Market Environment Overview

The U.S. equity market, as measured by the S&P 500 Index, returned 21.86% for the 12-month period ended March 31, 2014 (the period). After bottoming in March of 2009, the S&P 500 Index recorded its fifth straight year of gains. Measured from March 31, 2009 through March 31, 2014, the five year cumulative total return on the S&P 500 Index was 161.07%. This represents a substantial recovery in the equity markets as earnings and dividend levels reached and surpassed previous levels. In fact, this was also enough for the S&P 500 Index to reach new highs.

While the overall return for the period was positive, it was marked by several bouts of volatility. Most of the volatility during the period was surrounding the Federal Reserve's (Fed) decision to begin tapering its quantitative easing program. Since the global financial crisis, the Fed and central banks around the world have embraced policies to provide ample liquidity to the markets with the goal of keeping interest rates low and credit flowing. However, as the U.S. economy continued to improve, many began to anticipate the possibility of the Fed ending its extraordinary accommodation. Starting in May 2013, on just a hint of the Fed possibly dialing back its bond purchases, longer-term interest rates in the U.S. rose considerably. At its December meeting, the Fed began scaling back purchases of both mortgage-backed securities and U.S. Treasury bonds and is on track to end its asset purchase program by the end of 2014 assuming no drop-off in economic performance.

WisdomTree Funds Performance Overview

The following table reflects the WisdomTree Funds' performance versus their capitalization-weighted benchmark indexes:

| Ticker | WisdomTree Fund | 1-Year NAV Return | Performance Benchmark | 1-Year Return | Difference |
|--------|--|-------------------|---|---------------|------------|
| DTD | WisdomTree Total Dividend Fund | 18.10% | Russell 3000 Index | 22.61% | -4.51% |
| DHS | WisdomTree Equity Income Fund | 14.24% | Russell 1000 Value Index | 21.57% | -7.33% |
| DLN | WisdomTree LargeCap Dividend Fund | 17.70% | S&P 500 Index | 21.86% | -4.16% |
| DTN | WisdomTree Dividend ex-Financials Fund | 16.75% | Dow Jones U.S. Select Dividend Index | 19.79% | -3.04% |
| DON | WisdomTree MidCap Dividend Fund | 21.24% | S&P MidCap 400 Index | 21.24% | 0.00% |
| DES | WisdomTree SmallCap Dividend Fund | 22.99% | Russell 2000 Index | 24.90% | -1.91% |
| DGRW | WisdomTree U.S. Dividend Growth Fund ¹ | 14.19% | NASDAQ U.S. Dividend Achievers Select Index | 11.62% | 2.57% |
| DGRS | WisdomTree U.S. SmallCap Dividend Growth Fund ² | 14.66% | Russell 2000 Index | 12.30% | 2.36% |

¹ Total returns shown are for the period May 22, 2013 (commencement of operations) to March 31, 2014.

² Total returns shown are for the period July 25, 2013 (commencement of operations) to March 31, 2014.

The top-performing performance benchmark within the aforementioned chart was the Russell 2000 Index, which is a measure of small cap stocks. Small cap stocks typically perform well when market participants believe the economy is improving or performing strongly and under circumstances when interest rates are rising such as that experienced over the period. Of the performance benchmarks shown with one-year returns, the Dow Jones U.S. Select Dividend Index was actually the lowest performer, indicating that dividend focused equities slightly lagged over the period, pressurized by the rise in interest rates in 2013.

WisdomTree's dividend-weighted Funds are designed to track indexes based on the dividend stream generated by the companies included in the underlying WisdomTree Index. The dividend stream is defined as the sum of the dollar value of dividends indicated to be paid by each company. There are two primary factors that drive

Table of Contents

Management's Discussion of Funds' Performance

(unaudited) (concluded)

performance differentials of the WisdomTree Funds and Indexes versus their performance benchmarks. The first is aggregate exposure to one or more sectors. The second is stock selection within each sector. Both of these are determined as part of WisdomTree's rules-based index methodology. These exposures are not subjectively determined. Rather, they are objectively determined at the Index rebalancing dates based on the dividend stream.

All ten of the sectors represented within the S&P 500 Index experienced positive performance over the period. The best-performing sector over the period was the Health Care sector, with Industrials and Information Technology close behind. Each of these sectors delivered a return greater than 25% over the period. The Health Care sector was positively affected by the implementation of the Affordable Care Act and performance from high growth areas like biotechnology and life sciences. Industrials and Information Technology tend to be higher growth and more economically sensitive sectors, which allowed them to benefit from a continual improvement in the economy and strong equity markets. The worst performing sectors over the period were the Consumer Staples, Utilities and Telecommunication Services sectors. These sectors tend to be more defensive by nature and are apt to lag during periods of strong positive market performance. Also, these sectors tend to be some of the highest yielding sectors of the market and were negatively impacted by the rise in treasury yields over the second half of last year. Over the period last year there was a rotation out of the more defensive dividend paying equities into higher growth non-dividend paying cyclical stocks.

The performance of most WisdomTree Domestic Dividend Funds compared to the applicable performance benchmark was unfavorable over the period. This ultimately makes sense, in that WisdomTree's dividend-focused approaches have tended to historically tilt toward dividend-paying firms, and there have historically been larger numbers of these firms within the defensively oriented sectors like Consumer Staples, Utilities, and Telecommunication Services.

The strongest relative one-year performance advantage measured versus the requisite performance benchmarks came with respect to the WisdomTree MidCap Dividend Fund (DON). This was the only WisdomTree Domestic Dividend Fund with a one-year NAV return that didn't underperform its performance benchmark. For DON, this was largely due to stock selection within the Information Technology sector relative to the S&P MidCap 400 Index over the period.

Fund returns are shown at NAV. Please see Performance Summaries on the subsequent pages for more complete performance information. Please see page 11 for the list of index descriptions.

Fund performance assumes reinvestment of dividends and capital gain distributions. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Funds' performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. Past performance is no guarantee of future results. The WisdomTree Total Dividend Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dividend Index.

The Fund returned 18.10% at net asset value (NAV) for the fiscal year ending March 31, 2014 (for more complete performance information please see the chart below). The Fund's performance benefited most from its position in the Financials sector. The Fund's position in the Telecommunication Services sector created the greatest drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to

Edgar Filing: WisdomTree Trust - Form N-CSR

calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. ² Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on June 16, 2006.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. The WisdomTree MidCap Dividend Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree MidCap Dividend Index.

The Fund returned 21.24% at net asset value (NAV) for the fiscal year ending March 31, 2014 (for more complete performance information please see the chart below). The Fund's performance benefited most from its position in the Consumer Discretionary sector. The Fund's position in the Health Care sector created the greatest drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to

calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **As of the Fund's current prospectus dated August 1, 2013, the Fund's annual expense ratio was 0.38%.**

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2013 to March 31, 2014.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled **Expenses Paid During the Period 10/01/13 to 3/31/14** to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Table of Contents**Notes to Financial Statements****1. ORGANIZATION**

WisdomTree Trust (the Trust) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. The Trust was established as a Delaware statutory trust on December 15, 2005. As of March 31, 2014, the Trust offered 62 investment funds (each a Fund, and collectively, the Funds). These notes relate only to the Funds listed in the table below:

| Fund | Commencement of Operations |
|--|----------------------------|
| WisdomTree Total Dividend Fund (Total Dividend Fund) | June 16, 2006 |
| WisdomTree Equity Income Fund (Equity Income Fund) | June 16, 2006 |
| WisdomTree LargeCap Dividend Fund (LargeCap Dividend Fund) | June 16, 2006 |
| WisdomTree Dividend ex-Financials Fund (Dividend ex-Financials Fund) | June 16, 2006 |
| WisdomTree MidCap Dividend Fund (MidCap Dividend Fund) | June 16, 2006 |
| WisdomTree SmallCap Dividend Fund (SmallCap Dividend Fund) | June 16, 2006 |
| WisdomTree U.S. Dividend Growth Fund (U.S. Dividend Growth Fund) | May 22, 2013 |
| WisdomTree U.S. SmallCap Dividend Growth Fund (U.S. SmallCap Dividend Growth Fund) | July 25, 2013 |

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (WisdomTree Investments). WisdomTree Investments is the parent company of WisdomTree Asset Management, Inc. (WTAM), the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified.

In the normal course of business the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification) is the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Use of Estimates The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

Investment Valuation The net asset value (NAV) of each Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding. Each Fund issues and redeems shares at NAV only in large blocks of shares known as creation units, which only certain institutions or large investors may purchase or redeem. Shares of each Fund are listed on a national securities exchange and trade at market prices. Most investors will buy and sell shares through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV or less than NAV. In calculating each Fund's NAV, investments are valued under policies approved by the Board of Trustees.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value. Each Fund may invest in money market funds which are valued at their NAV per share

Edgar Filing: WisdomTree Trust - Form N-CSR

and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's investments will be fair valued in accordance with the Fund's pricing policy and procedures. The Board of Trustees of the Trust has established a pricing committee (the Pricing Committee) which is comprised of senior representatives of WTAM and which reports to the Board of Trustees on a quarterly basis. In the event that a financial instrument cannot be valued based upon

Table of Contents**Notes to Financial Statements** (continued)

a price from a national securities exchange, independent pricing service provider or broker quotation, or such prices are deemed to not reflect current market value, the Pricing Committee may value the financial instrument in good faith under the policies and procedures approved by the Board of Trustees based on current facts and circumstances. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV calculation time that may materially affect the value of a Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. The Funds may rely on an independent fair valuation service in adjusting the valuations of foreign securities. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy of inputs to be used when determining fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk—for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including each Fund's assumptions in determining the fair value of investments)

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation or market activity; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The valuation techniques and significant inputs used in determining the fair market value measurements for Level 2 and Level 3 positions are as follows:

Financial instruments are generally valued by independent pricing service providers that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. Depending on the type of financial instrument, the independent pricing service providers internal pricing models may use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Financial instruments that use similar valuation techniques and observable inputs as described above and have an appropriate level of activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy. Over-the-counter financial derivative contracts derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker-dealer quotations or independent pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative contracts can be estimated by an independent pricing service provider using a

Edgar Filing: WisdomTree Trust - Form N-CSR

series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, credit risks/spreads, interest rates, yield curves, default and exchange rates. Derivative contracts that use similar valuation techniques and observable inputs as described above and have an appropriate level of activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate.

Determination of a fair value by the Pricing Committee may include significant unobservable inputs and therefore would be reflected as a Level 3 of the fair value hierarchy. The Pricing Committee may employ a market-based valuation approach which may use, among other potential considerations, related or comparable securities, recent transactions, market multiples, book values, and other relevant information to determine fair value. The Pricing Committee may also use an income-based valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. The Pricing Committee meets at least on a monthly basis to review and discuss the appropriateness of such fair values using more current information such as, recent security news, recent market transactions, updated corporate action information and/or other macro or security specific events. Also, when observable inputs become available, the Pricing Committee conducts back testing of Level 3 financial instruments to substantiate the unobservable inputs used to value those investments. Such back testing includes comparing Level 3 investment values to observable inputs such as exchange-traded prices, transaction prices, and/or vendor prices.

