APPROXIMATE DATE OF PROPOSED PUBLIC OFFERING:

As soon as practicable after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box): when declared effective pursuant to section 8(c).

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered⁽¹⁾⁽³⁾	Proposed Maximum Aggregate Offering Price⁽²⁾	Amount of Registration Fee⁽⁴⁾
Common Stock, \$0.001 par value per share	13,000,000	\$ 132,795,000	\$ 7,576

(1) Pursuant to Rule 416, this registration statement also covers such additional shares of our common stock as may be issued by reason of stock splits, stock dividends or similar transactions.

Edgar Filing: HERCULES TECHNOLOGY GROWTH CAPITAL INC - Form N-2

- (2) Estimated solely for purposes of calculating the amount of the registration fee pursuant to Rule 457(c) under the Securities Act of 1933, as amended, based upon the average of the high and low prices of our common stock as reported on the Nasdaq Global Select Market on December 20, 2010.
- (3) In reliance upon Rule 429 under the Securities Act of 1933, all securities unsold under the prospectus contained in such prior registration statement on Form N-2 (File No. 333-150403) (a total of 5,812,500 shares of common stock) are carried forward into this registration statement, and the prospectus contained as a part of this registration statement shall be deemed to be combined with the prospectus contained in the above-referenced registration statement, which has previously been filed.
- (4) In reliance upon Rule 429 under the Securities Act of 1933, all securities unsold under a registration statement on Form N-2 (File No. 333-150403) (a total of 5,812,500 shares of common stock) are carried forward into this Registration Statement. A registration fee of \$1,893 has been paid previously with respect to such securities. The registration fee of \$7,576 relates solely to the registration of 7,187,500 shares of common stock not previously registered.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(A) OF THE SECURITIES ACT OF 1933, AS AMENDED, OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(A), MAY DETERMINE.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

PROSPECTUS (Subject to Completion)

December , 2010

13,000,000 Shares Common Stock

This prospectus relates to the offer, from time to time, of 13,000,000 shares of our common stock, par value \$0.001 per share by us.

The shares of common stock may be offered at prices and terms to be described in one or more supplements to this prospectus. We may offer shares of common stock at a discount to net asset value per share in certain circumstances. On June 9, 2010, our common stockholders voted to allow us to issue common stock at a price below net asset value per share for a period of one year ending June 9, 2011. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share.

We are a specialty finance company that provides debt and equity growth capital to technology-related companies at various stages of development from seed and emerging growth to expansion and established stages of development, which include select publicly listed companies and lower middle market companies. We primarily finance privately-held companies backed by leading venture capital and private equity firms and also may finance certain publicly-traded companies that lack access to public capital or are sensitive to equity ownership dilution. We source our investments through our principal office located in Silicon Valley, as well as additional offices in Boston and Boulder. Our goal is to be the leading structured debt financing provider of choice for venture capital and private equity backed technology-related companies requiring sophisticated and customized financing solutions. We invest primarily in structured debt with warrants and, to a lesser extent, in senior debt and equity investments.

Our investment objective is to maximize our portfolio total return by generating current income from our debt investments and capital appreciation from our equity-related investments. We are an internally-managed, non-diversified closed-end investment company that has elected to be treated as a business development company under the Investment Company Act of 1940.

Our common stock is traded on the Nasdaq Global Select Market under the symbol HTGC. On December 20, 2010, the last reported sale price of a share of our common stock on the Nasdaq Global Select Market was \$10.29. The net asset value per share of our common stock at September 30, 2010 (the last date prior to the date of this prospectus on which we determined net asset value) was \$9.36.

An investment in our common stock may be speculative and involves risks including a heightened risk of total loss of investment. In addition, the companies in which we invest are subject to special risks. See Risk Factors beginning on page 14 to read about risks that you should consider before investing in our common stock, including the risk of leverage.

Please read this prospectus before investing and keep it for future reference. It contains important information about us that a prospective investor ought to know before investing in our common stock. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission. The information is available free of charge by contacting us at 400 Hamilton Avenue, Suite 310, Palo Alto, California 94301 or by telephone calling collect at (650) 289-3060 or on our website at www.herculestech.com. The SEC also maintains a website at www.sec.gov that contains such information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of shares of common stock unless accompanied by a prospectus supplement.

The date of this prospectus is , 2010

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission using the shelf registration process. Under the shelf registration process, which constitutes a delayed offering in reliance on Rule 415 under the Securities Act of 1933, as amended, we may offer, from time to time, up to 13,000,000 shares of our common stock on the terms to be determined at the time of the offering. Shares of our common stock may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the shares of our common stock that we may offer. Each time we use this prospectus to offer shares of our common stock, we will provide a prospectus supplement that will contain specific information about the terms of that offering. Please carefully read this prospectus and any such supplements together with the additional information described under **Where You Can Find Additional Information** in the **Summary** and **Risk Factors** sections before you make an investment decision.

