**NOTE 4. Fair Value Measurement**

The carrying value of cash and cash equivalents, accounts receivable and accounts payable approximated fair value as of June 30, 2013 and December 31, 2012 due to their short-term nature.

We consider as cash equivalents all highly liquid instruments with an original maturity of three months or less. As of June 30, 2013 and December 31, 2012, our cash and temporary investments were with high quality financial institutions in DDAs (Demand Deposit Accounts).

Restricted investments included \$17.8 million and \$17.2 million as of June 30, 2013 and December 31, 2012, respectively, of mutual funds which are reported at fair value.

The fair value measurement of these securities is based on quoted prices in active markets for identical assets which are defined as Level 1 of the fair value hierarchy in the Fair Value Measurements and Disclosures Topic of the Codification.

**NOTE 5. Guarantees**

As a recruiting tool for our owner-operators, we are guaranteeing certain owner-operators lease payments for tractors. The guarantees expire at various dates beginning in 2013 through 2020.

The potential maximum exposure under these lease guarantees was approximately \$44.7 million and \$48.2 million as of June 30, 2013 and December 31, 2012, respectively. The potential maximum exposure represents the amount of the remaining lease payments on all outstanding guaranteed leases as of June 30, 2013 and December 31, 2012. However, upon default, we have the option to purchase the tractors. We could then sell the tractors and use the proceeds to recover all or a portion of the amounts paid under the guarantees. Alternatively, we can contract with another owner operator who would assume the lease. There were no material defaults during the period ended June 30, 2013 or the year ended December 31, 2012 and no potential material defaults.

We had a liability of approximately \$0.8 million as of June 30, 2013 and \$1.0 million as of December 31, 2012, for the guarantees representing the fair value of the guarantees based on a discounted cash-flow analysis included in liabilities in our Consolidated Balance Sheets. We are amortizing the amounts over the remaining lives of the respective guarantees.

**Table of Contents****NOTE 6. Commitments and Contingencies**

During the quarter, we entered into an equipment purchase contract for the acquisition of 1,500 53 containers. We expect the total cost of purchasing the containers to be approximately \$16.7 million. We expect to take delivery of the equipment between July and November 2013.

During the first quarter of 2013, we entered into an equipment purchase contract for the acquisition of 2,529 53 containers. We expect the total cost of purchasing the containers to be approximately \$29.0 million. Delivery began in April and is expected to continue through October 2013.

During the fourth quarter of 2012, we exercised our purchase option on approximately 4,000 containers that are currently leased. In addition, during the second quarter of 2013, we exercised our purchase option on another 200 containers that are currently leased. The purchases, totaling approximately \$14.8 million, will occur as the leases expire throughout 2013. So far in 2013, we have purchased 1,886 containers for approximately \$6.9 million.

**NOTE 7. Long-Term Debt and Financing Arrangements**

The Notes have terms that expire between May 14, 2018 and June 19, 2018 and bear fixed interest rates between 1.9% and 2.0%. The Notes require quarterly principal and interest payments of \$480,000.

**NOTE 8. Legal Matters**

We are a party to litigation incident to our business, including claims for personal injury and/or property damage, bankruptcy preference claims, claims regarding freight lost or damaged in transit, improperly shipped or improperly billed. Some of the lawsuits to which we are party are covered by insurance and are being defended by our insurance carriers. Some of the lawsuits are not covered by insurance and we defend those ourselves. We do not believe that the outcome of this litigation will have a material adverse effect on our financial position or results of operations.

On January 25, 2013, a complaint was filed in the U.S. District Court for the Eastern District of California (Sacramento Division) by Salvador Robles against our subsidiary, Comtrak Logistics, Inc. Mr. Robles drove a truck for Comtrak in California, first as an independent contractor and then as an employee. The action seeks class certification on behalf of a class comprised of present and former California-based truck drivers for Comtrak who were classified as independent contractors, from January 2009 to the present. The complaint alleges Comtrak has misclassified such drivers as independent contractors and that such drivers were employees. The complaint asserts various violations of the California Labor Code and claims that Comtrak has engaged in unfair competition practices. The complaint seeks, among other things, declaratory and injunctive relief, compensatory damages and attorney's fees. In May 2013, the complaint was amended to add similar claims based on Mr. Robles' status as an employed company driver. These additional claims are only on behalf of Mr. Robles and not a proposed class. We cannot reasonably estimate at this time the possible loss or range of loss, if any, that may arise from this lawsuit.

**NOTE 9. New Pronouncements**

In July 2012, the FASB issued an update to Topic 350 Intangibles Goodwill and Other of the Accounting Standards Codification. The objective of this update is to simplify how entities test indefinite lived intangibles for impairment. The amendments in the update permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of the indefinite lived intangible asset is less than its carrying amount as a basis for determining whether it is necessary to perform the quantitative test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. We adopted this guidance effective January 1, 2013 as required, and the adoption did not impact our consolidated financial statements.

## **Table of Contents**

We are the largest intermodal marketing company ( IMC ) in the United States and a full service transportation provider offering intermodal, truck brokerage and logistics services. We operate through a nationwide network of operating centers and independent business owners.

