Allergan, Inc. (Allergan) refers to its press release dated October 9, 2014 filed as Exhibit 99.1 on Form 8-K at: <http://www.sec.gov/Archives/edgar/data/850693/000119312514367204/d802328dex991.htm> and in particular, the following statements:

Allergan expects non-GAAP diluted EPS attributable to stockholders for the third quarter of 2014 to be between \$1.76 and \$1.78

Allergan expects product net sales for the third quarter of 2014 to increase in excess of 17 percent in dollars compared to product net sales for the third quarter of 2013

Allergan expects non-GAAP diluted EPS attributable to stockholders for full year 2014 to be between \$6.20 and \$6.25

Allergan expects product net sales for full year 2014 to increase between 14 and 15 percent in dollars compared to product net sales for full year 2013

Allergan expects non-GAAP diluted EPS attributable to stockholders for full year 2015 to be approximately \$8.60.

Allergan expects non-GAAP diluted EPS attributable to stockholders for full year 2016 to be approximately \$10.25.

Allergan notes that these EPS and sales expectations reflect current assumptions as to certain business and market conditions that are subject to change, including, but are not limited to:

Double digit revenue growth estimated by management from 2014 to 2019 driving growth in non-GAAP diluted EPS in each of those years, including 2015 and 2016;

Continued implementation of the Company's previously announced restructuring plan which it expects to yield annual pretax-savings of approximately \$475 million in 2015;

Research and development spend to be approximately 13% of product net sales, as targeted by management over the next five years, resulting in additional sales associated with that spend and improved net earnings over that period of time, including 2015 and 2016;

Selling, general and administrative expenses to be as targeted by management over the next five years, resulting in improved net earnings over that period of time, including 2015 and 2016;

Retention of intellectual property rights that are important to the anticipated sales growth across the Company's products;

Stable reimbursement of pharmaceutical and medical device products by federal and state government authorities, private health insurers and other organizations, including health maintenance and managed care organizations;

Preservation of the Company's reputation among and relationships with physicians, patients and other customers;

Absence of unanticipated increases to the Company's effective tax rate; and

Stable global economic conditions and absence of natural disasters and geo-political events that adversely affect our business in the United States or internationally.

These assumptions are subject to the limitations set forth in under "Forward-Looking Statements" below. In particular, they reflect the Allergan management's analysis of existing trends and information and represent their judgment only as of the date of the press release.

Forward-Looking Statements

This filing contains forward-looking statements. Because forecasts are inherently estimates that cannot be made with precision, Allergan's performance at times differs materially from its estimates and targets, and Allergan often does not know what the actual results will be until after the end of the applicable reporting period. Therefore, Allergan will not report or comment on its progress during a current quarter except through public announcement. Any statement made by others with respect to progress during a current quarter cannot be attributed to Allergan.

All forward-looking statements in this filing reflect Allergan's current analysis of existing trends and information and represent Allergan's judgment only as of the date of the press release. Actual results may differ materially from current

expectations based on a number of factors affecting Allergan's businesses, including, among other things, the following: changing competitive, market and regulatory conditions; Allergan's ability to obtain and maintain adequate protection for its intellectual property rights; the timing and uncertainty of the results of both the research and development and regulatory processes; domestic and foreign health care and cost containment reforms, including government pricing, tax and reimbursement policies; technological advances and patents obtained by competitors; the performance, including the approval, introduction, and consumer and physician acceptance of new products and the continuing acceptance of currently marketed products; the effectiveness of advertising and other promotional campaigns; the timely and successful implementation of strategic initiatives; the results of any pending or future litigation, investigations or claims; the uncertainty associated with the identification of and successful consummation and execution of external corporate development initiatives and strategic partnering transactions; and Allergan's ability to obtain and successfully maintain a sufficient supply of products to meet market demand in a timely manner. In addition, U.S. and international economic conditions, including higher unemployment, political instability, financial hardship, consumer confidence and debt levels, taxation, changes in interest and currency exchange rates, international relations, capital and credit availability, the status of financial markets and institutions, fluctuations or devaluations in the value of sovereign government debt, as well as the general impact of continued economic volatility, can materially affect Allergan's results. Therefore, the reader is cautioned not to rely on these forward-looking statements. Allergan expressly disclaims any intent or obligation to update these forward-looking statements except as required to do so by law.