A prospectus supplement may also add to, update or change information contained in this prospectus.

Table of Contents

SUMMARY

This summary highlights some of the information in this prospectus and may not contain all of the information that is important to you. For a more complete understanding of this offering, we encourage you to read this entire prospectus and the documents that are referenced in this prospectus, together with any accompanying supplements. In this prospectus, unless the context otherwise requires, the Company, Hercules Technology Growth Capital, we, us and our refer to Hercules Technology Growth Capital, Inc. and our wholly-owned subsidiaries.

Our Company

We are a specialty finance company that provides debt and equity growth capital to technology-related companies at various stages of development from seed and emerging growth to expansion and established stages of development, which include select publicly listed companies and lower middle market companies. Our investment objective is to maximize our portfolio total return by generating current income from our debt investments and capital appreciation from our equity-related investments. We are an internally-managed, non-diversified closed-end investment company that has elected to be treated as a business development company under the Investment Company Act of 1940, or the 1940 Act.

As of September 30, 2010 our total assets were approximately \$504.3 million, of which, our investments comprised \$407.5 million at fair value and \$427.8 million at cost. Our investments at fair value were comprised of our debt investments, warrant portfolio and equity investments valued at approximately \$349.1 million, \$19.0 million and \$39.4 million, respectively, or 85.7%, 4.6% and 9.7% of total investments, respectively. Our total investments at value in foreign companies were approximately \$32.3 million or 6.4% of total assets at September 30, 2010. During the year ended December 31, 2009 we made debt commitments to 21 portfolio companies totaling \$180.7 million and funded approximately \$95.5 million to 28 portfolio companies. During the three and nine-month periods ended September 30, 2010, we made debt commitments totaling \$82.7 million and \$391.9 million, respectively and funded approximately \$55.7 million and \$286.0 million, respectively. Debt commitments for the nine months ended September 30, 2010 included commitments of approximately \$266.1 million to 18 new portfolio companies and \$125.8 million to 19 existing portfolio companies. During the three and nine-month periods ended September 30, 2010, we made and funded equity commitments of approximately \$187,000 and \$18.0 million to two and eight portfolio companies respectively. Since inception through September 30, 2010, we have made debt and equity commitments of approximately \$2.0 billion to our portfolio companies.

We also make investments in qualifying small businesses through two wholly-owned, small business investment company (SBIC) subsidiaries, Hercules Technology II, L.P. (HT II) and Hercules Technology III, L.P. (HT III). As SBICs, HT II and HT III are subject to a variety of regulations concerning, among other things, the size and nature of the companies in which they may invest and the structure of those investments. As of September 30, 2010, we held investments in HT II in 53 companies with a fair value of approximately \$167.8 million. HT II s portfolio companies accounted for approximately 41.2% of our total portfolio at September 30, 2010. As of September 30, 2010, we held investments in HT III in three companies with a fair value of approximately \$22.8 million. HT III s portfolio accounted for approximately 5.6% of our total portfolio at September 30, 2010.

We primarily finance privately-held companies backed by leading venture capital and private equity firms and also may finance certain select publicly-traded companies that lack access to public capital or are sensitive to equity ownership dilution. As of September 30, 2010, our proprietary SQL-based database system included over 20,000 technology-related companies and approximately 4,800 venture capital, private equity sponsors/investors, as well as various other industry contacts. Our principal executive office is located in Silicon Valley, and we have additional offices in Boston and Boulder. Our goal is to be the leading structured debt financing provider of choice for venture capital and private equity backed technology-related companies requiring sophisticated and

Table of Contents

customized financing solutions. Our strategy is to evaluate and invest in a broad range of ventures active in the technology, clean technology and life science industries and to offer a full suite of growth capital products up and down the capital structure. We invest primarily in structured debt with warrants and, to a lesser extent, in senior debt and equity investments. We use the term structured debt with warrants to refer to any debt investment, such as a senior or subordinated secured loan, that is coupled with an equity component, including warrants, options or rights to purchase common or preferred stock. Our structured debt with warrants investments will typically be secured by select or all of the assets of the portfolio company.

We focus our investments in companies active in technology industry sub-sectors characterized by products or services that require advanced technologies, including, but not limited to, computer software and hardware, networking systems, semiconductors, semiconductor capital equipment, information technology infrastructure or services, Internet consumer and business services, telecommunications, telecommunications equipment, and media and life sciences. Within the life sciences sub-sector, we focus on medical devices, bio-pharmaceutical, drug discovery, drug delivery, health care services and information systems companies. Within the clean technology sub-sector, we focus on sustainable and renewable energy technologies and energy efficiency and monitoring technologies. We refer to all of these companies as technology-related companies and intend, under normal circumstances, to invest at least 80% of the value of our assets in such businesses.

