of 2006. Revenue increases related to managed account services, alternative investment services, and securities lending benefited from new business and existing asset growth. These increases were partially offset by a decline in offshore revenue due to the loss of a major client during 2006.

Operating expense increased \$2 million, or 1%, to \$153 million, in the first three months of 2007 compared with the first three months of 2006. The majority of this increase is attributable to increased headcount and technology costs to support new business achieved over the past year.

Nonoperating income benefited from grants received in a foreign jurisdiction for employment expansion as the firm's offshore operations continue to grow.

Total assets serviced by PFPC amounted to \$2.2 trillion at March 31, 2007 compared with \$1.9 trillion at March 31, 2006.

Table of Contents***CRITICAL ACCOUNTING POLICIES AND JUDGMENTS***

Note 1 Accounting Policies in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report and in Part II, Item 8 of our 2006 Form 10-K describe the most significant accounting policies that we use. Certain of these policies require us to make estimates and strategic or economic assumptions that may prove to be inaccurate or subject to variations that may significantly affect our reported results and financial position for the period or in future periods.

We must use estimates, assumptions, and judgments when financial assets and liabilities are required to be recorded at, or adjusted to reflect, fair value. Assets and liabilities carried at fair value inherently result in a higher degree of financial statement volatility. Fair values and the information used to record valuation adjustments for certain assets and liabilities are based on either quoted market prices or are provided by other independent third-party sources, when available. When such third-party information is not available, we estimate fair value primarily by using cash flow and other financial modeling techniques. Changes in underlying factors, assumptions, or estimates in any of these areas could materially impact our future financial condition and results of operations.

We discuss the following critical accounting policies and judgments under this same heading in Item 7 of our 2006 Form 10-K:

- Allowances for Loan and Lease Losses and Unfunded Loan Commitments and Letters of Credit
- Private Equity Asset Valuation
- Lease Residuals
- Goodwill
- Revenue recognition
- Income taxes

Additional discussion and information on the application of these policies is found in other portions of this Financial Review and in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report. In particular, see Note 1 Accounting Policies and Note 11 Income Taxes in the Notes To Consolidated Financial Statements regarding our first quarter 2007 adoption of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109*.

STATUS OF QUALIFIED DEFINED BENEFIT PENSION PLAN

We have a noncontributory, qualified defined benefit pension plan (plan or pension plan) covering eligible employees. Benefits are derived from a cash balance formula based on compensation levels, age and length of service. Pension contributions are based on an actuarially determined amount necessary to fund total benefits payable to plan participants. Plan assets are currently approximately 60% invested in equity investments with most of the remainder invested in fixed income instruments. Plan fiduciaries determine and review the plan's investment policy.

We calculate the expense associated with the pension plan in accordance with SFAS 87, *Employers Accounting for Pensions*, and we use assumptions and methods that are compatible with the requirements of SFAS 87, including a policy of reflecting trust assets at their fair market value. On an annual basis, we review the actuarial assumptions related to the pension plan, including the discount rate, rate of compensation increase and the expected return on plan assets. Neither the discount rate nor the compensation increase assumptions significantly affect pension expense.

The expected long-term return on assets assumption does significantly affect pension expense. The expected long-term return on plan assets for determining net periodic pension cost for 2007 was 8.25%, unchanged from 2006. Under current accounting rules, the difference between expected long-term returns and actual returns is accumulated and amortized to pension expense over future periods. Each one percentage point difference in actual return compared with our expected return causes expense in subsequent years to change by up to \$4 million as the impact is amortized into results of operations.

The table below reflects the estimated effects on pension expense of certain changes in assumptions, using 2007 estimated expense as a baseline.

Change in Assumption

Estimated
Increase to 2007

Pension
Expense

(In millions)

.5% decrease in discount rate	\$2
.5% decrease in expected long-term return on assets	\$10
.5% increase in compensation rate	\$2

We currently estimate a pretax pension benefit of \$33 million in 2007 compared with a pretax benefit of \$12 million in 2006. The primary reason for this change is 2006 investment returns in excess of the expected long-term return assumption. Actual pension benefit recognized for the first quarter of 2007 was \$8 million.

Table of Contents

In September 2006, the FASB issued SFAS 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106 and 132 (R)*. This statement affects the accounting and reporting for our qualified pension plan, our nonqualified retirement plans, our postretirement welfare benefit plans, and our postemployment benefit plans. SFAS 158 requires recognition on the balance sheet of the overfunded or underfunded position of these plans as the difference between the fair value of plan assets and the related benefit obligations. To the extent that a plan's net funded status differs from the amounts currently recognized on the balance sheet, the difference, net of tax, will be recorded as a part of accumulated other comprehensive income (loss) (AOCI) within the shareholders equity section of the balance sheet. This guidance also requires the recognition of any unrecognized actuarial gains and losses and unrecognized prior services costs to AOCI, net of tax. Post-adoption changes in unrecognized actuarial gains and losses as well as unrecognized prior service costs will be recognized in other comprehensive income, net of tax. SFAS 158 was effective for PNC as of December 31, 2006, with no restatements permitted for prior year-end reporting periods, and resulted in an adjustment for all unamortized net actuarial losses and prior service costs of \$132 million after tax. See Note 1 Accounting Policies of our 2006 Form 10-K for further information regarding our adoption of this pronouncement.

Our pension plan contribution requirements are not particularly sensitive to actuarial assumptions. Investment performance has the most impact on contribution requirements and will drive the amount of permitted contributions in future years. Also, current law, including the provisions of the Pension Protection Act of 2006, sets limits as to both minimum and maximum contributions to the plan. In any event, any large near-term contributions to the plan will be at our discretion, as we expect that the minimum required contributions under the law will be minimal or zero for several years.

See Note 8 Certain Employee Benefit And Stock-Based Compensation Plans in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report regarding a defined pension plan related to Mercantile that we plan to integrate into the PNC plan as of December 31, 2007.

We maintain other defined benefit plans that have a less significant effect on financial results, including various nonqualified supplemental retirement plans for certain employees.

RISK MANAGEMENT

We encounter risk as part of the normal course of our business and we design risk management processes to help manage these risks. The Risk Management section included in Item 7

of our 2006 Form 10-K provides a general overview of the risk measurement, control strategies and monitoring aspects of our corporate-level risk management processes. Additionally, our 2006 Form 10-K provides an analysis of the risk management processes for what we view as our primary areas of risk: credit, operational, market and liquidity, as well as a discussion of our use of financial derivatives as part of our overall asset and liability risk management process. In appropriate places within that section, historical performance is also addressed. The following information in this Risk Management section updates our 2006 Form 10-K disclosures in these areas.

CREDIT RISK MANAGEMENT

Credit risk represents the possibility that a customer, counterparty or issuer may not perform in accordance with contractual terms. Credit risk is inherent in the financial services business and results from extending credit to customers, purchasing securities, and entering into financial derivative transactions. Credit risk is one of the most common risks in banking and is one of our most significant risks.

Nonperforming, Past Due And Potential Problem Assets

See Note 4 Asset Quality in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report and included here by reference for details of the types of nonperforming assets that we held at March 31, 2007 and December 31, 2006. In addition, certain performing assets have interest payments that are past due or have the potential for future repayment problems.

Total nonperforming assets at March 31, 2007 increased \$33 million, to \$204 million, compared with December 31, 2006. Our acquisition of Mercantile added \$35 million of nonperforming assets at March 31, 2007.

Foreclosed lease assets of \$12 million at both March 31, 2007 and December 31, 2006 primarily represent our repossession of collateral related to a single airline industry credit. This repossessed collateral is currently being leased.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The amount of nonperforming loans that was current as to principal and interest was \$60 million at March 31, 2007 and \$59 million at December 31, 2006. While we believe that overall asset quality will remain strong for the near term, the current level of asset quality is very strong by historical standards and may not be sustainable for the foreseeable future, particularly in the event of deteriorating economic conditions or higher interest rates.

Table of Contents**Nonperforming Assets By Business**

In millions	March 31 2007	Dec. 31 2006
Retail Banking	\$ 101	\$ 106
Corporate & Institutional Banking	64	63
Other (a)	39	2
Total nonperforming assets	\$ 204	\$ 171

(a) Amount at March 31, 2007 includes \$35 million related to Mercantile.

Change In Nonperforming Assets

Transferred from accrual	76	50
Acquisition Mercantile	35	
Returned to performing	(4)	(3)
Principal activity including payoffs	(49)	(35)
Asset sales	(3)	(5)
Charge-offs and valuation adjustments	(22)	(16)
March 31	\$ 204	\$ 206

Accruing Loans Past Due 90 Days Or More

Dollars in millions	Amount		Percent of Total Outstandings	
	Mar. 31 2007	Dec. 31 2006	Mar. 31 2007	Dec. 31 2006
Commercial	\$ 8	\$ 9	.03%	.04%
Commercial real estate	4	5	.04	.14
Consumer	25	28	.14	.17
Residential mortgage	7	7	.08	.11
Other	2	1	.55	.27
Total loans	\$ 46	\$ 50	.07%	.10%

Loans that are not included in nonperforming or past due categories but cause us to be uncertain about the borrower's ability to comply with existing repayment terms over the next six months totaled \$48 million at March 31, 2007 compared with \$41 million at December 31, 2006. Approximately 52% of these loans are in the Corporate & Institutional Banking portfolio.

Allowances For Loan And Lease Losses And Unfunded Loan Commitments And Letters Of Credit

We maintain an allowance for loan and lease losses to absorb losses from the loan portfolio. We determine the allowance based on quarterly assessments of the probable estimated losses inherent in the loan portfolio. While we make allocations to specific loans and pools of loans, the total reserve is available for all loan and lease losses.

We refer you to Note 4 Asset Quality in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report regarding changes in the allowance for loan and lease losses and changes in the allowance for unfunded loan commitments and letters of credit for additional information which is included herein by reference.

Allocation Of Allowance For Loan And Lease Losses

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Dollars in millions	March 31, 2007		December 31, 2006	
	Allowance	Loans	Allowance	Loans
Commercial	\$ 477	37.3%	\$ 443	40.9%
Commercial real estate	110	14.9	30	7.0
Consumer	41	28.7	28	33.1
Residential mortgage	14	14.5	7	12.7
Lease financing	45	4.0	48	5.6
Other	3	.6	4	.7
Total	\$ 690	100.0%	\$ 560	100.0%

In addition to the allowance for loan and lease losses, we maintain an allowance for unfunded loan commitments and letters of credit. We report this allowance as a liability on our Consolidated Balance Sheet. We determine this amount using estimates of the probability of the ultimate funding and losses related to those credit exposures. This methodology is similar to the one we use for determining the adequacy of our allowance for loan and lease losses.

The provision for credit losses for the first three months of 2007 and the evaluation of the allowances for loan and lease losses and unfunded loan commitments and letters of credit as of March 31, 2007 reflected loan growth, changes in loan portfolio composition, the impact of refinements to our reserve methodology, and changes in asset quality. The provision includes amounts for probable losses on loans and credit exposure related to unfunded loan commitments and letters of credit.

We do not expect to sustain asset quality at its current level. However, based on the assets we currently hold and current business trends and activities, we believe that overall asset quality will remain strong by historical standards for at least the near term. This outlook, combined with expected loan growth, may result in an increase in the allowance for loan and lease losses in future periods.

The allowance as a percent of nonperforming loans was 388% and as a percent of total loans was 1.10% at March 31, 2007. The comparable percentages at December 31, 2006 were 381% and 1.12%.

Table of Contents**Charge-Offs And Recoveries**

	Three months ended March 31 Dollars in millions	Charge- offs	Recoveries	Net Charge- offs	Percent of Average Loans
2007					
Commercial		\$ 31	\$ 7	\$ 24	.45%
Consumer		17	5	12	.29
Total		\$ 48	\$ 12	\$ 36	.27
2006					
Commercial		\$ 16	\$ 6	\$ 10	.21%
Consumer		12	4	8	.20
Total		\$ 28	\$ 10	\$ 18	.15

We establish reserves to provide coverage for probable losses not considered in the specific, pool and consumer reserve methodologies, such as, but not limited to, industry concentrations and conditions; credit quality trends; recent loss experience in particular sectors of the portfolio; ability and depth of lending management; changes in risk selection and underwriting standards and the timing of available information. The amount of reserves for these qualitative factors is assigned to loan categories and to business segments primarily based on the relative specific and pool allocation amounts. The amount of reserve allocated for qualitative factors represented 7.0% of the total allowance and .08% of total loans, net of unearned income, at March 31, 2007.

CREDIT DEFAULT SWAPS

Credit default swaps provide, for a fee, an assumption by a third party of a portion of the credit risk related to the underlying financial instruments. We use these contracts to mitigate credit risk associated with commercial lending activities as well as proprietary derivative and convertible bond trading. Credit default swaps are included in the Free-Standing Derivatives table in the Financial Derivatives section of this Risk Management discussion. Net gains or losses from credit default swaps are reflected in the Trading line item on our Consolidated Income Statement and were not significant in the first three months of 2007 or 2006.

MARKET RISK MANAGEMENT OVERVIEW

Market risk is the risk of a loss in earnings or economic value due to adverse movements in market factors such as interest rates, credit spreads, foreign exchange rates, and equity prices.

MARKET RISK MANAGEMENT INTEREST RATE RISK

Interest rate risk results primarily from our traditional banking activities of gathering deposits and extending loans. Many factors, including economic and financial conditions, movements in interest rates, and consumer preferences, affect the difference between the interest that we earn on assets and the interest that we pay on liabilities and the level of our non-interest bearing funding sources. Due to the repricing term mismatches and embedded options inherent in certain of these products, changes in market interest rates not only affect

expected near-term earnings, but also the economic values of these assets and liabilities.

PNC's Asset and Liability Management group centrally manages interest rate risk within limits and guidelines set forth in our risk management policies approved by the Asset and Liability Committee and the Risk Committee of the Board.

Sensitivity estimates and market interest rate benchmarks for the first quarter of 2007 and 2006 follow:

Interest Sensitivity Analysis

	First Quarter 2007	First Quarter 2006
Net Interest Income Sensitivity Simulation		

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Effect on net interest income in first year from gradual interest rate change over following 12 months of:

100 basis point increase	(2.6)%	(.3)%
100 basis point decrease	2.2%	.1%

Effect on net interest income in second year from gradual interest rate change over the preceding 12 months of:

100 basis point increase	(5.8)%	(1.4)%
100 basis point decrease	3.3%	(.4)%

Duration of Equity Model

Base case duration of equity (in years):	2.0	1.0
------------------------------------------	-----	-----

Key Period-End Interest Rates

One-month LIBOR	5.32%	4.83%
Three-year swap	4.95%	5.26%

In addition to measuring the effect on net interest income assuming parallel changes in current interest rates, we routinely simulate the effects of a number of nonparallel interest rate environments. The following Net Interest Income Sensitivity To Alternate Rate Scenarios table reflects the percentage change in net interest income over the next two 12-month periods assuming (i) the PNC Economist's most likely rate forecast, (ii) implied market forward rates, and (iii) a Two-Ten Inversion (a 200 basis point inversion between two-year and ten-year rates superimposed on current base rates) scenario. We are inherently sensitive to a flatter or inverted yield curve.

Net Interest Income Sensitivity To Alternate Rate Scenarios (First Quarter 2007)

	PNC Economist	Market Forward	Two-Ten Inversion
First year sensitivity	1.5%	1.6%	(7.2)%
Second year sensitivity	6.6%	4.5%	(6.8)%

Table of Contents

All changes in forecasted net interest income are relative to results in a base rate scenario where current market rates are assumed to remain unchanged over the forecast horizon.

When forecasting net interest income, we make assumptions about interest rates and the shape of the yield curve, the volume and characteristics of new business, and the behavior of existing on- and off-balance sheet positions. These assumptions determine the future level of simulated net interest income in the base interest rate scenario and the other interest rate scenarios presented in the following table. These simulations assume that as assets and liabilities mature, they are replaced or repriced at market rates.

The graph below presents the yield curves for the base rate scenario and each of the alternative scenarios one year forward.

Our risk position has become increasingly liability sensitive in part due to the continued flat yield curve and in part due to our balance sheet management strategies. We believe that we have the deposit funding base and balance sheet flexibility to adjust, where appropriate, to changing interest rates and market conditions.

MARKET RISK MANAGEMENT TRADING RISK

Our trading activities primarily include customer-driven trading in fixed income securities, equities, derivatives, and foreign exchange contracts. They also include the underwriting of fixed income and equity securities and proprietary trading.

We use value-at-risk (VaR) as the primary means to measure and monitor market risk in trading activities. The Risk Committee of the Board establishes an enterprise-wide VaR limit on our trading activities.

During the first quarter of 2007, our VaR ranged between \$6.1 million and \$8.4 million, averaging \$7.2 million.

To help ensure the integrity of the models used to calculate VaR for each portfolio and enterprise-wide, we use a process known as backtesting. The backtesting process consists of comparing actual observations of trading-related gains or losses against the VaR levels that were calculated at the close of the prior day. We would expect a maximum of two to three instances a year in which actual losses exceeded the prior day VaR measure. During the first three months of 2007, there were no such instances at the enterprise-wide level.

The following graph shows a comparison of enterprise-wide trading-related gains and losses against prior day VaR for the period.

