Invesco Treasury Fund Private Class, 0.02%	0.5%

\*The holdings are subject to change and there is no guarantee the Fund will continue to remain invested in any particular security.

Fully collateralized by U.S. Government security.

The WisdomTree Dreyfus Brazilian Real Fund (the Fund) seeks to achieve total returns reflective of both money market rates in Brazil available to foreign investors and changes in value of the Brazilian real relative to the U.S. dollar. The Brazilian real is a developing market currency which can experience periods of significant volatility. Although the Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 9.56% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). The Fund outperformed the change in the value of the Brazilian real relative to the U.S. dollar by 3.79% over the six months ended February 28, 2011. This was largely the result of the interest return embedded in the Fund's forward currency contracts and is reflective of the fact that interest rates in Brazil generally were higher than rates in the U.S. during the period.

## Edgar Filing: WisdomTree Trust - Form N-CSRS

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commission or taxes a shareholder would pay on the sales of Fund shares or on Fund distributions. **The annual expense ratio of the Fund during the period was 0.45%.**

### Performance as of 2/28/11

	Average Annual Total Return			Since Fund Inception <sup>2</sup>
	3-Month	6-Month	1 Year

Union Bank NA, 0.38%, 3/16/11	0.3%

\* The holdings are subject to change and there is no guarantee the Fund will continue to remain invested in any particular security.

Fully collateralized by U.S. Government security.

The WisdomTree Dreyfus Chinese Yuan Fund (the "Fund") seeks to achieve total returns reflective of both money market rates in China available to foreign investors and changes in value of the Chinese yuan relative to the U.S. dollar. The Chinese yuan is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 2.80% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). The Fund underperformed the spot currency rate by 0.73% over the six months ended February 28, 2011. This was primarily due to two factors. First, some expectation of future appreciation in the Fund was incorporated into the pricing of the currency forward contracts at the time of purchase by the Fund. This made the contracts more expensive and acted as a drag on Fund performance relative to the spot currency. Additionally, because of the low interest rate environment in the U.S., the rates paid on the Fund's investments in U.S. money market instruments were not sufficient to overcome this shortfall.

Fully collateralized by U.S. Government security.

The WisdomTree Dreyfus Commodity Currency Fund (the Fund) seeks to achieve total returns reflective of both money market rates in selected commodity-producing countries available to foreign investors and changes in value of these currencies relative to the U.S. dollar. The term commodity currency generally is used to describe the currency of a country whose economic success is commonly identified with the production and export of commodities (such as precious metals, oil, agricultural products or other raw materials) and whose value is closely linked to the value of such commodities. The Fund can invest in the currencies of commodity-producing countries, such as Australia, Brazil, Canada, Chile, Colombia, Indonesia, Malaysia, New Zealand, Norway, Peru, Russia and South Africa. Although this Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 5.46% on net asset value (NAV) for the period September 24, 2010 through February 28, 2011 (for more complete performance information please see below). It underperformed its reference composite index by 0.34% over the period, due to transaction costs and expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to

The WisdomTree Dreyfus Emerging Currency Fund (the Fund) seeks to achieve total returns reflective of both money market rates in selected emerging market countries available to foreign investors and changes in value of these currencies relative to the U.S. dollar. Emerging market currencies can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 6.21% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). During this period, the Fund underperformed its industry reference benchmark, the JPMorgan Emerging Market Index Plus (ELMI+), by 0.59%. The Fund lagged the benchmark primarily due to the underperformance of Asian currencies, relative to currencies in Eastern Europe. The Fund was more heavily invested in Asia while its benchmark index was more heavily concentrated in Eastern Europe.

The WisdomTree Dreyfus Euro Fund (the Fund) seeks to earn current income reflective of money market rates within the European Union available to foreign investors. The Fund also seeks to maintain liquidity and preserve capital measured in Euros. The euro is a developed market currency, which can experience periods of significant volatility. Although the Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 8.71% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). The Fund outperformed the change in the value of the Euro relative to the U.S. dollar by 0.04% over the six months ended February 28, 2011. The Fund benefited as short-term interest rates rose from historically low levels. This offered more attractive investment opportunities and helped the Fund outperform the Euro.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. Union Bank NA, 0.38%, 3/16/11	0.4%

\* The holdings are subject to change and there is no guarantee the Fund will continue to remain invested in any particular security.