Our primary business objectives are to increase our net income, net operating income and net asset value by investing in structured debt with warrants and equity of venture capital and private equity backed technology-related companies with attractive current yields and the potential for equity appreciation and realized gains. Our structured debt investments typically include warrants or other equity interests, giving us the potential to realize equity-like returns on a portion of our investments. Our equity ownership in our portfolio companies may represent a controlling interest. In some cases, we receive the right to make additional equity investments in our portfolio companies in connection with future equity financing rounds. Capital that we provide directly to venture capital and private equity backed technology-related companies is generally used for growth and general working capital purposes as well as in select cases for acquisitions or recapitalizations.

Our portfolio is comprised of, and we anticipate that our portfolio will continue to be comprised of, investments in technology-related companies at various stages of development. Consistent with regulatory requirements, we invest primarily in United States based companies and to a lesser extent in foreign companies. See Regulation Qualifying Assets. Since 2007, our investing emphasis has been primarily on private companies following or in connection with a subsequent institutional round of equity financing, which we refer to as expansion-stage companies and private companies in their later rounds of financing and certain public companies, which we refer to as established stage companies and lower middle market companies. We have also historically focused our investment activities in private companies following or in connection with the first institutional round of financing, which we refer to as emerging-growth companies.

Despite the current capital market disruption and recession, we continue to see a steady pace of new investments by venture capitalists. As a result of this favorable level of venture capital investment activities, we are experiencing an increase in new investment origination activities which commenced in the fourth quarter of 2009 and into 2010, and we would expect it to continue to the extent the venture capital community continues to accelerate its own pace of new investments. We are encouraged by signs of an improving economy, including improved valuations and higher levels of liquidity for our portfolio companies, increased investment activity from venture capitalists and the opening of the initial public offering, or IPO, marketplace. To the extent that we are able, we intend to seek new investment opportunities; however, we remain cautious in our investment and credit management strategies as the pace of economic recovery continues to improve.

As of September 30, 2010, our investment professionals, including Manuel A. Henriquez, our co-founder, Chairman, President and Chief Executive Officer, are currently comprised of 24 professionals who have, on average, more than 15 years of experience in venture capital, structured finance, commercial lending or

Table of Contents

acquisition finance with the types of technology-related companies that we are targeting. We believe that we can leverage the experience and relationships of our management team to successfully identify attractive investment opportunities, underwrite prospective portfolio companies and structure customized financing solutions.

Our Market Opportunity

We believe that technology-related companies compete in one of the largest and most rapidly growing sectors of the U.S. economy and that continued growth is supported by ongoing innovation and performance improvements in technology products as well as the adoption of technology across virtually all industries in response to competitive pressures. We believe that an attractive market opportunity exists for a specialty finance company focused primarily on investments in structured debt with warrants in technology-related companies for the following reasons:

Technology-related companies have generally been underserved by traditional lending sources;

Unfulfilled demand exists for structured debt financing to technology-related companies as the number of lenders has declined due to the recent financial market turmoil;

Structured debt with warrants products are less dilutive and complement equity financing from venture capital and private equity funds; and

Valuations currently assigned to technology-related companies in private financing rounds have generally decreased since 2008 as a result of the turmoil in the general market and should provide a good opportunity for attractive capital returns.

Technology-Related Companies are Underserved by Traditional Lenders. We believe many viable technology-related companies backed by financial sponsors have been unable to obtain sufficient growth financing from traditional lenders, including financial services companies such as commercial banks and finance companies, particularly due to the recent credit market dislocation and because traditional lenders have continued to consolidate and have adopted a more risk-averse approach to lending. More importantly, we believe traditional lenders are typically unable to underwrite the risk associated with financial sponsor-backed emerging-growth or expansion-stage companies effectively.

The unique cash flow characteristics of many technology-related companies include significant research and development expenditures and high projected revenue growth thus often making such companies difficult to evaluate from a credit perspective. In addition, the balance sheets of emerging-growth and expansion-stage companies often include a disproportionately large amount of intellectual property assets, which can be difficult to value. Finally, the speed of innovation in technology and rapid shifts in consumer demand and market share add to the difficulty in evaluating technology-related companies.

Due to the difficulties described above, we believe traditional lenders are generally refraining from entering the structured mezzanine marketplace, instead preferring the risk-reward profile of asset based lending. Traditional lenders generally do not have flexible product offerings that meet the needs of technology-related companies. The financing products offered by traditional lenders typically impose on borrowers many restrictive covenants and conditions, including limiting cash outflows and requiring a significant depository relationship to facilitate rapid liquidation.