Table of Contents

Total trading revenue for the first quarter of 2007 and 2006 was as follows:

Three months ended March 31 in millions	2007	2006
Noninterest income	\$ 52	\$ 57
Total trading revenue	\$ 52	\$ 57
Securities underwriting and trading (a)	\$ 9	\$ 14
Foreign exchange	14	14
Financial derivatives	29	29
Total trading revenue	\$ 52	\$ 57

(a) Includes changes in fair value for certain loans accounted for at fair value.

Average trading assets and liabilities consisted of the following:

Three months ended March 31 - in millions	2007	2006
Trading assets		
Securities (a)	\$ 1,569	\$ 1,797
Resale agreements (b)	820	321
Financial derivatives (c)	1,115	908
Loans at fair value (c)	193	
Total trading assets	\$ 3,697	\$ 3,026
Trading liabilities		
Securities sold short (d)	\$ 1,264	\$ 663
Repurchase agreements and other borrowings (e)	363	886
Financial derivatives (f)	1,126	901
Borrowings at fair value (f)	39

(d) Included in Borrowed funds - Other.

(e) Included in Borrowed funds - Repurchase agreements and Other.

(f) Included in Accrued expenses and other liabilities.

MARKET RISK MANAGEMENT EQUITY AND OTHER INVESTMENT RISK

Equity investment risk is the risk of potential losses associated with investing in both private and public equity markets.

BlackRock

PNC owns approximately 43 million shares of BlackRock common stock, accounted for under the equity method. Our total investment in BlackRock was \$3.8 billion at March 31, 2007 compared with \$3.9 billion at December 31, 2006. The market value of our investment in BlackRock was \$6.7 billion at March 31, 2007. The primary risk measurement, similar to other equity investments, is economic capital.

Low Income Housing Projects

Included in our equity investments are limited partnerships that sponsor affordable housing projects. At March 31, 2007 these investments, consisting of partnerships accounted for under the equity method as well as equity investments held by consolidated partnerships, totaled \$728 million. The

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

comparable amount at December 31, 2006 was \$708 million. PNC's equity investment at risk was \$154 million at March 31, 2007 compared with \$134 million at year-end 2006. We also had commitments to make additional equity investments in affordable housing limited partnerships of \$56 million at March 31, 2007 compared with \$71 million at December 31, 2006.

Private Equity

The private equity portfolio is comprised of equity and mezzanine investments that vary by industry, stage and type of investment. At March 31, 2007, private equity investments carried at estimated fair value totaled \$512 million compared with \$463 million at December 31, 2006. As of March 31, 2007, approximately 44% of the amount was invested directly in a variety of companies and approximately 56% was invested in various limited partnerships. Our unfunded commitments related to private equity totaled \$291 million at March 31, 2007 compared with \$283 million at December 31, 2006. Our acquisition of Mercantile added \$26 million and \$30 million of private equity investments and private equity unfunded commitments, respectively.

Other Investments

We also make investments in affiliated and non-affiliated funds with both traditional and alternative investment strategies. The economic values could be driven by either the fixed-income market or the equity markets, or both. At March 31, 2007, other investments totaled \$387 million compared with \$269 million at December 31, 2006. Approximately \$85 million of other investments were acquired in connection with the Mercantile transaction. Our unfunded commitments related to other investments totaled \$60 million at March 31, 2007 compared with \$16 million at December 31, 2006. The amounts of other investments and related unfunded commitments at March 31, 2007 included those related to Steel City Capital Funding LLC (Steel City), as further described below.

On March 1, 2007, we entered into a joint venture with a third party to form Steel City for purposes of purchasing and originating second lien loans and turnaround loans. Our primary reason for pursuing this venture was to leverage our strengths of origination and servicing, provide an additional product to our customers, and allow for us to moderate the risks associated with this asset class. Additionally, we will earn fees for portfolio management services. Steel City is a limited liability company in which various PNC subsidiaries will initially hold an approximate 31% equity ownership. Our initial capital contribution to Steel City was approximately \$33 million with a commitment to fund an additional \$45 million. The third party investor contributed initial capital of \$74 million with a commitment to fund an additional \$101 million. We evaluated the accounting for this transaction under FIN 46R and other appropriate generally accepted accounting principles and determined that our aggregate investment will be accounted for under the equity method as

Table of Contents

described under Note 1 Accounting Policies in the Notes To Consolidated Financial Statements included in this Report. This transaction did not have a material impact on our consolidated results of operations.

One of our subsidiaries will act as manager of Steel City. In this capacity it will perform loan origination and servicing activities and administer day-to-day operations for Steel City and will be compensated for those services through a monthly management fee. The manager also will receive certain performance-based fees. In addition, one of our subsidiaries is providing Steel City with a line of credit for purposes of short-term working capital needs at current market rates.

PNC Bank, N.A., sold \$107 million of loans at fair value to Steel City at the inception of the entity. All the loans sold to Steel City were classified as performing loans. This transfer was treated as a sale for accounting purposes.

LIQUIDITY RISK MANAGEMENT

Liquidity risk is the risk of potential loss if we were unable to meet our funding requirements at a reasonable cost. We manage liquidity risk to help ensure that we can obtain cost-effective funding to meet current and future obligations under both normal business as usual and stressful circumstances.

Our largest source of liquidity on a consolidated basis is the deposit base that comes from our retail and wholesale banking activities. Other borrowed funds come from a diverse mix of short and long-term funding sources. Liquid assets and unused borrowing capacity from a number of sources are also available to maintain our liquidity position.

Liquid assets consist of short-term investments (federal funds sold, resale agreements and other short-term investments, including trading securities) and securities available for sale. At March 31, 2007, our liquid assets totaled \$31.1 billion, with \$23.3 billion pledged as collateral for borrowings, trust, and other commitments.

Bank Level Liquidity

PNC Bank, N.A. is a member of the FHLB-Pittsburgh. Certain Mercantile banks are members of the FHLB-Atlanta. As such, these banks have access to advances from the FHLB secured generally by residential mortgages. PNC Bank, N.A. can also borrow from the Federal Reserve Bank of Cleveland's discount window to meet short-term liquidity requirements. These borrowings are secured by securities and commercial loans. Additionally, Mercantile banks can borrow from the Federal Reserve Bank of Richmond's discount window. At March 31, 2007, we maintained significant unused borrowing capacity from FHLB-Pittsburgh and the Federal Reserve Bank of Cleveland's discount window under current collateral requirements.

We can also obtain funding through alternative forms of borrowing, including federal funds purchased, repurchase agreements, and short-term and long-term debt issuances. In July 2004, PNC Bank, N.A. established a program to offer up to \$20 billion in senior and subordinated unsecured debt obligations with maturities of more than nine months. Through March 31, 2007, PNC Bank, N.A. had issued \$2.9 billion of debt under this program. In April 2007, we issued \$500 million of 18-month floating rate senior notes under this program that are due October 3, 2008. Interest will be reset monthly to 1-month LIBOR less six basis points and will be paid monthly. These notes are not redeemable by PNC Bank, N.A., or at the option of the holder prior to maturity.

PNC Bank, N.A. established a program in December 2004 to offer up to \$3.0 billion of its commercial paper. As of March 31, 2007, \$514 million of commercial paper was outstanding under this program.

Parent Company Liquidity

Our parent company's routine funding needs consist primarily of dividends to PNC shareholders, share repurchases, debt service, the funding of non-bank affiliates, and acquisitions.

Parent company liquidity guidelines are designed to help ensure that sufficient liquidity is available to meet these requirements over the succeeding 12-month period. In managing parent company liquidity we consider funding sources, such as expected dividends to be received from PNC Bank, N.A. and potential debt issuance, and discretionary funding uses, the most significant of which is the external dividend to be paid on PNC's stock.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The principal source of parent company cash flow is the dividends it receives from PNC Bank, N.A., which may be impacted by the following:

- Capital needs,
- Laws and regulations,
- Corporate policies,
- Contractual restrictions, and
- Other factors.

Also, there are statutory and regulatory limitations on the ability of national banks to pay dividends or make other capital distributions or to extend credit to the parent company or its non-bank subsidiaries. Dividends may also be impacted by the bank's capital needs and by contractual restrictions. The amount available for dividend payments to the parent company by PNC Bank, N.A. without prior regulatory approval was approximately \$585 million at March 31, 2007.

In addition to dividends from PNC Bank, N.A., other sources of parent company liquidity include cash and short-term investments, as well as dividends and loan repayments from other subsidiaries and dividends or distributions from equity investments. As of March 31, 2007, the parent company had approximately \$1.1 billion in funds available from its cash and

Table of Contents

short-term investments. As of March 31, 2007 there were \$650 million of parent company contractual obligations with maturities of less than one year, including all of the underlying Capital Securities, totaling \$300 million, related to PNC Institutional Capital Trust B, which we have elected to redeem as of May 15, 2007.

We can also generate liquidity for the parent company and PNC's non-bank subsidiaries through the issuance of securities in public or private markets.

In July 2006, PNC Funding Corp established a program to offer up to \$3.0 billion of commercial paper to provide the parent company with additional liquidity. As of March 31, 2007, there were no issuances outstanding under this program.

During February 2007, in connection with our acquisition of Mercantile, we issued \$1.9 billion of debt to fund a substantial portion of the cash portion of this transaction, comprised of the following:

- \$775 million of floating rate senior notes due January 2012,
- \$500 million of floating rate senior notes due January 2014, and
- \$600 million of fixed rate subordinated notes due February 2017.

Our 2006 Form 10-K includes further details on the February 2007 debt issuances.

In March 2007, we redeemed all of the underlying Capital Securities related to the following trusts, totaling \$216 million:

- UNB Capital Trust I (\$16 million), and
- Riggs Capital Trust II (\$200 million).

Commitments

The following tables set forth contractual obligations and various other commitments representing required and potential cash outflows as of March 31, 2007.

Contractual Obligations

March 31, 2007 - in millions	Total
Remaining contractual maturities of time deposits	\$ 22,196
Borrowed funds	20,456
Minimum annual rentals on noncancellable leases	1,136
Nonqualified pension and postretirement benefits	317
Purchase obligations (a)	293
Total contractual cash obligations (b)	\$ 44,398

- (a) Includes purchase obligations for goods and services covered by noncancellable contracts and contracts including cancellation fees.
- (b) Excludes amounts related to our adoption of FIN 48 due to the uncertainty in terms of timing and amount of future cash outflows. Note 11 Income Taxes in our Notes To Consolidated Financial Statements includes additional information regarding our adoption of FIN 48 in the first quarter of 2007.

Other Commitments (a)

March 31, 2007 - in millions	Total Amounts Committed
Credit commitments	\$ 49,263
Standby letters of credit	4,798
Other commitments (b)	407
Total commitments	\$ 54,468

- (a) Other commitments are funding commitments that could potentially require performance in the event of demands by third parties or contingent events. Loan commitments are reported net of participations, assignments and syndications.
- (b) Includes private equity funding commitments related to equity management, low income housing projects and other investments.

Financial Derivatives

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We use a variety of financial derivatives as part of the overall asset and liability risk management process to help manage interest rate, market and credit risk inherent in our business activities. Substantially all such instruments are used to manage risk related to changes in interest rates. Interest rate and total return swaps, interest rate caps and floors and futures contracts are the primary instruments we use for interest rate risk management.

Financial derivatives involve, to varying degrees, interest rate, market and credit risk. For interest rate swaps and total return swaps, options and futures contracts, only periodic cash payments and, with respect to options, premiums, are exchanged. Therefore, cash requirements and exposure to credit risk are significantly less than the notional amount on these instruments. Further information on our financial derivatives, including the credit risk amounts of these derivatives as of March 31, 2007 and December 31, 2006, is presented in Note 1 Accounting Policies and Note 9 Financial Derivatives in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report.

Not all elements of interest rate, market and credit risk are addressed through the use of financial or other derivatives, and such instruments may be ineffective for their intended purposes due to unanticipated market characteristics, among other reasons.

Table of Contents

The following tables provide the notional or contractual amounts and estimated net fair value of financial derivatives used for risk management and designated as accounting hedges or free-standing derivatives at March 31, 2007 and December 31, 2006. Weighted-average interest rates presented are based on contractual terms, if fixed, or the implied forward yield curve at each respective date, if floating.

INTERNAL CONTROLS AND DISCLOSURE CONTROLS AND PROCEDURES

As of March 31, 2007, we performed an evaluation under the supervision and with the participation of our management, including the Chairman and Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures and of changes in our internal control over financial reporting.

Based on that evaluation, our management, including the Chairman and Chief Executive Officer and the Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of March 31, 2007, and that there has been no change in internal control over financial reporting that occurred during the first quarter of 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

GLOSSARY OF TERMS

Accounting/administration net fund assets - Net domestic and foreign fund investment assets for which we provide accounting and administration services. We do not include these assets on our Consolidated Balance Sheet.

Adjusted average total assets - Primarily comprised of total average quarterly (or annual) assets plus (less) unrealized losses (gains) on available-for-sale debt securities, less goodwill and certain other intangible assets (net of eligible deferred taxes).

Annualized - Adjusted to reflect a full year of activity.

Assets under management - Assets over which we have sole or shared investment authority for our customers/clients. We do not include these assets on our Consolidated Balance Sheet.

Basis point - One hundredth of a percentage point.

Charge-off - Process of removing a loan or portion of a loan from our balance sheet because it is considered uncollectible. We also record a charge-off when a loan is transferred to held for sale by reducing the carrying amount by the allowance for loan losses associated with such loan or if the market value is less than its carrying amount.

Common shareholders equity to total assets - Common shareholders equity divided by total assets. Common shareholders equity equals total shareholders equity less the liquidation value of preferred stock.

Credit derivatives - Contractual agreements that provide protection against a credit event of one or more referenced credits. The nature of a credit event is established by the

protection buyer and protection seller at the inception of a transaction, and such events include bankruptcy, insolvency and failure to meet payment obligations when due. The buyer of the credit derivative pays a periodic fee in return for a payment by the protection seller upon the occurrence, if any, of a credit event.

Credit spread - The difference in yield between debt issues of similar maturity. The excess of yield attributable to credit spread is often used as a measure of relative creditworthiness, with a reduction in the credit spread reflecting an improvement in the borrower's perceived creditworthiness.

Custody assets - Investment assets held on behalf of clients under safekeeping arrangements. We do not include these assets on our Consolidated Balance Sheet. Investment assets held in custody at other institutions on our behalf are included in the appropriate asset categories on the Consolidated Balance Sheet as if physically held by us.

Derivatives - Financial contracts whose value is derived from publicly traded securities, interest rates, currency exchange rates or market indices. Derivatives cover a wide assortment of financial contracts, including forward contracts, futures, options and swaps.

Duration of equity - An estimate of the rate sensitivity of our economic value of equity. A negative duration of equity is associated with asset sensitivity (*i.e.*, positioned for rising interest rates), while a positive value implies liability sensitivity (*i.e.*, positioned for declining interest

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

rates). For example, if the duration of equity is +1.5 years, the economic value of equity declines by 1.5% for each 100 basis point increase in interest rates.

Earning assets - Assets that generate income, which include: federal funds sold; resale agreements; other short-term investments, including trading securities; loans held for sale; loans, net of unearned income; securities; and certain other assets.

Economic capital - Represents the amount of resources that a business segment should hold to guard against potentially large losses that could cause insolvency. It is based on a measurement of economic risk, as opposed to risk as defined by regulatory bodies. The economic capital measurement process involves converting a risk distribution to the capital that is required to support the risk, consistent with our target credit rating. As such, economic risk serves as a common currency of risk that allows us to compare different risks on a similar basis.

Economic value of equity (EVE) - The present value of the expected cash flows of our existing assets less the present value of the expected cash flows of our existing liabilities, plus the present value of the net cash flows of our existing off-balance sheet positions.

Table of Contents

Effective duration - A measurement, expressed in years, that, when multiplied by a change in interest rates, would approximate the percentage change in value of on- and off- balance sheet positions.

Efficiency - Noninterest expense divided by the sum of net interest income (GAAP basis) and noninterest income.

Foreign exchange contracts - Contracts that provide for the future receipt and delivery of foreign currency at previously agreed-upon terms.

Funds transfer pricing - A management accounting methodology designed to recognize the net interest income effects of sources and uses of funds provided by the assets and liabilities of a business segment. We assign these balances LIBOR-based funding rates at origination that represent the interest cost for us to raise/invest funds with similar maturity and repricing structures.

Futures and forward contracts - Contracts in which the buyer agrees to purchase and the seller agrees to deliver a specific financial instrument at a predetermined price or yield. May be settled either in cash or by delivery of the underlying financial instrument.

GAAP - Accounting principles generally accepted in the United States of America.

Interest rate floors and caps - Interest rate protection instruments that involve payment from the protection seller to the protection buyer of an interest differential, which represents the difference between a short-term rate (e.g., three-month LIBOR) and an agreed-upon rate (the strike rate) applied to a notional principal amount.

Interest rate swap contracts - Contracts that are entered into primarily as an asset/liability management strategy to reduce interest rate risk. Interest rate swap contracts are exchanges of interest rate payments, such as fixed-rate payments for floating-rate payments, based on notional principal amounts.

Intrinsic value - The amount by which the fair value of an underlying stock exceeds the exercise price of an option on that stock.

Leverage ratio - Tier 1 risk-based capital divided by adjusted average total assets.

Net interest margin - Annualized taxable-equivalent net interest income divided by average earning assets.

