UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2014

Commission file number 0-7674

FIRST FINANCIAL BANKSHARES, INC.

(Exact name of registrant as specified in its charter)

Texas
(State or other jurisdiction of
incorporation or organization)

75-0944023
(I.R.S. Employer
Identification No.)

400 Pine Street, Abilene, Texas
(Address of principal executive offices)

79601
(Zip Code)

(325) 627-7155

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulations S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Class
Common Stock, \$0.01 par value per share

Outstanding at April 29, 2014
64,039,234 (See Note 2)

FIRST FINANCIAL BANKSHARES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 - Basis of Presentation

The unaudited interim consolidated financial statements include the accounts of the Company, a Texas corporation and a financial holding company registered under the Bank Holding Company Act of 1956, as amended, or BHCA, and its wholly-owned subsidiaries: First Financial Bank, National Association, Abilene, Texas; First Technology Services, Inc.; First Financial Trust & Asset Management Company, National Association; First Financial Investments, Inc.; and First Financial Insurance Agency, Inc.

Through our subsidiary bank, we conduct a full-service commercial banking business. Our banking centers are located primarily in Central, North Central, Southeast and West Texas. As of March 31, 2014, we had 60 financial centers across Texas, with eleven locations in Abilene, three locations in San Angelo and Weatherford, two locations in Cleburne, Stephenville and Granbury, and one location each in Acton, Albany, Aledo, Alvarado, Boyd, Bridgeport, Brock, Burleson, Cisco, Clyde, Decatur, Eastland, Fort Worth, Glen Rose, Grapevine, Hereford, Huntsville, Keller, Mauriceville, Merkel, Midlothian, Mineral Wells, Moran, Newton, Odessa, Orange, Port Arthur, Ranger, Rising Star, Roby, Southlake, Sweetwater, Trent, Trophy Club, Vidor, Waxahachie, and Willow Park. Our trust subsidiary has seven locations which are located in Abilene, Fort Worth, Odessa, Orange, San Angelo, Stephenville and Sweetwater, all in Texas.

In the opinion of management, the unaudited interim consolidated financial statements reflect all adjustments necessary for a fair presentation of the Company's financial position and unaudited results of operations and should be read in conjunction with the Company's audited consolidated financial statements, and notes thereto in the Company's Annual Report on Form 10-K, for the year ended December 31, 2013. All adjustments were of a normal recurring nature. However, the results of operations for the three months ended March 31, 2014, are not necessarily indicative of the results to be expected for the year ending December 31, 2014, due to seasonality, changes in economic conditions and loan credit quality, interest rate fluctuations, regulatory and legislative changes and other factors. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted under U. S. Securities and Exchange Commission (SEC) rules and regulations. The Company evaluated subsequent events for potential recognition and/or disclosure through the date the consolidated financial statements were issued.

On May 31, 2013, the Company acquired 100% of the outstanding capital stock of Orange Savings Bank, SSB, a wholly-owned subsidiary of OSB Financial Services, Inc. The results of operations of Orange Savings Bank, SSB, subsequent to the acquisition date, are included in the consolidated earnings of the Company. See Note 10 for more information.

On October 26, 2011, the Company's Board of Directors authorized the repurchase of up to 750,000 common shares through September 30, 2014. The stock buyback plan authorizes management to repurchase the stock at such time as repurchases are considered beneficial to shareholders. Any repurchase of stock will be made through the open market, block trades or in privately negotiated transactions in accordance with applicable laws and regulations. Under the repurchase plan, there is no minimum number of shares that the Company is required to repurchase. Through March 31, 2014, no shares have been repurchased under this authorization.

Goodwill and other intangible assets are evaluated annually for impairment as of the end of the second quarter. No such impairment has been noted in connection with the current or any prior evaluations.

Table of Contents**Note 2 - Stock Split**

On April 22, 2014, the Company's Board of Directors declared a two-for-one stock split in the form of a 100% stock dividend effective for shareholders of record on May 15, 2014 to be distributed on June 2, 2014. All per share amounts in this report have been restated to reflect this stock split. An amount equal to the par value of the additional common shares to be issued pursuant to the stock split was reflected as a transfer from retained earnings to common stock on the consolidated financial statements as of and for the three months ended March 31, 2014.

Note 3 - Earnings Per Share

Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted average number of shares outstanding during the periods presented. In computing diluted earnings per common share for the three months ended March 31, 2014 and 2013, the Company assumes that all dilutive outstanding options to purchase common stock have been exercised at the beginning of the period (or the time of issuance, if later). The dilutive effect of the outstanding options is reflected by application of the treasury stock method, whereby the proceeds from the exercised options are assumed to be used to purchase common stock at the average market price during the respective periods. The weighted average common shares outstanding used in computing basic earnings per common share for the three months ended March 31, 2014 and 2013 were 64,010,076 and 31,507,975 shares, respectively. The weighted average common shares outstanding used in computing fully diluted earnings per common share for the three months ended March 31, 2014 and 2013 were 64,212,018 and 31,601,364 shares, respectively.

Note 4 - Interest-bearing Time Deposits in Banks and Securities

Interest-bearing time deposits in banks totaled \$30,026,000 and \$31,917,000 at March 31, 2014 and December 31, 2013, respectively, and have original maturities generally ranging from one to two years. Of these amounts, \$27,351,000 and \$29,002,000 are time deposits with balances greater than \$100,000 at March 31, 2014 and December 31, 2013, respectively.

Management classifies debt and equity securities as held-to-maturity, available-for-sale, or trading based on its intent. Debt securities that management has the positive intent and ability to hold to maturity are classified as held-to-maturity and recorded at cost, adjusted for amortization of premiums and accretion of discounts, which are recognized as adjustments to interest income using the interest method. Securities not classified as held-to-maturity or trading are classified as available-for-sale and recorded at estimated fair value, with all unrealized gains and unrealized losses judged to be temporary, net of deferred income taxes, excluded from earnings and reported in the consolidated statements of comprehensive earnings. Available-for-sale securities that have unrealized losses that are judged other-than-temporary are included in gain (loss) on sale of securities and a new cost basis is established. Securities classified as trading are recorded at estimated fair value with unrealized gains and losses included in earnings.