Unfulfilled Demand for Structured Debt Financing to Technology-Related Companies. Private debt capital in the form of structured debt financing from specialty finance companies continues to be an important source of funding for technology-related companies. We believe that the level of demand for structured debt financing is a function of the level of annual venture equity investment activity. During the first nine months of 2010, venture capital-backed companies received, in approximately 2,016 transactions, equity financing in an aggregate amount of approximately \$18.0 billion, representing a 10% increase from the same period of the

Table of Contents

preceding year, as reported by Dow Jones VentureSource. In addition, overall, the median round size during the three-month periods ended September 30, 2010 and 2009 was approximately \$5.0 million. Overall, seed- and first-round deals made up 35% of the deal flow in the three months ended September 30, 2010, and later-stage deals made up roughly 40% of all capital invested.

We believe that demand for structured debt financing is currently underserved, in part because of the credit market collapse in 2008 and the resulting exit of debt capital providers to technology-related companies during 2008 and 2009. Despite the current capital market disruption and recession, venture capitalists increased their investment activity during the nine months ended September 30, 2010. As a result of this favorable level of venture capital investment activities, we are experiencing an increase in new investment origination activities which commenced in the fourth quarter of 2009, and we expect it to continue as the venture capital community continues to make new investments. In addition, lending requirements of traditional lenders have recently become more stringent due to the significant write-offs in the financial services sector, the re-pricing of credit risk in the broadly syndicated market, and the financial turmoil affecting the banking system and financial market, which have negatively impacted the debt and equity capital market in the United States and most other markets. At the same time, the venture capital market for the technology-related companies in which we invest has continued to be active. Therefore, to the extent we have capital available, we believe this is an opportune time to be active in the structured lending market for technology-related companies.

Structured Debt with Warrants Products Complement Equity Financing From Venture Capital and Private Equity Funds. We believe that technology-related companies and their financial sponsors will continue to view structured debt securities as an attractive source of capital because it augments the capital provided by venture capital and private equity funds. We believe that our structured debt with warrants product provides access to growth capital that otherwise may only be available through incremental investments by existing equity investors. As such, we provide portfolio companies and their financial sponsors with an opportunity to diversify their capital sources. Generally, we believe emerging-growth and expansion-stage companies target a portion of their capital to be debt in an attempt to achieve a higher valuation through internal growth. In addition, because financial sponsor-backed companies have potentially reached a more mature stage prior to reaching a liquidity event, we believe our investments provide the debt capital needed to grow or recapitalize companies during the extended period prior to liquidity events.

Our Business Strategy

Our strategy to achieve our investment objective includes the following key elements:

Leverage the Experience and Industry Relationships of Our Management Team and Investment Professionals. We have assembled a team of experienced investment professionals with extensive experience as venture capitalists, commercial lenders, and originators of structured debt and equity investments in technology-related companies. Our investment professionals have, on average, more than 15 years of experience as equity investors in, and/or lenders to, technology-related companies. Our team members have originated structured debt, structured debt with warrants and equity investments in over 150 technology-related companies, representing over \$2.0 billion in commitments and have developed a network of industry contacts with investors and other participants within the venture capital and private equity communities. In addition, members of our management team also have operational, research and development and finance experience with technology-related companies. We have established contacts with leading venture capital and private equity fund sponsors, public and private companies, research institutions and other industry participants, which should enable us to identify and attract well-positioned prospective portfolio companies.

We concentrate our investing activities generally in industries in which our investment professionals have investment experience. We believe that our focus on financing technology-related companies will enable us to leverage our expertise in structuring prospective investments, to assess the value of both tangible and intangible

Table of Contents

assets, to evaluate the business prospects and operating characteristics of technology-related companies and to identify and originate potentially attractive investments with these types of companies.

Mitigate Risk of Principal Loss and Build a Portfolio of Equity-Related Securities. We expect that our investments have the potential to produce attractive risk adjusted returns through current income, in the form of interest and fee income, as well as capital appreciation from equity-related securities. We believe that we can mitigate the risk of loss on our debt investments through the combination of loan principal amortization, cash interest payments, relatively short maturities, security interests in the assets of our portfolio companies, and, on select investments, covenants requiring prospective portfolio companies to have certain amounts of available cash and the continued support from a venture capital or private equity firm at the time we make our investment.

Historically, our structured debt investments to technology-related companies typically include warrants or other equity interests, giving us the potential to realize equity-like returns on a portion of our investment. In addition, in some cases, we receive the right to make additional equity investments in our portfolio companies in connection with future equity financing rounds. We believe these equity interests will create the potential for meaningful long-term capital gains in connection with the future liquidity events of these technology-related companies.