Nondiscretionary assets under administration - Assets we hold for our customers/clients in a non-discretionary, custodial capacity. We do not include these assets on our Consolidated Balance Sheet.

Noninterest income to total revenue - Noninterest income divided by the sum of net interest income (GAAP basis) and noninterest income.

Nonperforming assets - Nonperforming assets include nonaccrual loans, troubled debt restructured loans, foreclosed assets and other assets. We do not accrue interest income on assets classified as nonperforming.

Nonperforming loans - Nonperforming loans include loans to commercial, commercial real estate, equipment lease financing, consumer, and residential mortgage customers as well as troubled debt restructured loans. Nonperforming loans do not include loans held for sale or foreclosed and other assets. We do not accrue interest income on loans classified as nonperforming.

Notional amount - A number of currency units, shares, or other units specified in a derivatives contract.

Operating leverage - The period to period percentage change in total revenue (GAAP basis) less the percentage change in noninterest expense. A positive percentage indicates that revenue growth exceeded expense growth (*i.e.*, positive operating leverage) while a negative percentage implies expense growth exceeded revenue growth (*i.e.*, negative operating leverage).

Options - Contracts that grant the purchaser, for a premium payment, the right, but not the obligation, to either purchase or sell the associated financial instrument at a set price during a period or at a specified date in the future.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Recovery - Cash proceeds received on a loan that we had previously charged off. We credit the amount received to the allowance for loan and lease losses.

Return on average capital - Annualized net income divided by average capital.

Return on average assets - Annualized net income divided by average assets.

Return on average common equity - Annualized net income divided by average common shareholders' equity.

Risk-weighted assets - Primarily computed by the assignment of specific risk-weights (as defined by The Board of Governors of the Federal Reserve System) to assets and off-balance sheet instruments.

Securitization - The process of legally transforming financial assets into securities.

Swaptions - Contracts that grant the purchaser, for a premium payment, the right, but not the obligation, to enter into an interest rate swap agreement during a period or at a specified date in the future.

Tangible common equity ratio - Period-end common shareholders' equity less goodwill and other intangible assets

Table of Contents

(net of eligible deferred taxes), and excluding mortgage servicing rights, divided by period-end assets less goodwill and other intangible assets (net of eligible deferred taxes), and excluding mortgage servicing rights.

Taxable-equivalent interest - The interest income earned on certain assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than taxable investments. To provide more meaningful comparisons of yields and margins for all interest-earning assets, we also provide revenue on a taxable-equivalent basis by increasing the interest income earned on tax-exempt assets to make it fully equivalent to interest income earned on other taxable investments. This adjustment is not permitted under GAAP on the Consolidated Income Statement.

Tier 1 risk-based capital - Tier 1 risk-based capital equals: total shareholders' equity, plus trust preferred capital securities, plus certain minority interests that are held by others; less goodwill and certain other intangible assets (net of eligible deferred taxes), less equity investments in nonfinancial companies and less net unrealized holding losses on available-for-sale equity securities. Net unrealized holding gains on available-for-sale equity securities, net unrealized holding gains (losses) on available-for-sale debt securities and net unrealized holding gains (losses) on cash flow hedge derivatives are excluded from total shareholders' equity for tier 1 risk-based capital purposes.

Tier 1 risk-based capital ratio - Tier 1 risk-based capital divided by period-end risk-weighted assets.

Total fund assets serviced - Total domestic and offshore fund investment assets for which we provide related processing services. We do not include these assets on our Consolidated Balance Sheet.

Total return swap - A non-traditional swap where one party agrees to pay the other the total return of a defined underlying asset (e.g., a loan), usually in return for receiving a stream of LIBOR-based cash flows. The total returns of the asset, including interest and any default shortfall, are passed through to the counterparty. The counterparty is therefore assuming the credit and economic risk of the underlying asset.

Total risk-based capital - Tier 1 risk-based capital plus qualifying subordinated debt and trust preferred securities, other minority interest not qualified as tier 1, and the allowance for loan and lease losses, subject to certain limitations.

Total risk-based capital ratio - Total risk-based capital divided by period-end risk-weighted assets.

Transaction deposits - The sum of money market and interest-bearing demand deposits and demand and other noninterest-bearing deposits.

Value-at-risk (VaR) - A statistically-based measure of risk which describes the amount of potential loss which may be incurred due to severe and adverse market movements. The measure is of the maximum loss which should not be exceeded on 99 out of 100 days.

Yield curve - A graph showing the relationship between the yields on financial instruments or market indices of the same credit quality with different maturities. For example, a normal or positive yield curve exists when long-term bonds have higher yields than short-term bonds. A flat yield curve exists when yields are the same for short-term and long-term bonds. A steep yield curve exists when yields on long-term bonds are significantly higher than on short-term bonds. An inverted or negative yield curve exists when short-term bonds have higher yields than long-term bonds.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

We make statements in this Report, and we may from time to time make other statements, regarding our outlook or expectations for earnings, revenues, expenses and/or other matters regarding or affecting PNC that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Forward-looking statements are typically identified by words such as believe, expect, anticipate, intend, outlook, estimate, forecast, project and other similar words and expressions.

Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made. We do not assume any duty and do not undertake to update our forward-looking statements. Actual results or future events could differ, possibly materially, from those that we anticipated in our forward-looking statements, and future results could differ materially from our historical performance.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Our forward-looking statements are subject to the following principal risks and uncertainties. We provide greater detail regarding some of these factors in our 2006 Form 10-K, including in the Risk Factors and Risk Management sections of that report. Our forward-looking statements may also be subject to other risks and uncertainties, including those discussed elsewhere in this Report or in our other filings with the SEC.

Our business and operating results are affected by business and economic conditions generally or specifically in the principal markets in which we do business. We are affected by changes in our customers' and counterparties' financial performance, as well as changes in customer preferences and behavior, including as a result of changing business and economic conditions.

Table of Contents

The value of our assets and liabilities, as well as our overall financial performance, are also affected by changes in interest rates or in valuations in the debt and equity markets. Actions by the Federal Reserve and other government agencies, including those that impact money supply and market interest rates, can affect our activities and financial results.

Our operating results are affected by our liability to provide shares of BlackRock common stock to help fund BlackRock long-term incentive plan (LTIP) programs, as our LTIP liability is adjusted quarterly (marked-to-market) based on changes in BlackRock s common stock price and the number of remaining committed shares, and we recognize gain or loss on such shares at such times as shares are transferred for payouts under the LTIP programs.

Competition can have an impact on customer acquisition, growth and retention, as well as on our credit spreads and product pricing, which can affect market share, deposits and revenues.

Our ability to implement our business initiatives and strategies could affect our financial performance over the next several years.

Our ability to grow successfully through acquisitions is impacted by a number of risks and uncertainties related both to the acquisition transactions themselves and to the integration of the acquired businesses into PNC after closing. These uncertainties continue to be present with respect to the integration of Mercantile Bankshares Corporation.

Legal and regulatory developments could have an impact on our ability to operate our businesses or our financial condition or results of operations or our competitive position or reputation. Reputational impacts, in turn, could affect matters such as business generation and retention, our ability to attract and retain management, liquidity and funding. These legal and regulatory developments could include: (a) the unfavorable resolution of legal proceedings or regulatory and other governmental inquiries; (b) increased litigation risk from recent regulatory and other governmental developments; (c) the results of the regulatory examination process, our failure to satisfy the requirements of agreements with governmental agencies, and regulators future use of supervisory and enforcement tools; (d) legislative and regulatory reforms, including changes to laws and regulations involving tax, pension, and the protection of confidential customer information; and (e) changes in accounting policies and principles.

Our business and operating results are affected by our ability to identify and effectively manage risks inherent in our businesses, including, where appropriate, through the effective use of third-party insurance and capital management techniques.

Our ability to anticipate and respond to technological changes can have an impact on our ability to respond to customer needs and to meet competitive demands.

The adequacy of our intellectual property protection, and the extent of any costs associated with obtaining rights in intellectual property claimed by others, can impact our business and operating results.

Our business and operating results can also be affected by widespread natural disasters, terrorist activities or international hostilities, either as a result of the impact on the economy and financial and capital markets generally or on us or on our customers, suppliers or other counterparties specifically.

Also, risks and uncertainties that could affect the results anticipated in forward-looking statements or from historical performance relating to our equity interest in BlackRock, Inc. are discussed in more detail in BlackRock s 2006 Form 10-K, including in the Risk Factors section, and in BlackRock s other filings with the SEC, accessible on the SEC s website and on or through BlackRock s website at www.blackrock.com.

We grow our business from time to time by acquiring other financial services companies. Acquisitions in general present us with risks other than those presented by the nature of the business acquired. In particular, acquisitions may be substantially more expensive to complete (including as a result of costs incurred in connection with the integration of the acquired company) and the anticipated benefits (including anticipated cost savings and strategic gains) may be significantly harder or take longer to achieve than expected. In some cases, acquisitions involve our entry into new businesses or new geographic or other markets, and these situations also present risks resulting from our inexperience in these new areas. As a regulated financial institution, our pursuit of attractive acquisition opportunities could be negatively impacted due to regulatory delays or other regulatory issues. Regulatory and/or legal issues related to the pre-acquisition operations of an acquired business may cause reputational harm to PNC following the acquisition and integration of the acquired business into ours and may result in additional future costs arising as a result of those issues. Post-closing acquisition risk continues to apply to Mercantile as we complete the integration.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

THE PNC FINANCIAL SERVICES GROUP, INC.

BUSINESS

We are one of the largest diversified financial services companies in the United States based on assets, with businesses engaged in:

Retail banking,
Corporate and institutional banking,
Asset management, and
Global fund processing services.

We provide many of our products and services nationally and others in our primary geographic markets located in Pennsylvania; New Jersey; Washington, DC; Maryland; Virginia; Ohio; Kentucky; and Delaware. We also provide certain global fund processing services internationally. We are subject to intense competition from other financial services companies and are subject to regulation by various domestic and international authorities.

NOTE 1 ACCOUNTING POLICIES

BASIS OF FINANCIAL STATEMENT PRESENTATION

Our consolidated financial statements include the accounts of the parent company and its subsidiaries, most of which are wholly owned, and certain partnership interests and variable interest entities. See Note 2 Acquisitions in our 2006 Annual Report on Form 10-K (2006 Form 10-K) regarding the deconsolidation of BlackRock, Inc. (BlackRock) from PNC 's Consolidated Balance Sheet effective September 29, 2006. Our investment in BlackRock has been accounted for under the equity method of accounting since that date. We prepared these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles or GAAP). We have eliminated intercompany accounts and transactions. We have also reclassified certain prior year amounts to conform with the 2007 presentation. These reclassifications did not have a material impact on our consolidated financial condition or results of operations.

In our opinion, the unaudited interim consolidated financial statements reflect all normal, recurring adjustments needed to present fairly our results for the interim periods.

When preparing these unaudited interim consolidated financial statements, we have assumed that you have read the audited consolidated financial statements included in our 2006 Form 10-K.

SPECIAL PURPOSE ENTITIES

Special purpose entities are broadly defined as legal entities structured for a particular purpose. We use special purpose entities in various legal forms to conduct normal business

activities. Special purpose entities that meet the criteria for a Qualifying Special Purpose Entity (QSPE) as defined in Statement of Financial Accounting Standards No. (SFAS) 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, are not required to be consolidated. We review special purpose entities that are not QSPEs for consolidation under the guidance contained in Financial Accounting Standards Board (FASB) Interpretation No. 46 (Revised 2003), Consolidation of Variable Interest Entities (FIN 46R) and Accounting Research Bulletin No. 51, Consolidated Financial Statements, as appropriate.

In general, a variable interest entity (VIE) is a special purpose entity formed as a corporation, partnership, limited liability corporation, or any other legal structure used to conduct activities or hold assets that either:

Does not have equity investors with voting rights that can directly or indirectly make decisions about the entity 's activities through those voting rights or similar rights, or

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Has equity investors that do not provide enough equity for the entity to finance its activities.
A VIE often holds financial assets, including loans or receivables, real estate or other property.

We consolidate a VIE if we are considered to be its primary beneficiary. The primary beneficiary is subject to absorbing the majority of the expected losses from the VIE's activities, is entitled to receive a majority of the entity's residual returns, or both. Upon consolidation of a VIE, we generally record all of the VIE's assets, liabilities and noncontrolling interests at fair value, with future changes based upon consolidation accounting principles. See Note 6 Variable Interest Entities for more information about non-consolidated VIEs in which we hold a significant interest.

BUSINESS COMBINATIONS

We record the net assets of companies that we acquire at their estimated fair value at the date of acquisition and we include the results of operations of the acquired business in our consolidated income statement from the date of acquisition. We recognize as goodwill the excess of the purchase price over the estimated fair value of the net assets acquired.

USE OF ESTIMATES

We prepare the consolidated financial statements using financial information available at the time, which requires us to make estimates and assumptions that affect the amounts reported. Actual results may differ from these estimates and the differences may be material to the consolidated financial statements.

Table of Contents

REVENUE RECOGNITION

We earn net interest income and noninterest income from various sources, including:

- Lending,
- Securities portfolio,
- Asset management and fund servicing,
- Customer deposits,
- Loan servicing,
- Brokerage services, and
- Securities and derivatives trading activities, including foreign exchange.

We also earn revenue from selling loans and securities, and we recognize income or loss from certain private equity activities. We earn fees and commissions from:

- Issuing loan commitments, standby letters of credit and financial guarantees,
- Selling various insurance products,
- Providing treasury management services,
- Providing merger and acquisition advisory and related services, and
- Participating in certain capital markets transactions.

Revenue earned on interest-earning assets is recognized based on the effective yield of the financial instrument.

We recognize asset management and fund servicing fees primarily as the services are performed. Asset management fees are generally based on a percentage of the fair value of the assets under management and performance fees are generally based on a percentage of the returns on such assets. Certain performance fees are earned upon attaining specified investment return thresholds and are recorded as earned. Beginning in the fourth quarter of 2006, asset management fees also includes our ownership share of the earnings of BlackRock under the equity method of accounting.

Fund servicing fees are primarily based on a percentage of the fair value of the fund assets and the number of shareholder accounts we service.

Service charges on deposit accounts are recognized as charged. Brokerage fees and gains on the sale of securities and certain derivatives are recognized on a trade-date basis.

We record private equity income or loss based on changes in the valuation of the underlying investments or when we dispose of our interest. Dividend income from private equity investments is generally recognized when received.

We recognize revenue from loan servicing; securities, derivatives and foreign exchange trading; and securities underwriting activities as they are earned based on contractual terms, as transactions occur or as services are provided. We recognize revenue from the sale of loans upon cash settlement of the transaction.

In certain circumstances, revenue is reported net of associated expenses in accordance with GAAP.

INVESTMENTS

We have interests in various types of investments. The accounting for these investments is dependent on a number of factors including, but not limited to, items such as:

- Marketability of the investment,
- Ownership interest,
- Our plans for the investment, and
- The nature of the investment.

Investment in BlackRock

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We deconsolidated the assets and liabilities of BlackRock from our Consolidated Balance Sheet effective September 29, 2006 and now account for our investment in BlackRock under the equity method of accounting. Under the equity method, our investment in the equity of BlackRock is reflected on our Consolidated Balance Sheet in the caption equity investments, while our equity in earnings of BlackRock is reported on our Consolidated Income Statement in the caption asset management.

We mark to market our obligation related to the BlackRock long-term incentive plan (LTIP) programs. As we transfer shares for payouts under such LTIP programs from time to time, we recognize gain or loss on those shares. These items are shown on a net basis on our Consolidated Income Statement in net gains related to BlackRock. Our obligation to the LTIP and the resulting accounting are described in more detail in our 2006 Form 10-K.

Private Equity Investments

We report private equity investments, which include direct investments in companies, interests in limited partnerships, and affiliated partnership interests, at estimated fair values. These estimates are based on available information and may not necessarily represent amounts that we will ultimately realize through distribution, sale or liquidation of the investments. The valuation procedures applied to direct investments include techniques such as multiples of cash flow of the entity, independent appraisals of the entity or the pricing used to value the entity in a recent financing transaction. We value affiliated partnership interests based on the underlying investments of the partnership using procedures consistent with those applied to direct investments. We generally value limited partnership investments based on the financial statements we receive from the general partner. We include all private equity investments on the Consolidated Balance Sheet in equity investments. Changes in the fair value of these assets are recognized in noninterest income.

We consolidate private equity funds when we are the sole general partner in a limited partnership and have determined that we have control of the partnership. The portion we do not own is reflected in the caption minority and noncontrolling interests in consolidated entities on the Consolidated Balance Sheet.

Table of Contents

Equity Securities and Partnership Interests

We account for equity investments other than BlackRock and private equity investments under one of the following methods:

Marketable equity securities are recorded on a trade-date basis and are accounted for based on the securities' quoted market prices from a national securities exchange. Dividend income on these securities is recognized in net interest income. Those purchased with the intention of recognizing short-term profits are classified as trading and included in other short-term investments. Both realized and unrealized gains and losses on trading securities are included in noninterest income. Marketable equity securities not classified as trading are designated as securities available for sale with unrealized gains and losses, net of income taxes, reflected in accumulated other comprehensive income (loss). Any unrealized losses that we have determined to be other-than-temporary are recognized in the current period earnings.