The following is a summary of the fair valuations according to the inputs used as of March 31, 2014 in valuing each Fund's assets:

Notes to Financial Statements (continued)

There were no Level 3 securities at or during the fiscal year or period ended March 31, 2014.

There were no transfers into or out of any fair value measurement levels as described above during the fiscal year or period ended March 31, 2014.

The Funds have elected to use the beginning of period method for transfers between fair value measurement levels.

Derivatives and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds did not invest in derivative instruments during the fiscal year ended March 31, 2014.

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date. Interest income is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Expenses Under the investment advisory agreement for each Fund except U.S. Dividend Growth Fund and U.S. SmallCap Dividend Growth Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of Trustees who are not interested persons of the Funds (Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's Chief Compliance Officer (CCO); (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM. The internal expenses of pooled investment vehicles in which a Fund may invest (acquired fund fees and expenses) are not expenses of the Fund and are not paid by WTAM.

Under the investment advisory agreement for U.S. Dividend Growth Fund and U.S. SmallCap Dividend Growth Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions (including without limitation any fees, charges, taxes, levies or expenses related to the purchase or sale of an amount of any currency, or the patriation or repatriation of any security or other asset, related to the execution of portfolio transactions or any creation or redemption transactions); (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's CCO; (vi) extraordinary expenses (in each case as determined by a majority of the Independent Trustees); (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; (viii) interest and taxes of any kind or nature (including, but not limited to, income, excise, transfer and withholding taxes); (ix) fees and expenses related to the provision of securities lending services; and (x) the advisory fee payable to WTAM.

The internal expenses of pooled investment vehicles in which the Fund may invest (acquired fund fees and expenses) are not expenses of the Fund and are not paid by WTAM.

Pursuant to a separate contractual arrangement, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WTAM receives a fee, as shown on the Statements of Operations under Service fees , of up to 0.0044% of each Fund's average daily net assets for providing such services and paying such expenses. WTAM provides CCO services to the Trust.

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Funds' policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The cash collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. The value of the investment of cash collateral for securities on loan along with the obligation to return

Edgar Filing: WisdomTree Trust - Form N-CSR

such collateral are included on the Statements of Assets and Liabilities. The value of securities received as collateral for securities on loan are not included on the Statements of Assets and Liabilities because the receiving Fund does not have the right to sell or repledge the securities received as collateral. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The securities lending income earned by the Funds is disclosed on the Statements of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receive a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

As of March 31, 2014, the Funds did not have any securities on loan.

Master Netting Arrangements Accounting Standards Update No. 2011-11 Disclosures about Offsetting Assets and Liabilities (ASU 2011-11) is generally intended to (i) help investors and other financial statement users to better assess the effect or potential effect of offsetting arrangements on a company s financial position, (ii) improve transparency in the reporting of how companies mitigate credit risk, and (iii) facilitate comparisons between those entities that prepare their financial statements on the basis of GAAP and those entities that prepare their financial statements on the basis of international financial reporting standards. ASU 2011-11 requires entities to disclose (i) gross and net information about both instruments and transactions eligible for offset in the financial statements, and (ii) instruments and transactions subject to an agreement similar to a master netting agreement. ASU 2011-11 is limited in scope to the following financial instruments, to the extent they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement: (i) recognized derivative instruments accounted for under ASC 815 (Derivatives and Hedging); (ii) repurchase agreements and reverse repurchase agreements; and (iii) securities borrowing and securities lending transactions.

A Fund s security lending activities are governed by a Securities Lending Authorization Agreement (Lending Agreement) between the Fund and the lending agent. The Lending Agreement authorizes the lending agent to lend qualifying U.S. and foreign securities held by a Fund to approved borrowers (each a Borrower). To mitigate borrower risk, a Fund typically receives from a Borrower, collateral in the form of U.S. dollar cash and/or securities issued or guaranteed by the U.S. government or its agencies in excess of the market value of the securities loaned. Under the provisions of the Lending Agreement, a Fund shall have, as to the collateral, all of the rights and remedies of a secured party under applicable law. A Fund is exposed to risk of loss if a Borrower defaults on its obligation to return borrowed securities and the value of the collateral a Fund received is insufficient to cover the market value of the securities loaned. Also, the lending agent is permitted to invest the cash collateral it receives from a Borrower into a money market fund which is subject to market fluctuation. Therefore, a Fund is exposed to risk of loss if the value of invested cash collateral is insufficient to satisfy the Fund s obligation to return the full amount owed to such Borrower.

For financial reporting purposes, the Funds elect to not offset assets and liabilities subject to master netting arrangements or similar arrangements in the Statements of Assets and Liabilities. Therefore, all qualifying transactions, if any at March 31, 2014, are presented on a gross basis in the Statements of Assets and Liabilities. As of March 31, 2014, there were no balances on the Statements of Assets and Liabilities subject to master netting arrangements.

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. government, its agencies, non-U.S. government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Banker s acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders It is each Fund s policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the Code). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company (RIC) under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. There can be no guarantee that a Fund will pay dividends. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with U.S. Federal income tax regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their U.S. Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions, which exceed earnings and profit for tax purposes, are reported as a tax return of capital.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM provides an investment program for each Fund. WTAM has arranged for Mellon Capital Management Corporation (MCM) to provide sub-advisory services to the Funds. MCM is compensated by WTAM at no additional cost to the Funds. WTAM also arranges for transfer agency, custody, fund accounting, fund administration, securities lending and all other non-distribution related services necessary for the Funds to operate which are generally under

Edgar Filing: WisdomTree Trust - Form N-CSR

separate agreements entered into between the Trust on behalf of the Funds and the applicable service provider. Under the investment advisory agreement for each Fund, WTAM agrees to pay all expenses of the Funds, except for certain expenses generally described in Note 2.

Pursuant to a separate contractual arrangement, also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044% of each Fund's average daily net assets. WTAM expects to receive advisory fees from each Fund, based on a percentage of the Fund's average daily net assets, as shown in the following table.

| Fund | Advisory Fee Rate |
|------------------------------------|------------------------------|
| Total Dividend Fund | 0.28% |
| Equity Income Fund | 0.38% |
| LargeCap Dividend Fund | 0.28% |
| Dividend ex-Financials Fund | 0.38% |
| MidCap Dividend Fund | 0.38% |
| SmallCap Dividend Fund | 0.38% |
| U.S. Dividend Growth Fund | 0.28% |
| U.S. SmallCap Dividend Growth Fund | 0.38% |

Each Fund may purchase shares of affiliated exchange traded funds in secondary market transactions. For the fiscal year or period ended March 31, 2014, WTAM waived its advisory fees for each Fund's investments associated with daily uninvested cash in correlated affiliated Funds net of any incremental costs as a result of these transactions (fund accounting, safekeeping, transaction fees, etc.) that are paid by WTAM out of the advisory fee received from the affiliated Funds. The table below indicates the waiver amounts. Please see Note 7 for additional information on Other Affiliated Parties and Transactions.

| Fund | Advisory Fees Waived |

4. CAPITAL SHARE TRANSACTIONS

As of March 31, 2014, there were an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in creation units or multiples thereof. Except when aggregated in creation units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of creation units of a Fund generally consists of the in-kind contribution of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund's underlying Index and an amount of cash. Investors purchasing and redeeming creation units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of creation units.

* Under the recently enacted Regulated Investment Company Modernization Act of 2010, a Fund is permitted to carry forward any new capital losses for an unlimited period. Additionally, such capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law. The character of these losses is noted above.

Capital losses incurred after October 31 (post-October capital losses) and within the taxable year are deemed to arise on the first business day of each Fund 's next taxable year.

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the fiscal year or period ended March 31, 2014, the Funds did not have any liabilities for unrecognized tax benefits. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with the Internal Revenue Service, the State of New York, and various other states. Generally, each of the tax years in the four-year period ended March 31, 2014, remains subject to examination by taxing authorities.

8. RECENT ACCOUNTING PRONOUNCEMENT

In June 2013, the FASB issued Accounting Standards Update 2013-08 Financial Services-Investment Companies (ASU 2013-08). ASU 2013-08 provides clarifying guidance to determine if an entity qualifies as an investment company. ASU 2013-08 also requires an investment company to measure non-controlling interests in other investment companies at fair value. The following disclosures will also be required upon adoption of ASU 2013-08: (i) whether an entity is an investment company and is applying the accounting and reporting guidance for investment companies; (ii) information about changes, if any, in an entity's status as an investment company; and (iii) information about financial support provided or contractually required to be provided by an investment company to any of its investees. The requirements of ASU 2013-08 are effective for fiscal years that begin after December 15, 2013.

At this time, management is evaluating the implications of ASU 2013-08 and its impact on the Trust's financial statements.

9. ADDITIONAL INFORMATION

In September 2013, the Funds entered into agreements to change transfer agency, custody, fund accounting, fund administration and securities lending services from Bank of New York Mellon to State Street Bank and Trust Company, effective April 1, 2014.

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders of WisdomTree Trust:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of WisdomTree Total Dividend Fund, WisdomTree Equity Income Fund, WisdomTree LargeCap Dividend Fund, WisdomTree Dividend ex-Financials Fund, WisdomTree MidCap Dividend Fund, WisdomTree SmallCap Dividend Fund, WisdomTree U.S. Dividend Growth Fund and WisdomTree U.S. SmallCap Dividend Growth Fund (eight of the investment funds constituting WisdomTree Trust (the "Trust")) as of March 31, 2014, and the related statements of operations, the statements of changes in net assets, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2014, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of WisdomTree Total Dividend Fund, WisdomTree Equity Income Fund, WisdomTree LargeCap Dividend Fund, WisdomTree Dividend ex-Financials Fund, WisdomTree MidCap Dividend Fund, WisdomTree SmallCap Dividend Fund, WisdomTree U.S. Dividend Growth Fund and WisdomTree U.S. SmallCap Dividend Growth Fund of WisdomTree Trust at March 31, 2014, the results of their operations, the changes in their net assets, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Market Environment Overview

The U.S. equity market, as measured by the S&P 500 Index, returned 21.86% for the 12-month period ended March 31, 2014 (the period). After bottoming in March of 2009, the S&P 500 Index recorded its fifth straight year of gains. Measured from March 31, 2009 through March 31, 2014, the five year cumulative total return on the S&P 500 Index was 161.07%. This represents a substantial recovery in the equity markets as earnings and dividend levels reached and surpassed previous levels. In fact, this was also enough for the S&P 500 Index to reach new highs.

While the overall return for the period was positive, it was marked by several bouts of volatility. Most of the volatility during the period was surrounding the Federal Reserve's (Fed) decision to begin tapering its quantitative easing program. Since the global financial crisis, the Fed and central banks around the world have embraced policies to provide ample liquidity to the markets with the goal of keeping interest rates low and credit flowing. However, as the U.S. economy continued to improve, many began to anticipate the possibility of the Fed ending its extraordinary accommodation. Starting in May 2013, on just a hint of the Fed possibly dialing back its bond purchases, longer-term interest rates in the U.S. rose considerably. At its December meeting, the Fed began scaling back purchases of both mortgage-backed securities and U.S. Treasury bonds and because of that it is on track to end its asset purchase program by the end of 2014 assuming no drop-off in economic performance.