The Company records its available-for-sale and trading securities portfolio at fair value. Fair values of these securities are determined based on methodologies in accordance with current authoritative accounting guidance. Fair values are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates, credit ratings and yield curves. Fair values for investment securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on the quoted prices of similar instruments or an estimate of fair value by using a range of fair value estimates in the market place as a result of the illiquid market specific to the type of security.

Table of Contents

When the fair value of a security is below its amortized cost, and depending on the length of time the condition exists and the extent the fair value is below amortized cost, additional analysis is performed to determine whether an other-than-temporary impairment condition exists. Available-for-sale and held-to-maturity securities are analyzed quarterly for possible other-than-temporary impairment. The analysis considers (i) whether we have the intent to sell our securities prior to recovery and/or maturity, (ii) whether it is more likely than not that we will have to sell our securities prior to recovery and/or maturity, (iii) the length of time and extent to which the fair value has been less than amortized cost, and (iv) the financial condition of the issuer. Often, the information available to conduct these assessments is limited and rapidly changing, making estimates of fair value subject to judgment. If actual information or conditions are different than estimated, the extent of the impairment of the security may be different than previously estimated, which could have a material effect on the Company's results of operations and financial condition.

The Company's investment portfolio consists of obligations of U. S. government sponsored-enterprises and agencies, mortgage pass-through securities, corporate bonds and general obligation or revenue based municipal bonds. Pricing for such securities is generally readily available and transparent in the market. The Company utilizes independent third party pricing services to value its investment securities, which the Company reviews as well as the underlying pricing methodologies for reasonableness and to ensure such prices are aligned with pricing matrices. The Company validates quarterly, on a sample basis, prices supplied by the independent pricing services by comparison to prices obtained from other third party sources.

Table of Contents

A summary of the Company's available-for-sale securities follows (in thousands):

	March 31, 2014			
	Amortized Cost Basis	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value

Commercial mortgage-backed securities	112,323		(3,617)	108,706
Total securities available-for-sale	\$ 2,035,126	\$ 45,455	\$ (22,858)	\$ 2,057,723

Disclosures related to the Company's held-to-maturity securities, which totaled \$582,000 and \$684,000 at March 31, 2014 and December 31, 2013, respectively, have not been presented due to insignificance.

Table of Contents

The Company invests in mortgage-backed securities that have expected maturities that differ from their contractual maturities. These differences arise because borrowers may have the right to call or prepay these obligations with or without a prepayment penalty. These securities include collateralized mortgage obligations (CMOs) and other asset backed securities. The expected maturities of these securities at March 31, 2014 were computed by using scheduled amortization of balances and historical prepayment rates. At March 31, 2014 and December 31, 2013, the Company did not hold any CMOs that entail higher rates than standard mortgage-backed securities.

The amortized cost and estimated fair value of available-for-sale securities at March 31, 2014, by contractual or expected maturity, as applicable, are shown below (in thousands):

	Amortized Cost Basis	Estimated Fair Value
Due within one year	\$ 68,456	\$ 69,139
Due after one year through five years	600,245	623,806
Due after five years through ten years	569,700	582,169
Due after ten years	11,752	12,478
Mortgage-backed securities	868,702	875,425
Total	\$ 2,118,855	\$ 2,163,017

The following tables disclose, as of March 31, 2014 and December 31, 2013, the Company's investment securities that have been in a continuous unrealized-loss position for less than 12 months and for 12 months or longer (in thousands):

	Less than 12 Months Unrealized		12 Months or Longer Unrealized		Total Unrealized	
	Fair Value	Loss	Fair Value	Loss	Fair Value	Loss

Table of Contents

The number of investments in an unrealized loss position totaled 278 at March 31, 2014. We do not believe these unrealized losses are other-than-temporary as (i) we do not have the intent to sell our securities prior to recovery and/or maturity and (ii) it is more likely than not that we will not have to sell our securities prior to recovery and/or maturity. In making the determination, we also consider the length of time and extent to which fair value has been less than cost and the financial condition of the issuer. The unrealized losses noted are interest rate related due to the level of interest rates at March 31, 2014 compared to the time of purchase. We have reviewed the ratings of the issuers and have not identified any issues related to the ultimate repayment of principal as a result of credit concerns on these securities. Our mortgage related securities are backed by GNMA, FNMA and FHLMC or are collateralized by securities backed by these agencies.

Securities, carried at \$1,329,068,000 at March 31, 2014, were pledged as collateral for public or trust fund deposits, repurchase agreements and for other purposes required or permitted by law.

During the quarters ended March 31, 2014 and 2013, sales of investment securities that were classified as available-for-sale totaled \$904,000 and \$5,227,000, respectively. Gross realized gains from security sales and calls during the first quarter of 2014 and 2013 totaled \$1,000 and \$223,000, respectively. Gross realized losses from security sales and calls during the first quarter of 2014 and 2013 totaled \$5,000 and \$1,000, respectively. The specific identification method was used to determine cost in order to compute the realized gains and losses.

Note 5 - Loans and Allowance for Loan Losses

Loans held for investment are stated at the amount of unpaid principal, reduced by unearned income and an allowance for loan losses. Interest on loans is calculated by using the simple interest method on daily balances of the principal amounts outstanding. The Company defers and amortizes net loan origination fees and costs as an adjustment to yield. The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes the collectability of the principal is unlikely.

The Company has lending policies and procedures in place that are designed to maximize loan income with an acceptable level of risk. Management reviews and approves these policies and procedures on an annual basis and makes changes as appropriate. Management receives and reviews monthly reports related to loan originations, quality, concentrations, delinquencies, nonperforming and potential problem loans. Diversification in the loan portfolio is a means of managing risk associated with fluctuations in economic conditions, both by type of loan and geographic location.

Commercial loans are underwritten after evaluating and understanding the borrower's ability to operate profitably and effectively. Underwriting standards are designed to determine whether the borrower possesses sound business ethics and practices and to evaluate current and projected cash flows to determine the ability of the borrower to repay their obligations as agreed. Commercial loans are primarily made based on the identified cash flows of the borrower and, secondarily, on the underlying collateral provided by the borrower. Most commercial loans are secured by the assets being financed or other business assets, such as accounts receivable or inventory, and include personal guarantees.