Nonmarketable equity securities are recorded using the cost method of accounting since we do not have significant influence over the investee. Under this method, there is no change to the cost basis unless there is an other-than-temporary decline in value. If the decline is determined to be other than temporary, we write down the cost basis of the investment to a new cost basis that represents realizable value. The amount of the write-down is accounted for as a loss included in noninterest income. Distributions received from income on cost method investments are included in interest income or noninterest income depending on the type of investment. We include nonmarketable equity securities in other assets on the Consolidated Balance Sheet.

For investments in limited partnerships, limited liability companies and other minor investments that are not required to be consolidated, we use either the cost method or the equity method. The cost method is described above for nonmarketable equity securities. We use the cost method for minor investments in which we have no influence over the operations of the investee and when cost appropriately reflects our economic interest in the underlying investment. We use the equity method for all other general and limited partner ownership interests and limited liability company investments. Under the equity method, we record our equity ownership share of net income or loss of the investee in noninterest income. Investments described above are included in equity investments on the Consolidated Balance Sheet.

Debt Securities

Debt securities are recorded on a trade-date basis. We classify debt securities as held to maturity and carry them at amortized cost if we have the positive intent and ability to hold the

securities to maturity. Debt securities that we purchase for short-term appreciation or other trading purposes are carried at market value and classified as other short-term investments. Realized and unrealized gains and losses on trading securities are included in noninterest income.

Debt securities not classified as held to maturity or trading are designated as securities available for sale and carried at market value with unrealized gains and losses, net of income taxes, reflected in accumulated other comprehensive income (loss). We review all debt securities that are in an unrealized loss position for other-than-temporary impairment on a quarterly basis. Other-than-temporary declines in the market value of available for sale debt securities are recognized as a securities loss included in noninterest income in the period in which the determination is made.

We include all interest on debt securities, including amortization of premiums and accretion of discounts using the interest method, in net interest income. We compute gains and losses realized on the sale of debt securities available for sale on a specific security basis and include them in noninterest income.

LOANS AND LEASES

Except as described below, loans are stated at the principal amounts outstanding, net of unearned income, unamortized deferred fees and costs on originated loans, and premiums or discounts on loans purchased. Interest related to loans other than nonaccrual loans is accrued based on the principal amount outstanding and credited to net interest income as earned using the interest method. Loan origination fees, direct loan origination costs, and loan premiums and discounts are deferred and amortized to income, over periods not exceeding the contractual life of the loan, using methods that are not materially different from the interest method.

Certain loans are accounted for at fair value in accordance with SFAS 155, Accounting for Certain Hybrid Financial Instruments, an amendment of FASB Statements No. 133 and 140, with changes in fair value reported in trading revenue. The fair value of these loans was \$160 million, or less than .5% of the total loan portfolio, at March 31, 2007.

We also provide financing for various types of equipment, aircraft, energy and power systems, and rolling stock through a variety of lease arrangements. Direct financing leases are carried at the aggregate of lease payments plus estimated residual value of the leased property, less

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

unearned income. Leveraged leases, a form of financing lease, are carried net of nonrecourse debt. We recognize income over the term of the lease using the interest method. Lease residual values are reviewed for other-than-temporary impairment on a quarterly basis. Gains or losses on the sale of leased assets are included in noninterest income while valuation adjustments on lease residuals are included in noninterest expense.

Table of Contents**LOAN SALES, SECURITIZATIONS AND RETAINED INTERESTS**

We recognize the sale of loans or other financial assets when the transferred assets are legally isolated from our creditors and the appropriate accounting criteria are met. We also sell mortgage and other loans through secondary market securitizations. In certain cases, we may retain a portion or all of the securities issued, interest-only strips, one or more subordinated tranches, servicing rights and, in some cases, cash reserve accounts, all of which are considered retained interests in the transferred assets. Our loan sales and securitizations are generally structured without recourse to us and with no restrictions on the retained interests. In the event we are obligated for recourse liabilities in a sale, our policy is to record such liabilities at fair value upon closing of the transaction. Specific reserves and allocated pooled reserves are charged-off and reduce the basis of the loans when the loans are designated as held for sale. Gains or losses recognized on the sale of the loans depend on the allocation of carrying value between the loans sold and the retained interests, based on their relative fair market values at the date of sale. We generally estimate fair value based on the present value of future expected cash flows using assumptions as to discount rates, interest rates, prepayment speeds, credit losses and servicing costs, if applicable. Gains or losses on these transactions are reported in noninterest income.

As of January 1, 2006, we adopted SFAS 156, *Accounting for Servicing of Financial Assets* an amendment of FASB Statement No. 140. SFAS 156 was issued in March 2006 and requires all newly recognized servicing rights and obligations to be initially measured at fair value. For each class of recognized servicing rights and obligations, the standard permits the election of either the amortization method or the fair value measurement method for subsequent measurement of the asset or obligation. For separately recognized servicing rights and obligations retained or purchased related to commercial loans and commercial mortgages, we have elected to account for them under the amortization method, which requires us to amortize the servicing assets or liabilities in proportion to and over the periods of estimated net servicing income or net servicing loss. For servicing rights or obligations related to residential mortgage loans, we have elected to account for subsequent adjustments using the fair value method with changes in the value of the right or obligation reflected in noninterest income.

Each quarter, we evaluate our servicing assets that are being carried at amortized cost for impairment by categorizing the pools of assets underlying servicing rights by product type. A valuation allowance is recorded and reduces current income when the carrying amount of a specific asset category exceeds its fair value.

We classify securities retained as debt securities available for sale or other assets, depending on the form of the retained

interest. Retained interests that are subject to prepayment risk are reviewed on a quarterly basis for impairment. If the fair value of the retained interest is below its carrying amount and the decline is determined to be other-than-temporary, then the decline is reflected in noninterest income. We recognize other adjustments to the fair market value of retained interests classified as available for sale securities through accumulated other comprehensive income (loss).

NONPERFORMING ASSETS

Nonperforming assets include:

- Nonaccrual loans,
- Troubled debt restructurings, and
- Foreclosed assets.

Other than consumer loans, we generally classify loans as nonaccrual when we determine that the collection of interest or principal is doubtful or when a default of interest or principal has existed for 90 days or more and the loans are not well-secured or in the process of collection. When the accrual of interest is discontinued, any accrued but uncollected interest credited to income in the current year is reversed and any unpaid interest accrued in the prior year, is charged against the allowance for loan and lease losses. We charge off loans based on the facts and circumstances of the individual loan.

Consumer loans well-secured by residential real estate, including home equity and home equity lines of credit, are classified as nonaccrual at 12 months past due. These loans are considered well secured if the fair market value of the property, less 15% to cover potential foreclosure expenses, is greater than or equal to the principal balance including any superior liens. A fair market value assessment of the property is initiated when the loan becomes 80 to 90 days past due. The procedures for foreclosure of these loans is consistent with our general foreclosure process discussed below. The classification of consumer loans well-secured by residential real estate as nonaccrual loans at 12 months past due is in accordance with Federal Financial Institutions Examination Council guidelines. We charge off loans based on the facts and circumstances of the individual loan.

Consumer loans not well-secured or in the process of collection are classified as nonaccrual at 120 days past due if they are home equity loans and at 180 days past due if they are home equity lines of credit. These loans are recorded at the lower of cost or market value, less liquidation

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

costs and the unsecured portion of these loans is generally charged off when they become nonaccrual.

A loan is categorized as a troubled debt restructuring if a significant concession is granted due to deterioration in the financial condition of the borrower.

Nonperforming loans are generally not returned to performing status until the obligation is brought current and the borrower

Table of Contents

has performed in accordance with the contractual terms for a reasonable period of time and collection of the contractual principal and interest is no longer doubtful. Nonaccrual commercial and commercial real estate loans and troubled debt restructurings are designated as impaired loans. We recognize interest collected on these loans on the cash basis or cost recovery method.

Foreclosed assets are comprised of any asset seized or property acquired through a foreclosure proceeding or acceptance of a deed-in-lieu of foreclosure. Depending on various state statutes, legal proceedings are initiated on or about the 65th day of delinquency. If no other remedies arise from the legal proceedings, the final outcome will result in the sheriff's sale of the property. When PNC acquires the deed, the transfer of loans to other real estate owned (OREO) will be completed. These assets are recorded on the date acquired at the lower of the related loan balance or market value of the collateral less estimated disposition costs. We estimate market values primarily based on appraisals, when available, or quoted market prices on liquid assets. Subsequently, foreclosed assets are valued at the lower of the amount recorded at acquisition date or the current market value less estimated disposition costs. Valuation adjustments on these assets and gains or losses realized from disposition of such property are reflected in noninterest expense.

ALLOWANCE FOR LOAN AND LEASE LOSSES

We maintain the allowance for loan and lease losses at a level that we believe to be adequate to absorb estimated probable credit losses inherent in the loan portfolio as of the balance sheet date. The allowance is increased by the provision for credit losses, which is charged against operating results, and decreased by the amount of charge-offs, net of recoveries. Our determination of the adequacy of the allowance is based on periodic evaluations of the loan and lease portfolios and other relevant factors. This evaluation is inherently subjective as it requires material estimates, all of which may be susceptible to significant change, including, among others:

- Expected default probabilities,
- Loss given default,
- Exposure at default,
- Amounts and timing of expected future cash flows on impaired loans,
- Value of collateral,
- Estimated losses on consumer loans and residential mortgages, and
- Amounts for changes in economic conditions and potential estimation or judgmental imprecision.

In determining the adequacy of the allowance for loan and lease losses, we make specific allocations to impaired loans, allocations to pools of watchlist and nonwatchlist loans and allocations to consumer and residential mortgage loans. We also allocate reserves to provide coverage for probable

losses not covered in specific, pool and consumer reserve methodologies related to qualitative and measurement factors. While allocations are made to specific loans and pools of loans, the total reserve is available for all credit losses.

Specific allocations are made to significant individual impaired loans and are determined in accordance with SFAS 114, Accounting by Creditors for Impairment of a Loan, with impairment measured based on the present value of the loan's expected cash flows, the loan's observable market price or the fair value of the loan's collateral. We establish a specific allowance on all other impaired loans based on their loss given default credit risk rating.

Allocations to loan pools are developed by business segment based on probability of default and loss given default risk ratings by using historical loss trends and our judgment concerning those trends and other relevant factors. These factors may include, among others:

- Actual versus estimated losses,
- Regional and national economic conditions, and
- Business segment and portfolio concentrations.

Loss factors are based on industry and/or internal experience and may be adjusted for significant factors that, based on our judgment, impact the collectibility of the portfolio as of the balance sheet date. Consumer and residential mortgage loan allocations are made at a total portfolio level based on historical loss experience adjusted for portfolio activity.

While our pool reserve methodologies strive to reflect all risk factors, there continues to be a certain element of uncertainty associated with, but not limited to, potential estimation errors and imprecision in the estimation process due to the inherent lag of information. We provide additional reserves that are designed to provide coverage for expected losses attributable to such risks. In addition, these reserves include factors which may not be directly measured in the determination of specific or pooled reserves. These factors include:

- Industry concentration and conditions,

Credit quality trends,
Recent loss experience in particular segments of the portfolio,
Ability and depth of lending management,
Changes in risk selection and underwriting standards, and
Bank regulatory considerations.

ALLOWANCE FOR UNFUNDED LOAN COMMITMENTS AND LETTERS OF CREDIT

We maintain the allowance for unfunded loan commitments and letters of credit at a level we believe is adequate to absorb estimated probable losses related to these unfunded credit facilities. We determine the adequacy of the allowance based on periodic evaluations of the unfunded credit facilities including an assessment of the probability of commitment

Table of Contents

usage, credit risk factors for loans outstanding to these same customers, and the terms and expiration dates of the unfunded credit facilities. Net adjustments to the allowance for unfunded loan commitments and letters of credit are included in the provision for credit losses.

MORTGAGE AND OTHER LOAN SERVICING RIGHTS

We provide servicing under various commercial, consumer and residential loan servicing contracts. These contracts are either purchased in the open market or retained as part of a commercial mortgage loan securitization, residential mortgage loan sale or other commercial loan sale. Prior to January 1, 2006, purchased contracts were recorded at cost and the servicing rights retained from the sale or securitization of loans were recorded based on their relative fair value to all of the assets securitized or sold. As a result of the adoption of SFAS 156, beginning January 1, 2006 all newly acquired servicing rights were initially measured at fair value. Fair value is based on the present value of the expected future servicing cash flows, including assumptions as to:

- Interest rates for escrow and deposit balance earnings,
- Discount rates,
- Estimated interest rates, and
- Estimated servicing costs.

For subsequent measurements of our servicing rights we have elected to account for our commercial mortgage and commercial loan servicing rights as a class of assets under the amortization method. This determination was made based on the unique characteristics of the commercial mortgages and commercial loans underlying these servicing rights with regard to market inputs used in determining fair value and how we manage the risks inherent in the commercial servicing rights assets. Specific risk characteristics of the commercial mortgages include loan type, currency or exchange rate, interest rates and expected cash flows. Specific risk characteristics of commercial loans include interest rates and credit quality factors which could impact expected cash flows. We record the servicing assets as other intangible assets and amortize them over their estimated lives in proportion to estimated net servicing income or loss. On a quarterly basis, we test the assets for impairment using various valuation models. If the estimated fair value of the assets is less than the carrying value, an impairment loss is recognized. Servicing fees are recognized as they are earned and are reported net of amortization expense in noninterest income. For residential mortgage servicing rights, we have elected to account for these assets under the fair value method. The primary risk of changes to the value of the residential mortgage servicing rights resides in the potential volatility in the economic assumptions used, primarily the interest rates. The pricing methodology used by PNC to value residential mortgage servicing rights uses a combination of securities market data observations, model cash flow projections and anecdotal servicing observations and surveys. Changes in the fair values of these assets are reflected in noninterest income.

DEPRECIATION AND AMORTIZATION

For financial reporting purposes, we depreciate premises and equipment principally using the straight-line method over their estimated useful lives.

We use estimated useful lives for furniture and equipment ranging from one to 10 years, and depreciate buildings over an estimated useful life of up to 40 years. We amortize leasehold improvements over their estimated useful lives of up to 15 years or the respective lease terms, whichever is shorter.

We purchase, as well as internally develop and customize, certain software to enhance or perform internal business functions. Software development costs incurred in the planning and post-development project stages are charged to noninterest expense. Costs associated with designing software configuration and interfaces, installation, coding programs and testing systems are capitalized and amortized using the straight-line method over periods ranging from one to seven years.

DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We use a variety of financial derivatives as part of our overall asset and liability risk management process to manage interest rate, market and credit risk inherent in our business activities. We use substantially all such instruments to manage risk related to changes in interest rates. Interest rate and total return swaps, interest rate caps and floors, and futures contracts are the primary instruments we use for interest rate risk management.

Financial derivatives involve, to varying degrees, interest rate, market and credit risk. We manage these risks as part of our asset and liability management process and through credit policies and procedures. We seek to minimize counterparty credit risk by entering into transactions with only high-quality institutions, establishing credit limits, and generally requiring bilateral netting and collateral agreements.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We recognize all derivative instruments at fair value as either other assets or other liabilities. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship. For derivatives not designated as an accounting hedge, the trading gain or loss is recognized in noninterest income.

For those derivative instruments that are designated and qualify as hedging instruments, we must designate the hedging instrument, based on the exposure being hedged, as a fair value hedge or a cash flow hedge. We have no derivatives that hedge the net investment in a foreign operation.

We formally document the relationship between the hedging instruments and hedged items, as well as the risk management objective and strategy before undertaking a hedge. To qualify for hedge accounting, the derivatives and related hedged items must be designated as a hedge. For hedging relationships in

Table of Contents

which effectiveness is measured, we formally assess, both at the inception of the hedge and on an ongoing basis, if the derivatives are highly effective in offsetting changes in fair values or cash flows of the hedged item. If it is determined that the derivative instrument is not highly effective as a hedge, hedge accounting is discontinued.

For derivatives that are designated as fair value hedges (i.e., hedging the exposure to changes in the fair value of an asset or a liability attributable to a particular risk), changes in the fair value of the hedging derivative are recognized in earnings and offset by recognizing changes in the fair value of the hedged item attributable to the hedged risk. To the extent the hedge is ineffective, the changes in fair value will not offset and the difference is reflected in the same financial statement category as the hedged item.

For derivatives designated as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows), the effective portions of the gain or loss on derivatives are reported as a component of accumulated other comprehensive income (loss) and subsequently reclassified in interest income in the same period or periods during which the hedged transaction affects earnings. As a result, the change in fair value of any ineffective portion of the hedging derivative is recognized immediately in earnings.

We discontinue hedge accounting when it is determined that the derivative is no longer qualifying as an effective hedge; the derivative expires or is sold, terminated or exercised; or the derivative is de-designated as a fair value or cash flow hedge or it is no longer probable that the forecasted transaction will occur by the end of the originally specified time period. If we determine that the derivative no longer qualifies as a fair value or cash flow hedge and therefore hedge accounting is discontinued, the derivative will continue to be recorded on the balance sheet at its fair value with changes in fair value included in current earnings. For a discontinued fair value hedge, the previously hedged item is no longer adjusted for changes in fair value.

When hedge accounting is discontinued because it is no longer probable that a forecasted transaction will occur, the derivative will continue to be recorded on the balance sheet at its fair value with changes in fair value included in current earnings, and the gains and losses in accumulated other comprehensive income (loss) will be recognized immediately into earnings. When we discontinue hedge accounting because the hedging instrument is sold, terminated or no longer designated, the amount reported in accumulated other comprehensive income (loss) up to the date of sale, termination or de-designation continues to be reported in other comprehensive income or loss until the forecasted transaction affects earnings.