Provide Customized Financing Complementary to Financial Sponsors' Capital. We offer a broad range of investment structures and possess expertise and experience to effectively structure and price investments in technology-related companies. Unlike many of our competitors that only invest in companies that fit a specific set of investment parameters, we have the flexibility to structure our investments to suit the particular needs of our portfolio companies. We offer customized financing solutions ranging from senior debt to equity capital, with a focus on structured debt with warrants.

We use our relationships in the financial sponsor community to originate investment opportunities. Because venture capital and private equity funds typically invest solely in the equity securities of their portfolio companies, we believe that our debt investments will be viewed as an attractive and complementary source of capital, both by the portfolio company and by the portfolio company's financial sponsor. In addition, we believe that many venture capital and private equity fund sponsors encourage their portfolio companies to use debt financing for a portion of their capital needs as a means of potentially enhancing equity returns, minimizing equity dilution and increasing valuations prior to a subsequent equity financing round or a liquidity event.

Invest at Various Stages of Development. We provide growth capital to technology-related companies at all stages of development, from emerging-growth companies, to expansion-stage companies, including select publicly listed companies and lower middle market companies and established-stage companies. We believe that this provides us with a broader range of potential investment opportunities than those available to many of our competitors, who generally focus their investments on a particular stage in a company's development. Because of the flexible structure of our investments and the extensive experience of our investment professionals, we believe we are well positioned to take advantage of these investment opportunities at all stages of prospective portfolio companies' development.

Benefit from Our Efficient Organizational Structure. We believe that the perpetual nature of our corporate structure enables us to be a long-term partner for our portfolio companies in contrast to traditional mezzanine and investment funds, which typically have a limited life. In addition, because of our access to the equity markets, we believe that we may benefit from a lower cost of capital than that available to private investment funds. We are not subject to requirements to return invested capital to investors nor do we have a finite investment horizon. Capital providers that are subject to such limitations are often required to seek a liquidity event more quickly than they otherwise might, which can result in a lower overall return on an investment.

Deal Sourcing Through Our Proprietary Database. We have developed a proprietary and comprehensive structured query language-based (SQL) database system to track various aspects of our investment process

Table of Contents

including sourcing, originations, transaction monitoring and post-investment performance. As of September 30, 2010, our proprietary SQL-based database system included over 20,000 technology-related companies and over 4,800 venture capital, private equity sponsors/investors, as well as various other industry contacts. This proprietary SQL system allows us to maintain, cultivate and grow our industry relationships while providing us with comprehensive details on companies in the technology-related industries and their financial sponsors.

Dividend Reinvestment Plan

We have adopted an opt-out dividend reinvestment plan through which distributions are paid to stockholders in the form of additional shares of our common stock, unless a stockholder elects to receive cash. See **Dividend Reinvestment Plan**. Those stockholders whose shares are held by a broker or other financial intermediary may receive distributions in cash by notifying their broker or other financial intermediary of their election.

Taxation

Prior to 2006, we were taxed as a corporation under Subchapter C of the Internal Revenue Code of 1986, as amended, which we refer to in this prospectus as the Code. We elected to be treated for federal income tax purposes as a regulated investment company (a RIC) under Subchapter M of the Code with the filing of our federal corporate income tax return for 2006, which election was effective as of January 1, 2006. As a RIC, we generally will not pay corporate-level federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends, which allows us to reduce or eliminate our corporate level tax. See **Certain United States Federal Income Tax Considerations**. To obtain and maintain the federal income tax benefits of RIC status, we must meet specified source-of-income and asset diversification requirements and distribute annually an amount equal to at least 90% of the sum of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of assets legally available for distribution. There is no assurance that we will meet these tests and be eligible to make a RIC election. If we do not qualify or do not make a RIC election, we would be taxed as a C corporation.

Use of Proceeds

We intend to use the net proceeds from selling shares of common stock for general corporate purposes, which includes investing in debt and equity securities, repayment of indebtedness and other general corporate purposes. The supplement to this prospectus relating to an offering will more fully identify the use of proceeds from such offering.

Leverage

We borrow funds to make additional investments, and we have granted, and may in the future grant, a security interest in our assets to a lender in connection with any such borrowings, including any borrowings by any of our subsidiaries. We use this practice, which is known as leverage, to attempt to increase returns to our common stockholders. However, leverage involves significant risks. See **Risk Factors**. With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowing. Our asset coverage for senior indebtedness as of September 30, 2010 was well over 200% since we exclude SBA leverage from this ratio and we have no other borrowings outstanding. The amount of leverage that we employ will depend on our assessment of market and other factors at the time of any proposed borrowing.