Table of Contents

Agricultural loans are subject to underwriting standards and processes similar to commercial loans. These agricultural loans are based primarily on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. Most agricultural loans are secured by the agriculture related assets being financed, such as farm land, cattle or equipment, and include personal guarantees.

Real estate loans are also subject to underwriting standards and processes similar to commercial and agricultural loans. These loans are underwritten primarily based on projected cash flows and, secondarily, as loans secured by real estate. The repayment of real estate loans is generally largely dependent on the successful operation of the property securing the loans or the business conducted on the property securing the loan. Real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. The properties securing the Company's real estate portfolio are generally diverse in terms of type and geographic location within Texas. This diversity helps reduce the exposure to adverse economic events that affect any single market or industry. Generally, real estate loans are owner occupied which further reduces the Company's risk.

Consumer loan underwriting utilizes methodical credit standards and analysis to supplement the Company's underwriting policies and procedures. The Company's loan policy addresses types of consumer loans that may be originated and the collateral, if secured, which must be perfected. The relatively smaller individual dollar amounts of consumer loans that are spread over numerous individual borrowers also minimize the Company's risk.

The allowance for loan losses is an amount management believes is appropriate to absorb probable losses that have been incurred on existing loans as of the balance sheet date based upon management's review and evaluation of the loan portfolio. The allowance for loan losses is comprised of three elements: (i) specific reserves determined based on probable losses on specific classified loans; (ii) a general reserve that considers historical loss rates; and (iii) qualitative reserves based upon general economic conditions and other qualitative risk factors both internal and external to the Company. The allowance for loan losses is increased by charges to income and decreased by charge-offs (net of recoveries). Management's periodic evaluation of the appropriateness of the allowance is based on general economic conditions, the financial condition of borrowers, the value and liquidity of collateral, delinquency, prior loan loss experience, and the results of periodic reviews of the portfolio. For purposes of determining our general reserve, the loan portfolio, less cash secured loans, government guaranteed loans and classified loans, is multiplied by the Company's historical loss rate. Specific allocations are increased in accordance with deterioration in credit quality and a corresponding increase in risk of loss on a particular loan. In addition, we adjust our allowance for qualitative factors such as current local economic conditions and trends, including, without limitations, unemployment, changes in lending staff, policies and procedures, changes in credit concentrations, changes in the trends and severity of problem loans and changes in trends in volume and terms of loans. This qualitative reserve serves to estimate for additional areas of incurred losses in our portfolio that are not reflected in our historic loss factors.

Although we believe we use the best information available to make loan loss allowance determinations, future adjustments could be necessary if circumstances or economic conditions differ substantially from the assumptions used in making our initial determinations. A further downturn in the economy and employment could result in increased levels of non-performing assets and charge-offs, increased loan provisions and reductions in income. Additionally, bank regulatory agencies periodically review our allowance for loan losses and methodology and could require additions to the loan loss allowance based on their judgment of information available to them at the time of their examination.

Table of Contents

Accrual of interest is discontinued on a loan and payments are applied to principal when management believes, after considering economic and business conditions and collection efforts, the borrower's financial condition is such that collection of interest is doubtful. Except consumer loans, generally all loans past due greater than 90 days, based on contractual terms, are placed on non-accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. Consumer loans are generally charged-off when a loan becomes past due 90 days. For other loans in the portfolio, facts and circumstances are evaluated in making charge-off decisions.

Loans are considered impaired when, based on current information and events, management determines that it is probable we will be unable to collect all amounts due in accordance with the loan agreement, including scheduled principal and interest payments. If a loan is impaired, a specific valuation allowance is allocated, if necessary. Interest payments on impaired loans are typically applied to principal unless collectability of the principal amount is reasonably assured, in which case interest is recognized on a cash basis. Impaired loans, or portions thereof, are charged off when deemed uncollectable.

The Company's policy requires measurement of the allowance for an impaired, collateral dependent loan based on the fair value of the collateral. Other loan impairments are measured based on the present value of expected future cash flows or the loan's observable market price. At March 31, 2014 and 2013, and December 31, 2013, all significant impaired loans have been determined to be collateral dependent and the allowance for loss has been measured utilizing the estimated fair value of the collateral.

From time to time, the Company modifies its loan agreement with a borrower. A modified loan is considered a troubled debt restructuring when two conditions are met: (i) the borrower is experiencing financial difficulty and (ii) concessions are made by the Company that would not otherwise be considered for a borrower with similar credit risk characteristics. Modifications to loan terms may include a lower interest rate, a reduction of principal, or a longer term to maturity. For all impaired loans, including the Company's troubled debt restructurings, the Company performs a periodic, well-documented credit evaluation of the borrower's financial condition and prospects for repayment to assess the likelihood that all principal and interest payments required under the terms of the agreement will be collected in full. When doubt exists about the ultimate collectability of principal and interest, the troubled debt restructuring remains on non-accrual status and payments received are applied to reduce principal to the extent necessary to eliminate such doubt. This determination of accrual status is judgmental and is based on facts and circumstances related to each troubled debt restructuring. To date, these troubled debt restructurings have been such that, after considering economic and business conditions and collection efforts, the collection of interest is doubtful and therefore have been placed on non-accrual. Each of these loans is individually evaluated for impairment and a specific reserve is recorded based on probable losses, taking into consideration the related collateral and modified loan terms and cash flow. As of March 31, 2014 and 2013, and December 31, 2013, all of the Company's troubled debt restructured loans are included in the non-accrual totals.

The Company originates certain mortgage loans for sale in the secondary market. Accordingly, these loans are classified as held for sale and are carried at the lower of cost or fair value on an aggregate basis. The mortgage loan sales contracts contain indemnification clauses should the loans default, generally in the first three to six months, or if documentation is determined not to be in compliance with regulations. The Company's historic losses as a result of these indemnities have been insignificant.