We occasionally purchase or originate financial instruments that contain an embedded derivative. Prior to January 1, 2006,

we assessed at the inception of the transaction if economic characteristics of the embedded derivative were clearly and closely related to the economic characteristics of the financial instrument (host contract), whether the financial instrument that embodied both the embedded derivative and the host contract were measured at fair value with changes in fair value reported in earnings, and whether a separate instrument with the same terms as the embedded instrument would not meet the definition of a derivative. If the embedded derivative did not meet these three conditions, the embedded derivative would qualify as a derivative and be recorded apart from the host contract and carried at fair value with changes recorded in current earnings. On January 1, 2006, we adopted SFAS 155, which, among other provisions, permits a fair value election for hybrid financial instruments requiring bifurcation on an instrument-by-instrument basis. Beginning January 1, 2006, we elected to account for certain previously bifurcated hybrid instruments and certain newly acquired hybrid instruments under this fair value election on an instrument-by-instrument basis. As such, certain previously reported embedded derivatives are now reported with their host contracts at fair value in loans or other borrowed funds.

We enter into commitments to make loans whereby the interest rate on the loan is set prior to funding (interest rate lock commitments). We also enter into commitments to purchase mortgage loans (purchase commitments). Both interest rate lock commitments and purchase commitments on mortgage loans that will be held for resale are accounted for as free-standing derivatives. Interest rate lock commitments and purchase commitments that are considered to be derivatives are recorded at fair value in other assets or other liabilities. Fair value of interest rate lock commitments and purchase commitments is determined as the change in value that occurs after the inception of the commitment considering the projected security price, fees collected from the borrower and costs to originate, adjusted for anticipated fallout risk. We recognize the gain or loss from the change in fair value of these derivatives in trading noninterest income.

RECENT ACCOUNTING PRONOUNCEMENTS

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities* Including an amendment of FASB Statement No. 115. This statement permits entities to choose to measure many financial instruments and certain other items at fair value. The fair value option may be applied on an instrument by instrument basis with a few exceptions. The election is irrevocable and must be applied to entire instruments and not to portions of instruments. We will adopt SFAS 159 beginning January 1, 2008.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

During 2006, the FASB issued the following:

SFAS 157, Fair Value Measurements, defines fair value and establishes a framework for measuring fair value which includes permissible valuation techniques and a hierarchy of inputs utilized in the measurement process. This statement applies

Table of Contents

whenever other accounting standards require or permit fair value measurement. As required, we will adopt SFAS 157 prospectively beginning January 1, 2008. While we are continuing to evaluate the possible impact of this new standard, we currently do not expect the adoption to have a material effect on our results of operations or financial position.

FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the financial statements and sets forth recognition, derecognition and measurement criteria for tax positions taken or expected to be taken in a tax filing. For PNC, this guidance is effective for all tax positions taken or expected to be taken beginning on January 1, 2007. See Note 11 Income Taxes.

FASB Staff Position No. (FSP) FAS 13-2, Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction. This guidance requires a recalculation of the timing of income recognition for a leveraged lease under SFAS 13, Accounting for Leases, when a change in the timing of income tax deductions directly related to the leveraged lease transaction occurs or is projected to occur. Any tax positions taken regarding the leveraged lease transaction must be recognized and measured in accordance with FIN 48 described above. This guidance is effective for PNC beginning January 1, 2007 with the cumulative effect of applying the provisions of this FSP being recognized through an adjustment to opening retained earnings. Any immediate or future reductions in earnings from the change in accounting would be recovered in subsequent years. Our adoption of the guidance in FSP FAS 13-2 resulted in an after-tax charge to beginning retained earnings at January 1, 2007 of approximately \$149 million.

NOTE 2 ACQUISITION

Effective March 2, 2007, we acquired Mercantile Bankshares Corporation (Mercantile) under an Agreement and Plan of Merger dated as of October 8, 2006. Mercantile shareholders received .4184 shares of PNC common stock and \$16.45 in cash for each share of Mercantile, or in the aggregate approximately 53 million shares of PNC common stock and \$2.1 billion in cash. Total consideration paid was approximately \$5.9 billion in stock and cash.

Mercantile has added banking and investment and wealth management services through 235 branches in Maryland, Virginia, the District of Columbia, Delaware and southeastern Pennsylvania. This transaction has significantly expanded our presence in the mid-Atlantic region, particularly within the attractive Baltimore and Washington, DC markets.

Our acquisition of Mercantile added approximately \$21 billion of assets to our Consolidated Balance Sheet, including \$12.4 billion of loans, \$4.3 billion of goodwill and \$3.0 billion of available for sale and trading securities. Loans added with this acquisition included \$5.8 billion of commercial real estate, \$2.7 billion of commercial, \$2.3 billion of residential mortgage and \$1.6 billion of consumer loans. In addition, we added \$12.5 billion of deposits and \$2.1 billion of borrowed funds in connection with this acquisition. Our Consolidated Income Statement includes the impact of Mercantile subsequent to our March 2, 2007 acquisition.

Corporate stocks and other	321	1	(1)		321
Total securities available for sale	\$23,333	\$57	\$(199)		\$23,191

(a) Securities held to maturity at March 31, 2007 and December 31, 2006 totaled less than \$.5 million at each date.

We evaluate our securities available for sale portfolio in light of changing market conditions and other factors and, where appropriate, take steps intended to improve our overall positioning.

At March 31, 2007, securities available for sale included a net unrealized loss of \$60 million, which represented the difference between fair value and amortized cost. The comparable amount at December 31, 2006 was a net unrealized loss of \$142 million.

The fair value of securities available for sale generally decreases when interest rates increase and vice versa. Net unrealized gains and losses in the securities available for sale portfolio are included in shareholders' equity as accumulated other comprehensive income (loss), net of tax.

Of the \$148 million gross unrealized loss amount at March 31, 2007, \$134 million related to securities that had been in a loss position for 12 months or more. The fair value of those securities totaled approximately \$7.4 billion. Of those securities in an unrealized loss position for 12 months or more as of March 31, 2007, PNC held 11 residential mortgage-backed security positions with fair value totaling \$270 million that had an unrealized loss of more than 5% when compared with their amortized cost. The unrealized loss on these positions totaled \$19 million and, the unrealized loss amount on any individual position did not exceed \$4 million. These securities are primarily collateralized mortgage obligations where amortized cost closely approximates the par value of

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

the security. These securities are either US government agency issued or rated AAA. At March 31, 2007, PNC also held certain other securities included in the other categories in the preceding table that had an unrealized loss of more than 5% when compared with their amortized cost. The approximate fair value of these other securities at March 31, 2007 was \$5 million and the aggregate unrealized loss on these securities positions was not significant. The majority of the reported unrealized loss related to these securities and the remaining other available for sale securities is attributable to changes in interest rates and not from the deterioration in the credit quality of the issuer.

The expected weighted-average life of securities available for sale (excluding corporate stocks and other) was 3 years and 8 months at March 31, 2007 and December 31, 2006.

Information relating to securities sold is set forth in the following table:

Securities Sold

Three months ended		Gross	Gross	Net	Income Tax
	Proceeds	Gains	Losses	Gains (Losses)	Expense/ (Benefit)
March 31 In millions					
2007	\$3,425	\$9	\$(12)	\$(3)	\$(1)
2006	1,257		(4)	(4)	(1)

The fair value of securities pledged to secure public and trust deposits and repurchase agreements and for other purposes was \$23.3 billion at March 31, 2007 and \$10.6 billion at

Table of Contents

December 31, 2006. The increase is due primarily to an increase in securities pledged as collateral for the ability to borrow from the Federal Reserve Bank of Cleveland. The pledged securities include positions held in our portfolio of securities available for sale, trading securities that are included in Other short-term investments on our Consolidated Balance Sheet, and securities accepted as collateral from others that we are permitted by contract or custom to sell or repledge.

The fair value of securities accepted as collateral that we are permitted by contract or custom to sell or repledge was \$1.3 billion at March 31, 2007 and \$1.4 billion at December 31, 2006 and is a component of Federal funds sold and Resale agreements on our Consolidated Balance Sheet. Of the permitted amount, \$1.2 billion was repledged to others at March 31, 2007 and \$1.3 billion was repledged to others at December 31, 2006.

NOTE 4 ASSET QUALITY

The following table sets forth nonperforming assets and related information.

Dollars in millions	March 31, 2007	December 31, 2006
Nonaccrual loans		
Commercial	\$121	\$109
Commercial real estate	25	12
Consumer	14	13
Residential mortgage	16	12
Lease financing	2	1
Total nonaccrual loans	178	147
Foreclosed and other assets		
Lease	12	12
Residential mortgage	11	10
Other	3	2
Total foreclosed and other assets	26	24
Total nonperforming assets (a)	\$204	\$171
Nonperforming loans to total loans	.28%	.29%
Nonperforming assets to total loans and foreclosed assets	.32	.34
Nonperforming assets to total assets	.17	.17

(a) Excludes equity management assets carried at estimated fair value of \$15 million at March 31, 2007 and \$11 million at December 31, 2006 (amounts include troubled debt restructured assets of \$4 million at both March 31, 2007 and December 31, 2006) and loans held for sale carried at lower of cost or market value of \$18 million at March 31, 2007.

Changes in the allowance for loan and lease losses were as follows:

In millions	2007	2006
Allowance at January 1	\$560	\$596
Charge-offs		
Commercial	(31)	(16)

Net change in allowance for unfunded loan commitments and letters of credit	16	(3)
Allowance at March 31	\$690	\$597

Changes in the allowance for unfunded loan commitments and letters of credit were as follows:

In millions	2007	2006
Allowance at January 1	\$120	\$100
Acquired allowance - Mercantile	17	
Net change in allowance for unfunded loan commitments and letters of credit	(16)	3
Allowance at March 31	\$121	\$103

NOTE 5 GOODWILL AND OTHER INTANGIBLE ASSETS

A summary of the changes in goodwill by business segment for the three months ended March 31, 2007 follows:

Goodwill

	December 31	Additions/	March 31
In millions	2006	Adjustments	2007
Retail Banking	\$1,466	\$3,958	\$5,424
Corporate & Institutional Banking	938	368	1,306
PFPC	968		968
BlackRock	30	13	43
Other		(2)	(2)
Total	\$3,402	\$4,337	\$7,739

We added \$4.3 billion of goodwill and \$288 million of other intangible assets in connection with our March 2007 acquisition of Mercantile. Assets and liabilities of acquired entities are recorded at estimated fair value as of the acquisition date and are subject to refinement as information relative to the fair values at that date becomes available. We are awaiting certain information relating to our valuations and any pre-acquisition contingencies. Revisions may result in subsequent adjustments to goodwill. As of March 31, 2007, the goodwill and other intangible assets related to Mercantile are reported in the Retail Banking and Corporate & Institutional Banking business segments.

Table of Contents

The gross carrying amount, accumulated amortization and net carrying amount of other intangible assets by major category consisted of the following:

Other Intangible Assets

In millions	March 31, 2007	December 31, 2006
Customer-related and other intangibles		
Gross carrying amount	\$ 623	\$ 342
Accumulated amortization	(193)	(178)
Net carrying amount	\$ 430	\$ 164
Mortgage and other loan servicing rights		
Gross carrying amount	\$ 727	\$ 689
Accumulated amortization	(228)	(212)
Net carrying amount	\$ 499	\$ 477
Total	\$ 929	\$ 641

Most of our other intangible assets have finite lives and are amortized primarily on a straight-line basis or, in the case of mortgage and other loan servicing rights and certain core deposit intangibles, on an accelerated basis.

For customer-related intangibles, the estimated remaining useful lives range from less than 1 year to 12 years, with a weighted-average remaining useful life of approximately 8 years. Our mortgage and other loan servicing rights are amortized primarily over a period of 5 to 10 years in proportion to the estimated net servicing cash flows from the related loans.

The changes in the carrying amount of goodwill and net other intangible assets for the three months ended March 31, 2007 are as follows:

Changes in Goodwill and Other Intangibles

In millions	Goodwill	Customer-Related	Servicing Rights
Balance at December 31, 2006	\$3,402	\$164	\$477
Additions/adjustments:			
Mercantile acquisition	4,326	281	7
Corporate & Institutional	(2)		31
BlackRock	13		
Amortization		(15)	(16)
Balance at March 31, 2007	\$7,739	\$430	\$499

Our investment in BlackRock changes when BlackRock repurchases its shares in the open market or issues shares for an acquisition or pursuant to its employee compensation plans. We record goodwill when BlackRock repurchases its shares at an amount greater than book value per share and this results in an increase in our percentage ownership interest.

Servicing revenue from both commercial and residential mortgage servicing assets and liabilities generated contractually

specified servicing fees, net interest income from servicing portfolio deposit balances and ancillary fees totaling \$43 million for the three months ended March 31, 2007 and \$33 million for the three months ended March 31, 2006. We also generate servicing revenue from fee-based activities provided to others.

Amortization expense on intangible assets for the first three months of 2007 was \$31 million. Amortization expense on existing intangible assets for the remainder of 2007 and for 2008 through 2012 is estimated to be as follows:

Remainder of 2007: \$146 million,
2008: \$147 million,

2009: \$129 million,
 2010: \$109 million,
 2011: \$94 million, and
 2012: \$53 million.

NOTE 6 VARIABLE INTEREST ENTITIES

As discussed in our 2006 Form 10-K, we are involved with various entities in the normal course of business that may be deemed to be VIEs. We consolidated certain VIEs as of March 31, 2007 and December 31, 2006 for which we were determined to be the primary beneficiary. These consolidated VIEs and relationships with PNC are described in our 2006 Form 10-K.

We hold significant variable interests in VIEs that have not been consolidated because we are not considered the primary beneficiary. Information on these VIEs follows:

Non-Consolidated VIEs Significant Variable Interests

In millions	Aggregate Assets	Aggregate Liabilities	PNC Risk of Loss
March 31, 2007			
Market Street	\$3,820	\$3,819	\$6,149(a)
Collateralized debt obligations	540	449	8
Partnership interests in low income housing projects	33	30	8
Total	\$4,393	\$4,298	\$6,165
December 31, 2006			
Market Street	\$4,020	\$4,020	\$6,117(a)
Collateralized debt obligations	815	570	22
Partnership interests in low income housing projects	33	30	8
Total	\$4,868	\$4,620	\$6,147

(a) PNC's risk of loss consists of off-balance sheet liquidity commitments to Market Street of \$5.6 billion and other credit enhancements of \$.5 billion at March 31, 2007. The comparable amounts at December 31, 2006 were \$5.6 billion and \$.6 billion, respectively.

MARKET STREET

Market Street Funding LLC (Market Street) is a multi-seller asset-backed commercial paper conduit that is owned by an independent third party. Market Street's activities are limited to the purchasing of assets or making loans secured by interests primarily in pools of receivables from US corporations that

Table of Contents

desire access to the commercial paper market. Market Street funds the asset purchases or loans by issuing commercial paper which has been rated A1/P1 by Standard & Poor's and Moody's, respectively, and is supported by pool-specific credit enhancement, liquidity facilities and program-level credit enhancement.

PNC Bank, National Association (PNC Bank, N.A.) provides certain administrative services, a portion of the program-level credit enhancement and the majority of liquidity facilities to Market Street in exchange for fees negotiated based on market rates. All of Market Street's assets at March 31, 2007 and December 31, 2006 collateralize the commercial paper obligations. PNC views its credit exposure for the Market Street transactions as limited. Facilities requiring PNC to fund for defaulted assets totaled \$890 million at March 31, 2007. For 84% of the liquidity facilities at March 31, 2007, PNC is not required to fund if the assets are in default. PNC may be liable for funding under liquidity facilities for events such as borrower bankruptcies, collateral deficiencies or covenant violations. Additionally, PNC's obligations under the liquidity facilities are secondary to the risk of first loss provided by the borrower or another third party in the form of deal-specific credit enhancement—for example, by the over collateralization of the assets. Deal-specific credit enhancement that supports the commercial paper issued by Market Street is generally structured to cover a multiple of the expected historical losses for the pool of assets and is sized to generally meet rating agency standards for comparably structured transactions. Credit enhancement is provided in part by PNC Bank, N.A. in the form of a cash collateral account that is funded by a loan facility that expires March 23, 2012. Neither creditors nor equity investors in Market Street have any recourse to our general credit. PNC recognized program administrator fees and commitment fees related to PNC's portion of the liquidity facilities of \$2.9 million and \$1 million, respectively, for the quarter ended March 31, 2007.

As more fully described in our 2006 Form 10-K, Market Street was restructured as a limited liability company in October 2005 and entered into a subordinated Note Purchase Agreement (Note) with an unrelated third party.

The Note provides first loss coverage whereby the investor absorbs losses up to the amount of the Note, which was \$6.0 million as of March 31, 2007. Proceeds from the issuance of the Note are held by Market Street in a first loss reserve account that will be used to reimburse any losses incurred by Market Street, PNC Bank, N.A. or other providers under the liquidity facilities and the credit enhancement arrangements.

As a result of the Note issuance, we reevaluated the design of Market Street, its capital structure and relationships among the variable interest holders under the provisions of FIN 46R. Based on this analysis,

we determined that we were no longer the primary beneficiary as defined by FIN 46R and deconsolidated Market Street from our Consolidated Balance Sheet effective October 17, 2005. There have been no events or changes in the contractual terms of the Note since that date that would change this conclusion.