WisdomTree Funds Performance Overview

The following table reflects the WisdomTree Funds' performance versus their capitalization-weighted benchmark indexes:

| Ticker | WisdomTree Fund | 1-Year NAV Return | Performance Benchmark | 1-Year Return | Difference |
|--------|-----------------------------------|-------------------|--------------------------|---------------|------------|
| EXT | WisdomTree Total Earnings Fund | 22.89% | Russell 3000 Index | 22.61% | 0.28% |
| EPS | WisdomTree Earnings 500 Fund | 22.24% | S&P 500 Index | 21.86% | 0.38% |
| EZM | WisdomTree MidCap Earnings Fund | 27.26% | S&P MidCap 400 Index | 21.24% | 6.02% |
| EES | WisdomTree SmallCap Earnings Fund | 29.55% | Russell 2000 Index | 24.90% | 4.65% |
| EZY | WisdomTree LargeCap Value Fund | 21.20% | Russell 1000 Value Index | 21.57% | -0.37% |
| EPI | WisdomTree India Earnings Fund | 6.81% | MSCI India Index | 6.74% | 0.07% |

The top-performing performance benchmark within the aforementioned chart was the Russell 2000 Index, which is a measure of small cap stocks. Small cap stocks typically perform well when market participants believe the economy is improving or performing strongly and under circumstances when interest rates are rising such as that experienced over the period. Of the U.S. based performance benchmarks shown, the S&P MidCap 400 Index was actually the lowest U.S. equity benchmark performer, which is quite impressive considering its return was over 21% for the period and was fairly close to the S&P 500 index of large cap stocks. The MSCI India Index is notable for its lackluster 6.74% return over the period, trailing the U.S. equity performance benchmarks by a significant margin.

WisdomTree's earnings-weighted funds are designed to track indexes based on the earnings stream generated by companies included in the underlying WisdomTree Index. The earnings stream is defined as the total dollar level of earnings for all companies within each Index. There are two primary factors that drive performance differentials of the WisdomTree Funds and Indexes versus their performance benchmarks. The first is aggregate exposure to one or more sectors. The second is stock selection within each sector. Both of these are determined as part of WisdomTree's rules-based index methodology. These exposures are not subjectively determined. Rather, they are objectively determined at the Index rebalancing dates based on the earnings stream.

All ten of the sectors represented within the S&P 500 Index experienced positive performance over the period. The best-performing sector over the period was the Health Care sector, with Industrials and Information Technology close behind. Each of these

Table of Contents

Management's Discussion of Funds Performance

(unaudited) (concluded)

sectors delivered a return greater than 25% over the period. The Health Care sector was positively affected by the implementation of the Affordable Care Act and performance from high growth areas like biotechnology and life sciences. Industrials and Information Technology tend to be higher growth and more economically sensitive sectors, which allowed them to benefit from a continual improvement in the economy and strong equity markets. The worst performing sectors over the period were the Consumer Staples, Utilities and Telecommunication Services sectors. These sectors tend to be more defensive by nature and are apt to lag during periods of strong positive market performance. Also, these sectors tend to be some of the highest yielding sectors of the market and were negatively impacted by the rise in treasury yields over the second half of last year. Over the period last year there was a rotation out of the more defensive dividend paying equities into higher growth non-dividend paying cyclical stocks.

The performance of most WisdomTree Funds compared to the applicable performance benchmark was favorable over the period. The best performing Funds of those shown relative to its performance benchmark were the WisdomTree MidCap Earnings Fund and the WisdomTree SmallCap Earnings Fund, outperforming their performance benchmarks by 6.02% and 4.65%, respectively. The only Fund to underperform during the period was the WisdomTree LargeCap Value Fund, which lagged the Russell 1000 Value Index by 0.37%.

Each of the WisdomTree Domestic and International Earnings Funds shown here tracks an underlying WisdomTree Index that focuses solely on generating exposure to the performance of companies that have generated positive profits on a cumulative basis leading up to the Index screening date. As such, during certain years with strong market performance, like the period shown here, focusing on companies that have generated positive earnings leading up to the Index screening date can certainly provide upside market capture. Of the domestic Funds shown, relative performance was gained by tilting more weight to the more profitable sectors relative to the performance benchmarks, as well as missing exposure to deeper value firms that may not have generated positive profits prior to the Index screening date.

With respect to India, the WisdomTree India Earnings Fund underperformed during the first half of the period, but was able to catch up during the second half of the period, and end slightly ahead of the performance benchmark. The Fund has typically performed better in broad equity market rallies, similar to what we witnessed in the second half of the period, because the Fund tends to be more inclusive of mid and small capitalization Fund. The WisdomTree India Earnings Fund tracks an Index that generates exposure to the performance of India's equities across all capitalization sizes, whereas the MSCI India Index is predominantly exposure to large caps.

Fund returns are shown at NAV. Please see Performance Summaries on the subsequent pages for more complete performance information. Please see page 9 for the list of index descriptions.

Fund performance assumes reinvestment of dividends and capital gain distributions. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Funds' performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. Past performance is no guarantee of future results. The WisdomTree Total Earnings Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Earnings Index.

The Fund returned 22.89% at net asset value (NAV) for the fiscal year ending March 31, 2014 (for more complete performance information please see the chart below). The Fund's position in Financials contributed to performance while its position in Telecommunication Services contributed the least to performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2013 to March 31, 2014.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 10/01/13 to 3/31/14 to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

¹ Based on average shares outstanding.

² Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. The total return would have been lower if certain expenses had not been reimbursed/waived by the investment adviser (Note 2 and 3).

Edgar Filing: WisdomTree Trust - Form N-CSR

- ³ The ratios to average net assets do not include net investment income (loss) or expenses of other Funds in which the Fund invests.
- ⁴ Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

68 WisdomTree Domestic and International Earnings Funds

Table of Contents**Notes to Financial Statements****1. ORGANIZATION**

WisdomTree Trust (the **Trust**) is registered under the Investment Company Act of 1940, as amended (the **1940 Act**), as an open-end management investment company. The Trust was established as a Delaware statutory trust on December 15, 2005. As of March 31, 2014, the Trust offered 62 investment funds (each a **Fund**, collectively, the **Funds**). These notes relate only to the Funds listed in the table below:

| Fund | Commencement of Operations |
|---|---|
| WisdomTree Total Earnings Fund (Total Earnings Fund) | February 23, 2007 |
| WisdomTree Earnings 500 Fund (Earnings 500 Fund) | February 23, 2007 |
| WisdomTree MidCap Earnings Fund (MidCap Earnings Fund) | February 23, 2007 |
| WisdomTree SmallCap Earnings Fund (SmallCap Earnings Fund) | February 23, 2007 |
| WisdomTree LargeCap Value Fund (LargeCap Value Fund) | February 23, 2007 |
| WisdomTree India Earnings Fund (India Earnings Fund) | February 22, 2008 |

The India Earnings Fund makes its investments through the WisdomTree India Investment Portfolio, Inc. (the **Portfolio**), a wholly owned subsidiary organized in the Republic of Mauritius. The Portfolio was incorporated under the provisions of the Mauritius Companies Act 2001 and holds a Global Business License Category 1 issued by the Financial Services Commission. The Portfolio is advised by WisdomTree Asset Management, Inc. (**WTAM**) and is sub-advised by Mellon Capital Management Corporation (**MCM**). For the India Earnings Fund, the accompanying financial statements reflect the financial position of the Fund and the results of operations on a consolidated basis with the Portfolio. All inter-company accounts and transactions have been eliminated in consolidation. This structure should permit the India Earnings Fund to benefit from a tax treaty between India and Mauritius. The Supreme Court of India upheld the validity of this tax treaty in response to a lower court challenge contesting the treaty's applicability to entities such as the India Earnings Fund. In March of 2012, the Indian Finance Minister introduced a new chapter to the Indian Income Tax Act 1961, which would include certain General Anti-Avoidance Rules (**GAAR**). The implementation of these rules has been postponed and would be effective April 1, 2015 (Indian tax year 2015-2016) and it is presently unclear if these rules will have any impact on the Fund's ability to benefit from the tax treaty. No assurance can be given that the terms of the treaty will not be subject to re-negotiation in the future or subject to an adverse interpretation under GAAR. Any change in the provision of this treaty or in its applicability to the India Earnings Fund could result in the imposition of withholding and other taxes on the India Earnings Fund by tax authorities in India. This would reduce the return to the India Earnings Fund on its investments and the return received by India Earnings Fund shareholders. References to investments by the India Earnings Fund herein should be understood to refer to investments by the Portfolio.

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (**Index**) developed by WisdomTree Investments, Inc. (**WisdomTree Investments**). WisdomTree Investments is the parent company of WTAM, the investment adviser to each Fund and the Trust. **WisdomTree** is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified. The securities in each Index are weighted based on earnings or earnings yield.

In the normal course of business the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (**FASB**) Accounting Standards Codification (the **Codification**) is the exclusive reference of authoritative U.S. generally accepted accounting principles (**GAAP**) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (**SEC**) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Use of Estimates The preparation of financial statements in conformity with GAAP, requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial

Investment Valuation The net asset value (NAV) of each Fund 's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund 's net assets by the number of Fund shares outstanding. Each Fund issues and redeems shares at NAV only in large blocks of shares known as creation units, which only certain institutions or large investors may purchase or redeem. Shares of each Fund are listed on a national securities exchange and trade at market prices. Most investors will buy and sell shares through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV or less than NAV. In calculating each Fund 's NAV, investments are valued under policies approved by the Board of Trustees.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price provided by dealers and pricing services. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value. Each Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded. Forward foreign currency contracts are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m. London time for Europe and the Americas, and Tullett Prebon closing spot and forward rates as of 2:00 p.m. Singapore time for Asia. Fixed income securities generally are valued at current market quotations or mean prices obtained from dealers or independent pricing services. Dealers or independent pricing services, in determining the value of securities may consider such factors as recent transactions, indications from other dealers, yields and prices for similar securities, and market sentiment for the type of security.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund 's investments will be fair valued in accordance with the Fund 's pricing policy and procedures. The Board of Trustees of the Trust has established a pricing committee (the Pricing Committee) which is comprised of senior representatives of WTAM and which reports to the Board of Trustees on a quarterly basis. In the event that a financial instrument cannot be valued based upon a price from a national securities exchange, independent pricing service provider or broker quotation, or such prices are deemed to not reflect current market value, the Pricing Committee may value the financial instrument in good faith under the policies and procedures approved by the Board of Trustees based on current facts and circumstances. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events . An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund 's next NAV calculation time that may materially affect the value of a Fund 's investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. The Funds may rely on an independent fair valuation service in adjusting the valuations of foreign securities. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy of inputs to be used when determining the use of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk—for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity 's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including each Fund 's assumption in determining the fair value of investments)

Edgar Filing: WisdomTree Trust - Form N-CSR

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a

security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation or market activity; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The valuation techniques and significant inputs used in determining the fair market value measurements for Level 2 and Level 3 positions are as follows:

Financial instruments are generally valued by independent pricing service providers that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. Depending on the type of financial instrument, the independent pricing service providers internal pricing models may use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Financial instruments that use similar valuation techniques and observable inputs as described above are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy. Over-the-counter financial derivative instruments derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker-dealer quotations or independent pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative contracts can be estimated by an independent pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, credit risks/spreads, interest rates, yield curves, default and exchange rates. Derivatives contracts that use similar valuation techniques and observable inputs as described above and have an appropriate level of activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate.