Loans acquired, including loans acquired in a business combination, are initially recorded at fair value with no valuation allowance. Acquired loans are segregated between those considered to be credit impaired and those deemed performing. To make this determination, management considers such factors as past due status, non-accrual status and credit risk ratings. The fair value of acquired performing loans is determined by discounting expected cash flows, both

principal and interest, at prevailing market interest rates. The difference between the fair value and principal balances due at acquisition date, the fair value discount, is accreted into income over the estimated life of each loan.

Table of Contents

Purchased credit impaired loans are those loans that showed evidence of deterioration of credit quality since origination and for which it is probable, at acquisition, that the Company will be unable to collect all amounts contractually owed. Their fair value was initially based on the estimate of cash flows, both principal and interest, expected to be collected or estimated collateral values if cash flows are not estimable, discounted at prevailing market rates of interest. The difference between the cash flows expected at acquisition and the investment in the loan, is recognized as interest income on a level-yield method over the life of the loan, unless management was unable to reasonably forecast cash flows in which case the loans were placed on non-accrual. Contractually required payments for interest and principal that exceed the cash flows expected at acquisition are not recognized as a yield adjustment. Increases in expected cash flows subsequent to the initial investment are recognized prospectively through adjustment of the yield on the loan over its remaining life. Decreases in expected cash flows are recognized as impairment. Valuation allowances on these impaired loans reflect only losses incurred after the acquisition. The carrying amount of purchased credit impaired loans at March 31, 2014 and December 31, 2013 was \$2,605,000 and \$2,707,000, respectively, compared to a contractual balance of \$3,844,000 and \$3,970,000, respectively. There were no such amounts at March 31, 2013. Other purchased credit impaired loan disclosures were omitted due to immateriality.

Loans held-for-investment by class of financing receivables are as follows (in thousands):

	March 31,		December 31,
	2014	2013	2013
Commercial	\$ 607,281	\$ 513,422	\$ 596,730

Restructured loans**			
Total	\$ 24,740	\$ 22,533	\$ 28,059

*

Edgar Filing: FIRST FINANCIAL BANKSHARES INC - Form 10-Q

Includes \$2,605,000 and \$2,707,000 of purchased credit impaired loans as of March 31, 2014 and December 31, 2013, respectively. There were no purchased credit impaired loan balances at March 31, 2013.

- ** Restructured loans whose interest collection, after considering economic and business conditions and collection efforts, is doubtful are included in non-accrual loans. All of our restructured loans are included in non-accrual loans.

Table of Contents

The Company's recorded investment in impaired loans and the related valuation allowance are as follows (in thousands):

March 31, 2014		March 31, 2013		December 31, 2013	
Recorded Investment	Valuation Allowance	Recorded Investment	Valuation Allowance	Recorded Investment	Valuation Allowance
\$ 24,710	\$ 5,283	\$ 22,509	\$ 5,793	\$ 27,926	\$ 5,338

The average recorded investment in impaired loans for the three months ended March 31, 2014 and 2013, and the year ended December 31, 2013 was approximately \$26,770,000, \$23,163,000 and \$31,293,000, respectively. The Company had \$27,553,000, \$25,718,000 and \$31,128,000 in non-accrual, past due 90 days still accruing and restructured loans and foreclosed assets at March 31, 2014 and 2013, and December 31, 2013, respectively. Non-accrual loans totaled \$24,710,000, \$22,509,000 and \$27,926,000 at March 31, 2014 and 2013, and December 31, 2013, respectively, and consisted of the following amounts by class of financing receivables (in thousands):

	March 31, 2014	March 31, 2013	December 31, 2013
Commercial	\$ 2,809	\$ 1,133	\$ 4,281

* Includes \$2,707,000 of purchased credit impaired loans.

The Company recognized interest income on impaired loans prior to being recognized as impaired of approximately \$685,000 during the year ended December 31, 2013. Such amounts for the three-month periods ended March 31, 2014 and 2013 were not significant.

From a credit risk standpoint, the Company rates its loans in one of four categories: (i) pass, (ii) special mention, (iii) substandard or (iv) doubtful. Loans rated as loss are charged-off.

The ratings of loans reflect a judgment about the risks of default and loss associated with the loan. The Company reviews the ratings on our credits as part of our on-going monitoring of the credit quality of our loan portfolio. Ratings are adjusted to reflect the degree of risk and loss that are felt to be inherent in each credit as of each reporting period. Our methodology is structured so that specific allocations are increased in accordance with deterioration in credit quality (and a corresponding increase in risk and loss) or decreased in accordance with improvement in credit quality (and a corresponding decrease in risk and loss).

Credits rated special mention show clear signs of financial weakness or deterioration in credit worthiness, however, such concerns are not so pronounced that the Company generally expects to experience significant loss within the short-term. Such credits typically maintain the ability to perform within standard credit terms and credit exposure is not as prominent as credits rated more harshly.

Credits rated substandard are those in which the normal repayment of principal and interest may be, or has been, jeopardized by reason of adverse trends or developments of a financial, managerial, economic or political nature, or important weaknesses exist in collateral. A protracted workout on these credits is a distinct possibility. Prompt corrective action is therefore required to strengthen the Company's position, and/or to reduce exposure and to assure that adequate remedial measures are taken by the borrower. Credit exposure becomes more likely in such credits and a serious evaluation of the secondary support to the credit is performed.

Credits rated doubtful are those in which full collection of principal appears highly questionable, and which some degree of loss is anticipated, even though the ultimate amount of loss may not yet be certain and/or other factors exist which could affect collection of debt. Based upon available information, positive action by the Company is required to avert or minimize loss. Credits rated doubtful are generally also placed on non-accrual.

Edgar Filing: FIRST FINANCIAL BANKSHARES INC - Form 10-Q

The following summarizes the Company's internal ratings of its loans held-for-investment by class of financing receivables and portfolio segments, which are the same, at March 31, 2014 and December 31, 2013 (in thousands):

* The Company monitors commercial, agricultural and real estate loans after such loans are 15 days past due.

Consumer loans are monitored after such loans are 30 days past due.

The allowance for loan losses as of March 31, 2014 and 2013, and December 31, 2013, is presented below.