We, through a special purpose wholly-owned subsidiary, Hercules Funding II, LLC, entered into a two-year revolving senior secured credit facility with an optional one-year extension with total commitments of \$50 million, with Wells Fargo Capital Finance as a lender and as an arranger and administrative agent (the Wells

Table of Contents

Facility). The Wells Facility has the capacity to increase to \$300 million if additional lenders are added to the syndicate. The Wells Facility expires in August 2011, unless the option to extend the facility is exercised by the parties to the agreement. We continue to be in discussions with various other potential lenders to join the facility; however, there is no assurance that additional lenders may join the facility.

Borrowings under the Wells Facility will generally bear interest at a rate per annum equal to LIBOR plus 3.25% or PRIME plus 2.0%, but not less than 5.0%. The Wells Facility requires the payment of a non-use fee of 0.3% annually. The Wells Facility is collateralized by debt investments in our portfolio companies, and includes an advance rate equal to 50% of eligible loans placed in the collateral pool. The Wells Facility generally requires payment of interest on a monthly basis. All outstanding principal is due upon maturity. We have paid a total of \$1.1 million in structuring fees in connection with the Wells Facility which is being amortized through August 2011. There was no outstanding debt under the Wells Facility at September 30, 2010.

The Wells Facility requires various financial and operating covenants. These covenants require us to maintain certain financial ratios and a minimum tangible net worth of approximately \$311 million, contingent upon our total commitments under all lines of credit not exceeding approximately \$311 million. To the extent our total commitments exceed approximately \$311 million, the minimum tangible net worth covenant will increase on a pro rata basis commensurate with our net worth on a dollar for dollar basis. In addition, the tangible net worth covenant will increase by 90 cents on the dollar for every dollar of equity capital subsequently raised by us. The Wells Facility provides for customary events of default, including, but not limited to, payment defaults, breach of representations or covenants, bankruptcy events and change of control. We were in compliance with all covenants at September 30, 2010.

On February 10, 2010, we entered a \$20.0 million one-year revolving senior secured credit facility with Union Bank (the Union Bank Facility). Borrowings under the Union Bank Facility will generally bear interest at a rate per annum equal to LIBOR plus 2.25% with a floor of 4.0%. At September 30, 2010, there were no borrowings outstanding on this facility. The Union Bank Facility requires the payment of a non-use fee of 0.25% annually. The Union Bank Facility is collateralized by debt investments in our portfolio companies, and includes an advance rate equal to 50.0% of eligible loans placed in the collateral pool. The Union Bank Facility generally requires payment of interest on a monthly basis. All outstanding principal is due upon maturity.

Hercules Technology II, L.P. (HT II) and Hercules Technology III, L.P. (HT III), our wholly owned subsidiaries, are licensed by the U.S. Small Business Administration (SBA) as small business investment companies (SBICs) under the Small Business Investment Act of 1958. As of September 30, 2010, we held investments in HT II in 53 companies with a fair value of approximately \$167.8 million. HT II s portfolio companies accounted for approximately 41.2% of our total portfolio at September 30, 2010. As of September 30, 2010, we held investments in HT III in three companies with a fair value of approximately \$22.8 million. HT III s portfolio accounted for approximately 5.6% of our total portfolio at September 30, 2010.

On September 27, 2006, HT II received a license to operate as a SBIC under the SBIC program and is able to borrow funds from the SBA against eligible investments and additional contributions to regulatory capital. As of September 30, 2010, the maximum statutory limit on the dollar amount of outstanding SBA guaranteed debentures issued by a single SBIC is \$150.0 million, subject to periodic adjustments by the SBA. With our net investment of \$75.0 million in HT II as of September 30, 2010, HT II has fully drawn its capacity to issue a total of \$150.0 million of SBA guaranteed debentures, of which \$150.0 million was outstanding as of September 30, 2010.

On May 26, 2010, HT III received a license to operate as a SBIC under the SBIC program and is able to borrow funds from the SBA against eligible investments and additional contributions to regulatory capital. As of September 30, 2010, HT III had the potential to borrow up to \$75.0 million of SBA-guaranteed debentures under the SBIC program. With our net investment of \$25.0 million in HT III as of September 30, 2010, HT III has the capacity to issue a total of \$ 50.0 million of SBA guaranteed debentures, subject to SBA approval, of which \$10.0 million was outstanding as of September 30, 2010. In order to have access to the remaining \$25.0 million

Table of Contents

leverage, which would be subject to SBA approval and compliance with SBIC regulations, the Company would have to make an additional net investment of \$12.5 million. There is no assurance that HT III will be able to draw up to the maximum limit available under the SBIC program.

Distributions

As a RIC, we are required to distribute annually to our stockholders at least 90% of the sum of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. We are not subject to corporate level income taxation on income we timely distribute to our stockholders as dividends. See [Certain Material United States Federal Income Tax Considerations](#). We pay regular quarterly dividends based upon an estimate of annual taxable income available for distribution to shareholders and the amount of taxable income carried over from the prior year for distribution in the current year.