Determination of a fair value by the Pricing Committee may include significant unobservable inputs and therefore would be reflected as a Level 3 of the fair value hierarchy. The Pricing Committee may employ a market-based valuation approach which use, among other potential considerations, use related or comparable securities, recent transactions, market multiples, book values, and other relevant information to determine fair value. The Pricing Committee may also use an income-based valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. The Pricing Committee meets at least on a monthly basis to review and discuss the appropriateness of such fair values using more current information such as, recent security news, recent market transactions, updated corporate action information and/or other macro or security specific events. Also, when observable inputs become available, the Pricing Committee conducts back testing of Level 3 financial instruments to substantiate the unobservable inputs used to value those investments. Such back testing includes comparing Level 3 investment values to observable inputs such as exchange-traded prices, transaction prices, and/or vendor prices.

The following is a summary of the fair valuations according to the inputs used as of March 31, 2014 in valuing each Fund's assets:

There were no transfers into or out of any fair value measurement levels as described above during the fiscal year ended March 31, 2014. The Funds have elected to use the beginning of period method for transfers between fair value measurement levels.

Derivatives and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The India Earnings Fund has invested in derivatives, specifically forward currency contracts, during the fiscal year ended March 31, 2014, which are detailed in the tables below. Risks may arise upon entering into forward foreign currency contracts from the potential inability of a counterparty to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other. The Fund's derivative agreements contain credit-risk-related contingent features which include, but are not limited to, a percentage decline in the Fund's NAV over a specified time period. If an event occurred at March 31, 2014 that triggered a contingent feature, the counterparty to the agreement may require the Fund to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivatives agreements with the credit-risk-related contingent features would be the total of derivatives in net liability positions for the Fund, as disclosed on page 75. At March 31, 2014, the Funds did not receive or post collateral with any counterparty for derivatives and no event occurred that triggered a credit-risk-related contingent feature.

The effect of such derivative instruments on the India Earnings Fund's financial position as reflected in the Statements of Assets and Liabilities is presented in the summary below:

| Fund | Asset Derivatives | | Liability Derivatives | |

Notes to Financial Statements (continued)

During the fiscal year ended March 31, 2014, the volume of derivative activity (based on the average of month-end balances) was as follows:

| Fund | Average Notional | |
|---|---|---|
| | Forward foreign currency contracts (to deliver) | Forward foreign currency contracts (to receive) |
| India Earnings Fund (consolidated) | | |
| Foreign exchange contracts | \$ 1,303,567 | \$ 677,664 |

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date, net of any foreign taxes withheld. Interest income including amortization of premiums and discounts, is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Foreign Currency Translation The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates prevailing on the respective dates of such transactions that are deemed appropriate by WTAM. Realized and unrealized foreign exchange gains and losses on investments are included as a component of net realized gain (loss) from investment transactions and net change in unrealized appreciation (depreciation) from investment transactions, respectively, on the Statement of Operations. Net realized and unrealized foreign exchange gains or losses arising from sales of foreign currencies, including gains and losses of forward foreign currency contracts, currency gains or losses recognized between the trade and settlement dates on investment transactions, and the difference between the amounts of dividends and foreign withholding taxes recorded on the Funds' books and the U.S. dollar equivalent of the amounts actually received or paid are included in net realized gain (loss) from forward foreign currency contracts and foreign currency related transactions and/or net change in unrealized appreciation (depreciation) from forward foreign currency contracts and translation of assets and liabilities denominated in foreign currencies on the Statement of Operations. Certain foreign exchange gains and losses included in realized and unrealized gains or losses are included in, or are a reduction of, ordinary income in accordance with U.S. Federal income tax regulations.

Expenses Under the investment advisory agreement for each Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions (which includes interest expense on loans); (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of trustees who are not interested persons of the Funds (Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's Chief Compliance Officer (CCO); (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM.

The internal expenses of pooled investments vehicles in which the Fund may invest (acquired fund fees and expenses) are not expenses of the Fund and are not paid by WTAM.

Pursuant to a separate contractual arrangement, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WTAM receives a fee, as shown on the Statements of Operations under Service fees, of up to 0.0044% of each Fund's average daily net assets for providing such services and paying such expenses. WTAM provides CCO services to the Trust.

Currency Transactions The India Earnings Fund may enter into forward foreign currency contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The India Earnings Fund does not expect to engage in currency transactions for the purpose of hedging against declines in the value of the Fund's assets that are denominated in one or more foreign currencies. The India Earnings Fund may not enter into such contracts for speculative purposes.

Forward Foreign Currency Transactions A forward foreign currency contract (Forward Contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A Forward Contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades.

Fluctuations in the value of open Forward Contracts are recorded for book purposes as unrealized gains or losses on Forward Contracts by the Funds. Realized gains and losses on Forward Contracts include net gains or losses recognized by the Funds on contracts which have matured or were sold.

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Funds' policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The cash collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The securities lending income earned by the Funds is disclosed on the Statements of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receive a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

As of March 31, 2014, the Funds did not have any securities on loan.

Master Netting Arrangements Accounting Standards Update No. 2011-11 Disclosures about Offsetting Assets and Liabilities (ASU 2011-11) is generally intended to (i) help investors and other financial statement users to better assess the effect or potential effect of offsetting arrangements on a company's financial position, (ii) improve transparency in the reporting of how companies mitigate credit risk, and (iii) facilitate comparisons between those entities that prepare their financial statements on the basis of GAAP and those entities that prepare their financial statements on the basis of international financial reporting standards. ASU 2011-11 requires entities to disclose (i) gross and net information about both instruments and transactions eligible for offset in the financial statements, and (ii) instruments and transactions subject to an agreement similar to a master netting agreement. ASU 2011-11 is limited in scope to the following financial instruments, to the extent they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement: (i) recognized derivative instruments accounted for under ASC 815 (Derivatives and Hedging); (ii) repurchase agreements and reverse repurchase agreements; and (iii) securities borrowing and securities lending transactions.

In order to better define its contractual rights and to secure rights that will help a Fund mitigate its counterparty risk, a Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (ISDA Master Agreement) or similar agreement with its counterparties. An ISDA Master Agreement is a bilateral agreement between a Fund and a counterparty that governs over-the-counter derivatives (OTC), including Forward Contracts, and typically contains, among other things, collateral posting terms, netting and rights of set-off provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, a Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and receivables to create a single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

Collateral requirements generally differ by type of derivative. Collateral terms are contract-specific for OTC derivatives (e.g. foreign exchange contracts, options and certain swaps). Generally, for transactions traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the marked to market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by a Fund and the counterparty. Generally, the amount of collateral due from or to a counterparty must

Edgar Filing: WisdomTree Trust - Form N-CSR

exceed a minimum transfer amount threshold before a transfer is required to be made. To the extent amounts due to a Fund from its derivatives counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance.

A Fund's security lending activities are governed by a Securities Lending Authorization Agreement (Lending Agreement) between the Fund and the lending agent. The Lending Agreement authorizes the lending agent to lend qualifying U.S. and foreign securities held by a Fund to approved borrowers (each a Borrower). To mitigate borrower risk, a Fund typically receives from a Borrower, collateral in the form of U.S. dollar cash and/or securities issued or guaranteed by the U.S. government or its agencies in excess of the market value of the securities loaned. Under the provisions of the Lending Agreement, a Fund shall have, as to the collateral, all of the rights and remedies of a secured party under applicable law. A Fund is exposed to risk of loss if a Borrower defaults on its obligation to return borrowed securities and the value of the collateral a Fund received is insufficient to cover the market value of the securities loaned. Also, the lending agent is permitted to invest the cash collateral it receives from a Borrower into a money market fund which is subject to market fluctuation. Therefore, a Fund is exposed to risk of loss if the value of invested cash collateral is insufficient to satisfy the Fund's obligation to return the full amount owed to such Borrower.

Notes to Financial Statements (continued)

For financial reporting purposes, the Funds elect to not offset assets and liabilities subject to an ISDA Master Agreement or Lending Agreement, if any, in the Statements of Assets and Liabilities. Therefore, all qualifying transactions, if any at March 31, 2014, are presented on a gross basis in the Statements of Assets and Liabilities. As of March 31, 2014, the impact of netting of assets and liabilities and the offsetting of collateral pledged or received based on contractual netting/set-off provisions in the ISDA Master Agreement and the Lending Agreement are detailed in the following table:

| Fund | Assets | | | Net Amount | Liabilities | | | Net Amount |
|---|--|---|---------------------|------------|--|---|--------------------|------------|
| | Gross Amounts Presented in the Statement of Assets and Liabilities | Gross Amounts Not Offset in the Statement of Assets and Liabilities | Collateral Received | | Gross Amounts Presented in the Statement of Assets and Liabilities | Gross Amounts Not Offset in the Statement of Assets and Liabilities | Collateral Pledged | |
| India Earnings Fund (consolidated) | | | | | | | | |
| Forward Foreign Currency Contracts | \$ | \$ | \$ | \$ | \$ 3,527 | \$ | \$ | \$ 3,527 |

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. government, its agencies, non-U.S. government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Banker s acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders It is each Fund s policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the Code). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company (RIC) under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. There can be no guarantee that a Fund will pay dividends. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with U.S. Federal income tax regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their U.S. Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions which exceed earnings and profit for tax purposes are reported as a tax return of capital. The India Earnings Fund has filed an election to treat the Portfolio as a pass-through entity for tax purposes.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM provides an investment program for each Fund. WTAM has arranged for MCM to provide sub-advisory services to the Funds. MCM is compensated by WTAM at no additional cost to the Funds. WTAM also arranges transfer agency, custody, fund accounting, fund administration, securities lending and all other non-distribution related services necessary for the Funds to operate, which are generally under separate agreements entered into between the Trust on behalf of the Funds and the applicable service provider. Under the investment advisory agreement for each Fund, WTAM agrees to pay all expenses of the Funds, except for certain expenses generally described in Note 2.

Pursuant to a separate contractual arrangement, as also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044% of each Fund s average daily net assets. WTAM expects to receive advisory fees from each Fund, based on a percentage of the Fund s average daily net assets, as shown in the following table:

Edgar Filing: WisdomTree Trust - Form N-CSR

| Fund | Advisory Fee Rate |
|---|------------------------------|
| Total Earnings Fund | 0.28% |

Each Fund may purchase shares of affiliated exchange traded funds in secondary market transactions. For the fiscal year ended March 31, 2014, WTAM waived its advisory fees for each Fund's investment associated with daily uninvested cash in correlated affiliated Funds net of any incremental costs as a result of these transactions (fund accounting, safekeeping, transaction fees, etc.) that are paid by WTAM out of the advisory fee received from the affiliated Funds. Please see Note 8 for additional information on Other Affiliated Parties and Transactions. The table below indicates the waiver.