Management has evaluated the appropriateness of the allowance for loan losses by estimating the probable losses in various categories of the loan portfolio, which are identified below (in thousands):

	March 31,		December 31,
	2014	2013	2013
Allowance for loan losses provided for:			
Loans specifically evaluated as impaired	\$ 5,283	\$ 5,793	\$ 5,338
Remaining portfolio	29,410	28,879	28,562
Total allowance for loan losses	\$ 34,693	\$ 34,672	\$ 33,900

The following table details the allowance for loan losses at March 31, 2014 and December 31, 2013 by portfolio segment (in thousands). There were no allowances for purchased credit impaired loans at March 31, 2014 or December 31, 2013. Allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories.

March 31, 2014	Commercial	Agricultural	Real Estate	Consumer	Total

Real Estate	1	76	76	4	796	796
Consumer	3	11	11			
Total	8	\$ 184	\$ 184	7	\$ 940	\$ 940

The balances below provide information as to how the loans were modified as troubled debt restructured loans during the three months ended March 31, 2014 and 2013 (in thousands):

	Three Months Ended March 31, 2014			Three Months Ended March 31, 2013		
	Adjusted Interest Rate	Extended Maturity	Rate and Maturity	Adjusted Interest Rate	Extended Maturity	Combined Rate and Maturity
Commercial	\$	\$ 97	\$	\$	\$ 120	\$
Agricultural					24	
Real Estate		76		272	350	174
Consumer		8	3			
Total	\$	\$ 181	\$ 3	\$ 272	\$ 494	\$ 174

During the three months ended March 31, 2013, eleven loans were modified as a troubled debt restructured loans within the previous 12 months and for which there was a payment default. There were no such defaults in the three months ended March 31, 2014. A default for purposes of this disclosure is a troubled debt restructured loan in which the borrower is 90 days past due or results in the foreclosure and repossession of the applicable collateral. The loans are as follows (dollars in thousands):

	Three Months Ended March 31, 2013	
	Number	Balance
Commercial	5	\$ 217
Agriculture		

Edgar Filing: FIRST FINANCIAL BANKSHARES INC - Form 10-Q

Real Estate	5	931
Consumer	1	19
Total	11	\$ 1,167

As of March 31, 2014, the Company has no commitments to lend additional funds to loan customers whose terms have been modified in troubled debt restructurings.

Our subsidiary bank has established a line of credit with the Federal Home Loan Bank of Dallas to provide liquidity and meet pledging requirements for those customers eligible to have securities pledged to secure certain uninsured deposits. At March 31, 2014, \$1,565,974,000 in loans held by our bank subsidiary were subject to blanket liens as security for this line of credit. At March 31, 2014, \$76,092,000 in advances were outstanding and \$40,100,000 in letters of credit were outstanding under this line of credit. The letters of credit were pledged as collateral for public funds held by our bank subsidiary.

Table of Contents

Note 6 - Income Taxes

Income tax expense was \$7,104,000 for the first quarter of 2014 as compared to \$6,182,000 for the same period in 2013. The Company's effective tax rates on pretax income were 24.13% and 24.97% for the first quarter of 2014 and 2013, respectively. The effective tax rates differ from the statutory federal tax rate of 35% primarily due to tax exempt interest income earned on certain investment securities and loans, the deductibility of dividends paid to our employee stock ownership plan and the settlement of a bank owned life insurance contract.

Note 7 - Stock Based Compensation

The Company grants incentive stock options for a fixed number of shares with an exercise price equal to the fair value of the shares at the date of grant to employees. At March 31, 2014, no options have been granted in 2014. On October 22, 2013, the Company granted 395,000 shares in incentive stock options at an exercise price of \$30.85 to its employees. The Company recorded stock option expense totaling approximately \$146,000 and \$88,000 for the three-month periods ended March 31, 2014 and 2013, respectively. The additional disclosure requirements under authoritative accounting guidance have been omitted due to immateriality.

Note 8 - Pension Plan

The Company's defined benefit pension plan was frozen effective January 1, 2004, whereby no new participants will be added to the plan and no additional years of service will accrue to participants, unless the pension plan is reinstated at a future date. The pension plan covered substantially all of the Company's employees at the time. The benefits for each employee were based on years of service and a percentage of the employee's qualifying compensation during the final years of employment. The Company's funding policy was and is to contribute annually the amount necessary to satisfy the Internal Revenue Service's funding standards. Contributions to the pension plan, prior to freezing the plan, were intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future. As a result of the Pension Protection Act of 2006 (the Protection Act), the Company will be required to contribute amounts in future years to fund any shortfalls. The Company has evaluated the provisions of the Protection Act as well as the Internal Revenue Service's funding standards to develop a plan for funding in future years. The Company made a contribution totaling \$1,000,000 in 2013 and has to date made no contributions in 2014.

Net periodic benefit costs totaling \$130,000 and \$208,000 were recorded, respectively, for the three months ended March 31, 2014 and 2013.

Note 9 - Fair Value Disclosures

The authoritative accounting guidance for fair value measurements defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact, and (iv) willing to transact.

The authoritative accounting guidance requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows

Table of Contents

or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, the authoritative guidance establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Securities classified as available-for-sale and trading are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include market spreads, cash flows, the United States Treasury yield curve, live trading levels, trade execution data, dealer quotes, market consensus prepayments speeds, credit information and the security's terms and conditions, among other items. Securities are considered to be measured with Level 1 inputs at the time of purchase and for 30 days following. After 30 days, the majority of securities are transferred to Level 2 as they are considered to be measured with Level 2 inputs, with the exception of U. S. Treasury securities and any other security for which there remain Level 1 inputs. Transfers are recognized on the actual date of transfer.

There were no transfers between Level 2 and Level 3 during the three months ended March 31, 2014 or 2013.