The aggregate assets and liabilities of VIEs that we have consolidated in our financial statements are as follows:

Consolidated VIEs - PNC Is Primary Beneficiary

In millions	Aggregate	
	Assets	Liabilities
<u>Partnership interests in low income housing projects</u>		
March 31, 2007	\$ 780	\$ 780
December 31, 2006	\$ 834	\$ 834

Investment Company Accounting - Deferred Application

We also have subsidiaries that invest in and act as the investment manager for private equity funds organized as limited partnerships as part of our equity management activities. The funds invest in private equity investments to generate capital appreciation and profits. As permitted by FIN 46R, we have deferred applying the provisions of the interpretation for these entities pending further action by the FASB. These entities are not consolidated into our financial statements as of March 31, 2007 or December 31, 2006. Information on these entities follows:

In millions	Aggregate Assets	Aggregate Equity	PNC Risk
-------------	------------------	------------------	----------

<u>Private Equity Funds</u>	of Loss		
March 31, 2007	\$ 110	\$ 110	\$ 102
December 31, 2006	\$ 102	\$ 102	\$ 104

PNC's risk of loss in the table above includes both the value of our equity investments and any unfunded commitments to the respective entities. The value of our investment in these entities is included in equity investments on our Consolidated Balance Sheet.

PERPETUAL TRUST SECURITIES

We issue certain hybrid capital vehicles that qualify as capital for both regulatory and tangible ratios.

In December 2006, one of our indirect subsidiaries, PNC REIT Corp., sold \$500 million of 6.517% Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities (the Trust Securities) of PNC Preferred Funding Trust I (Trust I), in a private placement. PNC REIT Corp. had previously acquired the Trust Securities from the trust in exchange for an equivalent amount of Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Securities (the LLC Preferred Securities), of PNC Preferred Funding LLC, (the LLC), held by PNC REIT Corp. The LLC's initial material

Table of Contents

assets consist of indirect interests in mortgages and mortgage-related assets previously owned by PNC REIT Corp. Our 2006 Form 10-K includes additional information regarding the Trust Securities, including descriptions of replacement capital and dividend restriction covenants.

In March 2007, PNC Preferred Funding LLC, sold \$500 million of 6.113% Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities of PNC Preferred Funding Trust II (Trust II), in a private placement. In connection with the private placement, Trust II acquired \$500 million of LLC Preferred Securities.

PNC REIT Corp. owns 100% of the LLC's common voting securities. As a result, the LLC is an indirect subsidiary of PNC and is consolidated on our Consolidated Balance Sheet. Trust I and Trust II's investment in the LLC Preferred Securities is characterized as a minority interest on our Consolidated Balance Sheet since we are not the primary beneficiary of Trust I and Trust II. This minority interest totaled approximately \$981 million at March 31, 2007.

NOTE 7 CAPITAL SECURITIES OF SUBSIDIARY TRUSTS

In March 2007, we redeemed all of the underlying Capital Securities relating to UNB Capital Trust I and Riggs Capital Trust II. The total outstanding Capital Securities redeemed were \$216 million.

As part of the Mercantile acquisition, we acquired the James Monroe Statutory Trust II (Monroe Trust II) and the James Monroe Statutory Trust III (Monroe Trust III).

On July 31, 2003, Monroe Trust II was formed and issued \$4 million of capital securities which are due July 31, 2033 and redeemable beginning July 31, 2008 at par. On October 3, 2005, Monroe Trust III was formed and issued \$8 million of capital securities which are due December 15, 2035 and are redeemable beginning December 15, 2010 at par. Aggregate junior subordinated debt of \$12 million owed by PNC to Monroe Trust II and Monroe Trust III is included on our Consolidated Balance Sheet at March 31, 2007, with the related service cost included in interest expense.

At March 31, 2007, our remaining Capital Securities represent non-voting preferred beneficial interests in the assets of PNC Institutional Capital Trust B and PNC Capital Trusts C and D (as further described in Note 14 Capital Securities of Subsidiary Trusts of our 2006 Form 10-K) and Monroe Trusts II and III. All of these trusts are wholly owned finance subsidiaries of PNC. The financial statements of the Trusts are not included in PNC's consolidated financial statements in accordance with GAAP.

We have elected to redeem, effective May 15, 2007, all of the underlying Capital Securities, totaling \$300 million, relating to PNC Institutional Capital Trust B.

The obligations of the respective parent of each Trust, when taken collectively, are the equivalent of a full and unconditional guarantee of the obligations of such Trust under the terms of the Capital Securities. Such guarantee is subordinate in right of payment in the same manner as other junior subordinated debt. There are certain restrictions on PNC's overall ability to obtain funds from its subsidiaries. For additional disclosure on these funding restrictions, including an explanation of dividend and intercompany loan limitations, see Note 4 Regulatory Matters in our 2006 Form 10-K.

NOTE 8 CERTAIN EMPLOYEE BENEFIT AND STOCK-BASED COMPENSATION PLANS

Pension and Post-Retirement Plans

As more fully described in our 2006 Form 10-K, we have a noncontributory, qualified defined benefit pension plan covering eligible employees. Benefits are derived from a cash balance formula based on compensation levels, age and length of service. Pension contributions are based on an actuarially determined amount necessary to fund total benefits payable to plan participants.

We also maintain nonqualified supplemental retirement plans for certain employees. We also provide certain health care and life insurance benefits for qualifying retired employees (post-retirement benefits) through various plans. The nonqualified pension and postretirement benefit plans are unfunded.

The components of our net periodic pension and post-retirement benefit cost for the first quarter of 2007 and 2006 were as follows:

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Three months ended March 31	Qualified		Nonqualified		Post-retirement	
	Pension Plan		Pension Plan		Benefits	
In millions	2007	2006	2007	2006	2007	2006
Service cost	\$9	\$9	\$1		\$1	
Interest cost	19	17	\$1	\$1	3	\$4
Expected return on plan assets	(36)	(32)				
Amortization of prior service cost					(2)	(2)
Recognized net actuarial loss		6	1	1		1
Net periodic cost (benefit)	\$(8)	\$	\$2	\$2	\$2	\$3

During the first quarter of 2007, we added another defined benefit pension plan as a result of the Mercantile acquisition. Plan assets and benefit obligations of the Mercantile plan were approximately \$242 million and \$246 million, respectively, at acquisition date. The \$4 million funding deficit was recognized as part of the Mercantile acquisition purchase price allocation. We plan to integrate the Mercantile plan into the PNC plan as of December 31, 2007.

Table of Contents**Stock-Based Compensation Plans**

We have long-term incentive award plans (Incentive Plans) that provide for the granting of incentive stock options, nonqualified stock options, stock appreciation rights, incentive shares/performance units, restricted stock, other share-based awards and dollar-denominated awards to executives and, other than incentive stock options, to non-employee directors. We grant a substantial portion of our stock-based compensation awards during the first quarter of the year. As of March 31, 2007, no incentive stock options or stock appreciation rights were outstanding. The Incentive Plans are more fully described in Note 18 Stock-Based Compensation Plans of our 2006 Form 10-K.

Nonqualified Stock Options

Options are granted at exercise prices not less than the market value of common stock on the grant date. Generally, options granted since 1999 become exercisable in installments after the grant date. Options granted prior to 1999 are mainly exercisable 12 months after grant date. No option may be exercisable after 10 years from its grant date. Payment of the option exercise price may be in cash or previously owned shares of common stock at market value on the exercise date.

Generally, options granted under the Incentive Plans vest ratably over a three-year period as long as the grantee remains an employee or, in certain cases, retires from PNC. For all options granted prior to the adoption of SFAS 123R Share-Based Payment (SFAS 123R), we recognized compensation expense over the three-year vesting period. If an employee retired prior to the end of the three-year vesting period, we accelerated the expensing of all unrecognized compensation costs at the retirement date. As required under SFAS 123R, we recognize compensation expense for options granted to retirement-eligible employees after January 1, 2006 in the period granted, in accordance with the service period provisions of the options. Total compensation expense recognized related to PNC stock options during the first quarter of 2007 and 2006 was approximately \$6 million in each quarter.

For purposes of computing stock option expense, we estimated the fair value of stock options using the Black-Scholes option-pricing model. The model requires the use of numerous assumptions, many of which are very subjective.

We used the following assumptions in the option-pricing model to determine first quarter 2007 and 2006 stock option expense:

- The risk-free interest rate is based on the US Treasury yield curve,
- The dividend yield represents average yields over the previous three-year period,
- Volatility is measured using the fluctuation in month-end closing stock prices over a period which corresponds with the average expected option life, but in no case less than a five-year period, and
- The expected life assumption represents the period of time that options granted are expected to be outstanding and is based on a weighted average of historical option activity.

Option Pricing Assumptions

Weighted average for the three months ended

March 31	2007	2006
Risk-free interest rate	4.9%	4.4%
Dividend yield	3.4%	3.7%
Volatility	19.4%	20.6%
Expected life	4.6 yrs.	5.5 yrs.

The following table summarizes PNC stock option information as of and for the three month period ending March 31, 2007:

	Shares (thousands)	Weighted-Average Exercise Price
Outstanding at December 31, 2006	14,950	\$59.29
Granted	1,604	72.74
Exercised	(1,155)	54.85

Forfeited	(25)	70.84
Outstanding at March 31, 2007	15,374	\$61.00
Exercisable at March 31, 2007	11,527	\$58.91

The weighted-average grant-date fair value of options granted during the first quarter of 2007 was \$10.76 per option, compared with \$10.00 per option for options granted during the first quarter of 2006. During the first quarter of 2007 we issued approximately 1.1 million shares from treasury stock in connection with stock option exercise activity. As with past exercise activity, we intend to utilize treasury stock for future stock option exercises.

Incentive/Performance Unit Share and Restricted Stock/Unit Awards

The fair value of nonvested incentive/performance unit shares and restricted stock/unit awards is initially determined based on prices not less than the market value of our common stock price on the date of grant. Incentive/performance unit shares are subsequently valued subject to the achievement of one or more financial and other performance goals over a three-year period. The Personnel and Compensation Committee of the Board of Directors approves the final award payout with respect to incentive/performance unit shares. Restricted stock/unit awards have various vesting periods ranging from 24 months to 60 months. There are no financial or performance goals associated with any of our restricted stock/unit awards.

We recognize compensation expense for incentive/performance unit shares and restricted stock/unit awards ratably over the corresponding vesting and/or performance periods for each type of program. Total compensation expense recognized related to PNC incentive/performance unit share and restricted stock/unit awards during the first quarter of 2007 was approximately \$10 million, compared with \$12 million during the first quarter of 2006.

Table of Contents

The following table summarizes PNC nonvested incentive/performance unit shares and restricted stock/unit awards as of and for the three month period ending March 31, 2007:

	Nonvested Incentive/ Performance Unit Shares	Weighted- Average Grant Date Fair Value	Nonvested Restricted Stock/ Units	Weighted- Average Grant Date Fair Value
Shares in thousands				
Dec. 31, 2006	186	\$64.15	2,425	\$57.45
Granted	130	68.91	512	69.86
Vested			(761)	59.94
Forfeited			(12)	55.46
March 31, 2007	316	\$66.11	2,164	\$59.52

The weighted-average grant-date fair value of incentive/performance unit shares and restricted stock/unit awards is measured by reducing the grant date price by the present value of dividends expected to be paid on the underlying shares and for estimated forfeitures on restricted stock/unit awards.

At March 31, 2007, there was \$64 million of unrecognized deferred compensation expense related to nonvested share-based compensation arrangements granted under the Incentive Plans. This cost is expected to be recognized as expense over a period of no longer than 5 years.

NOTE 9 FINANCIAL DERIVATIVES

We use a variety of derivative financial instruments to help manage interest rate, market and credit risk and reduce the effects that changes in interest rates may have on net income, fair value of assets and liabilities, and cash flows. These instruments include interest rate swaps, interest rate caps and floors, futures contracts, and total return swaps.

Fair Value Hedging Strategies

We enter into interest rate and total return swaps, interest rate caps, floors and futures derivative contracts to hedge designated commercial mortgage loans held for sale, commercial loans, bank notes, senior debt and subordinated debt for changes in fair value primarily due to changes in interest rates. Adjustments related to the ineffective portion of fair value hedging instruments are recorded in interest income, interest expense or noninterest income depending on the hedged item.

Cash Flow Hedging Strategy

We enter into interest rate swap contracts to modify the interest rate characteristics of designated commercial loans from variable to fixed in order to reduce the impact of interest rate changes on future interest income. We are hedging our exposure to the variability of future cash flows for all forecasted transactions for a maximum of 10 years for hedges converting floating-rate commercial loans to fixed. The fair value of these derivatives is reported in other assets or other liabilities and offset in accumulated other comprehensive income (loss) for the effective portion of the derivatives. When the hedged transaction culminates, any unrealized gains

or losses related to these swap contracts are reclassified from accumulated other comprehensive loss into earnings in the same period or periods during which the hedged forecasted transaction affects earnings and are included in interest income. Ineffectiveness of the strategy, if any, is reported in interest income.

During the next twelve months, we expect to reclassify to earnings \$20 million of pretax net losses, or \$13 million after-tax, on cash flow hedge derivatives currently reported in accumulated other comprehensive loss. This amount could differ from amounts actually recognized due to changes in interest rates and the addition of other hedges subsequent to March 31, 2007. These net losses are anticipated to result from net cash flows on receive fixed interest rate swaps that would impact interest income recognized on the related floating rate commercial loans.

As of March 31, 2007 we have determined that there were no hedging positions where it was probable that certain forecasted transactions may not occur within the originally designated time period.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

For those hedge relationships that require testing for ineffectiveness, any ineffectiveness present in the hedge relationship is recognized in current earnings. The ineffective portion of the change in value of these derivatives resulted in a minimal net loss for the three months ended March 31, 2007 and a \$1 million net loss for the three months ended March 31, 2006.

Free-Standing Derivatives

To accommodate customer needs, we also enter into financial derivative transactions primarily consisting of interest rate swaps, interest rate caps and floors, futures, swaptions, and foreign exchange and equity contracts. We primarily manage our market risk exposure from customer positions through transactions with third-party dealers. The credit risk associated with derivatives executed with customers is essentially the same as that involved in extending loans and is subject to normal credit policies. We may obtain collateral based on our assessment of the customer. For derivatives not designated as an accounting hedge, the gain or loss is recognized in trading noninterest income.

Also included in free-standing derivatives are transactions that we enter into for risk management and proprietary purposes that are not designated as accounting hedges, primarily interest rate and basis swaps, interest rate caps and floors, futures, credit default swaps, option and foreign exchange contracts and certain interest rate-locked loan origination commitments as well as commitments to buy or sell mortgage loans.

Basis swaps are agreements involving the exchange of payments, based on notional amounts, of two floating rate financial instruments denominated in the same currency, one

Table of Contents

pegged to one reference rate and the other tied to a second reference rate (e.g., swapping payments tied to one-month LIBOR for payments tied to three-month LIBOR). We use these contracts to mitigate the impact on earnings of exposure to a certain referenced interest rate.

We purchase and sell credit default swaps to mitigate the economic impact of credit losses on specifically identified existing lending relationships or to generate revenue from proprietary trading activities. The fair value of these derivatives typically are based on the change in value, due to changing credit spreads.

Interest rate lock commitments for, as well as commitments to buy or sell, mortgage loans that we intend to sell are considered free-standing derivatives. Our interest rate exposure on certain commercial mortgage interest rate lock commitments is economically hedged with pay-fixed interest rate swaps and forward sales agreements. These contracts mitigate the impact on earnings of exposure to a certain referenced rate.

Free-standing derivatives also include positions we take based on market expectations or to benefit from price differentials between financial instruments and the market based on stated risk management objectives.

Derivative Counterparty Credit Risk

By purchasing and writing derivative contracts we are exposed to credit risk if the counterparties fail to perform. Our credit

risk is equal to the fair value gain in the derivative contract. We minimize credit risk through credit approvals, limits, monitoring procedures and collateral requirements. We generally enter into transactions with counterparties that carry high quality credit ratings.

We enter into risk participation agreements to share some of the credit exposure with other counterparties related to interest rate derivative contracts or to take on credit exposure to generate revenue. We will make/receive payments under these guarantees if a customer defaults on its obligation to perform under certain credit agreements. Risk participation agreements entered into prior to July 1, 2003 were considered financial guarantees and therefore are not included in derivatives. Agreements entered into subsequent to June 30, 2003 are included in the derivatives table that follows. We determine that we meet our objective of reducing credit risk associated with certain counterparties to derivative contracts when the participation agreements share in their proportional credit losses of those counterparties.

We generally have established agreements with our major derivative dealer counterparties that provide for exchanges of marketable securities or cash to collateralize either party's positions. At March 31, 2007 we held cash and US government and mortgage-backed securities with a fair value of \$101 million and pledged cash with a fair value of \$176 million under these agreements.

The total notional or contractual amounts, estimated net fair value and credit risk for derivatives at March 31, 2007 and December 31, 2006 were as follows:

In millions	March 31, 2007			December 31, 2006		
	Notional/ Contract amount	Estimated net fair value	Credit risk	Notional/ Contract amount	Estimated net fair value	Credit risk
ACCOUNTING HEDGES

(c) Excludes exchangeable senior notes considered to be anti-dilutive (in thousands)		

NOTE 11 INCOME TAXES

As described in Note 1, we adopted FIN 48 effective January 1, 2007. Our adoption of FIN 48 did not result in a cumulative adjustment to equity.