As an IMC, we arrange for the movement of our customers' freight in containers and trailers over long distances. We contract with railroads to provide transportation for the long-haul portion of the shipment and with local trucking companies, known as drayage companies, for local pickup and delivery. As part of the intermodal services, we negotiate rail and drayage rates, electronically track shipments in transit, consolidate billing and handle claims for freight loss or damage on behalf of our customers.

As of June 30, 2013, approximately 66% of Hub's drayage needs were met by our subsidiary, Comtrak Logistics, Inc. ( Comtrak ), which assists us in providing reliable, cost effective intermodal services to our customers. Comtrak has terminals in Atlanta, Birmingham, Charlotte, Chattanooga, Chicago, Cleveland, Columbus (OH), Dallas, Harrisburg, Huntsville, Indianapolis, Jacksonville, Kansas City, Milwaukee, Memphis, Nashville, Newark, Los Angeles, Perry (FL), Philadelphia, Savannah, Seattle, St. Louis, Stockton, and Titusville (FL). As of June 30, 2013, Comtrak leased or owned 332 tractors, leased or owned 448 trailers, employed 363 drivers and contracted with 2,323 owner-operators.

We also arrange for the transportation of freight by truck, providing customers with another option for their transportation needs. We match the customers' needs with carriers' capacity to provide the most effective service and price combinations. As part of our truck brokerage services, we negotiate rates, track shipments in transit and handle claims for freight loss or damage on behalf of our customers.

Our logistics service consists of complex transportation management services, including load consolidation, mode optimization and carrier management. These service offerings are designed to take advantage of the increasing trend for shippers to outsource all or a greater portion of their transportation needs.

Hub has full time marketing representatives throughout North America who service local, regional and national accounts. We believe that fostering long-term customer relationships is critical to our success and allows us to better understand our customers' needs and specifically tailor our transportation services to them.

Hub's yield management group works with pricing and operations to enhance Hub's customer margins. We are working on margin enhancement projects including matching up inbound and outbound loads, reducing empty miles, improving our recovery of accessorial costs, using Comtrak more, and reviewing and improving low margin loads.

Hub's top 50 customers represent approximately 63% of the Hub segment revenue for the six months ended June 30, 2013. We use various performance indicators to manage our business. We closely monitor margin and gains and losses for our top 50 customers. We also evaluate on-time performance, cost per load and daily sales outstanding by customer account. Vendor cost changes and vendor service issues are also monitored closely.

Mode has approximately 232 agents, consisting of 96 sales/operating agents, known as Independent Business Owners ( IBOs ), who sell and operate the business throughout North America and 136 sales only agents. Mode also has a company managed operation and corporate offices in Dallas, a temperature protected services division, Temstar, located in Downers Grove, IL and corporate offices in Memphis. Mode's top 20 customers represent approximately 38% of the Mode segment revenue for the six months ended June 30, 2013. We closely monitor revenue and margin for these customers. We believe Mode brings us highly complementary service offerings, more scale and a talented sales channel that allows us to better reach small and midsize customers.

**LIQUIDITY AND CAPITAL RESOURCES**

During the first half of 2013, we funded operations, capital expenditures, purchase of treasury stock and stock buy backs related to employee withholding upon vesting of restricted stock through cash flows from operations, cash on hand and proceeds from the issuance of long-term debt. We believe that our cash, cash flow from operations and borrowings available under our Credit Agreement will be sufficient to meet our cash needs for at least the next twelve months.

Cash provided by operating activities for the six months ended June 30, 2013 was approximately \$34.4 million, which resulted primarily from income of \$34.0 million and adjustments for non-cash charges of \$20.0 million partially offset by the change in operating assets and liabilities of \$19.6 million.

Net cash used in investing activities for the six months ended June 30, 2013 was \$37.8 million, which includes proceeds from the sale of equipment of \$1.4 million. Capital expenditures of \$39.2 million related primarily to construction in progress of \$9.9 million, computer related hardware and software of \$4.8 million, containers and transportation equipment of \$23.1 million and leasehold improvements of \$1.4 million. We expect capital expenditures to be between \$105 million and \$115 million in 2013. Between \$30 million and \$32 million is for our corporate headquarters, which should be completed by the end of 2013. Another \$61 million is for containers and \$9 million is for tractors. The majority of the remainder is for technology related investments.

Net cash provided by financing activities for the six months ended June 30, 2013 was \$4.7 million. We used \$2.6 million of cash for stock tendered for payments of withholding taxes, \$0.9 million to purchase treasury stock and \$1.1 million for capital lease payments. These payments were offset by proceeds from the issuance of debt of \$9.1 million and excess tax benefits from share-based compensation of \$0.2 million as a financing cash in-flow.

We have standby letters of credit that expire at various dates in 2013 and 2014. As of June 30, 2013, our letters of credit were \$4.2 million.

Our unused and available borrowings under our bank revolving line of credit were \$45.8 million as of June 30, 2013. We were in compliance with our debt covenants as of June 30, 2013.

We are exposed to market risk related to changes in interest rates on our bank line of credit which may adversely affect our results of operations and financial condition. We have no significant exposure to foreign currency exchange rate changes. No derivative financial instruments were outstanding as of June 30, 2013 and December 31, 2012. We do not use financial instruments for trading purposes.

As of June 30, 2013 and December 31, 2012, other than our outstanding letters of credit, the Company had no outstanding obligations under its bank line of credit arrangement.