Table of Contents

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2014, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (dollars in thousands):

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Available-for-sale investment securities:				
Obligations of U. S. government sponsored-enterprises and agencies	\$ 15,167	\$ 118,596	\$	\$ 133,763
Obligations of states and political subdivisions	35,579	1,016,812		1,052,391
Corporate bonds		96,422		96,422
Residential mortgage-backed securities	38,253	704,079		742,332
Commercial mortgage-backed securities		133,093		133,093
Other securities	5,016			5,016
Total	\$ 94,015	\$ 2,069,002	\$	\$ 2,163,017

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis, that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets and financial liabilities measured at fair value on a non-recurring basis include the following at March 31, 2014:

Impaired Loans Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 2 inputs based on observable market data, or Level 3 inputs based on the discounting of the collateral. At March 31, 2014, impaired loans with a carrying value of \$24,710,000 were reduced by specific valuation reserves totaling \$5,283,000 resulting in a net fair value of \$19,427,000.

Loans Held for Sale Loans held for sale are reported at the lower of cost or fair value. In determining whether the fair value of loans held for sale is less than cost when quoted market prices are not available, the Company considers investor commitments/contracts. These loans are considered Level 2 of the fair value hierarchy. At March 31, 2014, the Company's mortgage loans held for sale were recorded at cost as fair value exceeded cost.

Certain non-financial assets and non-financial liabilities measured at fair value on a non-recurring basis include other real estate owned, goodwill and other intangible assets and other non-financial long-lived assets. Non-financial assets measured at fair value on a non-recurring basis during the three months ended March 31, 2014 and 2013 include other real estate owned which, subsequent to their initial transfer to other real estate owned from loans, were re-measured at fair value through a write-down included in gain (loss) on sale of foreclosed assets. During the reported periods, all fair value measurements for foreclosed assets utilized Level 2 inputs based on observable market data, generally third-party appraisals, or Level 3 inputs based on customized discounting criteria. These appraisals are evaluated individually and discounted as necessary due to the age of the appraisal, lack of comparable sales, expected holding periods of property or special use type of the property. Such discounts vary by appraisal based on the above factors but generally range from 5% to 25% of the appraised value. Reevaluation of other real estate owned is performed at least annually as required by regulatory guidelines or more often if particular circumstances arise. The following table presents other real estate owned that were re-measured subsequent to their initial transfer to other real estate owned

(dollars in thousands):

	Three Months Ended March 31,	
	2014	2013
Carrying value of other real estate owned prior to re-measurement	\$	\$ 1,827
Write-downs included in gain (loss) on sale of other real estate owned		(304)
Fair value	\$	\$ 1,523

Table of Contents

At March 31, 2014 and 2013, and December 31, 2013, other real estate owned totaled \$2,682,000, \$3,052,000 and \$2,903,000, respectively.

The Company is required under current authoritative accounting guidance to disclose the estimated fair value of their financial instrument assets and liabilities including those subject to the requirements discussed above. For the Company, as for most financial institutions, substantially all of its assets and liabilities are considered financial instruments, as defined. Many of the Company's financial instruments, however, lack an available trading market as characterized by a willing buyer and willing seller engaging in an exchange transaction.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

In addition, reasonable comparability between financial institutions may not be likely due to the wide range of permitted valuation techniques and numerous estimates that must be made given the absence of active secondary markets for many of the financial instruments. This lack of uniform valuation methodologies also introduces a greater degree of subjectivity to these estimated fair values.

Cash and due from banks, federal funds sold, interest-bearing deposits and time deposits in banks and accrued interest receivable and payable are liquid in nature and considered Level 1 or 2 of the fair value hierarchy.

Financial instruments with stated maturities have been valued using a present value discounted cash flow with a discount rate approximating current market for similar assets and liabilities and are considered Levels 2 and 3 of the fair value hierarchy. Financial instrument liabilities with no stated maturities have an estimated fair value equal to both the amount payable on demand and the carrying value and are considered Level 1 of the fair value hierarchy.

The carrying value and the estimated fair value of the Company's contractual off-balance-sheet unfunded lines of credit, loan commitments and letters of credit, which are generally priced at market at the time of funding, are not material.

Table of Contents

The estimated fair values and carrying values of all financial instruments under current authoritative guidance at March 31, 2014 and December 31, 2013, were as follows (in thousands):

	March 31, 2014		December 31, 2013		Fair Value Hierarchy
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value	
Cash and due from banks	\$ 160,469	\$ 160,469	\$ 183,084	\$ 183,084	Level 1

Deposits with stated maturities	681,158	683,245	686,626	688,876	Level 2
Deposits with no stated maturities	3,553,123	3,553,123	3,448,448	3,448,448	Level 1
Short term borrowings	383,220	383,220	463,888	463,888	Level 2
Accrued interest payable	280	280	299	299	Level 2

Note 10 - Acquisition

On February 9, 2013, we entered into an agreement and plan of merger to acquire Orange Savings Bank, SSB. On May 31, 2013, the transaction was completed. Pursuant to the agreement, we paid \$39,200,000 in cash and issued 420,000 shares of the Company's common stock in exchange for all of the outstanding shares of Orange Savings Bank, SSB. At closing, Orange Savings Bank, SSB, was merged into First Financial Bank, N.A., Abilene, Texas, a wholly owned subsidiary of the Company.

The primary purpose of the acquisition was to expand the Company's market share along Interstate Highway 10 in Southeast Texas. Factors that contributed to a purchase price resulting in goodwill include Orange Savings Bank, SSB's historic record of earnings, strong local economic environment and opportunity for growth. The results of operations from this acquisition are included in the consolidated earnings of the Company commencing June 1, 2013.

Table of Contents

The assets acquired and liabilities assumed were recorded on the consolidated balance sheet at estimated fair value on the acquisition date. The acquisition was not considered to be a significant business combination. The following table presents the amounts recorded on the consolidated balance sheet on the acquisition date (in thousands):

Fair value of consideration paid:	
Cash	\$ 39,200
Common stock issued (420,000 shares)	23,100
Total fair value of consideration paid	62,300
Fair value of identifiable assets acquired:	
Cash and cash equivalents	13,494
Securities available for sale	107,735
Loans	293,288
Identifiable intangible assets	2,300
Other assets	12,569
Total identifiable assets acquired	429,386
Fair value of liabilities assumed:	
Deposits	385,950
Other liabilities	4,154
Total liabilities assumed	390,104
Fair value of net identifiable assets acquired	39,282
Goodwill resulting from acquisition	\$ 23,018

Goodwill recorded in the acquisition of Orange Savings Bank, SSB was accounted for in accordance with the authoritative business combination guidance. Accordingly, goodwill will not be amortized, but will be tested for impairment annually. The goodwill recorded is expected to be deductible for federal income tax purposes.