4. CAPITAL SHARE TRANSACTIONS

As of March 31, 2014, there was an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in creation units or multiples thereof. Except when aggregated in creation units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of creation units of a Fund generally consists of the in-kind contribution of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund's underlying Index and an amount of cash. The India Earnings Fund issues and redeems shares on a cash basis only. Investors purchasing and redeeming creation units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of creation units.

5. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments (excluding in-kind capital share transactions and short-term investments) for the fiscal year ended March 31, 2014 were as follows:

* Under the recently enacted Regulated Investment Company Modernization Act of 2010, a Fund is permitted to carry forward any new capital losses for an unlimited period. Additionally, such capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law. The character of these losses is noted above.

Capital losses incurred after October 31 (post-October capital losses) and within the taxable year are deemed to arise on the first business day of each Fund 's next taxable year.

Table of Contents**Notes to Financial Statements** (continued)

During the fiscal year ended March 31, 2014, the following Funds incurred and will elect to defer post October capital losses as follows:

| Fund | Short-Term Post-October Capital Losses | Long-Term Post-October Capital Losses |

These differences are primarily due to redemption-in-kind, foreign currency transactions, and Passive Foreign Investment Companies (PFICs).

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the fiscal year ended March 31, 2014, the Funds did not have any liabilities for unrecognized tax benefits. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with the Internal Revenue Service, the State of New York, and various other states, and with respect to the India Earnings Fund, the Republic of Mauritius. Generally, each of the tax years in the four-year period ended March 31, 2014, remains subject to examination by taxing authorities.

7. MAURITIUS INCOME TAX

Edgar Filing: WisdomTree Trust - Form N-CSR

The taxable profits derived from the worldwide income of the wholly owned subsidiary of the India Earnings Fund, the Portfolio, is subject to income tax at the rate of 15% in the Republic of Mauritius. As with all Mauritian tax residents, the Portfolio is entitled to a foreign tax credit (FTC) on its foreign sourced income. The FTC is based on the lower of the Mauritian tax or the foreign taxes suffered. Where documentary evidence is not available to substantiate the foreign taxes suffered, the FTC can be presumed to be 80% of the Mauritius tax on its foreign source income. The presumed FTC effectively reduces the Mauritian income tax rate on the foreign sourced income of the Portfolio to a maximum of 3%. Interest income on call and deposit accounts with Mauritian banks is

During the fiscal year ended March 31, 2014, the India Earnings Fund had a demand note agreement with Bank of America, N.A. which allowed the Fund to borrow up to \$126,319,000 and having a final maturity date of October 7, 2013. During the fiscal year ended March 31, 2014, the Fund utilized the demand note and borrowed for a period of 14 days with an average outstanding note balance of \$50,749,286 and a weighted average interest rate of 2.56% per annum. Interest expense related to the note for the fiscal year ended March 31, 2014 was \$49,734. At March 31, 2014, the Fund did not have any amounts outstanding under the demand note agreement.

10. RECENT ACCOUNTING PRONOUNCEMENT

In June 2013, the FASB issued Accounting Standards Update 2013-08 Financial Services-Investment Companies (ASU 2013-08). ASU 2013-08 provides clarifying guidance to determine if an entity qualifies as an investment company. ASU 2013-08 also requires an investment company to measure non-controlling interests in other investment companies at fair value. The following disclosures will also be required upon adoption of ASU 2013-08: (i) whether an entity is an investment company and is applying the accounting and reporting guidance for investment companies; (ii) information about changes, if any, in an entity's status as an investment company; and (iii) information about financial support provided or contractually required to be provided by an investment company to any of its investees. The requirements of ASU 2013-08 are effective for fiscal years that begin after December 15, 2013.

At this time, management is evaluating the implications of ASU 2013-08 and its impact on the Trust's financial statements.

11. ADDITIONAL INFORMATION

In September 2013, the Funds entered into agreements to change transfer agency, custody, fund accounting, fund administration and securities lending services from Bank of New York Mellon to State Street Bank and Trust Company, effective April 1, 2014.

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders of WisdomTree Trust:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of WisdomTree Total Earnings Fund, WisdomTree Earnings 500 Fund, WisdomTree MidCap Earnings Fund, WisdomTree SmallCap Earnings Fund, WisdomTree LargeCap Value Fund and WisdomTree India Earnings Fund (consolidated) (six of the investment funds constituting WisdomTree Trust (the "Trust")) as of March 31, 2014, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2014, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of WisdomTree Total Earnings Fund, WisdomTree Earnings 500 Fund, WisdomTree MidCap Earnings Fund, WisdomTree SmallCap Earnings Fund, WisdomTree LargeCap Value Fund and WisdomTree India Earnings Fund (consolidated) of WisdomTree Trust at March 31, 2014, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com, or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing. There are risks associated with investing, including possible loss of principal. Past performance does not guarantee future results. Indexes are unmanaged and you cannot invest directly in an index.

There are risks associated with investing, including possible loss of principal. Funds focusing their investments on certain sectors and/or smaller companies increase their vulnerability to any single economic or regulatory development. This may result in greater share price volatility. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. The WisdomTree India Earnings Fund focuses its investments in India, thereby increasing the impact of events and developments associated with the region which can adversely affect performance. Investments in emerging, offshore or frontier markets such as India are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Due to the investment strategy of certain Funds they may make higher capital gain distributions than other ETFs. Please read the Fund s prospectus for specific details regarding the Fund s risk profile.

Transactions in Fund shares will result in brokerage commissions and will generate tax consequences. Shares may be sold through brokerage accounts, but may be redeemed from the Funds only in large amounts of 50,000 shares or more.

Table of Contents**Management's Discussion of Funds Performance** (audited)**Market Environment Overview**

The international equity markets, measured by the MSCI EAFE Index, a broad measure of equity performance for the developed world outside the U.S. and Canada, returned 17.56% in the 12-month period that ended March 31, 2014 (the period). Compared to peak levels reached in 2007, the MSCI EAFE Index is still down on a cumulative basis by approximately 3%. The emerging markets, shown through the MSCI Emerging Markets Index, failed to keep pace with the developed world markets for the period. The MSCI Emerging Markets Index returned -1.43%, which was over 23 percentage points behind the S&P 500 Index and almost 19 percentage points behind the MSCI EAFE Index.

Although the MSCI EAFE Index lagged the broad U.S. domestic markets, it was still a strong performance year for international equity markets. The ability for the European region to return to positive economic growth and see peripheral debt concerns abate significantly helped the international equity markets trend higher. Also, Japan helped contribute with strong positive performance, mainly due to broad monetary and fiscal stimulus enacted by Prime Minister Shinzo Abe with the goal of stimulating inflation and invigorating the economy. Broad emerging market equities continued to lag both U.S. and international developed markets. It seems investors have continued to sell higher risk emerging market equities to try and catch the performance of the U.S. and developed international markets. This trend has resulted from a continual slowdown of Chinese economic growth and fears that higher interest rates in the U.S. could be negative for emerging market countries.

All of the sectors within the MSCI EAFE Index had positive performance over the period, but returns in the Telecommunication Services, Consumer Discretionary and Utilities sectors were the best performers. The Telecommunications and Utilities sectors typically utilize higher leverage on their balance sheets so they benefited from the lowered financing costs across the European periphery as fears of a Eurozone debt crisis passed. The Consumer Discretionary sector tends to be an economically sensitive sector, so it was able to benefit from the region returning to positive growth and improvements in consumer sentiment. The Energy and Materials sectors were two of the worst performing sectors over the period and this can be partly attributed to a slower than expected demand from emerging market countries. As a result, a similar story unfolded in the emerging markets, with the Energy and Materials sectors recording negative performances over the period.

WisdomTree Funds Performance Overview

Measured in local currency, the MSCI EAFE Index returned 15.41% over the period. The foreign currency component of the developed world returns added approximately 2 percentage points to the returns of the MSCI EAFE Index. During the period, both the euro and pound appreciated against the U.S. dollar, strengthening by over 7% and 9%, respectively. On the other hand, the Japanese yen depreciated by over 8% against the U.S. dollar. Weakening currencies relative to the U.S. dollar decrease the value of foreign investments measured in U.S. dollars and tend to decrease returns experienced by U.S. investors who invest overseas, while strengthening currencies relative to the U.S. dollar have the opposite effect.

The following table reflects the WisdomTree International Dividend and Sector Funds performance versus capitalization-weighted benchmark indexes:

WisdomTree's international dividend-weighted funds are designed to track indexes based on the dividend stream generated by the companies included in the index. The dividend stream is defined as the sum of all dividends paid over the prior 12 months for each company. There are two primary factors that drive performance differentials versus market cap-weighted benchmarks. The first is aggregate exposure to one or more sectors

2 WisdomTree International Dividend and Sector Funds

Table of Contents

Management's Discussion of Funds Performance (audited) (concluded)

or countries. The second is stock selection within each sector or country. Both of these are determined as part of WisdomTree's rules-based index methodology. These exposures are not subjectively determined. Rather, they are objectively determined at the Index rebalancing dates based on the dividend stream.

The best performing Fund for the year was the WisdomTree Europe SmallCap Dividend Fund. Smaller capitalization firms led the European equity markets higher after the region seemed able to avert a peripheral debt crisis and economic indicators pointed towards expansion. The WisdomTree Europe SmallCap Dividend Fund returned 53.06% for the period. The Fund's benchmark, the MSCI Europe Small Cap Index returned 40.44% for the same period. Performance among large capitalization firms within Europe were also positive, with the WisdomTree Europe Hedged Equity Fund returning 15.73%, but they were unable to keep pace with smaller capitalization firms. Many larger firms tend to be export focused, so the strengthening currencies provided a headwind for revenue growth. The euro strengthened over 7% during the period, which further negatively impacted the WisdomTree Europe Hedged Equity Fund since the Fund hedges the exposure of the euro.

The WisdomTree Japan Hedged Equity Fund delivered a 13.48% return over the year, most of it coming in the 2013 calendar part of the period. Japan's economic policy, aggressive inflation target and accommodative central bank helped equities march higher. The yen weakened over 8 percent during the time period which helped contribute to the positive performance of the WisdomTree Japan Hedged Equity Fund. As a result of yen weakening, the WisdomTree Japan Small Cap Dividend Fund was only able to return 5.41% for the period since it does not hedge against the currency.

While the overall emerging markets lagged both the broad U.S. and developed international markets, there was a noticeable difference in performance between the different sectors and countries. The WisdomTree Emerging Markets Equity Income Fund returned -6.22%, while the MSCI Emerging Markets Index was down -1.43% for the period. The WisdomTree Emerging Market Equity Income Fund was overweight more economic cyclical sectors like Energy and Materials, while underweight more consumer focused sectors like Consumer Discretionary and Information Technology. While the consumer focused sectors have had positive performance over the past few years, we do not feel the fundamentals have improved commensurately. At the same time, although the Energy and Materials sectors continue to underperform in the emerging markets, we feel the fundamentals, in general, have seen improvement.