Principal Risk Factors

Investing in our common stock may be speculative and involves certain risks relating to our structure and our investment objective that you should consider before deciding whether to invest. In addition, we expect that our portfolio will continue to consist primarily of securities issued by privately-held technology-related companies, which generally require additional capital to become profitable. These investments may involve a high degree of business and financial risk, and they are generally illiquid. Our portfolio companies typically will require additional outside capital beyond our investment in order to succeed or to fully repay the amounts owed to us. A large number of entities compete for the same kind of investment opportunities as we seek.

We borrow funds to make our investments in portfolio companies. As a result, we are exposed to the risks of leverage, which may be considered a speculative investment technique. Borrowings magnify the potential for gain and loss on amounts invested and, therefore increase the risks associated with investing in our common stock. Also, we are subject to certain risks associated with valuing our portfolio, changing interest rates, accessing additional capital, fluctuating quarterly results, and operating in a regulated environment. See [Risk Factors](#) for a discussion of factors you should carefully consider before deciding whether to invest in our common stock.

Certain Anti-Takeover Provisions

Our charter and bylaws, as well as certain statutes and regulations, contain provisions that may have the effect of discouraging a third party from making an acquisition proposal for our company. This could delay or prevent a transaction that could give our stockholders the opportunity to realize a premium over the price for their securities.

Recent Developments

On December 16, 2010, we announced that our portfolio company, InfoLogix, Inc., entered into a definitive merger agreement with Stanley Black & Decker, Inc. Pursuant to the merger agreement, a wholly-owned subsidiary of Stanley will merge with and into InfoLogix, with InfoLogix surviving the merger as a wholly-owned subsidiary of Stanley. Each outstanding share of InfoLogix common stock will be cancelled and converted automatically into the right to receive \$4.75 in cash in a transaction valued at approximately \$61.2 million prior to transaction fees, closing costs, and working capital adjustments, and includes the purchase or payoff of substantially all of the debt of InfoLogix.

Table of Contents

In connection with the merger, and pursuant to a purchase and sale agreement between Stanley and Hercules and a wholly-owned subsidiary of Hercules, which together constitute InfoLogix's majority stockholder and senior lender, Stanley is expected to purchase all of InfoLogix's indebtedness owed to us, pay cash for our warrant to acquire shares of common stock of InfoLogix, and allow for our ability to convert certain obligations currently outstanding into common stock. Pursuant to the merger, we would plan to tender its shares in InfoLogix.

The board of directors of InfoLogix, acting upon the recommendation of a special committee consisting of independent members of the board of directors, unanimously approved and declared advisable the merger agreement and the transactions contemplated thereby. Shortly after execution of the merger agreement, Hercules and a wholly-owned subsidiary of Hercules, which together hold a substantial portion of the voting power of the outstanding shares of InfoLogix common stock, executed a written consent adopting and approving the transaction. No additional stockholder action is required.

The merger, which is subject to various closing conditions, including the filing with the SEC of an Information Statement on Schedule 14C and the distribution of the Information Statement to all of InfoLogix's stockholders, is expected to close early in the first quarter of 2011 although there can be no assurance that the transaction will close, or that it will close within the expected timeframe.

General Information

Our principal executive offices are located at 400 Hamilton Avenue, Suite 310, Palo Alto, California 94301, and our telephone number is (650) 289-3060. We also have offices in Boston, Massachusetts and Boulder, Colorado. We maintain a website on the Internet at www.herculestech.com. Information contained in our website is not incorporated by reference into this prospectus, and you should not consider that information to be part of this prospectus.

We file annual, quarterly and current periodic reports, proxy statements and other information with the SEC under the Securities Exchange Act of 1934, which we refer to as the Exchange Act. This information is available at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information about the operation of the SEC's public reference room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet website, at www.sec.gov, that contains reports, proxy and information statements, and other information regarding issuers, including us, who file documents electronically with the SEC.

Table of Contents**FEES AND EXPENSES**

The following table is intended to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. However, we caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by you or us or that we will pay fees or expenses, stockholders will indirectly bear such fees or expenses as investors in Hercules Technology Growth Capital.