The fair value of total loans acquired was \$293,288,000 at acquisition compared to contractual amounts of \$299,252,000. The fair value of purchased credit impaired loans at acquisition was \$4,475,000 compared to contractual amounts of \$5,878,000. Additional purchased credit impaired loan disclosures have been omitted due to immateriality. All other acquired loans were considered performing loans.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Forward-Looking Statements

This Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. When used in this Form 10-Q, words such as anticipate, believe, estimate, expect, intend, predict, project, and similar expressions, as they relate to us or our management, identify forward-looking statements. These forward-looking statements are based on information currently available to our management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including, but not limited to, those listed in Item 1A- Risk Factors in our Annual Report on Form 10-K and the following:

general economic conditions, including our local, state and national real estate markets and employment trends;

volatility and disruption in national and international financial markets;

government intervention in the U.S. financial system including the effects of recent legislative, tax, accounting and regulatory actions and reforms, including the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), the Jumpstart Our Business Startups Act, the Consumer Financial Protection Bureau and the capital ratios of Basel III as adopted by the federal banking authorities;

political instability;

the ability of the Federal government to deal with the slowdown of the national economy and the fiscal cliff;

competition from other financial institutions and financial holding companies;

the effects of and changes in trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System (the Federal Reserve);

changes in the demand for loans;

fluctuations in the value of collateral securing our loan portfolio and in the level of the allowance for loan losses;

the accuracy of our estimates of future loan losses;

the accuracy of our estimates and assumptions regarding the performance of our securities portfolio;

soundness of other financial institutions with which we have transactions;

inflation, interest rate, market and monetary fluctuations;

changes in consumer spending, borrowing and savings habits;

our ability to attract deposits;

changes in our liquidity position;

changes in the reliability of our vendors, internal control system or information systems;

our ability to attract and retain qualified employees;

acquisitions and integration of acquired businesses;

the possible impairment of goodwill associated with our acquisitions;

consequences of continued bank mergers and acquisitions in our market area, resulting in fewer but much larger and stronger competitors;

expansion of operations, including branch openings, new product offerings and expansion into new markets;

changes in compensation and benefit plans; and

acts of God or of war or terrorism.

Table of Contents

Such forward-looking statements reflect the current views of our management with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by this paragraph. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Introduction

As a financial holding company, we generate most of our revenue from interest on loans and investments, trust fees, and service charges. Our primary source of funding for our loans and investments are deposits held by our subsidiary bank. Our largest expenses are interest on these deposits, salaries and related employee benefits. We usually measure our performance by calculating our return on average assets, return on average equity, our regulatory leverage and risk based capital ratios and our efficiency ratio, which is calculated by dividing noninterest expense by the sum of net interest income on a tax equivalent basis and noninterest income.

The following discussion of operations and financial condition should be read in conjunction with the financial statements and accompanying footnotes included in Item 1 of this Form 10-Q as well as those included in the Company's 2013 Annual Report on Form 10-K.

Critical Accounting Policies

We prepare consolidated financial statements based on generally accepted accounting principles and customary practices in the banking industry. These policies, in certain areas, require us to make significant estimates and assumptions.

We deem a policy critical if (1) the accounting estimate required us to make assumptions about matters that are highly uncertain at the time we make the accounting estimate; and (2) different estimates that reasonably could have been used in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on the financial statements.

We deem our most critical accounting policies to be (1) our allowance for loan losses and our provision for loan losses and (2) our valuation of securities. We have other significant accounting policies and continue to evaluate the materiality of their impact on our consolidated financial statements, but we believe these other policies either do not generally require us to make estimates and judgments that are difficult or subjective, or it is less likely they would have a material impact on our reported results for a given period. A discussion of (1) our allowance for loan losses and our provision for loan losses and (2) our valuation of securities is included in note 5 and note 4, respectively, to our notes to consolidated financial statements (unaudited) which begins on page 9.

Stock Split

On April 22, 2014, the Company's Board of Directors declared a two-for-one stock split in the form of a 100% stock dividend effective for shareholders of record on May 15, 2014 to be distributed on June 2, 2014. All per share amounts in this report have been restated to reflect this stock split. An amount equal to the par value of the additional common shares to be issued pursuant to the stock split was reflected as a transfer from retained earnings to common stock on the consolidated financial statements as of and for the three months ended March 31, 2014.

Table of Contents

Acquisition of Orange Savings Bank, SSB

On February 9, 2013, we entered into an agreement and plan of merger to acquire Orange Savings Bank, SSB. On May 31, 2013, the transaction was completed. Pursuant to the agreement, we paid \$39.20 million in cash and issued 420,000 shares of the Company's common stock in exchange for all of the outstanding shares of Orange Savings Bank, SSB.

At closing, Orange Savings Bank, SSB, was merged into First Financial Bank, N.A., Abilene, Texas, a wholly owned subsidiary of the Company. The total purchase price exceeded the estimated fair value of assets acquired by approximately \$23.02 million and was recorded by the Company as goodwill.

Results of Operations

Performance Summary. Net earnings for the first quarter of 2014 were \$22.34 million compared to \$18.58 million for the same period in 2013, or a 20.23% increase.

Basic earnings per share for the first quarter of 2014 were \$0.35 compared to \$0.29 for the same quarter last year. The return on average assets was 1.74% for the first quarter of 2014, as compared to 1.71% for the same quarter of 2013. The return on average equity was 15.02% for the first quarter of 2014 as compared to 13.41% a year ago.

Net Interest Income. Net interest income is the difference between interest income on earning assets and interest expense on liabilities incurred to fund those assets. Our earning assets consist primarily of loans and investment securities. Our liabilities to fund those assets consist primarily of noninterest-bearing and interest-bearing deposits.