Fully collateralized by U.S. Government security.

The WisdomTree Dreyfus Indian Rupee Fund (the Fund) seeks to achieve total returns reflective of both money market rates in India available to foreign investors and changes in value of the Indian rupee relative to the U.S. dollar. The Indian rupee is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 6.77% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). The Fund outperformed the change in the value of the Indian rupee relative to the U.S. dollar by 2.67% over the six months ended February 28, 2011. This was largely the result of the interest return embedded in the Fund's forward currency contracts and reflects the fact that interest rates in India generally were higher than rates in the U.S. during the period. The Reserve Bank of India continued to raise interest rates during the period to counter inflationary pressures.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV

## Edgar Filing: WisdomTree Trust - Form N-CSRS

return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commission or taxes a shareholder would pay on the sales of Fund shares or on Fund distributions. **The annual expense ratio of the Fund during the period was 0.45%.**

**Performance** as of 2/28/11

	Average Annual Total Return			Since Fund Inception <sup>2</sup>
	3-Month	6-Month	1 Year	
Fund NAV Returns <sup>1</sup>	3.39%	6.77%	5.84%	3.28%
Fund Market Price Returns <sup>1</sup>	3.14%	6.71%	5.54%	3.05%

The WisdomTree Dreyfus Japanese Yen Fund (the Fund) seeks to earn current income reflective of money market rates in Japan available to foreign investors. The Fund also seeks to maintain liquidity and preserve capital measured in Japanese yen. The yen is a developed market currency, which can experience periods of significant volatility. Although the Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 2.34% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). The Fund underperformed the change in the spot currency rate by 0.15% over the six months ended February 28, 2011. This was primarily due to the persistence of low interest rates in Japan.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The WisdomTree Emerging Markets Local Debt Fund (the Fund) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its objective through investments in fixed income instruments denominated in the currencies of emerging market countries.

The Fund returned 3.95% on net asset value (NAV) for the six-month period ended February 28, 2011 (for more complete performance information please see below). During this period, the Fund underperformed its industry reference benchmark, the JPMorgan Global Bond Index Emerging Markets (GBI-EM) Global Diversified Index by 1.31%. The Fund lagged due to the relative underperformance of the Fund's strategic

## Edgar Filing: WisdomTree Trust - Form N-CSRS

concentrations in Asia versus local currency debt in Eastern Europe and Africa.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. \* The holdings are subject to change and there is no guarantee the Fund will continue to remain invested in any particular security.

The WisdomTree Managed Futures Strategy Fund (the Fund) seeks to achieve positive total returns in rising or falling markets that are not directly correlated to broad market equity or fixed income returns.

The Fund returned 2.39% on net asset value (NAV) since its inception on January 5, 2011 through February 28, 2011 (for more complete performance information please see below). The Fund underperformed its performance benchmark, the Diversified Trends Indicator, by 0.21% during the period. This was primarily due to management fees and transaction costs.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. ## **Table of Contents**

### **Description of Terms and Indices** (unaudited)

Below are descriptions of certain terms and of each index referenced in this Report.

#### **Forward Contracts:**

A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A forward contract may either be deliverable or non-deliverable. A **deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date upon which each party delivers the promised currency. A **non-deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date and then cash settle the agreement with a simple exchange of the market value difference between the current market rate and the initial agreed-upon rate.

#### **Spot rate:**

A spot rate is the foreign exchange market price at which a currency will be delivered on the settlement date. Spot rate is the starting point for all foreign exchange transactions. The spot return rate is the rate of return percentage difference between the end of period spot rate and the beginning of period spot rate.

#### **Swap:**

A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets.

#### **Diversified Trends Indicator ( DTI ):**

The Diversified Trends Indicator is a long/short rules-based index constructed of 24 liquid commodity and financial futures contracts comprised of 10 sectors. Each month the DTI index sector exposure is rebalanced back to the fixed weights, 50% physical commodities and 50% financials (when energy is long) and approximately 39.5% commodities and 60.5% financials (when energy is flat). The sectors are positioned either long or short depending on the current market environment. The DTI Index individual market components, sectors and related weightings, as well as other aspects of the calculation of the DTI Index are subject to change at any time.