Stockholder Transaction Expenses (as a percentage of the public offering price):	
Sales load (as a percentage of offering price) ⁽¹⁾	%
Offering expenses	%
Dividend reinvestment plan fees	%(2)
Total stockholder transaction expenses (as a percentage of the public offering price)	%
Annual Expenses (as a percentage of net assets attributable to common stock):⁽²⁾	
Operating expenses	5.4% ⁽³⁾⁽⁴⁾
Interest payments on borrowed funds	2.6% ⁽⁵⁾
Fees paid in connection with borrowed funds	0.5% ⁽⁶⁾
Acquired fund fees and expenses ⁽⁷⁾	0.0%
Total annual expenses	8.5%⁽⁸⁾

- (1) In the event that the shares of common stock to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load. We will not pay any underwriting discount or commission, and we will not receive any of the proceeds from shares sold by the selling stockholders.
- (2) The expenses associated with the administration of our dividend reinvestment plan are included in Operating expenses. We pay all brokerage commissions incurred with respect to open market purchases, if any, made by the administrator under the plan. For more details about the plan, see Dividend Reinvestment Plan.
- (2) Average net assets attributable to common stock equals the weighted estimated average net assets for 2010 which is approximately \$355.7 million.
- (3) Operating expenses represent our estimated operating expenses for the year ending December 31, 2010 including income tax expense (benefit) including excise tax, excluding interests and fees on indebtedness. This percentage for the year ended December 31, 2009 was 5.3%. See Management's Discussion and Analysis and Results of Operations, Management, and Compensation of Executive Officers and Directors.
- (4) We do not have an investment adviser and are internally managed by our executive officers under the supervision of our Board of Directors. As a result, we do not pay investment advisory fees, but instead we pay the operating costs associated with employing investment management professionals.
- (5) Interest payments on borrowed funds represents estimated interest payments on borrowed funds for 2010. Citigroup has an equity participation right through a warrant participation agreement on the pool of loans and warrants and shares underlying the warrants collateralized under our prior credit facility with Citigroup (the Citigroup Facility). As a fee and incentive to Citigroup for the extension of the Citigroup Facility, we entered into a Warrant Participant Agreement with Citigroup in August 2005. Pursuant to the Warrant Participation Agreement, we granted to Citigroup a 10% participation in all warrants held as collateral. However, no additional warrants are included in collateral subsequent to the Citigroup Facility amendment on May 2, 2007. As a result, Citigroup is entitled to 10% of the realized gains on the warrants until the realized gains paid to Citigroup pursuant to the agreement equals \$3,750,000 (the Maximum Participation Limit). The obligations under the warrant participation agreement continue until the Maximum Participation Limit has been reached even though the Citigroup Facility was terminated. During the quarter ended September 30, 2010, we recorded a decrease of the derivative liability related to this obligation and decreased its unrealized appreciation by approximately \$177,000 for Citigroup's participation in unrealized gains in the warrant portfolio. The value of their participation right on unrealized appreciation in the related equity investments was approximately \$335,000 at September 30, 2010 and is included in accrued liabilities. Since inception of the warrant participation agreement, we have paid Citigroup approximately \$1.1 million under the warrant participation agreement thereby reducing our realized gains by this amount. There can be no assurances that the unrealized appreciation of the warrants will not be higher or lower in future periods due to fluctuations in the value of the warrants, thereby increasing or reducing the effect on the cost of borrowing.
- (6) Fees paid in connection with borrowed funds represents estimated fees paid in connection with borrowed funds for 2010. This percentage for the year ended December 31, 2009 was approximately 0.5%.
- (7) For the quarter ended September 30, 2010 and the year ended December 31, 2009, we did not have any investments in shares of Acquired Funds that are not consolidated and, as a result, we did not directly or indirectly incur any fees from Acquired Funds.
- (8) Total annual expenses is the sum of operating expenses, interest payments on borrowed funds and fees paid in connection with borrowed funds.

Table of Contents**Example**

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. These amounts are based upon our payment of annual operating expenses at the levels set forth in the table above and assume no additional leverage.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 127	\$ 279	\$ 420	\$ 732

The example and the expenses in the tables above should not be considered a representation of our future expenses, and actual expenses may be greater or lesser than those shown. Moreover, while the example assumes, as required by the applicable rules of the SEC, a 5% annual return, our performance will vary and may result in a return greater or lesser than 5%. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, participants in our dividend reinvestment plan may receive shares valued at the market price in effect at that time. This price may be at, above or below net asset value. See [Dividend Reinvestment Plan](#) for additional information regarding our dividend reinvestment plan.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL DATA**

The selected consolidated financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations, Senior Securities and the consolidated financial statements and related notes included elsewhere herein. The selected balance sheet data as of the end of fiscal 2009, 2008, 2007, 2006 and 2005 and the selected statement of operations data for fiscal 2009, 2008, 2007, 2006 and 2005 have been derived from our audited financial statements included elsewhere herein, which have been audited by Ernst & Young LLP, an independent registered public accounting firm. The historical data are not necessarily indicative of results to be expected for any future period. The selected financial and other data for the nine months ended September 30, 2010 and other quarterly financial information is derived from our unaudited financial statements, but in the opinion of management, reflects all adjustments (consisting only of normal recurring adjustments) that are necessary to present fairly the results of such interim periods. Interim results at and for the nine months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.