Tax-equivalent net interest income was \$51.80 million for the first quarter of 2014, as compared to \$42.47 million for the same period last year. The increase in 2014 compared to 2013 was largely attributable to the increase in volume of interest earning assets. Average earning assets increased \$745.76 million for the first quarter of 2014 over the same period in 2013. Average tax exempt securities and average loans increased \$168.00 million and \$578.34 million, respectively, for the first quarter of 2014 over the first quarter of 2013. Average interest bearing liabilities increased \$651.89 million for the first quarter of 2014, as compared to the same period in 2013. The yield on earning assets increased 13 basis points during the first quarter of 2014, whereas the rate paid on interest-bearing liabilities decreased 1 basis point in the first quarter of 2014 primarily due to the effects of lower interest rates.

Table of Contents

Table 1 allocates the change in tax-equivalent net interest income between the amount of change attributable to volume and to rate.

Table 1 - Changes in Interest Income and Interest Expense (in thousands):

	Three Months Ended March 31, 2014 Compared to Three Months Ended March 31, 2013		
	Change Attributable to Volume	Rate	Total Change
Short-term investments	\$ (107)	\$ 17	\$ (90)
Taxable investment securities	507	202	709
Tax-exempt investment securities (1)	2,051	94	2,145
Loans (1) (2)	7,327	(623)	6,704
Interest income	9,778	(310)	9,468
Interest-bearing deposits	186	(113)	73
Short-term borrowings	21	38	59
Interest expense	207	(75)	132
Net interest income	\$ 9,571	\$ (235)	\$ 9,336

(1) Computed on a tax-equivalent basis assuming a marginal tax rate of 35%.

(2) Non-accrual loans are included in loans.

The net interest margin for the first quarter of 2014 was 4.32%, an increase of 13 basis points from the same period in 2013. Although interest rates have continued to remain at historically low levels, the Company is beginning to see improvements in its net interest margin. This improvement is a result of our continued efforts to mitigate the impact of low short-term interest rates by establishing minimum interest rates on certain of our loans, improving the pricing for loan risk, reducing rates paid on interest bearing deposits and increases in the overall reinvestment rate of our security portfolio. We expect interest rates to remain at the current low levels based on comments made by the Federal Reserve, which will continue to place pressure on our interest margin.

Table of Contents

The net interest margin, which measures tax-equivalent net interest income as a percentage of average earning assets, is illustrated in Table 2.

Table 2 - Average Balances and Average Yields and Rates (in thousands, except percentages):

	Three Months Ended March 31,

Interest income/earning assets			4.41%			4.28%
Interest expense/earning assets			0.09			0.09
Net yield on earning assets			4.32%			4.19%

- (1) Short-term investments are comprised of Fed Funds sold, interest-bearing deposits in banks and interest-bearing time deposits in banks.
- (2) Average balances include unrealized gains and losses on available-for-sale securities.
- (3) Computed on a tax-equivalent basis assuming a marginal tax rate of 35%.
- (4) Non-accrual loans are included in loans.

Noninterest Income. Noninterest income for the first quarter of 2014 was \$16.41 million, an increase of \$2.45 million over the same period in 2013. Trust fees increased \$783 thousand, ATM, interchange and credit card fees increased \$714 thousand and service charges on deposit accounts increased \$152 thousand. The increase in trust fees reflects an increase in fees from mineral management as well as assets under management over the prior year from both market value growth and growth in assets managed. The fair value of our trust assets managed, which are not reflected in our consolidated balance sheets, totaled \$3.47 billion at March 31, 2014 as compared to \$3.02 billion a year ago. The increases in ATM, interchange and credit card fees and service charges on deposit accounts is primarily a result of an increase in the number of accounts and from our Orange acquisition. Also included in noninterest income in the first quarter of 2014 was a \$605 thousand gain on the settlement of a bank owned life insurance contract and gains of \$452 thousand on the sale of foreclosed assets compared to losses of \$316 thousand in the same period a year ago.

Offsetting these increases were decreases in real estate mortgage fees of \$360 thousand, net gain on sale of available-for-sale securities of \$226 thousand and net gain on sale of assets of \$165 thousand. The decline in real estate mortgage fees is a result of the overall decline in mortgage refinance activity.

Table of Contents**Table 3 - Noninterest Income (in thousands):**

	Three Months Ended		
	2014	March 31, Increase (Decrease)	2013
Trust fees	\$ 4,576	\$ 783	\$ 3,793
Service charges on deposit accounts	4,047	152	3,895
ATM, interchange and credit card fees	4,443	714	3,729
Real estate mortgage operations	1,024	(360)	1,384
Net gain (loss) on sale of available-for-sale securities	(4)	(226)	222
Net gain (loss) on sale of foreclosed assets	452	768	(316)
Other:

Credit life and debt protection fees	26	(14)	40
Brokerage commissions	229	120	109
Interest on loan recoveries	281	43	238
Gain on sale of assets	3	(165)	168
Miscellaneous income	1,081	598	483
Total other	1,867	614	1,253
Total Noninterest Income	\$ 16,405	\$ 2,445	\$ 13,960

Noninterest Expense. Total noninterest expense for the first quarter of 2014 was \$32.45 million, an increase of \$4.98 million, or 18.12%, as compared to the same period in 2013. An important measure in determining whether a financial institution effectively manages noninterest expenses is the efficiency ratio, which is calculated by dividing noninterest expense by the sum of net interest income on a tax-equivalent basis and noninterest income. Lower ratios indicate better efficiency since more income is generated with a lower noninterest expense total. Our efficiency ratio for the first quarter of 2014 was 47.57%, compared to 48.68% from the same period in 2013.

Salaries and employee benefits for the first quarter of 2014 totaled \$17.41 million, an increase of \$2.23 million compared to 2013. The increase was largely the result of additional employees to staff new branches, annual pay increases, our Orange acquisition and an increase in health care expenses.

All other categories of noninterest expense for the first quarter of 2014 totaled \$15.04 million, an increase of \$2.74 million, or 22.32%, as compared to the same period in 2013. Other categories of noninterest expense with increases included net occupancy and equipment expense, printing, stationary and supplies expense, professional and service fees and advertising, primarily all resulting from our Orange acquisition.
