**Item 2.02 Results of Operations and Financial Condition.**

On February 10, 2012, Alliant Energy Corporation ( Alliant Energy ) issued a press release announcing its earnings for the fourth quarter and year ended December 31, 2011. A copy of such press release is furnished as Exhibit 99.1 and is incorporated by reference herein.

Alliant Energy included in the press release 2011 income from continuing operations and earnings per share from continuing operations excluding restructuring and impairment charges, net regulatory-related charges from IPL electric rate case decisions, charges related to Alliant Energy's Cash Balance Pension Plan, charges for emission allowance contracts and benefits from non-recurring state income tax impacts. Alliant Energy included in the press release 2010 income from continuing operations and earnings per share from continuing operations excluding net regulatory-related charges from IPL electric rate case decisions, charges for health care legislation impacts, restructuring and impairment charges, income from the completion of federal income tax audits and income from a depreciation adjustment. Alliant Energy believes these non-GAAP financial measures (financial measures not prepared in accordance with accounting principles generally accepted in the United States of America) are useful to investors because they provide an alternate measure to better understand and compare across periods the operating performance of Alliant Energy without the distortion of items that management believes are not normally associated with ongoing operations, and also provide additional information about Alliant Energy's operations on a basis consistent with the measures that management uses to manage its operations and evaluate its performance. Alliant Energy's management also uses income from continuing operations, as adjusted, to determine incentive compensation.

In addition, Alliant Energy included in the press release 2011 and 2010 Interstate Power and Light Company, Wisconsin Power and Light Company, utility, and non-regulated and parent earnings per share from continuing operations. Alliant Energy believes these non-GAAP financial measures are useful to investors because they facilitate an understanding of segment performance and trends and provide additional information about Alliant Energy's operations on a basis consistent with the measures that management uses to manage its operations and evaluate its performance. Alliant Energy's management also uses utility earnings per share from continuing operations to determine incentive compensation.