Upon adoption at January 1, 2007, we had \$49 million of unrecognized tax benefits. The unrecognized benefits were composed of the following three broad categories.

In millions	
Unrecognized tax benefits related to acquired companies tax positions	\$ 10
Unrecognized tax benefits related to temporary differences	20
Unrecognized tax benefits related to permanent differences	19
Total	\$ 49

Under existing accounting rules, any changes in the amounts of unrecognized tax benefits related to acquired companies tax positions would result in an adjustment to the goodwill associated with the particular acquisition; any changes in the amounts of unrecognized tax benefits related to temporary differences would result in a reclassification to deferred tax liability; and any changes in the amounts of unrecognized tax benefits related to permanent differences would result in an adjustment to income tax expense and therefore our effective tax rate. The unrecognized tax benefits included above that, if recognized, would affect the effective tax rate total \$13 million. This is less than the total amount of unrecognized tax benefit related to permanent differences because a portion of those unrecognized benefits relate to state tax matters.

During the first quarter of 2007, unrecognized tax benefits increased by \$39 million primarily due to our acquisition of Mercantile.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Our consolidated federal income tax returns through 2003 have been audited by the Internal Revenue Service. Tax years 1998-2003 are currently before the IRS Appeals Division with the only issue to be resolved being the tax treatment of our cross-border leases. The Internal Revenue Service is in the preliminary stages of examining our 2004 and 2005 consolidated federal income tax returns.

The states of New York, New Jersey and Maryland (following our acquisition of Mercantile) and New York City are principally where we are subject to state and local income tax. The State of New York is currently auditing our 2002 to 2004 filings. Subsequent years remain subject to examination in that jurisdiction. Through 2006, BlackRock was included in our New York combined tax filings and constituted most of the tax liability. Years subsequent to 2002 remain subject to examination by New Jersey and New York City and years subsequent to 2003 remain subject to examination by Maryland.

Our policy is to classify interest and penalties associated with income taxes as income taxes. Upon adoption of FIN 48 at January 1, 2007, we had accrued \$72 million of interest related to tax positions, most of which related to our cross-border leasing transactions. The total accrued interest during the first quarter of 2007 increased to \$85 million primarily due to our acquisition of Mercantile.

Table of Contents
NOTE 12 SHAREHOLDERS EQUITY AND OTHER COMPREHENSIVE INCOME

Activity in shareholders equity for the first three months of 2007 follows. Our preferred stock outstanding as of March 31, 2007 and December 31, 2006 totaled less than \$.5 million at each date and, therefore, is excluded from the table.

In millions, except per share data	Shares Outstanding		Capital Surplus	Retained Earnings	Accumulated Other Comprehensive Income (Loss)	Treasury Stock	Total
	Common Stock	Common Stock					
Balance at December 31, 2006	293	\$ 1,764	\$ 1,651	\$ 10,985	\$ (235)	\$ (3,377)	\$ 10,788
Net income				459			459
Other comprehensive income (loss), net of tax							
Net unrealized securities gains					53		53
Net unrealized gains on cash flow hedge derivatives					17		17
Pension, other postretirement and postemployment benefit plan adjustments					6		6
Other (a)					(3)		(3)
Comprehensive income							532
Cash dividends declared							
Common (\$.55 per share)				(161)			(161)
Net effect of adopting FSP FAS 13-2				(149)			(149)
Treasury stock activity	53		891			2,860	3,751
Tax benefit of stock option plans			7				7
Stock options granted			6				6
Effect of BlackRock equity transactions			(26)				(26)
Restricted stock/unit and incentive/performance unit share transactions			(9)				(9)
Balance at March 31, 2007	346	\$ 1,764	\$ 2,520	\$ 11,134	\$ (162)	\$ (517)	\$ 14,739

Comprehensive income for the three months ended March 31, 2006 totaled \$227 million.

A summary of the components of the change in accumulated other comprehensive income (loss) follows:

Three months ended March 31, 2007

In millions	Pretax	Tax (Expense) Benefit	After-tax
Change in net unrealized securities losses			
Increase in net unrealized gains on securities held at period end	\$ 72	\$ (26)	\$ 46
Less: Net losses realized in net income (b)	(11)	4	(7)
Change in net unrealized securities losses	83	(30)	53
Change in net unrealized losses on cash flow hedge derivatives			
Increase in net unrealized gains on cash flow hedge derivatives	24	(9)	15
Less: Net losses realized in net income	(3)	1	(2)
Change in net unrealized losses on cash flow hedge derivatives	27	(10)	17
Change in pension, other postretirement and postemployment benefit plan adjustments		6	6
Change in other (a)	1	(4)	(3)
Change in other comprehensive income (loss)	\$ 111	\$ (38)	\$ 73

The accumulated balances related to each component of other comprehensive income (loss) are as follows:

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

In millions	March 31, 2007		December 31, 2006	
	Pretax	After-tax	Pretax	After-tax
Net unrealized securities gains (losses)	\$ (57)	\$ (38)	\$ (140)	\$ (91)
Net unrealized gains (losses) on cash flow hedge derivatives	7	4	(20)	(13)
Pension, other postretirement and postemployment benefit plan adjustments	(228)	(142)	(228)	(148)
Other, net (a)	28	14	27	17
Accumulated other comprehensive loss	\$ (250)	\$ (162)	\$ (361)	\$ (235)

- (a) Consists of interest-only strip valuation adjustments, foreign currency translation adjustments and deferred tax adjustments on BlackRock's other comprehensive income.
- (b) The pretax amount represents net unrealized losses at December 31, 2006 that were realized in 2007 when the related securities were sold. This amount differs from net securities losses included in the Consolidated Income Statement primarily because it does not include gains or losses realized on securities that were purchased and then sold during 2007.

Table of Contents**NOTE 13 LEGAL PROCEEDINGS**

Some of our subsidiaries are defendants (or have potential contractual contribution obligations to other defendants) in several pending lawsuits brought during late 2002 and 2003 arising out of the bankruptcy of Adelphia Communications Corporation and its subsidiaries. There also are threatened additional proceedings arising out of the same matters. One of the lawsuits was brought on Adelphia's behalf by the unsecured creditors' committee and equity committee in Adelphia's consolidated bankruptcy proceeding and was removed to the United States District Court for the Southern District of New York by order dated February 9, 2006. Pursuant to Adelphia's plan of reorganization, this lawsuit will be prosecuted by a contingent value vehicle, known as the Adelphia Recovery Trust. The other lawsuits, one of which is a putative consolidated class action, were brought by holders of debt and equity securities of Adelphia and have been consolidated for pretrial purposes in that district court. These lawsuits arise out of lending and securities underwriting activities engaged in by these PNC subsidiaries together with other financial services companies. In the aggregate, more than 400 other financial services companies and numerous other companies and individuals have been named as defendants in one or more of the lawsuits. Collectively, with respect to some or all of the defendants, the lawsuits allege federal law claims, including violations of federal securities and other federal laws, violations of common law duties, aiding and abetting such violations, voidable preference payments, and fraudulent transfers, among other matters. The lawsuits seek unquantified monetary damages, interest, attorneys' fees and other expenses, and a return of the alleged voidable preference and fraudulent transfer payments, among other remedies. The bank defendants, including the PNC defendants, have entered into a settlement of the consolidated class action referred to above. This settlement was approved by the district court in November 2006. In December 2006, a group of class members appealed the order approving the settlement agreement to the United States Court of Appeals for the Second Circuit. The amount for which we would be responsible under this settlement is insignificant. We believe that we have defenses to the claims against us in these lawsuits, as well as potential claims against third parties, and intend to defend the remaining lawsuits vigorously. These lawsuits involve complex issues of law and fact, presenting complicated relationships among the many financial and other participants in the events giving rise to these lawsuits, and have not progressed to the point where we can predict the outcome of the remaining lawsuits other than the one for which a settlement is pending. It is not possible to determine what the likely aggregate recoveries on the part of the plaintiffs in these remaining matters might be or the portion of any such recoveries for which we would ultimately be responsible, but the final consequences to PNC could be material.

In April 2005, an amended complaint was filed in the putative class action against PNC, PNC Bank, N.A., our Pension Plan and its Pension Committee in the United States District Court

for the Eastern District of Pennsylvania (originally filed in December 2004). The complaint claims violations of the Employee Retirement Income Security Act of 1974, as amended (ERISA), arising out of the January 1, 1999 conversion of our Pension Plan from a traditional defined benefit formula into a cash balance formula, the design and continued operation of the Plan, and other related matters. Plaintiffs seek to represent a class of all current and former employee-participants in and beneficiaries of the Plan as of December 31, 1998 and thereafter. Plaintiffs also seek to represent a subclass of all current and former employee participants in and beneficiaries of the Plan as of December 31, 1998 and thereafter who were or would have become eligible for an early retirement subsidy under the former Plan at some time prior to the date of the amended complaint. The plaintiffs are seeking unquantified damages and equitable relief available under ERISA, including interest, costs, and attorneys' fees. In November 2005, the district court granted our motion to dismiss the amended complaint. Plaintiffs appealed this ruling to the United States Court of Appeals for the Third Circuit, which affirmed the district court's ruling in an opinion dated January 30, 2007. In February 2007, the court of appeals denied plaintiffs' petition for rehearing. Plaintiffs may seek further judicial review of the dismissal of the complaint.

In March 2006, a first amended complaint was filed in the United States District Court for the Eastern District of Texas by Data Treasury Corporation against PNC and PNC Bank, N.A., as well as more than 50 other financial institutions, vendors, and other companies, claiming that the defendants are infringing, and inducing or contributing to the infringement of, the plaintiff's patents, which allegedly involve check imaging, storage and transfer. The plaintiff seeks unspecified damages and interest and trebling of both, attorneys' fees and other expenses, and injunctive relief against the alleged infringement. We are not in a position to assess the likely outcome of this matter, including our exposure, if any. We believe that we have defenses to the claims against us in this lawsuit and intend to defend it vigorously. In January 2007, the district court entered an order staying the claims asserted against PNC under two of the four patents allegedly infringed by PNC, pending reexamination of these patents by the United States Patent and Trademark Office. The lawsuit will proceed with respect to the other two patents. Further, the stay may be lifted once the Patent and Trademark Office completes its reexamination.

As a result of the acquisition of Riggs, PNC is now responsible for Riggs' obligations to provide indemnification to its directors, officers, and, in some cases, employees and agents against certain liabilities incurred as a result of their service on behalf of or at the request of Riggs. PNC is also now responsible for Riggs' obligations to advance on behalf of covered individuals costs incurred in connection with certain claims or proceedings, subject to written undertakings to repay all amounts so advanced if it is ultimately determined that the individual is not entitled to

Table of Contents

indemnification. Since the acquisition, we have advanced such costs on behalf of covered individuals from Riggs and expect to continue to do so in the future.

Between 2001 and 2003, on behalf of either individual plaintiffs or a putative class of plaintiffs, several separate actions were filed in state and federal court against Community Bank of Northern Virginia (CBNV) and other defendants challenging the validity of second mortgage loans the defendants made to the plaintiffs. CBNV became a subsidiary of PNC when we acquired Mercantile. All of the cases were either filed in, or removed to, the United States District Court for the Western District of Pennsylvania. In June 2003, the parties to the various actions informed the court that they had reached an agreement in principle to settle the various actions. In July 2003, the court conditionally certified a class for settlement purposes, preliminarily approved the class settlement, and directed the issuance of notice to the class. Thereafter, certain plaintiffs who had initially opted out of the proposed settlement and other objectors challenged the validity of the settlement in the district court. The district court denied their arguments and approved the settlement. These opt out plaintiffs and other objectors appealed the district court's approval of the settlement to the United States Court of Appeals for the Third Circuit. In August 2005, the court of appeals reversed the district court's approval of the settlement and remanded the case to the district court with instructions to consider and address certain specific issues when re-evaluating the settlement. In August 2006, the settling parties submitted a modified settlement agreement to the district court for its approval. In addition, several individuals have filed actions on behalf of themselves or a putative class of plaintiffs alleging claims involving CBNV's second mortgage loans. These actions also were filed in, or transferred for coordinated or consolidated pre-trial proceedings, to the United States District Court for the Western District of Pennsylvania. The plaintiffs in these lawsuits seek unquantified monetary damages, interest, attorneys' fees and other expenses, and a refund of all origination fees and fees paid for title services.

There are several pending proceedings or other matters arising out of the three 2001 PAGIC transactions. These proceedings and other matters, including pending settlements relating to certain of the lawsuits and other claims arising out of the PAGIC transactions, are described in our 2006 Annual Report on Form 10-K for the year ended December 31, 2006. In April 2007, the United States District Court for the Western District of Pennsylvania approved the settlement by our former independent auditors for the years ended 2001 of the consolidated class action arising out of the PAGIC transactions. This defendant's settlement will become effective on May 18, 2007 unless there is an appeal from the court's approval. Upon effectiveness of this settlement, this defendant will dismiss its appeal of the court's approval of our

settlement of the same class action. At that point, our settlement would become final.

In connection with industry-wide investigations of practices in the mutual fund industry including market timing, late day trading, employee trading in mutual funds and other matters, several of our subsidiaries have received requests for information and other inquiries from state and federal governmental and regulatory authorities. These subsidiaries are fully cooperating in all of these matters. In addition, as a result of the regulated nature of our business and that of a number of our subsidiaries, particularly in the banking and securities areas, we and our subsidiaries are the subject from time to time of investigations and other forms of regulatory inquiry, often as part of industry-wide regulatory reviews of specified activities. Our practice is to cooperate fully with these investigations and inquiries.

In addition to the proceedings or other matters described above, PNC and persons to whom we may have indemnification obligations, in the normal course of business, are subject to various other pending and threatened legal proceedings in which claims for monetary damages and other relief are asserted. We do not anticipate, at the present time, that the ultimate aggregate liability, if any, arising out of such other legal proceedings will have a material adverse effect on our financial position. However, we cannot now determine whether or not any claims asserted against us or others to whom we may have indemnification obligations, whether in the proceedings or other matters specifically described above or otherwise, will have a material adverse effect on our results of operations in any future reporting period.

NOTE 14 SEGMENT REPORTING

We have four major businesses engaged in providing banking, asset management and global fund processing products and services:

- Retail Banking,
- Corporate & Institutional Banking,
- BlackRock, and
- PFPC.

Results of individual businesses are presented based on our management accounting practices and our management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to GAAP; therefore, the financial results of individual businesses are not necessarily comparable with similar information for any other company. We refine our methodologies from time to time as our management accounting practices are enhanced and our businesses and management structure change. Financial results are presented, to the extent practicable, as if each business, with the exception of our BlackRock segment, operated on a stand-alone basis. As permitted under GAAP, we have aggregated the business results for certain operating segments for financial reporting purposes.

Table of Contents

Assets receive a funding charge and liabilities and capital receive a funding credit based on a transfer pricing methodology that incorporates product maturities, duration and other factors. Capital is intended to cover unexpected losses and is assigned to the banking and processing businesses using our risk-based economic capital model. We have assigned to Retail Banking capital equal to 6% of funds to reflect the capital required for well-capitalized banks and to approximate market comparables for this business. The assigned capital for PFPC reflects its legal entity shareholders' equity.

BlackRock business segment results for the three months ended March 31, 2006 reflected our majority ownership in BlackRock during that period. Subsequent to the September 29, 2006 BlackRock/MLIM transaction closing, which had the effect of reducing our ownership interest to approximately 34%, our investment in BlackRock has been accounted for under the equity method but continues to be a separate reportable business segment of PNC. The fair value of our investment in BlackRock at March 31, 2007 was approximately \$6.7 billion. Our first quarter 2006 business segment information included in this Note 14 for BlackRock was not restated.

We have allocated the allowances for loan and lease losses and unfunded loan commitments and letters of credit based on our assessment of risk inherent in the loan portfolios. Our allocation of the costs incurred by operations and other support areas not directly aligned with the businesses is primarily based on the use of services.

Total business segment financial results differ from total consolidated results. The impact of these differences is reflected in the Intercompany Eliminations and Other categories. Intercompany Eliminations reflects activities conducted among our businesses that are eliminated in the consolidated results. Other includes residual activities that do not meet the criteria for disclosure as a separate reportable business, such as gains or losses related to BlackRock transactions including LTIP distributions and obligations, Mercantile and BlackRock/MLIM acquisition integration costs, asset and liability management activities, related net securities gains or losses, certain trading activities, equity management activities and minority interest in income of BlackRock for the first quarter of 2006, differences between business segment performance reporting and financial statement reporting (GAAP), and most corporate overhead.

Assets, revenue and earnings attributable to foreign activities were not material in the periods presented.

BUSINESS SEGMENT PRODUCTS AND SERVICES

Retail Banking provides deposit, lending, brokerage, trust, investment management, and cash management services to approximately 2.9 million consumer and small business customers within our primary geographic area. Our customers

are serviced through 1,077 offices in our branch network, the call center located in Pittsburgh and the Internet www.pncbank.com. The branch network is located primarily in Pennsylvania; New Jersey; Washington, DC; Maryland; Virginia; Ohio; Kentucky and Delaware. Brokerage services are provided through PNC Investments, LLC, and J.J.B. Hilliard, W.L. Lyons, Inc. Retail Banking also serves as investment manager and trustee for employee benefit plans and charitable and endowment assets and provides nondiscretionary defined contribution plan services and investment options through its *Vested Interest*[®] product. These services are provided to individuals and corporations primarily within our primary geographic markets.