Fund returns are shown at NAV. Please see Performance Summaries on the subsequent pages for more complete performance information.

Fund performance assumes reinvestment of dividends and capital gain distributions. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Funds' performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. Past performance is no guarantee of future results. The WisdomTree DEFA Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dividend Index of Europe, Far East Asia and Australasia (the WisdomTree DEFA Index).

The Fund returned 19.43% at net asset value (NAV) for the fiscal year ending March 31, 2014 (for more complete performance information please see the chart below). The Fund benefited from its investment in France, which contributed positively to performance. The Fund's position in Hong Kong detracted from performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV

return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

The Fund seeks to provide Japanese equity returns while mitigating or hedging against fluctuations between the value of the Japanese yen and the U.S. dollar.

The Fund returned 13.48% at net asset value (NAV) for the fiscal year ending March 31, 2014 (for more complete performance information please see the chart below). The Fund benefited most from its investment in the Information Technology sector, which had positive performance. The Fund's position in the Health Care sector was a drag on the Fund's performance as the sector provided negative returns.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV

Edgar Filing: WisdomTree Trust - Form N-CSR

return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **As of the Fund's current prospectus dated August 1, 2013, the Fund's annual expense ratio was 0.48%.**

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on June 16, 2006.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **As of the Fund's current prospectus dated August 1, 2013, the Fund's annual expense ratio was 0.58%.**

The Fund returned 44.12% at net asset value (NAV) for the fiscal year ending March 31, 2014 (for more complete performance information please see the chart below). The Fund's position in the United Arab Emirates was the greatest contributor to performance while its position in Jordan contributed the least to performance.

Edgar Filing: WisdomTree Trust - Form N-CSR

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **As of the Fund's current prospectus dated August 1, 2013, the Fund's annual expense ratio was 0.88%.**

¹ WisdomTree International Real Estate Index through June 17, 2011; WisdomTree Global ex-U.S. Real Estate Index thereafter.

² Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on June 5, 2007.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **As of the Fund's current prospectus dated August 1, 2013, the Fund's annual expense ratio was 0.63%.**

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The WisdomTree Korea Hedged Equity Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Korea Hedged Equity Index.

The Fund returned -5.97% at net asset value (NAV) since its inception on November 7, 2013 through March 31, 2014 (for more complete performance information please see the chart below). The Fund benefited from its position in Consumer Staples. The Fund's position in Materials created a drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to

Edgar Filing: WisdomTree Trust - Form N-CSR

calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **As of the Fund's current prospectus dated October 25, 2013, the Fund's annual expense ratio was 0.58%.**

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2013 to March 31, 2014.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled *Expenses Paid During the Period 10/01/13 to 3/31/14* to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

- ² Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. The total return would have been lower if certain expenses had not been reimbursed/waived by the investment adviser (Note 2 and 3).
- ³ The ratios to average net assets do not include net investment income (loss) or expenses of other Funds in which the Fund Invests.
- ⁴ Annualized.
- ⁵ Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

² Based on average shares outstanding.

³ Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. The total return would have been lower if certain expenses had not been waived by the investment adviser (Note 2 and 3).

⁴ The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.

⁵ Annualized.

⁶ Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (WisdomTree Investments). WisdomTree Investments is the parent company of WisdomTree Asset Management, Inc. (WTAM), the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified.

In the normal course of business the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification) is the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

176 WisdomTree International Dividend and Sector Funds

Table of Contents**Notes to Financial Statements** (continued)

The following is a summary of significant accounting policies followed by the Funds:

Use of Estimates The preparation of financial statements in conformity with GAAP, requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

Investment Valuation The net asset value (NAV) of each Fund 's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund 's net assets by the number of Fund shares outstanding. Each Fund issues and redeems shares at NAV only in large blocks of shares known as creation units, which only certain institutions or large investors may purchase or redeem. Shares of each Fund are listed on a national securities exchange and trade at market prices. Most investors will buy and sell shares through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV or less than NAV. In calculating each Fund 's NAV, investments are valued under policies approved by the Board of Trustees.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value. Each Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded. Forward foreign currency contracts are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m. London time for Europe and the Americas and Tullett Prebon closing spot and forward rates as of 2:00 p.m. Singapore time for Asia.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund 's investments will be fair valued in accordance with the Fund 's pricing policy. The Board of Trustees of the Trust has established a pricing committee (the Pricing Committee) which is comprised of senior representatives of WTAM and which reports to the Board of Trustees on a quarterly basis. In the event that a financial instrument cannot be valued based upon a price from a national securities exchange, independent pricing service provider or broker quotation, or such prices are deemed to not reflect current market value, the Pricing Committee may value the financial instrument in good faith under the policies and procedures approved by the Board of Trustees based on current facts and circumstances. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events . An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund 's next NAV calculation time that may materially affect the value of a Fund 's investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. The Funds may rely on an independent fair valuation service in adjusting the valuations of foreign securities. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy of inputs to be used when determining fair value measurements for disclosure purposes, including assumptions about risk for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity 's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Edgar Filing: WisdomTree Trust - Form N-CSR

Level 3 significant unobservable inputs (including each Fund's assumptions in determining the fair value of investments)

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as

WisdomTree International Dividend and Sector Funds 177

Table of Contents**Notes to Financial Statements** (continued)

amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation or market activity; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The valuation techniques and significant inputs used in determining the fair market value measurements for Level 2 and Level 3 positions are as follows:

Financial instruments are generally valued by independent pricing service providers that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. Depending on the type of financial instrument, the independent pricing service providers internal pricing models may use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Financial instruments that use similar valuation techniques and observable inputs as described above and have an appropriate level of activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy. Over-the-counter financial derivative instruments derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These instruments are normally valued on the basis of broker-dealer quotations or independent pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative instruments can be estimated by an independent pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, credit risks/spreads, interest rates, yield curves, default and exchange rates. Derivative contracts that use valuation techniques and observable inputs as described above and have an appropriate level of activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate.

Determination of a fair value by the Pricing Committee value may include significant unobservable inputs and therefore would be reflected as a Level 3 of the fair value hierarchy. The Pricing Committee may employ a market-based valuation approach which may use, among other potential considerations, related or comparable securities, recent transactions, market multiples, book values, and other relevant information to determine fair value. The Pricing Committee may also use an income-based valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. The Pricing Committee meets at least on a monthly basis to review and discuss the appropriateness of such fair values using more current information such as, recent security news, recent market transactions, updated corporate action information and/or other macro or security specific events. Also, when observable inputs become available, the Pricing Committee conducts back testing of the methodologies used to value Level 3 financial instruments to substantiate the unobservable inputs used to value those investments. Such back testing includes comparing Level 3 investment values to observable inputs such as exchange-traded prices, transaction prices, and/or vendor prices.

The following is a summary of the fair valuations according to inputs used as of March 31, 2014 in valuing each Fund's assets:

* Please refer to Schedule of Investments for a breakdown of the valuation by industry type and country.

** Includes Level 3 security valued at \$0. Security is being fair valued by the Pricing Committee under the direction of the Board of Trustees.

No transfers between Level 1 or Level 2 fair value measurements occurred during the fiscal year or period ended March 31, 2014. Transfers into Level 3 during the fiscal year or period ended March 31, 2014 occurred primarily due to the lack of observable market data. The Funds have elected to use the beginning of period method for transfers between fair value measurement levels.

Derivatives and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds have invested in derivatives, specifically forward foreign currency contracts for the year ended March 31, 2014 which are detailed in the tables herein. The Funds' derivative agreements contain credit-risk related contingent features which include, but are not limited to, a percentage decline in the Funds' NAV over a specified time period. If an event occurred at March 31, 2014 that triggered a contingent feature, the counterparty to the agreement may require the Funds to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivatives agreements with credit-risk related contingent

Edgar Filing: WisdomTree Trust - Form N-CSR

features would be the total value of

derivatives in net liability positions for each Fund, as disclosed on page 193. At March 31, 2014, the Funds did not receive or post collateral with any counterparty for derivatives and no event occurred that triggered a credit-risk-related contingent feature.

The Funds listed below have invested in derivatives, specifically forward foreign currency contracts for the fiscal year or period ended March 31, 2014, which are detailed in the table herein. All of the derivative instruments disclosed and described herein are subject to

credit risk. Credit risk is where the financial condition of an issuer of a security or instrument may cause it to default or become unable to pay interest or principal due on the investment. Risks may arise upon entering into forward foreign currency contracts from the potential inability of a counterparty to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

The effect of such derivative instruments on each Fund's financial position as reflected in the Statements of Assets and Liabilities are presented in the summary below:

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date, net of any foreign taxes withheld. Interest income including amortization of premiums and discounts, is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Foreign Currency Translation The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates prevailing on the respective dates of such transactions that are deemed, appropriate by WTAM. Realized and unrealized foreign exchange gains and losses on investments are included as a component of net realized gain (loss) from investment transactions and net change in unrealized appreciation

(depreciation) from investment transactions, respectively, on the Statement of Operations. Net realized and unrealized foreign exchange gains or losses arising from sales of foreign currencies, including gains and losses of forward foreign currency contracts, currency gains or losses recognized between the trade and settlement dates on investment transactions, and the difference between the amounts of dividends and foreign withholding taxes recorded on the Funds' books and the U.S. dollar equivalent of the amounts actually received or paid are included in net realized gain (loss) from forward foreign currency contracts and foreign currency related transactions and/or net change in unrealized appreciation (depreciation) from forward foreign currency contracts and translation of assets and liabilities denominated in foreign currencies in the Statement of Operations. Certain foreign exchange gains and losses included in realized and unrealized gains or losses are included in, or are a reduction of, ordinary income in accordance with U.S. Federal income tax regulations.

Fund, Germany Hedged Equity Fund, and Korea Hedged Equity Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of trustees who are not interested persons of the Funds (Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's Chief Compliance Officer (CCO); (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM. The internal expenses of pooled investment vehicles in which a Fund may invest (acquired fund fees and expenses) are not expenses of the Fund and are not paid by WTAM.

Under the investment advisory agreement for Japan Hedged SmallCap Equity Fund, United Kingdom Hedged Equity Fund, Emerging Markets Dividend Growth Fund, Emerging Markets Consumer Growth Fund, Germany Hedged Equity Fund, and Korea Hedged Equity Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions (including without limitation any fees, charges, taxes, levies or expenses related to the purchase or sale of an amount of any currency, or the patriation or repatriation of any security or other asset, related to the execution of portfolio transactions or any creation or redemption transactions); (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's CCO; (vi) extraordinary expenses (in each case as determined by a majority of the Independent Trustees); (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; (viii) interest and taxes of any kind or nature (including, but not limited to, income, excise, transfer and withholding taxes); (ix) fees and expenses related to the provision of securities lending services; and (x) the advisory fee payable to WTAM.