#### **Equal-Weighted Emerging Currency Composite:**

A composite incorporating equal-weighted exposure to the currencies within the Emerging Currency Fund was constructed as an additional gauge of Emerging Currency Fund performance. Currently, the composite tracks the returns for the currencies of the following countries: Brazil, Chile, Mexico, Poland, Israel, South Africa, Turkey, India, China, South Korea and Taiwan, using the total returns of the country subindices of the JPMorgan Emerging Local Markets Index Plus. Each subindex uses a weighted basket of one-month, two-months and three months currency forwards (deliverable or non-deliverable) collateralized with U.S. money market rates to proxy the total returns of an investment in local-currency money market instruments. Currency exposures are rebalanced back to equal-weighting at the end of the month in which the Emerging Currency Fund intends to rebalance, and currency changes will be similarly incorporated at the end of the month following the annual review unless otherwise noted.

#### **JPMorgan Emerging Local Markets Index Plus (ELMI+):**

The JPMorgan Emerging Local Markets Index Plus (ELMI+) and its underlying country and regional subindices track the total returns for local-currency denominated money market instruments in emerging market countries.

## **Table of Contents**

### **Description of Terms and Indices** (unaudited) (continued)

#### **JPMorgan Emerging Local Markets Index Plus (ELMI+) Brazil:**

The JPMorgan Emerging Local Markets Index Plus and its underlying country and regional subindices track the total returns for local-currency denominated money market instruments in emerging market countries. The Brazil sub index uses a weighted basket of one-month, two-months and three-months currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Brazilian real money market instruments. The returns are reported in U.S. dollar terms.

#### **JPMorgan Emerging Local Markets Index Plus (ELMI+) China:**

The JPMorgan Emerging Local Markets Index Plus and its underlying country and regional subindices track the total returns for local-currency denominated money market instruments in emerging market countries. The China sub index uses a weighted basket of one-month, two-months and three-months currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Chinese yuan money market instruments. The returns are reported in U.S. dollar terms.

#### **JPMorgan Emerging Local Markets Index Plus (ELMI+) India:**

The JPMorgan Emerging Local Markets Index Plus and its underlying country and regional sub indices track the total returns for local-currency denominated money market instruments in emerging market countries. The India sub index uses a weighted basket of one-month, two-months and three-months currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Indian rupee money market instruments. The returns are reported in U.S. dollar terms.

#### **JPMorgan Emerging Local Markets Index Plus (ELMI+) South Africa:**

The JPMorgan Emerging Local Markets Index Plus and its underlying country and regional sub indices track the total returns for local-currency denominated money market instruments in emerging market countries. The South Africa sub index uses a weighted basket of one-month, two-months and three-months currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in South African rand money market instruments. The returns are reported in U.S. dollar terms.

#### **JPMorgan Global Bond Index-Emerging Markets (GBI-EM) Global Diversified Index:**

The JPMorgan Global Bond Index-Emerging Markets (GBI-EM) Global Diversified Index tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base. The returns are reported in U.S. dollar terms.

#### **Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index:**

Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month Euro-denominated bank deposits.

#### **Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index:**

Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month yen-denominated bank deposits.

#### **Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index:**

Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month New Zealand dollar-denominated bank deposits.

**LIBID** is the London Interbank Bid Rate or the rate at which banks are willing to borrow for a discrete period of time.

Edgar Filing: WisdomTree Trust - Form N-CSRS

*Index returns do not reflect expenses paid by the Funds. Index returns assume reinvestment of distributions. It is not possible to invest directly in an index.*

## **Table of Contents**

### **Shareholder Expense Examples** (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from September 1, 2010 to February 28, 2011, for all Funds other than the Commodity Currency Fund and the Managed Futures Strategy Fund. For the Commodity Currency Fund the period is from September 1, 2010 to February 28, 2011. For the Managed Futures Strategy Fund the period is from January 5, 2011 to February 28, 2011.

#### **Actual expenses**

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During Period 9/01/10 to 2/28/11 to estimate the expenses you paid on your account during this period.

#### **Hypothetical example for comparison purposes**

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.