Corporate & Institutional Banking provides lending, treasury management, and capital markets-related products and services to mid-sized corporations, government entities, and selectively to large corporations. Lending products include secured and unsecured loans, letters of credit and equipment leases. Treasury management services include cash and investment management, receivables management, disbursement services, funds transfer services, information reporting, and global trade services. Capital markets-related products and services include foreign exchange, derivatives, loan syndications, mergers and acquisitions advisory and related services to middle-market companies, securities underwriting, and securities sales and trading. Corporate & Institutional Banking also provides commercial loan servicing, real estate advisory and technology solutions for the commercial real estate finance industry. Corporate & Institutional Banking provides products and services generally within our primary geographic markets, with certain products and services provided nationally.

BlackRock is one of the world's largest publicly traded investment management firms. As of March 31, 2007, BlackRock's assets under management were approximately \$1.15 trillion. The firm manages assets on behalf of institutions and individuals worldwide through a variety of equity, fixed income, cash management and alternative investment products. In addition, BlackRock provides BlackRock Solutions[®] investment system, risk management, and financial advisory services to a growing number of institutional investors. The firm has a major presence in key global markets, including the United States, Europe, Asia, Australia and the Middle East.

PFPC is a leading full service provider of processing, technology and business solutions for the global investment industry. Securities services include custody, securities lending, and accounting and administration for funds registered under the 1940 Act and alternative investments. Investor services include transfer agency, managed accounts, subaccounting, and distribution. PFPC serviced \$2.2 trillion in total assets and

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

68 million shareholder accounts as of March 31, 2007 both domestically and internationally through its Ireland and Luxembourg operations.

(a) Period-end balances for BlackRock and PFPC.

Certain revenue and expense amounts shown in the preceding table differ from amounts included in the Business Segments Review section of Part I, Item 2 of this Form 10-Q due to the presentation in Item 2 of business revenues on a taxable-equivalent basis, the inclusion of BlackRock/MLIM acquisition integration costs in Other in the Item 2 presentation, and classification differences related to PFPC. PFPC income classified as net interest income (expense) in the preceding table represents the interest components of other nonoperating income (net of nonoperating expense) and debt financing as disclosed in the Business Segments Review section.

NOTE 15 COMMITMENTS AND GUARANTEES**EQUITY FUNDING AND OTHER COMMITMENTS**

Our unfunded commitments related to private equity investments, affordable housing limited partnerships and other investments were \$291 million, \$56 million and \$60 million, respectively, at March 31, 2007. The amount of other

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

investments at March 31, 2007 included those related to Steel City Capital Funding LLC (Steel City) as further discussed below.

On March 1, 2007, we entered into a joint venture with a third party to form Steel City for purposes of purchasing and originating second lien loans and turnaround loans. Our primary reason for pursuing this venture was to leverage our strengths of origination and servicing, provide an additional product to our customers, and allow for us to moderate the risks associated with this asset class. Additionally, we will earn fees for portfolio management services. Steel City is a limited liability company in which various PNC subsidiaries will initially hold an approximate 31% equity ownership. Our initial capital contribution to Steel City was approximately \$33 million with a commitment to fund an additional \$45 million. The third party investor contributed initial capital of \$74 million with a commitment to fund an additional \$101 million. We evaluated the accounting for this transaction under FIN 46R and other appropriate generally accepted accounting principles and determined that our aggregate

Table of Contents

investment will be accounted for under the equity method. This transaction did not have a material impact on our consolidated results of operations.

STANDBY LETTERS OF CREDIT

We issue standby letters of credit and have risk participations in standby letters of credit and bankers' acceptances issued by other financial institutions, in each case to support obligations of our customers to third parties. If the customer fails to meet its financial or performance obligation to the third party under the terms of the contract, then upon the request of the guaranteed party, we would be obligated to make payment to them. The standby letters of credit and risk participations in standby letters of credit and bankers' acceptances outstanding on March 31, 2007 had terms ranging from less than one year to 10 years. The aggregate maximum amount of future payments we could be required to make under outstanding standby letters of credit and risk participations in standby letters of credit and bankers' acceptances was \$6.9 billion at March 31, 2007.

Assets valued as of March 31, 2007 of approximately \$.8 billion secured certain specifically identified standby letters of credit. Approximately \$2.1 billion in recourse provisions from third parties was also available for this purpose as of March 31, 2007. In addition, a portion of the remaining standby letters of credit and letter of credit risk participations issued on behalf of specific customers is also secured by collateral or guarantees that secure the customers' other obligations to us. The carrying amount of the liability for our obligations related to standby letters of credit and risk participations in standby letters of credit and bankers' acceptances was \$54 million at March 31, 2007.

STANDBY BOND PURCHASE AGREEMENTS AND OTHER LIQUIDITY FACILITIES

We enter into standby bond purchase agreements to support municipal bond obligations. At March 31, 2007, the aggregate of PNC's commitments under these facilities was \$240 million. PNC also enters into certain other liquidity facilities to support individual pools of receivables acquired by commercial paper conduits including Market Street. At March 31, 2007, our total commitments under these facilities were \$5.8 billion, of which \$5.6 billion was related to Market Street.

INDEMNIFICATIONS

We are a party to numerous acquisition or divestiture agreements under which we have purchased or sold, or agreed to purchase or sell, various types of assets. These agreements can cover the purchase or sale of:

- Entire businesses,
- Loan portfolios,
- Branch banks,
- Partial interests in companies, or
- Other types of assets.

These agreements generally include indemnification provisions under which we indemnify the third parties to these agreements against a variety of risks to the indemnified parties as a result of the transaction in question. When PNC is the seller, the indemnification provisions will generally also provide the buyer with protection relating to the quality of the assets we are selling and the extent of any liabilities being assumed by the buyer. Due to the nature of these indemnification provisions, we cannot quantify the total potential exposure to us resulting from them.

We provide indemnification in connection with securities offering transactions in which we are involved. When we are the issuer of the securities, we provide indemnification to the underwriters or placement agents analogous to the indemnification provided to the purchasers of businesses from us, as described above. When we are an underwriter or placement agent, we provide a limited indemnification to the issuer related to our actions in connection with the offering and, if there are other underwriters, indemnification to the other underwriters intended to result in an appropriate sharing of the risk of participating in the offering. Due to the nature of these indemnification provisions, we cannot quantify the total potential exposure to us resulting from them.

We enter into certain types of agreements that include provisions for indemnifying third parties, such as:

- Agreements relating to providing various servicing and processing functions to third parties,
- Agreements relating to the creation of trusts or other legal entities to facilitate leasing transactions, commercial mortgage-backed securities transactions (loan securitizations) and certain other off-balance sheet transactions,
- Confidentiality agreements,

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Syndicated credit agreements, as a syndicate member,
Sales of individual loans and equipment leases,
Arrangements with brokers to facilitate the hedging of derivative and convertible arbitrage activities, and
Litigation settlement agreements.

Due to the nature of these indemnification provisions, we cannot calculate our aggregate potential exposure under them.

We enter into certain types of agreements, including leases, assignments of leases, and subleases, in which we agree to indemnify third parties for acts by our agents, assignees and/or sublessees, and employees. While we do not believe these indemnification liabilities are material, either individually or in total, we cannot calculate our potential exposure.

We enter into contracts for the delivery of technology service in which we indemnify the other party against claims of patent and copyright infringement by third parties. Due to the nature of these indemnification provisions, we cannot calculate our aggregate potential exposure under this type of indemnification.

Table of Contents

We engage in certain insurance activities which require our employees to be bonded. We satisfy this bonding requirement by issuing letters of credit in a total amount of approximately \$4 million.

In the ordinary course of business, we enter into contracts with third parties under which the third parties provide services on behalf of PNC. In many of these contracts, we agree to indemnify the third party service provider under certain circumstances. The terms of the indemnity vary from contract to contract and the amount of the indemnification liability, if any, cannot be determined.

We are a general or limited partner in certain asset management and investment limited partnerships, many of which contain indemnification provisions that would require us to make payments in excess of our remaining funding commitments. While in certain of these partnerships the maximum liability to us is limited to the sum of our unfunded commitments and partnership distributions received by us, in the others the indemnification liability is unlimited. As a result, we cannot determine our aggregate potential exposure for these indemnifications.

Pursuant to their bylaws, PNC and its subsidiaries provide indemnification to directors, officers and, in some cases, employees and agents against certain liabilities incurred as a result of their service on behalf of or at the request of PNC and its subsidiaries. PNC and its subsidiaries also advance on behalf of covered individuals costs incurred in connection with certain claims or proceedings, subject to written undertakings by each such individual to repay all amounts so advanced if it is ultimately determined that the individual is not entitled to indemnification. We generally are responsible for similar indemnifications and advancement obligations that companies we acquire, including Riggs and Mercantile, had to their officers, directors and sometimes employees and agents at the time of acquisition. We advanced such costs on behalf of several such individuals (including some from Riggs) with respect to pending litigation or investigations during the first three months of 2007. It is not possible for us to determine the aggregate potential exposure resulting from the obligation to provide this indemnity or to advance such costs.

In connection with the lending of securities held by PFPC as an intermediary on behalf of certain of its clients, we provide indemnification to those clients against the failure of the

borrowers to return the securities. The market value of the securities lent is fully secured on a daily basis; therefore, the exposure to us is limited to temporary shortfalls in the collateral as a result of short-term fluctuations in trading prices of the loaned securities. At March 31, 2007, the total maximum potential exposure as a result of these indemnity obligations was \$14.7 billion, although we held collateral at the time in excess of that amount.

OTHER GUARANTEES

We write caps and floors for customers, risk management and proprietary trading purposes. At March 31, 2007, the fair value of the written caps and floors liability on our Consolidated Balance Sheet was \$54 million. Our ultimate obligation under written options is based on future market conditions and is only quantifiable at settlement. We manage our market risk exposure from customer positions through transactions with third-party dealers.

We also enter into credit default swaps under which we buy loss protection from or sell loss protection to a counterparty for the occurrence of a credit event of a reference entity. The fair value of the contracts sold on our Consolidated Balance Sheet was a net asset of \$3 million at March 31, 2007. The maximum amount we would be required to pay under the credit default swaps in which we sold protection, assuming all reference obligations experience a credit event at a total loss, without recoveries, was \$1.1 billion at March 31, 2007.

We have entered into various contingent performance guarantees through credit risk participation arrangements with terms ranging from less than one year to 10 years. We will be required to make payments under these guarantees if a customer defaults on its obligation to perform under certain credit agreements with third parties. Our exposure under these agreements is approximately \$406 million at March 31, 2007.

CONTINGENT PAYMENTS IN CONNECTION WITH CERTAIN ACQUISITIONS

A number of the acquisition agreements to which we are a party and under which we have purchased various types of assets, including the purchase of entire businesses, partial interests in companies, or other types of assets, require us to make additional payments in future years if certain predetermined goals are achieved or not achieved within a specific time period. Due to the nature of the contract provisions, we cannot quantify our total exposure that may result from these agreements.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Allowance for unfunded loan commitments and letters of credit	126		117	
Accrued expenses and other liabilities	7,961		7,882	
Minority and noncontrolling interests in consolidated entities	893		542	
Shareholders' equity	11,948		10,806	
Total liabilities, minority and noncontrolling interests, and shareholders' equity	\$107,422		\$99,048	
Interest rate spread		2.28		2.18
Impact of noninterest-bearing sources		.67		.70
Net interest income/margin	\$629	2.95%	\$571	2.88%

Nonaccrual loans are included in loans, net of unearned income. The impact of financial derivatives used in interest rate risk management is included in the interest income/expense and average yields/rates of the related assets and liabilities. Basis adjustments related to hedged items are included in noninterest-earning assets and noninterest-bearing liabilities. Average balances of securities are based on amortized historical cost (excluding SFAS 115 adjustments to fair value, which are included in other assets). Average balances for certain loans and borrowed funds accounted for at fair value, with changes in fair value recorded in trading noninterest income, are included in noninterest-earning assets and noninterest-bearing liabilities.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Loan fees for the three months ended March 31, 2007, December 31, 2006, September 30, 2006, June 30, 2006 and March 31, 2006 were \$9 million, \$8 million, \$9 million, \$9 million and \$9 million, respectively. Interest income includes the effects of taxable-equivalent adjustments using a marginal federal income tax rate of 35% to increase tax-exempt interest income to a taxable-equivalent basis. The taxable-equivalent adjustments to interest income for the three months ended March 31, 2007, December 31, 2006, September 30, 2006, June 30, 2006 and March 31, 2006 were \$6 million, \$5 million, \$7 million, \$6 million and \$7 million, respectively. Average securities held to maturity totaled less than \$.5 million for each of the periods presented and are included in the Other debt category.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

See Note 13 Legal Proceedings in the Notes To Consolidated Financial Statements under Part I, Item 1, of this Report, which is incorporated by reference in response to this item.

ITEM 1A. RISK FACTORS

No material changes from the risk factors previously disclosed in PNC's 2006 Form 10-K in response to Part I, Item 1A.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) Details of our repurchases of PNC common stock during the first quarter of 2007 are included in the following table:

In thousands, except per share data

2007 period	Total shares purchased (1)	Average price paid per share	Total shares purchased as part of publicly announced programs (2)	Maximum number of shares that may yet be purchased under the programs (2)
January 1 - January 31	686	\$ 74.57	338	14,165
February 1 - February 28	227	\$ 74.95		14,165
March 1 - March 31	1,172	\$ 71.73	1,062	13,103
Total	2,085	\$ 73.01	1,400	

- (1) Includes PNC common stock purchased under the program referred to in note (2) to this table and PNC common stock purchased in connection with our various employee benefit plans.
- (2) Our current stock repurchase program, which was authorized as of February 16, 2005, allows us to purchase up to 20 million shares on the open market or in privately negotiated transactions. This program will remain in effect until fully utilized or until modified, superseded or terminated.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

An annual meeting of shareholders of The PNC Financial Services Group, Inc. was held on April 24, 2007 for the purpose of considering and acting upon the following matters: (1) the election of 18 directors to serve until the next annual meeting and until their successors are elected and qualified, (2) the approval of The PNC Financial Services Group, Inc. 1996 Executive Incentive Award Plan, as amended and restated, and (3) the ratification of the Audit Committee's selection of PricewaterhouseCoopers LLP as PNC's independent auditors for 2007.

Eighteen directors were elected and the aggregate votes cast for or against/withheld were as follows:

Nominee	Aggregate Votes	
	For	Against/Withheld
Richard O. Berndt	238,665,877	6,565,291
Charles E. Bunch	240,450,246	4,780,922
Paul W. Chellgren	238,644,320	6,586,848
Robert N. Clay	240,144,841	5,086,327

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

George A. Davidson, Jr.	238,681,552	6,549,616
Kay Coles James	241,160,552	4,070,616
Richard B. Kelson	240,091,015	5,140,153
Bruce C. Lindsay	238,792,148	6,439,020
Anthony A. Massaro	240,113,857	5,117,311
Jane G. Pepper	227,376,677	17,854,491
James E. Rohr	230,048,512	15,182,656
Donald J. Shepard	240,564,271	4,666,897
Lorene K. Steffes	241,746,035	3,485,133
Dennis F. Strigl	239,787,961	5,443,207
Stephen G. Thieke	241,735,866	3,495,302
Thomas J. Usher	238,413,260	6,817,908
George H. Walls, Jr.	239,791,175	5,439,993
Helge H. Wehmeier	240,153,911	5,077,157

Table of Contents

The PNC Financial Services Group, Inc. 1996 Executive Incentive Award Plan, as amended and restated, was approved and the aggregate votes cast for or against and the abstentions and broker non-votes were as follows:

For	Aggregate Votes Against	Abstain	Broker Non-Votes
177,499,961	24,974,470	3,988,469	38,768,268

The Audit Committee's selection of PricewaterhouseCoopers LLP as PNC's independent auditors for 2007 was ratified and the aggregate votes cast for or against and the abstentions were as follows:

For	Aggregate Votes Against	Abstain
241,099,394	2,370,187	1,761,587

With respect to all of the preceding matters, holders of our common and voting preferred stock voted together as a single class. The following table sets forth, as of the February 28, 2007 record date, the number of shares of each class or series

of stock that were issued and outstanding and entitled to vote, the voting power per share, and the aggregate voting power of each class or series:

Title of Class or Series	Voting Rights	Number of		Aggregate Voting Power
		Per Share	Shares Entitled to Vote	
Common Stock		1	293,403,508	293,403,508
\$1.80 Cumulative Convertible Preferred Stock Series A		8	6,713	53,704
\$1.80 Cumulative Convertible Preferred Stock Series B		8	1,393	11,144
\$1.60 Cumulative Convertible Preferred Stock Series C		4/2.4	143,536	239,226
\$1.80 Cumulative Convertible Preferred Stock Series D		4/2.4	194,414	324,023
Total possible votes				294,031,605*

* Represents greatest number of votes possible. Actual aggregate voting power was less since each holder of such preferred stock was entitled to a number of votes equal to the number of full shares of common stock into which such holder's preferred stock was convertible.