The internal expenses of pooled investment vehicles in which the Fund may invest (acquired fund fees and expenses) are not expenses of the Fund and are not paid by WTAM.

Pursuant to a separate contractual arrangement, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WTAM receives a fee, as shown on the Statements of Operations under Service fees, of up to 0.0044% of each Fund's average daily net assets for providing such services and paying such expenses. WTAM provides CCO services to the Trust.

Currency Transactions The Funds may enter into forward foreign currency contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The Funds, other than Japan Hedged Equity Fund, Europe Hedged Equity Fund, United Kingdom Hedged Equity Fund, Japan Hedged SmallCap Equity Fund, Germany Hedged Equity Fund, and Korea Hedged Equity Fund, do not expect to engage in currency transactions for the purpose of hedging against declines in the value of a Fund's assets that are denominated in one or more foreign currencies. The Funds may not enter into such contracts for speculative purposes.

Forward Foreign Currency Contracts A forward foreign currency contract (Forward Contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A Forward Contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades.

Fluctuations in the value of open Forward Contracts are recorded for book purposes as unrealized gains or losses on Forward Contracts by the Funds. Realized gains and losses on Forward Contracts include net gains or losses recognized by the Funds on contracts which have matured or were sold.

The following Forward Contracts were open at March 31, 2014:

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Funds' policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The cash collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. The value of the investment of cash collateral for securities on loan along with the obligation to return such collateral are included on the Statements of Assets and Liabilities. The value of securities received as collateral for securities on loan are not included on the Statement of Assets and Liabilities because the receiving Fund does not have the right to sell or repledge the securities received as collateral. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The securities lending income earned by the Funds is disclosed on the Statements of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receive a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

Master Netting Arrangements Accounting Standards Update No. 2011-11 Disclosures about Offsetting Assets and Liabilities (ASU 2011-11) is generally intended to (i) help investors and other financial statement users to better assess the effect or potential effect of offsetting arrangements on a company's financial position, (ii) improve transparency in the reporting of how companies mitigate credit risk, and (iii) facilitate comparisons between those entities that prepare their financial statements on the basis of GAAP and those entities that prepare their financial statements on the basis of international financial reporting standards. ASU 2011-11 requires entities to disclose (i) gross and net information about both instruments and transactions eligible for offset in the financial statements, and (ii) instruments and transactions subject to an agreement similar to a master netting agreement. ASU 2011-11 is limited in scope to the following financial instruments, to the extent they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement: (i) recognized derivative instruments accounted for under ASC 815 (Derivatives and Hedging); (ii) repurchase agreements and reverse repurchase agreements; and (iii) securities borrowing and securities lending transactions.

In order to better define its contractual rights and to secure rights that will help a Fund mitigate its counterparty risk, a Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (ISDA Master Agreement) or similar agreement with its counterparties. An ISDA Master Agreement is a bilateral agreement between a Fund and a counterparty that governs over-the-counter derivatives (OTC), including forward foreign currency contracts, and typically contains, among other things, collateral posting terms, netting and rights of set-off provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, a Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and receivables to create a single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

Collateral requirements generally differ by type of derivative. Collateral terms are contract-specific for OTC derivatives (e.g. foreign exchange contracts, options and certain swaps). Generally, for transactions traded under an ISDA Master Agreement, the collateral requirements are calculated by netting the marked to market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by a Fund and the counterparty. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold before a transfer is required to be made. To the extent amounts due to a Fund from its derivatives counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance.

Edgar Filing: WisdomTree Trust - Form N-CSR

A Fund's security lending activities are governed by a Securities Lending Authorization Agreement ("Lending Agreement") between the Fund and the lending agent. The Lending Agreement authorizes the lending agent to lend qualifying U.S. and foreign securities held by a Fund to approved borrowers (each a "Borrower"). To mitigate borrower risk, a Fund typically receives from a Borrower, collateral in the form of U.S. dollar cash and/or securities issued or guaranteed by the U.S. government or its agencies in excess of the market value of the securities loaned. Under the provisions of the Lending Agreement, a Fund shall have, as to the collateral, all of the rights and remedies of a secured party under applicable law. A Fund is exposed to risk of loss if a Borrower defaults on its obligation to return borrowed securities and the value of the collateral a Fund received is insufficient to cover the market value of the securities loaned. Also, the lending agent is permitted to invest the cash collateral it receives from a Borrower into a money market fund which is subject to market fluctuation. Therefore, a Fund is exposed to risk of loss if the value of invested cash collateral is insufficient to satisfy the Fund's obligation to return the full amount owed to such Borrower.

For financial reporting purposes, the Funds elect to not offset assets and liabilities subject to an ISDA Master Agreement or Lending Agreement, if any, in the Statements of Assets and Liabilities. Therefore, all qualifying transactions are presented on a gross basis in the Statements of Assets and Liabilities. As of March 31, 2014, the impact of netting of assets and liabilities and the offsetting of collateral pledged or received based on contractual netting/set-off provisions in the ISDA Master Agreement and the Lending Agreement are detailed in the following table:

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. government, its agencies, non-U.S. government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders It is each Fund's policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the Code). Each Fund intends to qualify for and to elect treatment as a separate

Table of Contents**Notes to Financial Statements** (continued)

Regulated Investment Company (RIC) under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. There can be no guarantee that a Fund will pay dividends. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with U.S. Federal Income Tax Regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions, which exceed earnings and profit for tax purposes, are reported for tax purposes as a return of capital.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM also provides an investment program for each Fund. WTAM has arranged for Mellon Capital Management Corporation (MCM) to provide sub-advisory services to each of the Funds. MCM is compensated by WTAM at no additional cost to the Funds. WTAM also arranges for transfer agency, custody, fund accounting, fund administration, securities lending, and all other non-distribution related services necessary for the Funds to operate, which are generally under separate agreements entered into between the Trust on behalf of the Funds and the applicable service provider. Under the investment advisory agreement for each Fund, WTAM agrees to pay all expenses of the Funds, except for certain expenses generally described in Note 2. Prior to February 1, 2014, China Dividend ex-Financials Fund was sub-advised by Old Mutual Global Index Trackers (Proprietary) Limited.

Pursuant to a separate contractual arrangement, as also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044% of each Fund's average daily net assets. WTAM expects to receive advisory fees from each Fund, based on a percentage of the Fund's average daily net assets as shown in the following table:

Each Fund may purchase shares of affiliated exchange-traded funds in secondary market transactions. For the fiscal year or period ended March 31, 2014, WTAM waived its advisory fees for each Fund's investment associated with daily uninvested cash in correlated affiliated Funds net of any incremental costs as a result of these transactions (fund accounting, safekeeping, transaction fees, etc.) that are paid by WTAM out of the advisory fee received from the affiliated Funds. The table below indicates the waiver amounts. Please see Note 7 for additional information on Other Affiliated Parties and Transactions.

4. CAPITAL SHARE TRANSACTIONS

As of March 31, 2014, there was an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in creation units or multiples thereof. Except when aggregated in creation units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of creation units of a Fund generally consist of the in-kind contribution of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund's underlying Index and an amount of cash. The Middle East Dividend Fund issues and redeems shares on a cash basis only. Investors purchasing and redeeming creation units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of creation units.

* Under the recently enacted Regulated Investment Company Modernization Act of 2010, a Fund is permitted to carry forward any new capital losses for an unlimited period. Additionally, such capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law. The character of these losses is noted above.

Capital losses incurred after October 31 (post-October capital losses) and with the taxable year are deemed to arise on the first business day of each Fund 's next taxable year.

During the fiscal year or period ended March 31, 2014, the following Funds incurred and will elect to defer post-October capital losses and late year ordinary losses as follows:

The differences are primarily due to redemptions-in-kind, currency gain/loss, Passive Foreign Investment Companies (PFICs), the tax treatment of income earned from investments in partnerships, non-deductible expenses, taxable overdistributions, the tax treatment of net operating losses, and the utilization of earnings and profits distributed to shareholders on redemption of shares.

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the fiscal year or period ended March 31, 2014, the Funds did not have any liabilities for unrecognized tax benefits relating to uncertain income tax positions they have taken or expect to take in the future. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with the Internal Revenue Service, the State of New York, and various other states. Generally, each of the tax years in the four-year period ended March 31, 2014, remains subject to examination by taxing authorities.

8. RECENT ACCOUNTING PRONOUNCEMENT

In June 2013, the FASB issued Accounting Standards Update 2013-08 Financial Services-Investment Companies (ASU 2013-08). ASU 2013-08 provides clarifying guidance to determine if an entity qualifies as an investment company. ASU 2013-08 also requires an investment company to measure non-controlling interests in other investment companies at fair value. The following disclosures will also be required upon adoption of ASU 2013-08: (i) whether an entity is an investment company and is applying the accounting and reporting guidance for investment companies; (ii) information about changes, if any, in an entity's status as an investment company; and (iii) information about financial support provided or contractually required to be provided by an investment company to any of its investees. The requirements of ASU 2013-08 are effective for fiscal years that begin after December 15, 2013.

At this time, management is evaluating the implications of ASU 2013-08 and its impact on the Trust's financial statements.

9. ADDITIONAL INFORMATION

In September 2013, the Funds entered into agreements to change transfer agency, custody, fund accounting, fund administration and securities lending services from Bank of New York Mellon to State Street Bank and Trust Company, effective April 1, 2014.

These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2014, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of WisdomTree DEFA Fund, WisdomTree DEFA Equity Income Fund, WisdomTree Global Equity Income Fund, WisdomTree Europe SmallCap Dividend Fund, WisdomTree Japan Hedged Equity Fund, WisdomTree Global ex-U.S. Dividend Growth Fund, WisdomTree Japan SmallCap Dividend Fund, WisdomTree Asia Pacific ex-Japan Fund, WisdomTree Australia Dividend Fund, WisdomTree International LargeCap Dividend Fund, WisdomTree International Dividend ex-Financials Fund, WisdomTree International MidCap Dividend Fund, WisdomTree International SmallCap Dividend Fund, WisdomTree Emerging Markets Equity Income Fund, WisdomTree Emerging Markets SmallCap Dividend Fund, WisdomTree Middle East Dividend Fund, WisdomTree Europe Hedged Equity Fund, WisdomTree Commodity Country Equity Fund, WisdomTree Global Natural Resources Fund, WisdomTree Global ex-U.S. Utilities Fund, WisdomTree Global ex-U.S. Real Estate Fund, WisdomTree China Dividend ex-Financials Fund, WisdomTree United Kingdom Hedged Equity Fund, WisdomTree Japan Hedged SmallCap Equity Fund, WisdomTree Emerging Markets Dividend Growth Fund, WisdomTree Emerging Markets Consumer Growth Fund, WisdomTree Germany Hedged Equity Fund and WisdomTree Korea Hedged Equity Fund of WisdomTree Trust at March 31, 2014, the results of their operations, the changes in their net assets and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Approval of Investment Advisory and Sub-Advisory Agreements (unaudited)

Approval of Investment Advisory and Sub-Investment Advisory Agreements with respect to WisdomTree Germany Hedged Equity Fund and WisdomTree Korea Hedged Equity Fund

At a meeting held on June 12, 2013, the Board of Trustees (the Board) of the WisdomTree Trust (the Trust), including those trustees who are not interested persons (as defined in the Investment Company Act of 1940, as amended) of the Trust (the Independent Trustees), considered the approval of the Investment Advisory Agreement (the Agreement) between the Trust and WisdomTree Asset Management, Inc. (WTAM) with respect to WisdomTree Germany Hedged Equity Fund and WisdomTree Korea Hedged Equity Fund (each, a Fund and collectively, the Funds) pursuant to which WTAM will provide the Funds with investment advisory services, and the Sub-Investment Advisory Agreement (together with the Agreement, the Agreements) pursuant to which Mellon Capital Management Corporation (MCM) will coordinate the investment and reinvestment of the assets of the Funds.

In considering whether to approve the Agreements, the Board considered and discussed information and analysis provided by WTAM. The Board was assisted in its review by independent legal counsel. In considering the approval of the Agreements, the Board considered all factors that it deemed to be relevant, including those discussed below. The Board did not identify any particular factor as controlling, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of Services to be Provided

The Board considered the nature, extent and quality of the services to be provided by WTAM and MCM, recognizing WTAM's and MCM's operational capabilities and resources. The Board noted the extensive responsibilities that WTAM has as investment adviser to the Funds, including the selection of MCM, oversight of MCM's compliance with Fund policies and objectives, oversight of general Fund compliance with federal and state laws, and the implementation of Board directives as they relate to the Funds.

Comparative Analysis of the Funds' Performance, Advisory Fees and Fund Expenses

As the Funds had not yet commenced operations, the Board was not able to review the Funds' performance. The Board discussed with WTAM representatives the portfolio management personnel and the investment strategies to be employed in management of the Funds' assets. The Board considered the fee to be paid to WTAM by the Funds. The Board examined the fee to be paid by each Fund in light of fees paid to other investment advisers by comparable funds and the method of computing each Fund's fee. The Board also considered the fees to be paid to MCM in relation to the fees paid to WTAM by the Funds and the respective services to be provided. The Board noted that MCM's fees will be paid by WTAM (out of its fees paid by the Funds) and not the Funds. After comparing the Funds' fees with those of comparable funds, the Board concluded that the proposed level of fees for each Fund is reasonable and appropriate.

Costs of Services to be Provided, Profitability and Economies of Scale

As the Funds had not yet commenced operations, WTAM representatives were not able to review with the Board the dollar amount of expenses allocated and profit received by WTAM, or any economies of scale. The Board considered potential benefits to WTAM and MCM from acting as investment adviser and sub-investment adviser, respectively, to the Funds, including the potential fall-out benefits to MCM and its affiliates (i.e., ancillary benefits that may be realized by MCM and its affiliates from MCM's relations with the Funds, such as other service contracts). The Trustees also considered the uncertainty of the estimated asset levels and the renewal requirements for advisory agreements, as well as their ability to review the advisory fees annually after the initial term of the Agreements.

Conclusion

After consideration of the factors discussed above, the Board, including a majority of the Independent Trustees, determined that the approval of the Agreements was in the best interests of each Fund and approved the Agreements for the Funds.

Approval of Sub-Investment Advisory Agreement with respect to WisdomTree China Dividend Ex-Financials Fund

At a meeting held on December 11, 2013 (the Meeting), the Board, including the Independent Trustees, unanimously approved the appointment of MCM to serve as sub-adviser to the WisdomTree China Dividend ex-Financials Fund (the China Fund). MCM replaced Old Mutual Global

Edgar Filing: WisdomTree Trust - Form N-CSR

Index Trackers (Proprietary) Limited (Old Mutual) as the sub-adviser to the China Fund.

At the Meeting, the Board, including the Independent Trustees, considered the approval of the investment sub-advisory agreement (the China MCM Agreement) between WTAM and MCM pursuant to which MCM will coordinate the investment and reinvestment of the China Fund s assets. The China MCM Agreement replaced the investment sub-advisory agreement between WTAM and Old Mutual, dated November 20, 2012, with respect to the China Fund (the Old Mutual Agreement), which was terminated as of the close of business on January 31, 2014. The Board determined that the change in sub-adviser was in the best interests of Fund shareholders due to, among other matters, the factors set forth below.

Approval of Investment Advisory and Sub-Advisory Agreements (unaudited) (concluded)

In considering whether to approve the China MCM Agreement, the Board considered and discussed information and analysis provided by WTAM. The Board was assisted in its review by independent legal counsel. In considering the approval of the China MCM Agreement, the Board considered all factors that it deemed to be relevant, including those discussed below. The Board did not identify any particular factor as controlling, and each Trustee may have attributed different weights to the various factors.

Nature, Extent and Quality of Services to be Provided

The Board considered the nature, extent and quality of the services to be provided by MCM, recognizing MCM's operational capabilities and resources. Representatives of WTAM noted that MCM currently acts as sub-adviser for the WisdomTree suite of equity strategies with the exception of the China Fund, which has used Old Mutual for sub-advisory services since its inception in September 2012. The Board discussed the reasoning for the switch from Old Mutual to MCM with representatives of WTAM, noting MCM's expertise in the emerging markets space and the potential operational risks of an additional sub-adviser in light of the planned service provider conversion from Bank of New York Mellon to State Street Bank and Trust Company. Additionally, the Board noted that the China Fund invests in Hong Kong domiciled securities, which are also held in the existing WisdomTree strategies sub-advised by MCM.

Comparative Analysis of the China Fund's Performance, Advisory Fees and Fund Expenses

The Adviser noted that while Old Mutual's sub-advisory mandate has been satisfactory, MCM has proven itself to be an effective sub-adviser, particularly in the emerging markets equity space, currently operating six of the emerging markets equity strategies in the WisdomTree suite. The Board also noted WTAM's statement that it did not intend to retain Old Mutual as a sub-adviser for future funds. The Board discussed with WTAM's representatives the MCM portfolio management personnel that would be responsible for managing the China Fund's assets. The Board noted that because of the current asset level of the funds sub-advised by MCM, the fee rate to be paid to MCM will be lower than the fee paid to Old Mutual. The Board noted that MCM's fees will be paid by WTAM (out of its fees paid by the China Fund) and not the China Fund. The Board also considered the fee to be paid to MCM in relation to the fees paid to WTAM by the China Fund and the respective services to be provided. The Board was satisfied that the retention of MCM as sub-adviser for the China Fund was proposed for reasons consistent with the best interest of the China Fund and its shareholders.

Costs of Services to be Provided, Profitability and Economies of Scale

The Board considered potential benefits to MCM from acting as sub-investment adviser to the China Fund, including the potential fall-out benefits to MCM and its affiliates (*i.e.*, ancillary benefits that may be realized by MCM and its affiliates from its role with the China Fund, such as other service contracts).

Conclusion

After consideration of the factors discussed above, the Board, including a majority of the Independent Trustees, determined that the approval of the China MCM Agreement was in the best interest of the China Fund and approved the China MCM Agreement for the China Fund.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com, or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing. There are risks associated with investing, including possible loss of principal. Past performance does not guarantee future results. Indexes are unmanaged and you cannot invest directly in an index.

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Inflation protected securities do not eliminate risks associated with inflation or deflation. Investments in currency involve additional special risks, such as credit risk and interest rate fluctuations. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effect of varied economic conditions. As these Funds can have a high concentration in some issuers the Funds can be adversely impacted by changes affecting such issuers. Due to the investment strategy of certain Funds they may make higher capital gain distributions than other ETFs. Please read the Fund s prospectus for specific details regarding the Fund s risk profile.

Item 2. Code of Ethics.

- (a) The registrant, as of the end of the period covered by this report, has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party.
- (c) There have been no amendments, during the period covered by this report, to a provision of the code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party, and that relates to any element of the code of ethics description.
- (d) The registrant has not granted any waivers, including an implicit waiver, from a provision of the code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party, that relates to one or more of the items set forth in paragraph (b) of this item's instructions.

Item 3. Audit Committee Financial Expert.

The Registrant's Board of Trustees has determined that the Registrant has one audit committee financial expert, as that term is defined under Item 3(b) and 3(c), serving on its audit committee. The audit committee financial expert serving on the Registrant's audit committee is David Chrencik, who is an independent Trustee of the Trust, as that term is defined under Item 3(a) (2).

Item 4. Principal Accountant Fees and Services.

Audit Fees

- (a) The aggregate fees billed for each of the last two fiscal years for professional services rendered by the principal accountant for the audit of the registrant's annual financial statements or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for those fiscal years are \$992,219 for 2014 and \$785,733 for 2013.

Audit-Related Fees

- (b) The aggregate fees billed in each of the last two fiscal years for assurance and related services by the principal accountant that are reasonably related to the performance of the audit of the registrant's financial statements and are not reported under paragraph (a) of this Item are \$31,500 for 2014 and \$0 for 2013.

Table of Contents

Tax Fees

- (c) The aggregate fees billed in each of the last two fiscal years for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning are \$426,680 for 2014 and \$396,220 for 2013.

All Other Fees

- (d) The aggregate fees billed in each of the last two fiscal years for products and services provided by the principal accountant, other than the services reported in paragraphs (a) through (c) of this Item are \$0 for 2014 and \$0 for 2013.
- (e)(1) Disclose the audit committee's pre-approval policies and procedures described in paragraph (c)(7) of Rule 2-01 of Regulation S-X.

Per Rule 2-01(c) (7) (A), the Registrant's audit committee charter provides that the audit committee shall select and approve in advance the retention of independent accountants to annually audit and provide their opinion on the Registrant's financial statements. The audit committee must also approve prior to appointment the engagement of the principal accountant to provide other audit services to the Registrant or to provide non-audit services to the Registrant, its investment adviser, or any entity controlling, controlled by, or under common control with its investment adviser (adviser/affiliate) that provides ongoing services to the Registrant, if the engagement by the investment adviser or adviser affiliate relates directly to the operations and financial reporting of the Registrant. The audit committee must also, prior to appointment of the engagement of the principal accountant, review and approve the fees proposed to be charged to the Registrant by the auditors for each audit and non-audit service. The audit committee must also consider whether non-audit services provided by the Registrant's principal accountant to the Registrant's investment adviser, or adviser/affiliate that provides ongoing services to the Trust are compatible with maintaining the auditor's independence.

- (f) (e)(2) The Registrant's Audit committee has approved 100% of services described in each of Items 4(b) through (d) pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X. The percentage of hours expended on the principal accountant's engagement to audit the registrant's financial statements for the most recent fiscal year that were attributed to work performed by persons other than the principal accountant's full-time, permanent employees was 0%.
- (g) The aggregate non-audit fees billed by the registrant's accountant for services rendered to the registrant, and rendered to the registrant's investment adviser (not including any sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the adviser that provides ongoing services to the registrant for each of the last two fiscal years of the registrant was \$427,180 for 2014 and \$436,220 for 2013.
- (h) Not applicable.
